VOLUNTEERS NEEDED

Can you help us with some research?

We want to see how your bones in your leg influence the way you walk!

We need children with cerebral palsy to help us understand how your bone shape influence the way you walk. We want to create a better model of your bone to help your clinician in determining the best treatment for you!

Your participation will greatly assist researchers in validating their model. If you accept to participate we will take an MRI of your legs and a gait analysis session just like the one you have at the Auckland gait clinic.

If you are interested, please contact the study investigators below for more information and how to join!

Prof. Susan Stott       Dr Julie Choisne       Laura Carman
Associate Investigator  Principal Investigator  Co-Investigator
Starship Children’s Hospital  The University of Auckland  The University of Auckland
