Haere mai, welcome!

This Canvas resource enables the FoS learning & teaching community to create transformative learning experiences in science towards high quality learning environments that maximise the success for all students. Through our shared practices, resources, and experiences this Canvas hub provides practical advice on learning innovations in our faculty and the philosophies that underpin those. It is hoped to also provide a space for online sharing of professional development opportunities such as peer mentoring and workshops on learning design, discussions surrounding FoS policy and strategy development, and research into the scholarship of learning and teaching (SoTL research) in science.

Learning and teaching experiences build on the reciprocal relationship between what the teachers and the students bring to the learning situations and how new knowledge arises from that, defined as Ako in Māori culture. Ako, to teach and to learn, is a guiding principle of the TeachWell@UoA framework (Jan 2020), which was developed to support university teachers in various contexts. Therefore, this resource aligns with TeachWell@UoA across the five identified areas of teaching and learning activities:

- Whakaaroaro te akoranga - Design for learning
- Ākona, Āwhina kia ako - Teach for learning
- Whakamātautau kia whakamana - Assess for learning
- Nohupuku i te ako - Reflect on learning
- Wānanga i te ako - Contribute to learning

**Design**

Course planning: program and course outcomes, digital course outlines, policies.

**Teach**

Course delivery: student engagement strategies, interacting with students
About this Canvas resource

You can work through this hub in a logical progression via left navigation through *Modules*. Another way is to click on any of the *Tiles* above or the green *Overview of Themes* button which takes you to a sitemap with links to modules and their pages.
The aim of this resource is to have a “living” hub where people can continue to contribute. If there’s something missing, or you have something to add that you think will be helpful, or if others should be enrolled in this course and have been missed out, be sure to let us know.

- Marion Blumenstein, FoS Curriculum Development Manager  
  m.blumenstein@auckland.ac.nz (mailto:m.blumenstein@auckland.ac.nz)  or
- Andrew Luxton-Reilly, FoS Associate Dean L & T  a.luxton-reilly@auckland.ac.nz (mailto:a.luxton-reilly@auckland.ac.nz).

For University of Auckland resources on learning design, assessment and teaching go to:

- The University of Auckland Learning Design website | Ranga Auaha Ako (https://www.learningdesign.auckland.ac.nz/)  Preparing for Remote Learning at UoA (https://remotelearning.auckland.ac.nz/overview/prepare-for-teaching/)
- Canvas Guidelines for staff (https://canvas.auckland.ac.nz/courses/142).
