Biology lies at the core of New Zealand’s economic and natural environments. The biological sciences have never been more important for preserving our economic prosperity and the natural biodiversity of our islands in the face of global threats such as climate change and population growth.

Can’t choose which subject to study?

With so many options it’s sometimes hard to choose what you want to study, but we’ve got you covered. You can study a double major with our Bachelor of Science to gain a broader base of skills and knowledge.

Complementary majors include:

- Anthropological Science
- Chemistry
- Environmental Science
- Exercise Sciences
- Psychology
- Statistics

If you’re interested in studying Biological Sciences with us, a broad background in general sciences and a solid understanding of high school biology and chemistry is a good start.
