

Joint Graduate School in Biodiversity and Biosecurity

Student Seminar Day

Tāmaki Campus Lecture theatre 733.201

Friday September 7th 2012

Entertaining informative talks, networking and drinks.

It's research worth spreading, so where will you be?

PROGRAMME

Welcome	
12:50	Beggs, J: Welcome to the Joint Graduate School Student Seminar Day
Session One	
1:00	Damken, C: "The year is 2011 AD. Galls are entirely occupied by the Herbivores. Well, not entirely..." About insects in a fragmented landscape.
1:15	Nowland-Walker, E: The saproxylic invertebrates associated with decaying kauri (<i>Agathis australis</i>) fine woody debris
1:30	Gardiner, C: Trap morphology in aquatic bladderworts
1:45	Myers, S: Clasper morphology differences and behavioural isolation across a Phasmid hybrid zone
2:00	Bennik, R: Genital evolution: sexual conflict in the lichen tuft moths
2:15	Dale, E: Growing with guano: the ecology of Cook's scurvy grass, a seabird-associated species
2:30	Cummings, G: Aspects of the short-tailed bat (<i>Mystacina tuberculata</i>)— <i>Dactylanthus taylorii</i> pollination relationship
2:45-3:15 – Afternoon Tea	
Session Two	
3:15	Galbraith, J: Bird feeding in urban Auckland: quantifying the ecological effects of a common human activity
3:30	Kannemeyer, R: 1080: Love it or hate it everyone has an opinion, but what informs that opinion?
3:45	Nathan, H: Improving detection probabilities for ship rat management
4:00	Samaniego, A: Invasive rodents on tropical islands: ecology and eradication confirmation
4:15	Nathan, E: Mammalian predator pest management: effectiveness and extent
4:30	Garvey, P: Behavioural reactions of wild-captured stoats to larger sympatric competitors
4:45 Onwards – Drinks and nibbles
