### GENERAL QUEEN’S UNIVERSITY INFORMATION

Grads from Queen’s Engineering program have gone on to successful careers at some of the largest global corporations and provide a powerful network of alumni contacts.

Queen’s University is consistently ranked as one of Canada’s top universities. It is among Canada’s oldest degree-granting institutions, established in 1841 by Royal Charter of Queen Victoria—26 years before Canada was founded as a country.

Today, Queen’s University community features tradition, academic excellence, research, and a beautiful waterfront campus with venerable, ivy covered, limestone buildings side by side with modern research and teaching facilities. Queen’s students come from across Canada and more than 70 countries worldwide.

Since 1894, the Faculty of Engineering and Applied Science has been providing the best engineering education Canada has to offer, preparing students for leadership in a global society with top-quality, technically rigorous engineering programs.

Queen’s Engineering admits fewer than 900 of the highest-caliber undergraduate students from Canada and abroad each year. Ninety-one per cent of Engineering’s undergraduate students complete their degrees—the highest success rate of any engineering program in Canada.

Graduates leave Queen’s with an outstanding, committed alumni network that will sustain them throughout their careers.

**Nomination/Application Information**

Partner exchange offices will be emailed a link from the Queen’s Admission office to the online application to nominate their students. After receiving the online nomination, students will be contacted at their home university address, directing them to the Queen’s exchange online application. The nomination and application portals will only be open during the submission acceptance periods.

ACADEMIC PROGRAMS IN ENGINEERING AND APPLIED SCIENCE

LEARNING EXPECTATIONS

<table>
<thead>
<tr>
<th>Language of Instruction:</th>
<th>English</th>
</tr>
</thead>
<tbody>
<tr>
<td>Course Load:</td>
<td>Exchange students are <strong>recommended</strong> to take a <strong>minimum</strong> of 15 credits (CR) per term; 30 CR for the full year. As an example, 60 ECTS credits is usually considered a full course load in most European institutions and is equivalent to 30.0 Queen’s units. Please note: Queen’s Undergraduate degree seeking Engineering students take more than 15 credits per term – course load is to be determined by the home university and visiting student, should both feel that more than 15 credits is required for their home program.</td>
</tr>
<tr>
<td>Course Weight:</td>
<td>Course weights in Engineering and Applied Science varies. 1 credit = one 50 minute lecture) and to laboratory assignments, tutorial, and significant project work (0.5 credits =one hour).</td>
</tr>
<tr>
<td>Course Types:</td>
<td>LECT – Lecture; LAB – Laboratory; TUT – Tutorial</td>

</table>
Course Choices: Most Engineering and Applied Science courses are open to exchange students provided that they have all the appropriate prerequisite courses. Please note that availability in some courses may be limited in the event that there is limited spacing and/or the course is core for degree-seeking students. *Please see the course suggestions at the end of this document.*

Examinations: Requirements vary for each course. Accommodations are available for exchange students whose first language is not English. Students will need to request for this

**Courses and Academic Advising**
The Faculty of Engineering and Applied Science offers degree programs and courses in ten disciplines. The codes for these programs and for the courses in those disciplines are given below.

Students should visit the Faculty of Engineering and Applied Science Calendar, which lists all courses offered in the last five years ([http://calendar.engineering.queensu.ca/](http://calendar.engineering.queensu.ca/)). Exchange students admitted into the Faculty of Engineering and Applied Science are eligible to take up to two courses outside of the Faculty.

For academic advice, exchange students have access to the Exchange coordinator and the Undergraduate Assistant in their host department.

**GENERAL STUDENT SERVICES**

For general information on coming to Queen’s as an Exchange student, including general information on Kingston and Queen’s University, approximate living costs, accommodations study permits, transportation, and housing, please see the following site: [http://queensu.ca/international/incoming/exchanges](http://queensu.ca/international/incoming/exchanges)

**Queen’s International Centre**

The QIUC is a support service for all members of the Queen's community and through its activities promotes an internationally informed and cross-culturally sensitive learning environment. For more information, please access their website: [http://quic.queensu.ca/](http://quic.queensu.ca/)

**The Integrated Learning Centre**

The Integrated Learning Centre (ILC) is located in Beamish-Munro Hall and is a part of the Faculty of Engineering and Applied Science. It comprises staff, spaces and equipment that contribute significantly to the quality of undergraduate education in that Faculty, and is among the leading facilities for engineering education worldwide. The fundamental role of the ILC is to create a multidisciplinary learning environment which integrates theory with practice, develops team skills, the capability of life-long learning and open-ended program solving abilities. The ILC provides both the staff and the infrastructure necessary to improve learning effectiveness and to develop markedly enhanced professional skills. Its physical features include active learning spaces, student meeting rooms, computer labs, prototyping and fabrication facilities, teleconferencing and presentation resources, and industrial space housing competitive teams such as Fuel Cell, Aero Design and Concrete Canoe teams.

**Computing Resources**

Computers in Beamish-Munro Hall are available during ILC open hours (Monday - Thursday: 7:30 am to 11 pm; Friday: 7:30 am to 5:30 pm; Saturday: 11:30 am to 7 pm; Sunday: 11:30 am to 11 pm). Software includes Solid Edge, Lab View, MATLAB, Microsoft Office, ADS, Altera Quartus, OrCAD, and others.

**Student Wellness Services (SWS)**
The Student Wellness Services department supports the personal, academic, and social development of students at Queen’s University by providing a range of programs and services appropriate to their needs. http://www.queensu.ca/studentwellness/home

The Faculty of Engineering also has an embedded counsellor available to students, in our main Student Services office.

**Student Academic Success Services (SASS)**
Learning Strategies Development is a learning support service for students. Several options are available for students to enhance both their learning and study skills and their academic confidence: on-line resources, group workshops, individual consultations, and peer mentoring. For more information about available services, please visit http://sass.queensu.ca/learningstrategies/
Incoming Exchange Student Course Selection Considerations

The Queen’s University Faculty of Engineering and Applied Science offers degree programs in ten disciplines. Students find specific courses information at the Faculty of Engineering and Applied Science Calendar, which lists all courses offered in the last five years [http://engineering.queensu.ca/Calendar/CurrentYear/](http://engineering.queensu.ca/Calendar/CurrentYear/).

Many of our core courses are only open for general enrollment after our undergraduate students have completed their enrollment selections. Project courses are often problematic for exchange students and should only be considered if the student is extremely proficient at English for report writing and presentation requirements.

Below you will find some very specific recommendations regarding some of our more popular courses.

**APSC COURSES**

**APSC 100 level courses**
First year courses are open, dependent on enrollment numbers. For the past several years, we have had full enrollment capacity in these courses, therefore they generally are not viable option for exchange students.

**APSC 200/221/293**
APSC 221 is open to exchange students who have a standard 1st year math course and English Proficiency.

APSC 200 and APSC 293 enrollment for these courses are not open to exchange students due to English proficiency requirements

**APSC 381**
Enrollment in this course will only be considered after all 3rd year Queen’s students have completed enrollment, as this course is a pre-requisite for APSC 480. Application to the Course Instructor, Professor David Strong strongd@queensu.ca and Administrator, Deborah Leach dl103@queensu.ca must include a letter of request, transcript and syllabus of course(s) similar to learning objectives from APSC 200/293. Applications must be received at least one month prior to start of course. Strong English verbal and written skills will be required for this course.

**APSC 480**
Enrollment in this course will only be considered if space is available. Please note: this is a full year course and requires students to attend BOTH semesters. Application to the Course Instructor, Professor David Strong strongd@queensu.ca must include a letter of request and...
transcript, supporting proof of a strong academic and design background. Applications must be received at least one month prior to start of course. Strong English verbal and written skills will be required for this course.

CIVL COURSES
Exchange students are not eligible to take either CIVL 200, CIVL 300, CIVL 400 or CIVL 460

CHEE/ENCH COURSES
All courses are open to exchange students, dependent upon their academic background. Queen’s enrollment may have priority, but if there is room in the class and students are eligible, they are welcome to attend. CHEE420 (lab course), CHEE421 (research project), and CHEE471 (the full year design course) are generally not recommended for exchange students.

ELEC AND CMPE COURSES
Enrollment of exchange students in the following 2nd year ELEC courses will only be considered if space is available:
ELEC 221, ELEC 224, ELEC 271, ELEC 278, ELEC 252, ELEC 274, ELEC 280, ELEC 299

Unavailable to Exchange Students:
ELEC 390 - this course prepares the student for ELEC49x, the 4th-year capstone design project course
ELEC 490/ ELEC 498 – final 4th year capstone design project course
ELEC 491/ ELEC 492 – 4+1 program project courses

Subject to Department approval:
ELEC 497 – The student registered in this course works on a research project under the supervision of ECE faculty member. The project is designed for completion in one session, with a project proposal describing the research submitted at the beginning, and a major report and presentation of the work at the end of the session.
ELEC 421, 431, 443, 444, 448, 474, 486, 483 – the department has limited lab components to accommodate a larger number of students in these courses. Enrollment into these courses will be considered only with the course instructor’s approval.
ELEC 425, ELEC 472 are reserved for ECE students only and unavailable for exchange students.

Other Important Factors to Note:
CMPE and CISC courses are offered by the School of Computing, the Arts and Science Faculty. Registration in CMPE courses is subject to available space.
Registration in CISC courses must be done through the Arts and Science Faculty, the School of Computing.

**ENPH COURSES**

The following courses are NOT available to exchange students:

ENPH 455, ENPH 456, ENPH 457

The capstone thesis project courses are not available to exchange students as we don't have enough supervisors to offer one-on-one supervision to students from other universities.

**GEOE COURSES**

All courses are open to exchange students, dependent upon their academic background. Queen's enrollment may have priority, but if there is room in the class and students are eligible, they are welcome to attend.

**MECH COURSES**

*The courses with the MECH prefix that are typically not suitable for most exchange student’s follow.* (Note that some courses are core to our program, others are technical electives, as noted):

**MECH 213** – Not available due to resources and machine shop space, and this course is core to all of our 2nd year enrolled MECH students.

**MECH 230** – Only available if the 2nd year enrolment allows as this course is core to all of our 2nd year enrolled students along with that of other programs in engineering.

**MECH 273** – Lack of laboratory resources, and this course is core to all of our 2nd year enrolled students.

**MECH 323** – Lack of project resources, and this course is core to all of our 3rd year enrolled students.

**MECH 361** – Not a suitable course as it is only available to Queen’s students who are actively involved and participating in one of our student teams, i.e. Queen’s Formula, Mini Baja, etc.

**MECH 396** – Only available if students take MECH 370 at the same time as a co-requisite.

**MECH 397** – Only available if students take MECH 371 at the same time as a co-requisite.

**MECH 452** – Students must email and receive permission of the course instructor, as it is up to the instructor as to whether they are put into the course or not. Important to note that enrolment is very limited.

**MECH 460** – Lack of project resources meaning this is typically not a suitable course for exchange students. This is the final year project course for all of our 4th year MECH students.
MECH 462 – Typically not a suitable course as it requires the pre-requisite of a course typically not available, MECH 460 (above).

MECH 463 – This is actually not a course. This is solely a mark/completion holder for summer research students visiting the department sponsored by an MME faculty member in collaboration with their homeschool research supervisor. Typically not available to exchange students.

MECH 464 – Typically not a suitable course. It is the co-requisite course that must be taken with a course not available, MECH 460 (above).

MECH 465 – Students must email and receive permission from the course instructor. It is up to the instructor as to whether they are put into the course, or not, as it is by application.

Other Important Factors to Note:

- Students must ensure they use the up-to-date course listings from the new academic course calendar for the year of their exchange. Course offerings vary from year to year.
- Students must ensure they have the necessary pre-requisite background material previously covered to be successful in the Queen’s course(s) they are registered or plan to take. (The best way to do this is to briefly meet with the course instructor on arrival to be sure. Note that students have the first two weeks of term to add/change their courses).
- When viewing courses in the academic course calendar it is important to understand the details in the listing, for example:

**MECH 448 Compressible Fluid Flow F 3.5**

This course is offered in the Fall term only, W means Winter term only, FW means Fall and Winter and F/W means Fall or Winter.

**MINE COURSES**

Most course are open to Exchange students, if they have the necessary pre-requisite knowledge. It is often best to speak directly to the instructor to obtain final approval.

**The courses with the MINE prefix that are not suitable for most exchange students are:**

**MINE 445** – Not a suitable course as it is the final-year project course for all final year mine-mine students and most exchange students will not have the necessary design software experience to complete this course.

**MINE 471** – Not a suitable course as it is the final-year project course for all final year mine-mech students and most exchange students will not have the necessary mechanical engineering background to complete this course.

**MINE 448** – Not a suitable course as it is the final-year project course for all final year mine-mine students as few exchange students will have all the pre-requisites.
MTHE COURSES

Most courses are open to Exchange students if they have the pre-requisites. It is often best to speak directly to the instructor to obtain final approval. Exchange students are not eligible to take MTHE 493 and MTHE 494.
