Welcome to The University of Auckland. This Calendar is our official publication including academic statutes and regulations governing admission, enrolment, fees and examinations. The Calendar sets out degree, diploma, certificate requirements and courses. It also provides key information about the University and its staff.

The Academic Year
The academic year at The University of Auckland is divided into two semesters. Each semester covers a period of about 15 weeks comprising approximately 12 teaching weeks followed by three weeks for study and examination. The first semester starts at the beginning of March and the second semester in mid-July. Each semester has a mid-semester break which lasts for one to two weeks. During the three weeks after the end of lectures, there is a period of study followed by the examinations for the courses studied during that semester. There is a three-week inter-semester break during which results will be published and any further admissions and enrolments processed. At the end of the second semester there is a 13-week break. A small number of specialist courses may be taught during the inter-semester break. A Summer School comprising six weeks operates from the beginning of January. A limited number of courses are available.

The Points System
The value allocated to each course is standardised and is given as a number of points, each degree, diploma or certificate being made up of a specified number of points. Most courses are offered in values of 10, 15, 20 and 30 points. For instance, the programme for many bachelors degrees requires the completion of a total of 360 points and most masters degrees require 120 points. The points value for diplomas and certificates varies according to the discipline and content and full details are listed in the regulations.

Planning a Programme
Students planning a programme are advised to consult faculty and departmental handbooks and seek advice about programmes and course options through the faculty offices and student centres. Intending students should phone 0800 61 62 63 or visit www.auckland.ac.nz for general advice and for information on how to access more specific course advice from faculties. This Calendar contains the regulations and requirements for each faculty’s degrees, diplomas and certificates. It is important that students read the regulations for the programme they plan to take and ensure that they complete the prerequisites required for subsequent study. The details for each course are listed by faculty and in alphanumeric order in the Course Prescriptions. In addition, there is a range of Interfaculty and Conjoint degrees which are administered and supervised across the faculties. Assistance with programme planning is available online through the My Programme Requirements report. This report outlines the academic requirements for a programme of study and provides an individualised report comparing a student’s progress towards completion against the requirements. It indicates where requirements have been met, which requirements have yet to be completed and the points required. Students are able to enrol directly from the report into courses available for the programme.

Admission and Enrolment
The University of Auckland has an online system for admission and enrolment. All new students, and those not enrolled in 2012, who are intending to study at the University in 2013, should complete the online Application for Admission (www.auckland.ac.nz/apply_now). Doctoral students should first complete the Expression of Interest online. If students do not have access to online facilities, Application for Admission forms are available by phone, by mail or in person from: ClockTower Student Information Centre, The University of Auckland, 22 Princes St, Private Bag 92019, Auckland 1142, New Zealand, email studentinfo@auckland.ac.nz, phone 0800 61 62 63.

Students continuing study in a programme commenced before 2006 should refer to the Transition Regulations Handbook, available at www.auckland.ac.nz/transitionregulations and are encouraged to seek enrolment advice from faculty student centres or from the ClockTower Student Information Centre.

Official Communications to Students
Electronic Mail is an official and the primary means of communication with students. All official email to a student will be sent to a student’s current University email address (netid@aucklanduni.ac.nz). If the student wishes to forward messages to other addresses it is their responsibility to ensure the alternative address is in place and operating correctly. Failure to read an email does not free students from their responsibilities to understand and comply with the University’s requirements.
Heraldic Description
Azure between three Mullets Argent an open Book proper edged and bound Or with seven clasps on either side Gold on a Chief wavy also Argent three Kiwis proper. On a scroll set below the Arms appear the words ‘Ingenio et Labore’.

Symbolism
The open book together with the motto ‘Ingenio et Labore’, freely translated as ‘by natural ability and hard work’, indicate in a general way the aim of the institution, and combined with the three stars express the idea of learning pursued under the sky of the Southern Hemisphere. The kiwis are indicative of New Zealand as the bird is absolutely confined to its islands and the silver wavy chief upon which they are set directs attention to the fact that Auckland is on the sea coast.

The shield, minus the ribbon containing the Latin motto (called the Crest), is used in combination with the logotype ‘The University of Auckland’ and bar elements to form the University Logo. Guidelines for the Logo are prescribed in the University’s Style Guide.

History of The University of Auckland
As early as 1862 an unknown writer, ‘J.G.’, proposed in Chapman’s New Zealand Monthly Magazine that a university should be established in Auckland. The pioneer town, founded less than a quarter of a century before, had other, more pressing issues, and initially there was no response to the suggestion. Consequently the first university, created in 1869, was in the South Island, where the inhabitants were wealthier and keener on education. In 1870, Parliament passed legislation to create the University of New Zealand as an examining body with affiliated teaching colleges. An Auckland politician, later Speaker of the House of Representatives, Maurice O’Rorke, advocated that the University be located in Auckland but it was established as a federal body with no fixed location. Canterbury, which had been planning to create a university, became the first place to open a College of the new federal University in 1873.

The citizens of Auckland at first provided university instruction at the Auckland Grammar School. Students sat the examinations of the University of New Zealand. One of these students, Kate Edger, in 1877 became the first woman to graduate BA from a British university.

In 1878, O’Rorke chaired a Royal Commission on higher education that recommended the establishment of university colleges in Auckland and Wellington. In 1882, the Auckland University College was set up by Act of Parliament and was formally opened on 21 May 1883 in the Choral Hall, then the largest hall in Auckland. The Governor, Sir William Jervois, announced that the College was to be a thoroughly democratic institution, open to all, women as well as men, and to all classes.

The applicants for the first four chairs, of Classics and English, Mathematics, Natural Science, and Chemistry and Physics, were interviewed in England by the New Zealand Agent-General and some of the most famous scientists and scholars of the day, including the great Benjamin Jowett of Balliol College, Vice-Chancellor of Oxford University. The men appointed were an impressive group. The chemist, F. D. Brown, had studied in France and Leipzig as well as London, and taught at Oxford and London. He had published a dozen papers. Algernon Phillips Thomas, the biologist, was a Balliol man who had revealed the life history of the liver fluke. The classicist, T. G. Tucker, was to become a famous scholar. When he left to go to Melbourne University in 1885, he was succeeded by Hutcheson Macaulay Posnett, an Irishman who had written several books, including one on comparative literature, what would now be called the sociology of literature, a subject which he is credited with inventing. The first professor of Mathematics, George Walker, was drowned shortly after he reached Auckland and was succeeded by W. S. Aldis, who had been the top scholar in his subject at Cambridge and was the author of several mathematical books.

When O’Rorke first tried to secure a university for Auckland he suggested housing it in Government House, left empty when the Governor moved with the capital to Wellington in 1865. This immediately aroused opposition in the press, for many Aucklanders hoped that the capital – and the Governor – would eventually return to Auckland. These conflicting ambitions lay at the basis of a recurrent feature of the history of the College, the great ‘site row’, with the College trying to get at least part of the grounds of Government House while some influential citizens
strongly opposed it. One result was that for years
the College had no permanent site or permanent
buildings. Teaching started in the disused District
Court House, expanded into Admiralty House and,
in 1890, into the original Parliament Building. In
1907, the Choral Hall was purchased and, in 1917,
the College occupied the building vacated by the
Grammar School. In 1926 the College acquired
its first permanent building, now The ClockTower
Building, in Princes Street.

The College was poor: its statutory grant was for
many years only £4,000 a year, while land reserves,
set aside by government to provide an income,
brought in very little. There were few students: 95
in 1883, 156 by 1901. Some had not passed the
matriculation examination and were not studying
for degrees. Most of them were part-time, trainee
teachers and law clerks, music students from 1888
onwards, commerce students by 1905. The College
was dominated by the lay members of Council,
especially by Sir Maurice O’Rorke, who was an
autocratic chairman from 1883 to 1916.

The early College struggled to keep its small staff –
some left for positions in Australia and elsewhere.
Most of the remainder grew increasingly out-of-date
in their subjects. There was no system of sabbatical
or study leave until the 1920s. The teachers’ role was
to hand on traditional knowledge. The staff lectured
for very long hours, and in general, the students were
given a good, traditional undergraduate education.
Research was not expected and was rarely done. In
some subjects research was impossible. For instance,
the Library took no mathematical journals, so the
mathematicians knew little about recent work. Some
students, however, started to carry out good research,
notably in Chemistry.

In the 1920s and well into the 1930s the College
was ruled by a Registrar, Rocke O’Shea, and a new
Chairman of the Council (President after 1924),
another former Cabinet Minister, Sir George Fowlds.
Under their leadership the University started to
change. The first New Zealand graduates with
postgraduate education abroad were appointed to the
staff, notably the very able economist, Horace
Belshaw, the philosopher, R. P. Anschrift, and the
physicist, P. W. Burbidge. An excellent researcher, W.
F. Short, was appointed as a lecturer in Chemistry.

Some advances were made in providing professional
education. The only such education offered at the
College was in Law, which attracted large numbers of
students. The only ‘professional schools’ recognised
by the University of New Zealand were Medicine
at Otago and Engineering at Canterbury. In 1906,
the College established a School of Mining, which
slowly and covertly was turned into a ‘School of
Engineering’. After fierce battles with Canterbury,
fiend by provincial rivalry, the Auckland School
received University recognition for its teaching in
the first two professional years. Students then had
to go to Canterbury to complete the final year of
their degree. In 1917, the College began instruction
in architecture.

During the depression of the early 1930s the College
experienced its first dispute over academic freedom.
The temporary appointment of a lecturer in History,
J. C. Beaglehole, later a world famous scholar, was
terminated, his friends believed, because of a letter
to a newspaper, defending the right of communists
to distribute their literature. This episode led to a
Council election in which the liberal, Hollis Cocker,
defeated a conservative candidate. The College Council
then adopted resolutions in favour of academic
freedom and received the undeserved congratulations
of the flower of the British academic establishment,
including Lord Rutherford and Wittgenstein. At
the same time the College enrolled a lively group of
students led by James Bertram, who established a
new literary journal, Phoenix. This journal was the
focus for the first literary movement in New Zealand
history: Allen Curnow, A. R. D. Fairburn, R. A. K.
Mason and other writers, later distinguished, wrote
for it.

The College received a great intellectual stimulus in
1934 when four new professors arrived: H. G. Forder,
a very able mathematician, Arthur Sewell, a brilliant
lecturer in English, a classicist, C. G. Cooper, and a
new historian, James Rutherford.

The College gained its first academic leader in the
1950s, when the Council appointed a Principal
(later Vice-Chancellor) K. J. Maidment, a Classics
don from Merton College, Oxford. He came in 1950
and remained for two decades. Maidment faced a
further, fierce ‘site row’. The Council wanted to move
the College to a larger site out of town. Instead, in
1956, the National Government offered Government
House as compensation for staying in Princes Street.
Another citizens’ ‘save Government House’ campaign
followed. Both academic staff and the public were
deply divided over the issue, which was resolved
in 1960: the University was to stay where it was. In
1957 the slow move towards autonomy was marked
by legislation which changed the title of the College to
the University of Auckland while leaving the functions
and powers of the University of New Zealand intact.

The ‘site row’ held up the building programme for
about six years, while student rolls rose rapidly,
to 4,000 by 1959, with the result that there was
overcrowding in quite inadequate buildings.
Universities everywhere were expanding rapidly.
New Zealand academic salaries could not compete
with those of overseas universities and many able
Auckland staff left for positions in Australian and
other universities. Despite these problems, there was
significant progress. New subjects were introduced:
Geography, Anthropology, Māori Studies, Fine Arts.
There was a new emphasis on staff research. Many of
the new and younger academics became very active
researchers, reflected in the growing lists of staff
publications.

In the 1960s, the Report of the Hughes Parry
Committee led to major improvements in University
conditions and governance. Staff salaries were raised.
For the first time the students were given fairly
generous bursaries, which led to a rapid increase in
the proportion of full-time students. The government grant to the University rose rapidly. In 1962, the University at last became independent when the University of New Zealand was abolished.

There was a massive university building programme, and over the next two decades the campus was transformed as one large building after another was erected: Fine Arts, Science, Engineering buildings, a Student Union, a new Library. A number of new subjects were introduced, including Political Studies, Art History, and Sociology. In 1968, teaching commenced in the new Medical School on the Grafton Campus. By the end of the 1960s Auckland had the largest University Library in the country.

When Dr Maidment departed in 1970, there were 9,300 students. His successor, Dr Colin Maiden, was an Auckland engineer who had headed a research division of General Motors in Michigan. One of the first things that struck him in Auckland was the need for better student facilities. He pushed ahead to provide a theatre, a splendid gymnasium and recreation centre, and a large playing field ‘complex’. The entire administrative organisation, from faculties and committees to deputy vice-chancellors, was reformed. The academic boom of the 1960s continued well into the 1970s and several new buildings, like Human Sciences, were constructed and new subjects, like Management Studies and Computer Science, were introduced.

The 1970s brought numerous social changes: an increase in the proportion of Māori and Pacific students and in the proportion of women and older students. In 1975 and 1981 the first two women professors were appointed, Marie Clay and Patricia Bergquist. At a time of high inflation, the government grant to the University rose rapidly, to $895.2 million by 1989. In 1983 the University celebrated its centennial. Although there was a certain economic austerity, after a century of growth the University had established itself strongly within its own community and nationally.

There were still to be challenges. The wide-ranging restructuring of education undertaken by the Labour government after 1984 encompassed the universities, and their autonomy and their identity were seen to be threatened. As a result of efforts by the universities, supported by alumni, some changes were secured in the Education Amendment Acts of 1989 and 1990, but the University Grants Committee was abolished, the Ministry of Education became responsible for tertiary education policy, and the composition of the Council was altered. At the turn of the century, the government took another look at the whole range of tertiary education with the Tertiary Education Advisory Commission, out of which came the Tertiary Education Commission as the funder of tertiary education.

Anxious to respond to the growing demand for university education in the early 1990s, the University offered courses at other tertiary institutions in Auckland and Northland. Acquiring buildings used for the 1990 Commonwealth Games village, it began to develop a campus at Tamaki, initially offering courses in Commerce. Increasing student enrolments obliged it, like other universities, to introduce quotas for all first-year courses in 1992, breaking the historic policy of ‘open entry’.

The Tamaki Innovation Campus is now developing into a research-led campus with links to industry and a focus on postgraduate studies. Academic departments at Tamaki specialise in the areas of population health, biodiversity and biosecurity, information technology, psychology and speech science, materials and manufacturing, and sport and exercise science.

From the mid-1990s, the University introduced semesters, launched its first major fund-raising appeal, produced its first strategic plan and inaugurated a Summer School. It joined Universitas 21, an international network of research-intensive universities in Australasia, Asia, North America and Europe, as a foundation member. In the late 1990s, the School of Medicine expanded to become a Faculty of Medical and Health Sciences, introducing degrees in Nursing, Health Sciences, and Pharmacy.

The third Vice-Chancellor, Professor Kit Carson, served from 1995 to 1998 and was followed by Dr John Hood in 1999. Dr Hood was an alumnus of the University, a former Rhodes Scholar, and business leader. He faced a difficult financial situation as governments had progressively reduced tuition subsidies per student, and the University needed to re-activate its building programme. The last period of intensive construction had ended with completion of the new School of Music in 1986 and the Marae complex in 1988. The Law School had moved into refurbished premises in a new precinct to the north of Waterloo Quadrant in 1992. However, the University was growing very rapidly indeed, with increasing numbers of international students in addition to growing numbers of domestic students, who could now borrow to fund their tuition and other costs. This growth reached a peak in 2004 and then started to slow. In 2008 the government decided to cap the number of tertiary students it would fund and the University had to extend limits on admission from a few professional qualifications to all of its undergraduate degrees. In 2010, the student roll was 40,997 or 32,654 equivalent full-time students.

From the 1990s, research became very much more important in the life of the University and its academics. The country started to look more than ever before to universities to generate new ideas and knowledge, including innovations that might be harnessed for economic development. The University had already founded UniServices as an organisation to develop and commercialise research. In the early 2000s it became host to four of eight national Centres of Research Excellence funded by the government. In 2004 it was designated the country’s leading research university ‘on virtually any measure’ in the Performance Based Research Fund assessment carried out by the recently-created Tertiary Education...
Commission. In the PBRF assessment released in 2007, the University of Auckland again emerged as the New Zealand university with the greatest overall strength. International ranking systems started to become important to university reputations and placed great significance on research performance. The University was consistently placed first among New Zealand universities, although its actual placement varied from year to year and among the ranking systems.

Between 2000 and 2007 the University embarked on another major building programme. The impressive Kate Edger Information Commons and Student Commons, the Engineering Atrium and greatly expanded library wing, and a seven-floor extension to the Science Centre which houses Computer Science and Software Engineering enhanced the City Campus. At Tamaki a new building was constructed for the new School of Population Health. A Fale Pasifika opened in 2004 and the Owen G Glenn Building, a large and striking new complex for the Business School, was completed in 2007.

Organisational change saw Architecture, Dance Studies, Fine and Visual Arts, Music, and Planning combine to form the National Institute of Creative Arts and Industries. The University of Auckland and the Auckland College of Education amalgamated in September 2004 to form a Faculty of Education. The new faculty, based primarily at the College’s campus in Epsom, was established with the aim of becoming New Zealand’s leading provider of teacher and social services education.

Dr John Hood left the University in mid-2004 to take up the position of Vice-Chancellor of the University of Oxford. Professor Stuart McCutcheon, formerly Vice-Chancellor at Victoria University of Wellington, succeeded him as Vice-Chancellor in January 2005. Under his leadership a new strategic plan set a goal to make Auckland a world-class university in New Zealand. This Plan envisaged the development of a University focussed on excellent undergraduate teaching and learning, dynamic and challenging postgraduate education, and research that contributes to international knowledge, understanding and economic and social development. The University also recognised that it must play a role in addressing inequities in educational participation and achievement by Māori and Pacific students and placed an emphasis on enhancing its recruitment and support programmes for potential students.

In 2009 the University adopted a Campus Development Strategy that proposed a major investment in infrastructure over the next decade. Major projects include the redevelopment of the Grafton Campus to refurbish laboratories, upgrade plant and construction of a new building; a student accommodation building at Elam, completed in 2011, to house 442 students; the refurbishment of Arts and Science Buildings. The new South Pacific Centre for Marine Science, based at the Leigh Marine Laboratory, fosters marine research and educates visitors on the marine environment.

A major development of the Maths and Physics buildings was completed in 2011 and design work for major extensions to the Chemistry and Engineering buildings continues.

The University has become increasingly dependent on its own ability to raise the funds it requires to operate. Student tuition fees, including the fees of international students, are now an important part of University income, alongside the tuition subsidies contributed by government. Income from research is substantial. Philanthropic donations have also become a very important way in which friends of the University show their support for its activities, for the staff and the students. The University has come a long way from the early fund raising appeal of the 1990s. A ‘Leading the way’ fundraising campaign, to run from 2009 to 2012, exceeded its target of $150 million in 2011.

The University

The University now has five campuses with eight faculties representing each of its main disciplines: Arts; Business and Economics; Creative Arts and Industries; Education; Engineering; Law; Medical and Health Sciences; and Science. It also has two large-scale research institutes: the Auckland Bioengineering Institute and the Liggins Institute.

Many courses and research activities reflect Auckland’s and New Zealand’s place in the world. Pacific archaeology, ethnohistory and languages, for example, are stressed in the Anthropology Department. Geographers carry out fieldwork in the Pacific Islands while University scientists make frequent study trips to the Antarctic. Asian languages, including Chinese, Japanese and Korean, are taught and Pacific Island languages were introduced in 1991. A wide range of issues relevant to New Zealand society are addressed in subjects as diverse as Sociology, Education, Social Work, Medicine, Engineering and Architecture. The Geothermal Institute is one of four international centres which provide training in Geothermal Technology.

The University of Auckland recognises research and research-led teaching as a primary responsibility of its academic staff. High quality research on a large scale and across the full range of disciplines represented by faculties and Large Scale Research Institutes is essential to ensure the place of The University of Auckland among the leading international research universities. University researchers contribute to the growth of new knowledge by conducting fundamental research across a wide range of fields in the natural, human and social sciences, the humanities and creative arts. The University fosters the commercialisation of its research to assist in the pursuit of the country’s economic objectives and applies it so as to enhance social values and advance the wellbeing of all New Zealanders. Research underpins the University’s obligation to act as a critic and conscience of society.

As the leading research University in New Zealand, The University of Auckland is committed to the quality and excellence of its degree courses including its
postgraduate and doctoral programmes. Approximately 8,000 students are enrolled in postgraduate studies, 1700 of these in doctoral programmes.

Structure of the University

The Council
The University’s governing body is the Council, a mixture of elected staff, students and graduates, and outside appointees. The Vice-Chancellor, the University’s chief academic and administrative officer, is also a member. Council is chaired by the Chancellor who is a lay member of the Council.

The Senate
On academic matters, Council is bound to consult the Senate which the Vice-Chancellor chairs. This body includes all the professors, some non-professorial staff and student representatives. The Senate takes advice from the Education and Research Committees, and from specialist committees, dealing for example with the Library, Information Technology, and the Faculties.

The Faculties
Each faculty is a sub-committee of Senate and is headed by a Dean who is usually supported by Associate Deans, a Faculty Registrar and other administrative staff. The Dean is responsible for coordinating the academic and research activities of individual departments and liaises with both the Office of the Vice-Chancellor and the Senate committees on regulations, staff appointments, buildings, research funding, library facilities, timetabling etc. The faculty student centres provide assistance to students who are encouraged to contact the relevant staff for information and advice. Information is available on faculty websites; handbooks are available from both faculty and departmental offices.

Large-Scale Research Institutes
Each large-scale research institute (LRSI) is headed by a Director, supported by a Deputy Director and administrative staff. The Director is responsible for coordinating the research activities of LRSI staff, including postgraduate research supervision, and liaises with both the Office of the Vice-Chancellor and the Senate committees on regulations, staff appointments, buildings, research funding, library facilities etc. Information is available on LRSI websites.

Central Administration and Services
Day-to-day central administration and service provision is performed by the Vice-Chancellor’s Office and Academic Services, Alumni Relations and Development, Campus Life, Communications, Equity Office, Financial Services, Human Resources, International Office, IT Services, Property Services, Research Office, School of Graduate Studies, Schools Partnership Office, Student Information and Marketing Services and University Library.

The City Campus
The City Campus, established in 1883, is in the heart of Auckland City. Separated from the tower blocks of the central business district by historic Albert Park on its western flank, the Campus covers over 20 hectares. To the southeast lie the trees and open spaces of the Auckland Domain. Its proximity to the cultural and commercial amenities of the country’s largest city, attractive green setting and harbour views bestows advantages enjoyed by few inner city campuses anywhere.

The City Campus has undergone major development during its existence with many refurbished and new building works. No major building projects were completed in the last year, other than the refurbishment of several floors of Science Building 303.

Planning continues for major extensions to the Engineering and Science buildings.

The Tāmaki Innovation Campus
The University of Auckland Tāmaki Innovation Campus specialises in postgraduate and research activity, and is located on a 32-hectare site in St Johns, nine kilometres from the City Campus.

The vision for the Tāmaki Innovation Campus is based around three interlinking strategies which, in turn, are aligned with the University Strategic Plan. The strategies are research and teaching, innovation and wealth creation, and community engagement. Each strategy relates closely (but not exclusively) to a specific group of internal and external stakeholders as well as to the overall Strategic Plan of The University of Auckland.

The vision includes the development of Tāmaki as an integrated campus enabling research organisations and businesses to partner with the University. This concept recognises the significant opportunities that partnership delivers for creating wealth from knowledge. For students, this development provides practical examples of problem solving in a commercial environment, work opportunities, and an insight into the business ethos of our innovation partners.

The Tāmaki Innovation Campus is developed along three major themes:
• Health Innovation (Faculties of Medical and Health Sciences, Science, and Education)
• Materials Innovation (Faculties of Engineering and Science)
• Biodiversity and Biosecurity Innovation (Faculty of Science)

The Health Innovation theme focuses on population and community health in Auckland and New Zealand, and with its strong international connections leads the world in many areas. Groups included in this theme are Counsellor Education, Psychology, National Institute of Health Innovation, School of Population Health, Simulation Centre for Patient Safety, Sport and Exercise Science, and The University of Auckland Clinics. Many postgraduate programmes are offered within this theme in addition to the undergraduate Bachelor of Health Sciences, Bachelor of Sport and Exercise Science, and Certificate in Health Sciences.
The Materials Innovation theme focuses on research and postgraduate teaching, with particular emphasis on collaborations with industry and commercialisation resulting in leading-edge technologies in manufacturing. The theme includes the Centre for Advanced Composite Materials, Hybrid Plastics, Materials Accelerator, and Plastics Centre of Excellence.

The Biodiversity and Biosecurity theme focuses on New Zealand’s unique flora and fauna, with an emphasis on developing biodiversity expertise, conservation, and the prevention of major threats to native biodiversity by introduced species. The School of Biological Sciences and the School of Environment form the academic core for the theme, working in close collaboration with groups such as the Centre for Biodiversity and Biosecurity, Joint Graduate School in Biodiversity and Biosecurity, Landcare Research, Ministry of Primary Industries, and Pacific Invasives Initiative.

Tāmaki is also home to The University of Auckland Clinics providing services in audiology, brain recovery, cardiac and exercise rehabilitation, health and performance, optometry, psychology, and speech language therapy to staff, students and the community.

The Grafton Campus

Located opposite Auckland City Hospital and the entrance to the Domain, the Grafton Campus covers a 2.2 hectare site on Park Road, Grafton. Originally established for the School of Medicine in 1968, the site was recognised as a separate campus in 1995 and in 2008 was formally designated as the Grafton Campus.

Home to the Faculty of Medical and Health Sciences and the Liggins Institute, the Campus has recently benefited from an extensive programme of work to transform it into a modern biomedical and health education and training facility. The redeveloped Campus accommodates recently refurbished student and staff facilities including an information commons, café, common room, study space, Health Centre, and Student Centre, and a specialist medical library, the Philson. The redevelopment has also resulted in new modern laboratories and research accommodation, a new Clinical Skills Centre, and Eye Clinic, a new Pharmacy teaching suite, and a major upgrade of the central plant and infrastructure.

The Campus houses a number of significant research facilities, including the Centre for Brain Research, a state-of-the-art Biomedical Imaging Research Unit, the Centre for Advanced MRI, the Neurological Foundation Human Brain Bank, a GLP Laboratory (AnQual Laboratories), sophisticated data acquisition and analysis facilities, a DNA sequencing facility and the Auckland Medical Research Foundation Medical Sciences Learning Centre which provides teaching in anatomy, radiology, pathology, and clinical skills in a modern purpose built facility.

The Faculty maintains the Auckland Hospital Academic Centre in the Auckland City Hospital Support Building, and has a presence at Middlemore, North Shore, Rotorua, Tauranga, Waitakere, Whakatane and Whangarei Hospitals.

The Epsom Campus

The Epsom Campus was established in 1926 as the site of the Auckland College of Education, formerly known as the Auckland Teachers’ College and the Auckland Teachers’ Training College (established 1881). Upon the amalgamation of the Auckland College of Education and The University of Auckland in 2004, the Epsom Campus became the primary site for the new Faculty of Education. The 11.5 hectare campus on Epsom Avenue is approximately four kilometres from the City campus and three kilometres from the Grafton Campus. It is flanked by the Mt Eden Village to the west, Maungawhau (Mt Eden) Domain to the north, and directly adjoins Auckland Normal Intermediate and Kohia Schools and Melville Park to the south and south-east. The campus is well sited for major transport routes. Established trees and gardens complement diverse facilities including pool, gymnasium, café, marae, tennis courts, health and counselling centre and early childhood centres to make this an attractive study location.

The Epsom Campus also houses Team Solutions, the Kohia Education Centre and retail outlet, The University of Auckland Centre for Educational Leadership, the Woolf Fisher Research Centre, the Starpath project and the Sylvia Ashton-Warner Library. These facilities are a drawcard for practising professionals.

The Tai Tokerau Campus

The Tai Tokerau campus in Whangarei was established by the Auckland College of Education in 1992. Centrally located in Alexander St, opposite Forum North, the campus offers lecture rooms, student centre, library and a base for a range of Faculty of Education programmes and staff. The Tai Tokerau campus also provides a base for a wider presence of The University of Auckland in the North.

The University of Auckland Foundation

The University of Auckland Foundation, incorporated under the Charitable Trusts Act, and registered under the Charities Act, is the principal single Foundation for The University of Auckland. It has an independent Board of Trustees responsible for the stewardship, management and appropriate distribution of philanthropic funds, including bequests. Donations can be made for specific purposes, either as an endowment or as an amount that can be used for a specific period of time. Support is generally for six key purposes:

- Student scholarships and prizes recognising academic excellence and financial hardship
- Academic positions
• Research
• Facilities and equipment
• Visiting and travelling awards (international exchanges)
• Capital works.

In total there are four bodies which have registered charitable status in their jurisdictions. This allows for donors who are registered for tax purposes in these countries to take advantage of the tax deductibility available when making a gift. The four Trusts are:

1. The University of Auckland Foundation Inc. (established in 2002) and based in Auckland.
2. The School of Medicine Foundation (established in 1995) and based in Auckland primarily for the benefit of the Faculty of Medical and Health Sciences.
3. The Friends of The University of Auckland (established in 2000) and based in the United States.
4. The UK Friends of The University of Auckland (established in 2001) and based in the United Kingdom.

In addition, The University of Auckland itself has attained (2006) charitable status in Canada.

The University of Auckland name/logo can only be cited for philanthropic purposes with the consent of the University Council.

The Hood Fund, established to mark the contributions of former Vice-Chancellor John Hood to the University, is administered by The University of Auckland Foundation, together with funds established to mark the Centenary of the University, to further international exchange of knowledge and experience and academic excellence.

Interest in The University of Auckland Foundation and Hood Fund should be directed to the University Registrar or to the Office of Alumni Relations and Development.

Information on making a donation, including a bequest to any of the four Trusts above should be directed in the first instance to the Foundation Manager, the Office of Alumni Relations and Development.

### Alumni Relations

The University’s alumni, now numbering more than 155,000, form an influential community of graduates both in New Zealand and overseas. As members of the Court of Convocation they are eligible to vote for graduate representatives on the University Council.

They are entitled to a wide range of benefits including *Ingenio*, the twice-yearly alumni magazine and a monthly email newsletter @auckland. The Alumni Relations Office organises regular local, national and international events for them.

The University of Auckland Society offers alumni, friends and supporters of the University the chance to engage more closely with the university community. Members receive a range of discounts and benefits including invitations to events and activities based on their interests. For more information visit www.society.auckland.ac.nz

The Alumni Relations Office is based in University House, 19A Princes Street. Further information can be found at www.alumni.auckland.ac.nz

### Auckland UniServices Ltd

Auckland UniServices Ltd is a wholly owned company of The University of Auckland. As a not for profit company, UniServices generates half of the external research revenue for the University. UniServices works with academic staff and key University personnel to build successful business relationships with government agencies and industry in both domestic and international arenas.

UniServices manages The University’s intellectual property and is responsible for all research-based consultancy and education partnerships and commercialisation.

The objectives of UniServices are to:

• Commercialise University-sourced technology and innovations
• Carry out research contract work for outside organisations
• Contract with clients for education and training programmes for groups
• Undertake any other commercial work considered to be advantageous for The University and the New Zealand economy
• Manage the intellectual property of the University which arises from research activities
• Evaluate the commercial potential of new ideas, innovations and inventions produced by University staff and students and where there is judged to be a good possibility of commercialisation, arrange patent protection or advise on copyright and/or confidentiality agreements, and provide development funding as required.

Centres of UniServices are on campus. The head office is in UniServices House, 70 Symonds Street and is open Monday to Friday 8.30am to 5pm. Phone: +64 9 373 7522 or visit www.uniservices.co.nz

### Alliances with Other Tertiary Institutions

The University has alliances with other tertiary institutions in the Auckland region.

**Auckland University of Technology**

The University of Auckland and the Auckland University of Technology entered an alliance in 1999. The alliance provides for the development of complementary teaching programmes, co-operative activities in administration, research and procurement and a Joint Board to oversee the operation.

**Manukau Institute of Technology**

In 1999 The University of Auckland and the Manukau Institute of Technology signed a Deed of Cooperation
with the aim of enhancing the availability of University qualifications to students in the Manukau region. The Deed was renewed in 2008. The University of Auckland Programme at Manukau offers the degrees of Bachelor of Education (Teaching) and the Bachelor of Visual Arts. These programmes are taught at the Manukau Institute of Technology Campus.

From 2010 academic pathways in Business, Teacher Education, Engineering and Nursing enable MIT students to embark on a range of qualifications offered by the University. Students, depending on their chosen programme, can apply to the University with an awarded MIT qualification or may be admitted with a partially completed degree and transfer credits gained at MIT towards the requirements for qualifications at the University. For further information on these programmes and on admission and enrolment, please visit www.auckland.ac.nz/mit

**Auckland Tertiary Education Network (ATEN)**

In 2012 The University of Auckland signed a partnering agreement with the five other tertiary institutions with a physical presence in Auckland (Auckland University of Technology, Manukau Institute of Technology, Massey University, Te Wananga o Aotearoa, UNITEC), and Auckland Council. This launched ATEN: the Auckland Tertiary Education Network. The network provides the mechanism for improved collaboration among the institutions to develop the provision of an integrated but differentiated higher education offering in Auckland. It is also intended to contribute to economic development through coordinating effort around Auckland’s innovation agenda.

Admission and Enrolment 2013

The University of Auckland has an online system for admission and enrolment.

Admission to The University of Auckland

All new students and those not enrolled in 2012 who are intending to study at the University in 2013, are required to complete an Application for Admission form. The form may be completed online at www.auckland.ac.nz/apply_now or be obtained by telephoning 0800 61 62 63. For students who do not have access to Internet facilities, assistance is available at the address below. On completion of the Admission process Doctoral students will be asked to present themselves at the Graduate Centre to accept their offer and to be enrolled.

ClockTower Student Information Centre
The University of Auckland
22 Princes St
Auckland 1142
New Zealand
Email: studentinfo@auckland.ac.nz

All Applications for Admission by new students will be acknowledged. Students will receive an offer of a place in programmes (degree, diploma or certificate) for which their admission is approved. **This offer of a place must be accepted online before the student proceeds to enrol in the course/s of their choice.**

Enrolment at The University of Auckland

Students enrol in courses online, or they can seek assistance from the address above.

Admission and Enrolment Timetable

Applications for Admission can be submitted at any time throughout the year, but must be received by published deadlines. Students must enrol as soon as possible after acceptance of an offer of place, as many University of Auckland courses are very popular and have a limited number of places available.

Admission Regulations

Application for Admission
All students intending to study at The University of Auckland for the first time, and those students not enrolled at The University of Auckland in the previous calendar year, must submit an Application for Admission. To enrol applicants must meet (a) the admission requirements as detailed below and (b) any specific programme entry requirements. Students whose admission to a programme is approved will receive an offer of a place and on acceptance of this offer may proceed to enrol online in courses.

Prerequisites and Conditions
1 Subject to the Council’s statutory powers to decline admission and enrolment (whether for insufficiency of accommodation or of teachers or for other cause) and to Regulation 2, a person is eligible to be admitted to the University and to be admitted as a student if that person:
   a has satisfied the requirements for entrance to a university in New Zealand
   or
   b is granted Special Admission
   or
   c is granted Discretionary Entrance
   or
   d is granted admission ad eundem statum, based upon study at a secondary school or another tertiary institution:
      (i) at entrance level,
      or
      (ii) with credit,
      or
      (iii) with graduate status.

2 Unless Senate approves otherwise, a person who has not reached the age of 16 years by 31 December in the year preceding that in which admission is sought will not be eligible to be admitted to this University.

3 A person seeking to be admitted to the University must:
   a comply with these regulations
   and
   b sign and date the declaration on the Application for Admission form which includes the words:
      ‘I promise to abide by the Statutes and Regulations, and comply with the reasonable requirements of The University of Auckland’
   or
   c accept that completing and submitting the Application for Admission online constitutes signing and dating the declaration as defined under the Electronic Transactions Act 2002.

Requirements for Entrance to a University in New Zealand
4 a National Certificate of Educational Achievement
   From 2005: a minimum of 42 credits at level 3 or higher on the National Qualifications Framework, including a minimum of 14 credits at level 3 or higher in each of two subjects from an approved subject list, with a further 14 credits at level 3 or higher taken from no more than two additional domains on the National Qualifications Framework or approved subjects; plus, a minimum of 14 credits at level 1 or higher in Mathematics or Pangarau; plus, a minimum of 8 credits at level 2 or higher in English or Te Reo Māori; 4 credits must be in Reading and 4 credits must be in Writing.

   b Bursaries examination
   Up to and including 1986: an aggregate total of 160 marks in four subjects.
   From 1987 to 1992: four individual subjects with D grades or higher. (Practical Art up to 1988 counts as two subjects for this purpose.)
   From 1993 to 2003: three individual subjects with C grades or higher plus Higher School Certificate, or an ‘A’ or ‘B’ Bursary.

   c UE gained before 1986.

   d Up to and including 1992: a combination of credits, in a minimum of four subjects, gained from UE before 1986 and/or Bursaries Examinations since. A credit required a mark of at least 40 percent in 1986 or a D grade or higher from 1987 on. (Practical Art up to 1988 counts as two subjects for this purpose.)
   From 1993 to 2003: a combination of credits in three individual subjects in the Bursaries Examination plus Higher School Certificate.
Special Admission
5 a A person who does not hold a university entrance qualification but who is a New Zealand citizen or permanent resident and has attained the age of 20 years on or before the first day of the semester in which a proposed programme is offered is eligible to be granted Special Admission.

b A person seeking Special Admission to the University has to apply for it in accordance with the Admission Regulations and submit evidence of age and educational qualifications.

c Senate may waive the age requirement where an applicant is in its opinion otherwise fit to be admitted and, in particular, has satisfied any qualification for admission specified in the regulations for that programme of study.

d A person seeking to be admitted to The University of Auckland who wishes to be granted credit for any prior learning must apply under Regulation 7 (Admission at Entrance Level or with Credit).

e Special Admission applicants who have previously failed a foundation programme or not reached an adequate standard in a preparatory programme, will not be re-admitted to the University unless their last enrolment is two or more years previous and they have subsequently undertaken work, study or life experience that demonstrates readiness for academic study. Special Admission applicants refused admission should be advised of other study options.

Discretionary Entrance
6 a A person under the age of 20 years who does not meet the University Entrance standard, but
   (i) is a citizen or permanent resident of New Zealand or Australia*
   and
   (ii) has received secondary schooling to at least New Zealand Year 12 level (or its equivalent overseas) and earned at least 14 credits in an approved subject at Level 2 towards NCEA (or its equivalent)
   and
   (iii) has met the literacy and numeracy standards required for University Entrance, or their equivalents
   may apply for Discretionary Entrance.

* Australian applicants’ most recent year of schooling must have been in New Zealand.

b Persons who have undertaken Year 13 study beyond 1 June at a New Zealand secondary school may normally not be admitted under the Discretionary Entrance provisions before July in the following year. Admission will be at the discretion of the University.

c In special circumstances the Chair of Universities New Zealand–Te Pōkai Tara’s Sub-Committee on University Entrance may permit persons who do not fulfill Clause 6a(ii) or Clause 6a(iii) above to apply for Discretionary Entrance.

d A person studying at a New Zealand secondary school, who is attempting to qualify for entrance to the University, may apply for Discretionary Entrance in the same year for the purpose of enrolling in papers offered in Summer School. Any person admitted under this regulation who does not, in the following January, meet the University Entrance standard will be required to withdraw from the University and may re-apply for admission at mid-year. Students required to withdraw may complete their Summer School programme before doing so, but any courses passed will not be credited to a qualification until a University Entrance qualification is gained.

e A person seeking Discretionary Entrance to the University must apply by completing the requirements prescribed on the Discretionary Entrance form.

Admission ad eundem statum (Admission at Entrance Level or with Credit)
7 a From a New Zealand university
A student from another university in New Zealand, including a student who had enrolled at The University of Auckland previously, who wishes to reapply to The University of Auckland must submit an Application for Admission form and may apply for credit under the provisions of the Credit Regulations.

b From another tertiary institution in New Zealand or overseas
A person who wishes to be admitted to the University and who has gained appropriate
qualifications validated by the New Zealand Qualifications Authority or from an overseas institution may be granted admission by this University:

(i) at entrance level
(ii) with credit towards a certificate, diploma or a Bachelors degree for work which in the opinion of Senate is substantially equivalent and is in accordance with the credit regulations
(iii) with graduate status.

c From a New Zealand secondary school
New Zealand citizens, permanent residents or international students who have gained from a New Zealand secondary school an entrance qualification approved by Universities New Zealand–Te Pōkai Tara for the purpose of admission ad eundem statum, may be granted admission ad eundem statum to this University.

d From an overseas secondary school
New Zealand citizens, permanent residents or international students who have gained an appropriate overseas qualification may apply to have that qualification recognised as being equivalent to a university entrance qualification set out in Regulations 4a–e above. A New Zealand citizen who has completed a year of academic study overseas, which is deemed to be at the equivalent of Year 13 in New Zealand, whether or not a formal academic qualification has been obtained, may apply for Discretionary Entrance, if appropriate, or may apply for ad eundem statum entrance under this Clause.

e A person seeking admission under this regulation has to apply by completing the requirements on the Application for Admission form.

8 a  Credits may be specified or unspecified and the grant of admission may include permission to advance in specified subjects or courses.

b Prerequisite courses or programmes may be prescribed as a condition of the approval to proceed to a higher degree or other qualification.

Students Enrolled at Another Educational Institution
9 a  When they enrol, students are required to declare if they are intending to enrol concurrently during the year in question at any other educational institution.

b A student at a New Zealand secondary school who satisfies the admission requirements and who has the specific written approval of the institution’s principal may, with the approval of Senate or its representative, enrol in up to 15 points per semester.

English Language Competence
10 a  Applicants for admission to The University of Auckland must provide evidence acceptable to the University of their competence in both written and spoken English.

b For admission purposes, the University will be satisfied of an applicant’s competence in English:
(i) if English is the applicant’s first language
or
(ii) if the applicant has a New Zealand university entrance qualification
or
(iii) if the applicant has an overseas university entrance qualification from a country where the main language is English and the main language of instruction and assessment for that qualification was English
or
(iv) if the applicant performs to a satisfactory standard, as set down by the University Senate from time to time, in an approved English Language test
or
(v) if the applicant provides other evidence acceptable to the University of competence in both written and spoken English.

If the applicant is age 20 years or over, and is a New Zealand citizen or permanent resident, this regulation does not apply.

Note: Under the provisions of the Education Act 1989, The University of Auckland may require students over the age of 20 applying for admission to any restricted entry programme to provide evidence of English language competency.
Enrolment and Programme Regulations

Academic Calendar
1  a  The academic year will begin on the first day of January of the calendar year and will end on the last day of December of that same calendar year.
   b  There will be a Summer School and two semesters in each year.
   c  The Summer School will begin on the second working day after the New Year break and will end with examinations held over three days commencing the second or third Monday in February.
   d  The first semester will begin on the ninth or tenth Monday of the calendar year and end on the 26th Monday of the calendar year, the final three weeks and one day of which will be a study and examination period.
   e  The second semester will begin on the 29th or 30th Monday of the calendar year and end on the 46th Monday of the calendar year, the final three weeks and one day again being a study and examination period.
   f  Each semester will include a break of at least one week after about six weeks of teaching.

Definitions of Full-time Study
2  Full-time study is defined as a student workload of:
   a  not fewer than 100 points over two semesters in one year
      or
   b  not fewer than 50 points in one semester
      or
   c  not fewer than 25 points in Summer School.

Part-time study is defined as a student workload of:
   a  fewer than 100 points over two semesters in one year
      or
   b  fewer than 50 points in one semester
      or
   c  fewer than 25 points in Summer School.

Points
4  a  (i)  A student may enrol in up to 170 points in an academic year for a Bachelors degree, diploma or certificate, subject to the provisions of the Academic Progress regulations
      (ii)  Provided the 170 point limit is not exceeded, a student may enrol in:
          (a)  up to 80 points in each of Semesters One and Two
          (b)  up to 30 points in a Summer School.

Note: A recommended full-time programme in Semesters One and Two would normally comprise a total of 120 points.

b  (i)  For a Masters degree, PhD or other doctorate, where another programme is included in the enrolment, a limit on points may be determined by the Dean of Faculty or delegated representative in any particular case provided that the Masters, PhD or doctoral programme will always comprise more than half of the total points for which the student has enrolled.
      (ii)  Students who are eligible to claim student allowances and/or an additional student loan entitlement and wish to enrol during the summer vacation period in order to work on their thesis, dissertation or research topic are required to complete a Course Alteration Form.

Notes:
1  This regulation provides the opportunity for Masters students to include their thesis, dissertation or research topic in their enrolment together with the required courses in any academic year.
2  Before completing a Masters degree or submitting a thesis, a student needs to have enrolled in, and paid the specified fees for at least the minimum number of points as set out in the relevant degree course regulations.

General Programme Provisions
5  a  For the purposes of this section of the Regulations a representative of Senate includes a Dean, and the Deputy, or Associate of a Dean; and a Head of Department and the Deputy or Associate of a Head of Department.
b Subject to the Admission Regulations and to the express provisions of any other statute or regulation, every student for a certificate, diploma or degree programme must:
   (i) be admitted to the University
   and
   (ii) follow the prescribed programme in the order prescribed or indicated in accordance with the regulations governing that programme
   and
   (iii) comply with the provisions of the Examination Regulations.

c Each student must ensure that, before confirming their enrolment, their proposed programme and enrolment:
   (i) complies with the regulations of the qualification to which they have been admitted
   and
   (ii) does not involve lecture clashes.

d Senate or its representative may in exceptional circumstances approve:
   (i) a proposed enrolment which does not in every particular satisfy the regulations for the programme for which the student is intending to enrol
   or
   (ii) a variation in the programme to avoid lecture clashes.

e Where an approval of a proposed programme as a whole is declined by a representative of Senate the student may appeal to Senate whose decision shall be final.

f Where electives are prescribed for a programme, Senate may at its discretion determine which of them shall be available in any semester provided that sufficient electives are available to enable students to complete their programme.

g A student who has enrolled for the second semester in a course or courses that have a first semester prerequisite or corequisite and who fails the prerequisite/corequisite course(s) may not proceed with the second semester enrolment unless a concession is granted by the relevant Dean.

h Where in the opinion of a Head of Department an insufficient number of students has enrolled in a course taught in the Department or where there are insufficient staff to teach it, that Head of Department may, with the approval of the Dean of Faculty, cancel that course not later than one week after the beginning of the semester in which it would have been taught, if the essential prerequisites for any student’s enrolment are not thereby affected. A student is not to be charged a fee for any alteration to enrolment required because of the cancellation of a course.

Restrictions

6 a A student may not normally enrol in the same semester for more than two different programmes.

b (i) A student may not enrol in the same semester for courses the content of which is substantially similar.
   (ii) A student may not enrol for any course the content of which is the same as, or substantially similar to, any course for which credit has been received, provided that in exceptional circumstances Senate or its representative may permit such enrolment for a Certificate of Proficiency.
   (iii) Work submitted for credit towards the result in any course may not be resubmitted in respect of any other course.

c A student who has twice enrolled in, but has failed to be credited with a pass in, a course is not entitled to enrol again in that course other than in exceptional circumstances approved by Senate or its representative.

d A student may not be admitted to a programme for a qualification for which the requirements have been completed or which has already been awarded or conferred, unless specific provision is made in the regulations for the relevant programme or special approval is given by Senate or its representative.

e Unless special approval is given by Senate or its representative, a student may not be admitted to a programme for a postgraduate qualification
   (i) for which the student has previously failed to meet the requirements
   or
   (ii) the content of which is the same as, or substantially similar to, any qualification for which the student has previously failed to meet the requirements.
Discontinuation

7  a A student who has not enrolled in a course for a programme for a period of three years shall have their admission to the programme discontinued and must apply for readmission to that programme before any further enrolment for the programme.

    b A student who has twice enrolled in, but has failed to be credited with a pass in a course which is required for completion of, or continued enrolment in, a programme may have their enrolment for that programme discontinued by Senate or its representative.

    c A student who has been admitted to a programme with specified conditions which must be met in order to be able to continue enrolment in that programme and who has not met those conditions may have their enrolment for that programme discontinued by Senate or its representative.

    d A student who has been re-admitted to a programme after discontinuation may have specified conditions imposed which must be met in order to be able to continue enrolment in that programme. Where such conditions are not met their enrolment for that programme may be discontinued by Senate or its representative.

    e A student whose enrolment in a programme has been discontinued under Regulations 7c or 7d may not be re-admitted to that programme within two years of the date of discontinuation.

    f A student whose enrolment has been discontinued because of failure to meet specified conditions, may apply for reconsideration of their discontinuation where they consider that medical or other exceptional circumstances should be taken into account. An application for reconsideration of discontinuation must be made to the Dean of the Faculty in writing.

Enrolment

8  a Following acceptance in a programme of their choice, students can enrol in courses online. For late enrolment see the Late Enrolment provisions in this section.

    b Students whose dissertations or theses for a diploma or degree are incomplete are required to be enrolled until the dissertation or thesis is presented.

9  a A double-semester course is a full-year course, run over two consecutive semesters and assessed at the end of the second semester of enrolment. The same grade is applied across both components of the course.

    b To complete, students must enrol consecutively in both the A and B component of the course. Deadlines for additions and deletions for double-semester enrolments are noted under Changes to Current Enrolment.

    c Enrolments must normally be made in consecutive semesters unless a suspension of time is approved for a postgraduate research course under General Regulations.

    d The A and B enrolments in a double-semester course are two components of the same course. Any action applied to one component is applied to both.

    e Enrolment in the A component of a double-semester course is considered a request for enrolment in the B component for the following semester and withdrawal from or deletion of one component will be applied to the remaining component.

Late Enrolment

10 a Subject to the availability of courses and/or availability of places in a course, a late enrolment may be accepted

    (i) after the day prescribed and before the deadline for additions and deletions;

    (ii) after the deadline for additions and deletions upon payment of a late enrolment fee.

    b The choice of courses for students who enrol after the closing date for enrolment will be determined by Senate or its representative and will not necessarily be those proposed by the students concerned. In determining such courses, Senate is to have regard to the prior claims upon both laboratory and classroom space of those students who have enrolled at or before the prescribed time.

Not-for-credit Courses

11 a Subject to the Admission and Fees Regulations, a student who has a personal interest in a course and for whom enrolment for a Certificate of Proficiency is deemed inappropriate, may apply for enrolment in a Not-for-Credit course.

    b Enrolment is at the discretion of Senate or its representative.
Changes to Current Enrolment

Deadlines for Additions and Deletions

12 The last dates for additions and deletions under Regulations 13 and 14 are set out below:

<table>
<thead>
<tr>
<th>Semester courses enrolled in</th>
<th>Deadline for additions/deletions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Semester One courses</td>
<td>Second Friday of semester</td>
</tr>
<tr>
<td>Semester Two courses</td>
<td>Second Friday of semester</td>
</tr>
<tr>
<td>Double-semester courses</td>
<td>Fourth Friday of first semester for the course</td>
</tr>
<tr>
<td>Summer School courses</td>
<td>Seven days inclusive from the start of Summer School</td>
</tr>
<tr>
<td>Quarter courses</td>
<td>Second Friday of quarter</td>
</tr>
</tbody>
</table>

Notes:

a  It is not sufficient for a student to notify an addition or deletion solely to the Department – it must be done online.

b  Where special circumstances apply, a student may apply for an exemption from additional fees from the Director, Academic Services (or delegated authority).

c  Deadline dates are calculated from the start of the semester, quarter or Summer School. For courses that start on other dates, the deadline will be calculated from the start of the course. The principle followed in calculating the deadline for non-standard dated courses will normally be one-sixth of the teaching period for the course. Where a course has a teaching period of five days or less, then the deadline will be the day before the start of teaching.

Additions

13 Students wishing to add a course to their current enrolment may do so online, where the approved limit has not been reached or where the available resources have not reached capacity.

Deletions

14 a  A student wishing to delete a course may do so online.

b  The course will be deleted from the student’s academic record.

Late Deletion

15 a  Late applications to delete a course or courses will be considered by the Director, Academic Services (or delegated authority) only in exceptional circumstances (such as illness, injury or events beyond the control of the student) and upon submission by the student of appropriate evidence.

b  Applications must be made on the Late Application to Delete a Course form and must be received by the last day of lectures of the semester or quarter for the course.

c  Following the decision on an application for late deletion of a course, the student may apply for reconsideration of that decision. An application for reconsideration must be made:

   (i)  in writing to the Director, Academic Services no later than four weeks after the student is notified of the decision

   and

   (ii)  must be accompanied by further evidence in support of the application.

d  Where a student has been permitted by the Director, Academic Services to delete a course after the prescribed date under this regulation, any refund of tuition fees will be granted in accordance with the Tuition Fees Refund Guidelines given in Regulation 18.

Substitutions

16 a  Where a Department directs a student to substitute one course for another in the same subject, the student may do so on the appropriate form and with the approval of the Dean of the appropriate Faculty.

b  Courses may be substituted up until three weeks before the end of lectures for the semester in which the course is taught.

c  A course may only be substituted with a course which is of the same duration, same points value and taught in the same semester.

Note: Where students are directed to take a more/less advanced Second Semester course in place of a First Semester course, they will be permitted, if necessary, to make a late deletion.

d  The substituted course will be removed from the student’s academic record.
There will be no adjustment to the student’s tuition fees. If there is a variation between charges payable in respect of the substitute and the substituted course, the student will be required to pay only the difference in those charges.

There will be no refund of any fees or charges for the substituted course.

**Withdrawals**

17 a Any student wishing to cease attendance in a programme or course after the period specified for deletion may apply to do so by obtaining the approval of the relevant Head of Department and the Dean of the Faculty for that programme. Application must be made on the Course Alteration Form.

**Deadlines for Withdrawals**

b The last dates for withdrawals are set out below:

<table>
<thead>
<tr>
<th>Semester courses enrolled in</th>
<th>Deadline for withdrawals</th>
</tr>
</thead>
<tbody>
<tr>
<td>Semester courses</td>
<td>Third Friday before the end of lectures</td>
</tr>
<tr>
<td>Double-semester courses</td>
<td>Third Friday before the end of lectures in the 2nd semester</td>
</tr>
<tr>
<td>Quarter courses</td>
<td>Second Friday before the end of lectures</td>
</tr>
<tr>
<td>Summer School courses</td>
<td>One week before the end of lectures</td>
</tr>
</tbody>
</table>

c The course will remain on the academic record and show as a withdrawal.

d All fees will remain owing.

e For calculation of Requirements for Maintaining Good Academic Standing (under Regulation 20 of these regulations) withdrawal will be counted as a failure.

f For selection into a limited-entry course, a withdrawal is counted as a failure.

g Where withdrawal from a course will not reduce the student’s enrolment to less than 100 points over the academic year, the withdrawal from that course will not affect selection into limited-entry courses.

h For student allowances withdrawal from a course will count as a failure and automatically reduce the number of points in which the student is deemed to be enrolled.

i If a student who ceases to attend lectures fails to complete the Course Alteration Form, the course(s) will be recorded as ‘Did not sit’ and will count as a failure for all purposes.

j Applications to withdraw submitted after the dates in Regulation 17b and before the end of the semester or quarter will be considered by the Director, Academic Services (or delegated authority) only in exceptional circumstances (such as illness, injury or events beyond the control of the student) and upon submission of the appropriate evidence.

**Refund of Fees**

18 a Where a student applies, before the dates specified in Regulation 12, to delete all courses of the current enrolment, a full refund of all tuition fees and the Student Services Fee will be made.

Note: A student who has deleted all courses is no longer deemed to be enrolled.

b Where a student applies, before the dates specified in Regulation 12, to delete one or more but not all courses of the current enrolment, a refund of the fees for the course(s) deleted will be made.

c Where a student has been permitted by the Director, Academic Services, under Regulation 15, to delete a course after the prescribed date because of illness, injury or exceptional circumstances beyond the student’s control, a refund of tuition fees will be granted in accordance with the Tuition Fees Refund Guidelines below, provided that Senate may in its discretion increase this percentage, but there will be no refund of the Student Services Fee.

d All course deletions, under Regulations 18a, 18 b and 18c above, will incur a refund processing fee which shall be deducted from the refund of the fees.

Note: Tuition Fees Refund Guidelines:

1 For single-semester courses which are deleted:
   (i) before the commencement of the mid-semester break for that semester: 50 percent
   (ii) thereafter no refunds will be granted.
2 For double-semester courses which are deleted:
   (i) before the commencement of the mid-semester break for the First Semester: 75 percent
   (ii) before the end of the First Semester: 50 percent
   (iii) before the commencement of the mid-semester break for the Second Semester: 25 percent
   (iv) thereafter no refunds will be granted.

3 For Summer School courses which are deleted:
   (i) before the end of the second week from the start of Summer School: 50 percent
   (ii) thereafter no refunds will be granted.

4 For quarter courses which are deleted:
   (i) before the end of the fifth week of the quarter: 50 percent
   (ii) thereafter no refunds will be granted.

Academic Standing
   19 Regulations concerning Academic Standing apply to all undergraduate qualifications at The
      University of Auckland.
      a  The application of these regulations includes students intending to transfer to The University
          of Auckland from any other New Zealand university and those students applying for admission
          having previously studied at another tertiary institution.
      b  Summer School is classified as a semester for the purposes of Academic Standing.
      c  Academic Standing statuses are Good, At Academic Risk, Academic Restriction and Enrolment
          Terminated.

Requirements for Maintaining Good Academic Standing
   20 A student is required to pass at least 50 percent of points enrolled in any one semester, including
      Summer School, to maintain Good Academic Standing.

At Academic Risk Academic Standing
   21 A student who fails to meet the requirements for Good Academic Standing will, in the next semester
      of study, have their academic standing amended to At Academic Risk.
      a  A student with a status of At Academic Risk may be required to participate in such academic
          support programmes as deemed appropriate by the relevant Faculty.
      b  A student with a status of At Academic Risk who meets the requirements for Good Academic
          Standing will, in the next semester of study, have their record amended to that status.

Academic Restriction Academic Standing
   22 A student with a status of At Academic Risk who fails to meet the requirements for Good Academic
      Standing will, in the next semester of study, have their academic standing amended to Academic
      Restriction.
      a  A student with a status of Academic Restriction will be restricted to:
          (i) not more than 45 points of enrolment in that semester
          (ii) not more than 25 points in Summer School.
      b  A student with a status of Academic Restriction will be required to participate in such academic
          support programmes as deemed appropriate by the relevant Faculty.
      c  The record of a student with a status of Academic Restriction will be referred to the relevant
          Faculty for review of the restriction which may be varied if appropriate.
      d  A student with a status of Academic Restriction who meets the requirements for Good Academic
          Standing will, in the next semester of study, have their academic standing amended to At
          Academic Risk. Students whose enrolment is restricted under these provisions may apply to
          Senate for reconsideration of the restriction where they consider that disabilities, impairments,
          medical or other exceptional circumstances should be taken into account. Where such
          reconsideration is given, Senate or its representative (the Dean of the Faculty concerned) may:
          (i) confirm the restriction
          or
          (ii) vary the restriction.
      e  Applications to Senate must:
          (i) be made on the Reconsideration of Academic Standing form
          and
          (ii) if special consideration is sought for medical or other exceptional reasons, include
               evidence
               and
          (iii) reach the Dean of the Faculty concerned before the first day of the semester or Summer
                School.
23 Any student restricted under the Academic Standing regulations may within 14 days appeal to the Council against the decision of Senate.

**Enrolment Terminated**

24 A student with a status of Academic Restriction who fails to meet the requirements for Good Academic Standing will, in the next semester of study, have their academic standing amended to Enrolment Terminated.

25 A student with a status of Enrolment Terminated will be excluded from all programmes at The University of Auckland.

26 A student with a status of Enrolment Terminated will be entitled to reapply for admission to a programme after one year of exclusion. Where such application is made, Senate or its representative (the Dean of the Faculty concerned) may:
   a decline readmission
   or
   b permit a student to be readmitted under specific conditions.

27 A student declined readmission under these provisions may apply to Senate for reconsideration of their exclusion where they consider that disabilities, impairments, medical or other exceptional circumstances should be taken into account. Where such reconsideration is given, Senate or its representative (the Dean of the Faculty concerned) may:
   a confirm the exclusion
   or
   b permit a student to enrol under specific conditions.

28 A student permitted to re-enrol under conditions specified by Senate or its representative, but who fails to satisfy those conditions, will be automatically excluded from enrolment at The University of Auckland.

29 A student excluded under clause 27 is not entitled to apply for admission to a programme for at least one year.

30 Applications to Senate must:
   a be made on the Reconsideration of Academic Standing form
   and
   b if special consideration is sought for medical or other exceptional reasons, include evidence
   and
   c state the programme for which the student intends to apply, should the application for readmission be successful
   and
   d reach the Dean of the Faculty concerned before the first day of the semester or Summer School.

31 Any student declined readmission at this University under the Academic Standing regulations may within 14 days appeal to the Council against the decision of Senate.

**Vice-Chancellor's Special Powers**

32 a The Vice-Chancellor may give such direction, or make such provision as he or she thinks fit, for the relief of undue hardship including but not restricted to:
   (i) enforcement of requirements for admission to the University or to a programme, alteration or amendment to statutes or regulations, change in programme or examination requirements
   or
   (ii) occasions where official advice has been given in writing and acted upon, and it is later found that the courses the student has taken do not accord with the programme regulations and that hardship would be caused if the student were to be compelled to comply with the full requirements of the regulations.

   b A student may appeal against any decision of the Vice-Chancellor under this Regulation to the Council by giving notice in writing to the Registrar within 14 days of being notified of the decision. The Council shall have the power to make such provision as it may think fit. The decision of the Council on any appeal under this Regulation shall be final.
Credit Regulations

Credits
1 a A student may, with the approval of Senate or its representative and on payment of the prescribed fees under the Fees Statute, be granted credit towards a programme approved by the Dean of Faculty concerned under the provisions of these regulations.

b A student may not be granted further credit for work already credited under this regulation.

Credit from Another Tertiary Institution: Transfer Credit
2 a A student who applies for admission to The University of Auckland and has undertaken a programme at another tertiary institution in New Zealand may be granted appropriate credit towards a degree or other qualification of The University of Auckland on the basis of work successfully completed in the previous programme.

b A student who has gained from an overseas institution an appropriate qualification, or credit towards a qualification, validated by the New Zealand Qualifications Authority, and who is granted admission by this University, may be granted appropriate credit towards a qualification of The University of Auckland on the basis of work successfully completed in the previous programme.

c To be awarded an undergraduate degree of The University of Auckland, a student must complete at least the equivalent of a full time year of study as an enrolled student at The University of Auckland.

d Credit granted under 2a or 2b above may be specified or unspecified and the grant of admission may restrict advancement in specified subjects or programmes.

e (i) Credit granted under 2a or 2b above will normally be granted only for courses at Stage I and Stage II. Only where prior approval for exchange or study abroad enrolment has been granted, or in exceptional circumstances, will the grant of credit be considered at Stage III for courses taken at Stage III at another tertiary institution.

(ii) Where Parts are specified for a Bachelors degree, credit may be awarded within a Part according to suitability of course content and professional requirements and irrespective of the Stage of the course passed.

(iii) Only where prior approval for exchange or study abroad enrolment has been granted, or in exceptional circumstances, will the grant of credit be considered for courses taken at another tertiary institution at postgraduate level or for a postgraduate degree, diploma, or certificate.

f Credit will not be available for any course passed at another tertiary institution with a conceded or restricted pass.

g Credit may be refused for courses passed more than five years previously.

Approved Study at Another Institution
3 a A student who is enrolled at The University of Auckland and who concurrently enrolls and completes courses at another tertiary institution, which they wish to credit to their University of Auckland qualification must:

(i) Seek from the Dean of the relevant Faculty prior approval of the proposed concurrent enrolment and confirmation that the courses will satisfy the regulations and requirements for the qualification for which the student is enrolled at this University and that appropriate credit may be granted.

(ii) Apply for credit in accordance with these regulations when the official results are known.

b Any credit granted from study at a Summer School will be added to the current year of study at this University.

Notes:
1 Where prior approval has not been sought, credit will not normally be granted.

2 This regulation applies to Summer School study at an institution other than The University of Auckland with the intention of requesting credit for a University of Auckland qualification.

Cross-credits and Internal Credit
5 a In this Regulation ‘cross-credit’ means a course which is common to two University of Auckland
undergraduate qualifications, which may be Bachelors degrees, undergraduate diplomas and undergraduate certificates, and is credited to both. 'Internal credit' means credit awarded to a programme for one or more courses passed for another University of Auckland qualification, which cannot be designated as a cross-credit.

b A student taking two programmes may only be awarded as cross-credits and/or internal credit the maximum allowed for one, but not both, of the programmes.

c A course which is designated a cross-credit may not be credited to more than two qualifications.

6 a When calculating cross-credits between a second and third qualification, points from previously granted cross-credits may not be used. The maximum number of cross-credit points that may be granted is based on one third of the points not previously designated for cross-credits.

b A Stage III course that fulfils the Stage III requirements of one qualification may not be designated as a cross-credit to meet the Stage III requirement of another qualification.

c A student may not designate as a cross-credit any course passed with a conceded pass or a restricted pass. If that course is compulsory, another course may be substituted for it as Senate or its representative may approve.

d Designation of courses as cross-credits, as permitted by these regulations, is subject to the approval of the Dean of the relevant Faculty or their nominee.

Limits

7 Subject to any other provisions of these regulations or the relevant Programme Regulations:

a In the case of qualifications of equal value, the total value of cross-credits and internal credit is limited to one third of the total value of the degree, diploma or certificate.

b Where the qualifications concerned are of different values, the total value of cross-credits and internal credit may not exceed one third of the total points value applying to the qualification of lesser value.

c Other than under the provisions of Regulations 2(e)(iii) and 4, cross-credits and transfer credits are not available for Masters degrees, Bachelors Honours Postgraduate degrees, doctorates, postgraduate certificates and postgraduate diplomas.

Limits on Cross-credits for Conjoint Degrees

8 a A conjoint degrees combination is considered to be two degrees for the purpose of calculating cross-credits.

b (i) A maximum of 80 points may be cross-credited from a completed conjoint degree component to another qualification.

(ii) A maximum of 80 points may be cross-credited from a completed qualification to a conjoint degree component.

(iii) The apportionment of the points to the components of the conjoint degrees combination is subject to the approval of the appropriate Deans or their representatives.

Reassigned Courses

9 a A student may apply, by submitting an Application to Reassign Courses form, to reassign courses passed for, and assigned to, one qualification to another qualification for which the courses are available.

b A student may not reassign courses passed for one qualification to another once the qualification for which the courses were passed has been awarded.

c A student may not reassign to another qualification any course passed with a conceded pass or a restricted pass. If that course is compulsory, another course may be substituted for it as Senate or its representative may approve.

d A student may apply to reassign a course or courses passed for a Certificate of Proficiency to a taught Masters degree, a postgraduate diploma or a postgraduate certificate provided that:

(i) no more than 30 points are reassigned

(ii) the enrolment in the postgraduate qualification is no later than three semesters from the initial enrolment in the course(s) reassigned from a Certificate of Proficiency

(iii) the application to reassign is made at the time the student is admitted to the postgraduate qualification

(iv) the course is available in the schedule of the qualification to which it is reassigned.

e Courses which are reassigned cease to be credited to the former qualification.
### General Regulations – Masters Degrees

The following regulations take precedence over the specific regulations for each Masters degree published elsewhere in this Calendar. As far as possible they are to be read in conjunction with the specific degree regulations for each Masters degree and the Guidelines for Masters students.

**Note:** For the purposes of these regulations:

(i) a thesis or research portfolio is worth between 90 and 120 points

(ii) a dissertation or research project is worth between 30 and 80 points.

### General Requirements

1. A student enrolled for a Masters degree at this University must pass the full points value specified in the degree regulations. The total enrolment may not exceed the minimum points requirement for the degree by more than 40 points.

**Notes:**

1. For these purposes, the nominal starting date for Semester One is 1 March and for Semester Two 15 July.

2. In all cases for the calculation of due date, the semester of initial enrolment is deemed to be the first semester in which the student enrolled for a course which is assigned or reassigned to the programme.
Part-time study is defined as a student workload of fewer than 100 points over two semesters in one year or fewer than 50 points in one semester.

Where the enrolment in the programme is partially full-time and partially part-time, the maximum time for completion is to be based on the period for completion for part-time study provided that one semester of full-time study counts as two semesters of part-time study for the purposes of calculation of the completion date.

Due dates for submission are calculated according to the number of weeks available to complete the thesis or research portfolio, including the summer period.

**Completion of Requirements**

3 a **Thesis or Research Portfolio**

(i) A student whose programme includes a thesis or research portfolio must complete the requirements in accordance with the schedule in Regulation 2. However, the Head of the Department concerned may approve a short extension of time as shown in the schedule.

(ii) If, in exceptional circumstances beyond the student’s control, the thesis or research portfolio has not been able to be completed by the specified deadline (including any approved extensions given under Regulation 3a(i)), Senate or its representative, acting upon the recommendation of the Head of Department, may approve a limited extension of time, not normally exceeding one semester, for the work to be completed.

b **Dissertation or Research Project**

(i) A student whose programme includes a dissertation or research project must complete the requirements by the last day of the final semester of enrolment in the dissertation or research project.

(ii) If, in exceptional circumstances beyond the student’s control, the dissertation or research project has not been able to be completed by the above deadline, Senate or its representative, acting upon the recommendation of the Head of Department, may approve a limited extension of time, not exceeding two months.

c **Performance or Exhibition**

A student enrolled in a degree which requires a live examination through performance or exhibition must complete their individual programme by the date approved by the Academic Head. This date will be no later than the deadline for completion specified in the schedule in Regulation 2, and no earlier than the last day of the final semester of enrolment.

d **Taught Masters**

(i) A student whose programme does not include a thesis, research portfolio, dissertation or research project must complete the requirements by the end of the final semester shown in the schedule above.

(ii) Extensions of time to complete work in examined courses or 100 percent coursework courses will not be granted beyond the end of the semester(s) in which the course is offered.

(iii) A student who has failed a course or courses of no more than 40 points may be approved by Senate or its representative to enrol for no more than one further consecutive semester beyond the deadline for completion specified in Regulation 2 in order to complete the degree.

**Tuition Fees for Extensions of Time**

4 Where an extension of time for the submission of a thesis, research portfolio, dissertation or research project is approved under Regulation 3a(ii) or 3b(ii), students will be required to be enrolled and pay tuition fees at the rate of 10 points for each two-month period or part thereof. This will only apply when the student’s current enrolment period in the course has ended.

**Honours**

5 Where the regulations provide for the award of Honours, a Masters degree may be awarded with Honours where a student’s overall grade is sufficiently high. There are two classes of Honours: First Class Honours and Second Class Honours. Second Class Honours are awarded in either First Division or Second Division.

**Eligibility for Honours**

6 Where the requirements for the degree have not been completed in accordance with Regulations 2 and 3 a student’s eligibility for Honours will lapse. However, on the recommendation of the Head of Department, Senate or its representative may approve the retention of eligibility for Honours.

**Theses**

7 a The student is to submit three temporary-bound copies and a digital copy of their thesis to the appropriate Faculty Student Centre in accordance with Regulation 3a.
b The digital thesis shall be formatted as specified in the Guidelines for Formatting a Digital Thesis at The University of Auckland.

c The Associate Dean (Postgraduate) of the Faculty is responsible for transmitting the submitted copies to the examiners.

d Where the outcome of the examination is to award a thesis a passing grade:

(i) Within one month of being advised of the outcome of the examination, the student must complete any minor corrections required to the satisfaction of the supervisor, deposit one hard-bound copy of the thesis with the appropriate Faculty Student Centre, and deposit a digital copy of the thesis in ResearchSpace in the University Library. The Faculty Student Centre will forward the hard-bound thesis to the University Library and will confirm that the digital copy has been deposited in ResearchSpace.

(ii) The thesis deposited in digital form will be accessible to authenticated users through the University’s digital repository unless embargoed under Clause 24 of the Examination Regulations.

e Where the outcome of the examination is to award a thesis a fail grade the thesis will not be held in the University’s Library or digital repository.

Research Portfolios

8 a The student is to submit three temporary-bound copies and a digital copy of their research portfolio to the appropriate Faculty Student Centre in accordance with Regulation 3a.

b The Associate Dean (Postgraduate) of the Faculty is responsible for transmitting the submitted copies to the examiners.

c Copies of research portfolios are not deposited in the University Library, nor deposited with the University’s digital repository.

Performance and Exhibition

9 a Live examination through performance or exhibition shall be organised by the Academic Head in conjunction with the Faculty Student Centre. Submission of the thesis will be in accordance with Regulation 7 except that the deadline will be determined by Regulation 3c.

b The Academic Head is responsible for co-ordinating the live examination. If the performance/exhibition is not accompanied by a written thesis, the Academic Head is responsible for transmitting the examiners’ reports to the Faculty Student Centre. When the performance/exhibition is accompanied by a written thesis, the process for the written thesis shall be in accordance with Regulation 7.

c Recordings of performances and exhibitions are not deposited in the University Library, nor deposited with the University’s digital repository, except when included within a written thesis submission in accordance with Regulation 7.

Research Projects and Dissertations

10 a Research projects and dissertations are to be bound as specified by the Faculty and submitted to the supervisor or department, in accordance with Regulation 3b.

b The Academic Head is responsible for transmitting the submitted copies to the examiners.

c Copies of research projects or dissertations are not deposited in the University Library, nor deposited with the University’s digital repository.

Substitutions and Failed Courses

11 Masters students may not change their enrolment in a course after the last date approved for deletions, except in exceptional circumstances as provided for in the Enrolment and Programme Regulations under Changes to Current Enrolment.

12 A Masters student may not normally re-enrol in a failed course except as provided for in the regulations relating to aegrotat and compassionate passes. In exceptional circumstances, the student may apply to Senate or its representative, on the recommendation of the Head of Department, for permission to re-enrol in the course and where approval is granted, the result achieved in the first attempt will not be considered in arriving at the overall grade for the programme.

13 Except as provided for in Regulation 12, calculation of the overall grade will include the grades given for all courses attempted in the degree. For the purposes of grade or mark calculation, Withdrawal, Did Not Sit and Did Not Complete will count as zero.

Suspension

14 Enrolment for a Masters degree will normally be continuous. In exceptional circumstances Senate
or its representative, on the recommendation of the Head of Department, may grant a period of suspension from enrolment not normally exceeding two consecutive semesters. In such cases the period of suspension will not count towards the time limits for the degree.

**Transfer Credits, Cross-credits and Reassignments**

15 a. **Transfer credits**
Except as provided for in Regulation 2e(iii) of the Credit Regulations, transfer credits may not be awarded for a Masters degree.

b. **Cross-credits**
Courses may not be cross-credited into or from a Masters degree.

c. **Reassignments**
With the approval of the Head of Department, courses may be reassigned as specified in Clause 9 of the Credit Regulations.

**Certificate of Proficiency**

16 a. The Certificate of Proficiency regulations under ‘Other Programmes’ apply.

b. A Certificate of Proficiency course may not be reassigned to a Research Masters degree.

c. A Certificate of Proficiency course may be reassigned to a Taught Masters degree as specified in Clause 9 of the Credit Regulations.

**Transitional Certificate**

17 The Transitional Certificate regulations under ‘Other Programmes’ apply. A Transitional Certificate course may not be reassigned to a Masters degree.

**Variations**

18 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to the regulations for a Masters degree.

---

**General Regulations – Bachelors Honours Postgraduate Degrees**

The following regulations take precedence over the specific regulations for each Bachelors Honours Postgraduate degree published elsewhere in this Calendar. As far as possible they are to be read in conjunction with the specific degree regulations for each Bachelors Honours Postgraduate degree. The Bachelors Honours Postgraduate degree will not be awarded until the requirements for the qualifying Bachelors degree have been awarded.

Note: For the purposes of these regulations:
(i) a Bachelors Honours Postgraduate degree is worth a total of 120 points
(ii) a dissertation or research project is worth between 30 and 80 points.

**General Requirements**

1 A student enrolled for a Bachelors Honours Postgraduate degree at this University must pass the full points value specified in the degree regulations. The total enrolment may not exceed the minimum points requirement for the degree by more than 40 points.

**Duration of Enrolment**

2 The requirements for a Bachelors Honours Postgraduate degree must be completed within:
   a. one year of initial enrolment for the degree if enrolled full-time
   or
   b. two years of initial enrolment for the degree if enrolled part-time.

**Completion of Requirements**

3 a. A student enrolled for a Bachelors Honours Postgraduate degree must complete all work in taught courses by the last day of the semester in which the course is taught.

b. A student enrolled in a dissertation or research project of 30 points or more must complete the dissertation or research project by the last day of the final semester of enrolment in the dissertation or research project. In exceptional circumstances beyond the student’s control, Senate or its representative, acting upon the recommendation of the Head of Department, may approve a limited extension of time, not exceeding two months.

c. A student who has failed a course or courses of no more than 40 points may be approved by Senate or its representative to enrol for no more than one further consecutive semester beyond the duration of enrolment specified in Regulation 2 in order to complete the degree.
Tuition Fees for Extensions of Time
4 Where an extension of time for the submission of a dissertation or research project is approved under Regulation 3b, students will be required to be enrolled and pay tuition fees at the rate of 10 points for each two-month period or part thereof. This will only apply when the student’s current enrolment period in the course has ended.

Honours
5 a The Bachelors Honours Postgraduate degree may be awarded only where a student’s overall grade is sufficiently high.

b Honours will be awarded in either of two classes: First Class Honours and Second Class Honours. Second Class Honours are awarded in either First Division or Second Division.

c Where a student’s average grade is insufficiently high to be eligible for the award of honours, Senate or its representative may approve the reassignment of points to the relevant Graduate or Postgraduate Diploma.

6 Calculation of the class of Honours will include the grades given for all courses attempted in the degree. For the purposes of this calculation, Withdrawal, Did Not Sit and Did Not Complete will count as zero.

Dissertations and Research Projects
7 a Dissertations and Research Projects are to be bound as specified by the Faculty and submitted to the supervisor or department in accordance with Regulation 3b.

b The Head of Department is to transmit the submitted dissertation or research project to the examiner(s).

c Copies of dissertations and research projects are not deposited with the University Library.

Suspension
8 Enrolment for a Bachelors Honours Postgraduate degree will normally be continuous. In exceptional circumstances Senate or its representative, on the recommendation of the Head of Department, may grant a period of suspension from enrolment not normally exceeding two consecutive semesters. In such cases the period of suspension will not count towards the time limits for the degree.

Transfer Credits, Cross-credits and Reassignments
9 a Transfer credits
Except as provided for in Regulation 2e(iii) of the Credit Regulations, transfer credits may not be awarded for a Bachelors Honours Postgraduate degree.

b Cross-credits
Courses may not be cross-credited into or from a Bachelors Honours Postgraduate degree.

c Reassignments
(i) With the approval of the Head of Department, courses may be reassigned as specified in Clause 9 of the Credit Regulations.
(ii) In certain circumstances, Senate or its representative may approve the reassignment of points to the relevant Postgraduate degree as provided for in Regulation 5c.

Certificate of Proficiency
10 The Certificate of Proficiency regulations under ‘Other Programmes’ apply. A Certificate of Proficiency course may not be reassigned to a Bachelors Honours Postgraduate degree.

Transitional Certificate
11 The Transitional Certificate regulations under ‘Other Programmes’ apply. A Transitional Certificate course may not be reassigned to a Bachelors Honours Postgraduate degree.

Variations
12 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to the regulations for a Bachelors Honours Postgraduate degree.
General Regulations – Postgraduate Diplomas

The following regulations take precedence over the specific regulations for each Postgraduate Diploma published elsewhere in this Calendar. As far as possible they are to be read in conjunction with the specific regulations for each Postgraduate Diploma.

Note: For the purposes of these regulations:
(i) a Postgraduate Diploma is worth a total of 120 points
(ii) a dissertation or research project is worth between 30 and 80 points.

General Requirements

1 A student enrolled for a Postgraduate Diploma at this University must pass the full points value specified in the postgraduate diploma regulations. The total enrolment may not exceed the minimum points requirement for the postgraduate diploma by more than
   a 40 points
   or
   b 20 points in the case of a student with credit granted from a postgraduate certificate.

Duration of Enrolment

2 a The requirements for a Postgraduate Diploma must be completed within
   (i) one year of initial enrolment for the postgraduate diploma if enrolled full-time
   or
   (ii) four years of initial enrolment for the postgraduate diploma if enrolled part-time.

   b In the case of a student who has completed a postgraduate certificate for which credit is granted to a postgraduate diploma the requirements must be completed within
   (i) one semester of admission if enrolled full-time
   or
   (iii) two years of admission if enrolled part-time.

   c In all cases, the semester of initial enrolment is deemed to be the first semester in which the student enrolled for a course which is assigned or reassigned to the programme.

Completion of Requirements

3 a A student enrolled for a Postgraduate Diploma must complete all work in taught courses by the last day of the semester in which the course is taught.

   b A student enrolled in a dissertation or research project of 30 points or more must complete the dissertation or research project by the last day of the final semester of enrolment in the dissertation or research project. In exceptional circumstances beyond the student’s control, Senate or its representative, acting upon the recommendation of the Head of Department, may approve a limited extension of time, not exceeding two months.

   c A student who has failed a course or courses of no more than 40 points may be approved by Senate or its representative to enrol for no more than one further consecutive semester beyond the duration of enrolment specified in Regulation 2 in order to complete the postgraduate diploma.

   d Fine Arts Studio
   A student enrolled in the Postgraduate Diploma in Fine Arts must complete their individual programme not later than 1 November in the year in which the work is undertaken or by such other date as may be approved by the Head of School of Fine Arts.

Tuition Fees for Extensions of Time

4 Where an extension of time for the submission of a dissertation or research project is approved under Regulation 3b, students will be required to be enrolled and pay tuition fees at the rate of 10 points for each two-month period or part thereof. This will only apply when the student’s current enrolment period in the course has ended.

Distinction or Merit

5 a The Postgraduate Diploma may be awarded with Distinction or Merit where a student’s overall grade is sufficiently high.

   b Distinction or Merit is normally awarded only if the requirements for the Postgraduate Diploma are completed within
   (i) 24 months of initial enrolment
   or
   (ii) 12 months of initial enrolment in the case of a student with credit granted from a postgraduate certificate.
6 Calculation of the award of Distinction or Merit will include the grades given for all courses attempted in the diploma. For the purposes of this calculation, Withdrawal, Did Not Sit and Did Not Complete will count as zero.

Dissertations and Research Projects
7 a Dissertations or Research Projects are to be bound as specified by the Faculty and submitted to the supervisor or department in accordance with Regulation 3b.

b The Head of Department is to transmit the submitted dissertation or research project to the examiner(s).

c Copies of dissertations and research projects are not deposited with the University Library.

Suspension
8 a Enrolment for a Postgraduate Diploma will normally be continuous. In exceptional circumstances Senate or its representative, on the recommendation of the Head of Department, may grant a period of suspension from enrolment not normally exceeding two consecutive semesters. In such cases the period of suspension will not count towards the time limits for the diploma.

b In the case of a student who has completed a postgraduate certificate for which credit is granted to a postgraduate diploma admission to the postgraduate diploma must take place within five years of completion of the postgraduate certificate.

Transfer Credits, Cross-credits and Reassignments
9 a Transfer credits
Except as provided for in Regulation 2e(iii) of the Credit Regulations, transfer credits may not be awarded for a Postgraduate Diploma.

b Cross-credits
Courses may not be cross-credited into or from a Postgraduate Diploma.

c Reassignments
With the approval of the Head of Department, courses may be reassigned as specified in Clause 9 of the Credit Regulations.

Certificate of Proficiency
10 a The Certificate of Proficiency regulations under ‘Other Programmes’ apply.

b A Certificate of Proficiency course may be reassigned to a Postgraduate Diploma as specified in Clause 9 of the Credit Regulations.

Transitional Certificate
11 The Transitional Certificate regulations under ‘Other Programmes’ apply. A Transitional Certificate course may not be reassigned to a Postgraduate Diploma.

Variations
12 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to the regulations for a Postgraduate Diploma.

General Regulations – Postgraduate Certificates
The following regulations take precedence over the specific regulations for each Postgraduate Certificate published elsewhere in this Calendar. As far as possible they are to be read in conjunction with the specific regulations for each Postgraduate Certificate.

Note: For the purposes of these regulations a postgraduate certificate is worth 60 points.

General Requirements
1 A student enrolled for a Postgraduate Certificate at this University must pass the full points value specified in the postgraduate certificate regulations. The total enrolment may not exceed the minimum points requirement for the postgraduate certificate by more than 30 points.

Deadlines for Completion
2 a The requirements for a Postgraduate Certificate must be completed within
   (i) one semester of initial enrolment for the postgraduate certificate if enrolled full-time
   or
   (ii) four semesters of initial enrolment for the postgraduate certificate if enrolled part-time.

b In all cases, the semester of initial enrolment is deemed to be the first semester in which the student enrolled for a course which is assigned or reassigned to the programme.
Completion of Requirements
3 a A student enrolled for a Postgraduate Certificate must complete the requirements by the last day of the final semester of enrolment in the programme.

b Extensions of time to complete work in examined courses or 100 percent coursework courses will not be granted beyond the end of the semester(s) in which the course is offered.

c A student who has failed a course or courses of no more than 30 points may be approved by Senate or its representative to enrol for no more than one further consecutive semester beyond the deadline for completion specified in Regulation 2 in order to complete the postgraduate certificate.

Suspension
4 Enrolment for a Postgraduate Certificate will normally be continuous. In exceptional circumstances Senate or its representative, on the recommendation of the Head of Department, may grant a period of suspension from enrolment not normally exceeding one semester. In such cases the period of suspension will not count towards the time limits for the certificate.

Transfer Credits, Cross-credits and Reassignments
5 a Transfer credits
Except as provided for in Regulation 2e(iii) of the Credit Regulations, transfer credits may not be awarded for a Postgraduate Certificate.

b Cross-credits
Courses may not be cross-credited into or from a Postgraduate Certificate.

c Reassignments
With the approval of the Head of Department, courses may be reassigned as specified in Clause 9 of the Credit Regulations.

Certificate of Proficiency
6 a The Certificate of Proficiency regulations under ‘Other Programmes’ apply.

b A Certificate of Proficiency course may be reassigned to a Postgraduate Certificate as specified in Clause 9 of the Credit Regulations.

Transitional Certificate
7 The Transitional Certificate regulations under ‘Other Programmes’ apply. A Transitional Certificate course may not be reassigned to a Postgraduate Certificate.

Variations
8 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to the regulations for a Postgraduate Certificate.

General Regulations for Named Doctorates
These Regulations apply to all doctoral degrees except the Doctor of Philosophy and Higher Degrees, and should be read in conjunction with the regulations for those degrees.

The ‘Department’ is the Department or School or other academic unit in which the candidate is registered, and the ‘Head of Department’ is the head of that academic unit.

Registration
1 a The recommendation for registration by the Head of Department is to include:

(i) the proposed date of registration
and
(ii) nominations for supervisors
and
(iii) satisfactory evidence that the candidate meets the admission criteria and has the ability to follow the proposed programme of study
and
(iv) confirmation that the School/Department accepts responsibility for making satisfactory supervision arrangements and providing research resources and facilities over the whole enrolment for the degree.

b The Board of Graduate Studies will appoint two supervisors for each candidate, or one supervisor and one adviser, the main supervisor being a staff member of the Department. The supervisor(s) must be actively involved in research in the candidate’s general field, and must either hold a doctoral degree or be appropriately qualified and experienced.
c Candidates wishing to present and defend a thesis in Māori must, before applying to the Head of Department to be registered, obtain the permission of the Pro Vice-Chancellor (Māori). When such permission is granted, the Pro Vice-Chancellor (Māori) will make a recommendation in writing to the Board of Graduate Studies as to:
(i) whether the candidate has adequate fluency and literacy in Te Reo Māori in the subject area of the thesis
and
(ii) the likelihood of being able to find appropriately qualified examiners for the thesis.

Reviews of Progress
2 a At the end of each year of study the main supervisor, the candidate and the Head of Department are to submit, through the Associate Dean (Postgraduate) of the Faculty, a joint report to the Board of Graduate Studies on the candidate’s progress. As part of this report the main supervisor and the Head of Department are to make one of the following recommendations:
(i) that the candidate’s registration be continued
or
(ii) that the candidate’s registration be continued subject to specified conditions
or
(iii) that the candidate’s registration be terminated.
The candidate shall be given an opportunity to make written submissions to the Board of Graduate Studies on the above annual report.

b Where a recommendation is made under Clause 2a(ii), the Head of Department will also recommend to the Board of Graduate Studies any specific goals and/or conditions to be met by the candidate and the time in which these are to be completed. At the end of this period the Head of Department and main supervisor will advise the Board of Graduate Studies whether or not these requirements have been met. Registration will terminate if the specified conditions have not been fulfilled to the satisfaction of the Board of Graduate Studies.

Enrolment and Fees
3 a Candidates for the degree must be enrolled and pay all prescribed fees including tuition fees in each academic year for which they are registered. Candidates need not pay tuition fees for any period during which their registration is suspended.

b On enrolment in each academic year every candidate must pay the prescribed fees for that academic year.

c A candidate who submits a thesis or terminates their registration will receive a refund of one-twelfth of the tuition fee paid for each complete month of the period between the date of submission of the thesis or termination of registration and the end of the academic year for which fees have been paid.

d Unless otherwise exempted under the relevant regulations, all candidates must pay the prescribed Building Levy and Student Services fees and any other fees as may be prescribed from time to time. There is no refund of these fees.

e No thesis will be accepted for examination unless all outstanding prescribed fees including tuition fees have been paid for the academic year in which a candidate is registered.

Changes to the Conditions of Registration
4 a The Head of Department may, after consultation with the candidate, make a written recommendation to the Board of Graduate Studies via the Faculty Associate Dean (Postgraduate) for changes in the conditions of registration for the candidate. After considering a recommendation from the Head of Department, the Board of Graduate Studies may, after considering any submissions made by the candidate, change the conditions of registration for any candidate.

b When necessary, the Head of Department is to recommend changes to the supervision of the candidate for approval by the Board of Graduate Studies. This will normally be required when a supervisor is granted leave, resigns or retires.

c When the Board of Graduate Studies is satisfied that there is sufficient reason, it may extend a candidate’s submission date. Before approving an extension of submission time the Board of Graduate Studies will require the candidate, the supervisor(s) and Head of Department to agree on the programme of supervision and schedule of research considered necessary for submission by the new date proposed.

d Where a candidate is unable to continue with their research programme because of circumstances beyond their control, the Board of Graduate Studies may suspend their registration for a specified period of time. The conditions of Clause 7g of the Statute for the Degree of Doctor of Philosophy 2011 will apply.
The Board of Graduate Studies may terminate the registration of any candidate who fails to make payment of any prescribed fees including tuition fees, or for any other reason specified in Clause 7h of the Statute for the Degree of Doctor of Philosophy 2011. Before making a decision to terminate a candidate’s registration pursuant to this clause or otherwise, the Board of Graduate Studies will allow the candidate a reasonable opportunity to respond.

Appeals

If a doctoral candidate believes that he or she has been significantly disadvantaged by the examination process, or by any part of the examination process, then a written appeal may be made to the Board of Graduate Studies, setting out the grounds of the appeal. All relevant documents relied upon must be submitted with the appeal. Clauses 10d and 10e of the Statute for the Degree of Doctor of Philosophy 2011 shall then apply.

Candidates, supervisors or Heads of Department may appeal against any decision of the Board of Graduate Studies concerning matters other than examination normally within three months of the making of the decision, on the grounds that:

(i) relevant information which was not available to the Board of Graduate Studies at the time of its making the decision has since become available

and/or

(ii) the procedure adopted in arriving at the decision was unfair.

The appeal must state clearly all grounds relied on by the candidate and attach all relevant documentation. Clause 10b of the Statute for the Degree of Doctor of Philosophy 2011 shall then apply.

The Limitation of Entry Statute 1991

At The University of Auckland this 18th day of February 1991. Pursuant to Section 224 of the Education Act 1989, as amended by the Education Amendment Act 1990, the Council of The University of Auckland hereby makes the following Statute:

1 a This statute may be cited as The Limitation of Entry Statute 1991.

b This Statute came into force on 1 January 1991.

2 Where the Council is satisfied that it is necessary to do so because:

a students cannot be allocated places in appropriate lecture rooms or laboratories at times when they can reasonably be expected to attend

or

b the number of teaching staff does not ensure all students expected to seek a place in a particular programme or course can be adequately taught;

there shall be deemed to be an insufficiency of accommodation or of staff.

3 The maximum number of students that may be enrolled for any such programme or course shall be determined by the Council from time to time after considering any recommendations from Senate and be published in a schedule to this Statute.

4 In determining such maximum number of students the Council may, after securing a recommendation from Senate:

a prescribe academic standards to be achieved as a prerequisite for enrolment for any such programme or course

and

b prescribe other criteria for selection of students to be permitted enrolment for any such programme or course.

5 The Limitation of Entry Statute 1985 is hereby repealed.

Enrolment Limitations 2013

This Schedule is made under the provisions of Clause 3 of the Limitation of Entry Statute 1991.

Limited-entry Programmes and Courses

Because of insufficient accommodation and restrictions on staffing there will be a limitation on the number of students who can be enrolled in 2013 in the programmes and courses listed below.

Approved Limitations

1 Students must apply for a place in any limited entry programme. Unless otherwise specified in the

**C. General Education Courses**

The Schedule for General Education Courses for 2013 was unavailable at time of going to print. The 2013 Schedule can be viewed on the web from mid-December 2012 at www.calendar.auckland.ac.nz
Fees Statute 2001

1 Title and Commencement
This statute may be cited as the Fees Statute 2001 and came into force on 1 January 2001.

2 Interpretation
In this statute unless the context otherwise requires:
‘Building Levy’ means the levy to be paid by each enrolled student towards the provision of University buildings and facilities which provide student support services.
‘Council’ means the Council of The University of Auckland.
‘Domestic Student’ has the meaning given in the Act.
‘Due Date’ is the date specified on the Fees invoice and/or on the student’s account available through Student Services Online.
‘Enrolment’ means enrolment in a programme or course at the University.
‘Enrol’ has a corresponding meaning.
‘Fees Invoice’ means an invoice or an invoice/statement, or online invoice/statement for the fees and charges payable by a student as a condition of enrolment.
‘Foreign Student’ has the meaning given in the Act.
‘Staff Member’ means a member of the staff of the University.
‘Student’ includes a Domestic Student and a Foreign Student who is:
a. duly enrolled as a student of the University
or
b. applying to enrol as a student of the University.
‘Student Loan’ has the same meaning as it has in section 2 of the Student Loan Scheme Act 1992.
‘Student Services Fee’ means the fee paid by an enrolled student for student support services provided by the University.
‘University’ means The University of Auckland constituted under The University of Auckland Act 1961.
‘University Services’ means those services provided by the University that can be accessed by a student on request or application, such as enrolment or the provision of an official academic transcript.

3 Tuition Fees
3.1 The Council may prescribe from time to time Tuition Fees payable by:
a. Domestic Students; in compliance with section 227 of the Act;
and
b. Foreign Students or any categories of Foreign Students; in compliance with section 228 of the Act.

3.2 Tuition Fees may be prescribed either by resolution of the Council or by a schedule to this statute.

3.3 The Tuition Fees prescribed by the Council at the date when this statute comes into force apply until other Tuition Fees are prescribed in place or in addition to them.

4 General Fees
4.1 The Council hereby prescribes the General Fees specified in the schedule.

4.2 The Council may from time to time by resolution vary the amount of, or delete, any General Fee specified in the schedule or prescribe any additional General Fee.

4.3 Any such variation, deletion, or addition shall apply from the date specified in the amending resolution.

5 Additional Fees/Charges
5.1 Faculties and Departments of the University may impose charges to recover costs in providing Students with:
a. Copies of study material and other material relevant to a course or a programme or the means of access to that material;
b. Services incidental to courses or programmes as, for example, field trips and site visits.

6 Payment of Fees and Charges
6.1 Tuition Fees, General Fees and any other charges imposed pursuant to section 5.1 that are included on the Fees Invoice rendered to a Student shall be paid by the student.

6.2 All Students must pay the full amount on their Fees Invoice by the due date.

6.3 Charges imposed on a Student pursuant to section 5.1 that are not included in a Fees Invoice shall be paid by the Student on demand.
6.4 Any instalment of a Student Loan (within the meaning of the Student Loan Scheme Act 1992) that is available to a Student and received by the University in respect of his or her enrolment shall be applied toward payment of the Fees Invoice rendered to that Student on the occasion of that enrolment.

7 Refunds
7.1 The Council may by resolution prescribe from time to time in accordance with sections 227 and 228 of the Act:
a The circumstances in which Domestic Students and Foreign Students are or may be entitled to a refund of all or any part of the Tuition Fees and General Fees paid or payable to the Council; and
b The quantum of those refunds.
7.2 The circumstances in which a refund may be made and the quantum of that refund that pertains when this statute comes into force, continues until a change is prescribed by resolution.
7.3 The Council will take all reasonable steps to ensure that both Domestic Students and Foreign Students are given written notice of the circumstances in which they are or may be entitled to a refund of all or any part of the fees that have been paid or are payable by them to the Council.
7.4 The refund of all or any part of a Tuition Fee or a General Fee that was paid by an outstanding Student Loan shall be applied in reduction of that loan.

8 Non-payment of Fees and Charges
8.1 Where a Student does not pay:
a The Fees Invoice rendered to that Student; or
b A charge for that Student imposed under section 5 on demand;
then, until those fees and charges are paid in full and without prejudice to the right to recover the unpaid fees or charges at law; the Council may:
(i) Delete the enrolment of that Student from a course or courses;
(ii) Withhold the formal notification of the results of any examination of the Student;
(iii) Decline to re-enrol the Student;
(iv) Decline to release the Student’s academic record;
(v) Exclude that Student from the University;
(vi) Withhold any Degree or Diploma certificate from that Student;
(vii) Restrict that student’s access to University Services;
(viii) Charge a late payment fee.
(ix) Impose additional charges to recover legal and collection costs where a third party is engaged to recover those fees and charges.

8.2 Application for Reinstatement
a A student upon whom a penalty is imposed under section 8.1(i) may apply to have his/her enrolment reinstated upon payment of the outstanding amount owing and the Course reinstatement fee as outlined in Schedule – Part A.
b To be eligible to complete course requirements, a student must apply for course reinstatement two weeks before the beginning of the examination period within the semester which enrolment in the course(s) took place.

8.3 A Student upon whom a penalty is imposed under section 8.1 may by giving written notice to the Director, Academic Services within eight days of the penalty having been imposed, apply to the Council or duly constituted Committee of the Council to review the imposition of that penalty. The notice must set out the reasons for the review. The decision of the Council or its Committee is final.

9 Non-attendance
9.1 A Student who stops attending lectures or classes in a course or courses remains liable for the fees prescribed for that course or courses.

10 Revocation
10.1 The Fees Regulations are hereby revoked.
10.2 Notwithstanding the revocation of the Fees Regulations, the Council may recover any unpaid fees or charges levied under those Regulations and impose any of the penalties prescribed in section 8.1 until those fees or charges are paid in full.

</table>

The 2013 schedule of fees for New Zealand citizens and Permanent Residents of Australia and New Zealand was unavailable at time of going to print. The 2013 schedule of fees can be viewed on the web from mid-December 2012 at www.calendar.auckland.ac.nz. To obtain schedules of fees from previous years, please contact the Calendar and Regulations Office, email calendar@auckland.ac.nz.
Notes:

1. The fees listed in this schedule are per point and include the Course and Materials Fee. Enrolment in a standard full-time course load is 120 points per year. Fees will be adjusted on a pro-rata basis where the enrolment is more or less than a standard full-time load.

2. Fees for interfaculty programmes, programmes combining undergraduate and postgraduate courses, or courses selected from more than one listed programme, are calculated by deriving a fee for each course from the fees listed in the schedule above.

3. The Student Services Fee is payable by International Students at the same rates applying to domestic students.

4. From 1 January 2006, new international PhD students are accorded domestic status for the purposes of tuition fees. A new international PhD student is defined as a foreign student enrolled for the first time after 19 April 2005 in a Doctor of Philosophy programme at a New Zealand university.

5. BA(Hons), BCom(Hons), BMus(Hons), BNurs(Hons), BProp(Hons), BSc(Hons) and LLB(Hons) are charged as postgraduate programmes.

International Students

The following notes are intended to be a general guide for international students wishing to be admitted to The University of Auckland. Further information and application details are available from the International Office.

Admission

International students should apply for admission using the Student Services Online application. Intending applicants should note the following general points:

1. All international students enrolling in an undergraduate programme must hold, as a minimum requirement, an acceptable university entrance qualification.

2. All international students seeking admission to graduate or postgraduate programmes must hold, or expect to hold before the start of the programme, a recognised first degree in a relevant discipline.

3. Applicants whose first language is not English are required to provide satisfactory evidence of their proficiency in English. International applicants entering the University on the basis of NCEA or Cambridge International Examinations (CIE) must meet the standard literacy requirements for admission. International applicants entering the University on the basis of qualifications other than NCEA or CIE must meet a specified score in IELTS or TOEFL, or have completed and passed the Foundation Certificate in English for Academic Purposes (FCertEAP), or an approved alternative. The minimum score required in IELTS for admission to an undergraduate programme at the University is an overall score of 6.0 with no less than 5.5 on an individual band. The minimum score required in TOEFL is 550 (paper-based test), with a TWE (essay) of 4.5, or 80 in IBT (Internet-based test) with a writing score of 21. The minimum score required in IELTS for admission to a postgraduate programme at the University is an overall score of 6.5 with no less than 6.0 on an individual band. The minimum score required in TOEFL is 575 (paper-based test), with a TWE (essay) of 4.5, or 90 in IBT with a writing score of 21. Higher requirements may be imposed by faculties for entry to specified undergraduate and postgraduate programmes. For more information on minimum English language proficiency, please visit www.auckland.ac.nz/international/englishrequirements.

4. It is the responsibility of all international students to ensure that they have appropriate and current health insurance for their period of study in New Zealand. Health and travel insurance
is a condition of enrolment, and as such, must be valid for the entire duration of study. A student’s enrolment cannot continue in the event of their insurance cover being declined. Further information and application forms are available from the International Office website www.auckland.ac.nz/uaa/is-health-and-travel-insurance

5 The majority of international students must have a student visa before entering New Zealand. All students must have a valid student visa for the duration of their studies. For further information, including countries from which students may enter without a visa, visit Immigration New Zealand’s website www.immigration.govt.nz.

a An international student is any student who is not a citizen or permanent resident of New Zealand (includes the Cook Islands, Tokelau and Niue) or Australia.

b Every international student must provide the following information to The University of Auckland:
   (i) photocopy of title page of passport and of current visa
   (ii) current Auckland address and contact phone number(s)
   (iii) full name and current address of an emergency contact/next of kin.

c Where a student does not provide evidence of a valid student visa and/or the required contact details then, until that evidence is produced, the Council may:
   (i) delete the enrolment of that student from a course or courses
   (ii) decline to re-enrol the student
   (iii) restrict that student’s access to University services.

6 An offer of admission at the University does not guarantee that the student will be issued with a student visa.

International Student Fees

7 The above fees (refer to Schedule – Part C) apply to students who:
   a are not citizens of New Zealand or Australia (refer note 5a above)
   or
   b do not hold permanent residence status in New Zealand or Australia
   or
   c have been granted a New Zealand Ministry of Foreign Affairs and Trade Fees Scholarship
   or
   d are being fully funded under the New Zealand Ministry of Foreign Affairs and Trade New Zealand Aid Programme
   or
   e are not participating in an official University of Auckland exchange programme.

Note: For information on current fees please visit www.auckland.ac.nz/internationalfees.

International Scholarships

There are several international scholarships available for international students from selected countries identified by the Asian Development Bank-Japan Scholarship Programme (ADB-JSP), the New Zealand Aid Programme: New Zealand Pacific Scholarships, New Zealand Development Scholarships, New Zealand ASEAN Scholars Awards and Commonwealth Scholarships; and Education New Zealand: the New Zealand International Doctoral Research Scholarships (NZIDRS).

The University of Auckland also offers University of Auckland International PhD Scholarships at PhD level for international students from all countries.

Further information on available international scholarships and the international scholarship application process is available at www.auckland.ac.nz/international.

Code of Practice

The University of Auckland has agreed to observe and be bound by the Code of Practice for the Pastoral Care of International Students published by the Ministry of Education. Copies of the Code are available on request from this institution or from the New Zealand Ministry of Education website at www.minedu.govt.nz.

International Student Advisory Services

The International Student Advisers are available to assist students on a wide range of personal and welfare matters. The advisory service is based in the International Student Information Centre, Old Choral Hall, on the corner of Symonds Street and Alfred Street. Phone: +64 9 373 7599 ext 86911.

iSpace

iSpace provides a programme of activities, information, cultural events and welfare advice for international students. iSpace is located on Level 4 of the Student Commons building in Alfred Street. Phone: +64 9 373 7599 ext 82244.
International Student Information Centre
The International Information Centre provides a central campus information service for international students. The International Student Visa Renewal Service is also provided from this location. The International Student Information Centre is situated in Old Choral Hall, on the corner of Symonds Street and Alfred Street. Phone: +64 9 373 7599 ext 87556.

Examination Regulations
These regulations should be read in conjunction with other examination publications which contain more detail and particular instructions. The publications are:

- For staff: Instructions to Examiners and Assessors.
- For students: Examination Instructions – Regulations and General Information, available from Student Services Online.

Requirements
1. In order to be credited with a course, a candidate needs to have:
   a. enrolled in accordance with the Enrolment and Programme Regulations
   b. attended classes to the satisfaction of Senate
   c. completed to the satisfaction of the examiners such oral, practical, written or other tests or assignments as have been prescribed for completion during the course
   d. completed to the satisfaction of the examiners and in accordance with these regulations any examination prescribed by Senate
   e. made any payment due by that candidate to the University.

   Note: Candidates are to be informed by each department of the specific requirements for courses in that department and the extent to which coursework will be taken into consideration in assessing final results. In some cases candidates may not be permitted to sit the examination, as a result of unsatisfactory or incomplete coursework.

Work Other than Examinations
2. a. It is the responsibility of each candidate to ascertain the nature of the requirements for each course from the department or Faculty concerned.
   b. Provided that candidates have met deadlines set for this work, examiners should normally have determined and returned interim or definitive grades for this work before sitting of the examination, if one is prescribed.
   c. Unacknowledged copying or plagiarism in completing this work is treated as an examination offence.

Time of Examinations
3. a. The examination will be held at the times specified in the timetable each year.
   b. A candidate may not be examined in any course or part of a course at any time other than that set down for them in the timetable, except when, with the approval of Senate, a different time may be approved because of special circumstances, provided that there is the payment of the extra fee prescribed in the Fees Statute.

Place of Examinations
4. All students have to sit their examinations at The University of Auckland except when, with the approval of Senate, a different examination centre may be established because of special circumstances, provided that there is the payment of the extra fee prescribed in the Fees Statute.

Special Examination Conditions
5. A candidate who is permanently or temporarily disabled in a manner which affects their ability to undertake examinations under the prescribed examination conditions may, upon production of the appropriate evidence, obtain from one of the following bodies a recommendation which, subject to the approval of Senate or its representative, will enable that candidate to be examined under conditions which take account of the particular impairment: Student Health, Student Counselling or Student Learning.

Direction of Examinations
6. a. The examinations will comprise such written, oral and practical examinations as the examiners may determine.
Where degree regulations or prescriptions permit, or Senate, upon such conditions as it thinks fit, approves, the examiners may in respect of any examination release to the candidates the whole or part of the examination paper in advance of the sitting of the examination.

c Candidates will write out answers to the questions in the presence of a supervisor, who is to be appointed or approved by the Manager, Examinations Office in accordance with detailed instructions furnished by the Examinations Office.

**Materials Permitted in the Examination Room**

7  

a A candidate must not bring to an examination any written or printed matter or any blank paper except by direction of the examiner.

*Note: Candidates are to be informed by each department of the specific books or materials allowed for particular examinations. Details are also explained in the Examination Instructions.*

b (i) All books and papers not approved for use in the examination, along with any spare personal belongings brought to the examination must be left in such part of the room as the supervisor directs.

(ii) The University does not guarantee safekeeping of students' possessions in any circumstances, inside or outside examination rooms. Students concerned about the security of valuable possessions, briefcases etc during examinations will need to make alternative arrangements for their care, or ensure that they do not bring these possessions to the University on days when they are required to attend examinations.

c A candidate may not bring into an examination an electronic calculator except by direction of the examiner. A calculator is defined as an electronic device capable of processing, storing or retrieving information, which has the primary purpose of mathematical calculation. Any calculator permitted to be taken into an examination must be hand-held, self-powered and noiseless. It must not make use of an audible alarm or facilities for 'wireless' transmission or reception of information.

*General Conditions:*

(i) other than spare batteries and calculator, supplementary material (e.g., operating manuals) related to the use and operation of the calculator will not be permitted in the examination room and

(ii) in all cases it is the responsibility of the candidate to maintain the operation and operating power of the calculator.

*Note: Candidates are to be informed by each Department of the specific types of calculators allowed for particular examinations. Details are also explained in the Examination Instructions.*

d No other electronic device is allowed in the examination room unless specified by the examiner.

e Any cellular telephone brought into an examination room must have all functions switched off and must be left in such part of the room as the supervisor directs.

f Any cellular telephone, or electronic device not permitted in an examination room under Regulation 7d, that is found in the possession of a student during an examination will be removed and not returned to the student until after payment of a fine of $100.

g Audible alarms may not be active on any devices permitted in the examination room. Any device that emits an audible sound signal or alarm during an examination will be removed and not returned to the student until after payment of a fine of $150.

h Where specified material or calculators are permitted under items 7a and 7c above, examiners are required to be present at the commencement of the examination to check material brought into the examination room.

i Candidates will be asked to show their student identity cards on entry for verification purposes and must display them on their desk for the duration of the examination.

**Timekeeping of Examinations and Conduct**

8  

a (i) A candidate will not be allowed to enter the room later than exactly halfway through the period specified for writing the examination.

(ii) Latecomers will not be given any extra time for the examination.

b Candidates will be allowed to read their examination papers for a period of not more than 10 minutes before the examination commences but may not use any writing materials until the room supervisor announces that they may do so. During this time and during permitted resting periods, no reference is to be made to any book in an examination where books are allowed.

c Candidates must write out answers to examination questions in the official script book that is
provided by the University unless otherwise directed by examiners in the exam instructions. No part of the script book may be torn out or removed from the examination room.

d A candidate must not communicate with an examiner in regard to an examination either in the script book or otherwise, except through the Director, Academic Services.

e A candidate must not communicate with another candidate in the examination room or copy from another candidate’s answers.

f Candidates will not be readmitted to the examination room after they have left it unless, during the full period of their absence, they have been under approved supervision.

g All paper used during the examination must be handed to the supervisor before the candidate leaves the examination room.

h A candidate will not be permitted to leave the examination before 15 minutes after half of the period specified for writing the examination has elapsed and then only with the permission of the supervisor and upon handing in the script.

i No candidate will be permitted to leave the examination room during the last 15 minutes of the examination.

j A candidate must not continue writing an answer after the supervisor has announced the expiration of time. In no circumstances is any time over and above the time allotted to any examination to be allowed to candidates for reading over their scripts or making any amendment or addition to scripts.

**Misconduct**

9 a Any complaint that a candidate has committed an examination offence will be referred to Senate to determine whether the complaint should be investigated. For the purposes of this Regulation an ‘examination offence’ includes any breach of rules relating to the conduct of examinations and any dishonest practice occurring in the preparation or submission of any work (whether in the course of an examination or not) which counts towards the attainment of a pass in any subject, or otherwise occurs in connection with any examination.

b If Senate determines that a complaint against a candidate should be investigated, it will refer that complaint to the Discipline Committee.

c Where the Discipline Committee is satisfied that a candidate:

(i) has committed a breach of these regulations

or

(ii) has been notified that he or she has failed to comply with any Statute or any other Regulation of the University and (where the failure is capable of remedy) has been given a reasonable time to remedy the failure without having done so;

then the Discipline Committee may:

(iii) suspend for such time as it may prescribe the release to the candidate of the results of any examination

(iv) decline to credit to the candidate’s programme any course or courses

(v) cancel any pass with which the candidate may have been credited in the course or examination in respect of which the breach occurred

(vi) disqualify the candidate from sitting any examination for such period as it may prescribe

(vii) impose any one or more of these penalties.

d The Discipline Committee may also impose, in the circumstances stated in Clause 9b of this Regulation, the following penalties prescribed in Clause 9d of the Disciplinary Statute, that is to say:

(i) a fine not exceeding $1,000

(ii) a limitation or prohibition on attendance at any Class or Classes or the use and enjoyment of any of the Facilities

(iii) a suspension from attendance at the University or any Class or Classes for such a period as it thinks fit

(iv) cancellation of Enrolment of a student at the University or in a programme or training at the University

(v) a penalty in the form of requiring the offender to remove any defacement to University Premises or property or to render services to the benefit of the University or its students

(vi) any one or more of these penalties.

e A candidate upon whom a penalty is imposed under these regulations may apply for a review pursuant to section 11 of the Disciplinary Statute.
Missed Examinations

10 a A candidate who has missed an examination by reporting for it at the wrong time cannot sit that examination at another time except for candidates enrolled for Masters or Bachelors Honours postgraduate degrees, or a Postgraduate Diploma, for whom special arrangements may be made within a period of 24 hours from the start of the scheduled examination.

b Candidates other than those enrolled for Masters or Bachelors Honours degrees, or a Postgraduate Diploma, may apply for a special pass in the missed examination by completing the appropriate form and submitting it to the Director, Academic Services, not later than one week after the missed examination.

c In considering a special pass application, Senate or its representative may take into account the candidate's work in that course or in that subject or a particular element of hardship as it sees fit.

Aegrotat and Compassionate Consideration

11 a An application for Aegrotat or Compassionate Consideration may be made by candidates who have been prevented from being present at an examination or who consider that their preparation for or performance in an examination has been seriously impaired by temporary illness or injury or exceptional circumstances beyond their control, if the following conditions are satisfied:

(i) They must be enrolled for the course.
(ii) The application form must be submitted to the University Health and Counselling Service within one week of the date that the examination affected took place, or if more than one examination has been affected, then within one week of the last of those examinations.
(iii) The medical certificate or statement of exceptional circumstances on the application form must be completed in accordance with Regulations 11b and 11c below.

b In the case of illness or injury, a registered medical practitioner must:

(i) State when the practitioner saw the candidate. This should be on the day of the examination, or if this is not possible, on the day before or the day after. For impaired preparation, the medical certificate should cover a period within the fortnight immediately preceding the examination, unless special circumstances apply.
(ii) Give sufficient detail of the illness or injury to show clearly that the candidate was not responsible for the illness or injury.
(iii) State whether, in the practitioner’s opinion, the illness or injury of the candidate at the time either prevented the candidate from taking the examination, or was likely to have seriously impaired the candidate’s preparation for it or performance in it.

c In the case of exceptional circumstances beyond the candidate’s control, the statement of circumstances must be supported by suitable evidence.

d The application will be considered by Senate or its representative only if the medical or counselling adviser to the University reviews the evidence submitted and confirms that:

(i) the candidate was not responsible for the illness or injury or exceptional circumstances and
(ii) because of the illness or injury or exceptional circumstances the candidate was either prevented from being present at the examination or the candidate’s preparation for or performance in the examination was likely to have been seriously impaired.

e The candidate may be granted an aegrotat or compassionate grade by Senate or its representative if the above conditions are satisfied and there is a recommendation for an aegrotat or compassionate grade from the appropriate Head of Department or Dean.

f To make a recommendation for an aegrotat or compassionate grade, the Head of Department or Dean must certify that:

(i) the candidate’s coursework in the course was well above the minimum pass standard or, where relevant, the minimum standard for a class of Honours, Merit or Distinction and
(ii) for a candidate who sat the examination, the mark attained in the examination was lower than expected taking into account the candidate’s coursework in that course and
(iii) the candidate is in their opinion clearly worthy of a pass in the course or, where relevant, to be awarded First or Second Class Honours, Merit or Distinction.

g If a recommendation is required for a course with no coursework, the Head of Department or Dean may take into account the coursework and examination performance in any other courses for the same degree, where this is available to them.
h When considering the application, Senate or its representative may take into account the candidate’s work in other courses, or approve an aegrotat or compassionate grade other than that recommended, as it sees fit.

i The above is subject to the restrictions that:
   (i) No more than one third of the total points value credited to a degree or diploma may be awarded with an aegrotat or compassionate grade granted under this Regulation.
   (ii) A candidate for a Masters degree, Bachelors Honours Postgraduate degree or a Postgraduate Diploma in which Honours, Merit or Distinction is available may:
        (a) instead of applying for aegrotat or compassionate consideration, apply to re-enrol in all of the courses affected
        or
        (b) apply for aegrotat or compassionate consideration in courses worth up to the points limit specified above, and to re-enrol in any other affected courses in order to retain eligibility for Honours, Merit or Distinction.

j A candidate who applied for Aegrotat or Compassionate Consideration in any course may, in exceptional circumstances and on a recommendation from the Head of the Department, be granted permission by Senate or its representative to take another examination, either written or oral, in that course.

k The provisions of Regulation 11 apply to:
   (i) Any final written examination presented for a course for a degree, diploma, or certificate.
   (ii) Any final practical examination presented for a course for a degree, diploma, or certificate, other than a Music Performance examination.

l The provisions of Regulation 11 apply (with necessary changes) to:
   (i) The final submission in each year of work for the practical subjects for the Degree of Bachelor of Fine Arts, Postgraduate Diploma in Fine Arts or the Degree of Master of Fine Arts.
   (ii) The final submission in each semester of studio work for the Degrees of Bachelor of Architectural Studies and Bachelor of Architecture as if such final submission were an examination and as if the date upon which such final submission was due were the date of examination.

Note: The fees for Aegrotat and Compassionate Consideration are listed under the Fees Statute in this Calendar.

Reconsideration
12 a Following the decision of Senate on an application for Aegrotat or Compassionate Consideration, the candidate may apply to the Director, Academic Services, for reconsideration of that decision.

b An application for reconsideration must be made:
   (i) in writing to the Director, Academic Services, no later than four weeks after the student is notified of Senate’s decision and
   (ii) must be accompanied by further evidence in support of the application for aegrotat or compassionate consideration.

c Where the application seeks reconsideration of the effect of any medical evidence previously supplied or consideration of any additional medical evidence or both then:
   (i) If the medical or counselling adviser who reviewed the medical evidence previously submitted did not confirm that the requirements of Regulation 11d(i) and 11d(ii) had both been met then all the medical evidence shall be referred to a medically qualified independent person (‘Referee’) to determine that question. The Referee’s decision will be final and conclusive.
   (ii) If the requirements of Regulation 11d(i) and 11d(ii) have been found (either on the first application or by a Referee on reconsideration):
        (a) not to have been met, then the application shall be declined;
        (b) to have been met, then Senate or its representative shall consider the other factors to be taken into account in terms of Regulation 11 and determine whether or not to grant the application and that decision shall be final and conclusive.

Written Tests
13 Where a percentage of the marks awarded for a course is allocated to a prior written test, and candidates are prevented by temporary illness or injury or exceptional circumstances beyond their control from sitting the test, or consider that their performance in the test has been seriously impaired by any of those causes, then, if the conditions in Regulations 11c to 11f (with the necessary changes) are complied with, the candidates may on application and at the discretion of Senate:
Results Determination

14 In determining a candidate's result the examiners:
   a may take into consideration the work done by the candidate during the course
   b are to give due weight to reports on practical work done by the candidate wherever these are required
   c are to include marks obtained by the candidate where Senate has allotted a percentage of marks for on-course assessment in that course.

Grades and Marks

15 Pass Marks
   A pass mark is 50 percent or over.

18 Conceded Passes
   a Conceded passes apply only to courses taken towards:
      (i) a Bachelors degree
      or
      (ii) an undergraduate diploma comprising not fewer than 240 points
      or
      (iii) Parts I, II or III of the Bachelor of Engineering (Honours) degree
      or
      (iv) Parts I, II or III of the Bachelor of Engineering (Honours) component of a conjoint degree. Courses taken towards other Bachelors (Honours) degrees are not eligible for conceded passes.

   b A candidate may, at the discretion of the relevant Faculty, be considered for a conceded pass. No application by the candidate is required.

   c A conceded pass, if granted, may not be declined by the candidate.
A conceded pass will apply only to the programme for which it is awarded and may not be transferred or credited to any other programme.

A candidate granted a conceded pass in a course who wishes to take that course again may do so only for Certificate of Proficiency.

For the degrees of:
- Bachelor of Arts – BA
- Bachelor of Business and Information Management – BBIM
- Bachelor of Commerce – BCom
- Bachelor of Dance Studies – BDanceSt
- Bachelor of Education (Teaching) – BEd(Tchg)
- Bachelor of Health Sciences – BHSc
- Bachelor of Human Services – BHumServ
- Bachelor of Music – BMus
- Bachelor of Performing Arts – BPerfArts

- Bachelor of Property – BProp
- Bachelor of Science – BSc
- Bachelor of Social Sciences (Human Services) – BSocSci(Human Services)
- Bachelor of Social Work – BSW
- Bachelor of Theology – BTheol

Conceded passes will be awarded by a meeting of the Examiners for the Faculty concerned, provided that the Dean of the Faculty has the power to award where such power is authorised by the Examiners, in accordance with the following provisions.

One course to a maximum value of 30 points may be conceded provided:
1. the concession will allow the student to complete the degree
2. the course conceded is not a course counting towards the student’s major requirements
3. the student obtained a grade of D+ in the course
4. the result was achieved in the last two semesters of enrolment, one of which may be a Summer School.

Note: A conceded pass will not be given for a course failed at another university.

For the degree of LLB:
Conceded passes will be awarded by a meeting of the Examiners of the Faculty, provided that the Dean of the Faculty has the power to award where such power is authorised by the Examiners, in accordance with the following provisions:
1. one course to a maximum value of 20 points may be conceded
2. the concession will allow the student to complete the degree
3. the course is not one of the core law subjects prescribed by the New Zealand Council of Legal Education
4. the student obtained a grade of D+ in the course
5. the result was achieved in the last two semesters of enrolment, one of which may be a Summer School.

For the degrees of:
- Bachelor of Architectural Studies – BAS
- Bachelor of Architecture – BArch
- Bachelor of Engineering – BE
- Bachelor of Engineering (Honours) – BE(Hons)
- Bachelor of Fine Arts – BFA
- Bachelor of Optometry – BOptom
- Bachelor of Planning – BPlan
- Bachelor of Technology – BTech
- Bachelor of Visual Arts – BVA

Conceded passes will be awarded by a meeting of the Examiners for the Faculty concerned, provided that the Dean of the Faculty has the power to award where such power is authorised by the Examiners, in accordance with the following provisions:
1. that by the award of a conceded pass the student will complete a Part or all courses enrolled for in that year
2. a maximum of 20 points per Part and a maximum of 20 points in any one academic year may be conceded
3. that to be eligible for the award of a conceded pass in any course the student must have achieved a grade of D+ and an overall GPA of 2.5 or better in that year.
For the degree of BEd(TESOL):
Conceded passes will be awarded by a meeting of the Committee of BEd(TESOL) Examiners, provided that the Dean has the power to award where such power is authorised by the Examiners, in accordance with the following provisions:
(i) that by award of a conceded pass the student will complete that Part
and
(ii) a maximum of 15 points in any one Part be conceded
and
(iii) that to be eligible for the award of a conceded pass the student must have achieved a grade of D+ in that course (or courses) and an overall GPA of 2.5 or better in that Part.

Where a candidate has a fail grade of D+ in a course (or courses) and the Examiners deem that the failure(s) may be redeemable by satisfactory completion of additional work, then a pass in that Part may be awarded under the following provisions:
(iv) that the award of a grade for that course (or courses) be deferred until a prescribed course of additional study and/or examination be completed to the satisfaction of the Examiners
and
(v) deferred results be limited to a maximum of 15 points in any Part
and
(vi) that to be eligible for a deferred result a student must achieve an overall GPA of 2.5 or better
and
(viii) that the reassessed grade in that course (or courses) be no greater than a grade of C+.

Medical and Health Sciences
(i) For the degree of MBChB, Part III:
Conceded passes will be awarded by a meeting of the Board of MBChB Examiners, provided that the Dean has the power to award where such power is authorised by the Examiners, in accordance with the following provisions:
(a) that by award of a conceded pass the student will complete Part III
and
(b) one course to a maximum value of 30 points be conceded
and
(c) that to be eligible for the award of a conceded pass the student must have achieved a grade of D+ in that course (or courses) and an overall GPA of 2.5 or better.

Where a candidate has a fail grade of D or D+ in a course (or courses) and the Examiners deem that the failure(s) may be redeemable by satisfactory completion of additional work then a pass in that Part may be awarded under the following provisions:
(d) that the award of a grade for that course (or courses) be deferred until a prescribed course of additional study and/or examination be completed to the satisfaction of the Examiners
and
(e) deferred results be limited to no more than two courses with a total maximum value of 45 points
and
(f) that to be eligible for a deferred result a student must achieve an overall GPA of 2.5 or better
and
(g) that the reassessed grade in that course (or courses) be no greater than a grade of C+.

(ii) For the degree of BNurs, Part I:
Conceded passes will be awarded by a meeting of the Committee of BNurs Examiners, provided that the Dean has the power to award where such power is authorised by the Examiners, in accordance with the following provisions:
(a) that by award of a conceded pass the student will complete that Part
and
(b) a maximum of 30 points in the Part be conceded
and
(c) that to be eligible for the award of a conceded pass the student must have achieved a grade of D+ in that course (or courses) and an overall GPA of 2.5 or better in the Part.

Where a candidate has a fail grade of D or D+ in a course (or courses) and the Examiners deem that the failure(s) may be redeemable by satisfactory completion of additional work then a pass in that Part may be awarded under the following provisions:
(d) that the award of a grade for that course (or courses) be deferred until a prescribed course of additional study and/or examination be completed to the satisfaction of the Examiners
and
(e) deferred results be limited to a maximum of 30 points in any Part
and
(f) that to be eligible for a deferred result a student must achieve an overall GPA of 2.5 or better
and
(g) that the reassessed grade in that course (or courses) be no greater than a grade of C+.

(iii) For the degree of BPharm:
Conceded passes will be awarded by a meeting of the Committee of BPharm Examiners, provided that the Dean has the power to award where such power is authorised by the Examiners, in accordance with the following provisions:
(a) that by award of a conceded pass the student will complete that Part
and
(b) a maximum of 15 points in any one Part be conceded
and
(c) that to be eligible for the award of a conceded pass the student must have achieved a grade of D+ in that course (or courses) and an overall GPA of 2.5 or better in that Part
and
(d) a maximum of two conceded passes are awarded for the degree.

Where a candidate has a fail grade of D or D+ in a course (or courses) and the Examiners deem that the failure(s) may be redeemable by satisfactory completion of additional work then a pass in that Part may be awarded under the following provisions:
(e) that the award of a grade for that course (or courses) be deferred until a prescribed course of additional study and/or examination be completed to the satisfaction of the Examiners
and
(f) deferred results be limited to a maximum of 30 points in any Part
and
(g) that to be eligible for a deferred result a student must achieve an overall GPA of 2.5 or better
and
(h) that the reassessed grade in that course (or courses) be no greater than a grade of C+.

k Undergraduate Diplomas
For all undergraduate diplomas comprising 240 points or more a conceded pass may be awarded by a meeting of the Examiners for the Faculty concerned, provided that the Dean of the Faculty has power to award where such power is authorised by the Examiners, in accordance with the following provisions.

One course to a maximum value of 20 points may be conceded provided:
(i) that the conceded pass may only be awarded where it would permit the student to complete his/her diploma
and
(ii) that the student has obtained a grade of D+ in that course.

l Conjoint Degrees
For all conjoint degrees consideration for the award of conceded passes will be in accordance with the provisions for the particular degree as set out in (i), (g) and (h) of this section.

Deferred Results

19 a Bachelor of Medicine and Bachelor of Surgery
MBChB Parts II, IV and V
Where a student has not achieved a pass in a particular component or components of a Part the Examiners may withhold the result pending the completion of specified additional work and/or examination to the satisfaction of the Examiners.

If in the opinion of the Examiners for MBChB a particular weakness in a component or components is such that it cannot be addressed by the setting of additional work and/or examination, the student will fail that Part.

MBChB Part VI
Where a student has not achieved a pass in a particular component or components of this Part, the Examiners may withhold the result and require a further period of assignment to a department. This will involve postponement of qualification.

If in the opinion of the Board of MBChB Examiners a particular weakness in a component or components is such that it cannot be, or has not been, addressed by this additional work, the student will fail the Part.

b Bachelor of Nursing
BNurs Parts II, III
Where unsatisfactory performance occurs in the clinical practice component of courses in Part II
and Part III of the programme, the result of the course will be deferred. In these circumstances, the candidate will be required to complete additional work to the satisfaction of the examiners.

c **Bachelor of Optometry**

Where a weakness occurs in the clinical practice component in certain double-semester Stage III and Stage IV courses, the result of the course or courses will be deferred. In these circumstances, the candidate will be required to complete additional work to the satisfaction of the examiners. The work will be examined in the following February.

**Recount of Marks**

20 By making application not later than seven weeks after the last day of the examination period, any candidate sitting a written examination only may have the marks awarded for their examination script recounted. A recount of marks covers a careful rechecking of the marks recorded by the examiner and ensures that no answer, or any part of an answer, submitted by a candidate has been overlooked.

*Note: For the prescribed fee for an Application for Recount of Marks see the Fees Schedule in this Calendar.*

**Availability of Scripts**

21 a By making application during the three months after the end of the examination period for the examination, a candidate may obtain a copy of their examination script.  
b By making application not before three months and no later than four months after the end of the examination period for the examination, a candidate may request the return of their original examination script.

*Note: No further consideration of the examination script will be undertaken after the original script has been returned to the student. Examination scripts will normally be retained only for six months after the examination period and thereafter will be destroyed.*

**Theses and Dissertations**

22 Where a thesis or dissertation is required as part of an examination the following conditions apply.

a **Theses**  
Details of the submission and binding requirements for a thesis are listed in the General Regulations – Masters Degrees.

b **Dissertations**  
Binding requirements for dissertations will be defined by the Faculty.

c **Degree of Doctor of Philosophy**  
(i) Details of the submission and binding requirements for PhD theses are contained in the Statute for the Degree of Doctor of Philosophy.  
(ii) On completion of the examination, the candidate is to submit either three hardbound copies of the thesis or two hardbound copies and one digital copy of the thesis to the Graduate Centre as specified in Clauses 9s and 9t of the Statute for the Degree of Doctor of Philosophy. A short abstract not exceeding 350 words is to be included with each copy and bound into the hardbound copies of the thesis. The Graduate Centre is to deposit two hardbound or one hardbound and one digital copy with the University Library. The disposal of the third hardbound copy shall be at the discretion of the Head of the relevant Department.

*Note: Candidates are recommended to obtain the booklet Guide to Theses and Dissertations from the Graduate Centre before proceeding with the typing and binding of the thesis or dissertation. A clear, legible type style is to be used.*

23 In any thesis or dissertation, plagiarism or unacknowledged or unauthorised copying is not acceptable and will be treated as an examination offence.

**Embargoing of Theses**

24 a A thesis will normally be available for public consultation unless there are compelling reasons for restricting access to it.  
b Access to a thesis may be restricted, normally for a maximum of two years, if it contains confidential and sensitive material that would:

(i) breach prior contractual arrangements with outside organisations  
or
(ii) prevent or jeopardise an application for a patent, licence, or registration  
or
(iii) provide good reason for refusing to disclose the contents of the thesis, consistent with the provisions of the Privacy Act (1993) or the Official Information Act (1982).

c An application for an embargo is to be made by the author of the thesis and/or the supervisor, through the Head of Department to the Dean of Graduate Studies.
d The embargo will apply to all copies of the thesis, whether hard copy or electronic.

25 The University Librarian or a delegated authority has a right to make and supply copies of theses and dissertations in terms of Section 56 of the Copyright Act (1994) unless the author has imposed conditions restricting the reproduction of their work for a stipulated period.

Failed Theses
26 a Where a thesis or dissertation has failed the examination, that thesis or dissertation is not to be deposited in the University Library or digital repository.
   
b Where a thesis or dissertation has passed, but requirements for the degree have not been met, the thesis or dissertation is not to be deposited in the University Library or digital repository.

Conferment of Academic Qualifications and Academic Dress Statute 1992

1 Every degree and every diploma of the University shall be conferred or awarded in pursuance of a resolution of the Council and at a meeting of the Council.

2 Every degree and every diploma of the University shall be conferred or awarded by the Chancellor, or if they are absent from the meeting or incapacitated by sickness or otherwise, by the Vice-Chancellor or Pro-Chancellor. The Council may also authorise another person to confer degrees or award diplomas at a particular ceremony.

3 Every recipient of a degree shall receive a certificate in appropriate form, under the Common Seal of the University, that their degree has been conferred and stating the class of honours (if any awarded).

4 Every diploma shall be in appropriate form under the Common Seal of the University.

5 At a specified time or times each year the Council shall meet in convocation of the University to confer degrees and award diplomas. Persons wishing to have their degree conferred or diploma awarded (whether in person or in absentia) at such a ceremony shall make application to the Registrar not later than the date specified in the Calendar for this purpose.

6 The form of words to be used by the Chancellor, the Vice-Chancellor, Pro-Chancellor or such other person as may have been appointed by the Council to confer degrees or to award diplomas shall be as follows:
   a Degrees
   'By the authority vested in me by resolution of The University of Auckland Council I [NAME], [POSITION], confer the degrees stated upon those who, within their several faculties, have satisfied the requirements of this University.'

   b Diplomas
   'By the authority vested in me by resolution of The University of Auckland Council I [NAME], [POSITION], award the diplomas stated upon those who, within their several faculties, have satisfied the requirements of this University.'

7 In appropriate circumstances, the form of words to be used by the Chancellor, the Vice-Chancellor, Pro-Chancellor or such other person as may have been appointed by the Council to confer degrees and to award diplomas shall be as follows: 'By the authority vested in me by resolution of The University of Auckland Council I [NAME], [POSITION], confer the degrees and award the diplomas stated upon those who, within their several faculties, have satisfied the requirements of this University.'

8 The academic dress worn by members of the University at any public ceremony of the University shall be the costume appropriate to their degree, but doctors may on special occasions wear a scarlet gown and graduates admitted ad eundem statum may wear the academic costume of their own university. Unless the holder of a diploma is also a graduate the only academic dress they may wear is an undergraduate gown and the scarf appropriate to their diploma.

9 The academic costumes of The University of Auckland shall be as follows:
   a The robe for the Chancellor of the University is a blue damask gown with facings of gold lace, bearing on each shoulder the coat of arms of the University. The cap is a black velvet trenched with gold lace and tassel. The robe for the Pro-Chancellor is a black gown with facings of blue silk and gold lace, bearing on each shoulder the coat of arms. The cap is a black velvet trenched with gold tassel. The robe for the Vice-Chancellor is a blue silk gown with facings of silver lace, bearing on each shoulder the coat of arms. The cap is a black velvet trenched with silver lace and tassel. The robe for the Registrar is a gown of black silk with facings of blue silk, bearing on each shoulder the coat of arms. The cap is a black velvet trenched with a black silk tassel. The academic dress for Graduation Officials shall be the costume appropriate to their degree. In addition, the gown shall bear on each shoulder the coat of arms of the University, and the trenched shall have a blue tassel. Graduation Officials who are not graduates shall wear an undergraduate gown bearing the coat of arms of the University on each shoulder.

   b The gown for a Bachelors degree is as for the Cambridge Bachelor of Arts. The gown for a Masters degree is as for the Cambridge Master of Arts. The hood for every degree is the size and shape for the Cambridge Master of Arts. The hood for a Bachelors degree is lined with
coloured satin and bordered with white fur. The hood for a Masters degree is lined with coloured satin only. The hoods for the Bachelors and Masters degrees are as follows:

The hood for a Bachelor with Honours degree is as for the relevant Bachelors degree, with the addition of a 25mm ribbon band on the outside of the hood, alongside the fur. The colour of the ribbon band is the same colour as the lining.

The hood for a Bachelors degree for which the prerequisite is another Bachelors degree within the same Faculty, is as for a Bachelor with Honours degree, with the addition of a second 25mm band at a distance of 25mm from the first band. Both bands are the same colour as the lining.

Where there is more than one Masters or Bachelors degree within a Faculty, the hoods for such degrees are lined with satin in the colour approved by Council. The first such degree will have no ribbon band, but subsequent degrees of this nature will be distinguished by the addition of a 25mm band on the edge of the satin. The colour of the ribbon band for the first subsequent degree within a Faculty will be dark brown, and any further subsequent degrees of this nature within the Faculty will be in another colour which is not taupe, nor unless otherwise approved, the colour used to line the hoods for any other degree.

The hood for an Interfaculty Bachelors degree or Masters degree is lined with the colour of the Faculty primarily responsible for the degree, with the addition of a 25mm ribbon band on the edge of the satin. Where there are two Faculties involved, the colour of the ribbon band is the colour of the hood lining of the second Faculty. Where more than two Faculties are involved, the colour of the ribbon band is taupe.

c The gown for the degrees of Doctor of Clinical Psychology, Doctor of Education, Doctor of Fine Arts, Doctor of Medicine, Doctor of Music, Doctor of Musical Arts and Doctor of Pharmacy is as for the Cambridge Master of Arts with the addition of facings of 50mm wide satin. The hood is made wholly of satin and this and the facings of the gown are of the following colours for the different degrees:

Clinical Psychology dark blue
Education emerald green
Fine Arts gold
The gown for the degree of Doctor of Philosophy is as for the Cambridge Master of Arts, with the addition of 100mm satin facings, made up of 75mm of scarlet edged with 25mm of gold. The hood is made wholly of scarlet satin.

The gown for the degrees of Doctor of Engineering, Doctor of Laws, Doctor of Literature, and Doctor of Science is as for the Cambridge Master of Arts, but is made of black silk, or scarlet silk or cloth. The hood is made wholly of satin, and is of the following colours for the different degrees:

- **Engineering**: dark violet
- **Laws**: light blue
- **Literature**: pink
- **Science**: dark blue

The cap for all graduates other than Doctors and the officers of the University is a black trencher with a tassel. The cap for all Doctors other than officers of the University is as for the full dress Cambridge Doctor of Philosophy, namely a round black velvet bonnet with a gold cord around the crown ending in tassels.

The scarf for a diploma is to be made of the same black material as the gown with a band of colour in plain satin as in existing hoods down the centre edge. The colour is to match the degree cluster most closely associated with the diploma. The lining is to be the same colour as the band. The width of the scarf at the base is to be 140mm in total, the black being 100mm and the colour 40mm, and narrowing behind the neck. A band of the lining colour is to be stepped down from the inside edge to the outside edge of the black material at the base of each side of the scarf. The diploma scarves are as follows:

- **Architecture**: lemon band and lining
- **Arts**: pink band and lining
- **Business and Economics**: burgundy band and lining
- **Creative and Performing Arts**: pink band and lining
- **Education**: emerald green band and lining
- **Engineering**: dark violet band and lining
- **Fine Arts**: gold band and lining
- **Laws**: light blue band and lining
- **Medical and Health Sciences**: crimson band and lining
- **Music**: white band and lining
- **Pharmacy**: grey-green band and lining

- **Property**: silver grey band and lining
- **Science**: dark blue band and lining
- **Theology**: forest green band and lining

The gown for the honorary degrees of Doctor of Engineering, Doctor of Laws, Doctor of Literature, Doctor of Music, Doctor of Science and Doctor of The University of Auckland is as for the Cambridge Master of Arts, but is made of scarlet satin. The hood is made wholly of satin, and is of the following colours for the different degrees:

- **Engineering**: dark violet
- **Laws**: light blue
- **Literature**: pink
- **Music**: white
- **Science**: dark blue
- **The University of Auckland**: University blue

The gown for a Fellow of The University of Auckland will be an undergraduate gown of the colour University Blue bearing on the left front lapel the coat of arms of the University. No hood or cap shall be worn.
Availability of Academic Dress

The Kate Edger Educational Charitable Trust trading as Academic Dress Hire owns a stock of academic gowns, hoods, scarves, trenchers and Tudor bonnets. These are available for hire Monday to Friday from 8.30am until 5pm throughout the year. Details may be obtained from Academic Dress Hire, 17 George Street, Newmarket, or www.academicdresshire.co.nz. A student completing the requirements for a degree or diploma will receive information regarding the hire of academic dress for the graduation ceremony with their invitation to apply to graduate.

3 The Council shall have the power to confer the following honorary degrees in accordance with the provisions of the Honorary Degrees Regulations 1998.

Doctor of Engineering  
Doctor of Literature  
Doctor of Laws  
Doctor of Music  
Doctor of Science  
Doctor of The University of Auckland  
A Masters degree in any Faculty of the University

4 The Council may confer a degree or award a diploma previously included in a University of Auckland Degrees and Diplomas Statute on a person who had been enrolled in a programme leading to that qualification prior to its deletion from the Statute provided that person:

a  had completed a significant component of the course of study prior to the deletion of the degree or diploma  
and  

b  has completed a course of study in accordance with the provisions of the regulations for that degree or diploma.

5 The Degrees Statute 1990 is hereby repealed.

The Honorary Degrees and Awards Statute 1998

Pursuant to sections 192 and 194 of the Education Act 1989 and section 20 of The University of Auckland Act 1961 the Council of the University makes the following statute:

1 This Statute may be cited as the Honorary Degrees and Awards Statute 1998 and shall come into force on the 16 March 1998.

2 The Council may at its discretion:

a Confer the following honorary degrees:
   Doctor of Laws  
   Doctor of Science  
   Doctor of Literature  
   Doctor of Music  
   Doctor of Engineering
Doctor of The University of Auckland
A Masters degree in any Faculty of the University;
and
b Award the title 'Fellow of the University' ('Fellowship').

3 The University Honours Committee of the Council shall consider nominations and make recommendations to the Council for the conferring of any honorary degree or fellowship under this Statute.

4 The University Honours Committee shall henceforth consist of:
a the Chancellor who shall be the Chair of the Committee
b the Vice-Chancellor
c the Pro-Chancellor
d one member appointed by the Council
e two members of Senate elected by Senate
f a student member of the Council.

5 The Council may, from time to time, approve guidelines for the award of honorary degrees and fellowships and, in making its recommendations, the University Honours Committee shall ensure that it complies with all those guidelines.

6 The Council may also, in its discretion and on the recommendation of the University Honours Committee:
a award the title 'Professor Emeritus' to a retired member of the academic staff who held the office of a Professor of the University immediately before his or her retirement
b award the title 'University Librarian Emeritus' to a retired member of staff who held the office of University Librarian immediately before his or her retirement and who has a record of long and distinguished service to the University as the University Librarian.

7.1 The University Honours Committee may recommend to the Council, for the conferment of an Honorary Doctor’s degree:
a Any person who:
(i) is academically distinguished, or has made a distinguished contribution in creative or artistic fields, and has, or has had, some intimate connection with the University
or
(ii) has shown strong interest in the well-being of the University by benefactions, or in other appropriate ways
or
(iii) is of international repute and is visiting, or has visited the University in an official capacity
b Any other person approved for the purpose after consultation with Education Committee on behalf of Senate.

7.2 The University Honours Committee may recommend to the Council, for the conferment of an Honorary Masters degree:
a any member of the professional staff who has given long and distinguished service to the University
or
b any member of the academic staff who does not hold a degree
or
c any other person approved for the purpose after consultation with Education Committee on behalf of Senate.

7.3 The University Honours Committee may recommend to the Council, for the conferment of a Fellowship, a person who:
a has made a unique and valuable contribution to the University
and
b is not a permanent member of staff.

8 A nomination for the conferment of an honorary degree or a fellowship may be made by any three persons each of whom is a member of the Council or of Senate or of both these bodies; and shall be made confidentially to the Vice-Chancellor in accordance with the relevant provisions of the guidelines in force under Clause 5 of this Statute.

9 The Honorary Degrees Regulations 1978 and The Fellow of The University of Auckland Statute 1992 are both hereby repealed.
Guidelines for the Award of Honorary Degrees and Fellowships

1 A nomination for an honorary degree or for the award of a fellowship shall be made confidentially in writing to the Vice-Chancellor and signed by three persons each of whom shall be a member of the Council or of Senate or of both these bodies.

2 Each nomination shall be accompanied by a statement outlining in sufficient detail the career, standing and qualifications of the nominee and the grounds under Clauses 7.1, 7.2 or 7.3 for conferring the degree or awarding the fellowship.

3 The Vice-Chancellor shall refer each nomination and the accompanying statement to the University Honours Committee of Council.

4 If Council approves a recommendation that an honorary degree be conferred or a fellowship be awarded the Vice-Chancellor shall invite the nominee to accept the award.

5 The conferring of honorary doctorate degrees shall not be confined to a graduation ceremony but shall be arranged at the discretion of the Council.

6 The conferring of an honorary Masters degree will, except in very exceptional circumstances, take place at a graduation ceremony.

7 The award of a Fellowship shall be arranged at the discretion of the Council.

The Disciplinary Statute 1998

1 Title and Commencement
This Statute may be cited as The Disciplinary Statute 1998 and comes into force on 1 March 1998.

2 Interpretation
‘Appeals Committee’ means the Committee constituted by the Council with delegated authority to exercise the powers conferred on it by Statute.
‘Authorised Person’ means the Vice-Chancellor, the Registrar, any Staff Member, a Warden or a member of the staff of the Students’ Association.
‘Class’ means any lecture, tutorial, seminar, laboratory, or other assembly of Students at which tuition is being given and includes any lecture or address within the University at which Students are present.
‘Council’ means the Council of the University.
‘Discipline Committee’ means the committee constituted by the Council with delegated authority to exercise the powers conferred on it by Statute.
‘Enrolment’ means enrolment in a course of study or training at the University and ‘enrol’ has a corresponding meaning.

- Common Rooms
- Physical Fitness Facilities
- Playing Fields
- Student Union
- The Maidment Theatre.
‘Field Trip’ means a trip beyond University Premises undertaken by Students and conducted by the University for the purposes of study or research.
‘Hall’ means any hostel or hall of residence or other student accommodation under the control of the University and intended for the occupation of students.
‘Registrar’ means the person for the time being holding office as the Registrar of the University.
‘Rule’ means any rule of conduct made by the Council, Senate, or any Authorised Person of which notice has been given:
- by publication in the University Calendar; or
- by other means; or
- to the person charged with misconduct before the alleged misconduct has occurred.
‘Senate’ means Senate of the University.
‘Specified Statutes’ means the Examination Regulations, the Fees Regulations, the Information and Communications Technology Statute, the Library Statute as published in the most recent University Calendar and includes any other Regulations or Statutes so published which prescribe offences for misconduct (whether or not penalties are also prescribed for those offences).
‘Staff Member’ means a member of the staff of the University.
‘Statute’ means a Statute made by the Council and includes this Statute, a Specified Statute and all Regulations of the University made before 1 January 1991 and not since revoked.
‘Student’ means a duly enrolled student of the University and includes, for the purposes of section 3 of this Statute, a person applying to enrol.

‘Students’ Association’ means the Auckland University Students’ Association Incorporated.

‘Student Union’ means University Premises that are for the time being administered by the Students’ Association.

‘University’ means The University of Auckland.

‘University Premises’ means land and buildings owned by the University or of which the University has possession or control; and includes any Hall and (for the avoidance of doubt) the Student Union.

‘Vice-Chancellor’ means the person holding office for the time being as the Chief Executive of the University; and includes any person for the time being:

a acting in that capacity; or

b acting as a Deputy of the Chief Executive.

‘Warden’ means the person for the time being in charge of any Hall; and includes a deputy of that person.

Good Government and Discipline

3 Observance of Statutes and Rules

a Every Student shall observe and comply with the provisions of the Statutes and Rules of the University.

b Students who, on Enrolment or in the course of their attendance at the University, are subject to conditions imposed on their attendance to prevent disturbance or to maintain good order and discipline shall comply with those conditions.

c The Discipline Committee shall have the power to hear and determine recommendations from the Registrar that a person not be permitted to enrol as a student of the University consistent with section 224(13)(a) of the Education Act 1989, on the grounds that the person is not of good character or has been guilty of misconduct or a breach of discipline.

4 Prohibitions and Directions

a No Student or Staff Member shall:

(i) Willfully act (on University Premises or elsewhere) in a manner contrary to the good government of the University or so as to bring the University into disrepute.

(ii) Willfully damage, deface or destroy University Premises, any property on University Premises or any property of a Student, a Staff Member, or the Students’ Association.

(iii) Willfully impede the activities of the University, whether in teaching, research or otherwise.

(iv) Willfully obstruct any Authorised Person in the due performance of the functions or duties of that Authorised Person.

(v) Willfully create any nuisance in or on University Premises.

(vi) Willfully interfere with the pursuit of work or study by any Student or Staff Member or his or her proper enjoyment of the amenities of the University.

(vii) Be in University Premises when the Student knows or ought to know that he or she is not entitled to be there at that time.

(viii) Smoke in any place where smoking is prohibited in terms of the Smoke Free policy of the University for the time being.

(ix) Cause any unnecessary disturbance or annoyance to persons living in residential quarters on University Premises or to residents in the immediate neighbourhood of University Premises.

(x) Ride, drive or park a cycle or motor vehicle in the University grounds except in compliance with the directions notified from time to time regulating the entry, exit and speed of cycles and vehicles and the places where they may be parked.

(xi) Be accompanied by a dog (other than a guide dog) or any other pet on University Premises.

(xii) Refuse any reasonable request to identify himself or herself by an Authorised Person who has reason to suspect that the Student is involved in a breach of any Statute or Rule.

(xiii) Post notices elsewhere than on the permanent notice boards provided for the purpose and except in compliance with the conditions prescribed by the Executive of the Students’ Association in that regard.

(xiv) Bring or consume alcoholic liquor on University Premises other than:

(a) on licensed premises; or

(b) any other premises where permission has been given to consume alcohol and then only in accordance with any conditions imposed.

(xv) Use the Personal Identification Card or Access Card of another Staff Member or Student, or permit his or her Personal Identification Card or Access Card to be used by another person.

b All Students shall comply with:

(i) Such directions as may reasonably be given by an Authorised Person to maintain good order and discipline.
(ii) (While in a Class): any requirements as to behaviour or attire made for the orderly conduct of the Class or the safety of persons or property.

(iii) (While using any Facility): the Rules applicable to its use and any directions by the person in charge to preserve the safety of the persons using the Facility.

(iv) (While resident or present in a Hall): the Rules governing the maintenance of good order and discipline in the Hall and any directions given by the Warden of the Hall for that purpose.

(v) (While on a Field Trip): any Rules by the person in charge of the Field Trip to preserve the safety of the persons engaged on the Field Trip or to prevent misconduct during the Field Trip.

(vi) (While present in the Student Union): requests made by an Authorised Person to prevent unruly behaviour or to cause it to cease.

5 Members of the Security Intelligence Service

a No member of the Security Intelligence Service enrolled as a Student at the University shall carry out any inquiries into security matters within the University Premises.

b The proposed attendance of a member of the Security Intelligence Service at the University shall be discussed between the Security Intelligence Service and the Registrar before his or her enrolment.

c After those discussions have been held, Senate shall determine each year what special conditions (if any) as to attendance at Classes shall apply to students who are members of the Security Intelligence Service in order to maintain discipline among the students of the University by preventing any possible disturbance to the carrying out of normal teaching activities.

d In this Section 5 ‘Member of the Security Intelligence Service’ means an officer or employee engaged in the Security Intelligence Service established under the New Zealand Security Intelligence Service Act 1969.

Imposition of Penalties on Students

6 Misbehaviour in Classes or Facilities

a Where a Student commits a breach of any Statute or Rule:

(i) In any Class: the person in charge of the Class; or

(ii) In any Facility: the person in charge of the Facility; may

(a) Exclude the Student from the Class (and up to 3 subsequent sessions of the Class) or the Facility (for such period as the person in charge may determine); and

(b) Refer the breach to the Discipline Committee.

7 Misbehaviour in Halls

a Where a Student commits a breach of any Statute or Rule in any Hall, the Warden of that Hall may:

(i) Impose a fine not exceeding $1,000 on the Student; and/or

(ii) Suspend or terminate the Student’s right to reside in the Hall; and/or

(iii) Refer the breach to the Discipline Committee.

8 Misbehaviour in the Student Union Building or its Precincts

a Where a Student commits a breach of any Statute or Rule in the Student Union the Executive of the Students’ Association may:

(i) Impose a fine not exceeding $500; and/or

(ii) Refer the breach to the Discipline Committee.

9 Other Penalties

a The Discipline Committee may of its own motion or on reference to it pursuant to:

(i) This Statute; or

(ii) Any other Statute or Rule

impose on a Student who commits a breach of any Statute or Rule, any one or more of the penalties prescribed in Clauses 9b, 9c or 9d or require any such Student to pay an amount by way of restitution pursuant to Clause 9e.

b For a breach of Examination Regulations the Discipline Committee may:

(i) As provided in those Regulations:

(a) Suspend for such time as it may prescribe the release to the candidate of the results of any examination;

(b) Decline to credit to the candidate’s course any subject or subjects;

(c) Cancel any pass with which that candidate may have been credited in the subject or examination in respect of which the breach occurred;

(d) Disqualify the candidate from sitting any examination for such period as it may prescribe;

(e) Impose any one or more of those penalties; and/or
(ii) Impose any of the penalties prescribed in Clause 9d.

c For breach of any other Specified Statute the Discipline Committee may impose:
   (i) The penalties prescribed in that Specified Statute; and/or
   (ii) The penalties prescribed in section 9d.

d For a breach of any Statute (not being a Specified Statute) or any Rule, the Discipline Committee
   may impose:
   (i) A fine not exceeding $1,000.
   (ii) A limitation or prohibition on attendance at any Class or Classes or the use and enjoyment
       of any of the Facilities.
   (iii) A suspension from attendance at the University or any Class or Classes for such period as
       it thinks fit.
   (iv) Cancellation of Enrolment of a Student at the University or in a course of study or training
       at the University.
   (v) A penalty in the form of requiring the offender to remove any defacement to University
       Premises or property or to render services to the benefit of the University or its students.
   (vi) Any one or more of those penalties.

e In determining any allegation of a breach of paragraph (ii) of Clause 4a of this Statute (damage
       to property) the Discipline Committee may, with or without imposing a penalty, require an
       offending Student to pay such amount by way of restitution as the Discipline Committee thinks
       fit.

f On default of payment, within the time prescribed, of:
   (i) A fine; or
   (ii) Any amount to be paid by way of restitution pursuant to Clause 9e of this Statute;
       the Discipline Committee may suspend the Student in default from attendance at the University
       or any Class or Classes until that fine or that amount is paid.

10 Reprimands
   a Where the Discipline Committee has investigated a complaint that a Student has committed an
      offence under any Specified Statute it may:
      (i) Through its Chairperson or any Authorised Person it has nominated for the purpose; and
      (ii) Whether or not it has imposed any penalty for the offence;
      issue a reprimand orally or in writing to the Student charged with the offence in terms that it
      considers appropriate in all the circumstances.

11 Review of Penalties
   a Any Student:
      (i) Upon whom a penalty is imposed under any Statute or any Rule; or
      (ii) Who is required to pay any amount by way of restitution;
      may by giving written notice to the Registrar within 14 days of the penalty having been
      imposed apply to the Appeals Committee of the Council to review:
      (i) The amount of that penalty; or
      (ii) The imposition of that penalty; or
      (iii) Both those matters; or
      (iv) Any amount required to be paid by way of restitution.

   b The decision of the Appeal Committee on any such review is final.

12 Saving
   a Nothing in this or any other Statute prejudices the rights and remedies of the University at law
   in respect of the misconduct or negligence of any Student or Staff Member.

13 Transitional Provisions
   a Notwithstanding the revocation of the Disciplinary Regulations 1972:
      (i) Proceedings may be commenced in respect of any offence under those Regulations alleged
          to have been committed before their revocation; and
      (ii) Proceedings previously commenced under those Regulations may be continued;
          as if those Regulations remained in force.

   b Where any proceedings that are commenced or continued pursuant to Clause 13a relate to an
      offence under the Examination Regulations, those Regulations will be deemed not to have been
      amended for the purpose of those proceedings.

4 University District and Court of Convocation

Powers of the Council
20 Award of certificates, etc
21 Lectures to members of the public

An Act to consolidate and amend certain enactments of the General Assembly relating to The University of Auckland

Be it enacted by the General Assembly of New Zealand in Parliament assembled, and by the authority of the same, as follows:

1 Short Title and Commencement
(1) This Act may be cited as The University of Auckland Act 1961.
(2) This Act shall come into force on the first day of January, 1962.

2 Interpretation
(1) In this Act, unless the context otherwise requires:

- the Council means the Council of The University of Auckland constituted in accordance with Part XV of the Education Act 1989
- lecturer means a member of the staff of The University of Auckland who is in terms of his appointment an associate professor, a reader, a senior lecturer, or a lecturer of the University; and includes such other persons and classes of persons as the Council from time to time determines:
- Minister means the Minister of the Crown for the time being responsible for the administration of this Act
- professor means a professor of The University of Auckland; but does not include an associate professor:
- the Registrar means the Registrar of The University of Auckland
- the University means The University of Auckland constituted under this Act.

3 Constitution of the University
(1) For the advancement of knowledge and the dissemination and maintenance thereof by teaching and research there shall be a University to be called The University of Auckland.
(2) The University shall consist of the Council, the professors emeriti, the professors, lecturers, junior lecturers, Registrar and librarian of the University for the time being in office, the graduates and undergraduates of the University, the graduates of the University of New Zealand whose names are for the time being on the register of the Court of Convocation of The University of Auckland, and such other persons and classes of persons as the Council may from time to time determine.
(3) The University shall be a body corporate with perpetual succession and a common seal, and may hold real and personal property, and sue and be sued, and do and suffer all that bodies corporate may do and suffer.
(4) The University established under this Act is hereby declared to be the same institution as the institution of that name existing immediately before the commencement of this Act under The University of Auckland Act 1954 (as amended by The University of Auckland Amendment Act 1957), which institution was originally established under the name of the Auckland University College under the Auckland University College Act 1882.

4 Court of Convocation
(1) [Repealed]
(2) [Repealed]
(3) There shall be a Court of Convocation of the University.
(4) The said Court of Convocation shall consist of the persons whose names are enrolled on a register to be kept by the Registrar.
(5) Every person shall be entitled to have his name enrolled on the register of the Court of Convocation who
(a) is a graduate of the University; or
(b) being a graduate of the University of New Zealand either by examination at any time or by reasons of having been admitted *ad eundem gradum* before 1 January 1943, is not, by reason of that qualification, enrolled on the register of the Court of Convocation for any other University, and is otherwise qualified in accordance with statutes made by the Council to be enrolled on the register of the Court of Convocation of the University; or

c) not being such a graduate, is a professor or graduate full-time member of the staff of the University or a graduate member, approved by the Council as being of University status, of the staff of an institution affiliated to the University; or

d) is otherwise entitled in accordance with statutes made by the Council to have his name enrolled on the said register.

(6) The power of the Council under Section 194 of the Education Act 1989 to make statutes extends to making statutes for the keeping of the register of the Court of Convocation, which statutes may include provisions prescribing the persons and classes of persons who are eligible under paragraph (b) or paragraph (d) of subsection (5) of this section for membership of the said Court of Convocation and the conditions (whether as to payment of fee or otherwise) on which persons are entitled to have their names enrolled in the register of the said Court; and, subject to this Act and to the said statutes, if any, the said Court shall have power to make such rules for the conduct of its business as it thinks fit and until rules governing its meetings are so made shall meet at such times and places as the Council may determine.

(7) The said Court may make representations to the Council on any matter concerning the interests of the University.

Sections 5 to 19 – repealed

20 Awards of Certificates, etc

The Council shall have power, under such conditions as it thinks fit, to award certificates, fellowships, scholarships, bursaries and prizes, and to make other awards.

21 Lectures to Members of the Public

The Council shall have power to provide such lectures and instruction for any persons, whether or not they are members of the University, as it thinks fit, and on such conditions as it thinks fit, and may award certificates to any of them.

324 The Degree of Master of Professional Studies – MProfStuds
REGULATIONS – ARTS

The Degree of Bachelor of Arts – BA

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Duration and Total Points Value

1 A student enrolled for this degree must follow a programme of the equivalent of six full-time semesters and pass courses with a total value of 360 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

Structure and Content

2 Of the 360 points required for this degree, a student must pass:
   a at least 300 points from courses listed in the Bachelor of Arts Schedule, including
      (i) at least 180 points in courses above Stage I, of which at least 75 points must be above Stage II
      (ii) courses in a minimum of three subjects listed in the Bachelor of Arts Schedule either
      (iii) (a) a major of at least 135 points, of which at least 60 points must be above Stage II, from one of the subjects available for majors in the Bachelor of Arts Schedule
      and
      (b) a minor of at least 90 points, of which at least 60 points must be above Stage I, from one of the subjects available for minors in the Bachelor of Arts Schedule
      or
      (iv) a double major of 120 points in each of two subjects available for majors in the Bachelor of Arts Schedule
   b 30 points from courses offered in either the General Education Open Schedule or the General Education Faculty Schedule approved for this degree or from a combination of these schedules.

3 Up to 30 points may be taken from courses available for other programmes offered at this University.

General Education Exemptions

4 a A student is exempted from the requirement to pass courses offered in the General Education Schedules who has:
   either
      (i) completed an undergraduate degree at a tertiary institution
   or
      (ii) commenced study for this degree at a tertiary institution before 1 January 2006
   or
      (iii) been admitted to this degree with credit from another tertiary institution of 240 points or more.
   b A student who has been exempted from the requirement to pass courses offered in the General Education Schedules must substitute 30 points from courses available for this degree.
   c A student admitted to this degree with credit from another tertiary institution of between 120 and 235 points inclusive must pass:
      (i) 15 points from courses offered in the General Education Schedules and
      (ii) a further 15 points from courses available for this degree.

Conjoint Degrees

5 Special arrangements apply where this degree is taken as a component degree of an approved conjoint combination. The specific requirements and a complete list of the conjoint degrees available are set out in the Conjoint Degrees section of this Calendar.

Special Cases

6 For language courses, enrolment of students with prior knowledge of the language is at the discretion of the Head of the Department.
   a Enrolment in any particular course(s) may be declined, and enrolment may be required instead in a course at a more advanced level.
   b If a student who has been required to enrol in a more advanced course fails that course they may be credited with an appropriate less advanced course if they are certified by the examiners as having reached the standard of a pass for that course and have not previously been credited with that course.
A student who has passed or been credited with a language acquisition course may not enrol for a course which precedes that course in the sequence of language acquisition courses.

**Variations**

7 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

**Commencement**

8 These regulations came into force on 1 January 2006. The 2001 regulations for the Degree of Bachelor of Arts were thereby repealed.

           Schedule, or from other 700 level courses offered at this University. The approval of all
           Heads of Departments concerned is required.
6 The programme for each student requires the approval of the relevant Head of Department and the
   Dean of Faculty of Arts.

Dissertation
7 a A dissertation, when included in the programme, is to be carried out under the guidance of a
   supervisor appointed by Senate or its representative.
   b The dissertation topic must be approved by the relevant Head of Department or Programme
      Coordinator prior to enrolment.
   c The dissertation must be completed and submitted as specified in the General Regulations –
      Bachelors Honours Postgraduate Degrees.

Variations
8 In exceptional circumstances Senate or its representative may approve a personal programme which
   does not conform to these regulations.

Honours
9 a This degree may be awarded only where a student’s overall grade for the Degree of Bachelor of
   Arts (Honours) is sufficiently high to deserve Honours.
   b Should a student fail to qualify for the award of the Degree of Bachelor of Arts (Honours), Senate
      or its representative may approve the reassignment of points towards the Graduate Diploma in
      Arts or the Postgraduate Diploma in Arts.
10 Where the standard specified in Regulation 9a is achieved, Honours will be awarded as specified in
    the General Regulations – Bachelors Honours Postgraduate Degrees.

Withdrawal
11 A student may withdraw from enrolment for the Degree of Bachelor of Arts (Honours) and apply to
    have points reassigned to the Graduate Diploma in Arts or the Postgraduate Diploma in Arts.

Commencement
12 These regulations came into force on 1 January 2006. The 1999 regulations for the Degree of
   Bachelor of Arts (Honours) were thereby repealed.

### The Degree of Bachelor of Business and Information Management – BBIM

*New admissions into the Degree of Bachelor of Business and Information Management were suspended in 2013. The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.*

### Duration and Total Points Value

1. A student enrolled for this degree must follow a programme of the equivalent of six full-time semesters and pass courses with a total value of 360 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

### Structure and Content

2. Of the 360 points required for this degree, a student must pass:
   a. 150 points from the Core Courses listed in the Bachelor of Business and Information Management Schedule.
   b. 180 points from
       - either
       - 90 points: Information Management major
       - 90 points: Accounting major or Marketing major
       - or
       - 180 points from one of the Options listed in the Bachelor of Business and Information Management Schedule, with the approval of the Programme Director.
   c. 30 points from courses offered in either the General Education Open Schedule or the General Education Faculty Schedule approved for this degree or from a combination of these schedules.
   d. Students must pass or be concurrently enrolled in all Stage I courses listed in the Bachelor of Business and Information Management Core Courses Schedule before enrolling in any other courses for this degree.
General Education Exemptions

3  
a A student is exempted from the requirement to pass courses offered in the General Education Schedules who has:
   either
   (i) completed an undergraduate degree at a tertiary institution
   or
   (ii) commenced study for this degree at a tertiary institution before 1 January 2006
   or
   (iii) been admitted to this degree with credit from another tertiary institution of 240 points or more.

b A student who has been exempted from the requirement to pass courses offered in the General Education Schedules must substitute 30 points from courses listed in the Bachelor of Business Information Management Schedule or other courses offered at this University, as approved by the Programme Director.

c A student admitted to this degree with credit from another tertiary institution of between 120 and 235 points inclusive must pass:
   (i) 15 points from courses offered in the General Education Schedules
   and
   (ii) a further 15 points from courses listed in the schedule for this degree or other courses offered at this University, as approved by the Programme Director.

Special Cases

4 In exceptional circumstances Senate or its representative may permit a suitable qualified student to enrol directly in a Stage II course(s). If the student fails the Stage II course(s) but is certified by the examiner as having reached the standard of a pass at Stage I, the student may be credited with the appropriate Stage I course(s).

Variations

5 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement

6 These regulations came into force on 1 January 2006. The 2001 regulations for the Degree of Bachelor of Business and Information Management were thereby repealed.

The Degree of Bachelor of Fine Arts (Honours) – BFA(Hons)

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission
1 a No student on whom the Degree of Bachelor of Fine Arts has already been conferred may enrol for this degree.

b At the discretion of the Dean of Faculty of Creative Arts and Industries a student who has completed Parts I, II and III for the Degree of Bachelor of Fine Arts may be permitted to enrol for this degree.

c Where the Faculty of Creative Arts and Industries approves enrolment for the Degree of Bachelor of Fine Arts (Honours) the courses previously passed for the Degree of Bachelor of Fine Arts will be reassigned to the Degree of Bachelor of Fine Arts (Honours).

Duration and Total Points Value
2 A student enrolled for this degree must follow a programme of the equivalent of eight full-time semesters and pass courses with a total value of 480 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

Structure and Content
3 Of the 480 points required for this degree, a student must pass:
   a 360 points from the Degree of Bachelor of Fine Arts Schedule and
   b 120 points from courses listed in the Bachelor of Fine Arts (Honours) Schedule.

4 The programme for each student requires the approval of the Dean of Faculty of Creative Arts and Industries.
Conjoint Degrees
5 Special arrangements apply where this degree is taken as a component degree of an approved conjoint combination for which the specific requirements and a complete list of the conjoint degrees available are set out in the Conjoint Degrees section of this Calendar.

Research Project
6 a The research project is to be carried out under the guidance of a supervisor/s appointed by Senate or its representative, on the recommendation of the Dean of Faculty of Creative Arts and Industries.

Research project topic must be approved by the Dean of Faculty of Creative Arts and Industries prior to enrolment.

Research project is to be completed by the last day of the final semester of enrolment in the research project. If, in exceptional circumstances beyond the student's control, the research project has not been able to be completed by the above deadline, Senate or its representative, acting upon the recommendation of the Head of Department, may approve a limited extension of time, not exceeding two months.

Award of Honours
7 This degree may be awarded only where a student's overall grade for the Degree of Bachelor of Fine Arts (Honours), is sufficiently high to deserve Honours.

Withdrawal from Honours
8 A student whose work does not satisfy the standard specified in Regulation 7, or who at any time chooses to withdraw from Honours, may transfer from the Degree of Bachelor of Fine Arts (Honours) to the Degree of Bachelor of Fine Arts. In that case the courses already passed for, or credited to, the Degree of Bachelor of Fine Arts (Honours) may be reassigned to the Degree of Bachelor of Fine Arts, except for any research project taken under Regulation 3b.

Variations

The Degree of Doctor of Fine Arts – DocFA

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations,
including the General Regulations for Named Doctorates and the Academic Statutes and Regulations.

Preamble
1 a A candidate for the Degree of Doctor of Fine Arts is required to pursue an approved programme
   of advanced study and research as an enrolled student of the University.
   b It is expected that this programme will normally be completed within four years of equivalent
   full time study but in no less than three years.
   c The Degree of Doctor of Fine Arts is awarded for a formal and systematic exposition of a coherent
   programme of advanced creative work supported by a written submission and carried out over
   the period of registration for the degree, which in the opinion of the examiners and the Board of
   Graduate Studies satisfies all of the following criteria:
   (i) to be an original and substantial creative work
   and
   (ii) to meet internationally recognised standards for such work
   and
   (iii) whose supporting documentation is an original contribution to professional practice in
   the field of Fine Art and demonstrates a knowledge of the artistic practices and literature
   relevant to the subject of the work and the ability to exercise critical and analytical
   judgment of them.
   d The ‘thesis’ is taken as being the exposition of creative work and supporting documentation
   referred to above. The format for exposition of the creative work will normally be an exhibition,
   performance or publication.
e All research for the thesis is to be conducted in accordance with The University of Auckland Guidelines for the Conduct of Research.

Eligibility
2 A candidate for the Degree of Doctor of Fine Arts is required to have:
a (i) completed the requirements for the award of either the Degree of Master of Fine Arts with First Class or Second Class Honours First Division at The University of Auckland 
or 
(ii) completed the requirements for the award of a qualification that the Board of Graduate Studies considers to be equivalent

and
b demonstrated an ability to pursue doctoral level research in the field of Fine Arts.

c A candidate for the Degree of Doctor of Fine Arts must have applied for admission and been admitted to The University of Auckland.

Duration
3 A candidate must complete the requirements for this degree within not less than three full-time years and not more than four full-time years, or their part-time equivalent, from the date of registration, unless permitted to do otherwise by the Board of Graduate Studies under Regulation 8 of these regulations.

Registration
4 a The Board of Graduate Studies, on the recommendation of the Head of Elam School of Fine Arts, is to determine whether the candidate may be registered and the date of registration.

b Conditions of registration will be determined according to Regulation 1 of the General Regulations for Named Doctorates.

Structure and Content
5 A student enrolled for this degree must pass FINEARTS 894 Studio (360 points).

Reviews of Progress
6 Reviews of progress and continuation of registration will be made according to Regulation 2 of the General Regulations for Named Doctorates.

Enrolment and Fees
7 Enrolment and fees will be determined according to Regulation 3 of the General Regulations for Named Doctorates.

Changes to the Conditions of Registration
8 Changes to supervision, extensions of time, and suspension or termination of registration will be made according to Regulation 4 of the General Regulations for Named Doctorates.

Submission
9 a A candidate must apply to be examined, at the Graduate Centre, at least three months prior to the date on which the creative work will be available for examination. The application requires the approval of the Head of School and must include:
(i) a brief statement describing the creative work to be examined
and
(ii) a statement as to the availability of the work for examination.

If a candidate has reason to believe that any person would be unsuitable to serve as an examiner of the thesis on the grounds of conflict of interest, he or she may also submit to the Graduate Centre at this time the name of this person and a statement in writing as to the nature of the conflict of interest.

b At least one month prior to the date of the oral examination, the candidate must submit three copies of the written documentation to the Graduate Centre. With the written permission of the main supervisor, this may be supported by other media such as photographic, audio and video recordings. The submission is to be accompanied by a statutory declaration, signed by the candidate, stating that the submission is the candidate’s own work and that no part of the thesis has been submitted or accepted for any other degree or diploma.

c The written documentation is to be presented in English unless otherwise approved by the Board of Graduate Studies at the time of first registration.

Examination
10 The oral examination will take place during the period in which the creative work is being examined and on the site of that creative work. The examination process will otherwise follow that of Regulation 9 of the Statute for the Degree of Doctor of Philosophy 2011, except that Clauses 9f, 9g, 9k(ii), 9m, 9n, 9o(i) and 9q of the Statute for the Degree of Doctor of Philosophy 2011 will not apply, and:
a Both of the examiners appointed under Clause 9d of the Statute for the Degree of Doctor of Philosophy 2011 must be able to attend the examination.

b Each examiner will be provided with a copy of the written submission, and is to independently examine the creative work prior to the oral examination.

c The following procedure will apply to the oral examination, and replaces that of Clause 9m of the Statute for the Degree of Doctor of Philosophy 2011:

(i) The Head of School (or nominee) will arrange this examination, to take place after the examiners have completed their independent examinations but during the period in which the creative work is available for examination and on or near the site of that work.

(ii) The Board of Graduate Studies, on the recommendation of the Head of School, will appoint a person to act as an independent chair of the oral examination. The chair must be a member of the academic staff of the University, but will not normally be a member of the faculty in which the candidate is registered.

(iii) The examination must be attended by the candidate, both examiners, the chair and the Head of School nominee on the Examination Committee.

d Acting independently, each examiner will provide the Graduate Centre, within two months of the date of the oral examination, with a written report in English on the quality of the thesis according to the criteria outlined in Clause 1c above. The examiners will include with their reports one of the following recommendations:

(i) to award the degree

or

(ii) to permit the candidate to revise the thesis and resubmit it for examination on one further occasion only

or

(iii) not to award the degree.

e On successful completion of the examination the candidate must provide a substantial documentation of the thesis, approved by the Examination Committee. Three hardbound copies of the documentation must be deposited with the Graduate Centre. The degree will not be conferred until this requirement has been complied with.

Variations
11 In exceptional circumstances the Board of Graduate Studies may approve a personal programme which does not conform with these regulations.

Appeals
12 Appeals regarding the examination process or decisions of the Board of Graduate Studies must be made according to Regulation 5 of the General Regulations for Named Doctorates.

Dispute Resolution Procedures
13 Disputes are to be resolved according to the Policy for Resolution of Research Problems: Postgraduate Research Students.

Transitional Arrangements
14 a These regulations came into force on 1 January 2006. The 2005 regulations for the Degree of Doctor of Fine Arts were thereby repealed.

b For a candidate initially registered under earlier regulations for this degree the Board of Graduate Studies may agree to vary the application of the provisions of this statute to ensure consistency with the provisions of the regulations under which the candidate was enrolled where it is satisfied that the candidate would otherwise be at a disadvantage.

The Degree of Doctor of Music – DMus

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including Academic Statutes and Regulations.

Admission

1 A candidate for this degree needs to apply through the Head of School of Music for registration and to:

a have completed the requirements for the Degree of Master of Music at The University of Auckland or an equivalent qualification approved by Senate or its representative

and
b demonstrate adequate training and ability to follow a course of advanced study in musical composition.

2 a Senate or its representative, having received a recommendation from the Head of School of Music, is to determine whether the candidate is to be registered and the date and the conditions of registration.

b A recommendation is to include:
(i) the proposed date of the registration
(ii) the name of the supervisor or supervisors from the members of the academic staff
(iii) satisfactory evidence of the candidate's training and ability to follow the proposed programme.

Duration and Total Points Value
3 a A candidate for this degree must normally follow a programme of two full-time years from the date of registration and pass a course of advanced study in musical composition.

b After completing the initial two years of full-time study, a candidate may apply to Senate or its representative for permission to continue as a part-time student.

c In exceptional circumstances, Senate or its representative may permit a student who has held the accepted prerequisite qualification for over five years, to proceed directly to apply to be examined.

Structure and Content
4 a Each candidate is to complete a course of advanced study – MUSIC 894 Composition (360 points) – to the satisfaction of the supervisor or supervisors and the Head of School of Music.

b The supervisor is to submit a brief report to Senate or its representative on the progress of each candidate at the end of each year of study.

c Should such a report be unfavourable, Senate or its representative may terminate a candidate's enrolment in this degree.

Content of Examination
5 a A candidate is to submit for examination original and substantial work, consisting of not more than three pieces, each of which may be within any of the following classes:
(i) orchestral work
(ii) opera
(iii) work using vocal, keyboard or ensemble resources
(iv) presentation of Music Theatre
(v) electronic music.

b Electronic resources may be included in work within classes (i), (ii), (iii), or (iv) in Regulation 5a.

6 With the application to be examined, each candidate is also to submit:
a three copies of the work or works to be examined
and
b a statutory declaration which:
(i) states the extent to which the work is the candidate's own and, in the case of joint work, identifies as clearly as possible which parts are the candidate's own
and
(ii) states what portion, if any, of the work submitted has been previously presented for a degree or diploma of this or any other tertiary institution
and
(iii) declares that the work, in substantially its present form, has not been previously accepted for the award of a degree or diploma in this or any other tertiary institution and is not being submitted for a degree or diploma in any other tertiary institution.

Examination
7 A candidate is to apply in writing to the Graduate Centre to be examined for the degree within five years of initial enrolment. In exceptional circumstances, Senate or its representative may extend this period.

8 After the candidate's application to be examined has been accepted, Senate, on the recommendation of the Head of School of Music, is to appoint as examiners:
a the supervisor or supervisors
and
b one person who is to be a member of staff of another university in New Zealand
and
c one person who is resident outside New Zealand provided that Senate may, on the 
recommendation of the Head of School, appoint a further examiner and, in exceptional 
circumstances, two further examiners.

9 Each examiner is to:
   a assess the submitted work
   and
   b report independently to Senate on the quality of the work
   and
   c recommend to Senate whether the Degree of Doctor of Music should be awarded.

10 Where the recommendation is that the degree should not be awarded, the Examiners may recommend 
   that the candidate be permitted to resubmit the work at a later date.

Direct Examination

11 For a candidate who is eligible under Regulation 3c to apply to be examined directly, Senate, as soon 
as possible after the application is lodged, is to appoint a Moderator who is to:
   a consider the work and submit to Senate, through the Registrar, a preliminary report, which is 
   to indicate whether, in their opinion, the examination should proceed or whether the candidate 
   should be advised to withdraw the application
   and
   b state the names of not fewer than two persons recommended as suitable examiners.

12 Senate is to consider the Moderator’s report and decide whether to proceed with the examination.

13 Where it is agreed that the examination is to proceed:
   a Senate is to appoint two independent external examiners of whom at least one is normally 
   resident outside New Zealand, without being restricted to the persons recommended under 
   Regulation 11b.
   b Senate may appoint an additional examiner who may be a member of the teaching staff of The 
   University of Auckland.
   c the contents of the Moderator’s report are not to be communicated to the examiners.

14 The duties of each examiner appointed under Regulation 13 are:
   a to report independently on the quality of the work and its value as a significant contribution to 
   learning
   and
   b to recommend whether or not the degree is to be awarded provided that, where the 
   recommendation is that the degree is not to be awarded, the examiner may recommend that 
   the candidate be permitted to resubmit the work with further published work at a later date. A 
   resubmission has to be accompanied by a further full examination fee.

15 The reports are to be sent to the Graduate Centre who is to refer them to the Moderator.

16 The Moderator is to consider the reports of the Examiners and prepare a final report which, together 
   with the reports of the Examiners, is to be placed before Senate which is to determine whether the 
   Degree may be awarded.

17 If Senate has determined that the examination should not proceed or that the degree should not be 
   awarded (under Regulation 14b), the student may not lodge a further application to be examined 
   for a higher degree before five years or more has elapsed from the date of Senate’s decision. If the 
   examination is not to proceed the candidate is entitled to a refund of half of the fees paid.

Conflicting Examiners’ Reports

18 Where only two Examiners have been appointed and their recommendations are conflicting, the 
   Moderator or the Head of School of Music, as appropriate, is to submit to Senate the name of a 
   further person qualified to act as an Examiner. Senate is then to appoint the person so named or 
   some other suitable person to be an additional Examiner who is to furnish an independent report in 
   accordance with the provisions of Regulation 9 or Regulation 14. This report is to be considered by 
   Senate together with the other reports.

Commencement

19 These regulations came into force on 1 January 2006. The 1996 regulations for the Degree of Doctor 
   of Music were thereby repealed.
The Degree of Doctor of Musical Arts – DMA

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Preamble

1. A candidate for the degree of Doctor of Musical Arts is required to pursue an approved programme of advanced study and research as an enrolled student of the University.

2. The degree of Doctor of Musical Arts is awarded for the successful pursuit of a coherent programme of advanced performance work that is firmly supported by a written submission (the “Exegesis”) and carried out over the period of registration for the Degree, which in the opinion of the examiners and the Board of Graduate Studies satisfies both the following criteria:
   a. the consistent exhibition of performance skills at the highest professional levels
   b. the provision of supporting documentation (the “Exegesis”) that makes an original contribution to the field of knowledge relating to Music Performance, and shows an ability to articulate critical judgment and performance theory, while demonstrating a knowledge of the literature relevant to the history and performing practice of the music contained in the candidate’s examinable programmes.

3. All research for the Exegesis is to be conducted in accordance with The University of Auckland Guidelines for the Conduct of Research.

Eligibility

4. A candidate for the Degree of Doctor of Musical Arts is required to have:
   a. completed the requirements for the Degree of Master of Music of this University with First Class Honours or Second Class Honours First Division, unless an equivalent qualification is approved by Senate under the Admission Regulations
   b. demonstrated, to the satisfaction of the Head of School of Music, in consultation with the School of Music Postgraduate Committee, the level of training and ability that is necessary for the pursuit of a programme of advanced study in music performance and research.

Admission

5. Admission Essential

Every candidate for the Degree of Doctor of Musical Arts must have applied for admission and have been admitted to The University of Auckland.

Duration and Total Points Value

6. A candidate enrolled for this degree must normally follow a programme of 36 full-time months (or the part-time equivalent) and pass an approved three-part programme of advanced study in music performance and research with a total value of 360 points.

Registration

7. a. The Board of Graduate Studies, on the recommendation of the Dean of the Faculty of Creative Arts and Industries, is to determine whether the candidate may be registered and the date of registration.

   b. Conditions of registration will be determined in accordance with Clause 1 of the General Regulations for Named Doctorates.

Reviews of Progress

8. Reviews of progress and continuation of registration will be made according to Clause 2 of the General Regulations for Named Doctorates.

Changes to the Conditions of Registration

9. Changes to supervision, extensions of time, and suspension or termination of registration will be made according to Clause 4 of the General Regulations for Named Doctorates.

Structure and Content

10. a. During the period of Registration a candidate will undertake a three-part programme of academic and practical research in performance, repertoire and pedagogy relating to the candidate’s instrument or performance medium, and present a total of five public recitals each of approximately 90 minutes’ duration, including, in Part III, the Final Recital.

   b. The candidate’s recitals must provide a balanced programme comprising solo and ensemble repertoire which must include music of historical significance, recognised virtuoso pieces, and
works of a demanding contemporary nature. In every case except for the Final Recital, the candidate’s proposed programme is to be approved by the performance supervisor and the Head of School of Music at least three months before the recital date. The proposed programme for the Final Recital must be included in the candidate’s Annual Report at the end of Part II. The proposed Final Recital programme may be changed with the approval of the performance supervisor and the Head of School of Music six months before the recital date.

Part I

During Part I of the degree (normally comprising one year, or two years part-time) the candidate will present a minimum of one and a maximum of two recitals, as prescribed in 10b above.

Towards the end of Part I, the candidate will propose a topic for the Exegesis, which will relate to the candidate’s performance interests or specialisation, and be approved by the supervisor and Head of Department of School of Music.

The candidate’s registration will be confirmed upon completion of Part I, in accordance with Clause 2 of the General Regulations for Named Doctorates.

Part II

During Part II of the degree (normally comprising one year, or two years part-time) the candidate will continue to undertake supervised research in performance, and on the approved Exegesis topic.

To complete Part II, the candidate must present:

(i) a minimum of two and a maximum of three recitals, so that a total of four recitals has been presented for Parts I and II together
(ii) a seminar presentation on the Exegesis research, in consultation with the appropriate supervisor or supervisors.

Part III

During Part III of the degree, (normally comprising one year, or two years part-time) the candidate will complete and submit the Exegesis, and will present a Final Recital, with a programme that is linked to the Exegesis topic in such a way that the candidate’s theoretical and aesthetic ideals are clearly articulated through both the musical performance and the written submission.

All performances except the Final Recital will be assessed by panels appointed by the Head of School of Music. The panels will consist of the Head of School of Music or nominee, an internal moderator and one external examiner of international expertise and distinction.

Submission

Three months prior to the date of the Final Recital a candidate must apply in writing to be examined, through the Graduate Centre.

The application is to include details of the programme, as approved by the Head of School of Music, in accordance with Clause 10b. If a candidate has reason to believe that any person would be unsuitable to serve as an examiner on the grounds of conflict of interest, he or she may also submit to the Graduate Centre at this time the name of this person or persons and a statement in writing as to the nature of the conflict of interest.

Two months prior to the date of the Final Recital, the candidate must submit to the Graduate Centre three bound copies of the Exegesis, and a signed, statutory declaration, stating that the submission is the candidate’s own work and that no part of the Exegesis has been submitted or accepted for any other degree or diploma. The Exegesis is to be presented in English unless otherwise approved by the Board of Graduate Studies at the time of first registration.

Examination

The final examination will take the Exegesis and the Final Recital into joint consideration, and will include an Oral Examination, which will normally be held on the day following the Final Recital.

The Exegesis will be examined by two external examiners of international expertise and distinction, both of whom will be appointed by the Board of Graduate Studies on the recommendation of the Head of School of Music and one of whom will usually be resident overseas.

Each examiner will be provided with a copy of the Exegesis which is to be examined independently and reported on to the Board of Graduate Studies prior to the Final Recital, which both examiners must attend.

In their assessment of the Exegesis, the examiners will indicate whether it is of an acceptable standard, either as it stands or subject to minor corrections: examiners may also indicate a provisional assessment, to be confirmed or otherwise at the time of the Final Recital and Oral Examination.
The Final Recital will be examined by a panel that includes the two external examiners and an internal moderator, who must not have taken any role in any part of the supervision of the DMA, and is to be nominated by the Head of School of Music. The recital is to be recorded in both sound (CD) and vision (DVD or video).

The Board of Graduate Studies, on the recommendation of the Head of School of Music, will appoint a person to act as an independent chair of the Oral Examination. The chair must be a member of the academic staff of the University, but will not normally be a member of the faculty in which the candidate is registered.

The Oral Examination must be attended by the candidate, both external examiners, the chair, and the internal moderator. This Examination, but not the examiners’ discussion, must also be recorded in sound.

Examiners’ Reports

Within one month of the date of the Oral Examination, each examiner will submit to the Graduate Centre a written report in English on the quality of the whole examination performance, covering the Final Recital, Exegesis and the Oral Examination. The examiners will include with their reports one of the following recommendations:

- to award the degree
- to permit the candidate to revise the Exegesis and resubmit it for examination on one further occasion only
- to permit the candidate to repeat the Final Recital within a period of not less than six months and not more than 12 months
- not to award the degree.

On completion of the examination the candidate must deposit three hardbound copies of the Exegesis and the audio and video recordings of the Final Recital with the Graduate Centre. The degree will not be conferred until this requirement has been complied with.

Dispute Resolution Procedures

Where there is a dispute among the examiners, the Head of School of Music is to submit to the Board of Graduate Studies the name of a further person qualified to act as an examiner. The Board of Graduate Studies is then to appoint the person so named or some other suitable person to be an additional examiner who is to furnish an independent report based on the recording of the recital and/or on the Exegesis in accordance with the provisions of Regulation 15e. This report is to be considered by the Board of Graduate Studies together with the other reports. All other matters of dispute are to be resolved according to the Policy for Resolution of Research Problems: Postgraduate Research Students.

Appeals

Appeals regarding the examination process or decisions of the Board of Graduate Studies must be made according to Clause 5 of the General Regulations for Named Doctorates.

Transitional Arrangements

This statute came into force on 1 January 2007 and revokes the previous regulations for the Degree of Doctor of Musical Arts.

For a candidate initially registered under earlier regulations for this degree the Board of Graduate Studies may agree to vary the application of the provisions of this Statute to ensure consistency with the provisions of the regulations under which the candidate was enrolled.

Graduate Diploma in Music – GradDipMus

The regulations for this graduate diploma are to be read in conjunction with all the other relevant statutes and regulations including the Academic Statutes and Regulations.

In order to satisfy the requirements of this degree, students are required to be in various teaching environments which will bring them into contact with children and young persons. Only persons able to meet the criteria for provisional registration of the New Zealand Teachers Council will be permitted to enrol in this degree.

Admission

1 To be admitted to this programme a student must:
   either
   a (i) meet University entry criteria
       and
   (ii) have demonstrated the potential to meet the New Zealand Teachers Council criteria for provisional registration. Personal references and an interview will normally be required.
   or
   b (i) have completed a New Zealand Diploma in Teaching or Trained Teacher’s Certificate (or New Zealand Qualifications Authority and NZ Teachers Council recognised equivalent)
       and
   (ii) be currently registered as a teacher in New Zealand
       and
   (iii) have been a practising teacher or teacher educator in New Zealand for at least two of the last five years.

2 Students holding a qualification gained at an overseas institution may be required to provide evidence of language proficiency prior to admission into this programme.

Note: The applicant will be required to consent to disclosure of criminal convictions as part of the application process consistent with the requirements for provisional registration of the New Zealand Teachers Council.

3 Admission to this programme is at the discretion of Senate or its representative.

Duration and Total Points Value

4 A student enrolled for this degree must follow a programme of the equivalent of six full-time semesters and pass courses with a total value of 360 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

5 A student entering this degree under Regulation 1b may apply for up to 240 points credit.

Structure and Content

6 Of the 360 points required for this degree, a student must pass:
   a at least 345 points from one of the specialisations listed in the Bachelor of Education (Teaching) Schedule
   b 15 points from courses offered in either the General Education Open Schedule or the General Education Faculty Schedule approved for this degree.

7 Students who are admitted under Regulation 1b, and have applied for and been awarded 240 points credit, must pass at least 120 points as listed in the Teachers’ specialisation listed in the Bachelor of Education (Teaching) Schedule.

General Education Exemptions

8 a A student is exempted from the requirement to pass courses offered in the General Education Schedules who has:
   either
   (i) completed an undergraduate degree at a tertiary institution
   or
   (ii) commenced study for this degree at a tertiary institution before 1 January 2006
   or
   (iii) been admitted to this degree with credit from another tertiary institution of 120 points or more.

b A student who has been exempted from the requirement to pass courses offered in the General Education Schedules must substitute 15 points from courses approved by the Dean of Faculty of Education.
Practical Requirements
9  a  In any course that has a practicum and non-practicum component, a student must pass both the practicum and the non-practicum component in order to have passed that course as a whole.

  b  Re-enrolment in any EDPRAC course after failing that course requires the permission of the Dean of Faculty of Education or nominee.

  c  At the discretion of Senate or its representative, a student who does not pass an EDPRAC course may be declined permission to re-enrol for this degree.

Professional Requirements
10  a  In order to complete the requirements for this degree, a student must be able to meet the criteria for provisional registration of the New Zealand Teachers Council.

  b  A student who ceases to be able to meet the criteria for provisional registration of the New Zealand Teachers Council must immediately notify the Dean of Faculty.

  c  If the Dean of Faculty has reason to believe that a student does not meet the criteria for provisional registration of the New Zealand Teachers Council the Dean shall advise the student and take into account any written response from the student.

  d  If the Dean of Faculty is satisfied that the student is not able to meet the criteria for provisional registration of the New Zealand Teachers Council the Dean shall notify Senate or its representative.

  e  On receipt of such advice, Senate or its representative may terminate the student’s enrolment and any application to re-enrol may likewise be declined.

  f  A student whose enrolment is terminated under Regulation 10e may appeal from that decision to the Council or its duly appointed delegate.

Termination of Enrolment
11  a  If the behaviour of a student in a teaching environment is found, after due and fair inquiry, to be offensive, disruptive or likely to give rise to a risk of harm to the welfare of any person, the enrolment of the student in the programme may be terminated by Senate or its representative and any application to re-enrol may likewise be declined.

  b  A student who is subject to any such inquiry may be suspended by Senate or its representative from lectures, classes and any teaching placement pending the outcome of the inquiry.

  c  A student whose enrolment is terminated under Regulation 11a may appeal from that decision to the Council or its duly appointed delegate.

Variations
12  In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement
13  These regulations came into force on 1 January 2006 for all students enrolling for this degree for the first time. The 2003 regulations for the Degree of Bachelor of Education (Teaching) offered by The University of Auckland and the 2003 regulations for the Degree of Bachelor of Education (Teaching) offered by the former Auckland College of Education were thereby repealed except for those former students of the Auckland College of Education who have been studying continuously for this degree for whom the regulations will be repealed on 1 December 2011.

### The Degree of Doctor of Education – EdD

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations, including the General Regulations for Named Doctorates and the Academic Statutes and Regulations.

### Preamble

1 a A candidate for the degree of Doctor of Education is required to pursue an approved programme of advanced study and research as an enrolled student of the University.

   b It is expected that this programme will usually be completed within four to six years from the date of registration.
c The Degree of Doctor of Education is awarded for a formal and systematic exposition of a coherent programme of advanced research work carried out over the period of registration for the degree, which in the opinion of the examiners and the Board of Graduate Studies satisfies all of the following criteria:

(i) to be an original contribution to scholarship relating to professional practice in the field of Education

and

(ii) to meet internationally recognised standards for such work

and

(iii) to demonstrate a knowledge of the literature relevant to the subject of the thesis, and the ability to exercise critical and analytical judgement of it

and

(iv) to be satisfactory in its methodology, in the quality and coherence of its written expression, and in its scholarly presentation and format.

d All research for the thesis is to be conducted in accordance with The University of Auckland Guidelines for the Conduct of Research.

e Doctor of Education theses may not exceed 100,000 words or 250 pages in total without the permission of the Board of Graduate Studies.

Eligibility

2 A candidate for the Degree of Doctor of Education is required to have:

a (i) completed the requirements for the award of either the Degree of Master of Education or the Degree of Master of Arts in Education with First Class or Second Class (First Division) Honours at The University of Auckland

or

(ii) completed the requirements for the award of either the Degree of Bachelor of Education (Teaching) (Honours) or the Degree of Bachelor of Arts (Honours) in Education with First Class or Second Class (First Division) Honours at The University of Auckland

or

(iii) completed the requirements for the award of a qualification that the Board of Graduate Studies considers to be equivalent to one of the prerequisite qualifications specified in Clause 2a(i) and (ii)

and

b demonstrated an ability to pursue doctoral level research in the field of Education

and

c had at least five years’ experience in education or in an area considered comparable by the Board of Graduate Studies.

Admission

3 Admission Essential

Every candidate for the degree of Doctor of Education must have applied for admission and been admitted to The University of Auckland.

Duration and Total Points Value

4 a A candidate enrolled for this degree must follow an approved two-part programme with a total value of 360 points.

b Candidates must complete the requirements for Part I within two successive part-time years, unless permitted to do otherwise by the Board of Graduate Studies under Clause 9.

c After completing Part I candidates must complete the requirements for Part II within two full-time or four part-time years, unless permitted to do otherwise by the Board of Graduate Studies under Clause 9.

Registration

5 a The Board of Graduate Studies, on the recommendation of the Dean of Faculty of Education, is to determine whether the candidate may be registered and the date of registration.

b Conditions of registration will be determined in accordance with Clause 1 of the General Regulations for Named Doctorates.

Structure and Content

6 a A candidate enrolled for this degree must pass Parts I and II as follows:

(i) Part I: 120 points from EDPROFST 844 Research Portfolio

(ii) Part II: 240 points from EDPROFST 897 Thesis.

b A candidate must complete the requirements of Part I before commencing Part II.
Reviews of Progress
7  a  At the end of Part I the Dean of Faculty of Education will submit, through the Associate Dean (Postgraduate) of the Faculty, a report to the Board of Graduate Studies on the candidate's progress and containing a recommendation as to whether or not the candidate should be permitted to proceed to Part II.

    b  During Part II, reviews of progress and continuation of registration will be made in accordance with Clause 2 of the General Regulations for Named Doctorates.

Enrolment and Fees
8  Enrolment and payment of fees will be determined according to Clause 3 of the General Regulations for Named Doctorates.

Changes to the Conditions of Registration
9  Changes to supervision, extensions of time, and suspension or termination of registration will be made according to Clause 4 of the General Regulations for Named Doctorates.

Submissions
10  a  Copies of Thesis
    All candidates are initially required to submit three copies of the thesis to the Graduate Centre. The thesis should have a temporary binding and a statement to examiners as specified in the Guide to Theses and Dissertations.

    b  Notification of Submission
    One month prior to the expected date of submission, candidates should notify the Graduate Centre in writing of their intention to submit. If the candidate has reason to believe that any person would be unsuitable to serve as an examiner of the thesis on the grounds of conflict of interest, he or she may also submit at this time the name of this person and a statement in writing as to the nature of the conflict of interest to the Graduate Centre.

    c  Declaration as to Originality
    The thesis is to be accompanied by a statutory declaration, signed by the candidate, stating that the thesis is the candidate’s own work and that neither the thesis nor any part of it has been submitted or accepted for any other degree or diploma.

    d  Language of Thesis
    The thesis is to be presented in English unless otherwise approved by the Board of Graduate Studies at the time of first registration of the candidate.

Examinations
11  The examination process will follow that of Clause 9 of the Statute for the Degree of Doctor of Philosophy, except that:
    a  examiners will be requested to assess the thesis according to the criteria of Clause 1(c) of these regulations
    and
    b  the Board of Graduate Studies will normally appoint the Doctor of Education Adviser as the Head of Department nominee on the Examination Committee (and who will participate in the Oral Examination), as described in the Degree of Doctor of Philosophy Statute, for all Doctor of Education examinations.

Variations
12  In exceptional circumstances the Board of Graduate Studies may approve a personal programme which does not conform with these regulations.

Appeals
13  Appeals regarding the examination process or decisions of the Board of Graduate Studies must be made according to Clause 5 of the General Regulations for Named Doctorates.

Dispute Resolution Procedures
14  a  Disputes are to be resolved according to the Policy for Resolution of Research Problems: Postgraduate Research Students.

Transitional Arrangements
15  a  These regulations came into force on 1 January 2006. The 2001 regulations for the Degree of Doctor of Education were thereby repealed.

    b  For a candidate initially registered under earlier regulations for this degree the Board of Graduate Studies may agree to vary the application of the provisions of this statute to ensure consistency with the provisions of the regulations under which the candidate was enrolled where it is satisfied that the candidate would otherwise be at a disadvantage.
Diploma of Teaching (Early Childhood Education) – DipTchg(ECE)

The Diploma of Teaching (Early Childhood Education) was withdrawn in 2012. Students who are enrolled in this qualification should contact their Faculty for advice regarding completion.

Graduate Diploma in Education – GradDipEd

The regulations for this graduate diploma are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission

1 In order to be admitted to this programme, a student needs to have:
   a (i) completed the requirements for a Bachelors degree
      or
   (ii) completed the requirements for a university diploma approved by Senate or its representative
      or
   (iii) completed a professional qualification in teaching, counselling, social work or relevant other profession approved by Senate or its representative
      or
   (iv) at least five years’ employment experience deemed relevant to this programme by the Senate or its representative
   and
   b satisfied the Dean of Faculty of Education that they have appropriate training and experience to undertake the programme.

2 Admission to the graduate diploma is at the discretion of Senate or its representative.

Duration and Total Points Value

3 A student enrolled for this graduate diploma must follow a programme of the equivalent of two full-time semesters and pass courses with a total value of 120 points.

Structure and Content

4 Of the 120 points required for this graduate diploma, a student must pass:
   either
   a 120 points from courses listed in the General Option, or from one of the specialisations, in the Graduate Diploma in Education Schedule, including at least 75 points above Stage II
   or
   b at least 90 points from courses listed in the General Option in the Graduate Diploma in Education Schedule, including at least 75 points above Stage II and
      up to 30 points from other courses available at this University. The approval of all Heads of Departments concerned is required.

5 The programme for each student requires the approval of the Dean of Faculty of Education prior to enrolment.

Variations

6 In exceptional circumstances Senate or its representative may approve a personal course of study which does not conform to these regulations.

Commencement

7 These regulations came into force on 1 January 2006. The 2001 regulations for the Graduate Diploma in Education offered by The University of Auckland and the 2003 regulations for the Graduate Diploma in Education offered by former Auckland College of Education were thereby repealed except for those former students of the Auckland College of Education who have been studying continuously for this graduate diploma for whom the regulations will be repealed on 1 December 2007.

Graduate Diploma in Special Education – GradDipSpecEd

The Graduate Diploma in Special Education was withdrawn in 2012. Students who are enrolled in this qualification should contact their Faculty for advice regarding completion.

Graduate Diploma in Teaching (Early Childhood Education) – GradDipTchg(ECE)

The regulations for this graduate diploma are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

In order to satisfy the requirements of this graduate diploma, students are required to be in various teaching environments which will bring them into contact with children. Only persons able to meet the criteria for provisional registration of the New Zealand Teachers Council will be permitted to enrol in this graduate diploma.

Admission

1 In order to be admitted to this programme, a student needs to have:
   a completed the requirements for:
      (i) a degree from a New Zealand university
      or
      (ii) attained a level of competence approved by Senate or its representative as:
      (a) equivalent to that specified in (i) above, and
      (b) appropriate for the proposed programme for this graduate diploma.
      or
      (iii) a qualification recognised as equivalent by the Ministry of Education

   b demonstrated the potential to meet the New Zealand Teachers Council criteria for provisional registration. Personal references and an interview will normally be required.

   Note: The applicant will be required to consent to disclosure of criminal convictions as part of the application process consistent with the requirements for provisional registration of the New Zealand Teachers Council.

2 Admission to this graduate diploma is at the discretion of Senate or its representative.

Duration and Total Points Value

3 A student enrolled for this graduate diploma must follow a programme of the equivalent of one full-time year and pass courses with a total value of 150 points.

4 The requirements for this graduate diploma must be completed within 24 months of initial enrolment unless, in exceptional circumstances, Senate or its representative extends this period.

Structure and Content

5 A student enrolled for this graduate diploma must pass 150 points from the courses listed in the Graduate Diploma in Teaching (Early Childhood Education) Schedule.

6 The programme for each student requires the approval of the Dean of Faculty of Education prior to enrolment.

7 A student who has been credited for another degree or diploma with any course the same as or similar to those required in the Graduate Diploma in Teaching (Early Childhood Education) Schedule will be required to substitute for those courses so credited such additional course(s) as the Head of Teacher Education Programmes may approve.

Practicum Requirements

8 a In any course that has a practicum and non-practicum component, a student must pass both the practicum and non-practicum component in order to have passed that course as a whole.

    b Re-enrolment in any EDPRAC course after failing that course requires the permission of the Dean of Faculty of Education or nominee.
Professional Requirements
9  a  In order to complete the requirements for this graduate diploma, a student must be able to meet the criteria for provisional registration of the New Zealand Teachers Council.

b  A student who ceases to be able to meet the criteria for provisional registration of the New Zealand Teachers Council must immediately notify the Dean of Faculty.

c  If the Dean of Faculty has reason to believe that a student does not meet the criteria for provisional registration of the New Zealand Teachers Council the Dean shall advise the student and take into account any written response from the student.

d  If the Dean of Faculty is satisfied that the student is not able to meet the criteria for provisional registration of the New Zealand Teachers Council the Dean shall notify Senate or its representative.

e  On receipt of such advice, Senate or its representative may terminate the student’s enrolment and any application to re-enrol may likewise be declined.

f  A student whose enrolment is terminated under Regulation 9e may appeal from that decision to the Council or its duly appointed delegate.

Termination of Enrolment
10  a  If the behaviour of a student in a teaching environment is found, after due and fair inquiry, to be offensive, disruptive or likely to give rise to a risk of harm to the welfare of any person, the enrolment of the student in the programme may be terminated by Senate or its representative and any application to re-enrol may likewise be declined.

b  A student who is subject to any such inquiry may be suspended by Senate or its representative from lectures, classes and any teaching placement pending the outcome of the inquiry.

c  A student whose enrolment is terminated under Regulation 10a may appeal from that decision to the Council or its duly appointed delegate.

Variations
11  In exceptional circumstances Senate or its representative may approve a personal course of study which does not conform to these regulations.

Commencement
12  These regulations came into force on 1 January 2006 for all students enrolling for this degree for the first time. The 2004 regulations for the Graduate Diploma in Teaching (Early Childhood Education) offered by the former Auckland College of Education were thereby repealed except for those former students of the Auckland College of Education who have been studying continuously for this graduate diploma for whom the regulations will be repealed on 1 December 2007.

- 90 points from the Curriculum Courses listed in the Graduate Diploma in Teaching (Primary) Schedule.

The programme for each student requires the approval of the Dean of Faculty of Education prior to enrolment.

**Practicum Requirements**

- In any course that has a practicum and non-practicum component, a student must pass both the practicum and non-practicum component in order to have passed that course as a whole.
- Re-enrolment in any EDPRACT course after failing that course requires the permission of the Dean of Faculty of Education or nominee.
- At the discretion of Senate or its representative, a student who does not pass an EDPRACT course may be declined permission to re-enrol for this diploma.

**Professional Requirements**

- In order to complete the requirements for this graduate diploma, a student must be able to meet the criteria for provisional registration of the New Zealand Teachers Council.
- A student who ceases to be able to meet the criteria for provisional registration of the New Zealand Teachers Council must immediately notify the Dean of Faculty.
- If the Dean of Faculty has reason to believe that a student does not meet the criteria for provisional registration of the New Zealand Teachers Council the Dean shall advise the student and take into account any written response from the student.
- If the Dean of Faculty is satisfied that the student is not able to meet the criteria for provisional registration of the New Zealand Teachers Council the Dean shall notify Senate or its representative.
- On receipt of such advice, Senate or its representative may terminate the student's enrolment and any application to re-enrol may likewise be declined.
- A student whose enrolment is terminated under Regulation 8e may appeal from that decision to the Council or its duly appointed delegate.

**Termination of Enrolment**

- If the behaviour of a student in a teaching environment is found, after due and fair inquiry, to be offensive, disruptive or likely to give rise to a risk of harm to the welfare of any person, the enrolment of the student in the programme may be terminated by Senate or its representative and any application to re-enrol may likewise be declined.
- A student who is subject to any such inquiry may be suspended by Senate or its representative from lectures, classes and any teaching placement pending the outcome of the inquiry.
- A student whose enrolment is terminated under Regulation 9a may appeal from that decision to the Council or its duly appointed delegate.

**Variations**

In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.
Commencement
11 These regulations came into force on 1 January 2006. The 2004 regulations for the Graduate Diploma in Teaching (Primary) offered by The University of Auckland and the 2000 regulations for the Graduate Diploma in Teaching (Primary) offered by former Auckland College of Education were thereby repealed except for those former students of the Auckland College of Education who have been studying continuously for this graduate diploma for whom the regulations will be repealed on 1 December 2007.

3 The total enrolment for this postgraduate certificate must not exceed 80 points.

Structure and Content

4 A student enrolled in this postgraduate certificate must pass 60 points from the courses listed in the Postgraduate Certificate in Professional Supervision Schedule.

Variations

5 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.
Foundation Certificate Education – FCertEd

The regulations for this certificate are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission

1 In order to be admitted to this programme a student needs to:
   a be a New Zealand citizen or permanent resident of New Zealand
   and
   b (i) have satisfied the Head of Programme that they have completed NCEA Level 2 at a New Zealand secondary school or its equivalent
      or
      (ii) be eligible for Special Admission to the University
   and
   c have completed a satisfactory interview with the Coordinator of the Certificate.

Note: Students who satisfactorily complete the Foundation Certificate Education will be able to apply for ad eundem statum admission to the University for entry into undergraduate programmes in the Faculty of Education.

Duration and Total Points Value

2 A student enrolled in this certificate must follow a programme of the equivalent of two full-time semesters and pass courses with a total of 120 points.

Structure and Content

3 A student enrolled in this certificate must pass 120 points from the courses listed in the Foundation Certificate Education Schedule.

4 Courses must be selected in consultation with, and approved by, the Coordinator of the Certificate.

Variations

5 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement

6 These regulations came into force on 1 January 2006.

Degree Requirements

1 Students who enrol for the degree of Bachelor of Engineering (Honours) may be awarded the degree of Bachelor of Engineering if, having passed all courses and completed all other requirements for a BE(Hons), their performance in the courses is deemed by the Dean of Engineering to be not of Honours standard.

Note: Honours standard will normally imply completion of all courses in the minimum time and with a weighted grade point average exceeding a minimum set by the University.

The Degree of Bachelor of Engineering (Honours) – BE(Hons)

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Duration and Total Points Value

1 A student enrolled for this degree must follow a programme of the equivalent of eight full-time semesters and pass courses with a total value of 480 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

2 Students with high Grade Point Equivalent scores may be invited to complete the full requirements of the Degree of Bachelor of Engineering (Honours) over three years. Students will complete all courses in all Parts of the chosen specialisation except that some courses from Part I may be replaced by approved alternative courses.

Structure and Content

3 Of the 480 points required for this degree, a student must pass:

a 120 points: Part I as listed in the Bachelor of Engineering (Honours) Schedule including 15 points from courses offered in either the General Education Open Schedule or the General Education Faculty Schedule approved for this degree.

b 360 points from Parts II, III and IV for one of the areas of specialisation listed in the Bachelor of Engineering (Honours) Schedule.

4 a A student will not normally be permitted to enrol for Part II unless Part I has been completed, or to enrol for Part III unless Part II has been completed, or to enrol for Part IV unless Part III has been completed.

b However, a student who has failed to pass one of those Parts in its entirety may be allowed, at the discretion of Senate or its representative, to enrol for the course or courses needed to complete that Part together with a course or courses towards the next Part.

c Only in exceptional circumstances will a student be permitted to enrol for Part III unless Part I has been completed, or to enrol for Part IV unless Part II has been completed.

General Education Exemptions

5 A student is exempted from the requirement to pass courses offered in the General Education Schedules who has:

either

a completed an undergraduate degree at a tertiary institution

or

b commenced study for this degree at a tertiary institution before 1 January 2006

or

c been admitted to this degree with credit from another tertiary institution of 120 points or more

or

d been admitted to this degree with credit from another tertiary institution for the entire Part I of this degree.

Conjoint Degrees

6 Special arrangements apply where this degree is taken as a component degree of an approved conjoint combination. The specific requirements and a complete list of the conjoint degrees available are set out in the Conjoint Degrees section of this Calendar.
Practical Requirements

7 a. A student enrolled for this degree must carry out satisfactorily such practical work in ENGGEN 299 and ENGGEN 499, field trips and laboratory requirements, as prescribed by the Faculty of Engineering.

b. A student will not be considered to have completed the requirements for this degree unless Academic Services has received from the Dean of Faculty of Engineering confirmation that the student has complied with the requirements of Regulation 7a.

English Language Requirements

8 a. A student enrolled for this degree must demonstrate competence in the English language, in ENGGEN 199, as prescribed by the Faculty of Engineering.

b. A student will not be considered to have completed the requirements for this degree unless Academic Services has received from the Dean of Faculty of Engineering confirmation that the student has complied with the requirements of Regulation 8a.

Honours

9 The Bachelor of Engineering (Honours) may be awarded with First Class Honours or with Second Class Honours in either First Division or Second Division. The class of honours shall be determined by the student's weighted average grade over Parts II, III and IV. Students who have passed all courses and completed all other requirements for a BE(Hons) but whose performance in the courses is deemed by the Dean of Engineering to be not of Honours standard will be awarded the degree of Bachelor of Engineering.

Variations

10 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement

11 These regulations came into force on 1 January 2008. The 2000 regulations for the Degree of Bachelor of Engineering were thereby repealed.

The Degree of Master of Engineering – ME

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission

1. In order to be admitted to this programme, a student needs to have:
   a. completed the requirements for the Degree of Bachelor of Engineering or Bachelor of Engineering (Honours) at a level deemed satisfactory by the Dean of Faculty of Engineering

or
b (i) completed the requirements for the Degree of Bachelor of Engineering or Bachelor of Engineering (Honours)
and
(ii) at the completion of one semester, passed with an average grade of B or higher 60 points in 600 and 700 level courses for the Master of Engineering Studies, Graduate Diploma in Engineering or the Graduate Diploma in Engineering (Transportation)

or

c (i) completed the requirements for an equivalent degree qualification as approved by Senate or its representative at a level deemed satisfactory by the Dean of Faculty of Engineering
and
(ii) demonstrated competency in the English language to the satisfaction of the Dean of Faculty of Engineering.

In exceptional circumstances Senate or its representative may approve admission of a student whose average grade is less than B, or waive any other prerequisites.

Duration and Total Points Value

A student enrolled for this degree must:

a pass a thesis with a total value of 120 points
and
b complete within the time limit specified in the General Regulations – Masters Degrees.

Structure and Content

A student enrolled for this degree must complete a 120 point thesis, based on research in one of the areas listed in the Master of Engineering Schedule.

Thesis

a The thesis is to be carried out under the guidance of a supervisor appointed by Senate or its representative.

b The thesis is to embody the results obtained by the student in an investigation on a topic approved by the Head of Department prior to enrolment.

c The investigation is to be carried out by the student at the University under the direct supervision of a member of the academic staff, provided that:

(i) laboratory work may be carried out in an approved institution outside the University for such limited period or periods as Senate or its representative may determine

(ii) field work may be carried out at such places and for such periods as Senate or its representative may determine.

d At the discretion of the Head of Department the candidate may be required to attend an oral examination.

e The thesis is to be completed and submitted in accordance with the General Regulations – Masters Degrees.

Variations

In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Honours

This degree may be awarded with Honours as specified in the General Regulations – Masters Degrees.

Commencement

These regulations came into force on 1 January 2006. The 2002 regulations for the Degree of Master of Engineering were thereby repealed.

The Degree of Master of Engineering Management – MEMgt

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission

1 In order to be admitted to this programme, a student needs to have:

   either
   a completed the requirements for the Degree of Bachelor of Engineering or Bachelor of Engineering (Honours)
   or
   b completed the requirements for an equivalent degree qualification as approved by Senate or its representative
   and
   c achieved grades deemed satisfactory by the Dean of Faculty of Engineering.

Duration and Total Points Value

2 A student enrolled for this degree must:

   a pass courses with a total value of 120 points
   and
   b complete within the time limit specified in the General Regulations – Masters Degrees.

3 The total enrolment for this degree must not exceed 160 points.

Structure and Content

4 Of the 120 points required for this degree, a student must pass:

   a 30 points from the Master of Engineering Management Core Courses Schedule
   and
   b at least 30 points and up to 60 points from the Elective A Courses listed in the Master of Engineering Management Schedule
   and
   c at least 30 points and up to 60 points from the Elective B Courses listed in the Master of Engineering Management Schedule.

Variations

5 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Honours

6 This degree may be awarded with Honours as specified in the General Regulations – Masters Degrees.

Commencement

7 These regulations came into force on 1 January 2011. The 2006 regulations for the Degree of Master of Engineering Management were thereby repealed.

The Degree of Master of Engineering Studies – MEngSt

The regulations for this degree are to be read in conjunction with all other relevant regulations including the Academic Statutes and Regulations.

### Construction Management

**Requirement:**
- 75 points: CIVIL 703, 704, 707, 790, 791
- up to 45 points from CIVIL 708, 709, 716, 712
- up to 30 points from CIVIL 787–789

With the prior approval of the Dean of Faculty of Engineering, up to 45 points may be taken from appropriate 600 and 700 level courses offered at this or another university. Students who have previously passed any of the prescribed courses must substitute these courses with appropriate 600 and 700 level courses.

### Food Process Engineering

**Research Masters**
- 90 points: CHEMMAT 776 or 777
- 30 points from CHEMMAT 771, 772, 773

**Taught Masters**
- 60 points: CHEMMAT 774 or 775
- 30 points from CHEMMAT 771, 772, 773
- 30 points from BIOSCI 741, CHEMMAT 756, 757, 771, 772, 773, FOODSCI 703, 706–709, or other approved courses

A student enrolled for this specialisation, who has already passed courses the same as, or similar to, those required for this specialisation, must substitute alternative courses as approved by the Dean of Faculty of Engineering.

### Geotechnical Engineering

**Requirement:**
- 30 points: CIVIL 751, 752
- up to 75 points from CIVIL 720–725, 754, ENGSCI 711, ENVENG 752
- at least 15 points, but no more than 30 points, from GEOLOGY 701, 705, 771, 772

With the prior approval of the Dean of Faculty of Engineering, up to 45 points may be taken from appropriate 600 and 700 level courses offered at this or another university.

### Light Metals Reduction Technology

**Requirement:**
- 120 points from CHEMMAT 717, 718, 726, 727, 731, 789 and other approved courses

With the prior approval of the Dean of Faculty of Engineering, up to 45 points may be taken from appropriate 600 and 700 level courses offered at this or another university.

### Medical Devices and Technologies

**Research Masters**
- 90 points: ENNGEN 793
- 30 points from ENNGEN 770, 771 or other approved 600 or 700 level courses

**Taught Masters**
- 60 points: ENNGEN 791
- 30 points: ENNGEN 770, 771
- 30 points from SCIENT 702–721, MEDSCI 703, PHYSICS 780, or other approved 600 or 700 level courses

A student enrolled for this specialisation who has already passed courses the same as, or similar to, those required for this specialisation, must substitute alternative courses as approved by the Dean of Faculty of Engineering.

### Plastics

**Requirement:**
- 120 points from CHEMMAT 740, 741, 742, 743, POLYMER 701, 702, 711
- 60 points from CHEMMAT 732, 788, 789

With the prior approval of the Dean of Faculty of Engineering, up to 45 points may be substituted from other appropriate 600 and 700 level courses offered at this or another university.

### Transportation

**Requirement:**
- at least 75 points from CIVIL 760–775, 779, including at least 30 points from CIVIL 765, 770, 771
- up to 30 points from CIVIL 660, 661, 758, 759

With the prior approval of the Dean of Faculty of Engineering, up to 45 points may be taken from appropriate 600 and 700 level courses offered at this or another university.

### Yacht Engineering

**Requirement:**
- 75 points: MECHENG 711, 771–774
- 45 points: MECHENG 775 or 776

A student enrolled for this specialisation who has already passed courses the same as, or similar to, those required for this specialisation, must substitute alternative courses as approved by the Dean of Faculty of Engineering.

With the approval of the Dean of Faculty of Engineering, up to 45 points may be taken from appropriate courses offered at this or another university.

Graduate Diploma in Engineering – GradDipEng

The regulations for this graduate diploma are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission

1 In order to be admitted to this programme, a student needs to have:
   a either
      (i) completed the requirements for any Bachelors degree approved by Senate or its representative
      or
      (ii) received a professional qualification in Engineering approved by Senate or its representative
      or
      (iii) attained an equivalent level of practical experience in the engineering profession as approved by Senate or its representative
   or
   b attained a level of technical competence in Engineering equivalent to at least Parts I and II of the Degree of Bachelor of Engineering (Honours), as may be approved by the Dean of Faculty of Engineering.

Duration and Total Points Value

2 A student enrolled for this graduate diploma must follow a programme equivalent to two full-time semesters and pass courses with a total value of 120 points.

Structure and Content

3 Of the 120 points required for this graduate diploma, a student must pass:
   a at least 45 points from courses, excluding Project courses, listed in the Master of Engineering Studies Schedule.
   b up to 75 points from:
      (i) courses, excluding Project courses, listed for Parts III and IV in the Bachelor of Engineering (Honours) Schedule
      (ii) courses listed in the Graduate Diploma in Engineering Schedule
      (iii) up to 30 points from courses listed for Parts I and II in the Bachelor of Engineering (Honours) Schedule, with the specific approval of the Dean of Faculty of Engineering.

4 The programme for each student requires the approval of the Dean of Faculty of Engineering.

Variations

5 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement

Admission
1 In order to be admitted to this programme, a student needs to have:
   either
   a completed the requirements for the Degree of Bachelor of Engineering or Degree of Bachelor of Engineering (Honours) at a level deemed satisfactory by the Dean of Faculty of Engineering
   or
   b completed the requirements for an equivalent degree qualification in Engineering, as approved by Senate or its representative
   or
   c completed the requirements for an approved Bachelors degree relevant to the chosen specialisation at a level deemed satisfactory by the Dean of Faculty of Engineering
   or
   d completed the requirements for an equivalent degree qualification as approved by Senate or its representative.

2 In exceptional circumstances Senate or its representative may approve admission of a student who has not met the above requirement, but who has attained an equivalent qualification or professional experience in the engineering profession.

Duration and Total Points Value
3 A student enrolled for this postgraduate certificate must:
   a pass courses with a total value of 60 points
   and
   b complete within the time limit specified in the General Regulations – Postgraduate Certificates.

4 The total enrolment for this postgraduate certificate must not exceed 80 points.

Structure and Content
5 A student enrolled for this postgraduate certificate must pass 60 points from one of the specialisations listed in the Postgraduate Certificate in Engineering Schedule.

324 The Degree of Master of Professional Studies – MProfStuds
The Degree of Bachelor of Laws – LLB

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Duration and Total Points Value

1 A student enrolled for this degree must follow a programme of the equivalent of eight full-time semesters and pass courses with a total value of 480 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

Structure and Content

2 Of the 480 points required for this degree, a student must pass:
   a 465 points: Part I, including LAW 121G, and Parts, II, III and IV as listed in the Bachelor of Laws Schedule
   and
   b 15 points from courses offered in either the General Education Open Schedule or the General Education Faculty Schedule approved for this degree.

3 a Except as permitted under Regulation 7, a student may not enrol for Part II unless Part I has been completed.
   b Each student must pass Parts II, III and IV in the order set out in the Bachelor of Laws Schedule unless approval to vary the order is given by the Dean of Faculty of Law.

General Education Exemptions

4 A student is exempted from the requirement to pass courses offered in the General Education Schedules who has:
   either
   a completed an undergraduate degree at a tertiary institution
   or
   b commenced study for this degree at a tertiary institution before 1 January 2006
   or
   c been admitted to this degree with credit from another tertiary institution of 120 points or more.

Written Work and Practical Requirements

5 In order to complete the requirements of LAW 400 or LAW 499 under Regulation 2 above, a student must carry out such legal research assignments and practical application of the law as the Faculty of Law may require.

Conjoint Degrees

6 Special arrangements apply where this degree is taken as a component degree of an approved conjoint combination. The specific requirements and a complete list of the conjoint degrees available are set out in the Conjoint Degrees section of this Calendar.

Graduate Admission

7 A student who is a graduate or graduand of any university in New Zealand, or who is granted admission ad eundem statum with graduate status under the Admission Regulations, may be granted credit of up to 90 points towards LLB Part I. Such a student will normally be required to pass satisfactorily LAW 121G and 131 before applying for admission to LLB Part II.

   Note:
   (i) Admission to Part II will be subject to selection, according to the approved selection criteria.
   (ii) In exceptional circumstances the Dean of Faculty of Law may permit a graduate or graduand to be admitted directly to LLB Part II without having passed LAW 121G and 131, provided that the applicant has demonstrated to the satisfaction of the Dean an aptitude for legal studies, and provided that LAW 121G and 131 are taken concurrently with the Part II course(s).

Courses in Other Faculties

8 a In place of elective Law courses totalling not more than 45 points for this degree, a student may take courses at Stage II or above offered for other programmes at this University, if they are related to the student’s Law studies and approved by the Dean of Faculty of Law.
   b While approval of such courses is normally given before enrolment, the Dean of Faculty of Law may in special cases apply this provision to courses previously passed for another programme.
Where the Dean approves such courses, they are to be reassigned from that other programme to this degree.

Research Papers
9  a  With the prior approval of the teacher of the course and the Dean of Faculty of Law, a student enrolled for this degree may elect to present a research paper in lieu of an examination in any elective law course.

b  This regulation applies also to a student taking any elective Law course or courses for any degree other than this, or for any diploma or for a Certificate or Certificates of Proficiency.

Variations
10  In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement
11  These regulations came into force on 1 January 2006. The 1996 regulations for the Degree of Bachelor of Laws were thereby repealed.

The Degree of Bachelor of Laws (Honours) – LLB(Hons)

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission
1  a  No student on whom the Degree of Bachelor of Laws has already been conferred may enrol for this degree.

b  At the discretion of the Dean of Faculty of Law, a student who has completed Parts I and II for the Degree of Bachelor of Laws may be permitted to enrol for this degree.

c  Where the Faculty of Law approves enrolment for the Degree of Bachelor of Laws (Honours) the courses previously passed for the Degree of Bachelor of Laws will be reassigned to the Degree of Bachelor of Laws (Honours).

Duration and Total Points Value
2  A student enrolled for this degree must pass courses with a total value of 540 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

Structure and Content
3  Of the 540 points required for this degree, a student must pass:

a  480 points from the Degree of Bachelor of Laws Schedule

b  60 points from courses listed in the Bachelor of Laws (Honours) Schedule.

4  All the provisions and requirements of the Degree of Bachelor of Laws apply also to a student enrolled
for this degree, including the provisions concerning written work and practical requirements, courses in other faculties and research papers, and the General Education requirements.

Conjoint Degrees
5 Special arrangements apply where this degree is taken as a component degree of an approved conjoint combination for which the specific requirements and a complete list of the conjoint degrees available are set out in the Conjoint Degrees section of this Calendar.

Dissertation
6 a The dissertation is to be carried out under the guidance of a supervisor appointed by Senate or its representative, on the recommendation of the Dean of Faculty of Law.
b The dissertation topic must be approved by the Dean of Faculty of Law prior to enrolment.
c A student must enrol for the dissertation in the semester following completion of Part IV of the schedule for the Degree of Bachelor of Laws.
d The dissertation must be completed and submitted by the last day of lectures in the semester of enrolment.
e In exceptional circumstances beyond the student’s control, Senate or its representative may approve a limited extension of time, not exceeding two months, for the completion of the dissertation. Where an extension of time is approved, students will be required to be enrolled and pay tuition fees at the rate of 10 points for each two-month period or part thereof. This will only apply when the student’s current enrolment period in the course has ended.

Award of Honours
7 This degree will be awarded only where a student’s work throughout the entire programme, inclusive of the courses required for the Degree of Bachelor of Laws, is of a sufficiently high standard, as determined by the Faculty of Law. In assessing the standard of a student’s work in this programme, the courses taught by other faculties that are taken as part of Part I will not be taken into account.

Withdrawal from Honours
8 A student whose work does not satisfy the standard specified in Regulation 7, or who at any time chooses to withdraw from Honours, may transfer from the Degree of Bachelor of Laws (Honours) to the Degree of Bachelor of Laws. In that case the courses already passed for, or credited to, the Degree of Bachelor of Laws (Honours) may be reassigned to the Degree of Bachelor of Laws, except for any dissertation taken under Regulation 3b.

Variations
9 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement
10 These regulations came into force on 1 January 2006. The 1996 regulations for the Degree of Bachelor of Laws (Honours) were thereby repealed.

The Degree of Bachelor of Medicine and Bachelor of Surgery – MBChB

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission

1 In order to be admitted to this programme, a student needs to have:
   a either
      (i) completed the requirements for the courses listed in Part I of the MBChB Schedule, with
          a minimum of a B+ average grade over the courses specified
      or
      (ii) successfully completed, with at least a B+ average grade, a New Zealand undergraduate
           degree
      or
      (iii) met the requirements of a special entry scheme
       and
   b demonstrated in accordance with approved selection criteria the personal qualities determined
       by the Faculty of Medical and Health Sciences as appropriate for a person seeking a qualification
       as a doctor. This requirement will normally include an interview.

2 a Students selected for admission under Clause 1a(i) will be admitted to MBChB Part II.
   b Students selected for admission under Clause 1a(ii) or Clause 1a(iii) may be required to
      successfully complete some or all of the courses listed in Part I in the schedule to these
      regulations before proceeding to Part II.

Duration and Total Points Value

3 a A student enrolled for this degree must follow a programme of six full-time years and pass
   courses with a total value of 720 points, unless credit is granted under the Admission
   Regulations and/or the Credit Regulations.
   b The student is to follow the programme for this degree continuously.
   c Interrupted study may be resumed only with the approval of, and on conditions set by, Senate
      or its representative.

Structure and Content

4 Of the 720 points required for this degree, a student must pass:
   a 705 points from Parts I, II, III, IV, V and VI, as listed in the Bachelor of Medicine and Bachelor
      of Surgery Schedule.
   b 15 points from courses offered in either the General Education Open Schedule or the General
      Education Faculty Schedule approved for this degree.

5 a However, where a student has been granted admission with credit, or in exceptional
   circumstances which Senate or its representative approves, a student may be directly admitted
   to Part II, Part III or Part IV.
   b Each Part of the programme is to be completed to the satisfaction of Senate or its representative
      before a student is permitted to enrol for the next Part.
   c A student is required to pass Part III in its entirety by gaining a pass in each course for that Part
      in the same year. A student who fails one or more courses will fail Part III. A student who fails
      Part III must repeat the Part in its entirety. However, when in the first attempt, a student passes
      individual courses with a B grade or higher, the MBChB Examiners may recommend that the
      student be credited with these individual courses in the repeat year.
   d At the discretion of Senate or its representative, a student who fails any of Parts II-VI may be
      declined permission to re-enrol in the programme as a whole.
   e A student who fails twice to pass the same Part will not be permitted to continue with this
      degree.

General Education Exemptions

6 a A student is exempted from the requirement to pass courses offered in the General Education
   Schedules who has:
      either
      (i) completed an undergraduate degree at a tertiary institution
      or
      (ii) commenced study for this degree at a tertiary institution before 1 January 2006
(iii) been admitted to this degree with credit from another tertiary institution of 120 points or more.

b. A student who has been exempted from the requirement to pass courses offered in the General Education Schedules must substitute 15 points from courses listed in the Bachelor of Health Sciences or Bachelor of Science in Biomedical Science schedules.

Practical Requirements

7. A student enrolled for this degree must carry out satisfactorily such practical or clinical work as the Faculty of Medical and Health Sciences may require.

Variations

8. In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Termination of Enrolment

9. a. If the attitudes or behaviour of a student in a medical environment are found, after due and fair inquiry, to be offensive, disruptive or likely to give rise to a risk of harm to the welfare of any party, the enrolment of the student in the programme may be terminated by Senate or its representative and any application to re-enrol may likewise be declined.

b. A student who is subject to any such inquiry may be suspended by Senate or its representative from lectures, classes and any clinical attachments pending the outcome of the inquiry.

c. A student whose enrolment is terminated or application to re-enrol is declined under Regulation 9a may appeal from that decision to the Council or its duly appointed delegate.

Commencement

10. These regulations came into force on 1 January 2006. The 2005 regulations for the Degree of Bachelor of Medicine and Bachelor of Surgery were thereby repealed.

The Degree of Bachelor of Nursing – BNurs

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Duration and Total Points Value

1. A student enrolled for this degree must follow a programme of six full-time semesters and pass courses with a total value of 360 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

Structure and Content

2a. Of the 360 points required for this degree, a student must pass:

(i) 345 points from all Parts and courses listed in the Bachelor of Nursing Schedule.

(ii) 15 points from courses offered in either the General Education Open Schedule or the General Education Faculty Schedule approved for this degree.

b. Each Part must normally be completed before the next Part may be taken. However, a student who has failed to pass either Parts I or II in their entirety may be allowed, at the discretion of Senate or its representative, to enrol for the course or courses needed to complete that Part together with a course or courses towards the next successive Part.

General Education Exemptions

3a. A student is exempted from the requirement to pass courses offered in the General Education Schedules who has:

*either*
(i) completed an undergraduate degree at a tertiary institution
or
(ii) commenced study for this degree at a tertiary institution before 1 January 2006
or
(iii) been admitted to this degree with credit from another tertiary institution of 120 points or more.

b A student who has been exempted from the requirement to pass courses offered in the General Education Schedules must substitute 15 points from courses approved by the Head of School of Nursing.

**Practical Requirements**

4 A student enrolled for this degree must carry out satisfactorily such practical or clinical work as the Head of School of Nursing may require.

**English Language Requirements**

5 A student enrolled for this degree must demonstrate competence in the English language, by passing NURSING 199, as prescribed by the School of Nursing, before being permitted to enrol for Part II.

**Suspension or Termination of Enrolment**

6 a If the behaviour, attitude or circumstances of a student is found, after due and fair inquiry, to be inappropriate, offensive or disruptive in a clinical or practice environment, or to be likely to give rise to a risk of harm to the welfare of any party in a clinical or practice environment, then the enrolment of the student in the programme may be terminated by Senate or its representative and any application to re-enrol may likewise be declined.

b A student who is subject to any such inquiry may be suspended by Senate or its representative from lectures, classes and any clinical attachments pending the outcome of the inquiry.

c A student whose enrolment is terminated or application to re-enrol is declined under Regulation 6a may appeal from that decision to the Council or its duly appointed delegate.

**Variations**

7 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

**Commencement**

8 These regulations came into force on 1 January 2006. The 2000 regulations for the Degree of Bachelor of Nursing were thereby repealed.

**The Degree of Bachelor of Optometry – BOptom**

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

**Admission**

1 In order to be admitted to this programme a student needs to have:
   a (i) satisfactorily completed a prescribed 120 point Science year at The University of Auckland or equivalent programme of study
       and
   (ii) be a New Zealand citizen, or have Permanent Resident status
   or
   b (i) satisfactorily completed a Bachelor’s degree with science content deemed appropriate by Senate or its representative
       and
   (ii) be a New Zealand citizen, or have Permanent Resident status
   or
   c (i) satisfactorily completed a programme of study in Science deemed appropriate by Senate or its representative
       and
   (ii) have International Student status.
Admission to the programme is at the discretion of Senate or its representative, on the recommendation of the Director of the programme.

**Duration and Total Points Value**

A student enrolled for this degree must follow a programme of the equivalent of ten fulltime semesters and pass courses with a total value of 600 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

**Structure and Content**

Of the 600 points required for this degree, a student must pass:

- 570 points from Parts I, II, III, IV and V as listed in the Bachelor of Optometry Schedule
- 30 points from courses offered in either the General Education Open Schedule or the General Education Faculty Schedule approved for this degree or from a combination of these schedules.

In exceptional circumstances up to 120 points of credit as approved by the Head of Department may be substituted for Part I or parts thereof.

Each Part must normally be completed before the next Part may be taken. However, a student who has failed to pass one of those Parts in its entirety may be allowed, at the discretion of Senate or its representative, to enrol for the course or courses needed to complete that Part together with a course or courses towards the next Part.

Study for this degree must be pursued in consecutive semesters. Interrupted study may be resumed only with the approval of, and on conditions set by, Senate or its representative.

**General Education Exemptions**

A student is exempted from the requirement to pass courses offered in the General Education Schedules who has:

- either
  - (i) completed an undergraduate degree at a tertiary institution
  - (ii) commenced study for this degree at a tertiary institution before 1 January 2006
  - (iii) been admitted to this degree with credit from another tertiary institution of 240 points or more.

A student who has been exempted from the requirement to pass courses offered in the General Education Schedules must substitute 30 points from courses listed in the Bachelor of Science Schedule.

A student admitted to this degree with credit from another tertiary institution of between 120 and 235 points inclusive must pass:

- (i) 15 points from the courses offered in the General Education Schedules
- (ii) a further 15 points from other courses listed in the Bachelor of Science Schedule.

**Enrolment for Two Programmes**

A student may not be enrolled in this degree at the same time as in another programme, unless special permission is given by Senate or its representative.

**Practical Requirements**

A student enrolled for this degree must carry out satisfactorily such practical or clinical work as the Faculty of Medical and Health Sciences may require.

In any course that includes both a final written examination and practical or clinical work, a student must pass both the final written examination and the practical or clinical work to pass that course as a whole. However, a student who passes the practical or clinical work but fails the final written examination may, at the discretion of the Head of Department, have the result for the practical or clinical work for that failed course carried forward when the course is repeated.

A student who repeats any course may also be required to undertake such additional practical or clinical work as the Head of Department of Optometry and Vision Science determines.

Where a weakness occurs in the clinical practice component, in accordance with examination regulation 19, students will be required to be enrolled and pay tuition fees at the rate of 10 points for each two-month period or part thereof. This provision will only apply when the student’s current enrolment period has ended.
Variations
11 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Honours
12 a This degree may be awarded with Honours where a student’s overall grade is sufficiently high. There are two classes of Honours: First Class Honours and Second Class Honours. Second Class Honours are awarded in either First Division or Second Division.

b Honours may normally be awarded only if the requirements for this degree are completed within eight semesters of initial enrolment for the degree. In exceptional circumstances however, Senate or its representative may approve an extension of this period for not more than two further semesters.

Commencement
13 These regulations came into force on 1 January 2011. The 2006 regulations for the Degree of Bachelor of Optometry were thereby repealed.

The Degree of Doctor of Medicine – MD

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations, including the General Regulations for Named Doctorates and the Academic Statutes and Regulations.

Preamble
1 a A candidate for the Degree of Doctor of Medicine is required to pursue an approved programme of advanced study and research as an enrolled student of the University.

b It is expected that this programme will usually be completed within three to four years of equivalent full-time candidature. Part-time candidature may also be permitted.

c The Degree of Doctor of Medicine is awarded for a formal and systematic exposition of a coherent programme of advanced research work in any branch of medicine or medical science presented in a thesis which in the opinion of the examiners and the Board of Graduate Studies satisfies all of the following criteria:

(i) to be an original contribution to any branch of medicine or medical science

and

(ii) to meet internationally recognised standards for such work

and

(iii) to demonstrate a knowledge of the literature relevant to the subject of the thesis, and the ability to exercise critical and analytical judgement of it

and

(iv) to be satisfactory in its methodology, in the quality and coherence of its written expression, and in its scholarly presentation and format.

d If the core of the thesis comprises a series of published or unpublished research papers and/or case studies, the candidate must be the lead or sole author of each paper or case study and have written the text. The candidate must provide a contextual framework and concluding discussion
that will normally amount to 20,000–30,000 words. The range and focus of this material shall generally correspond with the introductory and concluding chapters of a thesis. The thesis must be presented in a consistent format, citation style and typeface.

e If the core of the thesis does not comprise a series of published or unpublished research papers and/or case studies, a candidate may still include within their thesis published or unpublished research papers and/or case studies, provided that the candidate was the lead or sole author of each paper or case study and wrote the text. The thesis must be presented in a consistent format, citation style and typeface.

f In the case of published or unpublished research papers and/or case studies that the candidate has contributed to but is not the sole or lead author of, the candidate may report in the thesis their contribution to the research with due reference to the original paper and/or case study. The thesis must be presented in a consistent format, citation style and typeface.

g All material which is not the original work of the author of the thesis must:
  (i) be fully and appropriately attributed
  or
  (ii) if a substantial part of another work, only be reproduced with the written permission of the copyright owner of the other work.

h All research for the thesis is to be conducted in a manner consistent with The University of Auckland Guidelines for the Conduct of Research.

Eligibility

2 A candidate for the Degree of Doctor of Medicine is required to have:
   a (i) completed the requirements for the award of the Degree of Bachelor of Medicine and Bachelor of Surgery at The University of Auckland
   or
   (ii) completed the requirements for the award of a medical qualification that the Board of Graduate Studies considers to be equivalent to the prerequisite qualification specified in Clause a(i) of this regulation
   and
   b demonstrated an ability to pursue doctoral level research in the field of medicine or medical science
   and
   c following the completion of their medical qualification, normally had at least five years of experience in medical practice or in an area considered comparable by the Board of Graduate Studies
   and
   d applied for admission and been admitted to The University of Auckland.

Duration

3 a A candidate will normally be required to complete the requirements for the degree within not less than three full-time years and not more than four full-time years, or the part-time equivalent, from the date of registration unless permitted to do otherwise by the Board of Graduate Studies.

b A candidate who draws upon original studies completed prior to registration may, with the permission of the Board of Graduate Studies, complete the requirements for the degree in less than three years. The minimum time for completion will not be less than one year.

Registration

4 a The Board of Graduate Studies, on the recommendation of the Head of Department in the discipline in which the candidate is to be primarily registered, is to determine whether the candidate may be registered and the date of registration.

b Conditions of registration will be determined according to Regulation 1 of the General Regulations for Named Doctorates.

c All candidates will provide two goals to be achieved in the first year of registration.

Structure and Content

5 A candidate enrolled for this degree must pass MEDSCI 896 Thesis.

Reviews of Progress

6 Reviews of progress and continuation of registration will be made according to Regulation 2 of the General Regulations for Named Doctorates.

Enrolment and Fees

7 Enrolment and payment of fees will be determined according to Regulation 3 of the General Regulations for Named Doctorates.
Changes to the Conditions of Registration

8 Changes to supervision, extensions of time, and suspension or termination of registration will be made according to Regulation 4 of the General Regulations for Named Doctorates.

Discontinuation of Registration

9 Enrolment and Programme Regulations regarding discontinuation apply to MD candidates.

Submission

10 a All candidates are required to submit three copies in temporary binding and one electronic copy in pdf format of the thesis to the Graduate Centre. Copies should include the following statement to examiners on the first page:
   “This thesis is for examination purposes only and is confidential to the examination process.”

b Three months prior to the expected date of submission, a candidate should notify the School of Graduate Studies in writing of their intention to submit. If the candidate has reason to believe that any person would be unsuitable to serve as an examiner of the thesis on the grounds of conflict of interest, he or she may also submit at this time the name of this person and a statement in writing as to the nature of the conflict of interest to the Graduate Centre.

c The thesis is to be accompanied by a statutory declaration, signed by the candidate, stating that the thesis is the candidate’s own work and that neither the thesis nor any part of it has been submitted or accepted for any other degree or diploma and that written permission has been obtained for any third-party copyright material reproduced in the thesis that represents a “substantial part” of the other work. The declaration should also state that the temporary-bound copies and electronic copy are identical.

d Where the thesis contains jointly authored research papers, case studies and/or any other work, published or unpublished, a Co-Authorship Form must be signed by the candidate and all the joint authors, stating the extent to which the jointly authored material is the candidate’s own work.

Where the thesis includes research reported in published or unpublished co-authored works (other than as in Clauses 1g and 1h in the PhD Statute) a Co-Authorship Form must be signed by the candidate and all the joint authors, stating the extent to which the jointly authored material is the candidate’s own work.

e The thesis is to be presented in English unless otherwise approved by the Board of Graduate Studies at the time of first registration of the candidate.

Examination

11 The examination process will follow that of Clause 9 of the PhD Statute, except that:

a Appointment of Examination Committee
The Board of Graduate Studies will appoint a Doctor of Medicine Examination Committee consisting of the Associate Dean (Postgraduate) of the Faculty of Medical and Health Sciences or delegate as Chair, the Head of Department or delegate, the Dean of the Faculty of Medical and Health Sciences or delegate, and the Head of the School of Medicine or delegate, for all Doctor of Medicine examinations and

b Examiners’ Reports
Examiners will be requested to assess the thesis according to the criteria of clause 1(c) of these regulations, and to make one of the following recommendations:

(i) to award the degree.

The thesis can be passed without any further amendment or correction. Sometimes examiners may wish to include a list of suggested amendments for the candidate to use when publishing the material.

or

(ii) to award the degree after specified “minor corrections” have been made to the thesis to the satisfaction of the Chair of the Doctor of Medicine Examination Committee or nominee, who may be the Main Supervisor, by a specified date.

This recommendation is made when the thesis has reached the required standard but for minor problems such as inconsistency in terminology, referencing problems, or typographical errors. When these are corrected, the thesis will meet the standard and then will be ready for permanent binding and placement in the Library.

or

(iii) to award the degree after revisions have been made to the thesis to the satisfaction of the Doctor of Medicine Examination Committee, by a specified date, and subject to satisfactory performance at the oral examination.
This recommendation is made when the Examiner concludes that the revisions required are not minor, but are substantive including re-analysis of data, or rewriting of chapters, or corrections of significant lapses in logic or coherence. These changes can normally be made within a 3–6 month period.

or

(b) to award the degree after revisions have been made to the thesis to the satisfaction of the Examiner by a specified date

This recommendation is made when the Examiner concludes that the revisions required are not minor, but are substantive including re-analysis of data, or rewriting of chapters, or corrections of significant lapses in logic or coherence. The nature of the revisions must be such that subject-specific knowledge is required and the Examiner wishes to see and approve the changes. These changes can normally be made within a 3–6 month period.

or

(iv) to permit the candidate to revise the thesis and resubmit it for examination on one further occasion only.

This recommendation is made when the Examiner concludes that the thesis is not yet of MD standard. It will require either further research, rewriting of specific sections, reconceptualisation, and/or reorganisation in order to reach the required MD standard. The candidate will be permitted to resubmit, normally within a 12 month period.

or

(v) not to award the degree, but refer the thesis to the appropriate authority within the University for consideration of the award of another degree.

This recommendation is made when the Examiner is of the opinion that the thesis has substantive flaws incompatible with the requirements of a MD.

or

(vi) not to award any degree.

and

c Recommendation of the Doctor of Medicine Examination Committee

The Doctor of Medicine Examination Committee will make a report to the Board of Graduate Studies which includes the nature and outcome of any communications with examiners and/or supervisors made under Clause 9j (PhD Statute) and which recommends one of the following:

(i) to award the degree

or

(ii) to award the degree after specified “minor corrections” have been made to the thesis to the satisfaction of the Doctor of Medicine Examination Committee or nominee, by a specified date

or

(iii) (a) to award the degree subject to revising part or parts of the thesis to the satisfaction of the Doctor of Medicine Examination Committee or nominee, by a specified date

or

(b) to award the degree subject to revising part or parts of the thesis to the satisfaction of the Examiner or Examiners by a specified date

or

(iv) to permit the candidate to revise the thesis and resubmit it for examination on one further occasion only, but only if the candidate has not already been permitted to revise and resubmit

or

(v) to refer the thesis to the appropriate authority within the University for consideration of the award of another degree

or

(vi) not to award the degree

or

(vii) to require the candidate to undergo an Oral Examination.

d In the case of recommendations (iii) and (iv), the report must also state clearly the nature of the revisions recommended.

e Oral Examination

An Oral Examination will be held only on the recommendation of the Doctor of Medicine
Examination Committee. Should an oral examination be required the Head of Department or delegate will be asked to nominate a Chair of the Oral Examination as well as a Head of Department Nominee to attend the oral examination. The Oral Examination and any required revisions will then proceed as per Clause 9 of the PhD Statute.

**Copies for Deposit**

(i) On successful completion of the examination, candidates who first registered in a Doctor of Medicine programme prior to 1 January 2009 will be required to deposit either, three hardbound copies of the thesis or, two hardbound copies and one digital copy of the thesis, corrected as may be required, with the Graduate Centre. The degree will not be conferred until the candidate has complied with this requirement.

(ii) On successful completion of the examination, candidates who first registered in a Doctor of Medicine programme on or after 1 January 2009 will be required to deposit two hardbound copies of the thesis and one digital copy, corrected as may be required, with the Graduate Centre. The degree will not be conferred until the candidate has complied with this requirement.

(iii) When two hardbound copies and a digital copy of the thesis are deposited, these must be accompanied by a statutory declaration signed by the candidate stating that the hardbound copies and the digital copy are the same.

(ii) The digital thesis deposited shall be formatted as specified in the *Guidelines for Formatting a Digital Thesis*.

(iii) A thesis which is deposited in digital form will be accessible through the University’s digital repository, unless embargoed under Clause 24 of the Examination Regulations.

**Variations**

12 In exceptional circumstances the Board of Graduate Studies may approve a programme which does not conform to these regulations.

**Appeals**

13 Appeals regarding the examination process or decisions of the Board of Graduate Studies must be made according to Regulation 5 of the General Regulations for Named Doctorates.

**Dispute Resolution Procedures**

14 Disputes are to be resolved according to the Policy for Resolution of Research Problems: Postgraduate Research Students.

**Transitional Arrangements**

15 a These regulations came into force on 1 January 2009 and were amended on 2 April 2012. The 1996 regulations for the Degree of Doctor of Medicine were thereby repealed.

b For candidates initially registered under earlier regulations for this degree the Board of Graduate Studies may agree to vary the application of the provisions of these regulations to ensure consistency with the provisions of the regulations under which the candidate was enrolled where it is satisfied that the candidate would otherwise be at a disadvantage.

**The Degree of Doctor of Pharmacy – DPharm**

*New admissions into the Doctor of Pharmacy were suspended in 2010. The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations, including the General Regulations for Named Doctorates and the Academic Statutes and Regulations.*

**Preamble**

1 a Candidates for the Degree of Doctor of Pharmacy are required to pursue an approved programme of advanced study and research as enrolled students of the University.

b It is expected that this programme will normally be completed within four years.

c The Degree of Doctor of Pharmacy is awarded for a formal and systematic exposition of a coherent programme of advanced research work carried out over the period of registration for the degree which in the opinion of the examiners and the Board of Graduate Studies satisfies all of the following criteria:

(i) to be an original contribution to professional practice in the field of Pharmacy

(ii) to meet internationally recognised standards for such work
(iii) to demonstrate a knowledge of the literature relevant to the subject of the thesis, and the ability to exercise critical and analytical judgement of it

and

(iv) to be satisfactory in its methodology, in the quality and coherence of its written expression, and in its scholarly presentation and format.

d All research for the thesis is to be conducted in accordance with The University of Auckland Guidelines for the Conduct of Research.

e Doctor of Pharmacy theses may not exceed 75,000 words or 160 pages in total without the permission of the Board of Graduate Studies.

Eligibility

Candidates for the Degree of Doctor of Pharmacy are required to have:

a (i) completed the requirements for the award of either the Degree of Master of Pharmacy Practice with First Class or Second Class Honours First Division at The University of Auckland

or

(ii) completed the requirements for the award of a qualification that the Board of Graduate Studies considers to be equivalent to the prerequisite qualification specified in Clause a(i) of this regulation

and

b demonstrated an ability to pursue doctoral level research in the field of Pharmacy

and

c following the completion of a first degree, had at least five years of experience in pharmacy practice or in an area considered comparable by the Board of Graduate Studies

and

d have current registration as a pharmacist in New Zealand or as a pharmacist in the country of domicile.

and

e Every candidate for the Degree of Doctor of Pharmacy must have applied for admission and been admitted to The University of Auckland.

Duration and Total Points Value

A student for this degree has to follow a two-part programme, Part I being taken in one full-time year or two consecutive part-time years and Part II being taken in two full-time years or four consecutive part-time years, and pass an approved programme with a total value of 360 points.

b Candidates must complete the requirements for this degree within not less than three years and not more than four years from the date of registration for full-time students, and not less than six years and not more than eight years from the date of registration for part-time students, unless permitted to do otherwise by the Board of Graduate Studies under Regulation 9. In the case of candidates who have been permitted to change between full-time and part-time the time requirements will be calculated on a pro rata basis.

Registration

The Board of Graduate Studies, on the recommendation of the Head of School of Pharmacy, is to determine whether the student may be registered and the date of registration.

b Conditions of registration will be determined according to Regulation 1 of the General Regulations for Named Doctorates (2004).

Structure and Content

Of the 360 points required for this degree, a student must pass Parts I and II as listed in the Doctor of Pharmacy Schedule.

Candidates must complete Part I with at least a B+ average grade before commencing Part II.

Reviews of Progress

At the end of Part I the Head of School of Pharmacy will submit, through the Associate Dean (Postgraduate) of the Faculty, a report to the Board of Graduate Studies on the candidate's progress and containing a recommendation as to whether or not the candidate should be permitted to proceed to Part II.

b During Part II, reviews of progress and continuation of registration will be made according to Regulation 2 of the General Regulations for Named Doctorates (2004).

Enrolment and Fees

Enrolment and payment of fees will be determined according to Regulation 3 of the General Regulations for Named Doctorates (2004).
Changes to the Conditions of Registration

9 Changes to supervision, extensions of time, and suspension or termination of registration will be made according to Regulation 4 of the General Regulations for Named Doctorates (2004).

Submission

10 a All candidates are initially required to submit three copies of the thesis to the Graduate Centre. The thesis should have a temporary binding and a statement to examiners as specified in the Guide to Theses and Dissertations.

b One month prior to the expected date of submission, candidates should notify the Graduate Centre in writing of their intention to submit. If the candidate has reason to believe that any person would be unsuitable to serve as an examiner of the thesis on the grounds of conflict of interest, he or she may also submit at this time the name of this person and a statement in writing as to the nature of the conflict of interest to the Graduate Centre.

c The thesis is to be accompanied by a statutory declaration, signed by the candidate, stating that the thesis is the candidate’s own work and that neither the thesis nor any part of it has been submitted or accepted for any other degree or diploma.

d The thesis is to be presented in English unless otherwise approved by the Board of Graduate Studies at the time of first registration of the candidate.

Examination

11 The examination process will follow that of Regulation 9 of the Statute for the Degree of Doctor of Philosophy (2011), except that:

a examiners will be requested to assess the thesis according to the criteria of Clause 1(c) of these regulations

and

b the Board of Graduate Studies will appoint a Doctor of Pharmacy Adviser who will take the part of the Head of Department Nominee, as described in the Statute for the Degree of Doctor of Philosophy (2011), for all Doctor of Pharmacy examinations.

Variations

12 In exceptional circumstances the Board of Graduate Studies may approve a personal programme which does not conform to these regulations.

Appeals

13 Appeals regarding the examination process or decisions of the Board of Graduate Studies must be made according to Regulation 5 of the General Regulations for Named Doctorates (2004).

Dispute Resolution Procedures

14 Disputes are to be resolved according to the Policy for Resolution of Research Problems: Postgraduate Research Students.

Transitional Arrangements

15 a These regulations came into force on 1 January 2006. The 2005 regulations for the Degree of Doctor of Pharmacy were thereby repealed.

b For candidates initially registered under earlier regulations for this degree the Board of Graduate Studies may agree to vary the application of the provisions of this statute to ensure consistency with the provisions of the statute under which the candidate was enrolled where it is satisfied that the candidate would otherwise be at a disadvantage.

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Duration and Total Points Value
1 A student enrolled for this degree must follow a programme of the equivalent of six full-time semesters and pass courses with a total value of 360 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

Structure and Content
2 Of the 360 points required for this degree, a student must pass:
   a at least 300 points from courses listed in the Bachelor of Science Schedule, including
      (i) at least 180 points above Stage I, including at least 75 points above Stage II
      (ii) courses in a minimum of three subjects listed in the Bachelor of Science Schedule
           and either
           (iii) a major listed in the Bachelor of Science Schedule, including at least 60 points above Stage II
                or
           (iv) two or more majors listed in the Bachelor of Science Schedule, of which at least one major
                must include at least 60 points above Stage II and any further majors must each include
                at least 45 points above Stage II.
   b 30 points from courses offered in either the General Education Open Schedule or the General Education Faculty Schedule approved for this degree or from a combination of these schedules.
3 Up to 30 points may be taken from courses available for other programmes offered at this University.

General Education Exemptions
4 a A student is exempted from the requirement to pass courses offered in the General Education Schedules who has:
    either
    (i) completed an undergraduate degree at a tertiary institution
    or
    (ii) commenced study for this degree at a tertiary institution before 1 January 2006
    or
    (iii) been admitted to this degree with credit from another tertiary institution of 240 points or more.
    b A student who has been exempted from the requirement to pass courses offered in the General Education Schedules must substitute 30 points from courses available for this degree.
    c A student admitted to this degree with credit from another tertiary institution of between 120 and 235 points inclusive must pass:
       (i) 15 points from courses offered in the General Education Schedules
       and
       (ii) a further 15 points from courses available for this degree.

Practical Requirements
5 In any course that includes practical work as well as written work, a student must obtain passes in both the practical and written work in order to pass that course as a whole. A student who passes the practical work but who fails the written work may, at the discretion of the Head of Department, have the result for the practical work carried forward when the course is retaken.

Conjoint Degrees
6 Special arrangements apply where this degree is taken as a component degree of an approved conjoint combination. The specific requirements and a complete list of the conjoint degrees available are set out in the Conjoint Degrees section of this Calendar.

Special Cases
7 a In exceptional circumstances Senate or its representative may permit a suitably qualified student to enrol directly in a Stage II course(s). If the student fails the Stage II course(s) but is certified by the examiner as having reached a pass in an equivalent Stage I course(s), the student may be credited with the appropriate Stage I course(s).
If a student who is enrolled in and fails the advanced or accelerated Stage I course but is certified by the examiner as having reached a pass in a Stage I course in the same subject having a lower entry requirement, the student may be credited with the latter course. The relevant Head(s) of Department shall certify to Senate or its representative that the failed course is an advanced or accelerated course.

Variations
In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement
These regulations came into force on 1 January 2006. The 2001 regulations for the Degree of Bachelor of Science were thereby repealed.

Electronics and Computing

The major in Electronics and Computing was suspended in 2012. Students who have a current enrolment in this major should contact their faculty student centre for advice regarding completion.

First or single Major must include
• 45 points at Stage II in Computer Science or Mathematics
• 30 points: PHYSICS 340, 390
• 15 other points from PHYSICS 315–391, GEOPHYSICS 330–331

• 15 points at Stage III in Computer Science

Second Major must include
• 45 points at Stage II in Computer Science or Mathematics
• 30 points: PHYSICS 340, 390
• 15 points at Stage III in Computer Science

Environmental Science

The Environmental Science major must be taken in conjunction with another BSc major, including 60 points from Stage III courses in the other majoring subject.

All Majors must include
• 75 points: ENVSCI 101, 201, 301, 310, GEOG 205
• 15 points from BIOSCI 209, GEOG 250, STATS 201, or approved equivalent
• 15 points from a Stage III Bachelor of Science course

Food Science

The major in Food Science was withdrawn in 2011. Students who have a current enrolment in this major should contact their faculty for advice regarding completion.

Food Science and Nutrition

Major must include
• 75 points: BIOSCI 101, 106, 107, CHEM 110, STATS 101 or 108
• 45 points from CHEM 120, ENVSIC 111, HLTHPSYC 122, MEDI SCI 142, PHYSICS 160, POPLHLTH 101, 102, 111
• 45 points: BIOSCI 203, FOODSCI 201, BIOSCI 204 or MEDI SCI 202 either
• 30 points: CHEM 230, CHEMMAT 211
• 30 points: Elective courses
or
• 60 points: BIOSCI 202, MEDI SCI 203, 205, POPLHLTH 206

or
• 60 points: BIOSCI 348, FOODSCI 301, 302, CHEMMAT 756
• 60 points: BIOSCI 358, MEDI SCI 312, 315, POPLHLTH 305
• at least 15 points from BIOSCI 358, FOODSCI 301–304, MEDI SCI 301, POPLHLTH 301
• at least 30 points from BIOSCI 201, 358, CHEM 240, FOODSCI 301–304, MEDI SCI 301, POPLHLTH 202, 301, SCIGEN 201, SPORTSCI 206

Subject to CUAP Approval

Geography

Single or First Major must include
• at least 45 points from GEOG 101, 102, 202, either 261 or 262
• 15 points: GEOG 250
• 15 points from GEOG 315, 330
• at least 45 further points from GEOG 302–362, ENVSCI 311

Second major must include
• at least 45 points from GEOG 101, 102, 202, either 261 or 262
• 15 points: GEOG 250
• 15 points from GEOG 315, 330
• at least 30 further points from GEOG 302–362, ENVSCI 311

Geology

The major in Geology was suspended in 2012. Students who have a current enrolment in this major should contact their faculty student centre for advice regarding completion.

Single or First Major must include
• 30 points: GEOLOGY 201, 301
• at least 30 points from GEOLOGY 202–204
• at least 30 points from GEOLOGY 302–305
Geophysics

First or single Major must include
- at least 15 points from GEOLOGY 103, 104
- 30 points: PHYSICS 213, 231
- 30 points from GEOLOGY 201, 204, MATHS 260, PHYSICS 240, 261
- 30 points from GEOLOGY 361, GEOPHYS 330–339

Second Major must include
- at least 15 points from GEOLOGY 103, 104
- 30 points: PHYSICS 213, 231
- 30 points from GEOLOGY 201, 204, MATHS 260, PHYSICS 240, 261
- 30 points from GEOLOGY 361, GEOPHYS 330–339

Industrial Mathematics

The major in Industrial Mathematics was withdrawn in 2011. Students who have a current enrolment in this major should contact their faculty student centre for advice regarding completion.

Information Systems

Note: Not available for conjoint degrees
First or Single Major must include
- 15 points: ACCTG 101
- 60 points from COMPSCI 210–280
- 45 points: INFOSYS 220, 222, 322
- at least 30 points from COMPSCI 313–379
- at least 30 points from INFOSYS 320–341, 343, 344

Second Major must include
- 15 points: ACCTG 101
- 45 points from COMPSCI 210–280
- 45 points: INFOSYS 220, 222, 322
- at least 30 points from COMPSCI 313–379
- at least 15 points from INFOSYS 320–341, 343, 344

Logic and Computation

All Majors must include
- 60 points: COMPSCI 101, 225, PHIL 101, 222
- 60 points from COMPSCI 320, 350, 367, LINGUIST 300, 313, 320, LOGICOMP 301, 302, MATHS 315, 326, 328, PHIL 305, 315, 323
- 15 further points from COMPSCI 105, 220, 320, 350, 367, LINGUIST 100, 103, 200, 300, 313, 320, LOGICOMP 201, 301, 302, MATHS 150, 250, 253, 255, 315, 326, 328, PHIL 105, 216, 222, 266, 305, 315, 323

Marine Science

All Majors must include
- 30 points: MARINE 202, 302
- 15 points from STATS 201, BIOSCI 209, GEOG 250
- 45 further points from approved Stage III Bachelor of Science courses

Mathematics

(i) Applied Mathematics
Single or First Major must include
- 45 points: MATHS 253, 260, 270
- 45 points: MATHS 340, 361, 363
- at least 15 points from MATHS 332, 362, 386–389, STATS 310, 325, 370, ENGSCI 343, 391 and any other courses approved by the Head of Department

Second major must include
- at least 30 points from MATHS 253, 260, 270
- 45 points: MATHS 340, 361, 363

(ii) Mathematics
Single or First Major must include
- 30 points from MATHS 253, 255, 260
- up to 30 points from MATHS 361–372, STATS 310, 325, 370, ENGSCI 391, PHIL 305
- at least 30 points from MATHS 302–360, 373–384

Second major must include

- up to 15 points from MATHS 361–372, STATS 310, 325, 370, ENGSCI 391, PHIL 305
- at least 30 points from MATHS 302–360, 373–384

Medicinal Chemistry

Note: Not available for conjoint degrees
All Majors must include

Part I
- 90 points: BIOSCI 101, 106, 107, CHEM 110, 120, MEDSCI 142
- at least 15 points from COMPSCI 111, PHYSICS 101, 120, 160

Part II
- 90 points: BIOSCI 201, 203, CHEM 230, 240, MEDSCI 204, 205
- at least 15 points from BIOSCI 202, 204, CHEM 210, 220, MEDSCI 202, 203, PHARMACY 202

Part III
- 60 points: CHEM 330, 390, 392, MEDSCI 303
- at least 30 points from CHEM 320, 340, 350, BIOSCI 349, 350, 351, 353–356, MEDSCI 206, 305, 306

Operations Research

First or Single Major must include
- 45 points: STATS 255, 320, ENGSCI 391
- at least 15 points from STATS 301, 310, 325, 360, 370, 380, COMPSCI 320
- at least 15 points from STATS 301–390, MATHS 326, 328, 361, OPSMGT 370, 371

- at least 15 points from STATS 301, 310, 325, 360, 370, 380, COMPSCI 320

Pharmacology

Single or First Major must include
- at least 60 points from MEDSCI 303–307

Second major must include
- at least 45 points from MEDSCI 303–307

Physics

Single or First Major must include
- at least 45 points from PHYSICS 315–371, GEOPHYS 330–339
- at least 15 points from PHYSICS 390, 391

Second major must include
- at least 30 points from PHYSICS 315–371, GEOPHYS 330–339
- at least 15 points from PHYSICS 390, 391

Physiology

Single or First Major must include
- at least 60 points from MEDSCI 308–312, 316, 317

Second major must include
- at least 45 points from MEDSCI 308–312, 316, 317

Psychology

Single or First Major must include
- at least 60 points from PSYCH 303–364, SPORTSCI 304

Second major must include
- at least 45 points from PSYCH 303–364, SPORTSCI 304

Sport and Exercise Science

Single or First Major must include
- 60 points: SPORTSCI 101, 103, BIOSCI 107, MEDSCI 142
- 15 points from PSYCH 108, 109
- 75 points: SPORTSCI 201–204, MEDSCI 205

The Degree of Bachelor of Science (Honours) – BSc(Hons)

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission
1 In order to be admitted to this programme, a student needs to have:
   a completed the requirements for the Degree of Bachelor of Science from The University of Auckland including at least 90 points above Stage II or attained an equivalent qualification as approved by Senate or its representative
   and
   b attained at least a B average in 45 points above Stage II in the relevant subject major as specified in the Bachelor of Science regulations or equivalent
   and
   c approval from the relevant Head of Department, Director of School, or equivalent.
2 A student who has not completed the requirements of the Degree of Bachelor of Science but who has passed:
   a courses with a total value of at least 345 points towards that degree including the requirements of the major as specified in the regulations for the Bachelor of Science
   and
   b the Stage III entry requirements for this degree
may, with the approval of the relevant Head of Department, Director of School or equivalent, enrol for this degree. The requirements for the Bachelor of Science degree must be completed within 12 months of initial enrolment for the Bachelor of Science (Honours). The Bachelor of Science (Honours) will not be awarded until the requirements for the Bachelor of Science have been completed.

Duration and Total Points Value
3 A student enrolled for this degree must:
   a pass courses with a total value of 120 points
   and
   b complete within the time limit specified in the General Regulations – Bachelors Honours Postgraduate Degrees.
4 The total enrolment for this degree must not exceed 160 points.

Structure and Content
5 A student enrolled for this degree must pass 120 points in one of the subjects listed in the Bachelor of Science (Honours) Schedule.
6 A project or dissertation of up to 60 points, in the same subject, must be included. The combined point value of the dissertation and a research preparation course (such as a dissertation preparation or research methods course) in the same subject must not exceed 60 points.
7 The programme for each student must be approved by the relevant Head of Department, Director of School or equivalent.

Project / Dissertation
8 a The project or dissertation is to be carried out under the guidance of a supervisor appointed by Senate or its representative, on the recommendation of the relevant Head of Department.
   b The dissertation topic must be approved by the relevant Head of Department prior to enrolment.
   c The dissertation is to be completed and submitted in accordance with the General Regulations – Bachelors Honours Postgraduate Degrees.

Variations
9 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.
Honours

10. a This degree may be awarded only where a student’s overall grade for the Degree of Bachelor of Science (Honours) is sufficiently high to deserve Honours.

b Should a student fail to qualify for the award of the Degree of Bachelor of Science (Honours), Senate or its representative may approve the reassignment of points towards the Postgraduate Diploma in Science.

11. Where the standard specified in Regulation 10a is achieved, Honours will be awarded as specified in the General Regulations – Bachelors Honours Postgraduate Degrees.

Commencement

12. These regulations came into force on 1 January 2006. The 1996 regulations for the Degree of Bachelor of Science (Honours) were thereby repealed.

Bachelor of Science (Honours) (BSc(Hons)) Schedule

Applied Geology

Prerequisite: A major in Geology and at least 90 points at Stage III
Requirement:
• 15 points: ENVSCI 701
• 45 points from GEOG 746, GEOLOGY 701, 703, 705, 713, 714, 754, 771 GEOPHYS 761–763, 780
• 30 points from approved courses within Part IV of the Bachelor of Engineering (Honours) Schedule or the Master of Engineering Studies Schedule
• 30 points from GEOLOGY 789

Applied Mathematics

Prerequisite: A major in Applied Mathematics and at least 90 points at Stage III
Requirement:
• at least 45 points from MATHS 761, 762, 763, 764, 769, 770, PHYSICS 701, 707
• 30 points: MATHS 776 Dissertation in Mathematics or Applied Mathematics
• up to 45 points from approved 700 level courses in Mathematics or related subjects with approval of the Head of Department

Bioinformatics

Prerequisite: A major in Bioinformatics and at least 90 points at Stage III
Requirement:
• 45 points: BIOINF 702, 703, 704
• 45 points: BIOINF 789 Project
• 30 points from BIOSCI 733, 737, 752, 755–758, COMPSCI 715, 720, 732, 760, 767, MATHS 764, STATS 720, 721, 730, 731, 761, 783, 784

Biological Sciences

Prerequisite: At least 90 points at Stage III including at least 60 points from Stage III Biological Sciences. With the permission of the Director of the School of Biological Sciences, up to 15 points at Stage III in related courses may be substituted.
Requirement:
• 15 points: BIOSCI 762
• 45 points: BIOSCI 788 Dissertation and
• 60 points from BIOINF 701, BIOSCI 724–741, 749–761 or
• 45 points from BIOINF 701, BIOSCI 724–741, 749–761 and a further 15 points, subject to approval by the Director of the School of Biological Sciences, from 700 level courses in a related subject

Biomedical Science

Prerequisite: A major in Biomedical Science and at least 90 points at Stage III
Requirement:
• 90 points: BIOMED 791 Research Portfolio

Chemistry

Prerequisite: A major in Chemistry and at least 90 points at Stage III
Requirement:
• 60 points: CHEM 793 Dissertation and
• 60 points from CHEM 710–780
or
45 points from CHEM 710–780 and a further 15 points, subject to approval by the Head of Department, from 700 level courses in a related subject

Computer Science

Prerequisite: A major in Computer Science and at least 90 points at Stage III
Requirement:
• at least 60 points from COMPSCI 701–777, 790
• up to 30 points from 700 level courses in a related subject with approval of the Head of Department
• 30 points: COMPSCI 799 Dissertation

Food Science

Prerequisite: A major in Food Science and at least 90 points at Stage III
Requirement:
• at least 30 points from CHEMMAT 757, FOODSCI 706–710
• up to 30 points from MEDSCI 709, 710, BIOSCI 741 or other courses approved by Programme Director
• 60 points: FOODSCI 788 Dissertation

Geography

Prerequisite: A major in Geography and at least 90 points at Stage III
Requirement:
• 15 points: ENVSCI 701
• at least 60 points from GEOG 711–779, ENVMGT 741, 743, 744, 746, ENVSCI 704, 713, 737, 738, GEOLOGY 705, 713
• 30 points: GEOG 789
• up to 15 further points, subject to approval by the Programme Coordinator

Geology

Prerequisite: A major in Geology and at least 90 points at Stage III
Requirement:
• 15 points: ENVSCI 701
• 30 points: GEOLOGY 789
• at least 45 points from GEOLOGY 701–772, GEOPHYS 761–763, 780
• up to 30 points from 700 level courses as approved by the Programme Coordinator

Bioinformatics

Prerequisite: A major in Bioinformatics and at least 90 points at Stage III
Requirement:
• 45 points: BIOINF 702, 703, 704
• 45 points: BIOINF 789 Project
• 30 points from BIOSCI 733, 737, 752, 755–758, COMPSCI 715, 720, 732, 760, 767, MATHS 764, STATS 720, 721, 730, 731, 761, 783, 784

• up to 15 further points, subject to approval by the Programme Coordinator

Geology

Prerequisite: A major in Geology and at least 90 points at Stage III
Requirement:
• 15 points: ENVSCI 701
• 30 points: GEOLOGY 789
• at least 45 points from GEOLOGY 701–772, GEOPHYS 761–763, 780
• up to 30 points from 700 level courses as approved by the Programme Coordinator
Geophysics
Prerequisite: At least 90 points at Stage III including at least 45 points from GEOLOGY 361, GEOPHYS 330–339
Requirement:
- 15 points from PHYSICS 731, 732
- 30 points: GEOPHYS 789 Dissertation
- 75 points from approved 700 level courses in Applied Mathematics, Geology, Geophysics or Physics

Logic and Computation
Prerequisite: A major in Logic and Computation and at least 90 points at Stage III
Requirement:
- 15 points from COMPSCI 720, 750, 760, 767
- 15 points from PHIL 736–738
- 60 points from COMPSCI 720, 750, 760, 767, LINGUIST 721, 724, LOGICOMP 701–705, MATHS 713, 715, PHIL 736–738
- 30 points: LOGICOMP 782 Dissertation

Mathematics
Prerequisite: A major in Mathematics including (either MATHS 320 or MATHS 328) and MATHS 332 and at least 90 points at Stage III
Note: Mathematics Education students may substitute MATHS 302 for one of these prerequisite courses
Requirement:
- 30 points: MATHS 776 Dissertation in Mathematics or Applied Mathematics
and either
- 90 points in 700 level Mathematics courses
or
- at least 45 points in 700 level Mathematics courses and up to 45 points, subject to approval by the Head of Department, from 700 level courses in a related subject

Medical Statistics
Prerequisite: A major in Statistics, at least 90 points at Stage III, and STATS 210 or equivalent
Requirement:
- 75 points: STATS 770, 773, 781, POPHLTH 708
- 15 points from STATS 779, 782, or equivalent
- 30 points from 600 or 700 level courses in Statistics or related subjects, as approved by the Head of Department

Medicinal Chemistry
Prerequisite: A major in Medicinal Chemistry and at least 90 points at Stage III
Requirement:
- 15 points: CHEM 735
- 45 points from CHEM 710–780, BIOSCI 756, 757, 759, MEDSCI 708, 715, 716, 721, 722
- 60 points: CHEM 793 Dissertation

Pharmacology
Prerequisite: A BSc degree with at least 60 points from MEDSCI 303–307 and at least 90 points at Stage III
Requirement:
- 45 points: PHARMCOL 788 Dissertation
and
- 75 points from MEDSCI 701 or 702, MEDSCI 715–723
or
60 points from MEDSCI 701 or 702, MEDSCI 715–723 and a further 15 points, subject to approval by the Head of Department, from 700 level courses in a related subject

Requirement:
- 45 points: PHARMCOL 788 Dissertation
and
- 75 points from MEDSCI 701 or 702, MEDSCI 715–723
or
60 points from MEDSCI 701 or 702, MEDSCI 715–723 and a further 15 points, subject to approval by the Head of Department, from 700 level courses in a related subject

Physics
Prerequisite: A major in Physics and at least 90 points at Stage III
Requirement:
- 30 points: PHYSICS 789 Dissertation
- 45 points from PHYSICS 701–788, 791, 792
and
- 45 additional points from PHYSICS 701–788, 791, 792, MATHS 761–763, GEOPHYS 761–780
or
at least 15 additional points from PHYSICS 701–788, 791, 792, GEOPHYS 761–780, MATHS 761–763 and up to 30 points from approved 700 level courses in related subjects as approved by the Head of Department

Physiology
Prerequisite: A major in Physiology and at least 90 points at Stage III
Requirement:
- 30 points: MEDSCI 725, 733
- 45 points from MEDSCI 701 or 702, MEDSCI 703, 717, 727–732, 734
- 45 points: PHYSIOL 788 Dissertation

Psychology
Prerequisite: A major in Psychology and at least 90 points at Stage III including PSYCH 306
Requirement:
- 45 points: PSYCH 788 Dissertation
and
- 75 points from PSYCH 700–762
or
at least 60 points from PSYCH 700–762
15 points, subject to approval by the Head of Department, from 700 level courses in a related subject

Sport and Exercise Science
Prerequisite: A major in Sport and Exercise Science, or equivalent as approved by the Head of Department and at least 90 points at Stage III
Requirement:
- 15 points: SPORTSCI 705
- 45 points: SPORTSCI 788 Dissertation
and
- 60 points from SPORTSCI 702–704, 706–714
or
45 points from SPORTSCI 702–704, 706–714 and a further 15 points, subject to approval by the Head of Department, from 700 level courses in a related subject

Statistics
Prerequisite: A major in Statistics and at least 90 points at Stage III and including STATS 210 or 225
Requirement:
- 30 points: STATS 781 Honours Project in Statistics
- 15 points: STATS 779, 782 or equivalent
- at least 45 points from STATS 701–787, BIOINF 704, POPHLTH 702, 707–709, 711
- up to 30 points from 700 level courses in Statistics or related subjects, as approved by the Head of Department
The Degree of Master of Science – MSc

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission

1 In order to be admitted to this programme, a student needs to have:
   either
   a (i) completed the requirements for the Degree of Bachelor of Science or an equivalent qualification approved by Senate or its representative
   and
   (ii) attained at least a B average in 75 points above Stage II, including at least 45 points in the relevant subject major as specified in the Bachelor of Science regulations
   or
   b (i) (a) completed the requirements for the Degree of Bachelor of Science (Honours) or an equivalent qualification approved by Senate or its representative
   and
   (b) attained at least a B– average in 90 points taken for the Bachelor of Science (Honours)
   or
   (ii) (a) completed the requirements for the Postgraduate Diploma in Science or an equivalent qualification approved by Senate or its representative
   and
   (b) attained at least a B– average in 90 points taken for the PGDipSci. At least 75 of these points must be in 700 level courses or a dissertation, if the proposed Masters degree programme includes a thesis.

   2 a A student who has not completed all the requirements of the Degree of Bachelor of Science but who has passed:
      (i) 345 points towards that degree
      and
      (ii) the Stage III entry requirements for this degree
      may, with the approval of the relevant Head of Department, Director of School or equivalent, enrol for this degree. The requirements for the Degree of Bachelor of Science must be completed within 12 months of initial enrolment for the Degree of Master of Science. Should these requirements not be completed within these 12 months, enrolment for the Degree of Master of Science will be suspended until they have been completed.

      b A student who has not completed all the requirements of the Degree of Bachelor of Science (Honours) or the Postgraduate Diploma in Science but who has:
      (i) passed 105 points towards the Degree of Bachelor of Science (Honours) or the Postgraduate Diploma in Science
      and
      (ii) met all other entry and prerequisite requirements
      may, with the approval of the relevant Head of Department, Director of School or equivalent, enrol for this degree. The requirements for the Degree of Bachelor of Science (Honours) or Postgraduate Diploma in Science must be completed within 12 months of initial enrolment for the Master of Science. Should these requirements not be completed within these 12 months, enrolment for the Master of Science will be suspended until they have been completed.

   3 Admission to this degree requires approval from the relevant Head of Department, Director of School, or equivalent and is at the discretion of Senate or its representative.

Duration and Total Points Value

4 A student admitted to this degree under Regulation 1a must:
   a pass courses with a total value of 240 points
   and
   b complete within the time limit specified in the General Regulations – Masters Degrees
   and
   c not exceed 280 points for the total enrolment for this degree.

5 A student admitted to this degree under Regulation 1b must:
   a pass courses with a total value of 120 points
   and
   b complete within the time limit specified in the General Regulations – Masters Degrees
   and
   c not exceed 160 points for the total enrolment for this degree.
Structure and Content
6 A student enrolled for this degree must complete the requirements for one of the subjects as listed in the Master of Science Schedule.

Thesis/Research Portfolio/Dissertation
7 a A thesis, research portfolio, or dissertation, when included in the programme, is to be carried out under the guidance of a supervisor appointed by Senate or its representative.

b The thesis or dissertation topic must be approved by the relevant Departmental Postgraduate Committee prior to enrolment.

c A student who has to complete 240 points for this degree and whose programme includes a thesis, research portfolio or dissertation needs, before enrolment for the thesis, research portfolio or dissertation, to obtain an average grade of at least B– in 90 points selected from the first 120 points passed in the coursework component of the degree. If this is not achieved the courses passed will be reassigned to the Postgraduate Diploma in Science for all subjects except Forensic Science, for which courses passed will be reassigned to the Postgraduate Diploma in Forensic Science.

d A student who has passed at least 105 points but fewer than 120 points of a 240 point degree and obtained an average grade of at least B– in 90 points may, with the approval of the relevant Head of Department, Director of School or equivalent, enrol in the thesis, research portfolio or dissertation, but must have completed 120 points for the coursework component of the degree within 12 months of initial enrolment in the thesis, research portfolio or dissertation. If this is not achieved the courses passed will be reassigned to the Postgraduate Diploma in Science for all subjects except Forensic Science, for which courses passed will be reassigned to the Postgraduate Diploma in Forensic Science.

e The thesis, research portfolio or dissertation is to be completed and submitted in accordance with the General Regulations – Masters Degrees.

Reassignment
8 A student who does not meet the requirements of this degree may apply to reassign courses passed for the Master of Science to the Postgraduate Diploma in Science for all subjects except Forensic Science, for which courses passed will be reassigned to the Postgraduate Diploma in Forensic Science.

Variations
9 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Honours
10 This degree may be awarded with Honours in accordance with the General Regulations – Masters Degrees.

Commencement
11 These regulations came into force on 1 January 2010. The 2006 regulations for the Degree of Master of Science were thereby repealed.

Master of Science (MSc) Schedule

A student who has to complete 120 points must satisfy the requirement for one of the following subjects:

Exercise Rehabilitation
The Master of Science in Exercise Rehabilitation was withdrawn in 2012. Students who have a current enrolment in this subject should contact their Faculty for advice regarding completion.

Food Science
Prerequisite: A BSc(Hons) or PGDipSci in Food Science, or an equivalent qualification as approved by the Board of Studies (Food Science)
Requirement: Research Masters
• 120 points: FOODSCI 796 MSc Thesis in Food Science

Forensic Science
Prerequisite: A Postgraduate Diploma in Forensic Science with an average of B– or higher or other relevant qualifications as approved by the Programme Director
Requirement: Research Masters
• 120 points: FORENSIC 796 MSc Thesis in Forensic Science

Geography
Prerequisite: A BSc(Hons) or PGDipSci in Geography
Requirement: Research Masters
• 120 points: GEOG 796 Masters Thesis in Geography

Geology
Prerequisite: A BSc(Hons) or PGDipSci in Geology
Requirement: Research Masters
• 120 points: GEOLOGY 796 MSc Thesis in Geology

Geophysics
Prerequisite: A BSc(Hons) or PGDipSci in Geophysics
Requirement: Research Masters
• 120 points: GEOPHYS 796 MSc Thesis in Geophysics

Health Psychology
The Master of Science in Health Psychology was withdrawn in 2012. Students who have a current enrolment in this subject should contact their Faculty for advice regarding completion.

Logic and Computation
Prerequisite: A BSc(Hons) or PGDipSci in Logic and Computation
Requirement: Research Masters
• 120 points: LOGICCOMP 796 Thesis

Marine Science
Prerequisite: A PGDipSci in Marine Science or equivalent
Requirement: Research Masters
• 120 points: MARINE 796 MSc Thesis in Marine Science

Mathematics
Prerequisite: A BSc(Hons) or PGDipSci in Mathematics
Requirement: Research Masters
• 120 points: MATHS 796 Thesis in Mathematics
or
• 90 points: MATHS 798 Research Portfolio in Mathematics
• 30 points from MATHS 701–789, 792–797 or approved 700 level courses in related subjects with the approval of the Head of Department

Medical Statistics
Prerequisite: A BSc(Hons) or PGDipSci in Statistics or Medical Statistics
Requirement: Taught Masters
• 30 points: STATS 790 Masters Dissertation 1
• 45 points: STATS 732, 761, 780
• at least 15 points from BIOMINF 704, POPLHLTH 702, 707–709, 711, STATS 701–787
• up to 30 points from 700 level courses in Statistics or related subjects, as approved by the Head of Department
Optometry
Prerequisite: A BOptom or a PGDipSci in Optometry, and current registration as an optometrist and an annual practising certificate
Requirement:
Research Masters
• 120 points: OPTOM 796 MSc Thesis in Optometry
Taught Masters
• 90 points: OPTOM 791
• 30 points: OPTOM 757

Pharmacology
Prerequisite: A BSc(Hons) or PGDipSci in Pharmacology
Requirement:
Research Masters
• 120 points: PHARMCOL 796 MSc Thesis in Pharmacology

Physiology
Prerequisite: A BSc(Hons) or PGDipSci in Physiology
Requirement:
Research Masters
• 120 points: PHYSIOL 796 MSc Thesis in Physiology

Polymers and Coatings Science
The Master of Science in Polymers and Coatings Science was withdrawn in 2011.

Psychology
Prerequisite: A BSc(Hons) or PGDipSci in Psychology and PSYCH 306, or equivalent as approved by the Head of Department
Requirement:
Research Masters
• 120 points: PSYCH 796 Thesis in Psychology

A student who has to complete 240 points must satisfy the requirement for one of the following subjects:

Applied Geology
Prerequisite: A major in Geology
Requirement:
Research Masters
• 15 points: ENVSCI 701
and
• at least 45 points from GEOG 746, GEOLOGY 701, 703, 705, 713, 714, 754, 771, GEOPHYS 761–763
and
• at least 30 points from approved courses within Part IV of the Bachelor of Engineering (Honours) Schedule or the Master of Engineering Studies Schedule
and
• up to 15 points from 700 level courses as approved by the Programme Coordinator
and
• 120 points: GEOLOGY 795 MSc Thesis in Applied Geology

Applied Mathematics
Prerequisite: A major in Applied Mathematics, or equivalent as approved by the Head of Department
Requirement:
Research Masters
• at least 60 points from MATHS 761, 762, 763, 764, 769, 770, PHYSICS 701, 707

Speech Science
Prerequisite: A PGDipSci in Speech Science, or equivalent as approved by the Chair of the Board of Studies
Requirement:
Research Masters
• 120 points: SPCHSCI 796 MSc Thesis in Speech Science

Sport and Exercise Science
Prerequisite: A BSc(Hons) or PGDipSci in Sport and Exercise Science or a PGDipSci in Clinical Exercise Physiology
Requirement:
Research Masters
• 120 points: SPORTSCI 796 MSc Thesis in Sport and Exercise Science

Statistics
Prerequisite: A BSc(Hons) or PGDipSci in Statistics and STATS 210 or 225
Requirement:
Research Masters
• 90 points: STATS 798 Masters Thesis in Statistics
• 30 points, subject to approval by the Head of Department, from 600 or 700 level courses in Statistics or related subjects
Taught Masters
• 30 points: STATS 790 Masters Dissertation 1
• 15 points: STATS 732
• at least 45 points from STATS 701–787, BIOINF 704, POPLHLTH 702, 707–709, 711
• up to 30 points from 700 level courses in Statistics or related subjects, as approved by the Head of Department

Wine Science
Prerequisite: A PGDipSci in Wine Science
Requirement:
Research Masters
• 120 points: WINESCI 796 MSc Thesis in Wine Science

• up to 60 points from approved 700 level courses in Mathematics or related subjects with approval of the Head of Department
• 120 points: MATHS 795 MSc Thesis in Applied Mathematics

Bioinformatics
Prerequisite: A BSc with a major in Biological Sciences and COMPSCI 220, or equivalent as approved by the Programme Director
Requirement:
Research Masters
• 75 points: BIOINF 701, 702, 703, 704, 761
• 45 points from BIOSCI 733, 737, 752, 755–758, COMPSCI 715, 720, 732, 760, 767, MATHS 794, STATS 720, 721, 730, 731, 732, 761, 783, 784, or related 700 level courses, from at least two departments as approved by the Programme Director
• 120 points: BIOINF 796 MSc Thesis in Bioinformatics

Biological Sciences
Prerequisite: A major in Biological Sciences, or equivalent as approved by the Director
Requirement:
Research Masters
• 15 points: BIOSCI 761
• at least 75 points from BIOINF 701, BIOSCI 724–741, 749–761
• up to 30 points from approved 700 level courses in a related subject
• 120 points: BIOSCI 796 MSc Thesis in Biological Sciences
Biomedical Science
Prerequisite: A major in Biomedical Science, or equivalent as approved by the Board of Studies (Biomedical Science)
Requirement:
Research Masters
• at least 90 points from MEDSCI 703–723, 725–739, BIOINF 701, BIOSCI 728, 729, 733, 736, 737, 738, 741, 755–761, HLTHPSYC 716
• up to 30 points from other 700 level courses as approved by the Board of Studies (Biomedical Science)
• 120 points: BIOMED 796 MSc Thesis in Biomedical Science

Biosecurity and Conservation
Prerequisite: An approved BSc or equivalent experience subject to approval by the Programme Director
Requirement:
Research Masters
• 15 points: BIOSCI 761 or ENVSCI 701
• 45 points: BIOSCI 747, 748, ENVSCI 733
• at least 30 points from, BIOSCI 724, 730, 735, 751, ENVMGT 743, 746, ENVSCI 716, 737
• up to 30 points from approved 700 level courses in the Faculty of Science
• 120 points: BIOSEC 796 Thesis in Biosecurity and Conservation

Chemistry
Prerequisite: A major in Chemistry
Requirement:
Research Masters
• 15 points: CHEM 795
• at least 75 points from CHEM 710–780
• up to 30 points from 700 level courses in Chemistry or related subjects with approval of the Head of Department
• 120 points: CHEM 796 MSc Thesis in Chemistry

Clinical Exercise Physiology
Prerequisite: A BSc in Sport and Exercise Science or equivalent approved programme
Taught Masters
Requirement:
• 90 points: SPORTSCI 703, 705, 710, 712, 781
• 30 points from approved 700 level courses in the Faculty of Science or the Faculty of Medical and Health Sciences
• 90 points: SPORTSCI 782, 783
• 30 points: SPORTSCI 787 Dissertation

Computer Science
Prerequisite: A major in Computer Science
Requirement:
Research Masters
• at least 90 points from COMPSCI 701–780, 790
• up to 30 points from 700 level courses in a related subject with approval of the Head of Department
• 120 points: COMPSCI 796 MSc Thesis in Computer Science

Environmental Management
Prerequisite: An approved BSc, BE, BA, BPlan, BCom or equivalent degree
Requirement:
Research Masters
• 15 points: ENVSCI 701
• at least 60 points from ENVMGT 741–747
• up to 45 points from 700 level courses as approved by the Programme Coordinator
• 120 points: ENVMGT 796 MSc Thesis in Environmental Management

Environmental Science
Prerequisite: An approved BSc, or other equivalent degree
Requirement:
Research Masters
• 30 points: ENVSCI 701, 711
• at least 60 points from ENVSCI 702–704, 713–738, GEOG 745–749, 771, ENVMGT 742, 744, GEOLOGY 705, MARINE 703
• up to 30 points from 700 level courses as approved by the Programme Coordinator
• 120 points: ENVSCI 796 MSc Thesis in Environmental Science

Food Science
Prerequisite: A major in Food Science, or in Biological Sciences, or in Chemistry, or in other relevant areas as approved by the Programme Coordinator
Requirement:
Research Masters
• 60 points from FOODSCI 703, 707, 708, CHEMMAT 757
• 60 points from approved 700 level courses
• 120 points: FOODSCI 796 MSc Thesis in Food Science

Forensic Science
Prerequisite: An approved BSc or other equivalent degree as approved by the Programme Director
Requirement:
Research Masters
• 115 points from FORENSIC 701–704, 706, 707
• 15 points from 700 level courses as approved by the Programme Director
• 120 points: FORENSIC 796 MSc Thesis in Forensic Science

Geography
Prerequisite: A major in Geography with 45 points at Stage III Geography
Requirement:
Research Masters
• 15 points: ENVSCI 701
• at least 75 points from GEOG 711–779, ENVMGT 741, 743, 744, 746, ENVSCI 704, 713, 737, 738, GEOLOGY 705, 713
• up to 30 additional points from other 700 level courses in a related subject as approved by the Programme Coordinator
• 120 points: GEOG 796 Masters Thesis in Geography

Geology
Prerequisite: A major in Geology
Requirement:
Research Masters
• 15 points: ENVSCI 701
• at least 60 points from GEOLOGY 701–772, GEOPHYS 761–763
• up to 45 points from 700 level courses as approved by the Programme Coordinator
• 120 points: GEOLOGY 796 MSc Thesis in Geology
Geophysics
Prerequisite: A BSc with at least 45 points from GEOLOGY 361, GEOPHYS 330–333
Requirement: Research Masters
• 15 points from PHYSICS 731, 732
• 105 points from 700 level courses in Applied Mathematics, Geology, Geophysics, Physics or other Science subjects, as approved by the Programme Coordinator
• 120 points: GEOPHYS 796 MSc Thesis in Geophysics

Health Psychology
The Master of Science in Health Psychology was withdrawn in 2012. Students who have a current enrolment in this subject should contact their Faculty for advice regarding completion.

Logic and Computation
Prerequisite: A major in Logic and Computation
Requirement: Research Masters
• 15 points from COMPSCI 720, 750
• 15 points from PHIL 736–738
• 90 additional points from LOGICOMP 701, 702, COMPSCI 720, 750, 760, 767, LINGUIST 721, 724, MATHS 713, 715, PHIL 736–738
• 120 points: LOGICCOMP 796 Thesis

Marine Science
Prerequisite: An approved BSc, BE, or equivalent degree
Requirement: Research Masters
• 15 points: MARINE 701
• 15 points from BIOSCI 761, CHEM 795, ENVSCI 701
• 90 points from the following 700 level courses including at least two of the following subject areas: BIOSCI 724–727, ENVSCI 704, 714, ENVMGT 746, GEOG 746, 748, GEOLOGY 721, MARINE 702, 703, PHYSICS 731, 732, STATS 767, 775, or other courses approved by the Programme Coordinator
• 120 points: MARINE 796 MSc Thesis in Marine Science

Mathematics
Prerequisite: A major in Mathematics, including (either MATHS 320 or 328) and MATHS 332, or an equivalent
Note: Mathematics Education students may substitute MATHS 302 for one of these courses
Requirement: Research Masters
• at least 75 points in 700 level Mathematics courses
• up to 45 points from approved 700 level courses in Mathematics or related subjects, with the approval of the Head of Department and either
• 120 points: MATHS 796 Thesis in Mathematics
• 90 points: MATHS 798 Research Portfolio in Mathematics

Medical Statistics
Prerequisite: A major in Statistics, or equivalent as approved by the Head of Department
Requirement: Taught Masters
• 90 points: STATS 732, 761, 770, 773, 780, POPHLTH 708
• 15 points from STATS 779, 782 or equivalent
• at least 75 points from STATS 701–789, BIOINF 704, POPHLTH 702, 707–709, 711

Optometry
Prerequisite: A BOptom, or an equivalent qualification approved by the Head of Department
Requirement: Research Masters
either
• 120 points from OPTOM 711–787
or
• at least 90 points from OPTOM 711–787 and up to 30 points from 700 level courses in a related subject as approved by the Head of Department
• 120 points: OPTOM 796 MSc Thesis in Optometry

Pharmacology
Prerequisite: A BSc including at least 45 points from MEDSCI 303–307
Requirement: Research Masters
• at least 60 points from MEDSCI 701 or 702, 715–724
• up to 60 points from other 700 level courses as approved by the Head of Department
• 120 points: PHARMCOL 796 MSc Thesis in Pharmacology

Physics
Prerequisite: A major in Physics, or equivalent as approved by the Head of Department
Requirement: Research Masters
• 75 points from PHYSICS 701–788
and either
• 45 additional points from PHYSICS 701–788, MATHS 761–763, GEOPHYS 761–780
or
• at least 15 additional points from PHYSICS 701–788, MATHS 761–763, GEOPHYS 761–780
and
• up to a 30 points from approved 700 level courses in related subjects as approved by the Head of Department
• 120 points: PHYSICS 796 MSc Thesis in Physics

Physiology
Prerequisite: A BSc including at least 45 points from MEDSCI 308–313
Requirement: Research Masters
• 30 points: MEDSCI 725, 733
• 90 additional points from MEDSCI 701–703, 717, 727–734

The Degree of Master of Speech Language Therapy Practice – MSLTPrac

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission

1 In order to be admitted to this programme, a student needs to have:
   a completed the requirements for any Bachelor’s or Master’s degree of this University other than a degree specialising in speech language therapy, or gained an equivalent qualification, provided that Senate or its representative is satisfied that the prior degree or other equivalent qualification is indicative of the ability to undertake advanced study in Speech Language Therapy Practice and
   b passed at least 75 points at Stage III or 700 level in approved subject areas (Education, Psychology, Linguistics, Health Sciences) and achieved in these an average grade of B– or higher.

2 On the recommendation of the Dean of Science, Senate or its representative may require a student with insufficient background in Psychology and Education to take additional courses as a condition of enrolment for Part I of this degree, as under Regulation 7c below.

3 Admission to the programme is at the discretion of Senate or its representative, on the recommendation of the Director of the programme.

Duration and Total Points Value

4 A student enrolled for this degree must:
   a pass courses with a total value of 240 points
   and
   b complete within the time limit specified in the General Regulations – Masters Degrees.

5 The total enrolment for this degree must not exceed 280 points.

Structure and Content

6 Taught Masters
   A student enrolled for this degree must pass courses to the value of 240 points from Parts I and II as listed in the Master of Speech Language Therapy Practice Schedule.

7 a A student may not enrol for Part II until Part I has been completed, unless special approval is given by the Dean of Science or representative.
b A student who has previously passed courses from another programme that are substantially similar to any one of the courses required under Regulation 6 above may, with the approval of the Dean of Science or representative, be required to take alternative 700 level courses from the subject Speech Science or other approved 700 level courses.

c Where a student is required to take additional courses as a condition of enrolment for Part I, under Regulation 2 above, those courses:
(i) are to be taken for Certificates of Proficiency and
(ii) are to be passed within 12 months of initial enrolment for this degree.

Practical and Clinical Requirements
8 A student is required to pass the clinical and practical requirements of the Speech Language Therapy Practice courses to the satisfaction of Senate or its representative.

Variations
9 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Termination of Enrolment
10 a If the behaviour of a student in a clinical environment is found, after due and fair inquiry, to be offensive, disruptive or likely to give rise to a risk of harm to the welfare of any person, the enrolment of the student in the programme may be terminated by Senate or its representative and any application to re-enrol may likewise be declined.

b A student who is subject to any such inquiry may be suspended by Senate or its representative from lectures, classes, clinics and any teaching placement pending the outcome of the inquiry.

c A student whose enrolment is terminated under Regulation 10a may appeal that decision to the Council or its duly appointed delegate.

Honours
11 This degree may be awarded with Honours in accordance with the General Regulations – Masters Degrees.

Commencement
12 These regulations came into force on 1 January 2006. The 2002 regulations for the Degree of Master of Speech Language Therapy Practice were thereby repealed.

Graduate Diploma in Science – GradDipSci

The regulations for this graduate diploma are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission
1 In order to be admitted to this programme, a student needs to have:

   either
   a (i) completed the requirements for the Degree of Bachelor of Science
       or
       (ii) attained an equivalent level of professional practical experience as approved by Senate or its representative
       or
       (iii) completed the requirement for a professional qualification in Science, as approved by Senate or its representative

   and
   b (i) passed the prerequisites for the courses in the selected subject major for the Graduate Diploma in Science
       or
       (ii) attained a level of competence equivalent to the prerequisites for the courses in the selected subject major for the Graduate Diploma in Science as approved by Senate or its representative.
2 A student may, if Senate or its representative gives approval, enrol for this graduate diploma without having fulfilled the prerequisite requirements, provided that the relevant Head of Department, Director of School or Coordinator of the Programme may require any such student to enrol for any or all of the unfulfilled prerequisite courses in addition to the normal requirements of this programme.

3 A student who has not completed all the requirements for the Degree of Bachelor of Science but who has passed courses with a total value of at least 330 points for that degree, may, with the approval of the relevant Head of Department, Director of School or Coordinator of the Programme enrol for this graduate diploma. The remaining courses for the Bachelor of Science must be taken and passed within 12 months of initial enrolment for this graduate diploma. Should the requirements for the Bachelor of Science not be completed within these 12 months, enrolment for the Graduate Diploma in Science will be suspended until the requirements for the Bachelors degree are completed.

Duration and Total Points Value
4 A student enrolled for this graduate diploma must follow a programme equivalent of two full-time semesters and pass courses with a total value of 120 points.

Structure and Content
5 Of the 120 points required for this graduate diploma, a student must pass 120 points above Stage I, including at least 75 points above Stage II, selected from the Bachelor of Science, Bachelor of Science (Honours) or Master of Science Schedules, including:
   a at least 45 points in a subject major as listed in the Bachelor of Science Schedule with the exception of Bioinformatics, Biomedical Science, Ecology, Information Systems, Logic and Computation, Medical Science and Operations Research
   or
   b at least 45 points from one of the following Bachelor of Science majors: Electronics and Computing, Environmental Science, Geophysics, Marine Science.

6 A project or dissertation of up to 30 points may be included.

7 The programme for each student requires the approval of the relevant Head of Department, Director of School or equivalent prior to enrolment.

Dissertation / Project
8 a A dissertation or project, when included in this programme, is to be carried out under the guidance of a supervisor appointed by Senate or its representative on the recommendation of the relevant Head of Department.
   b The dissertation or project topic must be approved by the relevant Head of Department prior to enrolment.
   c The dissertation or project is to be completed and submitted in accordance with the General Regulations – Postgraduate Diplomas.

Variations
9 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Award of Diploma
10 The graduate diploma is awarded with an endorsement in the relevant subject major.

Commencement
11 These regulations came into force on 1 January 2006. The 1996 regulations for the Graduate Diploma in Science were thereby repealed.

Postgraduate Diploma in Applied Psychology – PGDipAppPsych
The regulations for this postgraduate diploma are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission
1 In order to be admitted to this programme, a student needs to have completed the requirements for a Masters Degree in Psychology.

Duration and Total Points Value
2 A student enrolled for this postgraduate diploma must:
   a pass courses with a total value of 120 points
   and
   b complete within the time limit specified in the General Regulations – Postgraduate Diplomas.
3 The total enrolment for this postgraduate diploma must not exceed 160 points.

Structure and Content
4 A student enrolled for this postgraduate diploma must pass 120 points from courses listed in the Postgraduate Diploma in Forensic Science Schedule.
5 The programme for each student requires the approval of the Head of School of Psychology.

Variations
6 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Distinction
7 This postgraduate diploma may be awarded with Distinction or Merit in accordance with the General Regulations – Postgraduate Diplomas.

Commencement
8 These regulations came into force on 1 January 2006. The 1996 regulations for the Postgraduate Diploma in Forensic Science were thereby repealed.

Requirement:
• 30 points from MEDSCI 725, 733
• 90 additional points from MEDSCI 701–703, 717, 727–734
Certificate in Science – CertSci

New admissions into the Certificate in Science were suspended in 2011. The regulations for this certificate are to be read in conjunction with all other relevant statutes and regulations, including the Academic Statutes and Regulations.

Duration and Total Points Value

1 A student enrolled for this certificate must follow a programme equivalent to two semesters and pass Stage I courses to a total value of 120 points.

2 This qualification must be completed within four semesters of initial enrolment.

Structure and Content

3 Of the 120 points required for this certificate a student must pass:
   a at least 45 points from the Core Courses listed in the schedule for the Certificate in Science and
   b up to 75 points from the Elective Courses listed in the schedule for the Certificate in Science.

Credit

4 All courses passed for this certificate may be credited to the Bachelor of Science.

Variations

5 In exceptional circumstances Senate or its representatives may approve a personal course of study which does not conform to these regulations.

Commencement

6 These regulations came into force on 1 January 2007.

Certificate in Science (CertSci) Schedule

Core Courses

- 15 points: SCIGEN 101
- at least 30 points from CHEM 150, COMPSCI 111, GEOG 101 or 102, GEOLOGY 104, MATHS 102, PHYSICS 102, PSYCH 108 or 109, STATS 101

Elective Courses

- up to 75 points from other approved 600 or 700 level courses in Sport and Exercise Science, Biological Sciences, Engineering, Food Science, Nutrition, Physiology, Psychology, Statistics

- at least 45 points from approved 600 and 700 level courses in Biological Sciences, Chemical and Materials Engineering, Chemistry, Food Science or Geography

Statistics

Prerequisite: A major in Statistics, or equivalent as approved by the Head of Department

Requirement:

- 15 points from STATS 779, 782 or equivalent
- at least 75 points from STATS 701–787, BIOINF 704, POPLHLTH 702, 707–709, 711
- up to 30 points from 700 level courses in Statistics or related subjects, as approved by the Head of Department

Wine Science

Prerequisite: A BSc, or other relevant degree as approved by the Programme Director

Requirement:

- at least 75 points from WINESCI 701–708
- up to 45 points from approved 600 and 700 level courses in Biological Sciences, Chemical and Materials Engineering, Chemistry, Food Science or Geography
The Degree of Doctor of Clinical Psychology – DClinPsy

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations, including the General Regulations for Named Doctorates and the Academic Statutes and Regulations.

Preamble

1. a Candidates for the Degree of Doctor of Clinical Psychology are required to pursue an approved programme of advanced study, research and clinical practice as enrolled students of the University.
   
   b It is expected that this programme will normally be completed within three years of full-time candidature.
   
   c The Degree of Doctor of Clinical Psychology is awarded for a formal and systematic exposition of a coherent programme of advanced research work and supervised practice, carried out over the period of registration for the degree, which in the opinion of the examiners and the Board of Graduate Studies satisfies all of the following criteria:
      
      (i) that the research thesis is an original contribution to knowledge, and is of direct relevance to the field of clinical psychology
      
      and
      
      (ii) that the research components of the degree (thesis and clinical research projects) meet internationally recognised standards for such work
      
      and
      
      (iii) that the candidate has demonstrated both the knowledge of the relevant literature, in both research and clinical practice, and the ability to exercise analytical and professional judgement.
   
   d All research is to be conducted in accordance with The University of Auckland Guidelines for the Conduct of Research.
   
   e Doctor of Clinical Psychology theses may not exceed 60,000 words or 150 pages in total without the permission of the Board of Graduate Studies.

Eligibility

2. Candidates for the Degree of Doctor of Clinical Psychology are required to have:
   
   a (i) completed the requirements for the award of a Bachelors Honours Postgraduate Degree in Psychology with at least B+ average at The University of Auckland
      
      or
      
      (ii) completed the requirements for the award of a Masters Degree in Psychology with at least a B+ average at The University of Auckland
      
      or
      
      (iii) completed the requirements for the award of a qualification that the Board of Graduate Studies considers to be equivalent to one of the prerequisite qualifications specified in Clauses a(i) and a(ii) of this regulation
      
      and
   
   b passed PSYCH 708, 718, 723, 788 or their equivalents with a B+ average or better
   
   and
   
   c demonstrated to a Selection Panel the ability and personal qualities necessary to pursue a doctoral level research-oriented clinical programme in the field of psychology.
   
   d Every candidate for the Degree of Doctor of Clinical Psychology must have applied for admission and been admitted to The University of Auckland.

Duration and Total Points Value

3. a A student for this degree must follow a three-part programme consisting of three full-time years, and pass an approved programme with a total value of 360 points.
   
   b Candidates must pass each part and must normally complete the requirements for this degree within three years from the date of registration, unless permitted to do otherwise by the Board of Graduate Studies under Regulation 8.

Registration

4. a The Board of Graduate Studies, on the recommendation of the Head of Psychology, is to determine whether the student may be registered and the date of registration.
   
   b Conditions of registration will be determined according to Regulation 1 of the General Regulations for Named Doctorates.
Structure and Content
5 a Of the 360 points required for this degree, a student must pass Parts I, II and III as listed in the Doctor of Clinical Psychology Schedule.

Note that PSYCH 897 and 899 are awarded only on completion of the whole course.

b A student who fails any course or part of a course of the programme may be required to repeat that part or course or to sit a special examination before proceeding into the next part of the programme. A student who fails any part of the programme may be declined permission to enrol again in that part of the programme or, under Regulation 4e of the General Regulations for Named Doctorates, be declined permission to enrol in the programme as a whole.

Reviews of Progress
6 During the programme, reviews of progress and continuation of registration will be made in each year according to Regulation 2 of the General Regulations for Named Doctorates.

Enrolment and Fees
7 Enrolment and fees will be determined according to Regulation 3 of the General Regulations for Named Doctorates, except that Clause 3c applies only to the thesis component of the Doctor of Clinical Psychology.

Changes to the Conditions of Registration
8 Changes to supervision, extensions of time, and suspension or termination of registration will be made according to Regulation 4 of the General Regulations for Named Doctorates.

Submission
9 a All candidates are initially required to submit three copies of the thesis to the Graduate Centre. The thesis should have a temporary binding and a statement to examiners as specified in the Guide to Theses and Dissertations.

b All candidates are also required to submit with the thesis three copies of the Portfolio of Clinical Research.

c One month prior to the expected date of submission, candidates should notify the Graduate Centre in writing of their intention to submit. If the candidate has reason to believe that any person would be unsuitable to serve as an examiner of the thesis on the grounds of conflict of interest, he or she may also submit at this time the name of this person and a statement in writing as to the nature of the conflict of interest to the Graduate Centre.

d The thesis is to be accompanied by a statutory declaration, signed by the candidate, stating that the thesis is the candidate's own work and that neither the thesis nor any part of it has been submitted or accepted for any other degree or diploma.

e The thesis is to be presented in English unless otherwise approved by the Board of Graduate Studies at the time of first registration of the candidate.

Examination
10 a The examination process will follow that of Regulation 9 of the Statute for the Degree of Doctor of Philosophy 2011 except that:

(i) examiners will be requested to examine the thesis according to the criteria of Clause 1(c) of these regulations, and to provide an assessment of the grades assigned to the Portfolio of Clinical Research

(ii) the Board of Graduate Studies will appoint one DClinPsy Adviser who will take the part of the Head of Department nominee, as described in the Statute for the Degree of Doctor of Philosophy 2011, for all Doctor of Clinical Psychology examinations, except where that person is a research supervisor of the student concerned in which case a different staff member will be appointed DClinPsy Adviser

(iii) candidates may be asked to make specified minor corrections to or resubmit all or part of the Portfolio of Clinical Research.

b In the event that a candidate is asked to resubmit all or part of the Portfolio of Clinical Research the same process of examination will be followed for the resubmitted work.

Variations
11 In exceptional circumstances the Board of Graduate Studies may approve a personal programme which does not conform to these regulations.

Appeals
12 Appeals regarding the examination process or decisions of the Board of Graduate Studies must be made according to Regulation 5 of the General Regulations for Named Doctorates.
Dispute Resolution Procedures
13 Disputes are to be resolved according to the Policy for Resolution of Research Problems: Postgraduate Research Students.

Transitional Arrangements
14 a These regulations came into force on 1 January 2009. The 2006 regulations for the Degree of Doctor of Clinical Psychology were thereby repealed.

b For candidates initially registered under earlier regulations for this degree the Board of Graduate Studies may agree to vary the application of the provisions of this statute to ensure consistency with the provisions of the statute under which the candidate was enrolled where it is satisfied that the candidate would otherwise be at a disadvantage.

Postgraduate Diploma in Clinical Psychology – PGDipClinPsych

The regulations for this postgraduate diploma are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission
1 In order to be admitted to this programme, a student must have completed the requirements for:
   either
   a a Masters Degree in Psychology
   or
   b an Honours Degree in Psychology and passed, or have been credited with a pass in one of PSYCH 708, 709, 718, 747 or their equivalents
   or
   c a Doctor of Philosophy in Psychology.

2 Admission to the programme for this postgraduate diploma is at the discretion of Senate or its representative, on the recommendation of the Head of School of Psychology.

Duration and Total Points Value
3 a A student enrolled for this postgraduate diploma who has completed the requirement for a Masters Degree in Psychology which included a thesis, or a Doctor of Philosophy degree in Psychology, must follow a programme of the equivalent of four consecutive full-time semesters and pass courses with a total value of 240 points.

b Any other student enrolled for this postgraduate diploma must follow a programme of the equivalent of six consecutive full-time semesters and pass courses with a total value of 360 points.

Structure and Content
4 a A student who has completed the requirements for a Doctor of Philosophy in Psychology or a Masters Degree in Psychology which included a thesis must follow a programme of 240 points as listed in Option 1 in the Postgraduate Diploma in Clinical Psychology Schedule.

b Any other student enrolled for this postgraduate diploma must follow a programme of 360 points as listed in Option 2 in the Postgraduate Diploma in Clinical Psychology Schedule.

c A student who has not previously passed, or been credited with a pass in PSYCH 709, or PSYCH 718 and 747, will be required to take PSYCH 718 and 747 or their equivalents before taking Part III.

d A student enrolled for this postgraduate diploma has to carry out satisfactorily such practical or clinical work as the Head of School of Psychology may require.

e A student has to pass both the written work and the practical or clinical work in order to pass each Part of the programme. However, a student who passes the practical or clinical work of Part III but fails the final examination may, at the discretion of the Head of School of Psychology, be required to pass a special examination in order to meet the requirements of the programme.
A student who fails any year of the programme may, at the discretion of the Dean following a recommendation from the Head of School of Psychology, be declined permission to enrol again in that year of the programme or in the programme as a whole.

**Variations**

5 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

**Commencement**

6 These regulations came into force on 1 January 2006. The 1996 regulations for the Postgraduate Diploma in Clinical Psychology were thereby repealed.

329  The University of Auckland Tertiary Foundation Certificate – TertFoundCert
The Degree of Bachelor of Technology – BTech

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Duration and Total Points Value
1 A student enrolled for this degree must follow a programme of the equivalent of eight full-time semesters and pass courses with a total value of 480 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

Structure and Content
2 Of the 480 points required for this degree, a student must pass:
   a at least 450 points in one of the specialisations listed in the Bachelor of Technology Schedule and
   b 30 points from courses offered in either the General Education Open Schedule or the General Education Faculty Schedule approved for this degree or from a combination of these schedules.
3 A student must pass consecutively each of Parts I, II, III and IV for one of the specialisations listed in the Bachelor of Technology Schedule.
4 A student who has failed to pass any Part in its entirety may, at the discretion of the Convener of the Bachelor of Technology Board of Studies, be allowed to enrol for the course or courses needed to complete that Part together with a course or courses towards the next Part.
5 a For each specialisation, a student must choose complementary courses as indicated in the Bachelor of Technology Schedule.
   b Each student’s choice of complementary courses must be approved by the Bachelor of Technology Board of Studies.

General Education Exemptions
6 a A student is exempted from the requirement to pass courses offered in the General Education Schedules who has either
   (i) completed an undergraduate degree at a tertiary institution
   or
   (ii) commenced study for this degree at a tertiary institution before 1 January 2006
   or
   (iii) been admitted to this degree with credit from another tertiary institution of 240 points or more.
   
   b A student who has been exempted from the requirement to pass courses offered in the General Education Schedules must substitute 30 points from courses available for this degree.
   
   c A student admitted to this degree with credit from another tertiary institution of between 120 and 235 points inclusive must pass:
      (i) 15 points from courses offered in the General Education Schedules and
      (ii) a further 15 points from courses available for this degree.

Practical Requirements
7 a A student enrolled in any course that includes both laboratory work and written work must pass both in order to pass the course as a whole.
   
   b A student who passes the laboratory work but fails the written work may, with the permission of the relevant Head of Department, have the result for the laboratory work carried forward when the failed course is retaken.

Reassignment to Bachelor of Science
8 A student who does not complete the specialisations for Biotechnology, Industrial Mathematics, Information Technology, Materials or Optoelectronics in the Bachelor of Technology degree may reassign to the Degree of Bachelor of Science any courses passed for Parts I and II. Courses passed for Parts III and IV may be reassigned only with the approval of the Dean of Faculty of Science.

Variations
9 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.
Honours
10 a This degree may be awarded with Honours where a student’s overall grade is sufficiently high. There are two classes of Honours: First Class Honours and Second Class Honours. Second Class Honours are awarded in either First Division or Second Division.

b In order to be considered for the award of Honours a student must complete the requirements for this degree:
either
(i) within eight semesters
or
(ii) within a shorter period determined by the Convener of the Bachelor of Technology Board of Studies if the student has been granted credit on admission
or
(iii) in exceptional circumstances approved by the Convener of the Bachelor of Technology Board of Studies, within not more than 10 semesters.

Commencement
11 These regulations came into force on 1 January 2006. The 2004 regulations for the Degree of Bachelor of Technology were thereby repealed.

The Degree of Master of Bioscience Enterprise – MBioEnt

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission

1. In order to be admitted to this programme, a student needs to have:
   a. completed the requirements for
      either
      (i) the Postgraduate Diploma in Bioscience Enterprise
      or
      (ii) any other equivalent qualification approved by Senate or its representative
   and
   b. attained a B+ average in at least 90 points taken for the Postgraduate Diploma in Bioscience Enterprise
   and
   c. approval from the Director of School, or equivalent.

2. A student who has not completed all the requirements of the Postgraduate Diploma in Bioscience Enterprise but who has:
   a. passed 105 points towards the Postgraduate Diploma in Bioscience Enterprise
   and
   b. met all other entry and prerequisite requirements
   may, with the approval of the Director of School or equivalent, enrol for this degree. The requirements for the Postgraduate Diploma in Bioscience Enterprise must be completed within 12 months of initial enrolment for the Master of Bioscience Enterprise. Should these requirements not be completed within these 12 months, enrolment for the Master of Bioscience Enterprise will be suspended until they have been completed.

Duration and Total Points Value

3. A student enrolled for this degree must:
   a. pass courses with a total value of 120 points
   and
   b. complete within the time limit specified in the General Regulations – Masters Degrees.

4. The total enrolment for this degree must not exceed 160 points.

Structure and Content

5. Of the 120 points required for this degree, a student must pass:
   Research Masters
   90 point Thesis and 30 points from courses listed in the Research Masters option in the Master of Bioscience Enterprise Schedule.

6. The programme for each student must be approved by the Director of School or equivalent before enrolment for this degree.

Thesis / Dissertation

7. a. A thesis or dissertation, when included in the programme, is to be carried out under the guidance of a supervisor appointed by Senate or its representative.
   b. The thesis or dissertation topic must be approved by the Programme Coordinator prior to enrolment.
   c. The thesis or dissertation is to be completed and submitted in accordance with the General Regulations – Masters Degrees.

Variations

8. In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Honours

9. This degree may be awarded with Honours as specified in the General Regulations – Masters Degrees.

Commencement

10. These regulations came into force on 1 January 2006.
The Degree of Master of Educational Management – MEdMgt

The Degree of Master of Educational Management was withdrawn in 2009. Students who are enrolled in this qualification should contact their Faculty for advice regarding completion.

The Degree of Master of Energy – MEnergy

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission

1 In order to be admitted to this programme, a student needs to have:
   either
   a completed the requirements for the Degree of Bachelor of Engineering or Degree of Bachelor of Engineering (Honours), with a B average or higher in at least 90 points or equivalent in the most advanced courses taken towards the entry qualification
   or
   b completed the requirements for the Degree of Bachelor of Science (Honours) with a B average or higher in at least 90 points or equivalent in the most advanced courses taken towards the entry qualification
   or
   c completed the requirements for the Degree of Bachelor of Science and the requirements for the Postgraduate Diploma in Science, both with a B average or higher in at least 90 points or equivalent in the most advanced courses taken towards the entry qualification
   or
   d completed the requirements for the Degree of Bachelor of Commerce (Honours) with a B average or higher in at least 90 points or equivalent in the most advanced courses taken towards the entry qualification
   or
   e completed the requirements for the Degree of Bachelor of Commerce and the requirements for the Postgraduate Diploma in Commerce, both with a B average or higher in at least 90 points or equivalent in the most advanced courses taken towards the entry qualification
   or
   f completed the requirements for an approved Bachelors degree relevant to the study of Energy with a B average or higher in at least 90 points or equivalent in the most advanced courses taken towards the entry qualification and completed three years of relevant work experience
   or
   g completed the requirements for an equivalent four year study programme to an equivalent standard as approved by the Dean of Faculty of Engineering.

2 In exceptional circumstances Senate or its representative may approve admission of a student who has not met the above requirement, but who has attained an equivalent qualification or professional experience in the engineering, geotechnical, or business professions.

Duration and Total Points Value

3 A student enrolled for this degree must:
   a pass courses with a total value of 120 points
   and
   b complete within the time limit specified in the General Regulations – Masters Degrees.

Postgraduate Diploma in Bioscience Enterprise – PGDipBioEnt

The regulations for this postgraduate diploma are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission

1 In order to be admitted to this programme, a student needs to have:
   a (i) completed the requirements for the Degree of Bachelor of Engineering or Bachelor of Engineering (Honours) or Bachelor of Science or Bachelor of Technology or Bachelor of Science (Honours)

   or

   (ii) attained an equivalent qualification approved by Senate or its representative

   and

   b (i) completed one of the relevant subject majors as listed in the Postgraduate Diploma in Bioscience Enterprise Schedule

   or

   (ii) attained a level of competence equivalent to the prerequisites for the courses in the selected subject major for the Postgraduate Diploma in Bioscience Enterprise as approved by Senate or its representative.

2 A student may, if Senate or its representative gives approval, enrol for this postgraduate diploma without having fulfilled all the prerequisite requirements, provided that the Director of School may require any such student to enrol for any or all of the prerequisite courses not already passed in addition to the normal requirements of this programme.

3 a A student who has not completed the requirements of the Degree of Bachelor of Science but who has passed courses with a total value of at least 345 points towards that degree may, with the approval of the Director of School enrol for this postgraduate diploma. The remaining courses for the Bachelor of Science must be taken and passed within 12 months of initial enrolment for this postgraduate diploma. Should the requirements for the Bachelor of Science not be completed within these 12 months, enrolment for the Postgraduate Diploma in Bioscience Enterprise will be suspended until the requirements for the Bachelor’s degree are completed.

   or

   b A student who has not completed the requirements of the Degree of Bachelor of Engineering (Honours) or Bachelor of Technology, but who has passed courses with a total value of at least 465 points towards those degrees may, with the approval of the Director of School enrol for this postgraduate diploma. The remaining courses for the Bachelor of Engineering (Honours) or Bachelor of Technology must be taken and passed within 12 months of initial enrolment for this postgraduate diploma. Should the requirements for the Bachelor of Engineering (Honours) or Bachelor of Technology, not be completed within these 12 months, enrolment for the Postgraduate Diploma in Bioscience Enterprise will be suspended until the requirements for the Bachelor’s degree are completed.

Duration and Total Points Value

4 A student enrolled for this postgraduate diploma must:
   a pass courses with a total value of 120 points

   and

   b complete within the time limit specified in the General Regulations – Postgraduate Diplomas.

5 The total enrolment for this postgraduate diploma must not exceed 160 points.

Structure and Content

6 A student enrolled for this postgraduate diploma must pass 120 points from courses listed in the Postgraduate Diploma in Bioscience Enterprise Schedule.
Prerequisite:
A BSc or BSc(Hons) with a major in Biological Sciences, Bioinformatics, Biomedical Science, Food Science, Medicinal Chemistry, Pharmacology or Physiology, or a BE in Biomedical Engineering; or a BPharm; or a BTech in Biotechnology.

Requirement:
90 points: SCIENT 701–706
30 points from approved 700 level courses in Biological Sciences, Bioinformatics, Medical Science, Food Science or Bioscience Enterprise listed in the Postgraduate Diploma in Science Schedule, or courses from other approved programmes.

Conjoint Degrees

The regulations for these conjoint degrees combinations are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

General Provisions

1 A student whose academic record is of a sufficiently high standard may, with the permission of Senate or its representative, be admitted to conjoint enrolment in any of the following combinations of degrees:

- BA/BCom
- BA/BE(Hons)
- BA/BFA
- BA/BFA(Hons)
- BA/BHSc
- BA/BMus
- BA/BSc
- BA/BTTheol
- BA/LLB
- BA/LLB(Hons)
- BCom/BE(Hons)
- BCom/BHSc
- BCom/BMus
- BCom/BProp
- BCom/BSc
- BCom/LLB
- BCom/LLB(Hons)

2 Except as otherwise specified in these regulations, each student’s programme is to be governed by the regulations for each of the component degrees.

3 Only when all the requirements for both component degrees have been satisfied may the two degrees be conferred upon the student.

Admission

4 Admission to a conjoint degrees combination may be at initial enrolment, or after the student has passed or been credited with not more than 270 points for either component degree, but the student must not have graduated in either of the component degrees.

5 a A student for a conjoint degrees combination must gain admission to each of the component degrees and achieve a standard equivalent to a Grade Point Equivalent (GPE) of at least 3.9, except for the Bachelor of Engineering (Honours) which requires a GPE of at least 5.5, in the last year of full-time study.

Continuation

6 In order to continue in a conjoint degrees combination, a student needs to achieve a Grade Point Average (GPA) of at least 3.5 each year, except for the Bachelor of Engineering (Honours) which requires a GPA of 4.0 each year.

Approval

7 As a condition of approval, Senate or its representative may require that a student include in a conjoint programme:

- a specified major subject or specialisation
- specified elective courses.

Duration and Total Points Requirements

8 The duration of a conjoint degrees combination is determined by the sum of the points required for each of the component degrees as set out in the Schedule of Requirements in these regulations.

General Education

9 a A student is exempted from the requirement to pass a course offered in the General Education Schedule who has:

- either
(i) completed an undergraduate degree at a tertiary institution
or
(ii) commenced study for this degree at a tertiary institution before 1 January 2006

b A student who has been admitted to either component degree of a conjoint degree combination with credit from another tertiary institution of 120 points or more is exempted from the General Education requirement for the conjoint degree.

c A student who has been exempted from the General Education requirement must substitute 15 points from courses available for the component degrees.

Suspension
10 A student may in any year totally suspend study for both component degrees of a conjoint degrees combination.

Additional Component Degrees/Diplomas
11 a If a student has satisfied the requirements of one (but not both) of the component degrees and would be eligible to have that degree conferred, the relevant Dean may approve the suspension of enrolment for the conjoint degree to allow the student to enrol for a relevant honours or Masters degree or diploma. In that case the total number of points passed must satisfy the regulations specified for that programme.

b With the approval of the relevant Deans, a student who suspends conjoint study to pursue a graduate programme may complete the conjoint degrees combination provided they have not graduated with the completed component degree in the meantime.

Graduation
12 A student must graduate in all components of the conjoint degrees combination in one or more ceremonies in the same graduation period.

Note: Graduation in one component of the conjoint degrees combination constitutes a discontinuation of the conjoint degrees.

Variations
13 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement
14 These regulations came into force on 1 January 2006. The 2004 regulations for the Conjoint Degrees were thereby repealed.

New Start for Adults

New Start provides University preparation and bridging courses for anyone over the age of 20 who needs to gain skills and confidence to undertake University study. No previous academic qualifications are required. Students must have a good standard of English.

New Start for Business

A 12-week modular, part-time evening programme for adults, providing a comprehensive introduction to Mathematics and Business. A grade of B+ or above achieved in Mathematics Preparation for University and Business (both courses are compulsory) entitles New Start adults to apply for admission into the Bachelor of Business and Information Management, Bachelor of Commerce and Bachelor of Property degrees. This course is offered on the City Campus only.

New Start General

A 13-week part-time, day or evening programme providing a comprehensive introduction to first-year degree study. All work is set and graded at The University of Auckland Stage I level.

New Start General includes study skills and more than 10 subject lectures (such as Political Studies, Sociology, Psychology, Philosophy), assignments with written feedback and a final test. Students gain information on the structure of university degrees, and an insight into the standard of work expected. Educational guidance is an integral part of New Start and students are offered assistance in planning their ongoing programmes.

Depending on the final grade New Start adults may apply for admission into degrees in the faculties of Arts, Education, Law, and Science.

New Start General is offered at four venues: The University of Auckland City Campus, Manukau Institute of Technology, West Auckland and Whangarei (Tai Tokerau Campus).

Further Information

Further information can be obtained from the New Start Office, Building 810, Level 6, 1-11 Short Street, Auckland.

   Design
   Economics
Geography
Physics
Statistics
or other approved NCEA Level 3 subjects
and
(i) pass at least four of these courses
and
(ii) achieve a B grade in English for Academic Purposes, or pass or have passed an IELTS examination at a level approved by the Academic Board with an overall score of at least 6.0 in the academic module.

b Students must complete all required class work and written examinations which will be similar in standard and content to NCEA Level 3.

c Each student’s personal programme must be approved by the Academic Board.

Admission to University

4 a Students who satisfactorily complete the Certificate in Foundation Studies will satisfy the minimum requirements for entry to the University.

b Students who complete up to 30 points in University courses may apply to have those points credited towards a degree or diploma at the University.

Academic English Studies

The Department of Applied Language Studies and Linguistics offers credit courses for International students and New Zealand residents whose first language is not English, and who are studying at The University of Auckland.

A range of courses is offered designed to improve academic English skills and increase proficiency in listening, speaking, reading and writing for academic purposes. In addition, most students can gain credit points for successfully passing these courses.

ACADENG 100 develops skill in English grammar for academic reading and writing. ACADENG 101 focuses on academic writing, and the skills needed for basic academic essays. ACADENG 102 prepares students for listening and reading in academic contexts. ACADENG 103 develops students’ ability to make academic presentations. At Stage II level, ACADENG 201 is a more advanced writing course that develops skill in essay writing and writing using sources. ACADENG 210 is an advanced academic writing course for students who need to write different kinds of research reports. ACADENG 211 focuses on academic seminars and discussions in detail.

Further information may be obtained from the Department of Applied Language Studies and Linguistics, Faculty of Arts. Phone: +64 9 373 7599 ext 86588.

CONTINUING EDUCATION – TE ARA PUKENGA

Continuing Education offers lifelong learning opportunities to regional community and professional bodies through the delivery of courses, public lectures, workshops and conferences that all draw upon the expertise of the University.

Most courses are open to all adults and are taught in various formats including day and evening lectures, seminars and workshops. University Lecture Courses also allow Continuing Education students to join undergraduate students in selected courses.

The Conference Management service arranges and administers local, national and international conferences and seminars.

GENERAL EDUCATION REGULATIONS AND SCHEDULES

General Education Regulations

1. Students required to include General Education in their programme must pass courses as specified in the General Education Regulations and Schedules for their programme.

2. A student may not take a General Education course in a subject in which they have previously passed a course, or are already enrolled or intend to enrol. This regulation does not apply to LAW 121G and LAW 131 provided no other LAW courses were taken.

3. A student may not take both of their General Education courses in the same subject.

4. Language courses do not satisfy the General Education requirement for a student who has prior knowledge of the language (for example, as a native speaker, through formal or informal study, or through living with others who speak the language). Enrolment requires submission of a language competency form and a student with prior knowledge of the language may be declined enrolment or the enrolment may be deleted at the discretion of the Head of Department.

Notes:

(i) Some courses available for General Education are also available as part of regular degree requirements. The content and assessment for both occurrences of the course are the same. A student must enrol in the General Education offering of a course in order to meet the General Education requirements of their programme.

(ii) Some General Education courses have limits on the number of students who can enrol. Places in these courses will be allocated on a first-come-first-served basis.

(iii) ANTHRO 106G does not meet the General Education requirement for the Bachelor of Music or Bachelor of Music conjoints.

(iv) LAW 121G does not meet the General Education requirement for the Bachelor of Laws, Bachelor of Laws (Honours), Bachelor of Laws conjoints or Bachelor of Laws (Honours) conjoints.

Regulations – Doctor of Philosophy and Higher Degrees

360  Statute for the Degree of Doctor of Philosophy – PhD
372  The Degree of Doctor of Literature – LittD
372  The Degree of Doctor of Science – DSc
373  The Degree of Doctor of Laws – LLD
373  The Degree of Doctor of Engineering – DEng
374  Procedure for the Examination of Higher Degrees
DOCTOR OF PHILOSOPHY AND HIGHER DEGREES

In addition to the degree of Doctor of Philosophy, the University offers higher doctorates in Literature, Science, Laws, and Engineering. As at other universities, these are primarily designed for graduates of the University who have subsequently published original work that has over a period given them authoritative international standing in their field. The higher doctorate is thus to be seen as a recognition of real distinction in one of these areas of study. It will be awarded rarely and after rigorous examination of a substantial and significant corpus of material. Candidates intending to submit for examination of higher degrees are advised to obtain the notes Guidance for Candidates of Higher Degrees from the Graduate Centre, The University of Auckland, before submitting.

REGULATIONS

Statute for the Degree of Doctor of Philosophy – PhD

Preamble

Candidates for the degree of Doctor of Philosophy are required to pursue an approved programme of advanced study and research under supervision as enrolled students of the University. The demands of PhD research require a significant commitment by candidates in terms of time and resources, and candidates are normally expected to be working full-time on their doctoral research.

b It is expected that this programme will usually be completed within three to four years of full-time candidature. Part-time candidature may also be permitted.

c Upon completion of an approved programme of research:

(i) a candidate must submit a thesis that meets the requirements set out in Clause 1e or
(ii) in the case of a candidate enrolled in a creative arts or design discipline, upon recommendation of the Academic Head and approval from the Board of Graduate Studies, the candidate may present a corpus of creative work for assessment with a written thesis, comprising an integrated whole, that meets the requirements set out in Clause 1e.

d In order for the PhD degree to be awarded, the candidate must satisfy the examiners in an oral examination and any other relevant examination that may be required on the subject of the thesis and on relevant matters in the field or fields to which the subject belongs.

e The PhD degree is awarded for a formal and systematic exposition of a coherent programme of advanced research work. The work is carried out over the period of enrolment for the degree and, in the opinion of the examiners and the Board of Graduate Studies, satisfies all of the following criteria:

(i) is an original contribution to knowledge or understanding in its field and
(ii) meets internationally recognised standards for such work and
(iii) demonstrates knowledge of the literature relevant to the subject and the field or fields to which the subject belongs, and the ability to exercise critical and analytical judgement of it and
(iv) is satisfactory in its methodology, in the quality and coherence of its expression, and in its scholarly presentation and format.

f PhD theses may not, without the prior permission of the Board of Graduate Studies, exceed 100,000 words in total, or 60,000 words in total when accompanied by a corpus of creative work by a candidate enrolled in a creative arts or design discipline.

g If the core of the thesis comprises a series of published or unpublished research papers and/or case studies, the candidate must be the lead or sole author of each paper or case study and have written the text, and must provide a contextual framework and concluding discussion that will normally amount to 20,000–30,000 words. The range and focus of this material shall generally correspond with the introductory and concluding chapters of a thesis. The thesis must be presented in a consistent format, citation style and typeface.

h If the core of the thesis does not comprise a series of published or unpublished research papers and/or case studies, a candidate may still include within their thesis published or unpublished research papers and/or case studies, provided that the candidate was the lead or sole author
of each paper or case study and wrote the text. The thesis must be presented in a consistent format, citation style and typeface.

i In the case of published or unpublished research papers and/or case studies that the candidate has contributed to but is not the sole or lead author of, the candidate may report in the thesis their contribution to the research with due reference to the original paper and/or case study. The thesis must be presented in a consistent format, citation style and typeface.

j All material which is not the original work of the author of the thesis must:
(i) be fully and appropriately attributed
or
(ii) if a substantial part of another work, be reproduced only with the written permission of the copyright owner of that other work.

k All research for the thesis is to be conducted in accordance with The University of Auckland Guidelines for the Conduct of Research.

Eligibility
2 Candidates for the degree of Doctor of Philosophy are required to have:

a (i) completed the requirements for the award of a masters degree with First Class or Second Class (Division I) Honours at The University of Auckland
or
(ii) completed the requirements for the award of a bachelors degree with First Class or Second Class (Division I) Honours at The University of Auckland
or
(iii) completed all the taught course work requirements (if any) for a masters degree of The University of Auckland at the equivalent of First Class or Second Class (Division I) Honours level, and have made substantial progress towards completion of the masters research thesis
or
(iv) completed the requirements for the award of a qualification that the Board of Graduate Studies considers to be equivalent to a masters degree with First Class or Second Class (Division I) Honours or a bachelors degree with First Class or Second Class (Division I) Honours from The University of Auckland

and
b demonstrated an ability to pursue doctoral-level research
and
c if presenting a corpus of creative work for assessment, have demonstrated advanced training or experience in a relevant creative practice, and, in their provisional year, have identified their intention to present a corpus of creative work for final assessment and have received the approval of the Board of Graduate Studies.

d In exceptional circumstances, the Board of Graduate Studies may consider for registration a person whose qualifications do not meet the requirements of Clause 2a, if it is satisfied that the person's experience in research and the results of that experience are so outstanding that the person is likely to have the ability to complete the degree successfully.

Admission
3 Admission Essential
Every candidate for the degree of Doctor of Philosophy must have applied for admission and been admitted to The University of Auckland.

Registration
4 a Registration Essential
Every candidate for the degree of Doctor of Philosophy must be registered by the Board of Graduate Studies.

b Provisional Registration
Registration is provisional for all candidates for the first 12 months of equivalent full-time study following the Date of Registration as defined in Clause 4j of this Statute.

c Application for Registration
Application for registration must be made to the Head of Department, Division, School, Chair of a Board of Studies or Director of the Research Centre or Institute ("the Head of Department") in the discipline in which the candidate is to be primarily registered.

d Part-time Registration
Candidates with compelling reasons may be permitted to register as part-time students if the Board of Graduate Studies expects that the candidate will be able to complete the PhD within the permitted time frame. A candidate must normally submit the thesis in no fewer than six
and no more than eight years if they have been registered as a part-time student for the whole period of their registration.

**e Non-resident Candidature**
Where an intending candidate is not resident in Auckland, the Head of Department must provide the Board of Graduate Studies with evidence that the candidate will be provided with research resources and supervisory support at the location in which the research is to be carried out.

**f Concurrent Registration**
In exceptional cases a candidate may be permitted to enrol concurrently in a second degree in order to complete that degree, provided it is not the qualifying degree for entry into the PhD programme.

**g Role of the Head of Department**
The Head of Department will make a recommendation to the Faculty Associate Dean (Postgraduate) as to:
(i) whether the candidate:
   (a) meets the eligibility requirements
   and
   (b) has a preliminary thesis proposal capable of meeting the requirements of Clause 1e of this Statute
   and
   (c) has an appropriate set of goals for the provisional year of registration, agreed to by both the candidate and main supervisor

   if the Head of Department is of that opinion, then they will recommend:

(ii) whether their Department (in conjunction with any other Department where the field of study is interdisciplinary, or other university in the case of jointly awarded degrees) accepts the responsibility for:
   (a) making satisfactory supervision arrangements over the whole course of the PhD
   and
   (b) providing adequate research resources and facilities

   if the Head of Department is of that opinion, then they will nominate:

(iii) which other Departments will be involved if the field of study is interdisciplinary. In these cases, the Heads of any other Departments involved are required to endorse the recommendation

   and

(iv) suitably qualified supervisors and, where appropriate, advisers

   and

(v) in the case of a candidate in a Department of Languages and Literatures, or a candidate for whom joint registration with another university in a non-English speaking country is proposed, the language in which the thesis is to be submitted and examined.

**h Role of the Associate Dean (Postgraduate)**
On receipt of the recommendation of the Head of Department, the Faculty Associate Dean (Postgraduate) will make a recommendation to the Board of Graduate Studies as to the matters set out in Clause 4g.

**i Role of the Board of Graduate Studies**
On receipt of the recommendation of the Faculty Associate Dean (Postgraduate), the Board of Graduate Studies will decide whether or not to register the candidate and, if so, the conditions which will apply to the registration. The Board of Graduate Studies may call for any further information it considers relevant before making its decision.

**j Date of Registration**
Registration takes effect on the date (the “Date of Registration”) approved by the Board of Graduate Studies. Where a candidate has already started supervised research on the PhD topic the Date of Registration may be backdated by not more than six months, except for a candidate transferring from a masters degree under Clause 2a(iii), when the Date of Registration may be backdated not earlier than the date on which the coursework component (if any) of the masters degree was completed.

**k Supervision**
The Board of Graduate Studies will appoint the supervisors for each candidate. The supervisors must be actively involved in research in the candidate’s general field, and must either hold a doctoral degree or be appropriately qualified and experienced. Persons who are themselves candidates for the degree of PhD may not be appointed as supervisors, although they may be appointed as advisers.
For each candidate the Board of Graduate Studies will appoint a suitably qualified main supervisor who takes overall responsibility for the supervision of the candidate and for assistance in the provision of research resources. The main supervisor must be a staff member of The University of Auckland.

In addition, the Board of Graduate Studies will appoint for each candidate:
(i) at least one suitably qualified co-supervisor
and/or
(ii) an advisory committee or adviser/s.

Coursework
(i) The Board of Graduate Studies may require the candidate to undertake coursework that is considered to be necessary for the successful completion of the programme of research. Such coursework must be completed as part of the provisional registration requirements, will not normally exceed 60 points in total and should either be at the postgraduate level or, in special cases, at undergraduate level. Candidates must normally pass any such research-related coursework at the grade of at least B+ or its equivalent, or any such undergraduate generic skill course at the grade of at least B or its equivalent
or
(ii) The Board of Graduate Studies may require the candidate to include a structured coursework component into the candidate’s provisional year goals that is considered to be necessary for the successful completion of the programme of research. The structured coursework component will consist of designated courses that are compulsory within the provisional year. Candidates will be required to pass with a minimum B+ average across all courses, with no course lower than a B. The courses taken in the structured coursework component will not normally exceed 60 points in total and shall be at the postgraduate level.

Presentation in Te Reo Māori
Candidates wishing to present and defend a thesis in Māori must, before applying to the Head of Department to be registered, obtain the permission of the Pro Vice-Chancellor (Māori). When such permission is granted, the Pro Vice-Chancellor (Māori) will make a recommendation to the Board of Graduate Studies as to:
(i) whether the candidate has adequate fluency and literacy in Te Reo Māori in the subject area of the thesis
and
(ii) the likelihood of being able to find appropriately qualified examiners for the thesis.

Reviews of Registration
5 a Provisional Goals
During provisional registration, a candidate must:
(i) achieve the goals prescribed by the Board of Graduate Studies at the commencement of the registration
and
(ii) complete a full thesis proposal, including a provisional title, a schedule of research, an outline of the thesis structure and a statement of the resources required to complete the research. The thesis proposal should be submitted for approval to the appropriate postgraduate committee of the Department, Institute and/or Faculty in which the candidate is registered. The committee may accept the proposal, or indicate changes needed to the candidate and supervisor/s and request a resubmission, or it may decline the proposal. It will inform the Head of Department of its decision.

b Provisional Review
At the end of the provisional registration period, the candidate, the supervisor/s and the Head of Department are to submit a formal report to the Board of Graduate Studies on the progress of the candidate. The report should clearly state whether or not the progress of the candidate has been satisfactory, the goals laid down for the provisional year have been achieved and the candidate’s research proposal has been approved according to Clause 5a(ii). The report should include a recommendation that the candidate’s registration be:
(i) confirmed
or
(ii) continued on a provisional basis for a period of three to six months
or
(iii) discontinued and the candidate recommended for enrolment in another degree
or
(iv) terminated.

c Where the recommendation is to confirm the candidate’s registration, the report to the Board
of Graduate Studies must include a copy of the candidate’s full thesis proposal and provisional title.

d  **Annual Review of Registration**

In each year of registration each candidate must pursue a programme of advanced study and research to the satisfaction of the Head of Department and the main supervisor. At the end of each year of registration following the provisional period, the main supervisor, the candidate and the Head of Department are to submit, through the Associate Dean (Postgraduate) of the Faculty, a joint report to the Board of Graduate Studies on the candidate’s progress. As part of this report the main supervisor and the Head of Department are to make one of the following recommendations:

(i)  that the candidate’s registration be continued  

or

(ii)  that the candidate’s registration be continued subject to specified conditions  

or

(iii)  that the candidate’s registration be terminated.

e  **Specified Conditions for Registration**

Where a recommendation is made under Clauses 5b(ii) or 5d(ii), the Head of Department will also recommend to the Board of Graduate Studies the specific goals and/or conditions to be met by the candidate and the time in which these are to be completed. At the end of this period the Head of Department and main supervisor will advise the Board of Graduate Studies whether or not these requirements have been met. Registration will terminate if the specified conditions have not been fulfilled to the satisfaction of the Board of Graduate Studies.

f  **Recommendation to Terminate**

No decision to terminate registration may be made by the Board of Graduate Studies unless the candidate has been notified in writing and given reasonable opportunity to respond.

**Enrolment and Fees**

6  **Enrolment**

Candidates for the PhD degree must be enrolled and pay fees in each academic year for which they are registered. Candidates need not pay tuition fees for any period during which their registration is suspended under Clause 7g.

b  On enrolment in each academic year every candidate must pay the fee prescribed for that academic year.

c  **Refunds**

A candidate who submits a thesis or terminates their registration will receive a refund of one-twelfth of the tuition fee paid for each complete month of the period between the date of submission of the thesis or termination of registration and the end of the academic year for which fees have been paid.

d  **Fees other than Tuition Fees**

Unless otherwise exempted under the relevant regulations, all candidates must pay the prescribed Building Levy and Student Services fees and any other fees as may be prescribed from time to time. There is no refund of these fees.

e  **Fees to be paid before Thesis is Accepted**

No thesis will be accepted for examination unless outstanding fees have been paid for the academic year in which a candidate is registered.

f  **Other Fees Payable**

Candidates who enrol for courses other than those specified in their provisional year goals must pay the fees prescribed for those courses on enrolment.

**Changes to the Conditions of Registration**

7  **a** The Head of Department may, after consultation with the candidate, make a written recommendation to the Board of Graduate Studies for changes in the conditions of registration for the candidate. The candidate may express his or her written views on the recommendation to the Board of Graduate Studies if he or she wishes. After considering a recommendation from the Head of Department, the Board of Graduate Studies may, after considering any submissions made by the candidate, change the conditions of registration for that candidate.

b  In the case of a candidate enrolled in a creative arts or design discipline, permission to present a corpus of creative work for assessment with the written thesis as an integrated whole requires the recommendation of the Academic Head and approval from the Board of Graduate Studies. It is not expected that candidates will be granted permission to include a corpus of creative work after the provisional year review.
c **Absence from the University**
Where a resident candidate intends to be absent from the University in pursuit of their research for more than two months, supervisors are to submit for approval by the Board of Graduate Studies, through the Head of Department and before the candidate's departure, suitable plans for the supervision of the candidate during their absence.

d **Changes in Supervision**
When necessary, the Head of Department is to recommend changes to the supervision of the candidate for approval by the Board of Graduate Studies. This will normally be required when a supervisor is granted leave, resigns or retires.

e **Change to Part-time or Full-time Registration**
Candidates may apply to change their registration from part-time to full-time and vice versa.

f **Extension of Time for Submission**
When the Board of Graduate Studies is satisfied that there is sufficient reason, it may extend a candidate's submission date. Before approving an extension of submission time the Board of Graduate Studies will require the candidate, the supervisor/s and Head of Department to agree on the programme of supervision and schedule of research considered necessary for submission by the new date proposed.

g **Suspension of Registration**
Where a candidate is unable to continue with their research programme because of circumstances beyond their control, the Board of Graduate Studies may suspend their registration for a specified period of time. The following conditions apply:

(i) the length of time for which a candidate's registration may be suspended will be in multiples of whole calendar months
(ii) the Board of Graduate Studies must be satisfied that any period of suspension will not adversely affect the viability of the candidate's research
(iii) any period of suspension will be excluded from the calculation of the final submission date
(iv) while registration is suspended, a candidate is exempt from fees and enrolment, and is not entitled to any tuition or supervision, or to the use of any other research resources of the University.

h **Discontinuation of Registration**
Enrolment and Programme Regulations regarding discontinuation apply to PhD candidates.

i **Termination of Registration**
The Board of Graduate Studies may terminate the registration of any candidate who:

(i) fails to enrol for any academic year corresponding to a year of registration
or
(ii) fails to make payment of any tuition fees related to the PhD registration
or
(iii) applies to cease being registered
or
(iv) has not made satisfactory progress while under provisional registration
or
(v) has received an unsatisfactory annual report
or
(vi) has not met any conditions specified under Clause 5e
or
(vii) has not submitted or re-submitted the thesis in time
or
(viii) has had the termination of their registration recommended by a decision of a Disputes Committee constituted pursuant to Clause 11 of this Statute
or
(ix) is prohibited under the Disciplinary Statute of the University from enrolling.

Before making a decision to terminate a candidate’s registration pursuant to this Clause or otherwise, the Board of Graduate Studies will allow the candidate a reasonable opportunity to respond.

**Submission**

**Copies of Thesis**
All candidates are initially required to submit three copies in temporary binding and one electronic copy in pdf format of the thesis to the Graduate Centre. Copies should include the following statement to examiners on the first page:

“This thesis is for examination purposes only and is confidential to the examination process.”
b **Time for Submission**
Unless permitted to do otherwise by the Board of Graduate Studies under Clause 7f, a candidate must normally submit the thesis in no fewer than three and no more than four years from the Date of Registration if they are full-time students, or no fewer than six and no more than eight years in the case of candidates who have been registered as part-time students for the whole period of their registration. In the case of candidates who have been permitted to change between full-time and part-time registration, the submission times will be calculated on a pro rata basis.

c **Notification of Submission**
Three months prior to the expected date of submission, candidates should notify the Graduate Centre in writing of their intention to submit. If the candidate has reason to believe that any person would be unsuitable to serve as an examiner of the thesis on the grounds of conflict of interest, he or she may also submit at this time the name of this person and a statement in writing as to the nature of the conflict of interest to the Graduate Centre.

d **Declaration as to Originality**
The thesis is to be accompanied by a statutory declaration, signed by the candidate, stating that the thesis is the candidate's own work and that neither the thesis nor any part of it has been submitted or accepted for any other degree or diploma and that written permission has been obtained for any third-party copyright material reproduced in the thesis that represents a “substantial part” of the other work. The declaration should also state that the temporary-bound copies and electronic copy are identical.

e Where the thesis contains jointly authored research papers, case studies and/or any other work, published or unpublished, a Co-Authorship Form must be signed by the candidate and all the joint authors, stating the extent to which the jointly authored material is the candidate's own work.

Where the thesis includes research reported in published or unpublished co-authored works (other than as in Clauses 1g and 1h) a Co-Authorship Form must be signed by the candidate and all the joint authors, stating the extent to which the jointly authored material is the candidate's own work.

Where the thesis includes co-produced creative work, a Co-Production Form must be signed by the candidate and all the joint producers, stating the elements of the jointly produced material which are the candidate's own work.

f **Language of Thesis**
The thesis is to be presented in English unless otherwise approved by the Board of Graduate Studies at the time of first registration of the candidate.

---

**Examination**

9 **General Provisions**
The Head of Department and/or the Associate Dean (Postgraduate) of the Faculty may nominate another person to the Board of Graduate Studies to be authorised to act in his or her place in all of the provisions of this Clause 9. If either the Head of Department or the Associate Dean (Postgraduate) is a supervisor of the candidate, an alternate must be nominated and appointed.

b Neither the supervisors nor the candidate may communicate with the examiners regarding the examination at any stage of the examination process, except as specified in this Clause 9.

c **Nomination of Examiners**
On notification of submission or intent to submit under Clause 8c, the Head of Department will, on the advice of the supervisor/s, nominate at least two suitably qualified persons to the Board of Graduate Studies for selection as examiners. The nominees should each hold a doctoral degree, or have equivalent expertise and experience, and be expert in the field of study which is the subject of the thesis. At least one nominee should be from outside New Zealand. The examiners may not be staff members of the University or have been involved in either the thesis research or the preparation of the thesis.

d **Appointment of Examiners**
The Board of Graduate Studies will consider the nominations provided by the Head of Department and any submissions made by the candidate under the provisions of Clause 8c and will appoint two suitably qualified persons who are available to act as examiners. One examiner (the Oral Examiner) must be able to attend the oral examination and will normally be resident in New Zealand or Australia.

e **Appointment of Examination Committee**
The Board of Graduate Studies will also appoint an Examination Committee which will normally be composed of:
(i) the Head of Department

and

(ii) an Associate Dean (Postgraduate), who will chair the Examination Committee

and

(iii) one other person ("the Head of Department Nominee") nominated by the Head of Department. This person will have thorough knowledge of the general field of the thesis, but not necessarily of the thesis topic, and will normally be a staff member of the University.

No member of the Examination Committee may be a supervisor or have been involved in either the thesis research or the preparation of the thesis. The Associate Dean will normally be from the same faculty as the candidate, but if that person is in the same department as the candidate then an Associate Dean from another faculty should be substituted.

f Examiners’ Reports

Each examiner will be provided with a copy of the thesis and, acting independently, is required to provide the Graduate Centre, within two months of receipt of the thesis, with a written report in English on the quality of the thesis according to the criteria outlined in Clause 1e. One copy of the thesis will be provided to the Examination Committee.

g The examiners will include with their reports one of the following recommendations:

(i) to award the degree, subject to satisfactory performance at the oral examination.

The thesis can be passed without any further amendment or correction. Sometimes examiners may wish to include a list of suggested amendments for the candidate to use when publishing the material.

or

(ii) to award the degree after specified “minor corrections” have been made to the thesis and/or corpus of creative work, to the satisfaction of the Oral Examiner or nominee (who may be the Main Supervisor), by a specified date, and subject to satisfactory performance at the oral examination.

This recommendation can be made when the thesis has reached the required standard but for minor problems such as inconsistency in terminology, referencing problems, or typographical errors. These changes can normally be made within a 3 month period. When these corrections are made, the thesis will meet the standard and then will be ready for permanent binding and placement in the Library.

or

(iii) (a) to award the degree after revisions have been made to the thesis and/or corpus of creative work, to the satisfaction of the Oral Examiner or nominee (who will be the Head of Department), by a specified date, and subject to satisfactory performance at the oral examination.

This recommendation is made when an examiner concludes that the revisions required are not minor, but are substantive including re-analysis of data, or rewriting of chapters, or corrections of significant lapses in logic or coherence. When the Head of Department acts as the nominee of the Oral Examiner, the nature of the revisions must be such that he or she can certify that compliance has been achieved. In such cases, the Head of Department may discuss the revisions with the Head of Department Nominee on the Examination Committee and/or the Main Supervisor. These changes can normally be made within a 3-6 month period.

or

(b) to award the degree after revisions have been made to the thesis and/or corpus of creative work, to the satisfaction of the Examiner by a specified date, and subject to satisfactory performance at the oral examination.

This recommendation is made when an examiner concludes that the revisions required are not minor, but are substantive including re-analysis of data, or rewriting of chapters, or corrections of significant lapses in logic or coherence. The nature of the revisions must be such that subject-specific knowledge is required and the Examiner wishes to see and approve the changes. These changes can normally be made within a 3-6 month period.

or

(iv) to permit the candidate to revise the thesis and/or corpus of creative work, and resubmit it for examination on one further occasion only.

This recommendation is made when an examiner concludes that the thesis is not yet of PhD standard. It will require either further research, rewriting of specific sections, reconceptualisation, and/or reorganisation in order to reach the required PhD standard. The candidate will be permitted to resubmit, normally within a 12 month period.
or (v) not to award the degree, but refer the thesis to the appropriate authority within the University for consideration of the award of another degree.

This recommendation is made when an examiner is of the opinion that the thesis has substantive flaws incompatible with the requirements of a PhD.

or (vi) not to award any degree.

h As suppliers of evaluative material in terms of the Privacy Act 1993, all examiners will be informed that the information and reports they supply as such will be held in confidence to the candidate, supervisors and to persons involved in the formal examination process. Candidates’ preparation for an oral examination or thesis revision should be assisted by knowing what the examiners have said about their thesis. Examiners’ reports will normally be released initially to those involved in the examination process, other than the candidate. Part 1 of the report, the recommendation, will not be released to the candidate, but the examiners’ evaluations (Part 2 of the report) will be released to the candidate by the Graduate Centre once the Board of Graduate Studies has approved the Examination Committee’s recommendation. At this stage, the candidate will not be informed of the names, or other identifying information, of their examiners. Part 2 of the report will also be released for the purpose of judging the Vice-Chancellor’s Prize for Best Doctoral Thesis for those candidates who have been nominated. The Board of Graduate Studies (through the Dean of Graduate Studies) reserves the right to remove from an examiner’s report made available to the candidate any material that it considers should not be released.

i Replacement of Examiners
If a report has not been received within two months, the Graduate Centre will send a reminder to the examiner and advise him or her that unless the report is received within two further months the appointment of the examiner will be terminated. If the report has not been received within two months of the date of the reminder, the Board of Graduate Studies may appoint a replacement examiner.

j Consideration of Examiners’ Reports
Upon receipt of both of the examiners’ reports, the Graduate Centre will provide copies for consideration by the Examination Committee. The examiners’ reports will also be made available to the supervisor/s on a confidential basis. Supervisor/s may comment on the reports in writing to the Examination Committee on a confidential basis. The Examination Committee may also request clarification of issues raised in examiners’ reports from the examiners and, if necessary, from supervisors. If the recommendations of the examiners are in conflict and the Examination Committee considers that the conflict may be resolved, the Chair may invite the two examiners to consult and to provide a written report or reports on the outcome of their consultations.

k Recommendation of the Examination Committee
The Examination Committee will then make a report to the Board of Graduate Studies which includes the nature and outcome of any communications with the examiners and/or supervisor/s made under Clause 9j and which recommends one of the following:

or (i) to appoint one or more further independent Examiners to report on any areas of conflict
or (ii) to proceed to the Oral Examination
or (iii) to permit the candidate to revise the thesis and/or corpus of creative work, and resubmit it for examination on one further occasion only
or (iv) to refer the thesis to the appropriate authority within the University for consideration of the award of another degree
or (v) not to award the degree.

l Further Examiners
In the event that the examiners’ reports are in serious conflict the Board of Graduate Studies may appoint further independent external examiners to report on any matters which it may specify. In this event the candidate will be kept informed, and Clauses 9f to 9i will apply for the reports of the further examiners.

m Oral Examination
In the event that the Board of Graduate Studies accepts a recommendation to proceed to an oral examination, the following procedures will apply:

(i) the Head of Department will arrange this examination
(ii) the Board of Graduate Studies, on the recommendation of the Head of Department, will appoint a person to act as an independent Chair of the oral examination. The Chair must
be a member of the academic staff of the University, but will not normally be a member of a faculty in which the candidate is registered.

(iii) the examination must be attended by the candidate, the Oral Examiner, the Chair and the Head of Department Nominee on the Examination Committee. The main supervisor may attend with the agreement of the candidate, but will not act as an examiner and may only participate to the extent requested by the Chair.

(iv) subject to Clause 9h above, the Graduate Centre will forward copies of Part 2 of the examiners’ reports to the candidate no fewer than five working days before the Oral Examination.

(v) during the oral examination, the Oral Examiner and Head of Department Nominee will discuss with the candidate the subject of the thesis and relevant matters in the field or fields to which the subject belongs. The Oral Examiner will discuss with the candidate issues raised in the examiners’ reports and ask questions of the candidate on behalf of the other examiner. The Head of Department Nominee will ensure that the External Examiner’s comments and questions are discussed.

n Recommendation of the Oral Examination

On completion of the oral examination, the Chair will provide a written report and recommendation, endorsed by the Head of Department Nominee and the Oral Examiner, to the Board of Graduate Studies. The report will include one of the following recommendations:

either

(i) to award the degree

or

(ii) to award the degree after specified “minor corrections” (see Clause 9g(iii)) have been made to the thesis and/or corpus of creative work, to the satisfaction of the Oral Examiner or nominee (who may be the Main Supervisor), and by a specified date

or

(iii) (a) to award the degree subject to revising part or parts of the thesis and/or corpus of creative work, to the satisfaction of the Oral Examiner or nominee (who will be the Head of Department), by a specified date

or

(b) to award the degree subject to revising part or parts of the thesis and/or corpus of creative work, to the satisfaction of the Examiner or Examiners by a specified date

or

(iv) to permit the candidate to revise the thesis and/or corpus of creative work, and resubmit it for examination on one further occasion only, but only if the candidate has not already been permitted to revise and resubmit under Clause 9k(iii)

or

(v) to refer the thesis to the appropriate authority within the University for consideration of the award of another degree

or

(vi) not to award the degree.

In the case of recommendations 9n(iii) and 9n(iv), the report must also state clearly the nature of the revisions recommended.

o When Minor Corrections are Required

In the event that the Board of Graduate Studies requires the candidate to undertake minor corrections the following provisions apply:

(i) the Head of Department Nominee of the Oral Examination, in consultation with the Oral Examiner or nominee (who may be the Main Supervisor), will prepare a written report detailing the minor corrections required

(ii) the Head of Department Nominee will ensure that the candidate is provided with a copy of the required minor corrections, and the specified date for the corrections to be completed by

(iii) if the required minor corrections are completed to the satisfaction of the Oral Examiner or nominee (who may be the Main Supervisor) by the specified date, that person will notify the School of Graduate Studies that the degree may be awarded

(iv) in cases where the Oral Examiner or nominee (who may be the Main Supervisor) reports that the minor corrections were not completed to their satisfaction or by the specified date, the Examination Committee will consider the evidence and will make a report and recommendation to the Board of Graduate Studies.

p When Revisions are Required

In the event that the Board of Graduate Studies requires the candidate to undertake revisions to the satisfaction of the Oral Examiner or nominee (who will be Head of Department), or to the satisfaction of the Examiner, the following provisions apply:

(i) the Head of Department Nominee of the Oral Examination, in consultation with the Oral
Examiner or nominee (who will be Head of Department), or the Examiner, will prepare a written report detailing the revisions required.

(ii) The Head of Department Nominee will ensure that the candidate is provided with a copy of the required revisions, and the specified date for the revisions to be completed by.

(iii) If the required revisions are completed to the satisfaction of the Oral Examiner or nominee (who will be the Head of Department), or the Examiner, by the specified date, that person will notify the School of Graduate Studies that the degree may be awarded.

(iv) In cases where the Oral Examiner or nominee (who will be Head of Department) or the Examiner reports that the revisions were not completed to their satisfaction or by the specified date, the Examination Committee will consider the evidence and will make a report and recommendation to the Board of Graduate Studies. This recommendation may include the need to undertake further revisions.

When Revision and Resubmission are Permitted

In the event that the Board of Graduate Studies requires the candidate to revise the thesis and/or corpus of creative work, for resubmission, either prior to or following an oral examination, the following provisions apply:

(i) If an oral examination has already been held, a copy of the report of the oral examination will be sent to the Examination Committee.

(ii) The Examination Committee will agree on the date by which the thesis is to be resubmitted and the nature of the revisions recommended, and will convene a meeting with the candidate and supervisor/s to discuss these revisions. Both the revisions and the date are then to be reported in writing by the Chair of the Examination Committee to the Graduate Centre for approval by the Board of Graduate Studies and formal communication to the candidate. The date of resubmission may not be more than 12 months from the date of the oral examination or, in the case of a recommendation under Clause 9k(iii), not more than 12 months from the date the examiners’ reports were forwarded to the Examination Committee by the Graduate Centre.

(iii) The candidate is required to enrol and pay the prescribed tuition and research fees from the month in which the decision was made to the month in which the thesis is to be resubmitted. The registration of the candidate is to continue under the conditions applying at the first date of submission.

(iv) If the thesis is not resubmitted by the prescribed date, the registration of the candidate will normally be terminated.

(v) Upon resubmission, the revised thesis is to be examined as a whole by the same examiners in accordance with the provisions of this Clause, excepting that a further resubmission may not be recommended and that the Examination Committee may recommend that a second oral examination not be held. If one or both of the original examiners is unavailable to re-examine the thesis the Board of Graduate Studies will appoint alternative examiners.

(vi) Upon receipt of both of the examiners’ reports, the Graduate Centre will provide copies of the new examiners’ reports, the original examiners’ reports and the report of the oral examination (if held) to the Examination Committee and to the supervisor/s on a confidential basis. The procedure followed by the Examination Committee will be that in Clause 9j. Following consideration of all examiners’ reports the Examination Committee will make a report to the Board of Graduate Studies which includes the nature and outcome of any communications with the examiners and/or supervisor/s made under Clause 9j. In the case where an oral examination has not already been held the Examination Committee report must recommend that either an oral examination be held or the degree not be awarded. If an oral examination is to be held, the examiners’ evaluations of the revised thesis (Part 2 of the report) will be released to the candidate by the Graduate Centre once the Board of Graduate Studies has approved the Examination Committee’s recommendation no fewer than five working days before the oral examination. In the case where an oral examination has previously been held the Examination Committee report must recommend one of the following:

(a) To proceed to a second oral examination (in which case Clause 9m(iv) applies)

or

(b) To award the degree

or

(c) To award the degree after specified “minor corrections” (see Clause 9g(iii)) have been made to the thesis and/or corpus of creative work to the satisfaction of the Oral Examiner or nominee (who may be the Main Supervisor), by a specified date

or

(d) To refer the thesis to the appropriate authority within the University for consideration of the award of another degree

or

(e) Not to award the degree.
Final Decision
After considering all of the reports of the examiners and the Examination Committee the Board of Graduate Studies will make the final decision as to the award of the degree.

Copies for Deposit
(i) On successful completion of the examination, candidates will be required to deposit two hardbound copies of the thesis and one digital copy, corrected or revised as may be required, with the Graduate Centre. The degree will not be conferred until the candidate has complied with this requirement.
(ii) When two hardbound copies and a digital copy of the PhD thesis are deposited, these must be accompanied by a statutory declaration signed by the candidate stating that the hardbound copies and the digital copy are the same.

(i) The digital thesis deposited shall be formatted as specified in the Guidelines for Formatting a Digital Thesis at The University of Auckland.
(ii) A thesis which is deposited in digital form will be accessible through the University’s digital repository, unless embargoed under Clause 24 of the Examination Regulations.

Appeals

As to Registration
a Candidates, supervisors or Heads of Department may appeal against any decision of the Board of Graduate Studies made under Clauses 4, 5, 7 or 8 of this Statute, normally within three months of the making of the decision, on the grounds that:
(i) relevant information which was not available to the Board of Graduate Studies at the time of its making the decision has since become available
and/or
(ii) the procedure adopted in arriving at the decision was unfair. The appeal must state clearly all grounds relied on by the appellant and all relevant documentation must be attached.

b Any appeal made under Clause 10a will be considered by the Chair of the Board of Graduate Studies, or their nominee, who may seek further information relating to the grounds of the appeal and shall notify the candidate of such information before making any decision. The Chair shall give a written decision outlining the reason(s) for the decision. A decision:
(i) grounded on the lack of relevant information shall be final
or
(ii) grounded on procedural unfairness may be further appealed within six months after the decision is made to the Vice-Chancellor (or nominee) whose decision shall be final.

As to Examination
c If a PhD candidate believes that he or she has been significantly disadvantaged by the examination process, or by any part of the examination process, then a written appeal may be made to the Board of Graduate Studies, setting out the grounds of the appeal. All relevant documents relied upon must be submitted with the appeal.

d Any appeal as to examination process must be lodged within three months of the result of the examination being officially communicated to the candidate. The appeal document must state clearly all grounds relied on and include all relevant documents.

e In the case of appeals as to examination process:
(i) the Chair of the Board of Graduate Studies will undertake a preliminary investigation and determine if there are grounds for the appeal to be taken to a further stage
(ii) if there are grounds for further consideration of an appeal, this will be undertaken by two members of the Board of Graduate Studies who have not been involved in the examination process who will make a recommendation to the Vice-Chancellor
(iii) the candidate will be provided with a copy of the recommendation to the Vice-Chancellor and will have the opportunity to respond to the recommendation
(iv) the decision of the Vice-Chancellor will be final and may involve a re-examination of the work.

Dispute Resolution Procedures

11 Disputes are to be resolved according to the policy Resolution of Research Problems: Postgraduate Research Students.

Transitional Arrangements

12 a This Statute came into force on 1 January 2011 and revoked the previous Statute for the Degree of Doctor of Philosophy. It was further amended by the Board of Graduate Studies and Senate in August 2011.

b For candidates initially registered under a previous statute, the Board of Graduate Studies may agree to vary the application of the provisions of this Statute to ensure consistency with the provisions of the statute under which the candidate was enrolled, where it is satisfied that the candidate would otherwise be at a disadvantage.
The Degree of Doctor of Literature – LittD

1. Other than in exceptional circumstances, a candidate for the Degree of Doctor of Literature shall be a graduate of The University of Auckland, or of a university of New Zealand.

2. No candidate shall present himself or herself for the Degree of Doctor of Literature until at least eight years after graduation to his or her first degree.

3. The Degree of Doctor of Literature shall be awarded for an original contribution (or contributions) of special excellence to linguistics, literary, philosophical, social or historical knowledge.

4. The Degree shall be awarded only on work, whether sole or conjoint, published in book form or in scholarly journals in general circulation.

5. No work shall be considered for the Degree if the work, or major portion thereof, has previously formed the basis of an award of any degree or diploma in this or any other university.

6. A candidate shall make application in writing to be examined, and such application, accompanied by the fees prescribed in the Fees Statute, shall be lodged with the Registrar together with:
   a. three copies of the work to be examined
   and
   b. a statutory declaration which shall:
      (i) state the extent to which the work is the candidate’s own, and (in the case of a conjoint work) identify as clearly as possible which parts are the candidate’s own
      and
      (ii) state what portion (if any) of the work submitted has been previously presented for a degree or diploma of The University of Auckland or any other university
      and
      (iii) declare that the work in substantially its present form has not been previously accepted for the award of a degree or diploma in this or any other university and is not being concurrently submitted for a degree or diploma in any other university.

7. The examination shall be carried out in accordance with the Procedure for the Examination of Higher Degrees, as determined by Council from time to time after considering any recommendations from Senate and published as a supplement to this Statute.

The Degree of Doctor of Science – DSc

1. Other than in exceptional circumstances, a candidate for the Degree of Doctor of Science shall be a graduate of The University of Auckland, or of a university of New Zealand.

2. No candidate shall present himself or herself for the Degree of Doctor of Science until at least eight years after graduation to his or her first degree.

3. The Degree of Doctor of Science shall be awarded for an original contribution (or contributions) of special excellence in some branch of pure or applied science.

4. The Degree shall be awarded only on work, whether sole or conjoint, published in book form or in scholarly journals in general circulation.

5. No work shall be considered for the Degree if the work, or a major portion thereof, has previously formed the basis of an award of any degree or diploma in this or any other university.

6. A candidate shall make application in writing to be examined, and such application, accompanied by the fees prescribed in the Fees Statute, shall be lodged with the Registrar together with:
   a. three copies of the work to be examined
   and
   b. a statutory declaration which shall:
      (i) state the extent to which the work is the candidate’s own, and (in the case of a conjoint work) identify as clearly as possible which parts are the candidate’s own
      and
      (ii) state what portion (if any) of the work submitted had been previously presented for a degree or diploma of The University of Auckland or any other university
      and
      (iii) declare that the work in substantially its present form has not been previously accepted for the award of a degree or diploma in this or any other university and is not being concurrently submitted for a degree or diploma in any other university.
7 The examination shall be carried out in accordance with the Procedure for the Examination for Higher Degrees, as determined by Council from time to time after considering any recommendations from Senate and published as a supplement to this Statute.

The Degree of Doctor of Laws – LLD

1 Other than in exceptional circumstances, a candidate for the Degree of Doctor of Laws shall be a graduate of The University of Auckland, or of a university of New Zealand.

2 No candidate shall present himself or herself for the Degree of Doctor of Laws until at least eight years after graduation to his or her first degree.

3 The Degree of Doctor of Laws shall be awarded for an original contribution (or contributions) of special excellence to the history, philosophy, exposition or criticism of law.

4 The Degree shall be awarded only on work, whether sole or conjoint, published in book form or in scholarly journals in general circulation, but in addition to the published work the candidate may submit unpublished work in support of the application.

5 No work shall be considered for the Degree if the work or a major portion of it has previously formed the basis of an award of any degree or diploma in this or any other university.

6 Written application to be examined for the Degree, accompanied by the fees prescribed in the Fees Statute, shall be lodged with the Registrar together with:
   a three copies of the work to be examined
   and
   b a statutory declaration which shall:
      (i) state the extent to which the work is the candidate’s own, and (in the case of a conjoint work) identify as clearly as possible which parts are the candidate’s own
      and
      (ii) state what portion (if any) of work submitted has been previously presented for a degree or diploma of The University of Auckland or any other university
      and
      (iii) declare that the work in substantially its present form has not been previously accepted for the award of a degree or diploma in this or any other university and is not being concurrently submitted for a degree or diploma in any other university.

7 The examination shall be carried out in accordance with the Procedure for the Examination of Higher Degrees, as determined by Council from time to time after considering any recommendations from Senate and published as a supplement to this Statute.

The Degree of Doctor of Engineering – DEng

1 Other than in exceptional circumstances, a candidate for the Degree of Doctor of Engineering shall be a graduate of The University of Auckland, or of a university of New Zealand.

2 No candidate shall present himself or herself for the Degree of Doctor of Engineering until at least eight years after graduation to his or her first degree.

3 The Degree of Doctor of Engineering shall be awarded for an original contribution (or contributions) of special excellence in some branch of engineering or technology.

4 The Degree shall be awarded only on work, whether sole or conjoint, published in book form or in scholarly journals in general circulation or as designs and inventions; but in addition to the published work the candidate may submit unpublished work in support of the application.

5 No work shall be considered for the Degree if the work, or major portion thereof, has previously formed the basis of an award of any degree or diploma in this or any other university.

6 Written application to be examined for the Degree, accompanied by the fees prescribed in the Fees Statute, shall be lodged with the Registrar together with:
   a three copies of the work to be examined
   and
   b a statutory declaration which shall:
      (i) state the extent to which the work is the candidate’s own, and (in the case of a conjoint work) identify as clearly as possible which parts are the candidate’s own
      and
(ii) state what portion (if any) of work submitted has been previously presented for a degree or diploma of The University of Auckland or any other university
and
(iii) declare that the work in substantially its present form has not been previously accepted for the award of a degree or diploma in this or any other university and is not being concurrently submitted for a degree or diploma in any other university.

7 The examination shall be carried out in accordance with the Procedure for the Examination of Higher Degrees, as determined by Council from time to time after considering any recommendations from Senate and published as a supplement to this Statute.

---

**Procedure for the Examination of Higher Degrees**

1 This procedure applies to the examination of the Degrees of Doctor of Literature, Doctor of Laws, Doctor of Science and Doctor of Engineering.

2 As soon as possible after an application to be examined has been lodged, Senate or its delegate shall appoint a subcommittee consisting of the Dean of the relevant Faculty (or nominee), one Professor from a Department appropriate to the application, and another Professor from the Faculty concerned to make recommendations as to not fewer than five persons in the field covered by the work, who are not members of staff of The University of Auckland, and who might be suitable as either the moderator or examiners for the work.

3 Senate or its delegate shall appoint a Moderator from the persons recommended by the subcommittee constituted under Regulation 2 who will:
   a consider the work and submit, through the Registrar, a preliminary report, which shall indicate whether, in his or her opinion, the examination should proceed and, if so,
      either
   b state which of the other persons recommended by the subcommittee are suitable examiners in the field covered by the work
   or
   c if other persons are more appropriate, provide their names to the Registrar.

4 Upon receipt of the report of the Moderator Senate shall decide whether to proceed with the examination. If Senate determines that the examination shall not proceed or that the Degree shall not be awarded (Regulation 8) the candidate may not lodge a further application to be examined for a higher degree until a period of five years or more has elapsed from the date of Senate’s decision. If the examination is not to proceed the candidate shall be entitled to a refund of one half of the fees paid.

5 a  If the examination is to proceed Senate shall appoint two independent External Examiners of whom at least one shall be resident outside New Zealand, provided that Senate may in its discretion appoint an additional Examiner who may be a member of the teaching staff of The University of Auckland.
   b  The contents of the Moderator’s report shall not be communicated to the Examiners.

6 The duties of each Examiner shall be:
   a to report independently on the quality of the work and its value as a significant contribution to learning
   and
   b to recommend whether or not the Degree shall be awarded. Where the recommendation is that the Degree shall not be awarded, the examiner may recommend that the candidate be permitted to resubmit the work with further published work at a later date. A resubmission shall be accompanied by a further full examination fee.

7 All reports and other communications shall be sent to the Registrar who shall refer them to the Moderator.

8 The Moderator shall consider the reports of the Examiners and prepare a final report based upon them which, together with the reports of the Examiners, shall be placed before Senate and Senate shall determine whether or not the Degree shall be awarded.

9 Notwithstanding anything in Regulation 8 of these Regulations the Moderator shall, where only two examiners have been appointed and their recommendations are conflicting, submit to Senate the name of a further person qualified to act as an Examiner and in such case Senate shall appoint the person so named or some other suitable person to be an additional Examiner to furnish an independent report in accordance with the provisions of Regulation 6 of these Regulations, which shall be considered by Senate together with other reports.

For further information please refer to the note on page 380.
The Course Prescriptions contain approved University of Auckland courses. Before selecting courses from this Calendar, students and potential students are advised to ascertain which courses are expected to be offered in this Academic Year and in which semester they are scheduled by referring to the Class Search on Student Services Online, or by contacting the Student Information Centre in The ClockTower or relevant faculty student centre.

Where courses in the following Course Prescriptions are listed with an ‘A’ and a ‘B’ option, this means that, if they are offered, they will be taught over two semesters and students must enrol in both Part A and Part B in order to complete and, where successful, be credited with the course. Courses with no ‘A’ or ‘B’ designation are taught over one semester.

The Prescriptions are listed by faculty, in alpha-numeric order by subject title and should be read in conjunction with the relevant regulations.

A study of the lives and achievements of individual tyrants in order to establish the causes and effects of the phenomenon of tyranny, and an evaluation of Greek views of tyranny.  
Prerequisite: ANCHIST 102  
Restriction: ANCHIST 322

**ANCHIST 230**  
15 Points  
Egypt in Dynasties XI-XVII  
Covers the history of Egypt during one major phase of unification, the Middle Kingdom, as well as the First and Second Intermediate Periods. Topics analysed include the rise of imperialism in the south (Nubia), the importance of literature of propaganda as a social bond of loyalty, the conquest of the north by the Asiatic Hyksos, and the new artistic style of portraiture.  
Prerequisite: ANCHIST 100  
Restriction: ANCHIST 330

**ANCHIST 251**  
15 Points  
Icon and Narrative: Egypt, Greece, and the Aegean  
A study of key periods and cultural developments in the art and archaeological remains of Egypt (from the Predynastic Period to the New Kingdom) and Greece and the Aegean island cultures of the Bronze Age (from c. 4000 BC to c. 1000 BC).  
Prerequisite: 15 points at Stage I in Ancient History or Classical Studies, or ARTHIST 106  
Restriction: ANCHIST 351

Topics covered include the social, economic and political crises of the period, encounters and struggles between Romans and barbarians, the conflict between Paganism and Christianity, and the emergence of the barbarian kingdoms in the West and the Byzantine empire in the East. 
**Prerequisite:** ANCHIST 102 or 103, and 15 points at Stage II in Ancient History, or 30 points at Stage II in Greek or Latin  
**Restriction:** ANCHIST 255

ANCHIST 356  
**The Ancient World at War**
Provides an in-depth analysis of the role of the military in ancient Egypt, Greece and Rome. The physical evidence of warfare as well as chronological development of warfare within each society will be discussed. An additional theme will be the interweaving of the social and cultural impact of warfare and the army upon these civilisations. 
**Prerequisite:** ANCHIST 100 or 102 or 103, and 15 points at Stage II in Ancient History, or 30 points at Stage II in Greek or Latin  
**Restriction:** ANCHIST 256

ANCHIST 357  
**Special Topic in Egyptian History**
Prerequisite: ANCHIST 100 and 15 points at Stage II in Ancient History  
**Restriction:** ANCHIST 257

ANCHIST 358  
**Fifth Century Athens**
The social, economic, political, and ideological development of Athens and Athenian democracy in the fifth century BC: the course will consider both literary sources and archaeological material. 
**Prerequisite:** ANCHIST 102 and 15 points at Stage II in Ancient History, or 30 points at Stage II in Greek  
**Restriction:** ANCHIST 258

Course Prescriptions

**Anthropology**

**Stage I**

**ANTHRO 100** 15 Points

**Human Cultures: Introduction to Social Anthropology**

Humans are social and cultural beings. This course provides an understanding of human lives. Basic concepts and approaches are covered.

**ANTHRO 101** 15 Points

**World Archaeology**

World archaeology from the emergence of culture to the first cities, including the Pacific region.

**ANTHRO 102** 15 Points

**Introduction to Biological Anthropology**

Evolutionary theory and research as applied to humans and their closest relatives. Topics include: most recent evidence of our ancestors, an overview of primates and their behaviour, and modern human variation studied through analysis of living and past populations.

**ANTHRO 103** 15 Points

**Muscis of the World**

A broad survey of the world's music cultures covering North and South America; Africa; Europe; South, East, and South-East Asia; and the Pacific. Special attention will be given to the musics of the Pacific Islands, New Zealand and Australia.

**ANTHRO 104** 15 Points

**ANTHRO 104G** 15 Points

**Peoples and Cultures of the Pacific**

A survey of the peoples of Pacific Islands through the perspectives of archaeology, biological anthropology, ethnomusicology, linguistics and social anthropology.

**ANTHRO 105** 15 Points

**ANTHRO 105G** 15 Points

**Question of Race and Racism**

International, cross-cultural and interdisciplinary perspectives question 'race' and 'racism'. Why does the concept have such social and political potency? What are the impacts of concepts of race and practices of racism and anti-racism on individuals, families, communities, nation-states and empires, and in Aotearoa New Zealand and the Pacific in particular?

**ANTHRO 106** 15 Points

**ANTHRO 106G** 15 Points

**Issues and History in Popular Music**

A survey of popular music styles, artists, sub-cultures and issues that explores facets such as genre, the music industry, music and politics, music videos, the sales process, race and identity, and gender theory. Core theory and writers in popular music studies are introduced and popular music is used to explore societal changes in class, ethnicity, gender, sexuality, youth, and global economic and cultural processes.

*Note: Does not meet the General Education requirement for BMus or BMus conjoints.*

Restriction: POPMUS 106, 106G

**Stage II**

**ANTHRO 200** 15 Points

**Archaeology: Understanding the Past**

An examination of current concepts in archaeological research and their place in the development of
anthropological thought. How archaeology makes use of its methods and theories to understand the past. An introductory laboratory component. This course is essential for students who may wish to continue their study of Archaeology at Stage III.

**Prerequisite:** ANTHRO 101 and ANTHRO 100 or 102 or 103 or 104, or 60 points passed

**ANTHRO 201**  
**Human Evolution**

The study of human evolution, including recent advances in fossil, molecular, primate and ecological approaches.

**Prerequisite:** ANTHRO 102 and ANTHRO 100 or 101 or 103 or 104, or 60 points passed

**ANTHRO 202**  
**Music and Identity in World Music Cultures**

Examines music’s interaction with other culturally constructed concepts of identity including class, gender, and race and considers the impact on identity of mediated musical representations and diasporic contexts across a range of current and historical musical styles, from the ritual musics of hunter-gatherer cultures and the classical music of South Asia, to Korean punk.

**Prerequisite:** 15 points from ANTHRO 100, 103, 106 or 15 points from Stage I in Music

**ANTHRO 203**  
**Theoretical Approaches to Society and Culture**

A survey of some of the key anthropological theories used to analyse human social life, discussed by reference to cross-cultural studies. Also considers current debates/issues within the discipline.

**Prerequisite:** ANTHRO 100, and 101 or 102 or 103 or 104, or 60 points passed

**ANTHRO 204**  
**Ethnography of Island Polynesia**

What is distinctive about Polynesian culture and society? How and why are Polynesian cultures alike? How are they different? In what ways are Fiji, Samoa, Tokelau and Tonga similar or different? Other Oceania? Anthropological studies of these questions will be explored through indigenous Polynesian, anthropological and historical accounts.

**Prerequisite:** ANTHRO 100 or 104, or 60 points passed

**ANTHRO 205**  
**Primate Behaviour, Ecology and Conservation**

Examines the diversity of extant nonhuman primate species, including their behaviour, ecology, and conservation, and also the importance of primatology toward an understanding of our own species. Specifically, students will critically examine the results of primatological inquiries in order to gain insight into the comparative evolutionary approach, especially with respect to the applicability of such efforts to the study of humans.

**Prerequisite:** ANTHRO 102 or 60 points passed  
**Restriction:** ANTHRO 349

**ANTHRO 206**  
**Origins of Civilisation**

The shift from a hunter-gatherer way of life to one based on village life and agriculture is foundational for the development of complex society. The course considers what socio-cultural changes were involved as Holocene societies developed in different parts of the world and how the relationship between humans and the environment changed.

**Prerequisite:** ANTHRO 101 or 60 points passed  
**Restriction:** ANTHRO 322

**ANTHRO 207**  
**Coming of the Māori**

An introduction to New Zealand’s archaeological history, from early Māori origins to the initial period of Western contact. Tropical Polynesian adaptations to New Zealand’s temperate climate. Māori’s rich material culture and arts, resource use and environmental change, development of classic Māori society, and the emerging field of historic archaeology are covered.

**Prerequisite:** ANTHRO 101 or 30 points at Stage I in Museums and Cultural Heritage or 60 points passed  
**Restriction:** ANTHRO 365

**ANTHRO 210**  
**Ethnographies of the Contemporary Māori**

The history of ethnographic and other accounts of contemporary Māori society, examining the derivation of various social theories and their application to the Māori under changing political and economic circumstances in New Zealand since industrialisation.

**Prerequisite:** ANTHRO 100 or MAORI 130 or 60 points passed

**ANTHRO 211**  
**Anthropological Perspectives on Gender**

Gender as a cultural construction has been a dynamic field of anthropological inquiry for the past three decades. How do various peoples exhibit and conceptualise gender differences? How have anthropologists studied them?

**Prerequisite:** ANTHRO 100 or 101 or 102 or 103 or 104, or 60 points passed

**ANTHRO 215**  
**Human Sexuality**

Human sexuality and sexual behaviour explored from a variety of perspectives within anthropology. Topics include: the evolution of sex, cross-cultural variation in sexual behaviour, sex and the brain, sex through the life course, and the impact of sexually transmitted diseases.

**Prerequisite:** ANTHRO 100 or 101 or 102 or 103 or 104, or 30 points passed in Social Science for Public Health or 60 points passed

**ANTHRO 216**  
**Race, Ethnicity and Identity in Popular Music**

The reflection of identity explorations and negotiations in various mainstream popular musics, especially in regard to race and ethnicity. Musical styles, albums and artists from genres such as Punk, Hip Hop, Country and Soul will be explored, showing popular music’s usefulness as a tool for exploring and documenting social phenomena and power structures.

**Restriction:** POPMUS 205

**ANTHRO 219**  
**Anthropology of Music**

The study of music as a cultural object and event, documenting social phenomena and power structures. Musical styles, albums and artists from genres such as Punk, Hip Hop, Country and Soul will be explored, showing popular music’s usefulness as a tool for exploring and documenting social phenomena and power structures.

**Restriction:** POPMUS 206

**European Prehistory: From Cave Art to the Celts**

An overview of major developments in the prehistory of Europe, including the British Isles, from Palaeolithic...
anthropology focusing on variation and adaptability at the molecular, individual and population levels. Topics include: nutrition, growth and development, environmental effects on human biology and concepts of genetic variation including race.

Prerequisite: ANTHRO 102 or 30 points passed at Stage I in Social Science for Public Health or 60 points passed

ANTHRO 224 15 Points
Medical Anthropology
Biological and social anthropological approaches to health, employing cross-cultural perspectives and critical analysis of health, illness and disease, health systems and health policy.
Prerequisite: ANTHRO 100 or 102 or 30 points passed in Anthropology
Restriction: ANTHRO 324

ANTHRO 225 15 Points
Anthropology of Art and Performance
Explores art, material culture, music and performance within diverse socio-cultural contexts. Introduces analytic methods that can be used to deepen appreciation and understanding of different art forms, their aesthetic systems, and the ways that they are encoded with meaning.
Prerequisite: ANTHRO 100 or 102 or 103 or 60 points passed
Restriction: ANTHRO 315

ANTHRO 234 15 Points
Popular Musics of the Pacific
From hip hop to reggae to pop, this course explores Pacific popular music genre, artists and songs as well as relevant musical techniques, modes of distribution and processes of fusion and change. It probes the positions and possibilities of Pasifika pop musics by discussing critical questions about culture, authenticity, modernisation, consumerism, identity and musical (exchange.
Prerequisite: ANTHRO 103, 104, MUSIC 145 or POPMUS 106, or 60 points passed

ANTHRO 240 15 Points
Directed Studies in Anthropology
A directed reading and individual study course to prepare students in the methodologies in a selected sub-discipline of anthropology under supervision of appropriate staff.
Prerequisite: Approval of Head of Department

ANTHRO 241 15 Points
Anthropology of the Body
Examines cultural and historical variations in how societies understand and experience the human body. The focus will be primarily on social, historical, and political-economic approaches. Topics such as labour, sport, health, illness, sexuality, gender, and religious ritual will be considered. Explores the cultural construction and social experience of the human body in a diverse range of settings.
Prerequisite: ANTHRO 100 or 101 or 102 or 103 or 104 or 60 points passed
Restriction: ANTHRO 354

ANTHRO 242 15 Points
Cross-cultural Economics
Examines ways in which people throughout the world make a living, organise their productive activities, obtain goods and services from others through exchange, and appropriate and consume objects. Covers division of labour, similarities and differences between gifts and commodities, concepts of property, types of money and exchange, spheres of exchange, and connections between power and material conditions of life.
Prerequisite: ANTHRO 100 or 101 or 102 or 103 or 104 or 60 points passed
Restriction: ANTHRO 313

ANTHRO 243 15 Points
Special Topic

ANTHRO 244 15 Points
The Politics of Culture
A critical exploration of contemporary debates on and around the idea of 'culture'. Focuses particularly on controversies at the interface between anthropology and politics, from problems of cultural translation and the appropriation of culture, to the politicisation of culture, multiculturalism and the rise of the 'consumer culture'.
Prerequisite: ANTHRO 100 or 102 or 103 or 104 or 60 points passed
Restriction: ANTHRO 330

ANTHRO 245 15 Points
Evolutionary Anthropology Today
Explores contemporary issues in evolutionary anthropology, including: evolutionary medical anthropology, anthropological neuroscience, primatology and paleoanthropology. While biological anthropologists inform a largely professional discourse on the evolutionary history of our species, this course seeks to highlight research from topics of interest to the general public and with implications for modern human societies.
Prerequisite: ANTHRO 102 or 60 points passed

ANTHRO 246 15 Points
Tradition and History in New Zealand Archaeology
This course will examine Māori traditions and history as a guide to processes in the New Zealand archaeology. Case studies will include Māori canoe traditions, the expeditions of Hongi Hika and Te Rauparaha, and the Ngai Tahu settlement of the South island.
Prerequisite: ANTHRO 100 or 101 or 102 or 103 or 104 or 60 points passed
Restriction: ANTHRO 346

ANTHRO 247 15 Points
Anthropology Today: Debates in Culture
The primary aim is to provide students with an introduction to some of the more topical and controversial themes that social anthropologists are currently engaged with. Topics include: the culture of terrorism, anthropology and cyberculture, the anthropological study of prisons, race and racism, and the politics of representation.
Prerequisite: ANTHRO 100 or 101 or 102 or 103 or 104 or 60 points passed
Restriction: ANTHRO 331
ANTHRO 248 15 Points
Special Topic
Prerequisite: ANTHRO 100 or 101 or 102 or 103 or 104 or 60 points passed

ANTHRO 249 15 Points
Archaeology and Identity in Palestine/Israel
Examines the history of archaeology in Palestine/Israel, recent archaeological findings and how new interpretations are changing our understandings of the past and conflicts over the use of archaeology in contemporary identity politics.
Prerequisite: ANTHRO 100 or 101 or 102 or 103 or 104 or 60 points passed
Restriction: ANTHRO 359

ANTHRO 250 15 Points
World-view and Religion
Anthropological approaches to religion and world-view. Includes cross-cultural approaches to meaning, belief, religious experience, ritual and myth. Issues of religion, ideology, syncretism, symbolism in social conflict and change. Considers local and world religions.

Stage III

ANTHRO 300 15 Points
History of Anthropology
A historically contextualised perspective on anthropology as an integrated discipline from its origins to the mid-twentieth century. Organised thematically around ongoing debates, important figures and events and changing research modes in the various subdisciplines in anthropology.
Prerequisite: ANTHRO 200 or 201 or 203, or 30 points at Stage II in History and Philosophy of Science and Technology, or 120 points passed

ANTHRO 301 15 Points
Contemporary Research in Music and Culture
A seminar-style course covering a range of current topics and methods in ethnomusicology. Examines selected theories, methods, and perspectives on the roles and meanings of musical activity in contemporary human culture. We will view music as a symbolic component of cultural expression and as both focus and paradigm for cultural structures and behaviours.
Prerequisite: ANTHRO 202 passed with a grade of B or higher and 15 points from any Stage II courses available for the BA major in Anthropology or Music
Restriction: ANTHRO 219

ANTHRO 303 15 Points
Evolution of Human Behaviour
Introduction to the study of human behaviour in comparative evolutionary perspective. Topics include: group composition; subsistence and foraging; cooperation and conflict; kinship and reproduction; parenting, life history and demography; social inequality; and multi-level selection.
Prerequisite: ANTHRO 201 or 120 points passed

ANTHRO 304 15 Points
Contemporary Oceania
Critical issues in the islands of the Pacific: political, economic, social, environmental and ideological.
Prerequisite: ANTHRO 203 or 30 points passed at Stage II

ANTHRO 305 15 Points
Pacific Archaeology
The archaeology of the Pacific region, including colonisation, settlement patterns, interisland trade, traditional navigation, cultural change, emergence of complex societies and ethnography.
Prerequisite: ANTHRO 200 or 120 points passed
Restriction: ANTHRO 706

ANTHRO 306 15 Points
Australian Aboriginal Archaeology
Understanding the past and present of Aboriginal Australia through the study of archaeology, including the origins of the Australians, colonisation and adaptations to arid, temperate and tropical environments.
Prerequisite: ANTHRO 200 or 203 or 120 points passed
Restriction: ANTHRO 707

ANTHRO 307 15 Points
Quantitative Methods in Anthropology
Introduction to analytical approaches to anthropological data, providing professional skills of particular interest to students considering postgraduate work. Topics include: quantitative research design, basic statistical concepts and methods, use of the SPSS computer package and a brief introduction to GIS using MapInfo. This course assumes only a limited mathematical background.
Prerequisite: ANTHRO 200 or 201 or 203 or 120 points passed

ANTHRO 308 15 Points
Reading Ethnography
Ethnographic texts are the major outcome of research in social and cultural anthropology. This seminar-based course compares different ethnographies and approaches to ethnographic research and writing.
Prerequisite: ANTHRO 203 with a minimum B pass

ANTHRO 309 15 Points
New Zealand Archaeology
Case studies in the archaeology of New Zealand, from its beginnings to the present day.
Prerequisite: ANTHRO 200 or 120 points passed

ANTHRO 310 15 Points
Issues in New Zealand Ethnography
Discusses contemporary anthropological theory and ethnography in relation to topics such as: culture, community, identity, inequality, gender, multiculturalism and biculuralism in Aotearoa New Zealand.
Prerequisite: ANTHRO 203 or 30 points passed at Stage II

ANTHRO 311 15 Points
Anthropology of Art and Performance
Explores art, material culture, music and performance within diverse socio-cultural contexts. Introduces analytic methods that can be used to deepen appreciation and understanding of different art forms,
their aesthetic systems, and the ways that they are encoded with meaning.

Prerequisite: ANTHRO 201 or 203 or HERITAGE 200 or MUSEUMS 200 or 120 points passed

Restriction: ANTHRO 225

ANTHRO 316 15 Points

Biological Anthropology in the Pacific
Where did Pacific people come from? How did they adapt to their new environment? How did European contact affect their health and lives? What have been the impacts of urbanisation and westernisation? The current theory and methods of biological anthropology as applied to the Pacific are discussed.

Prerequisite: ANTHRO 201 or HLTHSOC 200 or SOCSCIIPH 200 or 120 points passed

ANTHRO 317 15 Points

Field Methods in Archaeology
Participation in a field school involving an intensive introduction to all aspects of excavation and subsequent laboratory analysis and report preparation.

Prerequisite: 15 points from ANTHRO 200, 201, 202, 203 with a minimum B– grade

Restriction: ANTHRO 737

ANTHRO 318 15 Points

Approaches to Archaeological Science
An introduction to the application of scientific techniques in archaeology. Topics covered will include: site location, dating, sourcing archaeological material, investigation of artefact manufacture and use, and study of archaeological sediments. Coursework will include a series of practical laboratories.

Prerequisite: 15 points from ANTHRO 200, 201, 202, 203 with a minimum B– grade

Restriction: ANTHRO 737

ANTHRO 319 15 Points

World-view and Religion
Anthropological approaches to religion and world-view includes cross-cultural approaches to meaning, belief, religious experience, ritual and myth. Issues of religion, ideology, syncretism, symbolism in social conflict and change. Considers local and world religions.

Prerequisite: ANTHRO 203 or 30 points passed at Stage II

Restriction: ANTHRO 250

ANTHRO 320 15 Points

Ethnographic Film and Photography
Explores the uses of photography and film in the production and dissemination of anthropological knowledge. A goal of this course is to increase students’ awareness of the choices that are made at all stages in the production of anthropological images. The course will also use ethnographic film and photography to consider issues of ethnographic representation more generally.

Prerequisite: ANTHRO 203 or 30 points passed at Stage II

ANTHRO 321 15 Points

Equality and Inequality
Examines conceptualisations, realities and consequences of equality and inequality cross-culturally. Considers whether there are egalitarian societies and whether inequality is inevitable. Covers types and systems of inequality such as slavery, gender inequality, caste and class, as well as differences between economic and political inequality, and between equality of opportunity and equality of results.

Prerequisite: ANTHRO 203 or 30 points passed at Stage II

ANTHRO 322 15 Points

Special Topic: Origins of Civilization
The shift from a hunter-gatherer way of life to one based on village life and agriculture is foundational for the development of complex society. The course considers what socio-cultural changes were involved as Holocene societies developed in different parts of the world and how the relationship between humans and the environment changed.

Prerequisite: ANTHRO 200 or 201 or 203 or 120 points passed

Restriction: ANTHRO 206

ANTHRO 323 15 Points

Special Topic in Ethnomusicology
Prerequisite: 60 points in Stage II courses available for the BA majors in Anthropology or Music

ANTHRO 324 15 Points

Medical Anthropology
Biological and social anthropological approaches to health, employing cross-cultural perspectives and critical analysis of health, illness and disease, health systems and health policy.

Prerequisite: 15 points from ANTHRO 201, 203, HLTHSOC 200, SOCSCIIPH 200 or 30 points passed at Stage II

Restriction: ANTHRO 224

ANTHRO 327 15 Points

Music and Culture in Bollywood
Focuses on Hindi film songs and song scenes taken from mainstream “Bollywood” films, with consideration of tensions between music as popular song and as a narrative component. Examines issues and theories of music, semiotics and narrative context and convention and explores the role of film song in South Asian popular culture.

Prerequisite: 60 points in Stage II courses available for the BA majors in Anthropology, Asian Studies, Film Television and Media Studies, or Music

ANTHRO 328 15 Points

Bioarchaeology
A practical introduction to the archaeological analysis and interpretation of biological remains, emphasising faunal materials but also including macrobotanical remains and pollen.

Prerequisite: 15 points from ANTHRO 200, 201, 202, 203 with a minimum B– grade

ANTHRO 329 15 Points

Music of East Asia: Tradition, Modernity and Globalisation
Explores East Asia from the ethnomusicological perspective and illuminates how music negotiates boundaries and constructs varying identities in China, Japan, and Korea, while affirming a distinct cultural identity generally referred to as “East Asian”. Using different musical practices of East Asia as case studies, it examines multiple approaches and methodologies used in studying East Asian music.

Prerequisite: ANTHRO 219 or 202 or ASIAN 200 or 60 points in Stage II courses available for the BA majors in Anthropology, Asian Studies, Film, Television and Media Studies, or Music

ANTHRO 330 15 Points

The Politics of Culture
A critical exploration of contemporary debates on and around the idea of ‘culture’. Focuses particularly on controversies at the interface between anthropology and politics, from problems of cultural translation and the appropriation of culture, to the politicisation
of culture, multiculturalism and the rise of the 'consumer culture'.

**Prerequisite:** ANTHRO 203 or 30 points passed at Stage II

**Restriction:** ANTHRO 244

**ANTHRO 331**

**Anthropology Today: Debates in Culture**

The primary aim is to provide students with an introduction to some of the more topical and controversial themes that social anthropologists are currently engaged with. Topics include: the culture of terrorism, anthropology and cyberculture, the anthropological study of prisons, race and racism, and the politics of representation.

**Prerequisite:** ANTHRO 203 or 30 points passed at Stage II

**Restriction:** ANTHRO 247

**ANTHRO 333**

**Colonialism, Globalisation and the Musics of India**

Music in the context of a mediated and 'global' India: musical genres are viewed as sites of identity construction, contestation, change, and outcomes of the processes of colonialism and globalisation.

Focuses on select musical case studies based on examples recorded and/or performed in the later twentieth and the twenty-first centuries.

**Prerequisite:** 60 points in Stage II courses available for the BA majors in Anthropology or Music

**Restriction:** ANTHRO 233

**ANTHRO 335**

**Evolution of Human Physiology**

Discusses the evidence for interactions between human ecology, physiology, behaviour, health and reproduction. The evolutionary function of physiological responses to our physical and social ecology is addressed, as are the health risks encountered by people living at the extremes of natural or modern environments. The human evidence is complemented by studies of other extant primate species.

**Prerequisite:** ANTHRO 201 or 120 points passed

**ANTHRO 336**

**Race and Ethnicity**

Ideas and debates about racial and ethnic differences. How real are these differences? How are these cultural constructions related to economic, political and ideological forces? What are the relationships between race, ethnicity and identity?

**Prerequisite:** ANTHRO 203 or 30 points passed at Stage II

**ANTHRO 337**

**Birth, Death and Sex: Evolutionary Life History**

How do biology and culture affect our reproduction? What factors underlie the patterns of death and ageing and how is personal survival balanced against future reproduction? Using evolutionary theory and demographic anthropology, critical questions about individual development, reproductive ecology, parental investment and population growth and decline are explored.

**Prerequisite:** ANTHRO 201 or 120 points passed

**ANTHRO 339**

**Anthropology and Development**

Anthropology of development and anthropology in development: anthropological critiques of the notion of 'development'; debates about anthropological praxis and ethics in development; case-based anthropological analyses of development interventions and methods and the applications of anthropological expertise.

**Prerequisite:** ANTHRO 203 or 30 points passed at Stage II

**ANTHRO 340**

**Heritage Conservation in Aotearoa**

Addresses the main principles of heritage conservation focusing on the rationale rather than treatment methods. Special emphasis is given to the fields of: conservation of place, archaeological, architectural, ethnographic and fine art conservation. Provides students with a cultural orientation to conservation where issues are examined through several contexts, including anthropological studies and conservation science.

**Prerequisite:** ANTHRO 100 and 101, and 200 or 201 or 203 or HERITAGE 200 or MUSEUMS 200, or 120 points passed

**ANTHRO 342**

**Special Topic in Anthropology**

**Prerequisite:** ANTHRO 200, 201, 203 or 219 or 120 points passed

**ANTHRO 345**

**Directed Studies in Anthropology**

A directed reading and individual study course to prepare students in the methodologies in a selected sub-discipline of Anthropology under supervision of appropriate staff.

**Prerequisite:** ANTHRO 200 or 201 or 219 or 203 and approval of Head of Department

**ANTHRO 346**

**Tradition and History in New Zealand Archaeology**

This course will examine Māori traditions and history as a guide to processes in the New Zealand archaeology. Case studies will include Māori canoe traditions, the expeditions of Hongi Hika and Te Rauparaha, and the Ngai Tahu settlement of the South island.

**Prerequisite:** ANTHRO 200 or 201 or 203 or 219 or 120 points passed

**Restriction:** ANTHRO 246

**ANTHRO 347**

**Special Topic in Anthropology**

**Prerequisite:** 30 points at Stage II in Anthropology including either ANTHRO 200 or 201

**ANTHRO 348**

**Perspectives on Human Growth**

Adopts evolutionary and biocultural perspectives in examining patterns of human growth and maturation. Human developmental patterns are placed within an evolutionary framework using evidence from non-human primates and earlier hominid remains. Variability within and among human populations in growth and developmental timing is considered in terms of genetics interacting with physical, biotic and social factors.

**Prerequisite:** ANTHRO 201 or 120 points passed

**ANTHRO 349**

**Primate Behaviour, Ecology and Conservation**

Examines the diversity of extant nonhuman primate species, including their behaviour, ecology, and conservation, and also the importance of primatology toward an understanding of our own species. Specifically, students will critically examine the results of primatological inquiries in order to gain insight into the comparative evolutionary approach, especially with respect to the applicability of such efforts to the study of humans.

**Prerequisite:** ANTHRO 201 or 120 points passed

**Restriction:** ANTHRO 205
ANTHRO 350 15 Points
Environmental Anthropology
An exploration of human-environmental relationships in a variety of cultural contexts. From an anthropological perspective, it considers how people imagine, explain, experience and interact with a range of different socio-cultural and physical environments, and how they encode and respond to meaning in their material surroundings. Key themes include cognition, the construction of worldviews, concepts of nature, cultural landscapes, environmental management, colonisation and development.
Prerequisite: ANTHRO 203 or 120 points passed

ANTHRO 351 15 Points

Archaeology in Practice
Contemporary approaches to archaeological practice: materials, analysis and interpretation.
Prerequisite: 15 points from ANTHRO 200, 201, 202, 203 with a minimum B– grade

ANTHRO 354 15 Points
Anthropology of the Body
Examines cultural and historical variations in how societies understand and experience the human body. The focus will be primarily on social, historical, and political-economic approaches. Topics such as labour, sport, health, illness, sexuality, gender and religious ritual will be considered. Explores the cultural construction and social experience of the human body in a diverse range of settings.
Prerequisite: ANTHRO 203 or 30 points passed at Stage II Restriction: ANTHRO 241

ANTHRO 355 15 Points
Anthropology and Public Policy
Examines the way ‘policy’ has become an increasingly central organising principle in contemporary societies, shaping the way we live, act and think. Drawing on anthropological and sociological theories of power, governance and subjectivity, it explores how policy creates new categories of individuals such as ‘citizens’, ‘nationals’, ‘criminals’ and ‘deviants’, and the influence policy plays in the way individuals construct themselves as subjects.
Prerequisite: ANTHRO 203 or 30 points passed at Stage II Restriction: ANTHRO 755

ANTHRO 356 15 Points
Anthropology and Intellectual Property
Examines recent anthropological contributions to debates about intellectual property. These include concepts of ownership, the objectification and appropriation of indigenous knowledge, creativity, bioprospecting, the protection of intangible cultural property, and the effects of global flows of information on persons, privacy and the ownership of ideas.
Prerequisite: ANTHRO 203 or 30 points passed at Stage II Restriction: ANTHRO 756

ANTHRO 357 15 Points
Gender, Sexuality and Popular Music
Explores the ways in which gender and sexual identities are both reflected in and modified by mainstream popular music: from ‘girl power’ to boy bands; from outwardly gay and lesbian artists to the gay appropriation of heterosexual female divas; from the camp masculinity of heavy metal to lesbian rock and riot grrrrls; from women-hating gangster rappers to powerful women in the recording industry.
Prerequisite: 60 points in Stage II courses available for the BA majors in Anthropology or Music Restriction: POPMUS 306

ANTHRO 358 15 Points
Gender and Colonialism in the Pacific
The transformation of gender relations in the Pacific from the inception of the European contact period and through the colonial process. Emphasis will be on the gendered nature of colonialism both in terms of how it framed the process, as well as how the experience was lived.
Prerequisite: ANTHRO 203 or 30 points passed at Stage II Restriction: WOMEN 303

ANTHRO 359 15 Points
Archaeology and Identity in Palestine/Israel
Examines the history of archaeology in Palestine/Israel, recent archaeological findings and how new interpretations are changing our understandings of the past and conflicts over the use of archaeology in contemporary identity politics.
Prerequisite: ANTHRO 200 or 120 points passed
Restriction: ANTHRO 249

Ethnographic Research Methods
Covers key ethnographic methods and related theoretical and ethical issues in Anthropology. It focuses on qualitative data collection and analysis, and contains a range of practical exercises. An intensive course, it involves an introductory day and a three-day field school just prior to the beginning of the semester, plus a full day on the two subsequent weekends.
Prerequisite: ANTHRO 203 with a minimum B grade

ANTHRO 364 15 Points
Issues in the Anthropology of Europe
Uses anthropological theory and ethnography to examine processes that are shaping contemporary European societies, including the on-the-ground effects of recent political economic transformations in Europe – globalisation, neoliberalisation, migration, European integration. Themes studied include: the idea of Europe, the European Union, gender, honour and shame, the Mafia, immigration, nationalism, ethnicity and popular culture in Europe.
Prerequisite: ANTHRO 203 or 30 points at Stage II

ANTHRO 365 15 Points
Coming of the Māori
An introduction to New Zealand’s archaeological history, from early Māori origins through the early
periods of western contact (ca. 1840s). Tropical Polynesian adaptations to New Zealand’s temperate climate, patterns of resource use and environmental change, development of Māori’s rich material culture and arts, classic Māori society, and cultural interactions with new arrivals in the historic period are discussed.

Prerequisite: ANTHRO 200 or 201 or 203 or 120 points passed
Restriction: ANTHRO 207

ANTHRO 366 15 Points
Medicine, Power and Politics
Anthropological examination of the interplay between cultural values, local and national politics, and international health programs and initiatives. Examines how experiences of medical care and ideas of illness and health vary across different cultural groups and socio-cultural settings.

Prerequisite: ANTHRO 203 and either ANTHRO 224 or 324

ANTHRO 701B 15 Points

Human Palaeoecology
Critical survey of methods, theories and problems in human palaeoecology, including issues of resource use, landscape change, island colonisation and anthropogenic extinctions.

To complete this course students must enrol in ANTHRO 701 A and B

ANTHRO 703 30 Points

ANTHRO 703A 15 Points
ANTHRO 703B 15 Points

Landscape Archaeology
Uses geographic information systems (GIS) and other computer programmes to examine the spatial organisation of data, and the relationship of archaeological features both to other features, and the environment. The social processes underlying these spatial configurations will be a particular focus.

To complete this course students must enrol in ANTHRO 703 A and B, or ANTHRO 703

ANTHRO 704A 15 Points
ANTHRO 704B 15 Points

Material Culture
The study of material culture using museum, ethnographic, archaeological and experimental approaches, including the information provided by material culture studies on human agency and the structuring of societies.

To complete this course students must enrol in ANTHRO 704 A and B

ANTHRO 708A 15 Points
ANTHRO 708B 15 Points

Cultural Resource Management in Archaeology
Covers all aspects of cultural resource management as it relates to archaeological sites and heritage with a particular focus on New Zealand archaeology and Māori heritage. There is an emphasis on site identification, recording and interpretation in the field. Legal aspects and the roles of archaeologists and iwi in cultural resource management are also covered.

To complete this course students must enrol in ANTHRO 708 A and B

ANTHRO 709 15 Points
Applying Anthropology
Considers the diverse fields in which Anthropology may be applied to peoples and cultures in the contemporary world, including, for example: environmental and development issues; land and resource conflicts; mediation and advocacy; human rights; cultural heritage; social policy; business and industry; communications; marketing; medical investigations; museums and other representational activities. Addresses practical and ethical issues that arise in these areas.

Art History

Stage I

ARTHIST 106 15 Points

Images and Ideas: Art since Antiquity
A survey of periods that have provided the foundation of western art and architecture, together with in-depth case studies of artworks from different periods and places. As well as acquiring a broad knowledge of art in its social context, students develop skills in visual and iconographic analysis, essential to the study of art.

Restriction: ARTHIST 111

ARTHIST 107 15 Points

Art and the City: 1400-1700
An investigation of the social and cultural history of urbanisation between 1400 and 1700 as expressed in art and architecture. The areas of study will involve looking at art in the spheres of public buildings, religious institutions and private houses. The cities to be covered will include Florence, Bruges, Venice, Antwerp, Rome, Madrid and Amsterdam.

ARTHIST 109 15 Points

Shock of the Modern: Monet to Warhol
Will explore the production and reception of modern art in the context of rapid social, political and technological change during the period from c.1850 to 1970. Modern art is interpreted broadly to include painting, sculpture, design, architecture, performance, photography and film. Issues such as the emergence of the avant garde, primitivism and abstraction will be studied.

Restriction: ARTHIST 104, 105

Themes in Art History  
15 Points  
Examines emerging questions and topical issues in Art History in a chosen subject area.

ARTHIST 114G  
Reading Images  
15 Points  
Is seeing learned? Can an image be read in the same way as a text? Understanding images is central to everyday life. Visual literacy is fundamental to all disciplines. This course provides students with tools for making sense of various kinds of images and objects: photographs, advertisements, paintings, film, television, comics, cartoons, monuments, buildings, maps, landscape, digital and internet images.

ARTHIST 115  
15 Points  
ARTHIST 115G  
Global Art Histories  
A broad survey of visual art spanning from the early modern period to the contemporary. Students will be introduced to a range of art practices situated within a global context and will consider art works produced in Māori and Pacific cultures alongside Indian, Asian, Middle Eastern, European and American traditions.

Stage II

ARTHIST 201  
Art and Revolution 1750-1850  
15 Points  
Topics in late eighteenth and early nineteenth-century painting, sculpture and architecture in Europe, particularly France and Britain. The impact of social and industrial revolution is examined, and developments in portraiture, landscape and history painting are explored. The major artists include Constable, Turner, Goya, Reynolds, Gainsborough, David, Ingres, Gericault and Delacroix.  
Prerequisite: Any 30 points at Stage I in Art History or 30 points at Stage I in European Studies  
Restriction: ARTHIST 321

ARTHIST 202  
Crisis and Change: Mid-19th Century Art in France and Britain  
15 Points  
Selected topics in British and French art, photography, art criticism and theory from the 1840s to the 1870s, a crucial period of change in art, with particular focus on Pre-Raphaelitism, leading figures such as Manet, Courbet, Daumier and Whistler, and influential women artists and photographers.  
Prerequisite: Any 30 points at Stage I in Art History or 30 points at Stage I in European Studies  
Restriction: ARTHIST 302

ARTHIST 203  
Northern European Art 1400-1600  
15 Points  
A survey of art in Northern Europe with the focus on developments primarily in painting and sculpture, and to a lesser extent in manuscript illumination and tapestry. Religious symbolism, approaches to landscape representation and portraiture are examined, as well as new genres such as still life and architectural painting. Artists studied include van Eyck, Campin, van der Goes, Hieronymous Bosch and Pieter Brueghel.  
Prerequisite: Any 30 points at Stage I in Art History or 30 points at Stage I in European Studies  
Restriction: ARTHIST 303

ARTHIST 204  
Contemporary Art and Theory  
15 Points  
Examines some central concerns that have arisen in late modernist art, exploring the moves, intensifications and political implications of art in the post-1968 period: dematerialisation of the art object, site-specificity, the artist in a commodity culture, activism, questions of identity, notions of looking and spectatorship, interactivity, new media, contemporary censorship and debates about the place of the aesthetic.  
Prerequisite: Any 30 points at Stage I in Art History or FTVMS 100 and 101  
Restriction: ARTHIST 334

ARTHIST 210  
Modernism and Design  
15 Points  
A study of the central role played by architecture and design within twentieth-century Modernism. Dealing with function, materials, decoration and Modernist theory, the course spans the period from Art Nouveau in the 1890s to World War II. The main focus will be on Europe and the United States, with some references to New Zealand.  
Prerequisite: Any 30 points at Stage I in Art History or 30 points at Stage I in European Studies  
Restriction: ARTHIST 310

ARTHIST 211  
Reading Landscape Art  
15 Points  
European landscape art emerged in the seventeenth century, exploring aesthetic qualities associated with nature, but also representing social values. English gardens and paintings by such artists as Constable and Turner were signifiers of economic and political change in the eighteenth and nineteenth centuries, as were artworks in colonial New Zealand.  
Prerequisite: Any 30 points at Stage I in Art History or 30 points at Stage I in European Studies  
Restriction: ARTHIST 311

ARTHIST 212  
Neo-Gothic to Art Nouveau  
15 Points  
Focuses on nineteenth-century British architecture and design. Topics include debates about style and history, relationships between form and function, uses of new technology and the role of ornament, and their relationships to man-made structures and to nature in the context of nineteenth-century social conditions and ideas.  
Prerequisite: Any 30 points at Stage I in Art History or 30 points at Stage I in European Studies  
Restriction: ARTHIST 312

ARTHIST 214  
Art and New Zealand: Past and Present  
15 Points  
The selection of topics from the late eighteenth century to the 1970s includes cross-cultural interactions and representations, landscape and art, questions of cultural identity and innovation, relationships with the art of Europe, America, Australia and Oceania, and tensions between the local and international. Painting, sculpture, carving, architecture, photography and other media are studied.  
Prerequisite: 30 points at Stage I in Art History, or EUROPEAN 100 and 15 points at Stage I in Art History  
Restriction: ARTHIST 110, 110G, 314

ARTHIST 215  
The Print in Northern Europe 1470-1600  
15 Points

Concepts in Contemporary Art

Examines the cross-fertilisation of theory and praxis, philosophy and art, materialism and idealism in the arts. It will be taught in four thematic units – Body/Mind: Representation/Experience; Self/Other and Materialism/Conceptualism – testing how visual theory bridges the gap between these dual terms. Students will learn to apply a number of important critical theories to their understanding of art, and importantly, to fine-tune those theories through visual experience.

Course Descriptions:

**COMPLIT 100 Reading Comparatively: An Introduction**
Through the study of an anthology of short fiction, poetry, myth and drama from every part of the world, introduces strategies for reading literature across national and cultural boundaries. All texts are in English.

**COMPLIT 200 Narrative: Theory and Practice**
Myths, oral tales, histories, feature films, diaries, strip cartoons, news reports, evidence in court, as well as novels and short stories, are all forms of narrative. Narrative seems to be a fundamental instrument used in all cultures to make the flow of experience comprehensible. Introduces theoretical tools for studying narrative, and applies them to a variety of texts from many cultures. All texts are in English.

**COMPLIT 202 Interpreting Folktales**
An introduction to the study of interpretation of folktales. Tales from many cultures will be examined. Contrasting theories on the origins and meaning of folktales will be explored.

**COMPLIT 203 Special Topic**

**COMPLIT 204 Travelling Tragedy**
A study of the mutations that tragedy has undergone from its origins as a theatrical form in ancient Greece to its contemporary manifestations around the world in drama, fiction and film.

**COMPLIT 205 When East Meets West**
Western readers have encountered the literatures of East and South Asia, and Asian readers have encountered Western literature, in a variety of political and cultural contexts, including: colonial expansion, spiritual inquiry, modernisation, warfare, migration, and globalisation. A selection of works from East and West, which have played a key role in these encounters, especially in the modern period, will be studied.

**COMPLIT 300 Special Topic: A World of Short Stories**
Examines a sampling of short narrative forms from a wide range of cultures (European, North and South American, African, Asian, NZ and the Pacific), time periods (from origins in oral story-telling to today’s digital media), types (moral, political, fantastic) and theoretical perspectives. Texts are presented.
in English and their original languages; language students are expected to read the originals.

Restriction: COMPLIT 707

Prerequisite: 30 points from MĀORI 130, PHIL 103, POLITICS 109, SOCIOL 100, 101, 103

CRIM 303 15 Points
Special Topic: Gender, Crime and Justice

Explores the importance of gender in the study of crime and criminal justice and examines patterns of offending, victimisation and employment in the criminal justice system amongst women and men. Traditional criminology theories and feminist critiques, and the differential treatment of women and men in the criminal justice system as victims, offenders and professionals will be critically examined and evaluated.

Prerequisite: CRIM 201 or 202

Stage III

CRIM 301 15 Points
Issues in Criminal Justice

Discusses the workings of the criminal justice system and explores and contextualises classical and emergent approaches to criminal justice, including their legal underpinnings. Practical and theoretical issues will be considered using a case study approach. Emphasis is given to the developing synthesis of criminal and social justice.

Prerequisite: CRIM 201 or 202

CRIM 302 15 Points
Criminology: The Indigenous and the Global

Are we all equal before the law? Or, are groups treated differently by the criminal justice system? This course examines, with particular emphasis on indigenous peoples in New Zealand, Australia and Canada, the impact of differential practices on inequalities and collective efforts to achieve social change. Concepts of restorative justice are central to this course.

Prerequisite: CRIM 201 or 202

Postgraduate 700 Level Courses

CRIM 700 30 Points
Research in Criminology

Examines the methods of research frequently employed in the field of criminology, and the various epistemological and ethical questions that arise in criminological research, and the connection between theory and research and quantitative and qualitative analytic strategies. Students will complete a research project under supervision.

CRIM 701 30 Points
Criminological Theory

An examination of classical and contemporary theories of crime, including sociological, psychological, medical, rational-choice and critical perspectives on criminology. Attention will be given to the construction of theory as it is informed by social science research; to the social, cultural and political contexts in which these theories have emerged; and to the influence of theories in criminal justice policies.

CRIM 702 30 Points
Advanced Issues in Penology

A survey of issues in penology, describing and interpreting specific penal reform strategies in terms of their historical, social, political and economic context. An appreciation of the main themes within penology will allow a greater understanding of the role that punishment regimes play in society and specifically in the criminal justice system.

CRIM 703 30 Points
Contemporary Criminology

An examination of critical approaches to the study of crime and crime control. Attention will be given to understanding how these approaches critically assess social problems surrounding crime and crime control strategies; the political, social and historical development of varying critical perspectives; and the ways in which such approaches may lead to changes in criminal justice policies and practices.

Literature and the Contemporary
Investigates the responses to our world that literature makes possible through an exploration of such themes as love, war, memory, terror, God, myth, murder, dreams and contemporary novels, poetry, drama and fiction on film.

ENGLISH 107 15 Points
Fundamental Questions: Desire
The significance of the idea of desire is at the forefront of recent critical thought. What is desire? How does the idea of desire have currency in our creative texts; how does it function in familiar genres such as poetry, prose, drama and film? Critical thinking about desire provides a unifying device for the texts and resources studied.

ENGLISH 109 15 Points
Drama on Stage and Screen
An introduction to conventions of dramatic practice and to the dimension of performance, both on stage and screen. Discussion of performance will extend to broader issues such as self-representation and gender. The texts studied will represent different types of dramatic styles, primarily those from the twentieth century, and will include some pairings of play texts and screen productions.

ENGLISH 111 15 Points
Literature From Sonnets to Comics
An introduction to masterpieces of literature from Shakespeare to the present, to a wide range of genres, and to literary terms, contexts, theory and approaches.

ENGLISH 112 15 Points
Global Literatures: Contested Spaces
Covers central issues in international postcolonial, settler and indigenous writing by examining a small selection of texts from the late nineteenth century (Kipling and Stevenson) and a larger selection of contemporary texts from several geographically diverse regions: India, the Pacific, Africa, the Caribbean, Canada, Ireland, New Zealand and the United States.

ENGLISH 121 15 Points
ENGLISH 121G 15 Points
Reading/Writing/Text
A course developing University-wide skills of reading, writing and analysis. Addresses the needs of students in both English and other disciplines where both writing and reading have an important role in learning. The course fosters personal writing skills and also introduces writing as a subject of study itself.

Restriction: ENGLISH 92W

Stage II

ENGLISH 200 15 Points
Middle English: Chaucer and Romance
An introduction to medieval narrative centred on the tales of Geoffrey Chaucer, the greatest English poet of the fourteenth century and one of the finest narrative poets in the language. Along with the Chaucer tales, we study a number of contemporary short romances, mostly anonymous, that display the narrative possibilities of the genre, the typical interest in adventure and passion, as well as the textual practices employed by poets in a manuscript or performance culture.

Prerequisite: Any 30 points at Stage I in English

Restriction: ENGLISH 359

ENGLISH 203 15 Points
English Language to 1900
Introduction to the history of the English language from its origins to 1900, with an emphasis on the development of sound changes, grammar, words and meanings in sociocultural and historical contexts.

Prerequisite: 30 points in English and/or Linguistics

ENGLISH 204 15 Points
Pacific Literature in English
An introduction to contemporary Pacific Literature exploring texts from canonical Pacific writers to spoken word performance poets. Texts will be examined in light of recent theories in Indigenous Writing Studies, with a focus on crossings of cultural and creative borders, diaspora and identity.

Prerequisite: 30 points at Stage I in English, or 15 points at Stage I in English and WOMEN 202 or PACIFIC 100

Restriction: ENGLISH 358

ENGLISH 205 15 Points
Women’s Texts of Experience
Explores a variety of ways in which women create texts or stories based on the experience of their lives, and how these ‘stories’ help them reflect upon that experience. A range of poetry, fiction, theoretical writing, film, visual art, photography, and music from different cultures is studied.

Prerequisite: Any 30 points in BA courses or Certificate in Women’s Studies

Restriction: WOMEN 205

ENGLISH 210 15 Points
Age of Shakespeare: Poetry
A study of one of the greatest periods of English poetry, beginning with the sonnets of Shakespeare and ending with the splendour of Milton’s Paradise Lost. Included are the sonnets of Spenser and Sidney, Donne’s profane and religious poetry, Herbert’s mystical and Marvell’s witty verse and finally the poetry of Katherine Phillips and Aphra Behn.

ENGLISH 332
Contemporary Drama
A study of drama since the 1970s. Addressing the plays primarily as theatre texts, it emphasises the theatrical strategies and conventions deployed in the texts, some of which self-consciously celebrate theatricality. Teaching combines lectures, discussions, play-readings and viewing theatrical videos. 
Prerequisite: 30 points at Stage II in English or Drama

ENGLISH 336
Victorian Poetry
A study of a range of Victorian poets, ranging from canonical figures to women poets who have received sustained critical attention only in recent years. Focal points of the course are the religious and spiritual issues raised by social change, the discourse of love and sexuality and the practice of the dramatic monologue. 
Prerequisite: 30 points at Stage II in English

ENGLISH 340
Arthurian Literature
The Arthurian story, from its first passage into French in the twelfth century. The English writings are studied in comparison with their French sources and counterparts (in translation).

ENGLISH 345
Adolescent Fiction 
Adolescence is a problematic category and a peculiarly modern one; necessarily, the same holds true for adolescent fiction. The aim of this course is to examine this phase of development that is neither childhood nor adulthood but lies between, and recent literary and filmic responses to the characteristic interests and demands of readers at this stage of their lives. Course reading will include film and television, as well as written texts. 
Prerequisite: 30 points at Stage II in English

ENGLISH 346
African and Caribbean Literature 
The Caribbean, by virtue of its geography and history, embraces cultural elements of Africa, India, Europe and North America. The focus, however, will primarily be on Caribbean and African societies in order to address a range of issues connected to these variously hybrid cultures: slavery, black identity and sexuality, nation/narration, home and location/dislocation. 
Prerequisite: 30 points at Stage II

ENGLISH 347
Poetry Off the Page 
The most recent technologies for performing and preserving poetry are in the process of coalescing with the oral roots of the art form. This shift in transmission and retrieval and its implications for reading communities is examined in three areas: poetry reading (live performance and audiovisual record); the poetry archive (physical and electronic); and digital poetry (virtual communities, real readers). 
Prerequisite: Any 30 points in English

ENGLISH 350
From Rhetorics to Writing 
Explores writing through discussion of theories of language use, especially issues raised by theorists of rhetoric and composition: cognitive process theory, discourse analysis, language as a social semiotic, literary studies, race and gender, writing for new technologies. The course centres on writing theory but there is a practical dimension: students investigate their present writing practices and consider possible future challenges.

ENGLISH 707  30 Points
Writing World War II
Takes the terror wrought by bombing as its theme with particular focus on the literature of the Second World War and the Cold War that followed it. Also addresses contemporary literary reimaginations of the Second World War, which incorporate elements of military, architectural and postcolonial history, and asks what these later versions imply about the war's historicity.

ENGLISH 708  15 Points
Post-theory
After the theory wars and the global dissemination of the work of acknowledged theory 'masters', this course asks: 'What does theory matter now?' Taking as given the legacy of literary and cultural theory, the course considers the variety of theoretical writing, its objects and concerns, which may be characterised as post-theory.

ENGLISH 710  15 Points
Interpreting Janet Frame
An exploration of the fiction of renowned writer Janet Frame. Using interpretative theory and reader-response strategies, the course addresses the challenge of developing enabling critical contexts for Frame's novels. Conversely, Frame's novels are used as a means of exploring the reading process and the dynamics involved in the act of interpretation.

The Poetics of Pleasure
Pleasure moves across time like a rumour through our sense of what texts might involve. It can be heard in Horace's 'dulce,' Sidney's 'delight,' Wordsworth's 'bliss' and Barthes's 'jouissance.' The New Zealand secondary school curriculum insists that pleasure is mandatory to the experience of studying English. This course will track the partiality of texts to a poetics of pleasure and its own partiality to a textual erotics.

Popular Fiction: Mystery, Romance and Fantasy
Popular Fiction offers an opportunity to extend critical study of literature to the mass of texts customarily denied academic approval. A key element is the reader's pleasure. Does pleasure make a difference in what is, admittedly, a critical study of several varieties of modern popular fiction, especially children's literature, romance and crime fiction (both in print and on television). Reading of texts will be supported by discussion of a range of theoretical issues.

and literacy studies, and writing for new technologies.

ENGLISH 759  
Apha Behn and the Canon  
A study of selected plays, prose fictions and poems  
by Behn in relation to both the emerging canon of  
early modern English literature and to contemporary  
debates about canonicity within feminism and cultural  
and the economy of the imaginative subject. 
Considers mimesis in literary and theoretical contexts  
from the early 1900s to the present. The course also  
addresses invention, reference, signs, authenticity,  
and the economy of the imaginative subject.
Restriction: ENGLISH 737

ENGLISH 760  
Milton and Poetic Authority  
Milton is the poet who has been most significant in  
the establishment of the familiar canon of English  
poetry so his achievement raises questions about the  
greatness of poetry written in one set of historical  
circumstances for an audience that the poem itself  
participates in constructing. In this context the course  
covers a range of Milton’s works but concentrates on  
Paradise Lost.

ENGLISH 769  
Special Topic: Representing Imagining  
Considers mimesis in literary and theoretical contexts  
from the early 1900s to the present. The course also  
addresses invention, reference, signs, authenticity,  
and the economy of the imaginative subject.

The media examined include: film, recorded sound, radio, television and the internet. The course introduces students to the basic concepts and analytical tools of media studies.

FTVMS 101 15 Points
Film Studies
An introduction to the feature film, and the main traditions of film criticism. A series of significant films, from 1915 to the present, are explored in detail. The aim is to develop an historical perspective, an awareness of film-making as an art and an interest in the relationship between films and society, including debates about race, gender, censorship.

FTVMS 110 15 Points
FTVMS 110G
Advertising and Society
A critical examination of advertising and advertisements focusing on the role advertising plays in consumer culture. Advertisements from a diverse range of media are studied in order to analyse how advertisements construct and disseminate meaning. The course investigates how advertising engages with the logic of wider cultural and global transformations with consideration given to both consumer and industry perspectives.

**Stage II**

FTVMS 201 15 Points
TV Studio Production: The Interview
An introduction to the technical skills required to produce the interview, a core television form, as well as providing a critical framework within which to access and critique industry practice. Combines formal lectures and practical exercises in exploring the function and construction of the interview, interspersed with presentations from a variety of industry practitioners.
Prerequisite: FTVMS 100 and 101

FTVMS 202 15 Points
Hollywood and its Others
An investigation of Hollywood with a particular focus on its industrial, aesthetic and cultural aspects. Students will gain a historical understanding of classical Hollywood cinema, which will serve as the basis for comparison to other national cinemas and/or American independent productions of recent decades.
Prerequisite: FTVMS 100 and 101
Restriction: FTVMS 307

FTVMS 203 15 Points
Techno-culture and New Media
Theory and analysis of media technologies. An introduction to the major debates about technology, multimedia and the digital age. Examines the academic and popular discourse on techno-culture in modernity, focusing on the exchange of bodies and commodities as bits, bytes and loops within
transnational capitalism, and the increasingly mediated ‘technologisation’ of everyday life.

Prerequisite: FTVMS 100 and 101
Restriction: FTVMS 314

FTVMS 204 15 Points
Media Analysis
In workshops and lectures, students will develop and practice the skills required to analyse, contextualise, and critique media texts. Examines the ambivalences surrounding European perceptions of the South Pacific and their translation into popular media culture. In addition to European representations of the Pacific, the course explores how these images and discourses have influenced films and video produced by Pacific peoples themselves.
Prerequisite: 30 points from FTVMS 200–214, 216–227, MĀORI 271
Restriction: FTVMS 209

FTVMS 323 15 Points
Popular Music on Screen
Examines popular music in film, television, video, the internet and other audiovisual media. Considers the relationship between sound and vision. Analyses the musical, documentary, narrative feature film, concert film, music video, television commercial and other forms. Looks at visual cultures of jazz, pop, rock, R’n’B, hip hop, electronic dance music and other music styles.
Prerequisite: 30 points from FTVMS 200–214, 216–227, MĀORI 271
Restriction: FTVMS 218

FTVMS 324 15 Points
Gender, Politics and the Media
Addresses the theory, practice and representation of politics in the media from a gendered perspective. Analyses the relationship between the media and women and men in the public sphere.
Prerequisite: 30 points from FTVMS 200–214, 216–227, MĀORI 271
Restriction: FTVMS 213

FTVMS 325 15 Points
Race, Indigeneity and the Media
Considers the media in relation to racial and ethnic identities. The course examines how dominant media represent minority cultural groups in terms of their perceived difference. Discusses postcolonialism and indigeneity in international contexts, with a focus on Māori engagement with media, and 'Pakehaness' as an ethnic identity. The course draws on critical race theory and whiteness studies.
Prerequisite: 30 points from FTVMS 200–214, 216–227, MĀORI 271
Restriction: FTVMS 210

FTVMS 326 15 Points
Memory and Media
Explores the relationship between memory and the ways in which it is experienced, represented and embodied through media technologies. Students will examine how film, television and new media have depicted processes of memory and forgetting, and the extent to which these media forms themselves serve as a type of surrogate memory.
Prerequisite: 30 points from FTVMS 200–214, 216–227, MĀORI 271
Restriction: FTVMS 219

FTVMS 327 15 Points
Comics and Visual Narrative
Examines the medium of comics both as an expression of popular culture and as a visual language. Beginning with a history of sequential graphic narrative considers issues around the legitimacy of a popular art form and means of story-telling, as well as the problem of censorship that dominated comics culture especially in the 1950s.
Prerequisite: 30 points from FTVMS 200–214, 216–227, MĀORI 271
Restriction: FTVMS 222

FTVMS 328 15 Points
Special Topic: Video Games: Theory and Culture
A study of video games as a new media form situated in the broader context of media theory and history. Considers video gaming as an industry, as a leisure activity, and as a site of aesthetic and narrative innovation. The course examines what makes video games a distinctive media form.
Prerequisite: 30 points from FTVMS 200–214, 216–227, MĀORI 271
Restriction: FTVMS 212

**Visualising Difference**

Critically examines the representation of racial and ethnic difference in cinema and broadcast television. This course explores and discusses how difference has been conceptualised in colonial, post-colonial, and multicultural frameworks using examples from the USA, Canada, Australia, and New Zealand.

**FTVMS 716**

**30 Points**  
**Love in/Loving the Cinema**

Critically examines the theme of love in the cinema. Looks at why the love story has been such a staple of movie narratives and what films can teach us about love. Also explores the nature of the love of cinema itself, cinephilia.

**FTVMS 717**

**30 Points**  
**Special Topic: Ubiquitous Media**

Explores some of the implications of increasingly mediatised and computerised space. From mobile phones and iPads to ‘smart’ clothes and biomaedia, communication, information and screen media are increasingly coming to define our relations with others. Taking an interdisciplinary approach, the course interrogates the philosophical, social and political implications of the move from software to ‘everyware’.

**News Framing across Cultures**

Compares Western, Indigenous and Asian news by considering news framing in two overlapping strands: firstly, different ways in which cultural and in some cases political values are inscribed into news, and secondly, ways in which different news organisations create/deal with those considered ‘other’. Main focus is on print and television news, with some consideration of on-line news.

**FTVMS 729**

**30 Points**  
**Film Evil**

Explores the theme of evil in the cinema. What films can teach about evil and why it is that conceptions of evil – its nature and source as well as distinctions between natural and moral evil – have formed so much of the subject matter of cinema. The course also considers the proposition that some films may themselves be evil.

**FTVMS 741**

**30 Points**  
**Time and the Moving Image**

Explores how moving images mediate our experience of time, from the actualités of early cinema to video games and digital special effects. Addresses the representation and articulation of time across documentary and narrative cinema, experimental film and video, television and new media, with reference to key concepts in philosophy and media theory.

**FTVMS 781**

**30 Points**  
**Research Project**

Directed research on an assigned topic. Following an introduction to the key issues in conducting such sustained research, students will develop their project through workshops, discussions and group supervisory sessions. Language Study Abroad

The Language Study Abroad courses are intended to permit students to take advantage of opportunities for formal language study in an approved overseas institution where instruction is in a language other than English. Supplementary study at The University of Auckland may be required as part of these courses.

Students taking one of these courses should enrol prior to undertaking the overseas study, and enrolment is subject to approval of the planned overseas study by the Head of Department or School for the language subject concerned. A final grade for any of the courses will be based on formal assessment of achievement in the language concerned, together with any other work required by the Head of Department or School.

The courses available for Language Study Abroad are listed under the following subjects: Arts General, Chinese, French, German, Italian, Japanese, Korean, Russian, Spanish.

Language Teaching and Learning

Stage I
LANGTCHG 100 15 Points
Linguistics for the Language Teacher
An introduction to linguistics and its applications for language teachers. Provides basic understanding about the nature and function of language, including phonology, morphology and syntax, as well as semantics. This understanding will underpin the pedagogical principles developed in other units of the programme; and will enable students to translate their understanding of language into effective classroom practice.
Prerequisite: Student must be enrolled in BEd(TESOL)

LANGTCHG 101 15 Points
Introduction to English Language Teaching
An introduction to a range of approaches to second language teaching and the theories of language and learning which underpin them. Students will explore the basic concepts related to current approaches to ELT in their home country and the social context of learning.

LANGTCHG 102 15 Points
Classroom Management and School Experience
Introduces students to the organisation of learning in the classroom and specifically to the role and behaviour of the teacher in secondary classrooms and in the school. The integrated school experience provides students with an initial orientation to the school environment in their home country and the opportunity to apply their growing knowledge and skills in a supportive classroom context.
Prerequisite: Student must be enrolled in BEd(TESOL)

LANGTCHG 103 15 Points
Competency in the Mother Tongue
Extends the students’ command and control over their mother tongue to enable them to operate efficiently and effectively in schools in their home country where the medium of instruction is the mother tongue. To further enrich their communication skills they will be exposed to the literature in their mother tongue.
Prerequisite: Student must be enrolled in BEd(TESOL)

LANGTCHG 104 15 Points
Ethics and Civilisation
The role and the influence of local culture/religion (eg, Islam or Confucianism) on world civilisation in general, and local culture in particular, will be examined. Offers opportunities for students to examine Asian civilisation and will examine the challenges facing contemporary Asian civilisations.
Prerequisite: Student must be enrolled in BEd(TESOL)

considerations and techniques, the focus is on different forms of assessment used in secondary English teaching contexts in the home country. 

**Prerequisite:** Student must be enrolled in BEd(TESOL)

**Restriction:** LANGTCHG 704

**LANGTCHG 402**

**15 Points**

**Linking Theory and Practice in the Language Classroom**

Examines the pedagogical frameworks underpinning classroom methodology. Focuses on linking theory and practice and on preparing students for forthcoming classroom teaching. Includes the practical preparation and implementation of lessons, drawing on and bringing into focus relevant aspects of the programme. 

**Prerequisite:** Student must be enrolled in BEd(TESOL)

**Restriction:** LANGTCHG 710

**LANGTCHG 403**

**60 Points**

**Teaching Practice**

A 12-week period of teaching practice in a school in the country of the student’s origin. The practice will focus mainly on the teaching of English, although the student may have an opportunity to teach a second subject. 

**Prerequisite:** Student must be enrolled in BEd(TESOL)

**Postgraduate 700 Level Courses**

**LANGTCHG 704**

**15 Points**

**Language Assessment**

Introduces students to some fundamental issues and debates in the field of second language testing and assessment to familiarise them with different assessment options and to develop skills in devising their own assessment procedures.

**Restriction:** LANGTCHG 401

**LANGTCHG 710**

**15 Points**

**Task-based Language Teaching**

Examines research that has investigated task-based second language learning and the theoretical rationale for task-based language teaching. Also considers factors in the design of task-based syllabuses and methodological options for lessons based on tasks, and problems in implementation.

**Restriction:** LANGTCHG 402

**LANGTCHG 715**

**15 Points**

**Developing Academic Literacy**

Aims to help participants understand and develop their academic literacies. Focuses on texts involved in the research process, such as review articles, research paper proposals, dissertations and conference abstracts; makes extensive reference to findings from genre and corpus-based analyses; and includes conducting mini-analyses on the discourse in participants’ own disciplines.

**LANGTCHG 716**

**15 Points**

**Vocabulary Learning and Teaching**

Explores the role of vocabulary learning within a language teaching programme. It reviews research evidence on the nature of vocabulary and the processes involved in vocabulary learning, and considers how to facilitate the acquisition of vocabulary by second language learners both inside and outside the classroom.

**LANGTCHG 717**

**15 Points**

**Qualitative and Narrative Inquiry in Language Education**

Explores definitions of qualitative and narrative research as used in the field of applied linguistics, specifically in language teaching and learning. Focuses on approaches associated with the collection and analysis of qualitative and narrative text, particularly its content, structure and the context in which it was constructed. Participants will examine examples of research and produce and analyse their own written and spoken data.

**LANGTCHG 722**

**15 Points**

**Learner Language**

A study of learner language, including an introduction to the methods used to analyse both the content and linguistic form of learner language, a review of empirical research that has used these methods, and its pedagogical relevance.

**LANGTCHG 723**

**15 Points**

**Theories of Language Learning**

A critical examination of theories of second language learning grounded in linguistics, psycholinguistics, sociolinguistics and education. The course focuses on cognitive and social theories of second language acquisition, identifying commonalities and differences in the theories, and considering their pedagogical implications.

**LANGTCHG 724**

**15 Points**

**Curriculum Development for Language Teaching**

An overview of the key concepts in the language curriculum, syllabus design and methodology, followed by a critical evaluation of language curriculum with reference to various socio-cultural and political factors. 

**Restriction:** LANGTCHG 400

**LANGTCHG 729**

**15 Points**

**Practicum in Second/Foreign Language Learning**

An opportunity for students to obtain practical experience of language teaching by carrying out a series of guided observation tasks in a second/foreign language classroom and by planning, teaching and evaluating a number of lessons in the same classroom.

**LANGTCHG 731**

**15 Points**

**Second Language Reading and Writing**

Explores the role of reading and writing in second language acquisition by giving an overview of theories about learning to read and write in a new language as well as important concepts related to acquiring second language literacy. Various strategies and other considerations associated with teaching reading and writing in a second language are considered and analysed.

**LANGTCHG 732**

**15 Points**

**Applied Linguistics Research**

Aims to prepare students for their dissertation or thesis by providing an introduction to the basic ideas and concepts in applied linguistics research design. It also covers aspects of writing a proposal, ethical issues in research, and managing the research process.

**LANGTCHG 740**

**15 Points**

**Language Analysis for Teachers**

The study of structure of English through an analysis of the key concepts and features of English phonology, morphology, syntax and vocabulary from the perspective of second/foreign language teaching. 

**Restriction:** LANGTCHG 720

**LANGTCHG 741**

**15 Points**

**Second Language Course Design and Methodology**

The study of the theoretical bases of language course design and methodology. Examines how to carry out a needs analysis, different types of syllabus, theories
of language teaching and the historic development of teaching methods including communicative language teaching.

LANGTCHG 742 15 Points
Language Assessment
A critical examination of the principles of language assessment and evaluation and their applications to both teaching practice and research.

LANGTCHG 743 15 Points
Second Language Acquisition
A study of different theories of second language acquisition and research that have investigated both natural and instructed acquisition. The applications of theory and research to language pedagogy will be considered.

LANGTCHG 744 15 Points
Discourse Analysis
Considers different approaches to discourse analysis, for the analysis of language as text and for the incorporation of discourse analysis into language teaching.
Restriction: LANGTCHG 721

LANGTCHG 745 15 Points
Second Language Classroom Research
The findings of second language classroom research and the methods used in this research.
Restriction: LANGTCHG 728

LANGTCHG 746 15 Points
Materials Development and Evaluation
The principles and processes of designing and evaluating language teaching materials.
Restriction: LANGTCHG 726

LANGTCHG 747 15 Points
Individual Learner Differences and Second Language Learning
The findings of research into individual learner differences and their role in language learning: the quantitative and qualitative methods used in this research.
Restriction: LANGTCHG 711

LANGTCHG 748 15 Points
Bilingualism and Bilingual Education
Aspects of both individual and societal bilingualism especially for the analysis of issues in education, assessment and policy.
Restriction: LANGTCHG 709

LANGTCHG 749 15 Points
Sociolinguistics and Language Teaching
An examination of concepts and issues in sociolinguistics which are relevant to language teaching in practice, and of sociolinguistic research methods.
Restriction: LANGTCHG 714

LANGTCHG 750 15 Points
Language Planning and Policy
An examination of a number of approaches to the study of literacy and of the implications of these approaches for second language teaching and learning.

LANGTCHG 751 15 Points
Corpus Studies in Applied Linguistics
Covers the theoretical and practical aspects of using corpora to promote language learning. A major part of the course will focus on using corpora and text analysis tools to provide a description of language as it is used by different people for different purposes.

Once we have a good description of language usage, we can move on to consider the role of corpus studies in language teaching.
Restriction: LANGTCHG 713

LANGTCHG 752 15 Points
Computer Assisted Language Learning
Covers the theoretical and practical aspects of using technology to promote language learning. Includes culture and CALL, exercise authoring, CALL research, technology and the four skills, web-based language learning, computer-mediated communication, and CALL evaluation.
Restriction: LANGTCHG 719

LANGTCHG 754 15 Points
Special Topic: English for Specific Purposes
Considers theory and practice in developing language courses to meet the specific academic or work-related needs of adult learners. In particular, it focuses on analysis of target communication, needs analysis, issues and methodologies in ESP and ESP research. Uses the example of English for Specific Purposes but is relevant to the teaching of other languages for specific purposes as well.

LANGTCHG 755 15 Points
Special Topic: Creativity in Language Learning and Teaching
Examines the role creativity plays in language learning and teaching; reviews the work on creativity in various disciplines such as applied linguistics and language pedagogy, language teaching materials and approaches, and educational psychology; demonstrates and designs language learning activities and materials implementing the principles of creativity; and explores possible research projects that can be conducted by language teachers.

*Prerequisite: SPANISH 103*
LATINAM 201 15 Points
Latin American History and Culture Through Film
A journey through five moments of Latin American history and culture, from its creation as a region imagined through the gaze of colonialism, through the development of an independent, revolutionary Third Cinema, to the present when globalisation is critiqued from the periphery.
Prerequisite: 15 points from SPANISH 103, 105, 107, 200, 201, 277, 278, 319, 321, 377, 378, FTVMS 100, 101, 112

LATINAM 216 15 Points
Music, Politics and Social Change
A theorised study of the history of twentieth-century social movements in Latin America through its poetry and music, largely as expressed in popular forms. The major focus is on the political and cultural manifestations of these expressions as they respond to and instigate social change.
Prerequisite: 15 points from SPANISH 103, 105, 200, 201, 277, 278, 319, 321, 377, 378
Restriction: LATINAM 301, SPANISH 216

Stage III

LATINAM 301 15 Points
Music, Politics and Social Change
A theorised study of the history of twentieth-century social movements in Latin America through its poetry and music, largely as expressed in popular forms. The major focus is on the political and cultural manifestations of these expressions as they respond to and instigate social change.
Prerequisite: 15 points from SPANISH 103, 201, 211, POLITICS 234, 317, SPANISH 202, 211, 213, 306
Restriction: LATINAM 216, SPANISH 216

LATINAM 302 15 Points
Special Topic
Prerequisite: 15 points from HISTORY 231, LATINAM 201, 211, POLITICS 234, 317, SPANISH 202, 211, 213, 306

LATINAM 306 15 Points
Latin American Icons: The Political Economy of Otherness
An examination of the ways in which Latin America, as a place and a people, has served as a site of otherness and exoticism providing economic and symbolic capital for the consumption and pleasure of colonial, neo-colonial and neo-liberal powers. Latin American cultural studies texts offer students a way to read against the grain established by this process.
Prerequisite: 15 points from LATINAM 201, 216, SPANISH 201, 202, 205, 211, 213, 216, HISTORY 231, POLITICS 234
Restriction: SPANISH 306, 729

LATINAM 320 15 Points
Latin American Knowledges
An examination of new knowledges produced in Latin America that have influenced socio-political theory and global epistemological paradigms but are subalternised as art, culture, or politics. Therefore this course will examine the link between theory and practice in the creation of new knowledge.
Prerequisite: 15 points from LATINAM 201, 216, POLITICS 234, SOCIOL 210, SPANISH 202, 205
Restriction: SPANISH 720

LATINAM 325 15 Points
First Nations in Latin America
Analysis of the representation of first nations of Latin America in the context of struggles for self-determination under colonialism and in modern nation-states. Topics include: Latin American indigeneity, indigenous belief systems and mestizaje, nineteenth-century genocidal wars and foundational fictions celebrating modernisation, testimonials, written and visual texts of the last decade. Focuses on the study of self-representation and the role of mediators.
Prerequisite: 15 points from LATINAM 201, 216, SPANISH 201, 202, 205, 211, 213, 216, HISTORY 231, POLITICS 234
Restriction: SPANISH 306, 729

LATINAM 350 15 Points
Directed Reading and Research
Supervised research projects.
Prerequisite: 75 points in Latin American Studies at Stages I and II, and permission of Head of Department

Linguistics

Stage I

LINGUIST 100 15 Points
Introduction to Linguistics
An introduction to the main areas of linguistics: the production and function of sounds in language (phonetics and phonology), word structure and word formation (morphology), the principles of grammar through a study of sentence structure (syntax), and various aspects of meaning (semantics). The course is a self-contained introduction and assumes no prior knowledge of linguistics or language study.
Restriction: 175.106, LINGUIST 103

LINGUIST 101 15 Points
LINGUIST 101G
Language and Society
Language in its social and cultural context. Topics may include language variation, language and gender, language and social identity, language contact, language in the media, language maintenance.

LINGUIST 102 15 Points
Languages of the Pacific
An introduction to the linguistics of the Pacific Islands (Melanesia, Micronesia and Polynesia), Australia and New Guinea. The topics covered include: principles of historical change, the social use of language, oral literature and the organisation of linguistic systems of sound, meaning and grammar. Pigidins and Creoles are explored, as is the interaction of language with cultural institutions and conceptual systems.

LINGUIST 103 15 Points
Introduction to English Linguistics
An introduction to the core areas of language study. Topics include: how sounds are produced, the basic structure of the English sound system, primary word formation processes in English, the rules for English sentence structure, and the fundamentals of word meaning. This course serves as an entry point into Stage II Linguistics, and provides an excellent background for students studying languages including English.
Restriction: 175.106, LINGUIST 100

Stage II

LINGUIST 200 15 Points
Syntax
Continues on from LINGUIST 100 or 103 and consists
of a formal and a functional part, providing problems and exercises in syntactic analysis, as well as an introduction to grammatical theories and types of grammatical system.  
**Prerequisite:** LINGUIST 100 or 103  

**LINGUIST 201**  
**Phonetics and Phonology**  
Includes a survey of speech sounds in the world’s languages, an overview of speech production and perception, and an introduction to how these sounds are organised into language. Includes a practical component in which theories are applied to language data.  
**Prerequisite:** LINGUIST 100 or 103  

**LINGUIST 202**  
**Language Change**  
Introduces long-term historical trends, types of language change, language families and comparative reconstruction.  
**Prerequisite:** LINGUIST 100 or 103  
**Restriction:** LINGUIST 308  

**LINGUIST 203**  
**Applied English Grammar**  
Covers the different types of sentences in English, with special attention to the relationship between grammar and meaning, tense, aspect and voice: their roles in texts, such as foregrounding, backgrounding and highlighting information, and introducing new information. Students will be shown how to distinguish standard and non-standard varieties of written English, and how to judge if written sentences are effective, appropriate and grammatical.  
**Prerequisite:** Any 15 points at Stage I  

**LINGUIST 206**  
**Semantics and Pragmatics**  
An introduction to a wide range of issues of contemporary relevance to the study of meaning. The semantics part includes topics in structural, truth-conditional and cognitive semantics. The pragmatics part covers some of the basic topics in pragmatics.  
**Prerequisite:** LINGUIST 100 or 103  
**Restriction:** LINGUIST 302  

**Stage III**  

**LINGUIST 300**  
**Syntax: Function and Typology**  
A continuation of the functional-typological part of LINGUIST 200. Examination of selected topics, such as grammatical relations, relative clauses, causatives, complementation, information packaging, typology and universals.  
**Prerequisite:** LINGUIST 200  

**LINGUIST 301**  
**Advanced Phonology**  
A continuation of LINGUIST 201, introducing a more theoretical approach to phonology including distinctive feature theory, syllable theory, metrical phonology, autosegmental phonology, lexical phonology. Issues are explored in the context of a constraint-based approach to phonology. Includes a practical component in which theories are applied to language data.  
**Prerequisite:** LINGUIST 201  

**LINGUIST 303**  
**Conversational Analysis**  
An introduction to the close and detailed observation of ordinary conversational interaction. Topics include the interactional nature of conversation, how turn taking and topic selection are organised, the role of narratives in conversation and how they are structured, how conversational repair is organised, how various expressive techniques are utilised, and the ways that conversation is used to accomplish social actions.  
**Prerequisite:** Any 30 points in the BA at Stage II  

**LINGUIST 305**  
**Child Language Acquisition**  
Examines the patterns and mechanisms by which children acquire knowledge of their native language and assesses a number of current theories which have been developed to explain the process.  
**Prerequisite:** LINGUIST 200 or 201 or 203  

**LINGUIST 306**  
**Polynesian Comparative Linguistics**  
Comparative and historical study of the sound systems, grammar, and vocabulary of the Polynesian languages.  
**Prerequisite:** LINGUIST 202 or MĀORI 201 or SAMOAN 201 or 202  

**LINGUIST 308**  
**Language Change**  
Introduces long-term historical trends, types of language change, language families and comparative reconstruction.  
**Prerequisite:** LINGUIST 200 and 201  
**Restriction:** LINGUIST 202  

**LINGUIST 310**  
**Linguistics Essays Course**  
Students undertake supervised research.  
**Prerequisite:** Permission of Head of Department  

**LINGUIST 312**  
**Language Origin and Evolution**  
Investigates the origin of human language, drawing on a range of evidence and arguments from psychology, anthropology, and primatology. Addresses questions such as when and how language evolved, whether early language was primarily verbal, gestural or both, what aspects of language structure and language capability are innate, and whether language developed gradually or was a sudden mutation.  
**Prerequisite:** LINGUIST 200  

**LINGUIST 313**  
**Lexical Functional Grammar**  
LFG is a psycho-linguistically based, lexically driven universal grammar in which semantic, syntactic and configurational relationships are analysed as related but partially independent levels of organisation. This makes LFG suited to analysis of languages of all types. LFG is also widely implemented in language synthesis, automatic parsing, SLA and creole studies. Understanding of word classes and constituency is assumed.  
**Prerequisite:** LINGUIST 200 or 203  

**LINGUIST 320**  
**Topics in Pragmatics**  
Pragmatics is the systematic study of language in use and is a rapidly developing discipline in linguistics. This course will give a critical survey of the central topics and the latest developments of pragmatics. The domain of pragmatics, implicature, presupposition, speech act and deixis will be among the issues dealt with in individual lectures.  
**Prerequisite:** LINGUIST 200 or 206
LINGUIST 321 15 Points
Gender and Language
Surveys recent and classic work in language and
gender from a sociolinguistic perspective. It covers
issues such as: how the category "gender" has
developed over time in sociolinguistics; what the
relationship is between gender identities and sexual
identities; how the ways we talk and act intersect with
non-linguistic behaviour to express gender identities.
Prerequisite: LINGUIST 101 or 103 and 30 points at Stage II in Linguistics

LINGUIST 322 15 Points
Special Topic
Prerequisite: 30 points at Stage II in Linguistics

LINGUIST 323 15 Points
Sociolinguistic Variation
Examines the methods and theory behind the study of
synchonous language variation and its relationship to
diachronic change. Students read a wide range of
studies exploring different linguistic variables and
apply their understanding of the theory and methods
to the extraction and analysis of data from corpora of
spontaneous speech that are provided.
Prerequisite: 15 points from LINGUIST 100, 101, 103 and 30 points at Stage II in Linguistics (either LINGUIST 200 or LINGUIST 201 strongly recommended)

Postgraduate 700 Level Courses

LINGUIST 700 15 Points
Directed Study

LINGUIST 707 30 Points
LINGUIST 707A 15 Points
LINGUIST 707B 15 Points
Field Methods
Description and analysis of an unfamiliar language,
based on data collected by the students. The class
meets with a speaker of that language, and data
are collected through elicitation and texts. Students
analyse the structure of the language, focusing on
both phonology and syntax.
Prerequisite: LINGUIST 201 and either LINGUIST 300 or 313
To complete this course students must enrol in LINGUIST 707 A and B, or LINGUIST 707

LINGUIST 709 15 Points
Linguistic Research
An introduction to research methods and practices in
Linguistics. The course is intended to develop research skills through a combination of lectures and practicum sessions, and will include the development and completion of a research project.

LINGUIST 710 15 Points
Fundamentals of Linguistics
A comprehensive survey of current theory in selected
topics in Linguistics, especially phonetics/phonology,
graham, semantics, and pragmatics.

LINGUIST 720 15 Points
Functional-typological Syntax
Cross-linguistic examination of selected topics, such as
lexical categories, passives, transitivity, serial
verb constructions, head-marking and dependent-
marking, and iconicity. Consideration will be given both
to differences among languages and to recurrent
patterns.

LINGUIST 721 15 Points
Formal Syntax
Formal theories of syntax, generative grammar, and
current topics of interest to students. This could
include: LFG, Minimalism, the DP analysis, theories of
argument structure, and/or formal models of
language processing.

LINGUIST 722 15 Points
Phonology
A range of topics from the field of non-linear phonology,
including autosegmental phonology, syllable theory,
feature geometry and CV phonology.
Prerequisite: LINGUIST 301

LINGUIST 724 15 Points
Semantics and Pragmatics
An introduction to logic and an exploration of the
interaction between semantics, pragmatics, and
grammar. Topics include: event structure, aspect,
tense, mood and modality, case and roles, transitivity
and information packaging, and contrasts between
English and other languages.
Prerequisite: LINGUIST 206 or 302, or equivalent

LINGUIST 725 15 Points
Mixed Languages
Language types (pidgins, creoles and ‘mixed’ or
‘intertwined’ languages) that are extreme results of
language contact. Major topics will include: processes
of formation, universalist and substratist theories,
and the typology of such languages.

LINGUIST 726 15 Points
Sociolinguistics: Variation and Change
Overview of major theories and practice in
sociolinguistics today. Emphasis on the connections
between ongoing variation in the speech community
and language change. Issues of individual agency
and social construction of identity are discussed as
well as different methods for modelling variation and
change in society.

LINGUIST 727 15 Points
Interactional Sociolinguistics
The analysis of small group interaction and the ways
it is structured by sociocultural forces, social roles,
and personal identity. Cross-cultural differences in
conversational behaviour and the influence on
language use of patterns of status and solidarity, and
institutional demands are approached through an
examination of the dynamic processes of talk itself.

LINGUIST 730 15 Points
Discourse and Grammar
The relationship between grammar and language
use in naturally occurring written and spoken
language, first in discourse-functional grammar,
where analysis focuses on the discourse functions of
particular grammatical structures; and secondly in
interactional grammar, which investigates the syntax
of conversational language, in order to develop a new
understanding of the nature of syntax, as shaped by
the pressures of interaction.
LINGUIST 731 15 Points
Historical Linguistics
Current topics in historical linguistics, such as: theories of change in sound systems; syntactic change and syntactic reconstruction; grammaticalisation; distant genetic relationships and comparative methods.

LINGUIST 739 15 Points
Directed Study
Directed reading and individual study course designed in consultation with appropriate staff according to the field of research.

LINGUIST 741 15 Points
Special Topic: Grammaticalisation
The following general topics will be covered: nature of grammaticalisation; does grammaticalisation represent a unique type of language change? Directionality of change; sources and targets of changes in grammaticalisation.

LINGUIST 743 15 Points
Special Topic: Analysing Variation
Students will develop skills and understanding in the methods and theory of language variation. A large part of the course will be devoted to independent research of a variable/variables in existing corpora (available from the department).

Māori Studies

Stage I
MĀORI 101 15 Points
MĀORI 101G 15 Points
Introduction to Written Māori
An introduction to listening, reading, writing and translation techniques used in the composition, reading and understanding of basic Māori. Designed for students with little or no knowledge of the language, and for those with some fluency wishing to understand simple sentence structure and composition.
Restriction: 260.105. May not be taken if a more advanced language acquisition course in this subject has previously been passed

MĀORI 103 15 Points
Introduction to Spoken Māori
An introduction to spoken Māori for those with no previous knowledge of the language. Concentrates on the acquisition of aural and oral skills, developing the ability to understand and speak Māori. It is recommended that students also enrol in MĀORI 101.
Restriction: MĀORI 106. May not be taken if a more advanced language acquisition course in this subject has previously been passed
MĀORI 104 15 Points
Reo Tuahahi Kōrero 1
The development of skills in speaking, writing and hearing language. This course is intended for students with a good command of Māori.
Prerequisite: MĀORI 103, 106

MĀORI 130 15 Points
MĀORI 130G
Te Ao Māori: The Māori World
An introduction to Māori analyses of topics that are often discussed and sometimes controversial, and that continue to shape contemporary life in New Zealand. Topics include aspects of world view, philosophy and social organisation; the Declaration of Independence, the Treaty of Waitangi and European immigration; and contemporary issues including Treaty claims, ownership of the foreshore and seabed and constitutional issues.

MĀORI 170 15 Points
Kaupapa Hōu: Special Topic

MĀORI 190 15 Points
Kapa Haka 1
An introductory course for beginners or others who have only a minimal knowledge of traditional and contemporary Māori performing arts. The course is strongly practical. It will stress the fundamentals of performance and the various social, cultural and political settings that give it meaning.

MĀORI 191 15 Points
Kaupapa Hōu: Special Topic

Stage II

MĀORI 201 15 Points
Whakatakoto Reo Tuarua / Intermediate Written Māori
Follows on from MĀORI 101. Techniques in listening, reading, writing and translation are further developed.
Prerequisite: MĀORI 101 or 105
Restriction: 260.205. May not be taken if a more advanced language acquisition course in this subject has previously been passed

MĀORI 203 15 Points
Intermediate Spoken Māori
Continuing the development of language skills that will facilitate students’ own communicative ability.
Prerequisite: MĀORI 103
Restriction: 260.202, MĀORI 206. May not be taken if a more advanced language acquisition course in this subject has previously been passed

MĀORI 204 15 Points
Reo Tuarua Kōrero II
Further development of listening and oral skills. This course follows on from MĀORI 104 and is structured to advance listening and oral skills.
Prerequisite: MĀORI 104
Restriction: MĀORI 203, 206

MĀORI 230 15 Points
Te Ao Hurihuri / Te Tiriti o Waitangi
Follows on from MĀORI 130, examining aspects of contemporary Māori society that continue to challenge and mould contemporary life in New Zealand. Topics are covered from a Māori perspective and include the Treaty of Waitangi, the role of the churches in colonisation, language loss and revitalisation, the modern protest movements and the influence of the issues raised on Māori-Pākehā relations.
Prerequisite: MĀORI 130 or 60 points passed

MĀORI 240 15 Points
Te Kete Aronui
Knowledge recovery of past traditions and practices relating to Māori material culture with a strong emphasis on developing practical skills and research that involves focus on the use of stone, bone, wood, shell and some fibre.
Prerequisite: MĀORI 130 or ARTHIST 102, or 30 points at Stage I in Museums and Cultural Heritage, or Departmental approval

MĀORI 241 15 Points
Te Aho Tahuhi
Māori fibre arts as a continuum from pre-European times with reference to the materials, practices and traditions of artefact manufacture. Includes individual research and practical projects.
Prerequisite: 60 points passed in any subject

MĀORI 270 15 Points
Kaupapa Hōu: Special Topic
MĀORI 271 15 Points
Māori and the Media / Te Ao Pahō
Examines the interrelationship between Māori and media. The course falls into two main strands: the representation of Māori and te ao Māori across a range of mainstream media, both historic and contemporary, and media made by Māori, for both a general audience and for a Māori audience. The course will draw on theories of political economy, postcolonialism and Kaupapa Māori.
Prerequisite: Any 30 points passed
Restriction: MĀORI 370

MĀORI 291 15 Points
Kaupapa Hōu: Special Topic
MĀORI 292 15 Points
Kapa Haka 2
Examines traditional and contemporary Māori performing arts and covers all aspects of Māori performance including whakaeke (entry), waiata mōteatea, waiata-ā-ringa (action song), poi, haka, whakawātea (exit). There is a strong practical element to the course as well as an analysis of social, cultural and political contexts of the songs and performance.
Prerequisite: MĀORI 190

MĀORI 293 15 Points
Kaupapa Hōu: Special Topic

Stage III

MĀORI 301 15 Points
Reo Māori Tuhituhi
Follows on from MĀORI 201. Includes a survey of the theoretical orientations to the study of Māori language, the effects of colonisation on the language and efforts to revitalise it once it became endangered. Also includes practical exercises in transcription and translation of selected recordings and texts, and grammatical analysis.
Prerequisite: MĀORI 201

MĀORI 302 15 Points
Reo Māori Kōrero
Ko tenei te pepa whakahouhoo ake i ngā tau ka taha. Ko te whaianga, ko te whanake i ngā ture whakatakotoranga o te Reo Māori, mai i ngā tuhinga me ngā kōrero Māori kia pai ai te puta mai o te kōrero. Mai ō hoki i nga tuhinga Māori, ka atā tirohia te ao o te Māori, te ataaahutanga o te whakahauhutanga mai o te kōrero i roto i te Reo Māori.
Prerequisite: 15 points from MĀORI 203, 204, 206
MĀORI 311 15 Points
Wānanga and Whaikōrero
The knowledge systems and practices of traditional schools of learning and their application in modern Māori society. The course includes a study of the structure, language and practice of Māori oratory. Prerequisite: MĀORI 206 or Departmental approval required

MĀORI 320 15 Points
Mātauranga: Māori Knowledge
Explores the various facets of knowledge. This includes genealogy – cosmic, theogenic and anthropogenic (whakapapa), traditional songs (mōteatea), proverbs (whakataukī). The aim is to help develop an understanding of a Māori world view and a te ao mārama paradigm through studying Māori epistemology. Prerequisite: 15 points from MĀORI 201, 203, 206

MĀORI 330 15 Points
Te Ao Hōu / Contemporary Māori Issues
An examination of contemporary issues and debates around Māori identity as indigenous peoples in the twenty-first century. Various aspects of Māori political, cultural, social and economic development in the twenty-first century will be discussed. Prerequisite: 30 points at Stage II

MĀORI 335 15 Points
Mana Taketake / Indigenous Sovereignty and Public Policy
Examines the nature of the claims that indigenous minorities are making and the political strategies that they use to pursue their self-determining agendas in both domestic and international arenas. Concepts of indigenous and human rights, redistributive justice and others are discussed and explored in relation to contemporary demands of some indigenous peoples. Prerequisite: 30 points at Stage II

MĀORI 340 15 Points
Te Whare Pora
Research and teaching of practical skills to extend students’ knowledge of tukutuku, raranga, whatu, tāniko, feather attachment and dyeing techniques. Students are expected to attend a field-school. Prerequisite: MĀORI 240 or 241 or Departmental approval, or 30 points at Stage II in Museums and Cultural Heritage and Departmental approval

MĀORI 342 15 Points
Te Ao Kōhatu
Develops skills and research methods introduced in Te Kete Aronui with an emphasis on recovery of knowledge relating to traditions of stone, bone, wood, shell and fibre use by Māori. Prerequisite: MĀORI 240 or 241 or Departmental approval, or 30 points at Stage II in Museums and Cultural Heritage and Departmental approval

MĀORI 370 15 Points
Māori and the Media / Te Ao Pāhō
Examines the interrelationship between Māori and media. The course falls into two main strands: the representation of Māori and te ao Māori across a range of mainstream media, both historic and contemporary, and media made by Māori, for both a general audience and for a Māori audience. The course will draw on theories of political economy, postcolonialism and Kaupapa Māori. Prerequisite: 30 points passed at Stage II in any subject

Postgraduate 700 Level Courses

Philosophy

Stage I

PHIL 100 15 Points
Mind, Knowledge, and Reality
Metaphysics deals with fundamental problems about the nature of the world and human beings, for example, questions about the existence of God, the nature of time, the relationship between mind and body and the nature of identity and the self. The theory of knowledge studies the sources, limits, and justification of human knowledge and understanding as distinct from opinion or belief.

Restriction: 280.150

PHIL 101 15 Points
Introduction to Logic
Logic is the study of argument. This course aims to provide an understanding of central logical notions, such as consistency and inconsistency, logical truth, and, most importantly, what it means for an argument to be valid or invalid, sound or unsound. The course examines two main logical systems, propositional and predicate logic, and shows how these formal systems are used to analyse and evaluate arguments.

Restriction: 280.151

PHIL 102 15 Points
Introduction to Ethics
The philosophical study of ethics provides theoretical frameworks for thinking about questions such as ‘What makes an action right or wrong?’, and ‘What kind of person should I try to be?’ Several theories will be explored, evaluated, and applied to practical moral issues such as abortion, our treatment of other animals, tolerance regarding cultural differences, and obligations to future generations.

Restriction: HLTHPSYC 102, PSYCHIAT 102

PHIL 103 15 Points
Freedom, Rights and Justice
Considers various questions concerning the relation between individuals and political communities such as: What principles of justice should communities adopt? What are rights? What limits can legitimately be placed on individual liberty? What is the source and nature of citizens’ obligations to obey the law? What makes a decision procedure democratic and why does it matter? These questions are considered in relation to the New Zealand context.

PHIL 105 15 Points
PHIL 105G 15 Points
Critical Thinking
Dialogue, argument and discussion are analysed. Distinctions are drawn between persuasive, logically good and materially good arguments. The focus is on well reasoned persuasive dialogue, and mistakes in persuasive reasoning. Topics include the point of an argument, strength of arguments, fallacious reasoning, relevance of reasons, and burden of proof.

PHIL 152 15 Points
Philosophy and Theories of Human Nature
What is human nature? The course covers competing conceptions of human nature, found in religious, philosophical and political thought, alongside theories that deny the existence of a human nature. Philosophers discussed may include: Aristotle, Descartes, Nietzsche, Plato, Hobbes, Marx, Sartre and Christian thinkers.

Stage II

PHIL 200 15 Points
Philosophy of Mind
There are many philosophical problems concerning mental lives (in particular, human mental lives), how they are constituted, and what makes them possible – problems which have generated a vast literature and diverse important philosophical theories.
Theories introduced and critically examined will include dualisms, but will mainly comprise forms of physicalism such as philosophical behaviourism, the identity theory and especially functionalist theories. Prerequisite: 30 points in Philosophy, or any 60 points
Restriction: PHIL 320

**PHIL 202 15 Points**

**Philosophy of Language**
The components of language and its use (expressions, utterances, speech acts etc); theories of language and its nature (including structuralism, Chomskyan psycholinguistics and platonism); linguistic meaning and its connection with other sorts of meaning (Grice on meaning, a theory of reference, truth-conditional theories of meaning etc); the connection between language, thought and reality.
Prerequisite: 30 points in Philosophy or Linguistics
Restriction: PHIL 322

**PHIL 204 15 Points**

**Greek Philosophy**
An introduction to some of the important figures in ancient philosophy and the issues with which they were concerned. The work of the Presocratics, Plato, and Aristotle will be explored, with a detailed discussion of the philosophical system of either Plato or Aristotle and its importance in the history of philosophy.
Prerequisite: 30 points in Philosophy, or 15 points from Philosophy and 15 points from CLASSICS 120, 130, 240, 250, or 260

**PHIL 205 15 Points**

**Community, Society and Rights**
Addresses a variety of topics in political philosophy such as: political theories of Locke and Hobbes; the nature of rights and rights-holders; sovereignty; strategies for securing stable and just societies between people with significantly different moral, political and cultural views; and the relationship between individuals and communities. Topics will be related to contemporary political issues in New Zealand and, in particular, to the Treaty of Waitangi.
Prerequisite: 30 points in Philosophy, or 30 points from Political Studies

**PHIL 207 15 Points**

**Philosophy of Religion**
A study of the relationship between reason and faith: is belief in the Judaeo-Christian God reasonable? Topics include: the problem of evil, the meaningfulness of religious language, alternative concepts of God, Hume on miracles, and Kierkegaard and William James on faith and reason.
Prerequisite: 30 points in Philosophy
Restriction: PHIL 327

**PHIL 209 15 Points**

**Schopenhauer and Nietzsche**
A study of the philosophies of Arthur Schopenhauer (1788-1860) and Friedrich Nietzsche (1844-1900), focusing on their respective attitudes towards the value of life and the meaning of suffering. Schopenhauer's emphasis upon transcendent modes of awareness will be compared with Nietzsche's more down-to-earth existentialism, in light of their views on the redeeming value of artistic and aesthetic experience.
Prerequisite: 30 points in Philosophy or EUROPEAN 100 and 15 points in Philosophy
Restriction: PHIL 329

**PHIL 210 15 Points**

**Applied Ethics**
Philosophical analysis and discussion of contemporary moral issues, such as abortion, euthanasia, reverse discrimination, the ethics of charity and our treatment of animals.

Political Studies

Stage I

POLITICS 106 15 Points
International Relations
An introduction to the study of international relations. The focus is on how international organisations, states and non-state actors raise and address global challenges such as security and human insecurity, humanitarian intervention, global trade and finance, development and poverty, environmental degradation, warfare, and respect for human rights. The course is informed by and introduces a range of international relations theories.
Restriction: 285.111

POLITICS 107 15 Points

POLITICS 107G 15 Points
New Zealand Politics
An examination of who governs New Zealand and in whose interests. Topics include: government formation and functioning under MMP, political leadership, national identity, parties and elections, the role of the media in election campaigns, the place of Māori within the political system, and business and politics.

POLITICS 109 15 Points
Foundations of Western Politics and Law
An examination, via the works of selected major European thinkers from Ancient Greece to late nineteenth-century Britain, of ideas central to the western tradition of political thought: law, liberty, subjection, rights, justice, citizenship, authority, the rights of women, kingship, republicanism, and the right to resist governments. Thinkers studied include: Plato, Machiavelli, Hobbes, Locke, Rousseau, Wollstonecraft, Bentham, Mill and Marx.

POLITICS 113 15 Points
Politics and the Media
An examination of the political importance of media and communication. Introduces students to theories and research dealing with the role of mass-mediated messages, images, symbols and opinions in political life. Topics include: the role of media in democracy, media and power relationships, the telecommunications revolution and its political consequences, newspaper and television constructions of political events, leaders, election campaigns, scandals, crises, foreign enemies.

Stage II

POLITICS 209 15 Points
Modern Political Thought
A survey of contemporary paradigms in political thought that shape our ideas about politics and society. We will examine different varieties of liberalism, communitarianism, multiculturalism, feminism, socialism and utilitarianism, and the ways they influence our beliefs about justice, liberty, equality, the legitimacy of state regulation, and our duties as citizens towards each other and to the wider global community.
Prerequisite: 30 points at Stage I in Political Studies, or 15 points at Stage I in Political Studies and EUROPEAN 100, or 15 points at Stage I in Political Studies and 15 points in Philosophy
POLITICS 213
Gender, Politics and International Relations
An overview of feminist perspectives in political science and international relations. New gendered theories have challenged the assumptions of mainstream political analysis. These theories are applied to issues such as democracy and representation, leadership and policy making, human rights, conflict and security, and the emergence of transnational feminist networks and their potential to affect power shifts in local, national and international politics.
Prerequisite: Any 30 points at Stage I in Political Studies and/or Women’s Studies or 60 points in BA, or Departmental approval required
Restriction: POLITICS 353

POLITICS 218

Comparative Election Campaigns
Comparative research on election campaigns reveals
increasing electoral volatility and the growing
significance of the media to voter choice. Political
Campaigning has become nearly continuous between
elections, and insights from campaign research can
illuminate trends in political communication more
generally. What do citizens bring to, seek, and take
away from televised debates, news stories, internet
chat groups and political advertisements?

POLITICS 735  15 Points
Policy, Knowledge and Power
The focusing question for this course is ‘What constitutes good policy-making’? This question is
examined from four competing perspectives which emphasise technical expertise, bargaining,
negotiation and brokerage between conflicting interests and advocacy, coalitions, the usage of
market-like mechanisms and disciplines, and models of participatory democracy applied to policy-making settings. In doing so, themes of knowledge, rationality, legitimacy and power are examined.

Examines the politics of conflict and post conflict states in Southeast and South Asia. By examining the global comparative literature and cases in the region, students will learn to carry out two policy-relevant tasks: identify common causes of violence to help identify conflict-prone areas and to assess which policies of prevention and peace-building work best in different contexts.

**POLITICS 771**  
**Special Topic**  

**POLITICS 772**  
**Special Topic: International Political Economy**  
Compares models of capitalist industrial development in their international context. It asks the questions: What explains national differences in the choice and outcome of policies in response to common external challenges brought about by increased economic integration and openness? And what impact, both positive and negative, do national choices have on other states and the international system generally? The neo-liberal model and its variants are given close attention, with exploration of illustrative case studies from East Asia, Western Europe, and North America, followed by assessments as to which is adapting best to political and economic globalisation. Two central political issues are examined: first, domestic political debates generated by the tensions between continuity and change in national political economies in response to new competitive pressures from the international political economy, particularly the phenomenon of globalisation, and Second, intergovernmental disputes generated by states’ differing adaptations and how these disputes are managed by diplomacy and international institutions.

Students will learn EP Scheduling, budgeting, safety management, casting and general production management skills to aid them in the production process and be introduced to the process of ‘creative producing’, including copyright purchasing, identifying appropriate and likely funding sources and market positioning.

*Restriction: FTVMS 754*

**SCREEN 705**  
15 Points

**Screenwriting**

Considers the short film script with a focus on dramatic writing. Studies a range of short films as a way of understanding this aesthetic form. Designed as a high-intensity, immersion experience in the principles of scriptwriting. Students will write two short scripts beginning with a 2-minute script with minimal dialogue and complete the course with a fully developed 10-minute script for a short film.

**Advanced Drama Directing (Screen)**

Focuses on the directing of actors for screen, and the relationship between this and blocking for camera. Students direct in front of the class and create a short piece of work as a group using improvisation. Students first focus on directing and presenting a 10-minute excerpt from a play and then direct and edit an original dramatic short film of 8-10 minutes. Crewing on fellow students’ projects is a compulsory requirement.

*Prerequisite: SCREEN 701  
Restriction: FTVMS 752, SCREEN 703*

**SCREEN 713**  
30 Points

**Advanced Documentary Directing**

Students complete a major treatment/script, an interview exercise, an editing exercise, and a completed documentary of 10-12 minutes. For the latter project, the course convener functions like an executive producer, overseeing and critiquing the documentaries as they progress. Emphasis is
placed on aesthetic and formal approaches to the documentary and the class will draw extensively on documentary history.  
**Prerequisite:** SCREEN 701  
**Restriction:** FTVMS 753, SCREEN 704

**SCREEN 714**  
**Advanced Screenwriting: Drama**  
Focuses on screenplay writing for feature films. Through a combination of lectures and workshops, students will take individual feature-length projects from pitch to step outline. The course emphasises plot, structure, character, and dialogue. Students will also gain skills in analysing screenplays and writing treatments.  
**Prerequisite:** SCREEN 705 or equivalent  
**Restriction:** FTVMS 759, SCREEN 706

**SCREEN 715**  
**Directed Study**  
Directed research on a selected topic.

**SCREEN 797A**  
**Production Project**  
The production of a substantial project in which the student specialises as director, writer, or producer completing either a documentary (under 30 minutes), a short dramatic film (10-15 minutes) or a feature length screenplay (80-110 pages). Students are required to attend a seminar series conducted by academic staff and industry practitioners in Semester One. Crewing on fellow students’ projects is also required.  
**Prerequisite:** Departmental approval  
**Restriction:** FTVMS 776, SCREEN 720  
To complete this course students must enrol in SCREEN 797 A and B

### Social Science for Public Health

**Stage II**

**SOCSCIPH 200**  
**Social Science for Health**  
Explores diversity in health knowledges, offers an overview of current health trends and systems with special focus on New Zealand and the Pacific, examines the contributions of social science disciplines to analysis of health including key theoretical approaches, and applies interdisciplinary analytical models to health.  
**Prerequisite:** 30 points at Stage I in Health Social Sciences or Social Science for Public Health, or 60 points passed  
**Restriction:** HLTHSOC 200

**Stage III**

**SOCSCIPH 300**  
**Current Debates in Health and Health Policy**  
Examines the recent histories of central intellectual debates in health and health policy and their relevance for and in the New Zealand and Pacific contexts. These may consist of the following: the ‘medicalisation’ of social issues, the ‘socialisation’ of medical issues, cross-national health policy analysis, the rationing of health resources (global and local perspectives), defining and measuring health outcomes (accountability and responsibility in health service delivery), health service management (medics or managers).  
**Prerequisite:** HLTHSOC 200 or SOCSCIPH 200, or 120 points passed  
**Restriction:** HLTHSOC 300

### Postgraduate 700 Level Courses

**SOCSCRES 701**  
**Research Process in Social Sciences**  
Analysis and discussion of the nature and issues of the research process including: research paradigms and strategies; the identification of research topics and questions; the review and critique of literature; a survey of research methodologies and when it is appropriate to use them; the development of funding applications: ethical requirements for research, including awareness of Māori research protocols; data analysis; writing of research reports and theses.  
**Restriction:** SOCIOL 718

**SOCSCRES 702**  
**Quantitative Research Methods**  
A range of quantitative research methods in the social sciences for students who have little research background, but are planning to do research in their workplace or empirical thesis/dissertation work. Students will become familiar with underlying theory and current best practice in quantitative research through discussion of topics including measurement, design (including survey design), and computer-based data analysis.  
**Restriction:** ARTSGEN 751

**SOCSCRES 703**  
**Qualitative Research Methods**  
Qualitative research methods in the social sciences for students who are planning to do research in their workplace or empirical thesis/dissertation work. Students will become familiar with current theory and practice in the areas of archival research, participant observation, interview and focus group methods, as well as transcription and analysis. Experience using analytical software, such as Nvivo, is a major focus.

To complete this course students must enrol in SOCSCRES 760 A and B, or SOCSCRES 760

### Sociology

**Stage I**

**SOCIOL 100**  
**Issues and Themes in Sociology**  
Introduction to sociology as a discipline and a review of some of its internal debates. Topics include: social class, gender, globalisation, power, sexual identity and family. Draws on material from a range of societies.
SOCIO 101 15 Points
SOCIO 101G 15 Points
Understanding Aotearoa New Zealand
Provides an introduction to the sociological analysis of New Zealand society. Looks at familiar events, institutions, social processes from a sociological point of view and offers ways to understand them in new and different ways. Focuses on the structure of New Zealand society and on social and political changes which affect the lives of New Zealanders and shape their society.
Restriction: 315.104

SOCIO 102 15 Points
Becoming Modern
Sociology is a modern discipline, born of the ‘dual revolution’. French political experience between 1789 and 1871, and British industrialisation are studied to explore the nature of modernity. And hence, of course, why sociology takes its current intellectual shape.

SOCIO 103 15 Points
Social Policy, Social Justice
Provides an overview of key contemporary social policy issues within the context of globalising economic processes and continuing gendered and racialised divisions. Discusses the way in which debates around social policy are constructed and the implications this has for social justice. Case studies may include food and health, technology, indigeneity and children.

SOCIO 105 15 Points
Cultural Studies and Society
A cultural studies approach to social life focuses on the way we experience the world, taking account of what we see, what we hear, what we consume and how we communicate. This course looks at how our lives are influenced by flows of images and objects around the world, and tracks the ways that global and local processes impact on each other.

SOCIO 106 15 Points
Sociology for Auckland
Auckland is in New Zealand but not always of New Zealand. By studying differences in class, ethnicity, gender, sexual orientation and other social factors, what makes Auckland ‘special’ is explored; its own particular place(s) within New Zealand, a city suffering (and enjoying) an uneasy relationship with the rest of this country and beyond.

Stage II

SOCIO 200 15 Points
Theory and Society
An introduction to the major themes of social theory. The focus is on the analyses of modern society to be found in the works of classical and contemporary social analysts.
Prerequisite: 30 points at Stage I in Sociology or 15 points at Stage I in Sociology with a minimum B+ pass

SOCIO 201 15 Points
Social Research: An Introduction
An introduction to social research through an examination of both qualitative and quantitative approaches.
Prerequisite: 30 points at Stage I in Sociology or 15 points at Stage I in Sociology with a minimum B+ pass, or 30 points passed in Stage I courses listed for Social Science for Public Health, or 15 points at Stage I in Sociology and 15 points from MĀORI 130, PHIL 103, POLITICS 109

SOCIO 208 15 Points
Work and Leisure
Examines the social aspects of work and leisure. Particular attention is paid to the phenomena of surveillance and simulation and their impact on work and leisure, including control and resistance. These developments are crucial to understanding the ‘big issues’ of globalisation, restructuring and new technologies. Course material is drawn from international literatures and is grounded in an understanding of contemporary New Zealand.
Prerequisite: 30 points at Stage I in Sociology or 15 points at Stage I in Sociology with a minimum B+ pass

SOCIO 210 15 Points
Colonisation, Globalisation and Development
Charts the political, economic and ecological realities of imperialism, colonisation, globalisation, aid and development up to and including the structural adjustment and ‘inclusive’ neoliberalism of the IMF/World Bank, and the rise of peace, security and state building. It pays particular attention to the violence, security, gender, and the environment in these contexts.
Prerequisite: 30 points at Stage I in Sociology or 15 points at Stage I in Sociology with a minimum B+ pass or LATINAM 100 or SPANISH 103

SOCIO 211 15 Points
Sociology and Popular Culture
Popular culture appears to be everywhere. But what political and social effects might all this popular entertainment have on us? This course seeks to answer such questions through a sociological interpretation of popular culture as both an indicator of social change and as a location of meaning and significance. Topics include reality TV, celebrities, consumption, music, and technology.
Prerequisite: 30 points at Stage I in Sociology, or 15 points at Stage I in Sociology with a minimum B+ pass, or FTVMS 100 and 101, or 30 points passed from courses listed in Comparative Literature

SOCIO 212 15 Points
Race, Gender and Class in Australia and New Zealand
This course looks at the persistence of race, gender and class inequality in Australia and New Zealand, from white settlement to the ‘celebrations’ of 1988/1990 and onwards to the bicultural and multicultural settlements in the twenty-first century.
Prerequisite: 30 points at Stage I in Sociology or 15 points at Stage I in Sociology with a minimum B+ pass

SOCIO 213 15 Points
Ethnicity and Identity
Theories of ethnicity: ethnic socialisation and resocialisation, ethnocide and ethnogensis, ethnicity and the individual, ethnic social movements, ethnicity in local, national and international affairs.
Prerequisite: 30 points at Stage I in Sociology or 15 points at Stage I in Sociology with a minimum B+ pass

SOCIO 214 15 Points
Sociology of Gender
Introduction to the sociology of gender. Preliminary examination of the topics of concern to sociologists and the major theoretical perspectives – psychoanalytic, functionalist, Marxist, socialism, feminist, antifeminist, biological. Critical analysis of key sites such as the family, reproduction, mothering, sexuality and violence against women, drawing on both international and local literature.
Prerequisite: 30 points at Stage I in Sociology or 15 points
SOCIOL 215
Law, Inequality and the State
15 Points
Examines, in a comparative mode, how law as a set of social relations and categories can both create and remedy inequalities of gender, race, and class. Prerequisite: 30 points at Stage I in Sociology or 15 points at Stage I in Sociology with a minimum B+ pass, or 15 points at Stage I in Sociology and 15 points from MĀORI 130, PHIL 103, POLITICS 109

SOCIOL 216
Sociology and Crime: An Introduction
15 Points
Studies forms of criminal behaviour, the causes of crime, definitions of criminality, and societal reaction to criminal activity. The main focus is on theories of crime which are critically analysed with reference to topical themes including race and crime, white collar and corporate crime, gender and crime, and political violence and terrorism. Prerequisite: 30 points at Stage I in Sociology or 15 points at Stage I in Sociology with a minimum B+ pass, or 15 points at Stage I in Sociology and 15 points from MĀORI 130, PHIL 103, POLITICS 109

SOCIOL 220
Last Call: The Sociology of Death and Dying
15 Points
Examines the social location of death in modern life. It includes topics on perceptions of death from sociological, philosophical, religious, historical, secular and medical approaches. It includes topics on death systems, medicalisation of death, death in popular culture, suicide and genocide. Prerequisite: 30 points at Stage I in Sociology or 30 points at Stage I in Social Science for Public Health or 90 points passed

SOCIOL 221
Everyday Life in New Zealand
15 Points
A cultural studies approach is used to address issues in the development of national characteristics. Which identity claims gain dominance? Investigates the 'invention' of New Zealand, and the enactment of values about nature, gender, ethnicity and branding. Myth-making in relation to globalisation is explored, with emphasis on the media's role in the formulation of everyday life. Prerequisite: 30 points at Stage I in Sociology or 30 points at Stage I in Sociology with a minimum B+ pass

SOCIOL 222
Families, Labour and Love
15 Points
The focus of this course is how and why family life is influenced by economic and labour force trends, laws and social values, as well as personal ideals and decisions. Partnering, childbearing, gendered labour and divorce, from both historical and cross-national perspectives, will be studied. Prerequisite: 30 points at Stage I in Sociology or 15 points at Stage I in Sociology with a minimum B+ pass, or 30 points passed at Stage I in courses listed in Women's Studies

SOCIOL 224
Issues in Migration
15 Points
Examines international migration in the context of the modern world economy, its impact on global cultures and its relationships with ideologies such as nationalism and racism. The focus is on the Pacific Rim region, but in the context of, and in comparison with, other parts of the world. Prerequisite: 30 points at Stage I in Sociology or 15 points at Stage I in Sociology with a minimum B+ pass

SOCIOL 225
Outsiders – Youth and Adult Subcultures
15 Points
Examines changing sociological understandings of subcultures, including music, style, and virtual and global subcultures, in both New Zealand and international contexts. Issues of social class, gender, age, and ethnicity are also considered. Prerequisite: 30 points at Stage I in Sociology, or 15 points at Stage I in Sociology with a minimum B+ pass, or 30 points from MĀORI 130, PHIL 103, POLITICS 109, SOCIOL 100, 101, 103

SOCIOL 226
Earning and Caring: Cross-national Comparisons
15 Points
Discusses trends in work and employment policies in Western countries, focusing on gendered work, policies to balance work and family, and retirement programmes. Compares New Zealand with less regulated labour markets and those offering more social protection. Discusses why labour markets have changed, how welfare states have adapted, how theorists explain cross-national variations, and the connections between work, gender and class. Prerequisite: 30 points at Stage I in Sociology or 15 points at Stage I in Sociology with a minimum B+ pass

SOCIOL 227
The Sociology of Mental Health
15 Points
Investigates social, cultural, economic and political processes surrounding the psychiatric gaze, critically evaluating medicine's focus on behaviour considered 'abnormal'. Topics include: history of psychiatry and mental illness, racism and psychiatry, psychiatry in New Zealand, institutional and community care, mental illness and pharmaceutical companies, critical and post-psychiatry, medicalisation of youth, alternative therapies, medicalisation of everyday life, mental health user narratives, gendered psychiatry. Prerequisite: 30 points at Stage I in Sociology or 30 points at Stage I in Sociology with a minimum B+ pass

SOCIOL 228

Stage III

SOCIOL 300
Sociology of Technology
15 Points
A survey of theoretical and practical approaches to understanding the relationship between technology and society. Topics studied include: technology and social theory, technology and subjectivity, the politics of artefacts and the impacts of new social media. Prerequisite: 30 points at Stage II in Sociology

Restriction: SOCIOL 311
SOCIOL 303  
Sociology of Religion  
15 Points  
Examines sociological accounts of the changing relationship between religion and the state in modern society, and pays particular attention to two topics: contemporary religious movements and cults, and religion as a system of legitimation.  
Prerequisite: 30 points at Stage II in Sociology

SOCIOL 307  
The Pacific in the World  
15 Points  
Brief history of post Second World War theories of economic development; Wallerstein and elements of modern world system; modern world system; and patterns of development in the Pacific; linkages between core and semi-periphery Britain, US, East Asia and Aotearoa New Zealand and Samoa/Cooks and Tuvalu; limitations of world systems models.  
Prerequisite: 30 points at Stage II in Sociology

SOCIOL 308  
Law and Identity  
15 Points  
Survey of theoretical and practical approaches to understanding the relationship between law and society in the modern state. Emphasis on their potential application in New Zealand society.  
Prerequisite: 30 points at Stage II in Sociology or Law or 15 points at Stage II in Sociology and CRIM 201 or 202

SOCIOL 310  
Applied Social Research  
15 Points  
Develops methodological competence in applied social research methods within a wider and critical framework of understanding of the social policy process and apparatus.  
Prerequisite: 30 points at Stage II in Sociology, or SOCSCIPH 200

SOCIOL 314  
Women/Deviance  
15 Points  
An analysis of the construction of images and representations of women in relation to conceptions of normality and deviance in bodies, reproduction, and popular culture; the creation of feminist epistemologies.  
Prerequisite: 30 points at Stage II in Sociology or Women’s Studies

SOCIOL 317  
Sociology of the Welfare State  
15 Points  
Examines the origins, history, ‘crisis’ and possible futures of the welfare state. Using a range of theoretical viewpoints, the course considers the historical shift from a Keynesian welfare state to a neo-liberalist state and questions whether recent ‘Third Way’ policies provide a solution to future welfare needs. The course is comparative, but will concentrate mostly on Aotearoa New Zealand.  
Prerequisite: 30 points at Stage II in Sociology, or SOCSCIPH 200

SOCIOL 318  
Sociology of the Media  
15 Points  
An exploration of the relationship and patterns of interaction between media, culture and society through an examination of the print and broadcasting media, and advertising in New Zealand.  
Prerequisite: 30 points at Stage II in Sociology or 30 points from FTVM 200–214, 216–219

SOCIOL 320  
Qualitative Sociological Research  
15 Points  
An introduction to non-numerical research methodologies in sociology. Topics drawn from a wide range: ethnography, interviews, life history methods, archival research, analysis of text. Not all topics will be included in any one year.  
Prerequisite: 30 points at Stage II in Sociology, or SOCSCIPH 200

SOCIOL 321  
Quantitative Sociological Research  
15 Points  
Principles and practice of the design, execution and analysis of the several forms of ‘systematic social research’ (including survey research, census and other social bookkeeping data, content analysis, systematic observation and unobtrusive methods) and their usefulness within sociological analyses. Not all topics will be included in any one year.  
Prerequisite: 30 points at Stage II in Sociology, or SOCSCIPH 200

SOCIOL 323  
Consuming Interests: The Sociology of Food  
15 Points  
Food is basic to human society. This course blends social history, political economy and hermeneutics to examine sociological aspects of food production, processing, distribution and consumption. Other issues raised will include hunger and famine, colonialism, gender differences and development.  
Prerequisite: 30 points at Stage II in Sociology

SOCIOL 325  
Sociology of Emotions  
15 Points  
The course examines some of the emotions – including anger, revenge, shame, love, pity, resentment, empathy, disgust, and desire – that shape social processes and influence the interaction between self and society.  
Prerequisite: 30 points at Stage II in Sociology

SOCIOL 326  
Sociology of Violence  
15 Points  
Drawing on writings from a variety of intellectual traditions, this course explores the contested nature of violence through an examination of a number of contemporary debates about the causes, agents, consequences, as well as responses to and interventions in, incidents of violence.  
Prerequisite: 30 points at Stage II in Sociology, or 15 points at Stage II in Sociology and CRIM 201 or 202

SOCIOL 330  
Special Topic  
15 Points  
Prerequisite: 30 points at Stage II in Sociology

SOCIOL 331  
Issues and Themes in Visual Culture  
15 Points  
Considers the significance of vision in the societies and cultures of modernity based on the notion that perception is socially and historically constructed. Looks at the impact of technology on vision and the way visual practices travel the world.  
Prerequisite: 30 points at Stage II in Sociology
SOCIOL 333 15 Points
Sociology of Health and Medicine
Examines the social construction of health, illness and medicine in New Zealand. A range of issues and sociological accounts will be addressed, including: competing conceptions of medicine and the sick role; the political economy of health; debates around professionalism and managerialism; the interface of medicalisation, risk and claims-making; medical ethics: the sociology of the body; lay-accounts and contested character of medical knowledge.
Prerequisite: 30 points at Stage II in Sociology, or SOCSCIPH 200

SOCIOL 334 15 Points
Youth and Society
Introduces students to literature in the social constructions of youth identity in society by exploring relationships between youth identity, public policy, media, popular culture, class, gender and ethnicity in modern society using 'youth-focused' theoretical and empirical work.
Prerequisite: 30 points at Stage II in Sociology

SOCIOL 335 15 Points
Organisation and Representation
Examines political and textual representations in complex organisations. Political readings of organisations emphasise the social forces and institutional frameworks by which sets of actors represent others. Textual readings emphasise ways in which symbolic realities come to stand for material ones. Examines the differing expressions of representation across organisations and the convergence and divergence of political and textual readings.
Prerequisite: 30 points at Stage II in Sociology

SOCIOL 336 15 Points
Special Topic: Fantasies of Finance
The financial crisis and global recession have demonstrated the social and political consequences of finance, while research in the sociology of markets, critiques of financialisation, and social and cultural studies of finance have provided understandings of the ideological fantasies that maintain the world of finance. This course explores these new approaches that emphasise the relationship between finance and society.
Prerequisite: 30 points at Stage II in Sociology or 60 points at Stage II

SOCIOL 337 15 Points
Doing Time: Incarceration and Punishment
Examines punishment and incarceration as a complex social institution informed by a range of social relations and cultural meanings. Explores the way politics shape notions of law and order and also looks at technologies of incarceration. Topics include: history of punishment, theories of incarceration, sentence determination, inmate and staff perspectives on incarceration, youth, refugees, enemy combatant detention centres, penalty regimes.
Prerequisite: 30 points at Stage II in Sociology or CRIM 201 or 202

SOCIOL 338 15 Points
Social Futures
Social Futures re-imagines sociology in view of major economic, ecological and political crises taking place in the world today. The course considers how these developments are represented in the media, whether there is any credibility in apocalyptic visions they inspire and what such visions tell us about general perceptions of the direction in which society is headed.
Prerequisite: 30 points at Stage II in Sociology

Postgraduate 700 Level Courses

SOCIOL 700 30 Points
Advanced Problems in Sociological Theory
Addresses contemporary developments and debates in the field of social theory and explores the effect of a range of complex social, cultural, economic and political processes of transformation on human experience and conduct.
Restriction: SOCIOL 733

SOCIOL 701 30 Points
Advanced Skills in Research
Examination of sociological issues in research design, execution, analysis and interpretation. Particular attention is paid to computer assisted data and benefits of employing multiple methods.
Restriction: SOCSGRES 702, 703

SOCIOL 703 30 Points
Sociology of Mental Health
Interrogates advanced sociological theories of medicine and psychiatry, investigating mental health interventions as social, economic, cultural and political projects. Key issues will include The Enlightenment and theories of the self, the rise of science and the 'psy' professionals, institutionalisation and community care, current sociological theories of mental health, the medicalisation of everyday life, and gender, race and mental illness.

SOCIOL 704 30 Points
Researching Islam in the West
Understanding and researching Islam from a Western base, which includes an analysis of Western representations of Islam, the diverse beliefs, practices and legal principles of Muslim societies, Muslim migration to the West, and the possible emergence of distinctively Western forms of Islam.
Restriction: SOCIOL 741

SOCIOL 705 30 Points
Empirical Sociology: Structure and Change
Addresses developments and debates about the role and character of empirical sociology. Attention is paid to how sociologists have explored social relations, especially social structure and social change. The course deals with social realist concerns of epistemology and methodology; it engages with two traditions: one with its origins in Marx's Capital, the other drawn from Mill's The Sociological Imagination.

SOCIOL 708 30 Points
Complex Organisations
Reviews methods and recent approaches to organisational analysis within a sociology of knowledge framework. Emphasises cross-cultural and comparative inquiry, focusing on such topics as Japanisation and post-Fordism.
SOCIOL 712  30 Points
After Neoliberalism?
Through an analysis of the works of Polanyi, Foucault, Harvey and other major theorists, this course provides an historically grounded, theoretical examination of the development of neoliberalism to the present, and of its current prospects. In addition to considering the international development of (neo)liberal approaches, we will look more closely at recent shifts in social policy in New Zealand, and to the approaches of international development agencies to state building, poverty reduction and livelihoods in South East Asia.

SOCIOL 713  30 Points
Sociology of Law: Human Rights
Examines recent developments in the sociology of human rights within the study of law and society. Sociological thinking can offer a critical examination of international rights thought and practice, addressing the place of rights discourse in law and literature. Feminist issues, indigenous rights, the place of rights in critical race theory and for refugees.

SOCIOL 718  30 Points
Research Projects: Design and Practice
Involves the development of a research proposal, especially for students intending to write a thesis or research essay. Both 'empirical' and 'theoretical' projects will be encouraged. Students will work through problem definition, literature review, research design, preparation of an ethics application and a small supervised pilot project.
Restriction: SOCIOL 731, SOCSGRES 701

SOCIOL 722  30 Points
Remaking Aotearoa New Zealand
Aotearoa New Zealand has experienced several critical 're-makings', from: Māori society to white-settler colony; colony to nation: 30s depression to post-war boom; from the end of the 'golden weather' to deregulated player in the global economy. Despite these episodes, the gaps between Māori/Pākehā, men/women and employers/workers remain as the objects of future contested settlements within Aotearoa New Zealand as a nation, or nations.

SOCIOL 728  30 Points
Family, Women and the State
The influence of ideologies of mothering, family and work, as well as the political forces and pressure groups that promote them, on both the development and restructuring of social policies in several industrialised nations, including New Zealand.

SOCIOL 729  30 Points
Modernity and Consciousness
Operating on the boundary between sociologies of history and culture, this course employs the work of Walter Benjamin, Marshall Berman, Wolfgang Schivelbusch, Raymond Williams, and Talcott Parsons to explore creatively tangled relationships among three superficially similar terms — 'modernisation', 'modernity' and 'modernism' — in sundry nineteenth and twentieth century urban and rural settings.

SOCIOL 730  30 Points
Globalisation and Market Governance
Political sociology has traditionally focused on relationships between state and society. Recent theoretical and empirical changes challenge this approach. Post-structuralism, neo-Marxism and feminism have given rise to wider definitions of power, politics and social identities. Globalisation, the shift from government to governance and the rise of 'new social movements' have transformed the social terrain of political struggle. Examines contemporary debates in political sociology.

SOCIOL 732  30 Points
Tourism and Heritage
Tourism is one of the world's largest and fastest growing industries. This course examines tourism's intersection with 'heritage', considering the political economy of tourist development, the tourist gaze, commodified 'authenticity' and cultural conflicts in tourism.

SOCIOL 735  30 Points
Current Debates in Gender and Sexuality
Traces contemporary sociological debates in the analysis of gender and sexuality. This includes reference to feminist concerns with identities, differences, bodies, power and agency. These issues are taken up and explored through an examination of practices enacted on/or through sexed bodies. Restriction: 315.723

SOCIOL 736  30 Points
Special Topic: Renegotiating Citizenship
Changing economic, political and social realities in Western societies have challenged traditional notions of citizenship. This course critically examines emerging debates in citizenship studies that consider how shifting political ideologies, welfare state reform, increasing cultural diversity and globalisation impact on citizenship at both theoretical and policy levels.

SOCIOL 737  15 Points

SOCIOL 740  30 Points
Modern Times, Modern Crimes
Sociology sees itself as being centrally concerned with the question of modernity. However, until recently, it has avoided active scholarly engagement with modernity's underbelly: war, genocide and torture. This course argues that rather than appearing as peripheral aberrations they are central to the project of modernity. Special attention will be paid to the roles played by science and technology in the production of inhumanity.

SOCIOL 742  30 Points
Deviance and Social Control
Examines cultural, medical and sociological explanations of deviant behavior. Particular attention is given to the manner in which social control has historically functioned in relation to race, class, gender, colonialism and sexuality, and the means by which individuals and groups have been politically, socially and culturally marginalised.

Special Topic
SOCIOL 745  30 Points
Special Topic: Communication: Economy, Power, Public Culture
Communication systems are central to every aspect of contemporary societies, from the operation of transnational systems to the intimacies of everyday life.
life. This course examines how power within these systems is shifting under the triple impact of marketisation, globalisation and digitalisation, and explores the consequences of these movements for the vitality of public culture and citizenship.

SOCIOL 746 30 Points
Special Topic: Connected Lives
Examines the personal and social significance of the relational dimension of our lives – from casual encounters with acquaintances, to intimate relationships with sexual partners, and the usually enduring relationships with kin – in an era that some claim is increasingly individualised. Three key themes will be emphasised: connection versus individualisation; past and present relational embeddedness; and the pleasure and pain of connections to others.

SOCIOL 747 30 Points
Political Ecology of Youth and Crime
Focuses on the social processes that underpin the relationship between individual agency, identity and the broader political ecology of crime as it relates to youth and crime. These will be explored by examining youth offending and criminalisation, victimisation, the media and representations of youth crime and young people’s engagement with youth justice policy and practice.

Commercial Law

Stage I

COMLAW 101  
Law in a Business Environment  
15 Points

Decision makers in commerce and industry require an understanding of legal structures, concepts and obligations. Provides an introduction to the New Zealand legal system and the legal environment in which businesses operate, and also introduces legal concepts of property and the law of obligations, including detailed study of various forms of legal liability relevant to business.

Restriction: COMLAW 191

COMLAW 151G  
The (Un)Lawful World: Law in Contemporary Life  
15 Points

An examination of and guide to the laws and legal institutions that shape contemporary life. The focus will be on the laws that people are most likely to brush up against in everyday life and current legal controversies. Topics may include crime and the criminal justice system, residential tenancies, employment disputes, consumer transactions, and the protection of creativity and innovation.

Stage II

COMLAW 201  
Commercial Contracts  
15 Points

Every business transaction involves a contract. Commercial Contracts examines the general principles of the law of contract including the interpretation of contractual terms and the various obstacles which may impede the enforceability of a bargain. Introduces the special features of contracts in digitally networked environments and issues relating to breach of contract and consumer protection.

Prerequisite: COMLAW 101 or 191

COMLAW 203  
Company Law  
15 Points

Companies are by far the most used vehicle for doing business and an understanding of the rules that govern them is essential for everyone involved in commerce and industry. Examines the nature of a company, incorporation and share capital, the concept of separate legal personality, how a company interacts with the world and the roles of the stakeholders in a company including directors and shareholders. A sound understanding will help decision makers to take the advantages of corporate structure while avoiding pitfalls and legal liability.

Prerequisite: COMLAW 101 or 191

COMLAW 209  
Special Topic  
15 Points

Prerequisite: COMLAW 101 or 191

Stage III

COMLAW 301  
Taxation  
15 Points

An introduction to the Income Tax Act and the Goods and Services Tax Act, with emphasis on developing an understanding of these types of tax as relevant to taxpayers. Specific topics include the nature of income, taxation of common types of income (such as wages, shares and land), the deduction and prohibition of various types of expenses, tax accounting issues (cash or accrual basis), provisional tax, rebates, PAYE system, tax returns and an introduction to GST.

Prerequisite: COMLAW 201 or 203

COMLAW 303  
Receiverships and Reconstructions  
15 Points

A business in difficulty may fail or it may be rehabilitated. Receiverships and Reconstructions looks at aspects of business failure and near failure including informal workouts, formal business rescue regimes, company receiverships and personal bankruptcy. Students will develop the skills and expertise to operate in these fields.

Prerequisite: COMLAW 203 or LAW 417

COMLAW 304  
Business Structures for Enterprises  
15 Points

Business advisers need to be familiar with a wide variety of business structures other than companies. Emphasis is on the most common of these including franchises, joint ventures, trading trusts, partnerships, unincorporated societies and State Owned Enterprises in order to ensure that advisers are familiar with their merits and legal consequences of utilising these structures.

Prerequisite: COMLAW 203

COMLAW 305  
Securities Markets and Investment Law  
15 Points

Businesses need investment to grow. Many raise finance from the securities markets, in particular by listing on the Stock Exchange. Topics include raising money from the public and the rules relating to insider trading, market manipulation, disclosure obligations, takeovers and listing on the Stock Exchange and will benefit investment advisers and anyone involved in the financial markets.

Prerequisite: COMLAW 203

COMLAW 306  
Marketing Law  
15 Points

Marketers are not free to say what they want. A variety of laws and codes govern the claims made about goods and services and the ways in which they are presented and sold. Marketing Law covers consumer legislation, product distribution, advertisement regulation, branding, privacy and competition law. It builds skills in problem solving, decision making and written communication.

Prerequisite: COMLAW 201 or 203; or COMLAW 101, MKTG 201; or COMLAW 191, MKTG 291

COMLAW 307  
International Trade Law  
15 Points

An introduction to the private law relationships which exist between buyers, sellers, insurers and bankers concerned with international trade. Major topics include: the sale of goods contract, the Vienna Convention, CIF and FOB contracts, marine insurance, the bill of lading, the Warsaw Convention and regional trade agreements such as CER.

Prerequisite: COMLAW 201

COMLAW 311  
Advanced Taxation  
15 Points

An advanced study of Income Tax and Goods and Services Tax, with emphasis on the important tax regimes applicable to business taxpayers and high-wealth individuals. Specific topics include corporate taxation, dividends and imputation, company losses and grouping, qualifying companies, trusts,
partnerships, financial accruals, international taxation, the disputes procedure and penalties regime, and evasion and avoidance.

Prerequisite: COMLAW 203 and 301, or LAW 429 and LLB

15 Points

The Tax Base

An advanced study of the breadth of the New Zealand income tax base, including the different concepts of income, its timing and recognition. Comparisons between the nature of capital and income, and the differing treatment of each, provides a deeper understanding of the policy behind the New Zealand income tax regime. Provides a theoretical background and detailed technical knowledge of the scope and application of the most significant regimes for income, deduction and timing in the Income Tax Act 2004.

To complete this course students must enrol in COMLAW 740 A and B

COMLAW 741A

15 Points

International Taxation

Tests of residence for individuals and corporations. The wider tax base for off-shore income of New Zealand residents. Income derived by overseas residents from New Zealand activities. The Double Tax Treaty System. Selecting the country of residence. Anti-avoidance measures directed at transnational activity. The use of tax havens. As well as New Zealand taxation law, the course also examines the municipal revenue law of some of our trading partners.

To complete this course students must enrol in COMLAW 741 A and B

COMLAW 741B

15 Points

Taxation of Corporates

An advanced study of the tax liability and issues affecting companies and their shareholders. Considers the different corporate tax regimes, including dividends, imputations, losses and groupings, amalgamations, LTCs and Unit Trusts. Comparison with other entities is intended to provide a deeper understanding of the policy behind New Zealand’s corporate tax regimes and the allocation of the tax burden between companies, shareholders and other investors.

COMLAW 747

15 Points

Goods and Services Tax

An advanced study of Goods and Services Tax. Provides both a theoretical background and high level of technical knowledge of the GST Act 1985. Comparisons with other indirect taxes and overseas variations of GST (notably Australian GST and UK VAT) provide a deeper understanding of the policy behind the New Zealand GST regime. Major topics include taxable activities, input tax, output tax, registration, adjustments, taxable supplies, timing and the GST anti-avoidance provisions.

COMLAW 748

15 Points

Tax Disputes

An advanced study of the statutory disputes and challenge procedures in the Tax Administration Act 1994. Covers the power of the Commissioner to propose adjustments, conduct investigations and raise assessments. Reviews the administrative law obligations imposed on the Commissioner, taxpayer rights and the power of the Courts to supervise and review the assessment process.

COMLAW 749

15 Points

Tax Avoidance

An advanced study of all aspects of the general anti-avoidance provision contained in the Income Tax Act 2004. Provides a detailed analysis of the structure, function and application of the general anti-avoidance provision and of its relationship to the “black-letter” tax law. Comparisons with the statutory and common law responses to tax avoidance in other jurisdictions, including Australia, Canada, the UK and US provide a deeper understanding of the policy behind New Zealand’s general anti-avoidance provision.

COMLAW 750

15 Points

Tax Policy

An examination of the tax policy issues arising in New Zealand and all tax systems. Topics studied may include historical background, the objectives of taxation and various criteria for evaluating tax systems, basic economic concepts used to analyse
tax systems, economic analysis of types of taxation, distinction between capital and income, theory of capital taxation, and the structure of indirect taxation.

**COMLAW 751** 15 Points
**Taxation of Property Transactions**
This course examines all of the tax consequences of acquiring, holding, developing, building on, leasing or otherwise dealing with land and personal property.

**COMLAW 752** 15 Points
**Taxation of Corporate Finance**
An examination of the theory and practice of the taxation of corporate finance and financial institutions. Topics considered in the analysis of the taxation of corporate finance include the major activities carried on by banks and companies of all descriptions in order to raise capital, return value to shareholders, and acquire, reorganise and dispose of businesses.

**COMLAW 753** 15 Points
**Tax Administration**
An advanced study of the Public Law and procedural issues arising from administration of the Revenue Acts in New Zealand. Provides an analysis of the powers, discretions and responsibility of the Commissioner and the Inland Revenue Department. Major topics include the Department’s assessment function and taxpayer self-assessment, the Binding Ruling regime, the Commissioner’s statutory powers of investigation and information gathering, the exercise of discretions and administrative decisions, and the role of judicial review.

**Commercialisation of Science and Technology**
Addresses the research-business interface, commercialisation pathways and processes and how IP based projects are evaluated and assessed as they advance through stages of development with the objective of penetrating national and international markets. Examines the product development process and different technology transfer models including licensing, partnering, spin-outs and start-ups. Introduces related issues of market and competitor research, IP valuation, risk management, and the financing of different stages in the commercialisation process.

**COMENT 704** 15 Points
**Entrepreneurship for Science and Technology Ventures**
Studies how entrepreneurs think and act in organising, motivating and leading high performance teams, and introducing and selling innovative science and technology-based products and services into national and international markets. Examines how entrepreneurs create and capture revenues and profits by recognising, assessing, and marketing opportunities for new products or services based on science and technology; developing new strategies and business models; validating markets; and selling into industrial enterprises and markets.

**COMENT 705** 45 Points
**Project in Commercialisation**
A supervised project requiring the application of knowledge and skills for the commercialisation of a creative application of science and technology. The commercialisation project will involve the identification and analysis of complex, open-ended problems and issues associated with commercialisation. A written commercialisation report will present findings and a plan for commercialisation. Projects will be sourced from universities, CRIs and science and technology based enterprises.

Economics

Stage I

Note: Students intending to advance beyond Stage I should include MATHS 108 or 150 in their first year programme.

ECON 101  15 Points
Microeconomics
Offers an introduction to the workings of market systems. This course deals with the economic behaviour of consumers and firms, covering analysis of demand and supply of goods, services and resources within an economy. The framework developed is used to examine and evaluate the operation of the market mechanism for various market structures and government policies.
Restriction: ECON 191

ECON 111  15 Points
Macroeconomics
Analyses aggregate economic activity in the national economy and its interrelationships with the rest of the world. Emphasis is placed on basic principles involved in the determination of the level of national output, the aggregate price level, and the money supply. Alternative explanations of key macroeconomic problems and relevant economic policies are compared. The theoretical concepts are illustrated from a range of New Zealand and international applications.

ECON 151G  15 Points
Understanding the Global Economy
Economics affects our daily lives and the global environment in many ways. Through the media we are constantly made aware of price increases, interest rate changes, exchange rate movements and balance of payments problems, growth and recessions, standard of living comparisons, regional trading agreements. What does it all mean and how does it all work?
Restriction: May not be taken by students with a concurrent or prior enrolment in Economics courses

ECON 191  15 Points
Business Economics
Introduction to economic analysis, with an emphasis on firms and their operating environment. Pricing and output decisions and cost and profit determination in competitive, imperfectly competitive, and monopolistic markets. Macroeconomic factors and policies affecting business activity in a small open economy.
Restriction: ECON 101, 111

Stage II

Note: Students intending to major in Economics must include ECON 201 and 211 in their programme.

ECON 201  15 Points
Microeconomics
Study of the allocation of scarce resources among competing end uses. Intermediate-level analysis of the economic behaviour of individual units, in particular consumers and firms. Although the focus is on perfectly competitive markets, attention is also given to other types of markets. Analysis also includes concepts of expected utility and uncertainty, and welfare economics.
Prerequisite: ECON 101 and MATHS 108 or 150 or 153

ECON 202  15 Points
Managerial Economics
An applied economics course which shows how various concepts and techniques drawn from economics, finance, mathematics and statistics can be used to develop and use computer-based models in decision-making, particularly in an uncertain environment.
Prerequisite: ECON 101 or 191, and 111

ECON 211  15 Points
Macroeconomics
Provides an introduction to the dynamic microfoundations of macroeconomics, and demonstrates how we can utilise these foundations (i) to understand the trends and fluctuations of macroeconomic aggregates like national output, unemployment, inflation and interest rates, and (ii) to predict the outcome of alternative government policies related to current economic problems of New Zealand and the rest of the world.
Prerequisite: ECON 111 and MATHS 108 or 150 or 153

ECON 212  15 Points
Game Theory and Economic Applications
An introduction to the fundamental concepts of non-cooperative and cooperative game theory: the concept of strategy; two person constant sum non-cooperative games and the minmax value; n-person non-cooperative games and Nash equilibrium; examples and applications in auctions, bargaining and other economic models, political science and other fields; the idea of backward induction and sub-game perfection; introduction to games in coalitional form; the core and the Shapley value.
Prerequisite: ECON 101 or 191 and MATHS 108 or 150 or 153 or PHIL 101

ECON 221  15 Points
Introduction to Econometrics
An introduction to model building and empirical research methods in economics. Emphasises the use and interpretation of single equation regression techniques in formulating and testing microeconomic and macroeconomic hypotheses. Cross-section and time series modelling, as well as qualitative choice models will be covered. There will be examples of the uses of econometrics in a variety of areas through statistical analysis, problem solving and econometric estimation using a statistical computer package.
Prerequisite: ECON 101 or 191 or 111 and MATHS 108 or 150 or 153 and STATS 101 or 102 or 108 or 125 or 191

ECON 232  15 Points
Development of the International Economy
The development of the international economy and changing economic relationships that have taken place since the late nineteenth century. The causes and consequences of growing interdependency among nations are examined. Changing patterns of trade and migration of capital and labour are analysed, as are
cyclical and secular trends in output, employment and investment. The focus is on the development of institutions as well as the economic and social conditions that induce and validate change.

Prerequisite: ECON 201

**ECON 241** 15 Points

**International Economics**

An introduction to issues in international trade and finance. Important issues for the international economy and the development of conceptual frameworks for understanding and analysing these issues will be discussed. Topics include: theories of international trade, exchange rate regimes, international capital flows and speculation, multilateral and regional trade agreements, issues in trade policy and the political economy of trade policy.

Prerequisite: ECON 101 or 191, and 111

**ECON 271** 15 Points

**Special Topic**

Prerequisite: ECON 101 or 191, and 111

---

**Stage III**

**ECON 301** 15 Points

**Advanced Microeconomics**

Advanced treatment of aspects of general equilibrium and game theory. Applications of this basic theory to the analysis of topics in uncertainty, contracts, auctions, oligopoly, and information economics.

Prerequisite: ECON 201

**ECON 302** 15 Points

**Economics of Labour Markets**

The application of economics to issues that confront policy makers all over the world. Covers the workings of labour markets and teaches how to use economic frameworks to judge the appropriateness of education, training, employment, taxation, immigration and other labour market policies.

Prerequisite: ECON 201

**ECON 303** 15 Points

**Law and Economics**

Economic analysis of law and organisation, and the application of economics to property rights, patents and natural resource management. Includes: contracts, transaction cost analysis, classical contracting, long-run contracts, enforcement, role of market forces, risk aversion, remedies for breach, economic theory for torts, negligence rules, strict liability, multiple torts, product liability. Special topics may include: crime, insider trading, and business law.

Prerequisite: COMLAW 101 or LAW 101, and ECON 201

**ECON 304** 15 Points

**Firms and Markets**

An introduction to Industrial Organisation, the analysis of markets with imperfect competition. Industrial Organisation is concerned with the interdependence of market structure, firm behaviour and market outcome. Basic concepts of game theory will be systematically introduced and applied to study strategic firm behaviour in a variety of general and more industry-specific market settings. In each case, we will analyse the implications of the market behaviour for consumers and society and explore the potential role for public policy with instruments like regulation, competition policy and patent policy.

Prerequisite: ECON 201

---

**ECON 311** 15 Points

**Macroeconomic Theory and Policy**

This course is designed to teach students modern macroeconomic analysis and focuses on the standard dynamic general equilibrium model, which is central to current macroeconomic research. Students are given a careful introduction to the overlapping generations version of this model and shown how this model can be adapted in different ways to address a wide variety of economic issues and policy questions.

Prerequisite: ECON 211

**ECON 321** 15 Points

**Econometrics**

Development of the linear regression model, its basis, problems, applications and extensions. Attention is also given to techniques and problems of simultaneous equations modelling, time-series analysis and economic forecasting.

Prerequisite: ECON 201 or 211, and ECON 221 or STATS 207 or 208 or 210

**ECON 322** 15 Points

**Applied Econometrics**

Provides a basic understanding of some of the econometric methods and models. Applications of basic linear regression, including: demand systems, time-series analysis including unit roots and co-integration, simulation and resampling methods. Also includes practical computing classes.

Prerequisite: ECON 201 or 211, and ECON 221

**ECON 341** 15 Points

**International Trade**

The main theories of international trade in goods and services, and of international movements of capital and labour. Partial equilibrium and general equilibrium analysis of the major instruments of trade policy, their economic effects, and the issues created by their use in practice. The economics of regional trading arrangements, such as free trade areas, customs unions and common markets.

Prerequisite: ECON 201

**ECON 342** 15 Points

**International Economic Policy**

An analysis of current international economic policy issues, including their implications for New Zealand. A variety of approaches are used, including issue-based analysis of key international economic policy problems, comparative analysis of regional trading arrangements, and a case study that focuses on international economic policy issues related to a selected region.

Prerequisite: ECON 241 or 341 or 352

**ECON 343** 15 Points

**East Asian Growth and Trade**

A study of the economic factors underlying the dynamic trade and growth performance of the major economies of contemporary East Asia, and of the impact of their development on New Zealand's international trading environment. Study of individual East Asian economies is strongly emphasised.

Prerequisite: ECON 201

**ECON 351** 15 Points

**Financial Economics**

A study of the modern literature on corporate finance, investments and derivative securities. An analysis of consumption and investment decisions in the presence of time and risk, asset pricing models and market efficiency. The term structure of interest rates
and various issues in debt and equity financing. The use of derivative securities, eg, forwards and/or options to manage exchange rate risk. 

Prerequisite: ECON 201

ECON 352 15 Points
International Finance
A study of the modern literature on exchange rate markets, exchange rate determination and the implications of exchange rate movements for various economic issues. Students will gain an understanding of why exchange rates change, of financial market arrangements, and of the reasons for, and implications of, recent events in international financial markets.

Prerequisite: ECON 201 and 211

ECON 361 15 Points
Public Economics
A study of the role of the state in a modern mixed economy; its roles, measurement and accountability. Topics include: welfare theory, theory of public goods, cost-benefit analysis, budgetary issues, taxation theory and practice, insurance markets, and social insurance.

Prerequisite: ECON 201

ECON 372 15 Points
Energy and Resource Economics
Examines the economics of resource use with a particular emphasis on world oil markets and issues surrounding energy security. Energy markets are analysed with an emphasis on the electricity market. Issues surrounding energy economics and climate change, energy efficiency and policy measures to promote renewable energy sources are also discussed.

Prerequisite: ECON 201

ECON 373 15 Points
Environmental Economics
An overview of the theory and empirical practice of economic analysis as it is used in evaluating environmental problems. Topics include: static and dynamic efficiency; environmental policy (pollution and economic efficiency); analysis of economic instruments, such as tradable property rights and pollution taxes; the allocation of non-renewable and renewable resources; and contemporary issues of growth, trade and the environment, sustainable development, and climate change.

Prerequisite: ECON 201

ECON 374 15 Points
Special Topic

ECON 381 15 Points
Foundations of Economic Analysis
A grounding in the quantitative methods of economic analysis with application to commonly used formal models in microeconomics, macroeconomics and econometrics. The emphasis will be on the unifying structure of the theory with a systematic treatment of the mathematical techniques involved. Preparation for continuing study in economic theory and econometrics.

Prerequisite: ECON 201

Postgraduate 700 Level Courses

ECON 701 15 Points
Microeconomic Theory 1
Advanced treatment of traditional topics from "core" microeconomics, including consumer theory and duality, expected utility theory, general equilibrium, game theory and the economics of information.

ECON 702 15 Points
Industrial Organisation
Industrial Organisation (IO) is concerned with the interdependence of market structure, firm behaviour and market outcome. Concepts of game theory will be systematically introduced and applied to study strategic firm behaviour in a variety of general and more industry-specific market settings. In each case, we will analyse the implications of the market behaviour for consumers and society and explore the potential role for public policy with instruments like regulation, competition policy and patent policy.

ECON 703 15 Points
Labour Economics and Human Resources
An advanced survey with emphasis on microeconomic modelling, econometric analysis and policy applications. Topics include: labour force participation, investment in education, returns to education, unemployment, collective bargaining and wage dispersion, discrimination, modelling risk, crime and illegal labour markets, migration, and labour market outcomes of immigration.

ECON 711 15 Points
Macroeconomics 1
This is a core course in macroeconomic theory which addresses fundamental problems including economic growth, consumption and saving decisions, investment, unemployment, and fiscal policies in the context of mainstream models of the economy.

ECON 712 15 Points
Macroeconomics 2
This is an advanced course in dynamic macroeconomic modelling, with an emphasis on applications. Models of business cycles, growth, unemployment, and government policy are covered, drawing from papers at the current research frontier. Students will learn to apply these methods to analyse contemporary economic problems in New Zealand and other countries.

ECON 713 15 Points
Monetary Economics
Examines a number of advanced topics in monetary economics. Topics include: relations of money, prices and output, macroeconomic models with money, monetary policy, roles of central banks, and monetary business cycles.

ECON 721 15 Points
Econometrics 1
Core econometrics including theory and applications. The development of the classical linear regression model and extensions to the most general case. Applications to types of linear models involving cross-section and time-series data, and simultaneous equation models. The method of maximum likelihood, other extrema estimators and associated methods of testing.

ECON 723 15 Points
Econometrics 2
An overview of time series econometrics, designed to introduce a range of material in stationary and nonstationary time series including: modern model determination methods, unit root and cointegration theory, non-linear time series analysis and continuous
time models. Students will be introduced to practical time series forecasting methods.

ECON 726  
Microeconomics  
15 Points
Empirical analysis of microeconomic data, covering theoretical and practical issues. Model design, identification, estimation and hypothesis testing in a range of microeconomic contexts to provide a basis for the analysis of public policy and/or commercial decisions.

ECON 741  
Topics in International Trade  
15 Points
Advanced treatment of selected developments in international trade theory, current trade policy issues, and trade policy modelling.

ECON 742  
Trade Policy  
15 Points
Economic analysis of current trade policy issues, with an emphasis on the theoretical, empirical and policy dimensions of international trade negotiations in the WTO, and the spread of preferential trading arrangements such as free trade areas.

ECON 747  
The European Economies  
15 Points

ECON 751  
Advanced International Finance  
15 Points
A study of open-economy macroeconomic topics (theoretic, empirical and policy oriented), including models of exchange rate behaviour.

ECON 761  
Public Economics and Policy 1  
15 Points
Fundamental theorems of public economics, market failure, public choice theory, and distribution; the role of the economist in the making of public policy in a modern mixed economy, ideologies and critiques of the market model, the economics of the welfare state, welfare and tax reform in New Zealand, and applied poverty issues.

ECON 763  
Public Economics and Policy 2  
15 Points
Theoretical foundations of equity, taxation in partial and general equilibrium, limitations of private insurance markets, health insurance; interpreting the government’s budget, social insurance, the economics of an ageing population, pensions, savings issues, annuities and old age care, intergenerational and intra-generational equity issues.

ECON 764  
Health Economics  
15 Points
Economic aspects of health and health services. Analysis of expenditure on healthcare. The structure and financing of health services and health reform. Cost benefit and cost-effectiveness and analysis in healthcare. Specific healthcare issues in the New Zealand health system.

ECON 771  
Economics of Development  
15 Points
Contemporary issues in development economics. Topics include: the way economists’ approaches to leading development issues have evolved to the present; and leading development issues, including sources of economic growth, the role of population, human capital and innovation, labour and migration, international trade and foreign aid, and strategies for sustainable economic development. There is emphasis on the ‘Newly Industrializing Countries’ and other Third World developing countries.

ECON 772  
Trade and Development  
15 Points
Focuses on the link between trade and development and contemporary issues relating to trade strategies and structural adjustment policies with particular emphasis on developing countries.

ECON 773  
The History of Economic Thought  
15 Points
Covers a selection of topics in the history of economic ideas, including classical economics, post-classical microeconomics and macroeconomics including Keynesian, Austrian, institutional economics and behavioural economics. Topics in twentieth century economics and twentieth century debates on international monetary reform will be given emphasis.

ECON 775  
Economics of the Environment  
15 Points

ECON 776  
Experimental Economics  
15 Points
Experiments provide an important link between economic theory and observation. This course will (1) undertake a systematic evaluation of the existing experimental literature with emphasis on game theoretic experiments; (2) instruct students on how to design suitable experiments to test a theoretical conjecture; (3) teach students how to collect and analyse data in a controlled setting and (4) help students begin doing actual research.

ECON 781  
Microeconomic Theory 2  
15 Points
A variety of topics from theoretical microeconomics at the advanced level.

ECON 782  
Regulation and Competition Policy  
15 Points
This course discusses utility regulation linked to the economics of telecommunication, electricity, water and gas. It introduces the economic principles of competition policy and discusses them with the most recent regulation and competition policy cases in New Zealand and elsewhere.

ECON 783  
Energy Economics  
15 Points
Discusses regulation and market design issues for energy and carbon markets. Natural resource economics and electricity markets are covered in depth. Peak oil issues are discussed as well as the economics of climate change.

FINANCE 751 15 Points
Modern Corporate Finance
Examines fundamental principles of corporate financial theory and discusses current issues, seminal theoretical contributions and empirical evidence regarding those theories. Specific topics will be chosen from capital structure, dividend policy, security issuance, mergers and acquisitions, corporate control and initial public offerings.

FINANCE 761 15 Points
Portfolio Theory and Investment Analysis
Advanced coverage of contemporary issues in investments through readings of classic theoretical articles and recent empirical studies. Topics include: market efficiency and empirical anomalies, risk-return relationships and alternative investment vehicles and strategies. This course builds on material covered in FINANCE 261 and 361 and presumes the student has completed MATHS 208 or its equivalent.

FINANCE 762 15 Points
Risk Management
The theory and practice of financial risk management for portfolio managers with an emphasis on defining and measuring market risk. This course builds on material covered in FINANCE 362 and MATHS 208 with extensions to include the use of futures, options and other financial derivatives to manage market risk.

FINANCE 763 15 Points
International Finance
An examination of theoretical and empirical perspectives on important issues in international finance. Topics will include: financial management of a multinational enterprise, macroeconomic effects, currency risk management and international capital budgeting. A portion of the course will also be devoted to international portfolio investments and diversification. This course builds on knowledge gained in FINANCE 251, 261 and 702.

Human Resource Management

Postgraduate 700 Level Courses

HRMGMT 702 20 Points
Employment Law and Relations
Employer and employee rights and responsibilities, interests, ideologies and equity issues in employment relationships. The structure, strategies and behaviour of trade unions. The dynamics of collective bargaining and mediation including the nature of position-based and interest-based bargaining strategies.
Prerequisite: HRMGMT 707 or EDPROFST 738

HRMGMT 704 20 Points
Managing Change in Organisations
Conceptual, theoretical and practical perspectives on change management, examining the change agent role and issues associated with change management in the contemporary context. Individual, group and organisational strategies for change and the role of HRM in the effective management of change.
Prerequisite: HRMGMT 702 and 707, or BUSADMIN 761 and EDPROFST 738

HRMGMT 705 20 Points
Strategic Human Resource Management
The role of HR strategy in underpinning organisational viability and its potential to contribute to competitive advantage. The importance of contextual factors in shaping HR strategy, HR strategy, SMEs and entrepreneurial growth. Typologies of HR systems and their links to performance outcomes.
Prerequisite: HRMGMT 702, 707, 708

HRMGMT 706 20 Points
Personal and Professional Development
Professional competencies in HRM, including interpersonal skills, coaching and feedback skills, interviewing skills, negotiation skills, and career development skills.
Prerequisite: HRMGMT 707
HRMGMT 707 20 Points  
Staffing and Employee Development  
The ‘make versus buy’ decision in HRM. Studies of job analysis, recruitment, selection, socialisation, employee development and labour turnover. Management selection and development. Equal employment opportunity (EEO) issues.

HRMGMT 708 20 Points  
Performance Management and Reward Systems  
Prerequisite: HRMGMT 707 or EDPROFST 738

HRMGMT 760 20 Points

HRMGMT 761 20 Points  
Special Topic

Information Management

Stage I

INFOMGMT 192 15 Points  
Introduction to Web Development  
The rapid growth of the internet has had an enormous impact on the ways that companies conduct their business. Covers the design and programming requirements of internet-based applications. Builds applied skills in the development of web-based solutions to practical business problems.  
Prerequisite: INFOMGMT 191 
Restriction: INFOSYS 120, 280, COMPSCI 101, 105

Stage II

INFOMGMT 291 15 Points  
Business Analysis and Applications  
The rapid development of the internet has had an enormous impact on the ways that companies conduct their business. Covers the analysis and design requirements of web applications. Builds applied skills in developing web-based solutions to practical business problems.  
Prerequisite: INFOMGMT 192 
Restriction: INFOSYS 220

INFOMGMT 292 15 Points  
Database Applications  
Businesses need to develop effective mechanisms for storing and retrieving information. Examines different ways of understanding, storing, and viewing business data using the latest information technology tools. Builds skills in problem analysis, data modelling, and database design.  
Prerequisite: INFOSYS 110 
Restriction: INFOSYS 222

INFOMGMT 296 15 Points  
Information Systems for Business  
Integrates the study of Information Technology tightly within a business context. Focuses on the practical design and maintenance of information systems, including issues of information security, internal controls, data analysis and modelling.  
Prerequisite: MKTG 201 or 291 or ACCTG 102 or 192 or MGMT 294, and INFOMGMT 192 
Restriction: INFOMGMT 293, 294, 295, ACCTG 222

Stage III

INFOMGMT 391 15 Points  
Information Systems Management  
To use information effectively, businesses need people who are able to leverage a strong set of skills in Information Technology while also interacting with others who may not have these same skills. Covers current issues and future trends in the use of information communication technology, and focuses on the challenges managers face in linking information systems with other functional business areas.  
Prerequisite: Either INFOMGMT 291 or INFOSYS 220 and either INFOMGMT 292 or INFOSYS 222 
Restriction: INFOSYS 323

INFOMGMT 392 15 Points  
Digital Media Production  
Digital technologies are used to address communication needs identified from the ‘real’ business world. Specifically, each student develops practical skills in information visualisation, digital photography, videography, and the use of communication and presentation tools. Their work is informed by a study of the principles of multimedia learning followed by an application of these principles to broader communication strategies in both individual and group projects.  
Prerequisite: Either INFOMGMT 291 or INFOSYS 220 and either INFOMGMT 292 or INFOSYS 222

INFOMGMT 393 15 Points  
Data Mining and Decision Support  
Successful businesses generate immense amounts of data. Focuses on how businesses use information technology to extract value by converting raw data into useful business information. Develops applied skills in managing information to support effective business decision making.  
Prerequisite: Either INFOMGMT 291 or INFOSYS 220 and either INFOMGMT 292 or INFOSYS 222 
Restriction: INFOSYS 330

Information Systems

Stage I

INFOSYS 110 15 Points  
Business Computing  
Information Systems has the potential to deliver business value by strategically managing, coordinating and controlling organisations. Students will explore how Information Systems support transactional, decisional and collaborative business processes by capturing, processing, storing, and distributing information. The students’ challenge is to leverage Information Systems to manage and solve the problems facing enterprises, customers, and suppliers.  
Restriction: INFOMGMT 191, INFOSYS 120

Stage II

INFOSYS 220 15 Points  
Business Systems Analysis  
An Information Technology (IT) professional must understand how IT systems are constructed and tested and how quality is assessed, in order to manage, develop or provide innovative business solutions. Business Systems Analysis introduces systems development process concepts and activities,
with a strong focus on understanding the problem and solution through modelling.

Prerequisite: INFOSYS 110 or 120 or INFOMGMT 192 or COMPSCI 105

Restriction: INFOMGMT 292

INFOSYS 222

Database Systems

Managers and other knowledge workers find that many of their duties revolve around accessing, organising, and presenting organisational and external information. The ability to develop and use computer databases is becoming a critical skill that is required in many disciplines. These skills are developed through an introduction to data modelling, relational theory, database design, and the management of databases.

Prerequisite: INFOSYS 110 or 120 or INFOMGMT 192 or COMPSCI 105

INFOSYS 280

Web Development

Web developers require solid technical skills to make the most of the opportunities provided by the internet as a platform. Students learn to design, build and maintain interactive, feature-rich, database-driven websites. Students gain practical skills in using industry standard client-side and server-side technologies to solve business problems.

Prerequisite: INFOSYS 110 or 120 or COMPSCI 101 or INFOMGMT 191

Restriction: COMPSCI 280, INFOMGMT 192

Stage III

Note: With the permission of the Head of Department, BSc and BTech students may substitute COMPSCI 220 and 230 for INFOSYS 280 or COMPSCI 280 as a prerequisite, provided they have passed these courses with a B Grade or higher.

Note: Enrolment in INFOSYS 338 is subject to approval of the Head of Department.

INFOSYS 320

Information Systems Design

Information systems that are specifically designed for an organisation provide a considerable competitive advantage. This course addresses design at several levels: user experience, architecture and object-oriented software design. Students learn to manage the design process in a team environment, drawing on previous courses to take a system from analysis through design to a prototype implementation using the latest modelling and development environments.

Prerequisite: Either INFOMGMT 291 or INFOSYS 220 and either INFOMGMT 292 or INFOSYS 222 and either INFOSYS 280 or COMPSCI 280 or equivalent

INFOSYS 321

Enterprise Systems

Examines cross-functional integrated computer-based information systems, known as Enterprise Resource Planning (ERP) systems, designed to support an organisation’s information needs and operations. Considers issues associated with the selection, analysis, design, implementation and configuration of such systems. Investigates transaction processing, management information and decision support across an organisation’s business processes. Explores the characterisation of problems, in terms of process and information models.

Prerequisite: Any 15 points at Stage II in ACCCTG, COMPSCI, ENGSCI, INFOMGMT, INFOSYS, MKTG, OPSMGT, SOFTENG

Restriction: OPSMGT 333

INFOSYS 322

Data Communications and the Internet

Examines topics related to the internet and communication networks, with an overall focus on the internet layered model, and services and capabilities that IT infrastructure solutions enable in an organisational context to revolutionise business. Provides a pathway to complete the industry recognised CCNA certificate by including the ‘Network Fundamentals’ module of the Cisco Networking Academy Programme.

Prerequisite: INFOSYS 110 or 120 or INFOMGMT 192 or COMPSCI 101

Restriction: INFOSYS 224

INFOSYS 323

Management of Information Systems

Business operations depend on the effective and efficient operation of information and telecommunications systems. A disciplined management approach to routine business system operations is a key success factor for IT managers. This course is concerned with the management issues surrounding information and telecommunications systems, presents fundamental knowledge essential to managing this environment, and considers strategic issues related to technology use.

Prerequisite: Any 15 points at Stage II in ACCCTG, COMPSCI, ENGSCI, INFOMGMT, INFOSYS, MKTG, OPSMGT, SOFTENG

Restriction: INFOSYS 223 and INFOMGMT 391

INFOSYS 330

Databases and Business Intelligence

An in-depth study of the strategic, managerial and technical aspects of database systems and how data can be analysed in business intelligence systems. New and emerging database and business intelligence technologies are studied to highlight solutions in organisational settings. The strategic value of information is examined through practical application of business intelligence techniques.

Prerequisite: Either INFOMGMT 291 or INFOSYS 220 and either INFOMGMT 292 or INFOSYS 222 and either INFOSYS 280 or COMPSCI 280, or equivalent

Restriction: INFOMGMT 393

INFOSYS 338

Contemporary Issues in Information Systems

Examines emerging information technologies and explores their theoretical and practical implications. The focus will be on social networking and online communities such as micro blogging and massively multiplayer online role playing games (MMORPG).

Prerequisite: INFOSYS 110 or equivalent and 30 points at Stage II in ACCCTG, COMPSCI, ENGSCI, INFOMGMT; INFOSYS, MKTG, OPSMGT, SOFTENG

INFOSYS 339

LANS, WANS, and Wireless Infrastructure

Studies the design, implementation and management of reliable and scalable networks. Topics covered: Local Area Network (LAN), switching and Virtual LANs, internet routing protocols, wireless switching, congestion control and quality of service (QoS). Introduces students to network performance analysis using network simulation software. Provides a pathway to complete the industry recognised CCNA (Cisco Certified Network Associate) certificate by including CCNA’s ‘Routing Protocols and Concepts’ and ‘LAN Switching and Wireless’.

Prerequisite: INFOSYS 224 or 322
INFOSYS 341  
Management of Information Security  
15 Points  
An overview of activities, methods, methodologies, and procedures related to establishing sound information security policies. Topics include: defining security requirements; security management models and practices; risk management; identification and authentication; access control; information security technologies and encryption techniques. Some key legal and ethical issues associated with the management of information security will be discussed.  
Prerequisite: 15 points from INFOSYS 220, 222, 223, 224 or ACCTG 222 or INFOMGMT 291, 292

INFOSYS 344  
Special Topic  
15 Points

INFOSYS 345A  
Business Project  
15 Points  
Industry sponsored real-world project. Through on-site work a group of students will provide a solution to business needs of the sponsoring organisation. The projects will be offered from the domains of information systems or operations management. In the process of completing the projects, students will gain practical skills in group dynamics, public presentation skills, project management, and business behaviour.  
Prerequisite: Either INFOMGMT 291 or INFOSYS 220 and either INFOMGMT 292 or INFOSYS 222 and either INFOSYS 280 or COMPSCI 280 or equivalent; or OPSMGT 255 and 258 and GPA of 4 or higher. Final enrolment subject to course supervisor approval  
Restriction: INFOSYS 342  
To complete this course students must enrol in INFOSYS 345 A and B

Postgraduate 700 Level Courses

INFOSYS 720  
Information Systems Research  
15 Points  
A substantive review of research in the discipline of information systems. Behavioural, strategic and social issues relating to the design, implementation and impact of information technology applications will be studied.

INFOSYS 722  
Decision Support Systems  
15 Points  
A review of the literature in the area of decision support systems (DSS) and DSS frameworks. Understanding the process of decision-making and issues involved in the design, implementation and evaluation of DSS. Additional topics include data mining, user interfaces, knowledge-based DSS, and research directions in DSS. Knowledge gained will be applied through the design and implementation of a DSS prototype.

INFOSYS 725  
New Perspectives on Organisations and Information Systems  
15 Points  
Investigates major issues facing organisations in adopting, implementing and using information systems for competitive advantage. Explores a set of critical issues from both an academic and practical perspectives. Topics include: Strategic Information Systems, Ecommerce, Knowledge Management, the Emergence of the Business Process, ERP Implementation, Virtual Teams and Global IT, IS and Developing Countries.

INFOSYS 726  
Information Modelling  
15 Points  
A study of various approaches to modelling information systems. Complex decision support problems are viewed as abstractions made up of diverse objects such as data, models and interfaces. Focuses on the representation of the semantics of complex problems and their manipulation. Prominent approaches such as semantic, object-oriented, structured and unified modelling are studied. An organisational problem, modelled and implemented, forms the project section.

INFOSYS 727  
Advanced Information Security  
15 Points  
Focuses on technical security issues of the end systems used in today’s information technology applications. Presentation of the practical issues like identification and authentication, security of operating systems, cryptography, disaster recovery and contingency planning, is accompanied by discussion of theoretical models supporting these issues. Managerial aspects of information security issues as well as legal and ethical issues arising from protecting computer files both from a New Zealand and world perspective will be addressed.

INFOSYS 730  
Telecommunications Management  
15 Points  
Seeks to expose students to current issues in telecommunications and computer networking as the involved industries move towards network and service convergence. Uses a multidisciplinary approach consisting of communications technology evolution, network economics principles and legal and regulatory frameworks. Cases include: Ethernet and the battle for the local area standard, Carrier Ethernet as a wide area technology, MPLS and VPLS, cellular and data wireless communications, next-generation networks VoIP, IPTV.

INFOSYS 732  
Readings in Information Systems  
15 Points  
An independent study of the research literature in a particular area of information systems. An opportunity to investigate a topic in depth, and gain valuable research skills. The particular area of research must be jointly agreed upon by the lecturer and students, and approved by the Head of Department.

INFOSYS 734  
Electronic Commerce  
15 Points  
Focuses on major research issues covering the design of information systems architectures for business-to-business, business-to-consumer and cross-national processes. Application development and design strategies specific to electronic commerce are formulated and evaluated.

INFOSYS 735  
Special Topic in Information Systems  
15 Points

INFOSYS 737  
Enterprise Resource Planning Systems  
15 Points  
Examines the cross-functional integrated computer-based information systems, commonly referred to as Enterprise Resource Planning (ERP) systems. Systems, common business processes, re-engineering/change management, and enterprise reference models are introduced with a holistic and research-oriented perspective. Considers issues associated with the analysis, design, implementation, and configuration of such enterprise systems and investigates topics such as: supply chain, planning and control
systems, optimisation, scheduling systems, electronic commerce and business information warehousing.

INFOSYS 740  15 Points
System Dynamics and Complex Modelling
The concepts, theories and modelling tools of system dynamics are used to deal with the dynamic complexities arising from interdependencies and interactions amongst various parts and functions within organisations and societies alike. Qualitative and computer modelling are used to gain insight and to foresee the intended outcomes as well as unintended consequences of policies and strategic decisions. All aspects of organisations including HR, IT, operations, marketing and strategy are considered and their interdependencies explored.
Restriction: OPSMGT 765

INFOSYS 750  15 Points
Research Methods – Quantitative
A comprehensive review of the methodological issues in systems research, including detailed coverage of univariate and multivariate data analysis. Prerequisite: Any Stage II Statistics or equivalent Univariate Statistics course (consult the relevant Graduate Adviser in the Faculty of Business and Economics)

INFOSYS 751  15 Points
Research Methods – Qualitative

Prerequisite: 60 points from BUSADMIN 761–764, 771–774, 775
Restriction: MARKET 702

**MARKET 718** 15 Points
Marketing Communications
Analysis and evaluation of the individual elements of the marketing communications mix: advertising, direct marketing, sales promotion and public relations. Further, how these may be managed as an integrated programme to implement and support the brand, product or service strategy.
Prerequisite: 60 points from BUSADMIN 761–764, 771–774, 775
Restriction: MARKET 703

**MARKET 719** 15 Points
Advanced Marketing
An advanced study of marketing theory and practice relating to contemporary issues. Emphasis is on providing students with an in-depth knowledge of key topics in marketing, based on critical evaluation of the field. Typical topics covered included marketing strategy, branding, services marketing, and the impact of ICT.
Prerequisite: 60 points from BUSADMIN 761–764, 771–774, 775
Restriction: MARKET 708

*Note: As indicated in the respective regulations, courses MANAGEMENT 724, 725 are available for the MHealthMgt.*

**MANAGEMENT 705** 90 Points

**MANAGEMENT 705A** 45 Points

**MANAGEMENT 705B** 45 Points

Organisational Research Project
Supervised empirical investigation of general and strategic management initiatives within the organisational setting. May involve action research initiatives and/or development and implementation of strategies.
Prerequisite: MANAGEMENT 704 or 30 points from BUSINESS 703–705
To complete this course students must enrol in MANAGEMENT 705 A and B, or MANAGEMENT 705

**MANAGEMENT 706** 30 Points
Business Research: Innovation and Enterprise
An investigation of current and emerging knowledge on innovation, enterprise and growth. Involves an empirical investigation on the topic resulting in a written case or research report.
Prerequisite: MANAGEMENT 704

**MANAGEMENT 707** 30 Points
Business Research: Strategic Management
An investigation of current and emerging knowledge on strategic management. Involves an empirical investigation on the topic resulting in a written case or research report.
Prerequisite: MANAGEMENT 704

**MANAGEMENT 708** 30 Points
Business Research: Organisational Change
An investigation of current and emerging knowledge on organisational change. Involves an empirical investigation on the topic resulting in a written case or research report.
Prerequisite: MANAGEMENT 704

**MANAGEMENT 709** 30 Points

**MANAGEMENT 709A** 15 Points

**MANAGEMENT 709B** 15 Points

Dissertation
Prerequisite: MANAGEMENT 704 or 30 points from BUSINESS 703–705
To complete this course students must enrol in MANAGEMENT 709 A and B, or MANAGEMENT 709

**MANAGEMENT 724** 20 Points
Strategic Management of Professional Organisations
Advanced analysis of strategic management issues that confront health care and other professional organisations in a dynamic environment. These will include managing with professionals, organisation design, strategic planning and the management of change in professional organisations.
MANAGEMENT 725 20 Points
Contemporary Health Care Delivery Systems
Analysis of the management systems employed in contemporary health care organisations including case mix, managed care methods and health care integration systems. Comparative and international developments will be reviewed.

MANAGEMENT 797A 60 Points
MANAGEMENT 797B 60 Points
Thesis (Mgt)
Prerequisite: MANAGEMENT 704 or 30 points from BUSINESS 703–705
Restriction: MANAGEMENT 712
To complete this course students must enrol in MANAGEMENT 797A and B

New Venture Management

Postgraduate 700 Level Courses

NEWVENT 716 15 Points
Business Development Project
Supervised field project on a high-potential-growth organisation.
Prerequisite: NEWVENT 710 and 711
Restriction: NEWVENT 713

NEWVENT 717 15 Points
Special Topic
Prerequisite: NEWVENT 710
Restriction: NEWVENT 714, 715

NEWVENT 718 15 Points
Entrepreneurial Thought in Action
Entrepreneurial perspectives on opportunity, risk, and growth; entrepreneurial business development and entrepreneurial action. The context for business development.
Prerequisite: 60 points from BUSADMIN 761–764, 771–774, 775
Restriction: NEWVENT 601, 701

Prerequisite: 75 points from BUSADMIN 761–764, 771–774, 775, NEWVENT 719
Restriction: NEWVENT 601, 712

Operations Management

Stage II

OPSMGT 255 15 Points
Introduction to Operations and Supply Chain Management
An introduction to important decision areas in operations and supply chain management.

Modelling and analytical skills will be developed and supporting techniques/tools will be introduced using spreadsheets. Common qualitative and quantitative aspects of supply chain management will be discussed.
Prerequisite: INFOSYS 110 or 120 and STATS 108 or 101 or 191

OPSMGT 258 15 Points
Business Process Design
Introduces the elements of business process management through mapping and design. Emphasis is on how organisations identify, design and improve essential business processes. Includes the use of software tools to model and analyse processes for continuous performance improvements.
Prerequisite: INFOSYS 110 or 120 and STATS 108 or 101 or 191

Stage III

OPSMGT 357 15 Points
Project Management
An introduction to the management of projects in organisations, with a particular emphasis placed on the interdisciplinary nature and broad application of projects. Topics covered include people management, organisational planning, and resource issues.
Prerequisite: INFOSYS 110 or 120 or INFOMGMT 192 and 30 points at Stage II

OPSMGT 370 15 Points
Operations and Supply Chain Strategy
Investigates and explores complex and dynamic issues associated with the design and execution of operations and processes. Promotes an applied, integrated, and systemic approach towards operations across supply chains.
Prerequisite: OPSMGMT 255 or ENGEN 303

OPSMGT 371 15 Points
Business Logistics
Covers common issues in business logistics. Focuses on coordinating logistics across supply chains. Topic coverage features modelling using spreadsheets and includes transportation, forecasting, and inventory control models suitable for use in a distribution and supply chain context.
Prerequisite: OPSMGMT 255 or STATS 255 or ENGSCI 255

OPSMGT 372 15 Points
Quality Management
The principles for delivering quality products and services that have value for both external and internal customers, while reducing waste throughout the system.
Prerequisite: STATS 108 or 101 or INFOMGMT 192 and 30 points at Stage II

OPSMGT 373 15 Points
e-Business and Supply Chains
Studies the role of information technology in the management of supply chains in the business environment. Examines the use of exchanges and internet-enabled collaboration in planning and product/process design. Topics include enterprise resource planning systems, decision support systems, electronic data interchange, and the internet.
Prerequisite: OPSMGMT 258

OPSMGT 376 15 Points
Strategic Procurement
Strategic issues in procurement and supply management, covering analysis, planning, and
management of domestic and international procurement and supply activities within the supply chain context.

Note: Students should be aware that several topics of the course make use of basic calculus concepts such as derivatives and maximisation problems.

Prerequisite: OPSMGT 255 or ENGEN 303 and 30 points at Stage II

OPSMGT 384  15 Points
Special Topic

OPSMGT 385  15 Points
Special Topic

Postgraduate 700 Level Courses

OPSMGT 732  15 Points
Readings in Operations Management
A comprehensive review of the research literature in a particular area of operations management. The particular area of research must be jointly agreed upon by the lecturer and student(s) and approved by the Head of Department.

OPSMGT 752  15 Points
Research Methods – Modelling
Mathematical modelling methods in operations management research. Includes simulation techniques, Markov decision models, optimisation methods, game theoretic formulations, and other modelling methods.

OPSMGT 760  15 Points
Advanced Operations Systems
A core course in the postgraduate programme in Operations and Supply Chain Management. Provides a deeper understanding of managing internal and external supply chains. Importance of language processing in proactive improvement is emphasised.

OPSMGT 762  15 Points
Quality Management
An investigation of the key concepts and theories of total quality management and its links between systems theory and learning organisations. Prerequisite: STATS 108 or 101 or equivalent

OPSMGT 764  15 Points
Systems Analysis for Operations Management
Business operations are becoming increasingly integrated and multifaceted, demanding novel approaches to managing their complexity. For example, the management of supply chains and of projects is particularly demanding, typically involving interrelated mission-critical activities that organisations must plan and control if they are to maximise their business opportunities and utilise their resources effectively. Develops some of the key concepts of stochastic and dynamic control and shows how they are applied in different circumstances.

OPSMGT 766  15 Points
Fundamentals of Supply Chain Coordination
Focuses on issues fundamental to supply chain coordination. The impact of information asymmetry, limits of information sharing, incomplete contracts, and other selected topics typically covered in separate subjects such as Contract Theory, Industrial Organisation and Implementation Theory are studied in the supply chain management context. The course will be taught from a quantitative perspective.

OPSMGT 780  15 Points
Special Topic in Operations Management

OPSMGT 788  30 Points
Dissertation in Operations Management for BCom(Hons)
Restriction: OPSMGT 789

OPSMGT 796A  60 Points
OPSMGT 796B  60 Points
Thesis in Operations Management for MCom
To complete this course students must enrol in OPSMGT 796 A and B

Operations Management Graduate Programmes

Postgraduate 700 Level Courses

OPSMAN 703  20 Points
Operations Management
An understanding of the importance of the operations management function for organisations, the strategic issues involved and the tools and techniques used to solve operations management issues. Topics include: decision analysis, resource planning, capacity planning and scheduling, supply and demand issues, location and layout and other issues considered core to the operations of an organisation.

OPSMAN 705  20 Points
Project Management
An exploration of the methods and issues inherent in planning programmes and projects. Topics include: the role of project management in new business thinking, the dynamics of project management, project organisation planning and scheduling, using computerised project management tools, politics and leadership in projects, building and managing a team and handling conflict.

OPSMAN 710  15 Points
Project Management
An exploration of the methods and issues inherent in planning programmes and projects. Topics include: the role of project management in new business thinking, the dynamics of project management, project organisation planning and scheduling, using computerised project management tools, politics and leadership in projects, building and managing a team and handling conflict. Prerequisite: 60 points from BUSADMIN 761–764, 771–774, 775

Restriction: OPSMAN 705

Operations Research

Stage III

OPSRES 385  15 Points
Simulation Modelling
Uncertainty exists in all management decisions and simulation is used for analysing systems in industry. This course focuses on modelling real-world problems using a commercial simulation tool. Industrial case studies will motivate the content of the course. Topics include the simulation process, general queue modelling, modelling networks (computer or transportation networks) and simulating operations (machine scheduling or assembly line modelling). The emphasis is on “learning by doing”. Prerequisite: STATS 255 or ENGSCI 255
Property

Stage I

PROPERTY 102  15 Points
Introduction to Property
Knowledge of how property markets work and how properties are valued, managed and financed is critical for property professionals and for understanding modern life. Key terms and definitions surrounding the property profession and introductory analyses of supply and demand characteristics unique to property markets will be key learning outcomes. Students will also learn key concepts surrounding residential property valuation and construction.

PROPERTY 251  15 Points
Property Finance and Investment
The application of general theories of property investment, discounted cash flow, risk and return, and financial mathematics is vital for property professionals. Debt and equity financing options are discussed for residential and income-producing property and development projects.

PROPERTY 241  15 Points
Land-use Planning and Controls
Provides an understanding of the Resource Management Act and regional and district plans and how these affect land use and subdivision as well as resource consent applications and other property processes.

PROPERTY 221  15 Points
Property Marketing
Effective marketing is at the core of successful property management, development and investment. Covers buyer behaviour, marketing research, segmentation and targeting, the marketing plan, the listing process and selling techniques all in the context of the property industry. Develops essential skills for independent thinking, strategic problem solving, effective teamwork and business report writing.

PROPERTY 211  15 Points
Property Valuation
As every property is unique, the valuation of property presents many challenges and has a strong influence on the financial viability of both existing buildings and the development process. General models for valuing commercial property, industrial property, and land will be introduced.

PROPERTY 281  15 Points
Building Construction
Knowledge of construction is vital in understanding property valuation, property management and property development. Building materials, structural options, and building services have a strong influence on how a property performs both financially and functionally. Provides general residential and commercial construction knowledge and an understanding of the construction process.

PROPERTY 311  15 Points
Advanced Valuation
The theory and practice of valuing special categories of urban property. Topics include: valuation of CBD land and office buildings, shopping centres, hotels and leasehold land. Also covered are: statutory valuations (compulsory purchase), going-concern valuations, litigation, arbitration, and professional ethics and practice.

PROPERTY 321  15 Points
Advanced Property Marketing
An understanding of how to market complex properties and real estate services is essential in creating a competitive advantage for property professionals. Covers review of current related academic literature, preparation of marketing strategies, marketing plans and market analysis relevant to the property market. Develops skills in analysing academic literature and advanced skills for independent and creative thinking, strategic problem solving, effective teamwork and business report writing.

PROPERTY 331  15 Points
Advanced Property Management
Property asset management theory through the study of its practical application in the strategic and estate management of property portfolios held in public and...
private ownership. The role of corporate real estate management in large organisations.
Prerequisite: PROPERTY 231 and 251

PROPERTY 342 15 Points
Property Development
An introduction to the process of property development, including application of analytical methods to case studies.
Prerequisite: PROPERTY 241, 251, 261

PROPERTY 351 15 Points
Advanced Property Finance and Investment
An understanding of how to research, analyse and advise on property financing and investment decisions is an essential analytical skill for property professionals. Topics include: asset pricing models, capital structure decision, weighted average cost of capital and adjusted present value, property as an asset class, and financing and investment strategies.
Prerequisite: PROPERTY 251

PROPERTY 371 15 Points
Property Project
A research project, feasibility study or structured internship on an approved topic.
Prerequisite: BProp Part II
Restriction: PROPERTY 372

PROPERTY 372 15 Points
Applied Valuation Project
The completion of a range of practical valuation reports in conjunction with industry mentors.
Prerequisite: PROPERTY 311
Corequisite: PROPERTY 371

PROPERTY 380 15 Points
Property Issues and Trends
Property development and investment practices have significant consequences for economic, social and environmental outcomes. Uses relevant literature to provide a critical analysis of contemporary dynamics and problems in international and national property markets.
Prerequisite: BProp Part II

PROPERTY 382 15 Points
Māori Land Issues
History of land conflicts in New Zealand, Waitangi Tribunal process, and development of portfolio management strategies.
Prerequisite: PROPERTY 241 and 271

PROPERTY 384 15 Points
Special Topic
A seminar or individual course of study on a specialised aspect of property.
Prerequisite: BProp Part II

Postgraduate 700 Level Courses

PROPERTY 701 15 Points
Research Methods for Property
A core course for all postgraduate students. Introduction to quantitative and qualitative research techniques and research design. Assists students to think critically when designing a research study.

PROPERTY 715 15 Points
Specialised Valuations in Property
Advanced studies in specialised valuations involving unique, unusual or infrequently traded properties.

PROPERTY 723 15 Points
Property Market Behaviour
An exploration into the behavioural approach to property research providing for a deeper understanding into market behaviour of participants within the property industry.
Prerequisite: PROPERTY 321

PROPERTY 724 15 Points
Property Trends and Issues
Analysis of specialised topics associated with emerging trends and issues in the property industry using national and international literature and case studies.

PROPERTY 733 15 Points
Seminar in Property Management
Advanced studies in the theory and practice of property management.
Prerequisite: PROPERTY 331

PROPERTY 743 15 Points
Seminar in Property Development
Advanced studies in the theory and practice of property development.
Prerequisite: PROPERTY 261, 342, 344, 351

PROPERTY 753 15 Points
Seminar in Property Finance and Investment
Advanced studies in the theory and practice of property finance and investment.
Prerequisite: PROPERTY 351

PROPERTY 754 15 Points
Financial Analysis for Property
Practical application of real estate financial software, through interactive examples and case studies. Participants will be exposed to software capabilities, fundamentals and unique nuances.

PROPERTY 755 15 Points
International Property Markets
Property markets are characterised by significant institutional differences that affect the nature and performance of national markets. Analysis of socio-economic and cultural factors influencing the operation of international markets.

PROPERTY 763 15 Points
Urban Economic Analysis
Analysis of macro-economic and institutional factors that affect urban property markets. Covers dynamic processes in the build environment from a variety of theoretical perspectives and examines the nature of local government and planning processes as they affect property development.
Prerequisite: PROPERTY 261 and 351 and, 362 or 363

PROPERTY 773 15 Points
GIS and Property Analysis
The increasing availability of geographically referenced property data offers significant potential for property research and modelling. Covers fundamentals of Geographic Information Systems (GIS) (concepts, principles and functions) and essential skills for applying GIS to solve real-world property problems.

PROPERTY 784 15 Points
Market Analysis for Property
Provides market analysis techniques and theories
relating to commercial, industrial, and residential property. Includes the application of supply and demand analyses, retail trade area analysis, and forecasting techniques.
Corequisite: At least 30 points selected from PROPERTY 713–763

PROPERTY 785 15 Points
Special Topic
A seminar or individual study on a specialised aspect of property.
Corequisite: At least 30 points selected from PROPERTY 701–773, and 784

PROPERTY 786 15 Points
PROPERTY 789 30 Points
Honours Dissertation
A dissertation on a topic in property approved by the Head of Department.
Prerequisite: At least 30 points selected from PROPERTY 703–763

PROPERTY 790 30 Points
Dissertation
A dissertation on an approved topic in property.
Prerequisite: At least 30 points selected from PROPERTY 701–773, and 784

PROPERTY 796A 60 Points
PROPERTY 796B 60 Points
Thesis for MProp
Prerequisite: PROPERTY 701
To complete this course students must enrol in PROPERTY 796 A and B

Faculty of Creative Arts and Industries

Architectural Design

Stage I

ARCHDES 100 20 Points
Design 1
The Conceptual: An introduction, in studio format, to the conceptual realm in which architecture operates, making connections to the cultural, physical, formal, social and political dimensions of architectural design. Emphasises the development of skills and abilities in conceptual thinking and design realisation using a range of representational materials.
Restriction: ARCHDES 110. 750.100

ARCHDES 101 20 Points
Design 2
The Formal: An introduction, in studio format, to the discipline of architectural organisation and form-making. Re-examines the traditional notions of typology, precedent, geometry, parti, and diagrams. Emphasises strategies that build on and transform understanding for organising form given contemporary programmes and digital modes of representation.
Restriction: ARCHDES 111. 750.101

ARCHDES 200 30 Points
Design 3
The Domestic: An introduction to those things both familiar and unfamiliar to our understanding of home, family, privacy, identity, and community. Explores both the most intimate and the most exposed aspects of dwelling, and addresses scales ranging from the room to the block.
Prerequisite: ARCHDES 100 or 110 or 750.100
Restriction: ARCHDES 210. 750.200

ARCHDES 201 30 Points
Design 4
The Constructed: An introduction to full-scale fabrication. Offers the opportunity to work directly with various materials, fabrication processes, and detailing. Requires students to understand the full range of drawings required to move from design concept to actual construction.
Prerequisite: Any two of ARCHDES 100, 101, 110, 111, 750.100, 750.101
Restriction: ARCHDES 211, 750.201

Stage II

ARCHDES 300 30 Points
Design 5
The Collected: An introduction to a complex architectural thinking. Examines both conceptual and exceptional spaces and develops an understanding of the corresponding architectural systems.
Prerequisite: ARCHDES 200 or 210 or 750.200
Restriction: ARCHDES 310, 750.300

ARCHDES 301 30 Points
Design 6
The Systemic: The culmination of all aspects – conceptual, formal, material, tectonic, structural – of architectural design within the context of a larger network of infrastructural services. Also requires an understanding of the full range of drawings describing the workings of the building as both an active ‘machine’ and place for human comfort.
Prerequisite: ARCHDES 200 or 210 or 750.200
Restriction: ARCHDES 310, 750.300

ARCHDES 374 10 Points
Elective Study
Topics approved by the Head of School of Architecture and Planning.

ARCHDES 375 10 Points
Elective Study
Topics approved by the Head of School of Architecture and Planning.

Stage IV

ARCHDES 400 30 Points
Design 7
Advanced design studies in which social, cultural, environmental and technological issues are investigated and synthesised in the context of an architectural project and setting of moderate complexity.
Prerequisite: Any two of ARCHDES 300, 301, 310, 311, or 750.300 and 750.301
Restriction: ARCHDES 410, 750.400

For further information please refer to the note on page 380.
ARCHDES 401 30 Points
Design 8
Advanced design studies in which social, cultural, environmental and technological issues are investigated and synthesised in the context of an architectural project and setting of moderate complexity.
Prerequisite: ARCHDES 301 or 311 or 750.301
Restriction: ARCHDES 411, 750.401

Stage V
ARCHDES 502 30 Points
Design 9
Culminating studies in which students are expected to address a challenging and conceptually complex architectural design project, together with developed design studies sufficient to explain the building's construction, structure, materials and environmental performance. A report is required to elucidate the design.
Prerequisite: ARCHDES 400 or 410 or 750.400
Restriction: ARCHDES 500, 512, 750.500

ARCHDES 503 30 Points
Design 10
Culminating studies in which students are expected to engage with complex architectural design issues, with an opportunity to explore areas of specific personal interest, leading to an architectural design. Documentation is required to elucidate the design.
Prerequisite: ARCHDES 400 or 410 or 750.400
Restriction: ARCHDES 501, 513, 750.501

ARCHDES 512 34.28 Points
Design 9
Culminating studies in which students are expected to address a challenging and conceptually complex architectural design project, together with developed design studies sufficient to explain the building's construction, structure, materials and environmental performance. A report is required to elucidate the design.
Available to transition students only.
Prerequisite: ARCHDES 400 or 750.400
Restriction: ARCHDES 500, 502, 750.500

ARCHDES 513 34.28 Points
Design 10
Culminating studies in which students are expected to engage with complex architectural design issues, with an opportunity to explore areas of specific personal interest, leading to an architectural design. Documentation is required to elucidate the design. Available to transition students only.
Prerequisite: ARCHDES 400 or 750.400
Restriction: ARCHDES 501, 503, 750.501

Postgraduate 700 Level Courses
ARCHDES 700 30 Points
Advanced Design 1
A studio based inquiry into an architectural topic approved by the Head of School of Architecture and Planning intended to facilitate in-depth study that is both tailored to a student's own interest and aligned with the School's research clusters, sharing workshops, discussions, presentations and tutorials.

ARCHDES 701 30 Points
Advanced Design 2
A studio based inquiry into an architectural topic approved by the Head of School of Architecture and Planning intended to facilitate in-depth study that is both tailored to a student's own interest and aligned with the School's research clusters, sharing workshops, discussions, presentations and tutorials.

ARCHDES 771 10 Points
Design Elective 1
An advanced study in architectural design on a topic approved by the Head of School of Architecture and Planning.

ARCHDES 796A 60 Points
Thesis
A thesis involving a design-based discourse on a topic approved by the Head of School of Architecture and Planning for the degree of Master of Architecture (Professional) under the guidance of an appointed supervisor.
Prerequisite: ARCHDES 700, 701 and ARCHPRM 700, 701
To complete this course students must enrol in ARCHDES 796 A and B

Architectural History, Theory and Criticism

Note: Stage I, II and III Architectural History, Theory and Criticism courses may be available to both Architecture and non-Architecture students.

Stage I
ARCHHTC 102 15 Points
ARCHHTC 102G 15 Points
Modern Architecture and Urbanism
Examines through case studies the cultural contexts that shaped the development of architecture, urban design, landscape and the environment during the twentieth century. Emphasis is placed on the historical developments that influenced changes in style and the theoretical contexts that shaped attitudes towards inhabitation, social organisation, national identity, and cultural self-expression, amongst other things.
Restriction: ARCHHTC 100

Stage II
ARCHHTC 235 10 Points
History and Theory of Architecture and Urbanism 1
Examines late modern, postmodern and contemporary architecture and urbanism. Emphasis is placed on the analysis of buildings, projects and developments that have the potential to inform contemporary architectural design, and on the reading and writing of architectural criticism.
Prerequisite: ARCHHTC 102 or 102G, or ARCHHTC 100 and 101

ARCHHTC 236 10 Points
History and Theory of Architecture and Urbanism 2
An introduction to architectural and urban theory with emphasis on significant developments in the modern and postmodern periods. Introduction to the contribution of architectural theory to an understanding of the phenomenon of architecture, of architectural design practice and of the problems that
architecture and urbanism must solve in the early twenty-first century.
Prerequisite: ARCHHTC 102 or 102G, or ARCHHTC 100 and 101

### Stage III

**ARCHHTC 335**  
10 Points

**History and Theory of Architecture and Urbanism 3**
Examines through case studies architectural landscapes, buildings, ensembles and urban projects, ornamental and iconographic programmes, and architectural texts from pre-history to the end of the fourteenth century. In considering the broad range of cultural and building traditions across the Old World, distinctions to be drawn between them with respect to: conceptual preoccupations, structural and spatial ideas and their use.
Prerequisite: ARCHHTC 235 and 236, or 202 and 230  
Restriction: ARCHHTC 233

**ARCHHTC 336**  
10 Points

**History and Theory of Architecture and Urbanism 4**
Examines through case studies the cultural contexts that shaped the development of architecture, urban design, landscape and the environment from the fifteenth to the eighteenth century. Emphasis on the historical developments that influenced changes in style and the theoretical contexts that shaped attitudes towards inhabitation, social organisation, national identity and cultural expression, amongst other things.
Prerequisite: ARCHHTC 235 and 236, or 202 and 230  
Restriction: ARCHHTC 234

**ARCHHTC 337**  
10 Points

**History and Theory of Architecture and Urbanism 5**
Examines the development of architecture, urban design, landscape and the environment in historical, geographical and cultural contexts.
Prerequisite: ARCHHTC 235 and 236, or 202 and 230, or 233 and 234  
Restriction: ARCHHTC 333

**ARCHHTC 338**  
10 Points

**History and Theory of Architecture and Urbanism 6**
Examines the development of architecture, urban design, landscape and the environment in historical and theoretical contexts.
Prerequisite: ARCHHTC 235 and 236, or 202 and 230, or 233 and 234  
Restriction: ARCHHTC 334

**ARCHDRC 374**  
10 Points

**Elective Study**
Topics approved by the Head of School of Architecture and Planning.

**ARCHDRC 375**  
10 Points

**Elective Study**
Topics approved by the Head of School of Architecture and Planning.

### Stage IV

**ARCHHTC 470**  
10 Points

**Elective Study**
Topics approved by the Head of School of Architecture and Planning.

**ARCHHTC 471**  
10 Points

**Elective Study**
Topics approved by the Head of School of Architecture and Planning.

---

**Postgraduate 700 Level Courses**

**ARCHHTC 771**  
10 Points

**History Elective 1**
An advanced study in architectural history, theory and criticism on a topic approved by the Head of School of Architecture and Planning.

### Architectural Media

#### Stage I

**ARCHDRC 102**  
10 Points

**Architectural Media I**
An introduction to drawing and computing techniques related to design studio practice and an overview of the analytical and critical value of these techniques for design.
Restriction: ARCHDRC 100, 101

#### Stage II

**ARCHDRC 202**  
10 Points

**Architectural Media II**
The study of drawing, computing and related art practices in terms of architectural representation and analysis and the practice of selected techniques.
Prerequisite: Both ARCHDRC 100 and 101, or ARCHDRC 102  
Restriction: ARCHDRC 200, 201

#### Stage III

**ARCHDRC 300**  
10 Points

**Life Drawing**
Analysis and understanding of proportion, structure, scale and how the human figure relates to architectural space and form.
Prerequisite: ARCHDRC 202 or 201 or 752.201  
Restriction: 752.300

**ARCHDRC 301**  
10 Points

**Measured Drawing**
The measurement, recording and drawing of existing New Zealand architecture of historical and cultural significance.
Prerequisite: ARCHDRC 202 or 201 or 752.201  
Restriction: 752.301

**ARCHDRC 303**  
10 Points

**Freehand Drawing**
The examination, through penetrative seeing, of the basic structure, form, tonal colour and textural elements found in the environment and the development of these awarenesses in knowledgeable graphic communications with an emphasis on perceptual expression.
Prerequisite: ARCHDRC 202 or ARCHDRC 201 or 752.201  
Restriction: 752.303

**ARCHDRC 304**  
10 Points

**Introduction to Architectural Photography**
An introduction to architectural photography and photographic techniques.

**ARCHDRC 370**  
10 Points

**Elective Study**
Topics approved by the Head of School of Architecture and Planning.
ARCHDRC 371 10 Points  
Elective Study  
Topics approved by the Head of School of Architecture and Planning.

Elective Study  
Topics approved by the Head of School of Architecture and Planning.

ARCHDRC 373 10 Points  
Elective Study  
Topics approved by the Head of School of Architecture and Planning.

**Stage IV**

**ARCHDRC 402** 10 Points  
Advanced Drawing and Computing  
An introduction to advanced theory and criticism of design media in architecture and research in drawing and computing.  
Prerequisite: Both ARCHDRC 200 and ARCHDRC 201, or ARCHDRC 308  
Restriction: ARCHDRC 400

**ARCHDRC 470** 10 Points  
Elective Study  
Topics approved by the Head of School of Architecture and Planning.

**ARCHDRC 471** 10 Points  
Elective Study  
Topics approved by the Head of School of Architecture and Planning.

**Postgraduate 700 Level Courses**

**ARCHDRC 771** 10 Points  
Architectural Media Elective 1  
An advanced study in architectural media on a topic approved by the Head of School of Architecture and Planning.

**Stage V**

**ARCHPRM 501** 10 Points  
Practice Management 1  
Introduction to the New Zealand legal system and the law of contract and torts. Negotiations, negligence, disputes and remedies relevant to architects in practice. Introduction to the professional institute, the registration procedure, risk management and professional ethics.  
Prerequisite: Either ARCHPRM 401 and 402, or 756.400  
Restriction: ARCHPRM 500, 531, 756.500

**ARCHPRM 502** 10 Points  
Practice Management 2  
Prerequisite: Either ARCHPRM 401 and 402, or 756.400  
Restriction: ARCHPRM 500, 532, 756.500

**ARCHPRM 531** 8.57 Points  
Practice Management 1  
Introduction to the New Zealand legal system and the law of contract and torts. Negotiations, negligence, disputes and remedies relevant to architects in practice. Introduction to the professional institute, the registration procedure, risk management and professional ethics.  
Available to transition students only.  
Prerequisite: ARCHPRM 401, 402  
Restriction: ARCHPRM 500, 501

**ARCHPRM 532** 8.57 Points  
Practice Management 2

**Postgraduate 700 Level Courses**

**ARCHPRM 700** 15 Points  
Professional Studies 1  
The management of the building project from inception to tendering. An examination of client needs and agreements, feasibility studies, project constraints, cost planning and control, consultants, administration and quality control. An analysis of all aspects of the contracts and documentation during construction and final project accounts.

**ARCHPRM 701** 15 Points  
Professional Studies 2  
The New Zealand legal system and the law of contract and torts; negotiations, negligence, disputes and remedies relevant to architects in practice. An examination of the requirements for establishing and maintaining an architectural practice as a business venture as well as strategic market management, financial planning, insurance and taxation.

**ARCHPRM 771** 10 Points  
Professional Studies Elective 1  
An advanced study in architectural professional studies on a topic approved by the Head of School of Architecture and Planning.
Architectural Technology

Stage I

ARCHTECH 106 15 Points
Architecture and Sustainability
People and internal and external environments through history; climate and microclimate; resources; materials, production, properties and environmental impact; comfort – psychology and measurement (thermal, lighting, sound); the sustainable house in New Zealand; architecture, techniques and systems; building and lifestyle, and measurement techniques. Restriction: ARCHTECH 102, 103, 758.101

ARCHTECH 107 10 Points
Design Technology I
Structural concepts and construction principles relating to light timber, steel, concrete and other typical construction materials for domestic scale buildings. In depth investigations of structural systems, building envelopes and detailing. Application of principles to design studio projects. Restriction: ARCHTECH 100, 104, 105, 758.100

Stage II

ARCHTECH 202 10 Points
Thermal and Services Design I
Climate, energy and sustainability considerations in building. Thermal performance, ventilation and condensation. Mechanical, electrical and hydraulic services for domestic-scale and low-rise buildings. Prerequisite: ARCHTECH 106 or 103 or 758.101 Restriction: 758.201, ARCHTECH 212

ARCHTECH 203 10 Points
Lighting and Acoustic Design I

ARCHTECH 206 10 Points
Design Technology II
Structural concepts and construction principles relating to light timber, steel, concrete and other typical construction materials for domestic scale buildings. In-depth investigations of structural systems, building envelopes and detailing. Application of principles to design studio projects. Prerequisite: ARCHTECH 107, or 104 and 105 Restriction: ARCHTECH 204, 205, 200, 758.200

ARCHTECH 207 15 Points
Design Technology II
Development of structural and construction principles and systems. Outline of forces acting in buildings. Characteristics and behaviour of common building materials. Standard details in residential housing. Outline of building codes, health and safety regulations and site operations. Active and passive building services and technology including heating, cooling, ventilation, water, waste, electrical services and vertical transportation. Application to design studio projects. Prerequisite: ARCHTECH 107, or 104 and 105 Restriction: ARCHTECH 200, 204, 205, 206, 758.200

ARCHTECH 208 15 Points
Environmental Design I

ARCHTECH 212 8.57 Points
Environment and Services 1
Climate and energy considerations in building. Thermal performance, ventilation and condensation. Mechanical, electrical and hydraulic services for low-rise buildings. Available to transition students only. Prerequisite: ARCHTECH 106 or 103 Restriction: ARCHTECH 202

ARCHTECH 213 8.57 Points
Environment and Services 2
Natural and artificial lighting; noise control and acoustical design principles and their application in buildings; requirements and recommendations to practice. Available to transition students only. Prerequisite: ARCHTECH 106 or 103 Restriction: ARCHTECH 203

Stage III

ARCHTECH 307 10 Points
Environmental Design II
Heat and the thermal environment. Light and the luminous environment. Sound and the sonic environment. Energy and resources. Integrating environmental design and performance. Relevant physical principles reviewed with application and integration of the four topic areas and their relationship to human comfort. Simulation tools, measurements and techniques. Quantitative and qualitative approach to sustainable practices. Prerequisite: ARCHTECH 208, or 202 and 203, or 212 and 213, or 758.201 Restriction: ARCHTECH 308, 309, 318, 319

ARCHTECH 312 10 Points
Design Technology III
Development of construction and structural principles for complex, large scale and multi-storey buildings. Investigation into advanced structural systems, façade technology, material selection and detailing. Introduction of factors affecting buildability, environmental performance. Fire protection and building code requirements. Application to design studio projects. Prerequisite: ARCHTECH 207, or 206, or 204 and 205 Restriction: ARCHTECH 311, 475
Stage IV

ARCHTECH 421
Design Technology IV
10 Points
Investigations of complex, larger-scale buildings with particular emphasis on the evaluation and selection of conceptually appropriate structural systems, materials and assembly. Factors affecting buildability, environmental performance, fire protection and building code requirements will be introduced. Self-directed research into, and representation of, technical systems and details of selected case study buildings and students’ studio projects.
Prerequisite: ARCHTECH 312 or 311 or 475
Restriction: ARCHTECH 420, 400

ARCHTECH 470

ARCHTECH 771
Technology Elective 1
10 Points
An advanced study in architectural technology on a topic approved by the Head of School of Architecture and Planning.

Stage III

ARCHGEN 300
Design as Research
10 Points
An investigation into the nature of the architectural design process, the research process, and the ways in which these two processes may be creatively combined in the context of a Masters level design thesis, in order that the thesis process and thesis outcomes might achieve the expectations associated with a research-based thesis.
Restriction: ARCHGEN 400, 410, 758.400

Stage V

ARCHGEN 590
Research Report
20 Points
A research report on a topic approved by the Head of School of Architecture and Planning.

ARCHGEN 591
Research Report
20 Points
A research report on a topic approved by the Head of School of Architecture and Planning.

ARCHGEN 595
Dissertation
30 Points
A dissertation involving applied research and/or a development project on a topic approved by the Head of School of Architecture and Planning.

Postgraduate 700 Level Courses

ARCHGEN 700
Research Process
10 Points
An introduction to the research process including: research paradigms and strategies, the identification of research topics and research questions, the review and critique of literature, research methodologies, the structuring of research theses and reports, referencing and the preparation of a bibliography. The focus of the course is on preparing students to undertake their own research projects.
Restriction: ARCHGEN 400, 753.400, 753.600

ARCHGEN 702
Research Process
15 Points
An introduction to the research process including: research paradigms and strategies, the identification of research topics and research questions, the review and critique of literature, research methodologies, the structuring of research theses and reports, referencing and the preparation of a bibliography. The focus of the course is on preparing students to undertake their own research projects.
Restriction: ARCHGEN 400, 700

ARCHGEN 711
Special Topic in History, Theory and Criticism 1
15 Points
Seminar topic approved by the Head of School of Architecture and Planning in the field of History, Theory and Criticism studies.

To complete this course students must enrol in ARCHGEN 799 A and B, or ARCHGEN 799

Dance Studies

Stage I

DANCE 101  15 Points
Introduction to Dance and Creative Processes
To develop an understanding of our moving bodies through movement awareness, dance improvisation, choreography and creative and analytic writing. Students will undertake both theoretical and practical classes focusing on a range of practices that dancers and movement practitioners use to facilitate kinaesthetic awareness, experimentation, communication and choreography. Students will explore somatic theory and practice, improvisation scores, choreography and dance analysis. (DANCE 101 not available for BDanceSt)

DANCE 107  15 Points
Dance History and Contexts
Study of the historical development in western theatre dance from the nineteenth century to the beginning of the twentieth century.

DANCE 110  15 Points
Contemporary Dance and Choreography 1
A study of contemporary dance practices through the choreography, creative facilitation and techniques of contemporary dance makers. For BDanceSt students only.

DANCE 112  15 Points
Dance Kinesiology
Introduction to physiological and kinesiological analysis of dance movements. The study of skeletal alignment, muscular balance and mechanical efficiency.

DANCE 120  15 Points
Dance Vocabulary I
Introducing the study of diverse dance vocabulary including ballet, contemporary dance; and the field of somatics. Students will examine specific technical requirements of identified dance vocabulary.

DANCE 121  15 Points
Dance Technique
Continuation of work undertaken in DANCE 120 with exploration of skills, repertoire, and merging dance styles.
Prerequisite: DANCE 120

DANCE 131  15 Points
Dance Education
The study of dance education practice and theory that shapes teaching and learning of dance in school and community contexts. Note, this course does not meet the requirements for teacher registration in New Zealand.

Stage II

DANCE 200G  15 Points
Dance and Culture
Examines the interrelationship between dance and wider political and cultural movements through practical dance classes and theoretical investigations into diverse cultural environments around the world. Students physically and theoretically engage in the study of various dance forms such as Tango, Salsa, Dabkeh, traditional Chinese dance and Bharata Natyam.
Prerequisite: 60 points at Stage I in any subject(s)

DANCE 201  15 Points
Dance and Interdisciplinarity
Building integrated connections with other arts disciplines such as music, literature, art.
Prerequisite: DANCE 101 or 110

DANCE 207  15 Points
Choreography and Performance
Focuses on the development and consolidation of choreographic and performance skills.
Prerequisite: Any 30 points at Stage I in Dance Studies

DANCE 210  15 Points
Contemporary Dance and Choreography 2
Study of contemporary choreography practice and theory. Students create choreography that may be shared through film and/or live performances.
Prerequisite: DANCE 101 or 110

DANCE 211  15 Points
Special Topic
Prerequisite: Any 30 points at Stage I in Dance Studies

DANCE 212  15 Points
New Zealand Dance Contexts and History
Emphasis is on the socio-historical developments of dance in the twentieth century. Choreographers, dancers, designers and composers who have created, influenced and shaped dance in New Zealand will be studied via lectures, videos, scores, and reconstructions.
Prerequisite: DANCE 107

DANCE 215  15 Points
Special Topic
Prerequisite: Any 30 points at Stage I in Dance Studies

DANCE 220  15 Points
Dance Vocabulary II
Exploring and analysing contemporary dance practices and techniques. Movement skills and performance skills will be developed integrating personal movement with techniques.
Prerequisite: DANCE 120

DANCE 222  15 Points
Safe Dance Practices
Establishing the theory and practice of safe dance practices within education, performance and health related contexts. Anatomy, kinesiology and dance conditioning methodologies will be studied in relation to dance practice.
Prerequisite: DANCE 112

DANCE 231  15 Points
Community Dance
Entering diverse community settings and teaching
Choreographic research methods are introduced pedagogy strategies specific to contemporary dance. Refining and deepening dance practices and Dance Vocabulary III

DANCE 320 15 Points
Dance Vocabulary III
Refining and deepening dance practices and pedagogy strategies specific to contemporary dance. Choreographic research methods are introduced with emphasis upon articulating key questions and processes for problem solving.

Prerequisite: DANCE 131

DANCE 250 15 Points
Special Topic
Prerequisite: Any 30 points at Stage I in Dance Studies

DANCE 300 15 Points
Dance Project
Resident/Guest Artist project that gives students an intensive experience of a particular choreographic vocabulary and repertoire. Not available to BA students.

Prerequisite: 30 points at Stage II in Dance Studies

DANCE 301 15 Points
Dance and Improvisation
Developing an embodied personal practice, and understanding of the theory and practice of contact improvisation and its influence in dance, education and community contexts.

Prerequisite: Any 30 points at Stage II in Dance Studies

DANCE 302 15 Points
Dance in Aotearoa/New Zealand
An examination of dance in New Zealand including Māori, Pacific Island, European, and Asian influences. Emphasis will be on developments during the twentieth century of traditional form into contemporary practice, indigenous forms in NZ society, the developments in ballet, contemporary and popular dance.

Prerequisite: DANCE 212

DANCE 310 15 Points
Contemporary Dance and Choreography 3
The study of contemporary dance practices through the choreography and techniques of contemporary dance makers.

Prerequisite: DANCE 210

DANCE 312 15 Points
Dance Production
Dance works are choreographed on the students by leading dance professionals in their chosen genre, resulting in a dance production. Not available to BA students.

Prerequisite: Any 45 points at Stage II in Dance Studies

DANCE 314 15 Points
Dance and Technology
Project based study of the interaction between technology and dance. Including hands-on practice with video, digital photography and the study of dance film.

Prerequisite: Any 30 points at Stage II in Dance Studies

DANCE 315 15 Points
Dance Composition
Studio based course developing improvisational and compositional skills. Choreographic principles are studied as guidelines for structure and design in movement.

Prerequisite: Any 30 points at Stage II in Dance Studies

DANCE 320 15 Points
Dance Vocabulary III
Refining and deepening dance practices and pedagogy strategies specific to contemporary dance. Choreographic research methods are introduced with emphasis upon articulating key questions and processes for problem solving.

Prerequisite: Any 30 points at Stage II in Dance Studies

DANCE 322 15 Points
Professional Practices
Developing skills and knowledge in planning and managing for careers in the diverse dance professions. Students will develop arts management and financial business skills, such as learning to write grant applications, CVs and personal plans that relate to employment and funding issues.

Prerequisite: DANCE 222

DANCE 331 15 Points
Dance Education Research
Analysis of dance teaching and learning philosophies, issues and theories as they are translated from texts and curriculum into classroom and community practice. This course does not meet the requirements for teacher registration in New Zealand.

Postgraduate 700 Level Courses

DANCE 730 30 Points
Dance Intensive
Advanced practice in the physicality and creation of dance.

Prerequisite: Departmental approval required

DANCE 734 15 Points
Dance Education and Community Dance Research
Students will examine issues and philosophies critical to the development of dance education and community dance in New Zealand and internationally. Personal pedagogical practice will be reviewed and dominant discourses critiqued.

Prerequisite: Departmental approval required

DANCE 735 15 Points
Research in Choreography
Students will investigate choreographic practice as a location for artistic production and academic research. They will reflect on their own choreographic practice through studio-based activities, while examining existing choreographies, choreographers and choreographic theory.

Restriction: DANCE 733, 760

DANCE 750 15 Points
Dance Writing, Performance and Analysis
Students will examine writing as a creative, analytical and performance practice. Students will discuss elements of creative writing such as metaphor, cadence, rhythm, character, narrative and subtext, and analytical writing such as reviews, critiques and transcripts. Students will practice manipulating these elements in order to develop their own writing from, through and about dance.

Prerequisite: Departmental approval required

DANCE 751 15 Points
Research Methodologies
An introduction to empirical and performance research methods. The course will address issues related to the development of dance education and community dance research. Students will examine issues and philosophies critical to the development of dance education and community dance in New Zealand and internationally. Personal pedagogical practice will be reviewed and dominant discourses critiqued.

Fine Arts

Stage I

FINEARTS 101 30 Points
Studio 1.1
Students will work on a range of ‘ideas based’ activities that will challenge them progressively to develop and extend their knowledge and skills. These range from short focused projects to those allowing more time for research and personal development. Students will cover a range of the disciplines available in the school and be encouraged to explore in a cross-disciplinary manner.
Prerequisite: FINEARTS 103 or 104

FINEARTS 102 30 Points
Studio 1.2
An extension of projects from FINEARTS 101 Studio 1.1. Students will be encouraged to develop personal creative directions with a focus on experimentation and interdisciplinary art and design outcomes.
Prerequisite: FINEARTS 101
Corequisite: FINEARTS 103 or 104

FINEARTS 103 15 Points
Drawing and Related Practices
An introduction to different approaches to drawing and its relationship with contemporary practices in art and design. Including traditional approaches to drawing and drawing techniques. Students will also explore drawing as a conceptual process. Research which investigates drawings as both a technical and conceptual practice is encouraged.
Corequisite: FINEARTS 101 or 102

FINEARTS 104 15 Points
Studio 1: Introduction to Critical Studies
An introduction to some key terms used in the discussion of contemporary art and design presented and discussed with reference to students’ learning in FINEARTS 101 and 102 in particular. This provides both an introduction to contemporary discourses and a means of enabling students to understand such discourses in relation to their own practices.
Corequisite: FINEARTS 101 or 102

Special Topic

Stage II

FINEARTS 201 30 Points
Studio 2.1
Provides an understanding of contemporary artistic practice relevant to students’ developing artistic interests. Students engage with current art and/or design ideas, methodologies and positions and become experienced in understanding their own practice in relationship to contemporary practices in an increasingly reflexive manner. Consists of the supervised completion of a number of prescribed briefs from which students select.
Prerequisite: FINEARTS 101, 102, 103 and 104 or FINEARTS 100
Corequisite: FINEARTS 203

FINEARTS 202 30 Points
Studio 2.2
Focuses on the conditions of reception relevant to students’ work including: ways meaning is created; how art and/or design works are read; and the significance of presentation strategies. Consists of the supervised completion of longer briefs, of which one is self-generated.
Prerequisite: FINEARTS 201

FINEARTS 203 15 Points
Studio 2.3
Study and exploration through practice of an issue relevant to a discipline or area of contemporary discourse. Students will understand, explore and analyse a selected issue through readings, discussions and production and presentation of studio work.
Prerequisite: FINEARTS 101, 102, 103 and 104 or FINEARTS 100
Corequisite: FINEARTS 201 or 202

FINEARTS 204 15 Points
Studio 2 Critical Studies
Presents a range of different modes of cultural production and discusses the relationships of these with studio practices. It extends on the learning in FINEARTS 104 and leads to a more complex understanding of the ways in which art and design is produced and experienced.
Prerequisite: FINEARTS 101, 102, 103 and 104 or FINEARTS 100
Corequisite: FINEARTS 201 or 202

FINEARTS 205 15 Points
Special Topic
FINEARTS 206 15 Points
Fields of Practice 2
Allows students to study and explore through practice an issue relevant to a media area, with the aim of encouraging reflexivity in relation to media processes. In this course students will understand, explore and analyse a selected issue through readings, discussions and production and presentation of studio work.
Prerequisite: FINEARTS 101, 102, 103, 104, 201, 203
Corequisite: FINEARTS 202

FINEARTS 210G 15 Points
Understanding Contemporary Visual Arts Practice
How does the contemporary artist and designer work? This course presents first hand, locally engaged practitioners’ perspectives on creative practice. On successful completion of this course students will be able to access local, contemporary art and design with confidence, and to discuss examples of practitioners’ methodologies and areas of investigation. Course work will involve active exploration of the local art world.
Prerequisite: 60 points at Stage I in any subject/s

FINEARTS 211G 15 Points
Understanding Contemporary Fashion Design
Investigates the relationship between fashion design and identity to build understanding of the increasing rapidity of clothing change as both the product of individual choice and the manifestation of a need for community. The emphasis will be on the consumption of fashion and its relationship to the human body with reference to fashion theory in the context of the broader literatures of gender, class and ethnicity.

Stage III
FINEARTS 302 30 Points
Studio 3.1
Builds on the conceptual, material, technical, and contextual work undertaken in Studio 2. Students will explore and develop, through studio activities, a range of methodologies required to generate and sustain an independent practice. Students are required to pursue open-ended exploration and critical analysis within their making and thinking with an emphasis on experimentation and reflexivity.
Prerequisite: FINEARTS 201, 202, 203, 206 or FINEARTS 200
Corequisite: FINEARTS 304

FINEARTS 303 30 Points
Studio 3.2
Extends the self-directed aspect of FINEARTS 301 through work on one or two long-term personal projects. A key focus is the identification of and response to a contextual issue relevant to contemporary art and/or design. Students will begin to develop an understanding of their practice within the context of a wider field of contemporary art and design practices.
Prerequisite: FINEARTS 302, 304

FINEARTS 304 15 Points
Studio 3.3
Builds on the different disciplines or areas of contemporary discourse explored in Studio 2. Students will study issues relevant to their individual practice and analyse, extend and develop an understanding of them through readings, discussions and the production and presentation of studio work.
Prerequisite: FINEARTS 201, 202, 203, 206 or FINEARTS 200
Corequisite: FINEARTS 302 or 303

FINEARTS 305 15 Points
Studio 3 Critical Practices
Analyzes and provides discussion for the different ways in which art and design engage with social structures that, in turn, define creative practices. The course leads to a critical understanding of the insertion of practices into wider fields, which provides students with a means of understanding their studio-based practices in a range of relevant professional contexts.
Prerequisite: FINEARTS 201, 202, 203 or FINEARTS 200
Corequisite: FINEARTS 302 or 303

FINEARTS 306 15 Points
Special Topic

FINEARTS 307 15 Points
Fields of Practice 4
Building on the media areas explored in Studio 2, this course allows students to study and explore an idea or issue in and around an area of contemporary art and/or design discourse. Students will investigate, analyse and develop the selected idea or issue through readings, discussions alongside the production and presentation of studio work.
Prerequisite: FINEARTS 101, 102, 103, 104, 201, 202, 203, 206, 302, 304
Corequisite: FINEARTS 303

**Sound Recording and Design**

**Postgraduate 700 Level Courses**

**SOUND 702**  
15 Points

**Live Recording Research and Practice**  
The construction of electronic and electro-acoustic systems, microphone design, application and placement; engineering suitable systems for live studio and 'in concert' recording. Particular emphasis on acoustic instruments/ensemble recording.

**SOUND 703**  
15 Points

**Physical and Cognitive Sound**  
The application of physical acoustic sound properties to the recording process, the physiology and functioning of the ear, aural cognition and human perception, and sound processing as these affect the production and recording process. Audience preferences in live and recorded sound.

**SOUND 706**  
15 Points

**Sound Design**  
The application of technological music skills to a range of media. The selection, preparation and integration of electronic or electro-acoustic sounds into live drama, video, film, web sites etc, as background music, sound effects or other component parts of multimedia productions or installations. Introduction to aesthetic considerations for sound design and to technological methodologies such as surround format and audio/video synchronisation.

**SOUND 707**  
15 Points

**Acoustics for Recording**  
Study of the behaviour of sound in an enclosed space. Moves progressively towards research, analysis of design criteria and the engineering of appropriate acoustic environments. The primary focus is on recording studios and control rooms. The practical testing of acoustic spaces and electronic systems is covered, as are certain aspects of budgeting for recording studio construction.

**SOUND 710**  
15 Points

**Research in Sound**  
Guided research in a topic chosen with approval of the academic supervisor. Assessed work may be academic, technical or creative.

**Creative Sound Design and Installation**  
The creation and application of electronic and electro-acoustic music in multi-media projects and/or installations. The creation of effective sound environments. The collaborative use of sound design to supplement installations in other media and the creation of interactive sound sculptures whether real or virtual.

**SOUND 791A**  
15 Points

**SOUND 791B**  
15 Points

**Professional Practice and Research**  
An audio engineering research course, in which an investigation into professional, technological or industrial issues is conducted through practical experience in a professional/industrial setting.
With approval of the coordinator and subject to availability of suitable placement, this course may include placement and internship in practical settings throughout New Zealand. Professional practice is to be complemented by written work presenting theoretical and technical insights based on the work undertaken. Students considering enrolling for this course must obtain prior departmental approval.

To complete this course students must enrol in SOUND 791 A and B

Visual Arts

---

Stage I

VISARTS 151  15 Points  
Contextual Studies 1A  
An introduction to some key terms used in the discussion of contemporary art and applied media practices. Provides an opportunity to explore the contexts of contemporary creative practices and their connection to a range of relevant other academic disciplines. The course will be delivered so as to link with students' studio practice and their learning in VISARTS 171.

VISARTS 152  15 Points  
Contextual Studies 1B  
An extension of VISARTS 151 Contextual Studies 1A. Students will be encouraged to investigate critically some of the key concepts used in the discussion of contemporary art and applied media practices. In addition to continuing to provide an introduction to contemporary discourses the course will encourage and enable students to understand such discourses in relation to their own practices.

VISARTS 161  15 Points  
Drawing 1A  
An introduction to different approaches to drawing and their relationship to contemporary practices in art and applied media. Develops skills in visualisation, exploration, interpretation and communication of ideas through drawing in relation to given topics. In addition to traditional and experimental drawing techniques students will be encouraged to explore drawing as a conceptual process.

VISARTS 162  15 Points  
Drawing 1B  
An extension of VISARTS 161 Drawing 1A. The course expands on the exploration and practice of a diverse range of drawing methodologies by focusing on ideas-driven approaches to drawing and their relationship to contemporary art and applied media. In addition to traditional and experimental drawing techniques students will be encouraged to explore drawing as a conceptual process.

VISARTS 171  30 Points  
Studio 1A  
Students will work on a range of activities that will establish the core languages of the study and practice of contemporary practices in art and applied media. These will challenge them progressively to develop their knowledge and skills. Students will cover a range of areas of practice relevant to contemporary art and design with an emphasis on experimentation.

VISARTS 172  30 Points  
Studio 1B  
An extension of VISARTS 171. Students continue to work on a range of activities that establish the core languages of the study and practice of contemporary practices in art and applied media. An independent project with outcomes that build on students' learning during the year is developed. Students develop this project from a conceptual and critical base and with interdisciplinary outcomes.

Stage II

VISARTS 251  15 Points  
Contextual Studies 2  
Selected topics of relevance to aspects of contemporary practices and theories of visual arts and applied media. Students will be encouraged to investigate those topics critically to develop a fuller understanding of the contexts of contemporary art, applied media and related fields. Encourages and enables students to understand such discourses in relation to their own practices and to recognise contexts of potential connection.  
Prerequisite: VISARTS 151, 152, 161, 162, 171, 172
VISARTS 261 15 Points
Drawing 2A
A programme of drawing study and practice that is oriented toward the development of drawing as an ideas-based and ideas-generating resource for studio outcomes. The course is delivered through directed briefs that give students the opportunity to extend their knowledge and practice of drawing.
Prerequisite: VISARTS 151, 152, 161, 162, 171, 172

VISARTS 262 15 Points
Drawing 2B
A programme of drawing study and practice that is oriented toward the development and consolidation of drawing as a means of supporting and expanding outcomes in studio practice. The course is delivered through directed briefs that give students the opportunity to extend their knowledge and practice of drawing.
Prerequisite: VISARTS 151, 152, 161, 162, 171, 172

VISARTS 271 10 Points
Studio Practice 2A
Enables students to develop technical skills in selected areas of studio practice in art and applied media. The course allows for students to develop areas of practice that extend and/or complement their studio practice in VISARTS 273.
Prerequisite: VISARTS 151, 152, 161, 162, 171, 172

VISARTS 272 10 Points
Studio Practice 2B
Enables students to develop additional technical skills in selected areas of studio practice in art and applied media to those offered in VISARTS 271. The course allows for students to develop areas of practice that extend and/or complement their studio practice in VISARTS 274.
Prerequisite: VISARTS 151, 152, 161, 162, 171, 172

VISARTS 273 20 Points
Studio 2A
Provides an understanding of contemporary practices in art and applied media relevant to students’ developing studio practice interests. Students will engage with current methodologies, ideas and practical issues and become experienced in understanding their interests in a reflexive manner. Consists of the supervised completion of prescribed briefs.
Prerequisite: VISARTS 151, 152, 161, 162, 171, 172

VISARTS 274 20 Points
Studio 2B
Provides an extended understanding of contemporary practices in art and applied media relevant to students’ developing studio practice interests. Students will engage with current methodologies, ideas and practical issues and become more experienced in understanding their interests in an increasingly reflexive manner. Consists of the supervised completion of prescribed briefs with students encouraged to adopt an increasingly independent position.
Prerequisite: VISARTS 151, 152, 161, 162, 171, 172

VISARTS 275 15 Points
Studio Special Topic 2A
A development of Part I Studio courses in selected fields.

Stage III

VISARTS 351 15 Points
Contextual Studies 3
A readings-based programme emphasising a critical engagement with contemporary and historic visual arts, applied media and other relevant theories and ideas. Drawn from a range of textual sources, it encourages students to engage with a variety of texts before enabling them to develop individualised reading programmes that complement their studies in VISARTS 372.
Prerequisite: VISARTS 251, 261, 262, 271–274

VISARTS 361 15 Points
Drawing 3A
A development of VISARTS 262, students are encouraged to advance media and conceptual skills in drawing relevant to their developing studio interests. Consists of the supervised completion of an extended brief that gives students the opportunity to experiment with and develop drawing and drawing-related outcomes that realise an independent position.
Prerequisite: VISARTS 251, 261, 262, 271–274

VISARTS 362 15 Points
Drawing 3B
The refinement of media and conceptual skills and knowledge towards the development of an independent drawing practice. Through supported critical supervision in studio, students are encouraged to initiate, develop and realise a body of drawing and drawing-related outcomes. The course develops understandings of appropriate modes of exhibition and/or professional submission of those outcomes.
Prerequisite: VISARTS 251, 261, 262, 271–274

VISARTS 371 30 Points
Studio 3A
A development of VISARTS 274, students are encouraged to advance media and conceptual skills in art and applied media studios relevant to their studio practice interests. Consists of the supervised completion of an extended brief that gives students the opportunity to develop studio outcomes that realise an independent position.
Prerequisite: VISARTS 251, 261, 262, 271–274

VISARTS 372 30 Points
Studio 3B
Through supported critical supervision in studio, students are encouraged to initiate, develop and realise a body of studio work that supports the development of an independent studio practice. Develops understandings of appropriate modes of exhibition and/or professional submission of that work. It also encourages students to understand their work in relation to the context of a wider field of contemporary art and applied media practices.
Prerequisite: VISARTS 251, 261, 262, 271–274

VISARTS 373 15 Points
Studio Special Topic 3A
A development of Part II Studio courses in selected fields.

Stage IV

VISARTS 471 60 Points
Studio 4A
Facilitated studio and contextual research project, oriented towards personalised studio outcomes in art and/or applied media. Students are encouraged
to experiment with methodologies and ideas relevant to their field of inquiry in a manner that develops knowledge and skills that establish their independent practice. Establishes a sound understanding of an area or areas of practice and relevant contexts that may be extended in VISARTS 472.

Prerequisite: VISARTS 351, 361, 362, 371, 372

VISARTS 472 60 Points
VISARTS 472A 30 Points
VISARTS 472B 30 Points
Studio 4B
Facilitated studio and contextual research, oriented to the refinement of technical and conceptual skills and knowledge relevant to the realisation of a coherent outcome or set of outcomes resulting from studio-based independent research. A development of the research project initiated in VISARTS 471, emphasis will be given to the development of presentation strategies appropriate to the exhibition and/or professional submission of the outcomes of studio research.

Prerequisite: VISARTS 351, 361, 362, 371, 372, 471
To complete this course students must enrol in VISARTS 472 A and B, or VISARTS 472

Faculty of Education

Academic Practice

Postgraduate 700 Level Courses

ACADPRAC 701 30 Points
ACADPRAC 701A 15 Points
ACADPRAC 701B 15 Points
Learning, Teaching and Assessment
Participants will become familiar with theoretically informed scholarly literature on tertiary learning and teaching, including the educational literature of their own disciplines, and they will test pedagogical theory against practice. All assignments and assessments will be integrated as closely as possible with the participants' current teaching activities.

To complete this course students must enrol in ACADPRAC 701 A and B, or ACADPRAC 701

ACADPRAC 702 15 Points
Academic Citizenship and Professionalism
Designed to help academic staff negotiate the apparently conflicting demands of teaching, research and service. Participants will explore the governmental, institutional and disciplinary contexts in which their professional practice takes place, and they will devise and implement synergistic strategies for fostering their own continuing professional development as teachers, researchers, and citizens of the academy.

ACADPRAC 706 15 Points
Independent Project
A guided research project based on current issues in learning and teaching. Participants will be assigned to work one-on-one with a supervisor.

Disability Studies

Stage I

DISABLTY 110 15 Points
Introduction to Intellectual Disability
An overview of the characteristics of people with an intellectual disability. Covers definition, assessment and classification systems, etiology, and educational, social, behavioural and medical services. Discusses the physiological, psychological, sociological, and educational implications of having an intellectual disability. Current trends in care, education and habilitation will be examined from both descriptive and best practice perspectives.

DISABLTY 111 15 Points
Disability and Support
Examines key perspectives and influences found in support for disabled people. The role of staff and services is critically analysed in light of concepts such as, autonomy, choice and self-determination. Alongside these, practice for supported living and transition to employment and continuing education are examined.

DISABLTY 112 15 Points
Theories of Disability
Introduces the way in which society defines and constructs disability. A range of discourses and cultural understandings related to disability are examined. The historical development of social understandings and accounts of the lived experience of disability are examined.

Prerequisite: SOCWORK 112
Restriction: ACE 962.601

DISABLTY 113G 15 Points
Making Disabilities: The Construction of Ideas
Examines the expression of social and cultural ideas of disability in popular culture through film, television and print media. The course aims to develop skills to examine the construction and maintenance of concepts of disability and disabling identities in popular culture. The consequences of these processes are also discussed and their implications for perpetuating social devaluation, discrimination, and disadvantage.

Stage II

DISABLTY 230 15 Points
Positive Behaviour Support
An introduction to critical features of positive behaviour support which have emerged from applied behaviour analysis with a focus on community participation, and person-centred values. Assists students to examine assumptions about behaviour, undertake problem identification and functional assessment, and design and evaluate behaviour plans in relation to community settings.

Prerequisite: Any 30 points passed from the BHumServ Schedule
Restriction: ACE 560.708, EDSPED 230

DISABLTY 281 15 Points
Special Topic
Prerequisite: Any 30 points passed from the BHumServ Schedule
**Stage III**

**DISABLTY 311**  
**Disability Research in Human Services**  
A critical examination of the social science research in the field of disability studies. Introduces a range of methodologies and methods of data collection and analysis commonly used in disability research. The course will promote the critical evaluation of a range of research approaches.  
Prerequisite: Any 30 points passed at Stage II from the BHumServ Schedule

**DISABLTY 312**  
**Quality of Life**  
An in-depth examination of the subjective and objective nature of the quality of life construct as it relates to the experience of disabled people. Key features and theories will be explored, with an emphasis on the application of the construct to service provision and support.  
Prerequisite: Any 30 points passed at Stage II from the BHumServ Schedule

**DISABLTY 313**  
**Contemporary Disability Theory and Policy**  
Examines contemporary theory and policy in the health and disability sector and critiques theories and models of disability, mental health and aging. Critically examines the interface between the state and the individual and includes an examination of changing assumptions of needs, rights and responsibilities in the context of the provision of disability support.

**DISABLTY 314**  
**The Legal Context of Disability Support**  
Explains and evaluates features of the health and disability, accident and rehabilitation environments in New Zealand. Introduces and examines current legislation relevant to the health and disability sector including mental health and support for older adults including the rights of service users.

**DISABLTY 315**  
**Management Processes in Disability Support**  
Offers a framework for the critique and analysis of the impact of personal professional practice on needs assessment and service coordination provision in the context of middle level management. In consultation with an off-site professional supervisor and on-site colleague, students will complete practical requirements related to the theory and practice of contract management.

**DISABLTY 316**  
**Special Topic**  
Prerequisite: Any 30 points passed at Stage II from the BHumServ Schedule

**Education**

**Stage I**

**EDUC 113**  
**Current Issues in Education**  
Educational issues are pressing concerns in our society. The course will help develop understanding of the background of today’s public debates around schooling and will introduce ways in which educational thought and research address big topics.  
Restriction: EDUC 118

**EDUC 114**  
**Introduction to Māori Education**  
An introduction to Māori education and to the education of Māori in Aotearoa. A range of critical issues related to Māori experiences both in and as a result of schooling and education in Aotearoa, and Māori educational interventions that have emerged, are examined.  
Restriction: EDUC 103, EDPROFST 100

**EDUC 115**  
**Introduction to Child and Adolescent Development**  
Study of factors influencing children’s development and socialisation within the culturally and linguistically diverse context of New Zealand. Research from developmental psychology and from family and parenting will be drawn upon to explore physical, emotional, social, cognitive and language development during childhood and adolescence.

**EDUC 116**  
**Introduction to Educational Thought**  
Why do we go to school? What is the purpose of schooling in society and do good grades translate into good jobs? An introduction to the study of education from sociological, historical and philosophical perspectives with reference to the forces that have shaped the development of education, especially in New Zealand. Understanding social inequalities in education relating to ethnicity, gender and class form a central concern of this course.

**EDUC 117**  
**Teaching and Learning: An Educational Psychological Perspective**  
Includes an examination of core aspects of educational psychology that include thinking, learning, and behaving. An analysis of relevant theory and research within psychology in education: topics include behaviour analysis, measurement and assessment, cognition, socialisation, and individual differences. Students will explore these in relation to different educational settings and contexts, for example, culture, community, school, and classroom.  
Restriction: EDUC 111, 121, 121G

**EDUC 118**  
**History and Society in New Zealand Education**

**Science Education Primary**  
15 Points  
Develops an appreciation of the nature of science that supports conceptual understandings and quality teaching and learning approaches in science education. Addresses questions such as: How do teachers design quality learning experiences based on the science curriculum so that positive engagement and effective learning can occur for a diverse range of learners? How is learning monitored and assessed?  
*Restriction: ACE 924.531, EDCURRIC 204, EDCURRM 105*

**EDCURRIC 106**  
**Social Studies Education Primary**  
15 Points  
Develops students' knowledge and skills associated with planning for teaching and learning in Social Studies. Addresses questions such as: What do teachers need to know and understand about the history, nature and purpose of Social Studies education? How are curriculum requirements, teaching methodologies, management strategies and resources used to plan for students' diverse needs? How is learning monitored and assessed?  
*Restriction: ACE 926.531, EDCURRIC 107*

**EDCURRIC 107**  
**Technology Education Primary**  
15 Points  
Develops knowledge, skills and attitudes associated with planning, teaching and assessing for children's learning in Technology Education. Addresses
questions such as: What do teachers need to know about the nature and purpose of Technology Education? How do teachers design quality learning experiences for a diverse range of learners? How is learning monitored and assessed?
Restriction: ACE 925.501, EDCURR 106, 209, EDCURRM 107

EDCURRIC 110  
Dance/Drama in the Early Years
Develops fundamental knowledge, skills and attitudes associated with planning, teaching and assessing children's dance and drama learning in early childhood. Addresses questions such as: Why are dance and drama important to children's learning? How do teachers design quality learning experiences that encourage individual responses from a diverse range of learners? How do we assess children's learning?
Restriction: ACE 922.622

EDCURRIC 111  
Experiencing Technology
Develops knowledge and understanding of the components of technological literacy as it relates to young children. Develops understanding of appropriate pedagogical strategies to enhance children's learning in technology. Addresses questions such as: What is technological literacy? How can we develop technological literacy in young children? What environments encourage children's exploration of technological experiences?
Restriction: ACE 925.501, 925.601

EDCURRIC 112  
Hauora: Early Years Movement
Develops knowledge and understanding of the place of movement in childhood development, growth and learning. Examines questions such as: What is the nature and purpose of physical activity in the early years? What learning and teaching strategies, teacher disposition and practices ensure quality experiences for learning of, through and about movement for diverse learners?
Restriction: ACE 923.621

EDCURRIC 114  
Music in the Early Years
Develops fundamental understanding of knowledge, skills, and attitudes required to assess, plan, and facilitate children's learning through listening, singing, moving, playing and creating with music. Addresses questions such as: What is the value of music in early childhood? How do teachers design quality-learning experiences that motivate and enhance children's learning through music?

Visual Arts in the Early Years
Develops fundamental knowledge, skills and attitudes associated with planning, teaching and assessing children's visual arts learning in early childhood. Addresses questions such as: Why is visual arts important to children's learning? What are effective design features of quality learning experiences that encourage individual responses from a diverse range of learners? How do we assess children's learning?
Restriction: ACE 922.624

EDCURRIC 130  
Physical Education Practice 1
Introduces students to the practical foundations of physical education. Involves experiential learning including residential field-based experiences. Addresses such questions as: How do I perform selected physical activities, improve my technical knowledge of the competencies required in the selected activities, analyse selected movements and provide feedback?
Prerequisite: EDCURRIC 130

EDCURRIC 131  
Physical Education Practice 2
Develops students' competency and knowledge about the physical foundations of physical education. Emphasis is placed on experiential learning. Addresses such questions as: Do I have the knowledge and competence: to be able to perform selected physical activities, to apply appropriate technical knowledge to specific physical activities, and to analyse selected movements and provide feedback?

EDCURRIC 132  
Bio-physical Foundations of Health and Physical Education
Introduces students to the anatomical and physiological foundations of Health and Physical Education with particular reference to the roles of body systems in human movement. Addresses such questions as: What do the muscular-skeletal systems play in movement and learning? How do the circulo-respiratory systems work during rest and activity? How do the neuro-muscular systems function to produce movement?
Restriction: ACE 923.553, 923.554

EDCURRIC 133  
Concepts Underpinning Skilled Movement
Introduces students to the bio-physical foundations of Health and Physical Education including the roles of skill acquisition and bio-mechanics in physical education contexts. Addresses such questions as: How can knowledge of the internal and external mechanics be applied to understand human movement? What is skill and how do people learn motor skills?
Restriction: ACE 923.553, 923.554

EDCURRIC 134  
Expressive Movement and Physical Education
Develops an understanding of purposeful expressive physical activity that embraces aesthetic and inherent cultural values in learning dance and te ao kori. Addresses such questions as: What knowledge do teachers need in a range of aesthetic and bicultural physical education contexts to develop this work in schools? What choreographic skills are needed for devising aesthetic movement compositions?
Restriction: ACE 923.559

EDCURRIC 135  
Socio-cultural Foundations of Health and Physical Education
Introduces subject matter knowledge in the socio-cultural foundations of Health and Physical Education.
Addresses such questions as: What is the nature of sport and why do people play it? In what ways is the body a cultural construct? What educational and cultural practices influence human movement culture and mediate understanding of human physicality? Restriction: ACE 923.551

**Research Study in Health and Physical Education**  
Examines research philosophy, approaches and methods in education as a basis for informing professional practice in health and physical education. Addresses such questions as: How can teachers use research to inform their teaching? What represents quality research in educational settings? What issues influence the design and conduct of a research project?  
Prerequisite: At least 60 points from EDCURRIC 230–241, 333–337  
Restriction: ACE 923.761

EDCURRIC 338  
15 Points  
**Enhancing Teaching Through Science**  
Investigates personal conceptual science understandings and selected science education research to inform effective practice. Selected scientific concepts will be examined to provide experience in enhancing teaching through science and engaging children in effective learning in a variety of environments.  
Prerequisite: 225 points passed in the BEd(Tchg) Primary Specialisation  
Restriction: ACE 924.602, EDCURRIC 260

EDCURRIC 339  
15 Points  
**Developing Classroom Mathematics Programmes**  
Develops knowledge and understanding of classroom mathematics procedures and learning environments. Examines the integrated nature of learning, teaching and assessment with respect to long term programmes. Aims to further develop teacher confidence in, and positive attitudes toward, the teaching and learning of mathematics through critical analysis and personal reflection.  
Prerequisite: 225 points passed in the BEd(Tchg) Primary Specialisation  
Restriction: ACE 921.731

EDCURRIC 341  
15 Points  
**Solving Science Education Issues**  
An in-depth analysis of a social, political or cultural issue in learning and teaching in science in Years 1-10 and early childhood education with an emphasis on programme design.  
Prerequisite: 225 points passed in the BEd(Tchg) Primary Specialisation  
Restriction: ACE 924.701

EDCURRIC 343  
15 Points  
**Indigenous Issues in Social Studies**  
An examination of indigenous issues and perspectives as they relate to the teaching and learning of Social Studies.  
Prerequisite: 225 points passed in the BEd(Tchg) Primary Specialisation  
Restriction: ACE 926.701

Mathematical Literacy for Lower-achieving Students
Approaches for teaching individuals or small groups who have been identified as achieving below expectations in mathematics in New Zealand primary and secondary schools will be explored. Numeracy assessment tools that identify the problems that students have with mathematical language and mathematical symbols will be explored.
Prerequisite: EDCURRIC 349
To complete this course students must enrol in EDCURRIC 369 A and B

Stage IV

EDCURRIC 430 15 Points
Curriculum Issues in Health and Physical Education
Critically examines the construction of health and physical education in the curriculum. Addresses questions such as: What stands for health and physical education in the curriculum? What contemporary issues face health and physical education teachers? What factors influence how curriculum is constructed and experienced?
Prerequisite: At least 60 points from EDCURRIC 230–241, 333–337
Restriction: ACE 923.762

EDCURRIC 431 15 Points
Physical Education Pedagogy
Examines the nature and characteristics of quality teaching in physical education. Addresses such questions as: What legal and ethical issues mediate professional practice? How can a focus on diversity help learners in physical education contexts? What teaching methodologies, management strategies and resources underpin quality practice in physical education?
Prerequisite: EDPROFST 303

Mathematics, Statistics and Technology Education 2
Develops the knowledge, skills and understanding for designing quality learning experiences in mathematics, statistics and technology education for diverse learners by addressing questions such as: What are the mathematical, statistical and technological concepts and learning progressions in the national curriculum? What constitutes effective teaching practices?
Prerequisite: EDCURRIC 628
Restriction: EDCURRIC 609, 612

EDCURRIC 630  
Early Years Curriculum
Critically evaluates appropriate curriculum for infants, toddlers and young children in early years settings. Integrated approaches to learning and teaching will be emphasised. Addresses, explores and examines questions about complex relationships between curriculum approaches, current learning theory, teachers' professional knowledge, and assessment, planning and evaluation practices with reference to early childhood curriculum.
Restriction: ACE 731.724

EDCURRIC 631  
Languages and Cultures
Develops knowledge, skills and attitudes associated with the planning, teaching and assessing of languages and literacies. Addresses such questions as: What are the interrelationships between languages and cultures in a Pacific nation? What influences construction and interpretation of meaning in text? What are the issues for family/whānau, teachers and learners relating to all children becoming confident, competent communicators in Aotearoa?
Restriction: ACE 920.721

EDCURRIC 632  
The Arts
Develops understanding of the knowledge, skills and attitudes required to optimise learning and teaching in the arts. Involves a focused inquiry into music, dance, drama and visual arts in early childhood settings. Addresses such questions as: How do specific learning and teaching approaches and strategies motivate and enhance all children's learning?
Restriction: ACE 922.621

EDCURRIC 633  
Te Ao Māori Early Childhood Education
Develops competence in Te Reo Māori and mātauranga Māori. Addresses the needs and aspirations of Māori learners and communities in order to improve educational outcomes. Critically reviews Te Tiriti o Waitangi and Māori pedagogies in relation to teachers' practices. Addresses questions such as: What are the historical and contemporary research and issues for Māori in education?

EDCURRIC 634  
Hauora
Develops understandings of hauora/well-being and belonging. Inquires into key concepts of health, physical education and social sciences. What images do we hold of children? What does identity mean for learners in a Pacific nation? Why is identity critical for Pasifika learners? What specific learning and teaching approaches and resources enhance the well-being and participation of children in a diverse society?

EDCURRIC 635  
Exploration
Develops pedagogical content knowledge and understanding in science, mathematics and technology. Considers such questions as: What are key early concepts, processes and possible learning progressions? What constitutes effective learning and teaching approaches to promote children's exploration?
Restriction: ACE 521.625

Postgraduate 700 Level Courses

EDCURRIC 703  
Issues in Science and Technology Education
Critically explores contentious issues in science and technology education, and develops an appreciation of complexities and inter-relationships. Provides theoretical underpinning for the development of pedagogical practice for teachers aimed at supporting students' informed discussion about contentious issues in science and technology.
Restriction: EDPROFST 775

EDCURRIC 704  
Teaching for Scientific Literacy
A detailed exploration, focusing on the merits and challenges, of the concept of scientific literacy. Topics will include the nature of science; the process of scientific inquiry; and the role of science education in improving public understanding of science.
Restriction: ACE 824.801, EDPROFST 729

Social Sciences Education in Practice
A critical examination of curriculum and practice in social sciences education in educational settings. Considers a range of theoretical perspectives on the development and teaching of social sciences subjects and applies understandings to personal professional practice.

Restriction: EDPROFST 726

EDCURRIC 772 30 Points

Curriculum Development and Design
Examines historical developments in the design of curriculum within early childhood, primary and secondary education sectors and the ways in which these developments reflect changed conceptions of school subjects and learning areas. Investigates the processes that influence interpretation of curriculum and evaluates design in relation to these processes. Students apply understandings to a selected curriculum area.

Restriction: EDUC 781, EDPROFST 778

EDCURRIC 780 30 Points

Psychology of Writing
An advanced study of contemporary theories, research and ideas that relate to the psychology of writing. This includes particular consideration of the development of expertise in writing and the role of instruction. Implications for practice will be at the forefront in the examination of theory and research.

Restriction: EDPROFST 754

EDCURRIC 781 30 Points

Theories and Literacy Intervention
Examines and evaluates literacy intervention theories and assessment methodologies relating to early and emerging literacy, models of literacy processing and pedagogical implications. Evaluates recent and seminal research and theory related to
 literacy difficulties, comparative research on literacy interventions, and applies and reflects on theoretical knowledge in relation to assessment and teaching of individual children with literacy difficulties.

**EDPROFST 760: Christian Religious Education in Integrated Schools**
A critical analysis of pedagogical methodology in Christian Religious Education through an examination of contemporary research, scholarship and theory, in Christian Scripture, Christian thought and History and Christian Religious Education in Integrated Schools.
*Restriction: ACE 827.801*

**EDPROFST 761: Professional Learning: Support and Supervision**
An exploration of the concepts of professional learning and supervision through a critical analysis of relevant historical and contemporary theory and applied research. Social, political, cultural, ethical and spiritual dimensions of professional learning and supervision in educational settings will be addressed.
*Restriction: ACE 830.806*

**EDPROFST 762: Mentoring Teachers**
Approaches to mentoring and reflections on issues and practices associated with mentoring teachers. Emphasis will be placed upon the mentor-teacher relationship including the way this develops over time, issues associated with promoting teacher self-evaluation, and assessment of school-based practice.
*Restriction: EDPROF 731*
*To complete this course students must enrol in EDPROFST 762 A and B, or EDPROFST 762 B*

**EDPROFST 763: New Teacher Development**
Focuses on pre-service and beginning teacher stages of career development. Identifies and critiques personal assumptions about learning to teach and critiques contexts, strategies and programs designed to support early career development. Critically examines the nature of professional identity; the development of knowledge, disposition and practices; and the processes of, and influences on, the education of pre-service and beginning teachers.

**EDPROFST 764: Directions in Disability Policy and Practice**
Explores contemporary issues and influences in the education of learners with disabilities. Critically examines a range of contemporary social, political and educational responses to disability.

**EDPROFST 765: Development in Early Years**
An advanced examination of a range of current theories and research issues related to development in early years of childhood. Topics will include: life experiences of children within family/whānau; cognitive, communicative, social, emotional and physical development in a range of contexts.
*Restriction: ACE 831.801*

**EDPROFST 766A and B: Professional Issues in Inclusive Education**
Examines critical issues in the professional practice of teachers who provide leadership in programmes for students with special needs. It provides practical guidance in designing, implementing and evaluating professional development and appraisal processes based on effective special educational practice. This course is particularly suited to those who take a leadership role with RTLB, learning support or special needs coordinators.
*To complete this course students must enrol in EDPROFST 766 A and B*

**EDPROFST 767: Critical Approaches to Inclusion**
Critically examines the role of the curriculum and processes for support in education settings; deconstructs traditional and neo-special education approaches; explores effective approaches to teaching and coordination; and analyses the role of educators in leading change for academic and social inclusion of learners with disabilities and special educational needs.

**EDPROFST 768: Special Topic**

**EDPROFST 769: Behaviour Change**
Applies knowledge of functional analysis to systems in classrooms, schools and homes with the objective of developing long-term strategies to reduce inappropriate behaviour, teach more appropriate behaviour, and provide contextual supports necessary for successful outcomes. Topics covered include individual student behaviour change in classrooms, schools and other settings. A knowledge of applied behaviour analysis is assumed.

**EDPROFST 770: An Advanced Study in Gifted Education**
An advanced study in the field of gifted education, which includes an analysis of specific curriculum models and critique of relevant policy initiatives. Students will be encouraged to critically analyse evidence-based research and make links to their own experience and practice.

**EDPROFST 771: Education and Empowerment**
A critical examination of contemporary issues faced in New Zealand’s decile 1-3 urban schools. International and New Zealand based literature will familiarise students with current theory and research regarding the history, politics, teaching and learning, and best practice relevant to New Zealand’s decile 1-3 urban school students, teachers and communities. Emphasis will be on empowerment theories, underpinned by Freirean perspectives.

**EDPROFST 772: Curriculum: Theory, Issues, Practice**
A critical examination of curriculum using a range of educational theories with an emphasis on sociological theory. Importance will be placed on contemporary curriculum issues, and the links between theory, policy and practice. Understandings will be applied to the NZ Curriculum Framework, or Te Whāriki, or to a sector in the NZ education system.
*Restriction: ACE 803.801, 803.901*

**EDPROFST 773: The Culture and Politics of Teachers’ Work**
An analysis and informed appreciation of the socially constructed and political nature of educators’ work. The concept of the professional and professional work will be critically interpreted through selected social theory frameworks.
*Restriction: ACE 803.802, 803.902*

Biomedical Engineering

Stage II
BIOMENG 221  15 Points
Mechanics of Biomaterials
The principles of mechanics and the special
circumstances associated with applying these principles to living and prosthetic structures will be presented. Topics include: introduction to linear elasticity, stresses and strains specific to direct and torsional loading, material constitutive relationships (including anisotropy, nonlinearity, and viscoelasticity), axial and transverse loading of bone, pressure loading of the heart, and theories of failure. *Restriction: ENGSCI 274*

**BIOMENG 241**  
15 Points  
Instrumentation and Design  
An introduction to engineering instrumentation related to the measurement of biological signals. Topics include: Fundamentals of measurement systems (electric circuits, basic electronics, frequency domain signal analysis and transient analysis, measurement systems). This course will cover the design methodology of instrumentation systems and include an instrumentation design project.  
*Prerequisite: ELECTENG 101  
Restriction: BIOMENG 233*

**Stage III**

**BIOMENG 321**  
15 Points  
Continuum Modelling in Bioengineering  
An introduction to continuum modelling approaches to bioengineering problems across a range of spatial scales. Topics include: mathematical modelling of gene regulation; molecular and cellular mechanics of striated muscle; and finite deformation elasticity and constitutive laws of soft biological materials; vascular networks and flow.  
*Restriction: ENGSCI 371*

**BIOMENG 341**  
15 Points  
Bioinstrumentation and Design  
Sensors and actuators (temperature, position, force, pressure, flow, bioelectric, optical sensors and instruments). Signals, systems and controls (s-domain signal notation, transfer functions, frequency response functions, block diagrams, the Laplace transform, first and second order systems, characterisation methods, fundamentals of control), Bioinstrumentation design methodology, Biomedical instrumentation design project.  
*Restriction: ENGSCI 372, 373*

**BIOMENG 361**  
15 Points  
Tissue and Molecular Bioengineering  
Overview of molecular and tissue engineering principles emphasizing biochemical kinetics, gene regulation, cell behaviour and biomedical ethics. Laboratory practice in cell culture and molecular biology techniques. Topics include enzymes and regulation of metabolic pathways, thermodynamic principles of biochemical reactions, systems biology and regulatory motifs in biochemical networks, cell culture techniques, research and medical ethics.

### Chemical and Materials Engineering

#### Stage I

**CHEMMAT 100G**  
15 Points  
Materials of the Modern World  
Every aspect of daily living is influenced in some way by the materials that surround us. Ceramics, metals, polymers, and composites; each has its own properties which have, over time, influenced the development of modern technological societies. Take a moment to imagine a world without metal, for example, to see how central the science of materials is to everyday life. This course will explore, at a non-specialist level, the basic principles governing the properties and behaviour of a wide variety of common materials and examine their applications and limitations.  
*Restriction: ENGSCI 121*

**CHEMMAT 121**  
15 Points  
Materials Science  
Introduction to materials science starting with the fundamentals of atomic structure and bonding and how this builds up a microstructure to create a solid. Metals, polymers, ceramics, electronic materials, composite and biomaterials will be covered and the properties, advantages and disadvantages of each discussed. Considerations such as corrosion, degradation and failure will be studied with a focus on improving design and creating new materials for our future world.  
*Restriction: ENGSCI 321*

#### Stage II

**CHEMMAT 211**  
15 Points  
Introduction to Process Engineering  
Materials and energy balancing with and without chemical reaction, materials and energy balances in multiphase systems such as crystallisation, evaporation, drying, humidification, dehumidification, absorption, distillation, extraction and filtration. An introduction to the most important unit operations in the chemical industry, design concept and safety as applied to processing.  
*Restriction: ENGSCI 121*

**CHEMMAT 212**  
15 Points  
Energy and Processing  
Introduction to thermodynamics for processing engineering. The second law of thermodynamics. Thermodynamics of power and refrigeration cycles and flow processes. Classical chemical thermodynamics including concepts of chemical potential, fugacity and activities; their applications to vapour-liquid equilibria and reacting systems. Multi-component physical equilibria. Multiple reaction equilibria and system-free energy minimisation. Practical examples and applications.  
*Restriction: ENGSCI 212*

## CHEMMAT 213  
15 Points  
Transfer Processes 1  
Fluid properties: specific gravity, viscosity, surface tension and types of flow. Fluid statics and manometry. Math models of fluid motion: the Bernoulli equation. Dimensional analysis and similitude: Reynolds Number, Friction factor and

**CHEMMAT 221** 15 Points

**Materials**

**CHEMMAT 232** 15 Points

**Process Design 1**

Mechanics of solids and analysis of stress and strain. Introduction to materials selection. Design of thin walled pressure vessels. Application to the design of vessels, tanks, reactors, piping and heat transfer equipment. Introduction to the chemical industry, unit operations, line diagrams and process equipment. Report writing and oral communication skills.

Restriction: CHEMMAT 231

**CHEMMAT 242** 15 Points

**Applied Chemistry**

**Stage III**

**CHEMMAT 312** 15 Points

**Transfer Processes 2**

Principles of continuous and staged processes. Mass transfer in various media, systems and phases. Interrelating reactor design to mass transfer processes. Studies of selected separation processes such as absorption, solvent extraction, and distillation. Heat transfer with phase change; nucleate and film boiling of liquids.

**CHEMMAT 313** 15 Points

**Advanced Process Engineering**

An in-depth analysis of selected topics that influence the design, operation, and performance of process plants. Topics may include particulate technology, particle mechanics and particle motions, non Newtonian fluid flow, two-phase solid-liquid and gas-liquid flow, flow through porous media and packed beds, filtration, centrifugation, fluidisation, variable-analysis of variations in materials and product processing, membrane separation methods and optimisation techniques.

Restriction: CHEMMAT 316, 411

**CHEMMAT 315** 15 Points

**Chemical Reactor Engineering**

**CHEMMAT 317** 15 Points

**New Developments in Process Engineering**

Focusing on Green Process Engineering, this course aims to improve the sustainability and minimise the environmental impact of all process design and engineering. This includes: overview and quantification of human environmental impacts, waste and energy minimisation, clean technologies, life cycle analysis, Industrial Ecology, and emissions regulation. Unit operations covered: adsorption, strippers, precipitation, flocculation, ion exchange, membrane separations, and advanced oxidations.

**CHEMMAT 322** 15 Points

**Materials Processing and Performance**

Materials Performance: materials degradation and protection, including high temperature corrosion and high temperature materials, corrosion principles and practice, testing methods, corrosion resistant materials and corrosion protection. Cast irons and non-ferrous alloys; performance of polymers and ceramics. Materials Processing: liquid metal processes, including metal melting, solidification and casting; mechanical forming processes.

Restriction: CHEMMAT 321, 421

**CHEMMAT 331** 15 Points

**Process Design 2**

**Postgraduate 700 Level Courses**

**CHEMMAT 712** 15 Points

**Chemical Engineering Seminar**

A graduate course on a topic or topics from the advanced fields of fluid mechanics, transport phenomena, heat transfer, particulate technology, chemical reactors, fuel technology, process simulation and control and other chemical engineering areas.

**CHEMMAT 713** 15 Points

**Studies in Chemical Engineering**

An advanced course on topics to be determined each year by the Head of Department of Chemical and Materials Engineering.

**CHEMMAT 716** 15 Points

**Advanced High Temperature Processing**

A theoretical and applied treatment of selected topics related to industrial processing in New Zealand. Examples may include: electrochemical engineering for aluminium production, reactors, heat and mass transfer in electrothermal production of metals and slags, metallurgical reactors for treatment and quality control of metals and alloys.
CHEMMAT 717  15 Points  
**Electrochemical Engineering**

The thermodynamics of aluminium electrolysis; heat and mass balance; components of the cell voltage; anode effect and its mitigation, resistance and voltage tracking; cell magnetics and magnetic modelling.  
*Corequisite: CHEMMAT 718, 726, 727*

CHEMMAT 718  15 Points  
**Aluminium Reduction Process Operations**

Monitoring overall aluminium cell performance – what are the appropriate parameters to measure, how are they measured and how are they used for process control? Optimising cell performance, scheduling of operations, dealing with process excursions, metal treatment and quality. Novel cell designs.  
*Corequisite: CHEMMAT 717, 726, 727*

CHEMMAT 721  15 Points  
**Advanced Materials**

A course with emphasis on new developments in materials science and engineering and their impact on technology and society. Topics may be selected from: surface engineering, nanocrystalline materials and composites, rapid solidification and mechanical alloying, diffusional synthesis, processing via solid state reaction, intermetallics, amorphous alloys and superconductors.

CHEMMAT 722  15 Points  
**Materials Seminar**

A course on a topic or topics in the field of materials to be determined each year by the Head of Department of Chemical and Materials Engineering.

CHEMMAT 724  15 Points  
**Advanced Materials Characterisation**

A course on modern methods for materials microstructural characterisation and analysis including: electron microscopy, microanalysis and surface analysis, atomic force microscopy (AFM), nanoindentation. The course will include both principles and practical experience of these techniques.

CHEMMAT 726  15 Points  
**The Light Metals Industry**

An overview of the light metals, Ti, Al and Mg, their chemistry, metallurgy and processing. It also deals with trends in the global light metals production and uses and recent advances in extending applications for these materials; economics of feedstock and materials selection and availability; power supply and management; efficient use of equipment and resources; and environmental issues.  
*Corequisite: CHEMMAT 717, 718, 727*

CHEMMAT 727  15 Points  
**Materials Performance and Selection for Light Metals Processing**

Performance requirements of anodes, cathodes, cell refractories and other aluminium cell construction materials are assessed. Techniques for monitoring materials performance in operation and post operation (autopsies) are discussed. This course also covers materials specifications, how well they predict performance in the aluminium cell as well as the relationship between the fabrication of the cell components and their performance. New materials.  
*Corequisite: CHEMMAT 717, 718, 726*

CHEMMAT 731  30 Points  
**Advanced Design for Reduction Technology**

Specification, planning and execution of a specific process design project in reduction technology. Detailed considerations in the project will include material selection, process energy demand and efficiency, costing and economics, environmental impact and process start-up and operation.

CHEMMAT 732  30 Points  
**Advanced Design Project**

An advanced design project looking at the design and manufacture of a product based on a plastics material. Detailed considerations will include material and process selection, mould design, costing and economics, and environmental impact.

CHEMMAT 740  15 Points  
**Advanced Polymer Materials**

Microstructure and morphology of semi-crystalline and amorphous polymers, including alloys and thermoplastic elastomers. The study of structure/property/processing inter-relationships for plastics materials. Coverage includes characterisation of plastics materials, especially spectroscopic, thermal and rheological analysis. Mechanical testing.

CHEMMAT 741  15 Points  
**Processing of Plastics**

In-depth coverage of advanced processing techniques including associated rheology considerations. The course includes the study of additives, degradation processes and the prevention of degradation, formulation of products and the mixing of materials.

CHEMMAT 742  15 Points  
**Plastics Materials Design**

Material properties and selection. Drying and heat transfer. Plastics part and mould design, moulding simulation software. IML, co-moulding and advanced moulding techniques. Fabrication and lifecycle considerations.

CHEMMAT 743  15 Points  
**Selected Topics in Plastics Processing**

Modular course covering specialised topics and applications including thermosetting elastomers, powder coating, reaction injection moulding and liquid moulding of siloxanes and urethanes. Reactive compounding of alloys, sintering. Specialised processes including thermoforming, coil coating, cast film and rotational moulding.

CHEMMAT 750A  15 Points  
**CHEMMAT 750B**

**Design Project**

Specification, planning and executing a specific process design project. The detailed considerations in the project will include environmental impact, safety and occupational health issues, material selection, process energy demand and efficiency, costing and economics, process start-up and operation.  
*Restriction: CHEMMAT 431, 432*

To complete this course students must enrol in CHEMMAT 750 A and B

CHEMMAT 751A  15 Points  
**CHEMMAT 751B**

**Research Project**

A student is required to submit a report on project...
work carried out on a topic assigned by the Head of Department of Chemical and Materials Engineering. The work shall be supervised by a member of staff. 

**Restriction:** CHEMMAT 441, 442

To complete this course students must enrol in CHEMMAT 751 A and B

**CHEMMAT 752**  
**Process Dynamics and Control**

Introduction to process instrumentation, modelling and simulation, first, second and higher order systems, transport delay, interactive elements, open-loop and negative feedback systems, transient response analysis, controllers and controller tuning, advanced control strategies including feed-forward, cascade control, and predictive control. Control of common loops, unit operations, multiple loops and whole plants.

**Restriction:** CHEMMAT 311, 411, 412

**CHEMMAT 753**  
**Non-metallic Materials**

**Restriction:** CHEMMAT 422

**CHEMMAT 754**  
**Materials Engineering**

Advanced aspects of mechanical behaviour, primarily application of fracture mechanics and failure analysis. Nanomaterials and nanotechnology, primarily synthesis, processing and characterisation of nanomaterials. Applications in devices – sensing, catalysis and biomedical areas. Selected topics on surface engineering – coating and thin films technology. Further topics on tribology, friction and wear of materials, powder metallurgy.

**Restriction:** CHEMMAT 423

**CHEMMAT 755**  
**Electronic Materials and their Applications**

Introduction to electronic properties of materials and their applications. Contents include: basic theories of electrical conduction, conducting and insulating materials, semiconductor properties and materials, dielectric, magnetic, optical, thermal and sensing properties and materials, and superconductors. This course will cover the basic properties, processing methods and performance of electronic materials. The applications of electronic materials in various industries will be emphasised.

**Restriction:** CHEMMAT 424

**CHEMMAT 756**  
**Food Process Engineering**

Application of engineering principles to food processing. Study of main food processing operations: heating and thermal processing, cooling, freezing and thawing, evaporation, dehydration, the use of membranes and packaging. Innovative thermal and non-thermal food processes, and most fundamental areas of engineering relevant for food processing such as heat and mass transfer, are covered. Process impact on food safety, quality and preservation is also discussed.

**Restriction:** CHEMMAT 463

**CHEMMAT 757**  
**Engineering Biotechnology**

Principles of biochemical engineering. Exploitation of bioreaction and bioprocess systems. Introduction to biomolecular techniques and their applications. Enzyme and microbial reaction kinetics, bioreactor design and downstream processing. Examples of biochemical process and food industry applications.

**Restriction:** CHEMMAT 361, 464, FOODSCI 704

**CHEMMAT 771**  
**Advanced Food Process Technology**

Advanced technology of dairy processing, meat processing, fruit and vegetable processing, seafood processing, wine processing and other specific food sectors strategic to New Zealand.

**CHEMMAT 772**  
**Advanced Food Process Engineering**

Food process modelling and advanced food process engineering technologies. Advanced food unit operations including high pressure processing (HPP), pulsed electric field (PEF), other “cold” technologies, ohmic heating and advanced packaging.

**CHEMMAT 773**  
**Food Process Systems Engineering**

**CHEMMAT 774A**  
**CHEMMAT 774B**  
**Food Process Engineering Research Project**

A structured supervised research project addressing a topic relevant to the development and commercialisation of food process engineering technologies.

**Restriction:** CHEMMAT 775, 776, 777

To complete this course students must enrol in CHEMMAT 774 A and B

**CHEMMAT 775A**  
**CHEMMAT 775B**  
**Food Process Engineering Research Project**

A structured supervised research project addressing a topic relevant to the development and commercialisation of food process engineering technologies.

**Restriction:** CHEMMAT 774, 776, 777

To complete this course students must enrol in CHEMMAT 775 A and B

**CHEMMAT 776A**  
**CHEMMAT 776B**  
**Food Process Engineering Research Portfolio**

A structured supervised research portfolio addressing a topic relevant to the development and commercialisation of food process engineering technologies.

**Restriction:** CHEMMAT 774, 775, 777

To complete this course students must enrol in CHEMMAT 776 A and B
CHEMMAT 777A 45 Points
CHEMMAT 777B 45 Points
Food Process Engineering Research Portfolio
A structured supervised research portfolio addressing a topic relevant to the development and commercialisation of food process engineering technologies.
Restriction: CHEMMAT 774, 775, 776
To complete this course students must enrol in CHEMMAT 777 A and B

CHEMMAT 787 15 Points
Project X
A student is required to submit a report on a topic assigned by the appropriate Head of Department.

CHEMMAT 788A 15 Points
CHEMMAT 788B 15 Points
Project Y
A student is required to submit a report on a topic assigned by the appropriate Head of Department.
To complete this course students must enrol in CHEMMAT 788 A and B

CHEMMAT 789 30 Points
Project Z
A student is required to submit a report on a topic assigned by the appropriate Head of Department.

CHEMMAT 796A 60 Points
CHEMMAT 796B 60 Points
ME Thesis (Chemical and Materials)
A student is required to submit a thesis on a topic assigned by the appropriate Head of Department.
To complete this course students must enrol in CHEMMAT 796 A and B

Civil Engineering

Stage II

CIVIL 201 10 Points
Land Information Systems
Aspects of elementary engineering surveying as used for gathering site information for the design and setting out of works. Land information systems, modern methods of gathering, processing and presenting information for engineering purposes.

CIVIL 210 15 Points
Introduction to Structures
Structural forms and systems. Analysis of determinate systems, elasticity. Engineering beam theory, elasticity, failure theories. Introduction to structural design.
Restriction: ENVENG 210, RESOURCE 210

CIVIL 211 10 Points
Structures and Design 1
Introduction to structural design – philosophy, loads, codes; design of simple structural elements in various materials.

CIVIL 220 10 Points
Introductory Engineering Geology

CIVIL 221 10 Points
Geomechanics 1
The basic concepts and principles governing the mechanical behaviour of soil, including phase relationships, permeability and seepage, the principle of effective stress, soil strength, compressibility and basic stability analysis.

CIVIL 230 10 Points
Fluid Mechanics 1

CIVIL 250 10 Points
Civil Engineering Materials and Design

Stage III

CIVIL 312 15 Points
Structures and Design 2

CIVIL 313 15 Points
Structures and Design 3

CIVIL 314 10 Points
Structural Dynamics
Dynamics of single and multi-degree-of-freedom systems. Ground motion, response spectra, time-history and spectral modal analysis; introduction to seismic design.

CIVIL 322 10 Points
Geomechanics 2
Stability analysis in geotechnical engineering: slope stability, soil pressures on retaining structures, bearing capacity. Consolidation and settlement. Prerequisite: CIVIL 221

CIVIL 324 10 Points
Geomechanics 3
Shear strength of soil – triaxial testing, measurement of pore water pressures, and interpretation of test data. Effective and total stress paths for drained and undrained loading in laboratory tests and field applications. Consolidation and the use of preloading to accelerate consolidation. Application of elastic solutions in geomechanics. Restriction: CIVIL 420

CIVIL 331 10 Points
Hydraulic Engineering
CIVIL 332 10 Points
Fluid Mechanics 2

CIVIL 360 10 Points
Transportation Engineering 1
Highway alignment geometrics (horizontal, vertical and cross sectional design). Basis of the main pavement design techniques, pavement materials, stabilisation, compaction and bituminous surfacings.

CIVIL 361 10 Points
Transportation Engineering 2

Diploma Courses
CIVIL 660 15 Points
Traffic Engineering and Planning
A range of selected topics in traffic engineering and transportation planning which will provide a basis for extension into further studies.
Restriction: CIVIL 361, 460

CIVIL 661 15 Points
Highway and Pavement Engineering
A range of selected topics in highway and pavement engineering which will provide a basis for extension into further studies.
Restriction: CIVIL 360, 461

Postgraduate 700 Level Courses
CIVIL 701 15 Points
Studies in Civil Engineering 1
Advanced course on topics to be determined each year by the Head of Department of Civil and Environmental Engineering.

CIVIL 702 15 Points
Design of Earthquake Resistant Foundations
Observed behaviour of foundations during earthquakes. Site investigation and laboratory testing to estimate values for required soil parameters. Shallow and deep foundations subject to earthquake excitation. Soil-foundation-structure-interaction. Force-based and displacement-based design. Earthquake induced earth pressures on stiff retaining structures.
Prerequisite: CIVIL 721 or equivalent

CIVIL 703 15 Points
Project Management
Planning, organisation and control of engineering projects. Application and integration of project management processes to the typical project lifecycle (initiating, planning, executing, monitoring, and closing). Studies in the nine knowledge areas defined by the Project Management Institute (PMI): Project Integration, Scope, Time, Cost, Quality, Human Resources, Communications, Risk and Procurement Management. Development of a range of skills, tools and techniques to become an effective project manager.

CIVIL 704 15 Points
Advanced Topics in Project Management
Advanced topics in project management such as: advanced scheduling techniques, integrated project delivery, building information modelling, negotiation techniques, dispute resolution and innovative project delivery models.
Prerequisite: CIVIL 703 or equivalent

CIVIL 705A 15 Points
CIVIL 705B 15 Points
Research Project
Restriction: CIVIL 408
To complete this course students must enrol in CIVIL 705 A and B

CIVIL 706 15 Points
Special Topic
Restriction: CIVIL 406

CIVIL 707 15 Points
Construction Logistics Engineering
Develops students’ understanding of logistics issues facing construction engineering supply chains; including inventory costing and ordering models; Materials Requirements Planning (MRP); Manufacturing Resource Planning (MRP2); Just in Time (JIT) models; quick response systems and forecasting logistics requirements. Understand concurrent construction and client involvement in project definition of the Construction Logistics Function. Understanding logistics data management issues, including barcoding and tagging technologies.

CIVIL 708 15 Points
Work Based Learning
Develops the student’s professional and interpersonal skills within the context of professional engineering and project management competencies. Application of theory and development of work procedures. Develops ability to question concepts and critically self-assess competencies. Fostering and enhancing professional competencies in preparation towards membership of a professional body.
Note: Students must be in part time professional employment or have completed at least three years professional employment within engineering or construction.

CIVIL 709 15 Points
Cost Engineering
This course introduces construction engineering cost planning. Key subjects include estimating and prediction throughout the project lifecycle; principles and applications of cost planning, control and design economics. Construction cost data sources and applications, standard forms of cost analysis, estimating and tendering; effects of procurement methods and contract conditions on pricing; preliminaries costing and contractor’s cash flow and bidding strategy.

CIVIL 710 15 Points
Advanced Structural Dynamics
Prerequisite: CIVIL 412 or 416 or 719 or equivalent

For further information please refer to the note on page 380.
CIVIL 711  
Structures Seminar  
Selected topics from recent developments in structural analysis and design, including an introduction to the advanced behaviour and design of thin-walled steel sections and composite components made from cold-formed sheet and light-weight fillers.

CIVIL 712  
Structural Analysis  
Analytical methods for some or all of the following structures: frames and grids, slabs, shear wall systems, shell structures, bridge superstructures. Structural optimisation.

CIVIL 713  
Structures and Design 4  
Continuation of the design and detailing of structures in structural steel, reinforced concrete, reinforced masonry, and timber including connections in steelwork, composite steel/concrete beams, masonry structures and retaining walls in reinforced masonry. Practical understanding and design of concrete ground floor slabs. Introduction to the NZ Standard for light timber frame construction. Introduction to fire engineering. Techniques in the checking of existing structures and lessons learnt from failures. 
*Prerequisite: CIVIL 312 and CIVIL 313 or equivalent  
Restriction: CIVIL 411*

CIVIL 714  
Multistorey Building Design  
Techniques for the design of structures to resist seismic loading. Derivation of design actions, alternative structural systems for resisting these loads, design of structural components subject to cyclic inelastic action, detailing of members and joints to enhance earthquake resistance. Techniques of seismic isolation. Design project. 
*Prerequisite: CIVIL 313 or equivalent*

CIVIL 715  
Advanced Structural Concrete  
Behaviour of reinforced and prestressed concrete components and systems under complex loading and environmental conditions. Thermal and other loading conditions in bridge structures. 
*Prerequisite: CIVIL 313 or equivalent*

CIVIL 716  
Engineering Risk Management  
A broad based understanding of the critical elements of risk and risk management within the construction and engineering industry. Key elements include risk identification with regard to the forms and types of risk inherent in construction. Risk analysis tools and techniques for the construction engineer, and risk response. Risk monitoring techniques, risk control and transference of risk methods. Risk within procurement, insurance issues and risk attenuation. 
*Prerequisite: CIVIL 451 or 750 or equivalent*

CIVIL 717  
Advanced Structural Timber  
Advanced topics in timber design such as: shearwalls, diaphragms, special glum beams, bolted connections, new fasteners, engineered wood products, laminated bridges, inspection of timber structures. Emphasis will be placed on latest international developments. 
*Prerequisite: CIVIL 451 or 750 or equivalent*

CIVIL 718  
Advanced Steel Structures  
This course covers relevant and current issues affecting the design and construction of steel structures for complex loading and environmental conditions. It combines theoretical aspects of the design of advanced steel structures with practical aspects and introduces new developments. 
*Prerequisite: CIVIL 411 or 713 or equivalent*

CIVIL 719  
Matrix Structural Analysis  
Direct stiffness method applied to linear, nonlinear and stability analyses. Introduction to variational principles and finite element method. Projects in practical modelling of major structures such as bridges and multi-storey buildings. Use of commercial software. 
*Restriction: CIVIL 416*

CIVIL 720  
Earthquake Engineering  
*Prerequisite: CIVIL 314 or equivalent*

CIVIL 721  
Foundation Engineering  
*Restriction: CIVIL 323, 421*

CIVIL 722  
Slope Engineering  
*Restriction: ENVENG 324, CIVIL 422*

CIVIL 723  
Rock Mechanics and Excavation Engineering  
Engineering rock behaviour – strength, elasticity and role of discontinuities. Stress – strain analysis, stability assessment of rock structures and support. Theoretical, practical and environmental aspects of ground excavations including ripping, cutting and blasting.

CIVIL 724  
Soil Behaviour  
A systematic review of the engineering properties of soils: principle of effective stress, soil types and origins, permeability, dilatlancy and pore pressure response, shear strength properties, compressibility models, consolidation and time dependent properties, partially saturated soil. Sedimentary, transported, residual soils and volcanically derived soils. Models for soil behaviour.

CIVIL 725  
Geotechnical Earthquake Engineering  
Introduction to the concepts, theories and practices
of modern geotechnical earthquake engineering. Seismic considerations are a significant factor in the design of much of the infrastructure in seismically active countries like New Zealand. The course will include geophysical site investigation, site response analysis, liquefaction assessment and the earthquake behaviour of earth dams.

CIVIL 726 15 Points
Engineering Geology
Introduction to fundamentals in soil and rock mechanics and their application to engineering projects. Discussion of natural hazards and their implications on infrastructure design. Practical exercises in field mapping, core logging, aerial photograph interpretation, and basic laboratory tests. Restriction: CIVIL 404, GEOLOGY 372

CIVIL 730 15 Points
Fluid Mechanics Seminar
Special topics selected from fluid dynamics, water resources engineering, statistics and numerical methods.

CIVIL 731 15 Points
Water Resources Modelling
Risk and uncertainty in water resources systems; evaluation of alternatives in water resources; hydrologic modelling; hydraulic modelling; river basin modelling; water resources economics.

CIVIL 732 15 Points
Coastal Engineering 2
Waves, wave theories, wave forces on structures. Breakers, tsunamis, flow-induced oscillations, resonance problems in tidal estuaries. Sediment transport by waves. Topics from coastal and harbour engineering. Prerequisite: CIVIL 431 or 733 or equivalent

CIVIL 733 15 Points
Coastal Engineering 1
Coastal, port and ocean engineering. Theories governing waves, tides and currents. Design of structures subject to a marine environment.

CIVIL 734 15 Points
River Engineering
Scales; flows; fluvial processes; mixing; ecohydraulics.

CIVIL 740 15 Points
Studies in Civil Engineering 3
Advanced course on topics to be determined each year by the Head of Department of Civil and Environmental Engineering.

CIVIL 741 15 Points
Ground Improvements and Geosynthetics Engineering
Advanced ground improvement techniques including: densification, consolidation, preloading and surcharge, soil reinforcement, stabilisation and thermal ground improvement. Restriction: CIVIL 403

CIVIL 742 15 Points
Special Topic

CIVIL 750 15 Points
Timber Engineering
The practical understanding of timber and its use in the construction industry. Design and detailing techniques for connections in timber structures, plywood structures, pole structures, timber floor systems, bridges, multi-storey buildings, formwork and falsework, arches and cable stayed systems. Prerequisite: CIVIL 312 or equivalent Restriction: CIVIL 451

CIVIL 751 15 Points
Experimental Geotechnical Engineering
A student will undertake and report on experimental work, field or laboratory. The work will entail a range of soil and/or rock tests, such as but not limited to, triaxial tests, ring shear, consolidation, permeability, cone penetration tests, shear wave velocity and in situ vane tests.

CIVIL 752 15 Points
Computational Geotechnical Engineering
The student will undertake and report on analytical work that relates to geotechnical engineering. The work will entail analysis of engineering works using state of practice numerical analysis software to elucidate geotechnical design and performance.

CIVIL 754 15 Points
Geotechnical Modelling
Analysis of stress and strain in two and three dimensions, the idea of a constitutive law, elastic and plastic models for geomaterials. Numerical modelling of consolidation. Implementation of realistic models for soil and rock mass stress-strain-strength behaviour in numerical analysis software and evaluation of geotechnical software against known solutions.

CIVIL 755 15 Points
Advanced Mechanics of Materials
Advanced treatment of topics relating to the mechanics and properties of materials, components and systems used in civil engineering.

CIVIL 758 15 Points
Traffic Systems Design

CIVIL 759 15 Points
Highway and Transportation Design
Economic and environmental assessments of transport projects. Land transport funding in NZ. Road safety engineering. Crash reduction and prevention methods. Pavement asset management. Pavement rehabilitation techniques. Heavy-duty pavements, highway drainage and chip seal design. Prerequisite: CIVIL 360 Restriction: CIVIL 461, 661

CIVIL 760 15 Points
Traffic Operations and Management
Selected topics from: traffic signal performance measures (queues, delays, stops), coordination of signals and platoon dispersion. Traffic characteristics, traffic studies, analytical tools in traffic engineering, queuing theory and applications. Traffic impact assessment and parking design. Travel demand management and other intelligent transport systems techniques. Prerequisite: CIVIL 460 or 660 or 758 or equivalent
CIVIL 761
Planning and Design of Transport Facilities
15 Points
Selected topics from: traffic signal practice/safety audits, two way highway planning, arterial traffic management, modelling and simulation and traffic flow.
Prerequisite: CIVIL 460 or 660 or 758 or equivalent

CIVIL 762
Transportation Planning
15 Points
Provides an in-depth exploration of various components of the urban transportation planning process, with emphasis on theories on modelling. The principle behind the conventional four-stage transport planning model, namely, trip generation, trip distribution, modal split and trip assignment, is covered in detail.
Prerequisite: CIVIL 460 or 660 or 758 or equivalent

CIVIL 763
Transportation and Networks Analysis
15 Points
A course on logistics and scheduling from a graph and network theory perspectives; max-flow network problems; shortest-path and minimal-cost network problems; network synthesis and location problems.
Prerequisite: CIVIL 460 or 660 or 758 or equivalent

CIVIL 764
Highway Safety and Operations
15 Points
An advanced course in the planning, design, safety management and operation of highways. Topics include: traffic flow characteristics, highway capacity, special design vehicles and facilities. Passing and overtaking models analysis and treatments, highway safety, collision modification and mitigation, roadway and roadside design, skid resistance, delineation, temporary traffic control, evaluation methods, and environmental design and management measures.
Prerequisite: CIVIL 460 and 361, or 661 or equivalent

CIVIL 765
Infrastructure Asset Management
15 Points
An advanced course in the procedures, systems and techniques used in the planning, management, operation and maintenance of infrastructure assets. Topics include: institutional issues, legislation and resource management. Developing and critiquing asset management plans. Levels of service, demand forecasting, life cycle asset management, demand management, risk analysis, condition monitoring and deterioration modelling, optimised decision making, data needs and integration of asset management systems.

CIVIL 766
Road Asset Management
15 Points
Selected topics from: road asset management concepts, levels and functions; data requirements; evaluation of functional and structural performance; intervention criteria; deterioration modelling; economic evaluation; lifecycle analysis; prioritisation and optimisation; risk management; performance management; pavement management systems; procurement models for network management.
Prerequisite: CIVIL 461, or 661, or 759 or equivalent

CIVIL 767
Pavement Analysis and Design
15 Points
Selected topics from: pavement design philosophy; stresses, strains and deflections in pavements; pavement material properties and characterisation; traffic loading and volume; pavement failure mechanisms; structural and functional assessment of pavements; empirical and mechanistic pavement design methods; pavement overlay design; asphalt mix design.
Prerequisite: CIVIL 461, or 661, or 759 or equivalent

CIVIL 768
Crash Reduction and Prevention
15 Points
An in-depth analysis of the techniques used to reduce and prevent road based crashes. Topics include: safety analysis, crash patterns, measuring safety, hazardous location identification, treatment and investigation procedures. Human factors, problem diagnosis and evaluation procedures. Road environment factors, geometries, lighting, signs, delineation, road side safety and road surface characteristics. Vehicle design trends, safety auditing, speed management, vulnerable road users.
Prerequisite: CIVIL 461 or 661 or 759 or equivalent

CIVIL 769
Highway Geometric Design
15 Points
An advanced course in geometrical design techniques used in Highway Engineering. Topics include: design context, human perception / reaction, sight distances. Economic considerations, speed environment, design speed and alignment consistency. Horizontal, vertical and cross sectional design, element coordination. Design plans and documentation, CAD, intersection design, road lighting, signs, marking and delineation, access controls and motorway interchanges.
Prerequisite: CIVIL 360 or 661 or equivalent

CIVIL 770
Transport Systems Economics
15 Points
Fundamentals of transport economics covering concepts in: (1) Demand, supply, pricing, congestion and other externalities in transport with a focus on their application in congestion pricing; and (2) Principles of economic evaluation in transport planning.

CIVIL 771
Planning and Managing Transport
15 Points
Outline of the following: NZ Transport Strategy and the relevant Acts for the provision of transport (LTMA and RMA); integrating land use with transport and with sea and air transport; urban design protocol; sustainable transport practices. Travel demand management and congestion pricing.

CIVIL 772
Public Transport: Planning and Operation
15 Points
Introduction and framework; PT data collection; frequency and headway determination; alternative timetables; vehicle scheduling; crew scheduling; short-turn design; PT network design; PT reliability; design of shuttle and feeder lines; bus priority and BRT.

CIVIL 773
Sustainable Transport: Planning and Design
15 Points
Pedestrian planning and design; cycling facilities and planning; land use and trips; travel behaviour change and travel plans; integrated transport assessment; transport impact guidelines for site development.

CIVIL 774
Studies in Transportation 1
15 Points
A graduate course on a range of selected topics to be determined each year by the Head of the Department of Civil and Environmental Engineering.
CIVIL 775 15 Points
Studies in Transportation 2
A graduate course on a range of selected topics to be determined each year by the Head of the Department of Civil and Environmental Engineering.

CIVIL 779A 15 Points
CIVIL 779B 30 Points
Project in Transportation
Students are required to submit a report on a topic in transportation assigned by the Head of Department. To complete this course students must enrol in CIVIL 779 A and B.

CIVIL 780 15 Points
Advanced Water Resources
Selected topics from hydrology and water resources engineering.

CIVIL 782 15 Points
Water Resources Engineering
A selection from the following: reservoir design and optimisation, flood control and design of flood control structures, micro to large scale hydroelectric engineering, river engineering and sedimentation. A water resources engineering design project. Prerequisite: ENVENG 333 or equivalent Restriction: CIVIL 480, 482

CIVIL 787 15 Points
Project X
A student is required to submit a report on a topic assigned by the appropriate Head of Department.

CIVIL 788A 15 Points
CIVIL 788B 15 Points
Project Y
A student is required to submit a report on a topic assigned by the appropriate Head of Department. To complete this course students must enrol in CIVIL 788 A and B.

CIVIL 789 30 Points
Project Z
A student is required to submit a report on a topic assigned by the appropriate Head of Department.

CIVIL 790 15 Points
Civil Engineering Administration
The application of legal principles to problems in civil engineering and environmental engineering management. Examines the administration of national and international engineering contracts. Discusses statutes affecting engineering business. Investigates the implications of resource management and natural resource allocation legislation on engineering projects. Analyses processes for resolving engineering disputes. Restriction: CIVIL 401, 490

CIVIL 791 15 Points
Construction Management
Understanding topics necessary for effective construction management. Using a generic construction project life cycle, essential aspects of construction projects including client brief preparation, the tendering process, preparing tenders, tender evaluation, project planning, resource allocation, teamwork, site safety, and contract types are covered. Case studies are used to reinforce the application of theoretical ideas to the successful running of construction projects. Restriction: CIVIL 409

CIVIL 792 15 Points
Discrete-event Simulation in Construction
Discrete-event simulation modelling for planning and design construction operations and management of the construction supply chain. Applications to real construction problems.

CIVIL 796A 60 Points
CIVIL 796B 60 Points
ME Thesis (Civil)
A student is required to submit a thesis on a topic assigned by the appropriate Head of Department. To complete this course students must enrol in CIVIL 796 A and B.

Computer Systems Engineering

Stage II

COMPSYS 201 15 Points
Fundamentals of Computer Engineering
The hardware/software interface: processors, registers, memory, basic I/O. Representation of data, number systems, and computer arithmetic; assembly language programming and debugging; support for high-level languages; exceptions and multithreading; combinational and sequential circuits (traditional design and standard circuits); instruction sets; communication principles. Prerequisite: ELECTENG 101

COMPSYS 202 15 Points
Object Oriented Design and Programming
A project-based course with extensive hands-on programming experience. Includes: an introduction to object oriented design including UML, sequence diagrams, use-case analysis; an introduction to object oriented programming in a modern high level language, algorithms, data abstraction and elementary data structures. Prerequisite: ENGGEN 131 or ENGSCI 131

Stage III

COMPSYS 301 15 Points
Design: Hardware Software Systems
An appreciation of the engineering design process as applied to computer systems. Design skills are enhanced through engineering projects which typically include elements of: computer hardware design, computer software design, system design and control, sensing, actuation and interfacing. Prerequisite: COMPSYS 302, and COMPSYS 305 or ELECTENG 304, and ELECTENG 206 or 209

COMPSYS 302 15 Points
Design: Software Practice
A project-based course with extensive hands-on programming experience emphasising problem-solving techniques and applications in computer systems engineering. Topics include: algorithms and data structures, parsing and translation, concurrent programming, scripting languages, systems programming. Prerequisite: COMPSYS 302 or ELECTENG 203

COMPSYS 303 15 Points
Microcomputers and Embedded Systems
Embedded applications. Microprocessors, microcontrollers, architecture, organisation, programming memories, I/O interfacing. Sensors, actuators, analog interfaces. Hardware/Software
Prerequisite: COMPSYS 202 or SOFTENG 251, and COMPSYS 201

COMPSYS 304
Computer Architecture 1
Modern processor architectures. Principles of modern processor design; pipelining; memory hierarchies; I/O and network interfacing; compiler and OS support; embedded processors; performance; multiprocessing.
Prerequisite: 15 points from COMPSYS 201, ELECTENG 205

COMPSYS 305
Digital Systems Design 1
Digital Systems implementation technologies; abstraction levels; hardware description languages; structural, architectural and behavioural modelling; register-transfer level design; datapath and control units; fixed and microprogrammed control units; ASM charts; synthesis from ASM charts, digital computation; verification; design flow. Design of a simple processor. FPGAs as prototyping technology.
Prerequisite: COMPSYS 201

Postgraduate 700 Level Courses

COMPSYS 700A 15 Points

COMPSYS 700B 15 Points

Research Project
A student is required to submit a report on project work carried out on a Computer Systems Engineering topic assigned by the Head of Department. The work shall be supervised by a member of staff.
Prerequisite: COMPSYS 301, and 45 points from COMPSCI 313, COMPSYS 302, 303, 304, 305, ELECTENG 303, 304
Restriction: COMPSYS 401
To complete this course students must enrol in COMPSYS 700 A and B

COMPSYS 701
Advanced Digital Systems Design
Register-transfer, behavioural and system-level design and synthesis; resource sharing; scheduling; the use of hardware-description languages; algorithms to logic: hardware/software partitioning; systems-on-chip; component re-usability; reconfigurable systems, low-power systems; case studies (DSP, speech, image and video algorithms implementation).
Prerequisite: 15 points from COMPSYS 305, ELECTENG 304

COMPSYS 703
Advanced Intelligent Systems
Selected topics from current research in robotics and intelligent systems, such as: navigation, human-robot interaction, control, programming, path planning, problem solving, pattern recognition, artificial neural networks, fuzzy systems, genetic algorithms.
Prerequisite: COMPSYS 406 or 726 or ELECTENG 707

COMPSYS 704
Advanced Embedded Systems
Selected topics from current research in embedded systems, such as: models of computation, architectures, distributed embedded systems, systems-on-chip, real-time operating systems, heterogeneous models of computation, architectures and technologies, formal verification, model-checking.
Prerequisite: 15 points from COMPSYS 402–404, 701, 723, 724 or ELECTENG 423

COMPSYS 705
Formal Methods for Engineers
Prerequisite: COMPSYS 302 and COMPSYS 305 or ELECTENG 304

COMPSYS 706
Speech and Language Processing
Introduction to the fundamentals of speech and language processing. Concepts, methods and applications of speech signal processing. Principles of speech analysis, coding, modelling, recognition, synthesis and language processing.
Prerequisite: ELECTENG 413 or 733

COMPSYS 707
Advanced Microcomputer Architecture
Hardware and software approaches for instruction-level parallel processing, multiprocessors and multithreading, embedded multiprocessing and memory systems, architectures for embedded multiple processors and networks on chip, dynamic reconfigurable architectures.
Prerequisite: 15 points from COMPSYS 304, ELECTENG 304

COMPSYS 710
Studies in Computer Systems Engineering 1
Advanced courses on topics to be determined each year by the Head of Department.

COMPSYS 711
Studies in Computer Systems Engineering 2
Advanced courses on topics to be determined each year by the Head of Department.

COMPSYS 712
Studies in Computer Systems Engineering 3
Advanced courses on topics to be determined each year by the Head of Department.

COMPSYS 713
Studies in Computer Systems Engineering 4
Advanced courses on topics to be determined each year by the Head of Department.

COMPSYS 714
Studies in Computer Systems Engineering 5
Advanced courses on topics to be determined each year by the Head of Department.

COMPSYS 715
Studies in Computer Systems Engineering 6
Advanced courses on topics to be determined each year by the Head of Department.

COMPSYS 721
Special Topics 1
An advanced course on topics to be determined each year by the Head of Department.

COMPSYS 722
Special Topics 2
An advanced course on topics to be determined each year by the Head of Department.

COMPSYS 723
Embedded Systems Design
Principles of embedded systems modelling. Models

Prerequisite: 15 points from COMPSYS 303, ELECTENG 304
Restriction: COMPSYS 402, 403

COMPSYS 724 15 Points
Real-Time Systems

Prerequisite: 15 points from COMPSYS 303, ELECTENG 304
Restriction: COMPSYS 402, 404

COMPSYS 725 15 Points
Computer Networks and Distributed Applications

Prerequisite: COMPSYS 201 or ELECTENG 205, and COMPSYS 202 or ELECTENG 203
Restriction: COMPSYS 405

COMPSYS 726 15 Points
Robotics and Intelligent Systems
Introduction to robotics and intelligent systems, including: robot manipulators and mobile robots, navigation techniques, planning and programming of robot actions, sensors and actuators, artificial intelligence, artificial neural nets, fuzzy systems, genetic algorithms.

Prerequisite: 15 points from COMPSYS 302, MECHENG 313, SOFTENG 306
Restriction: COMPSYS 406

COMPSYS 787 15 Points
Project X
A student is required to submit a report on a topic assigned by the appropriate Head of Department.

COMPSYS 788A 15 Points
COMPSYS 788B 15 Points
Project Y
A student is required to submit a report on a topic assigned by the appropriate Head of Department.

To complete this course students must enrol in COMPSYS 788 A and B

COMPSYS 789 30 Points
Project Z
A student is required to submit a report on a topic assigned by the appropriate Head of Department.

COMPSYS 796A 60 Points
COMPSYS 796B 60 Points
ME Thesis (Computer Systems)
A student is required to submit a thesis on a topic assigned by the appropriate Head of Department.

To complete this course students must enrol in COMPSYS 796 A and B

Electrical and Electronic Engineering

Stage I

ELECTENG 101 15 Points
Electrical and Digital Systems
An introduction to electrical, computer and electronic systems and technology. Digital circuits and analysis techniques, computer organisation. Analog circuits and analysis techniques. Inductive power transfer, power systems and electric machines. Communication systems.

Restriction: ELECTENG 202, 204, 208, 210

Stage II

ELECTENG 202 15 Points
Circuits and Systems
This course aims to provide a good understanding of the way electrical circuits work. It covers DC and AC circuit theorems and analysis; transient analysis, including the Laplace transform; transfer functions; AC power calculations; and time and frequency representation of signals.

Prerequisite: ELECTENG 101

ELECTENG 204 15 Points
Engineering Electromagnetics
Electrical conduction theories, conducting materials and insulators, magnetic and dielectric properties and materials, electrostatics and magnetostatics, steady electric currents, the magnetic field of steady electric currents, Ampere's law and its applications, electromagnetic induction, Faraday's law and its applications, electromagnetism, simple transmission lines, magnetic circuits, permanent magnets, inductors, transformers, introduction to electrical machines.

Prerequisite: ELECTENG 101

ELECTENG 208 15 Points
Electric Circuit Analysis
Aims to provide a good understanding of the way electrical circuits work. The course covers DC and AC circuit theorems and analysis. It also introduces some semiconductor devices (diodes, transistors and operational amplifiers) and gives examples of their applications.

Prerequisite: ELECTENG 101
Restriction: ELECTENG 202

ELECTENG 209 15 Points
Analogue and Digital Design
This project-based course provides an introduction to real-world design of analogue and digital circuits. Practical skills will be gained in electronic circuit analysis, use of CAD tools, PCB design and construction, circuit testing and calibration using laboratory equipment. Appropriate design methodology will be developed in a practical framework.

Prerequisite: ELECTENG 101, 202, ELECTENG 205 or COMPSYS 201, ELECTENG 207 or 210

ELECTENG 210 15 Points
Electronics 1

Prerequisite: ELECTENG 101
### Stage III

**ELECTENG 303**

**Systems and Control**

Introduction to linear, time-invariant, continuous-time system theory from both a time-domain and frequency domain standpoint. This leads on to the fundamental body of knowledge underlying the control and enhancement of system behaviour, with application to the analysis and control of electrical systems.

*Prerequisite: ELECTENG 202*

**ELECTENG 305**

**Electronics 2**

The operation, analysis and design of a range of electronic devices and systems will be discussed, taking examples from the full spectrum of electrical engineering. Such analysis will consider non-ideal circuit models and their frequency dependence. Selected applications will be taken from the fields of signal conditioning, amplifiers, communications systems and energy conversion.

*Prerequisite: ELECTENG 202, 207 or 210*

**ELECTENG 307**

**Transmission Lines and Systems**

The basic concepts of electromagnetism are completed with a formal treatment of Maxwell’s equations and their applications, including electromagnetic wave propagation, transmission lines, the Smith chart, and an introduction to antennas and radio systems, EMI and RFI.

*Prerequisite: ELECTENG 204*

**ELECTENG 309**

**Power Apparatus and Systems**

This course introduces students to fundamentals of electric machinery and power system components. It covers theory, control and practical aspects of electric machines and apparatus as well as their applications in relation to power electronics.

*Prerequisite: ELECTENG 204*

**ELECTENG 310**

**Electrical Engineering Design 1**

An appreciation of the design process as applied to various electrical and electronic engineering systems. Design skills are enhanced through a variety of engineering projects which typically introduce students to modelling, simulation and analogue and digital electronic hardware design.

*Prerequisite: ELECTENG 202, ELECTENG 203 or COMPSYS 202, ELECTENG 205 or COMPSYS 201, ELECTENG 206 or 209, ELECTENG 207 or 210*

**ELECTENG 311**

**Electrical Engineering Design 2**

The formal introduction to the design process is completed by one or more open-ended projects which typically include elements of design from concept to working prototype.

*Prerequisite: ELECTENG 310 or ELECTENG 203, 205, 206, 207*

### Postgraduate 700 Level Courses

**ELECTENG 700A**

15 Points

**Research Project**

A student is required to submit a report on project work carried out on a topic assigned by the Head of Department. The work shall be supervised by a member of staff.

*Prerequisite: ELECTENG 303, 305, ELECTENG 301 or 310 and 311*

*Restriction: ELECTENG 401*

To complete this course students must enrol in ELECTENG 700 A and B.

**ELECTENG 701**

**Wireless Communication**

*Prerequisite: ELECTENG 421 or 721*

**ELECTENG 702**

**Applied Electromagnetics**

Selected topics in electromagnetic theory. Consideration will be given to both analytical and numerical techniques.

*Prerequisite: ELECTENG 302 or 306 or 307*

**ELECTENG 703**

**Advanced Power Systems**

Electricity markets – structure, pricing, optimisation. Application of power electronics to power systems. Distribution system issues. Integration of DG/ renewable sources to bulk power systems.

*Prerequisite: ELECTENG 411 or 731*

**ELECTENG 704**

**Advanced Control Systems**

Theory of modern control systems with emphasis on optimisation techniques for both deterministic and stochastic processes. State-space modelling of dynamic systems and choice of suitable performance criteria. Adaptive, fuzzy logic and sliding mode control systems.

*Prerequisite: ELECTENG 422 or 722*

**ELECTENG 705**

**Heavy Current Electronics**

Selected advanced topics in the design and control of power electronics are presented. Topics include: analysis of power electronic circuits using state space techniques with suitable applications; design and application of switch mode resonant converters; scalar and vector control of AC induction motors; advanced magnetics modelling.

*Prerequisite: ELECTENG 414 or 734*

**ELECTENG 706**

**Digital Signal Processing**

*Prerequisite: ELECTENG 413 or 733*

**ELECTENG 709**

**Image Processing and Computer Vision**

Computer vision concepts and tools. Quantitative image analysis and information extraction.
Prerequisite: ELECTENG 413 or 733

**ELECTENG 711 15 Points**
Studios in Electrical and Electronic Engineering 1
Advanced course on topics to be determined each year by the Head of Department.

**ELECTENG 712 15 Points**
Studios in Electrical and Electronic Engineering 2
Advanced course on topics to be determined each year by the Head of Department.

**ELECTENG 713 15 Points**
Studios in Electrical and Electronic Engineering 3
Advanced course on topics to be determined each year by the Head of Department.

**ELECTENG 714 15 Points**
Studios in Electrical and Electronic Engineering 4
Advanced course on topics to be determined each year by the Head of Department.

**ELECTENG 715 15 Points**
Studios in Electrical and Electronic Engineering 5
Advanced course on topics to be determined each year by the Head of Department.

**ELECTENG 716 15 Points**
Studios in Electrical and Electronic Engineering 6
Advanced course on topics to be determined each year by the Head of Department.

**ELECTENG 720 15 Points**
Microwave Engineering
Prerequisite: ELECTENG 421 or 721

**ELECTENG 721 15 Points**
Radio Systems
Transmission lines and waveguides, impedance matching, devices. Radio propagation, antennas and arrays. Radio system design – mobile, point-to-point, area coverage.
Prerequisite: ELECTENG 302 or 306 or 307
Restriction: ELECTENG 421

**ELECTENG 722 15 Points**
Control Systems
Prerequisite: ELECTENG 303
Restriction: ELECTENG 422

**ELECTENG 724 15 Points**
Special Topics 2
An advanced course on topics to be determined each year by the Head of Department.
Restriction: ELECTENG 424

**ELECTENG 726 15 Points**
Digital Communications
Prerequisite: ELECTENG 303, 732
Restriction: ELECTENG 426

**ELECTENG 728 15 Points**
Sensor Networks
Prerequisite: ELECTENG 305 or COMPsys 305 or MECHENG 370
Restriction: ELECTENG 428

**ELECTENG 731 15 Points**
Power Systems
Power system network modelling; power system analysis – load flow, fault, stability, power quality; control of real and reactive power.
Prerequisite: ELECTENG 302 or 309
Restriction: ELECTENG 411

**ELECTENG 732 15 Points**
Communication Systems
Prerequisite: ELECTENG 303
Restriction: ELECTENG 412

**ELECTENG 733 15 Points**
Signal Processing
Analog signals and systems: Signal processing concepts and tools for analysing deterministic and random continuous-time signals and systems. Digital signals and systems: Discrete-time deterministic signal analysis, digital filters and transforms, including the FFT. Digital Signal Processor (DSP) architectures and DSP applications.
Prerequisite: ELECTENG 303
Restriction: ELECTENG 413

**ELECTENG 734 15 Points**
Power Electronics
This course introduces students to selected building blocks in power electronics by way of a practical design project utilising modern power electronic converters with supporting lectures that include: inductive power transfer, switched mode DC-DC converter design and control, high frequency magnetics design, semiconductor switches, practical design issues, controlled rectifiers and PWM converters with application to conventional and brushless DC motors.
Prerequisite: ELECTENG 303
Restriction: ELECTENG 414

**ELECTENG 735 15 Points**
Special Topics 1
An advanced course on topics to be determined each year by the Head of Department.

**ELECTENG 736 15 Points**
Analog and Digital Filter Synthesis
Filter concepts and network functions, a review of approximation techniques and frequency
transformations, leading to a thorough treatment of passive, active and digital filter implementations.

Prerequisite: ELECTENG 303
Restriction: ELECTENG 416

ELECTENG 787 15 Points
Project X
A student is required to submit a report on a topic assigned by the appropriate Head of Department.

ELECTENG 788A 15 Points
ELECTENG 788B 15 Points
Project Y
A student is required to submit a report on a topic assigned by the appropriate Head of Department. To complete this course students must enrol in ELECTENG 787 A and B

ELECTENG 789 30 Points
Project Z
A student is required to submit a report on a topic assigned by the appropriate Head of Department. To complete this course students must enrol in ELECTENG 788 A and B

Energy

Postgraduate 700 Level Courses

ENERGY 721 15 Points
Energy Resources
Past, present and likely future uses of various forms of energy focused on electricity generation. Energy resources. Energy economics, prices and markets. Environmental considerations in energy production and use. Climate change, carbon sequestration, carbon trading and carbon taxes.

ENERGY 722 15 Points
Energy Technology

ENERGY 785A 15 Points
ENERGY 785B 30 Points
Research Project
Supervised research project addressing a topic relevant to the technical, economic, environmental, regulatory or business aspects of energy. To complete this course students must enrol in ENERGY 785 A and B

ENERGY 786A 30 Points
ENERGY 786B 15 Points
Research Project
Supervised research project addressing a topic relevant to the technical, economic, environmental, regulatory or business aspects of energy. To complete this course students must enrol in ENERGY 786 A and B

ENERGY 787A 30 Points
ENERGY 787B 60 Points
Research Thesis
Supervised research project addressing a topic relevant to the technical, economic, environmental, regulatory or business aspects of energy. To complete this course students must enrol in ENERGY 787 A and B

Energy Technology

Diploma Courses

GEOTHERM 601 15 Points
Geothermal Resources and Their Use
Worldwide occurrence of geothermal systems, introductory geology, volcanoes and volcanic rocks, New Zealand geothermal systems, structure of the TVZ. Hydrothermal alteration, permeability and porosity. Introduction to geochemistry of geothermal systems, geothermal surface manifestations, water compositions, geothermometry, silica geochemistry, overview of geophysics for geothermal exploration, geothermal resource assessment.

GEOTHERM 602 15 Points
Geothermal Energy Technology
Worldwide geothermal development, types of geothermal systems, thermodynamics, properties of water and steam tables, heat transfer, fluid mechanics, steam-field equipment, geothermal power stations, geothermal drilling, wellbore processes, completion tests, downhole measurements, reinjection, corrosion, stored heat, Darcy’s law, cold groundwater, geothermal reservoirs, direct use, reservoir modelling, reservoir monitoring and steam-field management.

GEOTHERM 603 15 Points
Geothermal Exploration
Hydrothermal alteration, clays, fluid inclusions, direct use, subsidence, scaling and corrosion in geothermal wells, production geochemistry, environmental aspects of geothermal development, feasibility study, physical properties of rocks and self-potential (SP), magnetics, thermal methods, gravity, seismic methods, electrical methods, magneto-tellurics (MT).

GEOTHERM 620 15 Points
Geothermal Engineering
Completion tests, wellbore flow, two-phase flow, geothermal power cycles, flow measurements, direct use of geothermal energy, environmental effects, scaling and corrosion in geothermal wells, drilling engineering, flow measurements, steam-field operation and maintenance, subsidence, waste heat rejection, heat exchangers, geothermal well-test analysis, stimulation, pipeline design, feasibility study, reservoir modelling theory, TOUGH2, reservoir modelling process, case study (data and conceptual model, natural state modelling), Wairakei model.

GEOTHERM 689 15 Points
Geothermal Project
Based on a study using field, lab or theoretical methods, students are required to submit a report on some aspect of geothermal exploration, development or exploitation.
Engineering General

Stage I

ENGEN 100G
Technological Choices for the New Millennium
15 Points
A consideration of technological choices to support informed decision making in the use of technology in modern society. The course will be themed around important questions such as: will water be the new oil? Is nuclear power the only practical solution to our energy demands? Nanotechnology – how small can or should we go? Are cell phones safe?

ENGEN 115
Introduction to Engineering Design
15 Points
The aim of the course is to develop an appreciation of design as a key aspect of professional engineering. Course elements: sketching and interpretation of engineering drawings; preparation of drawings using computer-aided design (CAD) software; design projects, some of which will require teamwork and cover design-build-test activities; an introduction to the engineering design process.

ENGEN 121
Engineering Mechanics
15 Points
An introduction to planar mechanics including: free body diagrams, planar equilibrium of rigid bodies, friction, distributed forces, internal forces, shear force and bending moment diagrams, kinematics and kinetics of particles, work and energy, relative motion, kinematics and kinetics of rigid bodies.
Restriction: CIVIL 210, MECHENG 222

ENGEN 131
Introduction to Engineering Computation and Software Development
15 Points
Introduction to problem solving in engineering through the use of the software package MATLAB, and the high level programming language C.
Restriction: ENGSCI 233, 331

ENGEN 140
Engineering Biology and Chemistry
15 Points
Introduction to chemical and biological systems. The application of engineering analysis and design techniques to facilitate understanding the multiscale structure, function and interactions of such systems. The use of case studies to illustrate systems approaches to chemistry and biology.

ENGEN 150
Advanced Mechanics and Mathematical Modelling
15 Points
An accelerated course replacing ENGEN 121 and ENGEN 111 for well-prepared and conjoint students. Topics include: Free body diagrams, equilibrium of rigid bodies, internal forces, shear force and bending moment diagrams, work and energy, motion of particles and rigid bodies. Introduction to mathematical modelling. Differentiation and integration. Differential equations, Vector and matrix algebra. Introduction to probability.
Restriction: ENGEN 121, ENGEN 111

ENGEN 199
English Language Competency
0 Points
To complete this course students must attain a level of competency in the English language as determined by the Faculty of Engineering.

Stage II

ENGEN 204
Technical Communication for Engineers
15 Points
The communication of complex engineering material will be emphasised in the following ways: the use of appropriate engineering graphical software at an advanced level; the use of appropriate multi-media; visual and spoken presentation, in styles appropriate to seminars, conferences, and presentations to technological industries; the construction of industrial displays; and the preparation of engineering reports.
Prerequisite: ENGEN 199

ENGEN 299
Workshop Practice
0 Points

Stage III

ENGEN 303
Management for Engineers
15 Points
An introduction to modern theory and practice of management, including project, quality and financial management appropriate to the engineering profession.
Prerequisite: ENGEN 104 or 199
Restriction: ENGEN 302

Stage IV

ENGEN 403
Professional and Sustainability Issues
15 Points
Issues of particular relevance to the engineering profession including those relating to the law, ethics, culture and sustainability.
Restriction: ENGEN 402

ENGEN 499
Practical Work
0 Points

Diploma Courses

ENGEN 601
Case Studies in Engineering 1
15 Points
The case study may include aspects of design or analysis, a survey and/or evaluation of a problem in any branch of engineering. A student is required to submit a report.

ENGEN 602
Case Studies in Engineering 2
15 Points
The case study may include aspects of design or analysis, a survey and/or evaluation of a problem in any branch of engineering. A student is required to submit a report.

ENGEN 622
Advanced Topics in Engineering 1
15 Points
Courses on topics determined each year by the Associate Dean Postgraduate in the Faculty of Engineering.

ENGEN 623
Advanced Topics in Engineering 2
15 Points
Courses on topics determined each year by the Associate Dean Postgraduate in the Faculty of Engineering.

Postgraduate 700 Level Courses

ENGEN 701
Professional Project
15 Points
A comprehensive investigation, analysis and reporting
of a complex engineering design, development or professional engineering problem. Problem synthesis, solution specification, development and reporting as approved by the Head of Department of Mechanical Engineering.

Prerequisite: Departmental approval required
Restriction: ENGGEN 401, 405, 410, 705

ENGGEN 705 15 Points
Advanced Innovation and New Product Development
An advanced course dealing with the theoretical foundations of innovation, design and new product development. Theory is linked to practice in multidisciplinary teams engaged in innovation and design simulations and case studies.

Prerequisite: ENGGEN 303 with a grade of B or better
Restriction: ENGGEN 401, 405, 410, 701, MGMT 305

ENGGEN 720 15 Points
Special Topic

ENGGEN 721 15 Points
Special Topic

ENGGEN 765 30 Points
Engineering Management Project
A major project which should relate to a practical situation in an organisation or company selected by the candidate. The project must be approved by the Master of Engineering Management Programme Director, and may take the form of a survey and evaluation of modern advances in engineering management practices, the development and/or implementation of new management strategies, or a management oriented industrial case study.

Restriction: ENGGEN 763, ENGGEN 764
To complete this course students must enrol in ENGGEN 765 A and B, or ENGGEN 765

ENGGEN 770 15 Points
Medical Devices Technology
The technology of medical devices and instrumentation including software, hardware, measurement and processing of bio signals, interfacing, signal conditioning, signal processing and identification, bio-mechatronic system design, modelling, control and integration. Medical imaging systems.

ENGGEN 771 15 Points
Medical Devices Practice
Surgical assistance and medical intervention systems, training systems, prosthetics, orthotics, exoskeleton devices, and other bio-mechatronic devices. Healthcare robotics. Clinical evaluation of systems and safety issues. Medical and regulatory requirements for medical devices; quality assurance and controlled design.

ENGGEN 791A 30 Points
ENGGEN 791B 30 Points
Medical Devices Research Project
A structured supervised research project addressing a topic relevant to the development and commercialisation of medical devices and technologies.

To complete this course students must enrol in ENGGEN 791 A and B

Engineering Science

Stage I

ENGSCI 111 15 Points
Mathematical Modelling 1

Restriction: ENGSCI 211, 213, 311, 313, 314

ENGSCI 205 15 Points
Special Topic

ENGSCI 206 15 Points
Special Topic

ENGSCI 211 15 Points
Mathematical Modelling 2SE
Probability theory, random variables and distributions, linear algebra, eigenvectors, Fourier series. Application of the techniques through appropriate modelling examples. Introductory data analysis and statistics.

Restriction: ENGSCI 211, 213

ENGSCI 213 15 Points
Mathematical Modelling 2

Restriction: ENGSCI 211, 213

ENGSCI 233 15 Points
Computational Techniques and Computer Systems
Introduction to digital electronics, computer organisation and computational techniques. Digital gates, combinatorial and synchronous circuits, data
Complex Analysis, including complex numbers, analytic functions, complex integration, Cauchy's theorem, Laurent series, residue theory; Laplace transforms; Modelling with partial differential equations, including electronic and electrical applications; Fourier Analysis, Fourier transform, Fast Fourier transform; Optimisation, including unconstrained and constrained models, linear programming and nonlinear optimisation.

Prerequisite: ENGSCI 211
Restriction: ENGSCI 311, 312, 314

ENGSCI 314
Mathematical Modelling 3ES
Mathematical modelling using ordinary and partial differential equations. Probability. Conditional probability, random variables as models of a population, common distribution models, the Poisson process, applications to reliability. Exploratory data analysis, confidence intervals, tests of hypothesis, t-tests, sample tests and intervals, paired comparisons. Introduction to one-way ANOVA. Linear and polynomial regression, regression diagnostics.
Prerequisite: ENGSCI 211
Restriction: ENGSCI 311, 312, 313, 321

ENGSCI 331
Computational Techniques 2
Numerical algorithms and their translation to computer code. A selection of topics from numerical solution of linear equations, eigen problems, ordinary differential equations, numerical integration, nonlinear equations, finite differences and partial differential equations.
Prerequisite: ENGSCI 233
Corequisite: ENGSCI 311 or 313 or 314

ENGSCI 343
Fundamentals of Continuum Mechanics
Prerequisite: BIOMENG 221 or ENGSCI 263
Restriction: ENGSCI 341, 342

ENGSCI 355
Applied Modelling in Simulation and Optimisation
Use of optimisation modelling languages and simulation software, with an emphasis on practical problem solving and laboratory-based learning.
Prerequisite: 15 points from ENGSCI 255, STATS 255
Restriction: OPSRES 385, 392

ENGSCI 363
Modelling and Design 2
Applications of elasticity and fluid dynamics theory to engineering problems including design and analysis of mechanical assemblies. Group projects to formulate design proposals, including costs for development and manufacture. Underlying Finite Element Modelling (FEM) and Continuum Mechanics concepts. Utilisation of 3D CAD and FEM software during both design and analysis phases.
Prerequisite: ENGSCI 343
Restriction: ENGSCI 342, 361
ENGSCL 391 15 Points
Optimisation in Operations Research
Linear programming, the revised simplex method and its computational aspects, duality and the dual simplex method, sensitivity and post-optimal analysis. Network optimisation models, maximum flow, shortest path and spanning tree algorithms. Transportation, assignment and transhipment models, and the network simplex method.
Prerequisite: 15 points from ENGGN 150, ENGSCL 111, MATHS 208, 230, 250, 253, and one of COMPSCI 101, ENGGN 131, ENGSCL 131, MATHS 162, STATS 220
Restriction: STATS 391

Postgraduate 700 Level Courses

ENGSCL 700A 15 Points
ENGSCL 700B 15 Points
Research Project
An investigation carried out under the supervision of a member of staff on a topic assigned by the Head of Department of Engineering Science. A written report on the work must be submitted.
Restriction: ENGSCL 400
To complete this course students must enrol in ENGSCL 700 A and B

ENGSCL 701 15 Points
Studies in Engineering Science
An advanced course on topics to be determined each year by the Head of Department of Engineering Science.
Prerequisite: Departmental approval required

ENGSCL 705 15 Points
Special Topic

ENGSCL 706 15 Points
Special Topic

ENGSCL 711 15 Points
Advanced Mathematical Modelling
A selection of modules on mathematical modelling methods in engineering, including theory of partial differential equations, integral transforms, methods of characteristics, similarity solutions, asymptotic expressions, theory of waves, special functions, non-linear ordinary differential equations, calculus of variations, tensor analysis, complex variables, wavelet theory and other modules offered from year to year.
Prerequisite: ENGSCL 311 or 312 or 313 or 314
Restriction: ENGSCL 414, 415

ENGSCL 712 15 Points
Computational Algorithms for Signal Processing
Advanced topics in mathematical modelling and computational techniques, including topics on singular value decomposition, Principle Component Analysis and Independent Component Analysis, eigen-problems, and signal processing (topics on neural network models such as the multi-layer perception and self organising map).
Prerequisite: ENGSCL 314 and 331
Restriction: ENGSCL 416, 452

ENGSCL 721 15 Points
Advanced Numerical Methods
An advanced course on finite elements, boundary elements and finite differences.
Prerequisite: Departmental approval required

ENGSCL 740 15 Points
Advanced Continuum Mechanics 1
Applications of continuum mechanics to problems in biomechanics, fluid mechanics and solid mechanics. Including topics such as large deformation elasticity theory applied to soft tissues, inviscid flow theory, compressible flows, viscous flows, meteorology, oceanography, coastal ocean modelling, mixing in rivers and estuaries. Fracture, composite materials and geomechanics.
Prerequisite: ENGSCL 363 or Departmental approval
Restriction: ENGSCL 440

ENGSCL 741 15 Points
Advanced Continuum Mechanics 2
Turbulence and turbulence modelling. Advanced numerical techniques in computational fluid dynamics (CFD). Application of CFD to environmental flows and aerodynamics. A variety of topics in engineering solid mechanics which could include composite materials, geomechanics, contact mechanics, fracture mechanics, rheology, thermomechanics, constitutive theory and computational methods.
Prerequisite: ENGSCL 363 or Departmental approval
Restriction: ENGSCL 442, 443

ENGSCL 742 15 Points
Studies in Continuum Mechanics
An advanced course in continuum mechanics covering topics in the mechanics of solids and fluids and other continua.
Prerequisite: Departmental approval required

ENGSCL 745 15 Points
Petroleum Engineering
Interdisciplinary introduction to topics in geology, geophysics, reservoir engineering, drilling and production engineering relevant to the production of oil and gas. Mathematical models of multiphase fluid flow in porous media. Reservoir engineering tools for analysis and forecasting of reservoir performance. Unconventional petroleum resources.
Prerequisite: ENGSCL 311, 313 or 314

ENGSCL 753 15 Points
Computational Techniques in Continuum Mechanics and Bioengineering
Theoretical and applied finite element and boundary element methods for static and time dependent problems of heat flow, bioelectricity, linear elasticity and non-linear mechanics.
Prerequisite: ENGSCL 311 or 312 or 313 or 314
Restriction: ENGSCL 450, 451, 471

ENGSCL 760 15 Points
Algorithms for Optimisation
Meta-heuristics and local search techniques such as Genetic Algorithms, Simulated Annealing, Tabu Search and Ant Colony Optimisation for practical optimisation. Introduction to optimisation under uncertainty, including discrete event simulation, decision analysis, Markov chains and Markov decision processes and dynamic programming.
Restriction: ENGSCL 450, 451, 460

ENGSCL 761 15 Points
Integer, Non-linear and Multi-objective Optimisation
Computational methods for solving optimisation problems, including branch and bound and cutting plane methods for integer programming. Algorithms for multi objective functions, Nonlinear optimisation.
Prerequisite: 15 points from ENGSCL 391, STATS 391
Restriction: ENGSCL 450, 451, 460

ENGSCL 762 15 Points
Scheduling and Optimisation in Decision Making
A course of advanced topics arising in the practical
application of optimisation models for machine and resource scheduling, routing applications, staff rostering and performance measurement. 
Prerequisite: 15 points from ENGSCI 391, STATS 391
Restriction: ENGSCI 463

ENGSCI 763 15 Points
Advanced Simulation and Stochastic Modelling
Prerequisite: 15 points from ENGSCI 391, STATS 391
Corequisite: ENGSCI 760
Restriction: ENGSCI 461, 464

ENGSCI 765 15 Points
Studies in Operations Research 1
An advanced course in recent developments in operations research and its applications.
Prerequisite: Departmental approval required

ENGSCI 766 15 Points
Studies in Operations Research 2
An advanced course in recent developments in operations research and its applications.
Prerequisite: Departmental approval required

ENGSCI 768 15 Points
Research Topics in Operations Research 1
Includes selected topics from non-linear programming, decomposition, integerisation, combinatorial optimisation, stochastic optimisation, game theory, smooth and non-smooth optimisation, multicriteria decision making.
Prerequisite: 15 points from ENGSCI 391, STATS 391
Corequisite: ENGSCI 760, 761
Restriction: ENGSCI 461, 464

ENGSCI 769 15 Points
Research Topics in Operations Research 2
A course on recent research topics in Operations Research.
Prerequisite: 15 points from ENGSCI 391, STATS 391
Corequisite: ENGSCI 760, 761

ENGSCI 772 15 Points
Whole Organ Modelling
Prerequisite: PHYSIOL 210 or MEDSCI 205, ENGSCI 371 or BIOMENG 321
Restriction: ENGSCI 472

ENGSCI 787 15 Points
Project X
A student is required to submit a report on a topic assigned by the appropriate Head of Department.
and quality control approaches suitable for urban development. Includes device-specific design of systems such as detention ponds, constructed wetlands, and bioretention systems, green roofs and permeable/porous pavement, as well as integrated stormwater management planning known as Low Impact Development. Applies hydrologic principles and pollutant removal mechanisms to prevent or mitigate environmental impacts from urban stormwater runoff. Prerequisite: ENVENG 244 and 333

ENVENG 702 15 Points
Engineering Decision Making in Aotearoa
Practical application of assessment tools for understanding complex problems. A Māori model decision making framework is applied to an integrated analysis of environmental, cultural, social and economic well-being, the four sustainability pillars identified in New Zealand legislation.

ENVENG 703 15 Points
Studies in Environmental Engineering 3
Advanced course on topics to be determined each year by the Head of Department.

ENVENG 704 15 Points
Sustainable Resource Management
Wide-ranging review of the issues and techniques required for the sustainable management of resources. Restriction: ENVENG 404

ENVENG 705 15 Points
Special Topic in Environmental Engineering 1
A course on a topic in environmental engineering to be determined each year by the Head of Department. Restriction: ENVENG 402

ENVENG 706 15 Points
Special Topic in Environmental Engineering 2
A course on a topic in environmental engineering to be determined each year by the Head of Department. Restriction: ENVENG 403

ENVENG 707 15 Points
Special Topic in Environmental Engineering 3
A topic in environmental engineering to be determined each year by the Head of Department.

ENVENG 719 15 Points
Design Project
A design project requiring input from more than one engineering subdiscipline. The department will offer a number of projects from which the students may select. It will be possible for groups of students to work together on a project. Assessment will be based on a report and an oral presentation of the outcome of the project. Restriction: ENVENG 419

ENVENG 740 15 Points
Water and Wastewater Engineering
Chemistry and microbiology of water and wastewater treatment, flow models and reactors, Unit operations and process analysis and design. Treatment plant design and operation. Nutrient removal processes. Effluent and residues disposal. Restriction: ENVENG 441

ENVENG 741 15 Points
Hazardous Substance Management
A review of topics in hazardous substance management including: substance classification, legislation and enforcement, storage and handling practices, occupational safety and health, emergency preparedness and response, risk evaluation and control. 

ENVENG 743 15 Points
Integrated Solid Waste Management

ENVENG 744 15 Points
Environmental Engineering Processes Laboratory
Laboratory research methods (safety, sampling procedures, sample preservation, data analysis and report writing). Laboratory experiments exploring various physical, chemical and biological processes, such as sedimentation, chemical coagulation and precipitation, chlorination, reactor residence time distribution, activated carbon and anaerobic digestion.

ENVENG 745 15 Points
Modelling of Groundwater Flow and Pollutant Transport
Aquifer properties, principles of seepage and groundwater flow, solution techniques for two-dimensional flows, groundwater quality, contaminant transport in saturated and unsaturated media, biochemical transformation processes, multiphase flow and use of groundwater models.

ENVENG 746 15 Points
Surface Water Quality Modelling
Mass balance and steady state solutions for point and distributed loadings applied to rivers and lakes, feed-forward and feedback systems of reactors, mass transport in incompletely mixed systems, simple time-variable solutions, nutrient dynamics in water bodies and exchange with sediments, and eutrophication and toxic-substance modelling.

ENVENG 750 15 Points
Sustainability Engineering 2
An in-depth understanding of sustainability and engineering. The concept of sustainability engineering and engineering’s relationship to global issues such as limitations on material and energy resources, pollution and global warming. Tools that engineers need to assist in resolving such problems, including design for environment, servicing, clean technologies and industrial ecology will be covered.

ENVENG 751 15 Points
Sustainable Technologies and Processes
Pollution prevention and clean engineering. Resource, waste and energy auditing, resource management, cost/benefit analysis of sustainable technologies, technology and process assessment and design and management of sustainable technologies and processes.

ENVENG 752 15 Points
Risk, LCA and Sustainability
The objectives of this course are to provide students with an understanding of sustainability, life cycle assessment, impact assessment and risk assessment and how these can be used to measure sustainability. The format will include discussions on sustainability, assessment methods and sustainability assessment, including scoping, sustainable levels, inventory, impact and risk assessment and mitigations measures.
ENVE 753
Sustainable Engineering Design
The principles of sustainable design, including design for environment, design for recycling, design for duration and design for reuse. Assessment of product design, appropriate product function, level of quality and life cycle. Students will be expected to provide input into effective, efficient and sustainable product design.

ENVE 754
Sustainability Engineering Seminar
A variety of relevant and current topics relating to sustainability engineering, including the impact of information technologies, GM engineering, nanotechnologies and other new engineering initiatives on society and means of ensuring that those technologies encourage sustainability. Students will assess such issues and discuss the relevance to engineering, sustainability and future development of technology and society.

ENVE 787
Project X
A student is required to submit a report on a topic assigned by the appropriate Head of Department.

ENVE 788A
ENVE 788B
Project Y
A student is required to submit a report on a topic assigned by the appropriate Head of Department. To complete this course students must enrol in ENVE 788 A and B

ENVE 789
Project Z
A student is required to submit a report on a topic assigned by the appropriate Head of Department.

ENVE 796A
ENVE 796B
METhesis (Environmental)
A student is required to submit a thesis on a topic assigned by the appropriate Head of Department. To complete this course students must enrol in ENVE 796 A and B

Mechanical Engineering

Stage II

MECHENG 201
Electronics and Computing for Mechanical Engineers
Mechanical engineers need to be familiar with those electronics and software elements that are now vital components of most mechanical products and processes. Introduces sensors and actuators, analogue and digital circuit elements for signal processing, and computing and software programming. Prerequisite: ELECTENG 101

MECHENG 211
Thermofluids
The fundamentals of fluid mechanics, thermodynamics and heat transfer with practical applications to engineering devices and systems.

MECHENG 222
Dynamics
Kinematics of particles, rectilinear and curvilinear motion, kinematics of rigid bodies in the plane. Kinetics of particles, systems of particles and rigid bodies. Impulse and momentum, mechanism motion in the plane. Vibration of a particle. Prerequisite: 15 points from ENGGEN 121, 150

MECHENG 224
System Dynamics Modelling, Simulation and Animation
The course introduces basics of modelling, simulation and animation of a dynamics of systems, structures, objects and devices. Simulations and animations lead to deeper understanding of dynamic phenomena in various fields of engineering as well as in economy, bio-medicine and sociology. The problems included throughout the course reinforce the mastery of both the theory and the practice of system dynamics.

MECHENG 235
Design and Manufacture 1
The design process as a teamwork, and system based, problem-solving activity. Design methodology and evaluation, design failure and safety, communicating design intent through graphical means. Introduction to engineering material properties and concepts of material failure. Introduction to motive power sources, machine elements and production and fabrication processes. Prerequisite: ENGGEN 115
Restriction: MECHENG 223, 234

MECHENG 236
Design and Manufacture 2
Introduction to computer-assisted design animation and virtual mechanisms and computer-aided production processes. Basic hydraulics and pneumatics systems and components. Fundamental techniques for the determination of material behaviour under external loads. Further production processes. Design reliability. Basic principles of “Design for X”. Prerequisite: MECHENG 235
Restriction: MECHENG 223, 234

MECHENG 242
Mechanics of Materials 1

MECHENG 270
Software Design
Fundamentals of software design and high-level programming making use of case studies and programming projects. Includes: requirements analysis, specification methods, software architecture, software development environments, software quality, modularity, maintenance, reusability and reliability; models of software development.

Stage III

MECHENG 311
Thermal Engineering
Second Law of Thermodynamics, entropy. Cycles and applications. Heat transfer, heat exchangers. Prerequisite: MECHENG 211

MECHENG 312
Sensors and Actuators
An introduction to mechatronics engineering and its main elements. Topics include interfacing and signal
processing, sensors, actuators, control technologies, systems modelling, simulation and analysis.
Restriction: ELECTENG 428

MECHENG 313
15 Points
Real Time Software Design
Introduces the principles of software design in a real time environment. Main topics include computer/microprocessor architecture, programming in real-time environment, software design, embedded C or C# and data acquisition systems.

MECHENG 322
15 Points
Control Systems
An introduction to classical control of mechanical and mechatronic systems. Topics include: transfer functions, block diagrams, time response characteristics, stability, frequency response characteristics, and controller design (eg, pole placement, lead-lag compensation, PID). Applications in MATLAB/Simulink and with physical systems.
Prerequisite: ENGSCI 211, MECHENG 222

MECHENG 325
15 Points
Machine and Structural Dynamics
Restriction: MECHENG 324

MECHENG 334
15 Points
Engineering Design 3M
Good practice and standard methods in mechanical engineering design. Conceptual and detailed design in projects involving machine elements, engineering sciences and engineering mechanics. Some of the advanced computer-aided tools (eg, CAD, CAM, CAE) will be introduced and utilised in some projects.
Prerequisite: MECHENG 234, or MECHENG 222 and 233
Restriction: MECHENG 332, 333

MECHENG 340
15 Points
Mechanics of Materials 2
Prerequisite: MECHENG 242
Restriction: MECHENG 341

MECHENG 352
15 Points
Manufacturing Systems
An introduction to the procedures and technological aspects of typical manufacturing systems: basic concepts of plant and work design; automation; planning, implementation; simulation, and monitoring of production processes; project-based introduction to the tools and techniques applied by professional engineers in modern manufacturing plants.
Restriction: MECHENG 351

MECHENG 370
15 Points
Analog Circuit Design
An introduction to the design, analysis and implementation of electronic circuits or systems for various applications such as signal conditioning, interfacing and signal generation, and high power electronics. These include PCB design and testing.
Prerequisite: ELECTENG 101 or 208

MECHENG 371
15 Points
Digital Circuit Design
Introduction to a variety of techniques in digital system design ranging from simple combinational logic to finite state machines including issues relating to digital circuit such as hazards, thermal management and signal integrity. Students will be exposed to the use of FPGA to rapid prototype digital systems using schematic and hardware description language entries.
Prerequisite: ELECTENG 101 or 208

Postgraduate 700 Level Courses

MECHENG 701
15 Points
Studies in Mechanical Engineering 1
Advanced courses on topics to be determined each year by the Head of Department of Mechanical Engineering.

MECHENG 702
15 Points
Studies in Mechanical Engineering 2
Advanced courses on topics to be determined each year by the Head of Department of Mechanical Engineering.

MECHENG 705
15 Points
Mechatronics Systems
Modelling and analysis of electro-mechanical systems, including MEMS sensors, actuators, smart/functional materials, structures. Fundamentals of digital control and systems applied to electro-mechanical systems.
Prerequisite: MECHENG 312, 322
Restriction: MECHENG 405

MECHENG 706
15 Points
Mechatronics Design
A range of projects that demonstrate the application and integration of the materials taught in lecture courses to create practical intelligent products and manufacturing processes.
Prerequisite: MECHENG 312, 322
Restriction: MECHENG 406

MECHENG 707
15 Points
Special Topic in Mechanical Engineering 1
Courses on special topics are to be determined each year by the Head of Department of Mechanical Engineering.

MECHENG 708
15 Points
Special Topic in Mechanical Engineering 2
Courses on special topics are to be determined each year by the Head of Department of Mechanical Engineering.

MECHENG 709
15 Points
Industrial Automation
Automation technologies used in the manufacturing and processing industry. Topics include: robotics, PLCs, industrial process visualisation, data collection and supervisory control, robot sensors, computer vision systems, automated assembly systems, condition monitoring.
Prerequisite: MECHENG 312
Restriction: MECHENG 409

The application of computational methods to fluid dynamics and heat transfer. Finite volume and finite difference methods. Convergence and stability. Mesh generation and post-processing. Application of commercial computer programs to industrial problems.

The study of fluid mechanics relevant to external flows, e.g., wind turbines, yachts, aircraft or wind loadings on buildings, boundary layers, computational fluid dynamics.

Industrial thermodynamics and energy conversion/efficiency, power cycles, availability and irreversibility, simple combustion analysis, mass transfer, energy studies, boiling and condensation.

The wind-loading chain – planetary boundary-layer flow, extreme winds, wind structure, wind loads, dynamic response, bluff body aerodynamics, vortex shedding, aero-elasticity, wind-tunnel testing, pedestrian level winds.

Principles and practice of heating, ventilation, air-conditioning and refrigeration (HVAC&R), psychrometry, heating/cooling loads, mass transfer and air quality, refrigeration/heat pump systems, cooling towers, pumps, fans, valves, pipes and ducts.

Combustion processes; calculations for Diesel and Otto cycles; ideal, fuel-air and real cycles; use of alternative fuels as supplements or replacements.

Fundamentals of advanced thermodynamics-cycles and applications, heat and mass transfer, psychrometry, refrigeration and air-conditioning, combustion, thermal system design and simulation.

Advanced control of mechanical and mechatronic systems. Topics include: state-space representations, linearisation, discretisation, stability, state feedback control design, optimal control, state estimation and Kalman filters. Applications in MATLAB/Simulink and with physical systems.

The problems of learning from experimental data (support vector machines and neural networks) and the problem of embedding human knowledge into mathematical expressions (fuzzy logic) are covered. Learning from noisy sparse data patterns (examples) will be put in the framework of the theory of approximations of multivariate functions.

A variety of engineering projects requiring the development and communication of design solutions to a professional standard, and using a wide range of advanced engineering methods.

Polymer and composites manufacturing: properties and processing of polymers and reinforcing materials. Analysis of selected manufacturing processes; injection moulding, extrusion, liquid composites moulding, pultrusion. Consideration of viscous flow, flow through porous media and heat transfer.

Theory of plasticity; material characterisation; process analyses: extrusion, wire-drawing, forging, rolling; metal cutting; thin shear model and Merchant’s diagram, tool wear and tool life; sheet forming; forming limit diagram; thermal analyses of industrial operations including transient conduction and drying; casting; polymer processing; basic polymer science.
thermosets and thermoplastics, profile extrusion, sheet extrusion; blown-film extrusion, filament extrusion, blow moulding.

**Prerequisite:** MECHENG 340

**Restriction:** MECHENG 342, 447

**MECHENG 751**

15 Points

**Advanced CAD/CAM/CNC**

Selected topics in advanced computer-aided design (CAD), computer-aided manufacturing (CAM) and computer numerical controls (CNC). For each topic, its philosophy, analysis, selection and successful implementation will be investigated.

**MECHENG 752**

15 Points

**Technology Management**

An appreciation of the strategic systems and technology management aspects of manufacturing systems. Industry based projects that explore the design and optimisation of manufacturing operations form a major part of the course.

**Prerequisite:** ENGGEN 303 with a grade of B or better

**Restriction:** MECHENG 451

**MECHENG 753**

15 Points

**Manufacturing Information Systems**

A study of new or emerging information technologies and their applications in manufacturing enterprises. The focus is on product modelling technologies based on STEP, and intelligent and interoperable manufacturing systems. The targeted applications are computer numerically controlled machine tools. Basic knowledge of object-oriented programming and database techniques is a necessity. Students should also have basic programming skills, eg. C++.

**MECHENG 758**

15 Points

**Special Topic in Engineering Management 1**

Distance learning graduate course for students previously or currently employed. Students can select a specific topic from those offered in the area of engineering management in consultation with the programme coordinator.

**Students must be enrolled in the MEMgt programme.**

**MECHENG 759**

15 Points

**Special Topic in Engineering Management 2**

Distance learning graduate course for students previously or currently employed. Students can select a specific topic from those offered in the area of engineering management in consultation with the programme coordinator.

**Students must be enrolled in the MEMgt programme.**

**MECHENG 760**

15 Points

**Special Topic in Technology Management 1**

**Special Topic in Technology Management 2**

Distance learning graduate course for students previously or currently employed. Students can select a specific topic from those offered in the area

of technology management in consultation with the programme coordinator.

**Students must be enrolled in the MEMgt programme.**

To complete this course students must enrol in MECHENG 761 A and B, or MECHENG 761

**MECHENG 762A**

15 Points

**MECHENG 762B**

15 Points

**Mechatronics Research Project**

An innovative mechatronics project covering the research and design phases of problem analysis, specification and conceptual design, detailed design, prototype implementation and verification.

**Restriction:** MECHENG 407, 408, 462

To complete this course students must enrol in MECHENG 762 A and B

**MECHENG 763A**

15 Points

**MECHENG 763B**

15 Points

**Research Project**

A comprehensive investigation leading to an oral presentation, a display and a report on a topic assigned by the Head of Department of Mechanical Engineering.

**Restriction:** MECHENG 461

To complete this course students must enrol in MECHENG 763 A and B

**MECHENG 764**

Software Engineering

Stage II

SOFTENG 206  15 Points
Software Engineering Design 1
Project work. Skills and tools in systematic development of software, including testing, version control, build systems, working with others. 
Prerequisite: SOFTENG 250, 251

SOFTENG 211  15 Points
Software Engineering Theory
Prerequisite: ENGGEN 131 or COMPSCI 101

SOFTENG 250  15 Points
Introduction to Data Structures and Algorithms
Introduction to the analytical and empirical behaviour of basic algorithms and data structures. 
Prerequisite: ENGGEN 131 or COMPSCI 101 Corequisite: ENGSCL 213

SOFTENG 251  15 Points
Object Oriented Software Construction
An introduction to Object Oriented software development. Programming with classes; objects and polymorphism. Evolutionary and test-driven development. Analysis and design. Modelling with UML. Design patterns. Design for reuse, for testing, and for ease of change. 
Prerequisite: ENGGEN 131 or COMPSCI 101

SOFTENG 254  15 Points
Quality Assurance
Software verification and validation. Static and dynamic QA activities as part of the software lifecycle. Unit, integration, system, performance and usability testing. Use of automation and tools to support testing activities. Metrics to quantify strength of testing and complexity of programs. 
Prerequisite: SOFTENG 250, 251

Stage III

SOFTENG 306  15 Points
Software Engineering Design 2
Working in project teams to develop software to meet changing requirements for a large application. Project Planning. Requirements gathering. Estimating, costing and tracking. Acceptance and unit testing. Evolutionary design and development. Collaborative development tools. 
Prerequisite: SOFTENG 206, 254, 350, 351

SOFTENG 325  15 Points
Software Architecture
Taxonomy of software architecture patterns, including client/server and multi-tier. Understanding quality attributes. Methodologies for design of software architectures. Technologies for architecture level development, including middleware. 
Prerequisite: 15 points from SOFTENG 350. COMPSCI 302

SOFTENG 350  15 Points
Human Computer Interaction
Prerequisite: SOFTENG 206

SOFTENG 351  15 Points
Fundamentals of Database Systems
Relational model, Relational Algebra, Relational Calculus, SQL, SQL and Programming Languages, Entity Relationship Model, Normalisation, Query Processing and Query Optimisation, ACID Transactions, Transaction Isolation Levels, Database Recovery, Database Security, Databases and XML. 
Prerequisite: SOFTENG 211 or COMPSCI 225

SOFTENG 354  15 Points
Computer Networks
Prerequisite: 15 points from COMPSYS 201, SOFTENG 252 and 15 points from SOFTENG 206, 211, 250, 251, 254, 325

SOFTENG 370  15 Points
Operating Systems
replication transparency. Real-time programming and embedded systems.
Prerequisite: COMPSYS 201 or SOFTENG 252, 250

A student is required to submit a report on project work carried out on a Software Engineering topic assigned by the Head of Department.
Prerequisite: SOFTENG 306
Restriction: SOFTENG 401
To complete this course students must enrol in SOFTENG 700 A and B

SOFTENG 701 Advanced Software Engineering Development Methods

Advanced studies in methods and techniques for developing complex software systems including topics in component based technologies, software engineering environments, tool construction, software architectures.

SOFTENG 702 Advanced Human Computer Interaction

Current topics in Human-Computer Interaction research, such as: new user-interface technologies, empirical usability studies, pen-based user interaction models, advanced layout specification, systematics of human-computer interaction and computer-mediated collaborative work.

SOFTENG 710 Studies in Software Engineering 1

Advanced courses on topics to be determined each year by the Head of Department.
Prerequisite: Permission of the Head of Department

SOFTENG 711 Studies in Software Engineering 2

Advanced courses on topics to be determined each year by the Head of Department.
Prerequisite: Permission of the Head of Department

SOFTENG 750 Software Development Methodologies

Software lifecycle; software process models; examples of software processes; software process improvement; project management; tool support for software development; issues in software engineering.
Prerequisite: SOFTENG 306
Restriction: SOFTENG 450

SOFTENG 751 High Performance Computing

Project-based hands-on high performance computing and programming. Memory architecture and networks of parallel computing systems. Multicores, hardware acceleration devices such as graphics cards and FPGAs. Shared memory and data parallel programming. Object Oriented and low level parallel programming. Parallelisation process: subtask decomposition, dependence analysis and scheduling.
Prerequisite: SOFTENG 306 or COMPSYS 306 or COMPSYS 310 or 30 points at Stage III in Computer Science
Restriction: SOFTENG 461

SOFTENG 752 Formal Specification and Design

Formal specification, design, and (automatic) analysis of software systems. Use of Z, Alloy, OCL, and CSP notations. Comparison of approaches, emphasising their practical application.
Prerequisite: SOFTENG 306
Restriction: SOFTENG 462

SOFTENG 761 Special Topic in Software Engineering 1

An advanced course on a topic to be determined each year by the Head of Department.
Prerequisite: Permission of the Head of Department

SOFTENG 762 Special Topic in Software Engineering 2

An advanced course on a topic to be determined each year by the Head of Department.
Prerequisite: Permission of the Head of Department

SOFTENG 787 Project X

A student is required to submit a report on a topic assigned by the Head of Department.

SOFTENG 788A 15 Points
SOFTENG 788B 15 Points
Project Y

A student is required to submit a report on a topic assigned by the Head of Department.
To complete this course students must enrol in SOFTENG 788 A and B

SOFTENG 789 Project Z

A student is required to submit a report on a topic assigned by the Head of Department.

SOFTENG 796A 60 Points
SOFTENG 796B 60 Points
ME Thesis (Software Engineering)

A student is required to submit a thesis on a topic assigned by the Head of Department.
To complete this course students must enrol in SOFTENG 796 A and B

Faculty of Medical and Health Sciences

Audiology

Postgraduate 700 Level Courses

AUDIOL 701 15 Points
Auditory Neuroscience
The anatomy and physiology of the auditory system, including the central nervous system. Topics include: the anatomy and neuroanatomy of the ear, the role of the middle ear, cochlear mechanics and micromechanics, transduction in the cochlea and vestibular system, responses of the auditory nerve and cochlear homeostasis.

AUDIOL 702 15 Points
Basic Diagnostic Audiology
The basic principles and techniques of diagnostic audiology in adults and children. Topics include: basic audiometric techniques (history-taking, pure tone audiometry, speech audiometry, immittance audiometry, traditional site-of-lesion tests, paediatric assessment, non-organic hearing loss). Emphasis is placed on critical assessment of current literature.

AUDIOL 704 15 Points
Central Auditory Function
Auditory neurophysiology and electrophysiology of central auditory pathways, psychoacoustics, and speech and language. Topics include: the use of electrophysiology, imaging technologies and psychoacoustics to probe the function of the auditory system. Central processes involved in speech and language.

AUDIOL 713 15 Points
Clinical Otolaryngology and Related Sciences
An introduction to otolaryngology and speech pathology. Topics include: principles of pathology and mechanisms of disease, imaging techniques, diseases of the ear, head and neck, the genetics of deafness, neurological disorders that affect hearing and balance, occupational deafness and hearing conservation, speech pathology.

AUDIOL 714 15 Points
Hearing Aids and Other Devices for the Hearing Impaired
An introduction to the design and technology of analogue and digital hearing aids, cochlear implants and assistive devices for children and adults with hearing-impairment. Analysis of the signal processing techniques and strategies used in digital hearing aids and cochlear implants.

AUDIOL 715 15 Points
Physics and Acoustics for Audiology
The basic physics of sound; and instrumentation and the principles of digital signal processing involved in audiological research. Topics include: the physics of sound waves, room acoustics, the measurement of reverberation time; the nature of acoustic impedance; the nature of filters and amplifiers, acoustics of speech, calibration.

AUDIOL 716A 15 Points
AUDIOL 716B 15 Points
Clinical Practicum I
Introduces the clinical practice of Audiology. Topics include communication skills; ethics; cultural issues;
and the clinical practice of audiology, including counselling, understanding the effects of aging, tinnitus and hyperacusis management. Students will obtain the skills and knowledge to take a clinical history and to perform a basic audiomteric assessment of adults and children. Particular emphasis is placed on critical evaluation and independent learning. Involves clinical work including a nine week practicum during the summer semester between Part I and Part II.

To complete this course students must enrol in AUDIOL 716 A and B

AUDIOL 718A 15 Points
AUDIOL 718B 15 Points

Clinical Practicum II

The advanced clinical practice of audiology with particular emphasis on paediatric audiology and case management of children and adults. Topics include assessment of hearing in the paediatric population, including clinical electrophysiology, development of speech, auditory processing disorders and management of hearing loss in children. Particular emphasis is placed on critical evaluation and independent learning. The course involves substantial clinical work.

Prerequisite: AUDIOL 716

To complete this course students must enrol in AUDIOL 718 A and B

AUDIOL 796A 45 Points
AUDIOL 796B 45 Points

Thesis

To complete this course students must enrol in AUDIOL 796 A and B

Clinical Education

Postgraduate 700 Level Courses

CLINED 703 15 Points
Learning in Small Groups
Explores how clinicians operate as members and leaders of groups, and the conditions underlying effective group function both in education and the workplace.

CLINED 705 15 Points
Simulation and Clinical Skills Teaching
Theory and practice around the use of simulators in clinical education. Addresses underlying theory, research, course design, acquisition of clinical skills, scenario-based learning, scenario design, simulator programming, and feedback after simulated performance.

CLINED 706 15 Points
Interprofessional Learning in the Health Professions
Explores and evaluates the evidence base on interprofessional learning in the health professions. Evaluates the role of interprofessional learning in building effective healthcare teams.

CLINED 707 15 Points
Current Trends in Clinical Education
Supervised research on current trends approved by the Head of the Centre for Medical and Health Sciences Education.

CLINED 708 15 Points
Advanced Studies in the Assessment of Health Professionals
Supervised research on an assessment topic approved by the Head of the Centre for Medical and Health Sciences Education.

CLINED 709 15 Points
Advanced Studies in Evaluation
Supervised research on an evaluation topic approved by the Head of the Centre for Medical and Health Sciences Education.

CLINED 710 15 Points
Special Studies
Independent study on a topic approved by the Head of the Centre for Medical and Health Sciences Education.

CLINED 711 15 Points
E-learning and Clinical Education
Develops the knowledge and skills to critically evaluate e-learning in the clinical setting. Addresses underlying theoretical constructs, practical skills, sourcing and selection of learning objects, course design and assessment.

CLINED 712 15 Points
Curriculum and Course Design
Theory, concepts, and processes that underlie curriculum development and the design of short courses for a clinical setting. Addresses outcome-based course design and the development of objectives, content, methods, materials, assessment and evaluation for a course or curriculum.

CLINED 713 15 Points
Clinical Supervision
Students will explore theories of workplace learning and models of supervision of students and trainees in the clinical workplace, understand the different roles of clinical supervisors, and develop knowledge and skills to improve the effectiveness of clinical supervision in their own context.

CLINED 714 15 Points
Research Methods in Clinical Education
Theories of qualitative and quantitative research methodologies, particularly applied in clinical education, will be explored. Upon completion of the course students will be equipped with the knowledge and skills to understand, evaluate and conduct educational research, particularly within the health and medical professions disciplines and clinical contexts.

Restriction: NURSING 768, POPLHLTH 701

CLINED 715 30 Points
Clinical Teaching
Examines the conceptual frameworks for learning in a clinical setting. The course will explore learning theory as it relates to the clinical experience, programme design, learner preparation, practical skills in enhancing learning in the clinical setting, and translation of theoretical knowledge into clinical practice.

Restriction: CLINED 701, NURSING 709

CLINED 716 30 Points
Assessing Clinical Performance
Examines the purpose, criteria, methods, scoring methods and examiner training for a range of assessments of health professionals, with a focus on ensuring competence to practice. This will include concepts of reliability and validity, standard setting as well as advanced techniques to compare and effectively implement different types of clinical assessments.

Restriction: CLINED 704
Prerequisite: CLINIMAG 701, MEDIMAGE 703

Professional capability in MRI practice.

Needed to demonstrate mastery in both academic and professional capability in MRI practice.

The course will ensure students develop the knowledge, competencies, skills and attitudes needed to demonstrate mastery in academic and professional ultrasound practice.

Prerequisite: MEDIMAGE 705

CLINIMAG 704 15 Points

Ultrasound Clinical Practice II

Addresses normal and abnormal ultrasound imaging appearances, development and adaptation of scanning techniques, and includes reflection on clinical practice relating to mammography. The course will ensure students develop the knowledge, competencies, skills and attitudes needed to demonstrate mastery in academic and professional ultrasound practice.

Prerequisite: CLINIMAG 703, MEDIMAGE 705

CLINIMAG 705 15 Points

Nuclear Medicine Clinical Practice I

Addresses normal and altered radiopharmaceutical biodistribution imaging appearances, protocol selection and development, and includes reflection on clinical practice relating to the skeletal, respiratory, genitourinary and gastro-intestinal systems. The course will ensure students develop the knowledge, competencies, skills and attitudes needed to demonstrate mastery in academic and professional nuclear medicine practice.

Prerequisite: MEDIMAGE 708

CLINIMAG 706 15 Points

Nuclear Medicine Clinical Practice II

Addresses normal and altered radiopharmaceutical biodistribution imaging appearances, protocol selection and development, and includes reflection on clinical practice relating to the cardio-vascular, hepato-biliary, central nervous and endocrine systems. The course will ensure students develop the knowledge, competencies, skills and attitudes needed to demonstrate mastery in academic and professional nuclear medicine practice.

Prerequisite: CLINIMAG 705, MEDIMAGE 708

CLINIMAG 707 15 Points

CT Clinical Practice

Addresses normal and abnormal CT imaging appearances, protocol selection and development, and includes reflection on clinical practice. The course will ensure students develop the knowledge, competencies, skills and attitudes needed to demonstrate mastery in both academic and professional capability in CT practice.

Prerequisite: MEDIMAGE 710

CLINIMAG 708 15 Points

Mammographic Clinical Practice

Addresses normal and abnormal mammographic imaging appearances, technique evaluation and adaptation, and includes reflection on clinical practice relating to mammography. The course will ensure students develop the knowledge, competencies, skills and attitudes needed to demonstrate mastery in academic and professional mammographic practice.

Prerequisite: MEDIMAGE 707

CLINIMAG 709 15 Points

Dietetics

Postgraduate 700 Level Courses

**DIETETIC 701A** 30 Points
**DIETETIC 701B** 30 Points

**Professional Skills 1**
Develops professional communication and organisation/management skills that will enable students to work effectively as dietitians. Introduces the dietetic process as it applies to clinical practice, including assessment, planning, implementation and evaluation of nutrition and dietetic interventions, and introduces the principles of food service management ranging from food safety and hygiene to the development of menus for therapeutic diets. Includes practical placement in the domains of applied nutrition, public health and food service management in part fulfilment of the professional course accreditation requirements of the New Zealand Dietitians Board.

*Corequisite: DIETETIC 703*

To complete this course students must enrol in DIETETIC 701 A and B

**DIETETIC 702A** 7.5 Points
**DIETETIC 702B** 7.5 Points

**Professional Skills 2**
Further develops professional communication and organisation/management skills that will enable students to work effectively as dietitians. Reviews and explores the dietetic process as it applies to clinical practice, including assessment, planning, implementation and evaluation of nutrition and dietetic interventions. Includes practical placement in the domains of applied nutrition, and public health for part fulfilment of the professional course accreditation requirements of the New Zealand Dietitians Board.

*Prerequisite: DIETETIC 701*

To complete this course students must enrol in DIETETIC 702 A and B

**DIETETIC 703** 15 Points

**Advanced Clinical Nutrition**
Provides the basis for professional application of nutrition knowledge to professional nutrition and dietetic scenarios. Includes the role and function of food and nutrients in the various physiological states during the lifecycle, at the level of individual body systems and in human growth, development and performance. Includes study and skill development in nutritional assessment and body composition assessment relevant to individual and population based nutrition and dietetic practice. Key content areas include dietary assessment, anthropometry, laboratory and clinical methods.

**DIETETIC 793A** 45 Points
**DIETETIC 793B** 45 Points

**Thesis**
*Prerequisite: DIETETIC 701, 703*

To complete this course students must enrol in DIETETIC 793 A and B

Health Psychology

Stage I

**HLTHPSYC 122** 15 Points

**Behaviour, Health and Development**
Introduction to the relationship between behaviour and the major biological, cognitive and social-emotional processes, applying them to health and development across the life span. Focuses on aspects of behaviour and development particularly relevant for the healthcare professional.

*Restriction: POPLHLTH 122*

---

Postgraduate 700 Level Courses

**HLTHPSYC 714** 15 Points

**Health Psychology**
A review of the psychological factors involved in health and illness. Topics include: the understanding of patient behaviour in medical settings, preventative health behaviour, cognitive models of illness, stress and illness, communication and adherence to treatment, the psychology of physical symptoms and coping with chronic disease.
Hlthpsych 715  
Research Methods in Health Psychology  
15 Points  
A review of the principal methods used in the design, conduct and analysis of studies in the health psychology area. This will focus on quantitative research, but qualitative methodologies will also be addressed.

Hlthpsych 716  
Psychoneuroimmunology  
15 Points  
Outlines the nature of the human immune system, its measurement and limitations of current practices and models. The main focus of the course is the extent to which psychological processes such as stress, emotions, and social interactions have been found to influence immune behaviour and the implications of these findings for health and wellbeing. Various theoretical frameworks through which psycho-immune relationships might be understood are presented and discussed.

Hlthpsych 717  
Emotions, Emotion Regulation, and Health  
15 Points  
Extends content knowledge in health psychology by focussing on the expanding literature linking emotions and emotion regulation with health outcomes. The course provides an overview of the nature and functions of emotions, discrete versus dimensional approaches, developmental and cultural considerations, and the links between emotions and cognitive processes. Specific topics include direct and indirect pathways linking emotions and health, links between emotions and health-deleterious behaviours, symptom detection, screening behaviour, treatment decision-making, and adherence.

Hlthpsych 718  
Psychophysiology and Health  
15 Points  
Describes general psychophysiological methodology including the measurement, analysis and interpretation of physiological data. Topics include physiological responses to stress including heart rate, blood pressure, heart rate variability, cortisol and the startle response. This course takes a multisystems approach to exploring health and affords the opportunity to view behavioural, physiological and neuroendocrine responses to stress.

Hlthpsych 719  
Health Psychology Assessment  
15 Points  
Extends content knowledge in health psychology through the development of skills in the assessment and evaluation of constructs commonly used in health psychological research and practice. Includes consideration of general issues in psychometric theory and the specific assessment issues commonly confronting widely-used health psychological research designs, as well as detailed coverage of specific content areas including illness cognitions, health-related psychophysiology, emotions, and health outcomes.  
Restriction: PSYCH 701, 747

Hlthpsych 720  
Health Psychology Interventions  
15 Points  
Reviews the underpinning theory base for approaches commonly used in health psychology interventions such as CBT, and applies these approaches to examples from the field of health psychology. Individual and group/community treatment targets will be considered, including common difficulties that impact on disease occurrence or management, and the psychological consequences of disease.  
Restriction: PSYCH 701, 748

Hlthpsych 742A  
Professional Practice in Health Psychology  
15 Points  
Focuses on the professional intervention skills necessary to practice health psychology. Topics include: interviewing and assessment skills, formulation of problems, design and evaluation of interventions and models for interdisciplinary and multidisciplinary functioning. Relevant contexts include: hospitals, hospices, consultancies, general practice etc.  
Prerequisite: HLTHPSYC 746  
To complete this course students must enrol in HLTHPSYC 742A and B

Hlthpsych 743  
Psychopathology and Clinical Interviewing  
15 Points  
Common psychological disorders encountered in clinical practice and health settings. Practical teaching of clinical interview and diagnostic skills is completed in class.

Hlthpsych 744  
Research Topic in Health Psychology  
15 Points  
Offers the opportunity for academic staff to provide a specific course of study for one or several students. It is available only by arrangement between the staff member(s) and students.

Hlthpsych 745A  
Practicum in Health Psychology  
45 Points  
Pre-internship Placement  
Requires students to undertake 300+ hours in at least two approved clinical placements in addition to associated workshops and training over a twelve month period.

Hlthpsych 745B  
Pre-internship Placement  
45 Points  
A practical component of supervised applied work of not less than 1,500 hours in approved health settings, and other work as required. A detailed written report of the work undertaken will be required of the student.  
Prerequisite: HLTHPSYC 746  
To complete this course students must enrol in HLTHPSYC 745A and B

Hlthpsych 746  
Professional Practice in Health Psychology  
30 Points  
Pre-internship Placement  
Requires students to undertake 300+ hours in at least two approved clinical placements in addition to associated workshops and training over a twelve month period.

Hlthpsych 747  
Psychosomatic Processes  
15 Points  
Focuses on the psychological, social and biological mechanisms behind illnesses that present with medically unexplained symptoms. Such illnesses include: chronic fatigue syndrome, chronic pain, irritable bowel syndrome and the somatoform disorders. The diagnostic controversy surrounding these disorders and treatment approaches for these conditions will be addressed.

Hlthpsych 748  
Special Topic in Health Psychology  
15 Points  
A practical component of supervised applied work of not less than 1,500 hours in approved health settings, and other work as required. A detailed written report of the work undertaken will be required of the student.  
Prerequisite: HLTHPSYC 746

Māori Health

Foundation Courses

MĀORIHTH 10H 15 Points
Introduction to Human Biology
An introduction to human biology through a study of the structure and function of mammalian organ systems with special reference to humans. Topics of particular focus include: skin and derivatives, digestive, nervous, reproductive, bone, muscle and circulatory systems. This course also exposes students to learning in a laboratory environment with a strong focus on microscope work and dissection.

MĀORIHTH 11H 15 Points
Introduction to Physical Sciences for Health
Covers the basic physico-chemical principles and concepts relevant to an understanding of biological systems.

MĀORIHTH 12H 15 Points
Introduction to Population Health
A focus on factors that affect the health of whole populations or groups. Uses a population perspective to help understand patterns of health and well-being, whether some groups of people are healthier than others, and why. Introduces population health concepts and approaches, including models for understanding health, systems of explanations for health inequalities and inequities, social determinants of health, aspects of healthcare systems, and fundamental elements of epidemiology.

MĀORIHTH 13H 15 Points
Introduction to Māori Health
Introduces health issues important to Māori within Aotearoa New Zealand. Topics include Māori models of health, structure of the Māori population, health status of Māori, Māori rights as Tangata Whenua, similarities and differences with Pacific peoples, determinants that lead to health inequalities, differences in access to and through healthcare and interventions to address Māori health needs. Aspects of Māori tikanga and Pacific culture will also be studied.

MĀORIHTH 14H 15 Points
Introduction to Pacific Health
Introduces health issues important to Pacific peoples within Aotearoa New Zealand. Topics include Pacific models of health, structure of the Pacific population, health status of Pacific peoples, similarities and differences between Pacific peoples and Māori, determinants that lead to health inequalities, differences in access to and through healthcare and interventions to address Pacific health needs. Aspects of Pacific culture and Māori tikanga will also be studied.

MĀORIHTH 15H 15 Points
Introduction to Chemistry
Fundamentals of chemistry are explored with a view to enhancing appreciation of the chemical nature of the world around us as well as providing the foundation for further study in chemistry. Special attention is paid to familiarisation with the language of chemistry and the chemist’s perspective of the properties of matter and its transformations.

MĀORIHTH 16H 15 Points
Introduction to Physics
An introduction to physics relevant to biological systems, including examples and illustrations that revolve around biological systems. Topics include mechanics, optics, waves, radiation and electricity. Mathematical knowledge of measuring, notation, functions, equations, exponential growth/decay and logarithms is required for the course.

MĀORIHTH 18H 15 Points
Foundation Studies in Medical and Health Sciences
Assists in preparing students for Stage I courses in the medical and health science fields. Special attention is paid to topics not covered in other CertHSc courses including Chemistry, Biology for Biomedical Science and Population Health.
MĀORIHTH 19H  
**Academic and Professional Development**  
15 Points  

Presents the study and writing skills required to complete the Certificate in Health Sciences and in preparation for ongoing tertiary study. Topics will be based around Māori and Pacific health workforce development and career planning and will include library and research workshops, study skills for the sciences, academic writing, communication skills, presentation skills, and test/examination techniques.

MĀORIHTH 20H  
**Introduction to Mathematics for Health**  
15 Points  

A mathematical foundation for studies in health sciences to assist students develop mathematical thinking and discipline. Topics covered include measuring, notation, functions, equations, exponential growth/decay, logarithms and statistics. Examples used in the course will revolve around applications of mathematics in the health sciences.

---

### Stage III

MĀORIHTH 301  
**Māori Health**  
15 Points  

Models of health and well-being that are promoted in relation to Māori and non-Māori in Aotearoa New Zealand are examined and critiqued. The effect of these models on health outcomes is considered.  
Prerequisite: POPHLHTH 210  
Restriction: POPHLHTH 201

---

### Postgraduate 700 Level Courses

MĀORIHTH 701  
**Foundations of Māori Health**  
15 Points  

Provides an overview of the many dimensions of Māori Health. It examines the historical and contemporary determinants of Māori health status, and outlines strategies for improving Māori health in the context of the Treaty of Waitangi and reducing health inequalities.  
Restriction: MĀORIHTH 301

MĀORIHTH 705  
**Māori Health Promotion and Early Intervention**  
15 Points  

Discusses the importance of health promotion and early intervention for Māori. Models of health promotion used by different Māori providers will be presented as well as assisting students to design and implement health promotion and interventions which are likely to be effective for Māori individuals, families, and communities.

MĀORIHTH 706  
**Māori Health: Policy and Practice**  
15 Points  

Examines health and social policy in Aotearoa/New Zealand from a Kaupapa Māori perspective, with an emphasis on reorienting policy to advance Māori health and equity. Provides insights into how policy can be applied within a Kaupapa Māori framework in different areas of public health practice.  
Prerequisite: MĀORIHTH 710

MĀORIHTH 707  
**Practicum in Māori Health**  
15 Points  

Provides the opportunity to develop social assessment and critical analysis skills through the documentation of an approved practicum. Students will be expected to be able to use and demonstrate knowledge of different Māori views, concepts and frameworks. Each student will have supervision and practicum developed appropriate to their learning interests.

---

MĀORIHTH 708  
**Special Studies**  
15 Points

MĀORIHTH 709  
**Transformational Research for Māori Health**  
15 Points  

Provides a critical analysis of research and research processes with regard to their potential to colonise or liberate. Drawing on Kaupapa Māori Theory, the course examines how research can be undertaken in ways that are safe for Māori and that contribute to positive Māori development.  
Prerequisite: MĀORIHTH 710 and 15 points from POPHLHTH 701, 702, 767

MĀORIHTH 710  
**Kaupapa Māori Theory**  
15 Points  

Kaupapa Māori Theory (KMT) underpins a range of approaches employed to ensure policy, research and intervention processes emphasise Māori ways of knowing and being and work to prevent the further marginalisation of Māori. Students learn about the development of KMT and its use in the context of Māori health and development, and will experience and learn from a range of initiatives and projects that have KMT at their core.

MBCHB Part II  
**MBCHB Part II**  

Through clinical scenarios, lectures and laboratories, students are introduced to human health and the description and pathogenesis of disease processes as a basis for the systematic study of human illness. This is integrated with the study of human organ systems through components focusing on musculoskeletal, digestive, genitourinary, cardiovascular and respiratory systems, linked with practical work in anatomy, physiology, pathology, medical imaging, and professional, clinical and communication skills.  
Restriction: MBCHB 203, 205, 206, 209, 210, 211  
To complete this course students must enrol in MBCHB 221 A and B

For further information please refer to the note on page 380.
**Part III**

**MBCHB 303 15 Points**

**Reproduction, Development and Aging**

An integrated study of the biology of reproduction, development, and endocrinology. Emphasis is placed on understanding the endocrine regulatory mechanisms of the hypothalamic/pituitary/gonadal axis and the control of oogenesis and spermatogenesis, on the endocrinology and physiology of the menstrual cycle and pregnancy, and on the control of growth, development and aging from conception through puberty, menopause and beyond. Throughout there is a strong emphasis on clinical relevance and clinical sessions are an important component of the course.

**MBCHB 305 15 Points**

**Regulation of Body Function**

An integrated treatment of the regulation of human body function and its modification by drugs. Topics include: the regulation of gastrointestinal function; electrolytes and fluid volume; cardiovascular function; respiration; energy balance and body weight; body temperature and the physiology of exercise. Clinical problem sessions are an important component and common illnesses are analysed to demonstrate that knowledge of normal function provides a basis for understanding and managing these disorders.

**MBCHB 306 15 Points**

**Blood, Immunity and Infection**

An integrated and multidisciplinary approach to the normal and abnormal function of the haematopoietic and immune systems, and how bacteria and viruses produce infections. Teaching and learning will be based around clinical examples and will include instruction in relevant examination skills.

**MBCHB 311 15 Points**

**MBCHB 311A 7.5 Points**

**MBCHB 311B 7.5 Points**

**Medical Humanities**

A variety of options from the study of medical humanities.

*To complete this course students must enrol in MBCHB 311 A and B, or MBCHB 311*

**MBCHB 312A 15 Points**

**MBCHB 312B 15 Points**

**Professional, Clinical and Communication Skills 2**

This builds on the Part II course. There is an emphasis on developing and applying the key professional, clinical and communication skills for medicine in the clinical context. The course culminates in a hospital-based clinical medicine attachment.

*Restriction: MBCHB 307, 310*

*To complete this course students must enrol in MBCHB 312 A and B*

**MBCHB 313 30 Points**

**The Nervous System**

A coordinated multidisciplinary approach to the central and peripheral nervous systems and the systems of the head and neck including the special senses. It provides a scientific understanding of normal and abnormal structure and function of the nervous system and associated systems. Clinical problem solving and clinical examination skills are important aspects of this course.

*Restriction: MBCHB 301, 302*

**Stage IV**

**MBCHB 401A 60 Points**

**MBCHB 401B 60 Points**

**MBChB Part IV**

During Part IV, students spend 33 weeks in eight clinical attachments: emergency medicine; anaesthesiology; musculoskeletal; surgery; general and specialty medicine; geriatrics and general practice. These attachments are complemented by four weeks of topic teaching on campus. There is also a compulsory Māori and Pacific Health module.

*To complete this course students must enrol in MBCHB 401 A and B*

**Stage V**

**MBCHB 501A 60 Points**

**MBCHB 501B 60 Points**

**MBChB Part V**

Students spend thirty weeks in clinical attachments. These are obstetrics and gynaecology, specialty medicine, geriatric medicine, paediatrics, general practice, and specialty surgery. There is a four week selective experience and projects in professional development to be completed. There are five weeks of topic teaching on campus, including a Population Health week.

*Prerequisite: MBCHB 401*

*To complete this course students must enrol in MBCHB 501 A and B*

**MBCHB 551A 60 Points**

**MBCHB 551B 60 Points**

**MBChB Part VI**

The 42 week trainee intern year includes an ‘elective’ period when students may undertake optional training in an area of medicine of their choice. The remaining weeks are spent practising under supervision, in hospitals and community facilities. Students undertake patient care in the disciplines of medicine, surgery, psychiatry, general practice, paediatrics, and obstetrics and gynaecology. Students must also complete an advanced cardiac life support course, a module in radiology, and a surgical skills course.

*Prerequisite: MBCHB 501*

*To complete this course students must enrol in MBCHB 551 A and B*

**Medical Imaging**

**Postgraduate 700 Level Courses**

**MEDIMAGE 701 15 Points**

**Imaging Anatomy and Pathology**

Students will develop an integrated understanding of anatomy and pathology as it applies to medical imaging in the clinical context. The course introduces the principles of medical science at whole body, organ, tissue, cellular and sub cellular levels and includes the fundamentals of anatomy, physiology and pathophysiology of the major systems of the human body in relation to specific regions and pathologies.

**MEDIMAGE 702 15 Points**

**Professional Issues in Medical Imaging**

Students will investigate the concept of professional practice leading to an exploration of current professional issues relevant to medical imaging
including role development and advanced practice. The course will provide students with the knowledge to interact with individuals from a variety of backgrounds both ethically and with respect for their beliefs and values. The course also addresses medico-legal issues, decision-making and effective communication within the clinical setting.

MEDIMAGE 703 15 Points
Magnetic Resonance Imaging Technology I
Provides students with an in-depth understanding of MRI technology and its applications. The course addresses the scientific principles of the modality including basic pulse sequences, image formation, K-space strategies, tissue suppression techniques, technical parameters and tradeoffs, MR biodefects and safety, image quality, artefacts, quality assurance and equipment developments.

MEDIMAGE 704 15 Points
Magnetic Resonance Imaging Technology II
Addresses more advanced scientific principles of the modality including advanced pulse sequences, gating, contrast agents, parallel imaging methods, high-field imaging and new and evolving techniques.
Prerequisite: MEDIMAGE 703

MEDIMAGE 705 15 Points
Ultrasound Imaging Technology I
Provides students with an in-depth understanding of ultrasound technology and its application. The course addresses the scientific principles of the modality including beam production and propagation in tissue, attenuation, transducer technology, bioeffects and safety in ultrasound, image formation, image processing and recording, artefacts and quality assurance.

MEDIMAGE 706 15 Points
Ultrasound Imaging Technology II
Addresses advanced scientific principles of the modality including Doppler principles, artefacts and instrumentation, electronic array technology, contrast agents, three dimensional and 4-D scanning, equipment developments and new and evolving techniques.
Prerequisite: MEDIMAGE 705

MEDIMAGE 707 15 Points
Mammographic Technology
Provides students with an in-depth understanding of mammographic technology and its application. The course addresses the scientific principles of the modality including image formation, technical parameters, radiation safety specific to mammography, image quality, artefacts, and quality assurance. Equipment developments and new and evolving techniques will be examined.

MEDIMAGE 708 15 Points
Nuclear Medicine Technology I
Provides students with an in-depth understanding of radiopharmacy and nuclear medicine technology. The course addresses the scientific principles of the modality including radionuclide production and emissions, radiation protection, fundamentals of radiation physics, radioactivity, radiation detection, interaction of radiation with matter, and basic operation principles of the gamma camera. Safety in the nuclear medicine environment, image quality, and quality assurance will be examined.

MEDIMAGE 709 15 Points
Nuclear Medicine Technology II
Addresses advanced scientific principles of the modality including Single Photon Emission Computed Tomography (SPECT), SPECT/CT, Positron Emission Tomography (PET), PET/CT non-imaging radionuclide investigations, and new and evolving techniques.
Prerequisite: MEDIMAGE 708

MEDIMAGE 710 15 Points
CT Imaging Technology
Provides students with an in-depth understanding of CT technology and its application. The course addresses the scientific principles of the modality including image formation and reconstruction, technical parameters, radiation safety and dose reduction, image quality, artefacts, quality assurance and contrast agents. Equipment developments and new and evolving techniques will be examined.

Medical Science

Stage I

MEDSCI 100G 15 Points
Human Mind and Body Relationships
Humans share with other living things the features of physical self-generation and adaptation to the environment. Humans also live in a mental (mind) world and maintain relationships with our perceived environments. Minds and bodies mutually affect one another. This mind/body dance, which is explored in this course, is what gives rise to all of human behaviour from simple daily activities to the highest forms of creativity.

MEDSCI 101G 15 Points
Environmental Threats to Human Health
Our environment sustains our lives but at times threatens our health. These threats may occur naturally, or arise from damage we have inflicted on the environment. This course considers health impacts of climate change, pollution, lifestyle choices, poverty and affluence, workplace hazards, emerging infectious diseases, and dangers affecting cancer risk.

MEDSCI 142 15 Points
Biology for Biomedical Science: Organ Systems
Introduction to human biology with particular emphasis on integrated organ function. The course will deal with: structures and processes associated with the function of the nervous, locomotor, cardiovascular, respiratory, digestive, renal, endocrine, musculoskeletal and reproductive systems.
Restriction: HUMANBIO 142

Stage II

MEDSCI 201 15 Points
Human Structure and Function
Presents the structure of biological systems with special reference to human biology, from the levels of
histology through to gross anatomy. Specific examples of the correlation between structure and function will be considered. An introduction to current techniques for the visualisation of biological structure will be presented.
Prerequisite: BIOSCI 107, MEDSCI 142

MEDSCI 202 15 Points
Microbiology and Immunology
An introduction to the nature and roles of bacteria, viruses, fungi and parasites as the causative agents of human diseases. Topics include: the defence mechanisms of the body, the immune system including autoimmunity and allergy, control of disease by antimicrobials, sterilisation, disinfection and infection control practice.
Prerequisite: BIOSCI 107, MEDSCI 142
Restriction: OPTOM 241, PHARMACY 203

MEDSCI 203 15 Points
Mechanisms of Disease
Outlines the basic mechanisms, operating at the molecular, cellular and tissue levels, by which human disease develops. These include genetic factors, cell injury, inflammation, repair, circulatory disturbances, and neoplastic change. These mechanisms are illustrated by descriptions of the pathogenesis of specific diseases that are relevant to the New Zealand situation, or are the focus of current biomedical research.
Prerequisite: BIOSCI 107, MEDSCI 142

MEDSCI 204 15 Points
Introduction to Pharmacology and Toxicology
A solid grounding in the principles underlying pharmacology and toxicology, including the nature of drug targets, their interaction and response (pharmacodynamics), the fate of drugs within the body (pharmacokinetics), toxicity classification and testing, poisons and antidotes, adverse drug reactions, selective toxicity, drug discovery and development. Selected drug examples will be studied to illustrate key principles of clinical pharmacology.
Prerequisite: BIOSCI 107, MEDSCI 142

MEDSCI 205 15 Points
The Physiology of Human Organ Systems
An integrative approach is used to study fundamental physiological processes which enable the body to overcome the challenge of life. Drawing on examples of normal and abnormal function, the course examines the interaction of vital physiological processes, from cellular control mechanisms to multiple organ systems. Topics include: control of fluid and electrolytes, cardiovascular control, energy use, and the delivery of oxygen and metabolites.
Prerequisite: BIOSCI 107, MEDSCI 142
Restriction: PHARMACY 205

MEDSCI 206 15 Points
Introduction to Neuroscience
The impact of neuroscience revolution on our understanding of human physiology and biomedical research is reviewed. Topics include: mechanisms of neurotransmission, learning, memory, sensory perception (vision, hearing, touch and smell) and application of gene therapy for treating neurological diseases. Special emphasis is placed on the integration and control of physiological function by the nervous system. Examples include control of movement and coordination, regulation of reproduction, blood pressure, breathing, appetite, body weight and sexuality. Developmental neuroscience is also considered. Laboratory exercises provide insight into

neural structure and function and include application of neuroimaging technologies.
Prerequisite: BIOSCI 107, MEDSCI 142

Stage III

MEDSCI 301 15 Points
Molecular Basis of Disease
An in-depth analysis of the cellular and molecular basis of disease, including the role of environmental and inherited risk factors, as well as mechanisms of response to cell injury and inflammation in the disease process. Models of common diseases such as diabetes, obesity, cancer and infectious agents will be studied.
Prerequisite: MEDSCI 203

MEDSCI 302 15 Points
Cancer Biology
A study of the scientific basis of cancer including: mechanisms underlying the pathogenesis of cancer, carcinogenesis, DNA damage and repair, properties of cancer cells (including abnormalities of growth and cell cycle control), the growth of tumours, the classification and histopathology of cancers, and an introduction to therapeutic strategies.
Prerequisite: BIOSCI 356 or MEDSCI 203

MEDSCI 303 15 Points
Principles of Pharmacology
Topics covered are: ADME and pharmacokinetics; therapeutic drug monitoring; drug-drug interactions; pharmacogenetics and pharmacogenomics; drug development and analysis; novel drug delivery, chemotherapy including antibiotics, anticancer and antiviral drugs.
Prerequisite: MEDSCI 204 and 15 points from MEDSCI 205, 206, BIOSCI 203, PHARMACY 205

MEDSCI 304 15 Points
Molecular Pharmacology
Considers the molecular mechanisms of drug action. The cellular and molecular mechanisms of drugs acting at receptors, ion channels, enzymes and intermediate messengers are covered. These concepts are applied through a detailed examination of cell cycle and apoptotic pathways, the molecular basis of drug addiction and the mechanisms of action of common recreational drugs.
Prerequisite: MEDSCI 204 and 15 points from MEDSCI 205, 206, BIOSCI 203, PHARMACY 205

MEDSCI 305 15 Points
Systematic Pharmacology
Considers the modification by drugs of human systems under physiological and pathological conditions. The cellular and molecular mechanisms of drugs as receptors, ion channels, enzymes and intermediate messengers are considered. The modification of drugs on the cardiovascular, gastrointestinal, endocrine, reproductive, respiratory and central nervous systems will be covered.
Prerequisite: MEDSCI 204 and 15 points from MEDSCI 205, 206, BIOSCI 203, PHARMACY 205

MEDSCI 306 15 Points
Principles of Toxicology
Considers the principles and concepts that result in detrimental effects in animals and humans. It addresses: biochemical pathways and targets in the toxicity of chemicals, the effects at cellular, organ and whole body level, eg, cell death, cancer and hypersensitivity, as well as the basis for cell and
organ-selective toxicity. Drugs, occupational and environmental toxicants are discussed.

**Prerequisite: MEDSCI 204 and 15 points from MEDSCI 205, 206, BIOSCI 203**

**MEDSCI 307 15 Points**

**Neuroscience: Neuropharmacology**

An introduction to the principles and concepts involved in neuropharmacology. The course covers: the anatomy, neurochemistry and pharmacology of the normal and diseased human brain; the biochemical causes of psychiatric and neurological diseases; and the types and mechanisms of action of drugs used to treat brain disorders.

**Prerequisite: MEDSCI 204 and 15 points from MEDSCI 205, 206, BIOSCI 203**

**MEDSCI 309 15 Points**

**Biophysics of Nerve and Muscle**

An advanced treatment of the physiology of excitable cells. Topics include: the biophysical basis of membrane potential, the spread of electrical activation and synaptic transmission, structure, excitation, mechanics and energetics of muscle and functional differences among muscle types. The approach is quantitative with particular emphasis on current advances in the field.

**Prerequisite: MEDSCI 205, 206, or for BE(Hons) students, 15 points from MEDSCI 205 and 15 points from courses at Stage II listed in Part II of the Biomedical Engineering specialisation in the BE(Hons) Schedule**

**MEDSCI 311 15 Points**

**Cardiovascular Biology**

An advanced treatment of the human cardiovascular system that provides an integrated framework for understanding the structure, function and regulation of the heart and circulation, and their modification by drugs. Topics include: the energetics and mechanics of the heart, the regulation of heart rhythm and the control of blood pressure and the regulation of flow through the microcirculation. The course is illustrated using examples drawn from current research in the field and from representative disease states.

**Prerequisite: MEDSCI 205**

**MEDSCI 312 15 Points**

**Endocrinology of Growth and Metabolism**

An introduction to the mechanism controlling the production of hormones and how these achieve their effects in regulating body function. The course focuses in particular on the hormone systems controlling growth and metabolism and contrasts the differences between fetal and adult life. It also highlights how defects in endocrine systems are associated with conditions such as obesity and diabetes.

**Prerequisite: 30 points from BIOSCI 203, MEDSCI 201, 205**

**MEDSCI 313 15 Points**

**Reproductive Biology**

Aspects of reproductive biology including: regulation of gonadal function, the menstrual and oestrous cycles, ovulation, spermatogenesis, feto-maternal physiology including placental function, animal reproduction and assisted reproductive technologies.

**Prerequisite: 15 points from BIOSCI 107, 203, MEDSCI 142**

**MEDSCI 314 15 Points**

**Immunology**

The biology, cellular and molecular events underlying the immune response. The nature and characteristics of antibody-mediated and cell-mediated immunity including antigen recognition and presentation, antibody and T cell receptor structure, immune regulation and cytokines, immunogenetics and histocompatibility. The relationships of the immune system to the activities of pathogenic organisms. Applied immunology including biotechnology, infection, autoimmunity, tumour immunology, transplantation and immunodeficiency.

**Prerequisite: MEDSCI 202 or BIOSCI 201**  
**Restriction: BIOSCI 357**

**MEDSCI 315 15 Points**

**Nutrition, Diet and Gene Interactions**

Practical applications of nutrition in protection against, and reduction of symptoms in, chronic disease from a clinical perspective. Both non-communicable diseases (eg, cancer, osteoporosis, auto-immune disease) and communicable disease (eg, whooping cough, influenza) will be considered. Factors regulating appetite and food intake, and the role of genotype and epigenotype will also be studied.

**Prerequisite: BIOSCI 202, 203**

**MEDSCI 316 15 Points**

**Sensory Neuroscience: From Molecules to Disease**

The physiology of neurosensory systems in health and disease with an emphasis on clinical relevance and current advances in research. The course will provide in-depth coverage of mechanisms involved in each system at a broad systemic level, down to the molecular level. Topics include vision, hearing, balance, olfaction, taste, touch and pain.

**Prerequisite: MEDSCI 206**  
**Restriction: MEDSCI 310**

**MEDSCI 317 15 Points**

**Integrative Neuroscience: From Fetus to Adult**

The development and function of the central nervous system in health and disease. Topics include development of the CNS, functional imaging of the human brain, synaptic function in health and disease, development and pathophysiology of motor systems, perinatal and adult brain ischemia, stroke, and sleep related disorders. The topics are covered at an advanced level with emphasis on current advances in the fields.

**Prerequisite: MEDSCI 206**  
**Restriction: MEDSCI 310**

**Postgraduate 700 Level Courses**

**MEDSCI 701 15 Points**

**Special Studies in Medical Science**

The critical review and analysis of research literature relating to a research topic. Components include an extensive literature review article defining the current knowledge relevant to a particular research area, a research proposal outlining proposed Masters research topic and its significance, and a formal presentation of the proposal. Suitable for students intending to undertake a Masters thesis.

**Restriction: MEDSCI 702**

**MEDSCI 703 15 Points**

**Advanced Biomedical Imaging**

Theory and practice of biomedical imaging from the sub-cellular to whole body level with specific emphasis on recent developments. Principles of digital image-processing and image analysis (including quantitative morphology), computed tomography and volume rendering and analysis. Imaging modalities including atomic force microscopy, light and confocal microscopy, electron microscopy, X-ray, CT, ultrasound and magnetic resonance imaging.
MEDSCI 704 15 Points
Developmental Genetics
Genetics approaches used to understand developmental mechanisms. These utilise a variety of model systems including Drosophila and zebrafish to study processes such as pattern formation, cell specification, lineage commitment and cell-cell interaction. Insights into control of these events are critical to advancing understanding of disease processes, particularly cancer.

MEDSCI 705 15 Points
Infection, Immunity and Disease
Examines the ways in which host immune mechanisms control infection, infectious organisms evade host defence mechanisms, and the consequences of these processes for the host. Examples of human infectious diseases will include: HIV, hepatitis B, influenza, tuberculosis and streptococcal infections. Consideration of the consequences of infection will incorporate discussion of immune self/non-self discrimination, immune tolerance and autoimmune mechanisms, including the impact of response against infections on autoimmunity.

MEDSCI 706 15 Points
Genetic Disease
Examines a range of medical genetic disorders that illustrate principles of disease mechanisms, diagnosis and management. These will include: haemophilia, familial cancer, late-onset neurological disorders and mitochondrial disease.

MEDSCI 707 15 Points
Activities of Microbes in Disease
The dynamic interaction between pathogenic microorganisms and humans will be explored. Examines the molecular mechanisms which enable microbes to survive, proliferate and cause disease; to evolve and acquire new genes; and to control the expression of their genes. Emphasis will be placed on recent advances in the understanding of major human microbial diseases.

MEDSCI 708 15 Points
Advanced Immunology and Immunotherapy
Recent advances in immunology including: the genes and proteins involved in the innate and adaptive immune response, intracellular signalling mechanisms that determine immune outcomes, and the mechanisms by which the immune system learns 'self' from 'non-self'. Examines a range of inflammatory diseases, and methods of immunotherapy, in particular approaches to combat cancer.

MEDSCI 709 15 Points
Nutrition in Health and Disease
The influence that dietary patterns, foods and food components have on the promotion and protection against the common nutrition-related diseases in New Zealand. The relevant epidemiological, clinical, and biochemical/physiological aspects of each disease are covered.

MEDSCI 710 15 Points
Nutrition Mechanisms
The mechanisms by which food and food components can influence disease processes. Topics covered include: the interaction between genotype and nutrition, antioxidants and oxidation protection mechanisms, dietary toxicology, the process of atherosclerosis, and the influence of the intra-uterine environment on growth and disease.

MEDSCI 711 15 Points
Clinical Nutrition
Prevention of malnutrition and maintenance of nutritional status during acute and chronic illness through 'artificial' or 'interventional' means. Diagnosis and quantitation of malnutrition, and monitoring of nutrition support therapy. Practical techniques, common complications and quality assurance through a multidisciplinary team approach. Includes treatment of anorexia nervosa and cancer cachexia.

MEDSCI 712 15 Points
Critical Evaluation of Nutritional Therapies
The suggested roles for micronutrients, 'nutriceuticals' and functional foods in general health, exercise performance and disease are evaluated using an evidence-based approach. The roles of microminerals as dietary supplements and the potential actions of 'nutriceuticals' and functional foods are also critically evaluated. Regulatory and ethical issues in the use of nutritional remedies are considered, including their use as supplements in chemotherapy or other conventional therapies, or in individuals with no symptoms.

MEDSCI 713 15 Points
Principles of Cancer Therapy
Examines the molecular and cellular processes underlying cancer treatment and the development of tumour-selective therapy; the principles of radiotherapy and chemotherapy; DNA and the basis for its interactions with anticancer drugs; recognition of DNA by proteins; exploitation of these processes by anticancer drugs, oncogenes and other regulatory gene products; signal transduction mechanisms and strategies for changing cell cycle control; cytokines and the role of host responses in cancer therapy; new approaches to cancer therapy including gene therapy and photodynamic therapy.
Prerequisite: MEDSCI 302

MEDSCI 714 15 Points
Advanced Cancer Biology
Advanced studies of concepts related to the biology of cancer. These will include: molecular mechanisms, signal transduction pathways, genomic instability, telomeres and telomerase, anoikis, DNA damage sensing mechanisms, and hypoxia and tumour progression.
Prerequisite: MEDSCI 302

MEDSCI 715 15 Points
Molecular Toxicology
Covers the current understanding of mechanisms implicated in toxicity of drugs and environmental chemicals plus the basis of inter-individual susceptibility. The course identifies strategies used to predict and prevent adverse reactions during drug development.

MEDSCI 716 15 Points
Drug Disposition and Kinetics
Advanced study of the absorption, distribution, metabolism and excretion of drugs, and the analysis of these processes. Also included are: in vivo/in vitro techniques in drug ADME studies used in drug development; drug analysis in biological matrices; and pharmaco-genomic aspects related to drug disposition.

MEDSCI 717 15 Points
Advanced Neuroscience: Neuropharmacology
An advanced study of current research topics in
neuroscience. Involves critical analysis of the literature within the context of a series of major research themes that encompass models from molecular through to systems level neuroscience. Themes will be selected from the following areas: neurogenesis, neurodegeneration and/or addiction.

MEDSCI 718  
Pharmacology of Anaesthetics and Analgesics  
15 Points  
General aspects of anaesthetics and analgesics. Topics covered include the development of modern anaesthesia, the mechanisms of action of drugs used in general and local anaesthesia, and issues surrounding safety and efficacy of anaesthesia, including drug error and circadian variation in drug action.

MEDSCI 719  
Pharmacometrics  
15 Points  
An introduction to the application of mathematical models used in the interpretation of pharmacological observations. Computer-based analysis methods are investigated using individual and population-oriented approaches.

MEDSCI 720  
Biomedical Research Techniques  
15 Points  
An introduction to some of the most commonly used techniques used in today’s research laboratories; from tissue culture to confocal microscopy, RT-PCR to mass spectrometry, immunoassay to cloning. Emphasis is placed on understanding the principles behind the techniques, how they are applied to address specific questions, and how to evaluate and use the data they generate.

MEDSCI 721  
Advanced Toxicology  
15 Points  
Focuses on classes of drugs associated with idiosyncratic adverse reactions and studies to define their metabolic basis and assessment of toxic risk.

MEDSCI 722  
Clinical Pharmacology  
15 Points  
The disposition and action of drugs in the elderly, young and in pregnancy will be considered, as well as therapeutic drug monitoring, pharmaceconomics, adverse drug reactions, ethnic differences in PK’s and PD’s, evaluation of clinical trials and population kinetics. Emphasis is placed on the use of medicines in humans.

MEDSCI 723  
Cancer Pharmacology  
15 Points  
The pharmacological basis of the action of anti-tumour drugs relevant to human cancer therapy, emphasising the variability of chemotherapy effects, interactions between anti-cancer agents and early phase clinical trials.

MEDSCI 725  
Experimental Design  
15 Points  
Principles of experimental design and data analysis in physiological research. Topics include: analysis of variance, post-hoc multiple comparisons, non-linear and multiple linear regression, analysis of covariance and statistical power. The approach is practical and computer statistical packages are used.

MEDSCI 727  
Advanced Neuroscience: Neurophysiology  
15 Points  
An advanced treatment of selected topics in neurophysiology. Involves presentations and critical analysis by the students of the current scientific literature within the context of several major research themes that encompass models from molecular and cellular to systems level. Themes will be selected from the following areas: (1) motor control and motor disorders (Parkinson’s disease, motorneuron disease, stroke); (2) synapse physiology and pathophysiology; (3) advances in neural stem cell research; and (4) selected topics in sensory neuroscience research.

MEDSCI 729  
Perinatal Physiology and Medicine  
15 Points  
Fetal development has long-term consequences for health. This advanced course offers a wide range of research themes relating to fetal development and future health. Topics include: placental development, fetal physiology, and endocrine regulation and metabolic function during fetal and postnatal life. The course explores pathogenesis of disease and injury of the fetus and newborn, and how biomedical research leads to potential clinical treatment strategies.  
Prerequisite: MEDSCI 312

MEDSCI 730  
Reproductive Science  
15 Points  
Molecular regulation and coordination of normal reproduction. The reproductive disorders that arise when normal biological processes are disrupted. Recent molecular methods have enabled us to study these processes and to understand how they can go wrong. Genomic and proteomic approaches to the understanding of reproduction and reproductive disorders will be presented. Examination of the new technologies that allow us to overcome some of these reproductive problems.  
Prerequisite: 15 points from BIOSCI 351, 353, 356, MEDSCI 312, 313

MEDSCI 731  
Advanced Reproductive Biology  
15 Points  
Understanding normal reproductive events and how normal biological processes are disrupted to cause medical problems. A range of specific disorders of reproduction (Pre-eclampsia, polycystic ovarian syndrome, endometriosis), including infertility and gynaecological cancer, will be discussed. Attention will be given to the recent advances in understanding of disease at a molecular level and how they translate to become a clinical disorder.  
Prerequisite: 15 points from MEDSCI 312, 313, BIOSCI 351, 353, 356

MEDSCI 732  
Molecular Aspects of Endocrinology and Metabolism  
15 Points  
Explores how hormones are able to control such a wide range of physiological processes. Covers molecular aspects of hormone action with particular reference to the neuroendocrine and peripheral endocrine systems that control appetite and metabolism. Other topics covered include how defects in hormone action lead to diseases such as cancer, obesity, Type-2 diabetes and cardiovascular disease.

MEDSCI 733  
Advanced Methods in Cell Physiology  
15 Points  
The theoretical basis underpinning electrophysiological and live cell imaging techniques used to probe cellular function will be addressed. Emphasis will be placed on the instrumentation, data acquisition, and data analysis associated with each technology. The approach is practical and computer-based software programmes are used to analyse pre-recorded data, and data produced by the students themselves.  
Restriction: MEDSCI 726
MEDSCI 734  15 Points
Advanced Integrative Physiology
In the post-genomic world the limitations of reductionism as a basis for understanding complex function have become apparent and it is necessary to integrate genomics with the biology of organ systems. This course will portray how an integrative physiological approach can reveal new levels of understanding in the field of biomedical research. Examples of this approach will be drawn from research programmes within the areas of cardiovascular biology, fetal physiology, neurophysiology and vision. Restriction: MEDSCI 728

MEDSCI 737  15 Points
Biomedical MRI
Designed to give students a thorough understanding of a range of biomedical MRI techniques as well as advanced clinical MRI applications such as functional imaging of the brain and cardiovascular system. Laboratories will cover MRI pulse programming, MRI applications in basic science, and MRI applications in clinical medicine.

MEDSCI 738  15 Points
Biological Clocks
Chronobiology – the study of biological rhythms and the clocks that control them. Theory, anatomical location and molecular machinery of biological clocks will be covered, as will the control of rhythms of different time scales from days (circadian rhythms) to years (circannual rhythms). The influence the human circadian clock has on physiology and drug efficacy, and the effect hospitalisation has on the control of sleep cycles will be given special attention.

MEDSCI 739  15 Points
Advanced Sensory Neuroscience
Advanced study of the physiology of neurosensory systems in health and disease. Provides an in-depth coverage of the molecular, cellular and systemic mechanisms underlying vision and hearing. Prerequisite: MEDSCI 316

Named Doctoral Courses

MEDICINE 703  15 Points
Special Studies in Medicine
Advanced study in a specific area usually related to the field of study of the thesis. Topics include, but are not restricted to, clinical neuroscience, bone science, rheumatology, geriatrics, cardiology, respiratory and renal medicine.

MEDICINE 706  15 Points
Occupational Medicine
Occupational Medicine practice, management and industrial relations, and principles of workplace assessment. Also includes: occupational toxicity, rehabilitation, health surveillance, occupational hygiene, risk management, occupational psychological medicine, occupational epidemiology, statistics and research practice in occupational medicine. Restriction: MEDICINE 601

MEDICINE 713  15 Points
Cardiovascular Medicine
Cardiovascular anatomy and physiology with a detailed study of the pathophysiology of common cardiovascular conditions and management principles. Areas of study include atherosclerosis, hypertension, coronary artery disease and heart failure.

MEDICINE 721  15 Points
Investigating Human Incidents and Injury
The investigation of human incidents and injury through a multi-disciplinary study of the interaction between humans and the socio-technical systems that define their work and non-work environments. Integrates knowledge from psychology, physiology, sociology, biology, engineering and management, into the applied science of human factors and incident investigation. Focuses on the identification of investigative systems which enhance safety in safety critical social systems.

Nursing

Stage I

NURSING 104  15 Points  
Applied Science for Nurses 
Provides an opportunity for the application of specific and selected topics from the biological and physical sciences to be related to beginning nursing practice.

NURSING 105  30 Points  
Nursing in Practice 
An introduction to nursing as a profession including concepts of nursing practice, and communication skills. The theoretical basis for nursing practice as well as legal and ethical boundaries are introduced. The role of the nurse in health maintenance and health promotion is explored. Skills in assessment of clients and planning client care are introduced.  
Restriction: NURSING 101, 102

NURSING 199  0 Points  
English Language Competency 
To complete this course students must attain a level of competency in the English language as determined by the School of Nursing. 
This course must be completed prior to enrolling in Part II of the Bachelor of Nursing degree.

Stage II

NURSING 201  60 Points  
Nursing Clients with a Pathophysiological Problem 
A problem-based course where students acquire the skills associated with nursing clients requiring medical and surgical interventions and subsequent rehabilitation. Understanding the mechanisms of disease and prevention of such diseases is the basis for the course. Students are introduced to the principles of pharmacology and pharmacokinetics. Issues such as caring for clients with chronic pain and an understanding of death and grief are included. Practicums and teaching take place in a variety of clinical settings.

NURSING 202  60 Points  
Nursing Clients in Mental Health and Disability 
Allows students to understand perspectives of mental health and illness, the crisis nature of mental illness and the therapeutic models of mental health management. Students acquire the specific nursing skills required to care for people with mental health problems and also those who have a long-term disability. Students undertake a range of clinical attachments in hospital and community settings.

Stage III

NURSING 301  60 Points  
Child and Family Health Nursing 
An understanding of concepts related to family, women’s and child health. The focus is on childbirth as a healthy event in the life of a family, care in the community, together with the nursing care of children suffering illness in a hospital setting. Older persons’ health focuses on an alternate aspect of family health. Clinical attachments are in a variety of clinical and community settings.

NURSING 302  60 Points  
Professional Nursing Practice 
Allows the student to make the transition from student to professional nurse. A period of practice in an elected area of clinical speciality is included. Issues such as the development of nursing knowledge, autonomy of practice, accountability for practice, and the legal and ethical parameters of competency as a nurse are emphasised.

Postgraduate 700 Level Courses

NURSING 701  30 Points  
Clinical Project 
The Clinical Project represents personal scholarly work based on a focused area related to clinical nursing practice that reflects an understanding of research purpose and process. The project includes a critical and comprehensive review of relevant literature which results in new insights, perspectives and applications of existing knowledge.

NURSING 702  30 Points  
NURSING 702A  15 Points  
NURSING 702B  15 Points  
Developing Nursing Practice 
Early career nurses develop nursing knowledge and skills in a speciality practice area. Focus will include recognition of the contextual factors that impact on the practice area and a critique and analysis of their practice. 
To complete this course students must enrol in NURSING 702 A and B, or NURSING 702

NURSING 706  15 Points  
Principles of Pharmacology and Pharmacokinetics 
Drug therapy for advanced nursing practice is introduced through the study of the principles of pharmacology and pharmacokinetics. 
Prerequisite: NURSING 742

NURSING 710  15 Points  
Special Studies in Nursing 
As prescribed by the Head of the School of Nursing.

NURSING 714  15 Points  
Nursing Practicum 1 
The articulation and demonstration of advancing nursing knowledge and skills within a specialist clinical area. Students work with an academic and clinical adviser to develop an individual learning contract.

NURSING 716  15 Points  
Primary Health Care of Children and Adolescents 
The development of nursing knowledge specific to advanced nursing practice in a child health setting. Focuses on the primary healthcare of children,
throughout childhood and adolescence, including health promotion and maintenance of the well child and family.

**NURSING 719**  
**Specialty Nursing Knowledge and Practice**  
15 Points  
Extend nursing knowledge and skill related to the management of clients in specialty based clinical practice. Available in various specialty practice streams.

**NURSING 722**  
**Principles of Therapeutics for Advanced Nursing**  
15 Points  
The principles of therapeutics and mechanisms necessary for prescribing to be safe and effective.  
*Prerequisite:* NURSING 706

**NURSING 730**  
30 Points

**NURSING 730A**  
15 Points

**NURSING 730B**  
15 Points

**Knowledge/Science in Specialty Nursing**  
Extends knowledge and understanding of biomedical and social science concepts related to an identified specialty area and covers specialty-based practice knowledge required to care for clients in specialty practice streams.  
*Restriction:* NURSING 704, 719  
*To complete this course students must enrol in NURSING 730 A and B, or NURSING 730*

**NURSING 732**  
30 Points

**Leading and Managing Change in Healthcare**  
Theoretical and practice principles of leadership and management in the context of healthcare organisations. Utilises an action based learning model, mentorship and project work.

**NURSING 733**  
15 Points

**NURSING 734**  
15 Points

**NURSING 735**  
30 Points

**Clinical Education Practicum**  
Application and critical analysis of educational theories and concepts in a clinical learning environment. Utilises an action based learning model and project work.

**NURSING 736**  
15 Points

**Health Policy and Nursing**  
Health policy planning and development in New Zealand. Promotes understanding of policy theory, the policy process, the role government plays, and the role of nursing as a special interest group in the policy community.

**NURSING 737**  
30 Points

**The Scholarship of Practice**  
The development of professional knowledge is explored from a variety of perspectives, including the wider healthcare environment and national and international trends, as relevant to advancing nursing practice.

**NURSING 738**  
30 Points

**Long Term Condition Management in Primary Health Care**  
Covers knowledge to plan and implement appropriate programmes of healthcare for populations and individuals with chronic conditions and development of knowledge central to the delivery of client-centred healthcare in the community with a particular focus on risk assessment and management.

**NURSING 739**  
**Advanced Rural Nursing**  
30 Points  
Prepares nurses who are working in rural areas with the knowledge and skills to balance and integrate high level skills in communication, health assessment, diagnostic reasoning, with particular focus on improving health outcomes for those with chronic conditions.

**NURSING 740**  
30 Points

**Prescribing in Advanced Nursing Practice**  
The knowledge and competencies that form the basis of prescribing in advanced nursing are developed under supervision.

**NURSING 741**  
**Education for Clinical Practice**  
30 Points  
Professional learning is essential to enable healthcare professionals to function competently in the complex world of clinical practice. Health care professionals are required to become actively involved in teaching colleagues involved in healthcare and patients. Effective clinical teaching and learning is enabled by laying a foundation in educational theory and practice.

**NURSING 742**  
**Biological Science for Practice**  
30 Points  
Focuses on common pathologies acknowledging the New Zealand Health Strategy, giving particular attention to areas where health promotion, preventative care, chronic disease management and cost impact for New Zealand.

**NURSING 743**  
**Advanced Nursing Practicum**  
30 Points  
Designed to refine advanced nursing skills and to further develop an advanced analytical model for nurses preparing for advanced practice. Advanced assessment skills along with disease management models will be taught with a focus on clinical decision making in various health settings.  
*Prerequisite: NURSING 773 or equivalent, and practising in an advanced nursing role*

**NURSING 744**  
**Specialty Nursing Practicum**  
30 Points  
Extends nurses in their clinical skill and practice knowledge within a specific scope of practice and develops their clinical decision making through a range of guided learning experiences.

**NURSING 745**  
**Special Topic: Principles of Medication Management**  
30 Points

**NURSING 746**  
**Special Topic: Evidence-based Practice and Implementation**  
30 Points

**NURSING 747**  
**Mental Health Nursing of Older Adults**  
30 Points  
Explores therapeutic interventions for older people presenting to inpatient and community older adult mental health services, and to primary care services with complex mental health issues. There will be a focus on nursing practice in the context of multidisciplinary teams and on collaboration between primary and secondary services.  
*Restriction:* POPLPRAC 727

NURSING 775 30 Points  Leadership and Management for Quality Health Care  Builds management and leadership knowledge, competence and business acumen through project based learning. Focuses on critical thinking, quality service delivery and improvements and maximises organisational performance and change management.

NURSING 776 30 Points  Assessment and Clinical Decision Making in MHN  A clinically based course focussing on history taking, assessment and problem formulation. Using case studies from clinical practice, the course explores narrative and descriptive models. There is an emphasis on mental state assessment, and development of a client-focused plan of care.

NURSING 777 30 Points  Advanced Practice in Mental Health Nursing  Explores the social and clinical context of advanced practice in mental health nursing by encouraging critical awareness of advanced nursing roles in mental health services. Involves analysing practice development in a range of contexts in relation to clinical issues.

NURSING 778 30 Points  Health Promotion and Early Detection of Cancer  Examines the latest knowledge and research available around health promotion, risk assessment and early intervention for cancer and consider the implications for nursing practice. Content addressed includes epidemiology, genetic risk, nutrition, lifestyle and environmental screening, surveillance, government policies and interventions.  Restriction: NURSING 767

Obstetrics and Gynaecology

Postgraduate 700 Level Courses

OBSTGYN 705 15 Points  Special Topic in Obstetrics and Gynaecology

OBSTGYN 712 15 Points  Contraception and Pre and Early Pregnancy  An evidence-based approach to contraception and pre and early pregnancy care. Mechanisms, side effects and contraindications of methods of contraception are covered. Pre pregnancy care will include preconceptual counselling and the psycho-social aspects of pregnancy care such as effects of drugs, alcohol, smoking and travel. Best practise and referral guidelines for early pregnancy ante natal care will be covered including diagnosis and management of early pregnancy problems such as recurrent miscarriage, ectopic pregnancy, gestational trophoblastic disease and hyperemesis.

OBSTGYN 713 15 Points  Pregnancy and Postnatal Care in the Community  Common problems of pregnancy for primary care. Includes pregnancy care in the community, obstetric emergencies, common disorders in pregnancy, birth matters, the immediate postpartum period, the newborn.

OBSTGYN 715 15 Points  Medical Gynaecology I  Women’s health and sexually transmitted diseases, menstrual disorders, pelvic pain and dyspareunia, vulva problems and vaginal discharge, menopause management.

OBSTGYN 716 15 Points  Medical Gynaecology II  Pathophysiology and clinical management of infertility, gynaecological malignancies, family violence, adolescent gynaecology, termination of pregnancy, urogynaecology.

OBSTGYN 717 30 Points

OBSTGYN 717A 15 Points

OBSTGYN 717B 15 Points

Practical Obstetrics and Gynaecology  Practice of obstetrics and medical gynaecology, practical procedures in obstetrics and gynaecology including competency in examinations, cervical smear taking, and insertion of intrauterine contraceptive devices. Competency in normal labour and delivery and minor surgical procedures encountered in
obstetric practice. Requires the completion of a logbook approved by the Clinical Supervisor and Head of Department.
Corequisite: OBSTGYN 721, 722
To complete this course students must enrol in OBSTGYN 717 A and B, or OBSTGYN 717

Ophthalmology

Postgraduate 700 Level Courses

OPHTHAL 701 30 Points
Ophthalmic Vision Science
A guided course of advanced study that concentrates on anatomy, physiology, optics and pathology of the human ocular and visual system throughout the lifespan.

OPHTHAL 702 30 Points
Evidenced Based Ophthalmology
Examines the evidence base for ophthalmic diseases and clinical practice. Includes overview of common eye disease, clinical effectiveness and cost effectiveness for ophthalmic practice in today's healthcare environment.

OPHTHAL 703 30 Points
Special Topic: Research Methods and Skills for Eye Research
A comprehensive overview, focusing primarily on the ophthalmic arena. Includes: research, methodologies, literature reviews, implementation and appraisal of qualitative and quantitative research, developing research questions and writing up of research for presentation and publication. Provides skills specific to eye research that may not be relevant to other health care professionals.

OPHTHAL 704 30 Points
Special Topic: Ophthalmic Technology
The theory, basic principles, techniques and interpretation of results for ophthalmic technology used in the diagnosis and treatment of eye disease. Technology covered includes: slit lamp biomicroscopy, tonometry, A-scan ultrasound, keratometry; IOL master, HRT, OCT, computerised topography, anterior segment photography, FFA, autorefraction and therapeutic lasers. The latest advances in ophthalmic technology will also be included.

OPHTHAL 705 30 Points
Special Topic: Management of Acute Eye Disease
Overview of the diagnosis and management of 'acute eye conditions' in the community and hospital settings including: signs and symptoms, differential diagnosis, treatment modalities and medium term management.

Optometry and Vision Science

Stage II

OPTOM 215 15 Points
Optics of the Eye
Restriction: OPTOM 110

OPTOM 220 15 Points
Clinical Imaging and Evaluation Techniques
The theory and practice of specific clinical assessment techniques and instrumentation for imaging, measuring and evaluating the function of living optical systems will be the core of this course. The assessment of visual function and optical performance of the eye from the clinical perspective utilising advanced equipment is emphasised. An introduction to image processing, the production of clinically relevant outcomes and diagnosis-supportive hypotheses is included.

OPTOM 262 15 Points
Optics of Lenses and Lens Systems
Optics relevant to optometry, but of interest to other science students seeking a background in geometrical optics. Includes a study of the principles of image formation by lenses and lens systems, mirrors and prisms. In addition to an introduction to ophthalmic lenses, includes basic instruments such as telescopes, microscopes and projection systems.
Restriction: OPTOM 161

OPTOM 265 15 Points
Physical Optics
Includes physical optics relevant to optometry but is also directed towards students taking other science courses. Gives an understanding of the basic principles of physical optics and will involve a study of phenomena including interference, diffraction and polarisation.
Restriction: OPTOM 160, 165
OPTOM 272A 15 Points  
OPTOM 272B 15 Points  
**Visual Science 1: Structure and Function of the Visual System**

Anatomy and physiology of the eye and visual pathway. Topics include composition and structure of the tear film, neural processing in the visual cortex, aspects of visual function including spatial and temporal vision, motion perception and colour vision. Investigation of visual perception using psychophysical and electrophysiological techniques.

**Restriction:** OPTOM 151, 170, 171

To complete this course students must enrol in OPTOM 272 A and B

---

OPTOM 292A 7.5 Points  
OPTOM 292B 7.5 Points  
**Issues in Optometry**

Topics of special interest to students entering Optometry from overseas and from the graduate entry quota.

**Prerequisite:** Permission of Head of Department  
**Restriction:** OPTOM 191

To complete this course students must enrol in OPTOM 292 A and B

---

**Stage III**

OPTOM 313A 22.5 Points  
OPTOM 313B 22.5 Points  
**Optometry**

The history and development of optometry as a healthcare profession, scope of optometric practice. Introduction to the optometric examination: vision and visual acuity, contrast sensitivity, visual fields, colour vision, slit lamp biomicroscopy, ophthalmoscopy, objective and subjective examination, near visual examination, routine binocular vision examination, history taking, communication skills, clinical problem solving.

**Restriction:** OPTOM 211, 212

To complete this course students must enrol in OPTOM 313 A and B

OPTOM 345A 7.5 Points  
OPTOM 345B 7.5 Points  
**Principles of Ocular Pharmacology**

**Prerequisite:** OPTOM 171 or 272  
**Restriction:** OPTOM 245

To complete this course students must enrol in OPTOM 345 A and B

OPTOM 353A 7.5 Points  
OPTOM 353B 7.5 Points

---

**Stage IV**

OPTOM 415A 22.5 Points  
OPTOM 415B 22.5 Points  
**Clinical Optometry**

The routine optometric examination, diagnosis and management of disorders of the visual system, case analysis, myopia control, visual ergonomics, elements of illumination engineering, vision screening, visual standards. Principles of industrial safety. Ocular and vision problems in the elderly. Low vision, electronic, optical and non optical low vision appliances. Examination and treatment of patients in the Optometry Clinic under supervision.

**Restriction:** OPTOM 312

To complete this course students must enrol in OPTOM 415 A and B

OPTOM 430A 7.5 Points  
OPTOM 430B 7.5 Points

Diseases of the Eye and Visual System: Diagnosis and Management
Signs, symptoms and diagnosis of diseases of the eye, ocular adnexa and visual system, including neurological dysfunction and signs of systemic disease. Management of diseases of eye, ocular adnexa and visual system, including the use of therapeutic agents. Indications, contraindications and side effects of therapeutic agents for the treatment of ocular disease.

Restriction: OPTOM 351, 352, 355

To complete this course students must enrol in OPTOM 450 A and B

OPTOM 472A 7.5 Points
OPTOM 472B 7.5 Points

Visual Science 3
To provide an understanding of visual information processing by the visual pathways (retino-geniculate-striate system) and the physiology of other ocular components. A problem-oriented approach, which develops students’ skills in reading, analysing and debating scientific papers in the vision sciences, will be used to achieve a high level of critical thinking and problem solving skills. It is expected that students will acquire the ability to seek, evaluate and retrieve scientific information on which to base their clinical practice. Clear and concise communication of scientific information both in written and oral form will be required.

Restriction: OPTOM 372

To complete this course students must enrol in OPTOM 472 A and B

OPTOM 492A 7.5 Points
OPTOM 492B 7.5 Points

Issues in Optometry 3
Prerequisite: Permission of Head of Department

Restriction: OPTOM 391

To complete this course students must enrol in OPTOM 492 A and B

Stage V

OPTOM 510A 15 Points
OPTOM 510B 15 Points

Advanced Clinical Optometry 1
Clinical work with responsibility, under supervision, for patients.

Restriction: OPTOM 410

To complete this course students must enrol in OPTOM 510 A and B

OPTOM 520A 15 Points
OPTOM 520B 15 Points

Advanced Clinical Optometry 2
Clinical work with greater emphasis on particular areas in optometry including: contact lenses, low vision, binocular vision, paediatric optometry and practice management.

Restriction: OPTOM 420

To complete this course students must enrol in OPTOM 520 A and B

OPTOM 560A 15 Points
OPTOM 560B 15 Points

Optometry in Practice
Supervised clinical work in locations external to the Grafton Campus Optometry Clinic. These locations may include University satellite clinics, private optometry practice, hospital eye departments, overseas institutions, or experience in other approved locations. Lectures address; legislation relevant to healthcare including registration and competency, occupational safety and health, ethics, practice management, small business management.

Restriction: OPTOM 462

To complete this course students must enrol in OPTOM 560 A and B

OPTOM 570A 15 Points
OPTOM 570B 15 Points

Research in Advanced Optometric Science
Study modules on a range of topics in optometry and vision science, with the focus being on developing an evidence-based approach on selected topics. Study will include supervised investigations into an approved topic relating to optometry and vision science, including clinical and applied research.

Prerequisite: Enrolment in Part IV of the Optometry Programme

Restriction: OPTOM 470, 475, 480

To complete this course students must enrol in OPTOM 570 A and B

OPTOM 592A 7.5 Points
OPTOM 592B 7.5 Points

Issues in Optometry 4
A number of special topics in Clinical Skills. Further information may be obtained from the Department of Optometry and Vision Science.

Prerequisite: Permission of Head of Department

Restriction: OPTOM 491

To complete this course students must enrol in OPTOM 592 A and B

PG Diploma Dissertation (Optometry)

To complete this course students must enrol in OPTOM 691 A and B

Postgraduate 700 Level Courses

OPTOM 756 15 Points

Special Topic in Vision Science
The study of selected fields of vision science at an advanced level with detailed study of one particular field. The topic will be prescribed by the Head of Department.

OPTOM 757A 15 Points
OPTOM 757B 15 Points

Selected Topics in Optometry
The study of selected fields of clinical optometry at an advanced level with detailed study of the particular field. The topic will be prescribed by the Head of Department.

To complete this course students must enrol in OPTOM 757 A and B

OPTOM 781 30 Points

Principles of Ocular Disease
The basic anatomy, physiology, pharmacology, pathology, immunology and microbiology necessary for
an understanding of ocular disease and its treatment. The course is presented as a number of lectures combined with a significant self-directed learning component. Assessment is by written examination and completion of written assignments based on specified ocular disease conditions with the overall theme being an evidence-based approach to learning.

OPTOM 784 30 Points
Ocular Disorders and their Management
The clinical presentation and differential diagnosis of eye diseases with emphasis on those likely to be diagnosed and managed by a therapeutically-qualified optometrist and the principles and actions of therapeutic agents as a basis for their safe use in the management of ocular disease. The overall theme of the course is an evidence-based approach to the use of therapeutic agents.
Prerequisite: Permission from the Head of Department

OPTOM 787A 15 Points
OPTOM 787B 15 Points
Clinical Ocular Therapeutics
The clinical application of the therapeutic and management practices covered in OPTOM 781 and 784. Students attend a series of ophthalmological clinical rotations in which they examine patients under direct supervision and observe treatment of ocular conditions by an ophthalmologist. The emphasis is on developing practical therapeutic management plans for different disease conditions.
Prerequisite: OPTOM 781, 784 and registration to practise optometry in New Zealand or Australia.
To complete this course students must enrol in OPTOM 787 A and B

OPTOM 791 90 Points
OPTOM 791A 45 Points
OPTOM 791B 45 Points
Advanced Clinical Optometric Specialisation
Advanced clinical optometry study in a chosen sub-specialist area of optometric practice. The area of special interest may include contact lenses, low vision, paediatric optometry, binocular vision, ocular disease management, or any other area approved by the Head of Department.
To complete this course students must enrol in OPTOM 791 A and B, or OPTOM 791

OPTOM 796A 60 Points
OPTOM 796B 60 Points

Paediatrics

Diploma Courses
PAEDS 601A 60 Points
PAEDS 601B 60 Points
Diploma in Paediatrics
Covers: genetic and antenatal factors in development, neonatal paediatrics, assessment of a child’s physical, intellectual, emotional and social needs, epidemiology of childhood disease, cultural factors and child health, general and preventative paediatrics, management of common disorders of childhood, and the practical working of the statutory and voluntary services available in New Zealand for the care of children. A logbook and dissertation must be completed.
To complete this course students must enrol in PAEDS 601 A and B

Postgraduate 700 Level Courses
PAEDS 704 15 Points
Special Studies in Paediatrics
Advanced study in a specific area, usually related to the field of study of the thesis.

PAEDS 712 15 Points
Youth Health Clinical Skills
Develops and extends knowledge and skills in clinical interviewing, comprehensive assessments and effective interventions with young people.

PAEDS 714 15 Points
Emergency Paediatrics
Combines theoretical knowledge with clinical practice. Medical practitioners will learn how to manage the major paediatric medical and surgical emergencies until transfer.

PAEDS 719 15 Points
Health, Education and Youth Development
Examines the overlap of health and education in the context of youth development. It reviews the ‘business’ of schools, the Health and Physical Education curriculum, school-based health and support services, whole school approaches to health, and the health and education needs of students not engaged with the school system.

PAEDS 720 15 Points
Youth Health Theory, Application and Leadership
Extends students’ knowledge of youth health and well-being and aims to provide preparation for leadership roles in youth health. Focuses on expanding knowledge of the theory of youth development and students will study examples of effective youth development programmes and will be required to develop and present a youth health project in their field of work.

PAEDS 721 15 Points
Special Topic

PAEDS 722 15 Points
Youth Health Practicum
Aims to give clinicians the opportunity to extend their professional youth health skills and expertise through a supervised self-directed learning practicum in youth health.
Prerequisite: PAEDS 720

Restriction: PHARMCOL 789
To complete this course students must enrol in PHARMCOL 788 A and B, or PHARMCOL 788
Stage I

PHARMACY 101 15 Points
Pharmacy Practice 1
The role of medicines in society (including complementary medicines), introductory pharmacy law and ethics. The evolution and role of the pharmacist as a healthcare professional, pharmacy organisations, sources of pharmaceutical information, and professional communication. Introduction to dispensing and compounding of medicines.

PHARMACY 111G 15 Points
Drugs and Society
The use of drugs in society including historical perspectives. Selected examples of the use of medicines in disease, recreational drug use and drug misuse, and cultural and ethnic influences on drug use. Differences between conventional and complementary medicines. The role of the pharmaceutical industry in drug discovery, manufacture and promotion. Legal and ethical issues pertaining to access to pharmaceuticals.

PHARMACY 199 0 Points
English Language Competency
To complete this course students must attain a level of competency in the English language as determined by the School of Pharmacy. This course must be completed prior to enrolling in Part III of the Bachelor of Pharmacy degree.

Stage II

PHARMACY 201 15 Points
Pharmacy Practice 2
Prerequisite: PHARMACY 101

PHARMACY 202 15 Points
Pharmaceutics 1
The physical and chemical properties of materials used in the design of medicinal dosage forms. These principles are applied in the formulation and design of drug dosage forms and delivery systems, and choice of routes of administration of drugs.

PHARMACY 205 15 Points
Physiology for Pharmacy
An integrated approach to the fundamental physiological processes which enable the human body to maintain its viability in an ever-changing world. Examples of normal and abnormal function are used to illustrate interactions in vital physiological processes, including control of fluid and electrolytes, energy use, oxygen and metabolites, and cardiovascular control.
Prerequisite: BIOSCI 107, MEDSCI 142
Restriction: MEDSCI 205

Stage III

PHARMACY 301 15 Points
Pharmacy Practice 3
Prerequisite: PHARMACY 201, 205, MEDSCI 202, 203, 204

PHARMACY 302 30 Points
PHARMACY 302A 15 Points
PHARMACY 302B 15 Points
Pharmaco therapy
Actions, mechanisms of action and therapeutic uses of drugs with reference to the following systems and disorders: cardiovascular system disorders and risk management, respiratory disorders, gastrointestinal disorders, common skin disorders, rheumatic disorders, neurological disorders, and fever and pain control. A case-based approach is supplemented by clinical visits.
Prerequisite: PHARMACY 201, 205, MEDSCI 202, 203, 204
To complete this course students must enrol in PHARMACY 302 A and B, or PHARMACY 302

PHARMACY 303 15 Points
Pharmaceutics 2
The scientific principles of formulation and drug delivery, and the choice of appropriate routes of administration. Principles behind the development of pharmaceutical dosage forms capable of achieving predictable and reproducible therapeutic responses are developed, including an introduction to industrial processes and quality assurance.
Prerequisite: PHARMACY 202

PHARMACY 304 15 Points
Pharmaceutics 3
Themes in pharmaceutical formulation. Good Manufacturing Practice (GMP), quality assurance, dosage form design, and novel drug delivery systems are further developed. A problem-based approach is supplemented by industrial visits.
Prerequisite: PHARMACY 303

Stage IV

PHARMACY 407 30 Points
Integrated Pharmacy Studies 1
Elements of pharmacy practice, pharmaco therapy and pharmaceutical science are integrated with an emphasis on the optimal drug treatment of individual patients with cardiovascular disease, asthma, diabetes, and other complex conditions and special populations. A mix of workshops, case discussions, and dispensing practicals is provided. Pharmaceutical care provision is emphasised.

PHARMACY 408 30 Points
Integrated Pharmacy Studies 2
Elements of pharmacy practice, pharmaco therapy and pharmaceutical science are integrated with an emphasis on the optimal drug treatment of individual patients with mental health (and substance misuse), cancer, infections and other complex conditions and special populations. A mix of workshops, case discussions, and dispensing practicals is provided. Pharmaceutical care provision is emphasised.
The application of pharmaceutical and respiratory pharmacotherapy
PHARMACY 731 15 Points
The critical review of the relevant literature, and the design and implementation of pharmaceutical care plans for patients with respiratory disease.

The application of pharmaceutical and pharmacological knowledge to the selection and use of drug therapy in the management of respiratory disease.

To complete this course students must enrol in PHARMACY 409 A and B, or PHARMACY 409

Research Dissertation
Restriction: PHARMACY 405
To complete this course students must enrol in PHARMACY 410 A and B, or PHARMACY 410

Postgraduate 700 Level Courses

PHARMACY 700 15 Points
Complementary Medicines
A critical review of the evidence in the biomedical literature and other sources concerning a range of complementary medicinal products including herbs, homoeopathics and ethnopharmaceuticals. Includes consideration of efficacy, safety and interactions with conventional medicines.

PHARMACY 712 30 Points
Clinical Pharmacy Practice
Enhances key pharmaceutical knowledge and skills for effective practice in community and hospital settings, including oral and written communication, critical literature appraisal, review of patient medication and the design and implementation of pharmaceutical care plans.

To complete this course students must enrol in PHARMACY 712 A and B, or PHARMACY 712

PHARMACY 720 Issues in Concordance
Factors influencing the prescribing and recommendation of drug therapy and those which influence patients in their use of medicines. Addresses the issue of an ethical framework for prescribing and strategies to promote effective use of medicines by patients.

PHARMACY 730 Cardiovascular Pharmacotherapy
The application of pharmaceutical and pharmacological knowledge to the selection and use of drug therapy in the management of cardiovascular disease. The critical review of the relevant literature, and the design and implementation of pharmaceutical care plans for patients with cardiovascular disease.

PHARMACY 731 Respiratory Pharmacotherapy
The application of pharmaceutical and pharmacological knowledge to the selection and use of drug therapy in the management of respiratory disease. The critical review of the relevant literature, and the design and implementation of pharmaceutical care plans for patients with respiratory disease.

PHARMACY 732 Endocrine Pharmacotherapy
The application of pharmaceutical and pharmacological knowledge to the selection and use of drug therapy in the management of endocrine disorders and in regard to reproduction. Critical review of the relevant literature, and the design and implementation of pharmaceutical care plans for patients with endocrine disorders.

PHARMACY 733 GIT/Rheumatology Pharmacotherapy
The application of pharmaceutical and pharmacological knowledge to the selection and use of drug therapy in the management of gastrointestinal disease and rheumatic disorders. Critical review of the relevant literature, and the design and implementation of pharmaceutical care plans for patients with gastrointestinal disease and rheumatic disorders.

PHARMACY 734 Pharmacotherapy of Infections
The application of pharmaceutical and pharmacological knowledge to the selection and use of drug therapy and vaccination in the management of infectious diseases. Critical review of the relevant literature, and the design and implementation of pharmaceutical care plans for patients with infectious diseases.

PHARMACY 735 Pharmacotherapy in Psychiatry
The application of pharmaceutical and pharmacological knowledge to the selection and use of drug therapy in the management of psychiatric disorders. Critical review of the relevant literature, the design and implementation of pharmaceutical care plans, and consideration of the role of drug therapy in the overall management of psychiatric disorders.

PHARMACY 736 Pharmacotherapy in Dermatology
The application of pharmaceutical and pharmacological knowledge to the selection and use of preparations and drug therapy in the management of dermatological conditions. Critical review of the relevant literature, and the design and implementation of pharmaceutical care plans for patients with dermatological conditions.

PHARMACY 737 Pharmacotherapy in Oncology
The application of pharmaceutical and pharmacological knowledge to the selection and use of drug therapy in the management of cancer and the care of the terminally ill patient. Critical review of the relevant literature, the design and implementation of pharmaceutical care plans for cancer and terminally ill patients, and consideration of the role of drug therapy in the treatment of neoplastic disease.

PHARMACY 740 Evidence-based Pharmacy Practice
Examines the evidence base for the practice of pharmacy. Includes a critical review of the relevant literature and addresses issues related to both community and hospital practice.
PHARMACY 741 15 Points
Pharmacotherapy in the Elderly
Examines patient factors that influence drug use in elderly patients. It will address the issues of dosage modifications, polypharmacy and medicine management in elderly patients, and include a critical review of the relevant literature, and the design and implementation of pharmaceutical care plans for elderly patients.

PHARMACY 742 15 Points
Paediatric Pharmacotherapy
Examines patient factors that influence drug use in the newborn through to adolescence. Addresses the issues of dosage modifications, appropriate drug formulations and the use of unlicensed medicine in paediatric patients, and includes a critical review of the relevant literature, and the design and implementation of pharmaceutical care plans for paediatric patients.

PHARMACY 743 15 Points
Nutrition for Pharmacists
Examines nutritional requirements in pregnancy and lactation, in infants and the elderly and in relation to specific disease states. Includes a critical review of the relevant literature and the determination of patient requirements in respect of parenteral feeding.

PHARMACY 744 Special Topic 30 Points
Prerequisite: Completed the requirements for PGCertPharmPrac

PHARMACY 745 Special Topic 30 Points
Prerequisite: Completed the requirements for PGCertPharmPrac

PHARMACY 750 30 Points
Pharmaceutical Formulation
Physiological and physicochemical factors in drug delivery and formulation of pharmaceutical products. Consideration of both traditional (eg, solutions, semi-solids, solids, aerosols) and novel (eg, liposomal) drug delivery systems based on the experimental literature.

PHARMACY 751 30 Points
Pharmaceutical Techniques
Experimental and analytical techniques in the assessment of pharmaceutical products and of drug action in biological systems. Consideration of pharmacopoeial and official standards, drug stability and drug metabolism.

PHARMACY 752 15 Points
Pharmaceutical Quality Assurance
Principles of good manufacturing practice (GMP), quality assurance and quality control as applied to pharmaceutical products and processes. Consideration of relevant industrial processes, legislation, safety issues, packaging, labelling, stability and regulatory requirements.

PHARMACY 753 15 Points
Regulatory Affairs
National and international requirements pertaining to the registration, licensing and distribution of pharmaceutical products. Consideration of the legal framework, pre-clinical testing, clinical trials, pharmacovigilance, role of statutory authorities, pharmaco-economic data and the role of health professionals.

PHARMACY 754 15 Points
Pharmaceutical Science Research Proposal
A comprehensive scientific study of the literature pertaining to the proposed thesis research. This will include a review of the relevant methodologies, the analysis of research results and the relationship of published work to the proposed research.

PHARMACY 760 15 Points
Literature Review in Pharmaceutical Sciences
A thorough investigation of the current literature in a specified area leading to a comprehensive review with the intent of a review publication.

PHARMACY 761 15 Points
Pharmaceutical Science Research Project
Building on the experience gained in PHARMACY 754, a practical research project in a specified field is conducted. An introductory review of the relevant literature, hypothesis, research methodology and findings framed within the current literature will be reported.
Prerequisite: PHARMACY 754

PHARMACY 762 15 Points
Literature Review in Pharmacy Practice
A thorough investigation of the current literature in a specified area of pharmacy practice or pharmacotherapy leading to a comprehensive review with the intent of a review publication.

PHARMACY 763 15 Points
Case Studies in Pharmacy Practice
The investigation and construction of case studies in a current area of pharmacy practice to a quality suitable for submission for publication.

PHARMACY 764 30 Points
Medicines Information and Critical Appraisal
Develops advanced skills in the retrieval, evaluation and dissemination of medicines information, as well as the ability to critically evaluate clinical literature in the context of selected common therapeutic areas.
Restriction: PHARMACY 712

PHARMACY 765 30 Points
Medicines Management and Pharmaceutical Care
Explores the concepts of medicines management and pharmaceutical care planning in the context of selected common therapeutic areas. The course will emphasise the role of the pharmacist in the optimisation of medicines therapy for individual patients.
Prerequisite: PHARMACY 764
Restriction: PHARMACY 712

PHARMACY 766 30 Points
Applied Pharmacotherapy
Explores current pharmacotherapeutics in the context of common disease presentations and special populations (for example the very young and the elderly), allowing for some specialisation in the student’s areas of interest.
Prerequisite: PHARMACY 764, 765

PHARMACY 767 30 Points
Advanced Pharmacotherapy
Explores current pharmacotherapeutics in the context of patients with complex pathologies and complex clinical needs, allowing for some specialisation in the student’s areas of interest.
Prerequisite: PHARMACY 764, 765
PHARMACY 768 30 Points
Innovative Pharmacy Services
Explores the design, implementation and evaluation of novel and innovative pharmacy services in the context of the individual’s practice setting; principles of pharmaceutical management and strategic development of new services.
Prerequisite: PHARMACY 764, 765

PHARMACY 769 30 Points
Principles of Prescribing
Legal and ethical considerations; communication with patients and other health professionals; clinical reasoning and decision-making; physical assessment and diagnostic skills; ‘mechanics’ of prescribing; pharmacoeconomic considerations.

PHARMACY 770 30 Points
Prescribing Practicum
A practicum for prescribing: an experiential placement where the pharmacist develops experience in prescribing under the overarching guidance of a designated medical prescriber.
Prerequisite: PHARMACY 769

Research Portfolio
Supervised research that represents the personal scholarly work of a student based on a coherent area of enquiry. Culminates in a conclusive piece of work related to a specific area of specialisation or aspect of practice in health.

Named Doctoral Courses

PHARMACY 801 60 Points
Evidence-based Pharmacotherapy
Principles and techniques of evidence-based medicine and pharmacotherapy (EBM and EBP) including meta-analyses, systematic reviews and international collaborations (e.g., Cochrane Collaboration). Application of EBP (e.g., guidelines, protocols, academic detailing) including limitations. Role of health professionals in EBP, with an emphasis on pharmacy. Research project in a selected application of EBP.

PHARMACY 802 60 Points
Applied Pharmacoeconomics

PHARMACY 803 60 Points
Management of Pharmaceuticals
National and international strategies in the management of pharmaceuticals. Consideration of supply-side (e.g., pharmaceutical subsidisation) and demand-side (e.g., prescriber education) initiatives. The role of industry, regulatory authorities and government agencies and of health professionals with an emphasis on pharmacy. Pharmacy initiatives including drug-use evaluation and pharmaceutical care. Research project in a selected application of pharmacy intervention.

PHARMACY 804 60 Points
Philosophical Basis of Pharmacy Practice
Development of pharmacy from compounding and dispensing medicines to a knowledge system which renders a health service. Pharmacy’s societal purpose. Evolving concepts of product-orientation, patient-orientation and pharmaceutical care. Development of pharmacy values. Interaction of pharmacy developments with evolving models of healthcare. Predictions for future models of pharmacy practice. Reflective project to identify the student’s analysis of personal development and vision for the future.

Population Health

Stage I

POPLHLTH 101 15 Points
Health Systems 1
Provides an overview and understanding of the New Zealand health system, including: history of health and health service delivery in New Zealand; the role and functioning of hospitals; primary care; purchasers and funders of health services; the role of insurance and private healthcare providers.

POPLHLTH 102 15 Points
Health and Society
A description and analysis of health within a social context. Discusses different models of health and
An introduction to the study of community and cultural development.

POPLHLTH 103G
Epidemics: Black Death to Bioterrorism
15 Points
Epidemics have devastated human populations and will continue to do so. This course looks at how epidemics can run rampant through society and how we can control them. It will include examples from the past and present, as well as outline future threats. A diversity of epidemics will be covered, from the plague, gambling, depression, pandemics, nun-biting and alien abduction.

POPLHLTH 104G
Future Health
15 Points
Healthcare systems face complex challenges in improving people’s health. The goal of this course is to give students the opportunity to learn how the health system works, the challenges it faces, what role innovation plays, and how they can make a difference with knowledge about the role of information in the delivery of healthcare in the twenty-first century.

POPLHLTH 111
Population Health
15 Points
To introduce frameworks and tools for measuring and understanding and improving the health of populations, both locally and globally. These frameworks and tools are derived from epidemiology, demography, public health, environmental health and global health sciences.

Stage II

POPLHLTH 202
Research Methods in Health
15 Points
A review of the different ways of approaching, designing and undertaking social science research in the health field, covering research paradigms and methodologies, including both quantitative and qualitative methods.

POPLHLTH 203
Health Promotion: Philosophy and Practice
15 Points
Explains in detail the theoretical basis of health promotion: calling on current practice examples to bring the theory to life. Introduces international and New Zealand health promotion concepts and tools. Explains how health promotion practice rests on particular approaches, values and ethical considerations which directly link to a political analysis of deprivation and powerlessness.

POPLHLTH 204
Health Care Ethics
15 Points
An introduction to healthcare and medical ethics. A theoretical foundation of ethics in addition to the practical ethical issues relevant to healthcare professionals.

POPLHLTH 206
Life Cycle Nutrition
15 Points
Provides students with a general background and introduction to: the New Zealand diet; food preparation and meal patterns; dietary requirements during pregnancy and lactation, childhood and adolescence, lifestyle changes, maturity and ageing.

POPLHLTH 207
Community and Cultural Development
15 Points
An introduction to the study of community and cultural development as both philosophical approach and programme of practice for building active and sustainable communities from grassroots. Real world examples of effective practice will demonstrate the interdependence of theory, research and practice in health development. Emphasis is placed on collaboration and participation.

POPLHLTH 208
Mental Health Development
15 Points
The importance of mental health to overall health and well-being is explored. Major threats to mental health are reviewed, and contemporary responses to mental illness are placed in historical perspective. Current theory, research and practice related to mental health development, which includes both recovery-based approaches and mental health promotion practice (ie, promotion of well-being) at the community and population levels are reviewed.

POPLHLTH 210
Equity and Inequalities in New Zealand Health
15 Points
Investigates the way in which social determinants lead to particular distributions of health in populations. Draws on a social epidemiological approach to explore ways in which inequalities in health in New Zealand (based on factors such as age, ethnicity and socioeconomic status) are created, then maintained or eliminated. The place of the Treaty of Waitangi with respect to health is considered.

POPLHLTH 211
Introduction to Environmental Health
15 Points
Provides students with the concepts and knowledge necessary to understand the influence of the environment on health, and introduces the tools, such as Health Impact Assessment, that can be applied to identify and control environmental hazards.

POPLHLTH 212
Bio-behavioural Aspects of Drug Use
15 Points
An introduction to the ways drugs exert their effects on the body, why drug dependence (addiction) occurs and what factors may predispose individuals to the development of drug dependence, including the aetiology of drug dependence and ways in which the study of bio-behavioural aspects of drug use has influenced public health interventions to reduce drug dependence.

POPLHLTH 302
Health Services Internship
15 Points
Requires students to examine or research a
contemporary issue in health services, health management or health systems, and present their findings in an extended essay.
Prerequisite: POPHLTH 202

POPHLTH 303 15 Points
Health Informatics
Students will explore the development and management of information systems in contemporary New Zealand healthcare services. Health informatics concepts, conceptualised in different healthcare settings, are critically reviewed in terms of their practical application.
Prerequisite: POPHLTH 101, 202

POPHLTH 304 15 Points
Principles of Applied Epidemiology
The application of an epidemiological approach in population health, including study of the principles of epidemiological thinking, epidemiological study design and analyses, and the application of these findings to population health. Modules will be taught through specific themes for example, a life course approach or injury prevention.
Prerequisite: POPHLTH 111, 202 and 15 points from STATS 101, 102, 108

POPHLTH 305 15 Points
Community Nutrition
Provides students with an understanding of the nutritional practices and requirements in different sectors of the New Zealand population. Includes: socio-economic factors related to dietary habits; the health impacts of Māori and Pacific dietary habits; the relationship between diet, health, malnutrition and nutrition-related diseases; and the importance of nutrition education programmes.
Prerequisite: POPHLTH 111, 206

POPHLTH 306 15 Points
Health Promotion 2
Builds on the theory and practice in POPHLTH 203, and examines in depth the relationship between economic and political processes and health status. The course also looks at the most effective strategies to put health promotion theory into practice. Mixed in with this will be an in-depth introduction to some of the emerging issues in health promotion, and a look at some of the specific areas of health promotion practice.
Prerequisite: POPHLTH 203

POPHLTH 307 15 Points
Communities and Addictions
Examines how addictions such as tobacco, alcohol, drugs and gambling seriously undermine the health of individuals and the communities in which they live and/or work. Case studies are used to understand the primary elements of community and cultural health development.
Prerequisite: 30 points at Stage II in Population Health

POPHLTH 310 15 Points
Special Topic

POPHLTH 311 15 Points
Shaping Health Policy
Investigates recent changes to the ways in which governments seek to intervene to improve a population’s health. NZ case studies will be used to illustrate the interrelationships between research, policy and practice in a devolved health system and the changing relationships between government agencies and health providers.
Prerequisite: POPHLTH 202

POPHLTH 312 15 Points
Health and Pacific People in NZ
An overview of the major health issues facing Pacific peoples, including analysis of the key determinants of health status, focusing on approaches to improving health for Pacific peoples through research, policy, public health programmes and health services. A critique of dominant paradigms of health and well-being in relation to Pacific communities in Aotearoa New Zealand is included with consideration of their effect on health outcomes.
Prerequisite: POPHLTH 210
Restriction: POPHLTH 201

POPHLTH 313 15 Points
Health in Asian Communities
An overview of Asian health issues, including, the biological, ecological cultural, economic social and psychological factors that determine health for Asian New Zealanders is provided. Current practice, policy development and research priorities for Asian communities are included.
Prerequisite: POPHLTH 210

POPHLTH 314 15 Points
Health Services Integration
An exploration of the issues associated with integrating health services. Case studies form the basis for consideration of the ways in which primary and secondary healthcare may more effectively inform and be informed by public health programmes.
Prerequisite: 15 points from POPHLTH 201, 210

POPHLTH 315 15 Points
Special Topic

Postgraduate 700 Level Courses

POPHLTH 701 15 Points
Research Methods in Health
A comprehensive overview, in relation to health, of theoretical underpinnings of research; the asking of research questions; literature reviews; the design, implementation and appraisal of qualitative and quantitative research; and the writing up and dissemination of research.
Restriction: CLINED 714, NURSING 768

POPHLTH 704 15 Points
Undertaking Qualitative Health Research
Provides practical experience in the appraisal and use of qualitative methods in research in health. The development of studies from research questions through design, conduct, and analysis and interpretation of such studies are examined in detail. Students are required to prepare a portfolio examining the use of a specific methodological approach in qualitative health research.

POPHLTH 705 15 Points
Evaluation Research Methods
Provides a comprehensive outline of the nature of programme evaluation in the health sector and an overview of a variety of approaches to programme evaluation and the appropriate use of research tools. Includes logic models, stakeholder analysis, the development of objectives, indicators, client surveys and interviews. Emphasis on mixed
methods evaluation designs involving qualitative and quantitative data gathering.

**POPLHLTH 706 15 Points**
**Statistics in Health Science**
An introduction to statistics and statistical methods for health scientists. Covers basic methods and tests, including regression.

**POPLHLTH 707 15 Points**
**Statistics in Health Science 2**
Develops and builds on elementary statistical methods and prepares the student for advanced epidemiological and statistical analysis. *Prerequisite: POPLHLTH 706*

**POPLHLTH 708 15 Points**
**Epidemiology**
An introduction to epidemiological study design, measures of effect, screening, basic statistics for epidemiology and critical appraisal.

**POPLHLTH 709 15 Points**
**Evidence for Best Practice**
Evidence based practice uses epidemiological data derived from valid and clinically relevant research. This includes the accuracy of diagnostic tests, the power of prognostic markers and the efficacy and safety of therapeutic, rehabilitative or preventive interventions. This evidence is integrated with relevant contextual evidence such as patient and practitioner values, social, cultural and economic considerations to inform best practice.

**POPLHLTH 711 15 Points**
**Systematic Reviews and Meta-analysis**
An introduction to the principles and critical appraisal of systematic reviews and meta-analysis and their role in evidence-based practice. Topics include: protocol development, question formulation, identification of evidence, selection of studies for inclusion, appraisal and quality of included studies, extraction and recording of data, synthesis (meta-analysis) and interpretation of results, and application. *Prerequisite: POPLHLTH 708 or 709 or equivalent experience*

**POPLHLTH 712 15 Points**
**Clinical Trial Design, Analysis and Management**
An introduction to the methodological and practical aspects of clinical trial design, analysis and management. Participants will develop skills in designing and conducting randomised controlled trials. *Prerequisite: POPLHLTH 708 or 709 or equivalent experience*

**POPLHLTH 715 15 Points**
**Global Public Health**
Explores global health from a public health perspective, with a strong emphasis on health and its determinants in developing countries. Topics covered include the global burden of risk and disease, global environmental challenges to health, international health governance, international healthcare financing and international health promotion.

**POPLHLTH 717 15 Points**
**Health and Society**
An exploration of health within a social context. Examines the relationships between social factors, their impact on health, and the ways in which these relationships inform our understanding of health and help direct healthcare provision and public health policy.

**POPLHLTH 718 15 Points**
**Health and Public Policy**
A discussion of policy studies frameworks, and how these can be used to analyse policy issues and processes relevant to health and healthcare.

**POPLHLTH 719 15 Points**
**Health Economics**
Fundamental economic concepts and their application to healthcare. Provides students with some analytical skills with which to address issues and problems in the funding and organisation of health services.

**POPLHLTH 720 15 Points**
**Cost Effectiveness Evaluation**
The application of economic methods to the evaluation of health services and programmes. The principles and techniques of economic evaluation, the process of measuring costs and benefits of health services, quality of life measurement.

**POPLHLTH 721 15 Points**
**Health Management**
The application of general management principles to health organisations and services, with particular reference to the nature of health organisations, managing with professionals, working with teams and designing teamwork, leadership in change, improving service delivery and organisational performance in a turbulent environment.

**POPLHLTH 722 15 Points**
**Health Care Organisation**
The principles, structure, organisation and funding of health systems. Special reference to how the New Zealand health system operates and to current issues from an international perspective.

**POPLHLTH 724 15 Points**
**Quality in Health Care**
Quality healthcare is examined with an emphasis on strategies that enable individuals, teams, and services within healthcare organisations to implement and sustain performance improvement. Allows students to explore the quality principles to an area of their own choice.

**POPLHLTH 725 15 Points**
**Environmental Health**
Introduction to the mechanisms behind environmental hazards causing damage to human health. Links between industrial and agricultural development, environmental change and public health at local, national and global levels. The role of policies, legislation and public health actions in reducing environmental health risks.

**POPLHLTH 726 15 Points**
**Health Protection**
Current issues will be used to illustrate principles of health protection as an element of public health at local and national levels. The main inter-related topic areas within health protection (communicable disease control and surveillance; non-communicable disease control; food safety; alcohol and tobacco; air and water quality) will be discussed, along with identification of health hazards, development of prevention strategies, and field implementation methods.
POPLHLTH 729  
Information and Strategic Health Management  
Examines the potential for information from all sources to enhance management and impact on strategy in the health sector and healthcare organisations.

POPLHLTH 731  
Child Health  
Need, assessment and evaluation of programmes concerning the health of infants and children and their families. Specific examples include injury and infection prevention, and child advocacy.

POPLHLTH 732  
Population Youth Health  
Youth injury prevention, resiliency factors and reproductive issues, and advocacy for young people. How do you make a difference in youth health? This course introduces key concepts in population youth health and utilises an evidence based approach and New Zealand practice examples to consider how youth health can be improved in communities and populations.

POPLHLTH 733  
Health Promotion Theory and Models  
Examines the values, theories and practice models of health promotion and in particular, an approach to the social determinants of health and health equity that seeks to empower individuals and groups to deal with these issues.

POPLHLTH 734  
Health Promotion Strategies  
An overview of key strategies designed to promote health, with an emphasis on healthy public policy, partnerships, community action and advocacy and ways to link local, national and global actions. Practical and creative approaches to health promotion planning are explored through case studies, invited practitioners and the development of a group project with outcomes of empowerment and health gain.

POPLHLTH 735  
Mental Health Development: Theory and Principles  
Mental Health Development (MHD) represents an emergent paradigm in the mental health sector, one which emphasises strengths, resilience and positive quality of life. It is applicable to all people, including those with mental illness, and to all aspects of mental health and social services. The course has a particular focus on the treatment and recovery for individuals affected by mental health problems.

POPLHLTH 736  
Mental Health Promotion  
Examines the central role that positive mental health and well-being plays in the health of populations. It focuses on understanding the determinants of mental health and the processes by which these determinants affect mental health. The theory and application of mental health promotion practice, encompassing strategies for action at the societal, community and individual level, are discussed.

POPLHLTH 737  
Alcohol, Tobacco and Other Drug Studies  
Provides an introduction and overview to studies on alcohol and other drugs. Incorporates theory and research developed within public health, mental health, and specialised treatment frameworks. Topics will include: coverage of historical developments, a review of major theoretical issues and an overview of current trends.

POPLHLTH 738  
Biology of Addiction  
The genetic and neurobiological factors that predispose to addiction. The response of the brain to various addictive substances. The pharmacological, clinical and behavioural effects of alcohol, tobacco, opioids, marijuana, amphetamines and hallucinogens. Treatment of intoxication and withdrawal.

POPLHLTH 739  
Introduction to Pacific Health  
Examines a wide range of health issues related to Pacific health. Provides an in-depth analysis with evidence of the global, regional and local issues that determines the health of the Pacific population both in the Pacific region and in New Zealand.

POPLHLTH 746  
Ethics, Culture and Societal Approaches to Death  
Approaches to death by Māori and other cultures. Resource and legal issues in the New Zealand context. Ethical issues: euthanasia versus palliative care, privacy, living wills and end of life medical decision-making; particularly treatment abatement. Duties after death, the nature of teamwork, the multidisciplinary nature of palliative care, the role of volunteers, emotional self care for palliative care providers, and home versus residential care.

POPLHLTH 747  
Loss, Grief and Bereavement  
Contemporary understandings of change, loss, grief and bereavement in a variety of settings and arising from different causes and situations. Theories and research pertaining to assessment and support procedures and services will be reviewed.

POPLHLTH 749  
Biology of Ageing  
The systematic analysis of the physiological changes in ageing and the relationship of these changes to current beliefs and theories around the ageing process. Current issues around biogerontology are discussed.

POPLHLTH 750  
Research Project in Population Health  
POPLHLTH 751  
Special Studies  
POPLHLTH 752  
Case Studies in Global Health  
POPLHLTH 753  
Tobacco Control: Principles and Practices  
An overview of research and theory developed within public health and epidemiological contexts related to tobacco control. Major theoretical issues, current trends and challenges to Tobacco Control are considered. Topics covered relate to four themes: (1) reducing initiation, (2) reducing smoking-related harm, (3) smoking cessation and, (4) the new goal for New Zealand to be smoke-free by 2025.
POPLHLTH 754 15 Points
Health Leadership
Designed to help participants identify how they can take a leadership role within and across sectors that have an impact on health. Combines the relevant knowledge, theory, concepts, skills and personal development relating to leadership within the context of improving health.

POPLHLTH 755 60 Points
POPLHLTH 755A 30 Points
POPLHLTH 755B 30 Points
Applied Research Project
Provides a supervised learning experience for students in their place of work in the health sector. Students must undertake project work and write a report documenting the work undertaken, the results arising, and the learning obtained.
To complete this course students must enrol in POPLHLTH 755 A and B, or POPLHLTH 755

POPLHLTH 756 15 Points
Health Services Analysis and Policy
Examines how social factors, financing systems, organisational systems processes, health technologies and personal behaviours affect health outcomes and quality of life. Provides an overview of current research on access to healthcare, healthcare expenditure, quality of care and evidence based management and policy. Provides students with the expertise to conduct quantitative analysis in health services research, and includes the use of statistical packages.

POPLHLTH 757 15 Points
Evaluation Theory and Practice
Provides an in-depth perspective of evaluation theory and practice, and their application to the health sector. There will be an advanced level focus (following on from POPLHLTH 705) on how to conduct evaluations using a variety of models and applying them to specific contexts. Suitable for students wishing to develop more advanced skills in evaluation.
Prerequisite: POPLHLTH 705 or permission from the Course Coordinator

POPLHLTH 758 15 Points
Theoretical Concepts of Health
A number of theoretical explanations of public health are considered in order to address health issues in diverse communities. An ecological perspective of health will be explored and the specific models of population health will be critiqued.

POPLHLTH 759 15 Points
Clinical Leadership in Residential Care
Examines clinical leadership in residential care, including an in-depth exploration of models that support client centred and directed care, and the enhancement of clinical practice and client wellbeing utilising models of care and the role of advocacy. The course provides a broad framework for developing an understanding of clinical leadership in this environment and is directed at all health professionals providing services in the residential care sector.

POPLHLTH 760 15 Points
Principles of Public Health
Considers the principles underlying the modern practice of public health. Students examine the major core concepts in public health, including determinants of health, health equity, environments and health, health promotion and health systems.
Population Health Practice

Postgraduate 700 Level Courses

POPLPRAC 701 15 Points
Therapeutic Communication
Critical analysis of patient-centred approaches to communication with a strong practical emphasis. Topics will reflect the learning needs of the participants as located within their own area of clinical practice, and may include: communication within family systems; preparing for and managing challenging and/or difficult communication situations, including the giving of bad news; appropriate communication styles, including assertiveness and managing conflict. The role of self in the therapeutic relationship will be explored.

POPLPRAC 702 15 Points
Primary Mental Health
Provides an overview of the recognition and primary care management of adult mental health. A clinically focused course for primary care practitioners. The content covers high prevalence conditions (depression, anxiety, adjustment disorders) along with assessment and treatment options. Long term conditions – bipolar affective disorder and schizophrenia are discussed. Topics include recovery, cultural approaches, resilience, psychosomatic interface, stigma, CBT techniques for depression, insomnia, and alcohol and drugs.

POPLPRAC 707 15 Points
Theory and Skills in Counselling Practice
The theory, research and practice regarding counselling and psycho-therapeutic approaches used in mental health and addiction service contexts. Approaches will be critically examined in terms of history, theory, social context and trends in research. Particular attention will focus on counselling methods currently in use within services.

POPLPRAC 708A 15 Points
Assessment and Intervention with Addiction
Develops understanding and competency in assessment and intervention work with clients having co-existing problems, specifically those most affected by alcohol and drug issues. It focuses on comprehensive assessment, effective clinical interventions, drug-specific interventions and culturally specific approaches working with individuals, whanau, and communities. It will involve regular review of practice using case-based scenarios filmed with feedback from tutors, mentors and peers. To complete this course students must enrol in POPLPRAC 708A and B

POPLPRAC 709 15 Points
Gambling and Health
Provides an overview of gambling in New Zealand with an emphasis on historical, social, psychological and public health perspectives. It examines the emergence of harm from gambling and reviews research and theory as applied in services at the level of prevention, intervention and treatment.

POPLPRAC 710 15 Points
Health Promotion: Practicum
Theoretical and practical principles of health promotion processes, combined with practical experience, in the context of relevant organisations, community groups and research projects. Students are expected to find their own placement for the practicum.

POPLPRAC 711 15 Points
Health Promotion in Pacific Community Development
Allows supervised experience for students in a Pacific-specific service. A course of study relevant to the area of placement will be prescribed.

POPLPRAC 712 15 Points
Project Planning for Lifestyle Change
Focuses on the planning and development of interventions aimed at addressing lifestyle issues such as alcohol and other dangerous consumptions, obesity, lack of exercise and mental trauma. Students synthesise strategies from published literature and adapt them pragmatically for application in local contexts. Interventions will include those occurring in communities, primary and mental healthcare settings, hospitals, workplaces, and educational institutions.

POPLPRAC 713 15 Points
Understanding Health Behaviour
Designed for primary health practitioners to provide understanding about how and why individuals may (or may not) make changes to their health behaviour. It provides a background in long-term lifestyle protective and risk factors for disease. Examples of lifestyle behaviours contributing to disease are examined, with a focus on how diet and exercise affect obesity, diabetes and cancer. Models for promoting personal health behaviour change are critiqued.

POPLPRAC 714 15 Points
Facilitating Behaviour Change
Introduces practical skills for primary care professionals to facilitate healthy behaviours in healthy people (primary prevention) and to improve lifestyle behaviour choices and enable self-care in patients with long-term disease (secondary prevention). Social, psychological and biomedical evidence will be used to inform behavioural modification-based programmes. Includes practical sessions employing a variety of tools and imparting experiential skills for facilitating patient health behaviour change.

POPLPRAC 715 30 Points
POPLPRAC 715A 15 Points
POPLPRAC 715B 15 Points
Practicum in Population Health
Learning of advanced knowledge and skills, and supervised experience within an area of Population Health. To complete this course students must enrol in POPLPRAC 715 A and B, or POPLPRAC 715

POPLPRAC 716 15 Points
Practicum in Pacific Health
Supervised experience for students in a Pacific-specific health environment. A course of study relevant to the area of placement will be provided.

POPLPRAC 717 15 Points
Coexisting Disorders: Theory and Principles
Suitable for students who work within both the mental health and the alcohol and drug services. It introduces students to research and theory on coexistent
disorders and examines recent developments in intervention strategies from a theoretical point of view.

**POPLPRAC 718** 15 Points
**Coexisting Disorders: Interventions**
Develops the theoretical ideas in practice introduced in Coexisting Disorders: Theory and Principles. Additionally, students have an opportunity to reflect on the organisation of services to people with a dual diagnosis and the best practice that is offered within them.

Prerequisite: POPLPRAC 717

**POPLPRAC 719** 15 Points
**Essentials of Palliative Care**
Philosophy of palliative care, self-care including professional supervision and debriefing, cultural and ethical issues in palliative care, pain and other symptom management, loss, grief and spirituality issues in palliative care, Palliative care interventions such as paracentesis and thoracentesis. Coordination and planning of future care.

**POPLPRAC 720** 15 Points
**Psychosocial Issues in Palliative Care**
The psychological and social study of patients with cancer or active, progressive disease, unresponsive to curative treatment. Existential philosophy and models of coping with suffering, communication in palliative care, psychiatric disorders in palliative care, and bereavement.

**POPLPRAC 721** 15 Points
**Reflective Practice in Palliative Care**
Advanced study in an appropriate area of palliative care that is of special interest to the student as approved by the Head of School.

**POPLPRAC 722** 15 Points
**Foundations of Clinical Symptom Management in Palliative Care**
Management of pain, nausea and vomiting, respiratory symptoms, bowel care, mouth and skin care, cognitive mood and sleep disorders, oncological emergencies, palliative care for non malignant conditions, HIV/AIDS, and paediatric palliative care.

**POPLPRAC 723** 15 Points
**Clinical Symptom Management in Palliative Care 2**
Advanced concepts of the management of symptoms in a variety of palliative care situations.

**POPLPRAC 724** 15 Points
**Child and Adolescent Palliative Care**
An examination of specific palliative care issues related to the care of children, adolescents, and their families.

**POPLPRAC 725** 15 Points
**Principles of Gerontology**
The basic biology, demographics, social policy, sociology, psychology and economics of ageing.

**POPLPRAC 726** 15 Points
**Health Services for Older People**
Regulatory and accreditation requirements for facilities caring for the elderly in a wide variety of organisations and models of care for the elderly. Critical review of innovative services in elderly care.

**POPLPRAC 727** 15 Points
**Mental Health in Old Age**
The psychological aspects of ageing, common psychiatric presentations in the elderly, sleep disturbance, grief and loss, anxiety disorders, drug and alcohol abuse, depression, delirium, dementia, behavioural disorders, psychosis, and medicolegal aspects.

**POPLPRAC 739** 15 Points
**Urgent Primary Medical Care**
Assessment and management of a broad range of acute conditions and related issues including: chest pain, dyspnoea, collapse, coma, anaphylaxis, diabetes, toxicology, psychiatry and environmental conditions.

**POPLPRAC 740** 15 Points
**Urgent Primary Surgical Care**
Assessment and management of acute surgical and subspecialty conditions and related issues including: trauma, head injury, abdominal pain, ophthalmology, ENT, gynaecology, pregnancy, and genito-urinary conditions.

**POPLPRAC 741** 15 Points
**Upper Limb and Spine**
The management of acute and chronic sporting injuries of the upper limb and spine including: initial management, surgical intervention, and rehabilitation.

**POPLPRAC 744** 15 Points
**Lower Limb and Physiotherapy**
The management of acute and chronic sporting injuries of the lower limb including: initial management, surgical intervention, and rehabilitation. Physiotherapy principles in relation to diagnosis, management and rehabilitation are covered.

**POPLPRAC 745** 15 Points
**Sports Medicine in the Community**
The role of the doctor and physiotherapist in community settings including: their role in team sports, community sports event medical cover, environmental medicine, exercise for health, exercise physiology and sports psychology.

**POPLPRAC 746** 15 Points
**Medical Issues in Sport**
Management of medical conditions in sports people and the interaction of exercise and medical conditions, including diabetes, asthma and infections. Other topics covered include: pain management, immunology, rheumatology, ENT, the female athlete, haematology, pharmacology and drugs in sport.

**POPLPRAC 747** 45 Points
**POPLPRAC 747A**
22.5 Points
**POPLPRAC 747B**
22.5 Points
**Practical Sports Medicine**
Practical sports medicine skills including injury management, along with the duties of team health professionals, and drugs in sport. Corequisite: POPLHLTH 709, POPLPRAC 743, 744, 745, 746
To complete this course students must enrol in POPLPRAC 747 A and B, or POPLPRAC 747

**POPLPRAC 753** 15 Points
**Special Studies**

**POPLPRAC 754** 15 Points
**Infant, Child and Adolescent Primary Mental Health**
Provides an overview of the recognition and primary care management of mental health in the under-eighteen age group. A clinically focused course for primary care practitioners. The content covers attachment, early intervention, development, risk
assessments, resilience and families. Topics include depression, anxiety disorders, substance use, eating disorders, first episode psychosis, pain, somatic presentations, disruptive behaviour disorders and common behavioural problems.

POPLPRAC 755 15 Points
Special Topic

POPLPRAC 756 30 Points
Adult Rehabilitation Studies
Focuses on the rehabilitation of adults with an acquired or traumatic condition; including an in-depth exploration of the philosophy of rehabilitation interwoven with the development of clinical rehabilitation skills. The concepts addressed in rehabilitation reflect the eclectic nature of the discipline.
Restricted: POPLPRAC 728

POPLPRAC 757 15 Points

POPLPRAC 763A 15 Points
POPLPRAC 763B 15 Points
Urgent Primary Orthopaedic Surgical Care
Combines theoretical knowledge with clinical practice. Covers primary care, urgent and emergency orthopaedic and plastic surgical conditions including spinal, limb and pelvic fractures, bites and stings, burns and wound care. Practical skills relevant to acute injuries including X-ray assessment, fracture and dislocation reduction, plastering bones, local anaesthesia and suturing wounds.
Corequisite: POPLHLTH 709, POPLPRAC 739, 740, PAEDS 714
Restricted: POPLPRAC 737, 738, 741
To complete this course students must enrol in POPLPRAC 763 A and B

Special Topic

Psychiatry

Postgraduate 700 Level Courses

PSYCHIAT 713 15 Points
Special Topic in Mental Health

PSYCHIAT 740 15 Points
Child and Adolescent Psychopathology
Includes teaching on conceptualisation of mental disorder in children and adolescents, specifically considering the benefits and pitfalls of an illness model. The major focus will be a biopsychosocial and developmental perspective and there will be specific teaching focusing on the DSM IV classification in child and adolescent psychiatry.

PSYCHIAT 741 15 Points
Therapy in Child and Adolescent Mental Health – Theory
Covers the range of treatment modalities used in child and adolescent mental health. Rationale and nature of current therapies will be covered. Students will undertake critical appraisal of the evidence base for therapy pertinent to specific clinical situations.
Prerequisite: PSYCHIAT 740

PSYCHIAT 746 15 Points
Research Topic in Forensic Psychiatry
A detailed research study of key issues in forensic psychiatry.

PSYCHIAT 747 15 Points
Child and Adolescent Development
Evaluation of research support for major conceptual and theoretical frameworks for understanding development will be addressed. There will be a focus on specific aspects of development in relation to mental health in childhood and adolescence. These will include: theories of attachment, cognitive development, and social and emotional development in the context of the family; and identity and self-concept issues in adolescence.

PSYCHIAT 760 15 Points
Legal Issues in Psychiatry
An overview of the key issues in the interface between the law and psychiatry, including issues in criminal law (legal insanity, fitness to stand trial, sentencing issues of mentally abnormal offenders), mental health law and civil forensic psychiatry. Report writing and the principles of expert testimony will be addressed.

PSYCHIAT 761 15 Points
Clinical Forensic Psychiatry 1
Addresses the major clinical themes of forensic psychiatry. Students will develop an understanding of the relationship between mental disorder and dangerous behaviour, the principles of risk assessment and management, and the service needs of mentally abnormal offenders.

PSYCHIAT 762 15 Points
Clinical Forensic Psychiatry 2
Examines the literature in detail in relation to key forensic psychiatric issues including: the assessment of risk of violence, the impact of treatment services, the nature and application of the concept of psychopathy, and the role and directions of forensic psychiatric research.
Prerequisite: PSYCHIAT 761

Clinical Skills in Child, Adolescent and Family Mental Health Assessment
The clinical skills of assessment, formulation and case recording of children and adolescents, and their families within a mental health setting. An amalgam of theory and practice including methods of assessment, assessment of specific psychiatric disorders, assessment interviewing skills, processing and synthesis of clinical assessment information in written work.
Corequisite: PSYCHIAT 740, 747
Restricted: PSYCHIAT 748, 749
To complete this course students must enrol in PSYCHIAT 768 A and B, or PSYCHIAT 768
PSYCHIAT 769 15 Points
CBT with Children, Adolescents and their Families 1
Explores Cognitive Behavioural Therapy (CBT) as an evidence-based treatment for children, adolescents and their families, and covers both theoretical and practical applications of CBT. Specifically designed for New Zealand based practitioners working clinically and/or therapeutically with families, students will learn the CBT model, treatment packages and strategies for depression and anxiety. There is also a strong focus on culturally appropriate interventions (especially those appropriate for Māori).
Prerequisite: PSYCHIAT 740, 747

PSYCHIAT 770 15 Points
CBT with Children, Adolescents and their Families 2
Examines advanced knowledge and skills applied to complex disorders. Builds on PSYCHIAT 769 and further extends the practitioner’s knowledge and skill base to include more complex issues of Trauma, Anger, DBD, Self-esteem, OCD and Personality. The strong cultural focus continues, with issues for Māori families being considered in more depth. Students will also have access to New Zealand CBT resources and practice more in-depth CBT skills.
Prerequisite: PSYCHIAT 769

Bioinformatics

Stage III

BIOINF 301 15 Points
Introduction to Bioinformatics
An overview of the methods and applications of bioinformatics with specific reference to: internet-accessible database technology, database mining, applications for gene and protein sequence analysis, phylogenetic analyses, three-dimensional protein prediction methods, and genome sequence analysis.
Prerequisite: 30 points from Stage II in Biological Sciences
Restriction: BIOSCI 359

Postgraduate 700 Level Courses

BIOINF 701 15 Points
Bioinformatics
An overview of the methods and applications of bioinformatics with specific reference to: internet-accessible database technology, database mining, applications for gene and protein sequence analysis, phylogenetic analyses, three-dimensional protein prediction methods, and genome sequence analysis.
Prerequisite: 30 points from Stage II in Biological Sciences
Restriction: BIOINF 301, BIOSCI 359, 742

BIOINF 702 15 Points
Comparative Bioinformatics
Much knowledge of biological systems is acquired by making comparisons with known systems. Several computational methods, including Markov models, HMMs and dynamic programming can be used in making these comparisons. Technical aspects of these methods and their application to biological problems will be discussed.
A sound understanding of BIOSCI 359 or BIOINF 301 or equivalent is assumed. Students lacking this background must take BIOINF 701 as a corequisite.

BIOINF 703 15 Points
Genome Bioinformatics and Systems Biology
Advances in genetic sequencing technologies are rapidly changing our ability to determine the genome sequence and to explore the gene expression profiles of organisms. Relevant computational methods, including graph theory, string comparison and pattern matching, will be discussed, along with their application to genome assembly, metagenomics, gene-gene interaction and systems biology.
Prerequisite: BIOINF 701 or equivalent

BIOINF 704 15 Points
Statistical Bioinformatics
Introduction to the analysis of microarray and gene expression data, and of gene association studies.

BIOINF 761 15 Points
MSc Thesis Proposal
An extensive review of background material associated with the thesis topic, and a detailed outline of the proposed research and its significance. Students will also be required to present an overview of the proposal in a seminar.

BIOINF 789A 22.5 Points
BIOINF 789B 22.5 Points

Biological Sciences

Foundation Courses

BIOSCI 91F 15 Points
Foundation Biology 1
An introduction to unity in biological sciences. The structures and processes common to all living things at the cellular and molecular levels are introduced in the first half of the course. Genetic principles and processes and an overview of evolutionary concepts are explored in the second half. Laboratory classes complement and reinforce lecture material and several are computer-based utilising multi-media learning tools.
Restriction: BIOSCI 91W

BIOSCI 92F 15 Points
Foundation Biology 2
Concepts introduced in BIOSCI 91F are further developed with an emphasis on the diversity of living things (including bacteria, plants, fungi and animals). Fundamentals of classification and ecology are introduced and the study of a current topic in biology is used to develop research and critical thinking skills. Practical classes are both laboratory and field-based.
Restriction: BIOSCI 92W

Preparatory Courses

BIOSCI 91P 15 Points
Preparatory Biology 1
A preparatory introduction to unity in biological sciences. The structures and processes common to all living things at the cellular and molecular levels are introduced in the first half of the course. Genetic principles and processes and an overview of evolutionary concepts are explored in the second half. Laboratory classes complement and reinforce lecture material and several are computer-based utilising multi-media learning tools.
Restriction: BIOSCI 91F, 91W

BIOSCI 92P 15 Points
Preparatory Biology 2
Concepts explored in BIOSCI 91P are further developed with an emphasis on the diversity of living things (including bacteria, plants, fungi and animals). Fundamentals of classification and ecology are introduced and the study of a current topic in biology is used to develop research and critical thinking skills. Practical classes are both laboratory and field-based.

Stage I

BIOSCI 100 15 Points
BIOSCI 100G 15 Points
Antarctica: The Frozen Continent
A general introduction to Antarctica and its environs including the Southern Ocean and the sub-Antarctic islands. Emphasis will be placed on the evolution of Antarctica and how resident plants, animals and micro-organisms have adapted to cope with the extreme environment. Specific topics to be addressed include: the history of Antarctic exploration and its impact on the development of Antarctic science, Antarctic ecosystems, Antarctica as a wilderness region, and the impact of humans including the exploitation of resources and the effects of pollution.
This course is suitable for students with both science and non-science backgrounds.

BIOSCI 101 15 Points
Essential Biology: From Genomes to Organisms
An introduction to the structures and processes which are common to micro-organisms, animals and plants at the cellular, molecular and biochemical levels. Genetic principles and processes and an overview of evolution and evolutionary concepts are included. This course assumes a knowledge of NCEA Level 3 Biology and at least NCEA Level 2 Chemistry.

BIOSCI 102 15 Points
Plants, Microbes and Society
A multidisciplinary approach is taken to studying the relationships between plants, microbes and humans. The course begins with an introduction to the key characteristics of plants and microbes and then goes on to show how they are used for food and pharmaceuticals. The impact of plants and microbes on human health, as well as their role in a variety of industrial and biotechnological processes, will be highlighted.

BIOSCI 103 15 Points
Comparative Animal Biology
A comparative approach to the study of animals, focusing on the processes which underlie and unite all animal life. Emphasis will be placed on evolutionary relationships and history, and on the relationship between form and function and the predictability of animal design. Reference will be made to the New Zealand fauna and to other animals of economic or evolutionary importance, where appropriate.

BIOSCI 104 15 Points
BIOSCI 104G 15 Points
New Zealand Ecology and Conservation
An introduction to the diversity of animals and plants in New Zealand including endemic, native and introduced species, biogeographical and evolutionary relationships, community structure and interrelationships, behaviour and ecology. Māori perspectives in biology, and current conservation, environmental, social, animal welfare and economic issues relevant to New Zealand biology.

BIOSCI 106 15 Points
Foundations of Biochemistry
Biochemical reactions as essential elements of life processes with reference to the genes that control them. Material covered includes: the molecular structure and action of proteins, the synthesis and metabolism of carbohydrates and fats in the fed and starved states, and elements of enzymology, energetics, metabolism, nutrition and hormonal control in health, physical performance and disease. Reference will be made to specific biomedical examples, where appropriate.

BIOSCI 107 15 Points
Biology for Biomedical Science: Cellular Processes and Development
The cellular basis of mammalian form and function including embryology and development. Particular emphasis will be placed on the cellular components of the blood, neural, muscular, reproductive, immune and supporting systems, and how they contribute to the structure and function of the body as a whole.
**Stage II**

**BIOSCI 201** 15 Points  
**Cellular and Molecular Biology**  
The basic structures of biomolecules, the evolution and structure of cells and their organisation into tissues and organs are examined first. This is followed by a study of the nucleus, the regulation of gene expression, and DNA, RNA and protein synthesis. Further sections deal with cell behaviour, development, cancer and the basis of immunity.  
Prerequisite: BIOSCI 101, and 30 points from BIOSCI 102–107, MEDSCI 142, and 15 points from CHEM 110, 120, 150

**BIOSCI 202** 15 Points  
**Genetics**  
The basic principles of mutation, recombination and genetic mapping are established in this course. These principles are developed in a variety of prokaryotic and eukaryotic organisms. Laboratory work uses molecular, microbial and eukaryotic material to explore the key features of heredity.  
Prerequisite: 30 points from Stage I Biological Sciences including BIOSCI 101

**BIOSCI 203** 15 Points  
**Biochemistry**  
Presents core areas of modern biochemistry. Emphasis is on macromolecular structure and function. Areas covered include protein structure, oxygen and carbon dioxide transport in humans and other species, metabolism in mammals, proteases and human disease, cholesterol metabolism and transport and signal transduction.  
Prerequisite: BIOSCI 101, 106 and 15 points from CHEM 110, 120

**BIOSCI 204** 15 Points  
**Principles of Microbiology**  
An introduction to the diversity, physiology and functions of microorganisms (prokaryotes, eukaryotes, viruses) as individuals and as communities. The fundamental roles of microorganisms in ecosystems, health and disease are considered alongside methods for their isolation and study. Microbial applications in biotechnology, food production, agriculture and industry are also discussed.  
Prerequisite: BIOSCI 101 and at least 15 points from BIOSCI 102, 106, 107

**BIOSCI 205** 15 Points  
**Plant, Cell and Environment**  
Unlike animals, plants cannot move to respond to changes in their environment. Plants have evolved diverse signaling systems and the ability to grow towards their essential resources. Explores the intricate ways plants function, how they are able to respond to developmental and environmental signals at the whole plant and cellular level.  
Prerequisite: BIOSCI 101 and 15 points from BIOSCI 102, 104, 106, 107

**BIOSCI 206** 15 Points  
**Principles of Ecology**  
An examination of ecosystem processes, factors that affect distribution and interactions of organisms, population ecology, and applications of ecology such as restoration and conservation. The key principles of ecology are taught in a New Zealand context emphasising an experimental approach.  
Prerequisite: BIOSCI 101, 104 and 15 points from either STATS 101 or 108

**BIOSCI 207** 15 Points  
**Adaptive Design**  
The principles of evolutionary adaptation to different habitats and their application to behaviour, morphology, physiology and life histories. Comparative examples are drawn from diverse life forms and contexts, including the biology of dinosaurs, how animals navigate, the evolution of ageing, costs and benefits of sex and an evolutionary account of human nutritional biology.  
Prerequisite: BIOSCI 101 and 15 points from BIOSCI 102–104, 106, 107

**BIOSCI 208** 15 Points  
**Invertebrate Diversity**  
Invertebrates make up over 95 percent of animal species. This course explores the biology of invertebrates with an emphasis on structure, function, life histories, behaviour and ecology. Invertebrate diversity is examined in a variety of environments, using New Zealand examples where possible, and provides the basis for advanced courses in conservation and marine ecology.  
Prerequisite: BIOSCI 101, 103

**BIOSCI 209** 15 Points  
**Biometry**  
An introduction to statistical methods for biological and environmental scientists. Students will learn how to carry out various statistical analyses using computer packages, as well as how to interpret and communicate the results. The topics covered include: experimental design and sampling, regression and analysis of variance models, analysing frequencies and counts, and basic multivariate techniques commonly used in biology.  
Prerequisite: 15 points in either STATS 101 or 108 and 30 points from Biological Sciences, Environmental Sciences or Geography  
Restriction: STATS 201, 207, 208

**BIOSCI 210** 15 Points  
**Evolution and the Origins of Life**  
Covers basic concepts in evolutionary biology including Darwin and the theory of evolution by natural selection, phylogenetics, population genetics, molecular evolution, speciation and extinction. The extent to which Darwin's theory of evolution by natural selection can explain the origins of biological complexity is explored.  
Prerequisite: BIOSCI 101 and 15 points from BIOSCI 102, 103, 104, 106, 107

**Stage III**

**BIOSCI 320** 15 Points  
**Pure and Applied Entomology**  
An introduction to the systematics of insects describing the characters that define the major lineages, discussion of the role insects play in different ecological systems, and insect anatomy, physiology, and genetics. Their impact on agriculture and as disease vectors is discussed with descriptions of various control methods for insect pests and how these methods are integrated. Students wishing to complete a course in plant protection should take both BIOSCI 320 and 321.  
Prerequisite: BIOSCI 103 and 15 points from Stage II Biological Sciences courses

**BIOSCI 321** 15 Points  
**Plant Pathology**  
Micro-organisms are of major importance to
agriculture. This course will examine the biology of plant pathogens, plant-microbial interactions at the cellular and sub-cellular level, and the epidemiology and control of plant diseases. Practicals will focus on techniques for isolation, culture, identification and study of plant pathogens.

**Prerequisite:** 15 points from BIOSCI 204, 205

**BIOSCI 322**  
**Evolution of Genes, Populations and Species**  
Advanced concepts in evolutionary biology and their application to current research in molecular evolution, population genetics, phylogenetics and organismal evolution. Examples from animals, plants and microbes, as well as topical issues, including speciation, adaptation, co-evolution, sexual selection, conservation, biogeography, genomics, biotechnology and human disease.  
**Recommended preparation:** Prior or concurrent enrolment in BIOSCI 202  
**Prerequisite:** BIOSCI 210

**BIOSCI 323**  
**Plant Diversity**  
An introduction to plant systematics, plant reproductive strategies, and the evolution of plants with a comprehensive survey of the characteristics and distributions of the major plant groups. Coverage will also include classical and phylogenetic approaches to plant identification, and applications of systematics. Practical work will focus on tools for identifying plants, introduction to plant diversity in the lab and field, and development of a herbarium collection.  
**Prerequisite:** BIOSCI 102 or 104 and 30 points at Stage II in Biological Sciences, Environmental Science or Geography

**BIOSCI 328**  
**Fisheries and Aquaculture**  
Harvest and capture of aquatic organisms and inter-relationships with aquaculture. Fisheries and aquaculture are treated not as distinct disciplines but in the context of integrating exploitation and sustainable environmental integrity. Case studies include deep sea and coastal fisheries, and shellfish culture.  
**Prerequisite:** BIOSCI 207 or 208

**BIOSCI 329**  
**Biology of Fish**  
A comprehensive coverage of the biology of fish including their evolution, diversity and organism biology. Coverage includes habitats of particular interest to New Zealand such as Antarctica, the deep sea, coral and temperate reefs, and New Zealand's lakes and rivers.  
**Prerequisite:** 15 points from BIOSCI 207, 208

**BIOSCI 330**  
**Freshwater and Estuarine Ecology**  
The structure, biodiversity and ecology of lakes, streams, wetlands and estuaries and linkages with near-shore marine habitats. Emphasis is placed on the role of science in monitoring and managing these ecosystems. Case studies include the impact of Auckland's urban sprawl on stream, estuarine and near-shore marine habitats, and local estuaries as nurseries for fish.  
**Prerequisite:** BIOSCI 206, or 104 and 15 points from BIOSCI 205, or 207 or 208 and STATS 101 or 108

**BIOSCI 333**  
**Marine Ecology**  
Patterns and processes in marine ecology and biodiversity are described; including animal and plant interactions, benthic and pelagic habitats, biogeography, productivity and physiology. Applied aspects include resources such as fisheries and aquaculture, survey methods, and pollution. Other lectures cover nutritional and chemical ecology and invertebrate reproduction.  
**Prerequisite:** BIOSCI 206, or 104 and 15 points from BIOSCI 205, or 207 or 208 and STATS 101 or 108

**BIOSCI 335**  
**Ecological Physiology**  
Focuses on the strategies used by animals to cope with physical and biological challenges in the environment. Accordingly, we work at the level of the individual and the interface between physiological, biochemical or molecular approaches on the one hand, and ecology on the other. The adaptive strategies employed by a range of species, with an emphasis on aquatic organisms, in response to physical factors such as temperature, oxygen and food availability, are considered. Energetics and nutrition are emphasised. The course aims to meet the needs of students with ecological interests wishing to recognise the experimental approach to solving problems in environmental biology. The practical work is project oriented rather than laboratory based.  
**Prerequisite:** 15 points from BIOSCI 207, 208

**BIOSCI 337**  
**Animal Behaviour**  
Proximate and ultimate causes of behaviour are investigated experimentally in the field and the laboratory. Responses by animals to variations in the physical environment and to other organisms are studied. The development and organisation of behaviour and the theoretical background to topics of current interest are covered, using both New Zealand and overseas examples. A knowledge of BIOSCI 206 is recommended.  
**Prerequisite:** BIOSCI 207 and STATS 101 or 108 or BIOSCI 209

**BIOSCI 340**  
**Plant Cell Biology and Biotechnology**  
Explores the cellular basis of how plants develop, function and respond to the environment and how this knowledge is applied to biotechnology. Topics include: methods in plant cell biology, control of gene expression, control of cell shape, intracellular transport and targeting, plant growth hormones and signaling, controlled flowering, structures and biosynthesis of plant cell walls and horticultural biotechnology.  
**Prerequisite:** BIOSCI 201 or 202 or 205

**BIOSCI 347**  
**Environmental Microbiology and Biotechnology**  
The ecology and physiology of micro-organisms in natural and engineered environments. Key themes include marine microbiology, the importance of microbial symbioses to life on Earth, and contemporary research methods in microbiology. Processes such as wastewater treatment and the production of bioactives are used to emphasise exploitation of
microbial metabolism for environmental biotechnology purposes.
Prerequisite: 15 points from BIOSCI 204, MOLMED 201, MEDSCI 202
Restriction: BIOSCI 352

BIOSCI 348 15 Points
Food and Industrial Microbiology
The use and scientific fundamentals of microorganisms in the production of foods and food additives, nutriceuticals and probiotics. Molecular and applied aspects of the fermentation processes for beer and wine including aroma generation and analysis. Microbial food spoilage, pathogens involved, food safety and quality control.
Prerequisite: BIOSCI 106 and 15 points from BIOSCI 204, MOLMED 201, MEDSCI 202
Restriction: BIOSCI 352

BIOSCI 349 15 Points
Biomedical Microbiology
The major biochemical, physiological and genetic systems involved in the biology of micro-organisms affecting human health. Properties of micro-organisms important in pathogenesis and virulence, and examples of infectious diseases. The molecular response of the host cells during infection; the molecular basis for antimicrobial therapy, acquisition of resistance, and vaccination; use of micro-organisms in medical biotechnology.
Prerequisite: BIOSCI 201 and either BIOSCI 204 or MEDSCI 202

BIOSCI 350 15 Points
Protein Structure and Function
The relationship of molecular structure to protein function will be emphasised. Techniques for the purification, characterisation, production of native and recombinant proteins and three-dimensional structure determination will be combined with a description of protein structure. Specific groups of proteins will be selected to illustrate structure/function relationships and protein evolution.
Prerequisite: BIOSCI 201, 203

BIOSCI 351 15 Points
Molecular Genetics
The analysis of genetic material in prokaryotes, viruses, yeast, plants and humans is addressed. The means by which genetic information is transferred and the mechanisms underlying genome diversity will be examined, together with the study of eukaryote genomes at the level of chromosome structure and organisation. The molecular mechanisms underpinning selected inherited human disorders will be discussed as well as the role of model species in understanding normal and perturbed biological pathways.
Prerequisite: BIOSCI 201, 202

BIOSCI 353 15 Points
Molecular and Cellular Regulation
The molecular mechanisms which mediate intracellular sorting and targeting of biologically active molecules and the networks of intracellular and extracellular signals which regulate cell function form the focus of this course. The roles of growth factors, oncogenes, plasma membrane receptors, nuclear receptors, ion channels and membrane transporters are emphasised.
Prerequisite: BIOSCI 201, 203

BIOSCI 354 15 Points
Gene Expression and Gene Transfer
Molecular biology of plant and animal cells is stressed in topics covering gene expression and genetic engineering. These include: methods of gene isolation, transcription factors and the control of gene expression, animal viruses as gene vectors, gene therapy in humans and genetic engineering of livestock, methods of gene transfer in plants, and examples of genetic engineering for crop improvement.
Prerequisite: BIOSCI 202 and either 201 or 203 or 205

BIOSCI 356 15 Points
Developmental Biology and Cancer
Molecular, cellular and genetic aspects of normal and abnormal development focusing on a variety of model systems including drosophila, the zebrafish and the mouse. Molecular events underlying the development of body form, the differentiation of specific tissues such as the blood, and abnormalities of development which contribute to diseases of the body such as cancer. Implications of transgenic techniques on development.
Prerequisite: BIOSCI 201, 202

BIOSCI 358 15 Points
Nutritional Science
The scientific basis of nutrition focusing on its biochemistry and physiology in health and disease. Nutritional aspects of carbohydrates, fats, proteins, vitamins and trace nutrients are covered in an integrated manner. The methodologies which underpin nutritional science and its applications are included. Reference will be made to a broad range of examples, and a number of specific nutritional topics of current interest will also be included.
Prerequisite: BIOSCI 201, 203

BIOSCI 394 15 Points
Conservation Ecology
Prerequisite: BIOSCI 104 and 30 points at Stage II in either Biological Sciences or Geography

BIOSCI 395 15 Points
Pacific Biogeography and Biodiversity
Island biogeography and insular biodiversity across the Pacific. A multi-disciplinary approach involving the study of both plant and animal systematics and biogeography.
Prerequisite: 30 points at Stage II in either Biological Sciences or Geography

BIOSCI 396 15 Points
Terrestrial Ecology
Experimental and theoretical population and community ecology focusing on the interactions and environmental forces controlling the distribution and abundance of terrestrial populations of plants and animals. Both New Zealand and international examples will be used to explain the fundamental processes shaping ecological systems throughout the world.
Prerequisite: BIOSCI 206, or 104 and 15 points from BIOSCI 205, or 207 or 208 and STATS 101 or 108

**Meaning and Context:**

- **Marine Ecology**: Current topics in marine ecology at the population, community, and ecosystem level. Focuses on ecology and evolution in a life-history context, including topics on fertilisation, larval development, and recruitment.

- **Ecological Physiology**: Physiological and biochemical processes enable animals to occupy diverse habitats. A sound understanding of BIOSCI 357 or equivalent is assumed.

- **Aquaculture**: Current assessment of the national and global status of aquaculture and fisheries, including consideration of future prospects. Examples of algal, invertebrate, and fish aquaculture in New Zealand, and a review of general environmental and biological problems and the role of scientific knowledge in aquaculture management. A sound understanding of BIOSCI 328 or equivalent is assumed.

- **Neuroethology**: The experimental study of the neural basis of behaviour, including current topics in sensory systems (e.g., vision, olfaction, audition, lateral line, electro- and magneto-reception) together with neural mechanisms underlying biological rhythms. The application of neuroethology to biomimetic systems will also be discussed. A sound understanding of BIOSCI 337 or equivalent is assumed.

- **Evolutionary Biology**: A contemporary approach to central issues in evolutionary biology including mechanisms that produce macroevolutionary patterns. Current research using phylogenetic methods for testing evolutionary hypotheses will be discussed, encompassing the role of selection, the origin of mutations, and concepts of heredity. A sound understanding of BIOSCI 396 or equivalent is assumed.

- **Entomology and Biosecurity**: More than half of all described species are insects, and even more species await discovery and description. Insects at every trophic level above plants dominate terrestrial and freshwater food chains. Examines the evolution of insects, the importance of their role in terrestrial ecosystems, and the problems posed by insects as biosecurity invaders in non-native environments. A sound understanding of BIOSCI 320 or equivalent is assumed.

- **Biogeography**: Examines the patterns of animal and plant distribution, and the processes that influence these patterns. Topics covered include equilibrium theory, island succession, vicariance and dispersal, insular speciation, and human migration and colonisation. A sound understanding of BIOSCI 395 or equivalent is assumed.

- **Molecular Ecology and Evolution**: Interpreting the molecular archive by reconstructing the branching history of inheritance and its relationship to genetic diversity within and between species. Topics include the neutral theory of molecular evolution, rates of molecular evolution, molecular systematics, genome change and speciation, molecular identification of species, gene flow and population structure, selection at the molecular level, inbreeding depression and mutational load, and the use of molecular markers for estimation of kinship and the description of mating systems. A sound understanding of BIOSCI 322 or equivalent is assumed.

- **Terrestrial Plant Ecology**: Plants form the autotrophic basis of terrestrial food chains and their distribution, diversity and abundance is a critical determinant of ecosystem functioning. Topics covered include both plant population ecology – including population growth and structure, seed and seedling dynamics, and life history strategies – and community ecology – including vegetation structure, dynamics, and species interactions. Methods to survey, analyse, and model plant populations and communities will also be discussed. A sound understanding of BIOSCI 396 or equivalent is assumed.

- **Advanced Behavioural Ecology**: Focuses on organisms interacting in natural environments. Both the mechanistic underpinnings of behaviour and the fitness consequences of such behavioural traits will be examined. Behavioural ecology is not limited to questions of behaviour, but draws in issues of energetics and physiology as these factors are often used as proxies for fitness traits such as differences in survival and reproduction. A sound understanding of BIOSCI 337 or equivalent is assumed.

- **Microbial Genomics and Metabolism**: Cross-disciplinary issues involved in the understanding of microbial genome structure, gene regulation and metabolism. Includes: the genetic basis of microbial interactions and horizontal gene transfer, the effect of stress and mutation on microbial and viral evolution and modern approaches used to link gene sequence to biological function and phenotypes.

- **High Resolution Imaging of Biological Molecules**: X-ray crystallography and electron microscopy are two of the principal techniques used by biologists to determine molecular structure. The theory and practice of X-ray crystallography and electron microscopy, including a laboratory component where 3D structure are determined from experimental data, are addressed. Accessible to students with a variety of backgrounds, including Biology, Bioengineering, Chemistry and Physics. This course complements CHEM 738 and BIOSCI 757.
Advanced Biological Data Analysis

Design and analysis of experiments for both field and bench scientists. Methods for the analysis of designed experiments, including analysis of variance with fixed, random and mixed effects; also, regression analysis and analysis of covariance. Methods for the analysis of multivariate datasets such as cluster analysis, principal components analysis, multidimensional scaling, and randomisation methods. There will be a practical component to this course involving the use of appropriate statistical software.

Prerequisite: 15 points from BIOSCI 209, STATS 201, 207, 208, or equivalent

Dialogues in Biology

Cross-disciplinary issues in biology will be debated and explored including ethical and commercial issues underpinning science as a vocation; genetic engineering; development, and evolution versus genetic reductionism; environmentalism, conservation and biodiversity, the role of taxonomy, the history and philosophy of biological science.

Applied Microbiology and Biotechnology

Biosecurity and Invasion Biology

The science of invasion biology, including stages of the invasion process and ecological interactions between species. The impacts of invasive alien species in different ecosystems. Population and community ecology, in relation to biosecurity.

Weed and Pest Management

Techniques for the management of invasive plants and animals (vertebrates and invertebrates) in different ecosystem types, including terrestrial and aquatic ecosystems. Approaches to the prevention, control and eradication of invasive species in different situations.

Ecology of Microbial Interactions

The associations of micro-organisms with their immediate environment are considered. Topics to be discussed include microbial communities and their survival strategies in natural and artificial systems. A sound understanding of BIOSCI 347 or equivalent is assumed.

Advanced Plant Pathology

Addresses selected topics in plant pathology. Modern research on issues relating to biosecurity, plant disease spread (epidemiology) and plant pathogen interactions (disease resistance and susceptibility) will be investigated and discussed. A sound understanding of BIOSCI 321 or equivalent is assumed.

Plant Genomics and Genotype

How genomics and gene transfer technologies could be used to achieve improved plant growth and to develop food with new traits. Includes: plant genomics methods, engineering fruit colour, control of fruit ripening and texture, biotechnology project design. A sound understanding of BIOSCI 354 or BIOSCI 340 or equivalent is assumed.

Synthesis of Plant Products and Foods

Includes the biosynthesis of: selected plant cell-wall components important in dietary fibre or biomass for the production of biofuels, including lignins, cellulose or non-cellulosic polysaccharides; antioxidant pigments in food plants and their possible impacts on human health. The manipulation of nitrogen assimilation in plants to increase the yield and quality of agricultural and horticultural plant products. A sound understanding of BIOSCI 340 or equivalent is assumed.

Plant Genomes and Gene Expression

The analysis of plant genomes and regulation of gene expression in plant biology. Includes: inferences from whole plant genome sequences, transcription factors, transcriptional control of flowering time and post-translational control of hormone receptors by ubiquitination and degradation. A sound understanding of BIOSCI 354 or 340 or equivalent is assumed.

Genomics and Gene Expression

The analysis of genomes and gene expression as a means of understanding biological processes. Aspects of functional and chemical genomics will be presented, as well as gene expression profiling using microarray technology. In terms of the latter, features of experimental design and data analysis will be discussed in the context of disease and developmental processes. A sound understanding of BIOSCI 351 or equivalent is assumed.

Proteomics and Protein Interactions

Proteomics describes a field of research concerned with the large-scale study of protein expression and function. Highlights biochemical approaches used to link protein sequence and function. The application of proteomics to drug action, discovery and toxicology will be included. A sound understanding of BIOSCI 350 or equivalent is assumed.

Structural Biology

A selection of contemporary topics in the field of structure and function of important biomolecules and cellular activities. Topics may include: protein folding in the cell; motor proteins; influenza and HIV; protein structure determination; protein structure and function from genomic data. A sound understanding of BIOSCI 350 or equivalent is assumed.

Development, Differentiation and Disease

A critical analysis of normal and perturbed gene expression in selected model organisms as a means of understanding biological pathways and disease processes. Includes the development and use of transgenic organisms as models for human disease. A sound understanding of BIOSCI 356 or equivalent is assumed.
BIOSCI 759 15 Points  
**Molecular Cell Biology and Biomedicine**  
Explores recent advances in cell biology that have led to a greater understanding of a variety of cellular processes at the molecular level. Emphasis will be placed on biochemical and genetic approaches to understand disease mechanisms at the cellular level. A sound understanding of either BIOSCI 349 or 353 or MEDSCI 314 or equivalent is assumed.

BIOSCI 761 15 Points  
**MSc Thesis Proposal**  
An extensive review of background material associated with the thesis topic, and a detailed outline of the proposed research and its significance. Students will also be required to present an overview of the proposal in a seminar.

BIOSCI 762 15 Points  
**BSc(Hons) Dissertation Proposal**  
A review of the literature associated with the dissertation topic and an outline of the proposed research and its significance. Students will also be required to present an overview of the proposal in a seminar.

### Chemistry

#### Foundation Courses

**CHEM 91F**  
15 Points

**Foundation Chemistry 1**

Introduction to elements, compounds, the periodic
table, atomic structure, covalent bonding, molecular shape and polarity. Quantitative chemistry, including balancing equations, calculating moles and particles present, calculation of concentration in mol L⁻¹. Energy and thermo-chemistry. Laboratories include practical skills and qualitative analysis, and simple modelling.

CHEM 92F
Foundation Chemistry 2
15 Points
Introduces further principles of chemistry. Physical chemistry and qualitative inorganic analysis, including chemical kinetics and chemical equilibrium. Organic chemistry, including hydrocarbons, oxygen-containing functional groups, isomerism and reaction classifications, acids, bases, buffer solutions and titrations. Laboratories include reactions of hydrocarbon and oxygen-containing organic compounds, chromatography, testing for anions and cations in solution, acid-base titrations. This course requires prior enrolment in CHEM 91F.

Preparatory Courses

CHEM 91P
Preparatory Chemistry 1
15 Points
Preparatory introduction to elements, compounds, the periodic table, atomic structure, covalent bonding, molecular shape and polarity. Quantitative chemistry, including balancing equations, calculating moles and particles present, calculation of concentration in mol L⁻¹. Energy and thermo-chemistry. Laboratories include practical skills and qualitative analysis, and simple modelling.

Stage I

Note: For students who have not had the opportunity to study Chemistry previously, or wish to refresh their knowledge, attention is drawn to the Preparatory Chemistry course offered by the School of Chemical Sciences at the start of each academic year. For exceptionally well qualified students, Stage I requirements may be waived.

CHEM 100
15 Points

CHEM 100G
Molecules that Changed the World
15 Points
The impact of chemistry on the modern world will be explored by focusing on the stories of specific molecules, including penicillin, DDT and nylon. Their discovery, the underlying chemical principles that explain their behaviour, their impact on our lives including social and scientific issues that arise from their use, and their likely impact on the future will be investigated.
Prerequisite: No formal prerequisite, but the course assumes a science background at Year 11 or higher.

CHEM 110
Chemistry of the Living World
15 Points
A foundation for understanding the chemistry of life is laid by exploring the diversity and reactivity of organic compounds. A systematic study of reactivity focuses on the site and mechanism of reaction including application of chemical kinetics. A quantitative study of proton transfer reactions features control of pH of fluids in both living systems and the environment. It is recommended that students with a limited background in chemistry take CHEM 150 prior to CHEM 110.

CHEM 120
Chemistry of the Material World
15 Points
The chemistry of the elements and their compounds is explored. The relationship between molecular structure and reactivity, the role of energy, concepts of bond formation and chemical equilibrium are discussed. Issues such as sustainability, energy and fuels, and the creation of new materials are also discussed. It is recommended that students with a limited background in chemistry take CHEM 150 prior to CHEM 120.

CHEM 150
Concepts in Chemistry
15 Points
The fundamentals of chemistry are explored with a view to enhancing understanding of the chemical nature of the world around us and providing a foundation for further study in chemistry. Special attention is paid to familiarisation with the language of chemistry and the chemist’s perspective of the properties of matter and its transformations. It is recommended that students with a limited background in chemistry take this course prior to CHEM 110 or CHEM 120. Restriction: May not be taken with or after any other Chemistry course.

Stage II

CHEM 210
Physical and Materials Chemistry
15 Points
Physical chemistry is essential for developing and interpreting the modern techniques used to investigate the structure and properties of matter. Materials chemistry is an increasingly important subject aimed at producing new or improved materials for a variety of practical applications. Covers topics involving the application of physical chemistry to the study of modern materials: polymer chemistry, electrochemistry and energy storage, and the electrical properties of solids. An understanding of basic maths at the level covered in MAT110 102 will be assumed.
Prerequisite: Either CHEM 110 and 120, or B– in CHEM 110 or 120.

CHEM 220
Inorganic Compounds: Structure, Bonding and Reactivity
15 Points
Modern inorganic chemistry encompasses the study of compounds with a broad diversity of reactivities, structures and bonding types. Often these have widespread relevance for many other areas of science and technology. Fundamental concepts in atomic and molecular structure will be provided to give a foundation for examples drawn from coordination, bioinorganic, organometallic and main group chemistry. The associated laboratories provide complementary experience in synthesis and measurement of physical properties for selected inorganic compounds.
Prerequisite: Either CHEM 110 and 120, or B– in CHEM 110 or 120.

CHEM 230
Molecules for Life: Synthesis and Reactivity
15 Points
Students will build on their repertoire of fundamental reaction types that have previously been encountered with the introduction of new reactions and their application to more complex molecules of biological and medicinal importance. The laboratory course is an integral component of the course that emphasises...
preparative chemistry and the use of modern spectroscopic methods for structure determination. Prerequisite: Either CHEM 110 and CHEM 120, or B– in CHEM 110 or 120.

**CHEM 240** 15 Points
**Measurement and Analysis in Chemistry and Health Sciences**
An introduction to the physico-chemical principles and techniques underlying a wide range of modern analytical methods used in chemistry and the biomedical sciences. Topics include chromatographic methods for the separation of complex mixtures, the application of modern electrochemical and spectroscopic techniques to analytical problems, and methods for assessing the reliability of results. Experiments illustrating these principles are an integral part of this course. Prerequisite: Either CHEM 110 and CHEM 120, or B– in CHEM 110 or 120. An understanding of basic mathematics at the level covered in MATHS 102 will also be assumed.

**CHEM 243** 15 Points
**Physicochemical Principles for Pharmacy**
Topics of physical chemistry and chemical measurement relevant to the bioscience and health science student. Atomic theory, molecular bonding and structure, the behaviour of gases and other phases of matter, essential thermodynamics, electrochemistry, reactions at surfaces, and basic assay and chromatography principles. Associated laboratories focus upon reinforcing underlying principles through practical exercises using materials and concepts pertinent to the bioscience and health science experience. Prerequisite: CHEM 110 and a minimum of 90 points passed. Restriction: CHEM 210, 240

**CHEM 270** 15 Points
**Environmental Chemical Processes**
An introduction to the chemistry of the natural environment, including biogeochemical cycling of elements and chemical processes operating in the lithosphere, hydrosphere, atmosphere and biosphere. The objective is to develop a good understanding of how the natural environment works. The laboratory programme includes analytical methods and concepts central to environmental chemistry. No formal prerequisite, but knowledge of aspects of chemistry and laboratory practice at the level covered in CHEM 110 and 120 will be assumed.

**Stage III**

**CHEM 310** 15 Points
**Structural Chemistry and Spectroscopy**
Molecular structure is fundamental to the understanding of modern chemistry. Molecular spectroscopy provides an important method for probing the structure of molecules, and the following aspects of this subject will be presented: molecular energies and molecular spectra, molecular symmetry and spectroscopy, surface spectroscopy and the structure and chemistry of surfaces. Prerequisite: CHEM 210

**CHEM 320** 15 Points
**Design and Reactivity of Inorganic Compounds**
A selection of the most recent developments in contemporary inorganic chemistry will be covered. These will include ligand design and reactivity in coordination chemistry, macrocyclic chemistry, redox chemistry, photochemistry, construction of devices, organometallic chemistry, catalysis, and main group rings, chains, clusters and polymers. The laboratories provide complementary experience in synthesis and measurement of physical properties for selected inorganic compounds. Prerequisite: CHEM 220

**CHEM 330** 15 Points
**Contemporary Organic Chemistry**
Topics in advanced organic chemistry, including the synthesis, reactions and uses of compounds containing phosphorus, selenium, boron and silicon. Organotransition metal chemistry. Asymmetric synthesis. Heterocyclic chemistry and pericyclic reactions. Laboratories emphasise synthetic and structural methods. Prerequisite: CHEM 230

**CHEM 340** 15 Points
**Advanced Analytical Chemistry**
Principles and applications of modern instrumental analytical chemistry. Statistical methods, quality control and assurance, sampling, instrumentation, chromatographic and other separation methods, spectrophotometric methods, electro-analytical methods. Prerequisite: CHEM 240

**CHEM 350** 15 Points
**CHEM 350A** 7.5 Points
**CHEM 350B** 7.5 Points
**Topics in Chemistry**
Topics in modern chemistry. Students will select three of the modules offered, details of which are available in the School of Chemical Sciences Undergraduate Handbook. Prerequisite: 30 points at Stage II Chemistry. To complete this course students must enrol in CHEM 350 A and B, or CHEM 350

**CHEM 370** 15 Points
**Environmental Chemistry**
Anthropogenic chemicals in the environment and their influence on environmental systems and processes, including the chemistry of waste water, marine pollutants, pesticides, CFC’s, geothermal effluents and ozone. No formal prerequisite, but knowledge of appropriate material at the level covered in CHEM 270 will be assumed.

**CHEM 380** 15 Points
**Materials Chemistry**
Synthesis, properties characterisation and applications of advanced materials. Includes a review of current trends in materials research. Important aspects of solid inorganic materials and organic polymers are covered. Prerequisite: CHEM 210

**CHEM 390** 15 Points
**Medicinal Chemistry**
Nature of cellular targets for drug action – lipids, proteins, enzymes, DNA. Principles of molecular recognition. Enzymes and receptors as targets for drug action. DNA as a target for drug action. An overview of approaches to drug discovery and development. Structure-activity relationships, stereochemistry and drug action, prodrugs, drug solubilisation and delivery, drug metabolism and antibiotic resistance. Laboratories focus on the synthesis, computer modelling and biological testing of drugs. Prerequisite: CHEM 110 and a minimum of 165 points passed
CHEM 392 Issues in Drug Design and Development 15 Points
Intellectual property and patent law in the pharmaceutical industry. An overview of the legal and regulatory framework for drug design and development. Clinical trials: formulation of a drug; phase I, phase II and phase III protocols. An introduction to the principles involved in the Codes of Good Manufacturing Practice and Good Laboratory Practice (quality control and quality assurance procedures) as applied to the manufacture of drug products and the quantification of drugs and metabolites in biological fluids. Examples of drug development. Case studies of selected drugs from design to release.
Prerequisite: Minimum of 165 points passed

Diploma Courses

CHEM 690A 15 Points
CHEM 690B 15 Points
Graduate Diploma Dissertation (Chemistry)
To complete this course students must enrol in CHEM 690 A and B

CHEM 691 30 Points
CHEM 691A 15 Points
CHEM 691B 15 Points
PG Diploma Dissertation (Chemistry)
Restriction: CHEM 790
To complete this course students must enrol in CHEM 691 A and B, or CHEM 691

Postgraduate 700 Level Courses

CHEM 701 15 Points
PG Topics in Chemistry 1
A directed reading and individual study course to prepare students in the methodologies in a selected sub-discipline of chemistry.

CHEM 702 15 Points
PG Topics in Chemistry 2
A directed reading and individual study course to prepare students in the methodologies in a selected sub-discipline of chemistry.

CHEM 710 15 Points
Structural and Computational Chemistry
Quantum mechanics, and the calculation of molecular structure at the fundamental level. Statistical thermodynamics: the relationship between molecular structure and bulk properties of matter. The quantum mechanics of magnetic resonance: theory and applications of nuclear magnetic resonance (NMR) and electron paramagnetic resonance (EPR) spectroscopy in structural chemistry.
No formal prerequisite, but knowledge of physical chemistry at the level covered in CHEM 310 and of basic calculus will be assumed.

CHEM 720 15 Points
Advanced Inorganic Chemistry
The topics covered are chosen from areas of current research in inorganic chemistry, and will include functional supramolecular devices, organometallic and inorganometallic chemistry, and main group element multiple bonding.
No formal prerequisite, but knowledge of inorganic chemistry at the level covered in CHEM 320 will be assumed.

CHEM 730 15 Points
Modern Methods for the Synthesis of Bioactive Molecules
The use of modern methods for the construction of complex molecules with an emphasis on carbon-carbon bond formation and control of stereochemistry. Principles and practice of synthesis design based on retrosynthetic analysis. Each student will present and discuss a recent synthesis of a complex bioactive organic compound.
No formal prerequisite, but knowledge of organic chemistry at the level covered in CHEM 330 will be assumed.

CHEM 735 15 Points
Advanced Medicinal Chemistry
A selection of topics dealing with aspects of medicinal chemistry, including anticancer agents, metals in medicine, antibacterial and antiviral chemotherapy, contemporary topics in medicinal and/or bio-organic chemistry.

CHEM 738 15 Points
Biomolecular Chemistry
Discusses how techniques including NMR spectroscopy, calorimetry, neutron scattering and computational modelling, can characterise the molecular structure, dynamics, and interactions of biological macromolecules. The principles of each technique will be presented and complemented with examples of where these methods have made major advances in understanding important biochemical processes. Accessible to students with a background in chemistry, biology, bioengineering, or physics.

CHEM 740 15 Points
Current Topics in Analytical Chemistry
Principles and applications of modern analytical chemistry. Emphasis will be on the solution of problems met by analytical chemists, including a study of the development of instrumentation, and a study of current trends in analytical research.
No formal prerequisite, but knowledge of analytical chemistry at the level covered in CHEM 340 will be assumed.

CHEM 750 15 Points
Advanced Topics in Chemistry 1
CHEM 750A 7.5 Points
CHEM 750B 7.5 Points
Advanced Topics in Chemistry 1
To complete this course students must enrol in CHEM 750 A and B, or CHEM 750

CHEM 751 15 Points
CHEM 751A 7.5 Points
CHEM 751B 7.5 Points
Advanced Topics in Chemistry 2
A modular course comprising topics in physical, inorganic, organic and analytical chemistry related to departmental research interests, which will vary from year to year. Students satisfactorily completing three modules will be awarded CHEM 750. Students satisfactorily completing an additional three modules will be awarded CHEM 751.
To complete this course students must enrol in CHEM 751 A and B, or CHEM 751

CHEM 755 15 Points
Special Topics in Chemistry 1

CHEM 770 15 Points
Advanced Environmental Chemistry
Selected current research topics in environmental chemistry. Topics change from year to year, but
may include: chemical impacts of geothermal energy development or mining on the environment, trace metal fingerprinting, naturally occurring metal-adsorbents such as iron oxides, the behaviour of persistent organic contaminants, the chemistry of drinking water treatment and the chemical theory behind the design of environmental monitoring instruments. Includes a half-day field trip.

CHEM 780 15 Points
Advanced Materials Chemistry
A selection of topics on the chemistry of advanced materials, including novel polymeric materials and materials characterisation and analysis. No formal prerequisite, but knowledge of materials chemistry at the level covered in CHEM 380 will be assumed.

CHEM 793 60 Points
CHEM 793A 30 Points
CHEM 793B 30 Points
BSc(Hons) Dissertation in Chemistry
To complete this course students must enrol in CHEM 793 A and B, or CHEM 793

CHEM 795 15 Points
Research Methods in Chemistry
A review of the literature and research methods associated with a selected chemistry research topic and an outline of the proposed research and its significance. Students will also be required to present an overview of the proposal in a seminar.

CHEM 796A 60 Points
CHEM 796B 60 Points
MSc Thesis in Chemistry
To complete this course students must enrol in CHEM 796 A and B

Clinical Exercise Physiology
For the list of courses please refer to the Bachelor of Science Schedule. Prescriptions are listed under their respective subject codes.

Computer Science

Stage I

COMPSCI 101 15 Points
Principles of Programming
An introduction to computers and computer programming in a high-level language. The role of computers and computer professionals in society is also introduced. The course is intended for students who may wish to advance in Computer Science or in Information Systems and Operations Management.

COMPSCI 105 15 Points
Principles of Computer Science
Extends the programming skills of COMPSCI 101, covering more advanced data structures and their representation and manipulation. Topics include: pointers, dynamic data structures (lists, queues, stacks, trees, hashtables), recursion, sorting and searching. Prerequisite: COMPSCI 101

COMPSCI 111 15 Points
COMPSCI 111G
Mastering Cyberspace: An Introduction to Practical Computing
A practical introduction to computing. Topics include: web design, an overview of computer hardware and operating systems, effective use of common applications, using the internet as a communication medium, applying programming concepts, and social implications of technology.

Stage II

COMPSCI 210 15 Points
Computer Systems 1
The low level representation of data and algorithms in the computer. An introduction to computer organisation. The instruction execution model. Assembly language programming. Study of a high-level language and how it is implemented at the machine level. Assembly and disassembly of instructions. Prerequisite: COMPSCI 101 and 105

COMPSCI 215 15 Points
Computer Systems 2
Interacting with the operating system via a command line interface and use of a scripting language. Hardware support necessary to implement a secure multi-user operating system: user/kernel mode, exceptions and interrupts, virtual memory, context switching, synchronisation, interrupt driven input/output. An introduction to data communications: the OSI reference model, particularly how the lower layers combine to implement sockets. Recommended preparation: Prior or concurrent enrolment in COMPSCI 210
Prerequisite: COMPSCI 101, 105

COMPSCI 220 15 Points
Algorithms and Data Structures

COMPSCI 225 15 Points
Discrete Structures in Mathematics and Computer Science
An introduction to logic, principles of counting, mathematical induction, recursion, relations and functions, graphs and trees, and algorithms. This course is suited to students who are interested in the foundations of computer science, mathematics and logic. Prerequisites: 15 points from MATHS 108, 150, 153, COMPSCI 101, PHIL 101
Restriction: MATHS 255

COMPSCI 230 15 Points
Software Construction
Students will develop a software application of reasonable complexity through the application of established software development techniques. In doing so, students will demonstrate fundamental skills in object-oriented software development, GUI programming and application-level multithreading. In addition, students will learn established techniques to ensure that their software satisfies quality criteria. Prerequisite: COMPSCI 101, 105
COMPSCI 280
Enterprise Software Development
Develop a distributed application using an Enterprise technology. Demonstrate skills in data modelling, manipulating and querying; and accessing a remote database server. Model system requirements and design using established notations, to leverage a component-based Enterprise technology, and to use tools to support their activities. Collaborative work experience through pair programming. Prerequisite: COMPSCI 215, 230
Restriction: SOFTENG 370

COMPSCI 345
Human-computer Interaction
Human behaviour and humans’ expectations of computers. Computer interfaces and the interaction between humans and computers. The significance of the user interface, interface design and user centred design process in software development. Interface usability evaluation methodologies and practice. Includes a group development and evaluation project using current implementation techniques and tools. Prerequisite: COMPSCI 230 or SOFTENG 206
Restriction: COMPSCI 370, SOFTENG 350

COMPSCI 350
Mathematical Foundations of Computer Science
The aim of this course is to present mathematical models for programming languages and computation, and derive some theorems regarding what can and cannot be computed. Abstract programming languages (finite automata, context-free grammars, Turing and register machines) are studied. Basic concepts for programming languages, limits on computational power and algorithmic complexity are presented. Church-Turing thesis and quantum computing are briefly and critically discussed. Prerequisite: COMPSCI 225 and (COMPSCI 220 or PHIL 222)

COMPSCI 351
Fundamentals of Database Systems
Database principles. Relational model, Relational Algebra, Relational Calculus, SQL, and Programming Languages. Entity-Relationship Model, Normalisation, Query Processing and Query Optimisation, ACID Transactions, Transaction Isolation Levels, Database Recovery. Database Security, Databases and XML. Prerequisite: COMPSCI 220, 225
Restriction: SOFTENG 351

COMPSCI 357
Artificial Intelligence
The cornerstones of AI: representation, utilisation, and acquisition of knowledge. Taking a real world problem and representing it in a computer so that the computer can do inference. Using this knowledge and acquiring new knowledge is done by search which is the main technique behind planning and machine learning. Prerequisite: COMPSCI 220, 225
Restriction: COMPSCI 365, 366

COMPSCI 366
Computational Science
Principles of computational science. Computational science is the development and application of computer algorithms and software to solve scientific and engineering problems including probabilistic computer modelling, computer-based statistical inference and computer simulation. Focus is on the analysis of real-world data with emphasis on Computational Biology and Computational Engineering. Prerequisite: COMPSCI 220 and 15 points from STATS 101–125

COMPSCI 373
Computer Graphics and Image Processing
Basic geometric processes including transformations; location, migration and replication transparency. Real-time requirements. History of operating systems. Prerequisite: COMPSCI 215, 230
Restriction: SOFTENG 370

Stage III

COMPSCI 313
Computer Organisation
Modern processor architectures. Principles of modern processor design; pipelining; memory hierarchies; I/O and network interfacing; compiler and OS support; embedded processors; performance; multiprocessing. Prerequisite: COMPSCI 210, 215 (PHYSICS 140 or 243)
Restriction: SOFTENG 363, COMPSCI 304

COMPSCI 314
Modern Data Communications
The structure of data communications and networks, including the internet, covering all levels of the communications architecture. The layered protocol model, data transmission and coding, link-level and local area network protocols, wide-area internetworking, routing, transport and security protocols. Basic application protocols as the foundation for distributed computing. Prerequisite: COMPSCI 210 and (COMPSCI 215 or INFOSYS 224)
Restriction: SOFTENG 364

COMPSCI 320
Applied Algorithmics
Fundamental design techniques used for efficient algorithmic problem-solving and software development. Methods that yield algorithms that are both provably correct and efficient. Efficiency of algorithms to provide a basis for deciding which algorithm is best for the job. Limits on the power of computers and the theory of NP-completeness. An introduction to methods whose correctness or performance is not guaranteed. Prerequisite: COMPSCI 220, 225

COMPSCI 335
Distributed Objects, Services, and Programming
Programming introduction to distributed services and to browser based applications. Introduction to functional programming for data integration. Specific topics will include simple distributed applications, using message-based, declarative or functional programming methods. Concepts of programming with XML, SOAP and HTTP based mechanisms, and programming for dynamic web content generation. Prerequisite: COMPSCI 230 and 15 points at Stage II in Computer Science

COMPSCI 340
Operating Systems

**Prerequisite:** COMPSCI 210, 230
**Restriction:** COMPSCI 372, 375

**COMPSCI 380** 15 Points
**COMPSCI 380A** 7.5 Points
**COMPSCI 380B** 7.5 Points

**Undergraduate Project in Computer Science**
Each student taking one of these courses will be expected to do an individual practical project under the supervision of a member of staff. Only students with excellent academic records will be allowed to take these courses, and only after a supervisor and topic have been agreed upon by the Head of Department.

**Prerequisite:** Approval of Head of Department
**Restriction:** COMPSCI 690

To complete this course students must enrol in COMPSCI 380 A and B, or COMPSCI 380

**COMPSCI 390** 15 Points
**Special Topic in Computer Science 1**

**COMPSCI 391** 15 Points
**Special Topic in Computer Science 2**

**COMPSCI 392** 15 Points
**Special Topic in Computer Science 3**

**COMPSCI 393** 15 Points
**Special Topic in Computer Science 4**

**Diploma Courses**

**COMPSCI 601** 15 Points
**Special Topic**
**Prerequisite:** Permission of the Head of Department

**COMPSCI 602** 15 Points
**Special Topic**
**Prerequisite:** Permission of the Head of Department

**COMPSCI 690A** 15 Points
**COMPSCI 690B** 15 Points

**Graduate Diploma Dissertation (Computer Science)**
**Restriction:** COMPSCI 380

To complete this course students must enrol in COMPSCI 690 A and B

**COMPSCI 691A** 15 Points
**COMPSCI 691B** 15 Points

**PG Diploma Dissertation (Computer Science)**
**Restriction:** COMPSCI 780

To complete this course students must enrol in COMPSCI 691 A and B

**Postgraduate 700 Level Courses**

**COMPSCI 703** 15 Points
**Advanced Topic in Computer Science 3**
**Prerequisite:** Departmental approval

**COMPSCI 704** 15 Points
**Advanced Topic in Computer Science 4**
**Prerequisite:** Departmental approval

**COMPSCI 705** 15 Points
**Advanced Topics in Human Computer Interaction**
Human aspects of computer systems, relevant to commercial solution development and computer science research. Sample topics: support of pen-based interaction on a range of devices such as digital whiteboards, tablet PCs and PDAs; technical infrastructure for pen-based interaction; trends with domain specific user interface design, such as interfaces for enterprise systems.

**Recommended preparation:** COMPSCI 345 or SOFTENG 350
**Prerequisite:** Departmental approval
**Restriction:** SOFTENG 702

**COMPSCI 706** 15 Points
**Advanced Topic in Computer Science 6**
**Prerequisite:** Departmental approval

**COMPSCI 707** 15 Points
**Advanced Topic in Computer Science 7**
**Prerequisite:** Departmental approval

**COMPSCI 709** 15 Points
**Advanced Topic in Computer Science 8**
**Prerequisite:** Departmental approval

**COMPSCI 710** 15 Points
**Advanced Topic in Computer Science 10**
**Prerequisite:** Departmental approval

**COMPSCI 711** 15 Points
**Parallel and Distributed Computing**
Computer architectures and languages for exploring parallelism, conceptual models of parallelism, principles for programming in a parallel environment, different models to achieve interprocess communication, concurrency control, distributed algorithms and fault tolerance.

**Recommended preparation:** COMPSCI 335
**Prerequisite:** Departmental approval

**COMPSCI 715** 15 Points
**Advanced Computer Graphics**
An advanced look at current research issues in computer graphics. Typical topics include: ray-tracing acceleration methods; radiosity; subdivision surfaces; physically-based modelling; animation; image-based lighting and rendering; non-photorealistic rendering; advanced texturing. The precise content may vary from year to year. Consult the department for details.

**Recommended preparation:** COMPSCI 373 or equivalent, and 15 points at Stage II in Mathematics
**Prerequisite:** Departmental approval

**COMPSCI 720** 15 Points
**Advanced Design and Analysis of Algorithms**
Selected advanced topics in design and analysis of algorithms, such as: combinatorial enumeration algorithms; advanced graph algorithms; analytic and probabilistic methods in the analysis of algorithms; randomised algorithms; methods for attacking NP-hard problems.

**Recommended preparation:** COMPSCI 320
**Prerequisite:** Departmental approval
COMPSCI 725 15 Points
System Security
Prerequisite: Departmental approval

COMPSCI 732 15 Points
Software Tools and Techniques
An advanced course examining research issues related to tools and techniques for software design and development. Typical topics include: techniques for data mapping and data integration, software architectures for developing software tools, issues in advanced database systems. The precise content may vary from year to year. Consult the department for details. Recommended preparation: COMPSCI 335
Prerequisite: Departmental approval

COMPSCI 734 15 Points
Web, Mobile and Enterprise Computing
Examines advanced and emerging software architectures at the confluence of XML, web services, distributed systems, and databases. Includes advanced topics in areas such as: mobile computing, remote computing, web services for enterprise integration, workflow orchestrations for the enterprise, peer-to-peer computing, grid computing. Recommended preparation: COMPSCI 335
Prerequisite: Departmental approval

COMPSCI 742 15 Points
Advanced Internet: Global Data Communications
The protocols and performance of local area networks. The special requirements of very high speed networks (100 Mb/s and higher). Asynchronous transfer mode (ATM) and its relation to other protocols. The TCP/IP suite. Recommended preparation: COMPSCI 314
Prerequisite: Departmental approval

COMPSCI 750 15 Points
Computational Complexity
Definitions of computational models and complexity classes: time complexity (e.g., P and NP), space complexity (e.g., L and PSPACE), circuit and parallel complexity (NC), polynomial-time hierarchy (PH), interactive complexity (IP), probabilistic complexity (BPP), and fixed-parameter complexity. Recommended preparation: COMPSCI 320 or 350
Prerequisite: Departmental approval

COMPSCI 751 15 Points
Advanced Topics in Database Systems
Database principles. Relational model, relational algebra, relational calculus, SQL. SQL and programming languages, entity-relationship model, normalisation, query processing and query optimisation, ACID transactions, transaction isolation levels, database recovery, database security, databases and XML. Research frontiers in database systems. Recommended preparation: COMPSCI 220, 225
Prerequisite: Departmental approval
Restiction: COMPSCI 351, SOFTENG 351

COMPSCI 752 15 Points
Semantic Web Technologies
The Semantic Web is a major extension of the current Web. It aims to give information well-defined meaning, better enabling data to be shared, automatically reasoned with, and reused via machine-readable applications. This course will research Semantic Web technologies and their applications. Topics include: Semantic Web Vision, Semantic Annotations and Retrieval. Repositories for the Semantic Web, Querying the Semantic Web, Knowledge Representation and Reasoning on the Semantic Web, and Semantic Web Applications including eScience, eBusiness, eHealth, and eGovernment. Recommended preparation: COMPSCI 351 or equivalent

COMPSCI 753 15 Points
Uncertainty in Data
Modern applications such as data cleaning, data integration, financial risk assessment, information extraction, scientific databases, and sensor deployments generate large volumes of uncertain data. This course investigates approaches to modelling, managing and processing uncertain data. It covers the state-of-the-art in representation formalisms and querying techniques for databases where the value of some attributes, or the presence of some records, are uncertain. Concepts and methods are discussed to repair inconsistent databases, but also to extract semantically meaningful information from inconsistent databases. Principled methods are investigated that improve the quality of data in databases. Recommended preparation: COMPSCI 351 or equivalent

COMPSCI 760 15 Points
Datamining and Machine Learning
An overview of the learning problem and the view of learning by search. Techniques for learning such as: decision tree learning, rule learning, exhaustive learning, Bayesian learning, genetic algorithms, reinforcement learning, neural networks, explanation-based learning and inductive logic programming. Experimental methods necessary for understanding machine learning research. Recommended preparation: COMPSCI 367
Prerequisite: Departmental approval

COMPSCI 761 15 Points
Advanced Topics in Artificial Intelligence
The cornerstones of AI: representation, utilisation, and acquisition of knowledge. Taking a real world problem and representing it in a computer so that the computer can do inference. Utilising this knowledge and acquiring new knowledge is done by search which is the main technique behind planning and machine learning. Research frontiers in artificial intelligence. Recommended preparation: COMPSCI 220, 225
Prerequisite: Departmental approval
Restiction: COMPSCI 365, 366, 367

COMPSCI 767 15 Points
Intelligent Software Agents
An introduction to the design, implementation and use of intelligent software agents (e.g., knowbots, softbots etc). Reviews standard artificial intelligence problem-
solving paradigms (eg, planning and expert systems) and knowledge representation formalisms (eg, logic and semantic nets). Surveys agent architectures and multi-agent frameworks.

**Recommended preparation:** COMPSCI 367

**Prerequisite:** Departmental approval

**COMPSCI 771** 15 Points

**Advanced Topics in Computer Graphics and Image Processing**

Basic geometric processes including transformations; viewing and projection; back projection and ray tracing. Graphics modelling concepts: primitives, surfaces, and scene graphs, lighting and shading, texture mapping, and curve and surface design. Graphics and image processing fundamentals: image definition and representation, perception and control models, grey level and colour enhancement, neighbourhood operations and filtering. Use of the OpenGL graphics pipeline. Research frontiers in computer graphics and image processing.

**Recommended preparation:** COMPSCI 210, 230

**Prerequisite:** Departmental approval

**Restriction:** COMPSCI 372, 373, 375

**COMPSCI 773** 15 Points

**Intelligent Vision Systems**

Computational methods and techniques for computer vision are applied to real-world problems such as 2/3D face biometrics, autonomous navigation, and vision-guided robotics based on 3D scene description. A particular feature of the course work is the emphasis on complete system design.

**Recommended preparation:** COMPSCI 373 and 15 points at Stage II in Mathematics

**Prerequisite:** Departmental approval

**COMPSCI 775** 15 Points

**Advanced Multimedia Imaging**

Camera calibration, image sequence analysis, computer vision, 3D visualisation, ground truth for image sequence analysis, performance evaluation (noise, accuracy). Applications in vision-based driver assistance, panoramic or 3D visualisation using recorded images, or image and video retrieval.

**Recommended preparation:** COMPSCI 373 and MATHS 208 or 250

**Prerequisite:** Departmental approval

**COMPSCI 777** 15 Points

**Computer Games Technology**

An advanced course looking at some of the computer graphics and artificial intelligence technology involved in computer games. Typical topics are: an introduction to the gaming industry; commercial modelling and animation software; maximising graphics performance, including such techniques as visibility preprocessing, multiple levels of detail, space subdivision, fast collision detection, direct programming of the graphics card; AI for computer games, including decision trees, rule-based systems, path planning, flocking behaviours, intelligent agents; research issues, such as physically-based modelling, terrain generation, computer learning.

**Recommended preparation:** COMPSCI 367, 373

**Prerequisite:** Departmental approval

**COMPSCI 780** 15 Points

**COMPSCI 780A** 7.5 Points

**COMPSCI 780B** 7.5 Points

**Postgraduate Project in Computer Science 1**

**Prerequisite:** Departmental approval

**Restriction:** COMPSCI 691

To complete this course students must enrol in COMPSCI 780 A and B, or COMPSCI 780

**COMPSCI 789A** 15 Points

**COMPSCI 789B** 15 Points

**BSc(Hons) Dissertation**

**Prerequisite:** Approval of Head of Department

To complete this course students must enrol in COMPSCI 789 A and B

**COMPSCI 790** 15 Points

**History of Computing and Computers**

A survey of the historical context of modern computing and information technology. History of computing and computing devices prior to the computer age. Developments in computing since the introduction of electronic computers. Significant software developments and applications of computers.

**Recommended preparation:** 60 points from Stage III Computer Science courses

**Prerequisite:** Departmental approval

**COMPSCI 791** 30 Points

**COMPSCI 791A** 15 Points

**COMPSCI 791B** 15 Points

**MProfStuds Dissertation**

To complete this course students must enrol in COMPSCI 791 A and B

**COMPSCI 796A** 60 Points

**COMPSCI 796B** 60 Points

**MSc Thesis in Computer Science**

To complete this course students must enrol in COMPSCI 796 A and B

**Ecology**

For the list of courses please refer to the Bachelor of Science Schedule. Prescriptions are listed under their respective subject codes.

**Environmental Management**

**Postgraduate 700 Level Courses**

**ENVMGT 741** 15 Points

**Social Change for Sustainability**

How social change happens and how to improve the uptake of sustainability. Covers the theoretical frameworks that contribute to our understanding of how social change occurs, and their use in the development of sustainability programmes. Includes the methodologies used to gain insight into attitudes, behaviour and values, and their use as a basis for decision-making in environmental management.

**ENVMGT 742** 15 Points

**Ecosystem Complexity and Adaptive Management**

A review of the evolution in governance and knowledge systems for addressing environmental uncertainty. Learning objectives emphasise the socio-ecological complexity and scientific dilemmas in the determination of performance standards,
the management of environmental risk and the assessment of ecosystem services and their capacities.

**ENVMGT 743 15 Points**

**Environmental Policy**

Debates surrounding environmental policy and governance provide insights into the complexities of environmental management issues. Examples of environmental governance will be considered at global and local scales. The roles of international agencies, nation-states, civil society and corporations in shaping environmental policy and governance are examined.

**ENVMGT 744 15 Points**

**Resource Management**

A review of advanced principles, concepts and approaches to the sustainable management of natural resources. Case studies emphasise the need for conflict resolution, equitable allocation, and decentralised decision-making to address the social and environmental impacts of resource utilisation.

*Restriction: GEOG 751*

**ENVMGT 746 15 Points**

**Collaborative Environmental Management**

An exploration of participatory management and its potential for engaging communities, resource users and stakeholders in the pursuit of sustainable development. Students will examine strategies for incorporating local knowledge within conservation practices and for reconciling natural resource management with human welfare, social justice and indigenous rights.

*Restriction: GEOG 753, ENVSCI 735*

**ENVMGT 747 15 Points**

**Current Issues in Sustainability**

A topical review of approaches to sustainability as applied within a particular industry or sector. Consult the postgraduate handbook (Environmental Management) for information about this year’s topic.

*Restriction: ENVMGT 745*

**ENVMGT 796A 60 Points**

**ENVMGT 796B 60 Points**

**MSc Thesis in Environmental Management**

To complete this course students must enrol in ENVMGT 796 A and B

---

**Environmental Science**

**Stage I**

**ENVSCE 101 15 Points**

**Environment, Science and Management**

Explores the science behind key environmental issues to recognise the role environmental science plays in understanding the interaction between humans and the environment. The complexity of environmental problems and the difficult task of integrating science, knowledge and values are discussed.

**Stage II**

**ENVSCE 201 15 Points**

**Sustaining our Environment**

An examination of current environmental issues with an emphasis on urban systems and effects associated with everyday activities. Tools and techniques to assess and monitor the state of the environment are identified and discussed, as are sustainable options for mitigation of adverse effects.

*Prerequisite: At least 45 points at Stage I*

**Stage III**

**ENVSCE 301 15 Points**

**Environmental Effects and Management**

Effective management of the environmental effects of human activities depends upon a sound basis of environmental science. The effects of industrial production and resource usage are used to illustrate the requirements humans place on the environment.

A key theme is the use of tools, derived through environmental research, to effect sustainable management of the environment whilst satisfying human needs. The examples used relate to issues of local, national and international significance. Includes tutorials and a field trip.

*Prerequisite: ENVSCE 201 or equivalent*

**ENVSCE 310 15 Points**

**Modelling Environmental Systems**

An introduction to how models are used in the study and management of environmental systems in a range of environmental contexts and systems (eg, ecological, fluvial, atmospheric, coastal). Developing skills in designing, communicating and critically assessing models of the environment.

*Prerequisite: GEOG 250 or BIOSCI 209, or equivalent*

**ENVSCE 311 15 Points**

**Dynamics of Terrestrial Ecosystems**

A consideration of advanced material on the spatio-temporal controls on distribution and abundance of organisms at landscape level, ecosystem-level processes, and their restoration. These themes will be placed in the context of the use of developing ecological understanding to reconstruct the past and inform the management and restoration of contemporary ecological systems.

*Prerequisite: GEOG 101 or ENVSCE 101 or BIOSCI 104, or equivalent and 45 points at Stage II*

*Restriction: BIOSCI 393*

---

**Postgraduate 700 Level Courses**

**ENVSCE 701 15 Points**

**Research Practice in Earth, Environmental and Geographical Sciences**

Students will consider multiple ways of knowing and understanding research in a broader context and in relation to disciplinary specific examples. Students will be challenged to critically analyse ways of understanding and thinking and use this knowledge to: assemble and represent information, perform analyses and predict outcomes, validate or critique the process, and communicate or question findings.

**ENVSCE 702 15 Points**

**Special Topic in Environmental Science**

A course of study prescribed by the Head of the School, in the absence of an appropriate formal course being available.

**ENVSCE 703 15 Points**

**Research Topics in Environmental Science**

A course of study prescribed by the Head of the School, in the absence of an appropriate formal course being available.

*Prerequisite: Approval of the Programme Coordinator*
ENVSCL 704  
Modelling of Environmental and Social Systems
The following themes are emphasised: (i) building and using models to investigate environmental and social problems, (ii) understanding the utility of modelling in various disciplines, and (iii) appreciating how dynamic phenomena can be represented and analysed computationally. The course provides an understanding of modelling concepts, approaches and applications, and methods for determining the suitability of a particular modelling approach for a given task.
No formal requirement, but an understanding of the material in BIOSCI 209, ENVSCI 310, GEOG 250, MATHS 108 and STATS 101 will be assumed.

ENVSCL 711  
Assessing Environmental Effects
A focus on the interdisciplinary, scientific assessment of environmental activities within the New Zealand context. Methodologies used in the assessment, monitoring and regulation of environmental effects, trends and risks will be critically assessed. Aspects of the RMA, including consenting procedures and the role of public and professional participants in the process, will be discussed.

ENVSCL 713  
Air Quality and Atmospheric Processes
Monitoring, modelling and management will be considered with emphasis on air quality standards and guidelines and applications of science and technology to indoor and outdoor air pollution prevention, mitigation and remediation. Case studies and practical work will link the theoretical and practical aspects of air quality science.

ENVSCL 714  
Water Quality Science
Water contaminants, monitoring techniques and modelling systems for impact prediction and assessment of effects for both point and non-point sources. Application of science and technology to water pollution prevention, mitigation and remediation. Case studies and practical work (laboratory and field methods).

ENVSCL 716  
Aquatic Ecological Assessment
Application of science to freshwater ecological assessment, management and restoration. Assessment techniques and interpretation of risks associated with natural and anthropogenic disturbance of aquatic ecosystems. Monitoring and reporting of condition and health of aquatic environments. Relevant policy, strategic and legislative frameworks, and national and regional perspectives on applied freshwater management. Course includes case studies and practical work (incl. field trip).
No formal prerequisite but an understanding equivalent to BIOSCI 330 is assumed.

ENVSCL 733  
Biodiversity Management and Conservation
Emphasis will be on current issues associated with the ecological aspects of biodiversity management and conservation in terrestrial habitats. Topics include: biodiversity and ecosystem services, management of species and ecosystems, issues in plant conservation, precaution and adaptation in conservation, pest control in mainland islands, carbon storage and biodiversity. The course will also address national and international mechanisms for the sustainable management of natural resources.
Prerequisite: BIOSCI 394 or other Stage III course in Environmental Science, or equivalent

ENVSCL 734  
Landscape and Restoration Ecology
The integration of ecological principles and ecological services at the landscape level for both management and restoration. Topics include: the ecology of fragmented ecosystems such as demography, metapopulation issues, ecological genetics, biota-physical environment interactions, the consequences and techniques for restoration of damaged ecosystems and mitigation of the effects of development. Emphasis will be on sustainable solutions including biophysical, legal, social, cultural and economic considerations.
Prerequisite: ENVSCI 311 or other Stage III course in ecology or equivalent

ENVSCL 737  
Applied Terrestrial Ecology
The dynamics of change in terrestrial ecosystems with a focus on forest and wetland environments. The effects of factors such as climate change and fire in New Zealand’s terrestrial ecosystems will be considered. Students will be introduced to modern methods for vegetation assessment and monitoring, including multivariate statistical methods. Students are required to participate in a residential field course as this is a major component of ENVSCL 737.
No formal prerequisite but a knowledge of ecology equivalent to BIOSCI 394 or BIOSCI 396 and data analysis equivalent to GEOG 250 or BIOSCI 209 is assumed.

ENVSCL 738  
Water and Society
The effects of modern lifestyles on water resources are explored to develop ideas for sustainable infrastructure in future settlements. The importance of human behaviour in water system function is examined, along with the mechanisms used to influence those behaviours.

ENVSCI 796A  
ENVSCI 796B  
MSc Thesis in Environmental Science
To complete this course students must enrol in ENVSCI 796 A and B

Food Science

Stage II

FOODSCI 201  
Foundations of Food Science
The aim of this course is to give the student a general appreciation of the composition and structure of food. Material covered includes the molecular structure of the major food components and how they are altered by processing and preservation. Common foods will be studied in order to understand the complex relationships between food molecules and the physical structure of foods. Topical issues such as genetically modified foods and antioxidants will be included.
Prerequisite: At least 30 points from BIOSCI 101, 102, 106, 107, CHEM 110, 120, MEDSCI 142, PHYSICS 160, PSYCH 109

### Course Prescriptions

**FOODSCI 301 Food Quality Attributes**
Attributes that make food attractive, such as colour, flavour, and texture, and how they alter during processing are studied. Texture measurement and methods of studying food structure will be discussed. Lectures will be given on non-destructive testing of food.

**Recommended preparation:** BIOSCI 203 and 204  
**Prerequisite:** FOODSCI 201

**FOODSCI 302 Food Preservation**
The fundamental principles of freezing and thawing, thermal processing and canning, fermentation and dehydration are studied. Consideration is also given to emerging technologies, with an eye to methods of most interest to New Zealand food industries. An overview of the major causes of food degradation, from microbiological to chemical, is presented. Methods of shelf-life testing are introduced with an emphasis on the maintenance of the nutritive value, safety of the food product and appeal to the consumer.

**Recommended preparation:** FOODSCI 301, BIOSCI 204, CHEMMAT 211  
**Prerequisite:** FOODSCI 201

**FOODSCI 303 Sensory Science**
Human perception and preference of food products. Design of experiments, statistical methodologies and applications in industry and research. Sampling of foods is undertaken in this course.

**Prerequisite:** STATS 101 and FOODSCI 201  
**Corequisite:** FOODSCI 301 or Permission of the Programme Director/Course Coordinator

**FOODSCI 304 Food Product Development**
Development and evaluation of new products from raw ingredients through a thorough understanding of the physical and chemical properties of materials. Sensory evaluation will be a component. Sampling of food products is therefore undertaken in this course.

**Prerequisite:** FOODSCI 301 and 303  
**Corequisite:** FOODSCI 302 or Permission of the Programme Director/Course Coordinator

**FOODSCI 705 Project in Food Science**
Prerequisite: Permission of Programme Director  
**Restriction:** FOODSCI 691

**FOODSCI 706 Food Safety**
An understanding of the changing regulations that apply to the New Zealand food industry is of paramount importance. Pathogen awareness and control from an industry perspective are examined. HACCP and risk management plans will be generated.  
**Prerequisite:** Permission of Programme Director

**FOODSCI 707 Food Science**
Chemical, biological and physical aspects of foods. The decomposition of food due to lipid oxidation. Integrated study of selected basic foods.  
**Prerequisite:** Permission of Programme Director

**FOODSCI 708 Advanced Food Science**

**Prerequisite:** Permission of Programme Director

**FOODSCI 709 Advanced Food Science**
Modules will be organised by the staff and invited lecturers. Topics offered will usually be based on the specialist interests of the lecturers, although controversial issues may be included (for example, genetically modified food, irradiated food). Students may be required to participate actively by contributing seminars. Topics may vary from year to year.  
**To complete this course students must enrol in FOODSCI 709 A and B, or FOODSCI 709

**FOODSCI 710 Industrial Internship**
The industrial internship is an opportunity for students to experience the food industry at first hand. While the placement would normally be in New Zealand, overseas internships are possible. The student will work in the food organisation on a defined project under the supervision of a suitably qualified person. A detailed written report on the assignment must be submitted.

**FOODSCI 711 The Science of Food Contaminants and Their Control**
Examines the biology and biochemistry of human pathogens, their interactions with humans at the cellular level via the food chain, their epidemiology and control mechanisms. Also examines the chemical and physical food contaminants, their etiology and ways to prevent contamination of food.

**FOODSCI 712 Food Safety Management**
An overview of the management of Food Safety from farmgate to fork, and the development of food
safety planning and risk management including HACCP plans, their verification, validation, and implementation, traceability, and recall mechanisms.

**FOODSCI 713 15 Points**
Food Legislation
An overview of Australian and New Zealand food regulations and also related food regulations of some of our major trading partners, how they operate and are controlled. Models of food control plans, food labeling legislation, enforcement of food laws and the structures which govern these will also be examined.

**FOODSCI 714 15 Points**
Research Methodology in Food Safety
Methodologies consistent with human health research to identify and critically appraise relevant research, and to use appropriate methodologies to design research projects and collect, report and analyze data.

**FOODSCI 715 15 Points**
Food Allergens and Intolerants
An understanding of the epidemiology, management, regulation and classification of food allergens and intolerants in accordance with Food Standard 1.2.3 (Australia New Zealand Food Standards Code). This includes the study of foods or food groups with the major food allergens as identified in the Food Allergen Labeling and Consumer Protection Act (FALCPA), and application to new product development and labeling.

**FOODSCI 716 15 Points**
Current Issues in Food Safety
Current issues in Food Safety will be selected from time to time depending on the interest of the students and availability of experts to teach such course. Topics will focus on the science of issues of processing, contamination, packaging, storage and handling.

**FOODSCI 717 15 Points**
Food Processing and Sanitation
The science of some of the basic processing methods of food and packaging. The course will also cover properties of solid foods and their surface characteristics and the chemistry of detergents and sanitisers as well as factors affecting their effectiveness.

**FOODSCI 778 60 Points**
**FOODSCI 788A 30 Points**
**FOODSCI 788B 30 Points**
BSc(Hons) Dissertation in Food Science
A research proposal will be prepared on the dissertation topic. Students will be required to present an overview of the proposal in a seminar. Students will participate in the critical analysis of scientific papers. The student will carry out an original piece of research. The results will be presented and discussed in a dissertation. A seminar on the research will be given.
Restriction: FOODSCI 789
To complete this course students must enrol in FOODSCI 788 A and B, or FOODSCI 788

**FOODSCI 796A 60 Points**
**FOODSCI 796B 60 Points**
MSc Thesis in Food Science
Prerequisite: Permission of Programme Director
To complete this course student must enrol in FOODSCI 796 A and B

**FOODSCI 797 45 Points**

### Forensic Science

**Postgraduate 700 Level Courses**

**FORENSIC 701 15 Points**
Fundamental Concepts in Forensic Science
Ethics and quality assurance in forensic science. Principles of criminal law, principles of evidence and procedure, expert evidence, interpretation of scientific evidence, probability and statistics. Forensic pathology, psychology and psychiatry.
Prerequisite: Permission of Programme Director

**FORENSIC 702 15 Points**
Introduction to Forensic Science
Forensic biology, documents, fingerprints, physical evidence, toolmarks, fire examination, explosives, hairs and fibres, drugs, toxicology, alcohol (including blood and breath alcohol), crime scene examination, firearms identification.
Prerequisite: Permission of Programme Director

**FORENSIC 703 15 Points**
Statistics and Molecular Biology for Forensic Science
Statistics: data summarisation and reduction, laws of probability, conditional probability, likelihood ratios and Bayes theorem. Interpretation of statistical results. Forensic biology: basic principles of population genetics, genomic structure, conventional blood grouping. DNA profiling: structure, enzymology and basic chemistry of nucleic acids, PCR and microsatellites, interpretation of DNA profiles, developing forensic DNA technologies.
Prerequisite: Permission of Programme Director

**FORENSIC 704 15 Points**
Techniques and Applications for Forensic Science
Analytical techniques: GC, HPLC, GC-MS chromatography, IR and UV spectroscopy. Applications: toxicology, illicit drugs, sports drugs, racing chemistry. Physical and trace evidence.
Prerequisite: Permission of Programme Director

**FORENSIC 705 15 Points**
Environmental Forensic Science
Concepts of environmental science. Environmental monitoring and spill analysis, environmental legislation, criminal and environmental law. Case studies and practical work.
Prerequisite: Permission of Programme Director

**FORENSIC 706 15 Points**
Environmental Forensic Science

**FORENSIC 707 30 Points**
**FORENSIC 707A 15 Points**
**FORENSIC 707B 15 Points**
Project in Forensic Science
A research essay on an aspect of forensic science.
Prerequisite: Permission of Programme Director
Restriction: FORENSIC 705
To complete this course students must enrol in FORENSIC 707 A and B, or FORENSIC 707

**FORENSIC 796A 60 Points**
**FORENSIC 796B 60 Points**
MSc Thesis in Forensic Science
Prerequisite: Permission of Programme Director
To complete this course student must enrol in FORENSIC 796 A and B
Note: The Forensic Science MSc thesis research courses are mounted with the assistance of the Institute of Environmental Science and Research Ltd (ESR) and ESR facilities and databases will be used for some research. As ESR facilities and databases are relied on in Court proceedings, appropriate steps must be taken to ensure...
the integrity of ESR’s analyses. This means students wishing to use ESR laboratory facilities as part of the MSc programme will be subject to the same type of access requirements as ESR employees. This includes a security clearance (essentially a check of any convictions recorded against you) and a drug test prior to being given access to ESR resources. Students will normally be required to provide a DNA sample to ensure that any allegations of cross-contamination of a DNA sample can be properly investigated. The DNA profile will be retained by ESR. All other information will be returned to the students at the completion of their studies. Students who would like further details of these conditions should contact the Programme Director.

Geography

Foundation Courses

GEOG 91F 15 Points
Foundation Geography 1
Introduces population and development themes, including global and regional patterns of population growth, overpopulation, migration, urbanisation, city planning issues, uneven patterns of economic growth and human well-being, and sustainable development. 
Restriction: GEOG 91W

GEOG 92F 15 Points
Foundation Geography 2
Focuses on the relationship between humans and the environment, emphasising long-term trends in resource use, human impacts in the environment, sustainable resource management and environmental hazards. 
Restriction: GEOG 92W

Preparatory Courses

GEOG 91P 15 Points
Preparatory Geography 1
Introduces population and development themes, including global and regional patterns of population growth, overpopulation, migration, urbanisation, city planning issues, uneven patterns of economic growth and human well-being, and sustainable development. 
Restriction: GEOG 91F, 91W

Stage I

GEOG 101 15 Points
Earth Surface Processes and Landforms
Understanding of the functioning of natural systems at the Earth’s surface and human interactions with these systems. Examines the operation and interaction between Atmospheric, Hydrological, Ecological and Geomorphic systems. Environmental processes are an integrating theme. Topics include: climate and hydrological systems; ecological processes; surface sediment cycle; and processes governing development and dynamics of major landform types. 
Restriction: GEOG 151

GEOG 102 15 Points
Geography of the Human Environment
Examines the relationships among personal geographies and global geographies of uneven development, economic, environmental and socio-cultural change. Using a variety of examples from New Zealand and the world we illustrate the connection between local places and global issues. 
Restriction: GEOG 152

GEOG 103 15 Points
GEOG 103G 15 Points
Digital Worlds
Introduction to space-modifying technologies such as GIS, transport and communications, and their historical significance. Practical exposure to current digital technologies through laboratories, testing and web interaction and an introduction to the social impact of the technologies through media such as cyberspace, cellular phones and location based systems. Critical perspectives on new technologies and space, and the representation of such technologies in popular and academic writing.

GEOG 104 15 Points
GEOG 104G 15 Points
Cities and Urbanism
What makes a great city? This course explores ‘urbanism’ in both historical and contemporary cities to determine the essence of urbanity and the way that citizens (and visitors) experience city life. The dynamics and character of cities are considered in terms of their built environment, economic systems, population, human and cultural diversity and planning policies and practices.

GEOG 105 15 Points
GEOG 105G 15 Points
Natural Hazards in New Zealand
New Zealanders are exposed to extreme natural events and processes including earthquakes, volcanic eruptions, weather bombs, storm surge, tsunami, flooding and erosion. The physical context for each hazard is provided, drawing on the disciplines of geology, geomorphology and climatology. The frequency and magnitude of natural hazards for New Zealand are considered using different sources. Impacts on modern society are discussed using case studies and scenario modelling. 
Restriction: GEOLOGY 110

Stage II

Note: Students majoring in Geography should note the regulations for the Geography major; in particular, they must complete GEOG 250.

GEOG 202 15 Points
Geography of Social and Economic Change
A critical examination of geographic processes and consequences in contemporary society. Topics are selected from the instructors’ research interests, which include: the transformation of urban places and spaces; the forms and location of industries and retailing; social geographies of the city; New Zealand’s linkages with the global economy and society; urban historical geographies; and demographic and social changes in New Zealand and the Pacific region. The course is developed around the core themes of production, consumption and identity as important focuses for the examination of society. 
Restriction: GEOG 252

GEOG 205 15 Points
Environmental Processes and Management
Provides a foundation for understanding the complex mix of human and physical factors that must be considered by those involved in environmental management. Key concepts are introduced, and a
various topics from the following themes: biodiversity and vegetation change; land transformation; heritage values; environmental management; Māori resource management; coastal and fluvial geomorphology; regional economics; community development and planning; tourism development; and government policy. The course involves a one week field trip.

GEOG 207 Field Studies in Environment and Community
Connections between environment and community in New Zealand are explored on the ground through consideration of topics from the following themes: biodiversity and vegetation change; land transformation; heritage values; environmental management; Māori resource management; coastal and fluvial geomorphology; regional economics; community development and planning; tourism development; and government policy. The course involves a one week field trip.

GEOG 209 Introduction to GIS and Spatial Thinking
An introduction to the conceptual base of Geographic Information Science, the practical use of geo-spatial data and various societal issues related to the use of Remote Sensing and Geographic Information Systems. The course exercises cover a range of applications of GIS for analysis and display of spatial data, focusing on non-programmable solutions.

GEOG 210 Geographical Research in Practice
A critical exploration of the research experience in geography. Case studies and field work demonstrate approaches to understanding the complex interactions of social and environmental processes. Students will develop practical skills in problem identification, research methodologies, ethics and analytical practices.

GEOG 211 Field Studies in Earth Surface Processes
Introduction to laboratory, field methods and analytical techniques to interpret the dynamics of Earth surface processes. Specific topics include: geomorphic mapping; landform observation and topographic survey; soil and sedimentary analyses and sampling; stratigraphic analysis; measurement of climatic, hydrological and coastal processes; and techniques for ecological measurement and monitoring.

GEOG 212 Climate and Hydrology
Examines the interface between climate and hydrology. Investigates: (i) regional-scale atmospheric processes responsible for local precipitation and evaporation; (ii) near-surface hydrological processes that transform precipitation and evaporation into hydrological resources and hazards, and; (iii) the role of climate as a driver of hydrological change and variability. The focus is on mid-latitude climates and on understanding the fundamental role of climate in determining New Zealand’s hydrological environment.

GEOG 213 Geomorphology and Landscape Development
Explores key theoretical concepts in contemporary geomorphology and ecology including: morphodynamics; systems thinking; equilibrium; determinism and stochasticity; emergence and contingency; and chaos and predictability. These concepts are examined in the context of the temporal and spatial controls on geomorphic development using terrestrial, fluvial and coastal landforms as case studies. Examines these concepts in the setting of understanding the biotic and abiotic controls of ecosystem processes and the spatial and temporal distribution of organisms at landscape levels drawing on case studies from a range of terrestrial ecosystem types. Prerequisite: GEOG 101

GEOG 214 Tools and Techniques for the Earth Sciences
Exploring and understanding the complexities of Earth systems requires Earth Scientists to engage with a range of techniques and tools. Introduces students to contemporary approaches for managing, analysing and interpreting Earth science data. Introduces students in the context of research and applied problems to commonly used computational platforms. Emphasises the use of these platforms to explore and analyse quantitative information.

Stage III
Note: Students majoring in Geography should note the regulations for the Geography major; in particular, they must complete one of GEOG 315, 330.

GEOG 315 Regions, Industries and Enterprises
Examines economic, social and political processes underpinning recent transformations in the global economy. Debates concerning the transition from Fordism to post-Fordism and flexible accumulation are examined in conjunction with an analysis of the role of firms, industries, nation-states and supra-national organisations in changing the character of regions.

GEOG 316 Population, Health and Society
A survey of major themes in population, health and social geography. An examination of the dynamics of population complements analyses of health and healthcare, the education sector, the welfare state, and the changing character of urban places.

GEOG 317 Urban Geography
Analysis of key processes shaping socio-cultural geographies of contemporary cities. Using international and local examples, issues such as the economy of cities, the culture of cities, home and housing, segregation and polarisation, the imaging of cities and sustainability are explored.

GEOG 318 Geographies of Pacific Development
Examines development processes and issues in the countries of the Pacific. Themes will include development theory, colonialism, environment, population, economic systems, migration, gender, ethnicity and identity, geopolitics and international linkages, and development strategies.

GEOG 319 Advanced Analytical Methods in Geography
An introduction to multivariate statistical methods and their application to model building and systems analysis.
GEOG 315  
Research Design and Methods in Human Geography  
A lecture, practical and field course, the focus of which is a residential field section during the mid-semester study break. The course provides students with experience in designing and executing a research project. It is designed both to prepare students for the increasing number of jobs that require these research skills and as an introduction to research for those progressing to higher degrees. Prerequisite: GEOG 250 and either GEOG 202 or 205 plus at least one of GEOG 302, 305, 307, 312, 320, 322, 325, or equivalent

GEOG 317  
Remote Sensing and GIS for Physical Environments  
Further develops key concepts of geographic information science in earth and environmental sciences including physical geography. Covers techniques for describing the physical environment, ways of analysing and visualising the environment, particularly raster-based surface models, and spatial analysis of surface models. Also develops concepts and theories of remote sensing from space, aerial photography, and image analysis, emphasising the proper use of remotely sensed material. Prerequisite: GEOG 210 or equivalent

GEOG 318  
GIS for Human Environments  
Further develops key concepts of geographic information science as applied to human activity including retailing, population and health, crime analysis, tourism, consumer behaviour, and planning. Covers techniques for describing human artefacts and activities, ways of analysing and visualising activity in space, spatial analysis of census data, consumption, individual accessibility and activities in time, monitoring devices including remote imagery, locational technology, and privacy. Prerequisite: GEOG 210 or equivalent

Restriction: GEOG 208

GEOG 319  
GIS Project  
This course builds on materials in GEOG 317 and/or GEOG 318 by providing an opportunity for students to pursue a topic of choice through an individual project. Project topics are developed by students in conjunction with the instructors, and input and ideas from other courses is encouraged. Prerequisite: GEOG 318 or equivalent

GEOG 320  
Resources and Environmental Management  
Examines the development and conservation of the environment in its use as a resource base, with particular reference to the way in which institutional structures in society determine provision and allocation. Attention is balanced between international experience and the policy framework in New Zealand. The course provides an understanding of key concepts, practices and methods.

GEOG 322  
Culture and Environment in East Asia  
This course takes a topical and regional approach to the geography of East Asia. The unity and diversity of East Asia, environment and cultural development, industrialisation and urbanisation, population problems and environmental management are emphasised.
GEOG 351
Dynamics of Coastal Systems
Examination of material on processes in coastal and marine environments that shape coastal landforms. Topics include: wave, tide and current processes and sediment fluxes controlling short-term coastal change; styles and rates of morphological change of different landforms; sea level and sediment supply controls on evolution of landforms; coastal management issues in New Zealand.
Prerequisite: 45 points at Stage II, 15 points from GEOG 201, 260–263, or equivalent

GEOG 352
Landscapes, Environment and Heritage
The historical and cultural processes of environmental transformation, landscape and heritage making and representation are examined. Attention is directed to theories of and approaches to landscape and environment including Māori ideas of human–environment relations. The course explores how ideas about environment and landscape shape places.

GEOG 360
Climate Processes
An introduction to the climate system and the processes that determine global balances. The structure and circulation of the atmosphere and ocean will be presented and the ways in which they interact to create climate variability will be discussed. Material will also include techniques used to measure and model the climate system.
Prerequisite: 45 points at Stage II, including GEOG 201 or 15 points from GEOG 260–263, or equivalent

GEOG 361
Earth Hazards
An exploration of the causative mechanisms of a variety of geological and meteorological hazards. Tools for assessing, monitoring and mitigating hazards are investigated. Case studies are used to identify the potential impacts on society.
Prerequisite: 45 points at Stage II or above

GEOG 362
Environmental Hydrology
An exploration of the physical science underpinning hydrology. Hydrological pathways are used to examine rainfall-runoff with links made to water quality and eco-hydrology. There is a particular focus on the hydrological impact of urban development and attempts to understand and implement water sensitive cities.
Prerequisite: 15 points from GEOG 101, ENVSCI 101: 15 points from GEOG 201, 250, 261 or 331

Postgraduate 700 Level Courses
GEOG 711
15 Points
Emerging Economic Spaces
Examines globalising economic processes, localising forces, and the practices of economic actors in the production of emerging economic spaces. The course considers contemporary analytical and conceptual debates, including global value chains, geographic imaginaries, new economies, and diverse economies. Restriction: GEOG 724

GEOG 712
Land, Place and Culture
Contemporary geographic perspectives on society and culture, focusing on a review of traditional and new cultural geographic approaches to the constructions of place and environment, ethnicity, gender and identity. No formal prerequisite, but an understanding of material in Stage III courses in human geography will be assumed.

GEOG 714
Population, Mobilities and Health
An exploration of the changing nature of human populations, the dynamics of human mobilities, the determinants of health status and evolving modes of healthcare provision. No formal prerequisite, but an understanding of material in Stage III courses in human geography will be assumed. Restriction: GEOG 725, 726

GEOG 715
Development and New Regional Geographies
‘Development’ is place-dependent and takes place at a range of scales. This course considers economic, socio-cultural, geopolitical and environmental transformations of nations, regions, communities, and emerging or post-foundational political spaces focussing on examples from Pacific, Asia and New Zealand.
Restriction: GEOG 721

GEOG 717
Contemporary Issues in Human Geography
A critical review of selected issues and debates in contemporary human geography.

GEOG 732
Quaternary Environmental Change
The use and interpretation of the output of a range of paleoclimate reconstruction tools including dendroclimatology, palynology and environmental isotopes with a focus on New Zealand archives of past environments. The dating tools used to constrain and help explain the timing of the events interpreted from the paleoclimate data will also be considered.

GEOG 738
Future Food and Biological Economies
Investigates contemporary understandings, issues and strategies relating to the development of biological economies and food networks in the context of the globalising food economy. Addresses transformations in agro-food complexes and questions of nature–society relationships to do with ‘sustainable’ and ‘resilient’ food production and consumption.

GEOG 739
Research Topics in Geography
Directed research on an approved topic or topics.
Prerequisite: Approval of the Programme Coordinator

GEOG 745
Hydrogeomorphology and River Restoration
Catchment-scale perspectives are used to analyse spatial and temporal variability in river forms and processes. River responses to human disturbance are placed in a longer-term evolutionary context. Prospective ‘river futures’ are appraised, linking principles from geomorphology and hydrology to provide a physical platform with which to
frame management applications (especially river rehabilitation options).

No formal prerequisite but final year undergraduate experience in a related field required.

**GEOG 746**  
Dynamic Coasts  
An advanced study of the driving mechanisms and associated processes that shape coastlines. Uses and explores the morphodynamic concept as an integrating theme. Lecture topics examine wave hydrodynamics; surfzone circulation; fluid-sediment interactions and larger scale morphodynamics. Using sandy beach systems as the starting point, the dynamics of other coastal settings (e.g., gravel beaches, estuaries, coral reefs) are considered to examine approaches to model coastal behaviour.

No formal prerequisite but an understanding equivalent to GEOG 351 will be assumed.

**GEOG 748**  
Fragile Coasts, Vulnerable Communities  
Coastal communities are commonly perceived to be threatened by coastal change. Evaluate management responses. Case studies: highlight any geographic variation in local-scale vulnerability; critically evaluating methods that assess physical and social vulnerability; and demonstrating the importance of understanding these factors in coastal management decision-making.

No formal prerequisite but an understanding equivalent to GEOG 332 will be assumed.

**GEOG 749**  
Climate and Society  
An examination of inter-relationships between climate and society. The sensitivity of selected biophysical and human activity systems to climate will be investigated and the actual and potential impacts of climatic variability and change investigated. Impact themes will vary from year to year, but are likely to be drawn from hydrology and water resources, agriculture, human health, ecosystems, and energy.

No formal prerequisite but an understanding equivalent to GEOG 332 will be assumed.

**GEOG 759**  
Research Topics in Geography  
Directed research on an approved topic or topics.  
Prerequisite: Approval of the Programme Coordinator

**GEOG 760**  
Special Topic in Geography

**GEOG 771**  
Spatial Analysis and Geocomputation  
Approaches and challenges to analysing spatial data. Specific techniques covered will include measures of spatial autocorrelation, geographical regression, point pattern analysis, interpolation, overlay analysis, and an introduction to some of the newer geocomputation methods such as neural networks and cellular automata. Students will conduct a significant analysis task as part of this course.

No formal prerequisite but an understanding equivalent to GEOG 318 will be assumed.

**GEOG 772**  
Sensing Technology and Data Analysis  
Acquisition of airborne imagery, very high resolution satellite imagery, ground penetrating radar data, and LiDAR data. Geospatial data referencing, geometric and thematic accuracy of geospatial data, image classification and accuracy assessment, multitemporal data analysis, integrated processing of images using GPS and GIS data.

No formal prerequisite but an understanding equivalent to GEOG 317 will be assumed.

**GEOG 773**  
Visualisation and Cartography  
Introduction to field of cartography, drawing contrasts with new approaches to geovisualisation facilitated by information visualisation and statistical graphics. Human perceptual and cognitive systems as related to visual displays. Principles of sound perceptual and cognitive map design. Planning, creation and delivery of cartographic and visualisation-based projects. Review of emerging and future trends in this fast-changing field.

No formal prerequisite but 15 points from GEOG 317–319 or equivalent will be assumed.

**Geology**

**Stage I**

**GEOLOGY 103**  
Dynamic Earth  
Examination of geologic processes that have shaped Earth and life through time, and their impact on modern society. Topics include: earthquakes, plate tectonics, volcanic eruptions, tsunamis, landslides, meteorites and planets, mass extinctions and evolution of life. A practical introduction to rocks, minerals and fossils provides insights into Earth’s past and important modern resources.

Restriction: GEOLOGY 101, 102

**Stage II**

**GEOLOGY 201**  
15 Points

**Introductory Geological Skills and Methods**  
Introduction to field geological practice to build up a 3D picture of the geothermal history of a local field area. Includes: evaluation of structure and stratigraphy in the field, identification of fossils and their use as mapping aids, relationships between geomorphology and underlying geology, and keeping a systematic record of field observations, and culminates with independent mapping projects.

Prerequisite: 15 points from GEOLOGY 103 or 104
GEOL 202  
**Evolution of Earth and Life**  
15 Points  
Explores the evolution of the Earth from its molten beginnings to the dynamic planet we live on today. Topics include: stratigraphy (litho-, bio-, cyclo-, magneto-); evolution; paleoecology; Precambrian Earth (formation, first continents and beginnings of life); development of the Earth and life through the Phanerozoic Eon.  
Prerequisite: 15 points from GEOL 103 or 104

GEOL 203  
**Rock Genesis**  
15 Points  
An examination of the origin and evolution of igneous, sedimentary and metamorphic rocks by focussing on formative processes in the Earth’s interior and surface. Material covered includes: controls on the mineralogy and chemistry of magmas; sedimentary processes and controls; biogenic sediments; and metamorphic facies. Silicate and carbonate minerals will be introduced and used to develop petrographic microscopy skills. The course includes fieldwork.  
Prerequisite: GEOL 103

GEOL 204  
**Earth Structure**  
15 Points  
A foundation course in structural geology introduces students to descriptive and analytical methods for working with deformed rock. On completion of this course a student will be able to describe brittle and ductile structures, undertake simple analyses of stress and strain, and appreciate the role that structural geology plays in the applied and fundamental geological sciences, including engineering geology, geophysics, mineral and energy exploration, hydrogeology, and tectonophysics. Students enrolling in this course are encouraged to complement it with courses in any of mathematics, physics and/or geomechanics.  
Prerequisite: 15 points from GEOL 103 or 104

GEOL 205  
**Earth Deformation**  
15 Points  
An exploration of the causes and effects of vertical and horizontal motions of the Earth’s lithosphere, synthesising information from all fields of the geosciences. Students taking this course are exposed to seminal literature covering various tools and methods used for deciphering deformation at divergent and convergent plate margins. On completion of this course a student will have a strong foundation in tectonophysics, including seismotectonic hazards, and experience in critical evaluation of the scientific literature.  
Prerequisite: GEOL 203

GEOL 206G  
**New Zealand: Half a Billion Years on the Edge**  
15 Points  
Take a 500 million year journey through time following the geologic and biologic development of New Zealand from humble beginnings on the edge of the ancient supercontinent Gondwana to the present day geologically dynamic land mass beset by volcanic eruptions, earthquakes and massive erosion as a consequence of being located on the edge of the Earth’s largest tectonic plate.  
Prerequisite: Any 75 points

**Stage III**

GEOL 301  
**Advanced Geological Skills and Methods**  
15 Points  
Focuses on advanced field skills, work flows and interpretations needed to decipher increasingly complex geological terrains. Examination of a range of sedimentary and igneous units in stratigraphically and structurally complex locations. Critically examine outcrops and develop complex 3D models of tectono-stratigraphic evolution. Field exercises culminate in an individual mapping exercise and synthesis of the basin history.  
Prerequisite: GEOL 201 and 30 points from GEOL 202–204

GEOL 302  
**Hydrogeology**  
15 Points  
An examination of the physical aspects of hydrogeology including Darcy’s Law, Potentiometric surface maps, flow nets, groundwater flow modelling, and the determination of aquifer properties from pumping tests and slug tests. Geochemical and contaminant transport will also be covered.  
Prerequisite: GEOL 201, 203

GEOL 303  
**Sedimentary Paleoenvironments**  
15 Points  
Advanced course that critically examines an array of ancient sedimentary environments from the geologic record. Reconstruction of sedimentary paleoenvironments utilises a multi-proxy approach, incorporating facies analysis, taxonomy, paleoecology, taphonomy, geostatistics and sequence stratigraphy. Palaeontological and sedimentological case studies are examined and integrated exercises used to interpret complex 3D and 4D dynamic environmental models.  
Prerequisite: An understanding equivalent to GEOL 202 or 203 is desirable

GEOL 304  
**Volcanology, Petrology and Geochemistry**  
15 Points  
The generation and modification of magmas based on mineralogical, chemical and isotopic systems. The processes of physical volcanology including eruptions styles and deposits. The practical course involves an integrated field and laboratory project on rocks from a volcanic terrain, and introduces the use of geochemical models for magma evolution and tectonic settings. Geochemical systems in a range of environments are investigated.  
Prerequisite: GEOL 203

GEOL 305  
**Exploration Geophysics**  
15 Points  
Overview on seismic methods, an introduction to gravity, electric, magnetic, electromagnetic, and radar applications. The course will provide a comprehensive introduction to seismogenic methods, an introduction to gravity, electric, magnetic, electromagnetic, and radar techniques, and a short overview on other methods. Applications include hydrocarbon exploration, mineral exploration, studies of the shallow sub-surface and the deep Earth.  
Prerequisite: GEOL 201–204, PHYSICS 230, 231. Understanding of basic Maths covered in MATHS 102 and basic Geology covered in GEOL 103 is assumed

GEOL 361  
**Exploration Geophysics**  
15 Points  
Introduction to geophysical methods and their applications. The course will provide a comprehensive overview on seismic methods, an introduction to gravity, electric, magnetic, electromagnetic, and radar techniques, and a short overview on other methods. Applications include hydrocarbon exploration, mineral exploration, studies of the shallow sub-surface and the deep Earth.  
Prerequisite: 15 points from GEOL 201–204, PHYSICS 230, 231. Understanding of basic Maths covered in MATHS 102 and basic Geology covered in GEOL 103 is assumed

GEOL 372  
**Engineering Geology**  
15 Points  
An integration of quantitative and qualitative concepts in geology as applied to engineering projects. Fundamentals of soil and rock mechanics will be introduced. Topics covered in the course include landslides, dewatering schemes, contaminant transport, foundations, mines (open-pit and underground), dams, tunnels, urban geology, and...
transportation infrastructures. Case studies are used in lectures to demonstrate the importance of geology and water to engineering projects. Fieldwork is required.

Prerequisite: Either CIVIL 220 or GEOLOGY 201

GEOLOGY 382 15 Points

Postgraduate 700 Level Courses

GEOLOGY 701 15 Points
Engineering Geological Mapping
A field-based course which provides hands-on experience in outcrop mapping, geomorphic mapping, and simple field testing of rocks and soils for geotechnical purposes.
Prerequisite: GEOLOGY 372

GEOLOGY 703 15 Points
Geothermal Geology
Geothermal systems are dynamic and of vital significance to national energy requirements. The course overviews the geologic, hydrologic, and geochemical features of geothermal systems with emphasis on those occurring in New Zealand. Topics include the geologic setting of geothermal fields, exploration, heat and mass transfer, fluid compositions and boiling and mixing, geology of reservoirs, fluid/mineral equilibria, alteration, and reservoir geothermometry.

GEOLOGY 704 15 Points
Special Topic

GEOLOGY 705 15 Points
Geohazards
Introduction to contemporary methods used to identify and assess natural hazards, techniques used for the probabilistic forecasting, spatial representation and communication of hazards. How the relationship between hazard information, risk mitigation and emergency management is addressed. There will be a strong focus on the use of case studies.

GEOLOGY 706 30 Points
Special Topic

GEOLOGY 707 30 Points
Research Topics in Geology
Admission to research project by approval of Programme Coordinator.

GEOLOGY 713 15 Points
Tectonic Geomorphology
New Zealand is an ideal location in which to investigate the interplay between tectonics and geomorphic processes. This will be demonstrated by combining relevant case studies and field practise whereby students will develop skills in report writing and handling of some of the data. Literature and tools necessary to conduct field research in active tectonics and landform generation.
Prerequisite: GEOG 743, GEOLOGY 712, 773

GEOLOGY 714 15 Points
Earthquake Geology
Understanding why, how and where earthquakes occur from identification of their source parameters to consideration of their effects (ground shaking, fault rupture and crustal stress changes). Topics include seismic style, earthquake size and source parameters, recurrence interval, conditions for failure, and earthquakes as agents for crustal fluid redistribution.
Prerequisite: GEOLOGY 712

GEOLOGY 721 15 Points
Past Life and Ancient Environments
Paleontological data are used in hydrocarbon exploration, resource assessment, sequence stratigraphy, sedimentary basin analysis, dating/correlation of rocks, and evaluation of global biodiversity, paleobiogeography, and life’s evolution. This course examines fossils as research tools to decipher past biology, events and environments (Archean to Quaternary in age).

GEOLOGY 741 15 Points
Mineral Deposit Geochemistry
Advanced teaching in geochemistry that relates to mineral deposits, and examines case histories of ore deposits, to allow critical assessment of recent advances in research that underpins understanding of ore deposits.
Prerequisite: GEOLOGY 302
Restriction: GEOLOGY 742

GEOLOGY 752 15 Points
Understanding Volcanic Systems
Understanding how and why volcanoes erupt from magma processes in mantle to eruption at the surface. All tectonic settings and explosive and effusive processes are examined. Volcanic hazards and resource exploration in volcanic terrain is also covered.
Restriction: GEOLOGY 751

GEOLOGY 754 15 Points
Pure and Applied Sedimentology
An integrated account of aspects of advanced sedimentology from sediment source to sink. Critical examination of recent and ongoing, pure and applied research into the dynamics of sedimentary environments and their recognition in the ancient record.
No formal prerequisite, but knowledge of sedimentology and sedimentary processes at the level covered in GEOLOGY 202 or GEOG 201 will be assumed.

GEOLOGY 771 15 Points
Analysis Techniques in Engineering Geology
Application of analysis techniques routinely used in engineering geology. Topics covered in this course include slope stability, rock fall assessment, landslide runout, groundwater seepage, and stresses around underground openings. Attendance is required to two half-day fieldtrips.
Prerequisite: GEOLOGY 372 or equivalent

For further information please refer to the note on page 380.

Geophysics

Stage III

GEOPHYS 330 15 Points
Physics of the Earth
Discussion of the physics of the solid earth includes: the gravitational field, the rotation and figure of the earth, seismology and the internal structure of the earth, the earth's internal heat, the geomagnetic field, paleomagnetism and geodynamics. The applied geophysics section covers the theoretical basis of geophysical exploration techniques, including seismic methods.

No formal prerequisite, but it will be assumed that students have passed either (PHYSICS 213, 230 or 231, and 15 points in Geology) or (GEOLOGY 361, MATHS 108 or 150, and 15 points in Physics)

GEOPHYS 331 15 Points
Physics of the Atmosphere and Ocean
The application of fluid dynamics to the motion of the atmosphere and oceans. Marine topics include: ocean structure, oceanic circulation, underwater acoustics, tides and waves. Atmospheric topics include: boundary layer meteorology and the microphysics of clouds and precipitation. A weekend field trip is a component of the course.

Prerequisite: PHYSICS 230 or 231, and one of PHYSICS 211, MATHS 253, ENGSCI 211. PHYSICS 213 is recommended preparation

Information Technology

For the list of courses please refer to the Bachelor of Technology Schedule. Prescriptions are listed under their respective subject codes.
Marine Science

Stage II

MARINE 202 15 Points
Principles of Marine Science
An introduction to the physical and biological structure of the oceans, sea floor, coastlines and the biological communities that inhabit them. Subject matter includes an overview of the nature and scope of marine science globally and within the New Zealand and Auckland contexts. A wide coverage of marine science issues are presented with an emphasis on multidisciplinary examples.

No formal prerequisite, although an understanding of Stage I level science is assumed.

Stage III

MARINE 302 15 Points
Dynamics of Marine Systems
Fundamental processes in the marine environment with an emphasis on interdisciplinary linkages in the functioning of marine ecosystems. Topics include: the role of fluid dynamics in the lives of marine animals and in shaping the physical marine environment, and interdisciplinary studies of marine ecosystems.

No formal prerequisite although an understanding of marine science to the level of MARINE 202 will be assumed.

Postgraduate 700 Level Courses

MARINE 701 15 Points
Current Issues in Marine Science
A seminar-based examination of selected current issues in Marine Science. Seminars will be jointly run using a web link between the Universities of Auckland, Otago and Victoria. The topics and material will recognise the wide range of undergraduate experience across participants and emphasise the value of cross-disciplinary approaches to Marine Science.

MARINE 702 15 Points
Field Techniques in Marine Science
An advanced course in the development of practical skills in research design, implementation and analysis in Marine Science. Students participate in two field units: a compulsory field unit at The University of Auckland and a choice of either the unit offered by the University of Otago or the unit offered by Victoria University of Wellington. Each course focuses on different themes in Marine Science.

MARINE 703 15 Points
Marine Protected Areas
A review of current science related to MPA, including biogeo graphical and ecological principles in the design of marine reserve networks. MPA as controls in ecosystem research, conservation of biological diversity, interaction with fisheries, and case studies and experiences involving guest lecturers. Practicals may include visits to Goat Island marine reserve and other locations, and analysis and interpretation of data related to MPA.

Mathematics

Foundation Courses

MATHS 91F 15 Points
Foundation Mathematics 1
This first mathematics course for students enrolled in the Tertiary Foundation Certificate programme aims to promote an understanding of number skills, including an introduction to algebra. Students will learn how to use simple technology and develop their problem solving abilities.

Restriction: MATHS 91W

MATHS 92F 15 Points
Foundation Mathematics 2
This second mathematics course for students enrolled in the Tertiary Foundation Certificate programme aims to use the skills learnt in MATHS 91F to develop an understanding of functions in their tabular, algebraic and graphical representations. This course prepares students for either MATHS 101 or 102.

Recommended preparation: MATHS 91F or 93F

Restriction: MATHS 92W

MATHS 93F 15 Points
Foundation Mathematics 3
This Extension Mathematics course for students enrolled in the Tertiary Foundation Certificate Programme aims to promote an understanding of numerical and algebraic skills at a deeper level than MATHS 91F. Students will learn how to use simple technology and develop their problem solving abilities.

Restriction: MATHS 93W

MATHS 94F 15 Points
Foundation Mathematics 4
This second Extension Mathematics course for students enrolled in the Tertiary Foundation Certificate Programme aims to use the skills learnt in MATHS 93F to develop an understanding of functions, including differential functions, in their tabular, algebraic and graphical representations. This course prepares students for either MATHS 101 or 102.

Recommended preparation: MATHS 93F

Restriction: MATHS 94W

Preparatory Courses

MATHS 91P 15 Points
Preparatory Mathematics 1
Aims to promote an understanding of number skills, including an introduction to algebra. Students will learn how to use simple technology and develop their problem solving abilities.

Restriction: MATHS 91F, 91W

MATHS 93P 15 Points
Preparatory Mathematics 3
Aims to promote an understanding of numerical and algebraic skills at a deeper level than MATHS 91P. Students will learn how to use simple technology and develop their problem solving abilities.

Restriction: MATHS 93F, 93W

Stage I

MATHS 101 15 Points
MATHS 101G 15 Points
Mathematics in Society
Students will encounter the role mathematics plays
in understanding and guiding human activity. The teaching is thematic and students experience how fundamental mathematical ideas occur in modelling diverse features of our society such as the environment (e.g., air pollution) and medicine (e.g., burns, drug dosages).

Recommended preparation: For students who have not studied Mathematics at NCEA Level 3 (or equivalent)

Restriction: MATHS 101/101G may not be taken with, or after, any other Mathematics course except MATHS 190/190G. MATHS 101/101G is not available to students who have 12 credits or more in Mathematics at NCEA Level 3 or those who have passed Cambridge Mathematics A with an E or better, or Cambridge Mathematics AS with a D or better, or those who have passed International Baccalaureate Mathematics, or equivalent

MATHS 102 15 Points
Functioning in Mathematics
This introduction to calculus focuses on the development of mathematical skills and concepts leading up to calculus, through active participation in problems that model real life. Prepares students for further study in Mathematics.

Recommended preparation: For students who have achieved fewer than 12 credits in Calculus or Statistics at NCEA Level 3, or who have achieved at least 18 credits in Mathematics at NCEA Level 2 (or equivalent) and fewer than 12 credits in Calculus or Statistics at NCEA Level 3

Restriction: MATHS 102 may not be taken with or after any other Mathematics course at Stage I or above, except MATHS 101/101G or MATHS 190/190G

MATHS 108 15 Points
General Mathematics 1
A general entry to Mathematics for commerce and the social sciences, following Year 13 Mathematics. MATHS 108 covers selected topics in algebra and calculus and their applications, including: linear functions, linear equations and matrices; functions, equations and inequalities; limits and continuity; differential calculus of one and two variables; integral calculus of one variable.

Prerequisite: MATHS 102 or at least 12 credits in Achievement Standards in NCEA Level 3 Calculus, or at least 18 credits in Achievement Standards NCEA Level 3 Statistics and Modelling including standard 90644 Solving Equations. Alternative prerequisites include a D or better in CIE A2 Mathematics or a C or better in CIE AS Mathematics, or 3 out of 7 in IB Mathematics.

Restriction: ENGSCL 111, MATHS 153, 208, 250, PHYSICS 111. May not be taken with, or after, MATHS 150

MATHS 150 15 Points
Advancing Mathematics 1
The gateway to further mathematics courses for students intending to major in mathematics, statistics, physics, economics, finance or mathematical biology. It gives an introduction to the use of careful mathematical language and reasoning in the context of calculus of functions of a single variable and of linear algebra in finite dimensional spaces. Recommended preparation for MATHS 250.

Prerequisite: B– in MATHS 108, or A– in MATHS 102, or at least 18 credits in NCEA Mathematics with Calculus including at least 6 credits at merit or excellence, or B in CIE A2 Mathematics, or equivalent

Restriction: MATHS 153, ENGSCL 111, PHYSICS 111

MATHS 153 Accelerated Mathematics
A version of MATHS 150 for high achieving Year 13 students.

Enrolment requires permission from Department

Restriction: MATHS 108, 150, ENGSCL 111, PHYSICS 111

MATHS 162 Modelling and Computation
In this introduction to mathematical modelling and scientific computing, students will learn how to formulate mathematical models and how to solve them using numerical and other methods. A core course for students who wish to advance in Applied Mathematics.

Corequisite: One of MATHS 108, 150, 153, ENGSCL 111, ENGGEN 150

MATHS 190 15 Points
MATHS 190G Great Ideas Shaping our World
Mathematics contains many powerful and beautiful ideas that have shaped the way we understand our world. This course explores some of the grand successes of mathematical thinking. No formal mathematics background is required, just curiosity about topics such as infinity, paradoxes, cryptography, knots and fractals.

Stage II

MATHS 202 15 Points
Tutoring in Mathematics
This is a mainly practical course in which selected students learn tutoring skills that are put to use in MATHS 102 tutorials. In a small interactive class, students learn to mark, to question strategically and to facilitate learning. The theory and issues of mathematics education as a research field are also introduced.

Prerequisite: 30 points from courses in Mathematics and Departmental consent required

MATHS 208 15 Points
General Mathematics 2
This sequel to MATHS 108 features applications from the theory of multi-variable calculus, linear algebra and differential equations to real-life problems in statistics, economics, finance, computer science, and operations research. Matlab is used to develop analytical and numerical methods of solving problems.

Prerequisite: 15 points from ENGSCL 111, PHYSICS 111, MATHS 108, 150, 153

Restriction: MATHS 208 cannot be taken, concurrently with, or after MATHS 250, 253 or PHYSICS 211

MATHS 250 15 Points
Advancing Mathematics 2
This preparation for advanced courses in mathematics is intended for all students who plan to progress further in mathematics. Covers topics from multivariable calculus and linear algebra that have many applications in science, engineering and commerce, including vector spaces, eigenvalues, power series, least squares and improper integrals. The emphasis is on both the results and the ideas underpinning these.

Prerequisite: 15 points from ENGSCL 111, MATHS 150, 153, PHYSICS 111 or an A in MATHS 108, or a B+ in MATHS 208
MATHS 253 15 Points
Advancing Mathematics 3
The standard sequel to MATHS 250. It covers topics in linear algebra and multi-variable calculus including linear transformations, quadratic forms, double and triple integrals and constrained optimisation. It is a preparation for a large number of Stage III courses in mathematics and statistics, and for many advanced courses in physics and other applied sciences. All students intending to advance in mathematics should take this course.
Prerequisite: MATHS 250 or an A in MATHS 208
Restriction: PHYSICS 211

MATHS 255 15 Points
Principles of Mathematics
An introduction to mathematical thinking and communication: how to organise arguments logically and prove results. Rigorous notions are developed using topics that are central to the foundations of algebra and analysis including set theory, logic, abstract vector spaces and elementary number theory. An essential course for all students advancing in pure mathematics.
Prerequisite: MATHS 208 or an A in MATHS 208

MATHS 260 15 Points
Differential Equations
The study of differential equations is central to mathematical modelling of systems that change. Develops methods for understanding the behaviour of solutions to ordinary differential equations. Qualitative and elementary numerical methods for obtaining information about solutions are discussed, as well as some analytical techniques for finding exact solutions in certain cases. Some applications of differential equations to scientific modelling are discussed. A core course for Applied Mathematics.
Prerequisite: MATHS 208 or ENGSCI 211 or a concurrent enrolment in MATHS 250

MATHS 269 15 Points
Mathematics of Money
An introduction to the mathematics of the personal finance of saving and investment. Topics include interest, inflation, annuities, bonds, shares, mortgages and pension plans. This course will provide a useful introduction to STATS 370 but is not a prerequisite.
Prerequisite: One of MATHS 150, 153, 208, 250, PHYSICS 111

MATHS 270 15 Points
Numerical Computation
Many mathematical models occurring in Science and Engineering cannot be solved exactly using algebra and calculus. Students are introduced to computer-based methods that can be used to find approximate solutions to these problems. The methods covered in the course are powerful yet simple to use. This is a core course for students who wish to advance in Applied Mathematics.
Prerequisite: One of MATHS 108, 150, 153, PHYSICS 111, ENGEN 150, ENGS 111, and one of MATHS 162, COMPSCI 101, 105, INFOSYS 110, 120 (recommended MATHS 162)

Stage III

MATHS 302 15 Points
Teaching and Learning Mathematics
For people interested in thinking about the social, cultural, political, economic, historical, technological and theoretical ideas that influence mathematics education, who want to understand the forces that shaped their own mathematics education, or who are interested in teaching. Students will develop their ability to communicate ideas in essay form.
Recommended preparation: At least 45 points from courses in Mathematics or Statistics

MATHS 307 15 Points
Special Topic in Mathematics Education 1
Both MATHS 307 and 308 deal with some special topic(s) of contemporary interest in mathematics education.

MATHS 308 15 Points
Special Topic in Mathematics Education 2
Both MATHS 307 and 308 deal with some special topic(s) of contemporary interest in mathematics education.

MATHS 310 15 Points
History of Mathematics
A study of some of the topics occurring in the history of mathematics which facilitate the understanding of modern mathematics. These include: concepts of number, geometry, algebra, and the differential and integral calculus.
Corequisite: At least 30 points at Stage III in Mathematics

MATHS 315 15 Points
Mathematical Logic
Logic addresses the foundations of mathematical reasoning. It models the process of mathematical proof by providing a setting and the rules of deduction. Builds a basic understanding of first order predicate logic, introduces model theory and demonstrates how models of a first order system relate to mathematical structures. The course is recommended for anyone studying high level computer science or mathematical logic.
Prerequisite: COMPSCI 225 or MATHS 255 or PHIL 222

MATHS 320 15 Points
Algebraic Structures
This is a framework for a unified treatment of many different mathematical structures. It concentrates on the fundamental notions of groups, rings and fields. The abstract descriptions are accompanied by numerous concrete examples. Applications abound: symmetries, geometry, coding theory, cryptography and many more. This course is recommended for those planning graduate study in pure mathematics.
Prerequisite: MATHS 255 or 328, or an A– pass in MATHS 253

MATHS 326 15 Points
Combinatorics
Combinatorics is a branch of mathematics that studies collections of objects that satisfy specified criteria. An important part of combinatorics is graph theory, which is now connected to other disciplines including bioinformatics, electrical engineering, molecular chemistry and social science. The use of combinatorics in solving counting and construction problems is covered using topics that include algorithmic graph theory, codes and incidence structures, and combinatorial complexity.
Prerequisite: MATHS 235, or COMPSCI 223 and a B+ in MATHS 208, or COMPSCI 225 and any pass in MATHS 250

MATHS 328 15 Points
Algebra and Applications
The goal of this course is to show the power of algebra and number theory in the real world. It concentrates
on concrete objects like polynomial rings, finite fields, groups of points on elliptic curves, studies their elementary properties and shows their exceptional applicability to various problems in information technology including cryptography, secret sharing, and reliable transmission of information through an unreliable channel.

Prerequisite: MATHS 255, or B+ pass in COMPSCI 225 and one of MATHS 208, 250, 253

MATHS 332 15 Points
Real Analysis
A standard course for every student intending to advance in pure mathematics. It develops the foundational mathematics underlying calculus, it introduces a rigorous approach to continuous mathematics and fosters an understanding of the special thinking and arguments involved in this area. The main focus is analysis in one real variable with the topics including real fields, limits and continuity, Riemann integration and power series.

Prerequisite: MATHS 253 and 255, or 253 and a B+ in MATHS 260

MATHS 333 15 Points
Analysis in Higher Dimensions
By selecting the important properties of distance many different mathematical contexts are studied simultaneously in the framework of metric and normed spaces. Examines carefully the ways in which the derivative generalises to higher dimensional situations. These concepts lead to precise studies of continuity, fixed points and the solution of differential equations. A recommended course for all students planning to advance in pure mathematics.

Prerequisite: MATHS 332

MATHS 340 15 Points
Real and Complex Calculus
Calculus plays a fundamental role in mathematics, answering deep theoretical problems and allowing us to solve very practical problems. Extends the ideas of calculus to two and higher dimensions, showing how to calculate integrals and derivatives in higher dimensions and exploring special relationships between integrals of different dimensions. It also extends calculus to complex variables.

Prerequisite: MATHS 253

MATHS 353 15 Points
Geometry and Topology
A selection of topics providing an introduction to a range of concepts in geometry and general topology, with emphasis on visualisable aspects of these subjects. Topics include some or all of the following: axiom systems, affine geometry, Euclidean and non-Euclidean geometry, projective geometry, symmetry, convexity, the geometric topology of manifolds, and algebraic structures associated with topological spaces.

Prerequisite: MATHS 255

MATHS 361 15 Points
Partial Differential Equations
Partial differential equations are used to model many important phenomena in the real world (such as heat flow and wave motion). An introductory course on methods of solution for linear partial differential equations in one, two and three dimensions.

Prerequisite: MATHS 260 and 253, or PHYSICS 211

MATHS 362 Methods in Applied Mathematics
15 Points

Techniques such as variational methods, Green's functions, and perturbation analysis are a crucial part of the applied mathematician's toolbox. Covers a selection of such advanced topics in detail, and is suitable for those students intending to advance in Applied Mathematics or Physics.

Recommended preparation: MATHS 340 and 361
Prerequisite: MATHS 260 and 253, or PHYSICS 211

MATHS 363 Advanced Modelling and Computation
15 Points

Much of modern research in applied mathematics, physics and engineering relies heavily on the construction and numerical solution of mathematical models. Covers the theory and practice of such computational approaches, including the study of numerical linear algebra and differential equations, and bifurcations in ordinary differential equations. Matlab is used extensively.

Prerequisite: MATHS 260 and 270

MATHS 381 Special Topic in Mathematics 1
15 Points

MATHS 382 Special Topic in Mathematics 2
7.5 Points

MATHS 382A
7.5 Points

MATHS 382B

MATHS 383 Special Topic in Mathematics 3
15 Points

MATHS 384 Special Topic in Mathematics 4
15 Points

Each of these courses deals with some special topic(s) of contemporary interest in pure mathematics. Not all of them are offered every year; further information may be obtained from the Department of Mathematics.

MATHS 386 Special Topic in Applied Mathematics 1
15 Points

MATHS 386A
7.5 Points

MATHS 386B
7.5 Points

To complete this course students must enrol in MATHS 386 A and B, or MATHS 386

MATHS 387 Special Topic in Applied Mathematics 2
15 Points

Special Topic in Applied Mathematics 2
Each of these courses deals with some special topic(s) of contemporary interest in pure mathematics. Not all of them are offered every year; further information may be obtained from the Department of Mathematics.

MATHS 388 Special Topic in Applied Mathematics 3
15 Points

Special Topic in Applied Mathematics 3
Each of these courses deals with some special topic(s) of contemporary interest in pure mathematics. Not all of them are offered every year; further information may be obtained from the Department of Mathematics.

MATHS 389 Special Topic in Applied Mathematics 4
15 Points

Special Topic in Applied Mathematics 4
Each of these courses deals with some special topic(s) of contemporary interest in applied and computational mathematics. Not all of them are offered every year; further information may be obtained from the Department of Mathematics.

**MATHS 701: Research Skills in Mathematics Education**
Prepares students for postgraduate study in mathematics and statistics education. Its emphasis is on workshops in the key research skills required by students working at this level. It will cover a range of research issues and techniques.

**MATHS 702: Mathematics Curriculum**
A theoretical approach to mathematical curricula, broadly interpreted, with particular emphasis on cultural and linguistic perspectives, especially Māori. Additional issues will include a selection from history of mathematics curricula, influences on the development of a mathematics curriculum, and the aims and objectives of secondary and tertiary mathematics curricula.

**MATHS 703: Theoretical Issues in Mathematics Education**
An analysis of theoretical perspectives that inform research in mathematics education, with a focus on learning theories, both social and psychological, and their implications for teaching and learning in mathematics.

**MATHS 705: Socio-political Issues in Mathematics Education**
This course will examine mathematics teaching and learning from a sociological perspective. Topics covered will include gender differences in mathematics, grouping students by ability vs. mixed ability teaching, and the performance of students from working class and ethnic minority backgrounds. Equity issues will be a central focus, and we will discuss the ways in which sociological ideas complement other approaches to research in mathematics education.

**MATHS 706: Technology and Mathematics Education**
Practical and theoretical perspectives on ways that technology, especially calculators and computers, can enhance teaching at senior secondary and university levels, with a particular focus on calculus. Identification of affordances, constraints and obstacles in the use of technology. Consideration of issues of teacher and lecturer development in implementation of technology.

**MATHS 707: Special Topics in Mathematics Education 1**

**MATHS 708: Special Topics in Mathematics Education 2**

**MATHS 709: Special Topics in Mathematics Education 3**

**MATHS 710: Special Topics in Mathematics Education 4**

**MATHS 711: Special Topics in Mathematics Education 5**

To complete this course students must enrol in MATHS 711 A and B, or MATHS 711 B.
integrated, and illustrates how the subject is both an essential tool for analysis and a critical foundation for the theory of probability.

*Strongly recommended:* MATHS 333

**Prerequisite:** MATHS 332

**MATHS 731**

**Functional Analysis**

Provides the mathematical foundations behind some of the techniques used in applied mathematics and mathematical physics: it explores how many phenomena in physics can be described by the solution of a partial differential equation, for example the heat equation, the wave equation and Schrödinger’s equation.

*Recommended preparation:* MATHS 730 and 750

**Prerequisite:** MATHS 332 and MATHS 333

**15 Points**

**MATHS 735**

**Analysis on Manifolds and Differential Geometry**

Studies surfaces and their generalisations, smooth manifolds, and the interaction between geometry, analysis and topology: it is a central tool in many areas of mathematics, physics and engineering. Topics include Stokes’ theorem on manifolds and the celebrated Gauss Bonnet theorem.

*Strongly recommended:* MATHS 333 and 340

**Prerequisite:** MATHS 332

**15 Points**

**MATHS 740**

**Complex Analysis**

An introduction to functions of one complex variable, including Cauchy’s integral formula, the index formula, Laurent series and the residue theorem. Many applications are given including a three line proof of the fundamental theorem of algebra. Complex analysis is used extensively in engineering, physics and mathematics.

*Strongly recommended:* MATHS 333 and 340

**Prerequisite:** MATHS 332

**15 Points**

**MATHS 745**

**Chaos, Fractals and Bifurcation**

Presents the classical fractals of computer science and art such as Julia and Mandelbrot sets, iterated function systems and higher-dimensional strange attractors, and illustrates applications of chaos, fractals and bifurcation to areas including commerce, medicine, biological and physical sciences.

*Strongly recommended:* MATHS 333 and 340

**Prerequisite:** MATHS 332

**15 Points**

**MATHS 750**

**Topology**

Unlike most geometries, topology models objects which may be stretched. Its ideas have applications in other branches of mathematics as well as physics, chemistry, economics and beyond. Its results give a general picture of what might happen rather than precise details of when and where. The course covers aspects of general and algebraic topology.

*Strongly recommended:* MATHS 333.

**Prerequisite:** MATHS 332 or 353

**15 Points**

**MATHS 761**

**Dynamical Systems**

Mathematical models of systems that change are frequently written in the form of nonlinear differential equations, but it is usually not possible to write down explicit solutions to these equations. This course covers analytical and numerical techniques that are useful for determining the qualitative properties of solutions to nonlinear differential equations.

*Prerequisite:* B in MATHS 340, 361

**15 Points**

**MATHS 762**

**Nonlinear Partial Differential Equations**

A study of exact and numerical methods for non-linear partial differential equations. The focus will be on the kinds of phenomena which only occur for non-linear partial differential equations, such as blow up, shock waves, solitons and special travelling wave solutions.

*Prerequisite:* B in MATHS 340, 361

**15 Points**

**MATHS 763**

**Advanced Partial Differential Equations**

A study of exact and approximate methods of solution for the linear partial differential equations that frequently arise in applications.

*Prerequisite:* B in MATHS 340, 361

**15 Points**

**MATHS 764**

**Mathematical Biology**

A course introducing central concepts in mathematical biology, with emphasis on modelling of physiological systems and gene dynamics.

**15 Points**

**MATHS 769**

**Stochastic Differential and Difference Equations**

Differential and difference equations are often used as preliminary models for real world phenomena. The practically relevant models that can explain observations are, however, often the stochastic extensions of differential and difference equations. This course considers stochastic differential and difference equations and applications such as estimation and forecasting.

*Prerequisite:* MATHS 340 and 361

**15 Points**

**MATHS 770**

**Advanced Numerical Analysis**

Covers the use, implementation and analysis of efficient and reliable numerical algorithms for solving several classes of mathematical problems. The course assumes students have done an undergraduate course in numerical methods and can use Matlab or other high-level computational language.

*Prerequisite:* MATHS 270 and B in MATHS 340, 361

**15 Points**

**MATHS 776**

**Honours Dissertation in Mathematics or Applied Mathematics**

*Restriction:* MATHS 791

To complete this course students must enrol in MATHS 776 A and B, or MATHS 776

**30 Points**

**MATHS 776A**

**15 Points**

**MATHS 776B**

**15 Points**

**MATHS 777**

**Project in Mathematics 1**

A supervised investigation or research project including seminar presentation in pure or applied mathematics.

*Restriction:* MATHS 792

**15 Points**

**MATHS 781**

**Advanced Topic(s) in Mathematics 1**

Each of these courses deals with some special topic(s) from pure mathematics. Not all of them are offered every year; further information may be obtained from the Department of Mathematics.

**15 Points**

**MATHS 782**

**Advanced Topic(s) in Mathematics 2**

Each of these courses deals with some special topic(s) from pure mathematics. Not all of them are offered every year; further information may be obtained from the Department of Mathematics.

**Foundation Courses**

**PHYSICS 91F 15 Points**

**Foundation Physics 1**  
An introductory course for students who have not previously studied physics. Topics include the nature of light; wave motion; basic mechanics of motion in a straight line, including the concepts of momentum and energy; an introduction to heat.  
Restriction: PHYSICS 91W
COURSE PRESCRIPTIONS 2013 CALENDAR

PHYSICS 92F 15 Points
Foundation Physics 2
A second foundation course for students who understand the basic mechanics of motion in a straight line. Further mechanics, including equilibrium, projectile motion, rotational motion and gravitation. Electromagnetism, including electrostatics, elementary circuits and the effects of magnetic fields.
Restriction: PHYSICS 92W

Preparatory Courses

PHYSICS 91P 15 Points
Preparatory Physics 1
A preparatory course for students who have not previously studied physics. Topics include the nature of light; wave motion; basic mechanics of motion in a straight line, including the concepts of momentum and energy: an introduction to heat.
Restriction: PHYSICS 91F, 91W

Stage I

PHYSICS 102 15 Points
Basic Concepts of Physics
A non-advancing course in physics for students interested in understanding the physics of everyday phenomena. The course requires a minimal background in mathematics and physics, and will stress the conceptual understanding of important physical ideas. Demonstration experiments are a major feature.
Restriction: Cannot be taken either with or after any of PHYSICS 120–160

PHYSICS 103 15 Points
Introductory Physics for Science and Engineering
A course for those who require additional background in Physics before undertaking first-year pre-requisites for a Bachelor of Engineering, or proceeding to a Bachelor of Science or Bachelor of Science (Biomedical Science). Key concepts required for later enrolment in Physics 120 or 160 will be taught and consolidated in problem-based sessions. No background in calculus will be assumed, but simple applications will be developed and used.
Restriction: Cannot be taken either with or after any of PHYSICS 102, 120–160

PHYSICS 107 15 Points
PHYSICS 107G
Planets, Stars and Galaxies
A non-advancing course in physics for students interested in astronomy. Topics include a survey of astronomical objects in the universe, the tools of observational astronomy, stellar evolution, quasars and black holes, cosmology. This course does not require a formal background in mathematics or physics.

PHYSICS 108 15 Points
PHYSICS 108G
Science and Technology of Sustainable Energy
Leading-edge science behind the various technologies which underpin new sustainable energy sources will be discussed in a way which will lead to understanding of the advantages, disadvantages, and compromises involved. Case-study examples include solar energy, wind energy, biofuels, geothermal energy, tidal energy, wave energy, and hydrogen energy.

PHYSICS 120 15 Points
Advancing Physics 1
A course designed for students either advancing in physical science or with a major interest in field studies. It covers basic aspects of motion and its causes, electrostatics, geometric optics, as well as the production, transformation and propagation of energy in its thermal and mechanical forms. Physics and mathematics at NCEA level 3 or equivalent or a pass in PHYSICS 102 are recommended for students intending to enrol in this course. It is a recommended preparation for PHYSICS 150.
Restriction: PHYSICS 160

PHYSICS 130 15 Points
Properties of Matter
Static equilibrium of solids and fluids with an introduction to fluid mechanics. The physical properties of condensed matter including strength, elasticity, and other mechanical characteristics. The electrical, optical and thermal characteristics of materials with technological applications including alloys, ceramics, polymers, glasses and plastics. Physics and mathematics at NCEA level 3 or equivalent, or a pass in PHYSICS 102 are recommended for students intending to enrol in this course.
Restriction: PHYSICS 160

PHYSICS 140 15 Points
Digital Fundamentals
Logic components, Boolean algebra, combinational logic analysis and synthesis, synchronous and asynchronous sequential logic analysis and design, digital subsystems, computer organisation and design.
Restriction: PHYSICS 219, 243

PHYSICS 150 15 Points
Advancing Physics 2
Prescribed for students advancing either in the physical sciences or in the special science and technology programmes. It covers advanced aspects of mechanics (rotational motion), circuits, fields, optical systems and basic aspects of quantum effects and relativity. A pass in PHYSICS 120 is recommended for students intending to enrol in this course. High achieving Year 13 students with NCEA level 3 in physics and mathematics may be permitted to enrol directly in PHYSICS 150.
Restriction: PHYSICS 120

PHYSICS 160 15 Points
Physics for the Life Sciences
Designed for students intending to advance their studies in the life sciences. Topics covered will be especially relevant to biological systems: mechanics, thermal physics, wave motion, electricity and instrumentation. This course requires a knowledge of physics and mathematics to at least NCEA level 2.
Restriction: PHYSICS 120

Stage II

Note: For the purposes of recommended preparation for Stage II Physics courses: PHYSICS 120 and 160 are equivalent; PHYSICS 111, MATHS 107, 108, 130, 150 and 152 are equivalent; PHYSICS 210, MATHS 208 and 250 are equivalent; and COMPSCI 101 and INFOSYS 110 are equivalent.

PHYSICS 211 15 Points
Analytical Techniques in Physical Sciences 3
Covers analytical techniques associated with Stage II
Physics courses, relating appropriate mathematical concepts to various physical systems and including laboratory work. Provides a minimal preparation in mathematical techniques for Stage III Physics courses. Topics include: oscillations and waves, numerical and analytical solution of differential equations describing physical systems, vector calculus, description of physical systems by sets of linear equations.

No formal prerequisite, but an understanding of the material in MATHS 208 or 250 will be assumed.

Restriction: MATHS 253, ENGSCI 211

PHYSICS 213 15 Points
The Geophysical Environment
An understanding of the atmospheric, oceanic and solid earth environment in terms of physical principles. Topics include: the shape of the Earth, gravitational variations, seismic waves, global heat balance and atmospheric dynamics, ocean waves and tides, and general properties of fluids applied to the environment. A weekend fieldtrip is a component of the course.

No formal prerequisite, but an understanding of Stage I level Physics and Mathematics will be assumed.

PHYSICS 231 15 Points
Classical Physics

No formal prerequisite, but an understanding of the material in MATHS 208 or 250 and PHYSICS 120 will be assumed.

Restriction: PHYSICS 230

PHYSICS 240 15 Points
Networks and Electronics
Covers AC circuit theory with phasors and complex operators, including network theorems, resonance, and operational amplifiers treated as linear components. Principles of semiconductor physics, diodes, transistors, and associated analogue and digital applications.

No formal prerequisite, but an understanding of the material in MATHS 208 or 250 and PHYSICS 150 will be assumed.

Restriction: PHYSICS 242

PHYSICS 251 15 Points
Modern Physics

No formal prerequisite, but an understanding of the material in MATHS 208 or 250, PHYSICS 120 and 150 will be assumed.

Restriction: PHYSICS 250

PHYSICS 261 15 Points
Optics and Electromagnetism
Development of the principles underlying electric and magnetic field phenomena, and applications of Maxwell’s equations in integral form, leading to the wave equation. Discussion of optics and the modern science of Photonics using both the plane wave solution of the wave equation and geometrical optics. Fibre optics, lasers, LEDs, polarisation effects, interference and diffraction.

No formal prerequisite, but an understanding of the material in MATHS 208 or 250, PHYSICS 120 and 150 will be assumed.

Restriction: PHYSICS 260

PHYSICS 260 15 Points
Medical Physics
An overview of the field of Medical Physics including the biophysical basis of biomedical measurement, radiation, physics, biology and dosimetry.

Recommended preparation: PHYSICS 160

PHYSICS 280 15 Points
Medical Physics
An overview of the field of Medical Physics including the biophysical basis of biomedical measurement, radiation, physics, biology and dosimetry.

Recommended preparation: PHYSICS 160

PHYSICS 290 15 Points
Optics and Laser Physics
Lasers: electron oscillator model, rate equation model, Einstein coefficients, Fabry Perot etalons and resonators, optimum output coupling, reflection at a dielectric surface, waveguide theory, thin films, matrix techniques for optical elements, Gaussian beams and applications.

Prerequisite: One of PHYSICS 211, MATHS 253, ENGSCI 211 and either PHYSICS 231 or PHYSICS 220 and 230

PHYSICS 305 15 Points
Electromagnetism
A systematic development of Maxwell’s theory of electromagnetism and its applications to optics. Topics include: electrostatics, dielectrics, polarisation, charge conservation, magnetostatics, scalar and vector potentials, magnetic materials, Maxwell’s equations, the wave equation. Propagation of electromagnetic waves in vacuum, dielectrics and conducting media. Energy and momentum in electromagnetic waves.

Prerequisite: B– average in one of PHYSICS 211, MATHS 253, ENGSCI 211 and either PHYSICS 231 or PHYSICS 220 and 230

PHYSICS 315 15 Points
Classical and Statistical Physics
Statistical physics topics emphasise the description of macroscopic properties using microscopic models and include: temperature, the partition function and connections with classical thermodynamics, paramagnetic solids, lattice vibrations, indistinguishable particles, classical and quantum gases. Classical mechanics topics include: vector mechanics, coordinate transformations, rotating frames, angular momentum, rigid body dynamics, variational formulation, constraints, Lagrange equations, Hamiltonian mechanics and relationships with quantum mechanics.

Prerequisite: B– average in one of PHYSICS 211, MATHS 253, ENGSCI 211 and either PHYSICS 231 or PHYSICS 220 and 230

PHYSICS 325 15 Points
Electromagnetism
A systematic development of Maxwell’s theory of electromagnetism and its applications to optics. Topics include: electrostatics, dielectrics, polarisation, charge conservation, magnetostatics, scalar and vector potentials, magnetic materials, Maxwell’s equations, the wave equation. Propagation of electromagnetic waves in vacuum, dielectrics and conducting media. Energy and momentum in electromagnetic waves.

Prerequisite: B– average in one of PHYSICS 211, MATHS 253, ENGSCI 211 and either PHYSICS 231 or PHYSICS 220 and 230

PHYSICS 340 15 Points
Electronics and Signal Processing
An introduction to analogue and digital electronics. Topics will be selected from: linear circuit theory, analytical and numeric network analysis, steady state and transient response of networks, feedback and oscillation, transistor circuits, operational amplifier
circuits, sampling theory, digital filter design, the fast Fourier transform and digital signal processing. 
Prerequisite: PHYSICS 240 
Corequisite: One of PHYSICS 211, MATHS 253, ENGS 211 
Concurrent enrolment in PHYSICS 390 or 391 is recommended. 
Restriction: PHYSICS 341 

PHYSICS 350 15 Points
Quantum Mechanics and Atomic Physics 
Non-relativistic quantum mechanics will be developed using the three-dimensional Schrödinger equation, and will be applied particularly to the physics of atoms and molecules. The interaction of like particles and the quantisation of angular momentum will be studied. 
Prerequisite: B– average in one of PHYSICS 250, 251 and one of PHYSICS 211, MATHS 253, ENGS 211 

PHYSICS 355 15 Points
Condensed Matter and Sub-atomic Physics 
An introduction to the quantum and statistical foundations of modern studies in condensed matter and sub-atomic physics. Topics covered include quasiparticles, the band theory of electronic structure, semiconductors, magnetism, superconductivity, nuclear models, applications of nuclear processes in fields such as medicine and archaeology, the main properties of strong, weak and electromagnetic interactions, an introduction to Feynman diagrams and quark models. 
Prerequisite: One of PHYSICS 250, 251 and one of PHYSICS 211, MATHS 253, ENGS 211. Concurrent enrolment in PHYSICS 390 or 391 is recommended. 
Restriction: PHYSICS 356 

PHYSICS 371 15 Points
Special Topics in Physics 

PHYSICS 390 15 Points
Experimental Physics 1 
Students may select experiments from a wide spectrum of physics that are appropriate to the lecture courses being taken from PHYSICS 315–356. 
Prerequisite: At least one of PHYSICS 220–261 

PHYSICS 391 15 Points
Experimental Physics 2 
Experimental work as for PHYSICS 390. 
Prerequisite: At least one of PHYSICS 220–261 

Diploma Courses 

PHYSICS 625 15 Points
Selected Topics 1 
Enrolment requires approval of the Head of Department and the choice of subject will depend on staff availability or on the needs of particular students. 

PHYSICS 626 15 Points
Selected Topics 2 
Enrolment requires approval of the Head of Department and the choice of subject will depend on staff availability or on the needs of particular students. 

PHYSICS 681 15 Points
Experimental Physics 
A selection of experiments appropriate to the student’s lecture courses for the Diploma. Requires the approval of the Head of Department. 

PHYSICS 690A 15 Points
PHYSICS 690B 
Graduate Diploma Dissertation (Physics) 
To complete this course students must enrol in PHYSICS 690 A and B 

PHYSICS 691 30 Points
PHYSICS 691A 15 Points
PHYSICS 691B 15 Points
PG Diploma Dissertation (Physics) 
To complete this course students must enrol in PHYSICS 691 A and B, or PHYSICS 691 

Postgraduate 700 Level Courses 

PHYSICS 701 15 Points
Linear Systems 
Many physical situations are treated by making linear approximations to actual behaviour and analysing the resulting systems. Topics include: generalised functions, Green’s function, convolution, sampling theory, Fourier, Laplace and Hilbert transforms, with applications to statistics, optics, solution of differential equations, filtering and digital signal processing. 
Prerequisite: 30 points from PHYSICS 315–380, or MATHS 361 

PHYSICS 703 15 Points
Advanced Quantum Mechanics 
Includes a review of the general formalism of quantum theory, making use of: Dirac notation, scattering theory, time-dependent perturbation theory, relativistic quantum mechanics and spin, many-body quantum mechanics, rotations and other symmetry operations, quantum theory of radiation and introductory quantum field theory. Applications are taken from atomic, nuclear and particle physics. 

PHYSICS 705 15 Points
Advanced Electromagnetism and Special Relativity 
An introduction to tensors, development of the Special Theory of Relativity including kinematics, dynamics, properties of waves and a covariant formulation of electrodynamics. Charges, currents and fields in different inertial frames, electromagnetic wave propagation in media and radiation from moving charges. 

PHYSICS 706 15 Points
Quantum Field Theory 
Follows on from PHYSICS 703 Advanced Quantum Mechanics. The first part treats relativistic generalisations of the Schrödinger equation and many-particle quantum mechanics. The second part is an introduction to quantum electrodynamics, using Feynman diagram techniques. Applications are made to atomic, condensed matter and particle physics. 

PHYSICS 707 15 Points
Inverse Problems 
Inverse problems involve making inferences about physical systems from experimental measurements. Topics include: the linear inverse problem, regularisation, and introduction to multi-dimensional optimisation, Bayes theorem, prior and posterior probabilities, physically-based likelihoods, inference and parameter estimation, sample based inference, computational Markov chain, Monte Carlo, and output analysis. 
Prerequisite: PHYSICS 701, or MATHS 340 and 361
PHYSICS 708 15 Points
Statistical Mechanics and Stochastic Processes
Phase transitions and critical phenomena, stochastic methods, master equations, Fokker-Planck equations and stochastic differential equations.

PHYSICS 715 15 Points
Selected Topics 1
Enrolment requires approval of the Head of Department and the choice of subject will depend on staff availability or on the needs of particular students.

PHYSICS 726 15 Points
Optoelectronics
Laser physics including a discussion of resonator theory and laser beam diagnostics, together with mode-locked lasers, frequency stabilised lasers, non-linear optics and interferometry.

PHYSICS 727 15 Points
Optoelectronics and Communications
Optical data storage systems, scanners and printers, propagation in optical waveguides, non-linear effects in optical fibres, amplifiers, semiconductor laser sources, LEDs and the detection of optical radiation, optical communication systems architecture and an introduction to network topology.

PHYSICS 731 15 Points
Wave Propagation
A general treatment of wave propagation including rays, normal modes and reflection coefficients, with applications principally to underwater acoustics, seismology and electromagnetic waves.

PHYSICS 732 15 Points
Fluid Mechanics and Applications
Principles and phenomena of fluid dynamics, including the Navier-Stokes equations, viscous flow and non-viscous flow, with applications in areas including geophysics, medical physics and soft materials.

PHYSICS 751 15 Points
Selected Topics 2
Enrolment requires approval of the Head of Department and the choice of subject will depend on staff availability or on the needs of particular students.

PHYSICS 754 15 Points
Condensed Matter Physics
Modern aspects of condensed matter physics including liquids, glasses, amorphous solids, soft matter and low dimensional systems.

PHYSICS 755 15 Points
Particle Physics
An introduction to particle physics: the particles and their interactions, QED and field theory, gauge invariance (consequences, its role in particle physics), electroweak interaction (left-handed neutrinos, W and Z, bosons, neutrino mass) and strong interaction (quark model, problems, colour, confinement and QCD compared with QED).

PHYSICS 756 15 Points
Nuclear Physics
General properties of nuclei as described by the Liquid Drop and Fermi Gas and Shell models; properties of beta decay, and recent developments in neutrino mass theory and experiments; relativistic nuclear collisions, and recent theory and experiments of highly compressed nuclear matter leading to the quark-gluon plasma.

PHYSICS 760 15 Points
Quantum Optics
Light, non-classical, squeezed and anti-bunched light, quantum theory of the interaction of light with atoms, manipulations of atoms by light.

PHYSICS 788 15 Points
Project in Physics

POLYMER 692A 15 Points
POLYMER 692B 15 Points
PG Diploma Dissertation (Polymers and Coatings Science)
To complete this course students must enrol in POLYMER 692 A and B.

POLYMER 701 15 Points
Polymer Science
Prerequisite: Permission of Programme Director
COURSE PRESCRIPTIONS 2013 CALENDAR

from BIOSCI 101, 103
Prerequisite: 30 points at Stage I Psychology or 15 points
includes a compulsory laboratory component.

PSYCH 202 15 Points
Biopsychology
Provides a basic introduction to the structure and
function of the brain, neuropsychology, and genetic
and hormonal influences on behaviour. This course
includes a compulsory laboratory component.
Prerequisite: 30 points at Stage I Psychology or 15 points
from BIOSCI 101, 103

PSYCH 203 15 Points
Learning and Behaviour
A consideration of the environmental factors that
control and modify animal (including human)
behaviour. Generally, an experimental laboratory
approach is taken, and quantitative theories are
stressed. Topics include: classical and operant
conditioning, theories of reinforcement, the stimulus
control of operant behaviour, behavioural analyses
of problem solving, concept learning and language,
choice, self control, remembering and experimental
design. This course includes a compulsory laboratory
component.
Prerequisite: 30 points at Stage I Psychology or 15 points
from BIOSCI 101, 103

PSYCH 204 15 Points
Social Psychology
Focuses on humans as social beings. Covers
topics such as social cognition, attitudes, group
processes, interpersonal relationships, and language
communication. The course may include participation
in and completion of a research project.
Prerequisite: 30 points at Stage I Psychology

PSYCH 207 15 Points
Theories of Personality and Development
The major personality theories are presented
including: Behavioural, Cognitive, Social-Cognitive,
Psychodynamic, Humanistic/Phenomenological,
Trait/Dispositional and Biological/Evolutionary.
The hypotheses generated by these theories, about
development from early childhood onwards and about
‘normal’ and ‘abnormal’ behaviour, will be discussed
and evaluated in terms of empirical evidence and
utility. Attention will be paid to cultural issues of
relevance in a New Zealand context.
Prerequisite: 30 points at Stage I Psychology

PSYCH 208 15 Points
Producing Psychological Knowledge
How do you go about answering a research question?
What is a research question anyway? Which research
methodology and method will best provide the types
of answers you are looking for? Examines what we do
and can know in psychology, and why and how we
know it, including philosophy of science, methodology,
ethics, research outcomes, and particular methods.
Prerequisite: 30 points at Stage I in Psychology
Restriction: PSYCH 262

Stage I

PSYCH 108 15 Points
Individual, Social and Applied Psychology
Topics covered may include: developmental and
social psychology including group behaviour, the
measurement of mental abilities, intelligence, models
of personality, clinical and health psychology, methods
of therapeutic intervention, and the psychological
similarities and differences between cultures. A
laboratory component, in which students are required
to participate as subjects, forms part of the course.

PSYCH 109 15 Points
Mind, Brain and Behaviour
Topics covered may include: the nature of sensory
and perceptual processes, the cause of perceptual
illusions, the structure and function of the human
brain, approaches to animal and human learning,
models of human language and memory, and the
design of psychological experiments. A laboratory
component, in which students are required to
participate as subjects, forms part of the course.
 Restriction: PSYCH 129

Stage II

PSYCH 201 15 Points
Perception and Cognition
An introduction to a variety of topics in human
experimental psychology. Topics covered may include:
perceptual processes, attention, memory, mental
imagery, language development, theory of mind,
problem solving and decision making. Participation
in the laboratory component of this course is
compulsory.
Prerequisite: 30 points at Stage I Psychology

PSYCH 202 15 Points
Biopsychology
Provides a basic introduction to the structure and
function of the brain, neuropsychology, and genetic
and hormonal influences on behaviour. This course
includes a compulsory laboratory component.
Prerequisite: 30 points at Stage I Psychology or 15 points
from BIOSCI 101, 103

PSYCH 203 15 Points

from BIOSCI 101, 103

PSYCH 204 15 Points
Social Psychology
Focuses on humans as social beings. Covers
topics such as social cognition, attitudes, group
processes, interpersonal relationships, and language
communication. The course may include participation
in and completion of a research project.
Prerequisite: 30 points at Stage I Psychology

PSYCH 207 15 Points

know it, including philosophy of science, methodology,
ethics, research outcomes, and particular methods.
Prerequisite: 30 points at Stage I in Psychology
Restriction: PSYCH 262

Stage III

PSYCH 303 15 Points
Cognitive Science
Provides an introduction to cognitive science and
cognitive neuroscience. Topics covered include: visual
and auditory perception, attention, memory, thinking
and problem-solving. Participation in the laboratory
component of this course is compulsary.
Prerequisite: 45 points at Stage II Psychology and 15 points
from STATS 101–125, 191

PSYCH 305 15 Points
Human Neuroscience
Covers material relating to the neural basis of
cognitive processes, including perception, attention,
memory and language. Students will be introduced
to different methods of inferring mind-brain relations
in normal and neurologically-impaired individuals,
and different ways of conceptualising mind-brain
relations, such as connectionism and modularism.
Prerequisite: 45 points at Stage II Psychology and 15 points
This course studies the links between psychological processes and communication disorders. Hearing and speech and language development will be covered. A range of communication disorders will be introduced. Psychosocial aspects of communication disorders including impact on self-esteem, health-related quality of life, peer/interpersonal relationships and educational and behavioural consequences of communication disorders in children will also be discussed.

Prerequisite: 45 points at Stage II Psychology and 15 points from STATS 101–125, 191

**PSYCH 306**  
Research Methods in Psychology  
This course deals with principles and practices relevant to psychological research, including philosophy of science, research ethics, research design, measurement of dependent variables, describing and analysing data, and interpreting results. Participation in the laboratory component of this course is compulsory.

Prerequisite: 45 points at Stage II Psychology and 15 points from STATS 101–125, 191

**PSYCH 308A**  
Research Topic  
A course of research supervised by a staff member and written up as a course for publication instead of a final examination. A list of available supervisors and topics is published each year in the School of Psychology Undergraduate Handbook.

Prerequisite: 45 points at Stage II Psychology and 15 points from STATS 101–125, 191  
Corequisite: Student must be enrolled in (or have completed) an additional 45 points at Stage III in Psychology courses plus Head of School approval  
To complete this course students must enrol in PSYCH 308 A and B

**PSYCH 309**  
Learning  
A discussion of how behaviour is controlled and modified by discriminative stimuli and by consequential reinforcers and punishers. The emphasis is on laboratory research with animals, but with some human data also considered. Topics include: choice behaviour, punishment, avoidance, psychophysics, memory, and cognition. This course includes a compulsory laboratory component.

Prerequisite: 45 points at Stage II Psychology and 15 points from STATS 101–125, 191 or 45 points at Stage II in Biological Sciences  
Restriction: PSYCH 362

**PSYCH 310**  
Introduction to Clinical Psychology  
Describes and evaluates psychological approaches to the assessment and treatment of those mental health problems, in adults and children, most commonly encountered by clinical psychologists. Consideration is given to work in mental health, corrections, child protection and neuropsychology rehabilitation. Issues relevant to Māori mental health, gender, cross-cultural work and prevention are included.

Prerequisite: 45 points at Stage II Psychology and 15 points from STATS 101–125, 191

**PSYCH 311**  
Advanced Topics in Social Psychology  
This paper focuses on a number of key topics in social and community psychology. One module examines issues in identity and well-being, a second module looks at interpersonal influence and intimate relationships, and a third module addresses collective behaviour and social issues.

Prerequisite: 45 points at Stage II Psychology and 15 points from STATS 101–125, 191

**PSYCH 313**  
Psychology of Communication Disorders  
This course studies the links between psychological processes and communication disorders. Hearing and speech and language development will be covered. A range of communication disorders will be introduced. Psychosocial aspects of communication disorders including impact on self-esteem, health-related quality of life, peer/interpersonal relationships and educational and behavioural consequences of communication disorders in children will also be discussed.

Prerequisite: 45 points at Stage II Psychology and 15 points from STATS 101–125, 191

**PSYCH 317**  
Evolution, Behaviour and Cognition  
How does behaviour in non-human animals evolve? Do other animals have language? Do they have culture? Can human behaviour be explained in evolutionary terms? This course addresses these questions and the methods that can be used to answer them.

Prerequisite: 45 points at Stage II Psychology and 15 points from STATS 101–125, 191, or 45 points at Stage II in Biological Sciences

**PSYCH 319**  
Psychology and Gender  
The study of gender is crucial to understanding many everyday aspects of our lives, as well as many contemporary social issues. This course provides an introduction to selected key issues in the critical psychology of gender, from a social constructionist perspective. Topics that will be covered include gendered bodies, masculinity and femininity, sexuality, rape, and mental health.

Prerequisite: 45 points at Stage II Psychology and 15 points from STATS 101–125, 191, or 30 points at Stage II in Women’s Studies

**PSYCH 320**  
Special Topic

**PSYCH 322**  
Industrial, Work and Organisational Psychology  
An introduction to core areas of industrial, work and organisational Psychology. This field of Psychology is concerned with improving the performance and well-being of people at work at individual, group and organisational levels, recognising the interdependencies among these levels, and between people and their environments. Emphasis is given to the interplay between science and practice.

Prerequisite: 45 points at Stage II Psychology, or MGMT 211 and 15 points from STATS 101–125, 191  
Restriction: PSYCH 312, 314

**PSYCH 326**  
Life Span Development  
The development of people across the life span is studied. Describes key milestones in development and examines the causes and processes that produce stability and change in people’s development over time. Topics discussed will include aspects of cognitive, social and physical development with consideration given to biological, societal and family influences. Attention will also be given to development within the New Zealand context.

Prerequisite: 45 points at Stage II in Psychology and 15 points from STATS 101–125, 191  
Restriction: PSYCH 316

**PSYCH 364**  
Health Psychology  
An introduction to the study of links between psychological processes and health/illness. The
course discusses a number of psychological issues relating to serious illnesses (cancers, coronary heart disease etc.) and links to other aspects of physical well-being (eg, exercise, diet). Consideration will be given both to the theoretical models which have been developed within health psychology and to the types of methodology used in their investigation.  

Prerequisite: 45 points at Stage II Psychology and 15 points from STATS 101–125, 191

**Psychology and Sustainability**  
Human behaviour and thinking is central to both the sustainability problem and viable solutions. This course considers the psychological barriers to thinking and acting sustainably and how theories and research on emotions, modelling, identity, belonging, moral development and the evolution of cooperation can be applied to overcome these barriers. There will be particular emphasis on how to develop sustainability consciousness in individuals and organisations.

**PSYCH 717 15 Points**  
**Community Psychology**  
This course is about the application of psychological knowledge and research skills to issues faced by communities. Students will design an intervention relevant to a social issue. Theoretical approaches to working in community settings and the practical challenges involved will be discussed.

**PSYCH 718 15 Points**  
**Psychotherapeutic Assessment and Formulation**  
Major theories used in clinical practice to understand psychological problems will be discussed, including behavioural, cognitive-behavioural, systems and psychodynamic models. Emphasis is on assessment and formulation of clients’ problems rather than therapeutic intervention. Approaches covered are those that are most commonly employed by psychologists practicing in New Zealand.  
*Prerequisite: PSYCH 723*  
*Restriction: PSYCH 709*

**PSYCH 720A 15 Points**  
**Research Topic in Psychology**  
A research topic undertaken under the direct supervision of a staff member and written up for presentation, instead of a final examination paper. A list of staff available for supervision, and their areas of interest and expertise, is published each year in the School of Psychology Handbook.  
*To complete this course students must enrol in PSYCH 720 A and B*

**PSYCH 721 15 Points**  
**Consciousness and Cognition**  
This course will discuss recent research on consciousness from the perspective of cognitive neuroscience. Topics covered may include: implicit learning, implicit memory, blindsight, the split-brain syndrome, amnesia and hemineglect.

**PSYCH 722 15 Points**  
**Human Learning and Development**  
Focusses on the processes and factors that influence human learning from early childhood and beyond. Topics discussed may include: early social cognition, language development, and the factors that influence school and life success. Consideration will be given to diverse contexts and populations.

**PSYCH 723 15 Points**  
**Mental Health Problems: Aetiology and Assessment**  
Provides an overview of common mental health problems in childhood and adulthood and the methods that clinical psychologists use to assess these. Examines theories of causation and risk factors for a number of mental health problems. Also introduces and critiques diagnostic tools and psychometric instruments used in assessment.

**PSYCH 724 15 Points**  
**Special Topic**

**PSYCH 725 15 Points**  
**Evolutionary Psychology**  
This course will cover evolutionary concepts as they apply to psychological issues. Specific topics may include: the evolution of tool use, language, cerebral asymmetry, theory of mind, culture and the sociobiology/evolutionary psychology debates.

**Special Topic**

**PSYCH 727 15 Points**  
**Special Topic**

**PSYCH 730 15 Points**  
**Professional Psychology Practice in New Zealand**  
Aims to equip students with knowledge and skills required for registration as a psychologist with the New Zealand Psychologists Board. Topics include the structure and functions of the Psychologists Board/Health and Disability Commissioner, cultural competency (obligations under the Treaty of Waitangi and cultural safe practice), professional ethics (Code of Ethics for Psychologists Working in Aotearoa/New Zealand) and related legislation. For students enrolled in the PGDipAppPsych.

**PSYCH 731 15 Points**  
**Social Psychology and Intergroup Processes**  
Focuses on the application of social psychological knowledge and theory to the understanding of broad social and cultural processes and phenomena, such as violence, prejudice, group behaviour and conflict, intergroup dynamics, collective behaviour, social beliefs, cultural differentiation and contact.

**PSYCH 732 15 Points**  
**Work Analysis and Design**  
Reviews concepts, methods, applications and current research in work analysis and design, in the multidisciplinary field of industrial, work and organisational psychology.

**PSYCH 733 15 Points**  
**Reading Acquisition**  
Reading is a developmental milestone. How children learn to read, why they fail, and the cognitive processes underlying reading are the main issues addressed in this course. Adult models of reading and acquired dyslexia will also be considered, as they relate to developmental models.

**PSYCH 734 15 Points**  
**Sensory Science**  
A range of methods commonly used to measure sensory capacity will be explored, with an emphasis on the difference between methods commonly used by technicians and scientists and how these methods can be improved. Appropriate methods for use in psychological science as well as in industry will be explored.

**PSYCH 735 15 Points**  
**Critical Qualitative Research**  
An in-depth focus on critical and discursive approaches to psychological research will be provided in this seminar-based course. Content will include examination of key theoretical underpinnings of critical qualitative research, as well as the practical application of such approaches.

**PSYCH 744 15 Points**  
**Experimental Design and Quantitative Methods for Psychology**  
Covers applications of the general linear model...
to research design and analysis. Topics include: univariate techniques (analysis of variance, analysis of covariance, regression) and multivariate techniques (multivariate analysis of variance, discriminant analysis, multivariate regression, and factor analysis). 

Prerequisite: PSYCH 306 or consent of School

PSYCH 745 15 Points
The Psychology of Death and Dying
Introduction to psychological aspects of death and dying. There will be a brief introduction to psychological models and demography. Death rituals and culture, communication, timeliness of death, palliative care and end of life decision making will also be discussed.

PSYCH 746 15 Points
Perception, Cognition, Action
Seminar-based introduction to theories and models linking (human, animal and machine) perception, cognition and action, with emphasis on competing approaches to perceptual-motor control and learning, using evidence from classic and contemporary research in experimental psychology and cognitive neuroscience.
Restriction: PSYCH 735

PSYCH 747 15 Points
Psychological Assessment
This course focuses on developing skills in the assessment and evaluation of constructs commonly used in psychology research and practice. We will cover the critical aspects of psychometric theory and test construction including assessments of reliability and validity, item analysis, cultural sensitivity and potential biases in measurement, and assessments involving diagnostic practices, interviewing, and behavioural observations.
Restriction: PSYCH 701

PSYCH 748 15 Points
Health Psychology Interventions
This course focuses on theoretical, practical and ethical issues concerning the design and evaluation of health-related interventions. Covers research on a variety of clinic-based and community interventions including programmes for promoting healthy diet and exercise habits, psychosocial interventions for individuals with chronic illnesses and pain management interventions.
Restriction: PSYCH 701

PSYCH 750A 15 Points
PSYCH 750B 15 Points
Applied Behaviour Analysis: Methods
A study of the principles and issues involved with the observation, measurement, and functional analysis of an individual human or animal’s behaviour in some applied setting. Particular emphasis will be placed on the rationale behind single-subject research designs, and their application to the validation of interventions aimed at modifying behaviour.
To complete this course students must enrol in PSYCH 750 A and B

PSYCH 751A 15 Points
PSYCH 751B 15 Points
Applied Behaviour Analysis: Behaviour Modification
A study of the techniques and issues involved with modifying an individual human or animal’s behaviour in some applied setting. Appropriate and effective applications of scientific principles of learning will be taught, as will pertinent topics researched in the Experimental Analysis of Behaviour. Topics will include the application of research into associative learning, reinforcement, punishment, extinction, avoidance, stimulus control and choice.
To complete this course students must enrol in PSYCH 751 A and B

PSYCH 754 15 Points
Developmental and Intellectual Disabilities
Study of the behavioural aspects, aetiologies and therapeutic interventions for disorders usually diagnosed during childhood that are associated with reduced abilities to learn. Examples include intellectual disabilities (mental retardation) and pervasive developmental disorders (eg, autism).
Restriction: PSYCH 752

PSYCH 755 15 Points
Gender, Power, and Sexuality
This seminar-based course will allow students to explore a broad range of topics such as: sexual coercion, prostitution, rape, pornography, safer sex, lesbian and gay sexuality, heterosexuality, bisexuality, sexology, sex therapy, intersex, transgender, sexuality and culture. The emphasis will be on looking at questions from the perspective of theoretical approaches such as Foucault’s work on sexuality and feminist theories.

PSYCH 757 15 Points
Advanced Applied Behaviour Analysis
Advanced education and training in applied behaviour analysis (ABA) in preparation for a professional career. Topics include ethical, professional, and practical issues confronting behaviour analysts in employment; recent research in ABA and other sciences with respect to clinical, educational, and other populations with whom behaviour analysts typically work.
Prerequisite: PSYCH 750, 751
Corequisite: PSYCH 651
Restriction: PSYCH 753

PSYCH 760 15 Points
Workplace Assessment and Development
Focuses on assessing and developing employees at work. Both organisation and employee/candidate perspectives are considered through the process of recruitment, assessment, selection, socialisation, performance, and training and development. Students will be encouraged to adopt a scientist-practitioner perspective, through class discussions and assignments.

PSYCH 761 15 Points
Organisational Psychology
Focuses on attitudes and behaviours at work that reflect or impact on the relationship between employee and employer, with a particular emphasis on topics that are proposed to impact on employee well-being and productivity (eg, job satisfaction, motivation, leadership). Students will be encouraged to adopt a scientist-practitioner perspective, through class discussions and assignments.

PSYCH 762 15 Points
Advanced Industrial, Work and Organisational Psychology
Investigates current research in selected topics in industrial, work and organisational psychology, such as occupational stress, work-related fatigue, human-machine-environment interactions, decision making, automation, technology at work and safety management.
Prerequisite and Corequisite: PSYCH 737
### Portfolio of Professional Practice Reports

A portfolio of original reports associated with the student’s practicum experience and demonstrating the ability to make appropriate use of the scientific literature in solving problems in professional practice, as required by the New Zealand Psychologists Board for the practice of psychology. For students enrolled in the PGDipAppPsych specialising in IWO. Corequisite: PSYCH 651

To complete this course students must enrol in PSYCH 763 A and B

### Clinical Practice 1 and Professional Issues

Consists of two parts: First, psychological assessment and therapy for diverse clinical populations, including adult, and child and family. Cognitive behaviour therapy and family therapy are central, but other models are included. Consideration of psychotherapy research and practical exercises are incorporated. Secondly, ethics, bicultural and cross-cultural practice, and other professional issues relevant to the practice of clinical psychology are covered. Evaluation is by internal assessment.

### Named Doctoral Courses

- **PSYCH 801**: 30 Points
  - **Scientist-practitioner Model 1**: Research based psychological assessment and therapy skills for diverse clinical populations, including adult, child and family. Cognitive-behaviour therapy and family therapy are central, but other models are included. Advanced clinical research design, ethics, bicultural and cross-cultural practice, supervision practice, and other professional issues relevant to the practice of clinical psychology are covered. Evaluation is by internal assessment. Includes one 200-hour placement in either an adult or a child and family setting. Evaluation is by internal assessment, including assessment by field supervisors.

### Science Enterprise

**Postgraduate 700 Level Courses**

**SCIENT 701** 15 Points
**Accounting and Finance for Scientists**
Builds upon scientific numeracy in exploring the sources, uses and reporting of accounting and financial information in science-based enterprises; application of capital budgeting and valuation theory to science-relevant situations; and key bases for financially-informed project and enterprise decision-making and the management of economic resources.

**SCIENT 702** 15 Points
**Marketing for Scientific and Technical Personnel**
Examines the intermediaries and end-users of technical and research-related applications, products and services; their 'customers', 'value chain', 'marketing', and related concepts in both highly-regulated and open markets; and how effective science-related marketing strategies and promotional efforts are developed and communicated.

**SCIENT 703** 15 Points
**Frontiers in Biotechnology**
An examination of how breakthrough discoveries in contemporary life sciences flow through to commercialisation. Current and emerging applications of biotechnology; includes guest lectures from New Zealand's leading biotechnologists and case studies focused particularly on medical applications.

**SCIENT 704** 15 Points
**Law and Intellectual Property**
An explanation of the legal system including basic concepts of contract and corporate law in a biotechnology context. Emphasis will be upon intellectual property laws in particular patent law and practice and other means of protecting new ideas, discoveries and inventions. Also covered will be technology licensing and basic competition and marketing law.

**SCIENT 705** 15 Points
**Research Commercialisation**
Integrative exploration of common theories, processes and models involved in commercialising scientific research. Topics include technology transfer, technological entrepreneurship, commercial potential, risk, and valuation assessment and related tools. Utilises multiple learning approaches including case studies and a 'hands-on' term project.

Prerequisite: SCIENT 701, 702

---

**SCIENT 706** 15 Points
**Commercialisation Project**
A supervised practical application of the theories, concepts and techniques of commercialisation, covered in courses SCIENT 701–705, to a research-based opportunity and its related intellectual property estate.

Prerequisite: SCIENT 701, 702, 704
Corequisite: SCIENT 703, 705

**SCIENT 707** 15 Points
**Special Topic**

**SCIENT 720** 15 Points
**Science Enterprise Research Methods**
Students will become familiar with underlying theory and best practices in the principal qualitative and quantitative methods applicable to, and useful in, thesis research on commercialisation and science-based enterprise.

**SCIENT 721** 15 Points
**Product Development and Regulatory Environments**
Aims to give students an understanding of the stages of product development for therapeutics, diagnostics and medical devices, as well as the regulatory requirements affecting product development in the Life Sciences. Project management tools and processes will also be covered in the context of product development.

**SCIENT 722** 15 Points
**Current Issues in Bioscience Enterprise**
An exploration of trends and developments of importance to Life Sciences-related enterprises and industries. Utilises multiple learning approaches, eg, independent reading, case studies, projects, guest speakers, presentations and related discussions.

**SCIENT 794A** 45 Points
**SCIENT 794B** 45 Points
**Thesis**
Research project addressing a topic relevant to the commercialisation of research. Overseen jointly by both academic and industry supervisors.

*To complete this course students must enrol in SCIENT 794 A and B*

### Science General

**Stage I**

**SCIGEN 101** 15 Points

**SCIGEN 101G** 15 Points

**SCIGEN 189** 10 Points

**Special Topic**
Selected topics in Science designed as a short credit course for exchange students coming to New Zealand. This course is only available to inbound exchange students.

Prerequisite: Permission of Head of Department
Stage II

SCIGEN 201 15 Points
Managing Science and Technology
An interdisciplinary examination of issues relating to the management of science and technology. At a policy level, topics include the international context for science and technology, the role of business and research organisations, and policies for emerging technologies. At an organisational level, issues range from strategic analysis of the business environment to planning a corporate response. At project level, topics include the management of specialist staff and resources, and implementation of research strategies.

Stage III

SCIGEN 301 15 Points
Special Topic in General Science
Prerequisite: Any 180 points

Speech Science

Postgraduate 700 Level Courses

SPCHSCI 701 15 Points
Dysphagia for Speech Language Therapists
Assessment, analysis and intervention for children and adults with dysphagia. This is a fully online course for qualified Speech-Language Therapists.
Restriction: SPCHSCI 721

SPCHSCI 711 15 Points
Introduction to Communication in Children and Adults
Communication development and disorders. Normal communication development across the lifespan, in the context of total child development, of major changes in expectations such as school and literacy, and of variations such as cultural differences and multilingualism. Applications of these concepts in an introduction to the assessment and management of communication disorders in children and of acquired disorders in adults.

SPCHSCI 712 15 Points
Linguistics for Speech Language Therapy
The study of articulatory phonetics, phonemic transcription using the International Phonetic Alphabet, and the relationship between phonetics and phonology. Additional language analysis covering morphology, syntax, semantics and pragmatics.

SPCHSCI 713 15 Points
Anatomy and Physiology for Speech Language Therapy
Anatomy and physiology of speech, language and hearing, including the respiratory, phonatory, articulatory, auditory and peripheral and central nervous systems underlying spoken communication. Application of this knowledge is through manipulation of human models and supported computer laboratories.

SPCHSCI 714 15 Points
Speech Language Therapy Clinical Practicum 1
Clinical observation under supervisor guidance in a variety of settings, establishing links between theory and practice. This course is supported by weekly tutorial sessions.

SPCHSCI 721 15 Points
Dysphagia
Assessment and management of adult and paediatric clients with dysphagia.
Restriction: SPCHSCI 701

SPCHSCI 722 15 Points
Communication Difficulties in Children
The nature of speech and language delay and disorder in children. Introduces a range of disorders focussing on: general language impairment, specific language impairment (SLI) and phonological disorders in children through pre-school and primary school ages, and language disorders in adolescence. Assessment and intervention in phonology, articulation, and all aspects of language, incorporating principles of inclusion and diversity and evidence-based practices.

SPCHSCI 723 15 Points
Communication Disorders in Adults
Assessment and management of adults with acquired communication disorders.

SPCHSCI 724 15 Points
Speech Language Therapy Clinical Practicum 2
Clinical observation and practice in a variety of settings, enabling students to work with clients under supervision. This course is supported by weekly tutorials.
Prerequisite: SPCHSCI 714

SPCHSCI 733 15 Points
Audiology for Speech Language Therapy
Study of types of hearing impairment, pathologies of the hearing mechanism, tests and clinical procedures used in audiological evaluations and hearing instrumentation.
Restriction: SPCHSCI 732

SPCHSCI 734 15 Points
Speech Language Therapy Clinical Practicum 3
Clinical practice in a variety of settings with students taking responsibility for the assessment and management of cases with supervisor guidance. Weekly tutorials support the course.
Prerequisite: SPCHSCI 724

SPCHSCI 735 15 Points
Research Methods and Ethics for Speech Language Therapy
Research design, methods and data analysis. Critical evaluation of research literature. Ethical issues in research and clinical practice.

SPCHSCI 736 15 Points
Topics in Communication Disorders in Adults
Advanced study of speech language therapy with a focus on adult populations including evidence based practice, working with diversity, complex populations, lifelong disability and ageing effects on audition and language. Implications for SLT practice in the New Zealand context.
Restriction: SPCHSCI 741

SPCHSCI 737 15 Points
Advanced Study of Speech and Language Therapy in Children
Develops depth in specific areas of difficulty including language disorders in adolescents, pre-verbal stages, and working with disabilities, particularly intellectual and physical disability and autism spectrum disorder. Develop best practice in cultural and linguistic diversity. Consolidate and extend knowledge of evidence-based practice in child speech and language.
Restriction: SPCHSCI 732
SPCHSCI 744 15 Points
Speech Language Therapy Clinical Practicum 4
Clinical practice in a variety of settings with the student demonstrating independent practice and problem solving skills. Supervisory guidance will be given and the course will be supported by weekly tutorials.
Prerequisite: SPCHSCI 734

SPCHSCI 745 15 Points
Speech Language Therapy Project
Research project relating to diagnosis and treatment of adult or paediatric communication disorders or dysphagia.

SPCHSCI 746 15 Points
Voice and Fluency
Restriction: SPCHSCI 734

Stage II

SPORTSCI 201 15 Points
Sport and Exercise Physiology 1
The biology and physiology of skeletal muscle, including its metabolism, energetics, activation and control. Training and assessment of neuromuscular strength, power and endurance. Physiological measurement of short-term power and aerobic metabolism.
Prerequisite: SPORTSCI 103, and 15 points from BIOSCI 107, MEDSCI 142

SPORTSCI 202 15 Points
Principles of Tissue Adaptation
Principles of adaptation in nerve, muscle, bone and other tissue that occur with increased use, disuse, or misuse including sports and exercise injuries. Coverage includes examples relevant to the maintenance of healthy tissues and the recovery and rehabilitation of tissue following injury or disease.
Prerequisite: SPORTSCI 103

SPORTSCI 203 15 Points
Introductory Biomechanics
Mechanical analysis of human movement, using qualitative, quantitative and predictive techniques. The focus is on sports techniques, musculoskeletal stress and locomotion.
Prerequisite: SPORTSCI 103

SPORTSCI 204 15 Points
Psychology of Physical Activity
An introduction to the study of psychology as it relates to sport, exercise, health and rehabilitation.
Prerequisite: 15 points from PSYCH 108, 109, 128, 129

SPORTSCI 206 15 Points
Exercise Nutrition
A cross-disciplinary focus on nutrition, examining nutritional enhancement of sports performance, diet and physiological function, eating disorders, energy balance, body composition and the role of diet in growth and exercise.
Prerequisite: 15 points from BIOSCI 107, MEDSCI 142

Stage III

SPORTSCI 301 15 Points
Sport and Exercise Physiology 2
Cardiopulmonary, endocrine and immune systems and their responses and adaptations to exercise and training. Physiological aspects of exercise and adaptation under different environmental conditions. Training and evaluation of anaerobic and aerobic power and endurance.
Prerequisite: SPORTSCI 201

SPORTSCI 302 15 Points
Sport and Exercise Physiology for Special Populations
Examination of the role of exercise for special
populations. Physiological responses and adaptations to exercise and training, and exercise and training recommendations for selected medical and athletic populations. Evaluation of cardiovascular, pulmonary, metabolic and neuromuscular function.

Prerequisite: SPORTSCI 301

SPORTSCI 303
15 Points
Advanced Biomechanics
Advanced quantitative techniques in biomechanics used to study human movement including mathematical modelling and signal processing. An application area such as occupational ergonomics or clinical gait analysis will be used to demonstrate the biomechanical techniques.

Prerequisite: SPORTSCI 203

SPORTSCI 304
15 Points
Sport Psychology
Examination of psychological factors affecting behaviour and performance in exercise and sport. The individual performer is the major consideration, but group influences on individual performance are also considered.

Prerequisite: SPORTSCI 204, or 45 points at Stage II in Psychology with at least a B– average grade

SPORTSCI 305
15 Points
Movement Neuroscience
Examines brain and spinal cord organisation and function related to movement, and the neurological mechanisms involved in the planning, execution and control of movement in health and disease. Introduces the concept of neural plasticity as it relates to motor skill learning and recovery after injury in both healthy and neurologically impaired populations.

Prerequisite: SPORTSCI 201

SPORTSCI 306
15 Points
Technique Assessment in Movement Analysis
An overview of current biomechanics methodology for assessing various human movements, including sport and ergonomics. Emphasis is on image analysis, force measurement techniques and electromyography. A technique assessment project is completed.

Prerequisite: SPORTSCI 303

SPORTSCI 309
15 Points
SPORTSCI 309A
7.5 Points
SPORTSCI 309B
7.5 Points
Practicum in Sport and Exercise Science
This practicum provides an opportunity to combine theoretical knowledge with practical skills in exercise rehabilitation, physical/cognitive ergonomics, or sport science settings.

Prerequisite: Permission of Head of Department, and three of SPORTSCI 201, 202, 203, 204

To complete this course students must enrol in SPORTSCI 309 A and B, or SPORTSCI 309

Postgraduate 700 Level Courses

SPORTSCI 702
15 Points
Project in Sport and Exercise Science
Provides students with an opportunity to collect data in an area of interest, with the aim of validating an area of study towards their theses.

SPORTSCI 703
15 Points
Cardiac Rehabilitation
The role of the exercise scientist in cardiac rehabilitation. Topics include electrocardiography, exercise testing and exercise prescription. The course combines theory and laboratory/clinical study of these topics.

SPORTSCI 704
15 Points
Advanced Techniques in Biomechanics
A laboratory-based course which explores the theoretical foundations of advanced data collection and analysis of biomechanical data and offers students opportunities to experience practical, hands-on laboratory experiences that will demonstrate these theoretical foundations.

SPORTSCI 705
15 Points
Seminar in Sport and Exercise Science
The role of science in sport – current developments and future needs. Practical seminar and research skills. Meta-analysis and critiquing of journal articles. Development and presentation of literature reviews.

SPORTSCI 706
15 Points
Seminar in Advanced Exercise Physiology
A seminar-based course examining the physiological responses and adaptations to physical exercise or inactivity. Students evaluate, present, and discuss seminal and contemporary research publications on selected topics largely focusing on the cardiovascular, metabolic, and musculoskeletal systems. Emphasis will be placed upon investigations of the explanatory elements of adaptation, from the level of the genome to the living human, and the use of relevant contemporary experimental techniques.

Restriction: PHYSIOL 706

SPORTSCI 707
15 Points
Advanced Seminar in Biomechanics
A seminar and laboratory-based course which examines theoretical and practical concerns in quantitative biomechanical data collection and analysis. Topics include: signal processing methods, 2-D and 3-D video analysis, human body modelling.

SPORTSCI 708
15 Points
Advanced Seminar in Movement Neuroscience
Seminar based course which examines brain organisation and function related to movement in health and disease. Emphasis is placed on contemporary techniques and paradigms in the field of movement neuroscience, with special emphasis on clinical populations that exhibit impaired movement. Neural plasticity is a central theme.
SPORTSCI 710  15 Points
Exercise Rehabilitation
The role of exercise in a multi-component approach to rehabilitation. Risks and benefits of exercise, particularly with respect to sedentary individuals and/or those with medical considerations. Exercise test administration. Exercise prescription and monitoring, physical and functional assessment of performance.

SPORTSCI 712  15 Points
Advanced Exercise Prescription
Use of advanced techniques for interpreting physical test results used in the prescription of accurate and progressive exercise programmes for people with co-existing health problems including disease and injury. Applies the principles of exercise prescription in combination with scientific evidence for specific exercise modalities. Reviews the American College of Sports Medicine guidelines for exercise prescription and progression, their scientific evidence as well as baseline history taking, rationale, contraindications, privacy issues.

SPORTSCI 713  15 Points
Sport, Exercise and Rehabilitation Psychology
A course designed to provide a comprehensive perspective of the role of psychology and psychological techniques in the areas of sport and exercise. Historical, theoretical, clinical and methodological considerations will be examined.

SPORTSCI 714  15 Points
Special Topics in Sport and Exercise Science
Prerequisite: Permission of Head of Department

SPORTSCI 781A  15 Points
SPORTSCI 781B  15 Points
Clinical Exercise Practicum I
A body of practical supervised work of not less than 200 hours, including some laboratory work. The principles of exercise physiology, testing, and prescription will be integrated into a practical programme for delivery to premorbid and low-risk clinical populations.
To complete this course students must enrol in SPORTSCI 781 A and B

SPORTSCI 782A  30 Points
SPORTSCI 782B  30 Points
Clinical Exercise Practicum II
A body of practical supervised work of not less than 400 hours. The delivery of exercise rehabilitation services to clinical populations especially individuals who have cardiac, musculoskeletal, neurological, pulmonary, immunological, neoplastic, mood, and metabolic disorders, and post-surgical cases.
To complete this course students must enrol in SPORTSCI 782 A and B

SPORTSCI 783A  15 Points
SPORTSCI 783B  15 Points
Clinical Exercise Physiology
A body of advanced theoretical and administrative work related to exercise prescription and service delivery. The application of the principles of exercise physiology to clinical populations, especially individuals who have cardiac, musculoskeletal, neurological, pulmonary, immunological, neoplastic, mood, and metabolic disorders, post-surgical cases, the elderly, and for individuals at risk of developing diseases as a consequence of inactivity.
To complete this course students must enrol in SPORTSCI 783 A and B

SPORTSCI 787A  15 Points
SPORTSCI 787B  15 Points
Dissertation in Clinical Exercise Physiology
A scholarly discussion of a topic related to clinical exercise physiology.
To complete this course students must enrol in SPORTSCI 787 A and B

SPORTSCI 788A  22.5 Points
SPORTSCI 788B  22.5 Points

Statistics

Stage I

STATS 101  15 Points
STATS 101G  15 Points
Introduction to Statistics
Intended for anyone who will ever have to collect or make sense of data, either in their career or private life. Steps involved in conducting a statistical investigation are studied with the main emphasis being on data analysis and the background concepts necessary for successfully analysing data, extrapolating from patterns in data to more generally applicable conclusions and communicating results to others. Other topics include probability; confidence intervals, statistical significance, t-tests, and p-values; nonparametric methods; one-way analysis of variance, simple linear regression, correlation, tables of counts and the chi-square test.
Restriction: STATS 102, 107, 108, 191

STATS 108  15 Points
Statistics for Commerce
The standard Stage I Statistics course for the Faculty of Business and Economics or for Arts students taking Economics courses. Its syllabus is as for STATS 101, but it places more emphasis on examples from commerce.
Restriction: STATS 101, 102, 107, 191

STATS 125  15 Points
Probability and its Applications
Probability, conditional probability, Bayes theorem, random walks, Markov chains, probability models. Illustrations will be drawn from a wide variety of applications including: finance and economics; biology; telecommunications, networks; games, gambling and risk.
Corequisite: MATHS 108 or 150
Restriction: STATS 210

STATS 150  15 Points
STATS 150G  15 Points
Lies, Damned Lies, and Statistics
Examines the uses, limitations and abuses of statistical information in a variety of activities such as polling, public health, sport, law, marketing and the environment. The statistical concepts and thinking underlying data-based arguments will be
explored. Emphasises the interpretation and critical evaluation of statistically based reports as well as the construction of statistically sound arguments and reports. Some course material will be drawn from topics currently in the news.

Stage II

STATS 201 15 Points
Data Analysis
A practical course in the statistical analysis of data. Interpretation and communication of statistical findings. Includes exploratory data analysis, the analysis of linear models including two-way analysis of variance, experimental design and multiple regression, the analysis of contingency table data including logistic regression, the analysis of time series data, and model selection.
Prerequisite: 15 points from STATS 101–108, 191
Restriction: STATS 207, 208, BIOSCI 209

STATS 207 15 Points
Data-centred Investigation and Analysis
A practical course in the statistical analysis of data, with hands on experience in research design and execution. Includes exploratory data analysis, the analysis of linear models including two-way analysis of variance, experimental design and multiple regression, the analysis of contingency table data including logistic regression, the analysis of time series data, and model selection. The primary coursework assessment will be a group project.
Prerequisite: 15 points from STATS 101, 108, 191
Restriction: STATS 201, 208, BIOSCI 209

STATS 208 15 Points
Data Analysis for Commerce
A practical course in the statistical analysis of data. There is a heavy emphasis in this course on the interpretation and communication of statistical findings. Topics such as exploratory data analysis, the analysis of linear models including two-way analysis of variance, experimental design and multiple regression, the analysis of contingency table data including logistic regression, the analysis of time series data, and model selection will be covered.
Prerequisite: 15 points from STATS 101–108, 191
Restriction: STATS 201, 207, BIOSCI 209

STATS 210 15 Points
Statistical Theory
Probability, discrete and continuous distributions, likelihood and estimation, hypothesis testing. This course is a prerequisite for the BSc(Hons) and masters degree in statistics.
Corequisite: 15 points from MATHS 208, 250 or equivalent
Restriction: STATS 225

STATS 220 15 Points
Data Technologies
Explores the processes of data acquisition, data storage and data processing using current computer technologies. Students will gain experience with and understanding of the processes of data acquisition, storage, retrieval, manipulation, and management. Students will also gain experience with and understanding of the computer technologies that perform these processes.
Prerequisite: 15 points at Stage I in Computer Science or Statistics

Stage III

STATS 301 15 Points
Statistical Programming and Modelling using SAS
Introduction to the SAS statistical software with emphasis on using SAS as a programming language for purposes of database manipulation, simulation, statistical modelling and other computer-intensive methods.
Prerequisite: 15 points from STATS 201, 207, 208, BIOSCI 209

STATS 302 15 Points
Applied Multivariate Analysis
Covers the exploratory analysis of multivariate data, with emphasis on the use of statistical software and reporting of results. Topics covered include: techniques for data display, dimension reduction and ordination, cluster analysis, multivariate ANOVA and associated methods.
Prerequisite: 15 points from STATS 201, 207, 208, BIOSCI 209

STATS 310 15 Points
Introduction to Statistical Inference
Estimation, likelihood methods, hypothesis testing, multivariate distributions, linear models.
Prerequisite: STATS 210 or 225, and 15 points from MATHS 208, 250 or equivalent

STATS 320 15 Points
Applied Stochastic Modelling
Introduction to stochastic modelling, with an emphasis on queues and models used in finance. Behaviour of Poisson processes, queues and continuous time Markov chains will be investigated using theory and simulation.
Prerequisite: 15 points from STATS 125, 210, 225 and 15 points from STATS 201, 207, 208, 220, BIOSCI 209

STATS 325 15 Points
Stochastic Processes
Introduction to stochastic processes, including generating functions, branching processes, Markov chains, random walks.
Prerequisite: 15 points from STATS 125, 210, 320, with at least a B pass. 15 points from MATHS 208, 250, 253
STATS 326 15 Points
Applied Time Series Analysis
Components, decompositions, smoothing and filtering, modelling and forecasting. Examples and techniques from a variety of application areas. Prerequisite: 15 points from STATS 201, 207, 208, BIOSCI 209

STATS 330 15 Points
Statistical Modelling
Application of the generalised linear model and extensions to fit data arising from a range of sources including multiple regression models, logistic regression models, and log-linear models. The graphical exploration of data. Prerequisite: 15 points from STATS 201, 207, 208, BIOSCI 209

STATS 331 15 Points
Introduction to Bayesian Statistics
Introduces Bayesian data analysis using the WinBUGS software package and R. Topics include the Bayesian paradigm, hypothesis testing, point and interval estimates, graphical models, simulation and Bayesian inference, diagnosing MCMC, model checking and selection, ANOVA, regression, GLMs, hierarchical models and time series. Classical and Bayesian methods and interpretations are compared. Prerequisite: 15 points from STATS 201, 207, 208, BIOSCI 209

STATS 340 15 Points
Design and Analysis of Surveys and Experiments
Design, implementation and analysis of surveys including questionnaire design, sampling design and the analysis of data from stratified, cluster and multistage sampling. Design and implementation issues for scientific experiments including blocking, replication and randomisation and the analysis of data from designs such as complete block, balanced incomplete block, Latin square, split plot, factorial and fractional designs. Prerequisite: 15 points from STATS 201, 207, 208, 210, 225, BIOSCI 209

STATS 370 15 Points
Financial Mathematics
Mean-variance portfolio theory; options, arbitrage and put-call relationships; introduction of binomial and Black-Scholes option pricing models; compound interest, annuities, capital redemption policies, valuation of securities, sinking funds; varying rates of interest, taxation; duration and immunisation; introduction to life annuities and life insurance mathematics. Prerequisite: 15 points at Stage II in Statistics or BIOSCI 209; 15 points at Stage II in Mathematics

STATS 380 15 Points
Statistical Computing
Statistical programming using the R computing environment. Data structures, numerical computing and graphics. Prerequisite: 15 points from STATS 201, 207, 208, 220, BIOSCI 209

STATS 390 15 Points
Topics in Statistics
Postgraduate 700 Level Courses

STATS 701 15 Points
Special Topic in Statistics 1

STATS 702 15 Points
Special Topic in Statistics 2

STATS 705 15 Points
Topics in Official Statistics
Official statistics, data access, data quality, demographic and health statistics, other social statistics, economic statistics, analysis and presentation, case studies in the use of official statistics.

STATS 708 15 Points
Topics in Statistical Education
Covers a wide range of research in statistics education at the school and tertiary level. There will be a consideration of, and an examination of, the issues involved in statistics education in the curriculum, teaching, learning, technology and assessment areas.

STATS 710 15 Points
Probability Theory
Fundamental ideas in probability theory: sigma-fields, laws of large numbers, characteristic functions, the Central Limit Theorem. Prerequisite: STATS 310, 320 or 325

STATS 720 15 Points
Stochastic Processes
Continuous-time jump Markov processes. A selection of topics from: point processes, renewal theory, martingales, Brownian motion, Gaussian processes and inference for stochastic processes. Prerequisite: STATS 320 or 325

STATS 721 15 Points
Special Topic in Applied Probability

STATS 722 15 Points
Financial Mathematics

STATS 723 15 Points
Stochastic Methods in Finance
Contingent claims theory in discrete and continuous time. Risk-neutral option pricing, Cox-Ross-Rubinstein and Black-Scholes models, stochastic calculus, hedging and risk management. Prerequisite: STATS 320 or 225

STATS 724 15 Points
Operations Research
Continuous-time Markov processes; optimisation for jump Markov processes; Markov decision processes; queueing theory and stochastic networks. Prerequisite: 15 points from STATS 320, 325, 720 with at least B+

STATS 725 15 Points
Topics in Operations Research

STATS 726 15 Points
Time Series
Stationary processes, modelling and estimation in the time domain, forecasting and spectral analysis.

STATS 727 15 Points
Special Topic in Time Series

STATS 730 15 Points
Statistical Inference
Fundamentals of likelihood-based inference, including sufficiency, conditioning, likelihood principle, statistical paradoxes. Theory and practice of maximum likelihood. Examples covered may include survival
analysis, GLM’s, nonlinear models, random effects and empirical Bayes models, and quasi-likelihood.  

**Prerequisite: STATS 310**

**STATS 731 15 Points**  
**Bayesian Inference**
A course in practical Bayesian statistical inference covering: the Bayesian approach specification of prior distributions, decision-theoretic foundations, the likelihood principle, asymptotic approximations, simulation methods, Markov Chain Monte Carlo methods, the BUGS and CODA software, model assessment, hierarchical models, application in data analysis.  

**Prerequisite: STATS 210 or 225**

**STATS 732 15 Points**  
**Topics in Statistical Inference**

**STATS 740 15 Points**  
**Sample Surveys**
This is a course in the design, management and analysis of sample surveys. Topics such as the following are studied: Types of Survey. Revision of statistical aspects of sampling. Preparing surveys. Research entry: problem selection, sponsorship and collaboration. Research design: methodology and data collection; Issues of sample design and sample selection. Conducting surveys: Questionnaires and questions; Non-sampling issues: Project management; Maintaining data quality. Concluding surveys: Analysis; Dissemination.  

**Prerequisite: 15 points from STATS 340, 341**

**STATS 741 15 Points**  
**Special Topic in Sampling**

**STATS 747 15 Points**  
**Statistical Methods in Marketing**
Stochastic models of brand choice, applications of General Linear Models in marketing, conjoint analysis, advertising media models and marketing response models.

**STATS 750 15 Points**  
**Experimental Design**
The design and analysis of data from experiments involving factorial and related designs and designs which have the property known as general balance (this includes most of the standard designs), and more general designs with blocking and replication. Response surface methodology. Sequential experimentation.  

**Prerequisite: 15 points from STATS 340, 351**

**STATS 751 15 Points**  
**Special Topic in Experimental Design**

**STATS 760 15 Points**  
**A Survey of Modern Applied Statistics**
A survey of techniques from modern applied statistics. Topics covered will be linear, non-linear and generalised linear models, modern regression including CART and neural networks, mixed models, survival analysis, time series and spatial statistics.  

**Prerequisite: STATS 310, 330**

**STATS 761 15 Points**  
**Mixed Models**
Statistical techniques for analysis of data from medical studies, with an emphasis on mixed modelling. Topics such as the use of SAS for analysing medical data with applications in epidemiology. Analysis of multicentre trials (random effects models), repeated measures data (covariance pattern and random coefficient models), matched case-control studies and the use of generalised linear models in medical statistics will be studied.  

**STATS 762 15 Points**  
**Special Topic in Regression**

**STATS 763 15 Points**  
**Advanced Regression Methodology**

**STATS 764 15 Points**  
**Analysis of Failure Time Data**
Topics in the theory and analysis of survival data. Survival data arises both in the Health Sciences and in industrial testing. Such data is often subject to censoring and truncated data. Both parametric and nonparametric methods, such as Kaplan-Meier estimates, will be covered. Other topics may include: proportional hazards regression, censored data and reliability.  

**Prerequisite: STATS 310**

**STATS 766 15 Points**  
**Multivariate Analysis**
A selection of topics from multivariate analysis, including: advanced methods of data display (eg, Correspondence and Canonical Correspondence Analysis, Biplots, and PREFMAP) and an introduction to classification methods (eg, various types of Discriminant Function Analysis).  

**Prerequisite: STATS 302**

**STATS 767 15 Points**  
**Topics in Multivariate Analysis**

**STATS 770 15 Points**  
**Introduction to Medical Statistics**
An introduction to ideas of importance in medical statistics, such as measures of risk, basic types of medical study, causation, ethical issues and censoring, together with a review of common methodologies.

**STATS 771 15 Points**  
**Topics in Biostatistics 1**

**STATS 773 15 Points**  
**Design and Analysis of Clinical Trials**
The theory and practice of clinical trials, including: design issues, data management, common analysis methodologies, intention to treat, compliance, interim analyses and ethical considerations.

**STATS 775 15 Points**  
**Design of Ecological Experiments**
Factorial designs, nested hierarchies and mixed models; variance components and expected mean squares; precision and power analysis; multivariate analysis in ecology; designs to detect environmental impact; resampling methods and permutation tests for complex designs.

**STATS 776 15 Points**  
**Topics in Environmental and Ecological Statistics**

**STATS 777 15 Points**  
**Professional Skills for Statisticians**
Statistical software, data management, data integrity.
data transfer, file processing, symbolic manipulation, document design and presentation, oral presentation, professional ethics.

**STATS 780 15 Points**  
**Statistical Consulting**  
Students will learn about the practicalities of statistical consulting. Students will carry out a statistical consulting project, including the writing of a report, under the supervision of a member of the academic staff.

**STATS 781 30 Points**

**STATS 781A 15 Points**

**STATS 781B 15 Points**

**Honours Project in Statistics**  
*Restriction: STATS 789*  
To complete this course students must enrol in STATS 781 A and B, or STATS 781

**STATS 782 15 Points**  
**Statistical Computing**  
Professional skills, advanced statistical programming, numerical computation and graphics.

**STATS 783 15 Points**  
**Simulation and Monte Carlo Methods**  
A practical introduction to modern simulation and Monte Carlo techniques and their use to simulate real situations and to solve difficult statistical inferential problems whose mathematical analysis is intractable.

**STATS 784 15 Points**  
**Statistical Data Mining**  
Data cleaning, missing values, data warehouses, security, fraud detection, meta-analysis, and statistical techniques for data mining such as regression and decision trees, modern and semiparametric regression, neural networks, statistical approaches to the classification problem.

**STATS 785 15 Points**  
**Topics in Statistical Data Management**

**STATS 786 15 Points**  
**Special Topic in Statistical Computing**

**STATS 787 15 Points**

**Wine Science**

**Stage II**

**WINESCI 201 15 Points**  
**Introduction to Wine Science**  
An introduction to grape growing and wine. Topics covered include history of wine, geography and terroir, grape growing, winemaking technology, microbiology, sensory evaluation, and health considerations of wine.

A special emphasis on grape growing and winemaking in New Zealand.  
*Prerequisite: Any 120 points passed*

---

**Postgraduate 700 Level Courses**

**WINESCI 701 15 Points**  
**Winemaking in a New Zealand Setting**  
The principles and practices of local winemaking are reviewed and compared with international counterparts to highlight the distinctive characteristics of winemaking in New Zealand. A microvinification project is undertaken in which students begin with an allotment of grapes, monitor the fermentation using a range of analytical techniques, and make decisions which affect the style of wine they produce.

**WINESCI 702 15 Points**  
**The Science Behind Grape Production**  
Develops understanding of the contemporary scientific knowledge and research that is of relevance to grape production for winemaking. The application of traditional and modern molecular methods in plant science and plant pathology will be discussed in relation to the selection, improvement and management of vines and grape attributes. Research issues of national and international relevance to viticulture will also be addressed.

**WINESCI 703 15 Points**  
**The Science Behind Winemaking**  
Follows on from 702 and focuses on the contemporary scientific knowledge and research that is of relevance to winemaking, commencing from the point of grape harvest. The application of traditional and modern methods in biochemistry and microbiology will be discussed. Research issues of national and international relevance to winemaking will also be addressed.

**WINESCI 704 15 Points**  
**Sensory Evaluation and Statistical Methods**  
The principles of sensory science, sensory analysis of wine, differences among wine types, regional styles and grape types will be covered. Emphasis will be placed on those components which influence sensory appeal. The application of statistical methods to wine sampling and to the design of sensory panels will be overviewed.

**WINESCI 705 15 Points**

**WINESCI 705A 7.5 Points**

**WINESCI 705B 7.5 Points**

**Project in Wine Science**  
Students will gain a thorough understanding of the current knowledge on a selected topic associated with wine science and have experience in writing a research proposal and in giving a presentation to the peer group.

*To complete this course students must enrol in WINESCI 705 A and B, or WINESCI 705*
WINESCI 706  
**The Business of Wine Production**  
15 Points  
Students will be introduced to the economics of grape growing, winemaking, winery design and management. Distribution and marketing will be introduced. Special topics including wine law, use and negotiation of contracts small business development, stock valuation, issues of appellations, labelling and brand development will be taught. Environmental and resource management issues and health and safety regulations will be covered.

WINESCI 707  
**Topics in Wine Science**  
15 Points  
A number of advanced or special topics in wine science. This course may not be offered every year; further information may be obtained from the School of Chemical Sciences.  
*To complete this course students must enrol in WINESCI 707 A and B, or WINESCI 707*

WINESCI 708  
**Post-fermentation Processes in Winemaking**  
15 Points  
Covers the theory and practice of fining, filtration and other methods of wine clarification. Chemical and sensory effects of barrel and tank aging of red and white wine will be covered as well as blending decisions and stabilisation. Quality control methods used during processing, aging and packaging will also be addressed.

WINESCI 796A  
**MSc Thesis in Wine Science**  
60 Points  
Advanced research on an aspect of wine science. This may be undertaken with the Wine Industry CRIs and University staff.  
*To complete this course students must enrol in WINESCI 796 A and B*

---

**General Education**

**Accounting**

**Stage I**

ACCTG 151G  
**Financial Literacy**  
15 Points  
People who understand the basic principles of finance are likely to get much more mileage out of their money – whether spending, borrowing, saving or investing – than those who do not. Develop an understanding of how to be in control of spending and saving: understand borrowing; make informed investment decisions; know broadly what to insure and what not to; recognise scams and consider whether money is the key to happiness.  
*Restriction: May not be taken by students with a concurrent or prior enrolment in Accounting or Finance courses*

**Anthropology**

**Stage I**

ANTHRO 104G  
**Peoples and Cultures of the Pacific**  
15 Points  
A survey of the peoples of Pacific Islands through the perspectives of archaeology, biological anthropology, ethnomusicology, linguistics and social anthropology.

ANTHRO 106G  
**Question of Race and Racism**  
15 Points  
International, cross-cultural and interdisciplinary perspectives question ‘race’ and ‘racism’. Why does the concept have such social and political potency? What are the impacts of concepts of race and practices of racism and anti-racism on individuals, families, communities, nation-states and empires, and in Aotearoa New Zealand and the Pacific in particular?

ANTHRO 107G  
**Issues and History in Popular Music**  
15 Points  
A survey of popular music styles, artists, sub-cultures and issues that explores facets such as genre, the music industry, music and politics, music videos, the sales process, race and identity, and gender theory. Core theory and writers in popular music studies are introduced and popular music is used to explore societal changes in class, ethnicity, gender, sexuality, youth, and global economic and cultural processes.  
*Note: Does not meet the General Education requirement for BMus or BMus conjoints.*  
*Restriction: POPMUS 106, 106G*

**Architectural History, Theory and Criticism**

**Stage I**

ARCHHTC 102G  
**Modern Architecture and Urbanism**  
15 Points  
Examines through case studies the cultural contexts that shaped the development of architecture, urban design, landscape and the environment during the twentieth century. Emphasis is placed on the historical developments that influenced changes in style and the theoretical contexts that shaped attitudes towards inhabitation, social organisation, national identity, and cultural self-expression, amongst other things.  
*Restriction: ARCHHTC 100*

**Art History**

**Stage I**

ARTHIST 114G  
**Reading Images**  
15 Points  
Is seeing learned? Can an image be read in the same way as a text? Understanding images is central to everyday life. Visual literacy is fundamental to all disciplines. This course provides students with tools for making sense of various kinds of images and objects: photographs, advertisements, paintings, film, television, comics, cartoons, monuments, buildings, maps, landscape, digital and internet images.

ARTHIST 115G  
**Global Art Histories**  
15 Points  
A broad survey of visual art spanning from the early modern period to the contemporary. Students will be introduced to a range of art practices situated within a global context and will consider art works produced in Māori and Pacific cultures alongside Indian, South Asian, Middle Eastern, European and American traditions.
### Asian Studies

**Stage I**

**ASIAN 140G 15 Points**

**New Zealand and Asia**

Asia and its interrelationship with New Zealand, including Asia’s growing presence in New Zealand in all its manifestations, and the evolving political, social, economic, cultural, and strategic relations between this country and Asia. Topics will include historical and contemporary ties with Asia, Asian migration, literature, media and films. The course will focus especially on South-East and East Asia.

### Biological Sciences

**Stage I**

**BIOSCI 100G 15 Points**

**Antarctica: The Frozen Continent**

A general introduction to Antarctica and its environs including the Southern Ocean and the sub-Antarctic islands. Emphasis will be placed on the evolution of Antarctica and how resident plants, animals and micro-organisms have adapted to cope with the extreme environment. Specific topics to be addressed include: the history of Antarctic exploration and its impact on the development of Antarctic science, Antarctic ecosystems, Antarctica as a wilderness region, and the impact of humans including the exploitation of resources and the effects of pollution. This course is suitable for students with both science and non-science backgrounds.

**BIOSCI 104G 15 Points**

**New Zealand Ecology and Conservation**

An introduction to the diversity of animals and plants in New Zealand including endemic, native and introduced species, biogeographical and evolutionary relationships, community structure and interrelationships, behaviour and ecology. Māori perspectives in biology, and current conservation, environmental, social, animal welfare, and economic issues relevant to New Zealand biology.

### Business

**Stage I**

**BUSINESS 151G 15 Points**

**Communication in a Multicultural Society**

Develops communication knowledge and skills for students’ careers and interpersonal and intercultural relationships in this theory-based, but practical study of communication knowledge. Offers opportunities to improve your communication knowledge, competencies and skills through the study of interpersonal and intercultural relationships, information literacy, different forms of writing, group communication processes, oral presentations and the impact of technology on communication behaviours. **Restriction: BUSINESS 291, MGMT 291**

### Chemical and Materials Engineering

**Stage I**

**CHEMMAT 100G 15 Points**

**Materials of the Modern World**

Every aspect of daily living is influenced in some way by the materials that surround us. Ceramics, metals, polymers, and composites; each has its own properties which have, over time, influenced the development of modern technological societies. Take a moment to imagine a world without metal, for example, to see how central the science of materials is to everyday life. This course will explore, at a non-specialist level, the basic principles governing the properties and behaviour of a wide variety of common materials and examine their applications and limitations.

### Chemistry

**Stage I**

**CHEM 100G 15 Points**

**Molecules that Changed the World**

The impact of chemistry on the modern world will be explored by focusing on the stories of specific molecules, including penicillin, DDT and nylon. Their discovery, the underlying chemical principles that explain their behaviour, their impact on our lives including social and scientific issues that arise from their use, and their likely impact on the future will be investigated. **Prerequisite: No formal prerequisite, but the course assumes a science background at Year 11 or higher**

### Chinese

**Stage I**

**CHINESE 100G 15 Points**

**Beginning Modern Chinese 1**

Designed to provide basic written and spoken skills in modern standard Chinese (Mandarin, Putonghua) for beginners. **Restriction: CHINESE 110, 210, 310. May not be taken if a more advanced language acquisition course in this subject has previously been passed**

### Classical Studies

**Stage I**

**CLASSICS 110G 15 Points**

**Classical Mythology Through Tragedy**

A study of the mythology of ancient Greece and Rome through the works of tragic playwrights such as Aeschylus, Sophocles, Euripides and Seneca.

### Commercial Law

**Stage I**

**COMILAW 151G 15 Points**

**The (Un)Lawful World: Law in Contemporary Life**

An examination of and guide to the laws and legal institutions that shape contemporary life. The focus will be on the laws that people are most likely to brush up against in everyday life and current legal controversies. Topics may include crime and the criminal justice system, residential tenancies,
employment disputes, consumer transactions, and the protection of creativity and innovation.

Computer Science

Stage I

COMPSCI 111G 15 Points
Mastering Cyberspace: An Introduction to Practical Computing
A practical introduction to computing. Topics include: web design, an overview of computer hardware and operating systems, effective use of common applications, using the internet as a communication medium, applying programming concepts, and social implications of technology.

Cook Islands Maori

Stage I

COOKIS 101G 15 Points
Conversational Cook Islands Maori
Gives students a grounding in conversational Cook Islands Maori language, allowing them to develop basic skills in listening and speaking. Intended for students with no previous knowledge of the language, and those with limited fluency. Restriction: COOKIS 102. May not be taken if a more advanced language acquisition course in this subject has previously been passed.

Dance Studies

Stage I

DANCE 101G 15 Points
Introduction to Dance and Creative Processes
To develop an understanding of our moving bodies through movement awareness, dance improvisation, choreography and creative and analytic writing. Students will undertake both theoretical and practical classes focusing on a range of practices that dancers and movement practitioners use to facilitate kinaesthetic awareness, experimentation, communication and choreography. Students will explore somatic theory and practice, improvisation scores, choreography and dance analysis. (DANCE 101G not available for BDanceSt)

Stage II

DANCE 200G 15 Points
Dance and Culture
Examines the interrelationship between dance and wider political and cultural movements through practical dance classes and theoretical investigations into diverse cultural environments around the world. Students physically and theoretically engage in the study of various dance forms such as Tango, Salsa, Dabkeh, traditional Chinese dance and Bharata Natyam. Prerequisite: 60 points at Stage I in any subject(s)

Disability Studies

Stage I

DISABLTY 113G 15 Points
Making Disabilities: The Construction of Ideas
Examines the expression of social and cultural ideas of disability in popular culture through film, television and print media. The course aims to develop skills to examine the construction and maintenance of concepts of disability and disabling identities in popular culture. The consequences of these processes are also discussed and their implications for perpetuating social devaluation, discrimination, and disadvantage.

Economics

Stage I

ECON 151G 15 Points
Understanding the Global Economy
Economics affects our daily lives and the global environment in many ways. Through the media we are constantly made aware of price increases, interest rate changes, exchange rate movements and balance of payments problems, growth and recessions, standard of living comparisons, regional trading agreements. What does it all mean and how does it all work? Restriction: May not be taken by students with a concurrent or prior enrolment in Economics courses

Education

Stage I

EDUC 121G 15 Points
How People Learn
Focuses on learning in formal and informal settings and addresses such questions as: why do some things seem easier to learn than others, why do we forget things we once knew, and why do some people learn faster or better than others? Examines the nature of intelligence and how to help personal learning or the learning of others. Restriction: EDUC 111, 117

EDUC 122G 15 Points
Learning Sexualities
How and what do we learn about sexualities in New Zealand? Learning about sexualities is viewed as occurring both formally (eg, through sexuality education) and informally (eg, through the media) in a diversity of social sites. Schools are examined as one significant site where students are offered sexual meanings. The historical derivation and current context of contemporary education about sexuality along with its social effects are investigated. Restriction: ACE 535.507

Engineering General

Stage I

ENNGEN 100G 15 Points
Technological Choices for the New Millennium
A consideration of technological choices to support informed decision making in the use of technology in modern society. The course will be themed around important questions such as: will water be the new oil? Is nuclear power the only practical solution to our energy demands? Nanotechnology – how small can or should we go? Are cell phones safe?
English

Stage I

ENGLISH 121G 15 Points
Reading/Writing/Text
A course developing University-wide skills of reading, writing and analysis. Addresses the needs of students in both English and other disciplines where both writing and reading have an important role in learning. The course fosters personal writing skills and also introduces writing as a subject of study in itself.

Stage II

ENGLISH 241G 15 Points
Literature and Science
Explores the relations between literature and science past and present, including science fiction, science in fiction, creativity and criticism in science and in literature, narrative and metaphor as ways of understanding in science and in literature, literature about science, science writing (science as literature), science on literature and science and literature on human nature.
Prerequisite: 90 points passed

Environmental Science

Stage I

ENVSCI 101G 15 Points
Environment, Science and Management
Explores the science behind key environmental issues to recognise the role environmental science plays in understanding the interaction between humans and the environment. The complexity of environmental problems and the difficult task of integrating science, knowledge and values are discussed.

European Studies

Stage I

EUROPEAN 100G 15 Points
Thinking Europe
An introduction to the study of Europe, organised around a number of major themes, including linguistic and ethnic groupings, historical periods, literary and cultural movements, religious and philosophical traditions, and political and cultural figures. An ideal course for students wishing to explore European culture and civilisation.

Film, Television and Media Studies

Stage I

FTVMS 110G 15 Points
Advertising and Society
A critical examination of advertising and advertisements focusing on the role advertising plays in consumer culture. Advertisements from a diverse range of media are studied in order to analyse how advertisements construct and disseminate meaning. The course investigates how advertising engages with the logic of wider cultural and global transformations with consideration given to both consumer and industry perspectives.

Stage II

FTVMS 215G 15 Points
Reading Contemporary Films
Considers ways of analysing and interpreting contemporary films. The aim is to develop students' skills of close reading through the analysis of a range of contemporary films that represent a number of narrative and cinematic styles, both 'mainstream' and 'alternative'.
Prerequisite: 90 points passed
Restriction: FTVMS 112

Fine Arts

Stage II

FINEARTS 210G 15 Points
Understanding Contemporary Visual Arts Practice
How does the contemporary artist and designer work? This course presents first hand, locally engaged practitioners’ perspectives on creative practice. On successful completion of this course students will be able to access local, contemporary art and design with confidence, and to discuss examples of practitioners' methodologies and areas of investigation. Course work will involve active exploration of the local art world.
Prerequisite: 60 points at Stage I in any subject/s

FINEARTS 211G 15 Points
Understanding Contemporary Fashion Design
Investigates the relationship between fashion design and identity to build understanding of the increasing rapidity of clothing change as both the product of individual choice and the manifestation of a need for community. The emphasis will be on the consumption of fashion and its relationship to the human body with reference to fashion theory in the context of the broader literatures of gender, class and ethnicity.

French

Stage I

FRENCH 101G 15 Points
Introductory French Language 1
This is a four-skill language course (reading, writing, speaking, listening), teaching vocabulary and structure using up-to-date methodology and multimedia materials, for beginners or near beginners. Students who have achieved 12-16 credits in Level 2 NCEA French should enrol in FRENCH 102. FRENCH 101 does not count towards a major in French.
Restriction: FRENCH 151, 161. May not be taken if a more advanced language acquisition course in this subject has previously been passed

General Education

Stage I

GENED 101G 15 Points
Global Issues, Sustainable Futures
The basis for sustainability – social issues such as population and consumption, environmental issues such as climate change, limited resources and environmental degradation. Discusses the roles that various disciplines (law, business, engineering and urban planning) will play in developing solutions, including consideration of human rights and good governance, new concepts in economics and
business management which will lead to sustainable businesses, developments in science and technology which will change how we manage resources and new visions for cities and communities which will support sustainable ways of life.

Law

Stage I

LAW 121G 15 Points
Law and Society
An introduction to theories of the nature, functions
and origins of law and legal systems, including
sources of law; comparative concepts of law; an
overview of constitutional and legal arrangements
in New Zealand, including the role of the courts;
the operation of the legal system in historical and
contemporary New Zealand with a focus on concepts
of property rights, the Treaty of Waitangi, Treaty
Settlements and proposals for constitutional change.
Note: Does not meet the General Education requirement
for LLB, LLB(Hons), LLB conjoints or LLB(Hons) conjoints.
Restriction: LAW 101

Linguistics

Stage I

LINGUIST 101G 15 Points
Language and Society
Language in its social and cultural context. Topics
may include language variation, language and gender,
language and social identity, language contact,
language in the media, language maintenance.

Māori Studies

Stage I

MĀORI 101G 15 Points
Introduction to Written Māori
An introduction to listening, reading, writing and
translation techniques used in the composition,
reading and understanding of basic Māori. Designed
for students with little or no knowledge of the
language, and for those with some fluency wishing
to understand simple sentence structure and
composition.
Restriction: 260.105. May not be taken if a more advanced
language acquisition course in this subject has previously

MĀORI 130G 15 Points
Te Ao Māori: The Māori World
An introduction to Māori analyses of topics that
are often discussed and sometimes controversial,
and that continue to shape contemporary life in
New Zealand. Topics include aspects of world view,
philosophy and social organisation; the Declaration of
Independence, the Treaty of Waitangi and European
immigration; and contemporary issues including
Treaty claims, ownership of the foreshore and seabed
and constitutional issues.

Marketing

Stage I

MKTG 151G 15 Points
Essential Marketing
Marketing is an integral part of our modern world.
Essential Marketing is designed for non-business
students and provides an inside view to the world of
marketing. We explore basic marketing principles and
examine contemporary issues relevant to our changing
world. Its emphasis is based on creating customer
value and satisfaction through the understanding of
these principles and practices.

Mathematics

Stage I

MATHS 101G 15 Points
Mathematics in Society
Students will encounter the role mathematics plays
in understanding and guiding human activity.
The teaching is thematic and students experience
how fundamental mathematical ideas occur in
modelling diverse features of our society such as
the environment (eg, air pollution) and medicine (eg,
burns, drug dosages).
Recommended preparation: For students who have not
studied Mathematics at NCEA Level 3 (or equivalent)
Restriction: MATHS 101/101G may not be taken with,
or after, any other Mathematics course except MATHS
190/190G. MATHS 101/101G is not available to students
who have 12 credits or more in Mathematics at NCEA Level
3 or those who have passed Cambridge Mathematics A
with an E or better, or Cambridge Mathematics AS with
a D or better, or those who have passed International
Baccalaureate Mathematics, or equivalent

MATHS 190G 15 Points
Great Ideas Shaping our World
Mathematics contains many powerful and beautiful
ideas that have shaped the way we understand
our world. This course explores some of the grand
successes of mathematical thinking. No formal
mathematics background is required, just curiosity
about topics such as infinity, paradoxes, cryptography,
knots and fractals.

Medical Science

Stage I

MEDSCI 100G 15 Points
Human Mind and Body Relationships
Humans share with other living things the features
of physical self-generation and adaptation to the
environment. Humans also live in a mental (mind)
world and maintain relationships with our perceived
environments. Minds and bodies mutually affect one
another. This mind/body dance, which is explored
in this course, is what gives rise to all of human
behaviour from simple daily activities to the highest
forms of creativity.

MEDSCI 101G 15 Points
Environmental Threats to Human Health
Our environment sustains our lives but at times
threatens our health. These threats may occur
naturally, or arise from damage we have inflicted
on the environment. This course considers health
impacts of climate change, pollution, lifestyle choices, poverty and affluence, workplace hazards, emerging infectious diseases, and dangers affecting cancer risk.

Music

**Stage I**

**MUS 144G 15 Points**

**Turning-points in Western Music**

A study of significant people, major discoveries and inventions, and key factors (artistic, intellectual, social, technical) that were important agents of change in Western music. No previous knowledge of music is assumed.

*Restriction: MUSIC 144, 144G*

**MUS 149G 15 Points**

**New Zealand Music Studies**

New Zealand art music and popular music from World War II to the present, with a focus on contemporary practice. A broad range of musical styles and genres and their historical significance and wider social contexts will be discussed, together with notions of cultural identity in music at national and local levels. No previous knowledge of music is assumed.

*Restriction: MUSIC 149, 149G*

Pharmacy

**Stage I**

**PHARMACY 111G 15 Points**

**Drugs and Society**

The use of drugs in society including historical perspectives. Selected examples of the use of medicines in disease, recreational drug use and drug misuse, and cultural and ethnic influences on drug use. Differences between conventional and complementary medicines. The role of the pharmaceutical industry in drug discovery, manufacture and promotion. Legal and ethical issues pertaining to access to pharmaceuticals.

Philosophy

**Stage I**

**PHIL 105G 15 Points**

**Critical Thinking**

Dialogue, argument and discussion are analysed. Distinctions are drawn between persuasive, logically good and materially good arguments. The focus is on well reasoned persuasive dialogue, and mistakes in persuasive reasoning. Topics include the point of an argument, strength of arguments, fallacious reasoning, relevance of reasons, and burden of proof.

Physics

**Stage I**

**PHYSICS 107G 15 Points**

**Planets, Stars and Galaxies**

A non-advancing course in physics for students interested in astronomy. Topics include a survey of astronomical objects in the universe, the tools of observational astronomy, stellar evolution, quasars and black holes, cosmology. This course does not require a formal background in mathematics or physics.

**PHYSICS 108G 15 Points**

**Science and Technology of Sustainable Energy**

Leading-edge science behind the various technologies which underpin new sustainable energy sources will be discussed in a way which will lead to understanding of the advantages, disadvantages, and compromises involved. Case-study examples include solar energy, wind energy, biofuels, geothermal energy, tidal energy, wave energy, and hydrogen energy.

Planning

**Stage I**

**PLANNING 100G 15 Points**

**Creative Communities: An Introduction to Planning**

The evolution of modern planning as an intellectual and professional movement.

Political Studies

**Stage I**

**POLITICS 107G 15 Points**

**New Zealand Politics**

An examination of who governs New Zealand and in whose interests. Topics include: government formation and functioning under MMP, political leadership, national identity, parties and elections, the role of the media in election campaigns, the place of Māori within the political system, and business and politics.

Population Health

**Stage I**

**POPLHLTH 103G 15 Points**

**Epidemics: Black Death to Bioterrorism**

Epidemics have devastated human populations and will continue to do so. This course looks at how epidemics can run rampant through society and how we can control them. It will include examples from the past and present, as well as outline future threats. A diversity of epidemics will be covered, from the plague, gambling, depression, pandemics, nun-biting and alien abduction.

**POPLHLTH 104G 15 Points**

**Future Health**

Healthcare systems face complex challenges in improving people’s health. The goal of this course is to give students the opportunity to learn how the health system works, the challenges it faces, what role innovation plays, and how they can make a difference with knowledge about the role of information in the delivery of healthcare in the twenty-first century.

Psychology

**Stage I**

**PSYCH 109G 15 Points**

**Mind, Brain and Behaviour**

Topics covered may include: the nature of sensory and perceptual processes, the cause of perceptual illusions, the structure and function of the human brain, approaches to animal and human learning.
models of human language and memory, and the design of psychological experiments. A laboratory component, in which students are required to participate as subjects, forms part of the course.

**Restriction:** PSYCH 129

### Russian

#### Stage I

**RUSSIAN 100G 15 Points**

**Beginners' Russian 1**

A beginner's course using multi-media (computer) materials that presume no prior knowledge of Russian, with emphasis on a range of language skills—listening, comprehension, speaking, reading, writing, and the essential grammar of Russian.

**Restriction:** May not be taken if a more advanced language acquisition course in this subject has previously been passed

### Samoan

#### Stage I

**SAMOAN 101G 15 Points**

**Samoan Language 1**

The communicative uses of Samoan in everyday and specialised situations based on listening and speaking, reading and writing, and visual language and cultural learning. Intended for students with no previous knowledge or familiarity with the language, and for those with limited fluency wishing to understand simple sentence structure and composition.

**Restriction:** May not be taken if a more advanced language acquisition course in this subject has previously been passed

### Science General

#### Stage I

**SCIGEN 101G 15 Points**

**Communicating for a Knowledge Society**

Effective communication is required for specialists in all fields to engage meaningfully with society. In this course students gain an understanding of the important role communication plays in a knowledge society. Through case studies and practical experience students learn about the responsibilities and skills required to communicate with a variety of audiences. They learn how to effectively manage and present data and practice oral, written, visual and electronic communication.

### Sociology

#### Stage I

**SOCIOL 101G 15 Points**

**Understanding Aotearoa New Zealand**

Provides an introduction to the sociological analysis of New Zealand society. Looks at familiar events, institutions, social processes from a sociological point of view and offers ways to understand them in new and different ways. Focuses on the structure of New Zealand society and on social and political changes which affect the lives of New Zealanders and shape their society.

**Restriction:** 315.104

### Spanish

#### Stage I

**SPANISH 104G 15 Points**

**Beginners' Spanish 1**

Provides a solid grounding in the basic grammar and vocabulary of Spanish. Emphasis is on communicative competence including speaking, listening, reading, and writing skills. This course is designed for beginners or near beginners; thus, students who have achieved 16 credits in Level 2 NCEA Spanish within the last two years must enrol in SPANISH 105 instead. SPANISH 104 does not count towards a major in Spanish.

**Restriction:** May not be taken if a more advanced language acquisition course in this subject has previously been passed

### Sport and Exercise Science

#### Stage I

**SPORTSCI 100G 15 Points**

**Exercise and Fitness: Myths and Reality**

An introduction to the principles of physical exercise, with a focus on understanding how the body moves and responds to exercise, how performance can be measured, and how fitness can be developed and maintained to optimise health. Particular emphasis will be placed on the debunking of common myths about exercise, and offering evidence-based advice on the benefits of appropriate physical activity.

### Statistics

#### Stage I

**STATS 101G 15 Points**

**Introduction to Statistics**

Intended for anyone who will ever have to collect or make sense of data, either in their career or private life. Steps involved in conducting a statistical investigation are studied with the main emphasis being on data analysis and the background concepts necessary for successfully analysing data, extrapolating from patterns in data to more generally applicable conclusions and communicating results to others. Other topics include probability; confidence intervals, statistical significance, t-tests, and p-values; nonparametric methods; one-way analysis of variance, simple linear regression, correlation, tables of counts and the chi-square test.

**Restriction:** STATS 102, 107, 108, 191

**STATS 150G 15 Points**

**Lies, Damned Lies, and Statistics**

Examines the uses, limitations and abuses of statistical information in a variety of activities such as
as polling, public health, sport, law, marketing and the environment. The statistical concepts and thinking underlying data-based arguments will be explored. Emphasises the interpretation and critical evaluation of statistically based reports as well as the construction of statistically sound arguments and reports. Some course material will be drawn from topics currently in the news.

**Theology**

**Stage I**

**THEOLOGY 101G**  
**The Bible in Popular Culture**
An exploration of biblical themes, images, and metaphors in contemporary film, music and cultural arts through which religion and culture intersect. It develops tools appropriate for analysing popular culture, as it moves from the local to the national to the global.

**THEOLOGY 106G**  
**Islam and the Contemporary World**
Since the religion of Islam has become a very significant aspect of contemporary global and local societies, this course seeks to introduce students to an understanding of key aspects of Islam and an analysis of its significant contribution to New Zealand society as well as to societies and cultures across the world.

**Tongan**

**Stage I**

**TONGAN 101G**  
**Tongan Language 1**
Focuses on developing initial fluency in the communication skills of listening, speaking, reading and writing. Intended for students with no previous knowledge or familiarity with the language, and for those with limited fluency.  
*Restriction: May not be taken if a more advanced language acquisition course in this subject has previously been passed.*

**Youth Work**

**Stage I**

**YOUTHWRK 152G**  
**Understanding New Zealand Youth**
This course examines the concept of ‘youth’ and the historical, economic and political contexts in which young people live and are schooled in New Zealand society. The concept of youth is explored as a fundamental aspect of human development, identity and culture. The ways that we learn about what it is to be a young person in New Zealand today, including sport, body image, media, music, technology and social networking will be explored.

GLOSSARY OF TERMS

Note: The descriptions below are not intended to be legal definitions. The Regulations in the Calendar should also be referred to when interpreting these terms.

**Academic Standing**: A means of measuring a student’s academic performance each semester. Students are required to pass at least 50 percent of points enrolled in a semester to maintain good academic standing. Graduated academic sanctions apply to students failing to meet this requirement.

**Ad Eundem Statum**: A means of admission to the University on the basis of a qualification awarded by a body other than the New Zealand Qualifications Authority or The University of Auckland.

**Admission**: The process by which a student applies, and is approved, for entry to the University and to a University qualification.

**Bachelors degree**: A first degree.

**Campus**: A geographical location where University of Auckland qualifications are taught, eg, City Campus, Epsom, Tamaki, Grafton.

**Certificate**: A qualification awarded after academic study of a coherent programme of between 60 and 120 points.

**Class**: A component of a course, eg, a lecture stream.

**Completing student**: A student whose current enrolment is designed to complete a certificate, diploma or degree.

**Corequisite course**: A course that should be taken in the same semester as another unless it has previously been satisfactorily completed.

**Course**: The basic component of all academic programmes. A course is normally taught and assessed over one semester. A double-semester course is taught over the consecutive semesters of the same academic year.

**Course prescriptions**: A list of courses including course code, title, points value, description of content, prerequisites, corequisites and restrictions.

**Course schedule**: A list of the courses prescribed for a programme which forms part of the regulations.

**Coursework**: Assessable work produced by students, normally submitted during teaching weeks, eg, essays, assignments, reports, tests, and practical, tutorial and seminar work.

**Cross-credit**: A course which is common to two University of Auckland undergraduate diplomas or Bachelors degrees and is credited to both.

**Current enrolment**: Courses or other work taken by a student in a particular academic year or semester.

**Degree**: Principal qualification awarded by The University of Auckland, ie, bachelors, masters and doctoral degrees.

**Diploma**: A University qualification, generally awarded at graduate or postgraduate level.

**Direct entry**: Entry into a higher level of a subject or later part of a degree without the prerequisites.

**Dissertation**: A written research component of a degree or diploma worth between 30 and 80 points.

**Distance education**: Courses or programmes of study which provide content and support services to students who rarely, if ever, attend for face-to-face or for on-campus access to educational facilities.

**Doctoral degree**: A qualification at an advanced level requiring an original contribution to knowledge.

**Electives**: A defined set of courses for a diploma or degree from which a student may make a choice.

**End of lectures**: The final day of the final teaching week of a semester. The final lecture for a particular course might occur before this day.

**Enrolment**: The process by which a student, having gained admission to the University and to a qualification, selects and gains entry to courses and classes.

**Examination**: Formal assessment under supervision occurring after the teaching in a course has been completed.

**Extramural campus**: Where the teaching occurs mainly through paper-based study materials without a requirement for students to attend scheduled, on-campus classes. Students’ study is guided by workbooks and written interaction with teaching staff.

**Extramural students**: Students who have exemption from receiving instruction on campus.

**Flexible learning**: Learning characterised by a mixed mode of delivery and assessment of instructional material.

**Grade Point Average (GPA)**: A means of measuring a student’s performance at this University. The average grade achieved over a period of time expressed numerically on a scale between 0 (no passes) and 9 (A+ average). GPAs include:

- **Cumulative GPA**: calculated from all grades achieved by a student. Used for selection purposes unless an alternative has been indicated by the Faculty.

**Grade Point Equivalent (GPE)**: A means of measuring a student’s prior relevant academic performance and experience. Grades or marks achieved at external institutions and/or in examinations (such as NCEA) expressed as an equivalent to a Grade Point Average on the scale 0-9.

**Graduand**: A person who has completed the requirements for a degree but has not yet had the degree conferred.

**Graduate**: A person on whom a degree has been conferred.

**Honours**: Degrees, in some cases completed within prescribed time limits, may be awarded with honours which signify advanced or distinguished study.

**Laboratory**: A teaching session of a practical nature.

**Lecture**: A basic unit of instruction.
**Limited entry**: Applied to a course or programme for which the number of students that can be accepted is limited because of constraints on staffing, space or equipment.

**Major**: A required component of a degree, including a specified number of points in a subject at the most advanced level.

**Masters degree**: A degree programme at a higher level than a bachelor's degree.

**Maximum full-time study**: A student workload of 80 points per semester or 30 points in Summer School.

**Minimum full-time study**: A student workload of 50 points per semester or 25 points in Summer School.

**Minor**: A component of a degree including a specified number of points above Stage I in a subject.

**Normal full-time study**: A student workload of 120 points in one year.

**Online campus**: Where the teaching occurs mainly through online computer-based interactions without the requirement to attend scheduled, on-campus classes. Communication between teachers and students is via asynchronous platforms such as email, web-based texts and bulletin boards.

**Part**: A defined subdivision specified in the regulations of some degrees.

**Plussage**: A method of calculating the final result a student has gained in a course by counting either the final examination grade or a combination of final examination grade plus coursework, whichever is to the student's advantage.

**Point(s)**: A value assigned to a course or other work to indicate its weighting within The University of Auckland's certificates, diplomas and degrees.

**Postgraduate programme**: A programme at a higher level than a bachelor's degree.

**Prerequisite course**: A requirement that must be met before commencement of study for a particular course or programme.

**Prescribed texts**: Textbooks which are considered essential to a course.

**Programme**: A prescribed set of one or more courses or other work which on satisfactory completion leads to the award of a University of Auckland certificate, diploma or degree.

**Project**: A piece of investigative written work on a topic approved by the relevant Head of Department and supervisor.

**Quarter**: A 10-week period of instruction for Graduate School of Management students.

**Reassigned course**: A course satisfactorily completed for one programme which has been transferred to another programme.

**Recognition of Prior Academic Study (ROPAS)**: A means of assessment of previous study for students from another institution for admission or credit to the University.

**Regulation**: A rule set down by the University.

**Research essay**: A research-based essay on a topic approved by the relevant Head of Department and supervisor.

**Research portfolio**: A coherent, integrated programme of research-based work.

**Research project**: A piece of research-based work on a topic approved by the relevant Head of Department, usually worth between 30 and 80 points.

**Restriction (restricted course)**: A course in which the learning objectives, content and/or assessment are so similar to a second course that a student cannot be credited with both towards a certificate, diploma or degree. In some cases a restricted course may be taken and credited as a Certificate of Proficiency.

**Schedule**: University lists of courses, credits or limitations, often in tabular form.

**Semester**: A period of about 15 weeks which includes about 12 teaching weeks and about three weeks for study and examinations. In addition there is a mid-semester break of up to two weeks.

**Specialisation**: A coherent group of related courses from different subjects.

**Stage**: The academic level of study in a subject.

**Subject**: An area of learning which may be provided by a school or a department, or by departments offering related courses.

**Summer School**: A six-week period during which a select range of courses is taught and assessed.

**Thesis**: A research component of a postgraduate programme having a value of 90 or more points which will have a written component but may also include design, creative or performative elements.

**Transfer credit**: Credit granted towards a University of Auckland qualification from work successfully completed at another tertiary institution.

**Tutorial**: A small group-learning session.

**Undergraduate**: A person studying towards a first degree.

**Unspecified campus**: Applies to courses where the teaching occurs through scheduled face-to-face interactions on sites that are not recognised University of Auckland campuses. Examples include the provision of courses where the course material is delivered in students' local work-related environment.
