VOLUNTEERS NEEDED
How do infants learn to walk?

You could help us learn about how an infant develops important walking skills

There is very little known about walking development during a child’s first years of life. You could help us learn more so that we can better help those who don’t achieve normal walking skills.

We will use motion analysis technology (used for animations in films) at AUT Millennium, and 3D ultrasound at Auckland Medical School to study your child’s walking.

If you are interested to participate please contact one of the study researchers:

1. Ricardo Florez
   PhD Candidate
   The University of Auckland
   Auckland Bioengineering Institute
   rflo977@aucklanduni.ac.nz

A/P Justin Fernandez
Principal Investigator
The University of Auckland
j.fernandez@auckland.ac.nz
(09) 923 9196

Approved by the University of Auckland Human Participants Ethics Committee on 12/7/19 for three years, Reference Number 023174.
