Our researchers are at the leading edge of innovation, and our international research leaders in edible (millet) power transfer, computational physiology, artificial intelligence, human-machine interfaces and earthquake disaster research and better outcomes for mothers and babies. More than 12,000 staff and postgraduate students are involved in fundamental and applied research, which generates more than $169 million in annual research revenue.

Research Excellence

As well as having more than 70 active research centers, institutes and experimental facilities, faculty attracts high-level, world-renowned, or fund-drive research teams and high-level centers of excellence. It is the largest company of its kind in New Zealand.

Centre for Innovation and Entrepreneurship (CIE)

Our work is at the heart of innovation and entrepreneurship at the University. Based at Massey University, it fosters cross-disciplinary, cross-sectorial and cross-cultural connection with commercial potential, for business partners and the region. The largest of its kind in the University.

The University of Auckland was ranked 50th in the world’s top 100 universities in the Times Higher Education World University Rankings 2018. astronaut 2018

Centre of Research Excellence

Entrepreneurial Universities

In 2018, two world leaders in Augmented Reality (AR) and Virtual Reality (VR), Professor Mark Billinghurst and Dr Charith纳亚卡卡拉, set up the University’s Entrepreneurial Universities Programme. Dr Nanayakkara bought for research from the University of Canterbury to Auckland to set up the Nanayakkara Innovation and Entrepreneurship. He brought in Michelle Liu and the Centre for Entrepreneurship and Innovation. The Centre for Entrepreneurship and Innovation is a new research initiative to support the University’s entrepreneurial culture and knowledge transfer, computational physiology, artificial intelligence, human-machine interfaces and earthquake disaster research and better outcomes for mothers and babies. More than 12,000 staff and postgraduate students are involved in fundamental and applied research, which generates more than $169 million in annual research revenue.

Leading university

The University of Auckland is New Zealand's highest-ranked, largest and most comprehensive university. It is internationally recognised as one of the world's top five emerging leaders in entrepreneurship and innovation, and is the most innovative university in New Zealand.

Young entrepreneur – Aliy Samon

Aliy is one of four founders of his start-up firm. This is an easy way to run an application that allows users to collaborate, view, edit, and manage digital documentation. Born in 1999 to Aliy and his two fellow university alumni, Kamran, he has been involved in various start-ups, with a passion for machine learning in the North American educational market. Aliy has six in-product features and advice data with AI assistance. As a result, we have identified the university's entrepreneurship challenge.

International student – Anwar Hegazy

The recipient at a New Zealand University scholarship winner is a student. Anwar Hegazy, who was studying in a New Zealand university, has a passion for the Moon’s low-latitude area. Specifically, he is also a finalist in Velocity, the University's Entrepreneurship Challenge.

Sustainable fashion

To ensure that you are contributing to a more sustainable future for the world, our University is committed to reducing its carbon footprint by 2020. This includes reducing energy use by 20%, improving water efficiency, and reducing waste.

Sporting career – Stacey Michelsen

Stacey Michelsen has been playing basketball in the United States, Canada, and Australia. She holds an Olympic silver medal and has represented New Zealand in the Commonwealth Games. She has also been a member of the New Zealand national basketball team.

Excellence in teaching

Two Auckland staff have recently been awarded the top teaching excellence awards in New Zealand. Associate Professor Christine Woods received a University Impact Teaching Excellence Award in 2018. Associate Professor Mike Atherton received a New Zealand Creating Teaching Excellence Award.

Leading university

The University of Auckland is a global leader in teaching and research. We have a large faculty of 7,000 academic staff, including 1,000 full-time researchers, and 1,000 part-time researchers. We are committed to providing a high-quality education and research experience for all students.

We conduct teaching, research, and service across a wide range of disciplines, and have two largest faculties: Arts and Social Sciences, and Business and Economics. We are a top 50 university in the world for our research and teaching. Our researchers are involved in over 2,000 collaborative projects with universities and institutions in over 60 countries.

The University of Auckland is the highest-ranked university in New Zealand and is ranked in the top 50 universities globally. We are a member of the World University Rankings and are ranked in the top 1% globally. We are also ranked in the top 50 universities globally in the QS World University Rankings, Times Higher Education World University Rankings, and the Academic Ranking of World Universities.

The University of Auckland is a member of the Worldwide Universities Network, the only New Zealand member of Universitas 21, and a founding member of the China University Network. We are also a member of the University Impact Rankings 2019, which ranks universities based on their contribution to society and sustainability.

The University of Auckland is a leader in research and innovation. We conduct world-class research across a wide range of disciplines, including the Social Sciences, Humanities, Arts, Sciences, Business, Economics, and Health Sciences. We have over 1,000 research projects underway, with a focus on addressing global challenges.

The University of Auckland is a leader in graduate employability. We have a strong record of placing our graduates in high-demand careers, with over 90% of our graduates employed within six months of graduation. We are also a leading university for graduate employability.
