INTRODUCTION

Welcome to the University of Auckland. This Calendar is the official publication of the University and includes academic statutes and regulations governing admission, enrolment, fees and examinations. The Calendar sets out requirements for degrees, diplomas and certificates and lists the approved courses offered by the University. It also provides key information about the University and its staff.

The Academic Year

The academic year at the University of Auckland is divided into two semesters. Each semester covers a period of about 15 weeks comprising approximately 12 teaching weeks followed by three weeks for study and examination. The first semester starts at the beginning of March and the second semester in mid-July. Each semester has a mid-semester break which lasts for one to two weeks. During the three weeks after the end of lectures, there is a period of study followed by the examinations for the courses studied during that semester. There is a three-week inter-semester break during which results will be published and any further admissions and enrolments processed. A small number of specialist courses may be taught during the inter-semester break. At the end of the second semester there is a 13-week break. A Summer School comprising six weeks operates from the beginning of January. A limited number of courses are available. A small number of programmes are offered in quarters rather than semesters, comprising approximately 10 teaching weeks followed by one week for study and exams.

The Points System

The value allocated to each course is standardised and is given as a number of points, each degree, diploma or certificate being made up of a specified number of points. Most courses are offered in values of 10, 15, 20 and 30 points. For instance, the programme for many bachelors degrees requires the completion of a total of 360 points and most masters degrees require 120 points. The points value for diplomas and certificates varies according to the discipline and content and full details are listed in the regulations.

Planning a Programme

Assistance with programme planning is available online through the My Programme Requirements report. This report outlines the academic requirements for a programme of study and provides an individualised report comparing a student’s progress towards completion against the requirements. It indicates where requirements have been met, which requirements have yet to be completed and the points required. Students are able to enrol directly from the report into courses available for the programme.

Students can also enrol into classes via Timetable Planner. This tool allows students to view potential timetable options, as well as adding preferences such as work or study gaps.

Students planning a programme can also consult faculty and departmental handbooks and seek advice about programmes and course options through faculty student centres. Course advice is provided in the University's General Library before the start of the academic year. Intending students should phone 0800 61 62 63 or visit www.auckland.ac.nz for general advice and information. This Calendar contains the regulations and requirements for each faculty’s degrees, diplomas and certificates. It is important that students read the regulations for the programme they plan to take and ensure that they complete the prerequisites required for subsequent study. The details for each course are listed by faculty and in alphanumeric order in the Course Prescriptions. In addition, there is a range of Interfaculty and Conjoint degrees which are administered and supervised across the faculties.

Admission and Enrolment

The University of Auckland has an online system for admission and enrolment. All new students, and those not enrolled in 2018, who are intending to study at the University in 2019, should complete the online Application for Admission (www.auckland.ac.nz/apply_now). If students do not have internet access Application for Admission forms are available by phone, by mail or in person from: AskAuckland Central, The University of Auckland, 24 Princes St, or Private Bag 92019, Auckland 1142, New Zealand, email studentinfo@auckland.ac.nz, phone 0800 61 62 63.

Official Communications to Students

Electronic Mail is an official and the primary means of communication with students. All official email to a student will be sent to a student’s current University email address (username@aucklanduni.ac.nz). If the student wishes to forward messages to other addresses it is their responsibility to ensure the alternative address is in place and operating correctly. Failure to read an email does not free a student from their responsibilities to understand and comply with the University’s requirements.
GLOSSARY OF TERMS

Note: The descriptions below are not intended to be legal definitions. The Regulations in the Calendar should also be referred to when interpreting these terms.

Academic English Language Requirement: A specified level of attainment in English studies in NCEA, CIE and IB; if admitted without meeting this requirement students may satisfy it in their first year of study by passing a specified undergraduate course in academic English.

Academic Integrity Course: An online course designed to increase student knowledge of academic integrity. University rules relating to academic conduct, and the identification and consequences of academic misconduct.

Academic Standing: A means of measuring a student’s academic performance each semester. Students are required to pass at least 50 percent of points enrolled in a semester to maintain good academic standing. Graduated academic sanctions apply to students failing to meet this requirement.

Ad Eundem Statum: A means of admission to the University on the basis of a qualification awarded by a body other than the New Zealand Qualifications Authority or the University of Auckland.

Admission: The process by which a student applies, and is approved, for entry to the University and to a University qualification.

Alumni: A term describing graduates of the University and staff who have worked for the University.

Bachelors degree: A first degree.

Campus: A geographical location where University of Auckland qualifications are taught, eg, City, Epsom, Tamaki, Grafton.

Certificate: A qualification awarded after academic study of a coherent programme of between 60 and 120 points.

Certificate of Proficiency: Recognises successful completion of a course by those who are not enrolled in a degree or diploma.

Class: A component of a course, eg, a lecture stream.

Completing student: A student whose current enrolment is designed to complete a certificate, diploma or degree.

Conjoint degree: Enables students to complete two bachelor-level degrees, in a single programme of study. Conjoint degrees, often referred to as ‘conjoints’, require enrolment in less points than the separate components and may be completed in a shorter timeframe than two degrees.

Core courses: Compulsory courses that cover knowledge essential for the completion of a programme of study.

Corequisite course: A course that should be taken in the same semester as another unless it has previously been satisfactorily completed.

Course: The basic component of all academic programmes. A course is normally taught and assessed over one semester. A double-semester course is taught over the consecutive semesters of the same academic year.

Course prescriptions: A list of courses including course code, title, points value, description of content, prerequisites, corequisites and restrictions.

Course schedule: A list of the courses prescribed for a programme which forms part of the regulations.

Coursework: Assessable work produced by students, normally submitted during teaching weeks, eg, essays, assignments, reports, tests, and practical, tutorial and seminar work.

Cross-credit: A course which is common to two University of Auckland undergraduate diplomas or Bachelors degrees and is credited to both.

CUAP: Committee on University Academic Programmes: A subcommittee of Universities New Zealand on which all universities and the New Zealand Union of Students Associations are represented; CUAP undertakes programme approval and moderation procedures for the universities in New Zealand, as well as providing advice and comment on academic matters and developments across the university system.

Cumulative GPA: Calculated from all grades achieved by a student. Used for selection purposes unless an alternative has been indicated by the Faculty.

Current enrolment: Courses or other work taken by a student in a particular academic year or semester.

Degree: Principal qualification awarded by the University of Auckland, ie, bachelors, masters and doctoral degrees.

DELNA: Diagnostic English Language Needs Assessment.

Diploma: A University qualification, generally awarded at graduate or postgraduate level.

Direct entry: Entry into a higher level of a subject or later part of a degree without the prerequisites.

Dissertation: A written research component of a degree or diploma worth between 30 and 80 points.

Distance education: Courses or programmes of study which provide content and support services to students who rarely, if ever, attend for face-to-face or for on-campus access to educational facilities.

Doctoral degree: A qualification at an advanced level requiring an original contribution to knowledge.

EFTS: Equivalent full-time student.

Electives: A defined set of courses for a diploma or degree from which a student may make a choice.

End of lectures: The final day of the final teaching week of a semester. The final lecture for a particular course might occur before this day.

Enrolment: The process by which a student, having gained admission to the University and to a qualification, selects and gains entry to courses and classes.
Examination: Formal assessment under supervision occurring after the teaching in a course has been completed.

Extramural campus: Where the teaching occurs at a distance mainly through paper-based study materials without a requirement for students to attend scheduled, on-campus classes. Students’ study is guided by workbooks and written interaction with teaching staff.

Extramural students: Students who have exemption from receiving instruction on campus.

Faculty: The administrative organisation of academic programmes offered within a discipline or group of disciplines.

Flexible learning: Learning characterised by a mixed mode of delivery and assessment of instructional material.

Grade Point Average (GPA): A means of measuring a student’s performance at this University. The average grade achieved over a period of time expressed numerically on a scale between 0 (no passes) and 9 (A+ average).

Grade Point Equivalent (GPE): A means of measuring a student’s prior relevant academic performance and experience. Grades or marks achieved at external institutions and/or in examinations (such as NCEA) expressed as an equivalent to a Grade Point Average on the scale 0-9.

Graduand: A person who has completed the requirements for a degree but has not yet had the degree conferred.

Graduate: A person on whom a degree has been conferred.

Graduate certificate: A graduate certificate must be a minimum of 0.5 EFTS or 60 points. CUAP requires that half or more of the courses must be above Stage II.

Graduate diploma: A graduate diploma must be a minimum of 1.0 EFTS or 120 points. It must include 75 points above Stage II.

Honours: Degrees, in some cases completed within prescribed time limits, may be awarded with honours which signify advanced or distinguished study.

Laboratory: A teaching session of a practical nature.

Late Year Term: A period of about 12-13 weeks used for teaching or research. It starts on 1 December and finishes on the last Saturday before the beginning of the first semester of the following academic year.

Lecture: A basic unit of instruction.

Limited entry: Applied to a course or programme for which the number of students that can be accepted is limited because of constraints on staffing, space or equipment.

Major: A required component of a degree, including a specified number of points in a subject at the most advanced level.

Masters degree: A degree programme at a higher level than a bachelors degree.

Maximum full-time enrolment: 80 points per semester, 30 points in Summer School, 45 points per quarter or 60 points in Late Year Term.

Minimum full-time enrolment: 50 points per semester, 25 points in Summer School, 25 points per quarter or 50 points in Late Year Term.

Minor: A component of a degree including a specified number of points above Stage I in a subject.

Module: An optional component of a bachelor’s degree comprising 45 points focused on a particular skill or area of study.

Normal full-time study: A student workload of 120 points in one year.

NZQA: New Zealand Qualifications Authority. The government agency that administers the National Certificates of Educational Achievement (NCEA) qualifications for secondary school students, and is responsible for the quality assurance of non-university tertiary training providers in New Zealand.

Online campus: Where the teaching occurs online through computer-based interactions without the requirement to attend on-campus classes, though some scheduled online sessions might be compulsory. Communication between teachers and students is via a learning management system and email and reliable broadband internet access is required.

Part: A defined subdivision specified in the regulations of some degrees.

Plussage: A method of calculating the final result a student has gained in a course by counting either the final examination grade or a combination of final examination grade plus coursework, whichever is to the student’s advantage.

Point(s): A value assigned to a course or other work to indicate its weighting within the University of Auckland’s certificates, diplomas and degrees.

Postgraduate certificate: A qualification of at least 0.5 EFTS or 60 points. CUAP requires that all courses must be above Stage III.

Postgraduate diploma: A qualification of at least 1.0 EFTS or 120 points. CUAP requires that all courses must be above Stage III.

Postgraduate programme: A programme at a higher level than a bachelors degree.

Prerequisite: A requirement that must be met before commencement of study for a particular course or programme.

Prescribed texts: Textbooks which are considered essential to a course.

Proctor: A person who deals with disputes involving students. The Proctor can also provide advice about what to do about disputes involving a member of staff, and about other issues to do with student conduct.

Programme: A prescribed set of one or more courses or other work which on satisfactory completion leads to the award of a University of Auckland certificate, diploma or degree.

Project: A piece of investigative written work on a topic approved by the relevant Head of Department and supervisor.
**Quarter:** A 10-week period of instruction for Graduate School of Management students.

**Reassigned course:** A course satisfactorily completed for one programme which has been transferred to another programme.

**Recognition of Prior Academic Study (ROPAS):** A means of assessment of previous study for students from another institution for admission or credit to the University.

**Regulation:** A rule set down by the University.

**Research essay:** A research-based essay on a topic approved by the relevant Head of Department and supervisor.

**Research Masters:** A research based programme of study that includes either a 90 or 120 point thesis or research portfolio.

**Research portfolio:** A coherent, integrated programme of research-based work.

**Research project:** A piece of research-based work on a topic approved by the relevant Head of Department, usually worth between 30 and 80 points.

**Restriction (restricted course):** A course in which the learning objectives, content and/or assessment are so similar to a second course that a student cannot be credited with both towards a certificate, diploma or degree. In some cases a restricted course may be taken and credited as a Certificate of Proficiency.

**Schedule:** University lists of courses, credits or limitations, often in tabular form.

**Semester:** A period of about 15 weeks which includes about 12 teaching weeks and about three weeks for study and examinations. In addition there is a mid-semester break of up to two weeks.

**Specialisation:** A programme of related courses normally comprising more than 50 percent of a qualification.

**Stage:** The academic level of study in a subject.

**Subject:** An area of learning which may be provided by a school or a department, or by departments offering related courses.

**Summer School:** A six-week period during which a select range of courses is taught and assessed.

**Taught Masters:** A programme of study that is normally based on an undergraduate degree and includes coursework consisting of courses, project work and research in varying combinations. Masters degrees that build on generic attributes and/or experience (often called ‘conversion masters’) are usually in professional fields and are recognised as appropriate professional preparation by the industry concerned.

**Thesis:** A research component of a postgraduate programme having a value of 90 or more points which will have a written component but may also include design, creative or performative elements.

**Transfer credit:** Credit granted towards a University of Auckland qualification from work successfully completed at another tertiary institution.

**Tutorial:** A small group-learning session.

**Undergraduate:** A person studying towards a first degree.

**Unspecified campus:** Applies to courses where the teaching occurs through scheduled face-to-face interactions on sites that are not recognised University of Auckland campuses. Examples include the provision of courses where the course material is delivered in students’ local work-related environment.

**UTAS:** Undergraduate Targeted Admission Schemes. Admission schemes designed to improve access into higher education for students from under-represented equity groups.

Email: studentinfo@auckland.ac.nz

All Applications for Admission by new students will be acknowledged. Students will receive an offer of a place in programmes (degree, diploma or certificate) for which their admission is approved. This offer of a place must be accepted online before the student can proceed to enrol in the course/s of their choice.

Undergraduate

Applications to the University of Auckland must be received no later than the published closing date. Applications received after the closing date will only be considered on the basis of academic merit, if there are places available. International students should start the application process as early as possible to allow sufficient time to apply for a visa.

Postgraduate
Applications for Semester One submitted after 8 December will only be considered if places are available. Applications for Semester Two submitted after 4 July will only be considered if places are available. International students should start the application process as early as possible to allow sufficient time to apply for a visa.

**Doctoral**

Doctoral applications may be submitted at any time of the year (excluding the Degree of Doctor of Clinical Psychology and the Degree of Doctor of Education).

**Summer School**

No late applications will be accepted.

**Special Admission**

Applications to the University of Auckland must be received no later than the published closing date and no later than 1 December. Applications received after 1 December will only be considered if places are available.

---

### 2019 Enrolment Dates

Students must enrol as soon as possible after acceptance of an offer of place, as many University of Auckland courses are very popular and have a limited number of places available.

Arms of the University of Auckland

Heraldic Description

Azure between three Mullets Argent an open Book proper edged and bound Or with seven clasps on either side Gold on a Chief wavy also Argent three Kiwis proper. On a scroll set below the Arms appear the words 'Ingenio et Labore'.

Symbolism

The open book together with the motto 'Ingenio et Labore', freely translated as 'by natural ability and hard work', indicate in a general way the aim of the institution and combined with the three stars, express the idea of learning pursued under the sky of the Southern Hemisphere. The kiwis are indicative of New Zealand, as the bird is absolutely confined to its islands, and the silver wavy chief upon which they are set directs attention to the fact that Auckland is on the sea coast.

The shield, minus the ribbon containing the Latin motto (called the Crest), is used in combination with wordmark and graphic elements to form the University logo. Guidelines for the logo are prescribed in the University's Style Guide.

University of Auckland Act 1961

History of the University of Auckland

University of New Zealand

As early as 1862 an unknown writer, "J.G.", proposed in Chapman's New Zealand Monthly Magazine that a university should be established in Auckland. The pioneer town, founded less than a quarter of a century before, had other, more pressing issues, and initially there was no response to the suggestion. Consequently the first university, created in 1869, was in the South Island, where the inhabitants were wealthier and more keen on education. In 1870, Parliament passed legislation to create the University of New Zealand as an examining body with affiliated teaching colleges. An Auckland politician, later Speaker of the House of Representatives, Maurice O’Rorke, advocated that the University be located in Auckland but it was established as a federal body with no fixed location. Canterbury, which had been planning to create a university, became the first place to open a college of the new federal university in 1873.

The citizens of Auckland at first received university instruction at the Auckland Grammar School. Students sat the examinations of the University of New Zealand. One of these students, Kate Edger, in 1877 became the first woman to graduate BA from a British university.

Auckland University College

In 1878, O’Rorke chaired a Royal Commission on higher education that recommended the establishment of university colleges in Auckland and Wellington. In 1882, the Auckland University College was set up by Act of Parliament and was formally opened on 21 May 1883 in the Choral Hall, then the largest hall in Auckland. The Governor, Sir William Jervois, announced that the College was to be a thoroughly democratic institution, open to all, women as well as men, and to all classes.

The applicants for the first four chairs, of Classics and English, Mathematics, Natural Science, and Chemistry and Physics, were interviewed in England by the New Zealand Agent-General and some of the most famous scientists and scholars of the day, including the great Benjamin Jowett of Balliol College, Vice-Chancellor of Oxford University. The men appointed were an impressive group. The chemist, FD Brown, had studied in France and Leipzig as well as London, and taught at Oxford and London. He had published a dozen papers. Algernon Phillips Thomas, the biologist, was a Balliol man who had revealed the life history of the liver fluke. The classicist, TG Tucker, was to become a famous scholar. When he left to go to Melbourne University in 1885, he was succeeded by Hutcheson Macaulay Posnett, an Irishman who had written several books, including one on comparative literature – what would now be called the sociology of literature – a subject which he is credited with inventing.

The first professor of Mathematics, George Walker, was drowned shortly after he reached Auckland and was succeeded by WS Aldis, who had been the top scholar in his subject at Cambridge and was the author of several mathematical books.

Finding a Home

When O’Rorke first tried to secure a university for Auckland he suggested housing it in Government House, left empty when the Governor moved with the capital to Wellington in 1865. This immediately aroused opposition in the press, for many Aucklanders hoped that the capital – and the Governor – would eventually return to
Auckland. These conflicting ambitions lay at the basis of a recurrent feature of the history of the College, the great "site row", with the College trying to get at least part of the grounds of Government House while some influential citizens strongly opposed it. One result was that for years the College had no permanent site or permanent buildings. Teaching started in the disused District Court House, expanded into Admiralty House and, in 1890, into the original Parliament Building. In 1907, the Choral Hall was purchased and, in 1917, the College occupied the building vacated by the Grammar School. In 1926 the College acquired its first permanent building, now the ClockTower Building, in Princes Street.

Early Difficulties

The College was poor: its statutory grant was for many years only £4,000 a year, while land reserves, set aside by government to provide an income, brought in very little. There were few students: 95 in 1883, 156 by 1901. Some had not passed the matriculation examination and were not studying for degrees. Most of them were part-time, trainee teachers and law clerks, music students from 1888 onwards, commerce students by 1905. The College was dominated by the lay members of Council, especially by Sir Maurice O'Rorke, who was an autocratic chairman from 1883 to 1916.

The early College struggled to keep its small staff – some left for positions in Australia and elsewhere. Most of the remainder grew increasingly out-of-date in their subjects. There was no system of sabbatical or study leave until the 1920s. The teachers’ role was to hand on traditional knowledge. The staff lectured for very long hours, and in general, the students were given a good, traditional undergraduate education. Research was not expected and was rarely done. In some subjects research was impossible. For instance, the Library took no mathematical journals, so the mathematicians knew little about recent work. Some students, however, started to carry out good research, notably in Chemistry.

Progress

In the 1920s and well into the 1930s the College was ruled by a Registrar, Rocke O'Shea, and a new Chairman of the Council (President after 1924), another former Cabinet Minister, Sir George Fowlds. Under their leadership the University started to change. The first New Zealand graduates with postgraduate education abroad were appointed to the staff, notably the very able economist, Sir Maurice O'Rorke, who was an autocratic chairman from 1883 to 1916.

Some advances were made in providing professional education. The only such education offered at the College was in Law, which attracted large numbers of students. The only "professional schools" recognised by the University of New Zealand were Medicine at Otago and Engineering at Canterbury. In 1906, the College established a School of Mining, which slowly and covertly was turned into a "School of Engineering". After fierce battles with Canterbury, fired by provincial rivalry, the Auckland School received University recognition for its teaching in the first two professional years. Students then had to go to Canterbury to complete the final year of their degree. In 1917, the College began instruction in architecture.

Academic Freedom and Development

During the depression of the early 1930s the College experienced its first dispute over academic freedom. The temporary appointment of a lecturer in History, JC Beaglehole, later a world famous scholar, was terminated, his friends believed, because of a letter to a newspaper defending the right of communists to distribute their literature. This episode led to a Council election in which the liberal, Hollis Cocker, defeated a conservative candidate. The College Council then adopted resolutions in favour of academic freedom and received the undeserved congratulations of the British academic establishment, including Lord Rutherford and Wittgenstein. At the same time the College enrolled a lively group of students led by James Bertram, who established a new literary journal, Phoenix. This journal was the focus for the first literary movement in New Zealand history: Allen Curnow, ARD Fairburn, RAK Mason and other writers, later distinguished, wrote for it.

The College received a great intellectual stimulus in 1934 when four new professors arrived: HG Forder, a very able mathematician, Arthur Sewell, a brilliant lecturer in English, a classicist, CG Cooper, and a new historian, James Rutherford.

The University of Auckland

The College gained its first academic leader in the 1950s, when the Council appointed a Principal (later Vice-Chancellor) KJ Maidment, a Classics don from Merton College, Oxford. He came in 1950 and remained for two decades. Maidment faced a further, fierce "site row". The Council wanted to move the College to a larger site out of town. Instead, in 1956, the National Government offered Government House as compensation for staying in Princes Street. Another citizens' "save Government House" campaign followed. Both academic staff and the public were deeply divided over the issue, which was resolved in 1960: the University was to stay where it was. In 1957 the slow move towards autonomy was marked by legislation which changed the title of the College to the University of Auckland while leaving the functions and powers of the University of New Zealand intact.

The "site row" held up the building programme for about six years, while student rolls rose rapidly, to 4,000 by 1959, with the result that there was overcrowding in quite inadequate buildings. Universities everywhere were expanding rapidly. New Zealand academic salaries could not compete with those of overseas universities and many able Auckland staff left for positions in Australian and other universities. Despite these problems, there was significant progress. New subjects were introduced: Geography, Anthropology, Māori Studies, Fine Arts. There was a new emphasis on staff research. Many of the new and younger academics became very active researchers, reflected in the growing lists of staff publications.
In the 1960s, the Report of the Hughes Parry Committee led to major improvements in University conditions and governance. Staff salaries were raised. For the first time the students were given fairly generous bursaries, which led to a rapid increase in the proportion of full-time students. The government grant to the University rose rapidly. In 1962, the University at last became independent when the University of New Zealand was abolished.

Growth and Change

A massive university building programme commenced, and over the next two decades the campus was transformed as one large building after another was erected: Fine Arts, Science, Engineering buildings, a Student Union, a new Library. A number of new subjects were introduced, including Political Studies, Art History, and Sociology. In 1968, teaching commenced in the new Medical School on the Grafton Campus. By the end of the 1960s Auckland had the largest University Library in the country.

When Dr Maidment departed in 1970, there were 9,300 students. His successor, Dr Colin Maiden, was an Auckland engineer who had headed a research division of General Motors in Michigan. One of the first things that struck him in Auckland was the need for better student facilities. He pushed ahead to provide a theatre, a gymnasium and recreation centre, and a large playing-field "complex". The entire administrative organisation, from faculties and committees to deputy vice-chancellors, was reformed. The academic boom of the 1960s continued well into the 1970s and several new buildings, like Human Sciences, were constructed and new subjects, like Management Studies and Computer Science, were introduced.

The 1970s brought numerous social changes: an increase in the proportion of Māori and Pacific students and in the proportion of women and older students. In 1975 and 1981 the first two women professors were appointed, Marie Clay and Patricia Bergquist. At a time of high inflation, the government grant to the University rose rapidly, to $95.2 million by 1989. In 1983 the University celebrated its centennial. Although there was a certain economic austerity, after a century of growth the University had established itself strongly within its own community and nationally.

There were still to be challenges. The wide-ranging restructuring of education undertaken by the Labour government after 1984 encompassed the universities, and their autonomy and their identity were seen to be threatened. As a result of efforts by the universities, supported by alumni, some changes were secured in the Education Amendment Acts of 1989 and 1990, but the University Grants Committee was abolished, the Ministry of Education became responsible for tertiary education policy, and the composition of the Council was altered. At the turn of the century, the government took another look at the whole range of tertiary education with the Tertiary Education Advisory Commission, out of which came the Tertiary Education Commission as the funder of tertiary education.

The 1990s Onwards

Anxious to respond to the growing demand for university education in the early 1990s, the University offered courses at other tertiary institutions in Auckland and Northland. Acquiring buildings used for the 1990 Commonwealth Games village, it began to develop a campus at Tāmaki, initially offering courses in Commerce. Increasing student enrolments obliged it, like other universities, to introduce quotas for all first-year courses in 1992, breaking the historic policy of "open entry".

From the mid-1990s, the University introduced semesters, launched its first major fund-raising appeal, produced its first strategic plan and inaugurated a Summer School. It joined Universitas 21, an international network of research-intensive universities in Australasia, Asia, North America and Europe, as a foundation member. In the late 1990s, the School of Medicine expanded to become a Faculty of Medical and Health Sciences, introducing degrees in Nursing, Health Sciences and Pharmacy.

The third Vice-Chancellor, Professor Kit Carson, served from 1995 to 1998 and was followed by Dr John Hood in 1999. Dr Hood was an alumnus of the University, a former Rhodes Scholar and business leader. He faced a difficult financial situation as governments had progressively reduced tuition subsidies per student, and the University needed to re-activate its building programme. The last period of intensive construction had ended with completion of the new School of Music in 1986 and the Marae complex in 1988. The Law School had moved into refurbished premises in a new precinct to the north of Waterloo Quadrant in 1992. However, the University was growing very rapidly indeed, with increasing numbers of international students in addition to growing numbers of domestic students, who could now borrow to fund their tuition and other costs. This growth reached a peak in 2004 and then started to slow. In its 2005 Strategic Plan the University resolved to pursue a quality agenda and to limit student growth to an average of one percent per annum over time. Consequently the University extended limits on admission from a few professional qualifications to all of its undergraduate degrees. In 2010, the student roll was 40,997 or 32,654 equivalent full-time students.

From the 1990s, research became very much more important in the life of the University and its academics. The country started to look more than ever before to universities to generate new ideas and knowledge, including innovations that might be harnessed for economic development. The University had already founded UniServices as an organisation to develop and commercialise research. In the early 2000s it became host to four of eight national Centres of Research Excellence funded by the government. In 2004 it was designated the country’s leading research university “on virtually any measure” in the Performance Based Research Fund assessment carried out by the recently-created Tertiary Education Commission. In the PBRF assessments released in 2007 and 2012, the University of Auckland again emerged as the New Zealand university with the greatest overall strength. Revenue from research and contract activities grew from $153 million in 2006
to $243 million in 2016. International ranking systems started to become important to university reputations and placed great significance on research performance. The University was consistently placed first among New Zealand universities, although its actual placement varied from year to year and among the ranking systems.

Between 2000 and 2007 the University embarked on another major building programme. The impressive Kate Edger Information Commons and Student Commons, the Engineering Atrium and greatly expanded library wing, and a seven-floor extension to the Science Centre, which houses Computer Science and Software Engineering, enhanced the City Campus. At Tāmaki a new building was constructed for the new School of Population Health. A Fale Pasifika opened in 2004 and the Owen G Glenn Building, a large and striking new complex for the Business School, was completed in 2007.

Organisational change saw Architecture, Dance Studies, Fine and Visual Arts, Music, and Planning combine to form the National Institute of Creative Arts and Industries. The University of Auckland and the Auckland College of Education amalgamated in September 2004 to form a Faculty of Education. The new faculty, based primarily at the College's campus in Epsom, was established with the aim of becoming New Zealand’s leading provider of teacher and social services education.

**Strategic Plans**

Dr John Hood left the University in mid-2004 to take up the position of Vice-Chancellor of the University of Oxford. Professor Stuart McCutcheon, formerly Vice-Chancellor at Victoria University of Wellington, succeeded him as Vice-Chancellor in January 2005. Under his leadership a new strategic plan set a goal to make Auckland a world-class university in New Zealand. This plan, which was refreshed in 2013, envisaged the development of a University focused on excellent undergraduate teaching and learning, dynamic and challenging postgraduate education, and research that contributes to international knowledge, understanding and economic and social development. The University also recognised that it must play a role in addressing inequities in educational participation and achievement by Māori and Pacific students, and placed an emphasis on enhancing its recruitment and support programmes for potential students.

In 2009 the University adopted a Campus Development Strategy that proposed a major investment in infrastructure over the next decade. Major projects included the redevelopment of the Grafton Campus to refurbish laboratories, upgrade plant and construct a new building, completed in 2012; a student accommodation building at Elam, completed in 2011, to house 442 students; and the refurbishment of Arts and Science Buildings. The new South Pacific Centre for Marine Science, based at the Leigh Marine Laboratory, fosters marine research and educates visitors on the marine environment. A major development of the Maths and Physics buildings was completed in 2011.

**Funding**

The University has become increasingly dependent on its own ability to raise the funds it requires to operate. Student tuition fees, including the fees of international students, are now an important part of University income, alongside the tuition subsidies contributed by Government. Income from research is substantial. Philanthropic donations have also become a very important way in which friends of the University show their support for its activities, for the staff and the students. The University has come a long way from the early fund-raising appeal of the 1990s. A “Leading the Way” fundraising campaign, which ran from 2009 to 2012, exceeded its target of $150 million in 2011. A new “For All Our Futures” campaign was launched in 2016, with the goal of raising $300 million by 2020 to support life-changing research which will address critical challenges facing our communities.

**Recent Developments**

In 2013, in a bid to underpin 50 years of growth on a site close to the existing City and Grafton Campuses, the University purchased 5.2 hectares at Newmarket. The site, previously owned and occupied by Lion Breweries, has been partially developed, and the mixed-use campus was officially opened in May 2015, with Engineering and Science occupying the first facilities.

As a result of the Newmarket purchase, in January 2014 the University transferred the 20 hectare Colin Maiden Park and its associated facilities at the Tāmaki Innovation Campus to Auckland Council. This transaction was followed by a sale of the balance of the campus in April 2016. Several buildings and associated carparks have been leased-back for a maximum period of three and a half years to ensure continuity of operations while facilities on other campuses are being developed. This sale is part of the University’s long-term strategy to consolidate activities at the City, Grafton and Newmarket campuses and significantly reduce landholdings. It also reflects the growing importance of cross-disciplinary teaching and research at the University and the need for faculties to be co-located.

Other campus redevelopment projects are continuing, with the new Science Tower and Centre on the corner of Princes and Wellesley Streets now complete and work begun on city-based Engineering facilities. Additional self-catered student accommodation, providing over 700 student places, has opened adjacent to the Domain; while a further 315 self-catered single and double studio apartments in Symonds Street were completed in time for Semester One, 2017.

The Maidment Theatre, which opened in 1976 and has played a crucial role in the development of Auckland's vibrant theatre scene, was closed in December 2015 due to safety concerns about its seismic strength, and has now been demolished as part of a proposed redevelopment to provide improved support for student-related activities. The University plans to build a new performing arts facility elsewhere on the City Campus to meet the teaching, research and service requirements in

Structure of the University

The Council
The University’s governing body is the Council, a mixture of elected staff, students and graduates, and outside appointees. The Vice-Chancellor, the University’s chief academic and administrative officer, is also a member. Council is chaired by the Chancellor who is a lay member of the Council.

The Senate
On academic matters, Council is bound to consult the Senate which the Vice-Chancellor chairs. This body includes all the professors, some non-professorial staff and student representatives. The Senate takes advice from the Education and Research Committees, and from specialist committees, dealing for example with the Library and the Faculties.

The Faculties
Each faculty is a sub-committee of Senate and is headed by a Dean who is usually supported by Associate Deans, a Director of Faculty Operations and other administrative staff. The Dean is responsible for coordinating the academic and research activities of individual departments and liaises with both the Office of the Vice-Chancellor and the Senate committees on regulations, staff appointments, buildings, research funding, library facilities, timetabling etc. The faculty student centres provide assistance to students with programmes and courses. Information is available on faculty websites; handbooks are available from both faculty and departmental offices.

Large-Scale Research Institutes
Each large-scale research institute (LSRI) is headed by a Director, supported by a Deputy Director and administrative staff. The Director is responsible for coordinating the research activities of LSRI staff, including postgraduate research supervision, and liaises with both the Office of the Vice-Chancellor and the Senate committees on regulations, staff appointments, buildings, research funding, library facilities etc. Information is available on LSRI websites.

The Current University

The University has seven campuses with eight faculties representing each of its main disciplines: Arts; Business and Economics; Creative Arts and Industries; Education and Social Work; Engineering; Law; Medical and Health Sciences; and Science. It also has two large-scale research institutes: the Auckland Bioengineering Institute and the Liggins Institute.

Many courses and research activities reflect Auckland’s and New Zealand’s place in the world. This perspective has long been a feature of our programmes. For example, Pacific archaeology, ethnology and languages are emphasised in the discipline of Anthropology. Geographers carry out fieldwork in the Pacific Islands, while University scientists make frequent study trips to the Antarctic. Asian languages, including Chinese, Japanese and Korean, are taught, and Pacific Island languages were introduced in 1991.

The University continues to build on these foundations with the introduction of an entirely new degree programme in 2018. A Bachelor of Global Studies is offered by a number of overseas universities but within New Zealand it is unique to the University of Auckland. Students will learn how to better understand the increasingly complex political, economic, scientific and cultural issues of our world. They will also complete language training and closely study a region where their chosen language is spoken.

The University of Auckland recognises research and research-led teaching as a primary responsibility of its academic staff. High quality research on a large scale and across the full range of disciplines, represented by faculties and Large-Scale Research Institutes, is essential to ensure the place of the University of Auckland among the leading international research universities. University researchers contribute to the growth of new knowledge by conducting fundamental research across a wide range of fields in the natural, human and social sciences, the humanities and creative arts. The University fosters the commercialisation of its research to assist in the pursuit of the country’s economic objectives and applies it so as to enhance social values and advance the wellbeing of all New Zealanders. Research underpins the University’s obligation to act as a critic and conscience of society. As the leading research university in New Zealand, the University of Auckland is committed to the quality and excellence of its degree courses including its postgraduate and doctoral programmes.

Central Administration and Services
Day-to-day central administration and service provision is performed by the Vice-Chancellor’s Office and Academic Services, Alumni Relations and Development, Campus Life, Communications and Marketing, Equity Office, Finance, Human Resources, International Office, IT Services, Libraries and Learning Services (including the University Library), Office of Research Strategy and Integrity, Organisational Performance and Improvement, Property Services and the School of Graduate Studies.

The City Campus
The City Campus, established in 1883, is in the heart of Auckland City. Separated from the tower blocks of the central business district by historic Albert Park on its western flank, the campus covers over 20 hectares.

The City Campus has undergone major development during its existence with many refurbished and new building works.

A new 31,000m² building for the Faculty of Engineering is under construction with planning underway for a new Recreation Centre building.

The Newmarket Campus
The 5.2 hectare Newmarket site was previously owned and occupied by Lion Breweries, and acquired by the University in 2013 to develop as a long term mixed-use campus. The Newmarket Campus is a major strategic acquisition for the University which provides opportunities for long-term growth close to the City and Grafton campuses. The site’s benefits include the opportunity to integrate campus development across the city, providing long term additional space to develop purpose-built research facilities and student accommodation, as well as other business development opportunities.

The campus houses the Faculty of Engineering research facilities, located in four refurbished buildings, and a new building accommodating the Civil Structures Hall, including a 9-metre strong wall (one of the largest in Australasia). It also accommodates some Faculty of Science research facilities.

The Tāmaki Innovation Campus
The University of Auckland Tāmaki Innovation Campus specialises in advanced postgraduate teaching and research activity primarily focused on Health Innovation, and Biodiversity and Biosecurity Innovation.

The Health Innovation theme focuses on population and community health in Auckland and New Zealand, and with its strong international connections leads the world in many areas. Groups included in this theme are the National Institute of Health Innovation, School of Population Health, Simulation Centre for Patient Safety, Speech Science and the University of Auckland Clinics. Many postgraduate programmes are offered within this theme in addition to the undergraduate Bachelor of Health Sciences and Certificate in Health Sciences.

The Biodiversity and Biosecurity theme focuses on New Zealand’s unique flora and fauna, with an emphasis on developing biodiversity expertise, conservation, and the prevention of major threats to native biodiversity by introduced species. The School of Biological Sciences and the School of Environment form the academic core for the theme, working in close collaboration with groups such as the Centre for Biodiversity and Biosecurity, Joint Graduate School in Biodiversity and Biosecurity, Landcare Research, Ministry for Primary Industries.

Tāmaki Innovation Campus is home to the University of Auckland Clinics providing teaching and services to the community in hearing and tinnitus, nutrition and dietetics, and speech language therapy.

The recent sale of Tāmaki Innovation Campus means that activities are being progressively shifted to the City, Grafton and Newmarket campuses with occupation ceasing December 2019.

The Grafton Campus
Located opposite Auckland City Hospital and the entrance to the Domain, the Grafton Campus covers a 2.75 hectare site on Park Road, Grafton. Originally established for the School of Medicine in 1968, the site was recognised as a separate campus in 1995 and in 2008 was formally designated as the Grafton Campus.

Home to the Faculty of Medical and Health Sciences and the Liggins Institute, the campus is a modern biomedical and health education and training facility, complemented by a specialist medical library, the Philson.

The campus houses a number of significant research facilities, including the Auckland Cancer Society Research Centre, Brain Research New Zealand - Rangahau Roro Aotearoa, the Centre for Brain Research, a state-of-the-art Biomedical Imaging Research Unit, the Centre for Advanced MRI, the Clinical Research Centre, the Neurological Foundation Human Brain Bank, the Auckland Regional Tissue Bank, a DNA sequencing facility, the Clinical Skills Centre and the Auckland Medical Research Foundation Medical Sciences Learning Centre which provides teaching in anatomy, radiology and pathology.

Currently under construction, the new Park West building will house the School of Population Health, the School of Medicine, publically accessible teaching clinics and other groups, currently located offsite. A new daycare centre opened in July 2018.

The Faculty operates the Auckland Clinical Campus in the Auckland City Hospital Support Building, and has clinical campuses at Middlemore, North Shore and
Waikato Hospitals with further clinical sites at Henderson, Whangarei, Rotorua, Tauranga and New Plymouth.

The Epsom Campus

The Epsom Campus was established in 1926 as the site of the Auckland College of Education, formerly known as the Auckland Teachers’ College and the Auckland Teachers’ Training College (established 1881). Upon the amalgamation of the Auckland College of Education and the University of Auckland in 2004, the Epsom Campus became the primary site for the new Faculty of Education. The 11.5 hectare campus on Epsom Avenue is approximately four kilometres from the City Campus and three kilometres from the Grafton Campus. It is flanked by Mt Eden Village to the west, Maungawhau (Mt Eden) Domain to the north, and directly adjoins Auckland Normal Intermediate and Kohia Schools and Melville Park to the south and south-east. The campus is well sited for major transport routes. Established trees and gardens complement diverse facilities, including pool, gymnasium, café, marae, tennis courts, health and counselling centre and early childhood centres, to make this an attractive study location.

The Epsom Campus also houses Team Solutions, Te Whānau Maioha Professional Learning and Development, Kohia Centre and retail outlet, the University of Auckland Centre for Educational Leadership, the Woolf Fisher Research Centre and the Sylvia Ashton-Warner Library. These facilities are a drawcard for practising professionals.

In April 2015, the Faculty of Education changed its name to the Faculty of Education and Social Work, making more visible the two main practitioner communities the faculty engages with and serves – teachers and educators, and those in the human services/social work and counselling professions.

The Tai Tokerau Campus

The Tai Tokerau Campus in Whangarei was established by the Auckland College of Education in 1992. Centrally located in Alexander Street, opposite Forum North, the campus offers lecture rooms, student centre, library and a base for a range of Faculty of Education and Social Work programmes and staff. The Tai Tokerau Campus also provides a base for a wider presence of the University of Auckland in the North.

The Leigh Campus

The Leigh Marine Laboratory, situated at Leigh, north of Auckland, houses the University’s Marine Science Research Facility.

Alumni Relations and Development

Alumni Relations and Development is the University’s centralised point of contact for two key groups:

- Alumni and friends, a 190,000-strong network spread across the Auckland region, throughout New Zealand and around the globe. Alumni Relations and Development enables alumni and friends to stay connected with the University and one another and to enjoy a range of benefits and services. Those who wish to have a closer relationship with the University can join a range of alumni groups and clubs listed on the Alumni and friends website (visit www.auckland.ac.nz/globalalumni).
- Philanthropic partners and donors, whose generosity has a transformative effect on research, teaching and learning at the University.

Alumni Relations and Development operates in close collaboration with the University’s Senior Leadership Team, faculties and other service divisions. It is located at University House, 19A Princes Street.

Auckland UniServices Ltd

At UniServices, we bring ideas to life. We partner with the best minds at the University of Auckland to apply intelligent thinking to ideas that have the potential to change the world.

As the University of Auckland’s research and knowledge transfer company, UniServices’ core business is to transform knowledge into solutions for real-world challenges, working with government and industry for more than 30 years.

The objectives of UniServices are to:

- Support researchers and help them grow their research portfolios, increasing the impact of research on society and expanding the value of research outputs.
- Develop mutually-beneficial relationships with research funders and commercial clients, bringing the external worldview into the University research environment.
- Identify, protect and develop the intellectual property of the University that arises from world-class research
- Commercialise University-sourced technology and innovations, developing and investing in the commercial potential of new ideas produced by University staff and students
- Deliver social and economic benefits of research outputs to the wider community across New Zealand

Centres of UniServices are situated on campus. The head office is located at Level 10, 49 Symonds Street. Opening hours are Monday to Friday 8.30am to 5pm. Phone: +64 9 373 7522 or visit www.uniservices.co.nz.
Alliances with Other Tertiary Institutions

The University has alliances with other tertiary institutions in the Auckland region.

Auckland University of Technology
The University of Auckland and the Auckland University of Technology entered an alliance in 1999. The alliance provides for the development of complementary teaching programmes, co-operative activities in administration, research and procurement and a Joint Board to oversee the operation.

Manukau Institute of Technology
In 1999 the University of Auckland and the Manukau Institute of Technology signed a Deed of Cooperation with the aim of enhancing the availability of University qualifications to students in the Manukau region. The University of Auckland Programme at Manukau offers the degrees of Bachelor of Education (Teaching) and postgraduate courses in Education. These programmes are taught at the Manukau Institute of Technology Campus.

From 2010 academic pathways in Business, Teacher Education, Engineering and Nursing enable MIT students to embark on a range of qualifications offered by the University. Students, depending on their chosen programme, can apply to the University with an awarded MIT qualification or may be admitted with a partially completed degree and transfer credits gained at MIT towards the requirements for qualifications at the University. For further information on these programmes and on admission and enrolment, please visit www.auckland.ac.nz/mit.

Application for Admission
All students intending to study at the University of Auckland for the first time, and those students not enrolled at the University of Auckland in the previous calendar year, must submit an Application for Admission. To enrol applicants must meet (a) the admission requirements as detailed below and (b) any specific programme entry requirements. Students whose admission to a programme is approved will receive an offer of a place and on acceptance of this offer may proceed to enrol online in courses.

Prerequisites and Conditions
1 Subject to the Council’s statutory powers to decline admission and enrolment (whether for insufficiency of accommodation or of teachers or for other cause) and to Regulation 2, a person is eligible to be admitted to the University and to be admitted as a student if that person:
   a has satisfied the requirements for entrance to a university in New Zealand
   or
   b is granted Special Admission
   or
   c is granted Discretionary Entrance
   or
   d is granted admission ad eundem statum, based upon study at a secondary school or another tertiary institution:
      (i) at entrance level,
      or
      (ii) with credit,
      or
      (iii) with graduate status.

2 Unless Senate approves otherwise, a person who has not reached the age of 16 years by 31 December in the year preceding that in which admission is sought will not be eligible to be admitted to this University.

3 A person seeking to be admitted to the University must:
   a comply with these regulations
   and
   b sign and date the declaration on the Application for Admission form which includes the words:
      ‘I promise to abide by the Statutes and Regulations, and comply with the reasonable requirements of the University of Auckland’
      or
   c accept that completing and submitting the Application for Admission online constitutes signing and dating the declaration as defined under the Electronic Transactions Act 2002.

Requirements for Entrance to a University in New Zealand

   From 1993 to 2003: three individual subjects with C grades or higher plus Higher School Certificate, or an ‘A’ or ‘B’ Bursary.
Special Admission
5  a A person who does not hold a university entrance qualification but who is a New Zealand citizen or permanent resident and has attained the age of 20 years on or before the first day of the semester in which a proposed programme is offered is eligible to be granted Special Admission.

b A person seeking Special Admission to the University has to apply for it in accordance with the Admission Regulations and submit evidence of age and educational qualifications.

c Senate may waive the age requirement where an applicant is in its opinion otherwise fit to be admitted and, in particular, has satisfied any qualification for admission specified in the regulations for that programme of study.

d A person seeking to be admitted to the University of Auckland who wishes to be granted credit for any prior learning must apply under Regulation 7 (Admission at Entrance Level or with Credit).

e Special Admission applicants who have previously failed a foundation programme or not reached an adequate standard in a preparatory programme, will not be re-admitted to the University unless their last enrolment is two or more years previous and they have subsequently undertaken work, study or life experience that demonstrates readiness for academic study. Special Admission applicants refused admission should be advised of other study options.

Discretionary Entrance
6  a A person under the age of 20 years who does not meet the University Entrance standard, but

(i) is a citizen or permanent resident of New Zealand or Australia*

and

(ii) has received secondary schooling to at least New Zealand Year 12 level (or its equivalent overseas) and

earned at least 14 credits in an approved subject at Level 2 towards NCEA (or its equivalent)

and

(iii) has met the literacy and numeracy standards required for University Entrance, or their equivalents may apply for Discretionary Entrance.

* Australian applicants’ most recent year of schooling must have been in New Zealand.

b Persons who have undertaken Year 13 study beyond 1 June at a New Zealand secondary school may normally not be admitted under the Discretionary Entrance provisions before July in the following year. Admission will be at the discretion of the University.

c In special circumstances the Chair of Universities New Zealand–Te Pōkai Tara’s Sub-Committee on University Entrance may permit persons who do not fulfill Regulation 6a(ii) or Regulation 6a(iii) above to apply for Discretionary Entrance.

d A person studying at a New Zealand secondary school, who is attempting to qualify for entrance to the University, may apply for Discretionary Entrance in the same year for the purpose of enrolling in courses offered in Summer School. Any person admitted under this regulation who does not, in the following January, meet the University Entrance standard will be required to withdraw from the University and may re-apply for admission at mid-year. Students required to withdraw may complete their Summer School programme before doing so, but any courses passed will not be credited to a qualification until a University Entrance qualification is gained.

e A person seeking Discretionary Entrance to the University must apply by completing the requirements prescribed on the Discretionary Entrance form.

Admission ad eundem statum (Admission at Entrance Level or with Credit)
7  a From a New Zealand university

A student from another university in New Zealand, including a student who had enrolled at the University
of Auckland previously, who wishes to reapply to the University of Auckland must submit an Application for Admission form and may apply for credit under the provisions of the Credit Regulations.

b From another tertiary institution in New Zealand or overseas
A person who wishes to be admitted to the University and who has gained appropriate qualifications validated by the New Zealand Qualifications Authority or from an overseas institution may be granted admission by this University:
(i) at entrance level
(ii) with credit towards a certificate, diploma or a Bachelors degree for work which in the opinion of Senate is substantially equivalent and is in accordance with the credit regulations
(iii) with graduate status.

c From a New Zealand secondary school
New Zealand citizens, permanent residents or international students who have gained from a New Zealand secondary school an entrance qualification approved by Universities New Zealand–Te Pōkai Tara for the purpose of admission *ad eundem statum*, may be granted admission *ad eundem statum* to this University.

d From an overseas secondary school
New Zealand citizens, permanent residents or international students who have gained an appropriate overseas qualification may apply to have that qualification recognised as being equivalent to a university entrance qualification set out in Regulations 4a–e above. A New Zealand citizen who has completed a year of academic study overseas, which is deemed to be at the equivalent of Year 13 in New Zealand, whether or not a formal academic qualification has been obtained, may apply for Discretionary Entrance, if appropriate, or may apply for *ad eundem statum* entrance under this Regulation.

e A person seeking admission under this regulation has to apply by completing the requirements on the Application for Admission form.

8 a Credits may be specified or unspecified and the grant of admission may include permission to advance in specified subjects or courses.

b Prerequisite courses or programmes may be prescribed as a condition of the approval to proceed to a higher degree or other qualification.

Students Enrolled at Another Educational Institution
9 a When they enrol, students are required to declare if they are intending to enrol concurrently during the year in question at any other educational institution.

b A student at a New Zealand secondary school who satisfies the admission requirements and who has the specific written approval of the institution’s principal may, with the approval of Senate or its representative, enrol in up to 15 points per semester.

English Language Competence
10 a Applicants for admission to the University of Auckland must provide evidence acceptable to the University of their competence in both written and spoken English.

b For admission purposes, the University will be satisfied of an applicant’s competence in English:
(i) if English is the applicant’s first language
or
(ii) if the applicant has a New Zealand university entrance qualification
or
(iii) if the applicant has an overseas university entrance qualification from a country where the main language is English and the main language of instruction and assessment for that qualification was English
or
(iv) if the applicant performs to a satisfactory standard, as set down by the University Senate from time to time, in an approved English Language test
or
(v) if the applicant provides other evidence acceptable to the University of competence in both written and spoken English.

c If the applicant is age 20 years or over, and is a New Zealand citizen or permanent resident, this regulation does not apply.

Note: Under the provisions of the Education Act 1989, the University of Auckland may require students over the age of 20 applying for admission to any restricted entry programme to provide evidence of English language competency.
Credit Regulations

Credits
1 a A student may, with the approval of Senate or its representative and on payment of the prescribed fees under the Fees Statute, be granted credit towards a programme approved by the Dean of Faculty concerned under the provisions of these regulations.

b A student may not be granted further credit for work already credited under this regulation.

Credit from Another Tertiary Institution: Transfer Credit
2 a A student who applies for admission to the University of Auckland and has undertaken an appropriate programme at an approved tertiary institution may be granted appropriate credit towards a degree or other qualification of the University of Auckland on the basis of work successfully completed in the previous programme.

b To be awarded an undergraduate degree of the University of Auckland, a student must complete at least the equivalent of a full time year of study as an enrolled student at the University of Auckland and pass a minimum of 120 points towards that degree.

c Credit granted under 2a above may be specified or unspecified and the grant of admission may restrict advancement in specified subjects or programmes.

d (i) Credit granted under 2a above for an undergraduate qualification will normally be granted only for courses at Stage I and Stage II. Only in exceptional circumstances will the grant of credit be considered at Stage III for courses taken at Stage III at another tertiary institution.

(ii) Where Parts are specified for a Bachelors degree, credit may be awarded within a Part according to suitability of course content and/or professional requirements and irrespective of the Stage of the course passed. Credit towards an undergraduate qualification will not normally be granted for postgraduate level courses.

(iii) Subject to any provisions of the relevant Programme Regulations, where a transferring student has completed an undergraduate qualification at a recognised New Zealand or overseas institution, credit granted under 2a above will be treated as though it were ‘cross-credit’ under 5a and will be subject to the limits set out in 7.

(iv) Credit may be refused for undergraduate courses passed more than five years previously.

e Unless prohibited by the regulations of a prescribed degree, credit may be granted under 2a above towards a Bachelors Honours Postgraduate degree, taught Masters degree or the taught component of a research Masters degree with a total points value of more than 120 points, or Postgraduate Diploma provided that:

(i) No more than 30 points may be granted as transfer credit.

(ii) The enrolment in the postgraduate qualification at the University of Auckland is no later than three semesters from the initial enrolment in the courses for which credit is to be given.

(iii) The application for transfer credit is made at the time the student is admitted to the postgraduate qualification.

(iv) The completed courses are at postgraduate level in the disciplinary area of the qualification for which transfer credit has been sought.

(v) Transfer credit will not be given for independent research courses such as a dissertation, research project, research portfolio, thesis, or similar, or the major creative component of a postgraduate programme.

(vi) Transfer credit will not be given for courses in completed qualifications.

(vii) Grades for transfer credit courses will not be included in the calculation of an overall grade for Honours (or Distinction/Merit).

f Where prior approval for external tertiary study, exchange or study abroad enrolment has been granted:

(i) The grant of more than 30 points of credit for courses taken at another tertiary institution will be considered for a Bachelors Honours degree, taught Masters degree, the taught component of a research Masters degree with a total points value of more than 120 points, or a Postgraduate Diploma.

(ii) The grant of credit for courses taken at another tertiary institution will be considered for a research Masters degree.

g The grant of 60 points of credit from a completed postgraduate certificate towards a Postgraduate Diploma may be approved where the admission regulations for the diploma programme allow for it.

h Credit will not be available for any course passed at another tertiary institution with a conceded or restricted pass.
Where cross-credit or transfer credit has been awarded at another tertiary institution, this credit may not also be credited to a programme at the University of Auckland.

Approved Study at Another Institution

A student who is enrolled at the University of Auckland and who concurrently enrols and completes courses at another tertiary institution, which they wish to credit to their University of Auckland qualification, must:

(i) Seek from the Dean of the relevant Faculty, or nominee, prior approval of the proposed concurrent enrolment and confirmation that the courses will satisfy the regulations and requirements for the qualification for which the student is enrolled at this University and that appropriate credit may be granted.

(ii) Apply for credit in accordance with these regulations when the official results are known.

Any credit granted towards a University of Auckland qualification from study at a Summer School will be added to the current year of study at this University.

Where prior approval has not been sought, credit will not normally be granted.

Where study at another institution is part of approved external study, study abroad or exchange arrangement, credit for an undergraduate qualification may be approved for Stage III or postgraduate level courses if the successfully completed study is deemed appropriate for such credit by the Dean of the relevant Faculty or nominee.

Cross-credits and Internal Credit

In this Regulation ‘cross-credit’ means a course which is common to two University of Auckland undergraduate qualifications, which may be Bachelors degrees, undergraduate diplomas and undergraduate certificates, and is credited to both. ‘Internal credit’ means credit awarded to a programme for one or more courses passed for another University of Auckland qualification, which cannot be designated as a cross-credit.

A student taking two programmes may only be awarded as cross-credits and/or internal credit the maximum allowed for one, but not both, of the programmes.

A course which is designated a cross-credit may not be credited to more than two qualifications.

When calculating cross-credits between a second and third qualification, points from previously granted cross-credits may not be used. The maximum number of cross-credit points that may be granted is based on one third of the points not previously designated for cross-credits.

A Stage III course that fulfils the Stage III requirements of one qualification may not normally be designated as a cross-credit to meet the Stage III requirement of another qualification unless permitted by the regulations of a prescribed undergraduate degree.

A student may not designate as a cross-credit any course passed with a conceded pass or a restricted pass. If that course is compulsory, another course may be substituted for it as Senate or its representative may approve.

Designation of courses as cross-credits, as permitted by these regulations, is subject to the approval of the Dean of the relevant Faculty or their nominee.

Limits

Subject to any other provisions of these regulations or the relevant Programme Regulations:

In the case of qualifications of equal value, the total value of transfer credit, cross-credits and internal credit is limited to one third of the total value of the degree, diploma or certificate.

Where the qualifications concerned are of different values, the total value of transfer credit, cross-credits and internal credit may not exceed one third of the total points value applying to the qualification of lesser value.

Cross-credits are not available for Masters degrees, Bachelors Honours Postgraduate degrees, doctorates, postgraduate certificates and postgraduate diplomas.

Limits on Cross-credits for Conjoint Degrees

A conjoint degrees combination is considered to be two degrees for the purpose of calculating cross-credits.

A maximum of 80 points may be cross-credited from a completed conjoint degree component to another qualification.

A maximum of 80 points may be cross-credited from a completed qualification to a conjoint degree component.

The apportionment of the points to the components of the conjoint degrees combination is subject to the approval of the appropriate Deans or their representatives.
Reassigned Courses
9  a  A student may apply, by submitting an Application to Reassign Courses form, to reassign courses passed for, and assigned to, one qualification to another qualification for which the courses are available.

b  A student may not reassign courses passed for one qualification to another once the qualification for which the courses were passed has been awarded.

c  A student may not reassign to another qualification any course passed with a conceded pass or a restricted pass. If that course is compulsory, another course may be substituted for it as Senate or its representative may approve.

d  A student may apply to reassign a course or courses passed for a Certificate of Proficiency to a taught Masters degree, or the taught component of a research Masters degree with a total points value of more than 120 points, a Bachelors Honours Postgraduate degree, a postgraduate diploma or a postgraduate certificate provided that:
   (i)  no more than 30 points are reassigned
   (ii) the enrolment in the postgraduate qualification is no later than three semesters from the initial enrolment in the course(s) reassigned from a Certificate of Proficiency
   (iii) the application to reassign is made at the time the student is admitted to the postgraduate qualification
   (iv)  the course is available in the schedule of the qualification to which it is reassigned.

e  Courses which are reassigned cease to be credited to the former qualification.

Review and Appeal Procedure
10  a  Decisions under these Regulations may be reviewed only if:
   (i)  There was a failure of the University's process and/or
   (ii)  The basis of the decision was manifestly at odds with the evidence.

b  Requests for review of Transfer Credit and Approved Study at Another Institution decisions should be made to the Applications and Admissions Office. Requests for review of Cross-credits, Internal Credit and Reassigned Courses decisions should be made to the Records, Enrolment and Fees Office.

c  If the request for review is unable to be resolved by the Applications and Admissions or Records, Enrolment and Fees Offices, it will be referred to the Faculty concerned or, in the case of postgraduate qualifications, the Dean of Graduate Studies for reconsideration.

d  If a student remains dissatisfied following reconsideration by the Faculty or Dean of Graduate Studies, a written appeal for a review of the credit decision may be submitted to the Director, Academic Services.

e  The Credit Review Board will consider all appeals relating to credit decisions on behalf of Senate.

f  Students who are submitting an appeal have the right to be heard in person.

g  The decision of the Credit Review Board must be recorded and the appellant informed of the decision in writing.

h  The decision of the Credit Review Board is final.

Enrolment and Programme Regulations

Academic Calendar
1  a  The academic year will begin on the first day of January of the calendar year and will end on the last day of December of that same calendar year.

b  There will be a Summer School, a Late Year Term and two semesters in each year. There will be four quarters in a year.

c  The Summer School will normally begin on the second working day after the New Year break and will end with examinations held over three days commencing the second or third Monday in February. If the second working day is a Friday, the Summer School will begin on the following Monday.

d  The first semester will begin on the ninth or tenth Monday of the calendar year and end on the 26th Monday of the calendar year, the final three weeks and one day of which will be a study and examination period.

e  The second semester will begin on the 29th or 30th Monday of the calendar year and end on the 46th Monday of the calendar year, the final three weeks and one day again being a study and examination period.

f  Each semester will include a break of at least one week after about six weeks of teaching.
Definitions of Full-time and Part-time Study

2 Full-time study is defined as a student workload of:
   a not fewer than 100 points over two semesters in one year
   or
   b not fewer than 50 points in one semester
   or
   c not fewer than 25 points in Summer School
   or
   d not fewer than 25 points in one quarter
   or
   e not fewer than 50 points in Late Year Term.

3 Part-time study is defined as a student workload of:
   a fewer than 100 points over two semesters in one year
   or
   b fewer than 50 points in one semester
   or
   c fewer than 25 points in Summer School
   or
   d fewer than 25 points in one quarter
   or
   e fewer than 50 points in Late Year Term.

Points

4 a (i) Students in a Bachelors degree, diploma or certificate are subject to the provisions of the Academic Standing regulations

   (ii) A student may enrol in:
         (a) up to 80 points in each of Semesters One and Two
         (b) up to 30 points in a Summer School
         (c) up to 45 points in each of Quarters One, Two, Three and Four
         (d) up to 60 points in Late Year Term
         (e) up to 60 points in total if a student is enrolled in both Summer School and the Late Year Term.

   Notes:

   1 A recommended full-time programme in Semesters One and Two would normally comprise a total of 120 points.

   2 A recommended full-time programme in Quarters One, Two, Three and Four would normally comprise a total of 120 points.

   b (i) For a Masters degree, PhD or other doctorate, where another programme is included in the enrolment, a limit on points may be determined by the Dean of Faculty or delegated representative in any particular case provided that the Masters, PhD or doctoral programme will always comprise more than half of the total points for which the student has enrolled.

   (ii) Students who are eligible to claim student allowances and/or an additional student loan entitlement and wish to enrol during the summer vacation period in order to work on their thesis, dissertation or research topic are required to complete a Course Alteration Form.

Exchange/Study Abroad

5 For study at another institution as part of an approved undergraduate exchange or study abroad arrangement:
   a a student is required to enrol in at least 45 points in a semester for up to two semesters of their degree
   b a student may enrol in a maximum of 75 points in a semester for up to two semesters of their degree
   c the maximum amount of credit that may be awarded under these regulations is the maximum limit specified in Regulation 7 of the Credit Regulations.

General Programme Provisions

6 a For the purposes of this section of the Regulations a representative of Senate includes a Dean, and the Deputy, or Associate of a Dean; and a Head of Department and the Deputy or Associate of a Head of Department.

   b Subject to the Admission Regulations and to the express provisions of any other statute or regulation, every student for a certificate, diploma or degree programme must:
      (i) be admitted to the University
      and
      (ii) follow the prescribed programme in the order prescribed or indicated in accordance with the regulations governing that programme
      and
(iii) comply with the provisions of the Examination Regulations.

c Each student must ensure that, before confirming their enrolment, their proposed programme and enrolment:
   (i) complies with the regulations of the qualification to which they have been admitted
   and
   (ii) does not involve lecture clashes.

d Senate or its representative may in exceptional circumstances approve:
   (i) a proposed enrolment which does not in every particular satisfy the regulations for the programme for
       which the student is intending to enrol
       or
   (ii) a variation in the programme to avoid lecture clashes.

e Where an approval of a proposed programme as a whole is declined by a representative of Senate the student
     may appeal to Senate whose decision shall be final.

f A Faculty may determine whether a programme will be offered part-time or full-time for new students in any
   particular academic year. This information will be made available on the University’s website.

g Where electives are prescribed for a programme, Senate may at its discretion determine which of them shall
   be available in any semester provided that sufficient electives are available to enable students to complete
   their programme.

h A student who has enrolled for the second semester in a course or courses that have a first semester
   prerequisite or corequisite and who fails the prerequisite/corequisite course(s) may not proceed with the
   second semester enrolment unless a concession is granted by the relevant Dean.

i Where in the opinion of a Head of Department an insufficient number of students has enrolled in a course
   taught in the Department or where there are insufficient staff to teach it, that Head of Department may, with
   the approval of the Dean of Faculty, cancel that course not later than one week after the beginning of the
   semester in which it would have been taught, if the essential prerequisites for any student’s enrolment are not
   thereby affected. A student is not to be charged a fee for any alteration to enrolment required because of the
   cancellation of a course.

j If a student wishes to enrol in a course that is not explicitly listed in the Structure and Content or Schedule of
   their programme, they may do so, provided that:
   (i) the Structure and Content or Schedule of their programme includes a provision for them to enrol in
       other courses
       and
   (ii) approval is given by the Dean of the faculty in which the course is offered
       and
   (iii) any prerequisite, corequisite or other conditions are met or Senate or its representative has, in
       approving the enrolment, waived those requirements
       or
   (iv) it is completed as a Certificate of Proficiency.

k In respect of individual courses, ‘to complete’ means to attend all required classes, submit any required
   assessment, sit any required examinations, and be awarded a pass grade.

Restrictions

7 a A student may not normally enrol in the same semester or quarter or Summer School or Late Year Term for
   more than two different programmes.

   (i) A student may not enrol in the same semester or quarter or Summer School or Late Year Term for
       courses the content of which is substantially similar.

   (ii) A student may not enrol for any course the content of which is the same as, or substantially similar to,
       any course for which credit has been received, provided that in exceptional circumstances Senate or its
       representative may permit such enrolment for a Certificate of Proficiency.

   (iii) Work submitted for credit towards the result in any course may not be resubmitted in respect of any
       other course.

   (iv) A student who has twice enrolled in, but has failed to be credited with a pass in, a course is not entitled to
       enrol again in that course other than in exceptional circumstances approved by Senate or its representative.

   (v) A student may not be admitted to a programme for a qualification at the same level, in the same discipline,
       as a qualification that has already been awarded or conferred or for which the requirements have been
       completed, unless specific provision is made in the regulations for the relevant programme or special approval
       is given by Senate or its representative.
Unless special approval is given by Senate or its representative, a student may not be admitted to a programme for a postgraduate qualification

(i) for which the student has previously failed to meet the general requirements by being unable to complete within the total allowable enrolment limit

or

(ii) the content of which is the same as, or substantially similar to, any qualification for which the student has previously failed to meet the general requirements.

Discontinuation

8 a A student who has not enrolled in a course for a programme for a period of three years shall have their admission to the programme discontinued and must apply for readmission to that programme before any further enrolment for the programme.

b A student who has twice enrolled in, but has failed to be credited with a pass in a course which is required for completion of, or continued enrolment in, a programme may have their enrolment for that programme discontinued by Senate or its representative.

c A student who has been admitted to a programme with specified conditions which must be met in order to be able to continue enrolment in that programme and who has not met those conditions may have their enrolment for that programme discontinued by Senate or its representative.

d A student who has been re-admitted to a programme after discontinuation may have specified conditions imposed which must be met in order to be able to continue enrolment in that programme. Where such conditions are not met their enrolment for that programme may be discontinued by Senate or its representative.

e A student whose enrolment in a programme has been discontinued under Regulations 8c or 8d may not be re-admitted to that programme within two years of the date of discontinuation.

f A student who has received ‘Did not sit’ (DNS) or ‘Did not complete’ (DNC) grades on all their courses in a semester may have all future course enrolments deleted and their programme discontinued by Senate or its representative.

g A student whose enrolment has been discontinued because of failure to meet specified conditions, or as a result of receiving ‘Did not sit’ (DNS) or ‘Did not complete’ (DNC) grades in a prior semester, may apply for reconsideration of their discontinuation where they consider that medical or other exceptional circumstances should be taken into account. An application for reconsideration of discontinuation must be made to the Dean of the Faculty in writing.

Enrolment

9 a Following acceptance in a programme of their choice, students can enrol in courses online. For late enrolment see the Late Enrolment provisions in this section.

b Students whose dissertations or theses for a diploma or degree are incomplete are required to be enrolled until the dissertation or thesis is presented.

10 a A double-semester course is a full-year course, run over two consecutive semesters and assessed at the end of the second semester of enrolment. The same grade is applied across both components of the course.

b To complete, students must enrol consecutively in both the A and B component of the course. Deadlines for additions and deletions for double-semester enrolments are noted under Changes to Current Enrolment.

c Enrolments must normally be made in consecutive semesters unless a suspension of time is approved for a postgraduate research course under General Regulations.

d The A and B enrolments in a double-semester course are two components of the same course. Any action applied to one component is applied to both.

e Enrolment in the A component of a double-semester course is considered a request for enrolment in the B component for the following semester and withdrawal from or deletion of one component will be applied to the remaining component.

11 a A double-quarter course is a half-year course, run over two consecutive quarters and assessed at the end of the second quarter of enrolment. The same grade is applied across both components of the course.

b To complete, students must enrol consecutively in both the A and B component of the course. Deadlines for additions and deletions for double-quarter enrolments are noted under Changes to Current Enrolment.
c Enrolments must normally be made in consecutive quarters unless a suspension of time is approved for a postgraduate research course under General Regulations.

d The A and B enrolments in a double-quarter course are two components of the same course. Any action applied to one component is applied to both.

e Enrolment in the A component of a double-quarter course is considered a request for enrolment in the B component for the following quarter and withdrawal from or deletion of one component will be applied to the remaining component.

Members of the Security Intelligence Service
12 a No member of the Security Intelligence Service enrolled as a student at the University shall carry out any inquiries into security matters within the University premises.

b The proposed attendance of a member of the Security Intelligence Service at the University shall be discussed between the Security Intelligence Service and the Registrar before his or her enrolment.

c After those discussions have been held, Senate shall determine each year what special conditions (if any) as to attendance at Classes shall apply to students who are members of the Security Intelligence Service in order to maintain discipline among the students of the University by preventing any possible disturbance to the carrying out of normal teaching activities.

d In this Section 12 'Member of the Security Intelligence Service' means an officer or employee engaged in the Security Intelligence Service established under the New Zealand Security Intelligence Service Act 1969.

Academic Integrity
13 a All students admitted to a University of Auckland programme, excluding the University of Auckland Certificate in Foundation Studies, are required to complete the online Academic Integrity course.

b Completion of the Academic Integrity Course is a one-time only requirement. A student who has completed the Academic Integrity Course under the regulations for a programme is not required to repeat the course when admitted to any subsequent programme.

c For undergraduate students, completion of the Academic Integrity Course is a condition of fulfilling the requirements for General Education.

d Students who, for any reason, are fully or partially exempted from the requirements for General Education must complete the online Academic Integrity Course unless they have previously done so.

e All postgraduate students who have not already completed the Academic Integrity Course are required to do so as a condition for completing their programme of study, and before any degree, diploma or certificate is conferred or awarded.

f All doctoral candidates who have not already completed the Academic Integrity Course are required to do so as a condition of meeting the requirements for the provisional registration period.

Academic English Language Requirement
14 All domestic students, and all international students applying on the basis of a New Zealand secondary school qualification or results at another New Zealand tertiary institution, who are admitted to a University of Auckland bachelors degree qualification are required to meet the Academic English Language Requirement.

Note: for the purpose of these regulations this includes the Bachelor of Engineering (Honours) and the Bachelor of Urban Planning (Honours).

Meeting the Academic English Language Requirement
15 To meet the Academic English Language Requirement through an entry qualification on admission to a bachelors degree a student must have:

a If applying based on NCEA results

   either

   (i) gained the University Entrance Literacy Standard and through their NCEA results achieved a minimum of 17 credits in English at Level 2 and/or 3

   Note: English for Academic Purposes standards US 22749, US 22750 and US 22751 will contribute to meeting the Academic English Language Requirement

   or

   (ii) gained the University Entrance Literacy standard solely through Te Reo Māori and/or Te Reo Rangatira credits

b If applying based on University of Cambridge International Examinations (CIE, taken in New Zealand) results,
gained the University Entrance Literacy Standard and achieved a minimum of a D grade in an English course at AS or A Level

or

c if applying based on International Baccalaureate (taken in New Zealand) results, gained the University Entrance Literacy Standard and be in receipt of 26 points

or

d if a graduate,
(i) completed a bachelors degree, or a higher qualification from a New Zealand university

or

(ii) completed a bachelors degree, or a higher qualification, from a recognised tertiary education provider in New Zealand

or

(iii) completed a qualification from an overseas tertiary institution that is the equivalent of a bachelors degree, or higher, in New Zealand, as approved by Senate or its representative

or

e completed a University of Auckland Foundation programme, excluding the University of Auckland Certificate in Foundation Studies.

16 A student who has been admitted to a bachelors degree having passed at least 60 points of study at a tertiary institution, but who has not met the requirements in Regulation 15, will meet the Academic English Language Requirement if they achieve a result of good or satisfactory in DELNA screening (or an average score of 7 across all bands, and a minimum score of 7 in writing, in DELNA diagnosis if required). This result must be achieved within 12 months (three consecutive semesters) of the student’s first enrolment.

17 A student who has been granted Special Admission will meet the Academic English Language Requirement if they achieve a result of good or satisfactory in DELNA screening (or an average score of 7 across all bands, and a minimum score of 7 in writing, in DELNA diagnosis if required). This result must be achieved within 12 months (three consecutive semesters) of the student’s first enrolment.

18 Where the regulations allow a student to meet the Academic English Language Requirement through DELNA screening and/or diagnosis under Regulation 16 or 17, only the student’s first attempt within the nominated 12 month period will be accepted as the definitive result for the purposes of meeting the Academic English Language Requirement.

19 Where the Academic English Language Requirement is not met by an entry qualification, as outlined in Regulation 15, or through an acceptable result in DELNA screening and/or diagnosis, as outlined in Regulations 16, 17 and 18, the requirement must be met by the student passing an academic English language course, approved by Senate or its representative, within 12 months (three consecutive semesters) of the student’s first enrolment.

20 Summer School is defined as a semester for the purposes of the Academic English Language Requirement.

21 If a student enrols in an academic English language course prior to completing DELNA screening and/or diagnosis, but subsequently meets the Academic English Language Requirement through DELNA, the deadlines for making changes to their current enrolment as specified in Regulation 34 of the Enrolment and Programme Regulations, Changes to Current Enrolment, of the University Calendar, will still apply.

Failure to meet the Academic English Language Requirement

22 A student who fails to meet the Academic English Language Requirement by the end of the 12 months may have their programme discontinued.

23 A student who has had their programme discontinued because of failure to meet the Academic English Language Requirement may apply for reconsideration of the decision where they consider that disabilities, impairments, medical or other exceptional circumstances should be taken into account. An application for reconsideration of the discontinuation must:

a be made on the Reconsideration of the Academic English Language Requirement form

and

b include evidence of disabilities, impairments, medical or other exceptional circumstances

and

c reach the Deputy Vice Chancellor (Academic) within 14 days of the decision to discontinue being made.

24 Where such reconsideration is given the Deputy Vice-Chancellor (Academic) may:

a confirm the discontinuation

or

b cancel the discontinuation

or

c cancel the discontinuation but apply conditions to any further enrolment.
A student who has had their programme discontinued because of failure to meet the Academic English Language Requirement will be excluded from enrolment in all programmes at the University of Auckland for at least one year.

Any student who has had their programme discontinued under the Academic English Language Requirement regulations and who has had their application for reconsideration declined, may within 14 days of being advised of the decision, appeal to the Council against the decision of the Deputy Vice-Chancellor (Academic).

**Readmission**

A student whose programme has been discontinued for failure to meet the Academic English Language Requirement will be entitled to apply for admission to a programme after one year of exclusion.

Applications must:

a. be made on the Reconsideration of the Academic English Language Requirement form

b. state the programme for which the student intends to apply, should the application for readmission be successful

c. state the reasons why the student believes they should be readmitted and include evidence, where applicable

d. reach the Director of Academic Services two months prior to the listed closing date for application to the programme.

Where such application is made, the Director of Academic Services may:

a. permit the student to be readmitted

b. permit the student to be readmitted under specific conditions

c. decline readmission.

A student declined readmission under these provisions may apply for reconsideration of their application for readmission. Where such reconsideration is given, the Deputy Vice-Chancellor (Academic) may:

a. confirm the decision to decline readmission

b. permit the student to be readmitted

Or

c. permit the student to be readmitted under specific conditions.

Applications for reconsideration of a decision to decline readmission must reach the Deputy Vice-Chancellor (Academic) within 14 days of the decision to decline readmission being made.

A student readmitted under conditions specified by the Director of Academic Services or the Deputy Vice-Chancellor (Academic), but who fails to satisfy those conditions, will be automatically excluded from enrolment in all programmes at the University of Auckland.

A student excluded under Regulation 30 is not entitled to apply for admission to a programme for at least one year following the date of their exclusion.

Any student declined readmission at this University under the Academic English Language Requirement regulations and who has had their application for reconsideration declined may, within 14 days of being advised of the decision, appeal to the Council against the decision of the Deputy Vice-Chancellor (Academic).

**Late Enrolment**

Subject to the availability of courses and/or availability of places in a course, a late enrolment may be accepted:

(i) after the day prescribed and before the deadline for additions and deletions;

(ii) after the deadline for additions and deletions upon payment of a late enrolment fee.

The choice of courses for students who enrol after the closing date for enrolment will be determined by Senate or its representative and will not necessarily be those proposed by the students concerned. In determining such courses, Senate is to have regard to the prior claims upon both laboratory and classroom space of those students who have enrolled at or before the prescribed time.
## Changes to Current Enrolment

### Deadlines for Additions and Deletions

34 The last dates for additions and deletions under Regulations 39 and 40 are set out below:

<table>
<thead>
<tr>
<th>For enrolment in</th>
<th>Deadline for additions/deletions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Summer School courses</td>
<td>Seven days inclusive from the start of Summer School</td>
</tr>
<tr>
<td>Semester One courses</td>
<td>Second Friday of semester</td>
</tr>
<tr>
<td>Semester Two courses</td>
<td>Second Friday of semester</td>
</tr>
<tr>
<td>Double-semester (A and B) courses</td>
<td>Fourth Friday of first semester for the course</td>
</tr>
<tr>
<td>Late Year Term courses</td>
<td>Second Friday of Late Year Term</td>
</tr>
<tr>
<td>Quarter courses</td>
<td>Second Friday of quarter</td>
</tr>
<tr>
<td>Double-quarter (A and B) courses</td>
<td>Third Friday of first quarter for the course</td>
</tr>
<tr>
<td>Quarter MAIBUS courses</td>
<td>Second Sunday of quarter</td>
</tr>
</tbody>
</table>

35 It is not sufficient for a student to notify an addition or deletion solely to the department or faculty – it must be done online.

36 Where special circumstances apply, a student may apply for an exemption from additional fees from the Director, Academic Services (or delegated authority).

37 Deadline dates are calculated from the start of the semester, quarter, Summer School or Late Year Term. For courses that start on other dates, the deadline will be calculated from the start date of the course as specified in Student Services Online. The deadline will be the second Friday of the course for single semester, Late Year Term or quarter courses. For MAIBUS courses the deadline will be the second Sunday of the quarter. The deadline will be the fourth Friday of the course for double-semester courses. The deadline will be the third Friday of the course for double-quarter courses. The start date of the course may be prior to the period of teaching for the course. If the dates of a course comprise five days or less, then the deadline will be the day before the start of the course.

38 Where a thesis or research portfolio enrolment commences on 1 December, the deadline for deleting the enrolment, and the accompanying Semester One and Two enrolment, or for making changes to the points value of the enrolment in Semester One, is the fourth Friday of the course.

### Additions

39 Students wishing to add a course to their current enrolment may do so online before the deadline for additions and deletions to be made for the semester, Summer School, quarter or Late Year Term of the enrolment, where the approved limit has not been reached.

### Deletions

40 a A student wishing to delete a course may do so online before the deadline for additions and deletions to be made for the semester, Summer School, quarter or Late Year Term of the enrolment.

b The course will be deleted from the student’s academic record.

### Late Deletion

41 a Late applications to delete a course or courses will be considered by the Director, Academic Services (or delegated authority) only in exceptional circumstances (such as illness, injury or events beyond the control of the student) and upon submission by the student of appropriate evidence.

b Applications must be made on the Late Application to Delete a Course form and must be received by the last day of lectures of the semester, quarter, Summer School, or Late Year Term for the course. For MAIBUS courses applications must be made on the Late Application to Delete a Course form and must be received by the last day of the quarter.

c Following the decision on an application for late deletion of a course, the student may apply for reconsideration of that decision. An application for reconsideration must be made:

(i) in writing to the Director, Academic Services no later than four weeks after the student is notified of the decision

and

(ii) must be accompanied by further evidence in support of the application.

d Where a student has been permitted by the Director, Academic Services to delete a course after the prescribed date under this regulation, any refund or credit of tuition fees will be granted in accordance with the Tuition Fees Refund or Credit Guidelines given in Regulation 44.
Substitutions
42 a Where a department directs a student to substitute one course for another in the same subject, the faculty administration staff will process the substitution on the student's behalf and notify the student when the substitution has been actioned.

b Courses may be substituted up until three weeks before the end of lectures for the semester in which the course is taught.

c A course may only be substituted with a course which is of the same duration, same points value and taught in the same semester.

Note: Where students are directed to take a more/less advanced Second Semester course in place of a First Semester course, they will be permitted, if necessary, to make a late academic deletion. The deletion will be processed by the department on behalf of the student.

d The substituted course will be removed from the student's academic record.

e There will be no adjustment to the student's tuition fees. If there is a variation between charges payable in respect of the substitute and the substituted course, the student will be required to pay only the difference in those charges.

f There will be no refund or credit of any fees or charges for the substituted course.

Withdrawals
43 a Any student wishing to cease attendance in a programme or course after the period specified for deletion may apply to do so by obtaining the approval of the relevant Head of Department and the Dean of the Faculty for that programme. Application must be made on the Course Alteration Form.

Deadlines for Withdrawals
b The last dates for withdrawals are set out below:

<table>
<thead>
<tr>
<th>For enrolment in</th>
<th>Deadline for withdrawals</th>
</tr>
</thead>
<tbody>
<tr>
<td>Summer School courses</td>
<td>One week before the end of lectures</td>
</tr>
<tr>
<td>Semester courses</td>
<td>Third Friday before the end of lectures</td>
</tr>
<tr>
<td>Double-semester (A and B) courses</td>
<td>Third Friday before the end of lectures in the second semester</td>
</tr>
<tr>
<td>Late Year Term courses</td>
<td>Three weeks before the end of the term</td>
</tr>
<tr>
<td>Quarter courses</td>
<td>Second Friday before the end of lectures</td>
</tr>
<tr>
<td>Double-quarter (A and B) courses</td>
<td>Third Friday before the end of lectures in the second quarter</td>
</tr>
<tr>
<td>Quarter MAIBUS courses</td>
<td>Three weeks before the end of the quarter</td>
</tr>
</tbody>
</table>

c The course will remain on the academic record and show as a withdrawal.

d For the purposes of calculating a University Grade Point Average a withdrawal will be counted as a failure.

e There will be no refund or credit of any fees or charges for the withdrawn course. All fees will remain owing.

f For calculation of Requirements for Maintaining Good Academic Standing (under Regulation 47 of these regulations) withdrawal will be counted as a failure.

g For selection into a limited-entry course, a withdrawal is counted as a failure.

h Where withdrawal from a course will not reduce the student’s enrolment to less than 100 points over the academic year, the withdrawal from that course will not affect selection into limited-entry courses.

i For student allowances withdrawal from a course will count as a failure and automatically reduce the number of points in which the student is deemed to be enrolled.

j If a student who ceases to attend lectures fails to complete the Course Alteration Form, the course(s) will be recorded as 'did not sit' (DNS) and will count as a failure for all purposes.

k Applications to withdraw submitted after the dates in Regulation 43b and before the end of the semester, quarter, Summer School or Late Year Term will be considered by the Director, Academic Services (or delegated authority) only in exceptional circumstances (such as illness, injury or events beyond the control of the student) and upon submission of the appropriate evidence.

l Students receiving USA Government Federal Student Aid Title IV funds for payment of their study at the
University of Auckland are subject to special withdrawal procedures. For further information students should contact the Applications and Admissions Office.

Refund or Credit of Fees

44 a Where a student applies, before the dates specified in Regulation 34, to delete all courses of the current enrolment, a full refund or credit of all tuition fees and the Student Services Fee will be made.

Note: A student who has deleted all courses is no longer deemed to be enrolled.

b Where a student applies, before the dates specified in Regulation 34, to delete one or more but not all courses of the current enrolment, a refund or credit of the fees for the course(s) deleted will be made.

c Where a student has been permitted by the Director, Academic Services, under Regulation 41, to delete a course after the prescribed date because of illness, injury or exceptional circumstances beyond the student's control, a refund or credit of tuition fees will be granted in accordance with the Tuition Fees Refund or Credit Guidelines below, provided that Senate may in its discretion increase this percentage, but there will be no refund of the Student Services Fee.

d All course deletions, under Regulations 44a, 44b and 44c above, whereby the fees have been paid and therefore application for a refund may be made, will incur a refund processing fee which shall be deducted from the refund of the fees.

Note: Tuition Fees Refund or Credit Guidelines:

1 For single-semester courses which are deleted:
   (i) before the commencement of the mid-semester break for that semester: 50 percent
   (ii) thereafter no refund or credit will be granted.

2 For double-semester courses which are deleted:
   (i) before the commencement of the mid-semester break for the First Semester: 75 percent
   (ii) before the end of the First Semester: 50 percent
   (iii) before the commencement of the mid-semester break for the Second Semester: 25 percent
   (iv) thereafter no refund or credit will be granted.

3 For Summer School courses which are deleted:
   (i) before the end of the second week from the start of Summer School: 50 percent
   (ii) thereafter no refund or credit will be granted.

4 For quarter courses which are deleted:
   (i) before the end of the fifth week of the quarter: 50 percent
   (ii) thereafter no refund or credit will be granted.

5 For double-quarter courses which are deleted:
   (i) before the end of the first quarter: 50 percent
   (ii) thereafter no refund or credit will be granted.

6 For Late Year Term courses which are deleted:
   (i) before the end of the fifth week of the Late Year Term: 50 percent
   (ii) thereafter no refund or credit will be granted.

7 For courses with non-standard dates:
   (i) before the end of 50% of the course: 50 percent
   (ii) thereafter no refund or credit will be granted.

8 For courses that start on dates other than the official start date of a semester, Summer School or term, the deadline as stated in Guidelines 1-7 above will be calculated from the start date of the course as specified in Student Services Online. The start date of the course may be prior to the period of teaching for the course.

e Students receiving USA Government Federal Student Aid Title IV funds for payment of their study at the University of Auckland are subject to special refund procedures. For further information students should contact the Applications and Admissions Office.

f The University may delay processing a refund or credit until after the last dates for additions and deletions under Regulation 34 have expired.

g Where a student has provided all required documentation in support of their visa application and Immigration New Zealand has declined to grant a student visa then the University will process a full refund of any funds received, without deduction of a refund or administration fee.

Academic Standing

45 Regulations concerning Academic Standing apply to all undergraduate qualifications at the University of Auckland.

a The application of these regulations includes students intending to transfer to the University of Auckland from
any other New Zealand university and those students applying for admission having previously studied at another tertiary institution.

b Summer School is classified as a semester for the purposes of Academic Standing.

c Academic Standing statuses are Good, At Academic Risk, Academic Restriction and Enrolment Terminated.

46 Deferred Results

a Assessment of a student’s Academic Standing will be undertaken when results for at least 50 percent of points enrolled are available and where the results for the remaining points would not affect the overall outcome. Where results for 50 percent of points or more are not available assessment of a student’s Academic Standing may be deferred until sufficient results are available and an assessment can be made.

b A student whose Academic Standing has not been able to be assessed for one or more semesters may have their academic status amended by more than one status at the discretion of Senate or its representative.

Requirements for Maintaining Good Academic Standing

47 A student is required to pass at least 50 percent of points enrolled in any one semester, including Summer School, to maintain Good Academic Standing.

At Academic Risk Academic Standing

48 A student who fails to meet the requirements for Good Academic Standing will, in the next semester of study, have their academic standing amended to At Academic Risk.

a A student with a status of At Academic Risk may be required to participate in such academic support programmes as deemed appropriate by the relevant Faculty.

b A student with a status of At Academic Risk who is enrolled in more than 60 points in the following semester of study (or 15 points in Summer School) may be required by the department to delete the excess course(s).

c A student with a status of At Academic Risk who meets the requirements for Good Academic Standing will, in the next semester of study, have their record amended to that status.

Academic Restriction Academic Standing

49 A student with a status of At Academic Risk who fails to meet the requirements for Good Academic Standing will, in the next semester of study, have their academic standing amended to Academic Restriction.

a A student with a status of Academic Restriction will be restricted to:
   (i) not more than 45 points of enrolment in that semester
   (ii) not more than 25 points in Summer School.

b A student with a status of Academic Restriction will be required to participate in such academic support programmes as deemed appropriate by the relevant Faculty.

c The record of a student with a status of Academic Restriction will be referred to the relevant Faculty for review of the restriction which may be varied if appropriate.

d A student with a status of Academic Restriction who meets the requirements for Good Academic Standing will, in the next semester of study, have their academic standing amended to At Academic Risk. Students whose enrolment is restricted under these provisions may apply to Senate for reconsideration of the restriction where they consider that disabilities, impairments, medical or other exceptional circumstances should be taken into account. Where such reconsideration is given, Senate or its representative (the Dean of the Faculty concerned) may:
   (i) confirm the restriction
   or
   (ii) vary the restriction.

e Applications to Senate must:
   (i) be made on the Reconsideration of Academic Standing form
   and
   (ii) if special consideration is sought for medical or other exceptional reasons, include evidence
   and
   (iii) reach the Dean of the Faculty concerned before the first day of the semester or Summer School.

50 Any student restricted under the Academic Standing regulations may within 14 days appeal to the Council against the decision of Senate.

Enrolment Terminated

51 A student with a status of Academic Restriction who fails to meet the requirements for Good Academic Standing will, in the next semester of study, have their academic standing amended to Enrolment Terminated.
A student with a status of Enrolment Terminated will be excluded from all programmes at the University of Auckland.

A student with a status of Enrolment Terminated will be entitled to reapply for admission to a programme after one year of exclusion. Where such application is made, Senate or its representative (the Dean of the Faculty concerned) may:

a. decline readmission
or
b. permit a student to be readmitted under specific conditions.

A student declined readmission under these provisions may apply to Senate for reconsideration of their exclusion where they consider that disabilities, impairments, medical or other exceptional circumstances should be taken into account. Where such reconsideration is given, Senate or its representative (the Dean of the Faculty concerned) may:

a. confirm the exclusion
or
b. permit a student to enrol under specific conditions.

A student permitted to re-enrol under conditions specified by Senate or its representative, but who fails to satisfy those conditions, will be automatically excluded from enrolment at the University of Auckland.

A student excluded under Regulation 54 is not entitled to apply for admission to a programme for at least one year.

Applications to Senate must:

a. be made on the Reconsideration of Academic Standing form
and
b. if special consideration is sought for medical or other exceptional reasons, include evidence
and
c. state the programme for which the student intends to apply, should the application for readmission be successful
and
d. reach the Dean of the Faculty concerned before the first day of the semester or Summer School.

Any student declined readmission at this University under the Academic Standing regulations may within 14 days appeal to the Council against the decision of Senate.

Vice-Chancellor’s Special Powers

a. The Vice-Chancellor may give such direction, or make such provision as he or she thinks fit, for the relief of undue hardship including but not restricted to:

(i). enforcement of requirements for admission to the University or to a programme, alteration or amendment to statutes or regulations, change in programme or examination requirements
or
(ii). occasions where official advice has been given in writing and acted upon, and it is later found that the courses the student has taken do not accord with the programme regulations and that hardship would be caused if the student were to be compelled to comply with the full requirements of the regulations.

b. A student may appeal against any decision of the Vice-Chancellor under this Regulation to the Council by giving notice in writing to the Registrar within 14 days of being notified of the decision. The Council shall have the power to make such provision as it may think fit. The decision of the Council on any appeal under this Regulation shall be final.

Examination Regulations

These regulations should be read in conjunction with the following examination information which contains more detail and specific instructions:

For staff: Instructions to Examiners and Assessors.
For students: The Examination instructions and regulations page on the University website.

Requirements

1. In order to be credited with a course, a candidate needs to have:

a. enrolled in accordance with the Enrolment and Programme Regulations
and
b. attended classes to the satisfaction of Senate
and
c completed to the satisfaction of the examiners such oral, practical, written or other tests or assignments as have been prescribed for completion during the course and
d completed to the satisfaction of the examiners and in accordance with these regulations any examination prescribed by Senate and
e made any payment due by that candidate to the University.

*Note: Candidates are to be informed by each department of the specific requirements for courses in that department and the extent to which coursework will be taken into consideration in assessing final results. In some cases candidates may not be permitted to sit the examination, as a result of unsatisfactory or incomplete coursework.*

**Language of Assessment**

2 Except in courses where students are required to demonstrate their knowledge and understanding of languages other than English or Māori, or where a student has made provision to complete an assessment task in Te Reo Māori under the University of Auckland Te Reo Māori in Teaching, Learning and Learning and Assessment Policy, all assessment tasks must be completed in English.

**Work Other than Examinations**

3 a It is the responsibility of each candidate to ascertain the nature of the requirements for each course from the department or faculty concerned.

b Provided that candidates have met deadlines set for this work, examiners should normally have determined and returned interim or definitive grades for this work before sitting of the examination, if one is prescribed.

**Time of Examinations**

4 a The examination will be held at the times specified in the timetable each year.

b A candidate may not be examined in any course or part of a course at any time other than that set down for them in the timetable, except when, with the approval of Senate, a different time may be approved because of special circumstances, provided that there is the payment of the extra fee prescribed in the Fees Statute.

**Place of Examinations**

5 All students have to sit their examinations at the University of Auckland except when, with the approval of Senate, a different examination centre may be established because of special circumstances, provided that there is the payment of the extra fee prescribed in the Fees Statute.

**Special Examination Conditions**

6 A candidate who is permanently or temporarily disabled in a manner which affects their ability to undertake examinations under the prescribed examination conditions may, upon production of the appropriate evidence, obtain from one of the following bodies a recommendation which, subject to the approval of Senate or its representative, will enable that candidate to be examined under conditions which take account of the particular impairment: Student Health, Student Counselling or Student Learning Services.

**Direction of Examinations**

7 a The examinations will comprise such written, oral and practical examinations as the examiners may determine. This may include examinations that must be completed on computers or other electronic devices.

b Where degree regulations or prescriptions permit, or Senate, upon such conditions as it thinks fit, approves, the examiners may in respect of any examination release to the candidates the whole or part of the examination paper in advance of the sitting of the examination.

c Candidates will complete answers to the questions in the presence of a supervisor, who is to be appointed or approved by the Manager, Examinations and Timetable Services in accordance with detailed instructions furnished by the Examinations Office.

**Materials Permitted in the Examination Room**

8 a A candidate must not bring to an examination any written or printed matter or any blank paper except by direction of the examiner.

*Note: Candidates are to be informed by each department of the specific books or materials allowed for particular examinations. Details are also explained in the Examination Instructions.*

b (i) All books and papers not approved for use in the examination, along with any spare personal belongings brought to the examination must be left in such part of the room as the supervisor directs.

(ii) Only implements required for the examination are permitted to be on the student’s desk in a clear case
or clear bag. All other cases and containers including glasses cases must be left in such part of the room as the supervisor directs.

(iii) The University does not guarantee safekeeping of students’ possessions in any circumstances, inside or outside examination rooms. Students concerned about the security of valuable possessions, briefcases etc during examinations will need to make alternative arrangements for their care, or ensure that they do not bring these possessions to the University on days when they are required to attend examinations.

c A candidate may not bring into an examination an electronic calculator except by direction of the examiner. A calculator is defined as an electronic device capable of processing, storing or retrieving information, which has the primary purpose of mathematical calculation. Any calculator permitted to be taken into an examination must be hand-held, self-powered and noiseless. It must not make use of an audible alarm or facilities for ‘wireless’ transmission or reception of information.

General Conditions:

(i) other than spare batteries and calculator, supplementary material (eg, operating manuals) related to the use and operation of the calculator will not be permitted in the examination room.

and

(ii) in all cases it is the responsibility of the candidate to maintain the operation and operating power of the calculator.

Note: Candidates are to be informed by each Department of the specific types of calculators allowed for particular examinations. Details are also explained in the Examination Instructions.

d Students are not permitted to have in their possession in the examination room any other electronic device and/or mobile technology, or watches of any kind, unless specified by the examiner. Medically prescribed devices are permitted.

e Unless specified by the examiner, any electronic device and/or mobile technology or watches of any kind brought into an examination room must have all functions switched off and must be left in such part of the room as the supervisor directs. Medically prescribed devices are permitted.

f Any item not permitted in an examination room under Regulation 8d, that is found in the possession of a student will be removed for the duration of the examination and a fine of $100 will apply.

g Audible alarms may not be active on any devices permitted in the examination room. Any device that emits an audible sound signal or alarm during an examination will be removed for the duration of the examination and a fine of $150 will apply.

h Where specified material or calculators are permitted under Regulations 8a and 8c above, examiners are required to be present at the commencement of the examination to check material brought into the examination room.

i Candidates will be asked to show their student identity cards on entry for verification purposes and must display them on their desk for the duration of the examination. Where a candidate does not present a valid student identity card they will be required to remain under examination supervision until they have been verified by the Examinations Office. An administrative fee of $25 will be charged.

Timekeeping of Examinations and Conduct

9 a (i) A candidate will not be allowed to enter the room later than exactly halfway through the period specified for writing the examination.

(ii) Latecomers will not be given any extra time for the examination.

b Candidates will be allowed to read their examination papers for a period of not more than 10 minutes before the examination commences but may not use any writing materials, including calculators, or mark their examination papers until the room supervisor announces that they may do so.

c Candidates must write out answers to examination questions in the official script book that is provided by the University unless otherwise directed by examiners in the exam instructions. No part of the script book may be torn out or removed from the examination room.

d A candidate must not communicate with an examiner in regard to an examination either in the script book or otherwise, except through the Director, Academic Services.

e A candidate must not communicate with another candidate in the examination room or copy from another candidate’s answers.

f Candidates will not be readmitted to the examination room after they have left it unless, during the full period of their absence, they have been under approved supervision.
g All paper used during the examination must be handed to the supervisor before the candidate leaves the examination room.

h A candidate will not be permitted to leave the examination before 15 minutes after half of the period specified for writing the examination has elapsed and then only with the permission of the supervisor and upon handing in the script.

i No candidate will be permitted to leave the examination room during the last 15 minutes of the examination.

j A candidate must not continue writing an answer after the supervisor has announced the expiration of time. In no circumstances is any time over and above the time allotted to any examination to be allowed to candidates for reading over their scripts or making any amendment or addition to scripts.

Misconduct
10 a Any complaint that a candidate has committed an academic offence in an examination will be dealt with under the provisions of the Student Academic Conduct Statute.

b Any complaint that a student has committed an offence relating to unauthorised equipment, dictionaries, timekeeping or other minor matter in which questions of academic honesty are not at stake will receive a warning letter from the Manager, Examinations and Timetable Services. If a student receives two such warning letters they will be fined $150.

Non-payment of Examination Fines and Charges
11 The Manager, Examinations and Timetable Services has the delegated authority to impose examination fines and charges. Where a student does not pay a fine or charge imposed under Regulations 8f, 8g, 8i or 10b then, until those fines or charges are paid in full and without prejudice to the right to recover the unpaid fines or charges at law, the Council may:
   a withhold the formal notification of the results of any examination of the student
   b decline to re-enrol the student
   c decline to release the student’s academic record
   d withhold any degree or diploma certificate from that student
   e restrict that student’s access to University services
   f charge a late payment fee not exceeding $50
   g impose additional charges to recover legal and collection costs where a third party is engaged to recover those fees and charges.

Missed Examinations
12 A candidate who has missed an examination by reporting for it at the wrong time cannot sit that examination at another time.

Aegrotat and Compassionate Consideration
13 a An application for Aegrotat or Compassionate Consideration may be made by candidates who have been prevented from being present at an examination or who consider that their preparation for or performance in an examination has been seriously impaired by temporary illness or injury or exceptional circumstances beyond their control, if the following conditions are satisfied:
   (i) They must be enrolled for the course.
   (ii) The application form must be submitted to the University Health and Counselling Service within one week of the date that the examination affected took place, or if more than one examination has been affected, then within one week of the last of those examinations.
   (iii) The medical certificate or statement of exceptional circumstances on the application form must be completed in accordance with Regulations 13b and 13c below.

b In the case of illness or injury, a registered medical practitioner must:
   (i) State when the practitioner saw the candidate. This should be on the day of the examination, or if this is not possible, on the day before or the day after. For impaired preparation, the medical certificate should cover a period within the fortnight immediately preceding the examination, unless special circumstances apply.
   (ii) Give sufficient detail of the illness or injury to show clearly that the candidate was not responsible for the illness or injury.
   (iii) State whether, in the practitioner’s opinion, the illness or injury of the candidate at the time either prevented the candidate from taking the examination, or was likely to have seriously impaired the candidate’s preparation for it or performance in it.

c In the case of exceptional circumstances beyond the candidate’s control, the statement of circumstances must be supported by suitable evidence.

d The application will be considered by Senate or its representative only if the medical or counselling adviser to
the University reviews the evidence submitted and confirms that:
(i) the candidate was not responsible for the illness or injury or exceptional circumstances
and
(ii) because of the illness or injury or exceptional circumstances the candidate was either prevented from
being present at the examination or the candidate’s preparation for or performance in the examination
was likely to have been seriously impaired.

e The candidate may be granted an aegrotat or compassionate grade by Senate or its representative if the above
conditions are satisfied and there is a recommendation for an aegrotat or compassionate grade from the
appropriate Head of Department or Dean.

f To make a recommendation for an aegrotat or compassionate grade, the Head of Department or Dean must
certify that:
(i) the candidate's coursework in the course was well above the minimum pass standard or, where relevant,
the minimum standard for a class of Honours, Merit or Distinction
and
(ii) for a candidate who sat the examination, the mark attained in the examination was lower than expected
taking into account the candidate's coursework in that course
and
(iii) the candidate is in their opinion clearly worthy of a pass in the course or, where relevant, to be awarded
First or Second Class Honours, Merit or Distinction.

g If a recommendation is required for a course with no coursework, the Head of Department or Dean may take
into account the coursework and examination performance in any other courses for the same degree, where
this is available to them.

h When considering the application, Senate or its representative may take into account the candidate's work in
other courses, or approve an aegrotat or compassionate grade other than that recommended, as it sees fit.

i The above is subject to the restrictions that:
(i) No more than one third of the total points value credited to a degree or diploma may be awarded with
an aegrotat or compassionate grade granted under this Regulation.
(ii) A candidate for a Masters degree, Bachelors Honours Postgraduate degree or a Postgraduate Diploma in
which Honours, Merit or Distinction is available may:
(a) instead of applying for aegrotat or compassionate consideration, apply to re-enrol in all of the
courses affected
or
(b) apply for aegrotat or compassionate consideration in courses worth up to the points limit specified
above, and to re-enrol in any other affected courses in order to retain eligibility for Honours, Merit
or Distinction.

j A candidate who applied for Aegrotat or Compassionate Consideration in any course may, in
exceptional circumstances and on a recommendation from the Head of the Department, be granted
permission by Senate or its representative to take another examination, either written or oral, in
that course.

k The provisions of Regulation 13 apply to:
(i) Any final written examination presented for a course for a degree, diploma, or certificate.
(ii) Any final practical examination presented for a course for a degree, diploma, or certificate, other than
a clinical or performance examination.

l The provisions of Regulation 13 apply (with necessary changes) to:
(i) The final submission in each year of work for the practical subjects for the Degree of Bachelor of Fine
Arts, Bachelor of Fine Arts (Honours), Postgraduate Diploma in Fine Arts or the Degree of Master of Fine
Arts.
(ii) The final submission in each semester of studio work for the Degree of Bachelor of Architectural Studies
as if such final submission were an examination and as if the date upon which such final submission was
due were the date of examination.

Note: The fees for Aegrotat and Compassionate Consideration are listed under the Fees Statute in this Calendar.

Reconsideration
14 a Following the decision of Senate on an application for Aegrotat or Compassionate Consideration, the
candidate may apply to the Director, Academic Services, for reconsideration of that decision.

b An application for reconsideration must be made:
(i) in writing to the Director, Academic Services, no later than four weeks after the student is notified of Senate’s decision
and
(ii) must be accompanied by further evidence in support of the application for aegrotat or compassionate consideration.

c Where the application seeks reconsideration of the effect of any medical evidence previously supplied or consideration of any additional medical evidence or both then:
(i) If the medical or counselling adviser who reviewed the medical evidence previously submitted did not confirm that the requirements of Regulation 13d(i) and 13d(ii) had both been met then all the medical evidence shall be referred to a medically qualified independent person (‘Referee’) to determine that question. The Referee’s decision will be final and conclusive.
(ii) If the requirements of Regulation 13d(i) and 13d(ii) have been found (either on the first application or by a Referee on reconsideration):
   (a) not to have been met, then the application shall be declined;
   (b) to have been met, then Senate or its representative shall consider the other factors to be taken into account in terms of Regulation 13 and determine whether or not to grant the application and that decision shall be final and conclusive.

Written Tests
15 Where a percentage of the marks awarded for a course is allocated to a prior written test, and candidates are prevented by temporary illness or injury or exceptional circumstances beyond their control from sitting the test, or consider that their preparation for or performance in the test has been seriously impaired by any of those causes, then, if the conditions in Regulations 13c to 13f (with the necessary changes) are complied with, the candidates may on application and at the discretion of Senate:
   a be permitted to sit another written test
   or
   b receive a mark for the test based on the average of marks awarded for other coursework
   or
   c take a viva voce examination
   or
   d have the percentage of marks allocated to the test reallocated to the examination.

Results Determination
16 In determining a candidate’s result the examiners:
   a may take into consideration the work done by the candidate during the course
   b are to give due weight to reports on practical work done by the candidate wherever these are required
   c are to include marks obtained by the candidate where Senate has allotted a percentage of marks for on-course assessment in that course.

20 **Conceded Passes**

a Conceded passes apply only to courses taken towards:

(i) a Bachelors degree

or

(ii) an undergraduate diploma comprising not fewer than 240 points

or

(iii) Parts I, II or III of a four year Bachelors honours degree, or its component part in a conjoint degree.

b Courses taken towards Bachelors honours postgraduate degrees are not eligible for conceded passes.

c A candidate may, at the discretion of the relevant faculty, be considered for a conceded pass. No application by the candidate is required.

d A conceded pass, if granted, may not be declined by the candidate.

e A conceded pass will apply only to the programme for which it is awarded and may not be reassigned or credited to any other programme, except where courses for a Bachelors degree are reassigned to a Bachelors honours degree, or where a student is awarded a Bachelors degree, having passed all of the required courses for a Bachelors honours degree not at Honours standard.

f A candidate granted a conceded pass in a course who wishes to take that course again may do so only for Certificate of Proficiency.

g A conceded pass will not be awarded for a course to meet the requirements of General Education.

h A conceded pass will not be given for a course failed at another university.

(i) that the conceded pass may only be awarded where it would permit the student to complete his/her diploma
and
and
(ii) that the student has obtained a grade of D+ in that course.

p Conjoint Degrees
For all conjoint degrees consideration for the award of conceded passes will be in accordance with the provisions for the particular degree as set out in (i), (j), (k) and (n) of this section.

Deferred Results
21 a Bachelor of Education (Teaching English to Speakers of Other Languages) – BEd(TESOL)
Where a candidate has a fail grade of D+ in a course (or courses) and the Examiners deem that the failure(s) may be redeemable by satisfactory completion of additional work, then a pass in that Part may be awarded under the following provisions:

(i) that the award of a grade for that course (or courses) be deferred until a prescribed course of additional study and/or examination be completed to the satisfaction of the Examiners

and

(ii) deferred results be limited to a maximum of 15 points in any Part

and

(iii) that to be eligible for a deferred result a student must achieve an overall GPA of 2.5 or better

and

(iv) that the reassessed grade in that course (or courses) be no greater than a grade of C+.

b Bachelor of Medical Imaging (Honours) – BMedImag(Hons)
Where a student has not achieved a pass in a particular component or components of a course the Examiners may withhold the result pending the completion of specified additional work and/or examination to the satisfaction of the examiners.
If in the opinion of the Examiners for BMedImag(Hons) a particular weakness in a component or components is such that it cannot be addressed by the setting of additional work and/or examination, the student will fail that course.

c Bachelor of Medicine and Bachelor of Surgery – MBChB
Parts II, III, IV and V
Where a student has not achieved a pass in a particular component or components of a Part the Examiners may withhold the result pending the completion of specified additional work and/or examination to the satisfaction of the Examiners.
If in the opinion of the Examiners for MBChB a particular weakness in a component or components is such that it cannot be addressed by the setting of additional work and/or examination, the student will fail that Part.

MBChB Part VI
Where a student has not achieved a pass in a particular component or components of this Part, the Examiners may withhold the result and require a further period of assignment to a department. This will involve postponement of qualification.
If in the opinion of the Board of MBChB Examiners a particular weakness in a component or components is such that it cannot be, or has not been, addressed by this additional work, the student will fail the Part.

d Bachelor of Nursing – BNurs
Part I
Where a candidate has a fail grade of D or D+ in a course (or courses) and the Examiners deem that the failure(s) may be redeemable by satisfactory completion of additional work then a pass in that Part may be awarded under the following provisions:

(i) that the award of a grade for that course (or courses) be deferred until a prescribed course of additional study and/or examination be completed to the satisfaction of the Examiners

and

(ii) deferred results be limited to a maximum of 30 points in any Part

and

(iii) that to be eligible for a deferred result a student must achieve an overall GPA of 2.5 or better

and

(iv) that the reassessed grade in that course (or courses) be no greater than a grade of C+.

BNurs Parts II, III
Where unsatisfactory performance occurs in the clinical practice component of courses in Part II and Part III of the programme, the result of the course will be deferred. In these circumstances, the candidate will be required to complete additional work to the satisfaction of the examiners.

e Bachelor of Optometry – BOptom
Where a weakness occurs in the clinical practice component in certain double-semester Part IV and Part V courses, the result of the course or courses will be deferred. In these circumstances, the candidate will be required to complete additional work to the satisfaction of the examiners. The work will be examined in the following February.
f **Bachelor of Pharmacy – BPharm**  
Where a student has not achieved a pass in a particular component or components of a course the Examiners may withhold the result pending the completion of specified additional work and/or examination to the satisfaction of the Examiners.  
If in the opinion of the Examiners for BPharm a particular weakness in a component or components is such that it cannot be addressed by the setting of additional work and/or examination, the student will fail that course.

g **Bachelor of Physical Education – BPE**  
Where a student has been unable to complete the practical component of a course due to illness, injury or circumstances beyond their control, the result of the course will be deferred. In these circumstances the student will be required to complete assessment of the practical component as soon as practicably possible at a time deemed appropriate by the Head of Programme.

h **Bachelor of Social Work – BSW**  
Where performance criteria have not been met in the skills based components of Stage II, III, and IV courses in the programme, the result of the course or courses will be deferred. In these circumstances, the candidate will be required to complete additional work to the satisfaction of the examiners. The work will be re-examined as soon as possible or in the following semester.

i **Bachelor of Sport, Health and Physical Education – BSportHPE**  
Where a student has been unable to complete the practical component of a course due to illness, injury or circumstances beyond their control, the result of the course will be deferred. In these circumstances the student will be required to complete assessment of the practical component as soon as practicably possible at a time deemed appropriate by the Programme Leader.

j **Postgraduate Diploma in Health Psychology – PGDipHealthPsych**  
Where a student has not achieved a pass in a particular component or components of HLTHPSYC 745, the Examiners may withhold the result pending the completion of specified additional work and/or examination to the satisfaction of the Examiners. If in the opinion of the Examiners for PGDipHealthPsych a particular weakness in a component or components is such that it cannot be addressed by the setting of additional work and/or examination, the student will fail that course.

k **Master of Social Work (Professional) – MSW(Prof)**  
Where performance criteria have not been met in the skills based components of courses in Parts I and II of the programme, the result of the course will be deferred. In these circumstances, the candidate will be required to complete additional work to the satisfaction of the examiners. The work will be re-examined as soon as possible or in the following semester.

l **Graduate Diploma in Teaching (Early Childhood Education), Graduate Diploma in Teaching (Primary), Graduate Diploma in Teaching (Secondary)**  
Where a student, at the completion of their programme, receives a grade of D+ for one course the result of this course will be deferred. In this circumstance, the student’s overall progress will be reviewed by the Programme Head and if it is deemed to be of a satisfactory standard then the student may be given an opportunity to complete additional work within six weeks of notification.

### Recount of Marks

22 By making application not later than seven weeks after the last day of the examination period, any candidate sitting a written examination only may have the marks awarded for their examination script recounted. A recount of marks covers a careful rechecking of the marks recorded by the examiner and ensures that no answer, or any part of an answer, submitted by a candidate has been overlooked. Recounts should always include a careful checking of the accuracy and inclusion of coursework marks.

*Note: For the prescribed fee for an Application for Recount of Marks see the Fees Schedule in this Calendar.*

### Availability of Scripts

23 By making application during the three months after the end of the examination period for the examination, a candidate may obtain a copy of their examination script.

*Note: Examination scripts will normally be retained only for four months after the examination period and thereafter will be destroyed.*

### Theses and Dissertations

24 Where a thesis or dissertation is required as part of an examination the following conditions apply.

a **Theses**  
Details of the submission and binding requirements for a thesis are listed in the General Regulations – Masters Degrees.

b **Dissertations**  
Binding requirements for dissertations will be defined by the faculty.
c Degree of Doctor of Philosophy
   (i) Details of the submission and binding requirements for PhD theses are contained in the Statute for the Degree of Doctor of Philosophy 2016.
   (ii) On completion of the examination, the candidate is to submit two hardbound copies and one digital copy of the thesis to the Graduate Centre as specified in Regulations 9u and 9v of the Statute for the Degree of Doctor of Philosophy 2016. A short abstract not exceeding 350 words is to be included with each copy and bound into the hardbound copies of the thesis. The Graduate Centre is to deposit two hardbound copies and one digital copy with the University Library.

*Note: Candidates are recommended to obtain the booklet Guide to Theses and Dissertations from the Graduate Centre before proceeding with the typing and binding of the thesis or dissertation. A clear, legible type style is to be used.*

Embargoing of Theses
25
   a A thesis will normally be available for public consultation unless there are compelling reasons for restricting access to it.
   b Access to a thesis may be restricted, normally for a maximum of two years, if it contains confidential and sensitive material that would:
      (i) breach prior contractual arrangements with outside organisations
      or
      (ii) prevent or jeopardise an application for a patent, licence, or registration
      or
      (iii) provide good reason for refusing to disclose the contents of the thesis, consistent with the provisions of the Privacy Act (1993) or the Official Information Act (1982).
   c An application for an embargo is to be made by the author of the thesis and/or the supervisor, through the Head of Department to the Dean of Graduate Studies.
   d The embargo will apply to all copies of the thesis, whether hard copy or electronic.

26 The University Librarian or a delegated authority has a right to make and supply copies of theses and dissertations in terms of Section 56 of the Copyright Act (1994) unless the author has imposed conditions restricting the reproduction of their work for a stipulated period.

Failed Theses
27
   a Where a thesis or dissertation has failed the examination, that thesis or dissertation is not to be deposited in the University Library or digital repository.
   b Where a thesis or dissertation has passed, but requirements for the degree have not been met, the thesis or dissertation is not to be deposited in the University Library or digital repository.

References to the Senate
28 For the purposes of these regulations ‘Senate’ indicates any duly empowered delegate of the Senate.

Fees Statute 2001
1 Title and Commencement
   This statute may be cited as the Fees Statute 2001 and came into force on 1 January 2001.

2 Interpretation
   In this statute unless the context otherwise requires:
   ‘Council’ means the Council of the University of Auckland.
   ‘Deletions’ means the deletion of a course from the student’s academic record as specified in the Enrolment and Programme Regulations.
   ‘Domestic Student’ has the meaning given in the Act.
   ‘Due Date’ is the date specified on the Fees Account and/or on the student’s account available through Student Services Online.
   ‘Enrol’ has a corresponding meaning.
   ‘Enrolment’ means enrolment in a programme or course at the University.
   ‘Enrolment and Programme Regulations’ are the Regulations governing enrolment and all associated activity such as, but not limited to, definitions of full-time and part-time study, restrictions to enrolment and changes to current enrolments after closing date.
   ‘Fees Account’ means an invoice or an invoice/statement, or online invoice/statement for the fees and charges payable by a Student as a condition of enrolment.
   ‘International Student’ has the meaning given in the Act.
‘Staff Member’ means a member of the staff of the University.

‘Student’ includes a Domestic Student and an International Student who is:
   a duly enrolled as a Student of the University
   or
   b applying to enrol as a Student of the University.

‘Student Loan’ has the same meaning as it has in section 2 of the Student Loan Scheme Act 2011.

‘Student Services Fee’ means the fee paid by an enrolled Student for Student Support Services provided by the University.

‘University’ means the University of Auckland constituted under the University of Auckland Act 1961.

‘University Services’ means those services provided by the University that can be accessed by a Student on request or application, such as enrolment, the provision of an official academic transcript or other services such as (but not limited to) accommodation, health care or library.

‘Withdrawals’ of courses may be approved as outlined in the Enrolment and Programme Regulations.

3 Tuition Fees
3.1 The Council may prescribe from time to time Tuition Fees payable by:
   a Domestic Students; in compliance with section 227 of the Act
   and
   b International Students or any categories of International Students; in compliance with section 228 of the Act.

3.2 Tuition Fees may be prescribed either by resolution of the Council or by a schedule to this statute.

3.3 The Tuition Fees prescribed by the Council at the date when this statute comes into force apply until other Tuition Fees are prescribed in place or in addition to them.

4 General Fees
4.1 The Council hereby prescribes the General Fees specified in the schedule.

4.2 The Council may from time to time by resolution vary the amount of, or delete, any General Fee specified in the schedule or prescribe any additional General Fee.

4.3 Any such variation, deletion, or addition shall apply from the date specified in the amending resolution.

5 Additional Fees/Charges
   Faculties and Departments of the University may impose charges to recover costs in providing Students with non-compulsory services incidental to courses or programmes.

6 Payment of Fees and Charges
6.1 Tuition Fees, General Fees and any other charges imposed pursuant to section 5 that are included on the Student’s Fees Account must be paid by the Student.

6.2 All Students must pay the full amount on their Fees Account by the due date.

6.3 Charges imposed on a Student pursuant to section 5 that are not included in a Fees Account shall be paid by the Student on demand.

6.4 Any instalment of a Student Loan (within the meaning of the Student Loan Scheme Act 2011) that is available to a Student and received by the University in respect of his or her enrolment shall be applied toward payment of the Student Fees Account on the occasion of that enrolment.

7 Refunds or Credits
7.1 The Council may by resolution prescribe from time to time in accordance with sections 227 and 228 of the Act;
   a the circumstances in which Domestic Students and International Students are or may be entitled to a refund or credit of all or any part of the Tuition Fees and General Fees paid or payable to the Council
   and
   b the quantum of those refunds.

7.2 The circumstances in which a refund or credit may be made and the quantum of that refund or credit that is applicable when this statute comes into force, continues until a change is prescribed by resolution.

7.3 The Council will take all reasonable steps to ensure that both Domestic Students and International Students are informed of the circumstances in which they are or may be entitled to any refund or credit of all or any part of the fees that have been paid or are payable by them to the Council.

7.4 The refund or credit of all or any part of a Tuition Fee or a General Fee that was paid by Student Loan shall be applied in reduction of that loan.

7.5 In the case where a credit balance is insufficient to cover the total amount of the refund processing fee or administration fee, the fee will be adjusted to equal the amount of the credit balance.
7.6 In the event the University ceases to provide the courses in which the Student is enrolled then the University will delete the enrolments and process any refund or credit in accordance with the Enrolment and Programme Regulations and without deduction of or requirement to pay a refund fee.

8 Non-payment of Fees and Charges
8.1 Where a Student does not pay:
   a the Fees Account rendered to that Student
   or
   b a charge for that Student imposed under section 5 on demand;
      then, until those fees and charges are paid in full and without prejudice to the right to recover the unpaid fees or charges at law; the Council may:
         (i) Delete the enrolment of that Student from a course or courses;
         (ii) Withhold the formal notification of the final grades of the Student;
         (iii) Decline to re-enrol the Student;
         (iv) Decline to release the Student’s official academic transcript;
         (v) Exclude that Student from the University;
         (vi) Withhold any Degree or Diploma certificate from that Student;
         (vii) Restrict that Student’s access to University Services.
         (viii) Charge a late payment fee.
         (ix) Impose additional charges to recover legal and collection costs where a third party is engaged to recover those fees and charges.

8.2 Application for Reinstatement
   a A Student upon whom a penalty is imposed under section 8.1(i) may apply to have his/her enrolment reinstated upon payment of the outstanding amount owing and the course reinstatement fee as outlined in Schedule - Part A.
   b To be eligible to complete course requirements, a Student must apply for course reinstatement no later than two weeks before the beginning of the examination period within the semester which enrolment in the course(s) took place.

8.3 A Student upon whom a penalty is imposed under section 8.1 may by giving written notice to the Director, Academic Services within eight days of the penalty having been imposed, apply to the Council or duly constituted Committee of the Council to review the imposition of that penalty. The notice must set out the reasons for the review. The decision of the Council or its Committee is final.

9 Non-attendance
A Student who stops attending lectures or classes in a course or courses remains liable for the fees prescribed for that course or courses.

Notes:
1. The fees listed in this schedule are per point and include the Course and Materials Fee. Enrolment in a standard full-time course load is 120 points per year. Fees will be adjusted on a pro-rata basis where the enrolment is more or less than a standard full-time load.
2. Fees for interfaculty programmes, programmes combining undergraduate and postgraduate courses, or courses selected from more than one listed programme, are calculated by deriving a fee for each course from the fees listed in the schedule above.
3. The Student Services Fee is payable by International Students at the same rates applying to domestic students.
4. From 1 January 2006, new international PhD students are accorded domestic status for the purposes of tuition fees. A new international PhD student is defined as a foreign student enrolled for the first time after 19 April 2005 in a Doctor of Philosophy programme at a New Zealand university.
5. BA(Hons), BCom(Hons), BMus(Hons), BNurs(Hons), BProp(Hons), BSc(Hons) and LLB(Hons) are charged as postgraduate programmes.
General Regulations – Bachelors Honours Postgraduate Degrees

The following regulations take precedence over the specific regulations for each Bachelors Honours Postgraduate degree published in this Calendar. As far as possible they are to be read in conjunction with the specific degree regulations for each Bachelors Honours Postgraduate degree. The Bachelors Honours Postgraduate degree will not be awarded until the requirements for the qualifying Bachelors degree have been completed.

Note: For the purposes of these regulations:
(i) a Bachelors Honours Postgraduate degree is worth a total of 120 points
(ii) a dissertation, research portfolio, research project or thesis is worth between 30 and 120 points.

General Requirements
1. A student enrolled for a Bachelors Honours Postgraduate degree at this University must pass the full points value specified in the degree regulations. The total enrolment may not exceed the minimum points requirement for the degree by more than 40 points.

Duration of Enrolment
2. The requirements for a Bachelors Honours Postgraduate degree must be completed within:
   a. one year of initial enrolment for the degree if enrolled full-time
   or
   b. two years of initial enrolment for the degree if enrolled part-time.

3. In all cases, the semester of initial enrolment is deemed to be the first semester in which the student enrolled for a course which is assigned or reassigned to the programme.

Completion of Requirements
4. a. A student enrolled for a Bachelors Honours Postgraduate degree must complete all work in taught courses by the last day of the semester in which the course is taught.
   b. A student enrolled in a dissertation, research portfolio, research project or thesis of 30 points or more must complete the dissertation, research portfolio, research project or thesis by the last day of the final semester of enrolment in the dissertation, research portfolio, research project or thesis. In exceptional circumstances beyond the student's control, Senate or its representative, acting upon the recommendation of the Head of Department, may approve a limited extension of time, not exceeding two months.
   c. A student who has failed a course or courses of no more than 40 points may be approved by Senate or its representative to enrol for no more than one further consecutive semester beyond the duration of enrolment specified in Regulation 2 in order to complete the degree.

Tuition Fees for Extensions of Time
5. Where an extension of time for the submission of a dissertation, research portfolio, research project or thesis is approved under Regulation 4b, students will be required to be enrolled and pay tuition fees at the rate of 10 points for each two-month period or part thereof. This will only apply when the student's current enrolment period in the course has ended.

Honours
6. a. The Bachelors Honours Postgraduate degree may be awarded only where a student’s overall grade is sufficiently high.
   b. Honours will be awarded in either of two classes: First Class Honours and Second Class Honours. Second Class Honours are awarded in either First Division or Second Division.
   c. Where a student’s average grade is insufficiently high to be eligible for the award of honours, Senate or its representative may approve the reassignment of points to the relevant Graduate or Postgraduate Diploma.

7. Calculation of the class of Honours will include the grades given for all courses attempted in the degree. For the purposes of this calculation, Withdrawal, Did Not Sit and Did Not Complete will count as zero.

Submission
8. a. Dissertations, research portfolios, research projects and theses are to be bound as specified by the Faculty and submitted to the supervisor or department in accordance with Regulation 4b.
   b. The Head of Department is to transmit the submitted dissertation, research portfolio, research project or thesis to the examiner(s).
c  Copies of dissertations, research portfolios, research projects and theses are not deposited with the University Library.

Suspension
9  Enrolment for a Bachelors Honours Postgraduate degree will normally be continuous. In exceptional circumstances Senate or its representative, on the recommendation of the Head of Department, may grant a period of suspension from enrolment not normally exceeding two consecutive semesters. In such cases the period of suspension will not count towards the time limits for the degree.

Transfer Credits, Cross-credits and Reassignments
10  a  Transfer credits
    Transfer credits may be awarded for a Bachelors Honours Postgraduate degree as specified in Regulations 2e and 2f(i) of the Credit Regulations.

b  Cross-credits
    Courses may not be cross-credited into or from a Bachelors Honours Postgraduate degree.

c  Reassignments
    (i)  With the approval of the Head of Department, courses may be reassigned as specified in Regulation 9 of the Credit Regulations.
    (ii) In certain circumstances, Senate or its representative may approve the reassignment of points to the relevant Postgraduate degree as provided for in Regulation 6c.

Certificate of Proficiency
11  The Certificate of Proficiency regulations under ‘Other Programmes’ apply.

Transitional Certificate
12  The Transitional Certificate regulations under ‘Other Programmes’ apply. A Transitional Certificate course may not be reassigned to a Bachelors Honours Postgraduate degree.

Variations
13  In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to the regulations for a Bachelors Honours Postgraduate degree.

General Regulations – Masters Degrees
The following regulations apply to all Masters degrees published in this Calendar unless otherwise stated. As far as possible they are to be read in conjunction with the specific degree regulations for each Masters degree.

Notes:
(i)  a Masters is a Research Masters if it includes a thesis or research portfolio of at least 90 points, otherwise it is a Taught Masters
(ii)  a thesis or research portfolio is worth 90 or 120 points
(iii)  a dissertation or research project is worth between 30 and 80 points
(iv)  for the purposes of these regulations only, full-time enrolment is 50 points or more in one semester or 25 points or more in one quarter, otherwise the semester or quarter enrolment (and any Summer School enrolment) is part-time.

General Requirements
1  A student enrolled for a Masters degree at this University must pass the full points value specified in the degree regulations. The total enrolment may not exceed the minimum points requirement for the degree by more than 40 points.

Duration of Enrolment
2  a  The requirements for a Masters degree must be completed in accordance with the following time limits and the thesis or research portfolio due dates in Regulation 2e.

(i) The date of initial enrolment is deemed to be the start date of the thesis or research portfolio (where the programme commences with a thesis or research portfolio enrolment) or the first semester, quarter or Summer School in which a student enrolled for a course which is assigned or reassigned to the programme.

(ii) One period of Summer School enrolment counts towards the time limit as one semester of part-time enrolment, but is not counted if a thesis or research portfolio enrolment has already commenced.

(iii) Where a student’s enrolment is partially full-time and partially part-time, the part-time time limit applies, provided that:
   (a) one semester of full-time enrolment counts as two semesters of part-time enrolment
   (b) one quarter of full-time enrolment counts as two quarters of part-time enrolment.

(iv) Where a student’s enrolment is entirely full-time, it must be in consecutive semesters or quarters.

(v) Where a student’s enrolment is at least partially part-time, up to a maximum of four semesters or four quarters of non-enrolment may occur provided that:
   (a) one semester of non-enrolment counts towards the time limit as one semester of part-time enrolment
   (b) one quarter of non-enrolment counts towards the time limit as one quarter of part-time enrolment
   (c) any semesters of non-enrolment occur prior to commencement of a thesis or research portfolio enrolment.

b Enrolment in a Research Masters degree must conclude with the submission of the thesis or research portfolio.

c Enrolment in the thesis or research portfolio must commence on either 1 December, 1 March or 15 July and continue until the submission of the thesis or research portfolio.

d A student must enrol in thesis or research portfolio points in no fewer than two and no more than four consecutive semesters until the thesis or research portfolio points requirement is satisfied and subject to the time limits in Regulation 2a.

(i) Where a thesis or research portfolio enrolment commences on 1 December, the initial semester of enrolment in thesis or research portfolio points shall be Semester One of the following year.

(ii) Where a thesis or research portfolio enrolment commences on 1 March, the initial semester of enrolment in thesis or research portfolio points shall be Semester One of that year.

(iii) Where a thesis or research portfolio enrolment commences on 15 July, the initial semester of enrolment in thesis or research portfolio points shall be Semester Two of that year.

e A thesis or research portfolio must be submitted by the following due dates:

Notes:

1 The final semester of enrolment depends on the start date of the thesis or research portfolio and the number
of semesters (either two, three or four) in which a student is enrolled in thesis or research portfolio points before they satisfy the thesis or research portfolio points requirement.

2 These due dates provide 12 months of continuous enrolment in the thesis or research portfolio for students completing their thesis or research portfolio points enrolment in two consecutive semesters, and 18 or 24 months of continuous enrolment for other students (by enrolment in thesis or research portfolio points in three or four consecutive semesters respectively).

3 This due date occurs within the final semester of enrolment.

4 This due date is in the same year as the final semester of enrolment

5 This due date is in the year following the final semester of enrolment.

f A student enrolled in a 240 point Research Masters must complete at least 105 points of coursework prior to enrolment in the thesis or research portfolio.

g A student enrolled in a 300 point Research Masters must complete at least 180 points of coursework prior to enrolment in the thesis or research portfolio.

h A student enrolled in a 360 point Research Masters must complete at least 240 points of coursework prior to enrolment in the thesis or research portfolio.

Completion of Requirements

3 a Thesis or Research Portfolio
If, in exceptional circumstances beyond the student’s control, a thesis or research portfolio has not been able to be completed by the due date as specified in Regulation 2, Senate or its representative, acting upon the recommendation of the Head of Department, may approve a limited extension of time, not normally exceeding four months, for the work to be completed.

b Dissertation or Research Project
If, in exceptional circumstances beyond the student’s control, the dissertation or research project has not been able to be completed by the last day of the final semester or quarter of enrolment in the dissertation or research project, Senate or its representative, acting upon the recommendation of the Head of Department, may approve a limited extension of time, not exceeding two months.

c Other courses
Extensions of time to complete work in courses other than a thesis, research portfolio, dissertation or research project will not be granted beyond the end of the semester(s) or quarter(s) of enrolment in the course.

d Failed courses
A student who has failed a course or courses totalling no more than 40 points may be approved by Senate or its representative to enrol for no more than one further consecutive semester or quarter beyond the duration of enrolment for completion specified in Regulation 2 in order to complete the degree.

Tuition Fees for Extensions of Time

4 Where an extension of time for the submission of a thesis, research portfolio, dissertation or research project is approved under Regulation 3a or 3b, students will be required to be enrolled and pay tuition fees at the rate of 10 points for each two-month period or part thereof. This will only apply when the student’s current enrolment period in the course has ended.

Honours

5 a Where the regulations provide for the award of Honours, a Masters degree may be awarded with Honours where a student’s overall grade is sufficiently high and where the student has passed a research component of at least 30 points.

b There are two classes of Honours: First Class Honours and Second Class Honours. Second Class Honours are awarded in either First Division or Second Division.

c Where the requirements for the degree have been completed with an extension granted in accordance with Regulation 3, the student’s eligibility for Honours will lapse. However, on the recommendation of the Head of Department, Senate or its representative may approve the retention of eligibility for Honours.

6 a Where the regulations allow, a Masters degree may be awarded with Distinction or Merit where a student’s grade is sufficiently high.

b Where the requirements for the degree have been completed with an extension granted in accordance with Regulation 3, the student’s eligibility for the award of Distinction or Merit will lapse. However, on the
recommendation of the Head of Department, Senate or its representative may approve the retention of eligibility for the award of Distinction or Merit.

**Theses**

7  a  The student is to submit one temporary-bound copy and a digital copy of their thesis to the appropriate Faculty Student Centre in accordance with Regulations 2 and 3a.

    b  The digital thesis shall be formatted as specified in the Guidelines for Formatting a Digital Thesis at the University of Auckland.

    c  The Associate Dean (Postgraduate) of the Faculty is responsible for transmitting the submitted copies to the examiners.

    d  Where the outcome of the examination is to award a thesis a passing grade:

        (i)  Within one month of being advised of the outcome of the examination, the student must complete any minor corrections required to the satisfaction of the supervisor, deposit one hard-bound copy of the thesis with the appropriate Faculty Student Centre, and deposit a digital copy of the thesis in ResearchSpace in the University Library. The Faculty Student Centre will forward the hard-bound thesis to the University Library and will confirm that the digital copy has been deposited in ResearchSpace.

        (ii) The thesis deposited in digital form will be accessible to authenticated users through the University’s digital repository unless embargoed under Regulation 25 of the Examination Regulations.

    e  Where the outcome of the examination is to award a thesis a fail grade the thesis will not be held in the University’s Library or digital repository.

**Research Portfolios**

8  a  The student is to submit one temporary-bound copy and a digital copy of their research portfolio to the appropriate Faculty Student Centre in accordance with Regulations 2 and 3a.

    b  The Associate Dean (Postgraduate) of the Faculty is responsible for transmitting the submitted copies to the examiners.

    c  Copies of research portfolios are not deposited in the University Library, nor deposited with the University’s digital repository.

**Research Projects and Dissertations**

9  a  Research projects and dissertations are to be bound as specified by the Faculty and submitted to the supervisor or department, in accordance with Regulations 2 and 3b.

    b  The Academic Head is responsible for transmitting the submitted copies to the examiners.

    c  Copies of research projects or dissertations are not deposited in the University Library, nor deposited with the University’s digital repository.

**Substitutions and Failed Courses**

10 Masters students may not change their enrolment in a course after the last date approved for deletions, except in exceptional circumstances as provided for in the Enrolment and Programme Regulations under Changes to Current Enrolment.

11 A Masters student may not normally re-enrol in a failed course except as provided for in the regulations relating to aegrotat and compassionate passes. In exceptional circumstances, the student may apply to Senate or its representative, on the recommendation of the Head of Department, for permission to re-enrol in the course.

12 Calculation of the overall grade will include the grades given for all courses attempted in the degree. For the purposes of grade or mark calculation, Withdrawal, Did Not Sit and Did Not Complete will count as zero.

**Suspension**

13 In exceptional circumstances Senate or its representative, on the recommendation of the Head of Department, may grant a period of suspension from enrolment not normally exceeding one year for enrolment in a thesis or research portfolio or two consecutive semesters, or four quarters, for enrolment in other courses. In such cases the period of suspension will not count towards the time limits for the degree.

**Transfer Credits, Cross-credits and Reassignments**

14  a  Transfer credits

        (i)  Transfer credits may be awarded for a Taught Masters degree or the taught component of a Research
Masters degree with a total points value of more than 120 points as specified in Regulations 2e and 2f(i) of the Credit Regulations.

(ii) Except as provided for in Regulations 2e and 2f(ii) of the Credit Regulations, transfer credits may not be awarded for a Research Masters degree.

b Cross-credits
Courses may not be cross-credited into or from a Masters degree.

c Reassignments
With the approval of the Head of Department, courses may be reassigned as specified in Regulation 9 of the Credit Regulations.

Certificate of Proficiency
15 a The Certificate of Proficiency regulations under ‘Other Programmes’ apply.

b A course passed for a Certificate of Proficiency may be reassigned to a Taught Masters degree, or the taught component of a Research Masters degree with a total points value of more than 120 points as specified in Regulation 9 of the Credit Regulations.

c A course passed for a Certificate of Proficiency may not be reassigned to a Research Masters degree except as specified in 15b above.

Transitional Certificate
16 The Transitional Certificate regulations under ‘Other Programmes’ apply. A Transitional Certificate course may not be reassigned to a Masters degree.

Appeals
17 a If a Masters student believes that, in the examination of their thesis or research portfolio, he or she has been significantly disadvantaged by the examination process, or any part of the examination process, then a written appeal may be made to the Associate Dean (Postgraduate) of their Faculty setting out the grounds for the appeal. All relevant documents relied upon must be submitted with the appeal.

b Any appeal as to the examinations process or outcome must be lodged within three months of the result of the examination being officially communicated to the student.

c The Associate Dean (Postgraduate) or nominee will investigate the appeal and will provide the Dean of Graduate Studies with a written report within a reasonable length of time. Following receipt of the report the Dean of Graduate Studies will make a final decision.

Variations
18 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to the regulations for a Masters degree.

General Regulations – Named Doctorates
These Regulations apply to all doctoral degrees except the Doctor of Philosophy and Higher Doctorates, and should be read in conjunction with the regulations for those degrees.
The ‘Department’ is the Department or School or other academic unit in which the candidate is registered, and the ‘Head of Department’ is the head of that academic unit.

Admission
1 Every candidate for a named-doctoral degree must have applied for admission and been admitted to the University of Auckland.

Registration
2 a Every candidate for a named-doctoral degree must be registered by the Board of Graduate Studies.

b Registration is provisional for all candidates for the first 12 months of equivalent full-time study following the Date of Registration as defined in Regulation 2.

c Application for registration must be made to the Head of Department, Division, School, Chair of a Board of Studies or Director of the Research Centre or Institute (“the Head of Department”) in the discipline in which the candidate is to be registered and must include, where appropriate to the composition of the doctoral degree, a preliminary research proposal.

d The Head of Department will make a recommendation to the Faculty Associate Dean (Postgraduate) as to whether the candidate:
meets the eligibility criteria and has the ability to follow the proposed programme of study and has submitted a satisfactory preliminary research proposal as stipulated by the Head of Department.

e Where the Head of Department is satisfied, this recommendation must include:

(i) the proposed date of registration
(ii) nominations for supervisors
(iii) confirmation that the School/Department accepts responsibility for making satisfactory supervision arrangements and providing research resources and facilities over the whole enrolment for the degree
(iv) an appropriate set of goals for the provisional period of registration agreed to by both the candidate and nominated main supervisor; these must include, but are not limited to, those goals prescribed in the regulations for the relevant named doctorate and any standard goals required by the Board of Graduate Studies such as attendance at induction events, English language screening, and the satisfaction of academic integrity and health and safety requirements.

f Where an intending candidate is not resident in Auckland, the Head of Department must also provide the Associate Dean (Postgraduate) and the Board of Graduate Studies with evidence that the candidate will be provided with research resources and supervisory support at the location in which the research is to be carried out.

g On receipt of the recommendation of the Head of Department, the Faculty Associate Dean (Postgraduate) will make a recommendation to the Board of Graduate Studies as to the matters set out in Regulation 2d.

h On receipt of the recommendation of the Faculty Associate Dean (Postgraduate), the Board of Graduate Studies will decide whether or not to register the candidate and, if so, the conditions that will apply to the registration. The Board of Graduate Studies may call for any further information it considers relevant before making its decision.

i Registration takes effect on the date (the “Date of Registration”) approved by the Board of Graduate Studies. Where a candidate has already started supervised research on the doctoral topic, the Date of Registration may, subject to approval by the Board of Graduate Studies, be backdated by not more than six months.

j The Board of Graduate Studies will appoint the supervisors for each candidate. The supervisors must be actively involved in research in the candidate’s general field, and must either hold a doctoral degree or be appropriately qualified and experienced. Persons who are themselves candidates for the same named doctorate may not be appointed as supervisors, although they may be appointed as advisers.

k For each candidate the Board of Graduate Studies will appoint a suitably qualified main supervisor who takes overall responsibility for the supervision of the candidate and for assistance in the provision of research resources. The main supervisor must be a staff member of the University of Auckland.

l In addition, the Board of Graduate Studies will appoint for each candidate:

(i) at least one suitably qualified co-supervisor and/or
(ii) an advisory committee or adviser/s.

m Candidates wishing to present and defend a thesis in Te Reo Māori must, before applying to the Head of Department to be registered, obtain the permission of the Pro Vice-Chancellor (Māori). When such permission is granted, the Pro Vice-Chancellor (Māori) will make a recommendation in writing to the Board of Graduate Studies as to:

(i) whether the candidate has adequate fluency and literacy in Te Reo Māori in the subject area of the thesis and
(ii) the likelihood of being able to find appropriately qualified examiners for the thesis.

Reviews of Registration

3 During provisional registration, a candidate must achieve the goals prescribed by the Board of Graduate Studies and satisfy any other applicable programme requirements specified in the regulations for the relevant named doctorate.

b Where a thesis proposal is required as a provisional goal, it should be submitted for approval to the appropriate committee or subcommittee of the Department, Institute and/or Faculty in which the candidate is registered. The committee may accept the proposal, or indicate changes needed to the candidate and supervisor(s) and request a resubmission, or it may decline the proposal. It will inform the Head of Department of its decision.

c At the end of the provisional registration period, the candidate, the supervisor/s and the Head of Department are to submit a formal report to the Board of Graduate Studies on the progress of the candidate. This report may also be discussed by the appropriate postgraduate committee of the Department, Institute and/or
Faculty in which the candidate is registered. The report should clearly state whether or not the progress of the candidate has been satisfactory, whether or not any programme specific requirements for the period have been satisfied, and whether or not the goals laid down for the provisional period of registration have been achieved. The report should include a recommendation that the candidate's registration be:

(i) confirmed

or

(ii) continued on a provisional basis for a period of three to six months

or

(iii) discontinued and the candidate recommended for enrolment in another programme, where a suitable programme exists

or

(iv) terminated.

d At the end of each year of registration following the provisional period, the main supervisor, the candidate and the Head of Department are to submit, through the Associate Dean (Postgraduate) of the Faculty, a joint report to the Board of Graduate Studies on the candidate's progress. This report may also be discussed by the appropriate postgraduate committee of the Department, Institute and/or Faculty in which the candidate is registered. As part of this report, the main supervisor and the Head of Department are to make one of the following recommendations:

(i) that the candidate's registration be continued

or

(ii) that the candidate's registration be continued subject to specified conditions

or

(iii) that the candidate's registration be terminated.

e Where a recommendation is made under Regulation 3c(ii) or 3d(ii), the Head of Department will also recommend to the Board of Graduate Studies any specific goals and/or conditions to be met by the candidate and the time in which these are to be completed. At the end of this period the Head of Department and main supervisor will advise the Board of Graduate Studies whether or not these requirements have been met. Registration will be terminated if the specified conditions have not been fulfilled to the satisfaction of the Board of Graduate Studies.

f No decision to terminate registration may be made by the Board of Graduate Studies unless the candidate has been notified in writing and given reasonable opportunity to respond.

Changes to the Conditions of Registration

4 a The Head of Department may, after consultation with the candidate, make a written recommendation to the Board of Graduate Studies via the Faculty Associate Dean (Postgraduate) for changes in the conditions of registration for the candidate. After considering a recommendation from the Head of Department, the Board of Graduate Studies may, after considering any submissions made by the candidate, change the conditions of registration for any candidate.

b Where a resident candidate intends to be absent from the University in pursuit of their research for more than two months, supervisors are to submit for approval by the Board of Graduate Studies, through the Head of Department and before the candidate's departure, suitable plans for the supervision of the candidate during the period of absence.

c When necessary, the Head of Department will make a recommendation to the Board of Graduate Studies regarding changes to the supervision of the candidate. This will normally be required when a supervisor is granted leave, resigns or retires.

Whilst the Board of Graduate Studies will take into consideration the candidate's views on any recommended changes to supervision, it reserves the right to determine the appointment of supervisor/s according to the availability of suitably qualified staff.

d When the Board of Graduate Studies is satisfied that there is sufficient reason, it may extend a candidate's submission date. Before approving an extension of submission time the Board of Graduate Studies will require the candidate, the supervisor(s) and Head of Department to agree on the programme of supervision and schedule of research considered necessary for submission by the new date proposed.

e Where a candidate is unable to continue with their research programme because of circumstances beyond their control, the Board of Graduate Studies may suspend their registration for a specified period of time. The conditions of Regulation 7g of the Statute for the Degree of Doctor of Philosophy 2016 will apply.

f Enrolment and Programme Regulations regarding discontinuation apply to candidates for named doctorates.
The Board of Graduate Studies may terminate the registration of any candidate who:

(i) fails to enrol for any academic year corresponding to a year of registration

or

(ii) fails to make payment of any tuition fees related to the registration

or

(iii) applies to cease being registered

or

(iv) has not made satisfactory progress while under provisional registration

or

(v) has received an unsatisfactory annual report

or

(vi) has not submitted a required provisional year or annual report

or

(vii) has not met any conditions specified under Regulation 3e

or

(viii) has not satisfied a requirement as stipulated in the structure and content regulation of the relevant named doctorate regulations

or

(ix) has not submitted or re-submitted the examinable work in time

or

(x) has had the termination of their registration recommended by a decision of a Disputes Committee constituted pursuant to Regulation 6

or

(xi) is prohibited under the Disciplinary Statute of the University from enrolling.

Before making a decision to terminate a candidate's registration pursuant to this Regulation or otherwise, the Board of Graduate Studies will allow the candidate a reasonable opportunity to respond.

Enrolment and Fees

Candidates for the degree must be enrolled and pay all prescribed fees including tuition fees in each academic year for which they are registered. Candidates need not pay tuition fees for any period during which their registration is suspended.

On enrolment in each academic year every candidate must pay the prescribed fees for that academic year.

A candidate who submits all examinable work or terminates their registration will receive a refund of one-twelfth of the tuition fee paid for each complete month of the period between the date of submission of the examinable work or termination of registration and the end of the academic year for which fees have been paid.

Unless otherwise exempted under the relevant regulations, all candidates must pay the prescribed Building Levy and Student Services fees and any other fees as may be prescribed from time to time. There is no refund of these fees.

Notification of the award of the degree will be withheld until all outstanding fees have been paid for the academic year in which a candidate is registered. Candidates will not be able to graduate until all outstanding fees have been paid.

Appeals

If a doctoral candidate believes that he or she has been significantly disadvantaged by the examination process, or by any part of the examination process, then a written appeal may be made to the Board of Graduate Studies, setting out the grounds of the appeal. All relevant documents relied upon must be submitted with the appeal. Regulations 11d and 11e of the Statute for the Degree of Doctor of Philosophy 2016 shall then apply.

Candidates, supervisors or Heads of Department may appeal against any decision, other than one bearing on examination matters, of the Board of Graduate Studies normally within three months of the making of the decision, on the grounds that:

(i) relevant information which was not available to the Board of Graduate Studies at the time of its making the decision has since become available

and/or

(ii) the procedure adopted in arriving at the decision was unfair.

The appeal must state clearly all grounds relied on by the candidate and attach all relevant documentation. Regulation 11b of the Statute for the Degree of Doctor of Philosophy 2016 shall then apply.
Dispute Resolution Procedures
7 Disputes are to be resolved according to the Resolution of Student Academic Complaints and Disputes Statute.

Transitional Arrangements
8 a These regulations came into force on 1 January 2016 and revoked the previous General Regulations for Named Doctorates.

b For candidates initially registered under previous regulations, the Board of Graduate Studies may agree to vary the application of the provisions of these regulations to ensure consistency with the provisions of the regulations under which the candidate was enrolled, where it is satisfied that the candidate would otherwise be at a disadvantage.

General Regulations – Postgraduate Certificates
The following regulations take precedence over the specific regulations for each Postgraduate Certificate published in this Calendar. As far as possible they are to be read in conjunction with the specific regulations for each Postgraduate Certificate.

Note: For the purposes of these regulations a postgraduate certificate is worth 60 points.

General Requirements
1 A student enrolled for a Postgraduate Certificate at this University must pass the full points value specified in the postgraduate certificate regulations. The total enrolment may not exceed the minimum points requirement for the postgraduate certificate by more than 30 points.

Deadlines for Completion
2 a The requirements for a Postgraduate Certificate must be completed within:
   (i) one semester of initial enrolment for the postgraduate certificate if enrolled full-time
   or
   (ii) four semesters of initial enrolment for the postgraduate certificate if enrolled part-time.

b In all cases, the semester of initial enrolment is deemed to be the first semester in which the student enrolled for a course which is assigned or reassigned to the programme.

c In exceptional circumstances Senate or its representative, on the recommendation of the Head of Department, may increase the duration allowed for enrolment for a period not normally exceeding one semester.

Completion of Requirements
3 a A student enrolled for a Postgraduate Certificate must complete the requirements by the last day of the final semester of enrolment in the programme.

b Extensions of time to complete work in examined courses or 100 percent coursework courses will not be granted beyond the end of the semester(s) in which the course is offered.

c A student who has failed a course or courses of no more than 30 points may be approved by Senate or its representative to enrol for no more than one further consecutive semester beyond the deadline for completion specified in Regulation 2 in order to complete the postgraduate certificate.

Transfer Credits, Cross-credits and Reassignments
4 a Transfer credits
   Transfer credit may not be awarded for a Postgraduate Certificate.

b Cross-credits
   Courses may not be cross-credited into or from a Postgraduate Certificate.

c Reassignments
   With the approval of the Head of Department, courses may be reassigned as specified in Regulation 9 of the Credit Regulations.

Certificate of Proficiency
5 a The Certificate of Proficiency regulations under ‘Other Programmes’ apply.
b A Certificate of Proficiency course may be reassigned to a Postgraduate Certificate as specified in Regulation 9 of the Credit Regulations.

Transitional Certificate
6 The Transitional Certificate regulations under ‘Other Programmes’ apply. A Transitional Certificate course may not be reassigned to a Postgraduate Certificate.

Variations
7 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to the regulations for a Postgraduate Certificate.

General Regulations – Postgraduate Diplomas
The following regulations take precedence over the specific regulations for each Postgraduate Diploma published in this Calendar. As far as possible they are to be read in conjunction with the specific regulations for each Postgraduate Diploma.

Note: For the purposes of these regulations:
(i) a Postgraduate Diploma is worth a total of 120 points
(ii) a dissertation or research project is worth between 30 and 80 points.

General Requirements
1 A student enrolled for a Postgraduate Diploma at this University must pass the full points value specified in the postgraduate diploma regulations. The total enrolment may not exceed the minimum points requirement for the postgraduate diploma by more than:
   a 40 points
   or
   b 20 points in the case of a student with credit granted from a postgraduate certificate.

Duration of Enrolment
2 a The requirements for a Postgraduate Diploma must be completed within
   (i) one year of initial enrolment for the postgraduate diploma if enrolled full-time
   or
   (ii) four years of initial enrolment for the postgraduate diploma if enrolled part-time.

b In the case of a student who has completed a postgraduate certificate for which credit is granted to a postgraduate diploma the requirements must be completed within
   (i) one semester of admission if enrolled full-time
   or
   (ii) two years of admission if enrolled part-time.

   c In all cases, the semester of initial enrolment is deemed to be the first semester in which the student enrolled for a course which is assigned or reassigned to the programme.

   d In exceptional circumstances Senate or its representative, on the recommendation of the Head of Department, may increase the duration allowed for enrolment for a period not normally exceeding two consecutive semesters.

Completion of Requirements
3 a A student enrolled for a Postgraduate Diploma must complete all work in taught courses by the last day of the semester in which the course is taught.

b A student enrolled in a dissertation or research project of 30 points or more must complete the dissertation or research project by the last day of the final semester of enrolment in the dissertation or research project. In exceptional circumstances beyond the student’s control, Senate or its representative, acting upon the recommendation of the Head of Department, may approve a limited extension of time, not exceeding two months.

   c A student who has failed a course or courses of no more than 40 points may be approved by Senate or its representative to enrol for no more than one further consecutive semester beyond the duration of enrolment specified in Regulation 2 in order to complete the postgraduate diploma.

   d Fine Arts Studio
A student enrolled in the Postgraduate Diploma in Fine Arts must complete their individual programme not later than 1 November in the year in which the work is undertaken or by such other date as may be approved by the Head of School of Fine Arts.
Tuition Fees for Extensions of Time
4 Where an extension of time for the submission of a dissertation or research project is approved under Regulation 3b, students will be required to be enrolled and pay tuition fees at the rate of 10 points for each two-month period or part thereof. This will only apply when the student’s current enrolment period in the course has ended.

Distinction or Merit
5 a The Postgraduate Diploma may be awarded with Distinction or Merit where a student’s overall grade is sufficiently high.

b Where the requirements for the Postgraduate Diploma have not been completed in accordance with the time limits specified in Regulation 2a or 2b the student’s eligibility for the award of Distinction or Merit will lapse. On the recommendation of the Head of Department, Senate or its representative may approve the retention of the award of Distinction or Merit.

6 Calculation of the award of Distinction or Merit will include the grades given for all courses attempted in the diploma. For the purposes of this calculation, Withdrawal, Did Not Sit and Did Not Complete will count as zero.

Dissertations and Research Projects
7 a Dissertations or Research Projects are to be bound as specified by the Faculty and submitted to the supervisor or department in accordance with Regulation 3b.

b The Head of Department is to transmit the submitted dissertation or research project to the examiner(s).

c Copies of dissertations and research projects are not deposited with the University Library.

Transfer Credits, Cross-credits and Reassignments
8 a Transfer credits
Transfer credits may be awarded for a Postgraduate Diploma as specified in Regulations 2e and 2f(i) of the Credit Regulations.

b Cross-credits
Courses may not be cross-credited into or from a Postgraduate Diploma.

c Credit from a postgraduate certificate
In the case of a student who has completed a Postgraduate Certificate for which credit is granted to a Postgraduate Diploma, admission to the Postgraduate Diploma must take place within five years of completion of the Postgraduate Certificate.

d Reassignments
With the approval of the Head of Department, courses may be reassigned as specified in Regulation 9 of the Credit Regulations.

Certificate of Proficiency
9 a The Certificate of Proficiency regulations under ‘Other Programmes’ apply.

b A Certificate of Proficiency course may be reassigned to a Postgraduate Diploma as specified in Regulation 9 of the Credit Regulations.

Transitional Certificate
10 The Transitional Certificate regulations under ‘Other Programmes’ apply. A Transitional Certificate course may not be reassigned to a Postgraduate Diploma.

Variations
11 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to the regulations for a Postgraduate Diploma.

International Students
The following notes are intended to be a general guide for international students wishing to be admitted to the University of Auckland. Further information is available from the International Office or from the International students section of the University website at www.international.auckland.ac.nz

Admission
International students should apply for admission using the online Application for Admission. Intending applicants should note the following general points:

1 All international students enrolling in an undergraduate programme must hold, as a minimum requirement, an acceptable university entrance qualification.
2 All international students seeking admission to graduate or postgraduate programmes must hold, or expect to hold before the start of the programme, a recognised first degree in a relevant discipline.

3 Applicants whose first language is not English are required to provide satisfactory evidence of their proficiency in English. International applicants entering the University on the basis of NCEA or University of Cambridge International Examinations (CIE) taken in New Zealand, or International Baccalaureate (IB) taken in New Zealand, must meet the standard literacy requirements for admission. International applicants who have taken CIE or IB outside of New Zealand must meet the standard admission requirements from these qualifications but may also meet the standard literacy requirement through an alternative approved English test as outlined in the minimum English Language proficiency requirements. International applicants entering the University on the basis of qualifications other than NCEA, CIE or IB taken in New Zealand must meet a specified score in IELTS or an alternative approved English test, or must have completed and passed the Foundation Certificate in English for Academic Purposes (FCertEAP), the English Pathway for Undergraduate Studies (EPUS), the English Pathway for Postgraduate Studies (EPPS), or an approved alternative. The minimum score required in IELTS for admission to an undergraduate programme at the University is an overall score of 6.0 with no less than 5.5 on an individual band. The minimum score required in IELTS for admission to a postgraduate programme at the University is an overall score of 6.5 with no less than 6.0 on an individual band. Higher requirements may be imposed by faculties for entry to specified undergraduate and postgraduate programmes.

Health and Travel Insurance
4 It is the responsibility of all international students to ensure that they have appropriate and current approved health insurance for their period of study in New Zealand, and for the length of their student visa. Health and travel insurance is a condition of enrolment, and as such, must be valid for the entire duration of study. A student’s enrolment cannot continue in the event of their insurance cover being declined.

Student Visa
5 The majority of international students must have a student visa before entering New Zealand. All students must have a valid visa for the duration of their studies. For further information, visit Immigration New Zealand’s website at www.immigration.govt.nz.

a An international student is any student who is not a citizen or permanent resident of New Zealand (includes the Cook Islands, Tokelau and Niue) or Australia.

b Every international student must provide the following information to the University of Auckland:
   (i) photocopy of title page of passport and of current visa
   (ii) current Auckland address and contact phone number(s)
   (iii) full name and current address of an emergency contact/next of kin.

c Where a student does not provide evidence of a valid student visa and/or the required contact details either prior to commencement of study or before the visa information held on file at the University expires, then, until that evidence is produced, the Council may:
   (i) withdraw the enrolment of that student from a course or courses, with no refund or credit of fees and/or
   (ii) decline to re-enrol the student
   (iii) restrict or remove that student’s access to University services, including but not limited to the Student Learning System.

International Student Fees
6 The above fees (refer to Schedule – Part C – International Students) apply to students who:
   a are not citizens of New Zealand or Australia (refer note 5a above)
   or
   b do not hold residency status in New Zealand or Australia
   or
   c are being fully funded under the New Zealand Ministry of Foreign Affairs and Trade New Zealand Aid Programme
   or
   d are not participating in an official University of Auckland exchange programme.

International Scholarships
There are several international scholarships available for international students from selected countries identified by the Asian Development Bank-Japan Scholarship Programme (ADB-JSP), the New Zealand Aid Programme: New Zealand Pacific Scholarships, New Zealand Development Scholarships, New Zealand ASEAN Scholars Awards and Commonwealth Scholarships; and Education New Zealand: the New Zealand International Doctoral Research Scholarships (NZIDRS).

The University of Auckland also offers international scholarships including the University of Auckland International Student Scholarships, University of Auckland Doctoral Scholarships at PhD level for international students from all countries; and scholarships from various faculties at all levels.
Code of Practice

The University of Auckland has agreed to observe and be bound by the Code of Practice for the Pastoral Care of International Students published by the Ministry of Education. Copies of the Code are available in six languages from the New Zealand Qualification Authority (NZQA) website at www.nzqa.govt.nz/the-code.

The Limitation of Entry Statute 1991

At the University of Auckland this 18th day of February 1991. Pursuant to Section 224 of the Education Act 1989, as amended by the Education Amendment Act 1990, the Council of the University of Auckland hereby makes the following Statute:

1 a This statute may be cited as The Limitation of Entry Statute 1991.
   b This Statute came into force on 1 January 1991.

2 Where the Council is satisfied that it is necessary to do so because:
   a students cannot be allocated places in appropriate lecture rooms or laboratories at times when they can reasonably be expected to attend
   or
   b the number of teaching staff does not ensure all students expected to seek a place in a particular programme or course can be adequately taught;
   there shall be deemed to be an insufficiency of accommodation or of staff.

3 The maximum number of students that may be enrolled for any such programme or course shall be determined by the Council from time to time after considering any recommendations from Senate and be published in a schedule to this Statute.

4 In determining such maximum number of students the Council may, after securing a recommendation from Senate:
   a prescribe academic standards to be achieved as a prerequisite for enrolment for any such programme or course
   and
   b prescribe other criteria for selection of students to be permitted enrolment for any such programme or course.

5 The Limitation of Entry Statute 1985 is hereby repealed.

Limitations Schedule 2019

This Schedule is made under the provisions of Regulation 3 of the Limitation of Entry Statute 1991.

Limited-entry Programmes and Courses

Because of insufficient accommodation and restrictions on staffing there will be a limitation on the number of students who can be enrolled in 2019 in the programmes and courses listed below.

Approved Limitations

1 Students must apply for a place in any limited entry programme. Unless otherwise specified in Closing Dates for Admission, the closing date for Application for Admission is 8 December 2018 and for Enrolment is 14 February 2019. The closing date for Admission to Summer School is 1 December 2018 and for Enrolment is 22 December 2018.

2 Application for places in any limited-entry programmes and/or courses will be made online, or in person.

3 Applications received after the specified closing dates will be given reduced priority in consideration for a place in a limited-entry programme and/or course.

4 Where the number of applicants for a place in a limited-entry programme or course exceeds the approved number of available places, the Faculty or department concerned will select students in accordance with criteria that have been approved by the University Council.

5 Where a course is taught in both semesters, the Selection Committee will allocate students to the First or Second Semester where numbers of applications for one semester exceed places available.

6 Selection criteria will be available from the Faculty or department concerned for the information of students. In general, selection will be based upon academic merit. In those cases where the scholastic record is insufficient, eg,
Discretionary Entrance and Special Admission, other criteria such as the recommendation of the School Principal or Advisor, or employment history, will be taken into account. Account will also be taken of the University’s Equal Educational Opportunity objectives. Limitations on programmes and courses are listed below.

Section 3: All other scheduled courses

All other scheduled courses offered by the University shall be deemed to be limited. The maximum number of students that may be enrolled in each course shall be the maximum limit set by the relevant faculty, which will usually be the maximum capacity of the room(s) allocated to the class(es) associated with each course through the University’s timetable process in accordance with the Academic Timetable Policy. Students will be selected for enrolment on a first in, first enrolled basis, until the maximum capacity has been reached.

C. General Education Courses

(admission by selection)

Section 1: Identified courses with specific prerequisite academic standards and other selection criteria

Students will be selected for enrolment into the following courses, up to the specified maximum number of places available, on the basis of selection criteria available from the relevant faculty.
Section 2: Identified courses without specific prerequisite academic standards or other selection criteria

Students will be selected for enrolment into the following courses, up to the specified maximum number of places available, on a first in first enrolled basis:

General Statutes and Regulations

67 Conferment of Academic Qualifications and Academic Dress Statute 1992
71 Availability of Academic Dress
71 The Degrees and Diplomas Statute 1991
76 The Honorary Degrees and Awards Statute 1998
77 Guidelines for the Award of Honorary Degrees and Fellowships
Conferment of Academic Qualifications and Academic Dress Statute 1992

1 Every degree and every diploma of the University shall be conferred or awarded in pursuance of a resolution of the Council and at a meeting of the Council.

2 Every degree and every diploma of the University shall be conferred or awarded by the Chancellor, or if they are absent from the meeting or incapacitated by sickness or otherwise, by the Vice-Chancellor or Pro-Chancellor. The Council may also authorise another person to confer degrees or award diplomas at a particular ceremony.

3 Every recipient of a degree shall receive a certificate in appropriate form, under the Common Seal of the University, that their degree has been conferred and stating the class of honours (if any awarded), or whether it has been awarded with Distinction or Merit.

4 Every diploma shall be in appropriate form under the Common Seal of the University and state, where relevant, whether it has been awarded with Distinction or Merit.

5 At a specified time or times each year the Council shall meet in convocation of the University to confer degrees and award diplomas. Persons wishing to have their degree conferred or diploma awarded (whether in person or in absentia) at such a ceremony must apply in accordance with the dates specified on the University website.

6 The form of words to be used by the Chancellor, the Vice-Chancellor, Pro-Chancellor or such other person as may have been appointed by the Council to confer degrees or to award diplomas shall be as follows:

   a Degrees

      'By the authority vested in me by resolution of the University of Auckland Council I [NAME], [POSITION], confer the degrees stated upon those who, within their several faculties, have satisfied the requirements of this University.'

   b Diplomas

      'By the authority vested in me by resolution of the University of Auckland Council I [NAME], [POSITION], award the diplomas stated upon those who, within their several faculties, have satisfied the requirements of this University.'

7 In appropriate circumstances, the form of words to be used by the Chancellor, the Vice-Chancellor, Pro-Chancellor or such other person as may have been appointed by the Council to confer degrees and to award diplomas shall be as follows: 'By the authority vested in me by resolution of the University of Auckland Council I [NAME], [POSITION], confer the degrees and award the diplomas stated upon those who, within their several faculties, have satisfied the requirements of this University.'

8 The academic dress worn by members of the University at any public ceremony of the University shall be the costume appropriate to their degree, but doctors may on special occasions wear a scarlet gown and graduates admitted ad eundem statum may wear the academic costume of their own university. Unless the holder of a diploma is also a graduate the only academic dress they may wear is an undergraduate gown and the scarf appropriate to their diploma.

9 The academic costumes of the University of Auckland shall be as follows:

   a The robe for the Chancellor of the University is a blue damask gown with facings of gold lace, bearing on each shoulder the coat of arms of the University. The cap is a black velvet tunicer with gold lace and tassel. The robe for the Pro-Chancellor is a black gown with facings of blue silk and gold lace, bearing on each shoulder the coat of arms. The robe is a black velvet tunicer with gold lace, bearing on each shoulder the coat of arms. The cap is a black velvet tunicer with silver lace and tassel. The robe for the Registrar is a gown of black silk with facings of blue silk, bearing on each shoulder the coat of arms. The cap is a black velvet tunicer with a black silk tassel. The robe for the Kaumatua and the Kuia is the Fellows gown of the colour University blue to be worn with a black scarf lined with the colour University blue bearing on each lapel the coat of arms. The robe is a black velvet tunicer with a black silk tassel. The academic dress for Graduation Officials shall be the costume appropriate to their degree. In addition, the gown shall bear on each shoulder the coat of arms of the University, and the tunicer shall have a blue tassel. Graduation Officials who are not graduates shall wear an undergraduate gown bearing the coat of arms of the University on each shoulder.

   b The gown for a Bachelors degree is as for the Cambridge Bachelor of Arts. The gown for a Masters degree is as for the Cambridge Master of Arts. The hood for every degree is the size and shape as for the Cambridge Master of Arts. The hood for a Bachelors degree is lined with coloured satin and bordered with white fur. The hood for a Masters degree is lined with coloured satin only. The hoods for the Bachelors and Masters degrees are as follows:

c The hood for a Bachelor with Honours degree is as for the relevant Bachelor's degree, with the addition of a 25mm ribbon band on the outside of the hood, alongside the fur. The colour of the ribbon band is the same colour as the lining.

The hood for a Bachelor's degree for which the prerequisite is another Bachelor's degree within the same Faculty, is as for a Bachelor with Honours degree, with the addition of a second 25mm band at a distance of 25mm from the first band. Both bands are the same colour as the lining.

Where there is more than one Masters or Bachelor's degree within a Faculty, the hoods for such degrees are lined with satin in the colour approved by Council. The first such degree will have no ribbon band, but subsequent degrees of this nature will be distinguished by the addition of a 25mm band on the edge of the satin. The colour of the ribbon band for the first subsequent degree within a Faculty will be dark brown, and any further subsequent degrees of this nature within the Faculty will be in another colour which is not taupe, nor unless otherwise approved, the colour used to line the hoods for any other degree.

The hood for an Interfaculty Bachelor's degree or Master's degree is lined with the colour of the Faculty primarily responsible for the degree, with the addition of a 25mm ribbon band on the edge of the satin. Where there are two Faculties involved, the colour of the ribbon band is the colour of the hood lining of the second Faculty. Where more than two Faculties are involved, the colour of the ribbon band is taupe. Where the Faculty primarily responsible for an Interfaculty Master's degree has an existing Interfaculty Master's degree listed in Regulation 9b, where more than two Faculties are involved, the colour of the ribbon band for this subsequent Interfaculty Master's degree will be dark brown.

d The gown for the degrees of Doctor of Clinical Psychology, Doctor of Education, Doctor of Fine Arts, Doctor of Medicine, Doctor of Music, Doctor of Musical Arts and Doctor of Pharmacy is as for the Cambridge Master of Arts with the addition of 50mm wide satin. The hood is made wholly of satin and this and the facings of the gown are of the following colours for the different degrees:

- Clinical Psychology: dark blue
- Education: emerald green
- Fine Arts: gold
- Medicine: crimson
- Music: white
- Musical Arts: white
- Pharmacy: grey-green

e The gown for the degree of Doctor of Philosophy is as for the Cambridge Master of Arts, with the addition of 100mm satin facings, made up of 75mm of scarlet edged with 25mm of gold. The hood is made wholly of scarlet satin.

f The gown for the degrees of Doctor of Engineering, Doctor of Laws, Doctor of Literature, and Doctor of Science is as for the Cambridge Master of Arts, but is made of black silk, or scarlet silk or cloth. The hood is made wholly of satin, and is of the following colours for the different degrees:

- Engineering: dark violet
- Laws: light blue
- Literature: pink
- Science: dark blue

g The cap for all graduates other than Doctors and the Officers of the University is a black trencher with a tassel. The cap for all Doctors other than officers of the University is as for the full dress Cambridge Doctor of Philosophy, namely a round black velvet bonnet with a gold cord around the crown ending in tassels.

Note: The colour of the lining of the hood for the Degree of Master of Philosophy is that of the closest Masters degree to which the subject of the MPhil relates.

h The scarf for a diploma is to be made of the same black material as the gown with a band of colour in plain satin as in existing hoods down the centre edge. The colour is to match the degree cluster most closely associated with the diploma. The lining is to be the same colour as the band. The width of the scarf at the base is to be 140mm in total, the black being 100mm and the colour 40mm, and narrowing behind the neck. A band of the lining colour is to be stepped down from the inside edge to the outside edge of the black material at the base of each side of the scarf. The diploma scarves are as follows:

- Architecture: lemon band and lining
- Arts: pink band and lining
- Business and Economics: burgundy band and lining
- Creative and Performing Arts: pink band and lining
- Education: emerald green band and lining
The gown for the honorary degrees of Doctor of Engineering, Doctor of Laws, Doctor of Literature, Doctor of Music, Doctor of Science and Doctor of the University of Auckland is as for the Cambridge Master of Arts, but is made of scarlet satin. The hood is made wholly of satin, and is one of the following colours for the different degrees:

- Engineering: dark violet
- Laws: light blue
- Literature: pink
- Music: white
- Science: dark blue
- The University of Auckland: University blue

The gown for a Fellow of the University of Auckland will be an undergraduate gown of the colour University Blue bearing on the left front lapel the coat of arms of the University. No hood or cap shall be worn.

Availability of Academic Dress

The Kate Edger Educational Charitable Trust trading as Academic Dress Hire owns a stock of academic gowns, hoods, scarves, trenchers and Tudor bonnets. These are available for hire Monday to Friday from 8.30am until 5pm throughout the year. Details may be obtained from Academic Dress Hire, 17 George Street, Newmarket, or www.academicdresshire.co.nz. A student completing the requirements for a degree or diploma will receive information regarding the hire of academic dress for the graduation ceremony with their invitation to apply to graduate.

3 The Council shall have the power to confer the following honorary degrees in accordance with the provisions of the Honorary Degrees Regulations 1998.

- Doctor of Engineering
- Doctor of Literature
- Doctor of Laws
- Doctor of Music
- Doctor of Science
- Doctor of the University of Auckland

A Masters degree in any Faculty of the University

4 The Council may confer a degree or award a diploma previously included in a University of Auckland Degrees and
Diplomas Statute on a person who had been enrolled in a programme leading to that qualification prior to its deletion from the Statute provided that person:

a had completed a significant component of the course of study prior to the deletion of the degree or diploma and
b has completed a course of study in accordance with the provisions of the regulations for that degree or diploma.

5 The Degrees Statute 1990 is hereby repealed.

---

The Honorary Degrees and Awards Statute 1998

Pursuant to sections 192 and 194 of the Education Act 1989 and section 20 of the University of Auckland Act 1961 the Council of the University makes the following statute:

1 This Statute may be cited as the Honorary Degrees and Awards Statute 1998 and shall come into force on the 16 March 1998.

2 The Council may at its discretion:

a Confer the following honorary degrees:
   - Doctor of Laws
   - Doctor of Science
   - Doctor of Literature
   - Doctor of Music
   - Doctor of Engineering
   - Doctor of the University of Auckland
   - A Masters degree in any Faculty of the University;

and

b Award the title ‘Fellow of the University’ (‘Fellowship’).

3 The University Honours Committee of the Council shall consider nominations and make recommendations to the Council for the conferring of any honorary degree or fellowship under this Statute.

4 The University Honours Committee shall henceforth consist of:

a the Chancellor who shall be the Chair of the Committee
b the Vice-Chancellor
c the Pro-Chancellor
d one member appointed by the Council
e two members of Senate elected by Senate
f the student member of the Council.

5 The Council may, from time to time, approve guidelines for the award of honorary degrees and fellowships and, in making its recommendations, the University Honours Committee shall ensure that it complies with all those guidelines.

6 The Council may also, in its discretion and on the recommendation of the University Honours Committee:

a award the title ‘Professor Emeritus’ to a retired member of the academic staff who held the office of a Professor of the University immediately before his or her retirement
b award the title ‘Distinguished Professor Emeritus’ to a retired member of the academic staff who held the office of a Distinguished Professor of the University immediately before his or her retirement
c award the title ‘University Librarian Emeritus’ to a retired member of staff who held the office of University Librarian immediately before his or her retirement and who has a record of long and distinguished service to the University as the University Librarian.

7.1 The University Honours Committee may recommend to the Council, for the conferment of an Honorary Doctor’s degree:

a Any person who:
   (i) is academically distinguished, or has made a distinguished contribution in creative or artistic fields, and has, or has had, some intimate connection with the University
   or
   (ii) has shown strong interest in the well-being of the University by benefactions, or in other appropriate ways
   or
   (iii) is of international repute and is visiting, or has visited the University in an official capacity
   or
b Any other person approved for the purpose after consultation with Education Committee on behalf of Senate.
7.2 The University Honours Committee may recommend to the Council, for the conferment of an Honorary Masters degree:
   a any member of the professional staff who has given long and distinguished service to the University
   or
   b any member of the academic staff who does not hold a degree
   or
   c any other person approved for the purpose after consultation with Education Committee on behalf of Senate.

7.3 The University Honours Committee may recommend to the Council, for the conferment of a Fellowship, a person who:
   a has made a unique and valuable contribution to the University
   and
   b is not a permanent member of staff.

8 A nomination for the conferment of an honorary degree or a fellowship may be made by any three persons each of whom is a member of the Council or of Senate or of both these bodies; and shall be made confidentially to the Vice-Chancellor in accordance with the relevant provisions of the guidelines in force under Clause 5 of this Statute.

9 The Honorary Degrees Regulations 1978 and The Fellow of the University of Auckland Statute 1992 are both hereby repealed.

Guidelines for the Award of Honorary Degrees and Fellowships

1 A nomination for an honorary degree or for the award of a fellowship shall be made confidentially in writing to the Vice-Chancellor and signed by three persons each of whom shall be a member of the Council or of Senate or of both these bodies.

2 Each nomination shall be accompanied by a statement outlining in sufficient detail the career, standing and qualifications of the nominee and the grounds under Clauses 7.1, 7.2 or 7.3 for conferring the degree or awarding the fellowship.

3 The Vice-Chancellor shall refer each nomination and the accompanying statement to the University Honours Committee of Council.

4 If Council approves a recommendation that an honorary degree be conferred or a fellowship be awarded the Vice-Chancellor shall invite the nominee to accept the award.

5 The conferring of honorary doctorate degrees shall not be confined to a graduation ceremony but shall be arranged at the discretion of the Council.

6 The conferring of an honorary Masters degree will, except in very exceptional circumstances, take place at a graduation ceremony.

7 The award of a fellowship shall be arranged at the discretion of the Council.

The Degree of Bachelor of Arts – BA

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Duration and Total Points Value

1 A student enrolled for this degree must follow a programme of the equivalent of six full-time semesters and pass courses with a total value of 360 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

Structure and Content

2 Of the 360 points required for this degree, a student must pass:
   a at least 300 points from courses listed in the Bachelor of Arts Schedule, including
      (i) at least 180 points in courses above Stage I, of which at least 90 points must be above Stage II
      (ii) courses in a minimum of three subjects listed in the Bachelor of Arts Schedule
   b (i) two majors of 120 points each from the Bachelor of Arts Schedule, of which at least 45 points must be above Stage II in each major
       or
       (ii) a specialisation in Communication.
   c 30 points from courses offered in either the General Education Open Schedule or the General Education Faculty Schedule approved for this degree or from a combination of these schedules, and the Academic Integrity course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

3 A student who is required to meet the Academic English Language Requirement, as specified in the Enrolment and Programme Regulations, Academic English Language Requirement, of the University Calendar, may substitute an academic English language course approved by Senate or its representative for 15 points of General Education.

4 a A student may include in their degree one or more modules of 45 points from one of the subjects available for modules in the Bachelor of Arts Schedule. 
   b Courses passed for modules cannot also be counted for majors.

5 Up to 30 points may be taken from courses available for other programmes offered at this University.

General Education Exemptions

6 a A student is exempted from the requirement to pass courses offered in the General Education Schedules who has:
   either
   (i) completed an undergraduate degree at a tertiary institution
   or
   (ii) commenced study for this degree at a tertiary institution before 1 January 2006
   or
   (iii) been admitted to this degree having completed 240 points or more of degree-level study at another tertiary institution.
   
   b A student who has been exempted from the requirement to pass courses offered in the General Education Schedules must substitute 30 points from courses available for this degree.
   
   c A student admitted to this degree, who has completed between 120 and 235 points inclusive of degree-level study at another tertiary institution, must pass:
      (i) 15 points from courses offered in the General Education Schedules
      and
      (ii) a further 15 points from courses available for this degree.
   
   d A student who has been fully or partially exempted from the requirement to pass courses offered in the General Education Schedules is nonetheless required to complete the Academic Integrity course.

Conjoint Degrees

7 Special arrangements apply where this degree is taken as a component degree of an approved conjoint combination. The specific requirements and a complete list of the conjoint degrees available are set out in the Conjoint Degrees section of the University Calendar.
Special Cases
8 For language courses, enrolment of students with prior knowledge of the language is at the discretion of the Academic Head or nominee.
   a Enrolment in any particular course(s) may be declined, and enrolment may be required instead in a course at a more advanced level.
   b If a student who has been required to enrol in a more advanced course fails that course they may be credited with an appropriate less advanced course if they are certified by the examiners as having reached the standard of a pass for that course and have not previously been credited with that course.
   c A student who has passed or been credited with a language acquisition course may not enrol for a course which precedes that course in the sequence of language acquisition courses.

Variations
9 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement
10 These regulations came into force on 1 January 2018. The 2006 regulations for the Degree of Bachelor of Arts were thereby repealed.

**The Degree of Bachelor of Theology – BTheol**

*New admissions into the Degree of Bachelor of Theology were suspended in 2014. Students who have a current enrolment in this qualification should contact their faculty regarding completion. The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.*

**Duration and Total Points Value**

1. A student enrolled for this degree must follow a programme of the equivalent of six full-time semesters and pass courses with a total value of 360 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

**Structure and Content**

2. Of the 360 points required for this degree, a student must pass:
   a. at least 255 points from courses listed in the Bachelor of Theology Schedule, including 180 points above Stage I of which at least 75 points must be above Stage II
   and
   b. a student who has been exempted from the requirement to pass courses offered in the General Education Schedules must substitute 30 points from courses available for this degree.
   c. Up to 45 points may be taken from courses in the Bachelor of Arts Schedule with the approval of the Academic Head or nominee.
   d. Up to 30 points may be taken from courses in other Bachelor programmes offered at this University.
General Education Exemptions

3 a A student is exempted from the requirement to pass courses offered in the General Education Schedules who has:
   either
   (i) completed an undergraduate degree at a tertiary institution
   or
   (ii) commenced study for this degree at a tertiary institution before 1 January 2006
   or
   (iii) been admitted to this degree with credit from another tertiary institution of 240 points or more.

b (i) 30 points from courses offered in either the General Education Open Schedule or the General Education Faculty Schedule approved for this degree or from a combination of these schedules.
(ii) In order to complete the requirements for General Education students must pass the Academic Integrity course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

c A student admitted to this degree with credit from another tertiary institution of between 120 and 235 points inclusive must pass:
   (i) 15 points from courses offered in the General Education Schedules
   and
   (ii) a further 15 points from courses available for this degree.

d A student who has been fully or partially exempted from the requirement to pass courses offered in the General Education Schedules is nonetheless required to complete the Academic Integrity course.

Conjoint Degrees

4 Special arrangements apply where this degree is taken as a component degree of an approved conjoint combination. The specific requirements and a complete list of the conjoint degrees available are set out in the Conjoint Degrees section of the University Calendar.

Variations

5 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement

6 These regulations came into force on 1 January 2014. The 2006 regulations for the Degree of Bachelor of Theology were thereby repealed.

Bachelor of Theology (BTheol) Schedule

| Stage I courses: THEOLOGY 101–107, 135, 136, 175, 176 |

BTheol must include:
- 60 points: THEOLOGY 103, 104, 107, 201
- 15 points from THEOLOGY 301, 303, 304, 306, 308, 330
- 60 points from THEOLOGY 310–313, 315, 319, 321–327, 331–335, 354, 355

The Degree of Bachelor of Arts (Honours) – BA(Hons)

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission

1 In order to be admitted to this programme, a student needs to have:
   a completed the requirements for the Degree of Bachelor of Arts from the University of Auckland or an equivalent qualification as approved by Senate or its representative
   and
   b passed the specified prerequisite courses for one of the subjects listed in the Bachelor of Arts (Honours) Schedule with a Grade Point Average of 5 or higher in 45 points above Stage II in that subject
   and
   c passed the specified prerequisite courses as listed in the Bachelor of Arts (Honours) Schedule for the intended subject.

2 A student who has not completed all the requirements for the Degree of Bachelor of Arts but who has:
   a passed courses with a total value of at least 345 points for that degree
   and
   b achieved a Grade Point Average of 5 or higher in 45 points above Stage II in the subject intended for the Bachelor of Arts (Honours)
and

c passed the specified prerequisite courses as listed in the Bachelor of Arts (Honours) Schedule for the intended subject

may, with the approval of the relevant Academic Head or nominee, enrol for this degree. The remaining courses for the Bachelor of Arts degree must be passed within the first semester of enrolment for the Bachelor of Arts (Honours). The Bachelor of Arts (Honours) degree will not be awarded until the requirements for the Bachelor of Arts have been completed.

Note: Applicants to Preparatory Clinical Psychology must be able to demonstrate professional attributes suitable for becoming a clinical psychologist. A written supplementary application, personal references and an interview will normally be required.

Duration and Total Points Value

3 A student enrolled for this degree must:
   a pass courses with a total value of 120 points
   and
   b complete within the time limit specified in the General Regulations – Bachelors Honours Postgraduate Degrees.

4 The total enrolment for this degree must not exceed 160 points.

Structure and Content

5 Of the 120 points required for this degree, a student must pass:
   a at least 120 points in one of the subjects listed in the Bachelor of Arts (Honours) Schedule
   or
   b (i) at least 90 points in one of the subjects listed in the Bachelor of Arts (Honours) Schedule
   and
   (ii) up to 30 points may be taken from other subjects listed in the Bachelor of Arts (Honours) Schedule, or from other 700 level courses offered at this University. The approval of all Academic Heads or nominees concerned is required.

6 A student admitted to this programme must complete the University of Auckland Academic Integrity Course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

7 The programme for each student requires the approval of the relevant Academic Head or nominee and the Dean of Faculty of Arts.

Dissertation

8 a A dissertation, when included in the programme, is to be carried out under the guidance of a supervisor appointed by Senate or its representative.

   b The dissertation topic must be approved by the relevant Academic Head or nominee prior to enrolment.

   c The dissertation must be completed and submitted as specified in the General Regulations – Bachelors Honours Postgraduate Degrees.

Variations

9 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Honours

10 a This degree may be awarded only where a student's overall grade for the Degree of Bachelor of Arts (Honours) is sufficiently high to deserve Honours.

   b Should a student fail to qualify for the award of the Degree of Bachelor of Arts (Honours), Senate or its representative may approve the reassignment of points towards the Graduate Diploma in Arts or the Postgraduate Diploma in Arts.

11 Where the standard specified in Regulation 10a is achieved, Honours will be awarded as specified in the General Regulations – Bachelors Honours Postgraduate Degrees.

Withdrawal

12 A student may withdraw from enrolment for the Degree of Bachelor of Arts (Honours) and apply to have points reassigned to the Graduate Diploma in Arts or the Postgraduate Diploma in Arts.

Commencement

13 These regulations came into force on 1 January 2006. The 1999 regulations for the Degree of Bachelor of Arts (Honours) were thereby repealed.

The Degree of Bachelor of Theology (Honours) – BTheol(Hons)
The BTheol(Hons) was withdrawn in 2018.

The Degree of Master of Arts – MA
The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.
Admission
1 In order to be admitted to this programme, a student needs to have:
   either
   a (i) completed the requirements for the Degree of Bachelor of Arts from the University of Auckland or an equivalent qualification approved by Senate or its representative
       and
       (ii) passed the specified prerequisite courses for one of the subjects listed in the Master of Arts Schedule with a Grade Point Average of 5 in 45 points above Stage II
   or
   b (i) completed the requirements for the Degree of Bachelor of Arts (Honours) from the University of Auckland in the intended subject with a Grade Point Average of 5 or higher over the programme
       or
       (ii) completed the requirements for the Postgraduate Diploma in Arts from the University of Auckland in the intended subject with a Grade Point Average of 5 or higher over the programme
       or
       (iii) completed the requirements for a qualification approved by Senate or its representative as equivalent to the degree of Bachelor of Arts (Honours) or Postgraduate Diploma in Arts, with a Grade Point Average of 5 over the programme.
2 A student who has passed courses with a total value of only 345 points towards the Degree of Bachelor of Arts and has passed:
   a all other requirements for the degree
   and
   b the specified prerequisite courses for one of the subjects listed in the Master of Arts Schedule with a Grade Point Average of 5 or higher in at least 45 points above Stage II in that subject
   may, with the approval of the relevant Academic Head or nominee, enrol for this degree. The requirements for the Degree of Bachelor of Arts must be completed during the first semester of initial enrolment for the Degree of Master of Arts. Should these requirements not be completed within that semester, enrolment for the Degree of Master of Arts will be suspended until they have been completed.
3 Admission to this degree requires approval from the relevant Academic Head or nominee and is at the discretion of Senate or its representative.

Duration and Total Points Value
4 A student admitted to this degree under Regulation 1a or 2 must:
   a pass courses with a total value of 240 points
   and
   b complete within the time limit specified in the General Regulations – Masters Degrees
   and
   c not exceed 280 points for the total enrolment for this degree.
5 A student admitted to this degree under Regulation 1b must:
   a pass courses with a total value of 120 points
   and
   b complete within the time limit specified in the General Regulations – Masters Degrees
   and
   c not exceed 160 points for the total enrolment for this degree.

Structure and Content
6 a A student enrolled for this degree must complete the requirements for one of the subjects as listed in the Master of Arts Schedule.

   b A student enrolled for this degree must complete:

       either
       (i) for a Research Master of Arts, a Thesis or Research Portfolio as specified in the subject requirements
       or
       (ii) for a Taught Master of Arts, a research component of at least 45 points as specified in the subject requirements.

       c A student who has to complete 240 points for this degree must achieve, in the first 120 points of enrolment, an average grade of B, or, for a research Masters, any grade specified for enrolment in a thesis or research portfolio for the subject. If the grade required is not achieved, enrolment for the MA cannot continue.

       d A student who has to complete 240 points may include, with the approval of the Academic Head or nominee, up to 60 points from courses in other Master of Arts subjects or other 700 level courses offered at this University, or from appropriate courses from an approved programme of study at a university outside New Zealand approved by the Academic Head or nominee.
A student who has to complete 120 points may include up to 30 points, with the approval of each of the Academic Heads or nominees, from courses in other Master of Arts subjects or other 700 level courses offered at this University.

A student admitted to this programme must complete the University of Auckland Academic Integrity Course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

Thesis / Research Portfolio / Dissertation

A thesis, research portfolio, or dissertation, when included in the programme, is to be carried out under the guidance of a supervisor appointed by Senate or its representative.

The thesis or dissertation topic must be approved by the relevant Academic Head or nominee or Postgraduate Committee prior to enrolment.

The thesis, research portfolio or dissertation is to be completed and submitted in accordance with the General Regulations – Masters Degrees.

Reassignment

A student who does not meet the requirements of this degree may apply to reassign courses passed for the Master of Arts to another qualification for which they can meet the requirements. This will normally be a Postgraduate Diploma in Arts for all subjects except Language Teaching and Learning, for which courses passed will be reassigned to the Postgraduate Diploma in Language Teaching.

Variations

In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Honours / Distinction / Merit

This degree may be awarded with either Honours, Distinction or Merit in accordance with the General Regulations – Master Degrees.

Commencement

These regulations came into force on 1 January 2012. The 2006 regulations for the Degree of Master of Arts were thereby repealed.

The BBIM was withdrawn in 2018.

The Degree of Bachelor of Commerce – BCom

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Duration and Total Points Value

1. A student enrolled for this degree must follow a programme of the equivalent of six full-time semesters and pass courses with a total value of 360 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

Structure and Content

2. Of the 360 points required for this degree, a student must pass:
   a. at least 300 points from courses listed in the Bachelor of Commerce Schedule, including:
      (i) 105 points from the Core Courses listed in the Bachelor of Commerce Schedule
      (ii) at least 180 points above Stage I, of which at least 75 points must be above Stage II from courses listed in the Bachelor of Commerce Schedule
      (iii) the requirements of one or more majors as specified in the Bachelor of Commerce Schedule with at least 45 points at Stage III in each major
   and
   b. (i) 30 points from courses offered in either the General Education Open Schedule or the General Education Faculty Schedule approved for this degree or from a combination of these schedules.
      (ii) A student who is required to meet the Academic English Language Requirement, as specified in the Enrolment and Programme Regulations, Academic English Language Requirement, of the University Calendar, must complete ACADENG 104 to fulfill their General Education requirement, or with approval from Senate or its representative, may substitute an alternative Academic English Language Requirement course for 15 points of General Education.
      (iii) In order to complete the requirements for General Education students must pass the Academic Integrity course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

3. Up to 30 points may be taken from other programmes offered by this University.

4. Students must pass or be concurrently enrolled in all courses listed in the Bachelor of Commerce Core Courses Schedule before enrolling in any other courses for this degree.

General Education Exemptions

5. a. A student is exempted from the requirement to pass courses offered in the General Education Schedules who has:
      (i) completed an undergraduate degree at a tertiary institution
      or
      (ii) commenced study for this degree at a tertiary institution before 1 January 2006
      or
      (iii) been admitted to this degree having completed 240 points or more of degree-level study at another tertiary institution.

   b. A student who has been exempted from the requirement to pass courses offered in the General Education Schedules must substitute 30 points from courses available for this degree.

   c. A student admitted to this degree, who has completed between 120 and 235 points inclusive of degree-level study at another tertiary institution, must pass:
      (i) 15 points from courses offered in the General Education Schedules
      and
      (ii) a further 15 points from courses available for this degree.

   d. A student who has been fully or partially exempted from the requirement to pass courses offered in the General Education Schedules is nonetheless required to complete the Academic Integrity course.
Conjoint Degrees
6 Special arrangements apply where this degree is taken as a component degree of an approved conjoint combination. The specific requirements and a complete list of the conjoint degrees available are set out in the Conjoint Degrees section of the University Calendar.

Special Cases
7 In exceptional circumstances Senate or its representative may permit a suitably qualified student to enrol directly in a Stage II course(s). If the student fails the Stage II course(s) but is certified by the examiner as having reached the standard of a pass at Stage I, the student may be credited with the appropriate Stage I course(s).

Variations
8 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement
9 These regulations came into force on 1 January 2006. The 2001 regulations for the Degree of Bachelor of Commerce were thereby repealed.

3 Of the 360 points required for this degree, a student must pass:
   a at least 300 points from courses listed in the Bachelor of Dance Studies Schedule, including at least 180 points above Stage I, of which at least 90 points must be above Stage II and
   b (i) 30 points from courses offered in either the General Education Open Schedule or the General Education Faculty Schedule approved for this degree or from a combination of these schedules.
   (ii) A student who is required to meet the Academic English Language Requirement, as specified in the Enrolment and Programme Regulations, Academic English Language Requirement, of the University Calendar, may substitute an academic English language course approved by Senate or its representative for 15 points of General Education.
   (iii) In order to complete the requirements for General Education students must pass the Academic Integrity course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

4 Up to 30 points may be taken from courses available for any other Bachelors degree at this University.

General Education Exemptions

5 a A student is exempted from the requirement to pass courses offered in the General Education Schedules who has either
   (i) completed an undergraduate degree at a tertiary institution
   or
   (ii) been admitted to this degree having completed 240 points or more of degree-level study at another tertiary institution.

b A student who has been exempted from the requirement to pass courses offered in the General Education Schedules must substitute 30 points from courses approved by the Head of Dance Studies Programme.

c A student admitted to this degree, who has completed between 120 and 235 points inclusive of degree-level study at another tertiary institution, must pass:
   (i) 15 points from courses offered in the General Education Schedules and
   (ii) a further 15 points from courses approved by the Head of Dance Studies Programme.

d A student who has been fully or partially exempted from the requirement to pass courses offered in the General Education Schedules is nonetheless required to complete the Academic Integrity course.

Special Cases

6 Students entering this degree with prior learning in dance may be required to:
   either
   a enrol directly in a corresponding Stage II or Stage III course
   or
   b take an alternative course approved by the Head of the Programme.

In such cases where a student is required to enrol in an advanced or alternative course (due to prior learning), should the student then fail the advanced or alternative course, the student will be credited with the course originally specified in the Regulations if they are certified by the examiner as having reached the standard of a pass for that course.

Variations

7 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.
Commencement
8 These regulations came into force on 1 January 2010.

   a completed the requirements for the Degree of Bachelor of Dance Studies or an equivalent qualification as approved by Senate or its representative
   and
   b achieved an average grade of at least B in the Stage III courses
   and
   c approval from the Head of Programme.

2 A student who has not completed the requirements for the Degree of Bachelor of Dance Studies but who has:
   a passed courses with a total value of at least 345 points for that degree
   and
   b achieved an average grade of at least B in the Stage III courses
   may, with the approval of the Head of Programme, enrol for this degree concurrently with the remaining courses for the Degree of Bachelor of Dance Studies. The Degree of Bachelor of Dance Studies (Honours) will not be awarded until the requirements for the Bachelor of Dance Studies have been completed.

Duration and Total Points Value
3 A student enrolled for this degree must:
   a pass courses with a total value of 120 points
   and
   b complete within the time limit specified in the General Regulations – Bachelors Honours Postgraduate Degrees.

4 The total enrolment for this degree must not exceed 160 points.

Structure and Content
5 A student enrolled for this degree must pass at least 120 points from the Bachelor of Dance Studies (Honours) Schedule. Up to 30 points may be substituted from other 700 level courses offered at this University, with the approval of all Heads of Departments concerned.

6 The programme for each student must be approved by the Graduate Adviser of Dance Studies and the Head of Programme prior to enrolment.

7 A student admitted to this programme must complete the University of Auckland Academic Integrity Course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

Practical Requirements
8 In any course that includes performance work of a practical nature a student must comply with the requirements for that course as specified by the Head of Programme.

Dissertation
9 a A dissertation is to be carried out under the guidance of a supervisor appointed by Senate or its representative, on the recommendation of the Head of Programme.

b The dissertation topic must be approved by the Head of Programme prior to enrolment.

c The dissertation must be completed and submitted as specified in the General Regulations – Bachelors Honours Postgraduate Degrees.
Variations
10 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Honours
11 a This degree may be awarded only where a student's overall grade for the Degree of Bachelor of Dance Studies (Honours) is sufficiently high to deserve Honours.

b Should a student fail to qualify for the award of the Degree of Bachelor of Dance Studies (Honours), Senate or its representative may approve the reassignment of points towards the Postgraduate Diploma in Creative and Performing Arts in Dance Studies.

The Degree of Bachelor of Fine Arts (Honours) – BFA(Hons)

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission
1 a No student on whom the Degree of Bachelor of Fine Arts has already been conferred may enrol for this degree.

b At the discretion of the Dean of Faculty of Creative Arts and Industries a student who has completed Parts I, II and III for a Bachelor of Fine Arts or its equivalent, and achieved a Grade Point Average of 5 or higher in all Fine Arts courses above Stage II, may be permitted to enrol for this degree.

c Where the Faculty of Creative Arts and Industries approves enrolment for the Degree of Bachelor of Fine Arts (Honours) the courses previously passed for the Degree of Bachelor of Fine Arts will be reassigned to the Degree of Bachelor of Fine Arts (Honours).

Note: 30 points of the General Education requirement must be completed prior to enrolment.

Duration and Total Points Value
2 A student enrolled for this degree must follow a programme of the equivalent of eight full-time semesters and pass courses with a total value of 480 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

Structure and Content
3 Of the 480 points required for this degree, a student must pass:

a 360 points from the Degree of Bachelor of Fine Arts Schedule and

b 120 points from courses listed in the Bachelor of Fine Arts (Honours) Schedule.

4 The programme for each student requires the approval of the Dean of Faculty of Creative Arts and Industries.

5 A student admitted to this programme must complete the University of Auckland Academic Integrity Course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

Conjoint Degrees
6 Special arrangements apply where this degree is taken as a component degree of an approved conjoint combination for which the specific requirements and a complete list of the conjoint degrees available are set out in the Conjoint Degrees section of the University Calendar.

Research Project
7 a The research project is to be carried out under the guidance of a supervisor/s appointed by Senate or its representative, on the recommendation of the Dean of Faculty of Creative Arts and Industries.

b The research project topic must be approved by the Dean of Faculty of Creative Arts and Industries prior to enrolment.

c The research project is to be completed by the last day of the final semester of enrolment in the research
project. If, in exceptional circumstances beyond the student's control, the research project has not been able to be completed by the above deadline, Senate or its representative, acting upon the recommendation of the Head of Department, may approve a limited extension of time, not exceeding two months.

Award of Honours
8 The Bachelor of Fine Arts (Honours) may be awarded with either First Class Honours or Second Class Honours in either First Division or Second Division. The class of Honours shall be determined by the grade achieved in FINEARTS 790.

Withdrawal from Honours
9 A student whose work does not satisfy the standard specified in Regulation 8, or who at any time chooses to withdraw from Honours, may transfer from the Degree of Bachelor of Fine Arts (Honours) to the Degree of Bachelor of Fine Arts. In that case the courses already passed for, or credited to, the Degree of Bachelor of Fine Arts (Honours) may be reassigned to the Degree of Bachelor of Fine Arts.

Variations
10 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement
11 These regulations came into force on 1 January 2015. The 2008 regulations for the Degree of Bachelor of Arts (Honours) were thereby repealed.

The Degree of Bachelor of Urban Planning (Honours) – BUrBPlan(Hons)

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission
1 Admission to this programme is at the discretion of Senate or its representative.

2 No student on whom the Bachelor of Planning has been conferred or who has passed more than 240 points towards the Bachelor of Planning, or equivalent, may enrol for this degree.

Note: To be admitted a student must meet University entry criteria and through the submission of a written statement demonstrate knowledge required for the programme.

Duration and Total Points Value
3 A student enrolled for this degree must follow a programme of the equivalent of eight full-time semesters and pass courses with a total value of 480 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

Structure and Content
4 Of the 480 points required for this degree, a student must pass:
   a at least 450 points from courses listed in the Bachelor of Urban Planning (Honours) Schedule
   and
   b 30 points from courses offered in either the General Education Open Schedule or the General Education Faculty Schedule approved for this degree or from a combination of these schedules.
   c A student who is required to meet the Academic English Language Requirement, as specified in the Enrolment and Programme Regulations, Academic English Language Requirement, of the University Calendar, may substitute an academic English language course approved by Senate or its representative for 15 points of General Education.

5 a A student must pass each of Parts I, II, III, and IV as listed in the Bachelor of Urban Planning (Honours) Schedule.

   b (i) A student will not be permitted to enrol for Part II unless Part I has been completed, nor to enrol for Part III unless Part II has been completed, nor to enrol for Part IV unless Part III has been completed.
   (ii) However, a student who has failed to pass one of those parts in its entirety may be allowed, at the discretion of Senate or its representative, to enrol for the course or courses needed to complete that Part together with a course or courses towards the next Part.
   (iii) Only in exceptional circumstances will a student be permitted to enrol for Part III unless all of Part I has been completed, or to enrol for Part IV unless all of Part II has been completed.
   (iv) A student will not be permitted to enrol for Part IV if they have not completed the 30 points from courses offered in either the General Education Open Schedule or the General Education Faculty Schedule approved for this degree or from a combination of these schedules.
   (v) In order to complete the requirements for General Education students must pass the Academic Integrity course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

General Education Exemptions
6 a A student is exempted from the requirement to pass courses offered in the General Education Schedules who has:
   either
   (i) completed an undergraduate degree at a tertiary institution
   or
   (ii) commenced study for this degree at a tertiary institution before 1 January 2006
   or
   (iii) been admitted to this degree having completed 240 points or more of degree-level study at another tertiary institution.

b A student who has been exempted from the requirement to pass courses offered in the General Education Schedules must substitute 30 points from courses approved by the Head of School of Architecture and Planning.

c A student admitted to this degree, who has completed between 120 and 235 points inclusive of degree-level study at another tertiary institution, must pass:
   (i) 15 points from courses offered in the General Education Schedules
   and
   (ii) a further 15 points from courses approved by the Head of School of Architecture and Planning.
d A student who has been fully or partially exempted from the requirement to pass courses offered in the General Education Schedules is nonetheless required to complete the Academic Integrity course.

Variations
7 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Honours
8 The Bachelor of Urban Planning (Honours) may be awarded with First Class Honours or with Second Class Honours in either First Division or Second Division. The class of Honours shall be determined by the student’s weighted average grade over courses undertaken in Parts II, III and IV excluding General Education. Students who have passed all courses and completed all other requirements for the BURpPlan(Hons) but whose performance in the courses is deemed by the Head of School of Architecture and Planning to be not of Honours standard will be awarded the Degree of Bachelor of Urban Planning.

Commencement
9 These regulations came into force on 1 January 2014.

Admission

1 In order to be admitted to this programme, a student needs to have:
   a  either
      (i) completed the requirements for the Degree of Bachelor of Architectural Studies
      or
      (ii) completed the requirements for an equivalent qualification, approved by Senate or its representative, that is indicative of ability to undertake advanced professional study in Architecture

      and
   b achieved an average grade of B– or higher over 90 points in Stage III of the Bachelor of Architectural Studies or an equivalent qualification.
A student who has not completed all the requirements for one of the qualifications listed in Regulation 1 but who, for that qualification, has:

a) no more than 20 points left to complete

and

b) achieved an average grade of B or higher in at least 90 points at the highest level of that qualification

may, with the approval of the Head of School of Architecture and Planning, enrol for this degree. The remaining points required for the qualification must be completed within 12 months of initial enrolment for this degree. Should this requirement not be completed in this time, the enrolment for the Degree of Master of Architecture (Professional) will be suspended until they have been completed.

Duration and Total Points Value

3 A student who has enrolled for this degree must pass courses with a total value of 240 points.

4 The total enrolment for this degree must not exceed 280 points.

Structure and Content

5 Of the 240 points required for this degree, a student must pass:

a) 120 point Thesis listed in the Master of Architecture (Professional) Schedule

and

b) 120 points from courses listed in the Master of Architecture (Professional) Schedule, including up to 15 points taken from other 700 level courses offered at this University.

6 The programme for each student requires the approval of the Head of School of Architecture and Planning.

7 A student admitted to this programme must complete the University of Auckland Academic Integrity Course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

Reassignment

8 a) A student may reassign courses from this degree to the Master of Architecture (Professional) and Urban Planning (Professional) once.

b) A student may reassign courses from this degree to the Master of Architecture (Professional) and Heritage Conservation once.

c) A student may reassign courses from this degree to the Master of Architecture (Professional) and Urban Design once.

d) All courses that can be reassigned must be reassigned including courses not completed.

Deadlines for Completion

9 a) A student must complete the requirements for this degree within four semesters if enrolled full-time or eight semesters if enrolled part-time or equivalent.

b) A student enrolled in this degree must complete their thesis by the date approved by the Head of School of Architecture and Planning which will be no earlier than the last day of the twelfth week in the final semester of enrolment and no later than the last day of the final semester of enrolment.

c) With the approval of the Head of School of Architecture and Planning a student may submit their thesis up to 12 months after the student’s initial enrolment in the thesis if enrolled full-time, or its part-time equivalent.

Completion of Requirements

10 a) If in exceptional circumstances beyond the student’s control, the thesis has not been able to be completed by the date set under Regulation 9c, Senate or its representative, acting upon the recommendation of the Head of School of Architecture and Planning, may approve a limited extension of time not normally exceeding four months, for the work to be completed. Fees will be as stated in the General Regulations – Masters Degrees, Regulation 4.

b) Extensions of time to complete coursework will not be granted beyond the end of the semester(s) of enrolment in the course.

c) A student who has failed a course or courses totalling no more than 40 points may be approved by Senate or its representative to enrol for no more than one further consecutive semester beyond the deadline for completion specified in Regulation 9 in order to complete the coursework component of the degree.

Thesis

11 a) The thesis is to be carried out under the guidance of a supervisor appointed by Senate or its representative.

b) The thesis topic and mode of presentation must be approved by the Head of School of Architecture and Planning prior to enrolment in the thesis. The mode of presentation will normally include an exhibition of finished work (including some or all of digital, graphic and/or three-dimensional components) and an oral
presentation of the finished work to examiners, supervisors, academic staff and other students in the cohort being examined.

c The exhibition and oral presentation shall be organised by the Head of School of Architecture and Planning in consultation with the Faculty Student Centre.

d The exhibition and oral presentation will be followed by the submission of the thesis.

e Recordings of exhibitions and oral presentations are not deposited in the University Library, nor deposited with the University’s digital repository.

f The student is to submit three temporary-bound copies and a digital copy of their thesis to the Faculty Student Centre in accordance with Regulations 8 and 9.

g The digital thesis shall be formatted as specified in the Guidelines for Formatting a Digital Thesis at the University of Auckland.

h The Associate Dean (Postgraduate) of the Faculty is responsible for transmitting the submitted copies to the examiners.

i Where the outcome of the examination is to award a thesis a passing grade:
   (i) Within one month of being advised of the outcome of the examination, the student must complete any minor corrections required to the satisfaction of the supervisor, deposit one hard-bound copy of the thesis with the appropriate Faculty Student Centre, and deposit a digital copy of the thesis in ResearchSpace in the University Library. The Faculty Student Centre will forward the hard-bound thesis to the University Library and will confirm that the digital copy has been deposited in ResearchSpace.
   (ii) The thesis deposited in digital form will be accessible to authenticated users through the University’s digital repository unless embargoed under Regulation 25 of the Examination Regulations.

j Where the outcome of the examination is to award a thesis a fail grade, the thesis will not be held in the University’s Library or digital repository.

12 A Certificate of Proficiency course may be reassigned to the coursework component of this degree as specified in Regulation 9 of the Credit Regulations.

Variations

13 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Honours

14 This degree may be awarded with Honours as specified in the General Regulations – Masters Degrees.

7 a A student must complete the requirements for this degree within six semesters if enrolled full-time or twelve semesters if enrolled part-time or equivalent.
   b A student enrolled in this degree must complete their thesis by the date approved by the Head of School of Architecture and Planning which will be no earlier than the last day of the twelfth week in the final semester of enrolment and no later than the last day of the final semester of enrolment.
   c With the approval of the Head of School of Architecture and Planning a student may submit their thesis up to 12 months after the student’s initial enrolment in the thesis if enrolled full-time, or its part-time equivalent.

Completion of Requirements
8 a If in exceptional circumstances beyond the student’s control, the thesis has not been able to be completed by the date set under Regulation 7c, Senate or its representative, acting upon the recommendation of the Head of School of Architecture and Planning, may approve a limited extension of time not normally exceeding four months, for the work to be completed. Fees will be as stated in the General Regulations – Masters Degrees, Regulation 4.
   b Extensions of time to complete coursework will not be granted beyond the end of the semester(s) of enrolment in the course.
   c A student who has failed a course or courses totalling no more than 40 points may be approved by Senate or its representative to enrol for no more than one further consecutive semester beyond the deadline for completion specified in Regulation 7 in order to complete the coursework component of the degree.

Thesis
9 a The thesis is to be carried out under the guidance of a supervisor appointed by Senate or its representative.
   b The thesis topic and mode of presentation must be approved by the Head of School of Architecture and Planning prior to enrolment in the thesis. The mode of presentation will normally include an exhibition of finished work (including some or all of digital, graphic and/or three-dimensional components) and an oral presentation of the finished work to examiners, supervisors, academic staff and other students in the cohort being examined.
   c The exhibition and oral presentation shall be organised by the Head of School of Architecture and Planning in consultation with the Faculty Student Centre.
   d The exhibition and oral presentation will be followed by the submission of the thesis.
   e Recordings of exhibitions and oral presentations are not deposited in the University Library, nor deposited with the University’s digital repository.
   f The student is to submit three temporary-bound copies and a digital copy of their thesis to the Faculty Student Centre in accordance with Regulations 7 and 8.
g The digital thesis shall be formatted as specified in the Guidelines for Formatting a Digital Thesis at the University of Auckland.

h The Associate Dean (Postgraduate) of the Faculty is responsible for transmitting the submitted copies to the examiners.

i Where the outcome of the examination is to award a thesis a passing grade:
   (i) Within one month of being advised of the outcome of the examination, the student must complete any minor corrections required to the satisfaction of the supervisor, deposit one hard-bound copy of the thesis with the appropriate Faculty Student Centre, and deposit a digital copy of the thesis in ResearchSpace in the University Library. The Faculty Student Centre will forward the hard-bound thesis to the University Library and will confirm that the digital copy has been deposited in ResearchSpace.
   (ii) The thesis deposited in digital form will be accessible to authenticated users through the University’s digital repository unless embargoed under Regulation 25 of the Examination Regulations.

j Where the outcome of the examination is to award a thesis a fail grade, the thesis will not be held in the University’s Library or digital repository.

Reassignment
10 a A student may reassign courses from this degree to the Master of Architecture (Professional) once.

The Degree of Doctor of Fine Arts – DocFA

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations, including the General Regulations for Named Doctorates and the Academic Statutes and Regulations.

Preamble
1 a A candidate for the Degree of Doctor of Fine Arts is required to pursue an approved programme of advanced study and research as an enrolled student of the University.

b It is expected that this programme will normally be completed within four years of full-time candidature and in no fewer than three years of full-time candidature. Part-time candidature may also be permitted with the approval of the Board of Graduate Studies.

c The Degree of Doctor of Fine Arts is awarded for a formal and systematic exposition of a coherent programme of advanced creative work that is supported by a written thesis and carried out over the period of registration for the degree, which in the opinion of the examiners and the Board of Graduate Studies satisfies all of the following criteria:

(i) is an original and substantial creative work
and
(ii) meets internationally recognised standards for such work
and
(iii) the thesis is an original contribution to the field of Fine Art and demonstrates knowledge of the artistic practices and literature relevant to the creative work undertaken and the ability to exercise critical and analytical judgment of them.

d The submission of the creative work will normally be:

(i) an exhibition, and/or other live performance held after submission of the thesis.
or
(ii) audio, visual or other recording or documentation submitted together with the thesis.

e The thesis may not, without prior approval of the Board of Graduate Studies, exceed 30,000 words in total.

f All research for this degree is to be conducted in accordance with the University of Auckland Guidelines for the Conduct of Research.

Eligibility
2 A candidate for the Degree of Doctor of Fine Arts is required to have:

a (i) completed the requirements for the award of either the Degree of Master of Fine Arts with First Class or Second Class Honours First Division at the University of Auckland
or
(ii) completed the requirements for the award of a qualification that the Board of Graduate Studies considers to be equivalent

and

b demonstrated to the satisfaction of the Head of School of Fine Arts, in consultation with the School of Fine Arts Postgraduate Committee, the level of training and ability that is necessary for the pursuit of a programme of advanced doctoral study in fine arts creative practice and research.

Admission Essential
3 A candidate for the Degree of Doctor of Fine Arts must have applied for admission and been admitted to the University of Auckland.

Duration
4 A candidate must complete the requirements for this degree within not fewer than three full-time years and not more than four full-time years (or their part-time equivalent) from the date of registration, unless permitted to do otherwise by the Board of Graduate Studies under Regulation 8 of these regulations.

Registration
5 a Registration and all conditions pertaining to it shall be determined in accordance with Regulation 2 of the General Regulations for Named Doctorates.

b The following provisional goals are required of all candidates:

(i) approval of the full research proposal by the appropriate departmental/faculty postgraduate
committee, including full proposals for both creative work and thesis, a provisional title, a discussion of methodology, an outline of the creative work to be undertaken, an outline of the thesis structure and statement of the resources required to complete the research

(ii) substantial examples of creative work such as a series of works, exhibition, or performance completed to the satisfaction of the main supervisor

(iii) a substantial piece of written work, such as a literature review, completed to the satisfaction of the main supervisor

(iv) presentation by the student of the research proposal and/or work in progress to an appropriate forum, eg, seminar, research group, conference, to the satisfaction of the main supervisor

(v) ethics approval/s and/or permissions obtained for the research (if required)

(vi) attendance at one of the Doctoral Skills Programme Induction Days

(vii) completion of the standard doctoral milestone goals relating to induction, English language and academic integrity as prescribed by the Board of Graduate Studies upon commencement of the registration

(viii) completion of a health and safety risk assessment and training for any laboratory/studio/field and related work activities.

c Further provisional goals may be added as per Regulation 2 of the General Regulations for Named Doctorates and as required after the commencement of registration as per Regulation 4a of the General Regulations for Named Doctorates.

Structure and Content
6 A student enrolled for this degree must pass FINEARTS 894 Studio.

Reviews of Registration
7 Reviews of progress and continuation of registration will be made according to Regulation 3 of the General Regulations for Named Doctorates.

Changes to the Conditions of Registration
8 Changes to supervision, extensions of time, and suspension or termination of registration will be made according to Regulation 4 of the General Regulations for Named Doctorates.

Enrolment and Fees
9 Enrolment and fees will be determined according to Regulation 5 of the General Regulations for Named Doctorates.

Submission
10 a Time for Submission
Unless permitted to do otherwise by the Board of Graduate Studies, a candidate must normally submit the creative work and thesis in no fewer than three and no more than four years from the Date of Registration if they are full-time students, or no fewer than six and no more than eight years in the case of candidates who have been registered as part-time students for the whole period of their registration. In the case of candidates who have been permitted to change between full-time and part-time registration, the submission times will be calculated on a pro rata basis.

b Copies of Creative Work and Thesis
(i) In those cases where the submission of the creative work is an exhibition and/or performance, as in Regulation 1d(i), the following will apply:
At least one month prior to the submission of the creative work, all candidates are initially required to submit one copy in temporary binding and one electronic copy in pdf format of the thesis to the Graduate Centre. Copies should include the following statement to examiners on the first page:
“This thesis is for examination purposes only and is confidential to the examination process.”

(ii) In those cases where the creative work is submitted together with the thesis, as in Regulation 1d(ii), all candidates are initially required to submit two copies of the creative work as documentation and/or as recordings in a standard retrievable form, and one copy of the thesis in temporary binding and one electronic copy of the thesis in pdf format to the Graduate Centre by the maximum submission date. The thesis copies should include the following statement to examiners on the first page:
“This creative work and thesis are for examination purposes only and are confidential to the examination process.”

c Notification of Submission
Three months prior to the expected date of submission of the creative work, or of the creative work and thesis, candidates should notify the Graduate Centre in writing of their intention to submit. If the candidate has reason to believe that any person would be unsuitable to serve as an examiner of the creative work or thesis on the grounds of conflict of interest, he or she may also submit at this time the name of this person or people and a statement in writing as to the nature of the conflict of interest to the Dean of Graduate Studies.
This notice of submission must be approved by the Head of School and, in the case of Regulation 1d(i), must include:

(i) a brief statement describing the creative work to be examined

(ii) a statement as to the availability of the creative work for examination

(iii) confirmation that a suitable venue for such creative work as an exhibition and/or performance is available within the time limit of the enrolment

(iv) confirmation that the creative work submission will be recorded in a standard retrievable form and two copies deposited with the Graduate Centre.

In the case of Regulation 1d(ii), this notice of submission must be approved by the Head of School and must include:

(v) a brief statement describing the creative work to be examined

(vi) a statement as to the availability of the creative work for examination; that it will be documented, or recorded in a standard retrievable form, and that two copies will be deposited with the Graduate Centre together with the thesis.

d Declaration as to Originality of the Thesis and Creative Work

The thesis is to be accompanied by a statutory declaration, signed by the candidate, stating:

(i) that the creative work and thesis are the candidate’s own work

(ii) whether any part of the creative work and/or thesis (in form or substance) has been submitted or accepted for any other degree or diploma and, where that is the case, clearly setting out the extent to which that earlier work has been incorporated into the thesis

(iii) that written permission has been obtained for any third-party copyright material reproduced in the creative work and/or thesis that represents a “substantial part” of the other work

(iv) that the temporary-bound copy and electronic copy of the thesis are identical

e Co-Authorship

(i) Where the thesis contains jointly authored research papers, case studies and/or any other work, published or unpublished, a Co-Authorship Form must be signed by the candidate and all the joint authors, stating the extent to which the jointly authored material is the candidate’s own work.

(ii) Where the thesis includes research reported in published or unpublished co-authored works, a Co-Authorship Form must be signed by the candidate and all the joint authors, stating the extent to which the jointly authored material is the candidate’s own work.

(iii) Where the creative work includes co-produced creative work, a Co-Production Form must be signed by the candidate and all the joint producers, stating the elements of the jointly produced material which are the candidate’s own work.

f Language of Thesis

The thesis is to be presented in English unless otherwise approved by the Board of Graduate Studies at the time of first registration of the candidate.

Examination

11 a General Provisions

The Head of School of Fine Arts and/or the Associate Dean (Postgraduate) of the Faculty may nominate another person to the Board of Graduate Studies to be authorised to act in his or her place in all of the provisions of this Regulation and Regulations 12 and 13. If either the Head of School or Associate Dean (Postgraduate) is a supervisor of the candidate, an alternate must be nominated and appointed.

b Neither the supervisors nor the candidate may communicate with the examiners regarding the examination at any stage of the examination process, except as specified in Regulations 12 and 13 of these regulations.

c Nomination of Examiners

On notification of submission or intent to submit under Regulation 10c, the Head of School will, on the advice of the supervisor/s, nominate at least two suitably qualified persons to the Board of Graduate Studies for selection as examiners. The nominees should each hold a doctoral degree, or have equivalent expertise and experience, and be expert in the field of study which is the subject of the thesis and creative work. At least one nominee should be from outside New Zealand. The examiners may not be staff members of the University or have been involved in either the research or the preparation of the creative work and/or thesis.

d Appointment of Examiners

The Board of Graduate Studies will consider the nominations provided by the Head of School and any submissions made by the candidate under the provisions of Regulation 10c and will appoint two suitably qualified persons who are available to act as examiners. Both examiners must be able to participate in the oral
examination in the case of candidates submitting in accordance with Regulation 1d(i); one examiner must be able to participate in the oral examination in the case of candidates submitting in accordance with Regulation 1d(ii).

e  **Appointment of Examination Committee**

The Board of Graduate Studies will also appoint an Examination Committee which will normally be composed of:

(i) the Head of School

and

(ii) an Associate Dean (Postgraduate), who will chair the Examination Committee

and

(iii) one other person (“the Head of School Nominee”) nominated by the Head of School. This person will have knowledge of the general field of the creative work and the thesis, but not necessarily of the research topic, and will normally be a staff member of the University. No member of the Examination Committee may be a supervisor or have been involved in either the creative work or thesis research or the preparation of the creative work or thesis. The Associate Dean will normally be from the same faculty as the candidate, but if that person is in the same department as the candidate then an Associate Dean from another faculty should be substituted.

**Examination with Exhibition and/or Performance**

12 a  In those cases where the submission of the creative work is an exhibition and/or performance as in Regulation 1d(i), the oral examination will proceed as follows:

(i) The oral examination will take place during the period in which the creative work is being examined and on or near the site of that work.

(ii) Each examiner will be provided with a copy of the thesis at least one month prior to the final exhibition and/or performance and is to examine the thesis independently prior to the oral examination.

(iii) Each examiner will attend the final exhibition or performance of the creative work and is to examine the creative work independently prior to the oral examination.

(iv) The Head of School will arrange the oral examination to take place after the examiners have completed their independent examinations but during the period in which the creative work is available for examination.

(v) The Board of Graduate Studies will appoint a person to act as Independent Chair of the oral examination. The chair must be a member of the academic staff of the University but will not normally be a member of the Faculty of Creative Arts and Industries.

(vi) The oral examination must be attended by the candidate, both examiners, the Chair and the Head of School Nominee on the Examination Committee. The Head of School Nominee will not act as examiner and may only participate to the extent requested by the chair. The main supervisor may attend with the agreement of the candidate but may only participate to the extent requested by the Chair.

(vii) At the oral examination the candidate may give a short introductory presentation concerning the creative work and the thesis.

(viii) During the oral examination, examiners will discuss with the candidate issues pertinent to the creative work and thesis and relevant matters in the field to which the creative work and thesis belong.

(ix) No recommendation regarding outcome is to be made at the time of the oral examination; and no discussion of the recommendations listed in Regulation 12b is permitted at this time regardless of whether or not the candidate is present.

(x) On completion of the oral examination, the Chair will provide a written report to the Board of Graduate Studies attesting to the integrity of the examination.

(xi) On completion of the oral examination there is to be no communication regarding the examination between the examiners, or between the examiners, the Head of School nominee and the candidate.

b  **Examiners’ Reports**

Acting independently, the Examiners are required to provide the Graduate Centre, within four weeks of attendance at the oral examination, with a written report in English on the quality of the creative work and the thesis according to the criteria outlined in Regulation 1c.

Each report will include one of the following recommendations:

**either**

(i) to award the degree

The thesis can be passed without any further amendment or correction. Sometimes examiners may wish to include a list of suggested amendments for the candidate to use when publishing the material

or

(ii) to award the degree after specified “minor corrections” have been made to the thesis, to the satisfaction of one of the examiners or nominee (who may be the main supervisor), and by a specified date. The examiner should provide a full list of corrections. This recommendation can be made when the thesis
has reached the required standard but for minor problems such as inconsistency in terminology, referencing problems, or typographical errors. These changes can normally be made within a three month period. When these corrections are made, the thesis will meet the standard and then will be ready for permanent binding and placement in the Library.

or

(iii) (a) to award the degree subject to revising part or parts of the thesis, to the satisfaction of one of the examiners or nominee (who will be the Head of School), by a specified date. The examiner should provide a full list of revisions. This recommendation is made when an examiner concludes that the revisions required are not minor, but are substantive including re-analysis of data, or rewriting of chapters, or corrections of significant lapses in logic or coherence. These changes can normally be made within a 3-6 month period.

or (b) to award the degree subject to revising part or parts of the thesis, to the satisfaction of the examiner or examiners by a specified date.

or

(iv) to permit the candidate to revise the creative work and/or thesis, and resubmit it for examination on one further occasion only. This recommendation is made when an examiner concludes that the creative work and/or thesis is not yet of Doctor of Fine Arts standard. The creative work and/or thesis will require either further research, reworking of specific areas, rewriting of specific sections, reconceptualisation, and/or reorganisation in order to reach the required Doctor of Fine Arts standard. The candidate will be permitted to resubmit, normally within a 12 month period.

or

(v) to refer the creative work and thesis to the appropriate authority within the University for consideration of the award of another degree. This recommendation is made when an examiner is of the opinion that the creative work and/or thesis has substantive flaws incompatible with the requirements of a Doctor of Fine Arts.

or

(vi) not to award the degree.

c As suppliers of evaluative material in terms of the Privacy Act 1993, all examiners will be informed that the information and reports they supply as such will be held in confidence to the candidate, supervisors and to persons involved in the formal examination process. Candidates’ preparation for thesis revision should be assisted by knowing what the examiners have said about their thesis. Examiners’ reports will normally be released initially to those involved in the examination process, other than the candidate. Part 1 of the report, the recommendation, will not be released to the candidate but, if the Examination Committee recommends that the candidate revise the thesis, and the Board of Graduate Studies accepts that recommendation, then the Graduate Centre will release the examiners’ evaluations (Part 2 of the report) to the candidate. The author of each report will not be identified. Part 2 of the report will also be released for the purposes of judging the Vice-Chancellors Prize for Best Doctoral Thesis for those candidates who have been nominated.

d The Board of Graduate Studies (through the Dean of Graduate Studies) reserves the right to remove from an examiner’s report made available to the candidate any material that it considers should not be released.

e **Replacement of Examiners**

If a report has not been received within one month of the oral examination, the Graduate Centre will send a reminder to the examiner and advise him or her that unless the report is received within one further month the appointment of the examiner will be terminated. If the report has not been received within one month of the date of the reminder, the Board of Graduate Studies may appoint a replacement examiner, who will be provided with a recording of the exhibition and/or performance.

The Board of Graduate Studies reserves the right to appoint a replacement examiner in the event that an examiner provides an inappropriate report.

f **Consideration of Examiners’ Reports**

Upon receipt of both the examiners’ reports, the Graduate Centre will provide copies for consideration by the Examination Committee. The examiners’ reports will also be made available to the supervisor/s on a confidential basis. Supervisor/s may comment on the reports in writing to the Examination Committee on a confidential basis. The Examination Committee may also request clarification of issues raised in the examiners’ reports from the examiners and, if necessary, from supervisors. If the recommendations of the examiners differ and the Examination Committee considers that the difference may be resolved, the Chair may invite the two examiners to consult and to provide a written report or reports on the outcome of their consultations. The Examination Committee may also contact the Examiners to seek agreement on a list of recommended minor corrections and/or revisions.

g **Recommendation of the Examination Committee**
The Examination Committee will then make a report to the Board of Graduate Studies which includes the nature and outcome of any communications with the examiners and/or supervisor/s made under Regulation 12e and which recommends one of the following:

(i) to appoint one or more further independent examiners to report on any areas of conflict

or

(ii) to award the degree

or

(iii) to award the degree after specified “minor corrections” have been made to the thesis, to the satisfaction of one of the examiners or nominee (who may be the main supervisor), and by a specified date. This recommendation shall include full details of the work to be undertaken and a time frame for the completion of that work and nominate the party to whose satisfaction the work must be completed.

or

(iv) (a) to award the degree subject to revising part or parts of the thesis, to the satisfaction of one of the examiners or nominee (who will be the Head of School), by a specified date. This recommendation shall include full details of the work to be undertaken and a time frame for the completion of that work and nominate the party to whose satisfaction the work must be completed. When the Head of School acts as the Examiner’s nominee, the nature of the revisions must be such that he or she can certify that compliance has been achieved. In such cases, the Head of School may discuss the revisions with the Head of School Nominee on the Examination Committee and/or the main supervisor. If the Head of School is unable to assess whether the revisions have been made to the required standard, the revisions to the thesis must be assessed by an examiner.

or

(b) to award the degree subject to revising part or parts of the thesis, to the satisfaction of the Examiner or Examiners by a specified date. This recommendation shall include full details of the work to be undertaken and a time frame for the completion of that work and nominate the party to whose satisfaction the work must be completed.

or

(v) to permit the candidate to revise the creative work and/or thesis, and resubmit it for examination on one further occasion only, but only if the candidate has not already been permitted to revise and resubmit under this clause. This recommendation shall include a timeframe for the resubmission. The date of resubmission may not be more than 12 months from the date the examiner’s reports were forwarded to the Examination Committee by the Graduate Centre.

or

(vi) to refer the creative work and thesis to the appropriate authority within the University for consideration of the award of another degree

or

(vii) not to award the degree.

h Further Examiners
In the event that the examiners’ reports are in serious conflict the Board of Graduate Studies may appoint independent external examiners to report on any matters it may specify. In this event, the candidate will be kept informed, and Regulations 12b to 12d will apply for the reports of the further examiners. Such examiners will be provided with a recording of the exhibition and/or performance, and with a copy of the thesis.

i Minor Corrections
In the event that the Board of Graduate Studies requires a candidate to undertake minor corrections, the following provisions apply:

(i) the Head of School Nominee will ensure that the candidate is provided with a copy of the required minor corrections, and the specified date for the corrections to be completed by

(ii) if the required minor corrections are completed to the satisfaction of an examiner or nominee (who may be the main supervisor) by the specified date, that person will notify the Graduate Centre that the degree may be awarded

(iii) in cases where an examiner or nominee (who may be the main supervisor) reports that the minor corrections were not completed to their satisfaction or by the specified date, the Examination Committee will consider the evidence and will make a report and recommendation to the Board of Graduate Studies.

j Revisions
In the event that the Board of Graduate Studies requires the candidate to undertake revisions to the satisfaction of an examiner or nominee (who will be Head of School), or to the satisfaction of both examiners, the following provisions apply:

(i) the Head of School Nominee will ensure that the candidate is provided with a copy of the required revisions, and the specified date for the revisions to be completed by

(ii) if the required revisions are completed to the satisfaction of an examiner or nominee (who will be the
Head of School), or the examiners, by the specified date, that person will notify the Graduate Centre that the degree may be awarded

(iii) in cases where an examiner or nominee (who will be the Head of School), or the examiners, report that the revisions were not completed to their satisfaction or by the specified date, the Examination Committee will consider the evidence and will make a report and recommendation to the Board of Graduate Studies. This recommendation may include the need to undertake further revisions.

k Revision and Resubmission
In the event that the Examination Committee recommends to the Board of Graduate Studies that the candidate should be permitted to revise the creative work and/or thesis and resubmit it on one occasion only, the Examination Committee will recommend a timeframe for the resubmission. The date of resubmission may not be more than 12 months from the date the examiners’ reports were forwarded to the Examination Committee by the Graduate Centre. If the Board of Graduate Studies accepts the recommendation, the following provisions apply:

(i) the Graduate Centre will inform the candidate of the decision, and will forward copies of Part 2 of the examiners’ reports to the candidate
(ii) within two weeks of the notification from the Graduate Centre, the Examination Committee will meet with the candidate and discuss the revisions required
(iii) the Chair of the Examination Committee will send a written report of the meeting with the candidate to the Graduate Centre which will include a recommendation as to the date for resubmission
(iv) the candidate is required to enrol and pay the prescribed tuition and research fees from the month in which the decision was made to the month in which the thesis is to be resubmitted. The registration of the candidate is to continue under the conditions applying at the first date of submission
(v) if the creative work and/or thesis is not resubmitted by the prescribed date, the registration of the candidate will normally be terminated
(vi) upon resubmission, the revised creative work and/or thesis is to be examined as a whole by the same examiners in accordance with the provisions of Regulation 12, excepting that a further resubmission may not be recommended. If one or both of the original examiners is unavailable to re-examine the creative work and/or thesis, the Board of Graduate Studies will appoint alternative examiner/s
(vii) a second oral will only be held in the event that the creative work is required to be revised and resubmitted
(viii) where no amendments to the thesis were required, the examiners shall be provided with a copy of the original thesis for reference purposes but shall not re-examine it
(ix) where the creative work was not required to be revised and resubmitted, the examiners shall be provided with a recording of the creative work for reference purposes but shall not re-examine it
(x) upon receipt of both of the examiners’ reports, the Graduate Centre will provide copies of the new examiners’ reports and the original examiners’ reports to the Examination Committee and to the supervisor/s on a confidential basis. The procedure followed by the Examination Committee will be that in Regulation 12e. Following consideration of all examiners’ reports, the Examination Committee will make a report to the Board of Graduate Studies which includes the nature and outcome of any communications with the examiners and/or supervisor/s made under Regulation 12e and a recommendation in accordance with Regulation 12f of these regulations.

l Final Decision
After considering all of the reports of the examiners and the Examination Committee, the Board of Graduate Studies will make the final decision as to the award of the degree.

m Copies for Deposit
(i) On successful completion of the examination, candidates will be required to deposit two archival records in a standard retrievable form of the examined creative work, and two hardbound copies of the thesis and one digital copy, corrected or revised as may be required, with the Graduate Centre. The degree will not be conferred until the candidate has complied with this requirement.
(ii) When two hardbound copies and a digital copy of the Doctor of Fine Arts thesis are deposited, these must be accompanied by a statutory declaration signed by the candidate stating that the hardbound copies and the digital copy are the same.

n (i) The digital thesis and recording of the examined creative work deposited shall be formatted as specified in the Guidelines for Formatting a Digital Thesis at the University of Auckland.
(ii) A recording of the examined creative work and a thesis which are deposited in digital form will be accessible through the University’s digital repository, unless embargoed under Regulation 25 of the Examination Regulations.

Examination of Creative Work with the Thesis
13 a In those cases where the creative work is submitted together with the thesis, as in Regulation 1d(ii), Regulations 11a to 11e will apply.
b Examiners’ Reports
Each examiner will be provided with the recording or documentation of the creative work and an electronic copy of the thesis in pdf format. The recording or documentation of the creative work and a copy of the thesis will be provided to the Examination Committee. The Examiners will independently examine both the thesis and the creative work. Acting independently, the Examiners are required to provide the Graduate Centre, within two months of receipt of the creative work and thesis, with a written report in English on the quality of the creative work and thesis according to the criteria outlined in Regulation 1c.

c The examiners will include with their reports one of the following recommendations:
(i) to award the degree, subject to satisfactory performance at the oral examination. The thesis can be passed without any further amendment or correction. Sometimes examiners may wish to include a list of suggested amendments for the candidate to use when publishing the material.
or
(ii) to award the degree after specified “minor corrections” have been made to the thesis, to the satisfaction of the Oral Examiner or nominee (who may be the main supervisor), by a specified date, and subject to satisfactory performance at the oral examination. This recommendation can be made when the thesis has reached the required standard but for minor problems such as inconsistency in terminology, referencing problems, or typographical errors. These changes can normally be made within a three month period. When these corrections are made, the thesis will meet the standard and then will be ready for permanent binding and placement in the Library.
or
(iii) to award the degree after revisions have been made to the thesis to the satisfaction of the Examiner or nominee (who will be the Head of School), by a specified date, and subject to satisfactory performance at the oral examination. This recommendation is made when an examiner concludes that the revisions required are not minor, but are substantive including re-analysis of data, or rewriting of chapters, or corrections of significant lapses in logic or coherence. These changes can normally be made within a 3-6 month period.
or
(iv) to permit the candidate to revise the creative work and/or thesis, and resubmit it for examination on one further occasion only. This recommendation is made when an examiner concludes that the creative work and/or thesis is not yet of Doctor of Fine Arts standard. The creative work and/or thesis will require either further research, reworking of specific areas, rewriting of specific sections, reconceptualisation, and/or reorganisation in order to reach the required Doctor of Fine Arts standard. The candidate will be permitted to resubmit, normally within a 12 month period.
or
(v) to refer the creative work and thesis to the appropriate authority within the University for consideration of the award of another degree. This recommendation is made when an examiner is of the opinion that the creative work and/or thesis has substantive flaws incompatible with the requirements of a Doctor of Fine Arts.
or
(vi) not to award the degree.

d As suppliers of evaluative material in terms of the Privacy Act 1993, all examiners will be informed that the information and reports they supply as such will be held in confidence to the candidate, supervisors and to persons involved in the formal examination process. Candidates’ preparation for thesis revision should be assisted by knowing what the examiners have said about their thesis. Examiners’ reports will normally be released initially to those involved in the examination process, other than the candidate. Part 1 of the report, the recommendation, will not be released to the candidate but, if the Examination Committee recommends that the candidate proceed to oral or that the candidate revise and resubmit the work prior to an oral, and the Board of Graduate Studies accepts that recommendation, then the Graduate Centre will release the examiners’ evaluations (Part 2 of the report) to the candidate. The author of each report will not be identified. Part 2 of the report will also be released for the purposes of judging the Vice-Chancellors Prize for Best Doctoral Thesis for those candidates who have been nominated.

e The Board of Graduate Studies (through the Dean of Graduate Studies) reserves the right to remove from an examiner’s report made available to the candidate any material that it considers should not be released.

f Replacement of Examiners
If a report has not been received within two months, the Graduate Centre will send a reminder to the examiner and advise him or her that unless the report is received within two further months the appointment of the examiner will be terminated. If the report has not been received within two months of the date of the reminder, the Board of Graduate Studies may appoint a replacement examiner.

The Board of Graduate Studies reserves the right to appoint a replacement examiner in the event that an examiner provides an inappropriate report.
g. Consideration of Examiners’ Reports
The Examination Committee will consider the examination reports in accordance with Regulation 9k of the Statute for the Degree of Doctor of Philosophy 2016.

h. Recommendation of the Examination Committee
The Examination Committee will then make a report to the Board of Graduate Studies which includes the nature and outcome of any communications with the examiners and/or supervisor/s made under Regulation 9k of the Statute for the Degree of Doctor of Philosophy 2016 and which recommends one of the following:
(i) to appoint one or more further independent examiners to report on any areas of conflict
or
(ii) to proceed to the oral examination
or
(iii) to permit the candidate to revise the creative work and/or thesis, and resubmit it for examination on one further occasion only
or
(iv) to refer the thesis to the appropriate authority within the University for consideration of the award of another degree
or
(v) not to award the degree.

i. Further Examiners
In the event that the examiners’ reports are in serious conflict the Board of Graduate Studies may appoint independent external examiners to report on any matters it may specify. In this event, the candidate will be kept informed, and Regulations 13b to 13e will apply for the reports of the further examiners. Such examiners will be provided with the recording or documentation of the creative work and a copy of the thesis.

j. Oral Examination
In the event that the Board of Graduate Studies accepts a recommendation to proceed to an oral examination, Regulation 9n of the Statute for the Degree of Doctor of Philosophy 2016 will apply.

k. Recommendation of the Oral Examination
On completion of the oral examination, the Chair will provide a written report and recommendation, endorsed by the Head of School Nominee and the Oral Examiner, to the Board of Graduate Studies. The report will include one of the following recommendations:
either
(i) to award the degree
or
(ii) to award the degree after specified “minor corrections” (see Regulation 13c(ii)) have been made to the thesis, to the satisfaction of the Oral Examiner or nominee (who may be the main supervisor), and by a specified date
or
(iii) (a) to award the degree subject to revising part or parts of the thesis, to the satisfaction of the Oral Examiner or nominee (who will be the Head of School), by a specified date. When the Head of School acts as the Oral Examiner’s nominee, the nature of the revisions must be such that he or she can certify that compliance has been achieved. In such cases, the Head of School may discuss the revisions with the Head of School Nominee on the Examination Committee and/or the main supervisor. If the Head of School is unable to assess whether the revisions have been made to the required standard, the revisions to the thesis must be assessed by the Oral Examiner
or
(b) to award the degree subject to revising part or parts of the thesis, to the satisfaction of the Examiner or Examiners by a specified date
or
(iv) to permit the candidate to revise the creative work and/or thesis, and resubmit it for examination on one further occasion only, but only if the candidate has not already been permitted to revise and resubmit under Regulation 13h(iii). This recommendation is made when an examiner concludes that the creative work and/or thesis is not yet of Doctor of Fine Arts standard. The creative work and/or thesis will require either further research, reworking of specific areas, rewriting of specific sections, reconceptualisation, and/or reorganisation in order to reach the required Doctor of Fine Arts standard. The candidate will be permitted to resubmit, normally within a 12 month period.
or
(v) to refer the creative work and thesis to the appropriate authority within the University for consideration of the award of another degree
or
(vi) not to award the degree. In the case of recommendations 13k(iii) and 13k(iv), the report must also state clearly the nature of the revisions recommended.
When minor corrections are required, Regulation 9p of the Statute for the Degree of Doctor of Philosophy 2016 applies.

When revisions are required, Regulation 9q of the Statute for the Degree of Doctor of Philosophy 2016 applies.

Revision and Resubmission

In the event that the Examination Committee recommends to the Board of Graduate Studies that the candidate should be permitted to revise the creative work and/or thesis prior to an oral examination, Regulations 12j(i-v) of these regulations will apply and

(i) upon resubmission, the revised creative work and/or thesis is to be examined as a whole by the same examiners in accordance with the provisions of this Regulation 13, excepting that a further resubmission may not be recommended. If one or both of the original examiners is unavailable to re-examine the thesis, the Board of Graduate Studies will appoint alternative examiner/s

(ii) upon receipt of both of the examiners’ reports, the Graduate Centre will provide copies of the new examiners’ reports and the original examiners’ reports to the Examination Committee and to the supervisor/s on a confidential basis. The procedure followed by the Examination Committee will be that in Regulation 13f. Following consideration of all examiners’ reports, the Examination Committee will make a report to the Board of Graduate Studies which includes the nature and outcome of any communications with the examiners and/or supervisor/s made under Regulation 13f. The Examination Committee may recommend the appointment of one or more further independent examiners to report on any areas of conflict, and the Board of Graduate Studies may appoint a further examiner in accordance with Regulation 13h of these regulations. If the Examination Committee recommends that an oral examination be held, and the Board of Graduate Studies accepts this recommendation, the Graduate Centre will release the examiners’ evaluations of the revised thesis (Part 2 of the report) to the candidate no fewer than five working days before the oral examination. The procedure for the oral examination will be that in Regulation 9n of the Statute for the Degree of Doctor of Philosophy 2016. If the Examination Committee recommends that an oral examination should not be held, its report will include one of the following recommendations:

(a) to refer the creative work and thesis to the appropriate authority within the University for consideration of the award of another degree

or

(b) not to award the degree.

In the event that the Board of Graduate Studies requires that a candidate revise and resubmit the creative work and/or thesis after an oral examination, the Oral Examination Committee will recommend a timeframe for the resubmission. The date of resubmission may not be more than 12 months from the date of the oral examination. In such cases, the following provisions apply:

(i) the Graduate Centre will inform the candidate of the decision and send a copy of the oral examination report to the Examination Committee

(ii) within two weeks of the notification from the Graduate Centre, the Examination Committee will meet with the candidate and discuss the revisions required

(iii) the Chair of the Examination Committee will send a written report of the meeting with the candidate to the Graduate Centre

(iv) the candidate is required to enrol and pay the prescribed tuition and research fees from the month in which the decision was made to the month in which the thesis is to be resubmitted. The registration of the candidate is to continue under the conditions applying at the first date of submission

(v) upon resubmission, the revised creative work and/or thesis is to be examined as a whole by the same examiners in accordance with the provisions of this Regulation 13, excepting that a further resubmission may not be recommended. If one or both of the original examiners is unavailable to re-examine the creative work and/or thesis, the Board of Graduate Studies will appoint alternative examiner/s

(vi) where no amendments to the thesis were required, the examiners shall be provided with a copy of the original thesis for reference purposes but shall not re-examine it

(vii) where the creative work was not required to be revised and resubmitted, the examiners shall be provided with a copy of the creative work for reference purposes but shall not re-examine it

(viii) upon receipt of both of the examiners’ reports, the Graduate Centre will provide copies of the new examiners’ reports, the original examiners’ reports and the oral examination report to the Examination Committee and to the supervisor/s on a confidential basis. The procedure followed by the Examination Committee will be that in Regulation 13f. Following consideration of all examiners’ reports the Examination Committee will make a report to the Board of Graduate Studies which includes the nature and outcome of any communications with the examiners and/or supervisor/s made under Regulation 13f. The Examination Committee report must recommend one of the following:

(a) to appoint one or more further examiners in accordance with Regulation 13h of these regulations to report on any areas of conflict

or
(b) to proceed to a second oral examination. In which case Regulation 9n of the Statute for the Degree of Doctor of Philosophy 2016 will apply

or

(c) to award the degree

or

(d) to award the degree after specified “minor corrections” have been made to the thesis to the satisfaction of the Examiner or nominee (who may be the Main Supervisor), by a specified date

or

(e) to refer the creative work and thesis to the appropriate authority within the University for consideration of the award of another degree

or

(f) not to award the degree.

If the Examination Committee recommends that a second oral examination be held, and the Board of Graduate Studies accepts this recommendation, the Graduate Centre will release the examiners’ evaluations of the revised thesis (Part 2 of the report) to the candidate no fewer than five working days before the oral examination.

p Final Decision

After considering all of the reports of the examiners and the Examination Committee, the Board of Graduate Studies will make the final decision as to the award of the degree.

q Copies for Deposit

(i) On successful completion of the examination, candidates will be required to deposit two archival records in a standard retrievable form of the examined creative work, and two hardbound copies of the thesis and one digital copy, corrected or revised as may be required, with the Graduate Centre. The degree will not be conferred until the candidate has complied with this requirement.

(ii) When two hardbound copies and a digital copy of the Doctor of Fine Arts thesis are deposited, these must be accompanied by a statutory declaration signed by the candidate stating that the hardbound copies and the digital copy are the same.

r (i) The digital thesis and recording of the examined creative work deposited shall be formatted as specified in the Guidelines for Formatting a Digital Thesis at the University of Auckland.

(ii) A recording of the examined creative work and a thesis which are deposited in digital form will be accessible through the University’s digital repository, unless embargoed under Regulation 25 of the Examination Regulations.

Variations

14 In exceptional circumstances the Board of Graduate Studies may approve a personal programme that does not conform to these regulations.

Appeals

15 Appeals regarding the examination process or decisions of the Board of Graduate Studies must be made according to Regulation 6 of the General Regulations for Named Doctorates.

Dispute Resolution Procedures

16 Disputes are to be resolved in accordance with Regulation 7 of the General Regulations for Named Doctorates.

Transitional Arrangements

17 a These regulations came into force on 1 January 2016. The 2006 regulations for the Degree of Doctor of Fine Arts were thereby repealed.

b For a candidate initially registered under earlier regulations for this degree the Board of Graduate Studies may agree to vary the application of the provisions of this statute to ensure consistency with the provisions of the regulations under which the candidate was enrolled where it is satisfied that the candidate would otherwise be at a disadvantage.

The Degree of Doctor of Music – DMus

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including Academic Statutes and Regulations.

Preamble

1 a A candidate for the degree of Doctor of Music is required to pursue an approved programme of advanced study and research as an enrolled student of the University.

b It is expected that this programme will normally be completed within four years of full-time candidature but in no fewer than three years of full-time candidature. Part-time candidature may also be permitted with the approval of the Board of Graduate Studies.
The Degree of Doctor of Music is awarded for the successful pursuit of a coherent programme of advanced composition that is supported by a written thesis and carried out over the period of registration for the Degree. Upon completion of the programme, candidates must submit a portfolio which, in the opinion of the examiners and the Board of Graduate Studies, satisfies both the following criteria:

(i) the consistent demonstration of compositional skills (the composition component) at the highest professional levels, meeting internationally recognised standards for such work

and

(ii) the provision of written material (the thesis) that demonstrates a knowledge of the artistic practices and literature relevant to the works contained in the composition component and an ability to articulate critical and analytical judgement relating to them.

d The thesis may not, without the prior permission of the Board of Graduate Studies, exceed 20,000 words in total.

e All research for this degree is to be conducted in accordance with the University of Auckland Guidelines for the Conduct of Research.

Eligibility

2 A candidate for the Degree of Doctor of Music is required to have:

a completed the requirements for the Degree of Master of Music at the University of Auckland with First Class Honours or Second Class Honours First Division, or completed the requirements for the award of a qualification that the Board of Graduate Studies considers to be equivalent to the Degree of Master of Music with First Class Honours or Second Class Honours (First Division) at the University of Auckland

and

b demonstrated, to the satisfaction of the Head of School of Music, in consultation with appropriate Postgraduate Committee, the level of training and ability that is necessary for the pursuit of a programme of advanced doctoral study in music composition and research.

Admission Essential

3 Every candidate for the Degree of Doctor of Music must have applied for admission and have been admitted to the University of Auckland.

Duration and Total Points Value

4 A candidate enrolled for this degree must complete the requirements for this degree, with a total value of 360 points, within not fewer than three full-time years and not more than four full-time years (or the part-time equivalent) from the date of registration, unless permitted to do otherwise by the Board of Graduate Studies under Regulation 8 of these regulations.

Registration

5 a Registration and all conditions pursuant to it shall be determined in accordance with Regulation 2 of the General Regulations for Named Doctorates.

b The following provisional goals are required of all candidates:

(i) full proposals for both the composition component and the thesis, including a provisional title, a schedule of research, an outline of compositions yet to be written and a statement of resources required to complete the research, to be approved by the appropriate postgraduate committee

(ii) substantial items of compositional and written material, such as a major section from a composed work and a literature review, completed to the satisfaction of the main supervisor

(iii) presentation by the student of the proposal and/or work in progress to an appropriate forum, eg seminar, research group, conference, to the satisfaction of the supervisors

(iv) ethics approval/s and/or permissions obtained for the research (if required)

(v) completion of the standard doctoral milestone goals relating to induction, English language and academic integrity as prescribed by the Board of Graduate Studies upon commencement of the registration

(vi) completion of a health and safety risk assessment and training for any laboratory/studio/field and related work activities

(vii) enrolment in and satisfactory passing of one or more courses as determined by the postgraduate committee.

c Further provisional goals may be added as per Regulation 2 of the General Regulations for Named Doctorates and as required after the commencement of registration as per Regulation 4a of the General Regulations for Named Doctorates.

Structure and Content

6 a A candidate for this degree must pass MUS 894 Composition.
b A candidate is to submit for examination a collection of original and substantial musical works of at least sixty minutes' duration (the composition component), consisting of at least three significant items, each of which may be within any of the following classes:
   (i) orchestral work
   (ii) work using vocal, keyboard or ensemble resources
   (iii) music theatre
   (iv) sonic arts.

c Sonic arts may be included in work within classes (i), (ii) or (iii) listed in Regulation 6b.

d A candidate is also to submit for examination a thesis which may address a single research topic or more than one related research topics or provide detailed analytical commentary on the compositions submitted, and which will be linked to the composition component in such a way that the candidate's creative and aesthetic ideals are clearly articulated.

Reviews of Registration
7 Reviews of registration will be made in accordance with Regulation 3 of the General Regulations for Named Doctorates.

Changes to the Conditions of Registration
8 Changes to supervision, extensions of time, and suspension or termination of registration will be made according to Regulation 4 of the General Regulations for Named Doctorates.

Enrolment and Fees
9 Enrolment and payment of fees will be determined according to Regulation 5 of the General Regulations for Named Doctorates.

Submission
10 a Copies of Portfolio
   All candidates are initially required to submit one copy of a portfolio in temporary binding and one electronic copy in pdf format to the Graduate Centre. The portfolio consists of the composition component and the thesis, which are to be supplemented by three copies of any accompanying audio or audiovisual files, or those involving other media. Copies should include the following statement to examiners on the first page: “This portfolio is for examination purposes only and is confidential to the examination process.”

b Time for Submission
   Unless permitted to do otherwise by the Board of Graduate Studies, a candidate must normally submit the portfolio in no fewer than three and no more than four years from the Date of Registration if they are full-time students, or no fewer than six and no more than eight years in the case of candidates who have been registered as part-time students for the whole period of their registration. In the case of candidates who have been permitted to change between full-time and part-time registration, the submission times will be calculated on a pro rata basis.

c Notification of Submission
   Three months prior to the expected date of submission, candidates should notify the Graduate Centre in writing of their intention to submit. If the candidate has reason to believe that any person would be unsuitable to serve as an examiner of the portfolio on the grounds of conflict of interest, he or she may also submit at this time the name of this person or persons and a statement in writing as to the nature of the conflict of interest to the Dean of Graduate Studies.

d Declaration as to Originality
   The portfolio is to be accompanied by a statutory declaration, signed by the candidate, stating:
   (i) that the portfolio is the candidate's own work
   (ii) that no part of the portfolio has been submitted or accepted for any other degree or diploma
   (iii) that written permission has been obtained for any third-party copyright material reproduced in the portfolio that represents a “substantial part” of the other work
   (iv) that the temporary-bound copy and electronic copy of the composition component and thesis are identical, and that the three copies of the accompanying files are identical.

e Language of Portfolio
   The portfolio is to be presented in English unless otherwise approved by the Board of Graduate Studies.

Examination
11 The examination process will follow that of Regulation 9 of the Statute for the Degree of Doctor of Philosophy 2016, except that Regulations 9f, 9g, 9l, 9o, 9r (iv-vii), 9s (iv-vii) and 9u of the Statute for the Degree of Doctor of Philosophy 2016 will not apply.
Nomination of Examiners

On notification of intention to submit under Regulation 10c, the Head of School of Music will, on the advice of the supervisor/s, nominate at least two suitably qualified persons to the Board of Graduate Studies for selection as examiners. The nominees should each hold a doctoral degree, or have equivalent expertise and experience, and be expert in the field of study represented by the portfolio. At least one nominee must be from outside New Zealand. The examiners may not be staff members of the University or have been involved in either the research for or the preparation of the portfolio. Examiners will be appointed in accordance with Regulation 9d of the Statute for the Degree of Doctor of Philosophy 2016.

Appointment of Examination Committee

The Board of Graduate Studies will also appoint an Examination Committee, which will normally be composed of:
(i) the Head of School of Music
and
(ii) an Associate Dean (Postgraduate), who will chair the Examination Committee
and
(iii) one other person (“the Head of Department Nominee”), nominated by the Head of School of Music. This person will have knowledge of the general field of the portfolio, but not necessarily of the portfolio’s techniques and topics, and will normally be a staff member of the University. No member of the Examination Committee may be a supervisor or have been involved in either the research for or the preparation of the portfolio. The Associate Dean will normally be from the same faculty as the candidate, but if that person is in the same department as the candidate then an Associate Dean from another faculty must be substituted.

Examiners’ Reports

Each examiner will be provided with electronic copies of the portfolio, together with accompanying audio or audiovisual files, or those involving other media, and, acting independently, is required to provide the Graduate Centre, within two months of receipt of the portfolio, with a written report in English on the quality of the work according to the criteria outlined at Regulation 1c. One copy of the portfolio will be provided to the Examination Committee.

d The examiners will include with their reports one of the following recommendations:
(i) to award the degree, subject to satisfactory performance at the oral examination;
   The portfolio can be passed without any further amendment or correction. Sometimes examiners may wish to include a list of suggested amendments for the candidate to use when publishing any of the material contained in the portfolio.

or

(ii) to award the degree after specified “minor corrections” have been made to the portfolio to the satisfaction of one of the examiners or a nominee (who may be the main supervisor) and by a specified date, and subject to satisfactory performance at the oral examination;
   This recommendation can be made when the composition component has reached the required standard but for minor problems such as those involving notation or performance logistics and/or when the thesis has reached the required standard but for minor problems such as inconsistency in terminology, problems connected with referencing or typographical errors. These changes can normally be made within a three-month period. When these corrections are made, the portfolio will meet the standard and then will be ready for permanent binding and placement in the Library.

or

(iii) to award the degree after specified revisions have been made to the portfolio to the satisfaction of the examiner or nominee (who will be the Head of School of Music), by a specified date, and subject to satisfactory performance at the oral examination;
   This recommendation is made when an examiner concludes that the revisions required are not minor, but are substantial, for example in the case of the composition component the need to reshape the structure of a piece, reconsider the use of performing media or achieve higher standards of presentation, or in the case of the thesis the need to analyse data further, rewrite chapters or sections, correct significant lapses in logic or coherence, or achieve higher standards of presentation. These changes can normally be made within a 3-6 month period.

or

(iv) to permit the candidate to revise the portfolio and resubmit it for examination on one further occasion only.
   This recommendation is made when an examiner concludes that the portfolio is not yet of doctoral standard. It may require in the case of the composition component a reconsideration of structure, a higher level of understanding of performing media or greater evidence of creative control, and/or in the case of the thesis further research, rewriting of specific sections, reconceptualisation or reorganisation in order to reach the required standard. The candidate will be permitted to resubmit, normally within a twelve-month period.
or (v) not to award the degree, but refer the portfolio to the appropriate authority within the University for consideration of the award of another degree. This recommendation is made when an examiner is of the opinion that the portfolio demonstrates substantial flaws incompatible with the requirements of a DMus.

or (vi) not to award any degree.

e Replacement of Examiners
If a report has not been received within two months, the Graduate Centre will send a reminder to the examiner and advise them that unless the report is received within two further months the appointment of the examiner will be terminated. If the report has not been received within two months of the date of the reminder, the Board of Graduate Studies may appoint a replacement examiner.

The Board of Graduate Studies reserves the right to appoint a replacement examiner in the event that an examiner provides an inappropriate report.

f Consideration of Examiners' Reports
The examiners' reports will be referred to the Examination Committee as in Regulation 9k of the Statute for the Degree of Doctor of Philosophy 2016. The Examination Committee, which will be provided with a copy of the portfolio and any accompanying audio or audiovisual material, will make a report to the Board of Graduate Studies which includes the nature and outcome of any communication with the examiner/s and/or supervisor/s made under Regulation 9k and which recommends one of the following:

(i) to appoint one or more further independent examiners to report on any areas of conflict

or (ii) to proceed to the oral examination

or (iii) to permit the candidate to revise the portfolio and resubmit it for examination on one further occasion only

or (iv) not to award the degree, but refer the portfolio to the appropriate authority within the University for consideration of the award of another degree

or (v) not to award any degree.

g Further Examiners
In the event that the examiners' reports are in serious conflict the Board of Graduate Studies may appoint independent external examiners, as specified in Regulation 9m of the Statute for the Degree of Doctor of Philosophy 2016, to report on any matters it may specify. Such examiners will be provided with copies of the portfolio.

h Oral Examination
In the event that the Board of Graduate Studies accepts a recommendation to proceed to an oral examination, Regulation 9n of the Statute for the Degree of Doctor of Philosophy 2016 will apply.

i Recommendation of the Oral Examination
On completion of the oral examination, the Chair will provide a written report and recommendation, endorsed by the Head of Department Nominee and the Oral Examiner, to the Board of Graduate Studies. The report will include one of the following recommendations:

either (i) to award the degree

or (ii) to award the degree after specified “minor corrections” (see Regulation 11d(ii)) have been made to the portfolio, to the satisfaction of the Oral Examiner or nominee (who may be the main supervisor), and by a specified date

or (iii) (a) to award the degree subject to revising part or parts of the portfolio, to the satisfaction of the Oral Examiner or nominee (who will be the Head of School of Music), by a specified date. When the Head of School of Music acts as the Oral Examiner’s nominee, the nature of the revisions must be such that he or she can certify that compliance has been achieved. In such cases, the Head of School of Music may discuss the revisions with the Head of Department Nominee on the Examination Committee and/or the main supervisor. If the Head of School of Music is unable to assess whether the revisions have been made to the required standard, the revisions to the portfolio must be assessed by the Oral Examiner

(b) to award the degree subject to revising part or parts of the portfolio to the satisfaction of the Examiner or Examiners by a specified date

or
(iv) to permit the candidate to revise the portfolio, and resubmit it for examination on one further occasion only, but only if the candidate has not already been permitted to revise and resubmit under Regulation 11i(iii)

or

(v) not to award the degree, but refer the portfolio to the appropriate authority within the University for consideration of the award of another degree

or

(vi) not to award the degree.

In the case of recommendations 11i(iii) and 11i(iv), the report must also state clearly the nature of the revisions recommended.

j When minor corrections are required, Regulation 9p of the Statute for the Degree of Doctor of Philosophy 2016 applies. When revisions are required, Regulation 9q of the Statute for the Degree of Doctor of Philosophy 2016 applies.

k Revision and Resubmission

In the event that the Examination Committee recommends to the Board of Graduate Studies that the candidate should be permitted to revise the portfolio prior to an oral examination, the Examination Committee will recommend

(i) a timeframe for the resubmission

The date of resubmission of the portfolio may not be fewer than six months or more than twelve months from the date the examiners’ reports were forwarded to the Examination Committee by the Graduate Centre. If the Board of Graduate Studies accepts the recommendation, Regulations 9r(i to iii) of the Statutes for the Degree of Doctor of Philosophy Statute 2016 apply

and

(ii) the candidate is required to enrol and pay the prescribed tuition and research fees from the month in which the decision was made to the month in which the portfolio is to be resubmitted. The registration of the candidate is to continue under the conditions applying at the first date of submission

(iii) if the portfolio is not resubmitted by the prescribed date, the registration of the candidate will normally be terminated

(iv) upon resubmission, the portfolio is to be examined by the same examiners in accordance with the provisions of this Regulation, excepting that a further resubmission may not be recommended. If one or both of the original examiners is unavailable to re-examine the portfolio, the Board of Graduate Studies will appoint alternative examiner/s.

(v) upon receipt of both of the examiners’ reports, the Graduate Centre will provide copies of the new examiners’ reports and the original examiners’ reports to the Examination Committee and to the supervisor/s on a confidential basis. The procedure followed by the Examination Committee will be that in Regulation 11f. Following consideration of all examiners’ reports, the Examination Committee will make a report to the Board of Graduate Studies which includes the nature and outcome of any communications with the examiners and/or supervisor/s made under Regulation 11f. If the Examination Committee recommends that an oral examination be held, and the Board of Graduate Studies accepts this recommendation, the Graduate Centre will release the examiners’ reports to the candidate no fewer than five working days before the oral examination. The procedure for the oral examination will be that in Regulations 11h and 11i of these regulations. If the Examination Committee recommends that an oral examination should not be held, its report will include one of the following recommendations:

(a) not to award the degree, but refer the portfolio to the appropriate authority within the University for consideration of the award of another degree

or

(b) not to award the degree.

l In the event that the Board of Graduate Studies requires the candidate to revise the portfolio after an oral examination, the Oral Examination Committee will recommend a timeframe for the resubmission. The date of resubmission may not be fewer than six months or more than twelve months from the date of the oral examination. In such cases, Regulation 9s(i-iii) of the Statute for the Degree for the Doctor of Philosophy 2016 and the following provisions apply:

(i) the candidate is required to enrol and pay the prescribed tuition and research fees from the month in which the decision was made to the month in which the portfolio is to be resubmitted. The registration of the candidate is to continue under the conditions applying at the first date of submission

(ii) if the portfolio is not resubmitted by the prescribed date, the registration of the candidate will normally be terminated

(iii) upon resubmission, the portfolio is to be examined by the same examiners in accordance with the provisions of this Clause, excepting that a further resubmission may not be recommended. If one or both of the original examiners is unavailable, the Board of Graduate Studies will appoint alternative examiner/s.

(iv) upon receipt of both of the examiners’ reports, the Graduate Centre will provide copies of the new
examiners’ reports, the original examiners’ reports and the oral examination report to the Examination Committee and to the supervisor/s on a confidential basis.

The procedure followed by the Examination Committee will be that in Regulation 11f. Following consideration of all examiners’ reports the Examination Committee will make a report to the Board of Graduate Studies which includes the nature and outcome of any communications with the examiners and/or supervisor/s made under Regulation 11f. The Examination Committee report must recommend one of the following:
(a) to proceed to a second oral examination (in which case Regulations 11h and i of these regulations apply)

or
(b) to award the degree

or
(c) to award the degree after specified “minor corrections” (see Regulation 11d(ii)) have been made to the portfolio to the satisfaction of the Examiner or nominee (who may be the main supervisor), by a specified date

or
(d) not to award the degree, but refer the portfolio to the appropriate authority within the University for consideration of the award of another degree

or
(e) not to award the degree.

If the Examination Committee recommends that a second oral examination be held, and the Board of Graduate Studies accepts this recommendation, the Graduate Centre will release the examiners’ evaluations of the work (Part 2 of the report) to the candidate no fewer than five working days before the oral examination.

m Final Decision
After considering all of the reports of the examiners and Examination Committees, the Board of Graduate Studies will make the final decision as to the award of the degree.

n Copies for Deposit
On completion of the examination the candidate must deposit two hardbound copies of the portfolio, corrected or revised as may be required, and of any accompanying audio or audiovisual material, with the Graduate Centre. These must be accompanied by a statutory declaration signed by the candidate stating that the hardbound copies and the digital copy are the same. The degree will not be conferred until the candidate has complied with this requirement.

Variations
12 In exceptional circumstances the Board of Graduate Studies may approve a personal programme which does not conform to these regulations.

Appeals
13 Appeals regarding the examination process or decisions of the Board of Graduate Studies must be made according to Regulation 6 of the General Regulations for Named Doctorates.

Dispute Resolution Procedures
14 Disputes are to be resolved in accordance with Regulation 7 of the General Regulations for Named Doctorates.

Transitional Arrangements
15 a These regulations came into force on 1 January 2016. The 2006 regulations for the Degree of Doctor of Music were thereby repealed.

b For a candidate initially registered under earlier regulations for this degree the Board of Graduate Studies may agree to vary the provisions of these regulations to ensure consistency with the provisions of the regulations under which the candidate was enrolled.

The Degree of Doctor of Musical Arts – DMA

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Preamble
1 a A candidate for the degree of Doctor of Musical Arts is required to pursue an approved programme of advanced study and research as an enrolled student of the University.

b It is expected that this programme will normally be completed in no fewer than 33 months and no more than 36 months of full-time candidature. Part-time candidature may also be permitted with the approval of the Board of Graduate Studies.
The Degree of Doctor of Musical Arts is awarded for the successful completion of a coherent programme of advanced performance work that is firmly supported by a written thesis and carried out over the period of registration for the Degree, which in the opinion of the examiners and the Board of Graduate Studies satisfies both the following criteria:

(i) the consistent exhibition of performance skills at the highest professional levels, meeting internationally recognised standards for such work

and

(ii) the provision of written material (the thesis) that makes an original contribution to the field of knowledge relating to music performance, and shows an ability to articulate critical judgement and performance theory, while demonstrating a knowledge of the literature relevant to the history and performing practice of the music contained in the candidate’s examinable programmes.

The thesis may not, without the prior permission of the Board of Graduate Studies, exceed 35,000 words in total.

d All research for this degree is to be conducted in accordance with the University of Auckland Guidelines for the Conduct of Research.

Eligibility

2 A candidate for the Degree of Doctor of Musical Arts is required to have:

a completed the requirements for the Degree of Master of Music at the University of Auckland with First Class Honours or Second Class Honours First Division, or completed the requirements for the award of a qualification that the Board of Graduate Studies considers to be equivalent to the Degree of Master of Music with First Class Honours or Second Class Honours (First Division) at the University of Auckland

and

b demonstrated, to the satisfaction of the Head of School of Music, in consultation with the School of Music Postgraduate Committee, the level of training and ability that is necessary for the pursuit of a programme of advanced doctoral study in music performance and research.

Admission Essential

3 Every candidate for the Degree of Doctor of Musical Arts must have applied for admission and have been admitted to the University of Auckland.

Duration and Total Points Value

4 A candidate enrolled for this degree must normally follow a programme of 36 full-time months (or the part-time equivalent) and pass an approved three-part programme of advanced study in music performance and research with a total value of 360 points.

Registration

5 a Registration and all conditions pursuant to it shall be determined in accordance with Regulation 2 of the General Regulations for Named Doctorates.

b The following provisional goals are required of all candidates:

(i) full proposals for both the thesis and future recitals, including a provisional title, a schedule of research, an outline of repertoire and a statement of resources required to complete the research, to be approved by the appropriate postgraduate committee

(ii) a substantial piece of written work, such as a literature review, completed to the satisfaction of the main supervisor

(iii) presentation of a minimum of one and maximum of two recitals

(iv) presentation by the student of the proposal and/or work in progress to an appropriate forum, eg seminar, research group, conference, to the satisfaction of the supervisors

(v) ethics approval/s and/or permissions obtained for the research (if required)

(vi) completion of the standard doctoral milestone goals relating to induction, English language and academic integrity as prescribed by the Board of Graduate Studies upon commencement of the registration

(vii) completion of a health and safety risk assessment and training for any laboratory/studio/field and related work activities

(viii) enrolment in and satisfactory passing of one or more courses as determined by the postgraduate committee.

c Further provisional goals may be added as per Regulation 2 of the General Regulations for Named Doctorates and as required after the commencement of registration as per Regulation 4a of the General Regulations for Named Doctorates.

Reviews of Registration

6 a Reviews of progress and continuation of registration will be made according to Regulation 3 of the General Regulations for Named Doctorates.
During provisional registration, a candidate must achieve the provisional goals specified by the Board of Graduate Studies, and successfully complete the requirements for Part I of the degree as specified in Regulation 9 of these regulations.

Annual reviews of progress and continuation of registration beyond the period of provisional registration will be made in accordance with Regulation 3d of the General Regulations for Named Doctorates and in relation to Regulation 9 of these regulations below as well as progress on the thesis.

Changes to the Conditions of Registration

Changes to supervision, extensions of time, and suspension or termination of registration will be made according to Regulation 4 of the General Regulations for Named Doctorates.

Enrolment and Fees

Enrolment and payment of fees will be determined according to Regulation 5 of the General Regulations for Named Doctorates.

Structure and Content

During the period of Registration a candidate will undertake a three-part programme of academic and practical research in performance, repertoire and pedagogy relating to the candidate's instrument or performance medium, and present a total of five public recitals each of approximately 90 minutes' duration, including, in Part III, the Final Recital.

The candidate's recitals must provide a balanced programme comprising solo and ensemble repertoire which must include music of historical significance, recognised virtuoso pieces and works of a demanding contemporary nature. For each recital the candidate must provide substantial programme notes of a professional standard. In every case except for the Final Recital, the candidate's proposed programme and programme notes are to be approved by the performance supervisor and the Head of School of Music at least three months before the recital date. The proposed programme for the Final Recital must be included in the candidate's Annual Report at the end of Part II. The proposed Final Recital programme may be changed with the approval of the performance supervisor and the Head of School of Music at least six months before the recital date.

Part I

During Part I of the degree the candidate will:

(i) present a minimum of one and a maximum of two recitals, as prescribed in Regulations 9a, b and f

and

(ii) provide full proposals and a substantial example of written work

and

(iii) give a seminar on the thesis research, in consultation with the appropriate supervisor or supervisors.

Part II

During Part II of the degree the candidate will continue to undertake supervised research in performance, and on the approved thesis topic. To complete Part II, the candidate must present:

(i) a minimum of two and a maximum of three recitals, so that a total of four recitals has been presented for Parts I and II together

and

(ii) a seminar on the thesis research, in consultation with the appropriate supervisor or supervisors.

Part III

During Part III of the degree the candidate will complete and submit the thesis, and will present a further seminar and a Final Recital, with a programme that is linked to the thesis topic in such a way that the candidate's theoretical and aesthetic ideals are clearly articulated through both the musical performance and the written submission.

Recitals

All recitals except the Final Recital will be assessed by panels appointed by the Head of School of Music, to whom a report on each recital should be sent. The panels will consist of an internal examiner, an external examiner of international expertise and distinction and the Head of School of Music or nominee, who will act as moderator. Each of the first four recitals must be judged satisfactory in order for the student to progress to the next.

Recitals judged unsatisfactory will be treated as follows:

(i) the recital should normally be retaken within two months. If circumstances do not allow this, an application may be made to the Head of School of Music for a further month in which to present the recital

(ii) the original programme must normally be offered again in its entirety. Any alteration of the programme must be approved, in advance, by the Head of School of Music
Recitals may only be retaken once; if a retaken recital is judged to be unsatisfactory, the Head of School of Music will recommend to the Board of Graduate Studies that registration in the degree be terminated.

Submission

10 a Copies of Thesis
All candidates are initially required to submit to the Graduate Centre one copy of the thesis in temporary binding and one electronic copy in pdf format. Copies should include the following statement to examiners on the first page:
“This thesis is for examination purposes only and is confidential to the examination process”.

b Time for Submission
Unless permitted to do otherwise by the Board of Graduate Studies, a candidate must normally submit the thesis and undertake the final recital in no fewer than 33 months and no more than 36 months from the Date of Registration if they are full-time students, or no fewer than 66 months and no more than 72 months in the case of candidates who have been registered as part-time students for the whole period of their registration. In the case of candidates who have been permitted to change between full-time and part-time registration, the submission times will be calculated on a pro rata basis.

c Notification of Submission
Three months prior to the date of the Final Recital, which should normally be undertaken on or before the maximum submission date, a candidate must notify the Graduate Centre in writing of their intention to submit the thesis, which must be received one month before the date of the Final Recital or maximum submission date, whichever is sooner. This notice of submission must be approved by the Head of School of Music and must include details of the programme of the Final Recital, as approved by the Head of School of Music, in accordance with Regulation 9b. If a candidate has reason to believe that any person would be unsuitable to serve as an examiner on the grounds of conflict of interest, he or she may also submit to the Graduate Centre at this time the name of this person or persons and a statement in writing as to the nature of the conflict of interest. This notice of submission must be approved by the Head of School of Music.

d Declaration as to Originality
One month prior to the date of the Final Recital, the candidate must submit to the Graduate Centre one copy of the thesis in temporary binding and one electronic copy in pdf format accompanied by a statutory declaration, signed by the candidate, stating:
(i) that the thesis is the candidate’s own work
(ii) that no part of the thesis has been submitted or accepted for any other degree or diploma
(iii) that the temporary-bound copy and electronic copy are identical.

e Language of Thesis
The thesis is to be presented in English unless otherwise approved by the Board of Graduate Studies at the time of first registration of the candidate.

Examination

11 The examination process will follow that of Regulation 9 of the Statute for the Degree of Doctor of Philosophy 2016, except that Regulations 9c, 9e, 9f, 9g, 9i, 9l, 9o, 9r (iv-vii), 9s (iv-vii) and 9u of the Statute for the Degree of Doctor of Philosophy 2016 will not apply.

a Nomination and Appointment of Examiners
Upon request to approve a notice of submission as per Regulation 10c of these regulations, the Head of School of Music will, on the advice of the supervisor(s), nominate at least two suitably qualified persons to the Board of Graduate Studies for selection as examiners. The nominees should each hold a doctoral degree, or have equivalent expertise and experience, and be expert in the field of study which is the subject of the thesis and creative work. At least one nominee must be from outside New Zealand. The examiners may not be staff members of the University of Auckland or have been involved in either the research for or the preparation of the thesis and recital, and will not therefore have been involved in assessment of any of the first four recitals. Examiners will be appointed in accordance with Regulation 9d of the Statute for the Degree of Doctor of Philosophy 2016. Both examiners must be able to attend the Final Recital in person and one examiner must be able to attend the Oral Examination in person.

b Appointment of Examination Committee
The Board of Graduate Studies will also appoint an Examination Committee, which will normally be composed of:
(i) the Head of School of Music
and
(ii) an Associate Dean (Postgraduate), who will chair the Examination Committee
and
(iii) one other person (“the Head of Department Nominee”), nominated by the Head of School of Music. This person will have knowledge of the general field of the thesis, but not necessarily of the thesis topic, and will normally be a staff member of the University. No member of the Examination Committee may be a supervisor or have been involved in either the thesis research or the preparation of the thesis or recital. The Associate Dean will normally be from the same faculty as the candidate, but if that person is in the same department as the candidate then an Associate Dean from another faculty must be substituted.

c Examination Process
The final examination will take the thesis and the Final Recital into joint consideration.

d The Final Recital is to be attended by both the examiners and the Head of Department Nominee, and must be recorded in both sound and vision.

e Each examiner will be provided with a copy of the thesis, which is to be examined independently. Within one month after the date of the Final Recital, examiners are required to provide the Board of Graduate Studies with a report on both the thesis and the Final Recital according to the criteria given in Regulation 1c. The examiners will include with their reports one of the following recommendations. The examiners may also combine a recommendation of Regulation 11e(v) of these regulations with the recommendation of (ii), (iii) or (iv).

(i) to award the degree, subject to satisfactory performance at the oral examination;

or

(ii) to award the degree after specified “minor corrections” have been made to the thesis to the satisfaction of one of the examiners or a nominee (who may be the main supervisor) and by a specified date, and subject to satisfactory performance at the oral examination (and in the Final Recital if recommendation (v) is also selected).

This recommendation can be made when the thesis has reached the required standard but for minor problems such as inconsistency in terminology, problems connected with referencing or typographical errors. These changes can normally be made within a three-month period. When these corrections are made, the thesis will meet the standard and then will be ready for permanent binding and placement in the Library.

or

(iii) to award the degree after specified revisions have been made to the thesis to the satisfaction of the examiner or nominee (who will be the Head of School of Music), by a specified date, and subject to satisfactory performance at the oral examination (and in the Final Recital if recommendation (v) is also selected).

This recommendation is made when an examiner concludes that the revisions required are not minor, but are substantial, for example the need to analyse data further, rewrite chapters, correct significant lapses in logic or coherence, or achieve higher standards of presentation. These changes can normally be made within a 3-6-month period.

or

(iv) to permit the candidate to revise the thesis and resubmit it for examination on one further occasion only. This recommendation is made when an examiner concludes that the thesis is not yet of doctoral standard. It will require either further research, rewriting of specific sections, reconceptualisation, and/or reorganisation in order to reach the required standard. The candidate will be permitted to resubmit, normally within a twelve-month period.

and/or

(v) to permit the candidate to repeat the Final Recital on one further occasion only. This recommendation is made when an examiner concludes that Final Recital was not yet of doctoral standard. It may require a higher level of professional competence, interpretive reconceptualisation or a greater degree of musical artistry. The candidate will be permitted to offer the Final Recital again, normally within a 12-month period.

or

(vi) not to award the degree, but refer the thesis and performance (the Final Recital) to the appropriate authority within the University for consideration of the award of another degree. This recommendation is made when an examiner is of the opinion that the thesis and performance demonstrated substantial flaws incompatible with the requirements of a DMA.

or

(vii) not to award any degree.

f Replacement of Examiners
(i) If a report has not been received within one month, the Graduate Centre will send a reminder to the
examiner and advise them that unless the report is received within a further month the appointment of the examiner will be terminated. If the report has not been received within one month of the date of the reminder, the Board of Graduate Studies may appoint a replacement examiner.

(ii) The Board of Graduate Studies reserves the right to appoint a replacement examiner in the event that an examiner provides an inappropriate report.

Any replacement examiner will be provided with a digital recording of the Final Recital, as well as with a copy of the thesis.

g Consideration of Examiners’ Reports
The examiners’ reports will be referred to the Examination Committee as in Regulation 9k of the Statute for the Degree of Doctor of Philosophy 2016. The Examination Committee, which will be provided with both a copy of the thesis and a DVD recording of the Final Recital, will make a report to the Board of Graduate Studies which includes the nature and outcome of any communication with the examiner/s and/or supervisor/s made under Regulation 9k and which recommends one of the following:

(i) to appoint one or more further independent examiners to report on any areas of conflict
or
(ii) to proceed to the oral examination
or
(iii) to permit the candidate to revise the thesis and resubmit it for examination on one further occasion only
or
(iv) to permit the candidate to revise the thesis and resubmit it for examination on one further occasion only and retake the Final Recital on one further occasion only
or
(v) not to award the degree, but refer the thesis and performance (the Final Recital) to the appropriate authority within the University for consideration of the award of another degree
or
(vi) not to award any degree

h Further Examiners
In the event that the examiners’ reports are in serious conflict the Board of Graduate Studies may appoint independent external examiners, as in Regulation 9m of the Statute for the Degree of Doctor of Philosophy 2016, to report on any matters it may specify. Such examiners will be provided with a copy of the recording of the Final Recital and the thesis.

i Oral Examination
In the event that the Board of Graduate Studies accepts a recommendation to proceed to an oral examination, Regulation 9n of the Statute for the Degree of Doctor of Philosophy 2016 will apply.

j Recommendation of the Oral Examination
On completion of the oral examination, the Chair will provide a written report and recommendation, endorsed by the Head of Department Nominee and the Oral Examiner, to the Board of Graduate Studies. The report will include one of the following recommendations. The Examiners may also combine recommendation Regulation 11j(v) of these regulations with the recommendation of (ii), (iii) or (iv):

either

(i) to award the degree
or
(ii) to award the degree after specified “minor corrections” (see Regulation 11e(iii)) have been made to the thesis, to the satisfaction of the Oral Examiner or nominee (who may be the Main Supervisor), and by a specified date, and subject to satisfactory performance in the Final Recital where recommendation (v) is also selected
or
(iii) (a) to award the degree subject to revising part or parts of the thesis, to the satisfaction of the Oral Examiner or nominee (who will be the Head of School of Music), by a specified date, and subject to satisfactory performance in the Final Recital where recommendation (v) is also selected. When the Head of School of Music acts as the Oral Examiner’s nominee, the nature of the revisions must be such that he or she can certify that compliance has been achieved. In such cases, the Head of School of Music may discuss the revisions with the Head of Department Nominee on the Examination Committee and/or the Main Supervisor. If the Head of School of Music is unable to assess whether the revisions have been made to the required standard, the revisions to the thesis must be assessed by the Oral Examiner
or
(b) to award the degree subject to revising part or parts of the thesis to the satisfaction of the Examiner or Examiners by a specified date
or
(iv) to permit the candidate to revise the thesis, and resubmit it for examination on one further occasion
only, but only if the candidate has not already been permitted to revise and resubmit under Regulation 11g(iii) or (iv)

and/or

(v) to permit the candidate to repeat the Final Recital on one further occasion only, but only if the candidate has not already been permitted to retake the Final Recital under Regulation 11g(iv)

or

(vi) not to award the degree, but refer the thesis and Final Recital to the appropriate authority within the University for consideration of the award of another degree

or

(vii) not to award the degree.

In the case of recommendations 11j(iii) and 11j(iv), the report must also state clearly the nature of the revisions recommended.

k When minor corrections are required, Regulation 9p of the Statute for the Degree of Doctor of Philosophy 2016 applies. When revisions are required, Regulation 9q of the Statute for the Degree of Doctor of Philosophy 2016 applies.

l Revision and Resubmission of the Thesis/Repetition of the Final Recital

(i) In the event that the Examination Committee recommends to the Board of Graduate Studies that the candidate should be permitted to revise the thesis, or revise the thesis and retake the Final Recital, prior to an oral examination, the Examination Committee will recommend:

(a) a timeframe for the resubmission of the thesis

(b) a timeframe for the retaking of the Final Recital, if required.

(ii) The date of resubmission of the thesis or retaking of the Final Recital may not be fewer than six months or more than twelve months from the date the examiners’ reports were forwarded to the Examination Committee by the Graduate Centre. If the Board of Graduate Studies accepts the recommendation, Regulations 9r(i to iii) of the Degree of Doctor of Philosophy Statute 2016 apply and

(iii) the candidate is required to enrol and pay the prescribed tuition and research fees from the month in which the decision was made to the month in which the thesis is to be resubmitted and/or the Final Recital retaken. The registration of the candidate is to continue under the conditions applying at the first date of submission

(iv) if the thesis is not resubmitted or the Final Recital is not repeated by the prescribed date, the registration of the candidate will normally be terminated

(v) upon resubmission of the thesis, or resubmission of the thesis and retaking of the Final Recital, the thesis, and Final Recital if retaken, are to be examined by the same examiners in accordance with the provisions of this Regulation, excepting that a further resubmission or recital may not be recommended. If one or both of the original examiners is unavailable to re-examine the thesis or to attend the repeated Final Recital, the Board of Graduate Studies will appoint alternative examiner/s. In cases where a repeated Final Recital has not been required by the Board of Graduate Studies, examiners will be provided with a copy of the recording of the original.

(vi) upon receipt of both of the examiners’ reports, the Graduate Centre will provide copies of the new examiners’ reports and the original examiners’ reports to the Examination Committee and to the supervisor/s on a confidential basis. The procedure followed by the Examination Committee will be that in Regulation 11g. Following consideration of all examiners’ reports, the Examination Committee will make a report to the Board of Graduate Studies which includes the nature and outcome of any communications with the examiners and/or supervisor/s made under Regulation 11g. The Examination Committee may recommend the appointment of one or more further independent examiners to report on any areas of conflict, and the Board of Graduate Studies may appoint a further examiner where there is serious conflict between examiners’ reports. Further examiners must be provided with a copy of the thesis and a recording of the Final Recital. If the Examination Committee recommends that an oral examination be held, and the Board of Graduate Studies accepts this recommendation, the Graduate Centre will release the examiners’ reports to the candidate no fewer than five working days before the oral examination. The procedure for the oral examination will be that in Regulations 11i and 11j of these regulations. If the Examination Committee recommends that an oral examination should not be held, its report will include one of the following recommendations:

(a) not to award the degree, but refer the thesis and Final Recital to the appropriate authority within the University for consideration of the award of another degree

or

(b) not to award the degree.

m In the event that the Board of Graduate Studies requires the candidate to revise the thesis and/or repeat the Final Recital after an oral examination, the Oral Examination Committee will recommend a timeframe for the
resubmission. The date of resubmission may not be fewer than six months or more than twelve months from the date of the oral examination. In such cases, Regulation 9s(i-iii) of the Statute of the Degree for the Doctor of Philosophy 2016 and the following provisions apply:

(i) the candidate is required to enrol and pay the prescribed tuition and research fees from the month in which the decision was made to the month in which the thesis is to be resubmitted and/or the Final Recital retaken. The registration of the candidate is to continue under the conditions applying at the first date of submission

(ii) if the thesis is not resubmitted or the Final Recital is not repeated by the prescribed date, the registration of the candidate will normally be terminated

(iii) upon resubmission, the thesis and/or Final Recital are to be examined by the same examiners in accordance with the provisions of this Regulation, excepting that a further resubmission or recital may not be recommended. If one or both of the original examiners is unavailable to re-examine the thesis or to attend the repeated Final Recital, the Board of Graduate Studies will appoint alternative examiner/s. In cases where a repeated Final Recital has not been required by the Board of Graduate Studies, examiners will be provided with a copy of the recording of the original.

(iv) upon receipt of both of the examiners’ reports, the Graduate Centre will provide copies of the new examiners’ reports, the original examiners’ reports and the oral examination report to the Examination Committee and to the supervisor/s on a confidential basis.

The procedure followed by the Examination Committee will be that in Regulation 11g. Following consideration of all examiners’ reports the Examination Committee will make a report to the Board of Graduate Studies which includes the nature and outcome of any communications with the examiners and/or supervisor/s made under Regulation 11g. The Examination Committee report must recommend one of the following:

(a) to appoint one or more further examiners to report on any areas of conflict. Where the Board of Graduate Studies appoints a further examiner, they shall be provided with a copy of the thesis and a recording of the Final Recital as appropriate.

or

(b) to proceed to a second oral examination in cases where the thesis was revised and resubmitted (in which case Regulations 11i and 11j of these regulations apply)

or

(c) to award the degree

or

(d) to award the degree after specified minor corrections (see Regulation 11e(ii)) have been made to the thesis to the satisfaction of the Examiner or nominee (who may be the Main Supervisor), by a specified date

or

(e) not to award the degree, but refer the thesis and Final Recital to the appropriate authority within the University for consideration of the award of another degree

or

(f) not to award the degree.

If the Examination Committee recommends that a second oral examination be held, and the Board of Graduate Studies accepts this recommendation, the Graduate Centre will release the examiners’ evaluations of the work (Part 2 of the report) to the candidate no fewer than five working days before the oral examination.

n Final Decision
After considering all of the reports of the examiners and Examination Committees, the Board of Graduate Studies will make the final decision as to the award of the degree.

o Copies for Deposit
On completion of the examination the candidate must deposit two hardbound copies of the thesis and one digital copy, corrected or revised as may be required, and the audio and video recordings of the Final Recital with the Graduate Centre. These must be accompanied by a statutory declaration signed by the candidate stating that the hardbound copies and the digital copy are the same. The degree will not be conferred until this requirement has been complied with.

Variations
12 In exceptional circumstances the Board of Graduate Studies may approve a personal programme which does not conform to these regulations.

Appeals
13 Appeals regarding the examination process or decisions of the Board of Graduate Studies must be made according to Regulation 6 of the General Regulations for Named Doctorates.
Dispute Resolution Procedures
14 Disputes are to be resolved in accordance with Regulation 7 of the General Regulations for Named Doctorates.

Transitional Arrangements
15 a These regulations came into force on 1 January 2016. The 2006 regulations for the Degree of Doctor of Musical Arts were thereby repealed.

b For a candidate initially registered under earlier regulations for this degree the Board of Graduate Studies may agree to vary the provisions of these regulations to ensure consistency with the provisions of the regulations under which the candidate was enrolled.

Graduate Diploma in Architectural Studies – GradDipAS

The regulations for this graduate diploma are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

In order to satisfy the requirements of this degree, students are required to be in various teaching environments which will bring them into contact with children and young persons. Only persons able to meet the criteria for provisional registration of the Education Council of Aotearoa New Zealand will be permitted to enrol in this degree.

Admission

1 To be admitted to this programme a student must:
   either
   a (i) meet University entry criteria
   and
   (ii) have demonstrated the potential to meet the Education Council of Aotearoa New Zealand criteria for provisional registration. Personal references and an interview will normally be required.
   or
   b (i) have completed a New Zealand Diploma in Teaching or Trained Teacher’s Certificate (or New Zealand Qualifications Authority and Education Council of Aotearoa New Zealand recognised equivalent)
   and
   (ii) be currently registered as a teacher in New Zealand
   and
   (iii) have been a practising teacher or teacher educator in New Zealand for at least two of the last five years.

2 Students holding a qualification gained at an overseas institution may be required to provide evidence of language proficiency prior to admission into this programme.

Note: The applicant will be required to consent to disclosure of criminal convictions as part of the application process consistent with the requirements for provisional registration of the Education Council of Aotearoa New Zealand.

3 Admission to this programme is at the discretion of Senate or its representative.

Duration and Total Points Value

4 A student enrolled for this degree must follow a programme of the equivalent of six full-time semesters and pass courses with a total value of 360 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

5 A student entering this degree under Regulation 1b may apply for up to 240 points credit.

Structure and Content

6 Of the 360 points required for this degree, a student must pass:
   a at least 345 points from one of the specialisations listed in the Bachelor of Education (Teaching) Schedule
   and
   b 15 points from courses offered in either the General Education Open Schedule or the General Education Faculty Schedule approved for this degree, and the Academic Integrity course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

7 A student who is required to meet the Academic English Language Requirement, as specified in the Enrolment and Programme Regulations, Academic English Language Requirement, of the University Calendar, must complete ENGLISH 121G to fulfill their General Education requirement, or with approval from Senate or its representative, may substitute an alternative Academic English Language Requirement course for 15 points of General Education.

8 Students who are admitted under Regulation 1b, and have applied for and been awarded 240 points credit, must pass at least 120 points as listed in the Teachers’ specialisation listed in the Bachelor of Education (Teaching) Schedule.

English Language Requirements

9 A student enrolled for this degree must demonstrate competence in the English language, by passing EDUCSW 199, as prescribed by the Faculty of Education and Social Work, before enrolment in EDPRAC 305.

General Education Exemptions

10 a A student is exempted from the requirement to pass courses offered in the General Education Schedules who has:
   either
completed an undergraduate degree at a tertiary institution or
(ii) commenced study for this degree at a tertiary institution before 1 January 2006 or
(iii) been admitted to this degree having completed 120 points or more of degree-level study at another
tertiary institution.

b A student who has been exempted from the requirement to pass courses offered in the General Education
Schedules must substitute 15 points from courses approved by the Dean of Faculty of Education and Social
Work.

c A student who has been fully or partially exempted from the requirement to pass courses offered in the
General Education Schedules is nonetheless required to complete the Academic Integrity course.

Practical Requirements
11 a In any course that has a practicum and non-practicum component, a student must pass both the practicum
and the non-practicum component in order to have passed that course as a whole.

b Re-enrolment in any EDPRAC course after failing that course requires the permission of the Dean of Faculty of
Education and Social Work or nominee.

c At the discretion of Senate or its representative, a student who does not pass an EDPRAC course may be
denied permission to re-enrol for this degree.

Professional Requirements
12 a In order to complete the requirements for this degree, a student must be able to meet the criteria for
provisional registration of the Education Council of Aotearoa New Zealand.

b A student who ceases to be able to meet the criteria for provisional registration of the Education Council of
Aotearoa New Zealand must immediately notify the Dean of Faculty.

c If the Dean of Faculty has reason to believe that a student does not meet the criteria for provisional registration
of the Education Council of Aotearoa New Zealand the Dean shall advise the student and take into account any
written response from the student.

d If the Dean of Faculty is satisfied that the student is not able to meet the criteria for provisional registration of
the Education Council of Aotearoa New Zealand the Dean shall notify Senate or its representative.

e On receipt of such advice, Senate or its representative may terminate the student’s enrolment and any
application to re-enrol may likewise be declined.

f A student whose enrolment is terminated under Regulation 10e may appeal from that decision to the Council
or its duly appointed delegate.

Termination of Enrolment
13 a If the behaviour of a student in a teaching environment is found, after due and fair inquiry, to be offensive,
disruptive or likely to give rise to a risk of harm to the welfare of any person, the enrolment of the student in
the programme may be terminated by Senate or its representative and any application to re-enrol may likewise
be declined.

b A student who is subject to any such inquiry may be suspended by Senate or its representative from lectures,
classes and any teaching placement pending the outcome of the inquiry.

c A student whose enrolment is terminated under Regulation 13a may appeal from that decision to the Council
or its duly appointed delegate.

Variations
14 In exceptional circumstances Senate or its representative may approve a personal programme which does not
conform to these regulations.

Commencement
15 These regulations came into force on 1 January 2006. The 2003 regulations for the Degree of Bachelor of Education
(Teaching) were thereby repealed.

1  To be admitted to this programme a student must have personal qualities suitable for this programme. Personal references may be required.  
   Note: The applicant will be required to consent to disclosure of criminal convictions as part of the application process. While a record of criminal convictions will not prevent any student from attaining his/her qualification, it may limit his/her options with regards to available service-learning opportunities and employment in human services.

2  Admission to this programme is at the discretion of Senate or its representative.

Duration and Total Points Value

3  A student enrolled for this degree must follow a programme of the equivalent of six full-time semesters and pass courses with a total value of 360 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

Structure and Content

4  Of the 360 points required for this degree, a student must pass:
   a  at least 330 points from courses listed in the Bachelor of Human Services Schedule including:
      (i) at least 180 points in courses above Stage I, of which at least 75 points must be above Stage II
(ii) 255 points from the courses listed in the Core Courses Schedule
(iii) 75 points from the courses listed in the Elective Courses Schedule.

b (i) 30 points from courses offered in either the General Education Open Schedule or the General Education Faculty Schedule approved for this degree or from a combination of these schedules.
(ii) A student who is required to meet the Academic English Language Requirement, as specified in the Enrolment and Programme Regulations, Academic English Language Requirement, of the University Calendar, must complete ENGLISH 121G to fulfill their General Education requirement, or with approval from Senate or its representative, may substitute an alternative Academic English Language Requirement course for 15 points of General Education.
(iii) In order to complete the requirements for General Education students must pass the Academic Integrity course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

General Education Exemptions
5 a A student is exempted from the requirement to pass courses offered in the General Education Schedules who has:
either
(i)  completed an undergraduate degree at a tertiary institution
or
(ii) commenced study for this degree at a tertiary institution before 1 January 2006
or
(iii) been admitted to this degree with credit from another tertiary institution of 240 points or more.

b A student who has been exempted from the requirement to pass courses offered in the General Education Schedules must substitute 30 points from courses approved by the Dean of Faculty of Education and Social Work.

c A student admitted to this degree with credit from another tertiary institution of between 120 and 235 points inclusive must pass:
(i) 15 points from courses offered in the General Education Schedules
and
(ii) a further 15 points from courses approved by the Dean of Faculty of Education and Social Work.

d A student who has been fully or partially exempted from the requirement to pass courses offered in the General Education Schedules is nonetheless required to complete the Academic Integrity course.

Termination of Enrolment
6 a If the behaviour of a student in a teaching environment is found, after due and fair inquiry, to be offensive, disruptive or likely to give rise to a risk of harm to the welfare of any person, the enrolment of the student in the programme may be terminated by Senate or its representative and any application to re-enrol may likewise be declined.

b A student who is subject to any such inquiry may be suspended by Senate or its representative from lectures, classes and any teaching placement pending the outcome of the inquiry.

c A student whose enrolment is terminated under Regulation 6a may appeal from that decision to the Council or its duly appointed delegate.

Variations
7 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement
8 These regulations came into force on 1 January 2016. The 2007 regulations for the Degree of Bachelor of Human Services were thereby repealed.

The Degree of Bachelor of Physical Education – BPE

New admissions to the Degree of Bachelor of Physical Education were suspended in 2016. Students who have a current enrolment in this qualification should contact their faculty for advice regarding completion. The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

In order to satisfy the requirements of this degree, students are required to be in various teaching environments which will bring them into contact with children and young persons. Only persons able to meet the criteria for provisional registration of the Education Council of Aotearoa New Zealand will be permitted to enrol in this degree.

Admission

1. To be admitted to this programme a student must:
   a. meet University entry criteria
      and
   b. have demonstrated the potential to meet the Education Council of Aotearoa New Zealand criteria for provisional registration. Personal references and an interview will normally be required.

   Note: The applicant will be required to consent to disclosure of criminal convictions as part of the application process consistent with the requirements for provisional registration of the Education Council of Aotearoa New Zealand.

2. Admission to this programme is at the discretion of Senate or its representative.

Duration and Total Points Value

3. A student enrolled for this degree must follow a programme of the equivalent of eight full-time semesters and pass courses with a total value of 480 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

Structure and Content

4. Of the 480 points required for this degree, a student must pass:
   a. at least 420 points from the Core Courses listed in the Bachelor of Physical Education Schedule.
   b. at least 30 points from the Elective Courses listed in the Bachelor of Physical Education Schedule.
   c. (i) 30 points from courses offered in either the General Education Open Schedule or the General Education Faculty Schedule approved for this degree or from a combination of these schedules.
   (ii) A student who is required to meet the Academic English Language Requirement, as specified in the Enrolment and Programme Regulations, Academic English Language Requirement, of the University Calendar, must complete ENGLISH 121G to fulfill their General Education requirement, or with approval from Senate or its representative, may substitute an alternative Academic English Language Requirement course for 15 points of General Education.
   (iii) In order to complete the requirements for General Education students must pass the Academic Integrity course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

5. The programme for each student requires the approval of the Dean of Faculty of Education and Social Work prior to enrolment.

General Education Exemptions

6. a. A student is exempted from the requirement to pass courses offered in the General Education Schedules who has:
   either
   (i) completed an undergraduate degree at a tertiary institution
   or
   (ii) commenced study for this degree at a tertiary institution before 1 January 2006
   or
   (iii) been admitted to this degree with credit from another tertiary institution of 240 points or more.

   b. A student who has been exempted from the requirement to pass courses offered in the General Education Schedules must substitute 30 points from courses approved by the Dean of Faculty of Education and Social Work.

   c. A student admitted to this degree with credit from another tertiary institution of between 120 and 235 points inclusive must pass:
      (i) 15 points from courses offered in the General Education Schedules
      and
      (ii) a further 15 points from courses approved by the Dean of Faculty of Education and Social Work.
d A student who has been fully or partially exempted from the requirement to pass courses offered in the General Education Schedules is nonetheless required to complete the Academic Integrity course.

Practical Requirements
7 a In any course that has a practicum and non-practicum component, a student must pass both the practicum and the non-practicum component in order to have passed that course as a whole.

b Re-enrolment in any EDPRAC course after failing that course requires the permission of the Dean of Faculty of Education and Social Work or nominee.

c At the discretion of Senate or its representative, a student who does not pass EDPRAC 103, 203, 303, 403 may be declined permission to re-enrol for this degree.

d Results may be deferred for courses with a practical component where a student is unable to complete due to illness, injury, or other exceptional circumstances beyond their control.

e Where results are deferred, assessment of a practical component must be undertaken as soon as practicably possible at a time deemed appropriate by the Head of Programme.

Professional Requirements
8 a In order to complete the requirements for this degree, a student must be able to meet the criteria for provisional registration of the Education Council of Aotearoa New Zealand.

b A student who ceases to be able to meet the criteria for provisional registration of the Education Council of Aotearoa New Zealand must immediately notify the Dean of Faculty.

c If the Dean of Faculty has reason to believe that a student does not meet the criteria for provisional registration of the Education Council of Aotearoa New Zealand the Dean shall advise the student and take into account any written response from the student.

d If the Dean of Faculty is satisfied that the student is not able to meet the criteria for provisional registration of the Education Council of Aotearoa New Zealand the Dean shall notify Senate or its representative.

e On receipt of such advice, Senate or its representative may terminate the student’s enrolment and any application to re-enrol may likewise be declined.

f A student whose enrolment is terminated under Regulation 8e may appeal from that decision to the Council or its duly appointed delegate.

Termination of Enrolment
9 a If the behaviour of a student in a teaching environment is found, after due and fair inquiry, to be offensive, disruptive or likely to give rise to a risk of harm to the welfare of any person, the enrolment of the student in the programme may be terminated by Senate or its representative and any application to re-enrol may likewise be declined.

b A student who is subject to any such inquiry may be suspended by Senate or its representative from lectures, classes and any teaching placement pending the outcome of the inquiry.

c A student whose enrolment is terminated under Regulation 9a may appeal from that decision to the Council or its duly appointed delegate.

Variations
10 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement
11 These regulations came into force on 1 January 2006. The 1998 regulations for the Degree of Bachelor of Physical Education were thereby repealed.
The Degree of Bachelor of Social Work – BSW

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission

1 To be admitted to this programme a student must:
   a meet University entry criteria
   and
   b have personal qualities suitable for becoming a social worker. Personal references and an interview will normally be required.

Note: The applicant will be required to consent to a Police check to ensure they meet the requirements of the Social Workers Registration Act 2003.

Duration and Total Points Value

2 A student enrolled for this degree must follow a programme of the equivalent of eight full-time semesters and pass courses with a total value of 480 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

3 The requirements for this degree must be completed within 16 semesters of initial enrolment.

Structure and Content

4 Of the 480 points required for this degree, a student must pass:
   a at least 450 points from the Bachelor of Social Work Schedule.
   b 30 points from courses offered in either the General Education Open Schedule or the General Education Faculty Schedule approved for this degree or from a combination of these schedules, and the Academic Integrity course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

5 A student who is required to meet the Academic English Language Requirement, as specified in the Enrolment and Programme Regulations, Academic English Language Requirement, of the University Calendar, must complete ENGLISH 121G to fulfill their General Education requirement, or with approval from Senate or its representative, may substitute an alternative Academic English Language Requirement course for 15 points of General Education.

6 The programme for each student must be approved by the Head of Programme.

English Language Requirements

7 A student enrolled for this degree must demonstrate competence in the English language, by passing EDUCSW 199, as prescribed by the Faculty of Education and Social Work, before enrolment in SOCWORK 317.

General Education Exemptions

8 a A student is exempted from the requirement to pass courses offered in the General Education Schedules who has:

d A student who has been fully or partially exempted from the requirement to pass courses offered in the General Education Schedules is nonetheless required to complete the Academic Integrity course.
Practical and Professional Requirements

9 a At the discretion of Senate or its representative, a student who does not pass a Professional Practice course (SOCWORK 213, 317, 411, 415) may be declined permission to re-enrol for this degree.

b Re-enrolment in any of SOCWORK 213, 317, 411 or 415 after failing that course requires the permission of the Dean of Faculty of Education and Social Work.

c A student must continue to meet the requirements for registration throughout the duration of enrolment in the programme.

Termination of Enrolment

10 a If the behaviour of a student in a learning or practice environment is found, after due and fair inquiry, to be offensive, disruptive or likely to give rise to a risk of harm to the welfare of any person, the enrolment of the student in the programme may be terminated by Senate or its representative and any application to re-enrol may likewise be declined.

b A student who is subject to any such inquiry may be suspended by Senate or its representative from lectures, classes and any practice placement pending the outcome of the inquiry.

c A student whose enrolment is terminated under Regulation 10a may appeal from that decision to the Council or its duly appointed delegate.

Variations

11 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement

12 These regulations came into force on 1 January 2007. The 2001 regulations for the Degree of Bachelor of Social Work were thereby repealed.

c. A student enrolled must complete the research project by the last day of the final semester of enrolment in the research project.
   
d. In exceptional circumstances beyond the student’s control, Senate or its representative, acting upon the recommendation of the Head of Department, may approve a limited extension of time, not exceeding two months.

**General Education Exemptions**
6. a. A student is exempted from the requirement to pass courses offered in the General Education Schedules who has:
   either
   (i) completed an undergraduate degree at a tertiary institution
   or
   (ii) been admitted to this degree having completed 240 points or more of degree-level study at another tertiary institution.
   
b. A student who has been exempted from the requirement to pass courses offered in the General Education Schedules must substitute 30 points from courses approved by the Dean of Faculty of Education and Social Work.
   
c. A student admitted to this degree, who has completed between 120 and 235 points inclusive of degree-level study at another tertiary institution, must pass:
   (i) 15 points from courses offered in the General Education Schedules
   and
   (ii) a further 15 points from courses available for this degree.
   
d. A student who has been fully or partially exempted from the requirement to pass courses offered in the General Education Schedules is nonetheless required to complete the Academic Integrity course.

**Practical and Professional Requirements**
7. a. At the discretion of Senate or its representative, a student who does not pass a required Professional Practice course (SOCWORK 317, 715) may be declined permission to re-enrol in this degree.
   
b. Re-enrolment in any of SOCWORK 317, 411 or 715 after failing that course requires the permission of the Dean of Faculty of Education and Social Work.
   
c. A student must continue to meet the requirements for registration throughout the duration of enrolment in the programme as outlined in the programme handbook.

**Termination of Enrolment**
8. a. If the behaviour of a student in a learning or practice environment is found, after due and fair inquiry, to be offensive, disruptive or likely to give rise to a risk of harm to the welfare of any person, the enrolment of the student in the programme may be terminated by Senate or its representative and any application to re-enrol may likewise be declined.
b A student who is subject to any such inquiry may be suspended by Senate or its representative from lectures, classes and any practice placement pending the outcome of the inquiry.

c A student whose enrolment is terminated under Regulation 8a may appeal from that decision to the Council or its duly appointed delegate.

Award of Honours
9 This degree may be awarded only where a student’s overall grade for the Degree of Bachelor of Social Work (Honours) is sufficiently high to deserve Honours.

Withdrawal of Honours
10 A student whose work does not satisfy the standard specified in the Regulation 9, or who at any time chooses to withdraw from this programme, may apply to reassign courses passed for, or credited to, the Bachelor of Social Work (Honours) to the degree of Bachelor of Social Work.

Variations
11 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement
12 These regulations came into force on 1 January 2018. The 2009 regulations for the Degree of Bachelor of Social Work (Honours) were thereby repealed.

Admission
1 In order to be admitted to this programme, a student needs to have:
   a either
      (i) completed the requirements for a Bachelors degree in education, counselling, nursing, social work or another profession from this University or an equivalent qualification approved by Senate or its representative with an average grade of B or higher in at least 90 points or equivalent in the most advanced courses taken towards the entry qualification
   or
      (ii) completed the requirements for the Postgraduate Diploma in Counselling Theory, or the Postgraduate Diploma in Education – Counselling specialisation from this University or an equivalent qualification approved by Senate or its representative with an average grade of B or higher in at least 90 points or equivalent in the most advanced courses taken towards the entry qualification
   and
   b at least three years practical experience in teaching, counselling, nursing, social work or equivalent profession as approved by Senate or its representative.

2 An interview supported by referees’ statements and evidence of practical experience is required.

   Note: Agencies where counsellors in training are placed wish to ensure that client safety is not compromised. For this reason, the application form for the Counselling programme asks applicants to indicate whether they have any criminal convictions. Before any candidate can be accepted into the degree, an official police statement concerning absence or otherwise of criminal convictions will be required.

3 A student who has not gained an average of B or higher as specified in Regulation 1a must have otherwise shown to the satisfaction of the Dean of Faculty of Education and Social Work capacity to undertake advanced study and research in the courses proposed to be taken for this degree in order to be admitted to the programme.

4 Admission to the programme requires the approval of Senate or its representative.

5 No student on whom the Degree of Master of Education – Counselling specialisation has already been conferred by the University of Auckland may enrol for this degree unless specific approval is given by Senate or its representative.

The Degree of Doctor of Education – EdD

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations, including the General Regulations for Named Doctorates and the Academic Statutes and Regulations.

Preamble
1 a A candidate for the degree of Doctor of Education is required to pursue an approved programme of advanced study and research as an enrolled student of the University.

b It is expected that this programme will usually be completed within four to six years from the date of registration.

c The Degree of Doctor of Education is awarded for a formal and systematic exposition of a coherent programme of advanced research work carried out over the period of registration for the degree, which in the opinion of the examiners and the Board of Graduate Studies satisfies all of the following criteria:
   (i) is an original contribution to scholarship relating to professional practice in the field of Education
   and
   (ii) meets internationally recognised standards for such work
   and
   (iii) demonstrates a knowledge of the literature relevant to the subject of the thesis, and the ability to exercise critical and analytical judgement of it
   and
   (iv) is satisfactory in its methodology, in the quality and coherence of its written expression, and in its scholarly presentation and format.

d The thesis may not, without prior permission of the Board of Graduate Studies, exceed 100,000 words in total.

e If the core of the thesis comprises a series of published or unpublished research papers and/or case studies, the candidate must be the lead or sole author of each paper or case study and must provide a contextual framework and concluding discussion. The range and focus of this material shall generally correspond with the introductory and concluding chapters of a thesis. The thesis must be presented in a consistent format, citation style and typeface.

f If the core of the thesis does not comprise a series of published or unpublished research papers and/or case studies, a candidate may still include within their thesis published or unpublished research papers and/or case studies, provided that the candidate was the lead or sole author of each paper or case study. The thesis must be presented in a consistent format, citation style and typeface.

g In the case of published or unpublished research papers and/or case studies that the candidate has contributed to but is not the sole or lead author of, the candidate may report in the thesis their contribution to the research with due reference to the original paper and/or case study. The thesis must be presented in a consistent format, citation style and typeface.

h All material which is not the original work of the author of the thesis must:
   (i) be fully and appropriately attributed
   or
(ii) if a substantial part of another work, only be reproduced with the written permission of the copyright owner of the other work.

i All research for the thesis is to be conducted in accordance with the University of Auckland Guidelines for the Conduct of Research.

**Eligibility**

2 A candidate for the Degree of Doctor of Education is required to have:

a (i) completed the requirements for the award of either the Degree of Master of Education or the Degree of Master of Arts in Education with First Class or Second Class (First Division) Honours at the University of Auckland

or

(ii) completed the requirements for the award of either the Degree of Bachelor of Education (Teaching) (Honours) or the Degree of Bachelor of Arts (Honours) in Education with First Class or Second Class (First Division) Honours at the University of Auckland

or

(iii) completed the requirements for the award of a qualification that the Board of Graduate Studies considers to be equivalent to one of the prerequisite qualifications specified in Regulations 2a(i) and (ii)

and

b demonstrated an ability to pursue doctoral level research in the field of Education as typically indicated by the assessment of the equivalent of 30 points or more of independent research work

and

b had at least two years’ professional experience in education or in another professional area considered comparable by the Board of Graduate Studies.

**Admission**

3 Every candidate for the Degree of Doctor of Education must have applied for admission and been admitted to the University of Auckland.

**Duration and Total Points Value**

4 a A candidate enrolled for this degree must follow an approved two-part programme with a total value of 360 points.

b Candidates must complete the requirements for Part I within two successive part-time years, unless permitted additional time by the Board of Graduate Studies under Regulation 8.

c After completing Part I candidates must complete the requirements for Part II within two full-time or four part-time years, unless permitted to do otherwise by the Board of Graduate Studies under Regulation 8.

**Registration**

5 a Registration and all conditions pursuant to it shall be determined in accordance with Regulation 2 of the General Regulations for Named Doctorates.

b The following provisional goals are required of all candidates for this degree:

(i) completion of EDPROFST 844 Research Portfolio

(ii) completion of a literature review to the satisfaction of the main supervisor

(iii) approval of a full thesis proposal by the appropriate postgraduate committee

(iv) presentation of the proposal and/or work in progress to an appropriate forum

(v) completion of the standard doctoral milestone goals relating to induction, English language, academic integrity and health and safety prescribed by the Board of Graduate Studies upon commencement of the registration.

c Further provisional goals may be added as per Regulation 2 of the General Regulations for Named Doctorates and as required after the commencement of registration as per Regulation 4a of the General Regulations for Named Doctorates.

**Structure and Content**

6 a A candidate enrolled for this degree must pass Parts I and II as follows:

(i) Part I: 120 points from EDPROFST 844 Research Portfolio

(ii) Part II: 240 points from EDPROFST 897 Thesis.

b A candidate must complete the requirements of Part I to the satisfaction of the supervisor and external examiner before commencing Part II.

**Reviews of Registration**

7 Reviews of registration will be made in accordance with Regulation 3 of the General Regulations for Named Doctorates.
Changes to the Conditions of Registration
8 Changes to supervision, extensions of time, and suspension or termination of registration will be made according to Regulation 4 of the General Regulations for Named Doctorates.

Enrolment and Fees
9 Enrolment and payment of fees will be determined according to Regulation 5 of the General Regulations for Named Doctorates.

Submissions
10 The submission process will follow that of Regulation 8 of the Statute for the Degree of Doctor of Philosophy 2016.

Examinations
11 The examination process will follow that of Regulation 9 of the Statute for the Degree of Doctor of Philosophy 2016, except that:
   a examiners will be requested to assess the thesis according to the criteria of Regulation 1(c) of these regulations and
   b the Board of Graduate Studies will normally appoint the Doctor of Education Adviser as the Head of Department nominee on the Examination Committee (and who will participate in the Oral Examination), as described in the Degree of Doctor of Philosophy Statute, for all Doctor of Education examinations.

Variations
12 In exceptional circumstances the Board of Graduate Studies may approve a personal programme which does not conform with these regulations.

Appeals
13 Appeals regarding the examination process or decisions of the Board of Graduate Studies must be made according to Regulation 6 of the General Regulations for Named Doctorates.

Dispute Resolution Procedures
14 Disputes are to be resolved in accordance with Regulation 7 of the General Regulations for Named Doctorates.

Transitional Arrangements
15 a These regulations came into force on 1 January 2016. The 2006 regulations for the Degree of Doctor of Education were thereby repealed.
   b For a candidate initially registered under earlier regulations for this degree the Board of Graduate Studies may agree to vary the application of the provisions of this statute to ensure consistency with the provisions of the regulations under which the candidate was enrolled where it is satisfied that the candidate would otherwise be at a disadvantage.

Note: A student wishing to enrol in a thesis or research portfolio for the Master of Social Work following the award of this postgraduate qualification should note that SOCWORK 718 Applied Research in Social Services (or an equivalent 30 points in a research methods course approved by the Academic Head) is a prerequisite for enrolment.

Postgraduate Diploma in Teaching (Secondary Field-based) – PGDipTchg(SecFB)

New admissions to the Postgraduate Diploma in Teaching (Secondary Field-Based) were suspended in 2017. Students who have a current enrolment in this qualification should contact their faculty for advice regarding completion.

The regulations for this postgraduate diploma are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

In order to satisfy the requirements of this postgraduate diploma, students are required to be in various teaching environments which will bring them into contact with young persons. Only persons who have demonstrated the potential to meet the criteria for professional registration of the Education Council of Aotearoa New Zealand will be permitted to enrol in this postgraduate diploma.
Admission
1 In order to be admitted to this programme, a student needs to have:
   a completed the requirements for:
      (i) a Bachelor's degree from a New Zealand university with at least a B average
      or
      (ii) a qualification recognised as equivalent by the New Zealand Qualifications Authority (NZQA)
   and
   b passed at least 30 points from 300 or 400 level courses in a teaching subject appropriate to the secondary
   school curriculum
   and
   c demonstrated the potential to meet the Education Council of Aotearoa New Zealand criteria for provisional
   registration. Personal references, an online application and an interview will be required.

Note: The applicant will be required to consent to disclosure of criminal convictions as part of the applications
process consistent with the requirements for professional registration of the Education Council of Aotearoa New
Zealand.

2 Admission to this postgraduate diploma is at the discretion of the Senate or its representative.

Duration and Total Points Value
3 A student enrolled for this postgraduate diploma must:
   a follow a programme of the equivalent of two part-time years and pass courses with a total value of 120 points
   and
   b complete within 36 months of initial enrolment unless, in exceptional circumstances, Senate or its
   representative extends this period.

4 The total enrolment for this postgraduate diploma must not exceed 160 points.

Structure and Content
5 A student enrolled for this postgraduate diploma must pass 120 points from the courses listed in the Postgraduate
   Diploma in Teaching (Secondary Field-based) Schedule.

6 The programme for each student requires the approval of the Dean of Faculty of Education and Social Work prior
to enrolment.

7 A student admitted to this programme must complete the University of Auckland Academic Integrity Course as
   specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

Practical Requirements
8 a In any course that has a practicum and non-practicum component, a student must complete both components
   in order to have passed that course as a whole.

   b Re-enrolment in any EDPRAC course after failing that course requires the permission of the Dean of Faculty of
   Education and Social Work or nominee.

   c At the discretion of Senate or its representative, a student who does not pass an EDPRAC course may be
   declined permission to re-enrol for this diploma.

Professional Requirements
9 a In order to meet the requirements for this postgraduate diploma, a student must be able to meet the criteria
   for provisional registration of the Education Council of Aotearoa New Zealand.

   b A student who ceases to be able to meet the criteria for provisional registration of the Education Council of
   Aotearoa New Zealand must immediately notify the Dean of Faculty of Education and Social Work.

   c If the Dean of Faculty of Education and Social Work has reason to believe that a student does not meet the
   criteria for provisional registration of the Education Council of Aotearoa New Zealand the Dean shall advise
   the student and take into account any written response from the student.

   d If the Dean of Faculty of Education and Social Work is satisfied that the student is not able to meet the criteria
   for provisional registration of the Education Council of Aotearoa New Zealand the Dean shall notify Senate or
   its representative.

   e On receipt of such advice, Senate or its representative may terminate the student’s enrolment and any
   application to re-enrol may likewise be declined.

   f A student whose enrolment is terminated under Regulation 9e may appeal that decision to the Council or its
duly appointed delegate.
Termination of Enrolment
10 a If the behaviour of a student in a teaching environment is found, after due and fair inquiry, to be offensive, disruptive or likely to give rise to a risk of harm to the welfare of any person, the enrolment of the student in the programme may be terminated by the Senate or its representative and any application to re-enrol may likewise be declined.

b A student who is subject to any such inquiry may be suspended by the Senate or its representative from lectures, classes and any teaching placement pending the outcome of the inquiry.

c A student whose enrolment is terminated under 10a may appeal that decision to the Council or its duly appointed delegate.

Distinction
11 This postgraduate diploma may be awarded with Distinction or Merit as specified in the General Regulations – Postgraduate Diplomas.

Variations
12 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement
13 These regulations came into force on 1 January 2013.

The Degree of Bachelor of Engineering – BE

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Degree Requirements

1 Students who enrol for the degree of Bachelor of Engineering (Honours) may be awarded the degree of Bachelor of Engineering if, having passed all courses and completed all other requirements for a BE(Hons), their performance in the courses is deemed by the Dean of Engineering to be not of Honours standard.

Note: Honours standard will normally imply completion of all courses in the minimum time and with a weighted grade point average exceeding a minimum set by the University.

The Degree of Bachelor of Engineering (Honours) – BE(Hons)

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Duration and Total Points Value

1 A student enrolled for this degree must follow a programme of the equivalent of eight full-time semesters and pass courses with a total value of 480 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

Structure and Content

2 A student must pass 480 points from the Bachelor of Engineering (Honours) Schedule including:
   a 120 points: Part I as listed in the Bachelor of Engineering (Honours) Schedule including 15 points from courses offered in either the General Education Open Schedule or the General Education Faculty Schedule approved for this degree, and the Academic Integrity course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar and
   b 360 points from Parts II, III and IV for one of the areas of specialisation listed in the Bachelor of Engineering (Honours) Schedule.

3 a A student will not normally be permitted to enrol for Part II unless Part I has been completed, or to enrol for Part III unless Part II has been completed, or to enrol for Part IV unless Part III has been completed.

b However, a student who has failed to pass one of those Parts in its entirety may be allowed, at the discretion of Senate or its representative, to enrol for the course or courses needed to complete that Part together with a course or courses towards the next Part.

c Only in exceptional circumstances will a student be permitted to enrol for Part III unless Part I has been completed, or to enrol for Part IV unless Part II has been completed.

4 A student who is required to meet the Academic English Language Requirement, as specified in the Enrolment and Programme Regulations, Academic English Language Requirement, of the University Calendar, may substitute an academic English language course approved by Senate or its representative for 15 points of General Education.

General Education Exemptions

5 A student is exempted from the requirement to pass courses offered in the General Education Schedules who has:
   either
   a completed an undergraduate degree at a tertiary institution
   or
   b commenced study for this degree at a tertiary institution before 1 January 2006
   or
   c been admitted to this degree having completed 120 points or more of degree-level study at another tertiary institution
   or
   d been admitted to this degree with credit from another tertiary institution for the entire Part I of this degree.

6 A student who has been exempted from the requirement to pass courses offered in the General Education Schedules must substitute 15 points from courses offered at this University.

7 A student who has been fully or partially exempted from the requirement to pass courses offered in the General Education Schedules is nonetheless required to complete the Academic Integrity course.
Conjoint Degrees

8 Special arrangements apply where this degree is taken as a component degree of an approved conjoint combination. The specific requirements and a complete list of the conjoint degrees available are set out in the Conjoint Degrees section of the University Calendar.

Practical Requirements

9 a A student enrolled for this degree must carry out satisfactorily such practical work in ENGGEN 299 and ENGGEN 499, field trips and laboratory requirements, as prescribed by the Faculty of Engineering.

b A student will not be considered to have completed the requirements for this degree unless Academic Services has received from the Dean of Faculty of Engineering confirmation that the student has complied with the requirements of Regulation 9a.

English Language Requirements

10 a A student enrolled for this degree must demonstrate competence in the English language, in ENGGEN 199, as prescribed by the Faculty of Engineering.

b A student will not be considered to have completed the requirements for this degree unless Academic Services has received from the Dean of Faculty of Engineering confirmation that the student has complied with the requirements of Regulation 10a.

Honours

11 The Bachelor of Engineering (Honours) may be awarded with First Class Honours or with Second Class Honours in either First Division or Second Division. The class of honours shall be determined by the student’s weighted average grade over Parts II, III and IV. Students who have passed all courses and completed all other requirements for a BE(Hons) but whose performance in the courses is deemed by the Dean of Engineering to be not of Honours standard will be awarded the degree of Bachelor of Engineering.

Variations

12 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement

13 These regulations came into force on 1 January 2008. The 2000 regulations for the Degree of Bachelor of Engineering were thereby repealed.

The Degree of Master of Earthquake Engineering – MEqEng

The regulations for this degree are to be read in conjunction with all other relevant regulations including the Academic Statutes and Regulations.

Admission

1 In order to be admitted to this programme, a student needs to have completed the requirements for:
   either
   a (i) the Degree of Bachelor of Engineering or Bachelor of Engineering (Honours) from this University in a relevant subject with a Grade Point Average of 5.0 or higher in 120 points above Stage III, or the equivalent as approved by Senate or its representative

or
(ii) (a) the Degree of Bachelor of Engineering or Bachelor of Engineering (Honours) from this University, or
the equivalent as approved by Senate or its representative

and

(b) passed 60 points in the Postgraduate Certificate in Engineering, Postgraduate Certificate in Earthquake Engineering or Postgraduate Diploma in Engineering from this University relevant to the Master of Earthquake Engineering with a Grade Point Average of 5.0 or higher, provided that the postgraduate certificate or postgraduate diploma has not been awarded

or

(iii) (a) a relevant Bachelors degree from this University, as approved by Senate or its representative, with a
Grade Point Average of 4.0 or higher in 120 points in the most advanced courses, or the equivalent as approved by Senate or its representative

and

(b) at least three years of relevant professional experience approved by the Dean of Faculty of Engineering

or

(iv) (a) a relevant Bachelors degree as approved by Senate or its representative

and

(b) the Postgraduate Diploma in Engineering from this University with at least 60 points of courses relevant to the Master of Earthquake Engineering with a Grade Point Average of 5.0 or higher, or the equivalent as approved by Senate or its representative

or

b (i) a relevant Bachelors degree from this University as approved by Senate or its representative, with a
Grade Point Average of 5.0 or higher in 120 points in the most advanced courses, or the equivalent as approved by Senate or its representative

or

(ii) (a) a relevant Bachelors degree as approved by Senate or its representative

and

(b) passed 60 points in the Postgraduate Certificate in Engineering, Postgraduate Certificate in Earthquake Engineering or Postgraduate Diploma in Engineering from this University relevant to the Master of Earthquake Engineering with a Grade Point Average of 5.0 or higher, provided the postgraduate certificate or postgraduate diploma has not been awarded.

Note: Whether a degree is considered relevant will depend on the courses taken in that degree. Degrees in Architecture, Civil Engineering or Science for example, may be considered relevant.

2 In exceptional circumstances Senate or its representative may approve the admission of a student who has not met the above requirements, but who has attained an equivalent qualification or professional experience in the engineering profession.

Duration and Total Points Value

3 A student admitted to this degree under Regulation 1a must:
   a pass courses with a total value of 120 points
   and
   b complete within the time limit specified in the General Regulations – Masters Degrees
   and
   c not exceed 160 points for the total enrolment for this degree.

4 A student admitted to this degree under Regulation 1b must:
   a pass courses with a total value of 180 points
   and
   b complete within the time limit specified in the General Regulations – Masters Degrees
   and
   c not exceed 220 points for the total enrolment for this degree.

Structure and Content

5 A student enrolled for this degree must complete the requirements as listed in the Master of Earthquake Engineering Schedule.

6 A student who has previously passed any course the same as, or similar to, the courses required for this degree must substitute an alternative course as approved by Senate or its representative.

7 A student who has to complete 120 points for a Taught Masters must achieve a Grade Point Average of 4.5 or higher in the first 30 points of courses taken for this programme. If this Grade Point Average is not achieved, enrolment in the Master of Earthquake Engineering cannot continue.

8 A student who has to complete 180 points must achieve a Grade Point Average of 5.0 or higher in the first 60
points of taught courses taken for this degree. If this Grade Point Average is not achieved, enrolment in the Master of Earthquake Engineering cannot continue.

9 A student admitted to this programme must complete the University of Auckland Academic Integrity Course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

Reassignment
10 A student may apply to reassign courses passed for the Master of Earthquake Engineering to the Postgraduate Diploma in Engineering or Postgraduate Certificate in Earthquake Engineering.

Thesis / Research Project
11 a A thesis or research project, when included in the programme, is to be carried out under the guidance of a supervisor appointed by Senate or its representative.

b The topic of the thesis or research project must be approved by the Head of Department prior to enrolment.

c The thesis or research project is to be completed and submitted in accordance with the General Regulations – Masters Degrees.

Transfer from Postgraduate Certificate in Engineering, Postgraduate Certificate in Earthquake Engineering or Postgraduate Diploma in Engineering
12 A student who has passed courses towards the Postgraduate Certificate in Engineering, Postgraduate Certificate in Earthquake Engineering, or Postgraduate Diploma in Engineering that are available in this degree may apply to reassign those courses to this degree provided that the postgraduate certificate or postgraduate diploma has not been awarded.

Variations
13 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Honours/Distinction/Merit
14 This degree may be awarded with Honours, Distinction or Merit in accordance with the General Regulations – Masters Degrees.

Commencement
15 These regulations came into force on 1 January 2019.

Master of Earthquake Engineering (MEqEng) Schedule

A student who has to complete 120 points must satisfy the following requirements:

**Taught Masters**
- 15 points: CIVIL 720
- at least 45 points from CIVIL 702, 717, 725, 745, 787–789, but no more than 30 points from CIVIL 787–789
- at least 15 points from CIVIL 710, 714, 715, 717–719, 727, 742, 745, 750
- at least 15 points from CIVIL 702, 724, 725, 741
- up to 60 points from CIVIL 711, 716, 740, 744, DISMGT 703

With the prior approval of the Head of Department, up to 30 points may be replaced by other appropriate 600 and 700 level courses at this or another University

**Research Masters**
- 15 points: CIVIL 720
- 75 points from CIVIL 702, 710, 711, 714, 715, 717–719, 724, 725, 727, 741, 742, 744, 745, 750; with the prior approval of the Head of Department, up to 45 points may be replaced by other appropriate 600 and 700 level courses at this or another University
- 90 points: CIVIL 793 or 794 Thesis

A student who has to complete 180 points must satisfy the following requirements:

**Research Masters**
- 15 points: CIVIL 720
- 75 points from CIVIL 702, 710, 711, 714, 715, 717–719, 724, 725, 741, 742, 744, 745, 747, 742, 744, 745, 750; with the prior approval of the Head of Department, up to 45 points may be replaced by other appropriate 600 and 700 level courses at this or another University
- 90 points: CIVIL 793 Thesis

The Degree of Master of Engineering – ME

*The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.*

Admission
1 In order to be admitted to this programme, a student needs to have completed:

either

a (i) the requirements for the Degree of Bachelor of Engineering or Bachelor of Engineering (Honours) from this University, or an equivalent degree qualification as approved by Senate or its representative, with a Grade Point Average of 5.0 or higher in 120 points above Stage III or its equivalent

or
(ii) (a) the requirements for the Degree of Bachelor of Engineering or Bachelor of Engineering (Honours) from this University, or an equivalent degree qualification as approved by Senate or its representative
and
(b) the Postgraduate Certificate in Engineering or Postgraduate Diploma in Engineering from this University, or an equivalent qualification as approved by Senate or its representative, with a Grade Point Average of 5.0 or higher or its equivalent

or

(iii) (a) the requirements for a relevant Bachelors degree, as approved by Senate or its representative, with a Grade Point Average of 5.0 or higher, or its equivalent, in 120 points in the most advanced courses
and
(b) at least three years of relevant work experience approved by the Dean of Faculty of Engineering

or

(iv) (a) the requirements for a relevant Bachelors degree, as approved by Senate or its representative
and
(b) the Postgraduate Diploma in Engineering from this University, or an equivalent qualification as approved by Senate or its representative, with a Grade Point Average of 5.0 or higher or its equivalent

or

b (i) the requirements for a relevant Bachelors degree as approved by Senate or its representative, with a Grade Point Average of 5.0 or higher, or its equivalent, in 120 points in the most advanced courses

or

(ii) (a) the requirements for a relevant Bachelors degree, as approved by Senate or its representative
and
(b) passed 60 points in the Postgraduate Certificate in Engineering or Postgraduate Diploma in Engineering from this University relevant to the intended specialisation in the Master of Engineering with a Grade Point Average of 5.0 or higher, provided that the postgraduate certificate or postgraduate diploma has not been awarded.

Note: Whether a degree is considered relevant will depend on the courses taken in that degree and the specialisation a student intends to complete. As well as degrees in Engineering, degrees in Architecture, Planning, or Science, for example, may be considered relevant to some specialisations.

2 Students must have completed courses relevant to the specialisation in which they intend to enrol, and passed any prerequisite courses prior to enrolment in this programme.

3 A student wishing to enrol in courses listed in a specialisation in the Master of Engineering Studies Schedule as part of this programme must satisfy any prerequisites specified for that specialisation.

4 In exceptional circumstances Senate or its representative may approve admission of a student who has not met the above requirements, but who has attained an equivalent qualification or equivalent professional experience in the engineering profession.

Duration and Total Points Value

5 A student admitted to this degree under Regulation 1a must:
   a pass courses with a total value of 120 points
   and
   b complete within the time limit specified in the General Regulations – Masters Degrees.

6 A student admitted to this degree under Regulation 1b must:
   a pass courses with a total value of 180 points
   and
   b complete within the time limit specified in the General Regulations – Masters Degrees
   and
   c not exceed 220 points for the total enrolment for this degree.

Structure and Content

7 A student enrolled for this degree must complete the requirements for one of the specialisations listed in the Master of Engineering Schedule.

8 A student enrolled for this degree who has already passed any course the same or similar to those required for this degree, must substitute an alternative course approved by the appropriate Head of Department.

9 A student who has to complete 180 points must achieve a Grade Point Average of 4.0 or higher in at least 30 points of taught courses taken for this degree by the end of the first semester of their enrolment. If this Grade Point Average is not achieved, enrolment in the Master of Engineering cannot continue.

10 A student who has to complete 180 points must achieve a Grade Point Average of 5.0 or higher in their first 60 points of taught courses taken for this degree and have completed all taught courses by the end of their second
semester of enrolment. If this Grade Point Average is not achieved, enrolment in the Master of Engineering cannot continue.

11 A student admitted to this programme must complete the University of Auckland Academic Integrity Course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

Reassignment
12 A student may apply to reassign courses passed for this degree to the Master of Engineering Studies, Postgraduate Diploma in Engineering or Postgraduate Certificate in Engineering.

Thesis
13 a The thesis is to be carried out under the guidance of a supervisor appointed by Senate or its representative.

b The thesis is to embody the results obtained by the student in an investigation on a topic approved by the Head of Department prior to enrolment.

c The investigation is to be carried out by the student at the University under the direct supervision of a member of the academic staff, provided that:

   (i) laboratory work may be carried out in an approved institution outside the University for such limited period or periods as Senate or its representative may determine

   (ii) field work may be carried out at such places and for such periods as Senate or its representative may determine.

d At the discretion of the Head of Department the candidate may be required to attend an oral examination.

e The thesis is to be completed and submitted in accordance with the General Regulations – Masters Degrees.

Transfer from Postgraduate Certificate in Engineering or Postgraduate Diploma in Engineering
14 A student who has passed courses towards a Postgraduate Certificate in Engineering or Postgraduate Diploma in Engineering that are available for a specialisation in this degree and is eligible to be admitted to this programme, may apply to reassign those courses to the Master of Engineering for that specialisation provided that the postgraduate certificate or postgraduate diploma has not been awarded.

Variations
15 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Honours
16 This degree may be awarded with Honours in accordance with the General Regulations – Masters Degrees.

Commencement
17 These regulations came into force on 1 January 2018. The 2014 regulations for the Degree of Master of Engineering were thereby repealed.

*The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.*

#### Admission
1. In order to be admitted to this programme, a student needs to have:
   - either
     a. completed the requirements for the Degree of Bachelor of Engineering or Bachelor of Engineering (Honours) from the University of Auckland with a Grade Point Average of 5 or higher in 120 points above Stage III
   - or
     b. completed the requirements for an equivalent degree qualification, as approved by Senate or its representative, at a level deemed satisfactory by the Dean of Faculty of Engineering
   - or
     c. (i) completed the requirements for a Bachelors degree relevant to the proposed programme of study, as approved by Senate or its representative, at a level deemed satisfactory by the Dean of Faculty of Engineering

   and
2 In exceptional circumstances Senate or its representative may approve admission of a student who has not met the above requirements, but who has attained an equivalent qualification or professional experience in the engineering profession.

Duration and Total Points Value
3 A student enrolled for this degree must:
   a pass courses with a total value of 120 points
   and
   b complete within the time limit specified in the General Regulations – Masters Degrees.

4 The total enrolment for this degree must not exceed 160 points.

Structure and Content
5 A student must pass 120 points of courses as specified in the Master of Engineering Management Schedule.

6 A student admitted to this programme must complete the University of Auckland Academic Integrity Course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

Variations
7 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Honours
8 This degree may be awarded with Honours as specified in the General Regulations – Masters Degrees.

The Degree of Master of Engineering Studies – MEngSt

The regulations for this degree are to be read in conjunction with all other relevant regulations including the Academic Statutes and Regulations.

Admission

1 In order to be admitted to this programme, a student needs to have completed:

   either
   a (i) the requirements for the Degree of Bachelor of Engineering or Bachelor of Engineering (Honours) from this University, or an equivalent degree qualification as approved by Senate or its representative, with a Grade Point Average of 4.0 or higher in 120 points above Stage III or its equivalent

   or
   (ii) (a) the requirements for the Degree of Bachelor of Engineering or Bachelor of Engineering (Honours) from this University, or an equivalent degree qualification as approved by Senate or its representative and
           (b) passed 60 points in the Postgraduate Certificate in Engineering or Postgraduate Diploma in Engineering from this University relevant to the intended specialisation in the Master of Engineering Studies with a Grade Point Average of 4.0 or higher, provided that the postgraduate certificate or postgraduate diploma has not been awarded

   or
   (iii) (a) the requirements for a relevant Bachelors degree, as approved by Senate or its representative, with a Grade Point Average of 4.0 or higher, or its equivalent, in 120 points in the most advanced courses and
           (b) at least three years of relevant work experience approved by the Dean of Faculty of Engineering

   or
   (iv) (a) the requirements for a relevant Bachelors degree as approved by Senate or its representative and
           (b) the Postgraduate Diploma in Engineering from this University, or an equivalent qualification as approved by Senate or its representative, with a Grade Point Average of 4.0 or higher, or its equivalent

   or
   b (i) the requirements for a relevant Bachelors degree as approved by Senate or its representative, with a Grade Point Average of 4.0 or higher, or its equivalent, in 120 points in the most advanced courses

   or
   (ii) (a) the requirements for a relevant Bachelors degree, as approved by Senate or its representative and
           (b) passed 60 points in the Postgraduate Certificate in Engineering or Postgraduate Diploma in Engineering from this University relevant to the intended specialisation in the Master of Engineering Studies with a Grade Point Average of 4.0 or higher, provided that the postgraduate certificate or postgraduate diploma has not been awarded.

   Note: Whether a degree is considered relevant will depend on the courses taken in that degree and the specialisation a student intends to complete. As well as degrees in Engineering, degrees in Architecture, Planning, or Science, for example, may be considered relevant to some specialisations.

2 For entry to a specialisation in this programme, students must have completed courses relevant to the specialisation, passed any prerequisite courses prior to enrolment in this programme and satisfied any prerequisites specified for the specialisation in the Master of Engineering Studies Schedule.

3 In exceptional circumstances Senate or its representative may approve admission of a student who has not met the above requirements, but who has attained an equivalent qualification or professional experience in the engineering profession.

Duration and Total Points Value

4 A student admitted to this degree under Regulation 1a must:

   a pass courses with a total value of 120 points
   and
   b complete within the time limit specified in the General Regulations – Masters Degrees
   and
   c not exceed 160 points for the total enrolment for this degree.

5 A student admitted to this degree under Regulation 1b must:

   a pass courses with a total value of 180 points
   and
   b complete within the time limit specified in the General Regulations – Masters Degrees
   and
   c not exceed 220 points for the total enrolment for this degree.
Structure and Content
6 A student enrolled for this degree must complete the requirements as listed in the Master of Engineering Studies Schedule.

7 If these requirements include courses the same as, or similar to, those already passed by a student, alternative courses must be substituted as approved by the appropriate Head of Department.

8 This degree will be conferred with an endorsement as to the chosen area of specialisation.

9 A student who has to complete 120 points for a Taught Masters must achieve a Grade Point Average of 3.5 or higher in the first 30 points of courses taken for this programme. If this Grade Point Average is not achieved, enrolment in the Master of Engineering Studies cannot continue.

10 A student who has to complete 180 points must achieve a Grade Point Average of 4.0 or higher in the first 60 points of courses taken for this degree. If this Grade Point Average is not achieved, enrolment in the Master of Engineering Studies cannot continue.

11 A student admitted to this programme must complete the University of Auckland Academic Integrity Course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

Reassignment
12 A student may apply to reassign courses passed to the Postgraduate Diploma in Engineering or Postgraduate Certificate in Engineering.

Thesis/Research Portfolio/Dissertation/Research Project
13 a A thesis, research portfolio, research project, or dissertation, when included in the programme, is to be carried out under the guidance of a supervisor appointed by Senate or its representative.

b The topic of a thesis, dissertation or research project and the elements of a research portfolio must be approved by the Head of Department prior to enrolment.

c At the discretion of the Head of Department, a thesis, dissertation, research project or research portfolio candidate may be required to attend an oral examination.

d The thesis, research portfolio, research project or dissertation is to be completed and submitted in accordance with the General Regulations – Masters Degrees.

Transfer from Postgraduate Certificate in Light Metals Reduction Technology
14 A student who has passed courses towards a Postgraduate Certificate in Light Metals Reduction Technology that are available for the Light Metals Reduction Technology specialisation may reassign those courses to this specialisation in this degree provided that the Postgraduate Certificate in Light Metals Reduction Technology has not been awarded.

Transfer from Postgraduate Certificate in Engineering or Postgraduate Diploma in Engineering
15 A student who has passed courses towards the Postgraduate Certificate in Engineering or Postgraduate Diploma in Engineering that are available for a specialisation in this degree may apply to reassign those courses to this specialisation provided that the postgraduate certificate or postgraduate diploma has not been awarded.

Variations
16 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Honours/Distinction/Merit
17 This degree may be awarded with either Honours, Distinction or Merit in accordance with the General Regulations – Masters Degrees.

Commencement
18 These regulations came into force on 1 January 2018. The 2017 regulations for the Degree of Master of Engineering Studies were thereby repealed.

Master of Engineering Studies (MEngSt) Schedule
A student who has to complete 120 points must satisfy the requirement for one of the following specialisations:

Chemical and Materials Engineering
Requirement:
Taught Masters
• at least 45 points from CHEMMAT 713, 721, 724, 752, 771–773, 788, 789, MECHENG 741, 742
• up to 75 points from CHEMMAT 712, 722, 753–757
• up to 45 points from appropriate 600 and 700 level courses offered at this University, subject to approval by the Head of Department
Civil Engineering

Requirement:

Taught Masters

• at least 45 points from CIVIL 702, 704, 707–710, 717, 723–725, 740, 745, 763–766, 769–772, 787–789, 792, 795, but no more than 45 points from CIVIL 787–789, 795
• up to 75 points from CIVIL 701, 703, 706, 711, 713–716, 718–722, 726, 727, 730–734, 741, 742, 744, 750, 754, 758–762, 767, 768, 773–775, 782, 790, 791, ENGGEN 769
• up to 30 points from appropriate 600 and 700 level courses offered at this University, subject to approval by the Head of Department

Computer Systems Engineering

Requirement:

Taught Masters

• at least 45 points from COMPSYS 701, 704, 705, 726–729, 787–789, 795, ELECTENG 704, 706, 734, SOFTENG 701, 751, but no more than 45 points from COMPSYS 787–789, 795
• up to 75 points from COMPSYS 703, 706, 707, 710, 711, 713–715, 721–725, ELECTENG 722, 726, 728, 732, 733, SOFTENG 761
• up to 30 points from appropriate 600 and 700 level courses offered at this University, subject to approval by the Head of Department

Construction Management

Requirement:

Taught Masters

• at least 45 points from CIVIL 704, 707, 709, 765, 787–789, 795, but no more than 45 points from CIVIL 787–789, 795
• up to 75 points from CIVIL 703, 708, 716, 743, 790, 791, 792, ENGSCI 755, other approved 600 and 700 level courses offered at this University

Electrical and Electronic Engineering

Requirement:

Taught Masters

• at least 45 points from COMPSYS 726, 727, ELECTENG 704, 706, 734, 737–741, 787–789, 795, but no more than 45 points from ELECTENG 787–789, 795
• up to 75 points from ELECTENG 701, 703, 705, 709, 721, 722, 724, 726, 728, 731–733, 735, 736
• up to 30 points from appropriate 600 and 700 level courses offered at this University, subject to approval by the Head of Department

Engineering Science

Requirement:

Taught Masters

• 45 points from ENGSCI 787–789, 795
• up to 75 points from BIOMENG 771, ENGSCI 711, 712, 721, 740–742, 745, 753, 760–763, 765, 766, 768, 769, 772, GEOTHERM 785
• up to 30 points from appropriate 600 and 700 level courses offered at this University, subject to approval by the Head of Department

Environmental Engineering

Requirement:

Taught Masters

• at least 45 points from ENVENG 701–703, 705, 746, 747, 750, 787–789, 795, but no more than 45 points from ENVENG 787–789, 795
• up to 75 points from ENVENG 706, 707, 719, 740, 744, 752
• up to 30 points from appropriate ENVSCI 600 and 700 level courses, subject to approval by the Head of Department
• up to 30 points from appropriate 600 and 700 level courses offered at this University, subject to approval by the Head of Department

Food Process Engineering

Requirement:

Research Masters

• 90 points: CHEMMAT 776 or 777 Research Portfolio
• 30 points from CHEMMAT 771–773

Taught Masters

• 30 points from CHEMMAT 771–773
• a further 30 points from BIOSCI 741, CHEMMAT 756, 757, 771–773, FOODSCI 703, 706–709, or other approved 600 or 700 level courses
• 60 points: CHEMMAT 774 or 775 Project

Geotechnical Engineering

Prerequisite: CIVIL 324 or 728 or equivalent

Requirement:

Taught Masters

• 30 points from CIVIL 751, 752, 788, 789
• at least 15 points from CIVIL 702, 723–725
• up to 60 points from CIVIL 701, 720–722, 726, 728, 741, 754, ENGSCI 711, ENVENG 746, 752
• at least 15 points but no more than 30 points from EARTHSCI 705, 770–772
With the prior approval of the Head of Department, up to 45 points may be replaced by other appropriate 600 and 700 level courses offered at this or another university

Light Metals Reduction Technology

The MEngSt in Light Metals Reduction Technology was withdrawn in 2018.

Mechanical Engineering

Requirement:

Taught Masters

• at least 45 points from MECHENG 711, 714, 719, 728, 741, 742, 751, 753, 787–789, 795, but no more than 45 points from MECHENG 787–789, 795
• up to 75 points from ENNGEN 705, MECHENG 701, 702, 712, 713, 715, 717, 722, 724, 726, 735, 736, 743, 747, 752, 771–774
• up to 30 points from appropriate 600 and 700 level courses offered at this University, subject to approval by the Head of Department

Mechatronics Engineering

Requirement:

Taught Masters

• at least 45 points from MECHENG 710, 719, 720, 728, 730, 751, 753, 787–789, 795, but no more than 45 points from MECHENG 787–789, 795
• up to 75 points from COMPSYS 704, 705, 723, 724, 726, ELECTENG 706, 728, 733, ENNGEN 705, 770, MECHENG 709, 722, 724, 726, 735, 736, 752
• up to 30 points from appropriate 600 and 700 level courses offered at this University, subject to approval by the Head of Department

Medical Devices and Technologies

Requirement:

Research Masters

• 30 points from ENNGEN 770, 771 or other approved 600 or 700 level courses
• 90 points: ENNGEN 793 Research Portfolio

Taught Masters

• 30 points: ENNGEN 770, 771
• 30 points from CIVIL 703, CHEMMAT 740, 741, ENNGEN 705, MECHENG 728, 730, 752, MEDSCI 703, PHYSICS 780, or other approved 600 or 700 level courses offered at this University
• 60 points: ENNGEN 791 Project

Plastics

Requirement:

Research Masters

• 30 points: CHEMMAT 732
• 60 points from CHEMMAT 740, 741, 742, 743, POLYMER 701, 702, 711
• 30 points: CHEMMAT 788 or 789 Project
With the prior approval of the Head of Department, up to 45 points may be replaced by other appropriate 600 and 700 level courses offered at this or another university
Software Engineering

Requirement:
Taught Masters
• at least 45 points from COMPSYS 704, 705, 726, 727, SOFTENG 701, 751, 754, 755, 787–789, 795, but no more than 45 points from SOFTENG 787–789, 795
• up to 75 points from COMPSCI 711, 715, 725, 734, SOFTENG 702, 710, 711, 750, 752, 753, 761, 762
• up to 30 points from appropriate 600 and 700 level courses offered at this University, subject to approval by the Head of Department

Transportation Engineering

Requirement:
Taught Masters
• at least 45 points from CIVIL 763–766, 769–772, 779, 787–789, but no more than 45 points from CIVIL 779, 787–789

A student who has to complete 180 points must satisfy the requirement for one of the following specialisations:

Civil Engineering

Requirement:
Taught Masters
• at least 45 points from CIVIL 702, 704, 707–710, 717, 723–725, 740, 745, 763–766, 769–772, 787–789, 792, 795, but no more than 60 points from CIVIL 787–789, 795
• up to 135 points from CIVIL 701, 703, 706, 711, 713–716, 718–722, 726, 727, 730–734, 741, 742, 744, 750, 754, 758–762, 767, 768, 773–775, 782, 790, 791, ENGGEN 769
• up to 45 points from appropriate 600 and 700 level courses offered at this University, subject to approval by the Head of Department

Computer Systems Engineering

Requirement:
Taught Masters
• at least 45 points from COMPSYS 701, 704, 705, 726–729, 787–789, 795, ELECTENG 704, 706, 734, SOFTENG 701, 751, but no more than 60 points from COMPSYS 787–789, 795
• up to 135 points from COMPSYS 703, 706, 707, 710, 711, 713–715, 721–725, ELECTENG 722, 726, 728, 732, 733, SOFTENG 761
• up to 45 points from appropriate 600 and 700 level courses offered at this University, subject to approval by the Head of Department

Construction Management

Requirement:
Taught Masters
• at least 45 points from CIVIL 704, 707, 709, 765, 787–789, 795, but no more than 45 points from CIVIL 787–789, 795
• at least 30 points from CIVIL 703, 708, 716, 791, 792
• up to 105 points from CIVIL 743, 790, ENGSCI 755, other approved 600 and 700 level courses offered at this University

Electrical and Electronic Engineering

Requirement:
Taught Masters
• at least 45 points from COMPSYS 704, 705, 726, 727, ELECTENG 704, 706, 734, 737–741, 787–789, 795, but no more than 60 points from ELECTENG 787–789, 795
• up to 135 points from ELECTENG 701, 703, 705, 709, 721, 722, 724, 726, 728, 731–733, 735, 736
• up to 45 points from appropriate 600 and 700 level courses offered at this University, subject to approval by the Head of Department

Engineering Science

Requirement:
Taught Masters
• at least 45 points, but no more than 60 points, from ENGSCI 787–789, 795
• up to 135 points from BIOMENG 771, ENGSCI 711, 712, 721, 740–742, 745, 753, 760–763, 765, 766, 768, 769, 772, GEOTHERM 785
• up to 45 points from appropriate 600 and 700 level courses offered at this University, subject to approval by the Head of Department

Environmental Engineering

Requirement:
Taught Masters
• at least 45 points from ENVENG 701–703, 705, 746, 747, 750, 787–789, 795, but no more than 60 points from ENVENG 787–789, 795
• up to 75 points from ENVENG 706, 707, 719, 740, 744, 752
• up to 45 points from appropriate ENVSCI 600 and 700 level courses, subject to approval by the Head of Department
• up to 45 points from appropriate 600 and 700 level courses offered at this University, subject to approval by the Head of Department

Mechanical Engineering

Requirement:
Taught Masters
• at least 45 points from MECHENG 711, 714, 719, 728, 730, 751, 753, 787–789, 795, but no more than 60 points from MECHENG 787–789, 795
• up to 135 points from COMPSYS 704, 705, 723, 724, 726, ELECTENG 706, 728, 733, ENGGEN 705, 770, MECHENG 709, 722, 724, 726, 735, 736, 752
• up to 45 points from appropriate 600 and 700 level courses offered at this University, subject to approval by the Head of Department

Mechatronics Engineering

Requirement:
Taught Masters
• at least 45 points from MECHENG 710, 719, 720, 728, 730, 751, 753, 787–789, 795, but no more than 45 points from MECHENG 787–789, 795
• up to 135 points from COMPSYS 704, 705, 723, 724, 726, ELECTENG 706, 728, 733, ENGGEN 705, 770, MECHENG 709, 722, 724, 726, 735, 736, 752
• up to 45 points from appropriate 600 and 700 level courses offered at this University, subject to approval by the Head of Department

Yacht Engineering

The MEngSt in Yacht Engineering was suspended in 2015. Students who have a current enrolment in this specialisation should contact their faculty for advice regarding completion.

Requirement:
Taught Masters
• 45 points: MECHENG 775 or 776
• 75 points: MECHENG 711, 717–774
With the prior approval of the Head of Department, up to 45 points may be replaced by other appropriate 600 and 700 level courses offered at this or another university
Software Engineering

Requirement:
Taught Masters
• at least 45 points from COMPSYS 704, 705, 726, 727, SOFTENG 701, 751, 754, 755, 787–789, 795, but no more than 60 points from SOFTENG 787–789, 795
• up to 135 points from COMPSCI 711, 715, 725, 734, SOFTENG 702, 710, 711, 750, 752, 753, 761, 762
• up to 45 points from appropriate 600 and 700 level courses offered at this University, subject to approval by the Head of Department

Transportation Engineering

Requirement:
Taught Masters
• at least 45 points from CIVIL 763–766, 769–772, 779, 787–789, but no more than 60 points from CIVIL 779, 787–789
• 30 points from CIVIL 660, 681, 758, 759
• up to 105 points from CIVIL 760–762, 767, 768, 773–775
With the prior approval of the Head of Department, up to 45 points may be replaced by appropriate courses offered at this or another university

Yacht Engineering

The MEngSt in Yacht Engineering was suspended in 2015. Students who have a current enrolment in this specialisation should contact their faculty for advice regarding completion.

Requirement:
Research Masters
• 90 points: MECHENG 793
• 75 points: MECHENG 711, 771–774
• 15 points from appropriate 600 and 700 level courses offered at this University, subject to approval by the Head of Department
With the prior approval of the Head of Department, up to 45 points may be replaced by other appropriate courses offered at this or another university

Taught Masters
• 45 points: MECHENG 775 or 776
• 75 points: MECHENG 711, 771–774
• 60 points from appropriate 600 and 700 level courses offered at this University, subject to approval by the Head of Department
With the prior approval of the Head of Department, up to 45 points may be replaced by other appropriate courses offered at this or another university

Graduate Diploma in Engineering – GradDipEng

The regulations for this graduate diploma are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission
1 In order to be admitted to this programme, a student needs to have:
   a either
      (i) completed the requirements for any Bachelors degree approved by Senate or its representative
      or
      (ii) received a professional qualification in Engineering approved by Senate or its representative
      or
      (iii) attained an equivalent level of practical experience in the engineering profession as approved by Senate or its representative
   or
   b attained a level of technical competence in Engineering equivalent to at least Parts I and II of the Degree of Bachelor of Engineering (Honours), as may be approved by the Dean of Faculty of Engineering.

Duration and Total Points Value
2 A student enrolled for this graduate diploma must follow a programme equivalent to two full-time semesters and pass courses with a total value of 120 points.

Structure and Content
3 Of the 120 points required for this graduate diploma, a student must pass:
   a at least 45 points from courses, excluding Project courses, listed in the Master of Engineering Studies Schedule.
   b up to 75 points from:
      (i) courses, excluding Project courses, listed for Parts III and IV in the Bachelor of Engineering (Honours) Schedule
      (ii) courses listed in the Graduate Diploma in Engineering Schedule
      (iii) up to 30 points from courses listed for Parts I and II in the Bachelor of Engineering (Honours) Schedule, with the specific approval of the Dean of Faculty of Engineering.

4 A student admitted to this programme must complete the University of Auckland Academic Integrity Course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

5 The programme for each student requires the approval of the Dean of Faculty of Engineering.

Variations
6 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement
7 These regulations came into force on 1 January 2006. The 2004 regulations for the Graduate Diploma in Engineering were thereby repealed.
Graduate Diploma in Engineering (GradDipEng) Schedule

Courses available:
• ENGGEN 601, 602, 622, 623

Graduate Diploma in Engineering (Transportation) – GradDipEng(Transp)

The GradDipEng(Transp) was withdrawn in 2018.

Postgraduate Certificate in Earthquake Engineering – PGCertEqEng

The regulations for this postgraduate certificate are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission
1 In order to be admitted to this postgraduate certificate, a student needs to have completed:
   a the requirements for the Degree of Bachelor of Engineering or Bachelor of Engineering (Honours) from this University in a relevant subject, or an equivalent degree qualification as approved by Senate or its representative, with a Grade Point Average of 5.0 or higher in 120 points above Stage III or its equivalent
   or
   b (i) the requirements for a Degree of Bachelor of Engineering or Bachelor of Engineering (Honours) from this University in a relevant subject, or an equivalent degree qualification as approved by Senate or its representative, with a Grade Point Average of 3.0 or higher, or its equivalent and
   (ii) at least three years of relevant work experience approved by the Dean of Faculty of Engineering
   or
   c a relevant Bachelors degree as approved by Senate or its representative, with a Grade Point Average of 5.0 or higher in 75 points above Stage III.

Duration and Total Points Value
2 A student admitted to this postgraduate certificate must:
   a pass courses with a total value of 60 points
   and
   b complete within the time limit specified in the General Regulations – Postgraduate Certificates.

3 The total enrolment for this postgraduate certificate must not exceed 90 points.

Structure and Content
4 Of the 60 points required for this postgraduate certificate, a student must pass:
   a 15 points: CIVIL 720
   and
   b 45 points from courses listed in the Master of Earthquake Engineering Schedule, excluding CIVIL 793 and 794.

5 A student admitted to this programme must complete the University of Auckland Academic Integrity Course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

Variations
6 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement
7 These regulations came into force on 1 January 2019.

Postgraduate Certificate in Engineering – PGCertEng

The regulations for this postgraduate certificate are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission
1 In order to be admitted to this programme, a student needs to have completed the requirements for:
   either
   a the Degree of Bachelor of Engineering or Bachelor of Engineering (Honours) from the University of Auckland or
   b an equivalent degree qualification, as approved by Senate or its representative, at a level deemed satisfactory by the Dean of Faculty of Engineering
or

c  an appropriate Bachelors degree, as approved by Senate or its representative, at a level deemed satisfactory by the Dean of Faculty of Engineering.

2 In exceptional circumstances Senate or its representative may approve admission of a student who has not met the above requirement, but who has attained an equivalent qualification or professional experience in the engineering profession.

Duration and Total Points Value
3 A student enrolled for this postgraduate certificate must:
   a  pass courses with a total value of 60 points
   and
   b  complete within the time limit specified in the General Regulations – Postgraduate Certificates.

4 The total enrolment for this postgraduate certificate must not exceed 90 points.

Structure and Content
5 Of the 60 points required for this postgraduate certificate, a student must pass:
   either
   a  60 points from courses, excluding project courses, listed in the Master of Engineering Studies Schedule, of which at least 30 points must be from courses in Chemical and Materials Engineering, Civil Engineering, Computer Systems Engineering, Electrical and Electronic Engineering, Energy Technology, Engineering General, Engineering Science, Environmental Engineering, Mechanical Engineering, or Software Engineering
   or
   b  60 points as specified in the specialisation listed in the Postgraduate Certificate in Engineering Schedule.

6 This certificate will be conferred with an endorsement as to an area of specialisation only if Regulation 5b is satisfied.

7 A student admitted to this programme must complete the University of Auckland Academic Integrity Course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

Variations
8 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement
9 These regulations came into force on 1 January 2014. The 2010 regulations for the Postgraduate Certificate in Engineering were thereby repealed.

Postgraduate Certificate in Engineering Project Management – PGCertEPM

The regulations for this postgraduate certificate are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission
1 In order to be admitted to this postgraduate certificate, a student needs to have:
   a  been enrolled in the Degree of Master of Engineering Project Management
   and
   b  passed at least 30 points for that degree
   and
   c  been recommended for admission by the Dean or nominee.

Duration and Total Points Value

The Degree of Bachelor of Laws – LLB

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Duration and Total Points Value
1. A student enrolled for this degree must follow a programme of the equivalent of eight full-time semesters and pass courses with a total value of 480 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

Structure and Content
2. Of the 480 points required for this degree, a student must pass:
   a. 465 points: Part I, including LAW 121G, and Parts, II, III and IV as listed in the Bachelor of Laws Schedule
   and
   b. 15 points from courses offered in either the General Education Open Schedule or the General Education Faculty Schedule approved for this degree and the Academic Integrity course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

3. a. Except as permitted under Regulation 9, a student may not enrol for Part II unless Part I has been completed.
   b. Each student must pass Parts II, III and IV in the order set out in the Bachelor of Laws Schedule unless approval to vary the order is given by the Dean of Faculty of Law.
   
   Note: A student completing Part II will be permitted to commence Part III concurrently, subject to prerequisites and points limits.

4. A student who is required to meet the Academic English Language Requirement, as specified in the Enrolment and Programme Regulations, Academic English Language Requirement, of the University Calendar, may substitute an academic English language course approved by Senate or its representative for 15 points of General Education.

General Education Exemptions
5. A student is exempted from the requirement to pass courses offered in the General Education Schedules who has:
   either
   a. completed an undergraduate degree at a tertiary institution
   or
   b. commenced study for this degree at a tertiary institution before 1 January 2006
   or
   c. been admitted to this degree having completed 120 points or more of degree-level study at another tertiary institution.

6. A student who has been fully or partially exempted from the requirement to pass courses offered in the General Education Schedules is nonetheless required to complete the Academic Integrity course.

Written Work and Practical Requirements
7. In order to complete the requirements of LAW 400 or LAW 499 under Regulation 2 above, a student must carry out such legal research assignments and practical application of the law as the Faculty of Law may require.

Conjoint Degrees
8. Special arrangements apply where this degree is taken as a component degree of an approved conjoint combination. The specific requirements and a complete list of the conjoint degrees available are set out in the Conjoint Degrees section of the University Calendar.

Graduate Admission
9. A student who is a graduate or graduand of any university in New Zealand, or who is granted admission ad eundem statum with graduate status under the Admission Regulations, may be granted credit of up to 75 points towards LLB Part I. Such a student will normally be required to pass satisfactorily LAW 121G, 131 and 141 before applying for admission to LLB Part II.

Note:
(i) Admission to Part II will be subject to selection, according to the approved selection criteria.
(ii) In exceptional circumstances the Dean of Faculty of Law may permit a graduate or graduand to be admitted directly to LLB Part II without having passed LAW 121G, 131 and 141, provided that the applicant has demonstrated
to the satisfaction of the Dean an aptitude for legal studies, and provided that LAW 121G, 131 and 141 are taken concurrently with the Part II course(s).

Courses from Other Programmes
10 a In place of elective Law courses totalling not more than 45 points for this degree, a student may take courses at Stage II or above offered for other programmes at this University, if they are related to the student’s Law studies and approved by the Dean of Faculty of Law.

b While approval of such courses is normally given before enrolment, the Dean of Faculty of Law may in special cases apply this provision to courses previously passed for another programme. Where the Dean approves such courses, they are to be reassigned from that other programme to this degree.

Research Papers
11 a With the prior approval of the teacher of the course and the Dean of Faculty of Law, a student enrolled for this degree may elect to present a research paper in lieu of an examination in any elective law course.

b This regulation applies also to a student taking any elective Law course or courses for any degree other than this, or for any diploma or for a Certificate or Certificates of Proficiency.

Variations
12 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement
13 These regulations came into force on 1 January 2006. The 1996 regulations for the Degree of Bachelor of Laws were thereby repealed.

The Degree of Bachelor of Laws (Honours) – LLB(Hons)

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission
1 a No student on whom the Degree of Bachelor of Laws has already been conferred may enrol for this degree.

b At the discretion of the Dean of Faculty of Law, a student who has completed Parts I and II for the Degree of Bachelor of Laws may be permitted to enrol for this degree.

c Where the Faculty of Law approves enrolment for the Degree of Bachelor of Laws (Honours) the courses previously passed for the Degree of Bachelor of Laws will be reassigned to the Degree of Bachelor of Laws (Honours).

Duration and Total Points Value
2 A student enrolled for this degree must pass courses with a total value of 540 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

Structure and Content
3 Of the 540 points required for this degree, a student must pass:
  a 480 points from the Degree of Bachelor of Laws Schedule
and
b 60 points from courses listed in the Bachelor of Laws (Honours) Schedule.

4 All the provisions and requirements of the Degree of Bachelor of Laws apply also to a student enrolled for this degree, including the provisions concerning written work and practical requirements, courses in other faculties and research papers, and the General Education requirements.

5 A student admitted to this programme must complete the University of Auckland Academic Integrity Course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

Conjoint Degrees
6 Special arrangements apply where this degree is taken as a component degree of an approved conjoint combination for which the specific requirements and a complete list of the conjoint degrees available are set out in the Conjoint Degrees section of the University Calendar.

Dissertation
7 a The dissertation is to be carried out under the guidance of a supervisor appointed by Senate or its representative, on the recommendation of the Dean of Faculty of Law.

b The dissertation topic must be approved by the Dean of Faculty of Law prior to enrolment.

c A student must enrol for the dissertation in the semester following completion of Part IV of the schedule for the Degree of Bachelor of Laws.

d The dissertation must be completed and submitted by the last day of lectures in the semester of enrolment.

e In exceptional circumstances beyond the student’s control, Senate or its representative may approve a limited extension of time, not exceeding two months, for the completion of the dissertation. Where an extension of time is approved, students will be required to be enrolled and pay tuition fees at the rate of 10 points for each two-month period or part thereof. This will only apply when the student’s current enrolment period in the course has ended.

Award of Honours
8 This degree will be awarded only where a student’s work throughout the entire programme, inclusive of the courses required for the Degree of Bachelor of Laws, is of a sufficiently high standard, as determined by the Faculty of Law. In assessing the standard of a student’s work in this programme, the courses taught by other faculties that are taken as part of Part I will not be taken into account.

Withdrawal from Honours
9 A student whose work does not satisfy the standard specified in Regulation 8, or who at any time chooses to withdraw from Honours, may transfer from the Degree of Bachelor of Laws (Honours) to the Degree of Bachelor of Laws. In that case the courses already passed for, or credited to, the Degree of Bachelor of Laws (Honours) may be reassigned to the Degree of Bachelor of Laws, except for any dissertation taken under Regulation 3b.

Variations
10 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement
11 These regulations came into force on 1 January 2006. The 1996 regulations for the Degree of Bachelor of Laws (Honours) were thereby repealed.

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Degree Requirements
1 Students who enrol for the Degree of Bachelor of Medical Imaging (Honours) may be awarded the Degree of Bachelor of Medical Imaging if, having passed all courses and completed all other requirements for a BM edImag(Hons), their performance in the courses is deemed by the Head of the School of Medical Sciences to be not of Honours standard.

Note: Honours standard will normally imply completion of all courses in the minimum time and with a weighted grade point average exceeding a minimum set by the University.

The Degree of Bachelor of Medicine and Bachelor of Surgery – MBChB
The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission
1 In order to be admitted to this programme, a student needs to have:
   a either
      (i) completed the requirements for the courses listed in Part I of the MBChB Schedule on a full-time basis, with a Grade Point Average of 6.0 or higher
      or
      (ii) successfully completed, normally in the minimum academic time and no more than five years prior to the date of application, a degree, postgraduate degree or postgraduate diploma from a New Zealand university with a Grade Point Average of 6.0 or higher or equivalent
      or
      (iii) met the requirements of a special entry scheme
   and
   b demonstrated in accordance with approved selection criteria the qualities determined by the Faculty of Medical and Health Sciences as appropriate for a person seeking a qualification as a doctor. This requirement will normally include an interview.

2 a Students selected for admission under Regulation 1a(i) will be admitted to MBChB Part II.
   b Students selected for admission under Regulation 1a(ii) or Regulation 1a(iii) may be required to successfully complete some or all of the courses listed in Part I in the schedule to these regulations before proceeding to Part II.

Duration and Total Points Value
3 a A student enrolled for this degree must follow a programme of six full-time years and pass courses with a total value of 720 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.
   b Enrolment for the degree will normally be continuous. In exceptional circumstances Senate or its representative, on the recommendation of the Head of Programme, may grant a period of suspension from enrolment not normally exceeding two consecutive semesters.
c Interrupted study may be resumed only with the approval of, and on conditions set by, Senate or its representative.

Structure and Content
4 Of the 720 points required for this degree, a student must pass:
  a 705 points from Parts I, II, III, IV, V and VI, as listed in the Bachelor of Medicine and Bachelor of Surgery Schedule.

  b (i) 15 points from courses offered in either the General Education Open Schedule or the General Education Faculty Schedule approved for this degree.

  (ii) A student who is required to meet the Academic English Language Requirement, as specified in the Enrolment and Programme Regulations, Academic English Language Requirement, of the University Calendar, may substitute an academic English language course approved by Senate or its representative for 15 points of General Education.

  (iii) In order to complete the requirements for General Education students must pass the Academic Integrity course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

5 a However, where a student has been granted admission with credit, or in exceptional circumstances which Senate or its representative approves, a student may be directly admitted to Part II, Part III or Part IV.

  b Each Part of the programme is to be completed to the satisfaction of Senate or its representative before a student is permitted to enrol for the next Part.

  c At the discretion of Senate or its representative, a student who fails any of Parts II-VI may be declined permission to re-enrol in the programme as a whole.

  d A student who fails twice to pass the same Part will not be permitted to continue with this degree.

General Education Exemptions
6 a A student is exempted from the requirement to pass courses offered in the General Education Schedules who has:

  either

  (i) completed an undergraduate degree at a tertiary institution

  or

  (ii) commenced study for this degree at a tertiary institution before 1 January 2006

  or

  (iii) been admitted to this degree having completed 120 points or more of degree-level study at another tertiary institution.

  b A student who has been fully or partially exempted from the requirement to pass courses offered in the General Education Schedules is nonetheless required to complete the Academic Integrity course.

Practical Requirements
7 A student enrolled for this degree must carry out satisfactorily such practical or clinical work as the Faculty of Medical and Health Sciences may require.

Variations
8 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Fitness to Practise Requirements
9 a In order to complete the requirements for this degree, a student must meet the applicable fitness to practise requirements for this programme, as outlined in the Faculty of Medical and Health Sciences’ Fitness to Practise Policy.

  b Where a student is being investigated with regard to a fitness to practise matter under the policy, and there is a concern that the student’s attitudes or behaviour are inappropriate, offensive, disruptive, or may pose a risk of harm to the welfare of any party, that student’s attendance at lectures, classes and any clinical, industry or practise attachments may be suspended by the Deputy Dean of the Faculty of Medical and Health Sciences pending the outcome of the investigation.

  c If a student is found, after due and fair inquiry, and taking into account any written response from the student, to be not fit to practise, the student’s enrolment in the programme may be suspended or terminated in accordance with the policy.

  d Where a student’s enrolment in the programme has been terminated under Regulation 9c, any application to re-enrol may be declined.
e A student whose enrolment is suspended or terminated under Regulation 9c or their application to re-enrol declined under Regulation 9d may apply to the Deputy Vice-Chancellor (Academic) for the appeal of that decision in accordance with the policy.

Commencement
10 These regulations came into force on 1 January 2019. The 2006 regulations for the Degree of Bachelor of Medicine and Bachelor of Surgery were thereby repealed.

The Degree of Bachelor of Nursing – BNurs

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Duration and Total Points Value
1 A student enrolled for this degree must follow a programme of six full-time semesters and pass courses with a total value of 360 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

Structure and Content
2 a Of the 360 points required for this degree, a student must pass:

   (i) 345 points from all Parts and courses listed in the Bachelor of Nursing Schedule.

   (ii) 15 points from courses offered in either the General Education Open Schedule or the General Education Faculty Schedule approved for this degree.

   (b) A student who is required to meet the Academic English Language Requirement, as specified in the Enrolment and Programme Regulations, Academic English Language Requirement, of the University Calendar, may substitute an academic English language course approved by Senate or its representative for 15 points of General Education.

   (c) In order to complete the requirements for General Education students must pass the Academic Integrity course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

b Each Part must normally be completed before the next Part may be taken. However, a student who has failed to pass either Parts I or II in their entirety may be allowed, at the discretion of Senate or its representative, to enrol for the course or courses needed to complete that Part together with a course or courses towards the next successive Part.

c At the discretion of Senate or its representative, a student who fails any of Parts I-III may be declined permission to re-enrol in the programme as a whole.

General Education Exemptions
3 a A student is exempted from the requirement to pass courses offered in the General Education Schedules who has:

   either
   (i) completed an undergraduate degree at a tertiary institution
   or
   (ii) commenced study for this degree at a tertiary institution before 1 January 2006
   or
   (iii) been admitted to this degree having completed 120 points or more of degree-level study at another tertiary institution.

b A student who has been exempted from the requirement to pass courses offered in the General Education Schedules must substitute 15 points from courses approved by the Head of School of Nursing.
A student who has been fully or partially exempted from the requirement to pass courses offered in the General Education Schedules is nonetheless required to complete the Academic Integrity course.

Practical Requirements
4 A student enrolled for this degree must carry out satisfactorily such practical or clinical work as the Head of School of Nursing may require.

English Language Requirements
5 A student enrolled for this degree must demonstrate competence in the English language, by passing NURSING 199, as prescribed by the School of Nursing, before being permitted to enrol for Part II.

Fitness to Practise Requirements
6 a In order to complete the requirements for this degree, a student must meet the applicable fitness to practise requirements for this programme, as outlined in the Faculty of Medical and Health Sciences’ Fitness to Practise Policy.

b Where a student is being investigated with regard to a fitness to practise matter under the policy, and there is a concern that the student’s attitudes or behaviour are inappropriate, offensive, disruptive, or may pose a risk of harm to the welfare of any party, that student’s attendance at lectures, classes and any clinical, industry or practise attachments may be suspended by the Deputy Dean of the Faculty of Medical and Health Sciences pending the outcome of the investigation.

c If a student is found, after due and fair inquiry, and taking into account any written response from the student, to be not fit to practise, the student’s enrolment in the programme may be suspended or terminated in accordance with the policy.

d Where a student’s enrolment in the programme has been terminated under Regulation 6c, any application to re-enrol may be declined.

e A student whose enrolment is suspended or terminated under Regulation 6c or their application to re-enrol declined under Regulation 6d may apply to the Deputy Vice-Chancellor (Academic) for the appeal of that decision in accordance with the policy.

Conjoint Degrees
7 Special arrangements apply where this degree is taken as a component degree of an approved conjoint combination. The specific requirements and a complete list of the conjoint degrees available are set out in the Conjoint Degrees section of the University Calendar.

Variations
8 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement
9 These regulations came into force on 1 January 2006. The 2000 regulations for the Degree of Bachelor of Nursing were thereby repealed.

The Degree of Bachelor of Optometry – BOptom

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission
1 In order to be admitted to this programme a student needs to have:
   a (i) satisfactorily completed a prescribed 120 point Science year at the University of Auckland or equivalent programme of study

and

(ii) be a New Zealand citizen, or have Permanent Resident status

or

b (i) satisfactorily completed a Bachelors degree with science content deemed appropriate by Senate or its representative
and
(ii) be a New Zealand citizen, or have Permanent Resident status
or
c (i) satisfactorily completed a programme of study in Science deemed appropriate by Senate or its representative
and
(ii) have International Student status.

2 Admission to the programme is at the discretion of Senate or its representative, on the recommendation of the Director of the programme.

Duration and Total Points Value
3 A student enrolled for this degree must follow a programme of the equivalent of ten full-time semesters and pass courses with a total value of 600 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

Structure and Content
4 Of the 600 points required for this degree, a student must pass:
   a 570 points from Parts I, II, III, IV and V as listed in the Bachelor of Optometry Schedule
   and
   b (i) 30 points from courses offered in either the General Education Open Schedule or the General Education Faculty Schedule approved for this degree or from a combination of these schedules.
   (ii) A student who is required to meet the Academic English Language Requirement, as specified in the Enrolment and Programme Regulations, Academic English Language Requirement, of the University Calendar, may substitute an academic English language course approved by Senate or its representative for 15 points of General Education.
   (iii) In order to complete the requirements for General Education students must pass the Academic Integrity course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

5 In exceptional circumstances up to 120 points of credit as approved by the Head of School may be substituted for Part I or parts thereof.

6 Each Part must normally be completed before the next Part may be taken. However, a student who has failed to pass one of those Parts in its entirety may be allowed, at the discretion of Senate or its representative, to enrol for the course or courses needed to complete that Part together with a course or courses towards the next Part.

7 Study for this degree must be pursued in consecutive semesters. Interrupted study may be resumed only with the approval of, and on conditions set by, Senate or its representative.

General Education Exemptions
8 a A student is exempted from the requirement to pass courses offered in the General Education Schedules who has:
   either
   (i) completed an undergraduate degree at a tertiary institution
   or
   (ii) commenced study for this degree at a tertiary institution before 1 January 2006
   or
   (iii) been admitted to this degree having completed 240 points or more of degree-level study at another tertiary institution.

b A student who has been exempted from the requirement to pass courses offered in the General Education Schedules must substitute 30 points from courses listed in the Bachelor of Science Schedule.

c A student admitted to this degree, who has completed between 120 and 235 points inclusive of degree-level study at another tertiary institution, must pass:
   (i) 15 points from the courses offered in the General Education Schedules
   and
   (ii) a further 15 points from other courses listed in the Bachelor of Science Schedule.

d A student who has been fully or partially exempted from the requirement to pass courses offered in the General Education Schedules is nonetheless required to complete the Academic Integrity course.

Enrolment for Two Programmes
9 A student may not be enrolled in this degree at the same time as in another programme, unless special permission is given by Senate or its representative.
Practical Requirements
10 a A student enrolled for this degree must carry out satisfactorily such practical or clinical work as the Faculty of Medical and Health Sciences may require.

b In any course that includes both a final written examination and practical or clinical work, a student must pass both the final written examination and the practical or clinical work to pass that course as a whole. However, a student who passes the practical or clinical work but fails the final written examination may, at the discretion of the Head of School, have the result for the practical or clinical work for that failed course carried forward when the course is repeated.

c A student who repeats any course may also be required to undertake such additional practical or clinical work as the Head of School of Optometry and Vision Science determines.

d Where a weakness occurs in the clinical practice component, in accordance with examination regulation 21, students will be required to be enrolled and pay tuition fees at the rate of 10 points for each two-month period or part thereof. This provision will only apply when the student’s current enrolment period has ended.

Fitness to Practise Requirements
11 a In order to complete the requirements for this degree, a student must meet the applicable fitness to practise requirements for this programme, as outlined in the Faculty of Medical and Health Sciences’ Fitness to Practise Policy.

b Where a student is being investigated with regard to a fitness to practise matter under the policy, and there is a concern that the student’s attitudes or behaviour are inappropriate, offensive, disruptive, or may pose a risk of harm to the welfare of any party, that student’s attendance at lectures, classes and any clinical, industry or practise attachments may be suspended by the Deputy Dean of the Faculty of Medical and Health Sciences pending the outcome of the investigation.

c If a student is found, after due and fair inquiry, and taking into account any written response from the student, to be not fit to practise, the student’s enrolment in the programme may be suspended or terminated in accordance with the policy.

d Where a student’s enrolment in the programme has been terminated under Regulation 11c, any application to re-enrol may be declined.

e A student whose enrolment is suspended or terminated under Regulation 11c or their application to re-enrol declined under Regulation 11d may apply to the Deputy Vice-Chancellor (Academic) for the appeal of that decision in accordance with the policy.

Variations
12 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Honours
13 a This degree may be awarded with Honours where a student’s overall grade is sufficiently high. There are two classes of Honours: First Class Honours and Second Class Honours. Second Class Honours are awarded in either First Division or Second Division.

b Honours may normally be awarded only if the requirements for this degree are completed within ten semesters of initial enrolment for the degree. In exceptional circumstances however, Senate or its representative may approve an extension of this period for not more than two further semesters.

Commencement
14 These regulations came into force on 1 January 2011. The 2006 regulations for the Degree of Bachelor of Optometry were thereby repealed.

(i) completed an undergraduate degree at a tertiary institution

or

(ii) been admitted to this degree having completed 120 points or more of degree-level study at another tertiary institution.

b A student who has been exempted from the requirement to pass courses offered in the General Education Schedules must substitute 15 points from other courses offered at this University in consultation with the Head of School of Medical Sciences.

c A student who has been fully or partially exempted from the requirement to pass courses offered in the General Education Schedule is nonetheless required to complete the Academic Integrity course.

Practical Requirements
8 A student enrolled for this degree must carry out satisfactorily such practical or clinical work as the Head of School of Medical Sciences may require.

Honours
9 a This degree may be awarded with Honours where a student’s overall grade is sufficiently high. There are two classes of Honours: First Class Honours and Second Class Honours. Second Class Honours are awarded in either the First Division or Second Division.

b Students who have passed all courses and completed all other requirements for a BMedImag(Hons) but whose performance in the courses is deemed by the Head of the School of Medical Sciences to be not of Honours standard will be awarded the degree of Bachelor of Medical Imaging.
Fitness to Practise Requirements

10 a In order to complete the requirements for this degree, a student must meet the applicable fitness to practise requirements for this programme, as outlined in the Faculty of Medical and Health Sciences’ Fitness to Practise Policy.

b Where a student is being investigated with regard to a fitness to practise matter under the policy, and there is a concern that the student’s attitudes or behaviour are inappropriate, offensive, disruptive, or may pose a risk of harm to the welfare of any party, that student’s attendance at lectures, classes and any clinical, industry or practice attachments may be suspended by the Deputy Dean of the Faculty of Medical and Health Sciences pending the outcome of the investigation.

c If a student is found, after due and fair inquiry, and taking into account any written response from the student, to be not fit to practise, the student’s enrolment in the programme may be suspended or terminated in accordance with the policy.

d Where a student’s enrolment in the programme has been terminated under Regulation 10c, any application to re-enrol may be declined.

e A student whose enrolment is suspended or terminated under Regulation 10c or their application to re-enrol declined under Regulation 10d may apply to the Deputy Vice-Chancellor (Academic) for the appeal of that decision in accordance with the policy.

Variations

11 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement

12 These regulations came into force on 1 January 2019.

The Degree of Master of Health Psychology – MHealthPsych

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission
1 In order to be admitted to this programme, a student needs to have completed the requirements for a Bachelor of Science or Bachelor of Arts degree with a major in Psychology (or equivalent) with an average grade in the final year of study that is equivalent to a B or higher.

Duration and Total Points Value
2 A student admitted to this degree must:
   a pass courses with a total value of 240 points
   and
   b complete within the time limit specified in the General Regulations – Masters Degrees
   and
   c not exceed 280 points for the total enrolment for this degree.

Structure and Content
3 A student enrolled for this degree must pass courses with a total value of 240 points as listed in the Master of Health Psychology Schedule.

4 A student must, before enrolment for the thesis obtain an average grade of at least B in the first 120 points from
the coursework component of the degree. If this is not achieved the courses passed will be reassigned to the Postgraduate Diploma in Health Sciences.

5 A student enrolled for this degree who has already passed any course the same as, or similar to, those required under Regulation 3 must substitute an alternative course as approved by the Head of School of Medicine.

6 A student admitted to this programme must complete the University of Auckland Academic Integrity Course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

Thesis
7 The thesis is to be carried out under the guidance of a supervisor, appointed by Senate or its representative, on the recommendation of the Head of School of Medicine.

8 The thesis topic must be approved by the Head of School of Medicine prior to enrolment.

9 The thesis topic is to embody the results obtained by the student in an investigation into an area of health psychology.

10 Any laboratory work in connection with the thesis must be carried out within the University. However, Senate or its representative may permit a student to carry out the work in an approved institute outside the University for any period or periods considered necessary.

11 The thesis is to be completed and submitted in accordance with the General Regulations – Masters Degrees.

Variations
12 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Honours
13 This degree may be awarded with Honours as specified in the General Regulations – Masters Degrees.

Commencement
14 These regulations came into force 1 January 2013.

The Degree of Master of Health Sciences – MHSc

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission
1 In order to be admitted to this programme, a student needs to have:
   either
   a completed the requirements for a degree deemed relevant by Senate or its representative, with an average grade in the final year of study that is equivalent to a B or higher
   or
   b completed the requirements for the Postgraduate Diploma in Health Sciences, or its equivalent, as approved by Senate or its representative, with an average grade of B or higher.

2 In order to be admitted to a specialisation within this programme a student needs to have completed the specified prerequisite programmes or courses.

Duration and Total Points Value
3 A student admitted to this degree under Regulation 1a must:
   a pass courses with a total value of 240 points
   and
   b complete within the time limit specified in the General Regulations – Masters Degrees
   and
   c not exceed 280 points for the total enrolment for this degree.

4 A student admitted to this degree under Regulation 1b must:
   a pass courses with a total value of 120 points
   and
b complete within the time limit specified in the General Regulations – Masters Degrees
and
c not exceed 160 points for the total enrolment for this degree.

Structure and Content
5 A student wishing to enrol in the Nursing Practice courses listed in the Master of Health Sciences Schedule must hold current registration as a nurse in New Zealand.

6 A student wishing to enrol in the Clinical Imaging courses listed in the Master of Health Sciences Schedule must hold current registration with the New Zealand Medical Radiation Technologists Board, or as a Medical Radiation Technologist in their country of domicile, and must satisfy the Head of School of Medical Sciences that they have adequate access to clinical work in circumstances approved by the University of Auckland.

7 A student wishing to enrol in the Social Work courses listed in the Master of Health Sciences Schedule must hold an undergraduate degree recognised as a professional qualification by the Social Workers Registration Board.

8 A student wishing to enrol in the Optometry courses listed in the Master of Health Sciences Schedule must hold current registration as an optometrist in New Zealand.

9 A student admitted to this degree under Regulation 1a must complete the requirements for one of the 240 point options in the Master of Health Sciences Schedule.

10 A student admitted to this degree under Regulation 1b must complete the requirements for one of the 120 point options in the Master of Health Sciences Schedule.

11 The programme for each student must be approved by the relevant Head of School prior to enrolment.

12 A student who has to complete 240 points for this degree and whose programme includes a thesis, research portfolio, dissertation or research project must, before enrolment for the thesis, research portfolio, dissertation or research project, complete 120 points with a Grade Point Average of 5.0 or higher. If this is not achieved the courses passed will be reassigned to the Postgraduate Diploma in Health Sciences.

13 A student admitted to this programme must complete the University of Auckland Academic Integrity Course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

Practical Requirements
14 A student enrolled for this degree who is required to carry out practical or clinical work must satisfactorily complete such work to the standard that the Faculty of Medical and Health Sciences requires.

15 Where a weakness is identified in a clinical practice component of any course, students may be required to enrol in a clinical remediation course in addition to the requirements of their programme.

Suspension or Termination of Enrolment
16 a If a student is required to undertake clinical or practice experience as part of their programme, and their behaviour, attitude or circumstances is found, after due and fair inquiry, to be inappropriate, offensive or disruptive in this environment, or to be likely to give rise to a risk of harm to the welfare of any party in a clinical or practice environment, then the enrolment of the student in the programme may be terminated by Senate or its representative and any application to re-enrol may likewise be declined.

b A student who is subject to any such inquiry may be suspended by Senate or its representative from lectures, classes and any clinical attachments pending the outcome of the inquiry.

c A student whose enrolment is terminated or application to re-enrol is declined under Regulation 16a may appeal from that decision to the Council or its duly appointed delegate.

Fitness to Practise Requirements
17 a Students in the Nutrition and Dietetics specialisation must meet the applicable fitness to practise requirements, as outlined in the Faculty of Medical and Health Sciences’ Fitness to Practice Policy.

b Where a student is being investigated with regard to a fitness to practise matter under the policy, and there is a concern that the student’s attitudes or behaviour are inappropriate, offensive, disruptive, or may pose a risk of harm to the welfare of any party, that student’s attendance at lectures, classes and any clinical, industry or practise attachments may be suspended by the Deputy Dean of the Faculty of Medical and Health Sciences pending the outcome of the investigation.

c If a student is found, after due and fair inquiry, and taking into account any written response from the student, to be not fit to practise, the student’s enrolment in the programme may be suspended or terminated in accordance with the policy.

d Where a student’s enrolment in the programme has been terminated under Regulation 17c, any application to re-enrol may be declined.
A student whose enrolment is suspended or terminated under Regulation 17c or their application to re-enrol declined under Regulation 17d may apply to the Deputy Vice-Chancellor (Academic) for the appeal of that decision in accordance with the policy.

**Variations**

18 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

**Honours**

19 This degree may be awarded with Honours as specified in the General Regulations – Masters Degrees

**Commencement**

20 These regulations came into force on 1 January 2018. The 2012 regulations for the Degree of Master of Health Sciences were thereby repealed.

## The Degree of Doctor of Medicine – MD

*The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations, including the General Regulations for Named Doctorates and the Academic Statutes and Regulations.*

### Preamble

1. A candidate for the Degree of Doctor of Medicine is required to pursue an approved programme of advanced study and research as an enrolled student of the University.
2. A candidate for the Degree of Doctor of Medicine may draw upon original studies completed prior to registration that have not been submitted as part of a previous degree or diploma.
3. It is expected that this programme will usually be completed within three to four years of full-time candidature. Part-time candidature may also be permitted.
4. The Degree of Doctor of Medicine is awarded for a formal and systematic exposition of a coherent programme of advanced research work in any branch of medicine or medical science presented in a thesis which in the opinion of the examiners and the Board of Graduate Studies satisfies all of the following criteria:
   1. is an original contribution to any branch of medicine or medical science
   2. meets internationally recognised standards for such work
   3. demonstrates a knowledge of the literature relevant to the subject of the thesis, and the ability to exercise critical and analytical judgement of it
   4. is satisfactory in its methodology, in the quality and coherence of its written expression, and in its scholarly presentation and format.
5. The thesis may not, without prior permission of the Board of Graduate Studies, exceed 100,000 words in total.
6. If the core of the thesis comprises a series of published or unpublished research papers and/or case studies, the candidate must be the lead or sole author of each paper or case study and must provide a contextual framework and concluding discussion. The range and focus of this material shall generally correspond with the introductory and concluding chapters of a thesis. The thesis must be presented in a consistent format, citation style and typeface.
If the core of the thesis does not comprise a series of published or unpublished research papers and/or case studies, a candidate may still include within their thesis published or unpublished research papers and/or case studies, provided that the candidate was the lead or sole author of each paper or case study. The thesis must be presented in a consistent format, citation style and typeface.

In the case of published or unpublished research papers and/or case studies that the candidate has contributed to but is not the sole or lead author of, the candidate may report in the thesis their contribution to the research with due reference to the original paper and/or case study. The thesis must be presented in a consistent format, citation style and typeface.

All material which is not the original work of the author of the thesis must:

(i) be fully and appropriately attributed

or

(ii) if a substantial part of another work, only be reproduced with the written permission of the copyright owner of the other work.

All research for the thesis is to be conducted in accordance with the University of Auckland Guidelines for the Conduct of Research.

Eligibility
2 A candidate for the Degree of Doctor of Medicine is required to have:

a (i) completed the requirements for the award of the Degree of Bachelor of Medicine and Bachelor of Surgery at the University of Auckland

or

(ii) completed the requirements for the award of a medical qualification that the Board of Graduate Studies considers to be equivalent to the prerequisite qualification specified in Regulation 2a(i) of this regulation

and

b demonstrated an ability to pursue doctoral level research in the field of medicine or medical science, as measured by the prior completion of 30 points or more of postgraduate level or equivalent research to an appropriate standard

and

c following the completion of their medical qualification, normally had at least five years of experience in medical practice or in an area considered comparable by the Board of Graduate Studies.

Admission
3 Every candidate for the Degree of Doctor of Medicine must have applied for admission and been admitted to the University of Auckland.

Duration
4 a A candidate will normally be required to complete the requirements for the degree within not less than three full-time years and not more than four full-time years, or the part-time equivalent, from the date of registration unless permitted to do otherwise by the Board of Graduate Studies.

b A candidate who draws upon original studies completed prior to registration may, with the permission of the Board of Graduate Studies, complete the requirements for the degree in less than three years. The minimum time for completion will not be less than one full-time year or part-time equivalent.

Registration
5 a Registration and all conditions pursuant to it shall be determined in accordance with Regulation 2 of the General Regulations for Named Doctorates.

b A minimum of four goals will normally be prescribed by the Board of Graduate Studies for completion during the period of provisional registration.

Structure and Content
6 A candidate enrolled for this degree must pass MEDSCI 896 Thesis.

Reviews of Registration
7 Reviews of registration will be made in accordance with Regulation 3 of the General Regulations for Named Doctorates.

Changes to the Conditions of Registration
8 Changes to supervision, extensions of time, and suspension or termination of registration will be made according to Regulation 4 of the General Regulations for Named Doctorates.

Enrolment and Fees
9 Enrolment and payment of fees will be determined according to Regulation 5 of the General Regulations for Named Doctorates.
Submission
10 a All candidates are required to submit one copy in temporary binding and one electronic copy in pdf format of the thesis to the Graduate Centre. Copies should include the following statement to examiners on the first page:
“This thesis is for examination purposes only and is confidential to the examination process.”

b Three months prior to the expected date of submission, a candidate should notify the School of Graduate Studies in writing of their intention to submit. If the candidate has reason to believe that any person would be unsuitable to serve as an examiner of the thesis on the grounds of conflict of interest, he or she may also submit at this time the name of this person and a statement in writing as to the nature of the conflict of interest to the Dean of Graduate Studies.

c The thesis is to be accompanied by a statutory declaration, signed by the candidate, stating that the thesis is the candidate’s own work and that neither the thesis nor any part of it has been submitted or accepted for any other degree or diploma and that written permission has been obtained for any third-party copyright material reproduced in the thesis that represents a “substantial part” of the other work. The declaration should also state that the temporary-bound copy and electronic copy are identical.

d Where the thesis contains jointly authored research papers, case studies and/or any other work, published or unpublished, a Co-Authorship Form must be signed by the candidate and all the joint authors, stating the extent to which the jointly authored material is the candidate’s own work.

Where the thesis includes research reported in published or unpublished co-authored works (other than as in Regulations 1g and 1h in the PhD Statute) a Co-Authorship Form must be signed by the candidate and all the joint authors, stating the extent to which the jointly authored material is the candidate’s own work.

e The thesis is to be presented in English unless otherwise approved by the Board of Graduate Studies at the time of first registration of the candidate.

Examination
11 The examination process will follow that of Regulation 9 of the PhD Statute, except that Regulations 9a, b, c, d, e, f, g and i will not apply, and

a The Associate Dean (Postgraduate) of the Faculty of Medical and Health Sciences, the Head of Department, and/or the Dean of the Faculty may nominate another person to the Board of Graduate Studies to be authorised to act in his or her place in all of the provisions of this Regulation 11 and Regulation 9 of the PhD Statute where it applies. If either the Head of Department or the Associate Dean (Postgraduate) or the Dean of the Faculty is a supervisor of the candidate, an alternate must be nominated and appointed.

b Neither the supervisors nor the candidate may communicate with the examiners regarding the examination at any stage of the examination process, except as specified in this Regulation 11 or Regulation 9 of the PhD Statute where it applies.

c Nomination of Examiners
On notification of submission or intent to submit under Regulation 10b, the Head of Department will, on the advice of the supervisor(s), nominate at least two suitably qualified persons to the Board of Graduate Studies for selection as examiners. The nominees should each hold a doctoral degree, or have equivalent expertise and experience, and be expert in the field of study which is the subject of the thesis. At least one nominee must be from outside New Zealand. The examiners may not be staff members of the University or have been involved in either the thesis research or the preparation of the thesis.

d Appointment of Examiners
The Board of Graduate Studies will consider the nominations provided by the Head of Department and any submissions made by the candidate under the provisions of Regulation 10b and will appoint two suitably qualified persons who are available to act as examiners. One examiner must be able to participate in any oral examination in person.

e Appointment of Examination Committee
The Board of Graduate Studies will appoint a Doctor of Medicine Examination Committee consisting of the Associate Dean (Postgraduate) of the Faculty of Medical and Health Sciences as Chair, the Head of Department, the Dean of Faculty of Medical and Health Sciences, and the Head of School of Medicine, for all Doctor of Medicine examinations.

f Examiners’ Reports
Each examiner will be provided with an electronic copy of the thesis in PDF format and, acting independently, is required to provide the Graduate Centre, within two months of receipt of the thesis, with a written report in English on the quality of the thesis according to the criteria of Regulation 1(c) of these regulations. A copy of the thesis will be provided to the Examination Committee.
Recommendation of Examiners

The examiners will include with their reports one of the following recommendations:

(i) to award the degree.
   The thesis can be passed without any further amendment or correction. Sometimes examiners may wish to include a list of suggested amendments for the candidate to use when publishing the material.

or

(ii) to award the degree after specified “minor corrections” have been made to the thesis to the satisfaction of the Chair of the Doctor of Medicine Examination Committee or nominee, who may be the Main Supervisor, by a specified date.
   This recommendation is made when the thesis has reached the required standard but for minor problems such as inconsistency in terminology, referencing problems, or typographical errors. When these are corrected, the thesis will meet the standard and then will be ready for permanent binding and placement in the Library.

or

(iii) (a) to award the degree after revisions have been made to the thesis to the satisfaction of the Doctor of Medicine Examination Committee, by a specified date, and subject to satisfactory performance at any oral examination.
   This recommendation is made when the Examiner concludes that the revisions required are not minor, but are substantive including re-analysis of data, or rewriting of chapters, or corrections of significant lapses in logic or coherence. These changes can normally be made within a 3–6 month period. The Examiner should indicate whether or not they regard an Oral Examination as appropriate.

or

(b) to award the degree after revisions have been made to the thesis to the satisfaction of the Examiner by a specified date, and subject to satisfactory performance at any oral examination. The Examiner should indicate whether or not they regard an Oral Examination as appropriate.
   This recommendation is made when the Examiner concludes that the revisions required are not minor, but are substantive including re-analysis of data, or rewriting of chapters, or corrections of significant lapses in logic or coherence. The nature of the revisions must be such that subject-specific knowledge is required and the Examiner wishes to see and approve the changes. These changes can normally be made within a 3–6 month period.

or

(iv) to permit the candidate to revise the thesis and resubmit it for examination on one further occasion only.
   This recommendation is made when the Examiner concludes that the thesis is not yet of MD standard. It will require either further research, rewriting of specific sections, reconceptualisation, and/or reorganisation in order to reach the required MD standard. The candidate will be permitted to resubmit, normally within a 12 month period.

or

(v) not to award the degree, but refer the thesis to the appropriate authority within the University for consideration of the award of another degree.
   This recommendation is made when the Examiner is of the opinion that the thesis has substantive flaws incompatible with the requirements of a MD.

or

(vi) not to award any degree.

Recommendation of the Doctor of Medicine Examination Committee

The Doctor of Medicine Examination Committee will make a report to the Board of Graduate Studies which includes the nature and outcome of any communications with examiners and/or supervisors made under Regulation 9k (PhD Statute) and which recommends one of the following:

(i) to appoint one or more further independent examiners to report on any areas of conflict

or

(ii) to award the degree

or

(iii) to award the degree after specified “minor corrections” have been made to the thesis to the satisfaction of the Doctor of Medicine Examination Committee or nominee, who may be the main supervisor, by a specified date

or

(iv) (a) to award the degree subject to revising part or parts of the thesis to the satisfaction of the Doctor of Medicine Examination Committee or nominee, who must be the Head of Department, by a specified date

or

(b) to award the degree subject to revising part or parts of the thesis to the satisfaction of the Examiner or Examiners by a specified date
(v) to permit the candidate to revise the thesis and resubmit it for examination on one further occasion only, but only if the candidate has not already been permitted to revise and resubmit

or

(vi) to refer the thesis to the appropriate authority within the University for consideration of the award of another degree

or

(vii) not to award the degree

or

(viii) to require the candidate to undergo an Oral Examination.

i In the case of recommendations (iv) and (v), the report must also state clearly the nature of the revisions recommended.

j Where a candidate is required to revise and resubmit the thesis before any oral examination, Regulation 9r of the PhD Statute will apply, except that the examiners shall examine the revised thesis as a whole in accordance with Regulation 11g of these regulations rather than Regulation 9g of the PhD Statute, excepting that a further resubmission may not be recommended, and that the recommendations available to the Examination Committee at Regulation 9r(vii) of the PhD Statute are replaced by those detailed at Regulation 11h of these regulations.

k Oral Examination

(i) An Oral Examination will be held only on the recommendation of the Doctor of Medicine Examination Committee or as required by the Board of Graduate Studies.

(ii) An oral examination will only be held where there is a reasonable doubt regarding the adequacy of the thesis and/or the appropriate recommendation and where, in the opinion of the Committee or of the Board of Graduate Studies, an oral examination is the most appropriate way of addressing those doubts.

(iii) Should an oral examination be required, the Board of Graduate Studies will appoint a Head of Department Nominee in accordance with Regulation 9e of the PhD Statute, and the Oral Examination and the remainder of the examination process will proceed as per Regulation 9n to 9t of the PhD Statute, except that:

(a) Where a candidate has previously revised and resubmitted their thesis in accordance with Regulation 11h(v) of the Doctor of Medicine regulations no subsequent revision and resubmission is permitted.

(b) Where an oral examination results in the candidate being required to revise and resubmit the thesis:

(i) the examiners shall examine the revised thesis as a whole in accordance with Regulation 11g of the Doctor of Medicine regulations rather than Regulation 9g of the PhD Statute, excepting that a further revision and resubmission may not be recommended and

(ii) the composition of the Examination Committee for the revised and resubmitted thesis at Regulation 9s(vii) of the PhD Statute shall revert to that of the Doctor of Medicine Examination Committee appointed in accordance with Regulation 11e of the Doctor of Medicine regulations but include, where that person is not already included, the Head of Department Nominee appointed in accordance with Regulation 9e of the PhD Statute and

(iii) The recommendations available to the Examination Committee at Regulation 9s(vii) of the PhD Statute after consideration of the examiners’ reports for the revised and resubmitted thesis shall be replaced by those detailed at Regulation 11h of the Doctor of Medicine regulations.

l Copies for Deposit

(i) On successful completion of the examination, candidates will be required to deposit two hardbound copies of the thesis and one digital copy, corrected as may be required, with the Graduate Centre. The degree will not be conferred until the candidate has complied with this requirement.

(ii) When two hardbound copies and a digital copy of the thesis are deposited, these must be accompanied by a statutory declaration signed by the candidate stating that the hardbound copies and the digital copy are the same.

g (i) The digital thesis deposited shall be formatted as specified in the Guidelines for Formatting a Digital Thesis.

(ii) A thesis which is deposited in digital form will be accessible through the University’s digital repository, unless embargoed under Regulation 25 of the Examination Regulations.

Variations

12 In exceptional circumstances the Board of Graduate Studies may approve a programme which does not conform to these regulations.

Appeals

13 Appeals regarding the examination process or decisions of the Board of Graduate Studies must be made according to Regulation 6 of the General Regulations for Named Doctorates.
Dispute Resolution Procedures
14 Disputes are to be resolved according to Regulation 7 of the General Regulations for Named Doctorates.

Transitional Arrangements
15 a These regulations came into force on 1 January 2016. The 2009 regulations for the Degree of Doctor of Medicine were thereby repealed.

b For candidates initially registered under earlier regulations for this degree the Board of Graduate Studies may agree to vary the application of the provisions of these regulations to ensure consistency with the provisions of the regulations under which the candidate was enrolled where it is satisfied that the candidate would otherwise be at a disadvantage.

Practical Requirements
11 A student enrolled for this degree who is required to carry out practical or clinical work must satisfactorily complete such work to the standard that the Faculty of Medical and Health Sciences requires.

12 Where a weakness is identified in a clinical practice component of any course, students may be required to enrol in a clinical remediation course in addition to the requirements of their programme.

Variations
13 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Distinction
14 This postgraduate diploma may be awarded with Distinction or Merit as specified in the General Regulations – Postgraduate Diplomas.

Commencement
15 These regulations came into force on 1 January 2012. The 2006 regulations for the Postgraduate Diploma in Health Sciences were thereby repealed.

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Duration and Total Points Value

1 A student enrolled for this degree must follow a programme of the equivalent of six full-time semesters and pass courses with a total value of 360 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

Structure and Content

2 Of the 360 points required for this degree, a student must pass:
   a at least 300 points from courses listed in the Bachelor of Science Schedule, including
      (i) at least 180 points above Stage I, including at least 75 points above Stage II
      (ii) courses in a minimum of three subject codes listed in the Bachelor of Science Schedule
      (iii) (a) at least one major, as listed in the Bachelor of Science Schedule, and 15 points from a capstone course
           listed in the Bachelor of Science Schedule
           or
           (b) one specialisation, as listed in the Bachelor of Science Schedule.
   b 30 points from courses offered in either the General Education Open Schedule or the General Education Faculty Schedule approved for this degree or from a combination of these schedules, and the Academic Integrity course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.
   c up to 30 points from courses available for other programmes offered at this University.

3 A student who is required to meet the Academic English Language Requirement, as specified in the Enrolment and Programme Regulations, Academic English Language Requirement, of the University Calendar, may substitute an academic English language course approved by Senate or its representative for 15 points of General Education.

4 a A student may include one or more modules from the modules available in the Bachelor of Science Schedule.
   b (i) One module from the Schedule of another degree may be included.
   (ii) If a module from the Schedule of another degree is completed, the courses will be counted under Regulation 2a.

General Education Exemptions

5 a A student is exempted from the requirement to pass courses offered in the General Education Schedules who has:
   either
   (i) completed an undergraduate degree at a tertiary institution
   or
   (ii) commenced study for this degree at a tertiary institution before 1 January 2006
   or
   (iii) been admitted to this degree having completed 240 points or more of degree-level study at another tertiary institution.

   b A student who has been exempted from the requirement to pass courses offered in the General Education Schedules must substitute 30 points from courses available for this degree.

   c A student admitted to this degree, who has completed between 120 and 235 points inclusive of degree-level study at another tertiary institution, must pass:
      (i) 15 points from courses offered in the General Education Schedules
      and
      (ii) a further 15 points from courses available for this degree.

   d A student who has been fully or partially exempted from the requirement to pass courses offered in the General Education Schedules is nonetheless required to complete the Academic Integrity course.

Practical Requirements

6 In any course that includes assessed practical work as well as other assessed work, it may be required that a student must obtain passes in both the practical and the other work in order to pass that course as a whole.
Where this is specified a student who passes the practical work but who fails the other work may, at the discretion of the Academic Head, have the result for the practical work carried forward when the course is retaken.

Conjoint Degrees
7 Special arrangements apply where this degree is taken as a component degree of an approved conjoint combination. The specific requirements and a complete list of the conjoint degrees available are set out in the Conjoint Degrees section of the University Calendar.

Special Cases
8 a In exceptional circumstances Senate or its representative may permit a suitably qualified student to enrol directly in a Stage II course(s). If the student fails the Stage II course(s) but is certified by the examiners as having reached a pass in an equivalent Stage I course(s), the student may be credited with the appropriate Stage I course(s).

b If a student who is enrolled in and fails an advanced or accelerated Stage I course but is certified by the examiners as having reached a pass in an equivalent Stage I course in the same subject having a lower entry requirement, the student may be credited with the latter course. The relevant Academic Head shall certify to Senate or its representative that the failed course is an advanced or accelerated course.

Variations
9 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement
10 These regulations came into force on 1 January 2019. The 2006 regulations for the Degree of Bachelor of Science were thereby repealed.

- **Stage I course:** SCI SCHOL 100
- **Stage II course:** SCI SCHOL 202
- **Stage III course:** SCI SCHOL 302

### Statistics
- **Stage I courses:** STATS 100–150
- **Stage II courses:** STATS 201–290
- **Stage III courses:** STATS 301–389, 399

### Sustainability
- **Stage I course:** SUSTAIN 100
- **Stage II course:** SUSTAIN 200
- **Stage III course:** SUSTAIN 300

### Urban Planning
*Only for students in the Geographic Information Science major*
- **Stage I course:** URBPLAN 103
- **Stage II courses:** URBPLAN 203, 205

### Wine Science
- **Stage II course:** WINESCI 201
Capstone courses available:

ANTHRO 399, BIOMED 399, CHEM 397–399, COMPSCI 399, DATASCI 399, EARTHSCI 399, ENVSIC 399, EXERSCI 399, FOODSCI 399, GEOG 399, GEOPHYS 399, GSCI 399, INFOSYS 399, LOGICOMP 399, MARINE 399, MATHS 399, PHARMCOL 399, PHYSICS 399, PHYSIOL 399, PSYCH 399, STATS 399

BSc majors:

### Anthropological Science

*Not available for conjoints*

- 30 points: ANTHRO 101, 102
- 30 points: ANTHRO 200, 201
- 15 points from ANTHRO 205–208, 235, 252
- 15 points: ANTHRO 309
- 30 points from ANTHRO 306, 317, 318, 322, 328, 337, 348, 349, 352, 353, 365, 367

### Biological Sciences

#### either

- 60 points: BIOSCI 101, 108, 109, STATS 101
- 15 points: BIOSCI 220
- a further 30 points from BIOSCI 201–290
- 45 points from BIOSCI 301–390, MARINE 303
  or one of the following pathways:

**Biochemistry and Cell Biology**

- 75 points: BIOSCI 101, 106, 108, 109, STATS 101
- 15 points from CHEM 110, 120, 120
- 45 points from BIOSCI 201, 203, 220
- 30 points: BIOSCI 350, 353
- 15 points from BIOSCI 326, 349, 351, 355, 356

### Biotechnology

- 75 points: BIOSCI 101, 106, 108, 109, STATS 101
- 15 points from CHEM 110, 120, 120
- 75 points: BIOSCI 203, 204, 220, INNOVENT 203, SCIGEN 201
- 60 points: BIOSCI 326, 347, 348, INNOVENT 307

### Ecology

- 60 points: BIOSCI 101, 108, 109, STATS 101
- 30 points: BIOSCI 206, 220
- 15 points from BIOSCI 204, 205, 207, 208

The Degree of Bachelor of Advanced Science (Honours) – BAdvSci(Hons)

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Duration and Total Points Value
1 A student enrolled for this degree must follow a programme of the equivalent of eight full-time semesters and pass courses with a total value of 480 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

Structure and Content
2 Of the 480 points required for this degree, a student must pass:
   a at least 420 points from courses listed in the Bachelor of Science or Bachelor of Science (Honours) Schedule, including
      (i) at least 300 points above Stage I, including at least 210 points above Stage II
      (ii) courses in a minimum of three subject codes
      (iii) at least 120 points at 700 level, including a research project or dissertation of between 30 and 60 points
      (iv) a specialisation as listed in the Bachelor of Advanced Science (Honours) Schedule
      (v) the core courses as listed in the Bachelor of Advanced Science (Honours) Schedule
   b 30 points from courses offered in either the General Education Open Schedule or the General Education Faculty Schedule approved for this degree or from a combination of these schedules, and the Academic Integrity course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar
   c up to 30 points from courses available for other programmes offered at this University.
3 A student who is required to meet the Academic English Language Requirement, as specified in the Enrolment and Programme Regulations, Academic English Language Requirement, of the University Calendar, may substitute an academic English language course approved by Senate or its representative for 15 points of General Education.
4 a A student may include one or more modules from the modules available in the Bachelor of Science Schedule.
   b (i) One module from the Schedule of another degree may be included.
   (ii) If a module from the Schedule of another degree is completed, the courses will be counted under Regulation 2a.
5 A student must achieve a Grade Point Average of 5.0 or higher in each successive two semesters of full-time enrolment, or the part-time equivalent, taken towards this degree. If this Grade Point Average is not achieved, enrolment in the Bachelor of Advanced Science (Honours) cannot continue.

Reassignment
6 A student who does not achieve the Grade Point Average specified in Regulation 5 may apply to reassign courses passed for this degree to the Postgraduate Diploma in Science and/or the Bachelor of Science.

General Education Exemptions
7 a A student is exempted from the requirement to pass courses offered in the General Education Schedules who has:
   (i) completed an undergraduate degree at a tertiary institution
   (ii) been admitted to this degree having completed 240 points of degree level study at another tertiary institution.

b A student who has been exempted from the requirement to pass courses offered in the General Education Schedules must substitute 30 points from courses available for this degree.
c A student admitted to this degree having completed between 120 and 135 points of degree level study from another tertiary institution must pass:
   (i) 15 points from courses offered in the General Education Schedules  
   and
   (ii) a further 15 points from courses available for this degree.

d A student who has been fully or partially exempted from the requirement to pass courses offered in the General Education Schedules is nonetheless required to complete the Academic Integrity course.

Practical Requirements
8 In any course that includes assessed practical work as well as other assessed work, it may be required that a student must obtain passes in both the practical and the other work in order to pass that course as a whole. Where this is specified, a student who passes the practical work but who fails the other work may in these circumstances, at the discretion of the Academic Head, have the result for the practical work carried forward when the course is retaken.

Honours
9 a This degree may be awarded with Honours where a student’s overall grade in 120 points of 700 level courses, including the research project or dissertation, is sufficiently high. There are two classes of Honours: First Class Honours and Second Class Honours. Second Class Honours are awarded in either the First Division or Second Division.

   b Students who have passed all courses and completed all other requirements for a BAdvSci(Hons) but whose performance in the courses is deemed by the Dean of Science to be not of Honours standard will be awarded the degree of Bachelor of Science and the Postgraduate Diploma in Science instead.

Conjoint Degrees
10 Special arrangements apply where this degree is taken as a component degree of an approved conjoint combination. The specific requirements and a complete list of the conjoint degrees available are set out in the Conjoint Degrees section of the University Calendar.

Special Cases
11 a In exceptional circumstances Senate or its representative may permit a suitably qualified student to enrol directly in a Stage II course(s). If the student fails the Stage II course(s) but is certified by the examiners as having reached a pass in an equivalent Stage I course(s), the student may be credited with the appropriate Stage I course(s).

   b If a student who is enrolled in and fails an advanced or accelerated Stage I course but is certified by the examiners as having reached a pass in an equivalent Stage I course in the same subject having a lower entry requirement, the student may be credited with the latter course. The relevant Academic Head shall certify to Senate or its representative that the failed course is an advanced or accelerated course.

Variations
12 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement
13 These regulations came into force on 1 January 2019.

The Degree of Bachelor of Science (Honours) – BSc(Hons)

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission

1 In order to be admitted to this programme, a student needs to have:
   a completed the requirements for the Degree of Bachelor of Science from the University of Auckland including at least 90 points above Stage II or attained an equivalent qualification as approved by Senate or its representative
and
b attained at least a B average in 45 points above Stage II in the relevant subject major as specified in the Bachelor of Science regulations or equivalent
and
c approval from the relevant Head of Department, Director of School, or equivalent.

2 A student who has not completed the requirements of the Degree of Bachelor of Science but who has passed:
a courses with a total value of at least 345 points towards that degree including the requirements of the major as specified in the regulations for the Bachelor of Science
and
b the Stage III entry requirements for this degree
may, with the approval of the relevant Head of Department, Director of School or equivalent, enrol for this degree. The requirements for the Bachelor of Science degree must be completed within 12 months of initial enrolment for the Bachelor of Science (Honours). The Bachelor of Science (Honours) will not be awarded until the requirements for the Bachelor of Science have been completed.

Note: Applicants to Preparatory Clinical Psychology must be able to demonstrate professional attributes suitable for becoming a clinical psychologist. A written supplementary application, personal references and an interview will normally be required.

Duration and Total Points Value
3 A student enrolled for this degree must:
a pass courses with a total value of 120 points
and
b complete within the time limit specified in the General Regulations – Bachelors Honours Postgraduate Degrees.

4 The total enrolment for this degree must not exceed 160 points.

Structure and Content
5 A student enrolled for this degree must pass 120 points in one of the subjects listed in the Bachelor of Science (Honours) Schedule.

6 A project or dissertation between 30 and 90 points must be included. Where the dissertation is of less than 90 points, the points value of the dissertation and a research preparation course (such as a dissertation preparation or research methods course) in the same subject must not exceed 60 points.

7 A student admitted to this programme must complete the University of Auckland Academic Integrity Course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

8 The programme for each student must be approved by the relevant Head of Department, Director of School or equivalent.

Project / Dissertation
9 a The project or dissertation is to be carried out under the guidance of a supervisor appointed by Senate or its representative, on the recommendation of the relevant Head of Department.

b The dissertation topic must be approved by the relevant Head of Department prior to enrolment.

c The dissertation is to be completed and submitted in accordance with the General Regulations – Bachelors Honours Postgraduate Degrees.

Variations
10 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Honours
11 a This degree may be awarded only where a student’s overall grade for the Degree of Bachelor of Science (Honours) is sufficiently high to deserve Honours.

b Should a student fail to qualify for the award of the Degree of Bachelor of Science (Honours), Senate or its representative may approve the reassignment of points towards the Postgraduate Diploma in Science.

12 Where the standard specified in Regulation 11a is achieved, Honours will be awarded as specified in the General Regulations – Bachelors Honours Postgraduate Degrees.

Commencement
13 These regulations came into force on 1 January 2006. The 1996 regulations for the Degree of Bachelor of Science (Honours) were thereby repealed.
Bachelor of Science (Honours) (BSc(Hons)) Schedule

Subjects available:

Applied Mathematics
Prerequisite: A major in Applied Mathematics and at least 90 points at Stage III
Requirement:
• at least 45 points from MATHS 761–770
• up to 45 points from approved 700 level courses in Mathematics or related subjects with approval of the Head of Department
• 30 points: MATHS 776 Dissertation

Bioinformatics
Prerequisite: A major in Bioinformatics or Biological Sciences and COMPSCI 220 or equivalent as approved by the Director and at least 90 points at Stage III
Requirement:
• 45 points: BIOINF 702, 703, 704
• 30 points from BIOSCI 733, 737, 752, 755–758, COMPSCI 715, 720, 732, 760, 767, MATHS 764, STATS 720, 721, 730, 731, 761, 783, 784
• 45 points: BIOINF 789 Project

Biological Sciences
Prerequisite: At least 90 points at Stage III including at least 60 points from Stage III Biological Sciences. With the permission of the Director of the School of Biological Sciences, up to 15 points at Stage III in related courses may be substituted.
Requirement:
• 15 points: BIOSCI 762
• 45 points: BIOSCI 788 Dissertation
and
• 60 points from BIOINF 701, BIOSCI 724–746, 749–761
or
• 45 points from BIOINF 701, BIOSCI 724–759 and a further 15 points, subject to approval by the Head of School of Biological Sciences, from 700 level courses in a related subject

Biomedical Science
The BSc(Hons) in Biomedical Science was suspended in 2016. Students who have a current enrolment in this subject should contact their faculty for advice regarding completion.
Prerequisite: A major in Biomedical Science and at least 90 points at Stage III
Requirement:
• 30 points from BIOINF 701, BIOSCI 736, 737, 741, 746, 755–759, HLTHPSYC 716, MEDSCI 701–723, 725–734, 737–740
• 90 points: BIOMED 791 Research Portfolio

Biotechnology
Prerequisite: A major in Biotechnology, or equivalent as approved by the Director, and at least 90 points at Stage III
Requirement:
• 30 points from BIOSCI 741, 752, 759
• 30 points: SCIENT 701, 703
• 15 points: BIOSCI 762
• 45 points: BIOTECH 788 Dissertation

Chemistry
Prerequisite: A major in Chemistry and at least 90 points at Stage III
Requirement:
• 60 points: CHEM 793 Dissertation
and
• 60 points from CHEM 710–780
or
45 points from CHEM 710–780 and a further 15 points, subject to approval by the Head of Department, from 700 level courses in a related subject

Computer Science
Prerequisite: A major in Computer Science and at least 90 points at Stage III
Requirement:
• at least 60 points from COMPSCI 701–717, 720–777, BIOINF 702
• up to 30 points from 700 level courses in a related subject with approval of the Head of Department
• 30 points: COMPSCI 789 Dissertation

Earth Sciences
Prerequisite: A major in Earth Sciences, Geography, or Geology and at least 90 points at Stage III with at least 45 points at Stage III in Earth Sciences or Geography courses or GEOG 330, 331, 334, 351, 360 or equivalent
Requirement:
• at least 60 points from EARTHSCI 703–772, GEOG 730, 745, 746, 770–772, GEOPHYS 760, 761
• up to 30 points from 700 level courses as approved by the Programme Coordinator
• 30 points: EARTHSCI 789 Dissertation

Exercise Sciences
Prerequisite: A major in Sport and Exercise Science, Exercise Sciences or equivalent as approved by the Head of Department and at least 90 points at Stage III
Requirement:
• 15 points: EXERSCI 705
• 45 points from EXERSCI 702–704, 706–714 and up to 15 points from other 700 level courses in a related subject approved by the Head of Department
• 45 points: EXERSCI 780 Dissertation

Food Science
Prerequisite: A major in Food Science or Food Science and Nutrition and at least 90 points at Stage III
Requirement:
• at least 30 points from CHEMMAT 757, FOODSCI 706–710
• up to 30 points from MEDSCI 709, 710, BIOSCI 741 or other courses approved by Programme Director
• 60 points: FOODSCI 788 Dissertation

Geography
Prerequisite: A major in Geography or Earth Sciences and at least 90 points at Stage III with at least 45 points at Stage III in Geography
Requirement:
• 15 points: GEOG 701
• at least 60 points from GEOG 711–779, EARTHSCI 705, 713, 732, ENVMTG 741–746, ENVSCI 704, 713, 737, 738
• up to 15 further points, subject to approval by the Academic Head
• 30 points: GEOG 789 Dissertation

Geophysics
Prerequisite: At least 90 points at Stage III including at least 30 points from GEOPHYS 310–361 and 15 points from EARTHSCI 301–307, 372, GEOPHYS 310–361, MATHS 302–389, PHYSICS 331–390
Requirement:
• 45 points from EARTHSCI 783, GEOPHYS 711–713, 761, PHYSICS 743
• 45 points from approved 600 or 700 level courses in Earth Sciences, Geophysics, Mathematics or Physics, or other Science subjects approved by the Head of Department
• 30 points: GEOPHYS 789 Dissertation

Logic and Computation
Prerequisite: A major in Logic and Computation and at least 90 points at Stage III
Requirement:
• 15 points from COMPSCI 720, 750, 760, 767
• 15 points from PHIL 736–738
• 60 points from COMPSCI 720, 750, 760, 767, LINGUIST 721, 724, LOGICOMP 701–705, MATHS 713, 715, PHIL 736–738
• 30 points: LOGICOMP 782 Dissertation

Mathematics
Prerequisite: A major in Mathematics including (either MATHS 320 or MATHS 328) and MATHS 332 and at least 90 points at Stage III Mathematics Education students may substitute MATHS 302 for one of these prerequisite courses

Requirement
either
• 90 points in 700 level Mathematics courses
or
• at least 45 points in 700 level Mathematics courses and up to 45 points, subject to approval by the Head of Department, from 700 level courses in a related subject
and
• 30 points: MATHS 776 Dissertation

Medical Physics and Imaging Technology
Prerequisite: A major in Physics and at least 90 points at Stage III
Requirement:
• 45 points: MEDSCI 703, 737, PHYSICS 780
• 15 points: PHYSICS 743
• 15 points from MEDSCI 701–740, PHYSICS 703–780, 791, 792
• 45 points: PHYSICS 787 Project

Medical Statistics
The BSc(Hons) in Medical Statistics was withdrawn in 2018.

Medicinal Chemistry
Prerequisite: A major in Medicinal Chemistry and at least 90 points at Stage III
Requirement:
• 15 points: CHEM 735
• 45 points from CHEM 710–780, BIOSCI 757, 759, MEDSCI 708, 715, 716, 721, 722
• 60 points: CHEM 793 Dissertation

Pharmacology
Prerequisite: A major in Pharmacology and at least 90 points at Stage III
Requirement:
either
• 60 points from MEDSCI 700, 701, 715–723, 744
or
45 points from MEDSCI 700, 701, 715–723, 744
15 points from 700 level courses in a related subject approved by the Head of Department
and
• 60 points: PHARMCOL 787 Dissertation

Photronics
Prerequisite: A major in Physics including ELECTENG 209, 210 and 303 or equivalent, and at least 90 points at Stage III
Requirement:
• 15 points from PHYSICS 726, 752
• at least 15 points from ELECTENG 726, 732, PHYSICS 743
• up to 45 points from other 600 or 700 level courses in Physics or related subjects approved by the Head of Department
• 45 points: PHYSICS 787 Project

Physics
Prerequisite: A major in Physics and at least 90 points at Stage III
Requirement:
• 45 points from PHYSICS 703–788, 791, 792
and either
• a further 45 points from PHYSICS 703–788, 791, 792, MATHS 761–770, GEOPHYS 761–780
or
• at least 15 points from PHYSICS 703–788, 791, 792, GEOPHYS 761–780, MATHS 761–770
• up to 30 points from approved 700 level courses in related subjects as approved by the Head of Department
• 30 points: PHYSICS 789 Dissertation

Psychology
Prerequisite: A major in Psychology and at least 90 points at Stage III including PSYCH 306
Requirement:
either
• 15 points: PSYCH 779
• 75 points from PSYCH 700–762
or
Preparatory Clinical Psychology
• 15 points: PSYCH 779
• 60 points: PSYCH 708, 718, 723
• 15 points from PSYCH 700–762
• 30 points: PSYCH 780 Dissertation

Statistics
Prerequisite: A major in Statistics and at least 90 points at Stage III and including STATS 210 or 225
Requirement:
• 15 points from STATS 779, 782, or equivalent
• at least 45 points from STATS 701–703, 705, 708–787, BIOINF 704, POPLHLTH 707–709, 711
• up to 30 points from 700 level courses in Statistics or related subjects, as approved by the Head of Department
• 30 points: STATS 781 Project

The Degree of Master of Data Science – MDataSci
The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission
1 In order to be admitted to this programme, a student needs to have completed the requirements for:
a the Degree of Bachelor of Science in Data Science from this University, with a Grade Point Average of 4.5 or higher in 75 points above Stage II, or the equivalent as approved by Senate or its representative
or
b the Degree of Bachelor of Science with a double major in Computer Science and Statistics from this University, with a Grade Point Average of 4.5 or higher in 75 points above Stage II, or the equivalent as approved by Senate or its representative.

Duration and Total Points Value
2 A student admitted to this degree under Regulation 1 must:
   a pass courses with a total value of 180 points
   and
   b complete within the time limit specified in the General Regulations – Masters Degrees
   and
   c not exceed 220 points for the total enrolment in this degree.

Structure and Content
3 A student enrolled for this degree must complete the requirements as listed in the Master of Data Science Schedule.
4 A student must achieve a Grade Point Average of 4.0 or higher in the first 60 points of taught courses taken for this degree prior to enrolment in DATASCI 792. If this Grade Point Average is not achieved, enrolment in the Master of Data Science cannot continue.
5 A student admitted to this programme must complete the University of Auckland Academic Integrity Course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

Dissertation
6 a The dissertation is to be carried out under the guidance of a supervisor appointed by Senate or its representative.
   b The dissertation topic must be approved by the relevant Academic Head or nominee prior to enrolment.
   c The dissertation is to be completed and submitted in accordance with the General Regulations – Masters Degrees.

Reassignment
7 A student who does not achieve the Grade Point Average specified in Regulation 4 may apply to reassign courses passed for this degree to the Postgraduate Diploma in Science.

Variations
8 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Honours
9 This degree may be awarded with Honours in accordance with the General Regulations – Masters Degrees.

Commencement
10 These regulations came into force on 1 January 2019.

The Degree of Master of Environmental Science – MEnvSci

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission
1 In order to be admitted to this programme, a student needs to have completed the requirements for:
   a the Degree of Bachelor of Science from this University with a Grade Point Average of at least 5.0 or higher in 75 points above Stage II in Environmental Science, or the equivalent as approved by Senate or its representative
   and
   b any prerequisites for the courses in the subject area in which they wish to enrol.

Note: Relevant subjects may include environmental science, geography, biology, chemistry, earth sciences and geology.
Duration and Total Points Value
2 A student enrolled for this degree must:
   a pass courses with a total value of 180 points
   and
   b complete within the time limit specified in the General Regulations – Masters Degrees.
3 The total enrolment for this degree must not exceed 220 points.

Structure and Content
4 A student enrolled for this degree must complete the requirements as listed in the Master of Environmental Science Schedule.
5 A student must achieve a Grade Point Average of 5.0 or higher in the first 60 points of taught courses in order to enrol in ENVSCI 794.
6 A student admitted to this programme must complete the University of Auckland Academic Integrity Course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

Thesis/Research Project
7 a The thesis or research project is to be carried out under the guidance of a supervisor appointed by Senate or its representative.
   b The thesis or research project topic must be approved by the relevant Academic Head or nominee prior to enrolment.
   c The thesis or research project is to be completed and submitted in accordance with the General Regulations – Masters Degrees.

The Degree of Master of Information Technology – MInfoTech
This qualification is awarded jointly by the University of Auckland and the University of Waikato.
The regulations for this degree are to be read in conjunction with all other relevant regulations including the Academic Statutes and Regulations.

Admission
1 In order to be admitted to this programme, a student needs to have completed the requirements for:
   either
   a a Bachelors Honours degree from this University with a Grade Point Average of 4.5 or higher in 75 points above Stage III, including at least 45 points in an IT related field at postgraduate level, or the equivalent as approved by Senate or its representative
   or
   b (i) a Bachelors degree from this University with a Grade Point Average of 4.5 or higher in 75 points at Stage III or above, including at least 45 points in an IT related field, or the equivalent as approved by Senate or its representative
   or
(ii) (a) a Bachelors degree from this University, or an equivalent degree qualification as approved by Senate or its representative
and (b) the Postgraduate Certificate in Information Technology from this University with a Grade Point Average of 4.5 or higher, or the equivalent
or
  c a Bachelors degree from this University with a Grade Point Average of 4.5 or higher in 75 points at Stage III or above, or the equivalent as approved by Senate or its representative.

2 In exceptional circumstances, Senate or its representative may approve the admission of a student who has at least three years of extensive, relevant, practical, professional or scholarly experience deemed equivalent to the requirements in Regulation 1.

Duration and Total Points Value
3 A student admitted to this degree under Regulation 1a must:
   a pass courses with a total value of 120 points
   and b complete within two semesters if enrolled full-time or eight semesters if enrolled part-time
   and c not exceed 160 points for the total enrolment for this degree.

4 A student admitted to this degree under Regulation 1b must:
   a pass courses with a total value of 180 points
   and b complete within three semesters if enrolled full-time and 12 semesters if enrolled part-time
   and c not exceed 220 points for the total enrolment for this degree.

5 A student admitted to this degree under Regulation 1c must:
   a pass courses with a total value of 240 points
   and b complete within four semesters if enrolled full-time and 12 semesters if enrolled part-time
   and c not exceed 280 points for the total enrolment for this degree.

6 Unless approval has been granted by Senate or its representative to complete under Regulation 3 or 4, a student admitted to this degree under Regulation 2 must:
   a pass courses with a total value of 240 points
   and b complete within four semesters if enrolled full-time and 12 semesters if enrolled part-time
   and c not exceed 280 points for the total enrolment for this degree.

Structure and Content
7 A student enrolled for this degree must complete the requirements as listed in the Master of Information Technology Schedule.

8 A student who has to complete 120 points must achieve a Grade Point Average of 4.0 or higher in the first 60 points of taught courses taken for this degree prior to enrolment in COMPSCI 778. If this Grade Point Average is not achieved, enrolment in the Master of Information Technology cannot continue.

9 A student who has to complete 180 points must achieve a Grade Point Average of 4.0 or higher in the first 120 points of taught courses taken for this degree prior to enrolment in COMPSCI 778. If this Grade Point Average is not achieved, enrolment in the Master of Information Technology cannot continue.

10 A student who has to complete 240 points must achieve a Grade Point Average of 4.5 or higher in the first 60 points of taught courses taken for this degree. If this Grade Point Average is not achieved, enrolment in the Master of Information Technology cannot continue.

11 A student who has to complete 240 points must achieve a Grade Point Average of 4.0 or higher in the first 180 points of taught courses taken for this degree prior to enrolment in COMPSCI 778. If this Grade Point Average is not achieved, enrolment in the Master of Information Technology cannot continue.

12 A student who has previously passed any courses the same as, or similar to, the courses required for this degree must substitute an alternative course(s) approved by the Director of the ICT Graduate School.
A student admitted to this programme must complete the University of Auckland Academic Integrity Course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

Reassignment

A student who does not achieve the Grade Point Average specified in Regulations 8, 9, 10 or 11 may apply to reassign courses passed for this degree to the Postgraduate Diploma in Information Technology or Postgraduate Certificate in Information Technology.

Variations

In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Honours

This degree may be awarded with Honours where a student’s overall grade is sufficiently high. There are two classes of honours: First Class Honours and Second Class Honours. Second Class Honours are awarded in either First Division or Second Division.

Where the requirements for the degree have not been completed in accordance with the time limits specified in Regulations 3, 4, 5 and 6, the student’s eligibility for Honours will lapse. However, on the recommendation of the Head of Department, Senate or its representative may approve the retention of eligibility for Honours.

The calculation for the overall grade to determine the award of Honours will include the grades given for all courses attempted in the degree. For the purposes of grade or mark calculation, Withdrawn, Did Not Sit and Did Not Complete will count as zero.

Commencement

These regulations came into force on 1 January 2018. The 2017 regulations for the Degree of Master of Information Technology were thereby repealed.

The Degree of Master of Science – MSc
The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission
1 In order to be admitted to this programme, a student needs to have:
   either
   a (i) completed the requirements for the Degree of Bachelor of Science or an equivalent qualification approved by Senate or its representative
   and
   (ii) attained at least a Grade Point Average of 5.0 in 75 points above Stage II, including at least 45 points in the relevant subject major as specified in the Bachelor of Science regulations
   or
   b (i) (a) completed the requirements for the Degree of Bachelor of Science (Honours) or an equivalent qualification approved by Senate or its representative
   and
   (b) attained at least a Grade Point Average of 4.0 in 90 points taken for the Bachelor of Science (Honours)
   or
   (ii) (a) completed the requirements for the Postgraduate Diploma in Science or an equivalent qualification approved by Senate or its representative
   and
   (b) attained at least a Grade Point Average of 4.0 in 90 points taken for the Postgraduate Diploma in Science. At least 75 of these points must be in 700 level courses or a dissertation, if the proposed Masters degree programme includes a thesis.
2 a A student who has not completed all the requirements of the Degree of Bachelor of Science but who has passed:
(i) 345 points towards that degree
and
(ii) the Stage III entry requirements for this degree
may, with the approval of the relevant Head of Department, Director of School or equivalent, enrol for this
degree. The requirements for the Degree of Bachelor of Science must be completed within 12 months of initial
enrolment for the Degree of Master of Science. Should these requirements not be completed within these 12
months, enrolment for the Degree of Master of Science will be suspended until they have been completed.

b A student who has not completed all the requirements of the Degree of Bachelor of Science (Honours) or the
Postgraduate Diploma in Science but who has:
(i) passed 105 points towards the Degree of Bachelor of Science (Honours) or the Postgraduate Diploma in
Science
and
(ii) met all other entry and prerequisite requirements
may, with the approval of the relevant Head of Department, Director of School or equivalent, enrol for this
degree. The requirements for the Degree of Bachelor of Science (Honours) or Postgraduate Diploma in Science
must be completed within 12 months of initial enrolment for the Master of Science. Should these requirements
not be completed within these 12 months, enrolment for the Master of Science will be suspended until they
have been completed.

3 In exceptional circumstances Senate or its representative may approve the admission of a student who has
completed the requirements of a Bachelor of Science, or an equivalent qualification, and has significant relevant
professional scientific experience.

4 Admission to this degree requires approval from the relevant Head of Department, Director of School, or
equivalent and is at the discretion of Senate or its representative.

Duration and Total Points Value
5 A student admitted to this degree under Regulation 1a must:
   a pass courses with a total value of 240 points
   and
   b complete within the time limit specified in the General Regulations – Masters Degrees
   and
   c not exceed 280 points for the total enrolment for this degree.

6 A student admitted to this degree under Regulation 1b or 3 must:
   a pass courses with a total value of 120 points
   and
   b complete within the time limit specified in the General Regulations – Masters Degrees
   and
   c not exceed 160 points for the total enrolment for this degree.

Structure and Content
7 A student enrolled for this degree must complete the requirements for one of the subjects as listed in the Master
of Science Schedule.

8 A student admitted to this programme must complete the University of Auckland Academic Integrity Course as
specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

Thesis/Research Portfolio/Dissertation
9 a A thesis, research portfolio, or dissertation, when included in the programme, is to be carried out under the
guidance of a supervisor appointed by Senate or its representative.

b (i) The thesis or dissertation topic for the 120 point MSc must be approved by the relevant Departmental
Postgraduate Committee prior to enrolment in the degree.
   (ii) The thesis or dissertation topic for the 240 point MSc must be approved by the relevant Departmental
Postgraduate Committee prior to enrolment in the thesis or dissertation.

c A student who has to complete 240 points for this degree and whose programme includes a thesis, research
portfolio or dissertation needs, before enrolment for the thesis, research portfolio or dissertation, to obtain
an average grade of at least B– in 90 points selected from the first 120 points passed in the coursework
component of the degree. If this is not achieved the courses passed will be reassigned to the Postgraduate Diploma in Science for all subjects except Forensic Science, for which courses passed will be reassigned to the Postgraduate Diploma in Forensic Science.

d A student who has passed at least 105 points but fewer than 120 points of a 240 point degree and obtained
an average grade of at least B– in 90 points may, with the approval of the relevant Head of Department,
Director of School or equivalent, enrol in the thesis, research portfolio or dissertation, but must have
completed 120 points for the coursework component of the degree within 12 months of initial enrolment in the thesis, research portfolio or dissertation. If this is not achieved the courses passed will be reassigned to the Postgraduate Diploma in Science for all subjects except Forensic Science, for which courses passed will be reassigned to the Postgraduate Diploma in Forensic Science.

e. The thesis, research portfolio or dissertation is to be completed and submitted in accordance with the General Regulations – Masters Degrees.

Reassignment
10 A student who does not meet the requirements of this degree may apply to reassign courses passed for the Master of Science to the Postgraduate Diploma in Science for all subjects except Forensic Science, for which courses passed will be reassigned to the Postgraduate Diploma in Forensic Science.

Variations
11 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Honours/Distinction/Merit
12 This degree may be awarded with either Honours, Distinction, or Merit in accordance with the General Regulations – Masters Degrees.

Commencement
13 These regulations came into force on 1 January 2017. The 2010 regulations for the Degree of Master of Science were thereby repealed.

### Master of Science (MSc) Schedule

A student who has to complete 120 points must satisfy the requirement for one of the following subjects:

#### Applied Mathematics
**Prerequisite:** A BSc(Hons) or PGDipSci in Applied Mathematics  
**Requirement:**  
- Research Masters  
  - 120 points: MATHS 795 MSc Thesis in Applied Mathematics

#### Bioinformatics
**Prerequisite:** A BSc(Hons) in Bioinformatics, or a PGDipSci in Bioinformatics including BIOSCI 761, or an equivalent qualification as approved by the Programme Director  
**Requirement:**  
- Research Masters  
  - 120 points: BIOINF 796 MSc Thesis in Bioinformatics  
- Taught Masters

### Statistics
**Prerequisite:** A BSc(Hons) or PGDipSci in Statistics or Medical Statistics with an average of B or higher; and STATS 210 or 225, or equivalent
**Requirement:**
- Research Masters
  - 30 points from 700 level courses in Statistics or other approved 600 or 700 level courses offered at this University
  - 90 points: STATS 798 Thesis
- Taught Masters
  - 15 points: STATS 732
  - at least 45 points from BIOPHL, 707–709, 711, STATS

### Wine Science
**Prerequisite:** A PGDipSci in Wine Science
**Requirement:**
- Research Masters
  - 120 points: WINESCI 796 MSc Thesis in Wine Science

A student who has to complete 240 points must satisfy the requirement for one of the following subjects:

### Applied Mathematics
**Prerequisite:** A major in Applied Mathematics, or equivalent as approved by the Head of Department
**Requirement:**
- Research Masters
  - at least 60 points from MATHS 761–770
  - up to 60 points from approved 700 level courses in Mathematics or related subjects with approval of the Head of Department
  - 120 points: MATHS 795 MSc Thesis in Applied Mathematics

### Bioinformatics
**Prerequisite:** A BSc with a major in Bioinformatics or Biological Sciences and COMPSCI 220, or equivalent as approved by the Programme Director
**Requirement:**
- Research Masters
  - 75 points: BIOINF 701, 702, 703, 704, BIOSCI 761
  - 45 points from BIOSCI 733, 737, 732, 755–758, COMPSCI 715, 720, 732, 760, 767, MATHS 764, STATS 720, 721, 730, 731, 732, 761, 780, 784, or related 700 level courses, from at least two departments as approved by the Programme Director
  - 120 points: BIOINF 796 MSc Thesis in Bioinformatics

### Biological Sciences
**Prerequisite:** A major in Biological Sciences, or equivalent as approved by the Director
**Requirement:**
- Research Masters
  - 15 points: BIOSCI 761
  - at least 75 points from BIOPHL, BIOSCI 724–746, 749–761
  - up to 30 points from approved 700 level courses in a related subject
  - 120 points: BIOSCI 796 MSc Thesis in Biological Sciences

### Biomedical Science
The MSc in Biomedical Science was suspended in 2016. Students who have a current enrolment in this subject should contact their faculty for advice regarding completion.

**Prerequisite:** A major in Biomedical Science, or equivalent as approved by the Board of Studies (Biomedical Science)
**Requirement:**
- Research Masters
  - at least 90 points from MEDSCI 703–723, 725–739, BIOINF 701, BIOSCI 728, 729, 733, 737, 738, 741, 746, 755–761, HLTHPSYC 716
  - up to 30 points from other 700 level courses as approved by the Board of Studies (Biomedical Science)
  - 120 points: BIOMED 796 MSc Thesis in Biomedical Science

### Biosecurity and Conservation
**Prerequisite:** An approved BSc or equivalent experience subject to approval by the Programme Director

### Chemistry
**Prerequisite:** A major in Chemistry
**Requirement:**
- Research Masters
  - 15 points: CHEM 795
  - at least 75 points from CHEM 710–780
  - up to 30 points from 700 level courses in Chemistry or related subjects with approval of the Head of School
  - 120 points: CHEM 796 MSc Thesis in Chemistry

### Clinical Exercise Physiology
**Prerequisite:** A BSc in Exercise Sciences, Sport and Exercise Science or equivalent approved programme
**Requirement:**
- Taught Masters
  - 90 points: EXERSCI 703, 705, 710, 712, 771, 772
  - 30 points from approved 700 level courses in the Faculty of Science or the Faculty of Medical and Health Sciences
  - 75 points: EXERSCI 773, 774, 775
  - 45 points: EXERSCI 792 Dissertation

### Computer Science
**Prerequisite:** A major in Computer Science
**Requirement:**
- Research Masters
  - at least 90 points from COMPSCI 701–717, 720–780
  - up to 30 points from 700 level courses in a related subject with approval of the Head of Department
  - 120 points: COMPSCI 796 MSc Thesis in Computer Science

### Earth Sciences
**Prerequisite:** A major in Applied Geology, Earth Sciences, Geography, or Geology and at least 90 points at Stage III with at least 45 points at Stage III in Earth Sciences or Geology
**Requirement:**
- Research Masters
  - at least 90 points from EARTHSCI 703–772, GEOG 730, 745, 746, 771, 772, GEOPHYS 760, 761
  - up to 30 points from 700 level courses as approved by the Programme Coordinator

### The Degree of Master of Speech Language Therapy Practice – MSLTPrac
*The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.*

#### Admission
1. In order to be admitted to this programme, a student needs to have:
   a. completed the requirements for any Bachelors or Masters degree of this University other than a degree specialising in speech language therapy, or gained an equivalent qualification, provided that Senate or its representative is satisfied that the prior degree or other equivalent qualification is indicative of the ability to undertake advanced study in Speech Language Therapy Practice

   and
b passed at least 75 points at Stage III or 700 level in approved subject areas (Education, Psychology, Linguistics, Health Sciences) and achieved in these an average grade of B– or higher.

2 On the recommendation of the Dean of Science, Senate or its representative may require a student with insufficient background in Psychology and Education to take additional courses as a condition of enrolment for Part I of this degree, as under Regulation 7c below.

3 Admission to the programme is at the discretion of Senate or its representative, on the recommendation of the Director of the programme.

Duration and Total Points Value
4 A student enrolled for this degree must:
   a pass courses with a total value of 240 points
   and
   b complete within the time limit specified in the General Regulations – Masters Degrees.

5 The total enrolment for this degree must not exceed 280 points.

Structure and Content
6 Taught Masters
   A student enrolled for this degree must pass courses to the value of 240 points from Parts I and II as listed in the Master of Speech Language Therapy Practice Schedule.

7 a A student may not enrol for Part II until Part I has been completed, unless special approval is given by the Dean of Science or representative.

   b A student who has previously passed courses from another programme that are substantially similar to any one of the courses required under Regulation 6 above may, with the approval of the Dean of Science or representative, be required to take alternative 700 level courses from the subject Speech Science or other approved 700 level courses.

   c Where a student is required to take additional courses as a condition of enrolment for Part I, under Regulation 2 above, those courses:
      (i) are to be taken for Certificates of Proficiency
      and
      (ii) are to be passed within 12 months of initial enrolment for this degree.

8 A student admitted to this programme must complete the University of Auckland Academic Integrity Course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

Practical and Clinical Requirements
9 A student is required to pass the clinical and practical requirements of the Speech Language Therapy Practice courses to the satisfaction of Senate or its representative.

Variations
10 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Termination of Enrolment
11 a If the behaviour of a student in a clinical environment is found, after due and fair inquiry, to be offensive, disruptive or likely to give rise to a risk of harm to the welfare of any person, the enrolment of the student in the programme may be terminated by Senate or its representative and any application to re-enrol may likewise be declined.

   b A student who is subject to any such inquiry may be suspended by Senate or its representative from lectures, classes, clinics and any teaching placement pending the outcome of the inquiry.

   c A student whose enrolment is terminated under Regulation 11a may appeal that decision to the Council or its duly appointed delegate.

Honours
12 This degree may be awarded with Honours in accordance with the General Regulations – Masters Degrees.

Commencement
13 These regulations came into force on 1 January 2006. The 2002 regulations for the Degree of Master of Speech Language Therapy Practice were thereby repealed.

The Degree of Doctor of Clinical Psychology – DClinPsy

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations, including the General Regulations for Named Doctorates and the Academic Statutes and Regulations.

Preamble
1  a  A candidate for the Degree of Doctor of Clinical Psychology is required to pursue an approved programme of advanced study, research and clinical practice as an enrolled student of the University.

b  It is expected that this programme will normally be completed within three years of full-time candidature.

c  The Degree of Doctor of Clinical Psychology is awarded for a formal and systematic exposition of a coherent programme of advanced research work and supervised practice, carried out over the period of registration for the degree, which in the opinion of the examiners and the Board of Graduate Studies satisfies all of the following criteria:
  (i)  that the research thesis is an original contribution to knowledge, and is of direct relevance to the field of clinical psychology
  and
  (ii)  that the research components of the degree (thesis and clinical research projects) meet internationally recognised standards for such work
  and
  (iii)  that the candidate has demonstrated both the knowledge of the relevant literature, in both research and clinical practice, and the ability to exercise analytical and professional judgement.

d  A Doctor of Clinical Psychology thesis may not exceed 60,000 words in total without the permission of the Board of Graduate Studies.

e  If the core of the thesis comprises a series of published or unpublished research papers, the candidate must be the lead or sole author of each paper and must provide a contextual framework and concluding discussion. The range and focus of this material shall generally correspond with the introductory and concluding chapters of a thesis. The thesis must be presented in a consistent format, citation style and typeface.

f  If the core of the thesis does not comprise a series of published or unpublished research papers, a candidate may still include within their thesis published or unpublished research papers, provided that the candidate was the lead or sole author of each paper. The thesis must be presented in a consistent format, citation style and typeface.

g  In the case of published or unpublished research papers that the candidate has contributed to but is not the sole or lead author of, the candidate may report in the thesis their contribution to the research with due reference to the original paper. The thesis must be presented in a consistent format, citation style and typeface.

h  All material that is not the original work of the author must:
  (i)  be fully and appropriately attributed
  or
  (ii)  if a substantial part of another work, be reproduced only with the written permission of the copyright owner of that other work.

i  The Portfolio of Clinical Research may not exceed 25,000 words in total and will consist of five separate reports with the maximum word limit of 5000 words for each.

j  All research for this degree is to be conducted in accordance with the University of Auckland Guidelines for the Conduct of Research.

Eligibility
2  Candidates for the Degree of Doctor of Clinical Psychology are required to have:

   a  (i)  completed the requirements for the award of a Bachelors Honours Postgraduate Degree in Psychology at the University of Auckland with a Grade Point Average of at least 6.0
   or
   (ii)  completed the requirements for the award of a Masters Degree in Psychology at the University of Auckland with a Grade Point Average of at least 6.0
or
(iii) completed the requirements for the award of a qualification that the Board of Graduate Studies considers to be equivalent to one of the prerequisite qualifications specified in Regulations 2a(i) and 2a(ii) of these regulations

and
b passed PSYCH 708, 718, 723, 788 or their equivalents with at least a B+ average
and
c demonstrated to the Director and staff members of the relevant clinical psychology programme, during enrolment in the above prerequisite courses or equivalents, the ability and personal qualities necessary to pursue a doctoral level research-oriented clinical programme in the field of psychology.

Admission
3 Every candidate for the Degree of Doctor of Clinical Psychology must have applied for admission and been admitted to the University of Auckland.

Duration and Total Points Value
4 a A candidate for this degree must follow a programme consisting of three full-time years, and pass an approved programme with a total value of 360 points.

b Candidates must pass each part, and must normally complete the requirements for this degree within three years from the date of registration, unless permitted to do otherwise by the Board of Graduate Studies under Regulation 8 of these regulations.

Registration
5 a Registration and all conditions pursuant to it shall be determined in accordance with Regulation 2 of the General Regulations for Named Doctorates.

b The following provisional goals are required for all candidates for this degree:
(i) completion of PSYCH 801 and PSYCH 897 Part I
(ii) completion of a full thesis research proposal for PSYCH 899 Thesis to the satisfaction of the appropriate postgraduate committee
(iii) completion of a literature review and method section to the satisfaction of the academic unit or nominee
(iv) ethics approval(s) and/or permissions obtained for the research
(v) commence data collection
(vi) completion of the standard goals relating to induction, English language, academic integrity and health and safety prescribed by the Board of Graduate Studies upon commencement of the registration.

c Further provisional goals may be added as per Regulation 2 of the General Regulations for Named Doctorates and as required after the commencement of registration as per Regulation 4a of the General Regulations for Named Doctorates.

Structure and Content
6 a Of the 360 points required for this degree, a student must pass Parts I, II and III, as listed in the Doctor of Clinical Psychology Schedule.

Note that PSYCH 897 and 899 are awarded only on completion of the whole programme.

b (i) A student who fails any course or part of a course of the programme, may be required to repeat that part or course or to sit a special examination before proceeding into the next part of the programme.
(ii) A student must complete PSYCH 801 before enrolment in PSYCH 802, and must complete PSYCH 802 before enrolment in PSYCH 803.
(iii) A student who fails any part of the programme may be declined permission to enrol again in that part of the programme or, under Regulation 4g of the General Regulations for Named Doctorates, be declined permission to enrol in the programme as a whole.

Reviews of Registration
7 Reviews of registration will be made each year in accordance with Regulation 3 of the General Regulations for Named Doctorates, except that Regulation 3c(ii) will not apply. Instead, candidates may be confirmed subject to specified conditions.

Changes to the Conditions of Registration
8 Changes to supervision, extensions of time, and suspension or termination of registration will be made according to Regulation 4 of the General Regulations for Named Doctorates.

Enrolment and Fees
9 Enrolment and fees will be determined according to Regulation 5 of the General Regulations for Named Doctorates.

Submission
10 a All candidates are initially required to submit one copy of the thesis and the Portfolio of Clinical Research in
temporary binding and one electronic copy in pdf format of the thesis and the Portfolio of Clinical Research to the Graduate Centre. Copies should include the following statement to examiners on the first page:

“This thesis and portfolio are for examination purposes only and are confidential to the examination process.”

b Unless permitted to do otherwise by the Board of Graduate Studies, a candidate must normally submit the thesis and the Portfolio of Clinical Research in no fewer than three and no more than four years from the Date of Registration.

c Three months prior to the expected date of submission, candidates should notify the Graduate Centre in writing of their intention to submit. If the candidate has reason to believe that any person would be unsuitable to serve as an examiner of the thesis and the Portfolio of Clinical Research on the grounds of conflict of interest, he or she may also submit at this time the name of this person and a statement in writing as to the nature of the conflict of interest to the Dean of Graduate Studies.

d The thesis and Portfolio of Clinical Research are to be accompanied by a statutory declaration, signed by the candidate stating:

(i) that the thesis and Portfolio of Clinical Research are the candidate’s own work
(ii) whether any part of the thesis or Portfolio of Clinical Research (in form or substance) has been submitted or accepted for any other degree or diploma and, where that is the case, clearly setting out the extent to which that earlier work has been incorporated into the thesis or Portfolio of Clinical Research
(iii) that written permission has been obtained for any third-party copyright material reproduced in the thesis or Portfolio of Clinical Research that represents a “substantial part” of the other work
(iv) that the temporary-bound copy and electronic copy are identical.

e The thesis and Portfolio of Clinical Research are to be presented in English unless otherwise approved by the Board of Graduate Studies at the time of first registration of the candidate.

f Where the thesis or Portfolio of Clinical Research contain jointly authored research papers and/or any other jointly authored work, published or unpublished, a Co-Authorship Form must be signed by the candidate and all the joint authors, stating the extent to which the jointly authored material is the candidate’s own work.

Where the thesis or Portfolio of Clinical Research include research reported in published or unpublished co-authored works (other than as in Regulations 1e and 1f), a Co-Authorship Form must be signed by the candidate and all the joint authors, stating the extent to which the jointly authored material is the candidate’s own work.

Examining
11 a The examination process will follow that of Regulation 9 of the Statute for the Degree of Doctor of Philosophy 2016 except that:

(i) examiners will be requested to examine the thesis according to the criteria of Clause 1(c) of these regulations, and to provide an assessment of the grades assigned to the Portfolio of Clinical Research
(ii) candidates may be asked to make specified minor corrections to or resubmit all or part of the Portfolio of Clinical Research.

b In the event that a candidate is asked to resubmit all or part of the Portfolio of Clinical Research the same process of examination will be followed for the resubmitted work.

Variations
12 In exceptional circumstances the Board of Graduate Studies may approve a personal programme which does not conform to these regulations.

Appeals
13 Appeals regarding the examination process or decisions of the Board of Graduate Studies must be made according to Regulation 6 of the General Regulations for Named Doctorates.

Dispute Resolution Procedures
14 Disputes are to be resolved in accordance with Regulation 7 of the General Regulations for Named Doctorates.

Transitional Arrangements
15 a These regulations came into force on 1 January 2016. The 2009 regulations for the Degree of Doctor of Clinical Psychology were thereby repealed.

b For candidates initially registered under earlier regulations for this degree the Board of Graduate Studies may agree to vary the application of the provisions of this statute to ensure consistency with the provisions of the statute under which the candidate was enrolled where it is satisfied that the candidate would otherwise be at a disadvantage.

Graduate Diploma in Science – GradDipSci

The regulations for this graduate diploma are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission

1 In order to be admitted to this programme, a student needs to have:
   either
   a (i) completed the requirements for any degree from this University, or the equivalent as approved by
   Senate or its representative
   or
   (ii) demonstrated practical, professional, or scholarly experience of an appropriate kind that is approved
   by Senate or its representative as equivalent to that specified in 1a(i) above
   and
   b attained a level of preparation appropriate to the selected major for the Graduate Diploma in Science as
   approved by the relevant Academic Head or nominee.

2 A student may, if Senate or its representative gives approval, enrol for this graduate diploma without having
   fulfilled the requirements of Regulation 1b, provided that the student completes any prerequisite courses as part
   of or in addition to the normal requirements of this programme.

3 With the approval of Senate or its representative, a student who needs only 30 points to complete the Bachelor of
   Science may enrol concurrently for this graduate diploma and those remaining points, provided that the graduate
   diploma will not be awarded until such qualifying degree is completed.

Duration and Total Points Value

4 a A student enrolled for this graduate diploma must follow a programme equivalent of two full-time semesters
   and pass courses with a total value of 120 points.
   b The requirements for a Graduate Diploma in Science must be completed within four years of initial enrolment.
   c In all cases, the semester of initial enrolment is deemed to be the first semester in which the student enrolled
   for a course which is assigned or reassigned to the programme.
   d In exceptional circumstances the relevant Academic Head may increase the duration allowed for enrolment
   for a period not normally exceeding two consecutive semesters.

Structure and Content

5 Of the 120 points required for this graduate diploma a student must pass:
   a at least 75 points above Stage II, from the Bachelor of Science or Bachelor of Science (Honours) Schedules
   and
   b at least 60 points from a major listed in the Bachelor of Science Schedule, including the Stage III courses
   required for that major.

6 The programme for this graduate diploma may include a dissertation or project of up to 30 points in a subject for
   which the student is approved by the Academic Head or nominee as suitably qualified.

7 A student admitted to this programme must complete the University of Auckland Academic Integrity Course as
   specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

8 The programme for each student requires the approval of the relevant Head of Department, Director of School or
   equivalent prior to enrolment.

9 Cross-credits will not be granted toward the Graduate Diploma in Science.

Dissertation / Project

10 a A dissertation or project, when included in this programme, is to be carried out under the guidance of
    a supervisor appointed by Senate or its representative on the recommendation of the relevant Head of
    Department.
b The dissertation or project topic must be approved by the relevant Head of Department prior to enrolment.

c The dissertation or project is to be completed and submitted in accordance with the General Regulations – Postgraduate Diplomas.

Variations
11 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement
12 These regulations came into force on 1 January 2019. The 2006 regulations for the Graduate Diploma in Science were thereby repealed.

Postgraduate Certificate in Information Technology – PGCertInfoTech

This qualification is awarded jointly by the University of Auckland and the University of Waikato.
The regulations for this postgraduate certificate are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Requirement:
• at least 90 points from MEDSCI 703–723, 725–740, BIOINF 701, BIOSCI 728, 729, 732, 736, 737, 741, 744, 746, 755–761, HLTHPSYC 716
• up to 30 points from other 600 or 700 level courses as approved by the Board of Studies (Biomedical Science)

Biosecurity and Conservation
Prerequisite: An approved BSc or equivalent experience subject to approval by the Programme Director
Requirement:
• 45 points: BIOSCI 747, 748, ENVSCI 733
• 45 points from BIOSCI 761 or ENVSCI 701, BIOSCI 724, 730, 733, 734, 735, 738, 751, ENVMTG 742, 743, 746, ENVSCI 716, 734, 737
• 30 points from approved 700 level courses in the Faculty of Science

Biotechnology
Prerequisite: A major in Biotechnology, or equivalent as approved by the Director, and at least 90 points at Stage III
Requirement:
• 45 points from BIOSCI 741, 752, 755, 759
• 30 points: SCIENT 701, 703
• 45 points from other approved 700 level courses in Biological Sciences

Chemistry
Prerequisite: A major in Chemistry
Requirement:
• at least 90 points from CHEM 691, 710–780, 795
• up to 30 points from 600 or 700 level courses in Chemistry or related subjects with approval of the Head of Department
Note: Students intending to study for a Master of Science in Chemistry must take CHEM 795

Clinical Exercise Physiology
Prerequisite: A major in Exercise Sciences, Sport and Exercise Science, or an equivalent qualification and EXERSCI 302 or equivalent as approved by the Head of Department
Requirement:
• 90 points: EXERSCI 703, 705, 710, 712, 771, 772
• 30 points from approved 700 level courses in the Faculty of Science or the Faculty of Medical and Health Sciences

Computer Science
Prerequisite: A major in Computer Science
Requirement:
• at least 90 points from COMPSCI 601, 602, 691, 701–717, 720–780, BIOINF 702
• up to 30 points from 600 and 700 level courses in a related subject with approval of the Head of Department

Earth Sciences
Prerequisite: A major in Earth Sciences, Geography, or Geology with at least 45 points at Stage III in Earth Sciences or Geology courses or GEOG 330, 331, 334, 351, 360 or equivalent
Requirement:
• at least 90 points from EARTHSCI 703–772, GEOG 730, 732, 745, 746, 770–772, GEOPHYS 760, 761
• up to 30 points from 700 level courses as approved by the Programme Coordinator

Environmental Management
Prerequisite: An approved BSc, BE, BA, BPlan, BCom or equivalent degree
Requirement:
• 15 points: GEOG 701
• at least 60 points from ENVMTG 741–747
• up to 45 points from 700 level courses as approved by the Programme Coordinator

Environmental Science
Prerequisite: An approved BSc, or other equivalent degree
Requirement:
• 30 points: ENVSCI 701, 711
• at least 60 points from EARTHSCI 705, 720, ENVSCI 702–707, 713–738, GEOG 730, 745–749, 770, 771, ENVMTG 742, 744, MARINE 703
• up to 30 points from 700 level courses as approved by the Programme Coordinator

Exercise Sciences
Prerequisite: A major in Exercise Sciences, Sport and Exercise Science, or equivalent as approved by the Head of Department
Requirement:
• 15 points: EXERSCI 705
• at least 45 points from 700 level courses in Exercise Sciences as approved by the Head of Department
• up to 60 points from other 600 or 700 level courses in Biological Sciences, Engineering, Exercise Sciences, Food Science, Nutrition, Physiology, Psychology, Statistics, or related subjects, as approved by the Head of Department

Food Science
Prerequisite: A major in Food Science, or in Food Science and Nutrition, or in Biological Sciences, or in Chemistry, or in other relevant areas as approved by the Programme Coordinator
Requirement:
• 60 points from FOODSCI 703, 707, 708, CHEMMAT 757
• 60 points from approved 600 and 700 level courses

Geography
Prerequisite: A major in Geography or Earth Sciences with 45 points at Stage III in Geography
Requirement:
• 15 points: GEOG 701
• at least 75 points from GEOG 711–779, EARTHSCI 705, 713, 732, ENVMTG 741–746, ENVSCI 704, 713, 737, 738
• up to 30 further points from other 700 level courses in a related subject as approved by the Academic Head
Geophysics
Prerequisite: A major in Geophysics, Physics, or a related subject, with appropriate knowledge in the Earth Sciences
Requirement:
• 45 points from EARTHSCI 763, GEOPHYS 711–713, 761, PHYSICS 743
• 75 points from approved 600 or 700 level courses in Earth Sciences, Geophysics, Mathematics, Physics or other Science subjects approved by the Head of Department

Logic and Computation
Prerequisite: A major in Logic and Computation
Requirement:
• 15 points from COMPSCI 720, 750, 760, 767
• 15 points from PHIL 736–738
• 90 points from COMPSCI 720, 750, 760, 767, LINGUIST 721, 724, LOGICOMP 701–705, MATHS 713, 715, PHIL 736–738

Geophysics
Prerequisite: A major in Geophysics, Physics, or a related subject, with appropriate knowledge in the Earth Sciences
Requirement:
• 45 points from EARTHSCI 763, GEOPHYS 711–713, 761, PHYSICS 743
• 75 points from approved 600 or 700 level courses in Earth Sciences, Geophysics, Mathematics, Physics or other Science subjects approved by the Head of Department

Logic and Computation
Prerequisite: A major in Logic and Computation
Requirement:
• 15 points from COMPSCI 720, 750, 760, 767
• 15 points from PHIL 736–738
• 90 points from COMPSCI 720, 750, 760, 767, LINGUIST 721, 724, LOGICOMP 701–705, MATHS 713, 715, PHIL 736–738

Marine Science
Prerequisite: An approved BSc, BE, or equivalent degree
Requirement:
• 15 points: MARINE 701
• 15 points from BIOSCI 761, CHEM 795, ENVSCI 701
• 90 points from the following 700 level courses including at least two of the following subject areas: BIOSCI 724–727, 733, 738, 739, 749, CHEM 770, EARTHSCI 720, ENVMG 742, 744, ENVSCI 702, 704, 714, FOODSCI 703, 708, GEOG 730, 746, 748, 771, GEOPHYS 711–713, 761, MARINE 702–705, STATS 767, or other courses approved by the Programme Coordinator

Mathematics
Prerequisite: A major in Mathematics, including (either MATHS 320 or 328) and MATHS 332, or an equivalent
Mathematics Education students may substitute MATHS 302 for one of these courses
Requirement:
• at least 75 points in 700 level Mathematics courses
• up to 45 points from approved 600 or 700 level courses in Mathematics or related subjects, with the approval of the Head of Department

Medical Statistics
Prerequisite: A major in Statistics, or equivalent as approved by the Head of Department, and STATS 210 or 225
Requirement:
• 45 points: POPHLTH 708, STATS 770, 773
• 15 points from STATS 779, 782 or equivalent
• at least 30 points from STATS 701–703, 705, 708–787, BIOINF 704, POPHLTH 707–709, 711, 717
• up to 30 points from 700 level courses in Statistics or related subjects, as approved by the Head of Department

Optometry
Prerequisite: A BOptom, or an equivalent qualification approved by the Head of School
Requirement:
• 120 points from OPTOM 751, 752, 757, 759
or
• at least 90 points from OPTOM 751, 752, 757, 759
• up to 30 further points, subject to approval by the Head of Department, from approved 600 or 700 level courses in a related subject

Pharmacology
Prerequisite: A major in Pharmacology or equivalent as approved by the Head of Department
Requirement:
• at least 60 points from MEDSCI 700, 701, 715–723, 735, 744

Physiology
Prerequisite: A major in Physics, or equivalent as approved by the Head of Department
Requirement:
• 75 points from PHYSICS 625–681, 691, 701–787, 788
and
• a further 45 points from PHYSICS 625–681, 691, 701–787, 788, MATHS 761–770, GEOPHYS 761, 780
or
• at least 15 points from PHYSICS 625–681, 691, 701–787, 788, MATHS 761–770, GEOPHYS 761, 780
• up to 30 points, subject to the approval of the Head of Department, from approved 600 and 700 level courses in related subjects

Psychology
Prerequisite: A major in Psychology, or equivalent
Requirement:
either
• 120 points from PSYCH 691, 700–762
or
• 105 points from PSYCH 691, 700–762
• 15 points from other approved 600 or 700 level courses offered at this University
or
• Applied Behaviour Analysis: 120 points from PSYCH 711, 741, 750, 751, 754

Speech Science
Prerequisite: A BSc, or other qualification as approved by the Chair of the Board of Studies
Requirement:
• 60 points from SPCHSCI 701, 711–713, 722, 723, 733, 736, 743, 746, 751–754, 790 Dissertation
• 60 points from other approved 600 or 700 level courses in Audiology, Computer Science, Engineering, Linguistics, Physiology, Psychology, Speech Science

Statistics
Prerequisite: A major in Statistics, or equivalent as approved by the Head of Department, and STATS 210 or 225
Requirement:
• 15 points from STATS 779, 782 or equivalent
• at least 75 points from STATS 701–703, 705, 708–787, BIOINF 704, POPHLTH 707–709, 711
• up to 30 points from 700 level courses in Statistics or related subjects, as approved by the Head of Department

Wine Science
Prerequisite: A BSc, or other relevant degree as approved by the Programme Director
Requirement:
• at least 75 points from WINESCI 701–708
• up to 45 points from approved 600 and 700 level courses in Biological Sciences, Chemical and Materials Engineering, Chemistry, Food Science or Geography

The Degree of Bachelor of Global Studies – BGlobalSt

The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Duration and Total Points Value
1 A student enrolled for this degree must follow a programme of the equivalent of six full-time semesters and pass courses with a total value of 360 points, unless credit is granted under the Admission Regulations and/or the Credit Regulations.

Structure and Content
2 Of the 360 points required for this degree, a student must pass:
   a at least 300 points from courses listed in the Bachelor of Global Studies Schedule, including:
      (i) at least 195 points above Stage I, including at least 75 points above Stage II
      (ii) 45 points: GLOBAL 100, 200, 300
      (iii) a major of at least 150 points from the Bachelor of Global Studies Schedule, of which at least 45 points must be above Stage II
      (iv) 60 points from one of the Languages listed in the Bachelor of Global Studies Schedule, of which at least 30 points must be above Stage I
      (v) 45 points from one of the Area Studies listed in the Bachelor of Global Studies Schedule that is aligned with the chosen Language, of which at least 15 points must be above Stage II.
   b 30 points from courses offered in either the General Education Open Schedule or the General Education Faculty Schedule approved for this degree or from a combination of these schedules, and the Academic Integrity course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar
   c up to 30 points from courses available for this programme or other programmes at this University.

3 A student who is required to meet the Academic English Language Requirement, as specified in the Enrolment and Programme Regulations, Academic English Language Requirement, of the University Calendar, may substitute an academic English language course approved by Senate or its representative for 15 points of General Education.

General Education Exemptions
4 a A student is exempted from the requirement to pass courses offered in the General Education Schedules who has:
   (i) completed an undergraduate degree at a tertiary institution
   (ii) been admitted to this degree having completed 120 points or more of degree-level study at another tertiary institution.
   b A student who has been exempted from the requirement to pass courses offered in the General Education Schedules must substitute 30 points from courses available for this degree.
   c A student who has been fully exempted from the requirement to pass courses offered in the General Education Schedules is nonetheless required to complete the Academic Integrity course.

Conjoint Degrees
5 Special arrangements apply where this degree is taken as a component degree of an approved conjoint combination. The specific requirements and a complete list of the conjoint degrees available are set out in the Conjoint Degrees section of the University Calendar.

Special Cases
6 a For Language courses, enrolment of students with prior knowledge of the language is at the discretion of the Academic Head or nominee.
   b Enrolment in any particular course(s) may be declined, and enrolment may be required instead in a course at a more advanced level. A student who is required to enrol in a more advanced course may choose either to complete 60 points of Language courses or complete alternative course(s) from elsewhere in the Bachelor of Global Studies Schedule.
   c If a student who has been required to enrol in a more advanced course fails that course they may be credited with an appropriate less advanced course if they are certified by the examiners as having reached the standard of a pass for that course and have not previously been credited with that course.
d  A student who has passed or been credited with a language acquisition course may not enrol for a course which precedes that course in the sequence of language acquisition courses.

Variations
7  In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement
8  These regulations came into force on 1 January 2018.

Students who have chosen the Pacific must select either Cook Islands Māori, Samoan, or Tongan as their language.

The Degree of Bachelor of Technology – BTech
The BTech was withdrawn in 2018.

The Degree of Master of Bioscience Enterprise – MBioEnt
The regulations for this degree are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

Admission
1 In order to be admitted to this programme, a student needs to have:
   a completed the requirements for either
      (i) the Postgraduate Diploma in Bioscience Enterprise
or
(ii) any other equivalent qualification approved by Senate or its representative

and
b attained a B+ average in at least 90 points taken for the Postgraduate Diploma in Bioscience Enterprise

and
c approval from the Director of School, or equivalent.

2 A student who has not completed all the requirements of the Postgraduate Diploma in Bioscience Enterprise but who has:
   a passed 105 points towards the Postgraduate Diploma in Bioscience Enterprise

   and
b met all other entry and prerequisite requirements

   may, with the approval of the Director of School or equivalent, enrol for this degree. The requirements for the Postgraduate Diploma in Bioscience Enterprise must be completed within 12 months of initial enrolment for the Master of Bioscience Enterprise. Should these requirements not be completed within these 12 months, enrolment for the Master of Bioscience Enterprise will be suspended until they have been completed.

Duration and Total Points Value
3 A student enrolled for this degree must:
   a pass courses with a total value of 120 points

   and
b complete within the time limit specified in the General Regulations – Masters Degrees.

4 The total enrolment for this degree must not exceed 160 points.

Structure and Content
5 Of the 120 points required for this degree, a student must pass:
   Research Masters
   90 point Thesis and 30 points from courses listed in the Research Masters option in the Master of Bioscience Enterprise Schedule.

6 The programme for each student must be approved by the Director of School or equivalent before enrolment for this degree.

7 A student admitted to this programme must complete the University of Auckland Academic Integrity Course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

Thesis / Dissertation
8 a A thesis or dissertation, when included in the programme, is to be carried out under the guidance of a supervisor appointed by Senate or its representative.

b The thesis or dissertation topic must be approved by the Programme Coordinator prior to enrolment.

c The thesis or dissertation is to be completed and submitted in accordance with the General Regulations – Masters Degrees.

Variations
9 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Honours
10 This degree may be awarded with Honours as specified in the General Regulations – Masters Degrees.

Commencement
11 These regulations came into force on 1 January 2006.

   b (i) completed one of the relevant subject majors as listed in the Postgraduate Diploma in Bioscience Enterprise Schedule
   or
   (ii) attained a level of competence equivalent to the prerequisites for the courses in the selected subject major for the Postgraduate Diploma in Bioscience Enterprise as approved by Senate or its representative.

2 A student may, if Senate or its representative gives approval, enrol for this postgraduate diploma without having fulfilled all the prerequisite requirements, provided that the Director of School may require any such student to enrol for any or all of the prerequisite courses not already passed in addition to the normal requirements of this programme.
3 a A student who has not completed the requirements of the Degree of Bachelor of Science but who has passed courses with a total value of at least 345 points towards that degree may, with the approval of the Director of School enrol for this postgraduate diploma. The remaining courses for the Bachelor of Science must be taken and passed within 12 months of initial enrolment for this postgraduate diploma. Should the requirements for the Bachelor of Science not be completed within these 12 months, enrolment for the Postgraduate Diploma in Bioscience Enterprise will be suspended until the requirements for the Bachelors degree are completed.

or

b A student who has not completed the requirements of the Degree of Bachelor of Engineering (Honours) or Bachelor of Technology, but who has passed courses with a total value of at least 465 points towards those degrees may, with the approval of the Director of School enrol for this postgraduate diploma. The remaining courses for the Bachelor of Engineering (Honours) or Bachelor of Technology must be taken and passed within 12 months of initial enrolment for this postgraduate diploma. Should the requirements for the Bachelor of Engineering (Honours) or Bachelor of Technology, not be completed within these 12 months, enrolment for the Postgraduate Diploma in Bioscience Enterprise will be suspended until the requirements for the Bachelors degree are completed.

Duration and Total Points Value
4 A student enrolled for this postgraduate diploma must:
   a pass courses with a total value of 120 points
   and
   b complete within the time limit specified in the General Regulations – Postgraduate Diplomas.

5 The total enrolment for this postgraduate diploma must not exceed 160 points.

Structure and Content
6 A student enrolled for this postgraduate diploma must pass 120 points from courses listed in the Postgraduate Diploma in Bioscience Enterprise Schedule.

7 A student admitted to this programme must complete the University of Auckland Academic Integrity Course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

8 The programme for each student must be approved by the Director of School or equivalent.

Variations

REGULATIONS – CONJOINT DEGREES

Regulations – Conjoint Degrees

The regulations for these conjoint degrees combinations are to be read in conjunction with all other relevant statutes and regulations including the Academic Statutes and Regulations.

General Provisions

1 A student whose academic record is of a sufficiently high standard may, with the permission of Senate or its representative, be admitted to conjoint enrolment in any of the following combinations of degrees:

   - BA/BAdvSci(Hons)
   - BA/BCom
   - BA/BDes
   - BA/BE(Hons)
   - BA/BFA
   - BA/BFA(Hons)
   - BA/BGlobalSt
   - BA/BHSc
   - BA/BMus
   - BA/BSc
   - BA/BTheol
   - BA/LLB
   - BA/LLB(Hons)
   - BAdvSci(Hons)/BCom
   - BAdvSci(Hons)/BDes
   - BAdvSci(Hons)/BE(Hons)
   - BAdvSci(Hons)/BGlobalSt
   - BAdvSci(Hons)/BHSc
   - BAdvSci(Hons)/BMus
   - BAdvSci(Hons)/BNurs
   - BAdvSci(Hons)/BProp
   - BAdvSci(Hons)/LLB
   - BAdvSci(Hons)/LLB(Hons)
   - BCom/BAdvSci(Hons)
   - BCom/BDes
   - BCom/BE(Hons)
   - BCom/BGlobalSt
   - BCom/BHSc
   - BCom/BMus
   - BCom/LLB
   - BCom/BNurs
   - BCom/BProp
   - BCom/BNurs
   - BCom/LLB
   - BCom/BNurs

2 Except as otherwise specified in these regulations, each student’s programme is to be governed by the regulations for each of the component degrees.

3 Only when all the requirements for both component degrees have been satisfied may the two degrees be conferred upon the student.

Admission

4 Admission to a conjoint degrees combination may be at initial enrolment, or after the student has passed or been credited with not more than 270 points for either component degree, but the student must not have graduated in either of the component degrees.

5 a A student for a conjoint degrees combination must gain admission to each of the component degrees and
   b achieve a standard equivalent to a Grade Point Equivalent (GPE) of at least 3.9, except for the Bachelor of Engineering (Honours) which requires a GPE of at least 5.5, in the last year of full-time study.

Continuation

6 In order to continue in a conjoint degrees combination, a student needs to achieve a Grade Point Average (GPA) of at least 3.5 each year, except for the Bachelor of Engineering (Honours) conjoint degrees combinations which require a GPA of 4.0 each year, and Bachelor of Advanced Science (Honours) conjoint degrees combinations which require a GPA of 5.0 each year.
A student who has been discontinued from a conjoint degrees combination due to the continuation requirement specified in Regulation 6 may apply for readmission. To be eligible for readmission:

a. the student must have achieved a GPA of at least 3.5, 4.0 for the Bachelor of Engineering (Honours) or 5.0 for the Bachelor of Advanced Science (Honours), in the most recent 120 points of study towards one or more of the component degrees following the student's discontinuation. In exceptional circumstances the required grade point average may be waived by Senate or its representative.

b. if a student has fewer than 120 points to complete then they may apply for readmission immediately.

c. neither of the component degrees can have been awarded.

A student must state the reasons for re-admission, and include evidence where applicable. Where such application is made, the Deans or nominees of the respective faculties may:

a. permit the student to be readmitted to the conjoint degrees combination

b. permit the student to be readmitted under specific conditions

c. decline readmission.

A student may be readmitted to a conjoint degrees combination once, other than in exceptional circumstances approved by Senate or its representative.

Approval

As a condition of approval, Senate or its representative may require that a student include in a conjoint programme:

a. a specified major subject or specialisation

b. specified elective courses.

Duration and Total Points Requirements

The duration of a conjoint degrees combination is determined by the sum of the points required for each of the component degrees as set out in the Schedule of Requirements in these regulations.

General Education

A student is exempted from the requirement to pass a course offered in the General Education Schedule who has:

either

(i) completed an undergraduate degree at a tertiary institution

or

(ii) commenced study for this degree at a tertiary institution before 1 January 2006.

A student who has been admitted to either component degree of a conjoint degree combination who has completed 120 points or more of degree-level study at another tertiary institution is exempted from the General Education requirement for the conjoint degree.

A student who has been exempted from the General Education requirement must substitute 15 points from courses available for the component degrees.

A student who has been exempted from the General Education requirement is nonetheless required to complete the Academic Integrity course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

Suspension

A student may in any year totally suspend study for both component degrees of a conjoint degrees combination.

Additional Component Degrees/Diplomas

If a student has satisfied the requirements of one (but not both) of the component degrees and would be eligible to have that degree conferred, the relevant Dean may approve the suspension of enrolment for the conjoint degree to allow the student to enrol for a relevant honours or Masters degree or diploma. In that case the total number of points passed must satisfy the regulations specified for that programme.

With the approval of the relevant Deans, a student who suspends conjoint study to pursue a graduate programme may complete the conjoint degrees combination provided they have not graduated with the completed component degree in the meantime.

Graduation

A student must graduate in all components of the conjoint degrees combination in one or more ceremonies in the same graduation period.

Note: Graduation in one component of the conjoint degrees combination constitutes a discontinuation of the conjoint degrees.
Variations

16 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Commencement

17 These regulations came into force on 1 January 2019. The 2006 regulations for the Conjoint Degrees were thereby repealed.

The specific requirements for each conjoint degree combination can be found under its respective Schedule.

   b. Students who complete up to 30 points in University courses may apply to have those points credited towards a degree or diploma at the University.

Academic English Studies

Academic English Studies offers credit courses for international students and New Zealand residents whose first language is not English.

A range of courses is offered with the aim of improving academic English skills and increasing proficiency in listening, speaking, reading and writing for academic purposes. Students gain credit points for successfully passing each course.

ACADENG 100 develops skills in English grammar and vocabulary for academic reading and writing. ACADENG 101 focuses on academic writing, and the skills needed for basic academic essays. ACADENG 104 focuses on academic English skills to help Business students understand and express business-related concepts. At Stage II level, ACADENG 210 is an advanced academic writing course for students who need to write different kinds of research reports.
ACADENG 100, ACADENG 101, and ACADENG 104 are approved courses for students who have not met the Academic English Language Requirement (AELR). ACADENG 104 can be taken as an elective but priority is given to Business students who need the course to meet the AELR.

Further information may be obtained from the School of Cultures, Languages and Linguistics, Faculty of Arts. Phone: +64 9 373 7599 ext 86588.

New Start for Adults

New Start provides part-time University preparation and bridging courses for adults over the age of 20 who need to gain skills and confidence to undertake University study. No previous qualifications are required. Students who complete New Start must also complete the University of Auckland Academic Integrity ACADINT A01 course.

Students gain information on the structure of university degrees, and an insight into the standard of work expected. Educational guidance is an integral part of New Start and students are offered assistance in planning their ongoing programmes.

New Start General NSGEN 47

New Start General introduces students to study skills and includes more than 10 subject lectures (such as History, Politics and International Relations, Sociology, Psychology, Philosophy), tutorials, assignments with written feedback and a final test.

A 13-week part-time, day or evening course providing a comprehensive overview of first-year degree study. Coursework is set and graded. This course is compulsory.

Depending on the final grade achieved in this course students may apply for admission into an undergraduate degree in the faculties of Arts, Education and Social Work and Law.

New Start General is offered at three venues throughout the year: University of Auckland City Campus (Semester One and Semester Two), Manukau Institute of Technology (Otara North Campus, Semester One and Semester Two) and Whangarei (Tai Tokerau Campus, Summer School and Semester Two).

New Start Mathematics

Two mathematics options are taught at the University of Auckland City Campus: Mathematics Fundamentals and Mathematics Preparation for University. Mathematics Preparation for University is designed to be taken with New Start General as a pathway to Business School. Students intending to enrol in these courses must first sit a maths assessment. Results will be used to recommend the best pathway for students.

Mathematics Fundamentals NSMAT 10

Mathematics Fundamentals is designed to build students’ skills and confidence. It is a short intensive course taught over four consecutive Saturdays in a workshop environment. Most of the time students will be working together collaboratively, either as a class or in groups, but sometimes there will be lectures. This course is offered in Summer School and in the mid-semester break.

Students are advised to enrol in this course before the start of semester to prepare for the Mathematics Preparation for University course.

Mathematics Preparation for University NSMAT 14

A variety of topics of everyday interest will be explored with the aim of clarifying the underlying mathematics and statistics.

This is a 12-week part-time, evening course which is offered in Semester One and Semester Two and which is compulsory, together with New Start General NSGEN 47, for students who plan to apply for admission into an undergraduate degree in Commerce and Property at the University’s Business School. The course includes workshops, lectures, tutorials, assignments and a final test.

A grade of A– or above achieved in both Mathematics Preparation for University NSMAT 14 and New Start General NSGEN 47 entitles students to apply for admission into the degrees of Bachelor of Commerce and Bachelor of Property.

GENERAL EDUCATION REGULATIONS AND SCHEDULES

General Education Regulations
1 Students required to include General Education in their programme must pass courses as specified in the General Education Regulations and Schedules for their programme.

2 a A student may not take a General Education course with the same subject code as any course they have previously passed, or are already enrolled in.

b A student will not meet the General Education requirement for their programme if they subsequently enrol in a course with the same subject code as a General Education course which has been passed for their programme, unless the subsequent course is assigned to a different programme. Where appropriate the student may be able to use the course to meet another degree requirement. This regulation does not apply to LAW 121G, LAW 131, and LAW 141 provided no other LAW courses were taken.

c Students who transfer programmes and wish to meet the General Education requirement of their new programme using a course in a subject in which they have passed more than one course may do so if the General Education course is the only course in that subject credited or reassigned to their new programme.

3 A student may not take both of their General Education courses in the same subject.

4 Language courses do not satisfy the General Education requirement for a student who has prior knowledge of the language (for example, as a native speaker, through formal or informal study, or through living with others who speak the language). A student with prior knowledge of the language may be declined enrolment or the enrolment may be deleted at the discretion of the Academic Head or nominee.

5 A student who is required to meet the Academic English Language Requirement as specified in the Enrolment and Programme Regulations, Academic English Language Requirement, of the University Calendar, may substitute an academic English language course approved by Senate or its representative for 15 points of General Education.

Notes:
(i) Some courses available for General Education are also available as part of regular degree requirements. The content and assessment for both occurrences of the course are the same. A student must enrol in the General Education offering of a course in order to meet the General Education requirements of their programme.
(ii) Some General Education courses have limits on the number of students who can enrol. Places in these courses will be allocated on a first-come-first-served basis.
(iii) Students who have met the Academic English Language Requirement under Regulations 14-16 of the Enrolment and Programme Regulations, Academic English Language Requirement, of the University Calendar cannot use ACADENG 100, 101, or ENGW 101 to meet the General Education requirement for their degree.
(iv) ANTHRO 106G does not meet the General Education requirement for the Bachelor of Music or Bachelor of Music conjoints.
(v) LAW 121G does not meet the General Education requirement for the Bachelor of Laws, Bachelor of Laws (Honours), Bachelor of Laws conjoints or Bachelor of Laws (Honours) conjoints.
(vi) DISABLTY 113G does not meet the General Education requirement for the Bachelor of Human Services or the Bachelor of Social Work.
(vii) PLANNING 100G does not meet the General Education requirement for the Bachelor of Urban Planning or the Bachelor of Urban Planning (Honours).
(viii) ARCHHTC 102G does not meet the General Education requirement for the Bachelor of Architectural Studies.

Regulations – Doctor of Philosophy and Higher Doctorates

Regulations – Doctor of Philosophy

471 Statute for the Degree of Doctor of Philosophy – PhD

Regulations – Higher Doctorates

483 The Degree of Doctor of Engineering – DEng
483 The Degree of Doctor of Laws – LLD
484 The Degree of Doctor of Literature – LittD
485 The Degree of Doctor of Science – DSc
485 Procedure for the Examination of Higher Doctorates
Preamble

1  a Candidates for the degree of Doctor of Philosophy are required to pursue an approved programme of advanced study and research under supervision as enrolled students of the University. The demands of PhD research require a significant commitment by candidates in terms of time and resources, and candidates are normally expected to be working full-time on their doctoral research.

b It is expected that this programme will usually be completed within three to four years of full-time candidature. Part-time candidature may also be permitted.

c Upon completion of an approved programme of research:
(i) a candidate must submit a thesis that meets the requirements set out in Regulation 1e
or
(ii) upon the recommendation of the Academic Head and approval from the Board of Graduate Studies, a candidate may present a corpus of creative work for assessment with a written thesis, comprising an integrated whole, that meets the requirements set out in Regulation 1e.

d In order for the PhD degree to be awarded, the candidate must satisfy the examiners in an oral examination and any other relevant examination that may be required on the subject of the thesis and on relevant matters in the field or fields to which the subject belongs.

e The PhD degree is awarded for a formal and systematic exposition of a coherent programme of advanced research work. The work is carried out over the period of enrolment for the degree and, in the opinion of the examiners and the Board of Graduate Studies, satisfies all of the following criteria:
(i) is an original contribution to knowledge or understanding in its field
and
(ii) meets internationally recognised standards for such work
and
(iii) demonstrates knowledge of the literature relevant to the subject and the field or fields to which the subject belongs, and the ability to exercise critical and analytical judgement of it
and
(iv) is satisfactory in its methodology, in the quality and coherence of its expression, and in its scholarly presentation and format.

f PhD theses may not, without the prior permission of the Board of Graduate Studies, exceed 100,000 words in total, or 60,000 words in total when accompanied by a corpus of creative work.

The core of the thesis comprises a series of published or unpublished research papers and/or case studies, the candidate must be the lead or sole author of each paper or case study and must provide a contextual framework and concluding discussion. The range and focus of this material shall generally correspond with the introductory and concluding chapters of a thesis. The thesis must be presented in a consistent format, citation style and typeface.

h If the core of the thesis does not comprise a series of published or unpublished research papers and/or case studies, a candidate may still include within their thesis published or unpublished research papers and/or case studies, provided that the candidate was the lead or sole author of each paper or case study. The thesis must be presented in a consistent format, citation style and typeface.

i In the case of published or unpublished research papers and/or case studies that the candidate has contributed to but is not the sole or lead author of, the candidate may report in the thesis their contribution to the research with due reference to the original paper and/or case study.

j All material which is not the original work of the author of the thesis must:
(i) be fully and appropriately attributed
or
(ii) if a substantial part of another work, be reproduced only with the written permission of the copyright owner of that other work.

k All research for the thesis is to be conducted in accordance with the University of Auckland Research Code of Conduct Policy.
Eligibility

Candidates for the degree of Doctor of Philosophy are required to have:

a (i) completed the requirements for the award of a masters degree in a relevant subject area with First Class or Second Class (Division I) Honours at the University of Auckland

or

(ii) completed the requirements for the award of a bachelors degree in a relevant subject area with First Class or Second Class (Division I) Honours at the University of Auckland

or

(iii) completed all the taught coursework requirements (if any) for a masters degree of the University of Auckland at the equivalent of First Class or Second Class (Division I) Honours level, and have made substantial progress towards completion of the masters research thesis

or

(iv) completed the requirements for the award of a qualification that the Board of Graduate Studies considers to be equivalent to a masters degree in a relevant subject area with First Class or Second Class (Division I) Honours or a bachelors degree with First Class or Second Class (Division I) Honours from the University of Auckland

and

b demonstrated an ability to pursue doctoral-level research

and

c if presenting a corpus of creative work for assessment, have demonstrated advanced training or experience in a relevant creative practice, and, in their provisional year, have identified their intention to present a corpus of creative work for final assessment and have received the approval of the Board of Graduate Studies.

d In exceptional circumstances, the Board of Graduate Studies may consider for registration a person whose qualifications do not meet the requirements of Regulation 2a, if it is satisfied that the person’s experience in research and the results of that experience are so outstanding that the person is likely to have the ability to complete the degree successfully.

Admission

Every candidate for the Degree of Doctor of Philosophy must have applied for admission and been admitted to the University of Auckland.

Registration

Every candidate for the Degree of Doctor of Philosophy must be registered by the Board of Graduate Studies.

Registration is provisional for all candidates for the first 12 months of equivalent full-time study following the Date of Registration as defined in Regulation 4j of this Statute.

Application for registration must be made to the head of the department, division, school, chair of a board of studies or director of the research centre or institute (“the Head of Department”) in the discipline in which the candidate is to be primarily registered.

Candidates with compelling reasons may be permitted to register as part-time students if the Board of Graduate Studies expects that the candidate will be able to complete the PhD within the permitted time frame. A candidate must normally submit the thesis in no fewer than six and no more than eight years if they have been registered as a part-time student for the whole period of their registration.

For non-resident candidates, the Head of Department must provide the Board of Graduate Studies with evidence that the candidate has access to appropriate research resources and supervisory support.

In exceptional cases a candidate may be permitted to enrol concurrently in a second degree in order to complete that degree, provided it is not the qualifying degree for entry into the PhD programme.

The Head of Department will make a recommendation to the Faculty Associate Dean (Postgraduate) as to:

(i) whether the candidate:

(a) meets the eligibility requirements

and

(b) has a preliminary thesis proposal capable of meeting the requirements of Regulation 1e of this Statute

and
(c) has an appropriate set of goals for the provisional year of registration, agreed to by both the candidate and main supervisor

and

if the Head of Department is of that opinion, then they will recommend:

(ii) whether their department (in conjunction with any other department where the field of study is interdisciplinary, or other university in the case of jointly awarded degrees) accepts the responsibility for:

(a) making satisfactory supervision arrangements for the PhD

and

(b) providing adequate research resources and facilities

and

if the Head of Department is of that opinion, then they will nominate:

(iii) which other departments will be involved if the field of study is interdisciplinary. In these cases, the Heads of any other departments involved are required to endorse the recommendation

and

(iv) suitably qualified supervisors and, where appropriate, advisers

and

(v) in the case of a candidate in a languages and literatures discipline, or a candidate for whom joint registration with another university in a non-English speaking country is proposed, the language in which the thesis is to be submitted and examined.

h Role of the Associate Dean (Postgraduate)

On receipt of the recommendation of the Head of Department, the Faculty Associate Dean (Postgraduate) will make a recommendation to the Board of Graduate Studies as to the matters set out in Regulation 4g.

i Role of the Board of Graduate Studies

On receipt of the recommendation of the Faculty Associate Dean (Postgraduate), the Board of Graduate Studies will decide whether or not to register the candidate and, if so, the conditions that will apply to the registration. The Board of Graduate Studies may call for any further information it considers relevant before making its decision.

j Date of Registration

Registration takes effect on the date (the 'Date of Registration') approved by the Board of Graduate Studies. Where a candidate has already started supervised research on the PhD topic, the Date of Registration may be backdated by not more than six months, except for a candidate transferring from a masters degree under Regulation 2a(iii), when the Date of Registration may be backdated not earlier than the date on which the coursework component (if any) of the masters degree was completed.

k Supervision

The Board of Graduate Studies will appoint the supervisors for each candidate. The supervisors must be actively involved in research in the candidate's general field, and must either hold a doctoral degree or be appropriately qualified. Persons who are themselves candidates for the degree of PhD may not be appointed as supervisors, although they may be appointed as advisers.

l For each candidate the Board of Graduate Studies will appoint either:

(i) a main supervisor who takes overall responsibility for the supervision of the candidate and for assistance in the provision of research resources and at least one co-supervisor. The main supervisor must be a staff member of the University of Auckland

or

(ii) two supervisors with joint responsibility for the supervision of the candidate and for assistance in the provision of research resources. One of the supervisors, who must be a staff member of the University of Auckland, will be the administrative point of contact.

m In addition, the Board of Graduate Studies may appoint adviser/s for each candidate.

n Coursework

(i) The Board of Graduate Studies may require the candidate to undertake coursework that is considered to be necessary for the successful completion of the programme of research. Such coursework must be completed as part of the provisional registration requirements, will not exceed 60 points in total and should normally be at the postgraduate level. Candidates must normally pass any such research-related coursework at the grade of at least B+ or its equivalent, or any such undergraduate generic skill course at the grade of at least B or its equivalent

or

(ii) The Board of Graduate Studies may require the candidate to include a structured coursework component into the candidate's provisional year goals that is considered to be necessary for the successful completion of the programme of research. The structured coursework component will consist of designated courses that are compulsory within the provisional year. Candidates will be
required to pass with a minimum B+ average across all courses, with no course lower than a B. The courses taken in the structured coursework component will not normally exceed 60 points in total and shall be at the postgraduate level.

**Presentation in Te Reo Māori**

Candidates wishing to present and defend a thesis in Māori must, before applying to the Head of Department to be registered, obtain the permission of the Pro Vice-Chancellor (Māori). When such permission is granted, the Pro Vice-Chancellor (Māori) will make a recommendation to the Board of Graduate Studies as to:

(i) whether the candidate has adequate fluency and literacy in Te Reo Māori in the subject area of the thesis and

(ii) the likelihood of being able to find appropriately qualified examiners for the thesis.

**Reviews of Registration**

**5 a Provisional Goals**

During provisional registration, a candidate must:

(i) achieve the provisional year goals prescribed by the Board of Graduate Studies and

(ii) if required, attend an interview with a member of their Faculty to discuss their progress.

**5 b Provisional Review**

By the end of the provisional registration period, the candidate must submit their full thesis proposal to the appropriate postgraduate committee, give an oral presentation on their thesis proposal (which will be attended by members of the postgraduate committee), and meet with members of the postgraduate committee to discuss their progress to date and plans for the remainder of their enrolment.

**5 c The postgraduate committee will submit a report on the candidate’s proposal, presentation and meeting, and the candidate, the supervisor/s and the Head of Department will submit a report to the Board of Graduate Studies on the progress of the candidate. The reports will clearly state whether or not the progress of the candidate has been satisfactory, the goals laid down for the provisional year have been achieved and the candidate’s research proposal has been approved. The reports should include a recommendation that the candidate’s registration be:

(i) confirmed or

(ii) continued on a provisional basis for a period of three to six months or

(iii) discontinued and the candidate recommended for enrolment in another degree or

(iv) terminated.

**5 d Where the recommendation is to confirm the candidate’s registration, a copy of the candidate’s full thesis proposal must be submitted to the Board of Graduate Studies.**

**5 e Annual Review of Registration**

In each year of registration each candidate must pursue a programme of advanced study and research to the satisfaction of the Head of Department and the main supervisor. At the end of each year of registration following the provisional period, the supervisor/s, the candidate and the Head of Department will submit a report to the Board of Graduate Studies on the candidate’s progress. This report may also be discussed by the appropriate postgraduate committee of the department, institute and/or faculty in which the candidate is registered. As part of this report the supervisor/s and the Head of Department are to make one of the following recommendations:

(i) that the candidate’s registration be continued or

(ii) that the candidate’s registration be continued subject to specified conditions or

(iii) that the candidate’s registration be terminated.

**5 f Specified Conditions for Registration**

Where a recommendation is made under Regulations 5c(i), 5c(ii) or 5e(ii), the Head of Department will also recommend to the Board of Graduate Studies the specific goals and/or conditions to be met by the candidate and the time in which these are to be completed. At the end of this period the Head of Department and supervisor/s will advise the Board of Graduate Studies whether or not these requirements have been met. Registration will terminate if the specified conditions have not been fulfilled to the satisfaction of the Board of Graduate Studies.

**5 g If the supervisor/s have concerns about the candidate’s registration, the Board of Graduate Studies may send the candidate a formal warning. The formal warning will state the conditions the candidate must meet in order for their registration to continue. The candidate will be given the opportunity to respond, and will have three**
months to meet the conditions set out in the formal warning. Failure to meet those conditions may result in a decision to terminate the candidate's registration.

h Recommendation to Terminate
No decision to terminate registration may be made by the Board of Graduate Studies unless the candidate has been notified in writing and given reasonable opportunity to respond.

Enrolment and Fees

6 a Enrolment
Candidates for the PhD degree must be enrolled and pay fees in each academic year for which they are registered. Candidates need not pay tuition fees for any period during which their registration is suspended under Regulation 7g.

b On enrolment in each academic year every candidate must pay the fee prescribed for that academic year.

c Refunds
A candidate who submits a thesis or terminates their registration will receive a refund of one-twelfth of the tuition fee paid for each complete month of the period between the date of submission of the thesis or termination of registration and the end of the academic year for which fees have been paid, provided the candidate has paid the fees for at least three years of full-time equivalent study.

d Fees other than Tuition Fees
Unless otherwise exempted under the relevant regulations, all candidates must pay the prescribed Student Services fees and any other fees as may be prescribed from time to time. There is no refund of these fees.

e Fees to be paid before Notification of Award of the Degree
Notification of the award of the degree will be withheld until all outstanding fees have been paid. Candidates will not be able to graduate until all outstanding fees have been paid.

f Other Fees Payable
Candidates who enrol for courses other than those specified in their provisional year goals must pay the fees prescribed for those courses on enrolment.

Changes to the Conditions of Registration

7 a The Head of Department may, after consultation with the candidate, make a written recommendation to the Board of Graduate Studies for changes in the conditions of registration for the candidate. The candidate may express his or her written views on the recommendation to the Board of Graduate Studies if he or she wishes. After considering a recommendation from the Head of Department, the Board of Graduate Studies may, after considering any submissions made by the candidate, change the conditions of registration for that candidate.

b Permission to present a corpus of creative work for assessment with the written thesis as an integrated whole requires the recommendation of the Head of Department and approval from the Board of Graduate Studies.

c Absence from the University
Where a resident candidate intends to be absent from the University in pursuit of their research for more than one month, supervisors are to submit for approval by the Board of Graduate Studies, through the Head of Department and before the candidate's departure, suitable plans for the supervision of the candidate during their absence.

d Changes in Supervision
When necessary, the Head of Department is to recommend changes to the supervision of the candidate for approval by the Board of Graduate Studies. This will normally be required when a supervisor is granted leave, resigns or retires.

Whilst the Board of Graduate Studies will take into consideration the candidate's views on any recommended changes to supervision, it reserves the right to determine the appointment of supervisor/s according to the availability of suitably qualified staff.

e Change to Part-time or Full-time Registration
Candidates may apply to change their registration from part-time to full-time and vice versa.

f Extension of Time for Submission
When the Board of Graduate Studies is satisfied that there is sufficient reason, it may extend a candidate's submission date. Before approving an extension of submission time the Board of Graduate Studies will require the candidate, the supervisor/s and Head of Department to agree on the programme of supervision and schedule of research considered necessary for submission by the new date proposed.

g Suspension of Registration
Where a candidate is unable to continue with their research programme because of circumstances beyond their control, the Board of Graduate Studies may suspend their registration for a specified period of time. The
following conditions apply:
(i) the length of time for which a candidate's registration may be suspended will be in multiples of whole calendar months
(ii) the Board of Graduate Studies must be satisfied that any period of suspension will not adversely affect the viability of the candidate's research
(iii) any period of suspension will be excluded from the calculation of the final submission date
(iv) while registration is suspended, a candidate is exempt from fees and enrolment, and is not entitled to any tuition or supervision, or to the use of any other research resources of the University.

h Discontinuation of Registration
Enrolment and Programme Regulations regarding discontinuation apply to PhD candidates.

i Termination of Registration
The Board of Graduate Studies may terminate the registration of any candidate who:
(i) fails to enrol for any academic year corresponding to a year of registration
or
(ii) fails to make payment of any tuition fees related to the PhD registration
or
(iii) applies to cease being registered
or
(iv) has not made satisfactory progress while under provisional registration
or
(v) has received an unsatisfactory annual report
or
(vi) fails to meet the conditions of a formal warning
or
(vii) fails to submit by the due date a provisional or annual report
or
(viii) is unable to resume study after the maximum period of suspension as determined by the Board of Graduate Studies
or
(ix) has not met any conditions specified under Regulation 5f
or
(x) has not submitted or re-submitted the thesis in time
or
(xi) has had the termination of their registration recommended by a decision of a Disputes Committee constituted pursuant to Regulation 12 of this Statute
or
(xii) is prohibited under the Disciplinary Statute of the University from enrolling.

Before making a decision to terminate a candidate's registration pursuant to this Regulation or otherwise, the Board of Graduate Studies will allow the candidate a reasonable opportunity to respond.

Submission

8 a Copies of Thesis
All candidates are initially required to submit one copy in temporary binding and one electronic copy in pdf format of the thesis to the Graduate Centre. Copies should include the following statement to examiners on the first page:
“This thesis is for examination purposes only and is confidential to the examination process.”

b Time for Submission
Unless permitted to do otherwise by the Board of Graduate Studies, a candidate must normally submit the thesis in no fewer than three and no more than four years from the Date of Registration if they are full-time students, or no fewer than six and no more than eight years in the case of candidates who have been registered as part-time students for the whole period of their registration. In the case of candidates who have been permitted to change between full-time and part-time registration, the submission times will be calculated on a pro rata basis.

c Notification of Submission
Three months prior to the expected date of submission, candidates should notify the Graduate Centre in writing of their intention to submit. If the candidate has reason to believe that any person would be unsuitable to serve as an examiner of the thesis on the grounds of conflict of interest, he or she may also submit at this time the name of this person or people and a statement in writing as to the nature of the conflict of interest to the Dean of Graduate Studies.

d Declaration as to Originality
The thesis is to be accompanied by a statutory declaration, signed by the candidate, stating:
(i) that the thesis is the candidate's own work
(ii) whether any part of the thesis (in form or substance) has been submitted or accepted for any other degree or diploma and, where that is the case, clearly setting out the extent to which that earlier work has been incorporated into the thesis

(iii) that written permission has been obtained for any third-party copyright material reproduced in the thesis that represents a "substantial part" of the other work

(iv) that the temporary-bound copy and electronic copy are identical.

e Where the thesis contains jointly authored research papers, case studies and/or any other work, published or unpublished, a Co-Authorship Form must be signed by the candidate and all the joint authors, stating the extent to which the jointly authored material is the candidate's own work.

Where the thesis includes co-produced creative work, a Co-Production Form must be signed by the candidate and all the joint producers, stating the elements of the jointly produced material which are the candidate's own work.

f Language of Thesis
The thesis is to be presented in English unless otherwise approved by the Board of Graduate Studies at the time of first registration of the candidate.

Examination

9 a General Provisions
The Head of Department and/or the Associate Dean (Postgraduate) of the faculty may nominate another person to the Board of Graduate Studies to be authorised to act in his or her place in all of the provisions of this Regulation 9. If either the Head of Department or the Associate Dean (Postgraduate) is a supervisor of the candidate, an alternate must be nominated and appointed.

b Neither the supervisors nor the candidate may communicate with the examiners regarding the examination at any stage of the examination process, except as specified in this Regulation 9.

c Nomination of Examiners
On notification of submission or intent to submit under Regulation 8c, the Head of Department will, on the advice of the supervisor/s, nominate at least two suitably qualified persons to the Board of Graduate Studies for selection as examiners. The nominees should each hold a doctoral degree, or have equivalent expertise and experience, and be expert in the field of study which is the subject of the thesis. At least one nominee must be from outside New Zealand. The examiners must not be staff members of the University or have been involved in either the thesis research or the preparation of the thesis.

d Appointment of Examiners
The Board of Graduate Studies will consider the nominations provided by the Head of Department and any submissions made by the candidate under the provisions of Regulation 8c and will appoint two suitably qualified persons who are available to act as examiners. One examiner must be able to participate in the oral examination in person.

e Appointment of Examination Committee
The Board of Graduate Studies will also appoint an Examination Committee which will normally be composed of:

(i) the Head of Department

and

(ii) an Associate Dean (Postgraduate), who will chair the Examination Committee

and

(iii) one other person ("the Head of Department Nominee") nominated by the Head of Department. This person will have knowledge of the general field of the thesis, but not necessarily of the thesis topic, and will normally be a staff member of the University.

No member of the Examination Committee may be a supervisor or have been involved in either the thesis research or the preparation of the thesis. The Associate Dean will normally be from the same faculty as the candidate, but if that person is in the same department as the candidate then an Associate Dean from another faculty, or another Associate Dean from their faculty who is not in the same department, should be substituted.

f Examiners' Reports
Each examiner will be provided with an electronic copy of the thesis in pdf format and, acting independently, is required to provide the Graduate Centre, within two months of receipt of the thesis, with a written report in English on the quality of the thesis according to the criteria outlined in Regulation 1e. A copy of the thesis will be provided to the Examination Committee.

g The examiners will include with their reports one of the following recommendations:

(i) to award the degree, subject to satisfactory performance at the oral examination.
The thesis can be passed without any further amendment or correction. Sometimes examiners may wish to include a list of suggested amendments for the candidate to use when publishing the material.

or

(ii) to award the degree after specified “minor corrections” have been made to the thesis and/or corpus of creative work, to the satisfaction of the Oral Examiner or nominee (who may be the main supervisor), by a specified date, and subject to satisfactory performance at the oral examination. This recommendation can be made when the thesis has reached the required standard but for minor problems such as inconsistency in terminology, referencing problems, or typographical errors. These changes can normally be made within a one-month period. When these corrections are made, the thesis will meet the standard and then will be ready for permanent binding and placement in the Library.

or

(iii) to award the degree after revisions have been made to the thesis and/or corpus of creative work, to the satisfaction of the Examiner or nominee (who will be the Head of Department), by a specified date, and subject to satisfactory performance at the oral examination. This recommendation is made when an examiner concludes that the revisions required are not minor, including re-analysis of data, or rewriting of chapters, or corrections of significant lapses in logic or coherence. These changes can normally be made within a 2-4 month period.

or

(iv) to permit the candidate to revise the thesis and/or corpus of creative work, and resubmit it for examination on one further occasion only. This recommendation is made when an examiner concludes that the thesis is not yet of PhD standard. It will require either further research, rewriting of specific sections, reconceptualisation, and/or reorganisation in order to reach the required PhD standard. The candidate will be permitted to resubmit, normally within a 12 month period.

or

(v) not to award the degree, but refer the thesis to the appropriate authority within the University for consideration of the award of another degree. This recommendation is made when an examiner is of the opinion that the thesis has substantive flaws incompatible with the requirements of a PhD.

or

(vi) not to award any degree.

h As suppliers of evaluative material in terms of the Privacy Act 1993, all examiners will be informed that the information and reports they supply as such will be held in confidence to the candidate, supervisors and to persons involved in the formal examination process. Candidates’ preparation for an oral examination or thesis revision should be assisted by knowing what the examiners have said about their thesis. Examiners’ reports will normally be released initially to those involved in the examination process, other than the candidate. Part 1 of the report, the recommendation, will not be released to the candidate, but, if the Examination Committee recommends that the candidate proceed to oral, and the Board of Graduate Studies accepts that recommendation, then the Graduate Centre will release the examiners’ evaluations (Part 2 of the report) to the candidate. At this stage, the candidate will not be informed of the names, or other identifying information, of their examiners. Part 2 of the report will also be released for the purpose of judging the Vice-Chancellor’s Prize for Best Doctoral Thesis for those candidates who have been nominated. The Board of Graduate Studies (through the Dean of Graduate Studies) reserves the right to remove from an examiner’s report made available to the candidate any material that it considers should not be released.

i Replacement of Examiners

If a report has not been received within two months, the Graduate Centre will send a reminder to the examiner and advise him or her that unless the report is received within two further months the appointment of the examiner may be terminated. If the report has not been received within two months of the date of the reminder, the Board of Graduate Studies may appoint a replacement examiner.

j The Board of Graduate Studies reserves the right to appoint a replacement examiner in the event that an examiner provides an inappropriate report.

k Consideration of Examiners’ Reports

Upon receipt of both of the examiners’ reports, the Graduate Centre will provide copies for consideration by the Examination Committee. The examiners’ reports will also be made available to the supervisor/s on a confidential basis. Supervisor/s may comment on the reports in writing to the Examination Committee on a confidential basis. The Examination Committee may also request clarification of issues raised in examiners’ reports from the examiners and, if necessary, from supervisors. If the recommendations of the examiners are in conflict and the Examination Committee considers that the conflict may be resolved, the Chair may invite the two examiners to consult and to provide a written report or reports on the outcome of their consultations.

l Recommendation of the Examination Committee

The Examination Committee will then make a report to the Board of Graduate Studies which includes the
nature and outcome of any communications with the examiners and/or supervisor/s made under Regulation 9k and which recommends one of the following:

(i) to appoint one or more further independent examiners to report on any areas of conflict
or
(ii) to proceed to the oral examination
or
(iii) to permit the candidate to revise the thesis and/or corpus of creative work, and resubmit it for examination on one further occasion only
or
(iv) to refer the thesis to the appropriate authority within the University for consideration of the award of another degree
or
(v) not to award the degree.

m Further Examiners
In the event that the examiners’ reports are in serious conflict the Board of Graduate Studies may appoint further independent external examiners to report on any matters which it may specify. In this event the candidate will be kept informed, and Regulations 9f to 9j will apply for the reports of the further examiners.

n Oral Examination
In the event that the Board of Graduate Studies accepts a recommendation to proceed to an oral examination, the following procedures will apply:

(i) the Board of Graduate Studies, on the recommendation of the Examination Committee, will appoint one of the examiners to be the Oral Examiner and will determine whether the Oral Examiner should attend the examination in person or by video-conference. Candidates are expected to be available to attend the oral examination in person

(ii) the Board of Graduate Studies will appoint a person to act as an independent Chair of the oral examination. The Chair must be a member of the academic staff of the University, but will not be a member of a faculty in which the candidate is registered

(iii) the examination must be attended by the candidate, the Oral Examiner, the Chair and the Head of Department Nominee on the Examination Committee. A supervisor or co-supervisor may attend with the agreement of the candidate, but will not act as an examiner and may only participate to the extent requested by the Chair

(iv) subject to Regulation 9h above, the Graduate Centre will forward copies of Part 2 of the examiners’ reports to the candidate no fewer than five working days before the oral examination

(v) during the oral examination, the Oral Examiner and Head of Department Nominee will discuss with the candidate the subject of the thesis and relevant matters in the field or fields to which the subject belongs. The Oral Examiner will discuss with the candidate issues raised in the examiners’ reports and ask questions of the candidate on behalf of the other examiner. The Head of Department Nominee will ensure that the other examiner’s comments and questions are discussed.

o Recommendation of the Oral Examination
On completion of the oral examination, the Chair will provide a written report and recommendation, endorsed by the Head of Department Nominee and the Oral Examiner, to the Board of Graduate Studies. The report will include one of the following recommendations:

either

(i) to award the degree
or
(ii) to award the degree after specified “minor corrections” (see Regulation 9g(ii)) have been made to the thesis and/or corpus of creative work, to the satisfaction of the Oral Examiner or nominee (who may be the Main Supervisor), and by a specified date
or
(iii) (a) to award the degree subject to revising part or parts of the thesis and/or corpus of creative work, to the satisfaction of the Oral Examiner or nominee (who will be the Head of Department), by a specified date (see Regulation 9g(iii)). When the Head of Department acts as the Oral Examiner’s nominee, the nature of the revisions must be such that he or she can certify that compliance has been achieved. In such cases, the Head of Department may discuss the revisions with the Head of Department Nominee on the Examination Committee and/or the candidate’s supervisor/s. If the Head of Department is unable to assess whether the revisions have been made to the required standard, the revisions to the thesis and/or corpus of creative work must be assessed by the Oral Examiner.

or
(b) to award the degree subject to revising part or parts of the thesis and/or corpus of creative work, to the satisfaction of the Examiner or Examiners by a specified date (see Regulation 9g(iii))

or
(iv) to permit the candidate to revise the thesis and/or corpus of creative work, and resubmit it for
examination on one further occasion only, but only if the candidate has not already been permitted to revise and resubmit under Regulation 9(iii)

or

(v) to refer the thesis to the appropriate authority within the University for consideration of the award of another degree

or

(vi) not to award the degree.

In the case of recommendations 9o(iii) and 9o(iv), the report must also state clearly the nature of the revisions recommended.

p When Minor Corrections are Required

In the event that the Board of Graduate Studies requires the candidate to undertake minor corrections the following provisions apply:

(i) the Head of Department Nominee of the oral examination, in consultation with the Oral Examiner or nominee (who may be one of the candidate's supervisors), will prepare a written report detailing the minor corrections required

(ii) the Head of Department Nominee will ensure that the candidate is provided with a copy of the required minor corrections, and the specified date by which the corrections are to be completed

(iii) if the required minor corrections are completed to the satisfaction of the Oral Examiner or nominee (who may be the one of the candidate's supervisors) by the specified date, that person will notify the Graduate Centre that the degree may be awarded

(iv) in cases where the Oral Examiner or nominee (who may be one of the candidate's supervisors) reports that the minor corrections were not completed to their satisfaction or by the specified date, the Examination Committee will consider the evidence and will make a report and recommendation to the Board of Graduate Studies.

q When Revisions are Required

In the event that the Board of Graduate Studies requires the candidate to undertake revisions to the satisfaction of the Oral Examiner or nominee (who will be the Head of Department), or to the satisfaction of the Examiner, the following provisions apply:

(i) the Head of Department Nominee of the oral examination, in consultation with the Oral Examiner or the Examiner, will prepare a written report detailing the revisions required

(ii) the Head of Department Nominee will ensure that the candidate is provided with a copy of the required revisions, and the specified date by which the revisions are to be completed

(iii) if the required revisions are completed to the satisfaction of the Oral Examiner or nominee (who will be the Head of Department), or the Examiner, by the specified date, that person will notify the Graduate Centre that the degree may be awarded

(iv) in cases where the Oral Examiner or nominee (who will be the Head of Department) or the Examiner reports that the revisions were not completed to their satisfaction or by the specified date, the Examination Committee will consider the evidence and will make a report and recommendation to the Board of Graduate Studies.

r When Revision and Resubmission are Permitted

In the event that the Examination Committee recommends to the Board of Graduate Studies that the candidate should be permitted to revise the thesis and/or corpus of creative work prior to an oral examination, the Examination Committee will recommend a timeframe for the resubmission. The date of resubmission may not be more than 12 months from the date the Board of Graduate Studies accepts the Examination Committee's recommendation. If the Board of Graduate Studies accepts the recommendation, the following provisions apply:

(i) the Graduate Centre will inform the candidate of the decision, and will forward copies of Part 2 of the examiners' reports to the candidate

(ii) within two weeks of the notification from the Graduate Centre, the Examination Committee will meet with the candidate and discuss the revisions required

(iii) the Chair of the Examination Committee will send a written report of the meeting with the candidate to the Graduate Centre

(iv) the candidate is required to enrol and pay the prescribed tuition and research fees from the month in which the decision was made to the month in which the thesis is to be resubmitted. Where possible, the registration of the candidate is to continue under the conditions applying at the first date of submission

(v) if the thesis is not resubmitted by the prescribed date, the registration of the candidate will normally be terminated

(vi) upon resubmission, the revised thesis is to be examined as a whole by the same examiners in accordance with the provisions of this Regulation, excepting that a further resubmission may not be recommended. If any of the original examiners is unavailable to re-examine the thesis, the Board of Graduate Studies will appoint alternative examiner/s

(vii) upon receipt of both of the examiners' reports, the Graduate Centre will provide copies of the new examiners' reports and the original examiners' reports to the Examination Committee and to the
supervisor/s on a confidential basis. The procedure followed by the Examination Committee will be that in Regulation 9k. Following consideration of all examiners’ reports the Examination Committee will make a report to the Board of Graduate Studies which includes the nature and outcome of any communications with the examiners and/or supervisor/s made under Regulation 9k. Where warranted, the Examination Committee may recommend, and/or the Board of Graduate Studies may determine, that Regulation 9m should apply. If the Examination Committee recommends that an oral examination be held, and the Board of Graduate Studies accepts this recommendation, the Graduate Centre will release the examiners’ evaluations of the revised thesis (Part 2 of the report) to the candidate no fewer than five working days before the oral examination. The remainder of the examination process will proceed as per Regulations 9n-q.

If the Examination Committee recommends that an oral examination should not be held, its report will include one of the following recommendations:

(a) to refer the thesis to the appropriate authority within the University for consideration of the award of another degree

or

(b) not to award the degree.

In the event that the Board of Graduate Studies requires the candidate to revise the thesis and/or corpus of creative work after an oral examination, the Oral Examination Committee will recommend a timeframe for the resubmission. The date of resubmission may not be more than 12 months from the date of the oral examination. In such cases, the following provisions apply:

(i) the Graduate Centre will inform the candidate of the decision and send a copy of the oral examination report to the Examination Committee

(ii) within two weeks of the notification from the Graduate Centre, the Examination Committee will meet with the candidate and discuss the revisions required

(iii) the Chair of the Examination Committee will send a written report of the meeting with the candidate to the Graduate Centre

(iv) the candidate is required to enrol and pay the prescribed tuition and research fees from the month in which the decision was made to the month in which the thesis is to be resubmitted. Where possible, the registration of the candidate is to continue under the conditions applying at the first date of submission

(v) if the thesis is not resubmitted by the prescribed date, the registration of the candidate will normally be terminated

(vi) upon resubmission, the revised thesis is to be examined as a whole by the same examiners in accordance with the provisions of this Regulation, excepting that a further resubmission may not be recommended. If one or both of the original examiners is unavailable to re-examine the thesis the Board of Graduate Studies will appoint alternative examiner/s

(vii) upon receipt of both of the examiners’ reports, the Graduate Centre will provide copies of the new examiners’ reports, the original examiners’ reports and the oral examination report to the Examination Committee and to the supervisor/s on a confidential basis. The procedure followed by the Examination Committee will be that in Regulation 9k. Following consideration of all examiners’ reports the Examination Committee will make a report to the Board of Graduate Studies which includes the nature and outcome of any communications with the examiners and/or supervisor/s made under Regulation 9k. Where warranted, the Examination Committee may recommend, and/or the Board of Graduate Studies may determine, that Regulation 9m should apply. Otherwise, the Examination Committee report must recommend one of the following:

(a) to proceed to a second oral examination (in which case Regulations 9n-q apply)

or

(b) to award the degree

or

(c) to award the degree after specified “minor corrections” (see Regulation 9g(ii)) have been made to the thesis and/or corpus of creative work to the satisfaction of the Examiner or nominee (who may be one of the candidate’s supervisors), by a specified date

or

(d) to refer the thesis to the appropriate authority within the University for consideration of the award of another degree

or

(e) not to award the degree.

If the Examination Committee recommends that a second oral examination be held, and the Board of Graduate Studies accepts this recommendation, the Graduate Centre will release the examiners’ evaluations of the revised thesis (Part 2 of the report) to the candidate no fewer than five working days before the oral examination.

**Final Decision**

After considering all of the reports of the examiners and the Examination Committee, the Board of Graduate Studies will make the final decision as to the award of the degree.
Copies for Deposit
(i) On successful completion of the examination, candidates will be required to deposit two hardbound copies of the thesis and one digital copy, corrected or revised as may be required, with the Graduate Centre. The degree will not be conferred until the candidate has complied with this requirement.
(ii) When two hardbound copies and a digital copy of the PhD thesis are deposited, these must be accompanied by a statutory declaration signed by the candidate stating that the hardbound copies and the digital copy are the same.

Variations
10 In exceptional circumstances, the Board of Graduate Studies may approve a personal programme which does not conform to the regulations for a PhD.

Appeals
11 As to Registration
a Candidates, supervisors or Heads of Department may appeal against any decision of the Board of Graduate Studies made under Regulations 4, 5, 7 or 8 of this Statute, normally within three months of the making of the decision, on the grounds that:
(i) relevant information which was not available to the Board of Graduate Studies at the time of its making the decision has since become available
and/or
(ii) the procedure adopted in arriving at the decision was unfair. The appeal must state clearly all grounds relied on by the appellant and all relevant documentation must be attached.

b Any appeal made under Regulation 11a will be considered by the Chair of the Board of Graduate Studies, or their nominee, who may seek further information relating to the grounds of the appeal and shall notify the candidate of new information before making any decision. The Chair shall give a written decision outlining the reason/s for the decision. A decision:
(i) grounded on the lack of relevant information shall be final
or
(ii) grounded on procedural unfairness may be further appealed within six months after the decision is made to the Vice-Chancellor (or nominee) whose decision shall be final.

As to Examination
c If a PhD candidate believes that he or she has been significantly disadvantaged by the examination process, or by any part of the examination process, then a written appeal may be made to the Board of Graduate Studies, setting out the grounds of the appeal. All relevant documents relied upon must be submitted with the appeal.
d Any appeal as to examination process must be lodged within three months of the result of the examination being officially communicated to the candidate. The appeal document must state clearly all grounds relied on and include all relevant documents.

e In the case of appeals as to examination process:
(i) the Chair of the Board of Graduate Studies, or their nominee, will undertake a preliminary investigation and determine if there are grounds for the appeal to be taken to a further stage
(ii) if there are grounds for further consideration of an appeal, this will be undertaken by two members of the Board of Graduate Studies who have not been involved in the examination process who will make a recommendation to the Vice-Chancellor
(iii) the candidate will be provided with a copy of the recommendation to the Vice-Chancellor and will have the opportunity to respond to the recommendation
(iv) the decision of the Vice-Chancellor will be final and may involve a re-examination of the work.

Dispute Resolution Procedures
12 Disputes are to be resolved according to the Resolution of Student Academic Complaints and Disputes Statute.

Transitional Arrangements
13 a This Statute came into force on 1 January 2016 and revoked the previous Statute for the Degree of Doctor of Philosophy.
b For candidates initially registered under a previous statute, the Board of Graduate Studies may agree to vary the application of the provisions of this Statute to ensure consistency with the provisions of the statute under which the candidate was enrolled, where it is satisfied that the candidate would otherwise be at a disadvantage.
REGULATIONS – HIGHER DOCTORATES

In addition to the degree of Doctor of Philosophy, the University offers higher doctorates in Engineering (DEng), Laws (LLD), Literature (LittD), and Science (DSc). These are the highest academic awards offered by the University and are awarded to graduates or close affiliates of the University of Auckland who have published original work that has, over an extensive period of time, given them authoritative standing and international eminence in their respective field. The higher doctorate is thus to be seen as recognition of real distinction in one of these areas of study. It is awarded rarely and only after rigorous examination of a substantial and significant corpus of material. A person wishing to become a candidate for a higher doctorate should refer to the Guidelines for Candidates of Higher Doctorates.

The Degree of Doctor of Engineering – DEng

Eligibility
1. The Degree of Doctor of Engineering shall be awarded to those candidates whose submitted works provide evidence of an original contribution of special excellence in some branch of engineering or technology such that they are considered to have authoritative standing and international eminence in their field.

2. The Degree shall be awarded only on work, whether sole or conjoint, published in book form or in scholarly journals in general circulation, or as designs and inventions. In addition to the published work, the candidate may submit unpublished work in support of the application.

3. A candidate for the Degree of Doctor of Engineering must be a graduate of the University of Auckland or have a substantial, demonstrable association with the University of Auckland.

4. No application to be examined for a higher doctorate will be considered until at least eight years after graduation to the candidate’s first degree.

5. No work shall be considered for the Degree if the work, or a major portion thereof, has previously formed the basis of an award of any degree or diploma in this or any other university.

6. Work submitted on a previous occasion for consideration of a higher doctorate at the University of Auckland will not be reconsidered for the Degree unless more than five years have elapsed since the previous submission and the resubmission includes new material.

Application
7. A person wishing to become a candidate for a Doctor of Engineering should apply in writing to the Dean of Graduate Studies, providing:
   a. a completed Application to be Examined for a Higher Doctorate
   b. an academic curriculum vitae
   c. academic transcripts for each degree previously awarded (if these degrees were not awarded by the University of Auckland).

8. Consideration of applications and examination shall be carried out in accordance with the Procedure for the Examination of Higher Doctorates, as determined by the Board of Graduate Studies from time to time.

The Degree of Doctor of Laws – LLD

Eligibility
1. The Degree of Doctor of Laws shall be awarded to those candidates whose submitted works provide evidence of an original contribution of special excellence to the history, philosophy, exposition or criticism of law, such that they are considered to have authoritative standing and international eminence in their field.

2. The Degree shall be awarded for work, whether sole or conjoint, published in book form or in scholarly journals in general circulation. In addition to the published work, the candidate may submit unpublished work in support of the application.

3. A candidate for the Degree of Doctor of Laws must be a graduate of the University of Auckland or have a substantial, demonstrable association with the University of Auckland.

4. No application to be examined for a higher doctorate will be considered until at least eight years after graduation to the candidate’s first degree.
5 No work shall be considered for the Degree if the work, or a major portion thereof, has previously formed the basis of an award of any degree or diploma in this or any other university.

6 Work submitted on a previous occasion for consideration of a higher doctorate at the University of Auckland will not be reconsidered for the Degree unless more than five years have elapsed since the previous submission and the resubmission includes new material.

Application
7 A person wishing to become a candidate for a Doctor of Laws should apply in writing to the Dean of Graduate Studies, providing:
   a a completed Application to be Examined for a Higher Doctorate
   and
   b an academic curriculum vitae
   and
   c academic transcripts for each degree previously awarded if these degrees were not awarded by the University of Auckland.

8 Consideration of applications and examination shall be carried out in accordance with the Procedure for the Examination of Higher Doctorates, as determined by the Board of Graduate Studies from time to time.

The Degree of Doctor of Literature – LittD

Eligibility
1 The Degree of Doctor of Literature shall be awarded to those candidates whose submitted works provide evidence of an original contribution of special excellence to linguistic, literary, philosophical, social, cultural or historical knowledge such that they are considered to have authoritative standing and international eminence in their field.

2 The Degree shall be awarded for work, whether sole or conjoint, published in book form or in scholarly journals in general circulation. In addition to the published work, the candidate may submit unpublished work in support of the application.

3 A candidate for the Degree of Doctor of Literature must be a graduate of the University of Auckland or have a substantial, demonstrable association with the University of Auckland.

4 No application to be examined for a higher doctorate will be considered until at least eight years after graduation to the candidate’s first degree.

5 No work shall be considered for the Degree if the work, or a major portion thereof, has previously formed the basis of an award of any degree or diploma in this or any other university.

6 Work submitted on a previous occasion for consideration of a higher doctorate at the University of Auckland will not be reconsidered for the Degree unless more than five years have elapsed since the previous submission and the resubmission includes new material.

Application
7 A person wishing to become a candidate for a Doctor of Literature should apply in writing to the Dean of Graduate Studies, providing:
   a a completed Application to be Examined for a Higher Doctorate
   and
   b an academic curriculum vitae
   and
   c academic transcripts for each degree previously awarded if these degrees were not awarded by the University of Auckland.

8 Consideration of applications and examination shall be carried out in accordance with the Procedure for the Examination of Higher Doctorates, as determined by the Board of Graduate Studies from time to time.
The Degree of Doctor of Science – DSc

Eligibility
1 The Degree of Doctor of Science shall be awarded to those candidates whose submitted works provide evidence of an original contribution of special excellence to some branch of pure or applied science such that they are considered to have authoritative standing and international eminence in their field.

2 The Degree shall be awarded only on work, whether sole or conjoint, published in book form or in scholarly journals in general circulation.

3 A candidate for the Degree of Doctor of Science must be a graduate of the University of Auckland or have a substantial, demonstrable association with the University of Auckland.

4 No application to be examined for a higher doctorate will be considered until at least eight years after graduation to the candidate’s first degree.

5 No work shall be considered for the Degree if the work, or a major portion thereof, has previously formed the basis of an award of any degree or diploma in this or any other university.

6 Work submitted on a previous occasion for consideration of a higher doctorate at the University of Auckland will not be reconsidered for the Degree unless more than five years have elapsed since the previous submission and the resubmission includes new material.

Application
7 A person wishing to become a candidate for a Doctor of Science should apply in writing to the Dean of Graduate Studies, providing:
   a a completed Application to be Examined for a Higher Doctorate
   and
   b an academic curriculum vitae
   and
   c academic transcripts for each degree previously awarded (if these degrees were not awarded by the University of Auckland).

8 Consideration of applications and examination shall be carried out in accordance with the Procedure for the Examination of Higher Doctorates, as determined by the Board of Graduate Studies from time to time.

Procedure for the Examination of Higher Doctorates

This procedure applies to the examination of the Degrees of Doctor of Engineering, Doctor of Laws, Doctor of Literature and Doctor of Science, and should be read in conjunction with the Higher Doctorate Examination Procedures.

Consideration of Applications to be Examined
1 As soon as possible after an application to be examined has been lodged with the Dean of Graduate Studies and has been determined to meet initial requirements, the application will be forwarded to the relevant Faculty Dean or delegate (“the Faculty”) for further consideration.

2 The Faculty will appoint an Examination Committee of three senior academics who have a general understanding of the applicant’s field of research. At least two members of the Committee must be academic members of the University, one of whom will be nominated to chair the Examination Committee.

3 The Examination Committee will investigate the information provided, including the quality and nature of the submission for examination, will seek input from the Dean of the Faculty, and will make a recommendation to the Dean of Graduate Studies within one month that the Faculty:
   a will allow the applicant to be admitted to candidature for the higher doctorate
   or
   b will not allow the applicant to be admitted to candidature for the higher doctorate.

Notification of Assessment of Application and Intention to Submit
4 The Dean of Graduate Studies will advise the applicant of the Faculty’s decision and, if the application has been accepted, will request written notification of the applicant’s intention to proceed with candidature and submission. The submission of work to be examined must be received by the Dean of Graduate Studies within three months of the notification that the application was accepted.

5 The examination will not proceed until receipt of the candidate’s written notification of intention to proceed and payment of fees as set out in Schedule B of the Fees Statute.
Appointment of Examiners
6 Upon payment of fees and receipt of the candidate's written notification of intention to proceed, the Dean of Graduate Studies will request that the Faculty nominate three external examiners. The nominations should be made within three months of the request. The examiners must be of authoritative standing and international eminence in the field of the submitted work and must be active in research. At least one examiner shall be resident outside New Zealand. Examiners must not have engaged in substantial collaboration with the candidate. Any involvement with the candidate by the examiner which could constitute a conflict of interest should be declared at the outset. The appointment of all examiners must be approved by the Dean of Graduate Studies.

Submission
7 The candidate shall lodge at the Graduate Centre:
   a three copies of the work to be examined
   and
   b a statutory declaration which shall:
      (i) state the extent to which the work is the candidate's own, and (in the case of a conjoint work) identify as clearly as possible which parts are the candidate's own
      and
      (ii) declare that the work in substantially its present form has not been submitted or accepted previously for the award of a degree or diploma in this or any other tertiary institution, and is not being submitted for a degree or diploma in any other tertiary institution or for another degree or diploma at this institution.

Examination
8 The degree will be awarded solely on consideration of the submitted works upon which the candidate's claim to the degree is based.

9 In order to qualify for the degree, the submitted works must provide sufficient evidence that the candidate has made an original contribution of special excellence to their discipline such that they are considered to have authoritative standing and international eminence in their field.

10 Examiners will be requested to report to the Dean of Graduate Studies on the submission within three months of receipt and recommend whether the candidate:
   a should be awarded the degree
   or
   b should not be awarded the degree.

11 The reports of all examiners will be forwarded to the Examination Committee for consideration of whether or not to admit the candidate to the degree.

12 If the examiners' recommendations differ, the Examination Committee may invite the examiners to consult and provide a written report or reports on the outcome of their consultation. If, after such consultation, the differences remain unresolved, the Examination Committee may recommend to the Dean of Graduate Studies that a further independent external examiner be appointed to report on areas of conflict.

13 The Examination Committee shall recommend an outcome based on the examiners' reports to the Dean of Graduate Studies. The Dean of Graduate Studies will determine the result of the examination and notify the candidate of the decision.

14 An unsuccessful submission may not be presented for re-examination until at least five years after initial submission and must include new material.

Deposit of Submission in the Library
15 On successful completion of the examination of the submitted work, and when possible, two bound copies will be deposited in the University Library by the Graduate Centre. The first bound copy will remain in the Library for reference purposes; the second copy may be borrowed by members of the Library, or sent to other libraries on inter-library loan. The third copy will be returned to the candidate.

Graduation
16 Candidates who have satisfied the requirements for any award of the University shall be admitted to that award.
The Course Prescriptions contain approved University of Auckland courses. Before selecting courses from this Calendar, students and potential students are advised to ascertain which courses are expected to be offered in this Academic Year and in which semester they are scheduled by referring to the Class Search on Student Services Online, or by contacting AskAuckland Central in Alfred Nathan House, 24 Princes Street or the relevant faculty student centre.

Where courses in the following Course Prescriptions are listed with an 'A' and a 'B' option, this means that, if they are offered, they will be taught over two semesters and students must enrol in both Part A and Part B in order to complete and, where successful, be credited with the course. Courses with no 'A' or 'B' designation are taught over one semester.

The Prescriptions are listed by faculty, in alpha-numeric order by subject title and should be read in conjunction with the relevant regulations.

The University of Auckland

Internship

Postgraduate 700 Level Courses

INTERNSP 700 15 Points
Internship 1
Enables the development of practical knowledge and hands-on experience through a supervised internship.

INTERNSP 701 30 Points
Internship 2
Enables the development of practical knowledge and hands-on experience through a supervised internship.

INTERNSP 702 45 Points
Internship 3
Enables the development of practical knowledge and hands-on experience through a supervised internship.

INTERNSP 703 60 Points
Internship 4
Enables the development of practical knowledge and hands-on experience through a supervised internship.

TFC Academic English Studies

Foundation Courses

TFCAENG 93F 15 Points
Foundation Academic English
Develops language skills necessary for academic study. The course will help students to improve their sentence structure, develop their vocabulary, plan their writing, and improve paragraph and essay organisation. It focuses on sound principles of essay writing and provides practice in the various stages of writing.
Prerequisite: Coordinator approval
Restriction: ACADENG 93F

TFC Arts General

Foundation Courses

TFCARTS 92F 15 Points
Introduction to Arts and Humanities
An interdisciplinary, skills-based course which takes students through a special research topic with input from a number of different Arts and Arts-related disciplines. This not only provides students with research experience; it also assists them in making subject choices for Stage I by introducing them to different disciplines and subject areas in the arts and humanities.
Restriction: ARTSGEN 92P

TFC Biological Science

Foundation Courses

TFCBIO 91F 15 Points
Foundation Biology 1
An introduction to biological sciences with an emphasis on organism diversity, which includes bacteria, plants, fungi and animals. Fundamentals of classification, ecology and evolution are introduced and the study of a current topic in biology is used to develop research and critical thinking skills. Practical classes are both laboratory-based and field based.
Restriction: BIOSCI 91F, 91P

TFCBIO 92F 15 Points
Foundation Biology 2
Concepts introduced in TFCBIO 91F are further developed with an emphasis on the structures and processes of living things at cellular and molecular levels. Cell biology, genetic principles and biochemistry are explored and further developed in a human biological context. Laboratories focus on students developing key practical skills.
Restriction: BIOSCI 91F, 92F, 91P, 92P

TFC Business

Foundation Courses

TFCBUS 92F 15 Points
Foundation Business
Develops an understanding of the role of business in a rapidly changing national and international context. Focuses on factors impacting success and value creation including effective management and leadership, understanding customers, innovation and product development, financial and accounting practices, and strategic planning and decision-making.

TFC Chemistry

Foundation Courses

TFCCHEM 91F 15 Points
Foundation Chemistry 1
Introduction to elements, compounds, the periodic table, atomic structure, covalent bonding, molecular shape and polarity. Quantitative chemistry, including balancing equations, calculating moles and particles present, calculation of concentration in mol L-1. Energy and thermo-chemistry. Laboratories include practical skills and qualitative analysis, and simple modelling.
Restriction: CHEM 91F, 91P

TFCCHEM 92F 15 Points
Foundation Chemistry 2
Introduces further principles of chemistry. Physical chemistry and qualitative inorganic analysis, including chemical kinetics and chemical equilibrium. Organic chemistry, including hydrocarbons, oxygen-containing functional groups, isomerism and reaction classifications, acids, bases, buffer solutions and titrations. Laboratories include reactions of hydrocarbon and oxygen-containing organic compounds, chromatography, testing for anions and cations in solution, acid-base titrations.
Restriction: CHEM 92F

TFC Creative Arts

Foundation Courses

TFCAI 92F 15 Points
Foundation Creative Arts
Helps develop a practical and theoretical understanding of the skills and practises employed by performing artists, visual artists and designers when creating a performance, art object or design portfolio.
TFC Education

**Foundation Courses**

**TFCEDUC 12F**  
**Introduction to Computing**  
15 Points  
Develops computer literacy skills in word processing, spreadsheets, presentation software, document collaboration and common multi-media technologies. These skills will be embedded in the context of tertiary study.  
*Restriction: EDFOUND 12F*

**TFCEDUC 13F**  
**Child Development and Learning**  
15 Points  
Presents an overview of language and learning development, and examines strategies for helping children to develop as learners and readers.  
*Restriction: EDFOUND 13F*

**TFCEDUC 14F**  
**An Introduction to the New Zealand Education System**  
15 Points  
Introduces students to the education system of New Zealand. Illustrates the historical development of the New Zealand education system, and addresses issues such as changes to governance and curriculum and ethnic diversity in New Zealand schools.  
*Restriction: EDFOUND 14F*

**TFCEDUC 15F**  
**Mathematics for Education**  
15 Points  
Development of fundamental mathematics concepts including an understanding of arithmetic ideas as expressed in fractions, decimals and percentages, ratio and proportion, and algebraic thinking. Application of these concepts in contexts such as financial literacy, problem solving, and real-life mathematics will form the basis of this course.  
*Restriction: EDFOUND 15F*

**TFCEDUC 16F**  
**Mathematics for Teaching Science and Technology**  
15 Points  
Students will develop critical thinking skills by designing and critiquing investigative methods for science and mathematics.  
*Restriction: EDFOUND 16F*

**TFC English**

**Foundation Courses**

**TFCENG 91F**  
**Academic Literacy 1**  
15 Points  
Establishes the foundations of spoken and written English for academic purposes. The basics of academic practice, including critical reading, writing (short and longer forms), listening and presentation skills, and multi-modal literacies, will introduce academic literacy to students as a powerful, transferable communication tool. Assignments require students to handle English with competency and the course instils essential daily habits which foster university-level success.  
*Restriction: ENGLISH 92F*

**TFCENG 92F**  
**Academic Literacy 2**  
15 Points  
Further establishes skills in spoken and written English for academic purposes. The essentials of sound academic practice, including enhanced critical reading, writing (all forms), astute listening and presentation skills with a demonstrable ability to incorporate multi-modal literacies, will consolidate the students’ academic literacy skills.  
*Restriction: EDFOUND 16F*

Building on from Academic Literacy 1, the course strengthens each student’s confidence in participating in and producing convincing academic discourse.  
*Restriction: ENGLISH 92F*

**TFC Geography**

**Foundation Courses**

**TFCGEO 91F**  
**Foundation Geography 1**  
15 Points  
Introduces population and development themes, including global and regional patterns of population growth, overpopulation, migration, urbanisation, city planning issues, uneven patterns of economic growth and human well-being, and sustainable development.  
*Restriction: GEOG 91F*

**TFCGEO 92F**  
**Foundation Geography 2**  
15 Points  
Focuses on the relationship between humans and the environment, emphasising long-term trends in resource use, human impacts in the environment, sustainable resource management and environmental hazards.  
*Restriction: GEOG 92F*

**TFC History**

**Foundation Courses**

**TFCHIST 91F**  
**Foundation History**  
15 Points  
Survey of New Zealand history primarily since 1769, with particular emphasis on the interaction between the European world and the indigenous tribes. Skills training in reading for meaning, critical analysis, essay writing and computer word processing.  
*Restriction: HISTORY 91F*

**TFC Māori**

**Foundation Courses**

**TFCMĀORI 10F**  
**Te Pū**  
15 Points  
Introduction to functional and instructional Māori including everyday vocabulary, basic sentence structures, pronouns, possessives and positional language. Aspects of tikanga will include meeting and greeting people with waiata, karakia and himene, and values such as whānau, whakawhāngatanga and aroha. Referring to their own hapū/iwi students will introduce and locate themselves in relation to their whakapapa and carry out a short mihi.  
*Restriction: EDFOUND 10F*
**TFC Mathematics**

**Foundation Courses**

**TFCMATHS 89F 15 Points**  
Mathematics for Arts  
Aimed at linking mathematics to the world of students who are likely to be non-STEM majors. Includes several important mathematical ideas within historical, environmental, societal, political, financial, justice, entertainment and cultural contexts. The course will also be guided by the interests of its learners as citizens and consumers, who will be encouraged to draw on the mathematics they are already familiar with.

**TFCMATHS 91F 15 Points**  
Foundation Mathematics 1  
This first mathematics course aims to promote an understanding of number skills, including an introduction to algebra. Students will learn how to use simple technology and develop their problem solving abilities.  
Restriction: MATHS 91F, 92F

**TFCMATHS 92F 15 Points**  
Foundation Mathematics 2  
This second mathematics course aims to use the skills learnt in TFCMATHS 91F to develop an understanding of functions in their tabular, algebraic and graphical representations. This course prepares students for MATHS 102. Recommended preparation: TFCMATHS 91F or TFCMATHS 93F.  
Restriction: MATHS 92F

**TFCMATHS 93F 15 Points**  
Foundation Mathematics 3  
This mathematics course aims to promote an understanding of numerical and algebraic skills at a deeper level than TFCMATHS 91F. Students will learn how to use simple technology and develop their problem solving abilities.  
Restriction: MATHS 93F

**TFCMATHS 94F 15 Points**  
Foundation Mathematics 4  
This mathematics course aims to use the skills learnt in TFCMATHS 93F to develop an understanding of functions, including differential functions, in their tabular, algebraic and graphical representations. This course prepares students for MATHS 102.  
Restriction: MATHS 94F

**TFC Pacific Studies**

**Foundation Courses**

**TFCPAC 91F 15 Points**  
Foundation Pacific Studies  
Introduces students to an essential knowledge of the Pacific and its cultures and peoples, and to the core practices and concepts of interdisciplinary Pacific Studies. This course will provide a foundation of knowledge of Pacific cultures, languages, history, geography and politics, and introduce students to some core Pacific Studies concepts (such as fa’aalo’alo/faka’aapa’a, diaspora, Oceania, identity, and culture). Students will gain familiarity with the history and purposes of Pacific Studies and work with some accessible forms of indigenous Pacific knowledge.

**TFC Physics**

**Foundation Courses**

**TFCPHYS 91F 15 Points**  
Foundation Physics  
An introductory course for students who have not previously studied physics. Topics include the nature of light; wave motion; basic mechanics of motion in a straight line, including the concepts of momentum and energy; an introduction to heat.  
Restriction: PHYSICS 92F, 91P

**TFCPHYS 92F 15 Points**  
Foundation Physics 2  
A second foundation course for students who understand the basic mechanics of motion in a straight line. Further mechanics, including equilibrium, projectile motion, rotational motion and gravitation. Electromagnetism, including electrostatics, elementary circuits and the effects of magnetic fields  
Restriction: PHYSICS 92F

**TFC Social Work**

**Foundation Courses**

**TFCSOCW 17F 15 Points**  
Aotearoa Society in Context  
Considers the migration stories of the many peoples who make up Aotearoa New Zealand society and explores some contemporary issues and trends with particular reference to education and social services. Particular consideration will be given to Te Tiriti o Waitangi.  
Restriction: SOCWORK 11F

**TFCSOCIO 91F 15 Points**  
Foundation Sociology 1  
Introduces students to fundamental building blocks in sociology. Students develop familiarity with key sociological concepts that explain social inequalities, enabling them to think sociologically about this issue. In particular, students learn how social structures (for example, class, race/ethnicity, gender and sexuality), social institutions (for instance, the state) as well as interactions between people produce and sustain various forms of inequality.

**TFCSOCIO 92F 15 Points**  
Foundation Sociology 2  
Focuses on Aotearoa New Zealand as a multicultural nation produced through colonisation and subsequent waves of migration. Using a range of case studies, the course highlights the role of different cultural norms and values in creating diverse experiences of living in Aotearoa New Zealand. Such divergent realities invite reconsideration of what it means to be a ‘New Zealander’.

Academic Integrity

ACADINT A01 0 Points

Academic Integrity Course

The Academic Integrity Course is an online course designed to increase student knowledge of academic integrity, university rules relating to academic conduct, and the identification and consequences of academic misconduct. Students work through a series of modules, outlining scenarios that they may encounter while studying at university. Each scenario provides information on relevant rules, resources and expected behaviour.

Foundation Courses

ACADENG 93F 15 Points

Foundation Academic English

Develops language skills necessary for academic study. The course will help students to improve their sentence structure, develop their vocabulary, plan their writing, and improve paragraph and essay organisation. It focuses on sound principles of essay writing and provides practice in the various stages of writing.

Prerequisite: Coordinator approval

Stage I

ACADENG 100 15 Points

Forms in Academic English

Focuses on developing an understanding of academic reading and writing, including sentence and paragraph structure and academic vocabulary, and aims to develop strategies for employing these for effective reading and writing of academic texts. Develops an understanding of broad principles and practices of academic discourse at university level.

Humans are social and cultural beings. This course provides an understanding of human lives. Basic concepts and approaches are covered. |
| ANTHRO 101  | 15 Points |
| World Archaeology | World archaeology from the emergence of culture to the first cities, including the Pacific region. |
| ANTHRO 102  | 15 Points |
| How Humans Evolve | Humans are primates united by sociality, diversity, and flexibility and are subject to the same evolutionary forces as other species. However, human evolution is biocultural and is subject to both biological and cultural inheritances. Biological anthropology includes the study of human evolution past and present. This course will examine our evolutionary history and how evolution affects humans today. |
| ANTHRO 103  | 15 Points |
| Musics of the World in Everyday Life | Examines the personal, communal, religious, patriotic, emotional and economic roles that music plays in the lives of musicians, composers and listeners. Employs research from a range of ethnographic perspectives and encourages students to think and act analytically about their own musical worlds. Examples and case studies are drawn from around the globe, encompassing contemporary urban and remote village settings. |
| ANTHRO 104  | 15 Points |
| ANTHRO 104G |  
Peoples and Cultures of the Pacific | A survey of the peoples of Pacific Islands through the perspectives of archaeology, biological anthropology, ethnomusicology, linguistics and social anthropology. |
| ANTHRO 105  | 15 Points |
| ANTHRO 105G |  
Question of Race and Racism | International, cross-cultural and interdisciplinary perspectives question ‘race’ and ‘racism’. Why does the concept have such social and political potency? What are the impacts of concepts of race and practices of racism and anti-racism on individuals, families, communities, nation-states and empires, and in Aotearoa New Zealand and the Pacific in particular? |

**Additional Notes:**  
- Prerequisite: ANTHRO 100 or 30 points in Anthropology.  
- ANCHIST 796A, 796B  
  Thesis  
  **Prerequisite:** A BA(Hons) in Ancient History with at least Second Class Honours, First Division, or equivalent.  
  To complete this course students must enrol in ANCHIST 796 A and B.  
- ANCHIST 797A, 797B  
  Research Portfolio  
  **Prerequisite:** ANTHRO 100 or 30 points in Anthropology.  
  To complete this course students must enrol in ANCHIST 797 A and B.  
- **Stage II**  
  ANTHRO 200  
  Archaeology: Understanding the Past  
  An examination of current concepts in archaeological research and their place in the development of archaeological thought. How archaeology makes use of its methods and theories to understand the past. An introductory laboratory component. This course is essential for students who may wish to continue their study of Archaeology at Stage III.  
  **Prerequisite:** 30 points in Anthropology or 60 points passed  
- ANTHRO 201  
  Human Evolution  
  Explores issues fundamental to understanding humans’ place in nature from a biocultural perspective. What led to the evolution of bipedalism, large brains, and language? How do we define species in the fossil record? How can we reconstruct ancient diets and ecologies? The course will examine how new discoveries and advancements in biology are reshaping understandings of our evolutionary history.  
  **Prerequisite:** 30 points in Anthropology or 60 points passed  
- ANTHRO 202  
  Music and Identity in World Music Cultures  
  Examines music’s role in the construction and reinforcement of identity. Considers a range of culturally constructed concepts including class, gender and ethnicity; also considers the impact of mass mediated sound and unique nature of music in the cultural diaspora. Examples and case studies range from the ritual musics of Africa and the classical music of South Asia to East Asian pop.  
  **Prerequisite:** 30 points passed  
- ANTHRO 203  
  Thinking like a Social Anthropologist  
  A survey of some of the key anthropological theories used to analyse human social life, discussed by reference to cross-cultural studies. Also considers current debates/issues within the discipline.  
  **Prerequisite:** ANTHRO 100 or 30 points in Anthropology  
- ANTHRO 204  
  Ethnography of Island Polynesia  
  What is distinctive about Polynesian culture and society? How and why are Polynesian cultures alike? How are they different? In what ways are Fiji, Samoa, Tikopia, Tokelau and Tonga different or similar to other Oceanic cultures? Anthropological studies of these questions will be explored through indigenous Polynesian, anthropological and historical accounts.  
  **Prerequisite:** ANTHRO 100 or 30 points in Anthropology, Māori Studies or Pacific Studies, or 45 points in BGlobalSt courses

ANTHRO 246  
Tradition and History in New Zealand Archaeology  
Examines Māori traditions and history as a guide to processes in the New Zealand archaeology. Case studies will include Māori canoe traditions, the expeditions of Hongi Hika and Te Rauparaha, and the Ngāi Tahu settlement of the South island.  
Prerequisite: ANTHRO 100 or 101 or 102 or 103 or 104 or 60 points passed  
Restriction: ANTHRO 346

ANTHRO 247  
Anthropology Today: Debates in Culture  
The primary aim is to provide students with an introduction to some of the more topical and controversial themes that social anthropologists are currently engaged with. Topics include: the culture of terrorism, anthropology and cyberculture, the anthropological study of prisons, race and racism, and the politics of representation.  
Prerequisite: ANTHRO 100 or 30 points in Anthropology  
Restriction: ANTHRO 331

ANTHRO 248  
Special Topic  
Prerequisite: ANTHRO 100 or 101 or 102 or 103 or 104 or 60 points passed

ANTHRO 250  
World-view and Religion  
Anthropological approaches to religion and world-view. Includes cross-cultural approaches to meaning, belief, religious experience, ritual and myth. Issues of religion, ideology, syncretism, symbolism in social conflict and change. Considers local and world religions.  
Prerequisite: ANTHRO 100 or 30 points in Anthropology or Theological and Religious Studies or Sociology  
Restriction: ANTHRO 319

ANTHRO 251  
Special Topic  
Prerequisite: ANTHRO 100 or 30 points in Anthropology

ANTHRO 252  
Special Topic: Global Heritage Management  
Globally, archaeological features and historic monuments are increasingly threatened by urban development, looting, antiquities trafficking, and effects of climate change. Using an archaeological perspective, state-of-the-art recording technologies, community partnerships, legislation, management systems, and the role of museums in conservation and exhibition will be examined. Case studies from Aotearoa, Pacific and elsewhere illustrate major issues, contradictions, and controversies, alongside effective heritage management.  
Prerequisite: ANTHRO 100 or 101 or 102 or 103 or 104 or 60 points passed

ANTHRO 268  
Exploring Ethnography  
Explores ethnographic approaches to human cultures, including key elements of ethnographic fieldwork and analytic approaches. Uses ethnography to understand contexts and processes that shape people’s social and cultural lives. In any given year, a different ethnographic region (e.g., Europe, Melanesia, Polynesia, South-East Asia, New Zealand) or theme (e.g., art, economics, racism, technology, violence) may be covered.  
Prerequisite: ANTHRO 100 or 30 points in Anthropology, Sociology or History  
Restriction: ANTHRO 368
religious experience, ritual and myth. Issues of religion, ideology, syncretism, symbolism in social conflict and change. Considers local and world religions.

Prerequisite: ANTHRO 203 or 30 points at Stage II
Restriction: ANTHRO 250

**ANTHRO 321 15 Points**

**Equality and Inequality**

Examines conceptualisations, realities and consequences of equality and inequality cross-culturally. Considers whether there are egalitarian societies and whether inequality is inevitable. Covers types and systems of inequality such as slavery, gender inequality, caste and class, as well as differences between economic and political inequality, and between equality of opportunity and equality of results.

Prerequisite: ANTHRO 203 or 30 points at Stage II

**ANTHRO 322 15 Points**

**Origins of Civilisation**

The shift from a hunter-gatherer way of life to one based on village life and agriculture is foundational for the development of complex society. The course considers what socio-cultural changes were involved as Holocene societies developed in different parts of the world and how the relationship between humans and the environment changed.

Prerequisite: 60 points at Stage II
Restriction: ANTHRO 206

**ANTHRO 327 15 Points**

**Music and Culture in Bollywood**

Focuses on Hindi film songs and song scenes taken from mainstream “Bollywood” films, with consideration of tensions between music as popular song and as a narrative component. Examines issues and theories of music, semiotics and narrative context and convention and explores the role of film song in South Asian popular culture.

Prerequisite: 30 points at Stage II

**ANTHRO 328 15 Points**

**Bioarchaeology**

A practical introduction to the archaeological analysis and interpretation of biological remains, emphasising faunal materials but also including macrobotanical remains and pollen.

Prerequisite: ANTHRO 200 or 201 with a minimum B- grade

**ANTHRO 329 15 Points**

**Music of East Asia: Tradition, Modernity and Globalisation**

Examines East Asia from the ethnomusicological perspective and illuminates how music negotiates boundaries and constructs varying identities in China, Japan, and Korea, while affirming a distinct cultural identity generally referred to as “East Asian”. Using different musical practices of East Asia as case studies, it examines multiple approaches and methodologies used in studying East Asian music.

Prerequisite: 30 points at Stage II

**ANTHRO 330 15 Points**

**Politics of Culture**

A critical exploration of contemporary debates on and around the idea of ‘culture’. Focuses particularly on controversies at the interface between anthropology and politics, from problems of cultural translation and the appropriation of culture, to the politicisation of culture, multiculturalism and the rise of the ‘consumer culture’.

Prerequisite: ANTHRO 203 or 30 points at Stage II
Restriction: ANTHRO 244

**ANTHRO 331 15 Points**

**Anthropology Today: Debates in Culture**

The primary aim is to provide students with an introduction to some of the more topical and controversial themes that social anthropologists are currently engaged with. Topics include: the culture of terrorism, anthropology and cyberculture, the anthropological study of prisons, race and racism, and the politics of representation.

Prerequisite: ANTHRO 203 or 30 points at Stage II
Restriction: ANTHRO 247

**ANTHRO 337 15 Points**

**Birth, Death, and Disease: Anthropological Demography**

Examines how human populations change over time, what factors underlie patterns of disease and death, and why demography is so important to the study of epidemics. The course will explore the use of demographic methods and theories of demographic and epidemiological transition to examine fertility, morbidity, mortality, and migration from an anthropological perspective, with a particular focus on infectious disease dynamics.

Prerequisite: ANTHRO 201 or 60 points in Anthropology

**ANTHRO 340 15 Points**

**Heritage Conservation in Aotearoa**

Addresses the main principles of heritage conservation focusing on the rationale rather than treatment methods. Special emphasis is given to the fields of: conservation of place, archaeological, architectural, ethnographic and fine art conservation. Provides students with a cultural orientation to conservation where issues are examined through several contexts, including anthropological studies and conservation science.

Prerequisite: 30 points at Stage II in Anthropology

**ANTHRO 342 15 Points**

**Human Sex, Gender and Sexuality**

Explores the central anthropological topics of human sex, sexuality and gender from diverse perspectives. Topics may include cross-cultural and social conceptualisations and creations of difference; ideas about biology, gender and sexuality; how they are simultaneously socio-cultural products and forces; lived experiences and corporeal and political phenomena; reproductive politics; and global, national and local sexual and gender relations.

Prerequisite: ANTHRO 203 or 30 points at Stage II
Restriction: ANTHRO 211, 215

**ANTHRO 345 15 Points**

**Directed Study in Anthropology**

A directed reading and individual study course, offered in exceptional circumstances, to prepare students in the methodologies of a selected sub-discipline of Anthropology, with the agreement and under the supervision of appropriate staff.

Prerequisite: ANTHRO 200 or 201 or 215 or 239 or 243 and Head of Disciplinary Area approval

**ANTHRO 346 15 Points**

**Tradition and History in New Zealand Archaeology**

Examines Māori traditions and history as a guide to processes in the New Zealand archaeology. Case studies will include Māori canoe traditions, the expeditions of Hongi Hika and Te Rauparaha, and the Ngāi Tahu settlement of the South island.

Prerequisite: ANTHRO 200 or 201 or 103 or 219 or 120 points passed

**ANTHRO 347 15 Points**

**Special Topic in Anthropology**

Prerequisite: 30 points at Stage II in Anthropology including either ANTHRO 200 or 201
ANTHRO 348 15 Points
Perspectives on Human Growth
Adopts evolutionary and biocultural perspectives in examining patterns of human growth and maturation. Human developmental patterns are placed within an evolutionary framework using evidence from non-human primates and earlier hominid remains. Variability within and among human populations in growth and developmental timing is considered in terms of genetics interacting with physical, biotic and social factors.
Prerequisite: ANTHRO 201 or 60 points in Anthropology

ANTHRO 349 15 Points
Primate Behaviour, Ecology and Conservation
Examines the diversity of extant nonhuman primate species, including their behaviour, ecology, and conservation, and also the importance of primatology toward an understanding of our own species. Specifically, students will critically examine the results of primatological inquiries in order to gain insight into the comparative evolutionary approach, especially with respect to the applicability of such efforts to the study of humans.
Prerequisite: ANTHRO 201 or 60 points in Anthropology
Restriction: ANTHRO 205

ANTHRO 351 15 Points
Special Topic
Prerequisite: ANTHRO 203 or 30 points at Stage II in Anthropology

ANTHRO 352 15 Points
Special Topic: Applied Anthropology
Examines how anthropology has been used in interventions that affect people’s lives, and how anthropology has contributed to public policy and public discourse. Considers ethical, methodological and theoretical complexities of anthropology’s engagement in development and advocacy. Finally, the course will consider how anthropologists fit into the bigger picture of transnational governmentality, policy and economy.
Prerequisite: 60 points in Anthropology

ANTHRO 353 15 Points
Archaeology in Practice
Introduces standard laboratory methods for analysing artefacts and generating material culture data to answer questions about the past. Quantitative observations, classification, and hypothesis testing will be emphasised. Course content will be relevant to a range of archaeological research, including research in heritage management contexts. Analysis of Australasian and Pacific Island materials will form the basis of laboratory work when possible.
Prerequisite: B+ or higher in ANTHRO 200 or 201

ANTHRO 354 15 Points
Anthropology of the Body
Examines cultural and historical variations in how societies understand and experience the human body. The focus will be primarily on social, historical, and political-economic approaches. Topics such as labour, sport, health, illness, sexuality, gender and religious ritual will be considered. Explores the cultural construction and social experience of the human body in a diverse range of settings.
Prerequisite: ANTHRO 203 or 30 points at Stage II in Anthropology
Restriction: ANTHRO 241

ANTHRO 357 15 Points
Gender, Sexuality and Popular Music
Explores the ways in which gender and sexual identities are both reflected in and modified by mainstream popular music: from ‘girl power’ to boy bands; from outwardly gay and lesbian artists to the gay appropriation of heterosexual female divas; from the camp masculinity of heavy metal to lesbian rock and riot grrrls; from women-hating gangster rappers to powerful women in the recording industry.
Prerequisite: 30 points at Stage II
Restriction: POPMUS 306

ANTHRO 358 15 Points
Gender and Colonialism in the Pacific
The transformation of gender relations in the Pacific from the inception of the European contact period and through the colonial process. Emphasis will be on the gendered nature of colonialism both in terms of how it framed the process, as well as how the experience was lived.
Prerequisite: ANTHRO 203 or 30 points at Stage II
Restriction: WOMEN 303

ANTHRO 360 15 Points
Special Topic
Prerequisite: ANTHRO 200 or 201 or 203 or 219 or 120 points passed

ANTHRO 365 15 Points
Coming of the Māori: Archaeology of Aotearoa
Examines the first 600-700 years of human settlement in Aotearoa/New Zealand from an archaeological perspective, from Polynesian arrival through the early historic period. Themes include Māori origins in East Polynesia, adaptations to Aotearoa’s temperate environment, changing patterns of resource use, Māori material culture and arts, the development of fortified sites or pā, and the emergence of classic Māori society.
Prerequisite: 60 points at Stage II
Restriction: ANTHRO 207

ANTHRO 366 15 Points
Medicine, Power and Politics
Anthropological examination of the interplay between cultural values, local and national politics, and international health programs and initiatives. Examines how experiences of medical care and ideas of illness and health vary across different cultural groups and socio-cultural settings.
Prerequisite: ANTHRO 203 or 30 points at Stage II

ANTHRO 367 15 Points
The Anthropology of Human Remains
Human remains reflect the lives of the dead as well as the lives of those who buried them. The course introduces students to the various ways in which we can study the dead. It covers three areas: the interpretation of mortuary practices, the interpretation of past lives from skeletal remains, and the practice of burial archaeology in the southern hemisphere.
Prerequisite: ANTHRO 200 or 201 with a minimum B- grade
Restriction: ANTHRO 235

ANTHRO 368 15 Points
Exploring Ethnography
Explores ethnographic approaches to human cultures, including key elements of ethnographic fieldwork and analytic approaches. Uses ethnography to understand contexts and processes that shape people’s social and cultural lives. In any given year, a different ethnographic region (e.g., Europe, Melanesia, Polynesia, South-East

Asia, New Zealand) or theme (e.g., art, economics, racism, technology, violence) may be covered.

ANTHRO 370 15 Points  
Special Topic

ANTHRO 399 15 Points  
Capstone: Anthropological Science

Provides students with an opportunity to demonstrate their integrated knowledge and growth in the major. Students are encouraged to make connections between their academic learning in anthropological science and the professional world. Specific topics will vary by year, but will feature projects designed to incorporate both independent and collaborative work, as well as the potential for public engagement.  
Prerequisite: 30 points passed at Stage III in Anthropological Science or Academic Head approval

ARTHIST 107 15 Points
The Renaissance: Art and the City
An investigation of the social and cultural history of urbanisation 1400-1600 as expressed in painting, sculpture and architecture. The areas of study will involve looking at art in the spheres of public buildings, religious institutions
and private houses. The cities to be covered may include Florence, Bruges, Venice, Antwerp and Rome.

ARTHIST 109
Shock of the Modern
15 Points
Will explore the production and reception of modern art in the context of rapid social, political and technological change during the period from c.1850 to 1970. Modern art is interpreted broadly to include painting, sculpture, design, architecture, performance, photography and film. Issues such as the emergence of the avant garde, primitivism and abstraction will be studied.
Restriction: ARTHIST 104, 105, 114

ARTHIST 114
Understanding Art: Leonardo to Warhol
15 Points
Is seeing learned? Can an image be read in the same way as a text? Understanding images is central to everyday life. Visual literacy is fundamental to all disciplines. This course provides students with tools for making sense of various kinds of images and objects: photographs, advertisements, paintings, film, television, comics, cartoons, monuments, buildings, maps, landscape, digital and internet images.
Restriction: ARTHIST 109

ARTHIST 115
Global Art Histories
15 Points
A broad survey of visual art spanning from the early modern period to the contemporary. Students will be introduced to a range of art practices situated within a global context and will consider art works produced in Māori and Pacific cultures alongside Indian, Asian, Middle Eastern, European and American traditions.

Stage II

ARTHIST 200
Radical Change: 1850-1940
15 Points

**Concepts in Contemporary Art**

Examines the cross-fertilisation of theory and praxis, philosophy and art, materialism and idealism in the arts. It will be taught in four thematic units – Body/Mind; Representation/Experience; Self/Other and Materialism/Conceptualism – testing how visual theory bridges the gap between these dual terms. Students will learn to apply a number of important critical theories to their understanding of art, and importantly, to fine-tune those theories through visual experience.

Communication

Stage I

COMMS 100 15 Points
Communication, Technology and Culture
Explores the past, present and future of communication media. Examines communication media within their social context, and provides a particular focus on the interplay between technology and culture. Key concepts in the study of communication are introduced and various communication media are studied via specific case studies, with particular emphasis placed on new digital platforms including social and mobile media as well as older forms such as television and cinema.
Restriction: FTVMS 100

COMMS 104 15 Points
COMMS 104G 15 Points
Advertising and Society
A critical examination of advertising and advertisements focusing on the role advertising plays in consumer culture. Advertisements from a diverse range of media are studied in order to analyse how advertisements construct and disseminate meaning. The course investigates how advertising engages with the logic of wider cultural and global transformations with consideration given to both consumer and industry perspectives.
Restriction: FTVMS 110, 110G

Stage II

COMMS 200 15 Points
Writing in the Workplace
Addresses written communication in the workplace across a range of discourses, environments, strategies and audiences. Focusing on different kinds of writing used in contexts such as government, community organisations, consultancy, professions, NGOs and private business, students will analyse and produce key workplace text-types within a critical framework of workplace analysis and scholarship on labour and organisations.
Prerequisite: 60 points at Stage I in BA courses

COMMS 201 15 Points
Journalism Studies
Explores journalism, communications and the news media, examining the history and contemporary state of such practices from a theoretical, rather than practical, perspective. Students gain knowledge about the profound impact that social, political and technological shifts have had on the field of communications today and discuss their implications for popular, professional and citizen journalism.
Prerequisite: 60 points at Stage I in BA courses
Restriction: FTVMS 225

COMMS 202 15 Points
Audiences and Users
Examines the ways that audiences have been conceived, addressed, measured and empowered in the context of the history and technologies of communication media. Theories of reception to be studied include uses and gratifications models, consumer behaviourism, passive versus active audiences, the rise of the ‘prosumer’, modes of engagement and fan discourses. Students will also learn about audience research methods.
Prerequisite: 60 points at Stage I in BA courses

COMMS 203 15 Points
Television Journalism
A practical course where students explore the production of current affairs journalism. Students learn to write, video, present and edit short news items in the field and integrate these into a multi-camera production recorded as live in the television studio. Studio skills include directing, production management, multi-cam scripting, vision switching, presenting and interviewing within a framework of current industry practice.
Prerequisite: 60 points at Stage I in BA courses
Restriction: FTVMS 201

COMMS 204 15 Points
Social Media
Addresses issues related to the use of social media and considers in particular the influence of new media corporations such as Facebook, as well as platforms like Twitter, Snapchat, Tinder and YouTube. Explores our cultural practices and social rituals in relation to these peer-to-peer, one-to-many media technologies, and examines this revolution in the media landscape.
Prerequisite: 60 points at Stage I in BA courses
Restriction: FTVMS 235, 335

COMMS 205 15 Points
Writing: Concept and Craft
An exploration of written communication which connects writing as an object of analysis and critique to writing as a multi-faceted craft. Since writing systems, materials and tools create the worlds we live in, the course conceptualises the relation between world and word, image and text, technology and body, and addresses cultural, critical and digital literacies that organise lived experience.
Prerequisite: 60 points at Stage I in BA courses
Restriction: ENGLISH 105, 257, 363

COMMS 206 15 Points
Special Topic
Prerequisite: 60 points at Stage I in BA courses

COMMS 208 15 Points
Digital Communication Ethics
Addresses applied ethical issues arising in digital journalism, social media, “big data” surveillance and privacy, algorithmic bias, and software design. As digital media expand beyond the personal computer, there is an increase of ethical issues
pertaining to mobile devices, GPS navigation, biometric modelling, artificial intelligence, and the ever-expanding range of wired devices tracking us through the so-called 'internet of things'.

Prerequisite: 60 points passed

Stage III

**COMMS 300**

New Media and the Future of Communication

Explores theories and practices of communication in the digital age. The course analyses contemporary debates and controversies about the impact of new digital media platforms on the nature and ethics of communication. Examines the implications for the future in terms of opportunities and risks for individuals, communities and institutions in an environment of rapidly advancing communication technologies.

Prerequisite: 15 points from COMMS 200-208 and 15 points in BA courses
Restriction: FTVMS 203, 314

**COMMS 301**

Digital Communication and Practice

Offers a practical and creative approach to digital communication within the critical context of platform studies. Students will navigate the capacities, affordances and limitations of a variety of digital platforms by developing the skills to create platform-specific outputs, such as podcasts, gifs, vlogs, mobile films and digital storytelling shorts.

Prerequisite: 15 points from COMMS 200-208 and 15 points in BA courses

**COMMS 302**

Visual Communication

Provides students the tools for communicating with various kinds of visual images and objects. These may include brands, logos, graphics, photographs, advertisements, promos, paintings, cartoons, maps, architecture and architectural diagrams. Students will interrogate their culturally specific visual competencies and refine their skills in visual literacy while addressing issues of textuality, identity, ethnicity, nation, class, gender, and communicative inter-relationships more generally.

Prerequisite: ARTHIST 115 and 30 points from BA courses, or 15 points from COMMS 200-208 and 15 points from BA courses

**COMMS 303**

Sports Media

Examines the relationship between sport and the media. Topics include sports journalism; industry practice; the mediated game event; online communities of fandom; commentary; issues of race and gender; and sports law. Students have the opportunity to experience outside broadcast of televised sport and use the university television studio to engage with key media sport professionals.

Prerequisite: 15 points from COMMS 200-208 and 15 points in BA courses
Restriction: FTVMS 313

**COMMS 304**

Gender, Politics and the Media

Cook Islands Māori

Stage I
COOKIS 101 15 Points
COOKIS 101G 15 Points
Introduction to Cook Islands Māori
Gives students an introduction to the structure of Cook Islands Māori as well as allowing them to develop basic skills in listening, speaking, reading and writing. Designed for students with little or no knowledge of the language, and for those with some fluency wishing to understand simple sentence structure and composition.
Restriction: COOKIS 102. May not be taken if a more advanced language acquisition course in this subject has previously been passed

Stage II
COOKIS 201 15 Points
Cook Islands Māori Language 2
Further consolidates skills in listening, speaking, reading and writing in Cook Islands Māori. Students will also deepen their experience and knowledge of Cook Islands Māori culture through their participation in a dramatised re-enactment of a Cook Islands myth or legend, with its accompanying chants and songs.
Prerequisite: COOKIS 101 or 102
Restriction: COOKIS 202. May not be taken if a more advanced language acquisition course in this subject has previously been passed

COOKIS 204 15 Points
Special Topic

Stage III
COOKIS 301 15 Points
Cook Islands Māori Language 3
Students will develop their language skills to an advanced level, through examining, discussing and analysing, in Cook Islands Māori, selected oral and written texts in various genres, as a model for their own compositions. They will also study traditional oratory as a means of further expressing the richness of Cook Islands culture and history.
Prerequisite: COOKIS 201 or 202

To complete this course students must enrol in CREWRIT 797 A and B
**Stage II**

**CRIM 200**  
**Cultural Criminology**  
Exposes students to the major concepts and methodological approaches within cultural criminology, a field that is unique in its exploration of the meanings associated with crime and deviance. The course also considers the broader contexts of crime, how powerful groups and media influence criminal justice policies, and the relationship between popular discourses and the nature of social control.  
**Prerequisite:** 60 points passed from BA courses

**CRIM 201**  
**Debates in Criminology**  
Presents analysis of criminal behaviour, crime control and community safety. Attention is paid to criminal offending, response and regulation. Examples are drawn from New Zealand and overseas.  
**Prerequisite:** 30 points from MĀORI 130, PHIL 103, POLITICS 109, SOCIOL 100, 101, 103

**CRIM 202**  
**Contemporary Issues in Punishment**  
The focus is on contemporary issues in punishment, considering both its purposes and effectiveness. The course explores a range of perspectives drawing on longstanding criminological, sociological and philosophical literatures.  
**Prerequisite:** 30 points from MĀORI 130, PHIL 103, POLITICS 109, SOCIOL 100, 101, 103

**CRIM 203**  
**The Criminal Mind: Crime and Individual Differences**  
Examines the phenomena of crime and punishment from a psychological perspective. Particular attention is paid to psychological explanations of crime, the relationship between mental illness and crime, and the role of psychology in law enforcement, the courts, and corrections.  
**Prerequisite:** 30 points from MĀORI 130, PHIL 103, POLITICS 109, PSYCH 108, SOCIOL 100, 101, 103

**CRIM 204**  
**Critical Studies in Policing**  
Explores policing in New Zealand and beyond, including its legal and theoretical underpinnings. Critically examines media representations of the police, policing and inequality; police culture, power and accountability; the effects of human rights claims on policing methods and emerging threats to policing both locally and globally.  
**Prerequisite:** 30 points from MĀORI 130, PHIL 103, POLITICS 109, SOCIOL 100, 101, 103

**CRIM 205**  
**Crime, Media and Society**  
The relationship between crime and the media is complex and contradictory. This course investigates this relationship by encouraging students to develop an understanding of how the media help to influence the public views of crime and criminalisation. It will do this by focusing on media portrayals of crime and criminal behaviour, media effects, and theories of media and communication.  
**Prerequisite:** 30 points at Stage I in Law, Media, Film and Television, Psychology, or Sociology

**CRIM 206**

**Prerequisite:** 30 points from MĀORI 130, PHIL 103, POLITICS 109, SOCIOL 100, 101, 103

**Stage III**

**CRIM 301**  
**Issues in Criminal Justice**  
Discusses the workings of the criminal justice system and explores and contextualises classical and emergent approaches to criminal justice, including their legal underpinnings. Practical and theoretical issues will be considered using a case study approach. Emphasis is given to the developing synthesis of criminal and social justice.  
**Prerequisite:** 15 points from CRIM 201, 202

**CRIM 302**  
**Criminology: The Indigenous and the Global**  
Are we all equal before the law? Or, are groups treated differently by the criminal justice system? This course examines, with particular emphasis on indigenous peoples in New Zealand, Australia and Canada, the impact of differential practices on inequalities and collective efforts to achieve social change. Concepts of restorative justice are central to this course.  
**Prerequisite:** 15 points from CRIM 201, 202

**CRIM 303**  
**Gender, Crime and Justice**  
Explores the importance of gender in the study of crime and criminal justice and examines patterns of offending, victimisation and employment in the criminal justice system amongst women and men. Traditional criminology theories and feminist critiques, and the differential treatment of women and men in the criminal justice system as victims, offenders and professionals will be critically examined and evaluated.  
**Prerequisite:** 15 points from CRIM 201, 202

**CRIM 304**  
**Key Issues in Restorative Justice**  
Provides a critical analysis of the restorative justice process as a response to offender behaviour, which will aid an understanding of its place within the wider criminal justice system. A variety of perspectives on restorative justice will be considered, as well as the various practices associated with it, and its effectiveness according to different stakeholders.  
**Prerequisite:** 15 points from CRIM 201, 202

**CRIM 305**  
**Victims and Victimology**  
Explores patterns and theories of victimisation, the position of victims and victimology within criminology, and the representation of victims in the media. Includes case studies of specific types of victimisation such as racial hate crimes and family and sexual violence. Victims' rights and the position of victims in the criminal justice system and restorative justice will also be examined.  
**Prerequisite:** 15 points from CRIM 201, 202

**CRIM 306**

### Postgraduate 700 Level Courses

**CRIM 700**  
Research in Criminology  
Examines the methods of research frequently employed in the field of criminology, and the various epistemological and ethical questions that arise in criminological research, and the connection between theory and research and quantitative and qualitative analytic strategies. Students will complete a research project under supervision.

**CRIM 701**  
Criminological Theory  
An examination of classical and contemporary theories of crime, including sociological, psychological, medical, rational-choice and critical perspectives on criminology. Attention will be given to the construction of theory as it is informed by social science research; to the social, cultural and political contexts in which these theories have emerged; and to the influence of theories in criminal justice policies.

**CRIM 702**  
Advanced Issues in Penology  
A survey of issues in penology, describing and interpreting specific penal reform strategies in terms of their historical, social, political and economic context. An appreciation of the main themes within penology will allow a greater understanding of the role that punishment regimes play in society and specifically in the criminal justice system.

**CRIM 703**  
Contemporary Criminology  
An examination of critical approaches to the study of crime and crime control. Attention will be given to understanding how these approaches critically assess social problems surrounding crime and crime control strategies; the political, social and historical development of varying critical perspectives; and the ways in which such approaches may lead to changes in criminal justice policies and practices.

**CRIM 704**  
State Crime  
Considers a range of theoretical approaches to criminal acts committed by state officials in pursuit of their jobs as representatives of the state, and state organisational deviance that involves the violation of human rights and is liable to sanction. The course offers a series of case studies of such state crime.

**CRIM 710**  
Cybercrime  
Exploration of cybercrime and its economic and social impact. The course aims to encourage critical thinking, exploring a range of key theoretical perspectives in criminal justice and their application to cybercrime. It analyses how the Internet may promote criminal behaviour and contribute to the globalisation of crime. It also outlines the challenges of policing cybercrime, evaluating current approaches.

**CRIM 770**  
Research in Criminology  
Examines the methods of research frequently employed in the field of criminology, and the various epistemological and ethical questions that arise in criminological research, and the connection between theory and research and quantitative and qualitative analytic strategies. Students will complete a research project under supervision.

**CRIM 771**  
Criminological Theory  
An examination of classical and contemporary theories of crime, including sociological, psychological, medical, rational-choice and critical perspectives on criminology. Attention will be given to the construction of theory as it is informed by social science research; to the social, cultural and political contexts in which these theories have emerged; and to the influence of theories in criminal justice policies.

**CRIM 772**  
Advanced Issues in Penology  
A survey of issues in penology, describing and interpreting specific penal reform strategies in terms of their historical, social, political and economic context. An appreciation of the main themes within penology will allow a greater understanding of the role that punishment regimes play in society and specifically in the criminal justice system.

**CRIM 773**  
Contemporary Criminology  
An examination of critical approaches to the study of crime and crime control. Attention will be given to understanding how these approaches critically assess social problems surrounding crime and crime control strategies; the political, social and historical development of varying critical perspectives; and the ways in which such approaches may lead to changes in criminal justice policies and practices.

**CRIM 774**

**DEVELOP 701**  
Development Praxis  
Focuses on the practice of development and its relation to theory. General topics include aid modalities, participatory development and social and environmental discourses and practices, and in those contexts the project cycle, programme management tools, monitoring and evaluation and impact assessment.

**DEVELOP 702**  
Gender and Development  
Considers a range of topics focusing on the centrality of gender to development and developing nations. Topics include: empowerment, reproduction, masculinities, health, fertility, gendered economies, micro-credit and familial resource allocation.

**DEVELOP 703**  
Independent Research  
Supervised study on a topic or topics approved by the Academic Head or nominee.  
To complete this course students must enrol in DEVELOP 703 A and B, or DEVELOP 703

**DEVELOP 705**  
Contemporary Issues in Gender and Development  
Interrogates selected contemporary themes in gender and development. It builds on and complements DEVELOP 702 by focusing on the dynamics of topical issues in gender and development. In doing so it provides students with the critical tools of analysis necessary in research projects.  
Prerequisite: DEVELOP 702
DEVELOP 706 15 Points
DEVELOP 706A 7.5 Points
DEVELOP 706B 7.5 Points

Internship in Development
Involves students in the operation of a development organisation, enables them to put into practice development theory and methods, provides experience of researching and writing a report or proposal to be used by the organisation, and assists them to reflect on the process in the light of development and other social science research literature. Prerequisite: DEVELOP 701 and approval of Academic Head or nominee

To complete this course students must enrol in DEVELOP 706 A and B, or DEVELOP 706

DEVELOP 708 15 Points

DEVELOP 709 15 Points

Theories of International Development
Examines early and contemporary theories and paradigms of international development, including modernisation and dependency theory, neoliberalism, human development, post-development, and participatory development. Investigates the dominance of economic growth as a development target and how this has been contested. The course will enable students to critically analyse the processes and phenomena involved in what is called 'development'. Restriction: DEVELOP 700

DEVELOP 710 15 Points

Development Policies and Institutions
Provides students with in-depth knowledge of policy approaches to alleviate poverty, enhance social justice and achieve sustainability. Contemporary development policies carried out by governments, donor agencies and UN organisations will be scrutinised. Examples of policies that will be covered in the course are land reform and migration policies, gender policies, climate adaptation and mitigation as well as ethical trade policies. Restriction: DEVELOP 700

DEVELOP 712 15 Points

Undertaking Development Research
Provides students with an overview of all phases of development research, from the theoretical framing of research, methods employed, ethical considerations, and the completion of a research proposal which can be used as the basis of an MA thesis proposal. Prerequisite: Approval of the Academic Head or nominee

DEVELOP 713 15 Points

Ethics and Governance in International Development
Addresses challenges to ethics and governance that arise in international development processes. Examines the competing demands of various stakeholders in the development of appropriate governance mechanisms and the values and judgements that inform societal choices and political decision-making. Students shall be familiarised with ethical debates in international development and engaged in ethically informed conversations on contemporary development challenges.

DEVELOP 715 15 Points

Independent Research
Supervised study on a topic approved by the Academic Head or nominee.

DEVELOP 716 15 Points

Global Health and Development
Introduces a social science approach to the study of health and globalisation, tracing various historical genealogies from colonial hygiene movements, to international public health in the development sector, up through contemporary global health institutions and their governance structure. Current issues in health and development, including the increasing role of NGOs and human rights frameworks, are critically analysed.

DEVELOP 717 15 Points

Humanitarian Interventions
Traces the rise of the humanitarian narrative and examines how humanitarianism – along with other key words such as crisis, emergency, and intervention – has become one of the organising categories of political action and order. The course explores the possibilities and limits of intervening in the lives of individuals and communities grounded upon discourses of compassion.

Adolescent Fiction
Adolescence is a problematic category and a peculiarly modern one; necessarily, the same holds true for adolescent fiction. The aim of this course is to examine this phase of development that is neither childhood nor adulthood but lies between, and recent literary and filmic responses to the characteristic interests and demands of readers at this stage of their lives. Course reading will include film and television, as well as written texts.
Prerequisite: 30 points at Stage II in English

ENGLISH 346 15 Points
African and Caribbean Literature
The Caribbean, by virtue of its geography and history, embraces cultural elements of Africa, India, Europe and North America. The focus, however, will primarily be on Caribbean and African societies in order to address a range of issues connected to these variously hybrid cultures: slavery, black identity and sexuality, nation/narration, home and location/dislocation.

Postgraduate 700 Level Courses

ENGLISH 700 30 Points
Pacific Poetry
A critical engagement with poetry written in English by the peoples of Oceania (Polynesia, Melanesia, Micronesia). Pacific aesthetics and epistemologies evident in orature and art, in addition to post-colonial and women of colour feminist theories, will be used in the construction of culturally insightful frameworks to better appreciate this poetry that spans from the 1970s to the present day.
Restriction: ENGLISH 717, 720

ENGLISH 701 30 Points
Milton and Poetic Authority
Milton is the poet who has been most significant in the establishment of the familiar canon of English poetry. This achievement raises questions about the greatness of poetry written in one set of historical circumstances that is then judged by an audience constructed in part by the poetry itself. In this context the course covers political as well as poetic works.
Restriction: ENGLISH 760
ENGLISH 702  30 Points
Postcolonial Literary Studies
Provides a critical investigation of postcolonial literary studies as a field of academic inquiry and cultural critique. We read essays by influential theorists, including theoretical essays by contemporary poets and novelists, but concentrate on the study of literary texts produced in the social, political and cultural circumstances that are largely identified as postcolonial.
Restriction: ENGLISH 786

ENGLISH 703  15 Points
Stages of Religion
The history of English religion through the longer Reformation period, as reflected and addressed especially in the drama of the period, from the Cycle-plays to Milton. Combines English history and history of religion with issues of dramatic history and performance. Extensive use of primary and rare materials.

ENGLISH 705  30 Points
Modernism and the Contemporary
Examines the work of Modernist writers intensely concerned with ideas of the contemporary within the context of Modernism, the defining international ‘movement’ of the twentieth century, known for its narratives of crisis and transformation.

ENGLISH 706  30 Points
ENGLISH 706A  15 Points
ENGLISH 706B  15 Points
Shakespeare: Selected Plays and Poems
The focus of this course varies from year to year but includes attention to several of the most influential approaches to the reading of Shakespearean texts: psychoanalysis, feminism, new historicism, cultural materialism and post-colonial theory.

ENGLISH 707  30 Points
Writing World War II
Takes the terror wrought by bombing as its theme with particular focus on the literature of the Second World War and the Cold War that followed it. Also addresses contemporary literary reimaginings of the Second World War, which incorporate elements of military, architectural and postcolonial history, and asks what these later versions imply about the war’s historicity.

ENGLISH 708  15 Points
Geo-theory
The global dissemination of critical and cultural theory has unearthed non-European, non-Northern and non-metropolitan ‘grounds’, causing other centres to re-orient the concerns of theory. Taking as given the legacy of literary and cultural theory, the course considers the variety of theoretical writing, its objects and concerns, which may be characterised as geo-theory.

ENGLISH 709  30 Points
Theatre on Screen
Examines a range of mainstream and arthouse films which treat the processes of theatrical performance and dramatic composition. These films create commercial and aesthetic appeal by engaging the thin dividing line between reality and drama. Topics include: theatricality and politics; the business of theatre; gender and sexuality; adaptation.
Restriction: ENGLISH 774

ENGLISH 711  30 Points
Shakespeare from Stage to Page, 1590-1640
Studies the development of the theatre in the half-century encompassing Shakespeare’s career and after, and its relation to the print industry of the same period. Treats authors and writing, acting, company structure, audiences, censorship, book production, publication and readership. Involves extensive use of primary and rare materials.

Opening the Archive
Develops practical research skills while attending to archives as concept and theory. Skills include scoping and pursuing a significant research project, seeking permissions and presenting findings. The course also reflects critically on the provenance of textual, material, visual and digital collections and their public and scholarly uses in the twenty-first century.

ENGLISH 725  15 Points
Writing, Literacy, Poetics
Study of textualities, reading and writing as situated language, and literary study in relation to wider literacies and media. What does ‘deep reading’ promise? Can one be ‘fully literate’? Readings in literacy and literary theory, performativity, and performance.

ENGLISH 731  30 Points
Jane Austen and Charlotte Brontë
A comparative study of two significant women novelists of the nineteenth century, exploring the similarities and differences among their works, as well as giving attention to their critical and popular reception history and their ‘afterlife’ in print and on screen.
Restriction: ENGLISH 752

ENGLISH 732A  15 Points

Popular Fiction: Mystery, Romance and Fantasy
Popular Fiction offers an opportunity to extend critical study of literature to the mass of texts customarily denied academic approval. A key element is the reader’s pleasure. Does pleasure make a difference in what is, admittedly, a critical study of several varieties of modern popular fiction, especially children’s literature, romance and crime fiction (both in print and on television). Reading of texts will be supported by discussion of a range of theoretical issues.
To complete this course students must enrol in ENGLISH 732 A and B

Pedagogy and Performance
Explores teaching as theory and performance in the context of Writing Studies and English. The course reviews the discipline of English, its concerns, materials and methods, and the challenge of multi-literacies. Teaching writing is rationalised in theory and rehearsed in practice through learning activities and assignments that address the discourse of discipline, the teaching room and public pedagogy.

ENGLISH 779 30 Points
The Social Text, 1350-1590
Explores the relations between literature and political society in the late medieval/early modern period. The literary text may articulate the designs and demands of political culture, employing the terms of emerging political discourses, or it may itself become a political event. The course aims at an understanding of public culture in the period, including its texts.

Language Study Abroad

The Language Study Abroad courses are intended to permit students to take advantage of opportunities for formal language study in an approved overseas institution where instruction is in a language other than English. Supplementary study at the University of Auckland may be required as part of these courses.  
Students taking one of these courses should enrol prior to undertaking the overseas study, and enrolment is subject to approval of the planned overseas study by the Academic Head or nominee for the language subject concerned. A final grade for any of the courses will be based on formal assessment of achievement in the language concerned, together with any other work required by the Academic Head or nominee.

The courses available for Language Study Abroad are listed under the following subjects: Arts General, Chinese, French, German, Italian, Japanese, Korean, Russian, Spanish.

Language Teaching and Learning

Stage I

LANGTCHG 100  
15 Points  
Linguistics for the Language Teacher  
An introduction to linguistics and its applications for language teachers. Provides basic understanding about the nature and function of language, including phonology, morphology and syntax, as well as semantics. This understanding will underpin the pedagogical principles developed in other units of the programme; and will enable students to translate their understanding of language into effective classroom practice.  
Prerequisite: Student must be enrolled in BEd(TESOL)

LANGTCHG 101  
15 Points  
Introduction to Language Teaching  
An introduction to a range of approaches to second language teaching and the theories of language and learning which underpin them. Students will explore the basic concepts related to current approaches to ELT in their home country and the social context of learning.

LANGTCHG 102  
15 Points  
Classroom Management and School Experience  
Introduces students to the organisation of learning in the classroom and specifically to the role and behaviour of the teacher in secondary classrooms and in the school. The integrated school experience provides students with an initial orientation to the school environment in their home country and the opportunity to apply their growing knowledge and skills in a supportive classroom context.  
Prerequisite: Student must be enrolled in BEd(TESOL)

LANGTCHG 103  
15 Points  
Competency in the Mother Tongue  
Extends the students’ command and control over their mother tongue to enable them to operate efficiently and effectively in schools in their home country where the medium of instruction is the mother tongue. To further enrich their communication skills they will be exposed to the literature in their mother tongue.  
Prerequisite: Student must be enrolled in BEd(TESOL)

LANGTCHG 104  
15 Points  
Ethics and Civilisation  
The role and the influence of local culture/religion (e.g. Islam or Confucianism) on world civilisation in general, and local culture in particular, will be examined. Offers opportunities
for students to examine Asian civilisation and will examine the challenges facing contemporary Asian civilisations.

**Prerequisite:** Student must be enrolled in BEd(TESOL)

### Stage II

**LANGTCHG 202** 15 Points

*Introductory English Language Analysis for Teachers*

Introduces key concepts of phonology, grammar and vocabulary of English and develops an understanding of how they function as systems in written and spoken English. Develops the skills needed to formally analyse the phonological, lexical and grammatical systems of English. Illustrates how linguistic descriptions can be applied in language teaching.

**Prerequisite:** 30 points passed or approval of Academic Head or nominee.

**LANGTCHG 205** 15 Points

*Developing Literacy in a Second Language*

Examines the theory and practice related to the development of both initial and advanced literacy in a second language: how reading and writing skills are developed in a second language; the interdependency of first and second language literacy skills; effective instructional methods and the role played by second language literacy in the development of academic skills where English is the medium of instruction.

**Prerequisite:** 30 points passed or approval of Academic Head or nominee

**LANGTCHG 206** 15 Points

*Special Topic*

**LANGTCHG 207** 15 Points

*Instructed Language Learning*

Introduces the study of characteristics of the acquisition-rich classroom by considering how a second language is learned, and explores different aspects of language pedagogy from the perspective of second language learning and factors responsible for individual differences in L2 learning in a classroom context. Students will consider research that has examined instructed language learning and have the opportunity to design their own action research project.

**Prerequisite:** 30 points passed or approval of Academic Head or nominee

**Restriction:** LANGTCHG 303

**LANGTCHG 209** 15 Points

*Using Tasks in Language Teaching*

Students learn about task-based language teaching and have opportunities for hands-on practice in developing tasks for use in the language classroom. The course also enhances students’ understanding of the difference between task-based teaching and traditional approaches to language teaching.

**Prerequisite:** LANGTCHG 101 or 30 points passed or approval of Academic Head or nominee

**Restriction:** LANGTCHG 306

### Stage III

**LANGTCHG 300** 15 Points

*Theory and Practice of Language Teaching*

A general introduction to English language teaching. This course requires students to undertake a study of current theory and practice relating to the teaching of the knowledge systems of English and of language skills.

**Prerequisite:** LANGTCHG 101 or 202 or 30 points passed at Stage II or above or approval of Academic Head or nominee

**LANGTCHG 301** 15 Points

*The Second Language Curriculum*

Introduces principles and procedures used in course design and to evaluate TEFL courses, coursebooks and materials. Develops a practical understanding of how to set about planning an EFL curriculum.

**Prerequisite:** LANGTCHG 101 or 30 points passed at Stage II or above or approval of Academic Head or nominee

**LANGTCHG 302** 15 Points

*Practical Language Teaching*

Develops an understanding of the procedures, techniques and options used in teaching language lessons; helps participants to design and deliver effective language lessons for a variety of contexts; and introduces participants to a variety of tools for teacher development such as peer teaching, peer observation, and reflective teaching.

**Prerequisite:** LANGTCHG 300 or 301

**LANGTCHG 304** 15 Points

*The Young Second Language Learner*

Examines the experience of children aged 6-12 years in learning a second language. Gives particular attention to the social, cognitive and psychological characteristics of children; examines the particular needs of young learners of a second language, and how languages are learned in different contexts.

**Prerequisite:** 30 points at Stage II in Linguistics or Language Teaching and Learning or approval of the Academic Head or nominee

**LANGTCHG 305** 15 Points

*Special Topic*

**LANGTCHG 307** 15 Points

*Special Topic*

**Restriction:** 30 points passed at Stage II

**LANGTCHG 308** 15 Points

*Special Topic*

**LANGTCHG 309** 15 Points

*Second/Foreign Language Teaching Experience*

Students teach English (or another language) for an organisation (local or abroad) approved by the Academic Head or nominee. Excludes teaching in a NZ primary, intermediate or secondary school.

**Prerequisite:** LANGTCHG 101, 202, 300, 301, 302 with a B average or higher and approval of Academic Head or nominee

**LANGTCHG 310** 15 Points

*Literature in Second Language Learning*

Introduces students to the study of stylistics, looks at various forms and genres of literary texts and presents different approaches to teaching literature in a second language classroom. The students will experiment with, evaluate and discuss various ways of teaching literature.

**Prerequisite:** LANGTCHG 101 or 202, or 30 points at Stage II or III, or approval of the Academic Head or nominee

**LANGTCHG 311** 15 Points

*Language and Technology*

Develops an understanding of how language works at text and discourse level. Students analyse spoken and written texts using simple computer-based or web-based tools in order to reveal lexical, grammatical and discourse patterns in text data. They consider how the insights gained from analysis can be used for language teaching purposes.

**Prerequisite:** 30 points passed at Stage II

**LANGTCHG 312** 15 Points

*Special Topic*
Course Prescriptions

**Stage IV**

**LANGTCHG 400 15 Points**
Language Curriculum Studies
Examines the meaning of curriculum in relation to the school, state, national contexts, and the broader socio-political context. Of central importance is the idea of curriculum as an interactive process. The idea of curriculum as process and the dynamic interplay between curriculum context, theory and practice are emphasised.
Prerequisite: Student must be enrolled in BEd(TESOL)
Restriction: LANGTCHG 724, 741

**LANGTCHG 401 15 Points**
Language Assessment in Schools
Aims to develop understanding of second language learning assessment. Starting with broader considerations and techniques, the focus is on different forms of assessment used in secondary English teaching contexts in the home country.
Prerequisite: Student must be enrolled in BEd(TESOL)
Restriction: LANGTCHG 704, 742

**LANGTCHG 402 15 Points**
Linking Theory and Practice in the Language Classroom
Examines the pedagogical frameworks underpinning classroom methodology. Focuses on linking theory and practice and on preparing students for forthcoming classroom teaching. Includes the practical preparation and implementation of lessons, drawing on and bringing into focus relevant aspects of the programme.
Prerequisite: Student must be enrolled in BEd(TESOL)
Restriction: LANGTCHG 710

**LANGTCHG 403 60 Points**
Teaching Practice
A 12-week period of teaching practice in a school in the country of the student’s origin. The practice will focus mainly on the teaching of English, although the student may have an opportunity to teach a second subject.
Prerequisite: Student must be enrolled in BEd(TESOL)

**Postgraduate 700 Level Courses**

**LANGTCHG 700 15 Points**
Literature in Second Language Learning
Introduces students to the study of stylistics, looks at various forms and genres of literary texts and presents different approaches to teaching literature in a second language classroom. The students will experiment with, evaluate and discuss various ways of teaching literature.
Restriction: LANGTCHG 310

**LANGTCHG 708 15 Points**
Special Topic

**LANGTCHG 710 15 Points**
Task-based Language Teaching
Examines research that has investigated task-based second language learning and the theoretical rationale for task-based language teaching. Also considers factors in the design of task-based syllabuses and methodological options for lessons based on tasks, and problems in implementation.
Restriction: LANGTCHG 402

**LANGTCHG 715 15 Points**
Developing Academic Literacy
Aims to help participants understand and develop their academic literacies. Focuses on texts involved in the research process, such as review articles, research paper proposals, dissertations and conference abstracts; makes extensive reference to findings from genre and corpus-based analyses; and includes conducting mini-analyses on the discourse in participants’ own disciplines.

**LANGTCHG 716 15 Points**
Vocabulary Learning and Teaching
Explores the role of vocabulary learning within a language teaching programme. It reviews research evidence on the nature of vocabulary and the processes involved in vocabulary learning, and considers how to facilitate the acquisition of vocabulary by second language learners both inside and outside the classroom.

**LANGTCHG 717 15 Points**
Qualitative and Narrative Inquiry in Language Education
Explores definitions of qualitative and narrative research as used in the field of applied linguistics, specifically in language teaching and learning. Focuses on approaches associated with the collection and analysis of qualitative and narrative text, particularly its content, structure and the context in which it was constructed. Participants will examine examples of research and produce and analyse their own written and spoken data.

**LANGTCHG 722 15 Points**
Learner Language
A study of learner language, including an introduction to the methods used to analyse both the content and linguistic form of learner language, a review of empirical research that has used these methods, and its pedagogical relevance.

**LANGTCHG 723 15 Points**
Theories of Language Learning
A critical examination of theories of second language learning grounded in linguistics, psycholinguistics, sociolinguistics and education. The course focuses on cognitive and social theories of second language acquisition, identifying commonalities and differences in the theories, and considering their pedagogical implications.

**LANGTCHG 733 30 Points**
Second/Foreign Language Teaching Practice
Aims to create opportunities for students to integrate disciplinary knowledge and professional teaching practice in order to develop the skills required of effective teachers of second and foreign languages. The course includes a seminar-based learning component, micro-teaching, focused observation and reflective teaching practice.
Prerequisite: Approval of Academic Head or nominee
Restriction: LANGTCHG 729

**LANGTCHG 734 15 Points**
Special Topic

**LANGTCHG 739 15 Points**
Directed Study
Supervised research on an approved topic or topics related to language teaching and learning.

**LANGTCHG 740 15 Points**
Language Analysis for Teachers
The study of the structure of English through an analysis of the key concepts and features of English phonology, morphology, syntax and vocabulary from the perspective of second/foreign language teaching.
Restriction: LANGTCHG 720

**LANGTCHG 746 15 Points**
Materials Development and Evaluation
The principles and processes of designing and evaluating language teaching materials.
Restriction: LANGTCHG 726
LANGTCHG 747 15 Points
Individual Learner Differences and Second Language Learning
The findings of research into individual learner differences and their role in language learning: the quantitative and qualitative methods used in this research.
Restriction: LANGTCHG 711

LANGTCHG 751 15 Points
Corpus Studies in Applied Linguistics
Covers the theoretical and practical aspects of using corpora to promote language learning. A major part of the course will focus on using corpora and text analysis tools to provide a description of language as it is used by different people for different purposes. Once we have a good description of language usage, we can move on to consider the role of corpus studies in language teaching.
Restriction: LANGTCHG 713

LANGTCHG 752 15 Points
Computer Assisted Language Learning
Covers the theoretical and practical aspects of using technology to promote language learning. Includes culture and CALL, exercise authoring, CALL research, technology and the four skills, web-based language learning, computer-mediated communication, and CALL evaluation.

Prerequisite: An average of A– over four courses or approval of Academic Head or nominee
To complete this course students must enrol in LANGTCHG 753 A and B, or LANGTCHG 753

LANGTCHG 754 15 Points
English for Specific Purposes
Considers theory and practice in developing language courses to meet the specific academic or work-related needs of adult learners. In particular, it focuses on analysis of target communication, needs analysis, issues and methodologies in ESP and ESP research. Uses the example of English for Specific Purposes but is relevant to the teaching of other languages for specific purposes as well.

LANGTCHG 756 15 Points
Special Topic

LANGTCHG 757 15 Points
Conducting Research in Applied Language Studies
Explores advanced theoretical perspectives for research into second/foreign language learning, teaching, and use. Enables students to acquire an advanced understanding of selected research methods. Students work independently on a small-scale project, which involves the collection and analysis of data on second or foreign language learning, teaching or use.
Restriction: LANGTCHG 732, 745

LANGTCHG 760 15 Points
Curriculum Design
Advanced level study of theoretical principles and current issues in the second language curriculum. Includes historical examination of influential approaches and methods, with particular attention to the development and current position of communicative approaches. Examines issues associated with course design processes including assessment of needs, objectives setting, syllabus and materials selections, and course evaluation.
Restriction: LANGTCHG 741

LANGTCHG 761 15 Points
Sociolinguistics
Examines sociolinguistic concepts relevant to understanding influences on language use at the level of individuals, social groups and institutions. Enables students to acquire an advanced understanding of social and regional dialects, perceived differences in the market status of particular languages, the use of sociolects and ethnolects in the media and other public domains, and policies and practices concerning migrant and heritage language maintenance.
Restriction: LANGTCHG 749

LANGTCHG 762 15 Points
Second Language Acquisition
Advanced study of current theories of second language acquisition and research that have examined both instructed and naturalistic acquisition. Includes an independent study involving analysis of learner language and writing a standard research report and a critique of a pedagogical approach, drawing on contemporary research on how languages are learned.
Restriction: LANGTCHG 722, 723, 743

LANGTCHG 763 15 Points
Discourse Analysis
Examines major theoretical approaches to the analysis of discourse and implications for pedagogy. Students acquire specialised knowledge of approaches to analysis and frameworks that underpin research, and develop advanced skills in written and spoken text analysis and critical awareness of issues and debates in the field. Assignments involve substantial independent research that includes analysis and interpretation of data.
Restriction: LANGTCHG 744

LANGTCHG 764 15 Points
Creativity: Research and Practice
Theoretical perspectives, pedagogical practices and research projects related to the topic of creativity in language learning and teaching. Enables students to acquire an advanced understanding of the concept of ‘creativity’ with reference to language teaching and learning through exploratory research, practice and reflection.
Restriction: LANGTCHG 755

LANGTCHG 765 15 Points
Language Testing and Assessment
Advanced study of theoretical principles and current issues in language testing, assessment and evaluation, and their application to teaching practice and research. Examines issues associated with the creation of valid and reliable assessments, and the implications for course design processes, with particular attention to the testing, assessment and evaluation of communicative language proficiency.
Restriction: LANGTCHG 742

**LINGUISTICS**

---

**Stage I**

**LINGUIST 100** 15 Points

**Introduction to Linguistics**

An introduction to the main areas of linguistics: the production and function of sounds in language (phonetics and phonology), word structure and word formation (morphology), the principles of grammar through a study of sentence structure (syntax), and various aspects of meaning (semantics). The course is a self-contained introduction and assumes no prior knowledge of linguistics or language study.

**Restriction:** LINGUIST 103

---

**LINGUIST 101** 15 Points

**LINGUIST 101G** 15 Points

**Language, Mind and Society**

A survey of three areas: the interaction between language structure and use on the one hand, and social structure and social norms on the other (sociolinguistics); the relationship between linguistic and cultural knowledge (anthropological linguistics); and the inter-relationship of language and other cognitive structures, especially as it is revealed through language acquisition (psycholinguistics).

---

**Stage II**

**LINGUIST 200** 15 Points

**Syntax**

Continues on from LINGUIST 100 or 103 and consists of a formal and a functional part, providing problems and exercises in syntactic analysis, as well as an introduction to grammatical theories and types of grammatical system.

**Prerequisite:** LINGUIST 100 or 103

---

**LINGUIST 201** 15 Points

**Phonetics and Phonology**

Includes a survey of speech sounds in the world’s languages, an overview of speech production and perception, and an introduction to how these sounds are organised into language. Includes a practical component in which theories are applied to language data.

**Prerequisite:** LINGUIST 100 or 103
LINGUIST 203  15 Points
Applied English Grammar
Covers the different types of sentences in English, with special attention to the relationship between grammar and meaning, tense, aspect and voice; their roles in texts, such as foregrounding, backgrounding and highlighting information, and introducing new information. Students will be shown how to distinguish standard and non-standard varieties of written English, and how to judge if written sentences are effective, appropriate and grammatical.  
Prerequisite: 15 points at Stage I

LINGUIST 206  15 Points
Semantics and Pragmatics
An introduction to a wide range of issues of contemporary relevance to the study of meaning. The semantics part includes topics in structural, truth-conditional and cognitive semantics. The pragmatics part covers some of the basic topics in pragmatics.  
Prerequisite: LINGUIST 100 or 103
Restriction: LINGUIST 302

LINGUIST 207  15 Points
English Language to 1900
Introduction to the history of the English language from its origins to 1900, with an emphasis on the development of sound changes, grammar, words and meanings in sociocultural and historical contexts.  
Prerequisite: 30 points in English or Linguistics
Restriction: ENGLISH 203

Stage III

LINGUIST 300  15 Points
Advanced Syntax
A continuation of LINGUIST 200. Examines selected topics, such as syntactic dependencies, movement, grammatical relations, phrase structure, typology and universals.  
Prerequisite: LINGUIST 200 or 203

LINGUIST 301  15 Points
Advanced Phonology
A continuation of LINGUIST 201, introducing a more theoretical approach to phonology including distinctive feature theory, syllable theory, metrical phonology, autosegmental phonology and lexical phonology. Issues are explored in the context of a constraint-based approach to phonology. Includes a practical component in which theories are applied to language data.  
Prerequisite: LINGUIST 201

LINGUIST 305  15 Points
Child Language Acquisition
Examines the patterns and mechanisms by which children acquire knowledge of their native language and assesses a number of current theories which have been developed to explain the process.  
Prerequisite: LINGUIST 200 or 201 or 203

LINGUIST 310  15 Points

Topics in Pragmatics
Pragmatics is the systematic study of language in use and is a rapidly developing discipline in linguistics. This course will give a critical survey of the central topics and the latest developments of pragmatics. The domain of pragmatics, implicature, presupposition, speech act and deixis will be among the issues dealt with in individual lectures.  
Prerequisite: LINGUIST 206

LINGUIST 322  15 Points
Middle English: Language and Change
A study of the origins, development and influences on English until around 1500.  
Prerequisite: 15 points from LINGUIST 200, 201, ENGLISH 203

LINGUIST 324  15 Points
Morphology
Provides an overview of linguistic morphology and the various strategies of word formation across languages. Theories such as Distributed Morphology, Lexical Phonology and Morphology, Lexeme-Based Morphology, Prosodic Morphology, and Word Syntax will be discussed, and the course will include a practical component in which these theories are applied to language data.  
Prerequisite: LINGUIST 100 or 103

LINGUIST 704  15 Points
Special Topic

LINGUIST 705  15 Points
Field Methods: Phonetics and Phonology
Students analyse the structure of an unfamiliar language, focusing on phonetics and phonology. The language studied in LINGUIST 705 and 706 may be the same in any given academic year.  
Prerequisite: LINGUIST 201 and either LINGUIST 300 or 313
Restriction: LINGUIST 707

LINGUIST 706  15 Points
Field Methods: Morpho-syntax
Students analyse the structure of an unfamiliar language, focusing on morphosyntax. The language studied in LINGUIST 705 and 706 may be the same in any given academic year.  
Prerequisite: LINGUIST 201 and either LINGUIST 300 or 313
Restriction: LINGUIST 707

LINGUIST 709  15 Points
Linguistic Research
Research methods and practices in Linguistics, which provides students with skills necessary for carrying out linguistic research. In addition to practicum sessions students will propose, develop and complete an independent research project.

LINGUIST 720  15 Points
Functional-typological Syntax
Cross-linguistic examination of selected topics, such as lexical categories, passives, transitivity, serial verb constructions, head-marking and dependent-marking, and
ic nicity. Consideration will be given both to differences among languages and to recurrent patterns.

**LINGUIST 721 15 Points**
**Formal Syntax**
Formal theories of syntax, generative grammar, and current topics of interest to students. This could include: LFG, Minimalism, the DP analysis, theories of argument structure, and/or formal models of language processing.

**LINGUIST 722 15 Points**
**Phonology**
A range of topics from the field of non-linear phonology, including autosegmental phonology, syllable theory, feature geometry and CV phonology.

**LINGUIST 724 15 Points**
**Semantics and Pragmatics**
Deals with a wide range of issues in semantics and especially pragmatics. Topics may include implicature, presupposition, speech act, deixis, reference, pragmatics and cognition, pragmatics and semantics, and pragmatics and syntax.  
*Prerequisite: LINGUIST 206 or 302, or equivalent*

**LINGUIST 731 15 Points**
**Historical Linguistics**
Current topics in historical linguistics, such as: theories of change in sound systems; syntactic change and syntactic reconstruction; grammaticalisation; distant genetic relationships and comparative methods.

**LINGUIST 736 15 Points**
**Issues in Advanced Morphology**
Focuses on competing theoretical models of morphology and includes application of one theory in an extended analysis.

**Philosophy**

**Stage I**

**PHIL 100 15 Points**

Mind, Knowledge, and Reality
Metaphysics deals with fundamental problems about the nature of the world and human beings, for example, questions about the existence of God, the nature of time, the relationship between mind and body and the nature of identity and the self. The theory of knowledge studies the sources, limits and justification of human knowledge and understanding as distinct from opinion or belief.

**PHIL 101 15 Points**

Introduction to Logic
Logic is the study of argument. This course aims to provide an understanding of central logical notions, such as consistency and inconsistency, logical truth, and, most importantly, what it means for an argument to be valid or invalid, sound or unsound. The course examines two main logical systems, propositional and predicate logic, and shows how these formal systems are used to analyse and evaluate arguments.

**PHIL 102 15 Points**

Introduction to Ethics
The philosophical study of ethics provides theoretical frameworks for thinking about questions such as ‘What makes an action right or wrong?’, and ‘What kind of person should I try to be?’ Several theories will be explored, evaluated, and applied to practical moral issues such as abortion, our treatment of other animals, tolerance regarding cultural differences, and obligations to future generations.

**PHIL 103 15 Points**

Freedom, Rights and Justice
Considers various questions concerning the relation between individuals and political communities such as: What principles of justice should communities adopt? What are rights? What limits can legitimately be placed on individual liberty? What is the source and nature of citizens’ obligations to obey the law? What makes a decision procedure democratic and why does it matter? These questions are considered in relation to the New Zealand context.

**PHIL 105 15 Points**

**PHIL 105G 15 Points**

Critical Thinking
Dialogue, argument and discussion are analysed. Distinctions are drawn between persuasive, logically good and materially good arguments. The focus is on well reasoned persuasive dialogue, and mistakes in persuasive reasoning. Topics include the point of an argument, strength of arguments, fallacious reasoning, relevance of reasons, and burden of proof.

**Stage II**

**PHIL 200 15 Points**

Philosophy of Mind
There are many philosophical problems concerning mental lives (in particular, human mental lives), how they are constituted, and what makes them possible - problems which have generated a vast literature and diverse important philosophical theories. Theories introduced and critically examined will include dualisms, but will mainly comprise forms of physicalism such as philosophical behaviourism, the identity theory and especially functionalist theories.

Prerequisite: 30 points in Philosophy or 60 points
Restriction: PHIL 320

**PHIL 204 15 Points**

Greek Philosophy
An introduction to some of the important figures in ancient philosophy and the issues with which they were concerned. The work of the Presocratics, Plato, and Aristotle will be explored, with a detailed discussion of the philosophical system of either Plato or Aristotle and its importance in the history of philosophy.

Prerequisite: 30 points in Philosophy, or EUROPEAN 100 and 15 points in Philosophy

**PHIL 205 15 Points**

Community, Society and Rights
Addresses a variety of topics in political philosophy such as: the political theories of Locke and Hobbes; the nature of rights and rights-holders; sovereignty; strategies for...
securing stable and just societies between people with significantly different moral, political and cultural views; and the relationship between individuals and communities. Topics will be related to contemporary political issues in New Zealand and, in particular, to the Treaty of Waitangi.

Prerequisite: 30 points in Global Politics and Human Rights, Philosophy or Political Studies or Politics and International Relations

PHIL 207 15 Points

Philosophy of Religion
A study of the relationship between reason and faith; is belief in the Judeo-Christian God reasonable? Topics include: the problem of evil, the meaningfulness of religious language, alternative concepts of God, Hume on miracles, and Kierkegaard and William James on faith and reason.

Prerequisite: 30 points in Philosophy
Restriction: PHIL 327

PHIL 209 15 Points

19th-Century European Philosophy
Examines key figures in nineteenth-century European philosophy, including Arthur Schopenhauer, Friedrich Nietzsche, Søren Kierkegaard, and Karl Marx. Considers alternative reactions to the human condition, either by minimising suffering and seeking tranquillity, by embracing the pain that life contains and continuing to struggle for greatness, by aiming to experience one's true individuality, or by working to establish a non-exploitative social community.

Prerequisite: 30 points in Philosophy or EUROPEAN 100 and 15 points in Philosophy
Restriction: PHIL 329

PHIL 210 15 Points

Applied Ethics
Philosophical analysis and discussion of contemporary moral issues, such as abortion, euthanasia, reverse discrimination, sex work, punishment and the ethics of charity.

Prerequisite: PHIL 102, or 30 points in Philosophy, or 30 points at Stage I in Social Science for Public Health
Restriction: PHIL 313

PHIL 212 15 Points

Philosophy of the Arts
Considers a range of issues debated by contemporary philosophers concerning the origins, function, definition, ontology, presentation, interpretation, appreciation, expressiveness, representational character, and value of art. Related and applied topics, such as the status of coloured movies, the status of artistic fakes, and the paradox of our enjoying tragedies are also discussed.

Prerequisite: 30 points in Philosophy or 90 points
Restriction: PHIL 332

PHIL 216 15 Points

Modal Logic
An introduction to modal logic, which is a variation of the system of predicate logic studied in PHIL 101. Modal logic is well-suited for studying philosophically important concepts such as necessity, time, knowledge, vagueness, action and obligation. It is also used in computer science for studying the behaviour of programs and is recommended as preparation for studying logic at Stage III.

Prerequisite: PHIL 101

PHIL 217 15 Points

Philosophy of Law
Themes in contemporary Western philosophy of law, relating to debates between liberal and non-liberal conceptions of law, including questions about the nature of legal rules, legal reasons and the relationship between law and morality. Major positions in legal theory will be covered, from legal positivism to critical legal studies.

Prerequisite: 30 points in Philosophy or 90 points
Restriction: PHIL 337

PHIL 218 15 Points

Problems in Epistemology
Epistemology is the study of knowledge, rationality, belief and related topics. This course will give an overview of epistemology but will focus on three main issues: foundationalism versus coherentism, internalism versus externalism and replies to scepticism.

Prerequisite: 30 points in Philosophy
Restriction: PHIL 338

PHIL 222 15 Points

Intermediate Logic
Natural deduction for propositional and predicate logic; introductory metalogic and related topics in formal logic.

Prerequisite: PHIL 101

PHIL 228 15 Points

Special Topic

PHIL 250 15 Points

Philosophy and the Environment
Philosophical questions relating to the environment and our use of it, such as the following: Do we have obligations to future generations, especially concerning preservation of the environment? What are our moral and epistemic responsibilities regarding climate change and other environmental issues? Does nature have intrinsic value? Is it better to live in a natural world or a virtual world.

Prerequisite: 30 points in Philosophy or 60 points
Restriction: PHIL 351

PHIL 260 15 Points

Philosophy of Science
What makes science a distinctive way of discovering knowledge about our world whether natural, biological or social? Ever since science started in Ancient Greece, a number of different theories about the worldview, methods and rationality of science have been proposed that distinguish it from religion, pseudo-science and myth. The course examines some of these accounts of the nature of science.

Prerequisite: 30 points in Philosophy or 60 points
Restriction: PHIL 360

PHIL 261 15 Points

Metaphysical Structures of the World
Metaphysics attempts to give a quite general picture of the nature and structure of the world, and particularly
investigates philosophical problems which thereby arise. Science, common sense, religions and cultures all presuppose metaphysical worldviews. Traditional metaphysical problems concern laws, causation, time, space, substance, identity, attributes and universals, free will, reality, existence etc. Course topics will be selected from such traditional problems. 

Prerequisite: 30 points in Philosophy or 60 points
Restriction: PHIL 361

PHIL 263 15 Points

Philosophy of Biology

Examines philosophical and conceptual issues in the life sciences. Topics may include the units and levels of selection, adaptationism, the evolution of altruism, biology and ethics, sociobiology and evolutionary psychology, cultural evolution, evolution versus creationism, and the origin and nature of life.

Prerequisite: 30 points in Philosophy or 60 points
Restriction: PHIL 363

PHIL 268 15 Points

Ethical Theory

Philosophical study of moral theory, in both normative ethics and meta-ethics. Topics covered may include: accounts of well-being such as hedonism, preference theory, and objectivism; theories of right action such as consequentialism and contractualism; the demandingness of morality; the role of intuitions in moral theory; and the status and justification of moral theories.

Prerequisite: 30 points at Stage I in Philosophy or any 60 points passed from the BA or 30 points in Global Politics and Human Rights
Restriction: PHIL 368

Stage III

PHIL 301 15 Points

Philosophy for Children

Provides a thorough practical grounding in facilitation of philosophical communities of inquiry, and in the construction of materials to stimulate philosophical inquiry. Opportunities for classroom practice in co-operating primary schools will be provided to participants who are not classroom-based.

Prerequisite: 60 points in Philosophy
Restriction: PHIL 701

PHIL 302 15 Points

Medieval Philosophy

A detailed introduction to either the work of a leading medieval philosopher, for example Augustine, Abaelard, Scotus or Ockham, or to one or more of the topics which were of interest to medieval philosophers. The course aims to show how understanding medieval philosophy is essential for the history of Christian thought and philosophy up to modern times.

Prerequisite: 30 points at Stage II in Philosophy, or EUROPEAN 100 and 15 points at Stage II in Philosophy

PHIL 306 15 Points

Language, Truth and Meaning

Examines the relationship between language, thought, and reality. Topics include the nature of existence and nonexistence; the linguistic turn in analytic philosophy; theories of reference, meaning, and truth; the relation between meaning, necessity, and the a priori; scepticism about meaning and reference. (PHIL 101 offers useful background, but the course is intended to be accessible to students without a formal background in logic.)

Topics in Applied Logic

A selection of topics in applied logic such as: modal logic (the logic of necessity and possibility), temporal logic (the logic of time), dynamic logic (the logic of change), and epistemic logic (the logic of knowledge and belief, including the logic of belief revision).

Prerequisite: 15 points from PHIL 222, 216 or 266

PHIL 320 15 Points

Philosophy of Mind

There are many philosophical problems concerning mental lives (in particular, human mental lives), how they are constituted, and what makes them possible – problems which have generated a vast literature and diverse important philosophical theories. Theories introduced and critically examined will include dualisms, but will mainly comprise forms of physicalism such as philosophical behaviourism, the identity theory and especially functionalist theories.

Prerequisite: 30 points at Stage II in Philosophy or 30 points from HISTORY 240, PHIL 260, SCIGEN 201
Restriction: PHIL 200

PHIL 323 15 Points

Philosophy of Logic

An introduction to philosophical logic, covering at least three of the following topics: use and mention, language and logic, argumentation theory, propositions and sentences, conditionals, disjunctions, and existence and quantification.

Prerequisite: PHIL 222
Restriction: PHIL 223

PHIL 327 15 Points

Philosophy of Religion

A study of the relationship between reason and faith; is belief in the Judaeo-Christian God reasonable? Topics include: the problem of evil, the meaningfulness of religious language, alternative concepts of God, Hume on miracles and Kierkegaard and William James on faith and reason.

Prerequisite: 30 points at Stage II in Philosophy
Restriction: PHIL 207

PHIL 332 15 Points

Philosophy of the Arts

Considers a range of issues debated by contemporary philosophers concerning the origins, function, definition, ontology, presentation, interpretation, appreciation, expressiveness, representational character, and value of art. Related and applied topics, such as the status of colourised
movies, the status of artistic fakes, and the paradox of our enjoying tragedies are also discussed. 

Prerequisite: 30 points at Stage II in Philosophy or Transnational Cultures and Creative Practice  
Restriction: PHIL 212

PHIL 337  
15 Points  
Philosophy of Law  
Themes in contemporary Western philosophy of law, relating to debates between liberal and non-liberal conceptions of law, including questions about the nature of legal rules, legal reasons and the relationship between law and morality. Politics and International Relations

Stage I

POLITICS 106 15 Points
Global Politics
An introduction to the study of international relations. The focus is on how international organisations, states and non-state actors raise and address global challenges such as security and human insecurity, humanitarian intervention, global trade and finance, development and poverty, environmental degradation, warfare, and respect for human rights. The course is informed by and introduces a range of international relations theories.

POLITICS 107 15 Points
POLITICS 107G 15 Points
New Zealand Politics
An introduction to understanding who governs New Zealand and in whose interests. Topics include national identity, institutions of government, leadership, voting and elections, the place of Māori within the political system, parties and political participation. The course draws on current research in NZ politics and provides knowledge that can be applied
to a variety of careers, including law, business and public service.

**POLITICS 109**
**Foundations of Western Politics and Law**
15 Points

An examination, via the works of selected major European thinkers from Ancient Greece to nineteenth-century Britain, of ideas central to the western tradition of political thought: justice, law, liberty, power, rights, citizenship, the rights of women, and the right to resist governments. Thinkers studied include Plato, Machiavelli, Hobbes, Locke, Rousseau, Wollstonecraft, Mill and Marx.

### Stage II

**POLITICS 201**
**Globalisation and International Organisations**
15 Points

Examines the relationship between globalisation and international relations. Investigates recent developments of globalisation in view of the rise and fall of great powers, placing globalisation against the backdrop of the school of liberalism in international relations theory, and studies the role played by international organisations.

Prerequisite: 30 points at Stage I in Political Studies or Politics and International Relations or 30 points in either Global Politics and Human Rights or International Relations and Business

Restriction: POLITICS 348

**POLITICS 203**
**Special Topic**
15 Points

Prerequisite: 30 points at Stage I in Political Studies or Politics and International Relations

**POLITICS 209**
**Modern Political Thought**
15 Points

Examines political theory in the twentieth and twenty-first centuries. Explores interactions between political theory and influential macro-political developments in democratisation and justice, the environment, gender and culture, war and humanitarian intervention, post-colonialism and economic globalisation.

Prerequisite: 15 points at Stage I in Political Studies or Politics and International Relations or 30 points in the BA

**POLITICS 210**
**Special Topic**
15 Points

Prerequisite: 30 points at Stage I in Political Studies or Politics and International Relations

**POLITICS 211**
**Politics of China**
15 Points

An introduction to China’s domestic politics, emphasising changes since 1978. The course explores topics such as political succession; the cadre system and political decision-making at the central, provincial, and local levels; economic development; popular religion and the state; NGOs and the non-state sector; nationalism and ethnic diversity; the role and relevance of ideological legacies; and institutional innovation and authoritarian survival.

Prerequisite: 30 points at Stage I in Political Studies or Politics and International Relations, or POLITICS 106 and ASIAN 100

**POLITICS 214**
**Democracy in Theory and Practice**
15 Points

Examines the theory and practice of democratic politics. Specific questions include how democracies try to reconcile freedom and equality, and the relations between democracy, nationalism and citizenship. Practical topics include judicial review and the rule of law, referendums and the ‘tyranny of the majority’, and issues in political representation, including Māori representation.

Prerequisite: 15 points at Stage I in Political Studies or Politics and International Relations and 30 points in the BA, or 45 points in the BGlobalSt

**American Politics and Public Policy**
15 Points

An overview of structures and processes in American politics and policy. Topics include American political development, elements of civil society, the machinery of government, and contemporary politics and policy.

Prerequisite: 30 points at Stage I in Political Studies or Politics and International Relations, or POLITICS 106 and 30 points in Global Politics and Human Rights

Restriction: POLITICS 319

**POLITICS 222**
**Public Policy: Actors, Processes and Politics**
15 Points

Government policy choices determine the taxes we pay, the resources we consume and the wars we fight. This course provides an introduction to policy studies together with a conceptual tool-kit for understanding and evaluating public policies. It poses questions about the relevance of different actors and instruments in a series of important substantive policy areas: health and food, the environment, foreign relations, (un)employment, crime and the economy.

Prerequisite: 30 points at Stage I in Political Studies or Politics and International Relations or Māori Studies or MĀORI 130, or 30 points at Stage I in Social Science for Public Health

**POLITICS 229**
**Mana Māori Motuhake / Māori Politics and Public Policy**
15 Points

An introduction to Māori politics. Topics include the Treaty of Waitangi, the politicisation of identity, sovereignty and self-determination, representation, globalisation and the Māori economy, Māori development and Māori media. Some contemporary and comparative indigenous policy issues will be discussed.

Prerequisite: 30 points at Stage I in Political Studies or Politics and International Relations or Māori Studies, or any 60 points

**POLITICS 232**
**New Zealand Parties, Leaders and Elections**
15 Points

An examination of New Zealand’s political parties and the changing party system. Topics will include: the emergence of multi-party politics, candidate selection methods, parties and the media, the controversy over party finance and campaign funding, the so-called ‘Americanization’ of modern electoral campaigns, and changing patterns of electoral participation and support.

Prerequisite: 30 points at Stage I in Political Studies or Politics and International Relations

Restriction: POLITICS 352

**POLITICS 233**
**Politics, Media and Public Sphere**
15 Points

Critics voice disquiet about the future of journalism and political deliberation, and the lack of a unified public space where citizens can engage seriously with matters of collective concern. The course surveys the changing public sphere over time, from its early-modern emergence to the challenges of tabloid news and online fragmentation in contemporary media culture.

## Stage I

### SOCIO 100 15 Points
**Issues and Themes in Sociology**
Introduction to sociology as a discipline and a review of some of its internal debates. Topics include: social class, gender, globalisation, power, sexual identity and family. Draws on material from a range of societies.

### SOCIO 101 15 Points
**Understanding Aotearoa New Zealand**
Provides an introduction to the sociological analysis of New Zealand society. Looks at familiar events, institutions, social processes from a sociological point of view and offers ways to understand them in new and different ways. Focuses on the structure of New Zealand society and on social and political changes which affect the lives of New Zealanders and shape their society.

### SOCIO 103 15 Points
**New Zealand Social Policy and Social Justice**
Provides an overview of key contemporary social policy issues within the context of globalising economic processes and continuing gendered and racialised divisions. Discusses the way in which debates around social policy are constructed and the implications this has for social justice. Case studies may include food and health, technology, indigeneity and children.

### SOCIO 105 15 Points
**Cultural Studies and Society**
A cultural studies approach to social life focuses on the way we experience the world, taking account of what we see, what we hear, what we consume and how we communicate. Sociological theory will be explored through investigating different cultural forms including film, advertising, art, social media, sport, and video games.

## Stage II

### SOCIO 200 15 Points
**Sociological Theory**
An introduction to the major themes of social theory. The focus is on the analyses of modern society to be found in the works of classical and contemporary social analysts. 
Prerequisite: SOCIO 101 in Sociology with a minimum B+ pass

### SOCIO 203 15 Points
**Social Reality and Ideology**
Sociologists construe ideology as ideas that conceal social inequalities. This course explores the meaning of ideology and some of its related concepts, such as hegemony, discourse, and subjugation. It then critically analyses some of the most pervasive contemporary ideologies. Although not exhaustive, examples include beliefs about personal responsibility, corporate job creators, faith in technology, and crime and deviance.

### SOCIO 206 15 Points
**Sociology for Auckland**
Auckland is located in Aotearoa New Zealand but is not always of Aotearoa New Zealand. By virtue of geography, history, and size, Auckland is a unique social setting, with an uneasy relationship to the rest of Aotearoa New Zealand (and beyond). This course examines the differences in class, ethnicity, gender, sexual orientation, and other social factors that make Auckland “special”.
Prerequisite: SOCIO 101 in Sociology with a minimum B+ pass
Restriction: SOCIO 106

### SOCIO 207 15 Points
**Sociology of Gender and Families**
Focuses on the interrelationship between gender, sexuality and families in New Zealand and other Western societies. Through an examination of important moments in the life course of families – for example, partnering and parenting – it explores changes and continuities in the gendered norms, identities, practices and patterns that characterise contemporary family life.
Prerequisite: 30 points in Sociology or Gender Studies or 60 points passed
Restriction: SOCIO 214, SOCIO 222

### SOCIO 208 15 Points
**Economy and Society**
Examines the changing relations between work and life outside of paid employment. Particular attention is paid to new forms of expropriation that profit from claiming private ownership of collective effort, ideas and cultural forms. These developments are crucial to understanding and contesting social inequality, globalisation, organisational restructuring and new technologies. Course material is drawn from international literatures and is grounded in an understanding of contemporary New Zealand.
Prerequisite: 30 points at Stage I in Sociology or 15 points at
Stage I in Sociology with a minimum B+ pass, or 30 points in International Relations and Business

**SOCIOL 210**
15 Points

Colonisation, Globalisation and Social Justice
Charts the political, economic, cultural and ecological consequences of imperialism, colonisation, globalisation, aid and development, up to and including the IMF/World Bank's neoliberalism and structural adjustment programme. It pays particular attention to violence (physical, psychological and ideological), environmental consequences and health impacts in these contexts.

Prerequisite: 30 points at Stage I in Sociology or 15 points at Stage I in Sociology with a minimum B+ pass or SPANISH 103, or 30 points in Global Politics and Human Rights

**SOCIOL 211**
15 Points

Sociology of Popular Culture
Popular culture appears to be everywhere, but what political and social effects might all this popular entertainment have on us? This course seeks to answer such questions through a sociological interpretation of popular culture as both an indicator of social change and as a location of meaning and significance. Topics include reality TV, celebrities, consumption, music, and technology.

Prerequisite: 30 points at Stage I in Sociology, or 15 points at Stage I in Sociology with a B+ or higher, or 30 points from COMMS 100, FTVMS 100, 101, MEDIA 101, or 103 points from Comparative Literature

**SOCIOL 213**
15 Points

Ethnicity and Identity
Charts the development of the concepts of racial, national, ethnic and indigenous identities in relation to the histories of modernity and colonisation and then uses these concepts to analyse a range of contemporary issues of identity and belonging.

Prerequisite: 30 points at Stage I in Sociology or 15 points at Stage I in Sociology with a minimum B+ pass

**SOCIOL 228**
15 Points

Special Topic: Sociology of Migration
Examines international migration in the context of the modern world economy, its impact on global cultures and its relationships with ideologies such as nationalism and racism. The focus is on the Pacific Rim region, but in the context of, and in comparison with, other parts of the world.

Prerequisite: 30 points at Stage I in Sociology or 15 points at Stage I in Sociology with a minimum B+ pass

**SOCIOL 229**
15 Points

Environmental Sociology
Environmental sociology provides insight into the complex social processes that define, create and even threaten our natural environment. This course gives tools with which to think sociologically about environmental issues, such as understanding how environmental issues come to be seen as environmental problems, and how political, cultural, and economic factors have come to shape our interaction with the natural environment.

Prerequisite: 30 points at Stage I in Sociology or 30 points from ENVSCI 101, 201, GEOG 102, 205

---

**Stage III**

**SOCIOL 300**
15 Points

Sociology of Science and Technology
A survey of theoretical and practical approaches to understanding the relationship between technology and society. Topics studied include: technology and social theory, technology and subjectivity, the politics of artefacts and the impacts of new social media.

Prerequisite: 30 points at Stage II in Sociology

**SOCIOL 301**
15 Points

Critical Theory and Society
Critical theory seeks to understand the multiple contradictions of society and to offer roadmaps for progressive social change. This course explores foundational ideas in the tradition of critical theory and in contemporary critical thought. Critical theories are situated in the social and historical contexts from which they arise and are scrutinised for their relevance to contemporary struggles for social justice.

Prerequisite: SOCIOL 200 or 30 points above Stage I in BA or Global Studies courses

**SOCIOL 305**

Researching Social Problems
Develops skills in integrating theory and methods so that students can critically engage with social problems using a sociological lens both inside and outside the university.

Prerequisite: 30 points at Stage II in Sociology or 60 points passed at Stage II from BA courses

**SOCIOL 315**
15 Points

Law, Inequality and the State
Examines, in a comparative mode, how law as a set of social relations and categories can both create and remedy inequalities of gender, race, and class.

Prerequisite: 30 points at Stage II in Sociology or 15 points from CRIM 201, 202 or 30 points at Stage II in Global Politics and Human Rights

**SOCIOL 316**
15 Points

Critical Theories of Schooling
Compulsory schooling in western society has traditionally been seen as a significant instrument of socialisation, progression and economic advancement for young people. The course will engage students in ideas which challenge this view by drawing on critical theories such as Labelling, Marxist, Foucauldian, and Anarchist theory, and exploring topics including colonialism, patriarchy, racism, and the social control of youth.

Spanish Sound Structure
Provides advanced Spanish learners with a solid foundation in Spanish phonetics and phonology. Spanish sounds are explained and practiced in order to minimise native-language transfer. Students learn articulatory phonetics, phonetic transcription, and sound-pattern recognition,
skills that enable them to discern native pronunciations and discover the principles that underlie the Spanish sound system.  
Prerequisite: 15 points from SPANISH 201, 278, 319, 321, 377, 378  
Restriction: SPANISH 741

**SPANISH 342  15 Points**

*Spanish Word Formation*

An introduction to the formal study of Spanish words and the processes that generate them. Key morphological concepts explain how words may be related. The processes used to derive words and create grammatical variants will be analysed and practiced. Construction and deconstruction of words will be examined with reference to the enrichment of vocabulary.  
Prerequisite: 15 points from SPANISH 201, 278, 319, 321, 377, 378  
Restriction: SPANISH 742

**SPANISH 345  15 Points**

*Peripheric Cultures and Literatures*

Focuses on the study of peripheric cultures and literatures in the Hispanic world, historically marginalised by issues of language, ethnicity, and/or geopolitical positioning, which have excluded them from traditionally centralist, homogeneous and monolithic definitions of the nation.  
Prerequisite: SPANISH 201 or 278 or 319 or 321 or 377 or 378 and 15 points from SPANISH 202 or LATINAM 201 or 216  
Restriction: SPANISH 745

Accounting

Stage I

ACCTG 101  15 Points
Accounting Information
Business decisions require accounting information. Covers the role of accounting information and systems to support decision making, control, and monitoring in organisations. Examines general purpose financial statements and the analysis and interpretation of accounting information. Assesses investment opportunities using capital budgeting techniques and compares and evaluates alternative funding sources.

Prerequisite: ACCTG 102

ACCTG 151G  15 Points
Financial Literacy
People who understand the basic principles of finance are likely to get much more mileage out of their money – whether spending, borrowing, saving or investing – than those who do not. Develop an understanding of how to be in control of spending and saving; understand borrowing; make informed investment decisions; know broadly what to insure and what not to; recognise scams and consider whether money is the key to happiness.

Restriction: May not be taken by students with a concurrent or prior enrolment in Accounting or Finance courses

Stage II

ACCTG 211  15 Points
Financial Accounting
The study of financial accounting principles within New Zealand, to enable students to: (i) understand how they are developed and influenced; (ii) understand and apply New Zealand Financial Reporting Standards; (iii) report the results of complex business structures involving multiple entities and segments. Completing students will understand the role financial statements play in investment, analysis and contracting decisions, providing a base for advanced study and supporting other areas, particularly finance.

Prerequisite: ACCTG 102

ACCTG 221  15 Points
Cost and Management Accounting
Budgets and standards, costing systems, cost information for decision-making and control, performance appraisal, and contemporary related issues.

Prerequisite: ACCTG 102

ACCTG 222  15 Points
Accounting Information Systems
Encompasses the development and distribution of economic information about organisations for internal and external decision-making. Major themes include: objectives and procedures of internal control, the database approach to data management, data modelling, typical business documents and reports and proper system documentation through data flow diagrams and flowcharts.

Prerequisite: ACCTG 102, INFOSYS 110

Stage III

ACCTG 311  15 Points
Financial Accounting
Explanatory and prescriptive theories of accounting provide the context for an examination of the determinants of financial reporting practice in New Zealand with special reference to accounting for pensions, foreign currency, deferred tax and financial instruments. Issues in international accounting and professional ethics are also addressed.

Prerequisite: ACCTG 211

ACCTG 312  15 Points
Auditing
An introduction to the audit of financial statements. The objective of an audit is to add credibility to the information contained in the financial statements. Emphasises the auditor’s decision-making process in determining the nature and amount of evidence necessary to support management’s assertions. The end result of a financial statement audit is a report that expresses the auditor’s opinion on the fair presentation of the client’s financial statements.

Prerequisite: ACCTG 211 or 292, and INFOMGMT 296 or 294 or ACCTG 222

ACCTG 321  15 Points
Strategic Management Accounting
A study of the design of revenue and cost management systems to facilitate strategic decisions. This includes activity-based costing and activity-based management. The learning environment is student-centred with the seminar leader’s role being that of facilitator rather than lecturer. Students work not only as individuals but also in teams. The learning environment is a combination of lectures, case studies and related readings.

Prerequisite: ACCTG 221 or 291

ACCTG 322  15 Points
Performance Measurement and Evaluation
The design of performance measurement frameworks such as the Balanced Scorecard incorporating strategy maps and alignment principles. Methods of performance analysis will cover ratios, weighting systems and Data Envelopment Analysis. Evaluation principles and methods will include internal audit perspectives around project and programme evaluation, cost-benefit analysis, randomised control tests and value-for-money.

Prerequisite: Any 30 points at Stage II in Accounting or Finance

ACCTG 331  15 Points

Business

Stage I

BUSINESS 101 15 Points

Business and Enterprise 1

Businesses compete for ideas, customers, employees and capital. Entrepreneurs and managers make choices about how to create and capture value through innovation, differentiation of products and services, and how they utilise resources and organise activities. Explores frameworks for understanding how these choices are shaped by markets, technologies, government and society. Develops entrepreneurial thinking, management skills and professional capabilities needed in business.

Restriction: MGMT 101, BUSINESS 191

BUSINESS 102 15 Points

Business and Enterprise 2

Builds on BUSINESS 101 and further explores the frameworks
for understanding choices by entrepreneurs and managers. Continues to develop individual entrepreneurial thinking, management skills and professional capabilities needed for business success. Positions students to undertake disciplinary specialisations, informed by an understanding of the context and cross-functional nature of business.

Prerequisite: BUSINESS 101
Restriction: MGMT 101, BUSINESS 192

BUSINESS 151 15 Points
Communication in a Multicultural Society
Communication knowledge and skills are essential in business careers and for interpersonal and intercultural relationships. This course offers a theory-based approach combined with applied communication practices. BUSMBA 751  15 Points
Financial Management and Control
Covers the process of financial management within a corporation and explores how the analysis of a range of financial information can be used to gain insights which enhance managerial decision making. Examines how value can be created for shareholders and other stakeholders through investment and financing decisions.

BUSMBA 752  15 Points
Building Capabilities for Performance
Explores business strategies based on unique resources and capabilities, utilising perspectives from management and marketing. Develops skills to generate market intelligence, device strategies, manage intangible assets as well as relationships with external stakeholders.

BUSMBA 753  15 Points
Designing, Managing, and Improving Business Processes
Explores leading and organising intra- and inter-organisational processes and systems, for effective production and delivery of goods and services meeting customer needs. Considers uncertain and complex business environments, along with operations and supply chain management ideas and technologies.

BUSMBA 760  15 Points
Making Evidence-based Decisions under Uncertainty
Develops highly specialised knowledge about decision making within organisations. Requires the critical synthesis and appraisal of different types of expertise and evidence in informing management practice.
Prerequisite: 90 points from BUSMBA 701-753

BUSMBA 770  30 Points
Managing Entrepreneurial Growth Project
Provides a practical opportunity for participants to work with a New Zealand or international business in an advisory capacity to develop strategic recommendations for growth locally and internationally. Develops a hands-on multi-disciplinary approach to recognising, assessing, and marketing entrepreneurial opportunities for new products and services. An overseas fieldtrip is required to complete the course.
Prerequisite: BUSMBA 760 and 90 points from BUSMBA 701-753

Commercial Law

Stage I

COMLAW 101  15 Points
Law in a Business Environment
Decision makers in commerce and industry require an understanding of legal structures, concepts and obligations. Provides an introduction to the New Zealand legal system and the legal environment in which businesses operate, and also introduces legal concepts of property and the law of obligations, including detailed study of various forms of legal liability relevant to business.
Restriction: COMLAW 191

Stage II

COMLAW 201  15 Points
Commercial Contracts
Every business transaction involves a contract. Commercial Contracts examines the general principles of the law of contract including the process of formation of a contract, the interpretation of contractual terms and the various obstacles which may impede the enforceability of a bargain. Introduces the special features of contracts in digitally networked environments and issues relating to breach of contract and consumer protection.
Prerequisite: COMLAW 101 or 191

COMLAW 203  15 Points
Company Law
Companies are by far the most used vehicle for doing business and an understanding of the rules that govern them is essential for everyone involved in commerce and industry. Examines the nature of a company, incorporation and share capital, the concept of separate legal personality, how a company interacts with the world and the roles of the stakeholders in a company including directors and shareholders. A sound understanding will help decision makers to take the advantages of corporate structure while avoiding pitfalls and legal liability.
Prerequisite: COMLAW 101 or 191

Stage III

COMLAW 301  15 Points
Taxation
An introduction to the Income Tax Act and the Goods and Services Tax Act, with emphasis on developing an understanding of these types of tax as relevant to taxpayers. Specific topics include the nature of income, taxation of common types of income (such as wages, shares and land), the deduction and prohibition of various types of expenses, tax accounting issues (cash or accrual basis), provisional tax, rebates, PAYE system, tax returns and an introduction to GST.
Prerequisite: COMLAW 201 or 203

COMLAW 303  15 Points
Receiverships and Reconstructions
A business in difficulty may fail or it may be rehabilitated. Receiverships and Reconstructions looks at aspects of business failure and near failure including informal workouts, formal business rescue regimes, company receiverships and personal bankruptcy. Students will develop the skills and expertise to operate in these fields.
Prerequisite: COMLAW 203 or LAW 417

COMLAW 304  15 Points
Business Structures for Enterprises
Business advisers need to be familiar with a wide variety of business structures other than companies. Emphasis is on the most common of these including franchises, joint ventures, trading trusts, partnerships, unincorporated societies and State Owned Enterprises in order to ensure that advisers are familiar with their merits and legal consequences of utilising these structures.
Prerequisite: COMLAW 203

COMLAW 305  15 Points
Financial Markets Law
Businesses need investment to grow. Many raise finance from the securities markets, in particular by listing on the Stock Exchange. Topics include raising money from the public and the rules relating to insider trading, market manipulation, disclosure obligations, takeovers and listing on the Stock Exchange and will benefit investment advisors and anyone involved in the financial markets.
Prerequisite: COMLAW 203

COMLAW 306  15 Points
Marketing Law
Marketers are not free to say what they want. A variety of
laws and codes govern the claims made about goods and services and the ways in which they are presented and sold. Marketing Law covers consumer legislation, product distribution, advertisement regulation, branding, privacy and competition law. It builds skills in problem solving, decision making and written communication. 

Prerequisite: COMLAW 101, MKTG 201; or COMLAW 201 or 203; or COMLAW 101 and at least 30 points at Stage II

COMLAW 311 15 Points
Advanced Taxation
An advanced study of Income Tax and Goods and Services Tax, with emphasis on the important tax regimes applicable to business taxpayers and high-wealth individuals. Specific topics include corporate taxation, dividends and imputation, company losses and grouping, qualifying companies, trusts, partnerships, financial accruals, international taxation, the disputes procedure and penalties regime, and evasion and avoidance.

Prerequisite: COMLAW 203 and 301, or LAW 429 and LLB Part II
Restriction: LAW 409

COMLAW 314 15 Points
Employment Law
The success of a business depends on the maintaining of a productive relationship with its employees. Employment Law covers the legal principles governing the employment relationship. Specific topics include bargaining, personal grievances, enforcement of employment contracts, strikes and lockouts, the rules regarding holidays, and health and safety obligations.

Prerequisite: COMLAW 201 or 203; or COMLAW 101 and MGMT 223; or COMLAW 191 and MGMT 292 or 293 or BUSINESS 292 or 293

COMLAW 315 15 Points
Finance and Property Law
Examines the legal concepts of property and ownership which are central to securing repayment of debt. Major topics include types of security over personal and real property; statutory provisions regulating credit contracts and property rights; general principles relating to guarantees; legal aspects of commercial leasing; liability of professional advisers and aspects of unsecured lending.

Prerequisite: COMLAW 201 or 203 or PROPERTY 271

COMLAW 318 15 Points
Special Topic

COMLAW 320 15 Points
Intellectual Property and Innovation
Managers and entrepreneurs need to understand the legal rules governing the protection and commercialisation of innovative ideas and information in business. Topics covered include the role of copyright in a technological society, the importance of secrecy in protecting valuable ideas by way of patents and the common law, and the interaction of contract with elements of intellectual property.

Prerequisite: COMLAW 101 and at least 30 points at Stage II

COMLAW 321 15 Points
Special Topic

Postgraduate 700 Level Courses

COMENT 703
Commercialisation of Science and Technology
Addresses the research-business interface, commercialisation pathways and processes and how IP based projects are evaluated and assessed as they advance through stages of development with the objective of penetrating national and international markets. Examines the product development process and different technology transfer models including licensing, partnering, spin-outs and start-ups. Introduces related issues of market and competitor research, IP valuation, risk management, and the financing of different stages in the commercialisation process.

COMENT 704
Entrepreneurship for Science and Technology Ventures
Studies how entrepreneurs think and act in organising, motivating and leading high performance teams, and introducing and selling innovative science and technology-based products and services into national and international markets. Examines how entrepreneurs create and capture revenues and profits by recognising, assessing, and marketing opportunities for new products or services based on science and technology; developing new strategies and business models; validating markets; and selling into industrial enterprises and markets.

COMENT 705
Project in Commercialisation
A supervised project requiring the application of advanced knowledge and skills for the commercialisation of a creative application of science and technology. The commercialisation project will involve the identification and analysis of complex, open-ended problems and issues associated with commercialisation. A written commercialisation report will present findings and a plan for commercialisation. Projects
will be sourced from universities, CRIs and science and technology based enterprises. 

To complete this course students must enrol in COMENT 705 A and B, or COMENT 705

**COMENT 706**  
15 Points  
**Managing Innovative Processes**

Focuses on the core activities and practices associated with managing innovation, commercialisation and entrepreneurial processes such as internationalisation, collaboration, knowledge sharing, new product development, leading innovation and creativity, innovative organisation and project management.

**COMENT 707**  
15 Points  
**Elective Study**  
Topics approved by the Programme Director.

**COMENT 708A**

### Economics

#### Stage I

**ECON 151**  
15 Points  
**Understanding the Global Economy**

Economics affects our daily lives and the global environment in many ways. Through the media we are constantly made aware of price increases, interest rate changes, exchange rate movements and balance of payments problems, growth and recessions, standard of living comparisons, regional trading agreements. What does it all mean and how does it all work?

**Restriction**: ECON 101, 111, 152, 191

**ECON 152**  
15 Points  
**Principles of Economics**

Analysis of issues that affect our daily lives, including pricing decisions by firms and their impact on our cost of living; game theory and strategic decision-making; tackling problems of pollution and global warming; and how governments use monetary and fiscal policies to stimulate economic growth and address unemployment and inequality.

**Prerequisite**: ECON 151 or 16 credits in NCEA Level 3 Economics with a Merit average including standard 91399 (Demonstrate understanding of the efficiency of market equilibrium), or a scholarship pass in Economics, or B grade in CIE Economics or 4 out of 7 in Economics (HL) in IB

**Restriction**: ECON 101, 111, 191

---

### Stage II

**ECON 201**  
15 Points  
**Microeconomics**

Study of the allocation of scarce resources among competing end uses. Intermediate-level analysis of the economic behaviour of individual units, in particular consumers and firms. Although the focus is on perfectly competitive markets, attention is also given to other types of markets. Analysis also includes concepts of expected utility and uncertainty, and welfare economics.

**Prerequisite**: ECON 101 or 152 or 180 points in Mathematics or Statistics with a GPA of 5 or higher and a B or higher in MATHS 130, 150 or 153

**ECON 202**  
15 Points  
**Managerial Economics**

Applies economic principles to achieve better management and strategic decisions in real-world business situations. Covers costs and investment, transaction costs and vertical integration, behavioural economics, incentives and agency problems, bargaining and non-linear pricing, product bundling and product differentiation, entry deterrence and regulation of business. Uses theory, case studies and worked problems to develop and reinforce understanding.

**Prerequisite**: 15 points from ECON 101, 152, 191, or Department approval

**ECON 211**  
15 Points  
**Macroeconomics**

Provides an introduction to the dynamic microfoundations of macroeconomics, and demonstrates how we can utilise these foundations (i) to understand the trends and fluctuations of macroeconomic aggregates like national output, unemployment, inflation and interest rates, and (ii) to predict the outcome of alternative government policies related to current economic problems of New Zealand and the rest of the world.

**Prerequisite**: ECON 111 or 152 or 180 points in Mathematics or Statistics with a GPA of 5 or higher and a B or higher in MATHS 130, 150 or 153

**ECON 212**  
15 Points  
**Game Theory**

An introduction to the fundamental concepts of non-cooperative and cooperative game theory: the concept of strategy; two person constant sum non-cooperative games and the minmax value; n-person non-cooperative games and Nash equilibrium; examples and applications in auctions, bargaining and other economic models, political science and other fields; the idea of backward induction and sub-game perfection; introduction to games in coalitional form; the core and the Shapley value.

**Prerequisite**: 15 points from ECON 101, 151, 152, 191, MATHS 108, 130, 150, 153, PHIL 101

**ECON 221**  
15 Points  
**Introduction to Econometrics**

An introduction to model building and empirical research methods in economics. Emphasises the use and interpretation of single equation regression techniques in formulating and testing microeconomic and macroeconomic hypotheses. Cross-section and time series modelling, as well as qualitative choice models will be covered. There will be examples of the uses of econometrics in a variety of areas through statistical analysis, problem solving and econometric estimation using a statistical computer package.

**Prerequisite**: 15 points from ECON 152, MATHS 108, 130, 150, 153, STATS 101, 102, 108, 125, 191
ECON 232 15 Points
Development of the International Economy
The development of the international economy and changing economic relationships that have taken place since the late nineteenth century. The causes and consequences of growing interdependency among nations are examined. Changing patterns of trade and migration of capital and labour are analysed, as are cyclical and secular trends in output, employment and investment. The focus is on the development of institutions as well as the economic and social conditions that induce and validate change. 
Prerequisite: ECON 111 and 101 or 191, or ECON 152

ECON 241 15 Points
International Economics
An introduction to issues in international trade and finance. Important issues for the international economy and the development of conceptual frameworks for understanding and analysing these issues will be discussed. Topics include: theories of international trade, exchange rate regimes, international capital flows and speculation, multilateral and regional trade agreements, issues in trade policy and the political economy of trade policy. 
Prerequisite: ECON 111 and 101 or 191, or ECON 152

ECON 271 15 Points
Special Topic
Prerequisite: ECON 111 and 101 or 191, or ECON 152

Stage III

ECON 301 15 Points
Advanced Microeconomics
Advanced treatment of aspects of consumer theory, producer theory, and game theory. Applications of this basic theory to the analysis of some topics in uncertainty, contracts, auctions, oligopoly, and information economics. 
Prerequisite: ECON 201 and 15 points from MATHS 108, 130, 150, 153

ECON 302 15 Points
Economics of Labour Markets
The application of economics to issues that confront policy makers all over the world. Covers the workings of labour markets and teaches how to use economic frameworks to judge the appropriateness of education, training, employment, taxation, immigration and other labour market policies. 
Prerequisite: ECON 201

ECON 303 15 Points
Law and Economics
Economic analysis of law and organisation, and the application of economics to property rights, patents and natural resource management. Includes: contracts, transaction cost analysis, classical contracting, long-run contracts, enforcement, role of market forces, risk aversion, remedies for breach, economic theory for torts, negligence rules, strict liability, multiple torts, product liability. Special topics may include: crime, insider trading, and business law. 
Prerequisite: ECON 201

ECON 304 15 Points
Firms and Markets
An introduction to Industrial Organisation, the analysis of markets with imperfect competition. Industrial Organisation is concerned with the interdependence of market structure, firm behaviour and market outcome. Basic concepts of game theory will be systematically introduced and applied to study strategic firm behaviour in a variety of general and more industry-specific market settings. In each case, we will analyse the implications of the market behaviour for consumers and society and explore the potential role for public policy with instruments like regulation, competition policy and patent policy. 
Prerequisite: ECON 201 and 15 points from MATHS 108, 130, 150, 153

ECON 311 15 Points
Advanced Macroeconomics
Designed to teach students modern macroeconomic analysis and focuses on the standard dynamic general equilibrium model, which is central to current macroeconomic research. Students are given a careful introduction to the overlapping generations version of this model and shown how this model can be adapted in different ways to address a wide variety of economic issues and policy questions. 
Prerequisite: ECON 211 and 15 points from MATHS 108, 130, 150, 153

ECON 321 15 Points
Advanced Econometrics
A study of the modern literature on exchange rate markets, exchange rate determination and the implications of exchange rate movements for various economic issues. Students will gain an understanding of why exchange rates change, of financial market arrangements, and

ECON 341 15 Points
International Trade
The main theories of international trade in goods and services, and of international movements of capital and labour. Partial equilibrium and general equilibrium analysis of the major instruments of trade policy, their economic effects, and the issues created by their use in practice. The economics of regional trading arrangements, such as free trade areas, customs unions and common markets. 
Prerequisite: ECON 201

ECON 343 15 Points
East Asian Growth and Trade
A study of the economic factors underlying the dynamic trade and growth performance of the major economies of contemporary East Asia, and of the impact of their development on New Zealand’s international trading environment. Study of individual East Asian economies is strongly emphasised. 
Prerequisite: ECON 201 or 232 or 241

ECON 351 15 Points
Financial Economics
A study of the modern literature on corporate finance, investments and derivative securities. An analysis of consumption and investment decisions in the presence of time and risk, asset pricing models and market efficiency. The term structure of interest rates and various issues in debt and equity financing. The use of derivative securities, eg, forwards and/or options to manage exchange rate risk. 
Prerequisite: ECON 201 and 15 points from MATHS 108, 130, 150, 153

ECON 352 15 Points
International Finance
A study of the modern literature on exchange rate markets, exchange rate determination and the implications of exchange rate movements for various economic issues. Students will gain an understanding of why exchange rates change, of financial market arrangements, and
of the reasons for, and implications of, recent events in international financial markets.

Prerequisite: ECON 201 and 211

ECON 361 15 Points
Public Economics
A study of the role of the state in a modern mixed economy; its roles, measurement and accountability. Topics include: welfare theory, theory of public goods, cost-benefit analysis, budgetary issues, taxation theory and practice, insurance markets, and social insurance.

Prerequisite: ECON 201

ECON 372 15 Points
Energy and Environmental Economics
An overview of the theory and empirical practice of economic analysis as it is used in evaluating energy and environmental problems. Topics covered include natural resource economics, as well as electricity and oil markets. Other topics include environmental policy (pollution and economic efficiency); analysis of economic instruments, such as tradable property rights and pollution taxes; the allocation of non-renewable and renewable resources; and contemporary issues of growth, sustainable development and climate change.

Prerequisite: ECON 201

ECON 374 15 Points
Special Topic

ECON 381 15 Points
Foundations of Economic Analysis
A grounding in the quantitative methods of economic analysis with application to commonly used formal models in microeconomics, macroeconomics and econometrics. The emphasis will be on the unifying structure of the theory with a systematic treatment of the mathematical techniques involved. Preparation for continuing study in economic theory and econometrics.

Prerequisite: ECON 201

Postgraduate 700 Level Courses

ECON 701 15 Points
Microeconomic Theory
Advanced treatment of traditional topics from “core” microeconomics, including consumer theory and duality, expected utility theory, general equilibrium, game theory and the economics of information.

ECON 702 15 Points
Industrial Organisation
Concerned with interdependence of firm behaviour, market structures and implications for consumers and society. Concepts from game theory are introduced and applied to study strategic firm behaviour in a variety of general and more specific market settings; Coverage includes the potential role for public policy with instruments like competition policy, patent policy and the regulation of public utilities such as telecommunication, electricity, water and gas.

ECON 711 15 Points
Macroeconomic Theory and Policy
A core course in macroeconomic theory which addresses fundamental problems including economic growth, consumption and saving decisions, investment, unemployment, and fiscal policies in the context of mainstream models of the economy.

ECON 712 15 Points
Topics in Money, Banking and Finance
An advanced treatment of macroeconomics focusing on contemporary issues that have been brought into sharp relief since the global financial crisis. Topics include models of financial crises, the role of financial markets and liquidity, sovereign debt, the relationship between financial intermediation and the macroeconomy, and the (unorthodox) way in which central bank policy is now conducted.

ECON 721 15 Points
Econometrics 1
Core econometrics including theory and applications. The development of the classical linear regression model and extensions to the most general case. Applications to types of linear models involving cross-section and time-series data, and simultaneous equation models. The method of maximum likelihood, other extrema estimators and associated methods of testing.

ECON 723 15 Points
Econometrics 2
An overview of time series econometrics, designed to introduce a range of material in stationary and nonstationary time series including: modern model determination methods, unit root and co-integration theory, non-linear time series analysis and continuous time models. Students will be introduced to practical time series forecasting methods.

ECON 741 15 Points
Topics in International Trade
Advanced treatment of selected developments in international trade theory including the link between trade and development and contemporary issues relating to trade strategies and structural adjustment policies with an emphasis on developing countries.

ECON 742 15 Points
Trade Policy
Economic analysis of current trade policy issues, with an emphasis on the theoretical, empirical and policy dimensions of international trade negotiations in the WTO, and the spread of preferential trading arrangements such as free trade areas.

ECON 751 15 Points
Advanced International Finance
A study of open-economy macroeconomic topics (theoretic, empirical and policy oriented), including models of exchange rate behaviour.

ECON 761 15 Points
Public Economics and Policy
Fundamental theorems of public economics, market failure, public choice theory, and distribution; the role of the economist in the making of public policy in a modern mixed economy, ideologies and critiques of the market model, the economics of the welfare state, welfare and tax reform in New Zealand, and applied poverty issues.

ECON 771 15 Points
Economics of Development
Contemporary issues in development economics. Topics include: the way economists’ approaches to leading development issues have evolved to the present; and leading development issues, including sources of economic growth, the role of population, human capital and innovation, labour and migration, international trade and foreign aid, and
strategies for sustainable economic development. There is emphasis on the ‘Newly Industrializing Countries’ and other Third World developing countries.

ECON 773 15 Points

Finance

Stage II

FINANCE 251 15 Points
Financial Management
Focuses on practical aspects of corporate finance. Topics covered include: concepts of value creation, risk and required rates of return, financial maths, capital budgeting, capital structure and dividend policies.
Prerequisite: ACCTG 102 or 192

FINANCE 261 15 Points
Introduction to Investments
Markets for shares, fixed income securities, options and futures. Methods of valuing shares, fixed income securities, options, and futures. Simple techniques of hedging risk. Portfolio diversification. Portfolio evaluation.
Prerequisite: FINANCE 251 or 180 points in a BSc major in Mathematics or Statistics with a GPA of at least 5 and at least a B in MATHS 130, 150 or 153

Stage III

FINANCE 351 15 Points
Advanced Financial Management
A rigorous study of advanced capital budgeting procedures, more difficult aspects associated with capital structure and dividend decisions, mergers and acquisitions. Case study applications of financial management are used. A continuation of the material introduced in FINANCE 251.
Prerequisite: FINANCE 251

FINANCE 361 15 Points
Modern Investment Theory and Management
Portfolio theory and equilibrium asset pricing models and empirical tests. Portfolio management (forecasting, construction, administration and evaluation) including issues relating to fixed interest and international equity investment. A continuation of the material introduced in FINANCE 261.
Prerequisite: FINANCE 261 and MATHS 208 or 250

FINANCE 362 15 Points
Risk Management
Examines theoretical and practical aspects of risk management with an emphasis on the effective use of futures, options and other financial derivatives to control market risk exposure. Reviews no-arbitrage methods used to value financial futures and options, including the Black-Scholes model and binomial tree numerical methods.
Prerequisite: FINANCE 261 and MATHS 208 or 250

FINANCE 383 15 Points
Banking and Financial Institutions
Provides a thorough understanding of the role of banks and other financial institutions in the economy. It focuses on the problems of risk management and regulation with a particular emphasis on problems, crises and most importantly the Global Financial Crisis.
Prerequisite: FINANCE 251 or ECON 201 and 211

FINANCE 384 15 Points
Special Topic

Postgraduate 700 Level Courses

FINANCE 701 15 Points
Research Methods in Finance
The theory and application of modern research methods in finance. The content will include the philosophy, process and design of scientific research. Prior knowledge of basic statistical techniques is assumed.
Restriction: ACCTG 701

FINANCE 702 15 Points
Governance Issues in Finance
An introduction to the economic literatures relating to property rights, transaction cost economics, and agency
theory. Application of these notions to the way in which organisations are structured. Identification of why some transactions are internalised and some are undertaken through markets. The application of these ideas to finance. 

Restriction: ACCTG 702

FINANCE 705 15 Points
Empirical Finance
Examines the theory and application of modern research methods in finance. Through exposure to a range of contemporary research issues students will develop a basic framework of how to conduct research, and an overview of some of the pitfalls. Students will get started in a research project.

FINANCE 751 15 Points
Modern Corporate Finance
Examines fundamental principles of corporate financial theory and discusses current issues, seminal theoretical contributions and empirical evidence regarding those theories. Specific topics will be chosen from capital structure, dividend policy, security issuance, mergers and acquisitions, corporate control and initial public offerings.

FINANCE 761 15 Points
Portfolio Theory and Investment Analysis
Advanced coverage of contemporary issues in investments through readings of classic theoretical articles and recent empirical studies. Topics include: market efficiency and empirical anomalies, risk-return relationships and alternative investment vehicles and strategies. This course builds on material covered in FINANCE 261 and 361 and presumes the student has completed MATHS 208 or its equivalent.

FINANCE 762 15 Points
Risk Management
The theory and practice of financial risk management for portfolio managers with an emphasis on defining and measuring market risk. This course builds on material covered in FINANCE 362 and MATHS 208 with extensions to include the use of futures, options and other financial derivatives to manage market risk.

Global Management and Innovation

Postgraduate 700 Level Courses

GLMI 701 15 Points
Competing Internationally
Examines why, when, and how firms compete internationally. Utilises concepts and research on the firm, cluster and/ or industry in international competition, the role of its resources and capabilities, and its adaptation to diverse operating contexts. Includes analysis of internationalising small and medium sized enterprises, mini multinationals, and global enterprises.

Restriction: INTBUS 701

GLMI 702 15 Points
International Management
Focuses on management research and practice with a cross-border or cross-cultural dimension. Includes topics such as: forms and management practices in cross-border business; international human resource management; managing knowledge flows across borders; and the cross-border differential impact of culture and institutions on firms.

Restriction: INTBUS 702

GLMI 703 15 Points
Global Strategy
Examines the development and implementation of strategies by global firms. Focuses on strategy formation, strategic management processes, and evaluation in international, multinational and transnational organisations. Includes analysis of strategies such as foreign entry mode options, innovation and production networks.

Restriction: INTBUS 703

GLMI 704 15 Points
Challenges of Globalisation
Discusses the causes of globalisation and its consequences for firms, and other groups and actors. Investigates challenges and diverse approaches to navigating the globalising arena. Examines a variety of market and non-market governance structures that create incentives and opportunities for international firms.

Restriction: INTBUS 706

GLMI 705 15 Points
People, Performance and Well-being
Examines the employment relationship through tensions at the intersection of human resource management, organisational performance and employee well-being. Explores strategies associated with building, developing and motivating workforces and analyses ways of improving mutuality in employment relationships.

Restriction: MGMT 711, 712

GLMI 706 15 Points
Working in an Age of Uncertainty
Explores the contemporary environment which contains high levels of uncertainty, stemming from new technologies and changes in economy and society. Critically examines issues confronting organisations and work in these fast-paced, fluid and complex contexts, such as power and voice, meaning and dignity, and alternative forms of organising.
GLMI 707 15 Points

Responsible Business and Sustainability
Engages with pressing contemporary topics such as corporate social responsibility, sustainability, ethical business and governance, Māori and indigenous leadership, the stakeholder approach to responsible business, and diversity and inclusiveness in organisations.
Restriction: MGMT 733, 737

GLMI 708 15 Points

Critical, Creative and Strategic Thinking
Focuses on learning and applying ideas, processes and technologies to critical, creative and strategic thinking in fields related to leadership, management and change. Emphasises building the confidence, dexterity and set of practices to question and create new pathways for collaborative and systemic challenges.

GLMI 709 15 Points

Creating Global Ventures
Examines the issues involved in forming and operating a knowledge-intensive company that is global from inception. Includes topics such as assessing opportunities, developing a business model, forming a team and gathering the resources to launch a global new venture.
Restriction: INTBUS 705, MGMT 715

GLMI 710 15 Points

Innovation and Knowledge Management
Examines the role of innovation and knowledge in business profitability and growth. Includes knowledge as a foundation for innovation, core knowledge processes in organisations, understanding innovation processes in uncertain and complex environments, and collaborative innovation.
Restriction: MGMT 721

GLMI 711 15 Points

Strategic Entrepreneurship and Innovation
Examines the challenge of strategising in highly uncertain situations such as knowledge intensive start-ups and introduction of new products or processes. Reviews key theories of strategy and strategising, and applies tools for strategic management and analysis.
Restriction: MGMT 726

GLMI 712 15 Points

Understanding and Managing Creativity
Explores theories and research on creativity in both well-established and entrepreneurial organisations at different levels of analysis – individual, groups and firms. Includes topics such as factors impacting creativity, how to manage creative teams and individuals, and how to develop a creative climate in the organisation.

GLMI 750 15 Points

Contemporary Themes in Global Management and Innovation
Individualised readings and coursework from any field related to Global Management and Innovation.

Information Systems

Stage I

INFOSYS 110 15 Points
Business Systems
Explores how information systems and operations management help organisations to innovate, optimise and deliver value. Examines how the interaction of business, systems, and technologies bring about organisational transformation. Develops the ability to conduct a business analysis of an organisation’s vision, industry, strategy, value chain, processes, and systems.

INFOSYS 220 15 Points
Business Systems Analysis
An Information Technology (IT) professional must understand how IT systems are constructed and tested and how quality is assessed, in order to manage, develop or provide innovative business solutions. Business Systems Analysis introduces systems development process concepts and activities, with a strong focus on understanding the problem and solution through modelling.
Prerequisite: 15 points from COMPSCI 101, 105, 107, 130, INFOMGMT 192, INFOSYS 110
Restriction: INFOMGMT 291

INFOSYS 222 15 Points
Database Systems
Managers and other knowledge workers find that many of their duties revolve around accessing, organising, and presenting organisational and external information. The ability to develop and use computer databases is becoming a critical skill that is required in many disciplines. These skills are developed through an introduction to data modelling, relational theory, database design, and the management of databases.
Prerequisite: 15 points from COMPSCI 101, 105, 107, 130, INFOSYS 110

INFOSYS 280 15 Points
Business Systems Construction
The rapid growth of the internet and mobile technologies has had an enormous impact on the ways that companies conduct their business. Covers the construction process and programming requirements of internet based applications. Builds applied skills in the development of web-based solutions to practical business problems.
Prerequisite: INFOSYS 110 or COMPSCI 101 or 107 or 130
Stage III

INFOSYS 320 15 Points
Information Systems Design
Information systems that are specifically designed for an organisation provide a considerable competitive advantage. This course addresses design at several levels: user experience, architecture and object-oriented software design. Students learn to manage the design process in a team environment, drawing on previous courses to take a system from analysis through design to a prototype implementation using the latest modelling and development environments.
Prerequisite: INFORMGMT 291 or INFOSYS 220 and BUSAN 201 or INFORMGMT 292 or INFOSYS 322 and INFOSYS 280 and COMPSCI 235 or 280 or equivalent

INFOSYS 321 15 Points
Enterprise Systems
Examines cross-functional integrated computer-based information systems, known as Enterprise Resource Planning (ERP) systems, designed to support an organisation’s information needs and operations. Considers issues associated with the selection, analysis, design, implementation and configuration of such systems. Investigates transaction processing, management information and decision support across an organisation’s business processes. Explores the characterisation of problems, in terms of process and information models.
Prerequisite: 15 points at Stage II in Accounting, Business Analytics, Computer Science, Engineering Science, Information Management, Information Systems, Marketing, Operations Management, Software Engineering

INFOSYS 322 15 Points
Data Communications and the Internet
Examines topics related to the internet and communication networks, with an overall focus on the internet layered model, and services and capabilities that IT infrastructure solutions enable in an organisational context to revolutionise business. Provides a pathway to complete the industry recognised CCNA certificate by including the ‘Network Fundamentals’ module of the Cisco Networking Academy Programme.
Prerequisite: 15 points from COMPSCI 101, 107, 130, INFORMGMT 192, INFOSYS 110
Restriction: INFOSYS 224

INFOSYS 323 15 Points
Management of Information Systems
Business operations depend on the effective and efficient operation of information and telecommunication systems. A disciplined management approach to routine business system operations is a key success factor for IT managers. This course is concerned with the management issues surrounding information and telecommunications systems, presents fundamental knowledge essential to managing this environment, and considers strategic issues related to technology use.
Prerequisite: 15 points at Stage II in Accounting, Business Analytics, Computer Science, Engineering Science, Information Management, Information Systems, Marketing, Operations and Supply Chain Management, Software Engineering
Restriction: INFORMGMT 391

INFOSYS 330 15 Points
Databases and Business Intelligence
Identification and analysis of opportunities to improve business processes using innovative methods based in data analytics. Comprises three main components: data cleansing and management, data retrieval and data analytics. Case-studies will provide a practical perspective.
Prerequisite: BUSAN 201 or INFORMGMT 292 or INFOSYS 222 and 15 points from COMPSCI 101, 107, 130, INFORMGMT 192, INFOSYS 280, or equivalent

INFOSYS 338 15 Points
Contemporary Issues in Information Systems
Examines emerging information technologies and explores their theoretical and practical implications. Topics covered are dynamic and may include human-computer interaction, user behaviour in digital media, online communities, the sharing economy and the Internet of Things.
Prerequisite: INFOSYS 110 or equivalent and 30 points at Stage II in ACCTG, COMPSCI, ENGSIC, INFORMGMT, INFOSYS, MKTG, OPSMGT, SOFTENG

INFOSYS 339 15 Points
LANS, WANS, and Wireless Infrastructure
Studies the design, implementation and management of reliable and scalable networks. Topics covered: Local Area Network (LAN), switching and Virtual LANs, internet routing protocols, wireless switching, congestion control and quality of service (QoS). Introduces students to network performance analysis using network simulation software. Provides a pathway to complete the industry recognised CCNA (Cisco Certified Network Associate) certificate by including CCNA’s ‘Routing Protocols and Concepts’ and ‘LAN Switching and Wireless’.
Prerequisite: INFOSYS 224 or 322

INFOSYS 341 15 Points
Management of Information Security
An overview of activities, methods, methodologies, and procedures related to establishing sound information security policies. Topics include: defining security requirements; security management models and practices; risk management; identification and authentication; access control; information security technologies and encryption techniques. Some key legal and ethical issues associated with the management of information security will be discussed.
Prerequisite: 15 points from INFOSYS 220, 222, 223, 224 or ACCTG 222 or, 292

INFOSYS 344 15 Points
Special Topic
INFOSYS 345A 15 Points
INFOSYS 345B 30 Points
Business Project
Industry sponsored real-world project. Through on-site work a group of students will provide a solution to business needs of the sponsoring organisation. The projects will be offered from the domains of information systems or operations management. In the process of completing the projects, students will gain practical skills in group dynamics, public presentation skills, project management, and business behaviour.
Prerequisite: Either INFOSYS 220, 222 and 280 or COMPSCI 235 or 280 or equivalent, or either BUSAN 200 and 201 or INFORMGMT 290 and 292, or STATS 208 or 255, or OPSMGT 255 and 258, and a GPA of 4.0 or higher. Final enrolment subject to course supervisor approval.
Restriction: INFOSYS 342
To complete this course students must enrol in INFOSYS 345 A and B
INFOSYS 399  
Capstone: Information Systems  
Students work in a small group to solve a substantial problem applying the knowledge learnt from the different courses in the Information Systems major. Teams are expected to reason on a problem, device a solution, produce an artefact and present their work. The capstone provides an opportunity to students to further develop their technical and communication skills.  
Prerequisite: 30 points from INFOMGMT 292, INFOSYS 220 or COMPSCI 230, 15 points from COMPSCI 215, INNOVENT 203, OPSMG 258, SCI GEN 201, 30 points from COMPSCI 345, INF OSYS 390, 392, 393, INFOSYS 320-323, 330, 338, 339, 341, OPSMG 357

Postgraduate 700 Level Courses

INFOSYS 700  
Digital Innovation  
New information technologies are transforming how innovations are created, distributed, and commercialised. Focuses on the practices for digital innovation creation, distribution, and commercialisation as well as the digital strategies needed to manage such digital innovations.

INFOSYS 701  
Global Outsourcing  
Focuses on global outsourcing through the multiple lenses of information technology governance and operations and supply chain management. Examines outsourcing from a wide range of perspectives, including economic, cultural, and political. Addresses the main areas surrounding outsourcing and offshoring including organisational outsourcing, post outsourcing monitoring and control and evaluation.

INFOSYS 720  
Information Systems Research  
A substantive review of research in the discipline of information systems. Behavioural, strategic and social issues relating to the design, implementation and impact of information technology applications will be studied.

INFOSYS 722  
Data Mining and Big Data  
Data mining and big data involves storing, processing, analysing and making sense of huge volumes of data extracted in many formats and from many sources. Using information systems frameworks and knowledge discovery concepts, this project-based course uses cutting-edge business intelligence tools for data analytics.

INFOSYS 725  
New Perspectives on Organisations and Information Systems  
Investigates major issues facing organisations in adopting, implementing and using information systems for competitive advantage. Explores a set of critical issues from both an academic and practical perspectives. Topics include: Strategic Information Systems, Ecommerce, Knowledge Management, the Emergence of the Business Process, ERP Implementation, Virtual Teams and Global IT, IS and Developing Countries.

INFOSYS 727  
Advanced Information Security  
Focuses on technical security issues of the systems used in today’s information technology applications. Explores the practical issues of identification and authentication, security of operating systems, cryptography, disaster recovery and contingency planning, and discusses the relevant theoretical models. Managerial aspects of information security issues as well as legal and ethical issues arising from protecting computer files both from a New Zealand and global perspective will be addressed. The course follows the content of CISSP certification.

INFOSYS 730  
Telecommunications Management  
Seeks to expose students to current issues in telecommunications and computer networking as the involved industries move towards network and service convergence. Uses a multidisciplinary approach consisting of communications technology evolution, network economics principles and legal and regulatory frameworks. Cases include: Ethernet and the battle for the local area standard, Carrier Ethernet as a wide area technology, MPLS and VPLS, cellular and data wireless communications, next-generation networks VoIP, IPTV.

INFOSYS 732  
Readings in Information Systems  
An independent study of the research literature in a particular area of information systems. An opportunity to investigate a topic in depth, and gain valuable research skills. The particular area of research must be jointly agreed upon by the lecturer and students, and approved by the Head of Department.

INFOSYS 735  
Special Topic in Information Systems  

INFOSYS 737  
Adaptive Enterprise Systems  
Enterprises competing in contemporary dynamic markets must respond to the ever-increasing rates of change in a sustainable manner. Focuses on integrated cross-functional enterprise systems how they can be leveraged and enhanced to support adaptive and sustainable enterprises. A range of areas including Context-aware strategy/change/process/risk/performance management, Enterprise Resource Planning, Cloud Computing, Analytics, and Mobility will be discussed holistically.

INFOSYS 740  
System Dynamics and Complex Modelling  
The concepts, theories and modelling tools of system dynamics are used to deal with the dynamic complexities arising from interdependencies and interactions amongst various parts and functions within organisations and societies alike. Qualitative and computer modelling are used to gain insight and to foresee the intended outcomes as well as unintended consequences of policies and strategic decisions. All aspects of organisations including HR, IT, operations, marketing and strategy are considered and their interdependencies explored.

INFOSYS 750  
Research Methods – Quantitative  
A comprehensive review of the methodological issues in systems research, including detailed coverage of univariate and multivariate data analysis.  
Prerequisite: 15 points from STATS 201-255, or equivalent  
Restriction: MKTG 703, 704

INFOSYS 751  
Research Methods – Qualitative  
Focus is on the conduct and evaluation of qualitative research. Reviews various qualitative research methods and ways of analysing qualitative data and the challenges
of writing up qualitative research work for conferences and peer-reviewed academic journals.
Restriction: MKTG 703, 704

INFOSYS 788 30 Points

Innovation

Stage I
INNOVATE 100G 15 Points
Innovation through Design
Introduces design practice and tools to students in order to develop a user-centred approach to innovation. Students learn about design and, through cycles of empathy, creativity and prototyping, learn to design for innovation.

Innovation and Entrepreneurship

Stage II
INNOVENT 203 15 Points
INNOVENT 203G 15 Points
The Entrepreneurial Mindset
Stimulates new ways of thinking about enterprising behaviour in a multi-disciplinary manner relevant to understanding and addressing real world challenges of today. Introduces skills needed to identify and assess opportunities, solve problems creatively, communicate persuasively, work effectively in teams, and understand individual and organisational impact.
Prerequisite: BUSINESS 102 or MGMT 101 or 90 points passed or 60 points from Part I of the BE(Hons) Schedule

INTBUS 203 15 Points
Understanding Entrepreneurial Opportunities
Applies processes for creating, evaluating and realising entrepreneurial opportunities. Presents creative and analytical approaches to engage with different stakeholders and make decisions under conditions of uncertainty in a variety of entrepreneurial contexts. Skills to assess opportunities and associated business models and communicate a credible and compelling business case are introduced.
Prerequisite: BUSINESS 101 and 102 or SCIGEN 201
Restriction: INNOVENT 202

Stage III
INNOVENT 305 15 Points
Special Topic
Prerequisite: 15 points from ENNGEN 302, 303, INNOVENT 201, 203, 204, MGMT 202, 211, SCIGEN 201

INNOVENT 306 30 Points
Innovation and Entrepreneurship in Action
A project-based experience that integrates theory and practice in a variety of real world contexts that may include: start-ups, social and indigenous enterprise, new product development, corporate venturing, technology innovation. Combines and extends prior knowledge and skills for creating and capturing value in new and established ventures. Explores how organisational and sectoral factors influence ventures. Introduces skills for leading and managing projects in ambiguous situations.
Prerequisite: 30 points from INNOVENT 201, 202, 203, 204

INNOVENT 307 15 Points
Ecosystems for Innovation and Entrepreneurship
Introduces the eco-system concept to examine ways that innovating firms interact with various actors to build and sustain viable global enterprises. Actors include: suppliers, competitors, investors, users/customers, governments and universities. Develops the analytical skills needed to identify different actors for potential partnerships and strategies to engage with them.
Prerequisite: 15 points from ENNGEN 302, 303, INNOVENT 201, 203, 204, MGMT 202, 211, SCIGEN 201

International Business

Stage I
INTBUS 151 15 Points
INTBUS 151G 15 Points
Business across Borders
Business on a global scale presents unique challenges and unrivalled opportunities to companies equipped to cross national boundaries. Set against a background of current events, the course explores the influence of international trade and multinational corporations on the contemporary global economy.
Restriction: BUSINESS 101, INTBUS 201, 202

INTBUS 201 15 Points
Foundations of International Business
Explores the distinctive nature of business conducted beyond the boundary of the domestic market. Examines how firms reach multinational scale while exposed to the turbulence and complexity of international political and economic forces.
Prerequisite: BUSINESS 102 or MGMT 101, and ECON 111 or 151 or 152 or 191, or 15 points from ECON 111, 151, 152 and 30 points in International Relations and Business
Restriction: INTBUS 210, 211

INTBUS 202 15 Points
Foundations of Strategy
Examines how firms compete. Focuses on the frameworks and tools needed to make sense of the competitive landscape in order to formulate and implement strategies. Considers the challenges and constraints that managers face in increasingly complex environments and industries.
Prerequisite: BUSINESS 102 or MGMT 101, or 15 points from ECON 151, 152 and 30 points in International Relations and Business

Corequisite: At least 30 points selected from PROPERTY 701-773, and 784

PROPERTY 786 15 Points
Special Topic

PROPERTY 789 30 Points
Honours Dissertation
A dissertation on a topic in property approved by the Head of Department.
Prerequisite: At least 30 points selected from PROPERTY 703-763

PROPERTY 790 30 Points
Dissertation
A dissertation on an approved topic in property.
Prerequisite: At least 30 points selected from PROPERTY 701-773, and 784

PROPERTY 791 60 Points
PROPERTY 791A 30 Points
PROPERTY 791B 30 Points
Dissertation
To complete this course students must enrol in PROPERTY 791 A and B, or PROPERTY 791

PROPERTY 794A 30 Points
PROPERTY 794B 60 Points
Thesis
To complete this course students must enrol in PROPERTY 794 A and B

PROPERTY 796A 60 Points
PROPERTY 796B 60 Points
Thesis for MProp
Prerequisite: PROPERTY 701
To complete this course students must enrol in PROPERTY 796 A and B

Academic Integrity

ACADINT A01 0 Points
Academic Integrity Course
The Academic Integrity Course is an online course designed to increase student knowledge of academic integrity, university rules relating to academic conduct, and the identification and consequences of academic misconduct. Students work through a series of modules, outlining scenarios that they may encounter while studying at university. Each scenario provides information on relevant rules, resources and expected behaviour.
Architectural Design

Stage I
ARCHDES 102 15 Points
Design 1
The Conceptual: An introduction, in studio format, to the conceptual realm in which architecture operates, making connections to the cultural, physical, formal, social and political dimensions of architectural design. Emphasizes the development of skills and abilities in conceptual thinking and design realization, using a range of approaches to making and representation.
Restriction: ARCHDES 100

ARCHDES 103 15 Points
Design 2
The Formal: An introduction, in studio format, to the discipline of architectural organisation and form-making. Re-examines the traditional notions of typology, precedent, geometry, parti and diagrams. Emphasizes strategies that build on and transform understanding for organising form given contemporary programmes and modes of representation.
Restriction: ARCHDES 101

Stage II
ARCHDES 200 30 Points
Design 3
The Domestic: Exploring through design those things both familiar and unfamiliar in our understanding of home, family, privacy, identity, and community. Examines both the most intimate and the most exposed aspects of dwelling. Emphasizes the role of precedent in design and addresses scales ranging from the room to the block.
Prerequisite: ARCHDES 100 or 102

ARCHDES 201 30 Points
Design 4
The Constructed: An introduction to architectural practice as a complex and collaborative enterprise. Offers the opportunity to explore materials, construction, fabrication processes, and detailing, through making. Requires students to understand the full range of drawings required to move from design concept to actual construction.
Prerequisite: ARCHDES 101 or 103

Stage III
ARCHDES 300 30 Points
Design 5
The Experimental: Students will be exposed to experimental approaches to architectural design that seek to expand the field of architecture. Highlights the role and agency of media in explorative architectural pursuits.
Prerequisite: ARCHDES 200

ARCHDES 301 30 Points
Design 6
The Integrated: The culmination of all aspects – conceptual, formal, material, tectonic, environmental, structural – of architectural design within the context of a larger network of infrastructural services. Also requires an understanding of the full range of drawings describing the workings of the building as both an active ‘machine’ and place for human comfort.
Prerequisite: ARCHDES 200, and 201 or 300

ARCHDES 302 30 Points
Directed Study
A topic approved by the Head of School of Architecture and Planning.
Prerequisite: ARCHDES 300 and 301 or Departmental approval

Postgraduate 700 Level Courses
ARCHDES 700 30 Points
Advanced Design 1
A studio based inquiry into an architectural topic approved by the Head of School of Architecture and Planning intended to facilitate in-depth study that is both tailored to a student’s own interest and aligned with the School’s research clusters, sharing workshops, discussions, pin-ups and tutorials.

ARCHDES 701 30 Points
Advanced Design 2
A studio based inquiry into an architectural topic approved by the Head of School of Architecture and Planning intended to facilitate in-depth study that is both tailored to a student’s own interest and aligned with the School’s research clusters, sharing workshops, discussions, presentations and tutorials.

ARCHDES 702 30 Points
Adaptive Reuse
A studio-based inquiry into an architectural topic in the field of adaptive reuse, approved by the Head of School of Architecture and Planning.
Prerequisite: Head of School approval

ARCHDES 796A 60 Points
ARCHDES 796B 60 Points
Thesis
A thesis involving a design-based discourse on a topic approved by the Head of School of Architecture and Planning for the degree of Master of Architecture (Professional) under the guidance of an appointed supervisor.
Prerequisite: Students must have completed the taught component of their programme
To complete this course students must enrol in ARCHDES 796 A and B

ARCHDES 797A 30 Points
ARCHDES 797B 60 Points
Thesis
A thesis involving a design-based discourse on a topic approved by the Head of School of Architecture and Planning for the Degree of Master of Architecture (Professional) and Urban Planning (Professional).
Prerequisite: ARCHDES 700, 701, ARCHGEN 703 or ARCHPRM 700, ARCHPRM 701, URBPLAN 701-708
To complete this course students must enrol in ARCHDES 797 A and B

Architectural History, Theory and Criticism

Stage I
ARCHHTC 102 15 Points
ARCHHTC 102G 15 Points
Modern Architecture and Urbanism
Examines through case studies the cultural contexts that shaped the development of architecture, urban design, landscape and the environment during the twentieth century. Emphasis is placed on the historical developments that influenced changes in style and the theoretical contexts that shaped attitudes towards inhabitation, social
organisation, national identity, and cultural self-expression, amongst other things.

*Restriction: ARCHHTC 100

**Stage II**

**ARCHHTC 235**  
Contemporary Architecture and Urbanism  
10 Points

Examines late modern, postmodern and contemporary architecture and urbanism. Emphasis is placed on the analysis of buildings, projects and developments that have the potential to inform contemporary architectural design, and on the reading and writing of architectural criticism.  
*Prerequisite: ARCHHTC 102 or 102G, or ARCHHTC 100 and 101

**ARCHHTC 236**  
Introduction to Architectural Theory  
10 Points

An introduction to architectural and urban theory with emphasis on significant developments in the modern and postmodern periods. Introduction to the contribution of architectural theory to an understanding of the phenomenon of architecture, of architectural design practice and of the problems that architecture and urbanism must solve in the early twenty-first century.  
*Prerequisite: ARCHHTC 102 or 102G, or ARCHHTC 100 and 101

**ARCHHTC 237**  
Postmodern and Contemporary Architecture and Urbanism  
15 Points

Examines architectural and urban history and theory from the postmodern to the recent and contemporary.  
*Prerequisite: ARCHHTC 102

**Stage III**

**ARCHHTC 339**  
Premodern Architecture and Urbanism  
10 Points

Through case studies from architecture's origins to the end of the eighteenth century, this course examines a broad range of cultural landscapes, rural and urban ensembles, architecture and its interiors, ornamental and iconographic programmes, and architectural texts. Distinctions between the conceptual preoccupations, spatial and structural ideas and their use will be drawn for a wide variety of cultural and building traditions.  
*Prerequisite: ARCHHTC 235 and 236, or 202 and 230

**ARCHHTC 340**  
Oceanic Architecture and Urbanism  
10 Points

Examines the development of architecture and its contexts in Aotearoa New Zealand and the South Pacific, including origins, historical influences, key architects and buildings, identity and changing priorities.  
*Prerequisite: ARCHHTC 235 and 236, or 202 and 230

**ARCHHTC 341**  
Worlds of Architecture  
15 Points

Examines topics in pre-modern architectural and urban history and theory across the continents of Eurasia, Africa, the Americas, Australia and Oceania.  
*Prerequisite: ARCHHTC 235 and 236, or 237

**ARCHHTC 374**  
Directed Study  
10 Points

Topics approved by the Head of School of Architecture and Planning.

**ARCHHTC 375**  
Elective Study  
10 Points

Topics approved by the Head of School of Architecture and Planning.

**ARCHHTC 376**  
Directed Study  
15 Points

**Architectural Media**

**Stage I**

**ARCHDRC 103**  
Architectural Media 1  
15 Points

An introduction to drawing and computing techniques related to design studio practice and an overview of the analytical and critical value of these techniques for design.  
*Restriction: ARCHDRC 102

**ARCHDRC 104**  
Architectural Media 2  
15 Points

Examines specific types of representation – both freehand and digital – used in architectural media to develop concepts, evaluate architectural thinking and describe and refine design projects.  
*Restriction: ARCHDRC 202

**Stage II**

**ARCHDRC 202**  
Architectural Media II  
10 Points

The study of drawing, computing and related art practices in terms of architectural representation and analysis and the practice of selected techniques.  
*Prerequisite: Both ARCHDRC 100 and 101, or ARCHDRC 102

**ARCHDRC 203**  
Architectural Media 3  
15 Points

Explores the relationship between methods of architectural drawing and the three-dimensional communication of fabrication and assemblage. Central to this investigation is an understanding of how drawing is evolving in relation to new technologies.  
*Prerequisite: ARCHDRC 102 or 103

**Stage III**

**ARCHDRC 301**  
Measured Drawing  
10 Points

The measurement, recording and drawing of existing New Zealand architecture of historical and cultural significance.  
*Prerequisite: ARCHDRC 201 or 202 or Departmental approval

**ARCHDRC 303**  
Freehand Drawing  
10 Points

The examination, through penetrative seeing, of the basic structure, form, tonal colour and textural elements found in the environment and the development of these awarenesses in knowledgable graphic communications with an emphasis on perceptive expression.  
*Prerequisite: ARCHDRC 201 or 202 or Departmental approval

**ARCHDRC 304**  
Introduction to Architectural Photography  
10 Points

An introduction to architectural photography and photographic techniques.  
*Prerequisite: ARCHDRC 201 or 202 or Departmental approval
Architectural Professional Studies

Stage III

ARCHPRM 304 10 Points
Professional Studies 1
The management of the building project from inception to completion. An examination of client needs and agreements, feasibility studies, project constraints, consents, cost planning and control, consultants, administration and quality control. An analysis of all aspects of the contracts and documentation during construction and final project accounts.
Prerequisite: ARCHTECH 207 or 208
Restriction: ARCHPRM 700

ARCHPRM 305 15 Points
Professional Studies 1
Professional practice and the practical demands of managing construction. Explores the roles of architect, client, builder and consultants; land, building, planning and environmental legislation; the consenting processes that precede construction; documentation; cost and quality management; procurement; contract law; construction contracts; site observation; contract administration and progress payments; completion; final accounts; and post-project procedures.
Prerequisite: ARCHTECH 207 or 208 or 210
Restriction: ARCHPRM 304, 700

Postgraduate 700 Level Courses

ARCHPRM 700 15 Points
Professional Studies 1
The management of the building project from inception to tendering. An examination of client needs and agreements, feasibility studies, project constraints, cost planning and control, consultants, administration and quality control. An analysis of all aspects of the contracts and documentation during construction and final project accounts.

ARCHPRM 701 15 Points
Professional Studies 2
The New Zealand legal system and the law of contract and torts; negotiations, negligence, disputes and remedies relevant to architects in practice. An examination of the requirements for establishing and maintaining an architectural practice as a business venture as well as strategic market management, financial planning, insurance and taxation.

Architectural Technology

Stage I

ARCHTECH 108 15 Points
Introduction to Sustainability and Technology
Restriction: ARCHTECH 106, 107

Stage II

ARCHTECH 207 15 Points
Design Technology 1
Development of structural and construction principles and systems for small-scale and residential buildings. Characteristics and behaviour of common building materials. Building components and detailing. Outline of building codes, health and safety regulations and site operations. Active building services and technologies for residential housing, including heating, cooling, ventilation, water, waste, electrical services and vertical transportation. Application to design studio projects.
Prerequisite: ARCHTECH 107 or 108

ARCHTECH 208 15 Points
Environmental Design I
Prerequisite: ARCHTECH 102 and 103 or 106

ARCHTECH 210 15 Points
Environmental Design II
Prerequisite: ARCHTECH 106 and 107, or 108
Restriction: ARCHTECH 208

Stage III

ARCHTECH 307 10 Points
Environmental Design II
Heat and the thermal environment. Light and the luminous environment. Sound and the sonic environment. Energy
and resources. Integrating environmental design and performance. Relevant physical principles reviewed with application and integration of the four topic areas and their relationship to human comfort. Simulation tools, measurements and techniques. Quantitative and qualitative approach to sustainable practices. 

Prerequisite: ARCHTECH 208
Restriction: ARCHTECH 308, 309, 318, 319

ARCHTECH 312 10 Points
Design Technology III
Development of construction and structural principles for complex, large scale and multi-storey buildings. Investigation into advanced structural systems, façade technology, material selection and detailing. Introduction of factors affecting buildability and environmental performance. Fire protection and building code requirements. Application to design studio projects.

Prerequisite: ARCHTECH 207
Restriction: ARCHTECH 311, 475

ARCHTECH 313 10 Points
Directed Study
A topic approved by the Head of School of Architecture and Planning.

Prerequisite: ARCHTECH 307 and 312 or Departmental approval

ARCHTECH 314 15 Points
Environmental Design 2

Prerequisite: ARCHTECH 208 or 210
Restriction: ARCHTECH 307

ARCHTECH 315 15 Points
Design Technology 2
Development of construction and structural principles for complex, large-scale and multi-storey buildings. Investigation of façade technology, material selection and detailing, as applied in practice. Development of factors affecting buildability, fire protection and building code requirements. Application to design studio projects through drawing and prototyping.

Prerequisite: ARCHTECH 207
Restriction: ARCHTECH 312

Architecture General

Postgraduate 700 Level Courses

ARCHGEN 702 15 Points
Research Process
An introduction to the research process including: research paradigms and strategies, the identification of research topics and research questions, the review and critique of literature, research methodologies, the structuring of research theses and reports, referencing and the preparation of a bibliography. The focus of the course is on preparing students to undertake their own research projects.

Restriction: ARCHGEN 400, 700

ARCHGEN 703 15 Points
Design as Research
Examines the literature on, and approaches to, research by design. Considers research processes and architectural design processes, and the ways in which these processes might be creatively combined in the context of a Masters level design thesis, in order that the thesis process and outcomes might meet the expectations of a research-based thesis.

Restriction: ARCHGEN 300

ARCHGEN 711 15 Points
Special Topic
Restriction: ARCHGEN 710, 712-715

ARCHGEN 712 15 Points
Special Topic: Building the Case
Examines architectural argument, including the ways in which architects defend their position in an environment court, review a building in an architectural journal or debate the merits of heritage conservation in the mainstream media.

Restriction: ARCHGEN 710, 711, 713-715

ARCHGEN 713 15 Points
Special Topic: Contemporary Architectural Theory
Examines architectural theory from the 1970s to the present. As architectural theories morph from design paradigms to architecture’s relevance in culture to disciplinary autonomy to technological determinism, theory narratives adjust to changing political, economic and social conditions.

Restriction: ARCHGEN 710-712, 714, 715

ARCHGEN 714 15 Points
Special Topic: Invisible Historie
Examines class, gender and ethnicity in New Zealand architectural history. Develops research skills through a focus on selected historical figures, with the aim of retrieving some of those who are invisible within the accepted canon.

Restriction: ARCHGEN 710-713, 715

ARCHGEN 715 15 Points
Special Topic: Pacific Architecture
Examines architectural history and practice in the Pacific region from ancient sites to the present day. Explores design from all periods, with a view to informing future design through consideration of climate, culture, society, materials and economics.

Restriction: ARCHGEN 710-714

ARCHGEN 721 15 Points
Special Topic: Designing with Resilience Thinking
Examines resilience in the built environment, from reviewing the literature on resilience to analysing case studies and developing strategies to enhance resilience in architecture.

Restriction: ARCHGEN 720, 722-725

ARCHGEN 722 15 Points
Special Topic: Sustainability as the Driver for Creativity
Examines the key principles guiding sustainable design and the role of the construction industry in regards to climate change. Focuses on projects in which sustainability, energy efficiency and resilience are the drivers for creative design solutions.

Restriction: ARCHGEN 720, 721, 723-725

ARCHGEN 723 15 Points
Special Topic: Designing Regenerative Low Carbon Communities
Examines the ‘why’ and ‘how’ to retrofit and transform
existing built form and infrastructure to deliver regenerative communities within the urban villages of Tāmaki Makaurau.

Restriction: ARCHGEN 720-722, 724, 725

ARCHGEN 724 15 Points
Special Topic
Restriction: ARCHGEN 720-723, 725

ARCHGEN 725 15 Points
Special Topic
Restriction: ARCHGEN 720-724

ARCHGEN 731 15 Points
Special Topic
Restriction: ARCHGEN 730, 732-735, URBDES 702

ARCHGEN 732 15 Points
Special Topic: From Public Art to Public Architecture
Examines contemporary theory and criticism in public art in order to develop a set of strategies for producing architecture that is more responsive to the ‘public sphere’ in which it is designed, built and continues to exist.
Restriction: ARCHGEN 730, 731, 733-735, URBDES 702

ARCHGEN 733 15 Points
Special Topic: Public Urban Space in the Contemporary City
Examines the role of public urban space in the city and how history, geography, culture, physical connections and architectural form contribute to its formation. Explores how contemporary cities are transforming their urban environments through design.
Restriction: ARCHGEN 730-732, 734-735, URBDES 702

ARCHGEN 734 15 Points
Special Topic
Restriction: ARCHGEN 730-733, 735, URBDES 702

ARCHGEN 735 15 Points
Special Topic
Restriction: ARCHGEN 730-734, URBDES 702

ARCHGEN 741 15 Points
Special Topic: Architectural Project Management
Examines the theory and practice of managing a building construction project. Explores advanced models of project organisation, procurement, construction contracts, time and cost management and efficient delivery methods.
Restriction: ARCHGEN 740, 742-745

ARCHGEN 742 15 Points
Special Topic: Timber Technology
Students will build a small building (a shelter) in a group, and then design a second shelter, through concept plans, developed design plans and a scale model.
Restriction: ARCHGEN 740, 741, 743-745

ARCHGEN 743 15 Points
Special Topic: Documenting the Intangible
Examines how architectural drawing conventions can communicate the intangible, including through drawing at the scale of 1:1.
Restriction: ARCHGEN 740-742, 744, 745

ARCHGEN 744 15 Points
Special Topic: Marking Time
Explores temporality and how time is expressed in, about and through the medium of spatial practice and representation.
Restriction: ARCHGEN 740-743, 745

ARCHGEN 745 15 Points
Special Topic: Tangible Data
Explores concepts for new conditions of buildings and cities, in which digital information can be given physical form and physical spatial appearance. Aims to make data ‘touchable’ in space.
Restriction: ARCHGEN 740-744

ARCHGEN 750 15 Points
Heritage Processes
Examines heritage conservation legislation, policy, guidelines and processes. Includes international context as well as New Zealand laws and processes.

ARCHGEN 751 15 Points
Heritage Assessment and Conservation Planning
Examines the assessment of cultural heritage value and the use and preparation of conservation plans to guide heritage conservation work. Coursework comprises the researching and writing of a conservation plan.

ARCHGEN 752 15 Points
Conservation of Materials
Examines the theory and practice of conserving materials commonly found in heritage buildings and artefacts, including stone, brick, timber, concrete and steel.

ARCHGEN 753 15 Points
Diagnosis and Adaptation
Examines the investigation of existing building fabric, diagnosis of issues impacting upon the state of repair or the level of comfort, and the adaptation of heritage buildings, including strengthening, energy upgrading, reuse and the design of additions and alterations.

ARCHGEN 754 30 Points
Research Project
A research project in the field of heritage conservation which may include an internship. Placements and topics to be approved by the Head of School of Architecture and Planning.
Prerequisite: ARCHGEN 750, 751

ARCHGEN 790 30 Points
Dissertation
Restriction: ARCHGEN 793, 795

ARCHGEN 793A 60 Points
ARCHGEN 793B 60 Points
Thesis
A study of research processes, together with a thesis involving a discourse on a topic approved by the Head of School of Architecture and Planning for the degree of Master of Architecture under the guidance of an appointed supervisor.
Restriction: ARCHGEN 795, 796, 797
To complete this course students must enrol in ARCHGEN 793 A and B

ARCHGEN 795A 45 Points
ARCHGEN 795B 45 Points
Thesis
A study of research processes, together with a thesis involving a discourse on a topic approved by the Head of School of Architecture and Planning for the degree of Master of Architecture under the guidance of an appointed supervisor.
Restriction: ARCHGEN 793, 796, 797
To complete this course students must enrol in ARCHGEN 795 A and B
ARCHGEN 799 60 Points  
ARCHGEN 799A 30 Points  
ARCHGEN 799B 30 Points

Research Report
A report involving research and application in an architectural subject for the Postgraduate Diploma in Architecture under the guidance of appointed supervisor on a topic approved by the Head of School of Architecture and Planning. 
Prerequisite: ARCHGEN 700 or 702  
Restriction: ARCHGEN 798
To complete this course students must enrol in ARCHGEN 799 A and B, or ARCHGEN 799

Dance Studies

Stage I

DANCE 101 15 Points
DANCE 101G 15 Points
Introduction to Dance and Creative Processes
To develop an understanding of our moving bodies through movement awareness, dance improvisation, choreography and creative and analytic writing. Students will undertake both theoretical and practical classes focusing on a range of practices that dancers and movement practitioners use to facilitate kinaesthetic awareness, experimentation, communication and choreography. Students will explore somatic theory and practice, improvisation scores, choreography and dance analysis. DANCE 101 not available for BDanceSt.

DANCE 107 15 Points
Dance History and Contexts
Study of the historical development in western theatre dance from the nineteenth century to the beginning of the twentieth century.

DANCE 110 15 Points
Contemporary Dance and Choreography I
A study of contemporary dance practices through the choreography, creative facilitation and techniques of contemporary dance makers. For BDanceSt students only.

DANCE 112 15 Points
Dance Kinesiology
Introduction to physiological and kinesiological analysis of dance movements. The study of skeletal alignment, muscular balance and mechanical efficiency.

DANCE 120 15 Points
Dance Vocabulary I
Introducing the study of diverse dance vocabulary including ballet, contemporary dance and the field of somatics. Students will examine specific technical requirements of identified dance vocabulary.

DANCE 121 15 Points
Dance Technique
Continuation of work undertaken in DANCE 120 with exploration of skills, repertoire, and merging dance styles. Prerequisite: DANCE 120

DANCE 131 15 Points
Dance Education
The study of dance education practice and theory that shapes teaching and learning of dance in school and community contexts. Note: this course does not meet the requirements for teacher registration in New Zealand.

Stage II

DANCE 200 15 Points  
DANCE 200G 15 Points
Dance and Culture
Examines the interrelationship between dance and wider political and cultural movements through practical dance classes and theoretical investigations into diverse cultural environments around the world. Students physically and theoretically engage in the study of various dance forms such as Tango, Salsa, Dabkeh, traditional Chinese dance and Bharata Natyam. 
Prerequisite: 60 points passed

DANCE 201 15 Points
Dance and Interdisciplinarity
Building integrated connections with other arts disciplines such as music, literature, art. Prerequisite: DANCE 101 or 110

DANCE 207 15 Points
Choreography and Performance
Focuses on the development and consolidation of choreographic and performance skills. Prerequisite: Any 30 points at Stage I in Dance Studies

DANCE 210 15 Points
Contemporary Dance and Choreography 2
Study of contemporary choreography practice and theory. Students create choreography that may be shared through film and/or live performances. Prerequisite: DANCE 101 or 110

DANCE 211 15 Points
Special Topic
Prerequisite: Any 30 points at Stage I in Dance Studies

DANCE 212 15 Points
New Zealand Dance Contexts and History
Emphasis is on the socio-historical developments of dance in the twentieth century. Choreographers, dancers, designers and composers who have created, influenced and shaped dance in New Zealand will be studied via lectures, videos, scores, and reconstructions. Prerequisite: DANCE 107

DANCE 215 15 Points
Special Topic
Prerequisite: Any 30 points at Stage I in Dance Studies

DANCE 220 15 Points
Dance Vocabulary II
Exploring and analysing contemporary dance practices and techniques. Movement skills and performance skills will be developed integrating personal movement with techniques. Prerequisite: DANCE 120

DANCE 222 15 Points
Safe Dance Practices
Establishing the theory and practice of safe dance practices within education, performance and health related contexts. Anatomy, kinesiology and dance conditioning methodologies will be studied in relation to dance practice. Prerequisite: DANCE 112

DANCE 231 15 Points
Community Dance
Entering diverse community settings and teaching and learning dance; analysing the roles and functions of dance in your own and others’ communities. Note: this course
does not meet the requirements for teacher registration in New Zealand.
Prerequisite: DANCE 131

DANCE 250
15 Points
Special Topic
Prerequisite: Any 30 points at Stage I in Dance Studies

Stage III

DANCE 300
15 Points
Dance Project
Resident/Guest Artist project that gives students an intensive experience of a particular choreographic vocabulary and repertoire. Not available to BA students.
Prerequisite: 30 points at Stage II in Dance Studies

DANCE 301
15 Points
Dance and Improvisation
Developing an embodied personal practice, and understanding of the theory and practice of contact improvisation and its influence in dance, education and community contexts.
Prerequisite: Any 30 points at Stage II in Dance Studies

DANCE 302
15 Points
Dance in Aotearoa New Zealand
An examination of dance in New Zealand including Māori, Pacific Island, European, and Asian influences. Emphasis will be on developments during the twentieth century of traditional form into contemporary practice, indigenous forms in NZ society, the developments in ballet, contemporary and popular dance.
Prerequisite: DANCE 210 or DANCE 200 for students in Transnational Cultures and Creative Practice

DANCE 310
15 Points
Contemporary Dance and Choreography 3
The study of contemporary dance practices through the choreography and techniques of contemporary dance makers.
Prerequisite: DANCE 210

DANCE 312
15 Points
Dance Production
Dance works are choreographed on the students by leading dance professionals in their chosen genre, resulting in a dance production. Not available to BA students.
Prerequisite: Any 45 points at Stage II in Dance Studies

DANCE 314
15 Points
Dance and Technology
Project based study of the interaction between technology and dance. Including hands-on practice with video, digital photography and the study of dance for film.
Prerequisite: Any 30 points at Stage II in Dance Studies

DANCE 315
15 Points
Dance Composition
Studio based course developing improvisational and compositional skills. Choreographic principles are studied as guidelines for structure and design in movement.
Prerequisite: Any 30 points at Stage II in Dance Studies

DANCE 320
15 Points
Dance Vocabulary III
Refining and deepening dance practices and pedagogy strategies specific to contemporary dance. Choreographic research methods are introduced with emphasis upon articulating key questions and processes for problem solving.
Prerequisite: Any 30 points at Stage II in Dance Studies

DANCE 322
15 Points
Professional Practices
Developing skills and knowledge in planning and managing for careers in the diverse dance professions. Students will develop arts management and financial business skills, such as learning to write grant applications, CVs and personal plans that relate to employment and funding issues.
Prerequisite: DANCE 222

DANCE 331
15 Points
Dance Education Research
Analysis of dance teaching and learning philosophies, issues and theories as they are translated from texts and curriculum into classroom and community practice. This course does not meet the requirements for teacher registration in New Zealand.
Prerequisite: DANCE 231

DANCE 350
15 Points
Special Topic
Prerequisite: Any 30 points at Stage II in Dance Studies

DANCE 351
15 Points
Special Topic
Prerequisite: Any 30 points at Stage II in Dance Studies

Postgraduate 700 Level Courses

DANCE 720
30 Points
Choreography and Performance Research
Investigates choreographic practice and dance creation as a location for artistic production and academic research. Students will reflect on their own choreographic and performance practice through studio-based activities, while examining choreographic and performance theory.
Prerequisite: Departmental approval
Restriction: DANCE 733, 735, 760

DANCE 722
30 Points
Dance in Community and Education Research
Examines issues and philosophies critical to the development of dance education in formal and informal contexts in New Zealand and internationally. Personal pedagogical practices are reviewed and dominant discourses critiqued.
Prerequisite: Departmental approval
Restriction: DANCE 734

DANCE 724
30 Points
Research Methods and Critical Analysis in Dance Studies
Examines diverse qualitative research methods, critical theory and research ethics. Through practical investigations students will source and critically review literature relevant to their personal research directions.
Prerequisite: Departmental approval
Restriction: DANCE 751

DANCE 730

DANCE 772 15 Points  
Dance Therapy, Theory and Practice I  
Students will develop their knowledge of dance therapy through theoretical and practical approaches to understanding the conceptual and theoretical foundations that underpin concepts of therapy, well-being, therapist/client relationships and clinical health care systems.

DANCE 773 15 Points  
Dance Therapy, Theory and Practice II  
Builds on DANCE 772. Focuses on deepening theoretical and practical understanding of the needs of a variety of client populations in regard to different ages, issues and settings, in individual and group work.  
Prerequisite: DANCE 772

DANCE 774 15 Points  
Psychology in Dance Movement Therapy  
Focuses on fundamental skills required for professional clinical settings, including counselling and psychological theories and practice including accurate observation and listening techniques, development of the individual and group therapeutic relationship. Key areas covered include abnormal psychology, developmental psychology, group process and advanced counselling skills.

DANCE 775 30 Points  
Therapeutic Modalities of DMT  
Practicums in dance therapy contexts are supervised by experienced dance therapists. Students will extend their real world knowledge and develop their experience in observing, reporting and facilitating dance movement therapy.

DANCE 776 15 Points  
Awareness and Analysis in DMT  
Anatomy and kinesiology will involve the study of the structures and systems of the body through both somatic and scientific approaches. Movement observation involves developing key diagnostic and reporting tools in dance movement therapy.

DANCE 777A 15 Points  
DANCE 777B 15 Points  
Practicum in Dance Movement Therapy  
Advanced practicum placements in dance therapy settings are supervised by experienced dance therapists. Students will extend their practical knowledge and develop their experience in observing, reporting and facilitating dance movement therapy at a professional level.

Design

Stage I

DESIGN 100 30 Points  
Design Methods and Processes 1  
Introduces students to key tools, methods and processes of design planning, strategy and practice. Students learn to apply design thinking and technologies to real world contexts and issues. A course of studio-based study focused on a series of creative, hands-on projects and supported by lectures. The emphasis is on human-centred design and interventions.

DESIGN 101 15 Points  
Why We Design  
Investigates design as a driver and responder to social needs in contemporary and historic contexts. Students will understand relevant technologies and their contexts. The course explicitly considers planetary limits and sustainability, as well as design and business considered in a social-technological, tikanga Maori, financial, cultural-ethical and environmental context.

Stage II

DESIGN 200 30 Points  
Design Methods and Processes 2  
An intermediate studio-based programme in which students develop a customised design strategy in response to a real-world issue. By working on a detailed case study, students learn to address local issues and engage with the local design community. Students present their design solutions, and learn to pitch design concepts and evaluate potential outcomes.  
Prerequisite: DESIGN 100, 101

DESIGN 201 15 Points  
Creative Communities  
Students analyse and discuss the ‘design difference’ by understanding design as both problem and (potential)
solution to one or more identified social issues. Attention is paid to the economic and ethical implications of design with emphasis on value chains and Triple Bottom Line practices.

**Prerequisite:** DESIGN 100, 101

### DESIGN 210
**Indigeneity and Place**
Communication technologies and economic forces are reshaping the ways in which individuals, societies and nations define themselves. In today’s global society, what does it mean to belong to a specific place or participate in a specific culture and how might Māori culture locate itself within this global context? Using immersive forms such as video, animation, gaming and/or VR-AR, students will explore their identity—personally, experientially and culturally—in relation to place.

**Prerequisite:** DESIGN 100, 101

### DESIGN 211
**New Zealand’s Narratives**
What were New Zealand’s stories, Māori and European? Who got to tell them and why? How have these narratives evolved? How do today’s narratives reflect and constitute culture? In this course, students will address these questions by developing and communicating messages, narratives and experiences across a range of media (traditional and digital) with an emphasis on twenty-first century communication via app-based and social media forms.

**Prerequisite:** DESIGN 100, 101

### DESIGN 212
**Data, Design and Rhetoric**
Data is a valuable resource but can be overwhelming. Economists have used data to influence public policy, but this is changing as data becomes more widely available and informs decision-making more broadly. Students will learn to produce data-driven arguments about a local issue. Using Micro Strategy they will create databases and visualisation concepts (design) and tools (software) to present persuasive design cases.

**Prerequisite:** DESIGN 100, 101

### DESIGN 213
**Special Topic**

**DESIGN 220**
**Design Entrepreneurship**
Entrepreneurship and design are equally characterised by open inquiry, trial and error and a view of failure as integral to the creative process. Students will study entrepreneurship in creative industries, focusing on the role of strategic design in the start-up and operation of companies. They will examine entrepreneurial design practice within organisations (intrepreneurship) and tools and strategies for organisational innovation.

**Prerequisite:** DESIGN 100, 101

### DESIGN 221
**Design and Social Responsibility**
Metrics for success differ between profit-making and non-profit organisations. In this course, students will learn how Triple Bottom Line models measure the wider impact and the social responsibilities of all types of organisation. By studying business cases they will understand how design methods and strategies can help any enterprise to develop practices that are socially, financially and environmentally responsible.

**Prerequisite:** DESIGN 100, 101

### DESIGN 222
**Design and Legal Concepts**
Introduction to core legal concepts of significance to the commercial success and social value of design such as patent, trademark, copyright, cultural ownership, agency and client confidentiality and the importance of these to social and commercial legal issues.

**Prerequisite:** DESIGN 100, 101

### DESIGN 230
**Design Scenarios and Geopolitics**
Understanding how to build and convincingly populate ‘what if?’ scenarios entails substantial research. Students will use science fiction, design fiction, current and past events and investigations into various sectors to inform their scenario planning. Students will use a range of physical and digital technologies to visualise and experientialise these scenarios, making them tangible for users.

**Prerequisite:** DESIGN 100, 101

### DESIGN 231
**Gamified Scenario Design**
Forward-casting (futuring) often uses a framework that maps random through to probable outcomes. In this course, students learn to use forecasting models and predictive analytics in relation to design solutions. Referring to game theory and using appropriate tools, students will develop a participatory game, and develop an interactive gamified futuring tool directed toward a specific local sector.

**Prerequisite:** DESIGN 100, 101

### DESIGN 232
**Future Auckland**
Working in collaboration with a local civic or non-governmental agency, students will create a public exhibition of design concepts, strategies and visual imaginations of the future of the Auckland urban area. Students will arrange the venue and curate the exhibition. The exhibition will include diegetic prototypes, models, timelines, games and other forms visual information.

**Prerequisite:** DESIGN 100, 101

### DESIGN 233
**The Future Of …**
Students will work with a local government institution, creative industry company or Non-Governmental Organisation. Engaging that organisation as a client seeking to improve future outputs, students will design future forecasting tools for their use.

**Prerequisite:** DESIGN 100, 101

### DESIGN 240
**Sustainable Design NZ**
How has New Zealand used design thinking to advance its national agenda? How can New Zealand businesses develop sustainable practices in the face of global climate change? Students will explore New Zealand’s design legacy, focusing on the history and future of a specific design-led industry or product. In response, students will produce design proposals incorporating principles of sustainability.

**Prerequisite:** DESIGN 100, 101

### DESIGN 241
**Design and Bio-Engineering**
What new materials, products and processes will be developed at the interface between design, bio-chemistry and bio-engineering? How can design help to direct new developments in biological science, and focus that
science on tangible human-centred needs? Students will work in interdisciplinary teams to explore and prototype bio-engineered materials and processes for real-world application. Teams may collaborate with an industry partner.

**Prerequisite:** DESIGN 100, 101

**DESIGN 242**

**15 Points**

**Design and Robotics**

What are the major social and psychological trends driving the adoption of mechatronic and robotic devices? How are these devices being deployed to help people? How can design focus mechatronics and robotics on human-centred needs? Students will work in interdisciplinary teams to explore and prototype mechatronic and robotic devices for real-world application. This may involve collaboration with an industry partner.

**Prerequisite:** DESIGN 100, 101

**DESIGN 243**

**15 Points**

**Design and Health Science**

Explores design in relation to the field of healthcare, well-being, and aged care. After mapping needs within the health sector, students will create design concepts for new devices, technologies, and services that are also responsive to culture. They will develop and prototype new health products and engage the wider issue of systems design across the sector.

**Prerequisite:** DESIGN 100, 101

**Stage III**

**DESIGN 300**

**15 Points**

**Design Research Methodologies**

Introduction to a range of key design methodologies that inform contemporary design thinking, research and practice, within New Zealand, with reference to Māori philosophies of making and community. Drawing on methodological principles, students learn how to develop design strategies, apply design processes and test their design concepts. Consideration will be given to the phasing and planning of design investigations from data analytics to design concepts to practical methods and proposed solutions.

**Prerequisite:** DESIGN 100, 101 and 90 points from DESIGN 200-243

**DESIGN 301**

**45 Points**

**Advanced Design Methods Capstone**

An advanced course in which students complete a major design project in collaboration with a local design professional. The task is to develop a design strategy in response to a real-world issue. Students will engage in research and practical studio work; use multiple tools, technologies and methods; and work in teams. Outcomes will be exhibited, and critiqued by design professionals.

**Prerequisite:** DESIGN 200, 201, 300 and 90 points from DESIGN 210-243

**DESIGN 302**

**15 Points**

**Critical-Technical Positioning**

An advanced course in which students produce a written account of their capstone project (DESIGN 301). The account will take the form of a 5,000 word essay or technical report, with visual evidence. It will provide a critical contextualisation of the capstone project within the field of design, and use design theory to describe the project from concept to execution.

**Prerequisite:** DESIGN 200, 201, 300

**Corequisite:** DESIGN 301

---

**Fine Arts**

**Stage I**

**FINEARTS 101**

**30 Points**

**Studio 1.1**

Students will work on a range of ‘ideas based’ activities that will challenge them progressively to develop and extend their knowledge and skills. These range from short focused projects to those allowing more time for research and personal development. Students will cover a range of the disciplines available in the school and be encouraged to explore in a cross-disciplinary manner.

**Prerequisite:** FINEARTS 103 or 104

**FINEARTS 102**

**30 Points**

**Studio 1.2**

An extension of projects from FINEARTS 101 Studio 1.1. Students will be encouraged to develop personal creative directions with a focus on experimentation and interdisciplinary art and design outcomes.

**Prerequisite:** FINEARTS 101

**Corequisite:** FINEARTS 103 or 104

**FINEARTS 103**

**15 Points**

**Drawing and Related Practices**

An introduction to different approaches to drawing and its relationship with contemporary practices in art and design, including traditional approaches to drawing and drawing techniques. Students will also explore drawing as a conceptual process. Research which investigates drawings as both a technical and conceptual practice is encouraged.

**Prerequisite:** FINEARTS 101 or 102

**FINEARTS 104**

**15 Points**

**Introduction to Critical Studies**

An introduction to contemporary art from a practice-led perspective. Themes, ideas and movements relevant to the field of contemporary art will be introduced, alongside key theoretical and philosophical terms. Students study the ways these contextual and conceptual frameworks inform art production. Emphasises the multiple ways in which art-practice engages with these frameworks. Aspects of tikanga Māori and its relationship to art-making will also be introduced.

**Corequisite:** FINEARTS 101 or 102

**FINEARTS 105**

**15 Points**

**Special Topic**

---

**Stage II**

**FINEARTS 201**

**30 Points**

**Studio 2.1**

Provides an understanding of contemporary artistic practice relevant to students’ developing artistic interests. Students engage with current art and/or design ideas, methodologies and positions and become experienced in understanding their own practice in relationship to contemporary practices in an increasingly reflexive manner. Consists of the supervised completion of a number of prescribed briefs from which students select.

**Prerequisite:** FINEARTS 101, 102, 103 and 104 or FINEARTS 100

**Corequisite:** FINEARTS 203

**FINEARTS 202**

**30 Points**

**Studio 2.2**

Focuses on the conditions of reception relevant to students’ work including: ways meaning is created; how art and/or design works are read; and the significance of presentation...
strategies. Consists of the supervised completion of longer briefs, of which one is self-generated.
Prerequisite: FINEARTS 201

FINEARTS 203 15 Points
Studio 2.3
Study and exploration through practice of an issue relevant to a discipline or area of contemporary discourse. Students will understand, explore and analyse a selected issue through readings, discussions and production and presentation of studio work.
Prerequisite: FINEARTS 101, 102, 103 and 104 or FINEARTS 100
Corequisite: FINEARTS 201 or 202

FINEARTS 204 15 Points
Critical Studies
A practice-led perspective to consider the key contexts and concepts relevant to contemporary art introduced in FINEARTS 104. Examines selected theoretical and philosophical terms, their broader cultural contexts, and their relevance for art-practice. Complements FINEARTS 207 and 208, by exploring art’s dynamic relationship to the range of contexts and knowledge discussed, and the ways in which these relationships inform art’s production and reception.
Prerequisite: FINEARTS 101, 102, 103, 104
Corequisite: FINEARTS 201 or 202 or 207 or 208 or 209 or 212

FINEARTS 205 15 Points
Special Topic

FINEARTS 206 15 Points
Fields of Practice 2
Allows students to study and explore through practice an issue relevant to a media area, with the aim of encouraging reflexivity in relation to media processes. In this course students will understand, explore and analyse a selected issue through readings, discussions and production and presentation of studio work.
Prerequisite: FINEARTS 101, 102, 103, 104, 201, 203
Corequisite: FINEARTS 202

FINEARTS 207 45 Points
Studio Practice 1
Provides an understanding of contemporary artistic practice relevant to students’ developing interests. Students will engage with current art ideas, methodologies and positions and will gain experience in understanding their own work in relationship to local and international contemporary art practices. Consists of the supervised completion of a number of prescribed briefs. Discipline-based and interdisciplinary learning will be undertaken, with a dual emphasis on the development of conceptual thinking and material languages.
Prerequisite: FINEARTS 101, 102, 103, 104
Restriction: FINEARTS 201, 203

FINEARTS 208 45 Points
Studio Practice 2
Focuses on the conditions of reception relevant to students’ work including ways meaning is created; how art works are read; and the significance of presentation strategies. Consists of a range of supervised briefs embracing media specific, interdisciplinary, Māori, local and global approaches to creating art works. Students will also engage in focused contextual study in an area relevant to their studio interests.
Prerequisite: FINEARTS 207 or 209
Restriction: FINEARTS 202, 206

FINEARTS 209 30 Points
Studio Practice 1
Provides an understanding of contemporary artistic practice relevant to students’ developing interests. Students will engage with current art ideas, methodologies and positions and will gain experience in understanding their own work in relationship to local and international contemporary art practices. Consists of the supervised completion of a number of prescribed briefs. Discipline-based and interdisciplinary learning will be undertaken, with a dual emphasis on the development of conceptual thinking and material languages.
Prerequisite: FINEARTS 101, 102, 103, 104
Restriction: FINEARTS 201, 203, 207

FINEARTS 210G 15 Points
Understanding Contemporary Visual Arts Practice
How does the contemporary artist and designer work? This course presents first hand, locally engaged practitioners’ perspectives on creative practice. On successful completion of this course students will be able to access local, contemporary art and design with confidence, and to discuss examples of practitioners’ methodologies and areas of investigation. Course work will involve active exploration of the local art world.
Prerequisite: 60 points passed

FINEARTS 211G 15 Points
Understanding Contemporary Fashion Design
Investigates the relationship between fashion design and identity to build understanding of the increasing rapidity of clothing change as both the product of individual choice and the manifestation of a need for community. The emphasis will be on the consumption of fashion and its relationship to the human body with reference to fashion theory in the context of the broader literatures of gender, class and ethnicity.
Prerequisite: 60 points passed

FINEARTS 212 30 Points
Studio Practice 2
Focuses on the conditions of reception relevant to students’ work including ways meaning is created; how art works are read; and the significance of presentation strategies. Consists of a range of supervised briefs embracing media specific, interdisciplinary, Māori, local and global approaches to creating art works.
Prerequisite: FINEARTS 207
Restriction: FINEARTS 202, 206, 208

Stage III

FINEARTS 302 30 Points
Studio 3.1
Builds on the conceptual, material, technical, and contextual work undertaken in Studio 2. Students will explore and develop, through studio activities, a range of methodologies required to generate and sustain an independent practice. Students are required to pursue open-ended exploration and critical analysis within their making and thinking with an emphasis on experimentation and reflexivity.
Prerequisite: FINEARTS 201, 202, 203, 206 or FINEARTS 200
Corequisite: FINEARTS 304

FINEARTS 303 30 Points
Studio 3.2
Extends the self-directed aspect of FINEARTS 301 through work on one or two long-term personal projects. A key focus is the identification of and response to a contextual issue relevant to contemporary art and/or design. Students will begin to develop an understanding of their practice within the context of a wider field of contemporary art and design practices.
Prerequisite: FINEARTS 302, 304
FINEARTS 304 15 Points
Studio 3.3
Builds on the different disciplines or areas of contemporary discourse explored in Studio 2. Students will study issues relevant to their individual practice and analyse, extend and develop an understanding of them through readings, discussions and the production and presentation of studio work.
Prerequisite: FINEARTS 201, 202, 203, 206 or FINEARTS 200
Corequisite: FINEARTS 302 or 303

FINEARTS 305 15 Points
Critical Practices
Presents selected forms of contemporary art practices and their related concepts. Considers these practices to enable a critical understanding of a broad range of contemporary art production and its relevance to students’ own emerging practice. Provides a critical introduction to a range of artists’ writing. Complements FINEARTS 308 and 309 by critically exploring the value of certain frameworks, including: philosophy, theory, art history, writing, tikanga Māori and the socio-cultural for a self-directed practice.
Prerequisite: FINEARTS 204
Corequisite: FINEARTS 302 or 303 or 308 or 309 or 310 or 311

FINEARTS 306 15 Points
Special Topic
FINEARTS 307 15 Points
Fields of Practice 4
Building on the media areas explored in Studio 2, this course allows students to study and explore an idea or issue in and around an area of contemporary art and/or design discourse. Students will investigate, analyse and develop the selected idea or issue through readings, discussions alongside the production and presentation of studio work.
Prerequisite: FINEARTS 101, 102, 103, 104, 201, 202, 203, 206, 302, 304
Corequisite: FINEARTS 303

FINEARTS 308 45 Points
Studio Practice 3
Builds upon the conceptual, material, technical and contextual work undertaken in Studio Practice 2. Students will explore and develop a range of methodologies that will enable them to understand the principle of a self-directed practice. Students are required to pursue open-ended exploration and critical analysis within their studio work, with an emphasis on experimentation and reflexivity. Consists of a range of supervised briefs embracing media specific, interdisciplinary, Māori, local and global approaches to creating art works.
Prerequisite: FINEARTS 204, 207, 208
Restriction: FINEARTS 302, 304, 308

FINEARTS 309 45 Points
Studio Practice 4
Extends the self-directed aspect of FINEARTS 308 through work on one or two long-term personal projects. A key focus is the identification of, and response to, a contextual issue or mode of practice relevant to contemporary art. Students will begin to develop an understanding of their own practice within the context of a wider field of local and global contemporary art, and contemporary Māori Art practices.
Prerequisite: FINEARTS 308
Restriction: FINEARTS 303, 307, 309

Stage IV
FINEARTS 402 30 Points
Studio 4.1
Places emphasis on students’ understanding and articulation of concepts and discourse surrounding their work. Promotes the development of independent artistic and/or design philosophies and their effective use in relation to studio practice.
Prerequisite: FINEARTS 302, 303, 304 and 305 or FINEARTS 300
Corequisite: FINEARTS 403

FINEARTS 403 30 Points
Studio 4.2
Advances students’ understanding of the way meaning effects are produced by things done or made and the way they are presented. Develops students’ personal methodology through the production of a coherent body of work supported by a considered use of studio research and explorative work.
Prerequisite: FINEARTS 302, 303, 304 and 305 or FINEARTS 300
Corequisite: FINEARTS 402

FINEARTS 404 30 Points
Studio 4.3
Further develops students’ understanding and articulation of concepts and discourse surrounding their studio work. Promotes the development of independent artistic and/or design philosophies and their effective use in relation to studio practice.
Prerequisite: FINEARTS 402
Corequisite: FINEARTS 403 or 405

FINEARTS 405 30 Points
Studio 4.4
Directed at the synthesis and refinement of previous studio practice towards the production and presentation of a body of studio work that demonstrates advanced understandings and professional capabilities. Emphasis placed on the development of presentation strategies appropriate to the exhibition and/or professional submission of work.
Prerequisite: FINEARTS 402
Corequisite: FINEARTS 402 or 404

For further information please refer to the note on page 488.
FINEARTS 406
Special Topic
A development of Part III Studio courses in selected fields.

FINEARTS 407
Special Topic
A development of Part III Studio courses in selected fields.

FINEARTS 408
Studio 4 A
Assists students to develop their creative practice through the production of a coherent body of studio-based work. This will be supported by considered development of an artistic and/or design philosophy and its effective use in relation to studio practice. The course encourages a solid understanding of presentation strategies appropriate to the exhibition and/or professional presentation of creative work. 
Prerequisite: FINEARTS 305, 308, 309
Restriction: FINEARTS 402, 403

FINEARTS 409
Studio 4 B
Building on Studio 4A this course will assist students to develop further their creative practice through the production of a coherent body of studio-based work. Students will further develop their understanding and articulation of concepts and discourses relevant to their studio work. The course promotes a reflexive understanding of creative practice and strategies for its professional presentation.
Prerequisite: FINEARTS 408
Restriction: FINEARTS 404, 405

Postgraduate 700 Level Courses

FINEARTS 756A 60 Points
Research Project
A research project in fine arts and/or design. 
To complete this course students must enrol in FINEARTS 756 A and B

FINEARTS 756B 60 Points
Research Project
A research project in fine arts and/or design. 
To complete this course students must enrol in FINEARTS 756 A and B

FINEARTS 790A 60 Points
Research Project
A research project focused on artistic or related outcomes. Individualised research-based programmes of study are supported through a range of studio critiques, various forms of group tutorials, technical workshops, reading groups, lectures and frequent one-to-one meetings with studio staff. Research projects are thus developed through an integrated programme including studio practice, seminars, and/or written coursework and reading groups. 
To complete this course students must enrol in FINEARTS 790 A and B

FINEARTS 790B 60 Points
Research Project
A research project focused on artistic or related outcomes. Individualised research-based programmes of study are supported through a range of studio critiques, various forms of group tutorials, technical workshops, reading groups, lectures and frequent one-to-one meetings with studio staff. Research projects are thus developed through an integrated programme including studio practice, seminars, and/or written coursework and reading groups. 
To complete this course students must enrol in FINEARTS 790 A and B

FINEARTS 795A 60 Points
Research Portfolio
A practice-based research project involving the exploration of themes in contemporary fine arts and design. The final submission of the project will be a presentation in the form of an exhibition, performance or other such outcome as approved by the Head of Fine Arts. The presentation will be supported by a written component that introduces topics and methodological directions relevant to the creative project. 
Prerequisite: Departmental approval
To complete this course students must enrol in FINEARTS 795 A and B

FINEARTS 795B 60 Points
Research Portfolio
A practice-based research project involving the exploration of themes in contemporary fine arts and design. The final submission of the project will be a presentation in the form of an exhibition, performance or other such outcome as approved by the Head of Fine Arts. The presentation will be supported by a written component that introduces topics and methodological directions relevant to the creative project.

To complete this course students must enrol in FINEARTS 798 A and B

Music

Stage I

MUS 102 15 Points
Materials of Music 2
Continuation of work begun in MUS 101 in harmony and analysis, aural skills and musicianship. 
Prerequisite: MUS 101
Restriction: MUSIC 105, 107

MUS 103 15 Points
Music Fundamentals
A practical and theoretical overview of the fundamental written and aural skills required for music literacy. This course prepares students for MUS 104 and further university-level study and practice in music. 
Restriction: MUS 100, may not be taken with or after passing MUS 101, 104, 174, 184, 284

MUS 104 15 Points
Music Literacies
The development of music theory, aural skills and perception necessary to be an effective musician. The study of basic theory, harmony, analysis, aural perception and musicianship with exemplars from classical, jazz and popular music genres. Includes a choral performance component. 
Prerequisite: MUS 100 or 103 or Departmental approval

MUS 106 15 Points
Ensemble Communication and Direction
An examination of the skills and techniques required for the communication and direction of ensembles including orchestras, bands, jazz and contemporary ensembles, choirs and other performing arts contexts. Includes knowledge of repertoire style, genre and period associated with directing music. 
Restriction: MUSIC 106

MUS 110 15 Points
Composition 1
An introduction to concepts, craftsmanship and creativity in instrumental/vocal composition and sonic arts. Students
will learn and apply skills through the completion of both notational and sound-based exercises, in-class analysis, discussion of relevant repertoire and the realisation of an end-of-semester portfolio of original compositions. 

Prerequisite: Entrance is by Composition Portfolio. Departmental approval.

MUS 111 Composition 2
Continuation of work begun in MUS 110. 
Prerequisite: MUS 110 or MUSIC 110

MUS 120 Performance 1

Academic Integrity
ACADINT A01  0 Points
Academic Integrity Course
The Academic Integrity Course is an online course designed to increase student knowledge of academic integrity, university rules relating to academic conduct, and the identification and consequences of academic misconduct. Students work through a series of modules, outlining scenarios that they may encounter while studying at university. Each scenario provides information on relevant rules, resources and expected behaviour.

Postgraduate 700 Level Courses
ACADPRAC 701  30 Points
ACADPRAC 701A  15 Points
ACADPRAC 701B  15 Points
Learning, Teaching and Assessment
Participants will become familiar with theoretically informed scholarly literature on tertiary learning and teaching, including the educational literature of their own disciplines, and they will test pedagogical theory against practice. All assignments and assessments will be integrated as closely as possible with the participants’ current teaching activities. To complete this course students must enrol in ACADPRAC 701 A and B, or ACADPRAC 701

ACADPRAC 702  15 Points
Academic Citizenship and Professionalism
Designed to help academic staff negotiate the apparently conflicting demands of teaching, research and service. Participants will explore the governmental, institutional and disciplinary contexts in which their professional practice takes place. They will devise and implement synergistic strategies for fostering their own continuing professional development as teachers, researchers, and citizens of the academy.

ACADPRAC 703  15 Points
Special Topic: Engagement in Digital Learning and Teaching
How can we provide a ‘high quality learning environment that maximises the opportunity’ for our increasingly diverse, demanding and technologically sophisticated student body’ (The University of Auckland Strategic Plan 2013-2020)? Draws on international best practice in the use of new technologies to promote and support research-informed innovation in teaching and learning that enhances student engagement and achievement.

Restriction: EDUC 111, 112, 113, 140, EDUCM 140

EDUC 119 15 Points  Development, Learning and Teaching  
Presents an introduction to developmental and psychological theory and research and its application to teaching and learning within a variety of educational settings. Understandings for creating effective learning environments which foster high levels of motivation for all learners will be identified through an exploration of typical and atypical development; and behavioural, cognitive, constructivist and social approaches to teaching and learning.  
Restriction: EDUC 117

EDUC 121 15 Points  How People Learn  
Focuses on learning in formal and informal settings and addresses such questions as: why do some things seem easier to learn than others, why do we forget things we once knew, and why do some people learn faster or better than others? Examines the nature of intelligence and how to help personal learning or the learning of others.  
Restriction: EDUC 111, 117

EDUC 122 15 Points  Learning Sexualities  
How and what do we learn about sexualities in New Zealand? Learning about sexualities is viewed as occurring both formally (eg, through sexuality education) and informally (eg, through the media) in a diversity of social sites. Schools are examined as one significant site where students are offered sexual meanings. The historical derivation and current context of contemporary education about sexuality along with its social effects are investigated.

EDUC 142 15 Points  Health and Physical Education in a Diverse Society  
Introduces students to thinking critically about Health and Physical Education. Examines discourses about health and physical activity from historical and sociological perspectives. Introduces diversity as it relates to educational opportunity in Health and Physical Education. Addresses such questions as: How are notions about health and physical education and difference constructed and supported?  
Restriction: EDUC 141, EDUCM 141

Stage II

EDUC 200 15 Points  Youth Mentoring  
A theoretical and applied study of youth mentoring. Develops the content knowledge, skills and understanding consistent with the environmental education guidelines to enable effective teaching and learning approaches about, for and within the environment. Addresses questions such as: How do teachers design quality learning experiences for a diverse range of learners? How can social sciences, science and technology education enhance the potential of this educational focus?

To complete this course students must enrol in EDCURSEC 689 A and B, or EDCURSEC 689

EDCURSEC 690 15 Points
EDCURSEC 690A 7.5 Points
EDCURSEC 690B 7.5 Points

Multi-disciplinary Approaches
Develops pedagogical knowledge, skills and attitudes associated with teaching in multi-disciplinary contexts incorporating information and communication technologies. Addresses questions such as: What are the important principles, concepts and skills associated with multi-disciplinary teaching? How do teachers plan for cross-curricular projects? How can multi-disciplinary teams operate effectively? How can the use of ICT contribute to effective learning?

Restriction: EDCURR 625
To complete this course students must enrol in EDCURSEC 690 A and B, or EDCURSEC 690

Postgraduate 700 Level Courses

EDCURSEC 700 30 Points
Responsive Pedagogies
Within a curriculum specialism this course examines responsive pedagogies and how these enhance engagement and achievement of priority learners. Through classroom practice students reflect critically on how responsive pedagogies impact on learning.

EDCURSEC 701 30 Points
Enacting Core Practices
Examines evidenced-based core practices that have the potential to improve student achievement. Within the context of curriculum areas, students will enact these practices and inquire into the impact of their teaching on priority learners.

EDCURSEC 709 15 Points
Curriculum, Teaching, and Learning
Critically explores the New Zealand Curriculum and secondary school qualifications, and develops pedagogical content knowledge of planning, teaching and assessment in specialist learning areas. A short teaching practice enables students to apply knowledge to practice, and critically examine its relationship to relevant theory and research.

EDCURSEC 719A 15 Points
EDCURSEC 719B 15 Points

Learning Area Inquiry
Within the context of concurrent field-based teaching, critically reflects on effective teaching practices, and theory and research evidence that underpin them. Develops pedagogical content knowledge, and understanding and use of inquiry within a specialist learning area. Students demonstrate evidence of self-awareness, awareness of learning through use of individualised student data, problem solving skills, and an understanding of culturally responsive pedagogy.

To complete this course students must enrol in EDCURSEC 719 A and B

Education Curriculum Studies

Stage I

EDCURRIC 101 15 Points
Arts Education Primary
Develops students’ knowledge, skills and attitudes associated with planning, teaching and assessing children’s learning in the arts: dance, drama, music and visual art. Addresses questions such as: Why are the arts important to children’s learning? How do teachers design quality learning experiences that encourage individual responses from a diverse range of learners? How do we monitor and assess learning? Restriction: EDCURR 106, 206, EDCURRM 101

EDCURRIC 102 15 Points
Language and Literacy Education Primary I
Develops the knowledge, skills and attitudes associated with planning, teaching and assessing for students’ learning in the English curriculum. Addresses questions such as: What do teachers need to know to teach the curriculum effectively? How do teachers’ literacy competencies affect student learning? How do teachers balance the needs of the curriculum and the needs of learners? Restriction: EDCURR 202, EDCURRM 102

EDCURRIC 103 15 Points
Health and Physical Education
Develops understandings of the theories, concepts and practices that support learning and teaching in health and physical education. Addresses questions such as: How do teachers implement quality learning experiences based on the health and physical education curriculum for effective learning to occur for a diverse range of learners? How is learning monitored and assessed? Restriction: EDCURR 108, EDCURRM 103

EDCURRIC 104 15 Points
Primary Mathematics and Statistics Education I
Develops knowledge and understanding of the nature of mathematics and statistics. Considers questions related to primary school mathematics and statistics education such as: What is the purpose and role of mathematics and statistics in the New Zealand Curriculum Framework? What is meant by thinking mathematically and statistically? What are the components of, and key concepts in, the national curriculum? Restriction: EDCURR 203, EDCURRM 104

EDCURRIC 105 15 Points
Science Education Primary
Develops an appreciation of the nature of science that supports conceptual understandings and quality teaching and learning approaches in science education. Addresses questions such as: How do teachers design quality learning experiences based on the science curriculum so that positive engagement and effective learning can occur for a diverse range of learners? How is learning monitored and assessed? Restriction: EDCURR 204, EDCURRM 105

EDCURRIC 106 15 Points
Social Studies Education Primary
Develops students’ knowledge and skills associated with planning for teaching and learning in Social Studies. Addresses questions such as: What do teachers need to know and understand about the history, nature and purpose of Social Studies education? How are curriculum requirements, teaching methodologies, management strategies and resources used to plan for students’ diverse needs? How is learning monitored and assessed? Restriction: EDCURR 107

EDCURRIC 107 15 Points
Technology Education Primary
Develops knowledge, skills and attitudes associated with planning, teaching and assessing for children’s learning in Technology Education. Addresses questions such as: What do teachers need to know about the nature and purpose of Technology Education? How do teachers design quality learning experiences for a diverse range of learners? How is learning monitored and assessed? Restriction: EDCURR 106, 209, EDCURRM 107

EDCURRIC 110 15 Points
Dance/Drama in the Early Years
Develops fundamental knowledge, skills and attitudes associated with planning, teaching and assessing children’s dance and drama learning in early childhood. Addresses questions such as: Why are dance and drama important to children’s learning? How do teachers design quality learning experiences that encourage individual responses from a diverse range of learners? How do we assess children’s learning?

EDCURRIC 111 15 Points
Experiencing Technology
Develops knowledge and understanding of the components of technological literacy as it relates to young children. Develops understanding of appropriate pedagogical strategies to enhance children’s learning in technology. Addresses questions such as: What is technological literacy? How can we develop technological literacy in young children? What environments encourage children’s exploration of technological experiences?

EDCURRIC 112 15 Points
Hauora: Early Years Movement
Develops knowledge and understanding of the place of movement in childhood development, growth and learning. Examines questions such as: What is the nature and purpose of physical activity in the early years? What learning and teaching strategies, teacher disposition and practices ensure quality experiences for learning of, through and about movement for diverse learners?

EDCURRIC 114 15 Points
Music in the Early Years
Develops fundamental understanding of knowledge, skills, and attitudes required to assess, plan, and facilitate children’s learning through listening, singing, moving, playing and creating with music. Addresses questions such as: What is the value of music in early childhood? How do teachers design quality-learning experiences that motivate and enhance children’s learning through music?

EDCURRIC 115 15 Points
Science in the Early Years
Develops an appreciation of the nature of science, which supports conceptual understandings and quality teaching and learning approaches to science education. Examines questions such as: How do teachers foster quality learning environments for infants, toddlers and young children based on the early childhood curriculum so that effective learning in science can occur for a diverse range of learners?

EDCURRIC 116 15 Points
Visual Arts in the Early Years
Develops fundamental knowledge, skills and attitudes associated with planning, teaching and assessing children’s visual arts learning in early childhood. Addresses questions
such as: Why is visual arts important to children's learning? What are effective design features of quality learning experiences that encourage individual responses from a diverse range of learners? How do we assess for children’s learning?

EDCURRIC 130 15 Points
Physical Education Practice 1
Introduces students to the practical foundations of physical education. Involves experiential learning including residential field-based experiences. Addresses such questions as: How do I perform selected physical activities, improve my technical knowledge of the competencies required in the selected activities, analyse selected movements and provide feedback to others?

EDCURRIC 131 15 Points
Physical Education Practice 2
Develops students’ competency and knowledge about the physical foundations of physical education. Emphasis is placed on experiential learning. Addresses such questions as: Do I have the knowledge and competence to be able to perform selected physical activities, to apply appropriate technical knowledge to specific physical activities, and to analyse selected movements and provide feedback?
Prerequisite: EDCURRIC 130

EDCURRIC 132 15 Points
Bio-physical Foundations of Health and Physical Education
Introduces students to the anatomical and physiological foundations of Health and Physical Education with particular reference to the roles of body systems in human movement. Addresses such questions as: What roles do the musculo-skeletal systems play in movement and learning? How do the circulo-respiratory systems work during rest and activity? How do the neuro-muscular systems function to produce movement?

EDCURRIC 133 15 Points
Concepts Underpinning Skilled Movement
Introduces students to the bio-physical foundations of Health and Physical Education including the roles of skill acquisition and bio-mechanics in physical education contexts. Addresses such questions as: How can knowledge of the internal and external mechanics be applied to understand human movement? What is skill and how do people learn motor skills?

EDCURRIC 134 15 Points
Expressive Movement and Physical Education
Develops an understanding of purposeful expressive physical activity that embraces aesthetic and inherent cultural values in learning dance and te ao kori. Addresses such questions as: What knowledge do teachers need in a range of aesthetic and bicultural physical education contexts to develop this work in schools? What choreographic skills are needed for devising aesthetic movement compositions?

EDCURRIC 135 15 Points
Socio-cultural Foundations of Health and Physical Education
Introduces subject matter knowledge in the socio-cultural foundations of Health and Physical Education. Addresses such questions as: What is the nature of sport and why do people play it? In what ways is the body a cultural construct? What educational and cultural practices influence human movement culture and mediate understanding of human physicality?

Stage II

EDCURRIC 200 15 Points
Biophysical Concepts in Physical Education
Develops knowledge and understanding of exercise physiology and motor skill learning in the context of the teaching of Physical Education. Addresses such questions as: What role does physiology play during exercise? What physiological responses occur during, and as a result of exercise? What is the nature of skill learning? What theories inform our understanding of skill acquisition?
Prerequisite: EDCURRIC 132, 133

EDCURRIC 202 15 Points
Languages and Literacy Education Primary 2
Deepens the knowledge, skills and attitudes associated with planning, teaching and assessing for individual students’ learning in the English curriculum. Addresses questions such as: What are effective literacy practices for working with individual learners? How are wider concepts of literacy including bilingualism and biliteracy developed? How is learning monitored and assessed?
Prerequisite: EDCURRIC 102
Restriction: EDCURRIC 203, EDCURRM 202

EDCURRIC 204 15 Points
Primary Mathematics and Statistics Education 2
Develops the knowledge, skills and understanding for designing quality learning experiences for diverse learners. Considers questions related to primary school mathematics and statistics education such as: What are the concepts and learning progressions in the national curriculum? What theoretical models of teaching, learning and assessment best inform teachers about the growth of understanding? What constitutes effective teaching practice?
Prerequisite: EDCURRIC 104
Restriction: EDCURRIC 203, EDCURRM 204

EDCURRIC 211 15 Points
Languages and Literacies
Develops knowledge, critical skills and dispositions associated with assessing, planning and teaching for children's learning in languages and literacies. Addresses questions such as: What do teachers need to know and be, to teach with diverse learners, family, whānau and communities? What resources and strategies maximise complexity and continuity such that all children identify as competent and confident communicators in Aotearoa New Zealand?

EDCURRIC 212 15 Points
Mathematics in the Early Years
Develops knowledge and understanding of early mathematical concepts and their relationship with holistic learning environments. Considers questions such as: What are early mathematical concepts? What is effective planning for mathematical possibilities within a play-based early childhood programme? What constitutes an holistic approach to mathematics learning?

EDCURRIC 213 15 Points
Social Sciences Education
Develops knowledge, skills, dispositions associated with children's learning and social sciences education. Addresses questions such as: What do teachers need to know about belonging, contribution, family and community, and empowerment? What do teachers need to understand about culture and identity? How does pedagogical documentation support learning and teaching? What resources and strategies maximise contribution and participation?
EDCURRIC 220 15 Points
Special Topic

EDCURRIC 230 15 Points
Physical Education Ngā Kākano
Examines ngā tikanga Māori in the physical education context. Addresses such questions as: How can teachers understand what it is to be Māori? What is the cultural significance of Māori movement forms and ngā mahi a rēhia (games and pastimes)? What is a culturally responsive pedagogy? Includes marae based experiences where Māori values, traditions and beliefs are practised.
Prerequisite: EDUC 142

EDCURRIC 231 15 Points
Physical Education Practice 3
Further develops the knowledge, skills and dispositions relating to a practical knowledge base with emphasis being placed on integrating theory and practice. Involves practical learning and addresses such questions as: What knowledge is relevant to: teach physical skills effectively, analyse the learning environment and the diverse needs of learners and provide appropriate feedback to assist learning?
Prerequisite: 15 points from EDCURRIC 130, 131

EDCURRIC 232 15 Points
Physical Education Practice 4
Broadens the practical knowledge base of physical activities appropriate for inclusion in physical education. Emphasis is placed on practical learning about differing physical activity practices in our diverse society. Addresses such questions as: What is the place and range of possibilities of physical activity in contemporary society? How do different communities engage in physical activity?
Prerequisite: 15 points from EDCURRIC 130, 131

EDCURRIC 233 15 Points
Youth Health Education
Develops an understanding of adolescent health priorities in New Zealand and their influences on teaching and learning in schools. Addresses such questions as: Why is this subject important? What is the health status of adolescents in New Zealand? What content knowledge is relevant to teaching and learning in Health?
Prerequisite: EDUC 142

EDCURRIC 234 15 Points
Physical Activity and Health
Examines human physiological responses to physical work and the research evidence linking health and physical activity. Addresses such questions as: What is the nature of work? How do humans respond and adapt to work? What activities promote adaptation to physical work? What is the veracity of the evidence linking physical activity and health?
Prerequisite: 45 points from EDUC 142, EDCURRIC 132, 133, 135

EDCURRIC 235 15 Points
Senior School Health and Physical Education
Examines and critically evaluates Health and Physical Education in the New Zealand Curriculum and contemporary assessment and qualifications for Years 11-13. Addresses such questions as: What knowledge, skills and attitudes are required to teach and assess Year 11-13 students? What are the issues associated with the learning environments, teaching and assessment methods used by teachers at these levels?
Prerequisite: 45 points from EDUC 142, EDCURRIC 132, 133, 135

EDCURRIC 236 15 Points
Teaching Outdoor Education
Examines the role of outdoor education as an educational process in physical education contexts. Involves camping and other experiential learning to develop outdoor skills, knowledge, attitudes and behaviours for teaching outdoor education in schools. Addresses such questions as: How does pedagogy and programme design support safe, effective learning in the outdoors? What are the legal responsibilities for teaching outdoor education?

EDCURRIC 237 15 Points
Recreation and Leisure
Examines the nature of recreation and leisure in contemporary society. Addresses such questions as: How does leisure relate to concepts of lifestyle, work and play? What factors influence participation in recreation and leisure activities? How does one educate for leisure? Involves practical learning experiences.

EDCURRIC 238 15 Points
Special Needs Physical Education
Further examines the principles and practices of inclusion within physical education and physical activity contexts. Addresses such questions as: What knowledge, skills and attitudes are appropriate for teaching people with disabilities? Includes practical work based in schools or the community.

EDCURRIC 239 15 Points
Teaching and Coaching Sport
Examines principles and practices associated with teaching and coaching sport. Emphasis is given to practice in applied settings. Addresses such questions as: What is the role of the coach? How do coaches provide quality coaching and management of sports teams? What knowledge is relevant to coaching sport? How do coaches analyse the playing environment and needs of players?

EDCURRIC 241 15 Points
Special Study in Health and Physical Education
Prerequisite: Approval by Head of Programme required

Stage III

EDCURRIC 303 15 Points
Scientific and Technological Literacies: Primary
Develops a critical view of scientific and technological literacies and an understanding of their inter-relationship within a range of learning environments. Asks questions such as: What are scientific and technological literacies? What do teachers need to know to be scientifically and technologically literate? How can teachers develop a quality science/technology learning environment?
Prerequisite: 225 points passed in the BEd(Tchg) Primary Specialisation

EDCURRIC 309 15 Points
Senior Primary
Investigates quality teaching and learning across the curriculum for learners in Years 7-8. Addresses questions such as: What constitutes effective teaching for diverse learners at these levels? How can curriculum be integrated at this level and how can the effectiveness of this integration be monitored?
Prerequisite: 225 points passed in the BEd(Tchg) Primary Specialisation

EDCURRIC 310 15 Points
Pasifika Learners
Examines what helps Pasifika learners to succeed in New Zealand education. Addresses questions such as: Who are Pasifika learners? How is Pasifika success addressed in classrooms/centres? How can the study of Pasifika learners
help promote effective teaching in multiethnic primary and intermediate schools in New Zealand?
Prerequisite: 225 points passed in the BEd(Tchg) Primary Specialisation

EDCURRIC 315 15 Points
Special Topic

EDCURRIC 322 15 Points
Special Study

EDCURRIC 333 15 Points
Advanced Youth Health Education
Critically examines social determinants of adolescent health in New Zealand and analyses their relevance to the Health and Physical Education curriculum. Addresses such questions as: How is the health teacher’s role determined by adolescent health issues? What pedagogical practices in health education address adolescent health status?
Prerequisite: EDCURRIC 233

EDCURRIC 334 15 Points
Exercise and Physical Education
Critically examines and applies knowledge about exercise practices in physical education contexts. Addresses such questions as: What evidence base supports current exercise principles? How can the diverse exercise needs of students be addressed in physical education contexts? What issues and dilemmas are associated with current exercise practices? What influences how exercise is programmed in a physical education context?
Prerequisite: EDCURRIC 234

EDCURRIC 335 15 Points
Research Study in Health and Physical Education
Examines research philosophy, approaches and methods in education as a basis for informing professional practice in health and physical education. Addresses such questions as: How can teachers use research to inform their teaching? What represents quality research in educational settings? What issues influence the design and conduct of a research project?
Prerequisite: At least 60 points from EDCURRIC 230-241, 333-337

EDCURRIC 338 15 Points
Enhancing Teaching Through Science
Investigates personal conceptual science understandings and selected science education research to inform effective practice. Selected scientific concepts will be examined to provide experience in enhancing teaching through science and engaging children in effective learning in a variety of environments.
Prerequisite: 225 points passed in the BEd(Tchg) Primary Specialisation
Restriction: EDCURRIC 260

EDCURRIC 339 15 Points
Developing Classroom Mathematics Programmes
Develops knowledge and understanding of classroom mathematics procedures and learning environments. Examines the integrated nature of learning, teaching and assessment with respect to long term programmes. Aims to further develop teacher confidence in, and positive attitudes toward, the teaching and learning of mathematics through critical analysis and personal reflection.
Prerequisite: 225 points passed in the BEd(Tchg) Primary Specialisation

EDCURRIC 343 15 Points
Indigenous Issues in Social Studies
An examination of indigenous issues and perspectives as they relate to the teaching and learning of Social Studies.
Prerequisite: 225 points passed in the BEd(Tchg) Primary Specialisation

EDCURRIC 344 15 Points
Social Studies: Changes and Challenges
An examination of changes in the New Zealand Social Studies curriculum since 1940; the nature and purpose of Social Studies education; citizenship in a diverse society; planning for teaching, learning and assessment in Social Studies; challenges associated with planning engaging and effective Social Studies programmes.
Prerequisite: 225 points passed in the BEd(Tchg) Primary Specialisation

EDCURRIC 345 15 Points
Literacy in the Primary School
An exploration of a variety of literacy processes, approaches, strategies and resources relevant to literacy learning and teaching in the New Zealand primary school curriculum. The emphasis will be on the place of reading and its relationship to oral, written and visual language.

EDCURRIC 347 15 Points
EDCURRIC 347A 7.5 Points
EDCURRIC 347B 7.5 Points
Helping Children Succeed in Maths
The development of a theoretical base for analysing children’s mathematics understanding and associated pedagogies.
To complete this course students must enrol in EDCURRIC 347 A and B, or EDCURRIC 347

EDCURRIC 349A 7.5 Points
EDCURRIC 349B 7.5 Points
Understanding and Extending Mathematical Thinking
An investigation of a wide range of strategies that children use to solve mathematical problems. Reflects on reasons for learners’ naive conceptions and subsequent planning for teaching thinking strategies.
To complete this course students must enrol in EDCURRIC 349 A and B

EDCURRIC 350 15 Points
EDCURRIC 350A 7.5 Points
EDCURRIC 350B 7.5 Points
Teaching Mathematics Investigations
An examination of investigative approaches to the teaching and learning of mathematics within the context of problem solving.
Prerequisite: 225 points passed in the BEd(Tchg) Primary Specialisation
To complete this course students must enrol in EDCURRIC 350 A and B, or EDCURRIC 350

EDCURRIC 356 15 Points
Teaching and Learning in the Visual Arts
Extends the theoretical and practical knowledge base for visual arts teaching and learning. Examines pedagogies used to support the development of visual arts literacy. Connects learning in the visual arts with the guiding structures of national curriculum documents and investigates issues such as addressing diversity and using new technologies. Identifies action and reflection practices that enhance visual arts learning.
EDCURRIC 357 15 Points
Dance Studies
An exploration of the processes underlying creation and presentation of dance performance. There will be opportunity, through practical and theoretical activities, to develop abilities to integrate elements of dance and choreography.

EDCURRIC 358 15 Points
Learning Through Dance
An exploration of the theoretical and practical underpinnings of the practice of dance and movement. Arts collaboration and cross-curricular programmes in movement and dance will be investigated.

EDCURRIC 360 15 Points
Teaching and Planning in Technology
An in-depth analysis of technology, and technology education and teaching practice, in primary and early childhood environments.
Prerequisite: 225 points passed in the BEd(Tchg) Primary Specialisation

EDCURRIC 361 15 Points
The Performance Arts in Education
A critical examination of the performance of creating in the arts. The processes of creating and shaping works selected from dance, drama, music and the visual arts will be analysed and used to plan and implement arts education practices in specified educational settings.
Prerequisite: 225 points passed in the BEd(Tchg) Primary Specialisation

EDCURRIC 362 15 Points
Drama and Learning
An examination of the learning processes initiated by the use of drama in the classroom with a particular focus on language use. There will be opportunity to design, implement and evaluate drama programmes.
Prerequisite: 225 points passed in the BEd(Tchg) Primary Specialisation

EDCURRIC 363 15 Points
Drama Studies
An exploration of practical and theoretical activities relating to drama and performance in a range of contexts.

EDCURRIC 364 15 Points
Special Topic

EDCURRIC 365 15 Points
Special Topic

EDCURRIC 366 15 Points
Special Topic

EDCURRIC 367 15 Points
Teaching Children's Literature
A close examination of selected children's literature texts (focusing mainly on novels and picture books) with reference to literary and pedagogical theories. Implications for classroom practice are critically examined.
Restriction: EDCURRIC 262

EDCURRIC 368 15 Points
Initiating and Supporting Learning in Music
Development of the knowledge base for the teacher of Music, linking curriculum design and principles with practical experience of The Arts in the New Zealand Curriculum document, while offering opportunities for reflection on practice.
Prerequisite: 225 points passed in the BEd(Tchg) Primary Specialisation

EDCURRIC 369A 7.5 Points
EDCURRIC 369B 7.5 Points
Mathematical Literacy for Lower-achieving Students
Approaches for teaching individuals or small groups who have been identified as achieving below expectations in mathematics in New Zealand primary and secondary schools will be explored. Numeracy assessment tools that identify the problems that students have with mathematical language and mathematical symbols will be explored.
Prerequisite: EDCURRIC 349
To complete this course students must enrol in EDCURRIC 369 A and B

Stage IV

EDCURRIC 430 15 Points
Curriculum Issues in Health and Physical Education
Critically examines the construction of health and physical education in the curriculum. Addresses questions such as: What stands for health and physical education in the curriculum? What contemporary issues face health and physical education teachers? What factors influence how curriculum is constructed and experienced?
Prerequisite: At least 60 points from EDCURRIC 230-241, 333-337

EDCURRIC 431 15 Points
Physical Education Pedagogy
Examines the nature and characteristics of quality teaching in physical education. Addresses such questions as: What legal and ethical issues mediate professional practice? How can a focus on diversity help learners in physical education contexts? What teaching methodologies, management strategies and resources underpin quality practice in physical education?
Prerequisite: EDPROFST 303

EDCURRIC 433 15 Points
The Health Educator
Critically analyses the professional responsibilities and roles of health educators in schools. Addresses such questions as: What are the issues and dilemmas associated with teaching health education? What values and beliefs underpin teaching approaches in health education? How is health education influenced by external factors? How do teachers resolve ethical and professional dilemmas and challenges related to teaching this subject?
Prerequisite: EDCURRIC 235, 333

Diploma Courses

EDCURRIC 603 10 Points
Arts Education
Develops fundamental knowledge, skills and attitudes associated with planning, teaching and assessing children's learning in the arts: dance, drama, music and visual art. Addresses such questions as: Why are the arts important to children's learning? How do teachers design quality learning experiences that encourage individual responses from a diverse range of learners? How do we monitor and assess achievement?

EDCURRIC 604 10 Points
Health and Physical Education
Develops understandings of the theories, concepts and practices that support learning and teaching in health and physical education. It will examine such questions as: How are teachers informed in these subjects? How do teachers implement quality learning experiences based on the health and physical education curriculum for effective learning to occur for a diverse range of learners?
EDCURRIC 610 10 Points
Science Education
Develops an appreciation of the nature of science which supports conceptual understandings and quality teaching and learning approaches in science education. Addresses questions such as: How do teachers design quality learning environments based on the science curriculum so that positive engagement and effective learning can occur for a diverse range of learners? How is achievement determined and monitored?

EDCURRIC 611 10 Points
Social Studies Education
Develops students' knowledge and skills associated with planning for teaching and learning in Social Studies. Addresses questions such as: What do teachers need to know and understand about the history, nature and purpose of Social Studies education? What do teachers need to know about curriculum requirements, teaching methodologies, management strategies and resources to successfully plan for students' diverse needs?

EDCURRIC 613 10 Points
Special Topic

EDCURRIC 620 15 Points
Special Topic

EDCURRIC 621 15 Points
Arts, Language and Literacies Education 1
Develops knowledge, skills and understandings necessary to plan, teach and assess diverse learners in arts, language and literacies by addressing such questions as: Why are these curriculum areas important in the junior school and beyond? How do teachers design and resource quality programmes in order to encourage children to become confident, competent communicators and to maximise their achievement in these areas?
Restriction: EDCURRIC 101, 202, 605

EDCURRIC 622 15 Points
Arts, Language and Literacies Education 2
Extends knowledge, skills and dispositions necessary to plan for, teach and assess diverse learners in arts, language and literacies by addressing such questions as: Why are these curriculum areas important to middle/senior primary school learning? What resources, strategies and approaches will maximise achievement? How do teachers design quality teaching and learning programmes which encourage children to become competent communicators in these areas?
Prerequisite: EDCURRIC 621
Restriction: EDCURRIC 101, 202, 606

EDCURRIC 628 15 Points
Mathematics, Statistics and Technology Education 1
Develops knowledge and understanding of the nature of mathematics, statistics and technology education by addressing questions such as: What is the nature and purpose of mathematics, statistics and technology education in the New Zealand Curriculum? What are the components, key concepts and learning progressions in the national curriculum? What constitutes effective teaching practices?
Restriction: EDCURRIC 608, 612

EDCURRIC 629 15 Points
Mathematics, Statistics and Technology Education 2
Develops the knowledge, skills and understanding for designing quality learning experiences in mathematics, statistics and technology education for diverse learners by addressing questions such as: What are the mathematical, statistical and technological concepts and learning progressions in the national curriculum? What constitutes effective teaching practices?
Prerequisite: EDCURRIC 628
Restriction: EDCURRIC 609, 612

EDCURRIC 630 15 Points
Early Years Curriculum
Critically evaluates appropriate curriculum for infants, toddlers and young children in early years settings. Integrated approaches to learning and teaching will be emphasised. Addresses, explores and examines questions about complex relationships between curriculum approaches, current learning theory, teachers' professional knowledge, and assessment, planning and evaluation practices with reference to early childhood curriculum.

EDCURRIC 631 15 Points
Languages and Cultures
Develops knowledge, skills and attitudes associated with the planning, teaching and assessing of languages and literacies. Addresses such questions as: What are the interrelationships between languages and cultures in a Pacific nation? What influences construction and interpretation of meaning in text? What are the issues for family/whānau, teachers and learners relating to all children becoming confident, competent communicators in Aotearoa?

EDCURRIC 632 15 Points
The Arts
Develops understanding of the knowledge, skills and attitudes required to optimise learning and teaching in the arts. Involves a focused inquiry into music, dance, drama and visual arts in early childhood settings. Addresses such questions as: How do specific learning and teaching approaches and strategies motivate and enhance all children's learning?

EDCURRIC 633 15 Points
Te Ao Māori Early Childhood Education
Develops competence in Te Reo Māori and mātauranga Māori. Addresses the needs and aspirations of Māori learners and communities in order to improve educational outcomes. Critically reviews Te Tiriti o Waitangi and Māori pedagogies in relation to teachers' practices. Addresses questions such as: What are the historical and contemporary research and issues for Māori in education?

EDCURRIC 634 15 Points
Hauora
Develops understandings of hauora/well-being and belonging. Inquires into key concepts of health, physical education and social sciences. What images do we hold of children? What does identity mean for learners in a Pacific nation? Why is identity critical for Pasifika learners? What specific learning and teaching approaches and resources enhance the well-being and participation of children in a diverse society?

EDCURRIC 635 15 Points
Exploration
Develops pedagogical content knowledge and understanding in science, mathematics and technology. Considers such questions as: What are key early concepts, processes and possible learning progressions? What constitutes effective learning and teaching approaches to promote children's exploration?
EDCURRIC 700 30 Points
Contemporary Pedagogies
Comprehensive examination of contemporary pedagogical models and teachers’ professional knowledge associated with curriculum delivery, appropriate for diverse learners and their educational outcomes, traversing the early childhood, primary and secondary sectors.

EDCURRIC 701 30 Points
Special Topic: Minding the Body in Education
Explores the visibility and invisibility of the body in education. Draws upon the concept of embodiment to examine how identity, knowing, and performing are theorised in curriculum and pedagogy. Encourages participants to reflect on the potential of conceptualising learners in new, embodied ways regardless of educational context or subject area.

EDCURRIC 702 30 Points
Arts Education: Creative Pedagogy
Students will critically explore emerging visions, theoretical perspectives, and creative approaches that broaden pedagogy in arts education. The emphasis is on creative pedagogies in dance, drama, music and visual arts, moving the paradigm from a modernist curriculum focus to postmodernist approaches appropriate to students living in a multicultural society, globalised world, and digital age.

EDCURRIC 704 30 Points
Teaching for Scientific Literacy
A detailed exploration, focusing on the merits and challenges, of the concept of scientific literacy. Topics will include the nature of science; the process of scientific inquiry; and the role of science education in improving public understanding of science.

Restriction: EDPREFST 729

EDCURRIC 705 30 Points
EDCURRIC 705A 15 Points
EDCURRIC 705B 15 Points
Special Topic: Effective Language Teaching
A practice-focused examination of effective teaching and learning of additional languages in school settings. Aligned with curricular expectations and underpinned by advances in the theory, research and best practice of teaching and learning languages, the course uses evidence-based evaluative inquiry to explore the design and implementation of responsive practices in contemporary language learning environments.

Prerequisite: Departmental consent
Restriction: EDPREFST 360
To complete this course students must enrol in EDCURRIC 705 A and B, or EDCURRIC 705

EDCURRIC 706 30 Points
Researching Practice in the Second Language School Classroom
Students will apply appropriate research methods and specialised knowledge in an independent investigation into a problem of practice in the second language school classroom. In an authentic setting, students will carry out the investigation and consider critically issues associated with the methods applied, including ethical concerns.

EDCURRIC 708 30 Points
EDCURRIC 708A 15 Points
EDCURRIC 708B 15 Points
Making a Difference - Science
A practice-focused examination of teaching and learning in science at primary and intermediate level, using evidence-based evaluative inquiry to explore the teaching and learning of key science understandings. Includes critical examination of pedagogies in science and research into students’ science learning, including the nature of science.

To complete this course students must enrol in EDCURRIC 708 A and B, or EDCURRIC 708

EDCURRIC 709 30 Points
EDCURRIC 709A 15 Points
EDCURRIC 709B 15 Points
Reading Recovery: Individual Inquiry
Students engage in advanced study of theory and research related to optimising Reading Recovery’s effectiveness. A critical understanding of Literacy Processing theory and Reading Recovery principles and practices is integral to support teachers in effectively working with children having difficulty with literacy learning. A practicum component involving daily teaching of four six-year-old children forming case studies for analysis is required.

Prerequisite: Departmental consent
To complete this course students must enrol in EDCURRIC 709 A and B, or EDCURRIC 709

EDCURRIC 712 30 Points
EDCURRIC 712A 15 Points
EDCURRIC 712B 15 Points
Reading Recovery: Design, Implementation and Research
Critical analysis of issues and research related to the design and implementation of an effective early literacy intervention in an education system is central to this course. Particular emphasis is on facilitating the professional development and learning of Reading Recovery teachers. Students observe and work with teachers at Reading Recovery centres during the year-long Reading Recovery teacher training.

Prerequisite: Departmental consent
To complete this course students must enrol in EDCURRIC 712 A and B, or EDCURRIC 712

EDCURRIC 714 30 Points
EDCURRIC 714A 15 Points
EDCURRIC 714B 15 Points
Exploring Mathematical Thinking
Provides an opportunity for teachers to critique historical number systems as a way of illuminating theoretical issues, and informing their teaching practice, around learning number and place value concepts.

To complete this course students must enrol in EDCURRIC 714 A and B, or EDCURRIC 714

EDCURRIC 715 30 Points
EDCURRIC 715A 15 Points
EDCURRIC 715B 15 Points
Understanding Difficulties in Number Learning
Critically examines how conceptual early number learning proceeds, and the key difficulties in learning number concepts and generalisations considered from a psychological perspective. There is an emphasis on the link between the language, symbols, and place-value used...
for instruction and the conceptual underpinnings of the mathematics to be learnt.
Prerequisite: EDCURRIC 349 or 714
To complete this course students must enrol in EDCURRIC 715 A and B, or EDCURRIC 715

EDCURRIC 716 30 Points
EDCURRIC 716A 15 Points
EDCURRIC 716B 15 Points
Special Topic: Research Methods in Language Education
A mixed methods course examining the evidence required to establish causal claims in researching language-education in higher-education settings within both experimental and qualitative methodological frameworks. A range of research methodologies for investigating aspects of language learning/teaching is presented to prepare students for conducting critical literature reviews, formulating a research design, creating a research proposal, and analysing data. Restriction: EDPROFST 700
To complete this course students must enrol in EDCURRIC 716 A and B, or EDCURRIC 716

EDCURRIC 717 30 Points
EDCURRIC 717A 15 Points
EDCURRIC 717B 15 Points
Development of Numeracy Practice
A critical examination of the following themes: theories of learning and models of teaching of numeracy and their effects on students’ mathematics learning; New Zealand government policy on mathematics education since 1950 and its influences on teaching numeracy; the influence of central government on curriculum materials in selected countries. Restriction: EDPROFST 719
To complete this course students must enrol in EDCURRIC 717 A and B, or EDCURRIC 717

EDCURRIC 718 30 Points
EDCURRIC 718A 15 Points
EDCURRIC 718B 15 Points
Special Topic: Leadership for Learning
Extending teachers’ curricular and pedagogical expertise will enable them to assume a curriculum leadership role. Participants focus on effective leadership, collaborative problem solving, and curricular and teaching innovations that impact students’ engagement and learning. Influencing the capacities of others to effect and sustain organisational renewal within schools or early childhood centres will be emphasised.

EDCURRIC 720 30 Points
EDCURRIC 720A 15 Points
EDCURRIC 720B 15 Points
Teaching with Digital Pedagogies
A critical examination of the research and practice in using digital technologies to transform classroom pedagogy and enhance students’ learning experiences. Building on prior knowledge and using the knowledge and skills developed in the course, students will identify a focus of their choosing to test concepts of usage, and evaluate new instructional designs for using digital technologies in classrooms. To complete this course students must enrol in EDCURRIC 720 A and B, or EDCURRIC 720

EDCURRIC 724 30 Points
Technological Literacy
An advanced understanding of technological literacy by an exploration of technology as a domain. The implications of the need for a broad technological literacy for classroom practice in varied educational settings will be explored. Restriction: EDPROFST 730

Accelerate Learning in a Digital World
A critical examination and application of current theory, research, and practice involving the acceleration of students’ learning using digital technologies. Students will undertake an independent critical evaluation of the development, implementation and impact of a digital tool they have designed to accelerate students’ learning. To complete this course students must enrol in EDCURRIC 740 A and B, or EDCURRIC 740

EDCURRIC 750 30 Points
Arts Research: Innovative Practices
Students will critically explore emerging visions and theoretical concepts that broaden research practices in the Arts. Emphasis will be on how innovative Arts practices move attention from not just what is researched, but to how the research can be conducted and reported in creative ways. Topics include approaches such as narrative, autobiography, performative ethnography, reader’s theatre, poetic inquiry, and a/r/tography.

EDCURRIC 760 30 Points
Making a Difference – Mathematics and Statistics
A practice-focused examination of teaching and learning in mathematics and statistics at primary and intermediate level, using evidence-based evaluative inquiry to explore the teaching and learning of key mathematical and statistical concepts. Includes critical examination of pedagogies in mathematics and statistics and research into the learning of key concepts in mathematics and statistics.

EDCURRIC 763 30 Points
Special Topic: Sexuality and Health Education
How can we ensure schools are healthy places? How might schools address gender and sexuality? This course explores teaching and leading health and sexuality education within curriculum programmes and school-wide. Includes engagement with contemporary issues, international research, and enhancing practice. This course is appropriate for primary and secondary teachers, school leaders and community health workers engaging with schools.

EDCURRIC 780 30 Points
Psychology of Writing
An advanced study of contemporary theories, research and ideas that relate to the psychology of writing. This includes particular consideration of the development of expertise in writing and the role of instruction. Implications for practice will be at the forefront in the examination of theory and research. Restriction: EDPROFST 754

EDCURRIC 791 30 Points
Enterprise and Innovation in Education
Develops a critical understanding of relationships
between business and education, the role of business, enterprise and innovation in the community and various theoretical underpinning frameworks. Develops an in-depth understanding of business practice and critiques opportunities for interaction between enterprise and educational institutions. This would include commercial opportunities for educational institutions as well as contribution to curriculum delivery.

Education Foundation

Foundation Courses

EDFOUND 10F 15 Points
Academic Literacy I
An introduction to relevant academic literacy and study skills, providing students with skills to access a wide range of information literacy strategies.

EDFOUND 11F 15 Points
Academic Literacy II
Extends students’ academic literacy into more complex uses of information, academic writing and reading skills, and strategies for management of time and resources.

EDFOUND 12F 15 Points
Introduction to Computing
Introduces students with little previous computing experience to basic word processing, database development and spreadsheets. Course participants choose work related tasks to develop word processing, database and spreadsheet skills. These skills will be embedded in the context of tertiary study.

EDFOUND 13F 15 Points
Child Development and Learning
An overview of language and learning development, introducing strategies for helping children to develop as learners and readers.

EDFOUND 14F 15 Points
An Introduction to the New Zealand Education System
Introduction to the education system of New Zealand. Includes a focus on the diversity of education at all levels. Introduces students to the historical development of the New Zealand education system and the governance of this system, to the curriculum in New Zealand with a focus on the concept of ‘curriculum’, the range of current curriculum documents and the professional nature of teaching.

EDFOUND 15F 15 Points
Mathematics Preliminary
Basic mathematics including an understanding of arithmetic ideas (knowledge and strategies), fractions, decimals and percentages; ratio and proportion, algebraic thinking, measurement using the metric system, and estimation and its uses in context.

EDFOUND 16F 15 Points
Science and Mathematics for Teaching
Mathematics and science for teacher education students in preparation for degree level study. Prerequisite: EDFOUND 15F

EDFOUND 17F 15 Points
Pasifika Academic Literacy
Particular consideration will be given to an understanding of the ‘whole’ person within Pasifika contexts, teaching and learning processes for success, self-management strategies, and development of communication skills.

Education Foundation Māori

Foundation Courses

EDFOUNDM 10F 15 Points
Te Pū
Introduction to functional and instructional Māori including everyday vocabulary, basic sentence structures, pronouns, possessives and positional language. Aspects of tikanga will include meeting and greeting people with waiata, karakia and hīmene, and values such as whānau, whakawhanaungatanga and aroha. Referring to their own hapū/iwi students will introduce and locate themselves in relation to their whakapapa and carry out a short mihi.

EDFOUNDM 11F 15 Points
Te More
Builds on the introductory course Te Pū. Sentence structures will be extended into tenses, negatives, passives and more complex possessives and phrases. The pōwhiri will be the context for tikanga studies along with values and practices such as manaaki, awhi and koha. Hapū/iwi studies will include the study of student’s own marae history and pepeha.

EDFOUNDM 12F 15 Points
Te Weu
Students’ Māori language skills will be extended to include particles, adverbs, prefixes, suffixes and transitive verbs and prepositions. The marae will be the context for tikanga studies along with the values of tautoko, tapu/noa and mana. Hapū/iwi studies will include whaikōrero, pepeha, waiata, tupuna, kaumatua/kuia.

EDFOUNDM 13F 15 Points
Te Aka
Study of complex Māori clauses and sentences, interrogatives and conditional constructions. Tikanga studies further develop the context of the marae to include the tangi, kawe mate, hura kōhatu and rāhui. Hapū/iwi studies involve study of taonga and art from student’s own rohe.

EDFOUNDM 14F 15 Points
Te Rea
Study of Te Reo Māori including complex negatives, particles, verbs and agents. Tikanga studies explore Māori cosmology including te kore, te po, te ao, and ngā atua. Hapū/iwi studies introduce students to Te Tiriti o Waitangi, Tino Rangatiratanga and related iwi initiatives. Students carry out an independent study on a topic of their choice pertaining to their own hapū/iwi.

EDFOUNDM 15F 15 Points
Te Whakahaere Tūhuratanga
Intended for students who may already have tertiary study experience but limited Māori language skills. Students carry
out a structured investigation whereby they can demonstrate and apply study skills already gained from other contexts.

EDFOUNDM 16F 15 Points
Te Rangahau Kaupapa Māori
Intended for students who may already have tertiary study experience but limited Māori language skills. Students carry out an investigation on a topic of their choice related to their own hapū/iwi.

EDFOUNDM 17F 15 Points
Te Anga Marautanga o Aotearoa
An examination of Māori language and content in the Te Anga Marautanga o Aotearoa.

EDFOUNDM 18F 15 Points
Te Reo Tātai
Development of numeracy skills within a Māori language context to the level of current NCEA requirements for entry to university.

EDFOUNDM 19F 15 Points
Te Reo Ako o te Whare Wānanga
Academic literacy in Māori language contexts.

Education Māori

Stage I

EDUCM 118 15 Points
He Tirohanga ki te Mātauranga i Aotearoa
Examines the wider context of New Zealand education through a historical and contemporary overview. Draws on a critical sociological analysis of selected issues in society. Some emphasis is given to learners and their communities, including Māori, Pasifika, new migrants, and people with disabilities.
Restriction: EDUC 111, 112, 140, EDUCM 140

EDUCM 119 15 Points
Te Whanaketanga me te Ako
Presents an introduction to developmental and psychological theory and research and its application to teaching and learning within a variety of educational settings. Understandings for creating effective learning environments which foster high levels of motivation for all learners will be identified through an exploration of typical and atypical development; and behavioural, cognitive, constructivist and social approaches to teaching and learning.

Stage III

EDUCM 300 15 Points
Special Study

EDUCM 321 15 Points
Te Ao Tōrangapū me te Mātauranga
Investigates the relationship between local, national and global politics, and education in Aotearoa New Zealand. Explores philosophical perspectives on teaching and the relationship between educational theory and practice.
Prerequisite: EDUC 118 or EDUCM 118 or EDUC 140 or EDUCM 140

Education Practice

Stage I

EDPRAC 101 15 Points
The Professional Teacher: Primary 1
Develops knowledge, skills and attitudes associated with effective pedagogical practice through integrating research, theory and practical experience. Addresses questions such as: What does it mean to be a teacher? What does it mean to be a professional? How are teachers learners? How do teachers establish professional relationships in complex environments? Requires demonstration of emerging pedagogical practice.
Prerequisite: Any 45 points from courses in the BEd(Tchg) Schedule
Restriction: EDPROF 100, EDPRAC 102, 103, EDPRACM 101

EDPRAC 102 15 Points
The Professional Teacher: Early Childhood 1
Develops knowledge, skills and attitudes associated with effective pedagogical practice through integrating research, theory and practical experience. Addresses questions such as: What does it mean to be a teacher? What does it mean to be a professional? How are teachers learners? How do teachers establish professional relationships in complex environments? Requires demonstration of effective emerging pedagogical practice.
Prerequisite: Any 45 points from courses in the BEd(Tchg) Schedule
Restriction: EDPRAC 101, 103, EDPRACM 101

EDPRAC 103 15 Points
The Professional Teacher: Health and Physical Education
Develops the knowledge, skills and attitudes associated with effective pedagogical practice through integrating research, theory and practical experience. Addresses such questions as: What does it mean to be a teacher, to be a professional, and to establish professional relationships in complex environments? Requires demonstration of developing pedagogical practice.
Restriction: EDPRAC 101, 102, EDPRACM 101

Stage II

EDPRAC 201 15 Points
Practicum Primary 2
Further develops the knowledge, skills and attitudes associated with effective pedagogical practice through integrating research, theory and practical experience. Addresses questions such as: How do I teach responsively and purposefully? How do I establish and maintain professional relationships in complex environments and manage the environment effectively and professionally to
enable success for learners? Requires demonstration of effective developing pedagogical practice. 
Prerequisite: EDPRAC 101 and any 75 points from courses in the BEd(Tchg) Schedule
Restriction: EDPROF 200, 210, EDPRAC 202, 203, EDPRACM 201

EDPRAC 202 15 Points
Practicum Early Childhood
Further develops the knowledge, skills and attitudes associated with effective pedagogical practice through integrating research, theory and practical experience. Addresses questions such as: How do I teach responsively and purposefully; establish and maintain professional relationships in complex environments and manage the learning environment effectively and professionally to enable success for learners? Requires demonstration of effective developing pedagogical practice. 
Prerequisite: EDPRAC 102 or EDPRACPK 102 and any 75 points from courses in the BEd(Tchg) Schedule
Restriction: EDPRAC 201, 203, EDPRACM 201

EDPRAC 203 15 Points
Health and Physical Education Practicum 1
Further develops the knowledge, skills and attitudes associated with effective pedagogical practice through integrating research, theory and practical experience. Requires demonstration of developing pedagogical practice and addresses such questions as: Do I as a teacher practise responsibility and teach purposefully to establish and maintain professional relationships in complex environments?
Prerequisite: EDPRAC 103
Restriction: EDPRAC 201, 202, EDPRACM 201

Stage III
EDPRAC 303 15 Points
Health and Physical Education Practicum 2
Develops the knowledge, skills and attitudes associated with effective pedagogy in diverse health and physical education contexts. Requires demonstration of informed and ethical practice and addresses such questions as: Do I have the subject matter knowledge? Can I teach it effectively? Can I access the required knowledge? How do I assess student learning?
Prerequisite: EDPRAC 203
Restriction: EDPRAC 301, 302, EDPRACM 301

EDPRAC 305 30 Points
EDPRAC 305A 15 Points
EDPRAC 305B 15 Points

Practicum: Enabling Achievement Primary
Refines an emerging philosophy and effective pedagogy through integrating research, theory and practical experience. Addresses questions such as: What are my moral, ethical and legal obligations as a teacher? How do I manage complexities of teaching professionally in order to create and sustain purposeful learning environments and enable achievement for all learners? Requires demonstration of effective, informed and ethical pedagogical practice. 
Prerequisite: EDPRAC 201 and any 180 points from courses in the BEd(Tchg) Schedule
Restriction: EDPROF 300, 310, EDPRAC 301, 302, 303, EDPRACM 301
To complete this course students must enrol in EDPRAC 305 A and B, or EDPRAC 305

EDPRAC 306A 15 Points
EDPRAC 306B 15 Points

Practicum: Enabling Achievement Early Childhood
Refines an emerging philosophy and effective pedagogy through integrating research, theory and practical experience. Addresses questions such as: What are my moral, ethical and legal obligations as a teacher? How do I manage complexities of teaching professionally in order to create and sustain purposeful learning environments and enable achievement for all learners? Requires demonstration of effective, informed and ethical pedagogical practice. 
Prerequisite: EDPRAC 202 and any 180 points from courses in the BEd(Tchg) Schedule
Restriction: EDPROF 300, 310, EDPRAC 301, 302, 303, EDPRACM 301
To complete this course students must enrol in EDPRAC 306 A and B, or EDPRAC 306

Stage IV
EDPRAC 403 15 Points
Advanced Health and Physical Education Practicum
Critically evaluates personal pedagogy to consolidate understanding and management of the learning and teaching processes. Requires demonstration of informed and ethical practice and addresses such questions as: How do I manage the complexity of teaching? 
Prerequisite: EDPRAC 303

Diploma Courses
EDPRAC 607 30 Points
EDPRAC 607A 15 Points
EDPRAC 607B 15 Points

Professional Practice in Context
Uses an evidence-based approach to develop professional knowledge, skills and dispositions for effective teaching in primary and middle school contexts. Addresses what it means to establish effective professional relationships and to teach inclusively and purposefully in complex environments. Requires demonstration of informed and ethical pedagogy. 
To complete this course students must enrol in EDPRAC 607 A and B, or EDPRAC 607

EDPRAC 608 30 Points
EDPRAC 608A 15 Points
EDPRAC 608B 15 Points

Professional Learning in Practice
Uses an evidence-based approach to develop professional knowledge, skills and dispositions for effective teaching in secondary school contexts. Questions include: what does it mean to establish positive professional relationships and to teach inclusively and purposefully in complex environments? Requires demonstration of informed and ethical pedagogy. 
Restriction: EDPRAC 604
To complete this course students must enrol in EDPRAC 608 A and B, or EDPRAC 608

EDPRAC 621 15 Points
Conceptualising Practice
Develops knowledge, skills and attitudes associated with effective pedagogical practice through integrating research, theory and practical experience in early childhood settings. Addresses questions such as: What does it mean to establish effective professional relationships, practice effectively and teach purposefully in complex environments? Requires demonstration of developing pedagogical practice.

EDPRAC 622 15 Points
Pedagogy in Practice
Refines knowledge, skills and attitudes associated with effective pedagogical practice through integrating research, theory and practical experience. Explores such questions as: What does it mean to be a teacher and manage
complexities in order to create and sustain purposeful learning environments? What are the moral, ethical and legal obligations of a teacher? Requires demonstration of effective and ethical pedagogical practice.

Critically analyses the bi-cultural, multicultural, social, political, economic, historical and legal contexts of teaching and learning in New Zealand. Examines and evaluates pedagogical theories, evidence informed practices, and attitudes that are critical to being a professional teacher of adolescent learners in New Zealand.

EDPROF 701  30 Points
Accelerating Achievement
Focuses on assessment practices in the context of secondary education in Aotearoa New Zealand, and addresses the enduring challenge of equity in schools to accelerate the achievement of priority learners. Students will engage with current assessment practices, including national qualifications, and will use data and evidence-based research in developing teaching, learning, and assessment practices.

EDPROF 702  30 Points
The Twenty-first Century Classroom/Centre
Examines the opportunities and challenges of teaching and learning in twenty-first century classrooms and centres. Addresses superdiversity that is increasingly characteristic of schools and centres, the impact and use of digital pedagogies, innovative learning environments and formal inquiry-based teaching practices. Draws on world leading research and development work carried out with teachers in authentic learning contexts and considers, in particular, the question of what works best for whom and in what circumstances?

EDPROF 703  15 Points
Practitioner Inquiry Techniques
Students will investigate a range of practitioner-inquiry approaches and develop an understanding of practitioner tools for empirical study of practices to improve student learning. Critical analysis of how practitioner-inquiry questions are constructed and the ability to situate and view educational issues within major theoretical frameworks will be developed. Students will design a well justified proposal for investigating professional practice.

Prerequisite: EDPROF 702 and a further 30 points from the Master of Education Practice Schedule with a GPA of 5.0 or higher

EDPROF 704  30 Points
Advanced Study of Education Practice
Students will undertake an advanced study of contemporary issues, innovations, or curriculum and pedagogical advancement relating to educational practice. This will involve independent work demonstrating application of highly specialised knowledge that is at the forefront of contemporary education practice.

Prerequisite: 60 points from the Master of Education Practice Schedule with a GPA of 5.0 or higher

EDPROF 709  30 Points
Early Childhood Leadership
A practice-focused course that introduces leadership theory and research in order to examine leadership beliefs and attitudes. Will explore leadership in diverse early childhood services using problem-based methodology. Will develop and strengthen leadership practices to improve outcomes for children, families and whānau.

EDPROF 724  30 Points
Developing Communities of Learning
Optimise the impact of a ‘Community of Learning’ through critical examination and practical engagement with key concepts and processes as they relate to disciplined, collaborative inquiry and student achievement challenges across districts. A specific focus is innovative, evidence-based approaches to collective problems of practice and community engagement across education sectors and across subject disciplines.

EDPROF 737  30 Points
Ako: Learning to Learn and Teaching to Learn
Students will experience, explore and apply strategies that support effective learning, responsive teaching and the development of self-regulated learners and teachers. They will utilise the methodology of personal narrative to produce an advanced critical analysis and evaluation of cognate content, concepts and experiences.

EDPROF 738  15 Points
Te Ao Māori
Students will critically examine the cultural competencies required for teachers of Māori learners, as well as the significance of the cultural locatedness of the teacher in relation to learners, their whānau and communities.

EDPROF 739  15 Points
Differentiating Learning for Literacy and Mathematics
Students will experience and inquire into what responsive pedagogies mean for learners and teachers in literacy and mathematics. They will develop knowledge, understandings and skills in both curriculum areas that are known to improve outcomes for priority learners.

EDPROF 740  15 Points
Promoting Learning through Inquiry: Understanding our Communities
Students will explore, experience and develop understandings of themselves within and across communities. They will be expected to apply these understandings to promote physical, social and emotional wellbeing and connectedness with others.

EDPROF 741  15 Points
Teaching for Social Justice and Inclusion
Students will critically inquire into the notion of social justice and its importance for learning and teaching. Drawing on powerful practices, students will identify a repertoire of inclusive, culturally intelligent and responsive teaching practices that provide rich learning opportunities for priority learners.

EDPROF 742  15 Points
Working Together to Accelerate Learning
Students will undertake a supervised investigation that involves advanced analysis of existing data sets and the drawing of robust and trustworthy conclusions with a view to accelerating learning. The processes involved when making judgments to accelerate learning and promote positive relationships with students will be critically examined.

EDPROF 743  15 Points
Promoting Learning through Inquiry: Understanding our World
Students will explore and experience the role that science and technology play in current issues in their community. They will analyse and justify their developing pedagogy in terms of a learning theory that underpins science and technology teaching practice.
EDPROF 755
Promoting Learning through Inquiry: Responsiveness and Creativity
Students will explore and experience creative and responsive ways of teaching and learning in the arts that they will then apply to their own practice.

EDPROF 756
Enacting Responsive Pedagogies in Literacy and Mathematics
Building on knowledge, understandings and skills, students will enact responsive pedagogies that improve outcomes for priority learners in Literacy and Mathematics. Adaptive expertise will be developed through inquiry into learning and teaching of these two curriculum areas.
Prerequisite: EDPROF 739

EDPROF 757
An Investigation into Practice
Students will use selected research methods to address a problem of practice through an independent, supervised inquiry. Working as a cohort in authentic settings, students will critically consider issues, including ethical concerns.
Corequisite: EDPROF 758

EDPROF 758
Inquiring into Practice
Students will demonstrate adaptive expertise through their application of the knowledge, skills and dispositions required for development of culturally responsive, ethical and learning focused relationships with children.

*Restriction: EDPROF 745*

**EDPROFST 751**  
**ECE Curriculum Issues**  
An educational curriculum negotiates social, political, educational and interdisciplinary ideas and theories. It critically examines influences on curriculum pertinent to an international curriculum in contemporary early childhood education. What perspectives of children, families and teachers are represented? How do these perspectives privilege particular outcomes? How does practitioner inquiry into curriculum issues underpin and improve practices? It requires the completion of independent research-focused assignments.

**EDPROFST 752**  
**Assessment for Learning and Teaching**  
A critical examination of the relationship between assessment, teaching and learning. The notion of Assessment for Learning will be explored in relation to educational policy, relevant literature and contemporary research. Implications for practice and factors affecting implementation will be explored in detail.

**EDPROFST 753**  
**Issues in Assessment**  
Two current, substantive issues in the area of assessment will be critically examined and investigated in depth. Issues selected for study may include: national testing; standard-based assessment; home-school partnerships; the construction of reliable and valid assessment tasks. Students may locate their investigation within a specific context for example: tertiary, secondary, primary, or early childhood education.

**EDPROFST 754**  
**Critical Research Methodologies in Education**  
An in-depth examination of ways in which critical research methodologies provide new knowledge and offer alternatives, through analysis of social, cultural, economic, political contexts in education. The critical research paradigm will be explored, to understand various perspectives and methods, and to enhance its use in educational research. Students will be expected to design an education inquiry using critical research methodologies.

**EDPROFST 755**  
**The Inquiring Professional**  
Optimise learning through inquiry into practice. Through collaborative endeavour the course will involve a review and critical analysis of literature relating to a chosen research area that will provide the basis for inquiry and learning. It will include a critical evaluation of learning and implications for future practice.

**EDPROFST 757**  
**Issues in Assessment**  
**EDPROFST 757A**  
**EDPROFST 757B**

**Undertaking Research for School Improvement**  
Students will learn how to design research that contributes to the understanding and improvement of educational practice. They will develop an understanding of practitioner-based research methods and produce a detailed research proposal that includes a clearly defined, and justified, research design and methodology aimed at studying a specific educational problem.  
*Restriction: EDPROF 772*

**Education Professional Studies Māori**

**Stage I**

**EDPROFOM 109**
Te Pou Tāwharau Tikanga Māori
Develops Te Reo Māori knowledge, skills and attitudes for learning and teaching across Marautanga. Addresses questions such as: What is bilingual education? How are languages acquired? What are optimal conditions for acquisition? What factors assist or impede personal Reo Māori acquisition? What key linguistic features underpin Marautanga Māori? What historical factors influenced the development of Te Reo Māori in education?

**Stage II**

**EDPROFOM 205**
Te Whakatairanga Paetae mo te Ākonga
Explores diversity in the New Zealand context and its implications for teaching and learning. Considers strategies to address identified underachievement. Utilising psychological and sociological theory and research, the course examines practices that create effective teaching and learning environments for diverse/all learners. Teacher expectations, relationships, individual differences, classroom management and questioning are examined in relationship to contemporary approaches to teaching and learning.
Prerequisite: EDUC 140, 141 or EDUC 118, 119 or EDUCM 140, 141 or EDUCM 118, 119

**EDPROFOM 209**
Te Whiringa Pūmau o Te Reo
Further investigates Te Reo Māori knowledge, skills and attitudes for learning and teaching across Marautanga. Addresses questions such as: What key theories and approaches underpin the development of bilingualism and bilitracy in Māori medium educational contexts? What are the pedagogical implications of these when planning for learning and teaching? How can personal Māori language development be planned for effectively?
Prerequisite: EDPROFOM 109

**EDPROFOM 214**
Te Aromatawai mō te Ako me te Whakaako
Assessments for learning, for teaching, and of learning will be examined with reference to their specific purposes, characteristics and the degrees of reliability and validity necessary for each. Emphasis will be placed on the appropriate use of assessment tools/tasks and the gathering of robust information so sound interpretations and decisions can be made about learning.
Restriction: EDUC 224, 225, 230, 231, EDUCM 230

**Learning and Pedagogy**  
An introduction to how humans learn and how such learning is applied within the fields of health, physical education, and sport. Examines the way humans develop and apply knowledge, skills, and dispositions and their implications for pedagogical practices in health, physical education, and sport contexts.

**SPORTHPE 103**  
**Biophysical Foundations**  
Introduces students to the anatomical, physiological and biomechanical foundations of human movement. Examines the functions of the musculo-skeletal system, the circulatory-respiratory system and the nervous system, during rest and activity. Studies the biomechanical principles required to improve mechanical efficiency in human movement.  
**Restriction:** EDCURRIC 133

### Stage II

**SPORTHPE 201**  
**Whakatinanahia**  
Examines Māori approaches to embodiment, forms of physicality and movement valuable for educational and health settings in Aotearoa New Zealand. Students will gain knowledge through engaging in forms of Māori physical culture in a range of contexts.  
**Prerequisite:** EDUCSW 101

**SPORTHPE 202**  
**Skill Learning**  
Develops knowledge and understanding of skill learning, teaching and coaching in human movement. Examines concepts of skill and theories of learning, including: psychological theories underpinning physical competency, child and youth development, motivation, inclusion and

Prerequisite: SPORTHPE 102
Restriction: EDCURRIC 200

SPORTHPE 203 15 Points
Physiology, Exercise, Fitness
Develops knowledge and understanding of exercise physiology. Examines physiological responses during and as a result of exercise. Examines the nature and purpose of deliberate exercise and fitness programmes. Explores the pedagogy of teaching exercise and fitness.
Prerequisite: SPORTHPE 103
Restriction: EDCURRIC 200, 334

Stage III

SPORTHPE 301 15 Points
School Health and Physical Education
Examines health education and physical education in primary and secondary school contexts. Develops knowledge of pedagogy, curriculum, and programming. Critically examines how contemporary issues in the fields of health, sport and physical education impact schools.

SPORTHPE 303 15 Points
Health, Fitness and Culture
Critically examines the nature of incidental and deliberate exercise, lifestyle choices, and concepts of health. Critiques the veracity of evidence linking physical activity and health. Critically explores contemporary health issues associated with sedentary lifestyles, and the impact of twenty-first century lifestyle changes including globalisation and digitalisation. Examines how education can contribute to the diverse exercise and health needs of society.
Prerequisite: SPORTHPE 203
Restriction: EDCURRIC 334

Youth Work

Stage I

YOUTHWRK 152 15 Points
YOUTHWRK 152G 15 Points
Understanding New Zealand Youth
Examines the concept of ‘youth’ and the historical, economic and political contexts in which young people live and are schooled in New Zealand society. The concept of youth is explored as a fundamental aspect of human development, identity and culture. The ways that we learn about what it is to be a young person in New Zealand today, including sport, body image, media, music, technology and social networking will be explored.

Stage II

YOUTHWRK 253 15 Points
Addictions and Youth
An examination of addictions related to intoxicating commodities such as alcohol, intimacy and sex, food and exercise, money and information technologies and their impact on health outcomes for young people in Aotearoa New Zealand. It examines the patterns and effects of discourses and practices related to various addictions and their treatment where youth are concerned.
Prerequisite: Any 30 points passed from the BHumServ Schedule

YOUTHWRK 281 15 Points

Academic Integrity

ACADINT A01 0 Points
Academic Integrity Course
The Academic Integrity Course is an online course designed to increase student knowledge of academic integrity, university rules relating to academic conduct, and the identification and consequences of academic misconduct. Students work through a series of modules, outlining scenarios that they may encounter while studying at university. Each scenario provides information on relevant rules, resources and expected behaviour.

Bioengineering

Postgraduate 700 Level Courses

BIOENG 796A 60 Points
BIOENG 796B 60 Points
ME Thesis (Bioengineering)
Students are required to submit a thesis on a topic assigned by the Director of Bioengineering.
To complete this course students must enrol in BIOENG 796 A and B

Biomedical Engineering

Stage II

BIOMENG 221 15 Points
Mechanics of Engineered and Biological Materials
The principles of mechanics and the special circumstances associated with applying these principles to living and prosthetic structures will be presented. Topics include: introduction to linear elasticity, stresses and strains specific to direct and torsional loading, material constitutive relationships (including anisotropy, nonlinearity, and viscoelasticity), axial and transverse loading of bone, pressure loading of the heart, and theories of failure.
Prerequisite: ENGENG 150, or ENGSCI 111, or B+ or higher in MATHS 108 or 110 or 150 or 153, or B+ or higher in MATHS 120 and 130

BIOMENG 241 15 Points
Instrumentation and Design
An introduction to engineering instrumentation related to the measurement of biological signals. Topics include: Fundamentals of measurement systems (electric circuits, basic electronics, frequency domain signal analysis and transient analysis, measurement systems). This course will cover the design methodology of instrumentation systems and include an instrumentation design project.
Prerequisite: ELECTENG 101
BIOMENG 261 15 Points
Tissue and Biomolecular Engineering
Overview of molecular and tissue engineering principles emphasising biochemical kinetics, gene regulation, cell behaviour and biomedical ethics. Laboratory practice and design project in cell culture and molecular biology techniques. Topics include enzymes and regulation of metabolic pathways, thermodynamic principles of biochemical reactions, systems biology and regulatory motifs in biochemical networks, cell culture techniques, research and medical ethics.
Prerequisite: BIOSCI 107, ENGSCI 211
Restriction: BIOMENG 361

Stage III
BIOMENG 321 15 Points
Continuum Modelling in Bioengineering
An introduction to continuum modelling approaches to bioengineering problems across a range of spatial scales. Topics include: tensor analysis, molecular and cellular mechanics of striated muscle; finite deformation elasticity and constitutive relations for soft biological materials; conservation equations for momentum, mass and heat transfer in fluids; viscous flow; boundary layers; pure conduction and diffusion; advective transport of mass and heat.
Prerequisite: BIOMENG 221, ENGSCI 211
Restriction: ENGSCI 343

BIOMENG 341 15 Points
Bioinstrumentation and Design
Sensors and actuators (temperature, position, force, pressure, flow, bioelectric, optical sensors and instruments). Signals, systems and controls (s-domain signal notation, transfer functions, frequency response functions, block diagrams, the Laplace transform, first and second order systems, characterisation methods, fundamentals of control). Bioinstrumentation design methodology, biomedical instrumentation design project.
Prerequisite: BIOMENG 241

Postgraduate 700 Level Courses
BIOMENG 771 15 Points
Musculoskeletal and Orthopaedic Biomechanics
Topics that biomechanical and orthopaedic engineers use in research and industry. Includes guest lectures from practitioners. Orthopaedic engineering topics cover implant design, material choice, implant stress shielding and bone loss, implant wear and bone remodelling. Musculoskeletal biomechanics topics cover motion capture, inverse kinematics and dynamics, muscle force evaluation, electromyography (EMG), inertial sensors and applications in sports medicine and rehabilitation.
Prerequisite: 15 points from ENGSCI 311, 313, 314

BIOMENG 791 15 Points
Advanced Biomedical Engineering Design
An engineering project requiring the application and integration of material taught in lecture courses to the design of medical devices and software to meet client needs. The project also requires consideration of ethical issues, social impact, safety risks, and international regulations.
Prerequisite: BIOMENG 341

BIOMENG 792 15 Points

Chemical and Materials Engineering

Stage I
CHEMMAT 100G 15 Points
Materials of the Modern World
Every aspect of daily living is influenced in some way by the materials that surround us. Ceramics, metals, polymers, and composites; each has its own properties which have, over time, influenced the development of modern technological societies. Take a moment to imagine a world without metal, for example, to see how central the science of materials is to everyday life. This course will explore, at a non-specialist level, the basic principles governing the properties and behaviour of a wide variety of common materials and examine their applications and limitations.

CHEMMAT 121 15 Points
Materials Science
Introduction to materials science starting with the fundamentals of atomic structure and bonding and how this builds up a microstructure to create a solid. Metals, polymers, ceramics, electronic materials, composite and biomaterials will be covered and the properties, advantages and disadvantages of each discussed. Considerations such as corrosion, degradation and failure will be studied with a focus on improving design and creating new materials for our future world.

Stage II
CHEMMAT 201 15 Points
Process Engineering 1: Introduction
Materials and energy balances with and without chemical reaction, materials and energy balances in multiphase systems such as crystallisation, evaporation, drying, humidification, dehumidification, absorption, distillation, extraction and filtration. An introduction to the most important unit operations in the chemical industry, design concept and safety as applied to processing.
Prerequisite: ENGGEN 140
Restriction: CHEMMAT 211

CHEMMAT 202 15 Points
Process Engineering 2: Energy and Processing
Introduction to thermodynamics for process engineering. The first and second laws of thermodynamics. Application of thermodynamic concepts in closed systems, flow processes and cycles, refrigeration and liquefaction. Classical chemical thermodynamics including concepts of chemical potential, fugacity and activities; their applications to vapour-liquid equilibria and reacting systems. Multi-component physical equilibria. Multiple reaction equilibria and system-free energy minimisation. Practical examples and applications.
Restriction: CHEMMAT 212

CHEMMAT 203 15 Points
Process Engineering 3: Transfer Processes
Fluid properties and statics (specific gravity, viscosity, surface tension, flow types, manometry). Modelling fluid motion (Bernoulli equation. Dimensional analysis and
CHEMMAT 204 15 Points
Materials
Restriction: CHEMMAT 221

CHEMMAT 205 15 Points
Process Design 1
Mechanics of solids and analysis of stress and strain. Introduction to materials selection. Design of thin walled pressure vessels. Application to the design of vessels, tanks, reactors, piping and heat transfer equipment. Introduction to the chemical industry, unit operations, line diagrams and process equipment. Report writing and oral communication skills.
Prerequisite: ENNGEN 121 or equivalent
Restriction: CHEMMAT 231, 232

CHEMMAT 206 15 Points
Applied Chemistry
Fundamental chemistry required for chemical engineering and materials engineering. Topics may include phase equilibrium, reaction kinetics, thermodynamics, surface chemistry, electrochemistry and polymer chemistry. This course will have an emphasis on problem definition and solution.
Prerequisite: 15 points from ENNGEN 140, CHEM 110, 120
Restriction: CHEMMAT 242

Stage III

CHEMMAT 301 15 Points
Transfer Processes 2
Principles of continuous and staged processes. Mass transfer in various media, systems and phases. Interrelating equipment design to mass transfer processes. Studies of selected separation processes such as absorption, solvent extraction, and distillation. Heat transfer with phase change; nucleate and film boiling of liquids.
Prerequisite: CHEMMAT 203 or 213, and CHEMMAT 242 or 206
Restriction: CHEMMAT 312

CHEMMAT 302 15 Points
Advanced Process Engineering
An in-depth analysis of selected topics that influence the design, operation, and performance of process plants. Topics may include particulate technology, particle mechanics and particle motions, non-Newtonian fluid flow, two-phase solid-liquid and gas-liquid flow, flow through porous media and packed beds, filtration, centrifugation, fluidisation, variable-analysis of variations in materials and product processing, membrane separation methods and optimisation techniques.
Prerequisite: CHEMMAT 203 or 213
Restriction: CHEMMAT 313, 316, 411
CHEMMAT 717 15 Points
**Electrochemical Engineering**
The thermodynamics of aluminium electrolysis; heat and mass balance; components of the cell voltage; anode effect and its mitigation, resistance and voltage tracking; cell magnetics and magnetic modelling.
*Corequisite: CHEMMAT 718, 726, 727*

CHEMMAT 718 15 Points
**Aluminium Reduction Process Operations**
Monitoring overall aluminium cell performance - what are the appropriate parameters to measure, how are they measured and how are they used for process control? Optimising cell performance, scheduling of operations, dealing with process excursions, metal treatment and quality. Novel cell designs.
*Corequisite: CHEMMAT 717, 726, 727*

CHEMMAT 721 15 Points
**Advanced Materials**
An advanced course with emphasis on new developments in materials science and engineering and their impact on technology and society, for example surface engineering, nanomaterials and composites, alloy development, high performance ceramics, powder processing, biomaterials. Students develop critical assessment, report writing and oral communication skills through independent projects and seminars.

CHEMMAT 722 15 Points
**Materials Seminar**
An independent study on a topic or topics in the field of materials to be determined each year by the Head of Department of Chemical and Materials Engineering.

CHEMMAT 724 15 Points
**Advanced Materials Characterisation**
The underlying theory essential to understanding modern methods of advanced materials analysis including; electron microscopy, surface analysis, atomic force microscopy and nanoindentation. Teaching is highly research informed with examples drawn from the Research Centre for Surface and Materials Science (RCSMS) and involves principles, practical experience and independent project work related to the application of these techniques.
*Prerequisite: CHEMMAT 305 or 322*

CHEMMAT 726 15 Points
**The Light Metals Industry**
An overview of the light metals, Ti, Al and Mg, their chemistry, metallurgy and processing. It also deals with trends in the global light metals production and uses and recent advances in extending applications for these materials; economics of feedstock and materials selection and availability; power supply and management; efficient use of equipment and resources; and environmental issues.
*Corequisite: CHEMMAT 717, 718, 727*

CHEMMAT 727 15 Points
**Materials Performance and Selection for Light Metals Processing**
Performance requirements of anodes, cathodes, cell refractories and other aluminium cell construction materials are assessed. Techniques for monitoring materials performance in operation and post operation (autopsies) are discussed. This course also covers materials specifications, how well they predict performance in the aluminium cell as well as the relationship between the fabrication of the cell components and their performance. New materials.
*Corequisite: CHEMMAT 717, 718, 726*

CHEMMAT 731 30 Points
**Advanced Design for Reduction Technology**
Application of advanced specialised knowledge across multiple aspects of reduction technology in order to specify, plan and execute a process design in reduction technology. A capstone group project will be supplemented by individual research work. Detailed considerations in the project will include material selection, process energy demand and efficiency, costing and economics, environmental impact and process start-up and operation.

CHEMMAT 732 30 Points

CHEMMAT 732A 15 Points

CHEMMAT 732B 15 Points
**Advanced Design Project**
An advanced design project utilising the application of the specialised knowledge required for the design and manufacture of a sophisticated product based on multiple plastics materials. Detailed considerations will include material and process selection, mould design, costing and economics, and environmental impact.
*To complete this course students must enrol in CHEMMAT 732 A and B, or CHEMMAT 732*

CHEMMAT 740 15 Points
**Advanced Polymer Materials**
Microstructure and morphology of semi-crystalline and amorphous polymers, including alloys and thermoplastic elastomers. The study of structure/property/processing inter-relationships for plastics materials. Coverage includes characterisation of plastics materials, especially spectroscopic, thermal and rheological analysis. Mechanical testing.

CHEMMAT 741 15 Points
**Processing of Plastics**
In-depth coverage of advanced processing techniques including associated rheology considerations. The course includes the study of additives, degradation processes and the prevention of degradation, formulation of products and the mixing of materials.

CHEMMAT 742 15 Points
**Plastics Materials Design**
Material properties and selection. Drying and heat transfer. Plastics part and mould design, moulding simulation software. IML, co-moulding and advanced moulding techniques. Fabrication and lifecycle considerations.

CHEMMAT 743 15 Points
**Selected Topics in Plastics Processing**
Modular course covering specialised topics and applications including thermosetting elastomers, powder coating, reaction injection moulding and liquid moulding of siloxanes and urethanes. Reactive compounding of alloys, sintering. Specialised polymers, processes and products including fluoropolymers, membranes and biobased polymers.

CHEMMAT 750A 15 Points

CHEMMAT 750B 15 Points
**Design Project**
Specification, planning and executing a specific process design project. The detailed considerations in the project to include environmental impact, safety and occupational health issues, material selection, process energy demand...
and efficiency, costing and economics, process start-up and operation. 
Prerequisite: CHEMMAT 331 
Restriction: CHEMMAT 431, 432 
To complete this course students must enrol in CHEMMAT 750 A and B
CHEMMAT 751A 15 Points 
CHEMMAT 751B 15 Points 
Research Project 
Students are required to submit a report on independent investigation carried out on a topic assigned by the Head of Department of Chemical and Materials Engineering. The work shall be supervised by a member of staff. 
Restriction: CHEMMAT 441, 442 
To complete this course students must enrol in CHEMMAT 751 A and B
CHEMMAT 752 15 Points 
Process Dynamics and Control 
Application of mathematical modelling and simulation for understanding modern methods of process control via open-ended workshop study projects. Includes rigorous treatment of control fundamentals (dynamics, hardware, transient analysis, feedback, tuning), advanced classical control (feed-forward, cascade), and advanced control (multiple variable control, whole plant control and model predictive control). Research informed with examples from the Industrial Information and Control Centre (I2C2).
Prerequisite: ENGSCI 211
Restriction: CHEMMAT 311, 411, 412
CHEMMAT 753 15 Points 
Biomaterials and Applications 
Biological materials: form, structure and function; formation, growth and development; repair, replacement and regeneration. Biomaterials: applications of hydrogels, elastomers, metals, ceramics, bio-resorbable materials, biomaterial surface modifications.
Prerequisite: BIOMENG 221, or CHEMMAT 204 and 205, or CHEMMAT 221 and 232
Restriction: CHEMMAT 422
CHEMMAT 754 15 Points 
Materials Performance Enhancement 
Materials under extreme service conditions – surface engineering, high temperature corrosion/oxidation, tribology/wear, and case studies of failure. Nanomaterials and nanotechnology – special mechanical, physical and chemical properties of nanomaterials, synthesis and processing techniques, applications in devices, sensing, catalysis and biomedical areas. Advanced manufacturing technology – additive manufacturing, powder metallurgy, materials joining and sustainable/green manufacturing.
Prerequisite: CHEMMAT 121, and 305 or 322 or equivalent 
Restriction: CHEMMAT 423
CHEMMAT 755 15 Points 
Materials for Energy and Environmental Applications 
Prerequisite: CHEMMAT 121, and 305 or 322 or equivalent 
Restriction: CHEMMAT 424
CHEMMAT 756 15 Points 
Food Process Engineering 
Application of engineering principles to food processing. Study of main food processing operations: heating and thermal processing, cooling, freezing and thawing, evaporation, dehydration, the use of membranes and packaging. Innovative thermal and non-thermal food processes, and most fundamental areas of engineering relevant for food processing such as heat and mass transfer, are covered. Process impact on food safety, quality and preservation is also discussed. 
Prerequisite: CHEMMAT 201 or 211, and 15 points from ENGSCT 111, MATHS 108, 110 
Restriction: CHEMMAT 463
CHEMMAT 757 15 Points 
Engineering Biotechnology 
Principles of biochemical engineering. Exploitation of bioreaction and bioprocess systems. Enzyme and microbial reaction kinetics, bioreactor design and downstream processing. Examples of biochemical process and food industry applications. 
Prerequisite: ENGSCT 111 or equivalent 
Restriction: CHEMMAT 361, 464, FOODSCI 704
CHEMMAT 771 15 Points 
Advanced Food Process Technology 
Advanced knowledge essential for the application of food process technology. Topics include advanced food processing technology in specific food sectors strategic to New Zealand including dairy processing, meat processing, fruit and vegetable processing, seafood processing, wine processing. Teaching is highly research informed and involves principles, practice and independent project work relevant to the application of these skills.
CHEMMAT 772 15 Points 
Advanced Food Process Engineering 
Advanced theory essential to an understanding of food process modelling and advanced food process engineering technologies. Topics include advanced food unit operations including high pressure processing (HPP), pulsed electric field (PEF), other “cold” technologies, ohmic heating and advanced packaging. Teaching is highly research informed with principles, application examples and related individual research project work.
CHEMMAT 773 15 Points 
Food Process Systems Engineering 
Advanced understanding of the theory and application of process systems engineering for the food industry. Includes advanced process analytical technology, real-time quality control, multivariate data analysis, advanced statistical process control, advanced control methods and strategies, and real-time optimisation. Teaching is highly research informed with examples from the Industrial Information and Control Centre (I2C2) and includes an independent laboratory based project.
CHEMMAT 774A 15 Points 
Food Process Engineering Research Project 
A structured supervised research project addressing a topic relevant to the development and commercialisation of food process engineering technologies.
Restriction: CHEMMAT 775, 776, 777
To complete this course students must enrol in CHEMMAT 774 A and B
CHEMMAT 775A 30 Points
CHEMMAT 775B 30 Points
Food Process Engineering Research Project
A structured supervised research project addressing a topic relevant to the development and commercialisation of food process engineering technologies.
Restriction: CHEMMAT 774, 776, 777
To complete this course students must enrol in CHEMMAT 775 A and B

CHEMMAT 776A 30 Points
CHEMMAT 776B 60 Points
Food Process Engineering Research Portfolio
A structured supervised research portfolio addressing a topic relevant to the development and commercialisation of food process engineering technologies.
Restriction: CHEMMAT 774, 775, 777
To complete this course students must enrol in CHEMMAT 776 A and B

CHEMMAT 777A 45 Points
CHEMMAT 777B 45 Points
Food Process Engineering Research Portfolio
A structured supervised research portfolio addressing a topic relevant to the development and commercialisation of food process engineering technologies.
Restriction: CHEMMAT 774, 775, 776
To complete this course students must enrol in CHEMMAT 777 A and B

CHEMMAT 787 15 Points
Project X
Students are required to submit a report on a topic assigned by the appropriate Head of Department.
Prerequisite: Departmental approval

CHEMMAT 788A 15 Points
CHEMMAT 788B 15 Points
Project Y
Students are required to submit a report on a topic assigned by the appropriate Head of Department.
Prerequisite: Departmental approval

CHEMMAT 789 30 Points
Project Z
Students are required to submit a report on a topic assigned by the appropriate Head of Department.
Prerequisite: Departmental approval

CHEMMAT 795 45 Points
CHEMMAT 795A 15 Points
CHEMMAT 795B 30 Points
Research Project (Chemical and Materials)
Students are required to submit a report on a topic relevant to the specialisation, as assigned by the appropriate Head of Department.
Prerequisite: Departmental approval
To complete this course students must enrol in CHEMMAT 795 A and B, or CHEMMAT 795

CHEMMAT 796A 60 Points
CHEMMAT 796B 60 Points
ME Thesis (Chemical and Materials)
Students are required to submit a thesis on a topic assigned by the appropriate Head of Department.
Prerequisite: Departmental approval
To complete this course students must enrol in CHEMMAT 796 A and B

Civil Engineering

Stage II

CIVIL 201 10 Points
Land Information Systems
Aspects of elementary engineering surveying as used for gathering site information for the design and setting out of works. Land information systems, modern methods of gathering, processing and presenting information for engineering purposes.

CIVIL 210 15 Points
Introduction to Structures
Structural forms and systems. Analysis of determinate systems, elasticity. Engineering beam theory, elasticity, failure theories. Introduction to structural design.
Prerequisite: ENGEN 121 or 150
Restriction: ENVE 210

CIVIL 211 10 Points
Structures and Design 1
Introduction to structural design – philosophy, loads, codes; design of simple structural elements in various materials.

CIVIL 220 10 Points
Introductory Engineering Geology

CIVIL 221 10 Points
Geomechanics 1
The basic concepts and principles governing the mechanical behaviour of soil, including phase relationships, permeability and seepage, the principle of effective stress, soil strength, compressibility and basic stability analysis.

CIVIL 230 10 Points
Fluid Mechanics 1

CIVIL 250 10 Points
Civil Engineering Materials and Design

Stage III

CIVIL 312 15 Points
Structures and Design 2
Prerequisite: CIVIL 211

CIVIL 313 15 Points
Structures and Design 3
Design of structures in reinforced concrete, prestressed concrete and structural steel. Computer analysis of
structures; use of a commercial analysis program. Design project.
Prerequisite: CIVIL 211

CIVIL 314 10 Points
Structural Dynamics
Dynamics of single and multi-degree-of-freedom systems. Ground motion, response spectra, time-history and spectral modal analysis; introduction to seismic design.

CIVIL 322 10 Points
Geomechanics 2
Stability analysis in geotechnical engineering; slope stability, soil pressures on retaining structures, bearing capacity. Consolidation and settlement.
Prerequisite: CIVIL 221

CIVIL 324 10 Points
Geomechanics 3
Prerequisite: CIVIL 322 or equivalent
Restriction: CIVIL 420, 728

CIVIL 331 10 Points
Hydraulic Engineering
Prerequisite: CIVIL 230 or equivalent

CIVIL 332 10 Points
Fluid Mechanics 2

CIVIL 360 10 Points
Transportation Engineering 1
Highway alignment geometrics (horizontal, vertical and cross sectional design). Basis of the main pavement design techniques, pavement materials, stabilisation, compaction and bituminous surfacings.

CIVIL 361 10 Points
Transportation Engineering 2

Diploma Courses
CIVIL 660 15 Points
Traffic Engineering and Planning
A range of selected topics in traffic engineering and transportation planning which will provide a basis for extension into further studies.
Restriction: CIVIL 361, 460

CIVIL 661 15 Points
Highway and Pavement Engineering
A range of selected topics in highway and pavement engineering which will provide a basis for extension into further studies.
Restriction: CIVIL 360, 461

Postgraduate 700 Level Courses
CIVIL 701 15 Points
Studies in Civil Engineering 1
Advanced course on topics to be determined each year by the Head of Department of Civil and Environmental Engineering.

CIVIL 702 15 Points
Design of Earthquake Resistant Foundations
Observed behaviour of foundations during earthquakes. Site investigation and laboratory testing to estimate values for required soil parameters. Earthquake induced foundation actions. Shallow and deep foundations subject to earthquake excitation. Soil-foundation-structure-interaction. Force-based and displacement-based design. Earthquake induced earth pressures on stiff retaining structures. An independent foundation design project is required.
Prerequisite: CIVIL 721 or equivalent, CIVIL 314 or equivalent

CIVIL 703 15 Points
Project Management
Planning, organisation and control of engineering projects. Application and integration of project management processes to the typical project lifecycle (initiating, planning, executing, monitoring, and closing). Studies in the nine knowledge areas defined by the Project Management Institute (PMI): Project Integration, Scope, Time, Cost, Quality, Human Resources, Communications, Risk and Procurement Management. Development of a range of skills, tools and techniques to become an effective project manager.

CIVIL 704 15 Points
Advanced Topics in Project Management
Advanced topics in project management are analysed such as: advanced scheduling techniques, integrated project delivery, lean construction, building-information modelling, negotiation techniques, dispute resolution and innovative project delivery models. Independent research is undertaken in an advanced project in project management.

CIVIL 705A 15 Points
CIVIL 705B 15 Points
Research Project
Restriction: CIVIL 408
To complete this course students must enrol in CIVIL 705 A and B

CIVIL 706 15 Points
Special Topic
Restriction: CIVIL 406

CIVIL 707 15 Points
Construction Supply Chain Management
Advanced topics in construction supply chain management such as construction logistics, buffer management, relational contracts and behavioural dimensions, analytical models for construction, information technologies and sustainable supply chains. Independent research is undertaken by developing individual research projects in which students study logistics and supply chain problems by analysing real production scenarios or the current literature available in this topic.

CIVIL 708 15 Points
Work Based Learning
Develops the student's professional and interpersonal
skills within the context of professional engineering and project management competencies. Application of theory and development of work procedures. Develops ability to question concepts and critically self-assess competencies. Fostering and enhancing professional competencies in preparation towards membership of a professional body. 

Note: Students must be in part time professional employment or have completed at least three years professional employment within engineering or construction.

CIVIL 709 15 Points
Cost Engineering
Advanced topics in cost engineering such as construction engineering cost planning, cost estimating, cost control, cost analysis and engineering economics. The core taught skills are extended by individual projects in which independent research is undertaken to solve cost engineering problems or to give critical comments on the current literature on cost engineering.

CIVIL 710 15 Points
Advanced Structural Dynamics
Advanced topics in structural dynamics, such as wave guide representation, holistic consideration of structural behaviour including soil, main and secondary structures interaction, nonlinearities of soil-foundation-structure systems including uplift, pile-soil separation, plastic hinge or pounding. The core skills are taught and accompanied by an individual project in which independent research is undertaken to solve a challenging structural dynamics problem.

Prerequisite: Departmental approval

CIVIL 711 15 Points
Structures Seminar
Selected topics from recent developments in structural analysis and design, including an introduction to the advanced behaviour and design of thin-walled steel sections and composite components made from cold-formed sheet and light-weight fillers.

CIVIL 713 15 Points
Structures and Design 4
Continuation of the design and detailing of structures in structural steel, reinforced concrete, reinforced masonry, and timber including connections in steelwork, composite steel/concrete beams, masonry structures and retaining walls in reinforced masonry. Practical understanding and design of concrete ground floor slabs. Introduction to the NZ Standard for light timber frame construction. Introduction to fire engineering. Techniques in the checking of existing structures and lessons learnt from failures.

Prerequisite: CIVIL 312 and 313 or equivalent

Restriction: CIVIL 411

CIVIL 714 15 Points
Multistorey Building Design
Techniques for the design of structures to resist seismic loading. Derivation of design actions, alternative structural systems for resisting these loads, design of structural components subject to cyclic inelastic action, detailing of members and joints to enhance earthquake resistance. Techniques of seismic isolation. Design project.

Prerequisite: CIVIL 313 or equivalent

CIVIL 715 15 Points
Advanced Structural Concrete
Behaviour of reinforced and prestressed concrete components and systems under complex loading and environmental conditions. Thermal and other loading conditions in bridge structures.

Prerequisite: CIVIL 313 or equivalent

CIVIL 716 15 Points
Engineering Risk Management
A broad based understanding of the critical elements of risk and risk management within the construction and engineering industry. Key elements include risk identification with regard to the forms and types of risk inherent in construction. Risk analysis tools and techniques for the construction engineer, and risk response. Risk monitoring techniques, risk control and transference of risk methods. Risk within procurement, insurance issues and risk attenuation.

Restriction: ENGGEN 722

CIVIL 717 15 Points
Advanced Structural Timber
Advanced topics in timber design such as: shearwalls, diaphragms, special glulam beams, bolted connections, new fasteners, engineered wood products, laminated bridges, inspection of timber structures. Emphasis will be placed on latest international developments. The core skills are taught and accompanied by an individual project in which independent research is undertaken to solve a challenging timber connection problem.

Prerequisite: CIVIL 451 or 750 or equivalent

CIVIL 718 15 Points
Light Gauge Steel
Use of thin steel load bearing structural components in walls, floors and roofs. Behaviour of members and connections under the full range of structural actions. Theory and design application including the Direct Strength Method of design. Use of light gauge steel acting compositely with other materials such as concrete and structural foams.

Prerequisite: CIVIL 313 or equivalent

CIVIL 719 15 Points
Matrix Structural Analysis
Direct stiffness method applied to linear, nonlinear and stability analyses. Introduction to variational principles and finite element method. Projects in practical modelling of major structures such as bridges and multi-storey buildings. Use of commercial software.

Restriction: CIVIL 416

CIVIL 720 15 Points
Earthquake Engineering
Earthquakes and the effects on civil infrastructure. The passage of seismic waves from inception, propagation, arrival at site bedrock, site specific response, infrastructure response. Including engineering seismology, seismo-tectonic setting of NZ, probabilistic seismic hazard analyses, NZS 1170.5, infrastructure dynamics, base isolation, effects of site geology, geophysical and geotechnical site characterisation, concepts of soil-structure interaction, the Canterbury series of earthquakes.

Prerequisite: CIVIL 313 and ENGSCI 311 or equivalent

CIVIL 721 15 Points
Foundation Engineering
structures, embedded retaining walls and reinforced earth walls.
Prerequisite: CIVIL 312 or equivalent
Restriction: CIVIL 323, 421

CIVIL 722 15 Points
Slope Engineering
Prerequisite: CIVIL 322 or equivalent
Restriction: ENVENG 324, CIVIL 422

CIVIL 723 15 Points
Rock Mechanics and Excavation Engineering
Engineering rock behaviour including strength, stiffness and role of discontinuities. Stress-strain analysis, stability assessment of rock structures and support using advanced models of rock. Theoretical, practical and environmental aspects of ground excavation techniques as applied to tunnelling. An independent research project will develop skills and knowledge to solve a challenging engineering rock behaviour problem.
Prerequisite: CIVIL 322 or equivalent

CIVIL 724 15 Points
Soil Behaviour
Advanced topics in soil behaviour including stress-strain-strength response of remoulded and natural geomaterials when subject to monotonic and cyclic loading; critical state soil mechanics; advanced soil testing; and partially saturated soils. Includes an independent research project related to an applied topic in soil behaviour.
Prerequisite: CIVIL 324 or equivalent

CIVIL 725 15 Points
Geotechnical Earthquake Engineering
Advanced topics in earthquake effects on geotechnical structures, including: dynamic properties of soils; earthquake-induced ground response; seismic stability of slopes, embankments; earth-retaining structures; soil liquefaction; ground deformations; remediation and mitigation techniques. Design applications and advanced methods of analysis with case history analyses of major earthquakes. An independent research project will be used to solve a challenging geotechnical earthquake engineering problem.
Prerequisite: CIVIL 324 or equivalent

CIVIL 726 15 Points
Engineering Geology
Introduction to fundamentals in soil and rock mechanics and their application to engineering projects. Discussion of natural hazards and their implications on infrastructure design. Practical exercises in field mapping, core logging, aerial photograph interpretation, and basic laboratory tests.
Restriction: CIVIL 404, EARTHSCI 372, GEOLOGY 372

CIVIL 727 15 Points
Dynamics of Structures in Earthquakes
Dynamic behaviour of structures and the means of predicting their response to the effects of earthquakes. Fundamental principles of earthquake engineering, including the effects of structural properties, and the roles of ductility, damping and isolation in mitigating earthquake damage. An individual research project on the impact of earthquakes on civil infrastructure is undertaken.
Prerequisite: Departmental approval
Restriction: CIVIL 314 or equivalent

CIVIL 728 15 Points
Geotechnical Engineering in Professional Practice
Prerequisite: Departmental approval
Restriction: CIVIL 324

CIVIL 730 15 Points
Fluid Mechanics Seminar
Special topics selected from fluid dynamics, water resources engineering, statistics and numerical methods.

CIVIL 731 15 Points
Water Resources Modelling
Risk and uncertainty in water resources systems; evaluation of alternatives in water resources; hydrologic modelling; hydraulic modelling; river basin modelling; water resources economics.

CIVIL 732 15 Points
Coastal Engineering 1
Prerequisite: CIVIL 431 or 733 or equivalent

CIVIL 733 15 Points
Coastal Engineering 2
Coastal, port and ocean engineering. Theories governing waves, tides and currents. Design of structures subject to a marine environment.

CIVIL 734 15 Points
River Engineering
Scales; flows; fluvial processes; mixing; ecohydraulics.

CIVIL 740 15 Points
Studies in Civil Engineering 3
Advanced course on topics to be determined each year by the Head of Department of Civil and Environmental Engineering. The course will include the independent application of highly specialised knowledge and skills related to the study area.

CIVIL 741 15 Points
Ground Improvements and Geosynthetics Engineering
Advanced ground improvement techniques including: densification, consolidation, preloading and surcharge, soil reinforcement, stabilisation and thermal ground improvement.
Prerequisite: CIVIL 322 or equivalent
Restriction: CIVIL 403

CIVIL 742 15 Points
Bridge Design
Comprehensive overview of road and rail bridge typologies, design philosophies, performance requirements in key areas of strength and serviceability, calculation methods to address these topics and the analysis and strengthening
of existing bridges. Bridge technology used in New Zealand and associated legislative requirements.

Prerequisite: CIVIL 713, 715 or equivalent

CIVIL 743
Special Topic: Building Information Modelling
Introduction to the main principles and tools of Building Information Modelling (BIM) in the Architecture-Engineering-Construction (AEC) industry. This course is suitable for different AEC professionals such as civil and structural engineers, architects, among others.

CIVIL 744
Special Study in Earthquake Engineering
An advanced course on topics in earthquake engineering to be determined each year by the Head of Department of Civil and Environmental Engineering.

CIVIL 745
Seismic Assessment of Existing Buildings
Principles of assessing the response of buildings to earthquakes and identification of vulnerabilities for different building types. Example buildings will be assessed using these advanced methodologies and independent research conducted on appropriate forms of retrofit.

CIVIL 750
Timber Engineering
The practical understanding of timber and its use in the construction industry. Design and detailing techniques for connections in timber structures, plywood structures, pole structures, timber floor systems, bridges, multi-storey buildings, formwork and falsework, arches and cable stayed systems.

Prerequisite: CIVIL 312 or equivalent

Restriction: CIVIL 451

CIVIL 751
Experimental Geotechnical Engineering
A student will undertake and report on experimental work, field or laboratory. The work will entail a range of soil and/or rock tests, such as but not limited to, triaxial tests, ring shear, consolidation, permeability, cone penetration tests, shear wave velocity and in situ vane tests.

CIVIL 752
Computational Geotechnical Engineering
The student will undertake and report on analytical work that relates to geotechnical engineering. The work will entail analysis of engineering works using state of practice numerical analysis software to elucidate geotechnical design and performance.

CIVIL 754
Geotechnical Modelling
Analysis of stress and strain in two and three dimensions, the idea of a constitutive law, elastic and plastic models for geomaterials. Numerical modelling of consolidation. Implementation of realistic models for soil and rock mass stress-strain-strength behaviour in numerical analysis software and evaluation of geotechnical software against known solutions.

CIVIL 756
Capstone Project
Final year team exercise with students in multi-disciplinary civil and environmental roles integrating technical learning into realistic design outcomes. Comprehensive investigation of an open ended, complex, real or synthetic civil engineering problem with simulated professional design office constraints. Includes technical, economic and environmental impact components to complete a scheme assessment report.

Prerequisite: 90 points from Part III courses listed in the BE(Hons) Schedule for Civil Engineering

CIVIL 758
Traffic Systems Design

Prerequisite: CIVIL 361

Restriction: CIVIL 403, 460, 660

CIVIL 759
Highway and Transportation Design

Prerequisite: CIVIL 360

Restriction: CIVIL 461, 661

CIVIL 760
Traffic Operations and Management
Selected topics from: traffic signal performance measures (queues, delays, stops), coordination of signals and platoon dispersion. Traffic characteristics, traffic studies, analytical tools in traffic engineering, queuing theory and applications. Traffic impact assessment and parking design. Travel demand management and other intelligent transport systems techniques.

Prerequisite: 15 points from CIVIL 660, 758, or equivalent

CIVIL 761
Planning and Design of Transport Facilities
Selected topics from: traffic signal practice/safety audits, two way highway planning, arterial traffic management, modelling and simulation and traffic flow.

Prerequisite: 15 points from CIVIL 660, 758, or equivalent

CIVIL 762
Transportation Planning
Provides an in-depth exploration of various components of the urban transportation planning process, with emphasis on theories on modelling. The principle behind the conventional four-stage transport planning model, namely, trip generation, trip distribution, modal split and trip assignment, is covered in detail.

Prerequisite: 15 points from CIVIL 660, 758, or equivalent

CIVIL 763
Transportation and Networks Analysis
Advanced themes of transportation-related network algorithms and analysis including theory and applications. The theory covers in-depth description of how to construct algorithms; the applications contain individual research and assignments in constructing new algorithms for traffic and transportation networks problems.

Prerequisite: 15 points from CIVIL 660, 758, or equivalent

CIVIL 764
Highway Safety and Operations
Advanced planning, design, operation and safety management of predominantly two way two lane highways, including: passing and overtaking models analysis and treatments, collision modification and mitigation,
roadway design, skid resistance, delineation, temporary traffic control, evaluation methods, and environmental management measures. An independently applied research project will use advanced analytical skills to critically evaluate factors which impact highway safety.

**Prerequisite:** CIVIL 360, 361, and 15 points from 661, 759, or equivalent

**CIVIL 765 15 Points**

**Infrastructure Asset Management**

Advanced theories and techniques fundamental to the management of infrastructure assets, with a primary focus on Asset Management Plans. Covers the entire spectrum of infrastructure, including roads, water networks and buildings. A major independent project incorporates a literature review and selection, and then critical review, of an Asset Management Plan from industry.

**Prerequisite:** 15 points from CIVIL 661, 759, or equivalent

**CIVIL 766 15 Points**

**Road Asset Management**

Focuses on advanced topics in road asset management. Develops a critical awareness of the key issues encountered, including those related to the evaluation of functional and structural performance; risk management; deterioration modelling and calibration; prioritisation and optimisation. The core skills are extended by an independent applied project in which students undertake to solve a complex road asset management problem.

**Prerequisite:** 15 points from CIVIL 661, 759, or equivalent

**CIVIL 767 15 Points**

**Pavement Analysis and Design**

Selected topics from: pavement design philosophy; stresses, strains and deflections in pavements; pavement material properties and characterisation; traffic loading and volume; pavement failure mechanisms; structural and functional assessment of pavements; empirical and mechanistic pavement design methods; pavement overlay design; asphalt mix design.

**Prerequisite:** 15 points from CIVIL 661, 759, or equivalent

**CIVIL 768 15 Points**

**Crash Reduction and Prevention**

An in-depth analysis of the techniques used to reduce and prevent road based crashes. Topics include: safety analysis, crash patterns, measuring safety, hazardous location identification, treatment and investigation procedures. Human factors, problem diagnosis and evaluation procedures. Road environment factors, geometrics, lighting, signs, delineation, road side safety and road surface characteristics. Vehicle design trends, safety auditing, speed management, vulnerable road users.

**Prerequisite:** 15 points from CIVIL 661, 759, or equivalent

**CIVIL 769 15 Points**

**Highway Geometric Design**

An advanced course in highway geometric design techniques. Through the use of an independent applied project, students will apply advanced theory, methods, processes and design tools to the safe design of highway geometric alignments that includes an understanding of human / driver behaviour characteristics.

**Prerequisite:** CIVIL 360, 361, and 15 points from 661, 759, or equivalent

**CIVIL 770 15 Points**

**Transport Systems Economics**

Advanced specialist topics in transportation economics including economic analysis, the theory of demand and supply of transport, government intervention policies, and the theory of externalities and agglomeration. Students are required to undertake a major research project by analysing two major transportation infrastructure projects to determine the likely future social and real time benefits and dis-benefits which accrue to the wider community.

**Prerequisite:** 15 points from CIVIL 660, 758, or equivalent

**CIVIL 771 15 Points**

**Planning and Managing Transport**

An advanced course on integrating land use planning and transport provisions, including planning for different land use trip types and parking, travel demand management techniques, and intelligent transport systems applications. An independent project applies this specialised knowledge towards planning, designing and managing transport infrastructure in a Territorial Local Authority (TLA) area.

**Prerequisite:** 15 points from CIVIL 660, 758, or equivalent

**CIVIL 772 15 Points**

**Public Transport: Planning and Operation**

Advanced scientific methods and algorithms for improving the cost-effectiveness of short-range public transport (PT) planning. Topics are: PT data collection; frequency and headway determination; alternative timetables; vehicle scheduling; crew scheduling; short-turn design; PT network design; PT reliability; and bus priority and BRT (Bus Rapid Transit). An independent research project is used to solve a complex transport planning problem.

**Prerequisite:** 15 points from CIVIL 660, 758, or equivalent

**CIVIL 773 15 Points**

**Sustainable Transport: Planning and Design**

Pedestrian planning and design; cycling facilities and planning; land use and trips; travel behaviour change and travel plans; integrated transport assessment; transport impact guidelines for site development.

**Prerequisite:** 15 points from CIVIL 660, 758, or equivalent

**CIVIL 774 15 Points**

**Studies in Transportation 1**

A graduate course on a range of selected topics to be determined each year by the Head of the Department of Civil and Environmental Engineering.

**CIVIL 775 15 Points**

**Studies in Transportation 2**

A graduate course on a range of selected topics to be determined each year by the Head of the Department of Civil and Environmental Engineering.

**CIVIL 779A 15 Points**

**CIVIL 779B 30 Points**

**Project in Transportation**

Students are required to submit a report on a topic in transportation assigned by the Head of Department. To complete this course students must enrol in CIVIL 779A and B

**CIVIL 782 15 Points**

**Water Resources Engineering**

A selection from the following: reservoir design and optimisation, flood control and design of flood control structures, micro to large scale hydroelectric engineering, river engineering and sedimentation. A water resources engineering design project.

**Prerequisite:** ENVENG 333 or equivalent

**Restriction:** CIVIL 480, 482

**CIVIL 787 15 Points**

**Project X**

Students are required to submit a report on a topic assigned by the appropriate Head of Department.

**Prerequisite:** Departmental approval required

To complete this course students must enrol in CIVIL 787A and B, or CIVIL 787
CIVIL 788A  15 Points  
CIVIL 788B  15 Points  
Project Y  
Students are required to submit a report on a topic assigned by the appropriate Head of Department.  
Prerequisite: Departmental approval required  
To complete this course students must enrol in CIVIL 788 A and B  

CIVIL 789  30 Points  
Project Z  
Students are required to submit a report on a topic assigned by the appropriate Head of Department.  
Prerequisite: Departmental approval required  

CIVIL 790  15 Points  
Civil Engineering Administration  
The application of legal principles to problems in civil engineering and environmental engineering management. Examines the administration of national and international engineering contracts. Discusses statutes affecting engineering business. Investigates the implications of resource management and natural resource allocation legislation on engineering projects. Analyses processes for resolving engineering disputes.  
Restriction: CIVIL 401, 490, ENNGEN 734  

CIVIL 791  15 Points  
Construction Management  
Understanding topics necessary for effective construction management. Using a generic construction project life cycle, essential aspects of construction projects including the tendering process, preparing tenders, tender evaluation, project planning, resource allocation, teamwork, site safety, and contract types are covered. Case studies are used to reinforce the application of theoretical ideas to the successful running of construction projects.  
Restriction: CIVIL 409  

CIVIL 792  15 Points  
Discrete-event Simulation in Construction  
Application of discrete-event simulation (DES) modelling to advanced planning and design construction operations and management of the construction supply chain. Critical assessment of the improvements in efficiency of planning methods and decisions patterns in construction management using DES. Individual and team research projects will apply advanced DES concepts and methods to complex, real-world construction projects.  

CIVIL 793A  30 Points  
CIVIL 793B  60 Points  
Thesis (Earthquake Engineering)  
To complete this course students must enrol in CIVIL 793 A and B  

CIVIL 794A  45 Points  
CIVIL 794B  45 Points  
Thesis (Earthquake Engineering)  
To complete this course students must enrol in CIVIL 794 A and B  

CIVIL 795  45 Points  
CIVIL 795A  15 Points  
CIVIL 795B  30 Points  
Research Project (Civil)  
Students are required to submit a report on a topic relevant to the specialisation, as assigned by the appropriate Head of Department.  
Prerequisite: Departmental approval required  
To complete this course students must enrol in CIVIL 795 A and B, or CIVIL 795  

CIVIL 796A  60 Points  
CIVIL 796B  60 Points  
ME Thesis (Civil)  
Students are required to submit a thesis on a topic assigned by the appropriate Head of Department.  
Prerequisite: Departmental approval required  
To complete this course students must enrol in CIVIL 796 A and B  

Computer Systems Engineering  

Stage II  
COMPSYS 201  15 Points  
Fundamentals of Computer Engineering  
Digital systems and binary coding; binary numbers; Boolean algebra and computer logic; combinational logic circuits; sequential logic circuits; hardware description language; digital design flow; register transfer level descriptions and design; data paths and control units; from circuits to microprocessors; basic computer organisation; introduction to modern microprocessors; timers and interfacing; C and assembly language for microprocessors; designing digital systems using microprocessors.  
Prerequisite: ELECTENG 101  

COMPSYS 202  15 Points  
Object Oriented Design and Programming  
A project-based course with extensive hands-on programming experience. Includes: an introduction to object oriented design including UML, sequence diagrams, use-case analysis; an introduction to object oriented programming in a modern high level language, algorithms, data abstraction and elementary data structures.  
Prerequisite: ENNGEN 131 or ENGSCI 131  
Restriction: MECHENG 270  

Stage III  
COMPSYS 301  15 Points  
Design: Hardware Software Systems  
An appreciation of the engineering design process as applied to computer systems. Design skills are enhanced through engineering projects which typically include elements of: computer hardware design, computer software design, system design and control, sensing, actuation and interfacing.  
Prerequisite: COMPSYS 302, 305, ELECTENG 209  

COMPSYS 302  15 Points  
Design: Software Practice  
A project-based course to gain experience in software design emphasising problem solving techniques and applications in computer systems engineering. The course includes practical, real-world project(s) involving a representative subset of the following topics: algorithm and data structure selection and implementation, parsing and translation, object-oriented and multi-threaded programming, scripting languages, peer-to-peer communication over internet.  
Prerequisite: COMPSYS 202  

COMPSYS 303  15 Points  
Microcomputers and Embedded Systems  
Prerequisite: COMPSYS 201, and COMPSYS 202 or SOFTENG 251
COMPSYS 304 15 Points
**Computer Architecture**
Modern processor architectures. Principles of modern processor design; pipelining; memory hierarchies; I/O and network interfacing; compiler and OS support; embedded processors; performance; multiprocessing.
Prerequisite: COMPSYS 201
Restriction: COMPSCI 313

COMPSYS 305 15 Points
**Digital Systems Design 1**
Digital Systems implementation technologies with emphasis on hardware description languages and design abstraction levels; structural, architectural and behavioral modelling; register-transfer level design; datapath and control units; functional and timing simulations; FPGA-based implementation design flow and case studies.
Prerequisite: COMPSYS 201

Postgraduate 700 Level Courses

COMPSYS 700A 15 Points
**Research Project**
Students are required to submit a report on project work carried out on a Computer Systems Engineering topic assigned by the Head of Department. The work shall be supervised by a member of staff.
Prerequisite: COMPSYS 301, and 45 points from COMPSCI 313, COMPSYS 302-305, ELECTENG 303
Restriction: COMPSYS 401
To complete this course students must enrol in COMPSYS 700 A and B

COMPSYS 701 15 Points
**Advanced Digital Systems Design**
Advanced concepts in digital design including: System-on-Chip (system level description, behavioural and register-transfer descriptions); advanced modelling techniques and design flows; design space exploration and optimisation; hardware-software partitioning and trade-offs; component reusability; reconfigurable systems; low-power systems; case studies (speech, image, video algorithms implementation, application specific processor design); individual research projects to analyse the problem, model and implement the required hardware-software components.
Prerequisite: COMPSYS 305

COMPSYS 703 15 Points
**Advanced Intelligent Systems**
Selected topics from current research in robotics and intelligent systems, such as: navigation, human-robot interaction, control, programming, path planning, problem solving, pattern recognition, artificial neural networks, fuzzy systems, genetic algorithms.
Prerequisite: COMPSYS 726

COMPSYS 704 15 Points
**Advanced Embedded Systems**
Selected advanced topics from current research in embedded systems such as: embedded systems based on formal models of computation; centralised and distributed architectures for embedded systems; static and dynamic embedded systems; languages and frameworks for distributed embedded systems; actor and agent systems; verification. Includes a significant individual research project.
Prerequisite: COMPSYS 723, and COMPSYS 302 or SOFTENG 306

COMPSYS 705 15 Points
**Formal Methods for Engineers**
Mathematical modelling techniques for embedded, automation, and mechatronic systems; advanced techniques for validation and verification; techniques for formal specification; methods of verification such as bisimulation and model checking; state space explosion problem and solutions such as BDDs, symbolic model checking, and modular verification; verification of HDL/C using model checking tools. Includes a significant individual research project.
Prerequisite: COMPSYS 302, and COMPSYS 305 or SOFTENG 211

COMPSYS 706 15 Points
**Speech and Language Processing**
Introduction to the fundamentals of speech and language processing. Concepts, methods and applications of speech signal processing. Principles of speech analysis, coding, modelling, recognition, synthesis and language processing.
Prerequisite: ELECTENG 733

COMPSYS 707 15 Points
**Advanced Microcomputer Architecture**
Hardware and software approaches for instruction-level parallel processing, multiprocessors and multithreading, embedded multiprocessing and memory systems, architectures for embedded multiple processors and networks on chip, dynamic reconfigurable architectures.
Prerequisite: COMPSYS 304

COMPSYS 710 15 Points
**Studies in Computer Systems Engineering 1**
Advanced courses on topics to be determined each year by the Head of Department.

COMPSYS 711 15 Points
**Studies in Computer Systems Engineering 2**
Advanced courses on topics to be determined each year by the Head of Department.

COMPSYS 713 15 Points
**Studies in Computer Systems Engineering 4**
Advanced courses on topics to be determined each year by the Head of Department.

COMPSYS 714 15 Points
**Studies in Computer Systems Engineering 5**
Advanced courses on topics to be determined each year by the Head of Department.

COMPSYS 715 15 Points
**Studies in Computer Systems Engineering 6**
Advanced courses on topics to be determined each year by the Head of Department.

COMPSYS 721 15 Points
**Special Topic**
An advanced course on topics to be determined each year by the Head of Department.

COMPSYS 722 15 Points
**Special Topic**
An advanced course on topics to be determined each year by the Head of Department.

COMPSYS 723 15 Points
**Embedded Systems Design**
Concurrency and models of computation, task models and race conditions, real-time operating systems based approach, synchronous approach, safe state machines, key properties: determinism and reactivity, SoPC and MPSoC, cyber-physical embedded systems, static analysis...
techniques, case studies in smart grid, automotive, medical devices and the like.
Prerequisite: COMPSYS 304, and COMPSYS 303 or SOFTENG 370
Restriction: COMPSYS 402, 403, 727

**COMPSYS 724** 15 Points
Real-time Systems
Prerequisite: COMPSYS 303
Restriction: COMPSYS 402, 404

**COMPSYS 725** 15 Points
Computer Networks and Distributed Applications
Prerequisite: COMPSYS 201, 202
Restriction: COMPSYS 405

**COMPSYS 726** 15 Points
Robotics and Intelligent Systems
Robotics and intelligent systems, including: robot manipulators and mobile robots, navigation techniques, planning and programming of robot actions, sensors and actuators, kinematic analysis and may include topics in artificial intelligence, artificial neural nets, fuzzy systems, genetic algorithms. Core concepts are extended by an individual research project where a challenging robotics problem is analysed and a solution implemented and tested.
Prerequisite: 15 points from COMPSYS 302, MECHENG 313, SOFTENG 306
Restriction: COMPSYS 406

**COMPSYS 727** 15 Points
Model-based Embedded Systems Design
Traditional and advanced methods of embedded systems modelling and design, models of computation, hardware-software co-design, real-time and safety-critical systems, principles of embedded and real-time operating systems, design using the real-time operating systems approach and the synchronous approach, use of the networks in real-time embedded systems. The assessment includes a significant individual research project.
Prerequisite: COMPSYS 303
Restriction: COMPSYS 402, 403, 723

**COMPSYS 728** 15 Points
Special Topic
An advanced course on a topic to be determined each year by the Head of Department. Includes a substantial individual research project.
Prerequisite: Departmental approval

**COMPSYS 729** 15 Points
Special Topic
An advanced course on a topic to be determined each year by the Head of Department. Includes a substantial individual research project.
Prerequisite: Departmental approval

**COMPSYS 787** 15 Points
Project X
Students are required to submit a report on a topic assigned by the appropriate Head of Department.
Prerequisite: Departmental approval

**COMPSYS 788A** 15 Points
COMPSYS 788B 15 Points
Project Y
Students are required to submit a report on a topic assigned by the appropriate Head of Department.
Prerequisite: Departmental approval
To complete this course students must enrol in COMPSYS 788 A and B

**COMPSYS 789** 30 Points
Project Z
Students are required to submit a report on a topic assigned by the appropriate Head of Department.
Prerequisite: Departmental approval

**COMPSYS 795** 45 Points
COMPSYS 795A 15 Points
COMPSYS 795B 30 Points
Research Project (Computer Systems)
Students are required to submit a report on a topic relevant to the specialisation, as assigned by the appropriate Head of Department.
Prerequisite: Departmental approval
To complete this course students must enrol in COMPSYS 795 A and B, or COMPSYS 795

**COMPSYS 796A** 60 Points
COMPSYS 796B 60 Points
ME Thesis (Computer Systems)
Students are required to submit a thesis on a topic assigned by the appropriate Head of Department.
Prerequisite: Departmental approval
To complete this course students must enrol in COMPSYS 796 A and B

**Disaster Management**

**Postgraduate 700 Level Courses**

**DISMGT 701** 15 Points
**Disaster Risk Management**
A broad based understanding of the critical elements of risk and risk management in pre- and post-disaster scenarios. Key elements include risk identification with regard to the forms and types of risk inherent in areas prone to disasters. Risk management approaches are explored and applied to different aspects of disaster management.

**DISMGT 703** 15 Points
**Disaster Management and Resilience**
Disaster management concepts and approaches related to urban resilience, including societal and infrastructure resilience. Key elements include exploring holistic approaches to disaster management and assessment of the relationship between resilience and disaster management. This includes systems and complexity, policy and general regulatory environment. This course involves group work and a course project.

**DISMGT 704** 45 Points
**DISMGT 704A** 15 Points
**DISMGT 704B** 30 Points
**Research Project**
Supervised research project addressing a topic relevant to disaster management.
To complete this course students must enrol in DISMGT 704 A and B, or DISMGT 704
ELECTENG 208 15 Points
Electric Circuit Analysis
Aims to provide a good understanding of the way electrical circuits work. It covers DC and AC circuit theorems and analysis; transient analysis, including the Laplace transform; transfer functions; AC power calculations; and time and frequency representation of signals. Prequisite: ELECTENG 101

ELECTENG 204 15 Points
Engineering Electromagnetics
Electrical conduction theories, conducting materials and insulators, magnetic and dielectric properties and materials, electrostatics and magnetostatics, steady electric currents, the magnetic field of steady electric currents, Ampere’s law and its applications, electromagnetic induction, Faraday’s law and its applications, electromagnetism, simple transmission lines, magnetic circuits, permanent magnets, inductors, transformers, introduction to electrical machines. Prequisite: ELECTENG 101

ELECTENG 208 15 Points
Electric Circuit Analysis
Aims to provide a good understanding of the way electrical circuits work. The course covers DC and AC circuit theorems and analysis. It also introduces some semiconductor devices (diodes, transistors and operational amplifiers) and gives examples of their applications. Prequisite: ELECTENG 101
Restriction: ELECTENG 202

ELECTENG 209 15 Points
Analogue and Digital Design
This project-based course provides an introduction to real-world design of analogue and digital circuits. Practical skills will be gained in electronic circuit analysis, use of CAD tools, PCB design and construction, circuit testing and calibration using laboratory equipment. Appropriate design methodology will be developed in a practical framework. Prequisite: ELECTENG 101, 202, 210, COMPSYS 201

ELECTENG 210 15 Points
Electronics 1
Semiconductor devices and applications, diodes, bipolar junction transistors and operational amplifiers. Elementary device physics. Linear and non-linear devices, terminal characteristics, small-signal modelling and analysis.
Postgraduate 700 Level Courses

ELECTENG 700A 15 Points
Research Project
Students are required to submit a report on project work carried out on a topic assigned by the Head of Department. The work shall be supervised by a member of staff. Prerequisite: ELECTENG 303, 305, 310, 311
Restriction: ELECTENG 401
To complete this course students must enrol in ELECTENG 700 A and B

ELECTENG 701 15 Points
Wireless Communication
Aspects of the design and planning of wireless communication systems. Introduction to cellular system design. Issues related to radio propagation: multipath, path loss prediction, channel characterisation. System aspects: cellular technologies, system planning and reliability estimation. Wireless systems and standards. Prerequisite: ELECTENG 721

ELECTENG 703 15 Points
Advanced Power Systems
Electricity markets: structure, pricing, optimisation, ancillary services; Power system protection practices; Distribution network development: Smart Grid, Demand Side participation; HVDC and FACT Devices Theory and Application; Renewable energy grid integration. Prerequisite: ELECTENG 731
Restriction: ELECTENG 738

ELECTENG 704 15 Points
Advanced Control Systems
Advanced theory of modern control systems with emphasis on optimisation techniques for both deterministic and stochastic processes. State-space modelling of dynamic systems and choice of suitable performance criteria. Adaptive, nonlinear and sliding mode control systems. Core concepts are extended by an individual research project in which a challenging control problem is analysed and solved. Prerequisite: ELECTENG 722

ELECTENG 705 15 Points
Heavy Current Electronics
Selected advanced topics in the design and control of power electronics are presented. Topics include: analysis of power electronic circuits using state space techniques with suitable applications; design and application of switch mode resonant converters; scalar and vector control of AC induction motors; advanced magnetics modelling. Prerequisite: ELECTENG 724

ELECTENG 706 15 Points
Digital Signal Processing
Advanced digital signal processing of discrete-time deterministic and stochastic signals. System response to stochastic signals; adaptive systems; Gauss-Markov processes; Wiener and Kalman filtering. Estimation and decision theory. Linear algebra in DSP: linear vector spaces; vector and matrix norms; fundamental matrix subspaces; inverse problems; conditioning and regularisation; singular value decomposition. Research projects with challenging digital signal processing problems. Prerequisite: ELECTENG 733

ELECTENG 707 15 Points
Image Processing and Computer Vision

ELECTENG 711 15 Points
Studies in Electrical and Electronic Engineering 1
Advanced course on topics to be determined each year by the Head of Department.

ELECTENG 712 15 Points
Studies in Electrical and Electronic Engineering 2
Advanced course on topics to be determined each year by the Head of Department.

ELECTENG 713 15 Points
Studies in Electrical and Electronic Engineering 3
Advanced course on topics to be determined each year by the Head of Department.

ELECTENG 714 15 Points
Studies in Electrical and Electronic Engineering 4
Advanced course on topics to be determined each year by the Head of Department.

ELECTENG 715 15 Points
Studies in Electrical and Electronic Engineering 5
Advanced course on topics to be determined each year by the Head of Department.

ELECTENG 716 15 Points
Studies in Electrical and Electronic Engineering 6
Advanced course on topics to be determined each year by the Head of Department.

ELECTENG 721 15 Points
Radio Systems
Transmission lines and waveguides, impedance matching, devices. Radio propagation, antennas and arrays. Radio system design – mobile, point-to-point, area coverage. Prerequisite: ELECTENG 307
Restriction: ELECTENG 421, 737

ELECTENG 722 15 Points
Control Systems
Restriction: ELECTENG 422, MECHENG 720, 724

ELECTENG 724 15 Points
Special Topic
An advanced course on topics to be determined each year by the Head of Department. Prerequisite: Departmental approval

ELECTENG 726 15 Points
Digital Communications
Prerequisite: ELECTENG 303, 732
Restriction: ELECTENG 426, 741

ELECTENG 728  
Sensor Networks  
15 Points
Prerequisite: ELECTENG 303, 732
Restriction: ELECTENG 428

ELECTENG 731  
Power Systems  
15 Points
Builds on the knowledge of three-phase power systems components to understand modelling, formulation and typical analysis carried out by electricity transmission, distribution and generation entities. Load flow, fault, stability and power quality. Supplemented by laboratories where students learn to use professional software to implement the theoretical aspects. 
Prerequisite: ELECTENG 303, 732
Restriction: ELECTENG 429

ELECTENG 732  
Communication Systems  
15 Points
Prerequisite: ELECTENG 303
Restriction: ELECTENG 410

ELECTENG 733  
Signal Processing  
15 Points
Prerequisite: ELECTENG 303
Restriction: ELECTENG 411

ELECTENG 734  
Power Electronics  
15 Points
Selected advanced concepts in power electronics are introduced through a practical and research based individual design project, utilising modern power converter topologies with supporting lectures that include: inductive power transfer and control, DC-DC converter design and control, high frequency magnetics design, semiconductor switches, practical design issues, controlled rectifiers and PWM converters with application to conventional and brushless DC motors. 
Prerequisite: ELECTENG 303
Restriction: ELECTENG 412

ELECTENG 735  
Green Energy Technologies  
15 Points
Green energy technologies with examples from current industry practice and cutting edge research developments. Topics include: renewable energy systems, distributed power generation, energy storage techniques, transportation electrification, power converters for renewable energy integration, soft-switched resonant converters, wireless power transfer, new semiconductor devices, motor drives, and LED lighting. 
Prerequisite: ELECTENG 734

ELECTENG 736  
Analog and Digital Filter Synthesis  
15 Points
Filter concepts and network functions, a review of approximation techniques and frequency transformations, leading to a thorough treatment of passive, active and digital filter implementations. 
Prerequisite: ELECTENG 303
Restriction: ELECTENG 413

ELECTENG 737  
Advanced Radio Systems  
15 Points
Advanced topics in radio system and high frequency electromagnetic design including; transmission lines and waveguides; impedance matching; radio frequency devices; radio propagation; antennas and arrays; mobile/point-to-point/area coverage systems. Core taught skills are extended by a focused laboratory programme and an individual research project involving techniques for high frequency system characterisation. 
Prerequisite: ELECTENG 307
Restriction: ELECTENG 421, 721

ELECTENG 738  
Selected Topics in Advanced Power Systems  
15 Points
Electricity markets: structure, pricing, optimisation, ancillary services; Power system protection practices; Distribution Network Development: Smart Grids, Demand Side Participation, Integration of DG/renewable sources and Electric Vehicles. Core concepts are extended by an individual research project, a self-guided protection laboratory and industry engagement in advanced power system practices. 
Prerequisite: ELECTENG 731
Restriction: ELECTENG 703

ELECTENG 739  
Special Topic  
15 Points
An advanced course on a topic to be determined each year by the Head of Department. Includes a substantial individual research project. 
Prerequisite: Departmental approval

ELECTENG 740  
Special Topic  
15 Points
An advanced course on a topic to be determined each year by the Head of Department. Includes a substantial individual research project. 
Prerequisite: Departmental approval

ELECTENG 741  
Advanced Digital Communications  
15 Points
Advanced topics in modern digital communication systems and networks including: Advanced digital modulation theory
and practice in single and multi-user communications systems; advanced information theory including single and multiple source coding; modern error control coding methods and applications; traffic theory and application in communication systems and networks. Theoretical knowledge is extended by an advanced laboratory programme and research projects.

Prerequisite: ELECTENG 303, 732
Restriction: ELECTENG 426, 726

**ELECTENG 787** 15 Points

**Project X**
Students are required to submit a report on a topic assigned by the appropriate Head of Department.

Prerequisite: Departmental approval

**ELECTENG 788A** 15 Points
**ELECTENG 788B** 15 Points

**Project Y**
Students are required to submit a report on a topic assigned by the appropriate Head of Department.

Prerequisite: Departmental approval

To complete this course students must enrol in ELECTENG 788 A and B

**ELECTENG 789** 30 Points

**Project Z**
Students are required to submit a report on a topic assigned by the appropriate Head of Department.

Prerequisite: Departmental approval

To complete this course students must enrol in ELECTENG 789 A and B, or ELECTENG 795

**Research Project (Electrical and Electronic)**
Students are required to submit a report on a topic relevant to the specialisation, as assigned by the appropriate Head of Department.

Prerequisite: Departmental approval

To complete this course students must enrol in ELECTENG 795 A and B, or ELECTENG 795

**ELECTENG 795** 45 Points
**ELECTENG 795A** 15 Points
**ELECTENG 795B** 30 Points

**Research Project**
Students are required to submit a report on a topic relevant to the technical, economic, environmental, regulatory or business aspects of energy.

Prerequisite: Departmental approval

To complete this course students must enrol in ENERGY 785 A and B

**ENERGY 785A** 15 Points
**ENERGY 785B** 30 Points

**Research Project**
Supervised research project addressing a topic relevant to the technical, economic, environmental, regulatory or business aspects of energy.

Prerequisite: Departmental approval

To complete this course students must enrol in ENERGY 785 A and B

**ENERGY 786A** 30 Points
**ENERGY 786B** 15 Points

**Research Project**
Supervised research project addressing a topic relevant to the technical, economic, environmental, regulatory or business aspects of energy.

Prerequisite: Departmental approval

To complete this course students must enrol in ENERGY 786 A and B

**ENERGY 794A** 30 Points
**ENERGY 794B** 60 Points

**Thesis**

### Diploma Courses

**GEOTHERM 601** 15 Points

**Geothermal Resources and their Use**
Worldwide occurrence of geothermal systems, introductory geology, volcanoes and volcanic rocks, New Zealand geothermal systems, structure of the TVZ, hydrothermal alteration, permeability and porosity, introduction to geochemistry of geothermal systems, geothermal surface manifestations, water compositions, geothermometry, silica geochemistry, overview of geophysics for geothermal exploration, geothermal resource assessment.

Corequisite: GEOTHERM 602, and 603 or 620
Restriction: GEOTHERM 785

**GEOTHERM 602** 15 Points

**Geothermal Energy Technology**
Worldwide geothermal development, types of geothermal systems, thermodynamics, properties of water and steam tables, heat transfer, fluid mechanics, steam-field equipment, geothermal power stations, geothermal drilling, wellbore processes, completion tests, downhole measurements, reinjection, corrosion, stored heat, Darcy’s law, cold groundwater, geothermal reservoirs, direct use, reservoir modelling, reservoir monitoring and steam-field management.

Corequisite: GEOTHERM 601
Restriction: GEOTHERM 785

Technological Choices for the Future
ENGGEN 100G 15 Points
Stage I
Engineering General

ENGGEN 121 15 Points
Engineering Mechanics
An introduction to planar mechanics including: free body
diagrams, planar equilibrium of rigid bodies, friction,
distributed forces, internal forces, shear force and bending
moment diagrams, kinematics and kinetics of particles,
work and energy, relative motion, kinematics and kinetics
of rigid bodies.
Restriction: CIVIL 210, MECHENG 222
ENGGEN 131 15 Points
Introduction to Engineering Computation and Software
Development
Introduction to problem solving in engineering through the
use of the software package MATLAB, and the programming
language C.
Restriction: ENGS 133, 331
ENGGEN 140 15 Points
Engineering Biology and Chemistry
Introduction to chemical and biological systems. The
application of engineering analysis and design techniques
to facilitate understanding the multiscale structure, function
and interactions of such systems. The use of case studies
to illustrate systems approaches to chemistry and biology.
ENGGEN 150 15 Points
Advanced Mechanics and Mathematical Modelling
An accelerated course replacing ENGGEN 121 and ENGSCI
111 for well-prepared and conjoint students. Topics include:
Free body diagrams, equilibrium of rigid bodies, internal
forces, shear force and bending moment diagrams,
work and energy, motion of particles and rigid bodies.
Introduction to mathematical modelling. Differentiation
and integration. Differential equations, Vector and matrix
algebra. Introduction to probability.
Restriction: ENGGEN 121, ENGSCI 111
ENGGEN 199 0 Points
English Language Competency
To complete this course students must attain a level of
competency in the English language as determined by the
Faculty of Engineering.

Stage II
ENGGEN 204 15 Points
Managing Design and Communication
The management of engineering design based on systems
engineering, plus the practical application of advocacy, and
individual and group-based communication skills. Scenarios
representative of real-world issues are addressed through
team-based projects and problem solving. The professional
issues introduced in ENGGEN 115 (health and safety, ethics,
sustainability, cultural diversity, communication, leadership,
and teamwork) are continued and developed.
Prerequisite: ENGGEN 115, 199
ENGGEN 299 0 Points
Workshop Practice
Stage III

ENGEN 303 15 Points
Managing Projects and Innovation
Introduction to theory and practice of managing projects, innovation, product development and service delivery. Students work in interdisciplinary teams to complete a project based on a complex real-world systems scenario. Project management and innovation topics are integrated with design studies covered in previous courses, and extended to wider business issues of risk and opportunities, entrepreneurship, financial management, and regulatory issues. Prerequisite: ENGEN 199, 204

ENGEN 388 0 Points
Leadership in Engineering
Prepares engineers for roles as future leaders. Enhances skills in seeing problems from non-engineering perspectives and dealing with situations without ideal solutions. Develops skills from other disciplines and increases awareness of the broader context of how engineering supports society. Prerequisite: Programme Director approval

Stage IV

ENGEN 403 15 Points
Managing a Business
An introduction to the commercial drivers and business practices which prepare students for successful roles in the commercial, government, and non-profit sectors after graduation. Students are presented with a systems thinking approach to managing large, complex, multidisciplinary challenges. Professional issues (such as health and safety, sustainability, resilience, ethics, leadership, and cultural diversity) from previous courses are expanded. Prerequisite: ENGEN 303, or BUSINESS 101 and 102, or PROPERTY 231 or SCI GEN 201 or LAW 241 or MUS 186

ENGEN 499 0 Points
Practical Work

Diploma Courses

ENGEN 601 15 Points
Case Studies in Engineering 1
The case study may include aspects of design or analysis, a survey and/or evaluation of a problem in any branch of engineering. Students are required to submit a report.

ENGEN 602 15 Points
Case Studies in Engineering 2
The case study may include aspects of design or analysis, a survey and/or evaluation of a problem in any branch of engineering. Students are required to submit a report.

ENGEN 622 15 Points
Advanced Topics in Engineering 1
Courses on topics determined each year by the Associate Dean Postgraduate in the Faculty of Engineering.

ENGEN 623 15 Points
Advanced Topics in Engineering 2
Courses on topics determined each year by the Associate Dean Postgraduate in the Faculty of Engineering.

Postgraduate 700 Level Courses

ENGEN 701 15 Points
Professional Project
A comprehensive investigation, analysis and reporting of a complex engineering design, development or professional engineering problem. Problem synthesis, solution specification, development and reporting as approved by the Head of Department of Mechanical Engineering. Prerequisite: Departmental approval

ENGEN 705 15 Points
Advanced Innovation and New Product Development
An advanced course dealing with the theoretical foundations of innovation, design and new product development. Theory is linked to practice in multidisciplinary teams engaged in innovation and design simulations and case studies. Prerequisite: B grade or higher in ENGEN 303

ENGEN 720 15 Points
Special Topic

ENGEN 721 15 Points
Special Topic

Special Study in Engineering Management 1
Directed study of an engineering management topic approved by the Programme Coordinator. Restriction: CIVIL 716

ENGEN 723 15 Points
Special Study in Engineering Management 2
Directed study of an engineering management topic approved by the Programme Coordinator.

ENGEN 724 15 Points
Special Study in Technology Management 1
Directed study of an engineering technology topic approved by the Programme Coordinator.

ENGEN 725 15 Points
Special Study in Technology Management 2
Directed study of an engineering technology topic approved by the Programme Coordinator.

ENGEN 730 15 Points
Management Skills for Project Professionals
Core theories and their implications for the art and practice of project management in organisations.

ENGEN 731 15 Points
Agile and Lean Project Management
The culture, structures, roles, tools and techniques required for effective management of projects in uncertain, volatile and ambiguous environments where the project scope evolves or the timescale is the primary driver. Students will learn advanced techniques and apply them to reinforce their learning.

ENGEN 732 15 Points
Systems Thinking and Project Business Case
The business case as the tool of choice for many businesses for turning strategy into projects and the subsequent investment appraisals. Topics include systems thinking, the theory of constraints, value, cost/benefit analysis, quadruple bottom line, sensitivity analysis, risk analysis, investment appraisal, performance measurement and benefit realisation.

ENGEN 733 15 Points
Organisational Strategic Management of Projects
The P3M (Project, Programme and Portfolio Management) and Scaled Agile frameworks and their practical application to local organisations as a method of driving performance.
improvement. Management of inter-dependencies between projects using current tools and techniques and the role of Hoshin Kanri (policy deployment) in managing strategy implementation.

**ENGEN 734  15 Points**
**Engineering Contracts for Project Managers**
Theoretical concepts in engineering commercial contracts, how these concepts apply to the work environment and manifest in the contracts in use in the project environment. Students will study relevant case law, NZS3910, NEC3 and FIDIC.
*Restriction: CIVIL 790*

**ENGEN 735  15 Points**
**Project Management Case Studies**
Examination of examples from industry to show how theoretical concepts relate to the success or failure of projects. Students will study a range of projects from across the world that highlight critical success factors.

**ENGEN 736  15 Points**
**Research Implementation and Dissemination**
Implementation and dissemination of a research project.
*Corequisite: ENGEN 792 or 794*

**ENGEN 766  45 Points**
**ENGEN 766A  15 Points**
**ENGEN 766B  30 Points**
**Engineering Management Project**
A major project which should relate to a practical situation in an organisation or company selected by the candidate. The project must be approved by the Master of Engineering Management Programme Director, and may take the form of a survey and evaluation of modern advances in engineering management practices, the development and/or implementation of new management strategies, or a management oriented industrial case study.
*Restriction: ENGEN 763, 764, 765*
To complete this course students must enrol in ENGEN 766 A and B, or ENGEN 766

**ENGEN 769  15 Points**
**Research Methods for Engineers**
Development of research methods knowledge and skills including research philosophy and design, research ethics, data collection and analysis techniques, identification of limitations, and writing up and reporting. Qualitative and quantitative research methods are addressed.
*Restriction: CHEMMAT 751, CIVIL 705, COMPYS 700, ELECTENG 700, ENGSCE 700, MECHENG 700, SOFTENG 700*

**ENGEN 770  15 Points**
**Medical Device and Technology Development**
Clinical and technical aspects of medical device development. Identification and definition of a medical device, examples and case studies. Evidence based technology, justification and motivation for developing medical devices. Techniques and issues concerning medical device research and design processes.

**ENGEN 771  15 Points**
**Medical Device Industry Practice**
Commercial lifecycle considerations in medical device design. Clinical evaluation of systems; safety and ethics issues. Medical and regulatory requirements and international standards for medical devices; quality assurance and controlled design. Examples drawn from surgical assistance and medical intervention systems, training systems, prosthetics, orthotics, exoskeleton devices, and healthcare robotics.

**ENGEN 791A  30 Points**
**ENGEN 791B  30 Points**
**Medical Devices Research Project**
A structured supervised research project addressing a topic relevant to the development and commercialisation of medical devices and technologies.
*Prerequisite: Departmental approval*
To complete this course students must enrol in ENGEN 791 A and B

**ENGEN 792  30 Points**
**ENGEN 792A  15 Points**
**ENGEN 792B  15 Points**
**Research Project**
A research project which requires students to undertake a practical application in a temporary endeavour to deliver a product, service or specified outcome. May take the form of surveys, interviews, action research, project implementation and evaluation of modern advances in project management practices, or a project management oriented case study. Projects conducted by students working in pairs. Each student must prepare a separate individual report.
*Prerequisite: Departmental approval*
To complete this course students must enrol in ENGEN 792 A and B, or ENGEN 792

**ENGEN 793A  30 Points**
**ENGEN 793B  60 Points**
**Medical Devices Research Portfolio**
A structured supervised research portfolio addressing a topic relevant to the development and commercialisation of medical devices and technologies.
*Prerequisite: Departmental approval*
To complete this course students must enrol in ENGEN 793 A and B

**ENGEN 794  30 Points**
**ENGEN 794A  15 Points**
**ENGEN 794B  15 Points**
**Research Project**
A research project which requires a student to undertake a practical application in a temporary endeavour to deliver a product, service or specified outcome. May take the form of action research, project implementation and evaluation of modern advances in project management practices, or a project management oriented case study. Project will be conducted by students working individually within an existing project orientated team.
*Prerequisite: Departmental approval*
To complete this course students must enrol in ENGEN 794 A and B, or ENGEN 794

**ENGEN 796A  60 Points**
**ENGEN 796B  60 Points**
**ME Thesis (Engineering)**
Students are required to submit a thesis on a topic assigned by the appropriate Head of Department.
*Prerequisite: Departmental approval*
To complete this course students must enrol in ENGEN 796 A and B
ENNGEN 798A  60 Points
ENNGEN 798B  60 Points
Master of Operations Research Thesis
Prerequisite: Departmental approval
To complete this course students must enrol in ENNGEN 798 A and B

ENGSCI 211  15 Points
Mathematical Modelling 2
Introductory data analysis and statistics.
Prerequisite: ENNGEN 150, or ENNGEN 111, or a B+ grade or higher in MATHS 108 or 110 or 150 or 153, or a B+ grade or higher in MATHS 120 and 130
Restriction: ENGSCI 213

ENGSCI 213  15 Points
Mathematical Modelling 2SE
Probability theory, random variables and distributions, data analysis and statistics, linear algebra, stochastic process.
Prerequisite: ENNGEN 150, or ENNGEN 111, or a B+ grade or higher in MATHS 108 or 110 or 150 or 153, or a B+ grade or higher in MATHS 120 and 130
Restriction: ENGSCI 213

ENGSCI 233  15 Points
Computational Techniques and Computer Systems
Introduction to digital electronics, computer organisation and computational techniques. Digital gates, combinatorial and synchronous circuits, data representation, instruction sets, memory, hardware, interfacing. Numerical computation, numerical algorithms.
Prerequisite: ELECTENG 101 and ENNGEN 131, and ENNGEN 150 or ENGSCI 111
Corequisite: ENGSCI 211 or 213

ENGSCI 255  15 Points
Modelling in Operations Research
Emphasises the relationship between business and industrial applications and their associated operations research models. Software packages will be used to solve practical problems. Topics such as: linear programming, transportation and assignment models, network algorithms, queues, inventory models, simulation, analytics and visualisation will be considered.
Prerequisite: 15 points at Stage I in Statistics or Mathematics or Engineering
Restriction: STATS 255

ENGSCI 263  15 Points
Engineering Science Design I
Introduction to concepts of modelling of engineering problems, including model formulation, dimensional analysis, solution procedures, comparisons with reality, and shortcomings, with examples from elementary mechanics, structures, hydrostatics, one-dimensional heat, diffusion and fluid motion. Further development of problem-solving skills and group project work. The use of computer tools in engineering design, including advanced spreadsheeting integrated with solid modelling.
Prerequisite: ENNGEN 115, and ENNGEN 150 or ENGSCI 111
Corequisite: ENGSCI 211 or 213

Stage III
ENGSCI 305  15 Points

ENGSCI 306  15 Points
Special Topic
ENGSCI 309  15 Points
Image and Digital Signal Processing
Prerequisite: ENGSCI 211
Restriction: ELECTENG 709

ENGSCI 311  15 Points
Mathematical Modelling 3
A selection from: ordinary differential equations, systems of equations, analytical and numerical methods, non-linear ODEs, partial differential equations, separation of variables, numerical methods for solving PDEs, models for optimisation, industrial statistics, data analysis, regression, experimental design reliability methods.
Prerequisite: ENGSCI 211
Restriction: ENGSCI 313, 314

ENGSCI 313  15 Points
Mathematical Modelling 3ECE
Complex Analysis, including complex numbers, analytic functions, complex integration, Cauchy’s theorem, Laurent series, residue theory; Laplace transforms; Modelling with partial differential equations, including electronic and electrical applications; Fourier Analysis, Fourier transform, Fast Fourier transform; Optimisation, including unconstrained and constrained models, linear programming and nonlinear optimisation.
Prerequisite: ENGSCI 211
Restriction: ENGSCI 313, 314

ENGSCI 314  15 Points
Mathematical Modelling 3ES
Mathematical modelling using ordinary and partial differential equations. Topics include: probability, conditional probability, random variables as models of a population, common distribution models, the Poisson
process, applications to reliability, exploratory data analysis, confidence intervals, tests of hypothesis, t-tests, sample tests and intervals, paired comparisons. Introduction to one-way ANOVA. Linear and polynomial regression, regression diagnostics.

Prerequisite: ENGSCI 211
Restriction: ENGSCI 311, 313, 321

**ENGSCI 331 15 Points**
Computational Techniques 2
Numerical algorithms and their translation to computer code. A selection of topics from numerical solution of linear equations, eigen problems, ordinary differential equations, numerical integration, nonlinear equations, finite differences and partial differential equations.

Prerequisite: ENGSCI 233
Corequisite: ENGSCI 311 or 313 or 314

**ENGSCI 343 15 Points**
Mathematical and Computational Modelling in Mechanics

Prerequisite: BIOMENG 221 or MECHENG 242, and ENGSCI 211 or 213
Restriction: BIOMENG 321

**ENGSCI 344 15 Points**
Modelling and Simulation in Computational Mechanics
Solution of real-world continuum mechanics problems, using computational tools commonly used in engineering practice. This will develop skills in: analysing complexity and selecting an appropriate model representation of the physical problem; choosing the correct computational tool with which to solve the model; designing and executing appropriate numerical experiments using the chosen tool; validating, interpreting and communicating the simulation results.

Prerequisite: BIOMENG 321 or ENGSCI 343

**ENGSCI 355 15 Points**
Applied Modelling in Simulation and Optimisation
Use of optimisation modelling languages and simulation software, with an emphasis on practical problem solving and laboratory-based learning.

Prerequisite: ENGSCI 255 or STATS 255
Restriction: OPSRES 385

**ENGSCI 363 15 Points**
Engineering Science Design II
Applications of elasticity and fluid dynamics theory to engineering problems including design and analysis of mechanical assemblies. Group projects solving an integrated, complex design problem, including costings for development, manufacture and other professional engineering issues. Underlying Finite Element Modelling (FEM) and Continuum Mechanics concepts. Utilisation of 3D CAD and FEM software during both design and analysis phases.

Prerequisite: BIOMENG 241 or ENGSCI 263

**ENGSCI 391 15 Points**
Optimisation in Operations Research
Linear programming, the revised simplex method and its computational aspects, duality and the dual simplex method, sensitivity and post-optimal analysis. Network optimisation models and maximum flow algorithms. Transportation, assignment and transhipment models, and the network simplex method. Introduction to integer programming.

Prerequisite: 15 points from ENGGEND 150, ENGSCI 111, MATHS 208, 250, 253, and 15 points from COMPSCI 101, ENGGEN 131, MATHS 162, STATS 220

**Postgraduate 700 Level Courses**

**ENGSCI 700A 15 Points**
Research Project
An investigation carried out under the supervision of a member of staff on a topic assigned by the Head of Department of Engineering Science. A written report on the work must be submitted.

To complete this course students must enrol in ENGSCI 700 A and B

**ENGSCI 701 15 Points**

An advanced course on topics to be determined each year by the Head of Department of Engineering Science.

Prerequisite: Departmental approval

**ENGSCI 705 15 Points**
Special Topic

**ENGSCI 706 15 Points**
Special Topic

**ENGSCI 711 15 Points**
Advanced Mathematical Modelling
A selection of modules on mathematical modelling methods in engineering, including theory of partial differential equations, integral transforms, methods of characteristics, similarity solutions, asymptotic expressions, theory of waves, special functions, non-linear ordinary differential equations, calculus of variations, tensor analysis, complex variables, wavelet theory and other modules offered from year to year.

Prerequisite: 15 points from ENGSCI 311, 313, 314

**ENGSCI 712 15 Points**
Computational Algorithms for Signal Processing
Advanced topics in mathematical modelling and computational techniques, including topics on singular value decomposition, Principle Component Analysis and Independent Component Analysis, eigen-problems, and signal processing (topics on neural network models such as the multi-layer perception and self organising map).

Prerequisite: 15 points from ENGSCI 311, 313, 314

**ENGSCI 721 15 Points**
Advanced Numerical Methods
An advanced course on finite elements, boundary elements and finite differences.

Prerequisite: Departmental approval

**ENGSCI 740 15 Points**
Advanced Mechanics in Research and Technology
Applications of continuum mechanics to problems in biomechanics, fluid mechanics and solid mechanics. Including topics such as large deformation elasticity theory applied to soft tissues, inviscid flow theory, compressible flows, viscous flows, meteorology, oceanography, coastal...
ocean modelling, mixing in rivers and estuaries. Fracture, composite materials and geomechanics.

**Prerequisite:** ENGBIOM 321 or ENGSCE 343

**ENGSCI 741**

**Waves and Fracture**

Advanced topics in mechanics including: waves and wave motion with applications to acoustics, optics, fluid flow problems and shock discontinuities using numerical methods. Fracture: modes of, displacement discontinuity in linear elasticity, stress intensity factor, spectral solution methods, finite friction. Applications include: hydraulic fracturing, earthquakes, macroscale strength of materials.

**Prerequisite:** BIOMENG 321 or ENGSCE 343

**ENGSCI 742**

**Studies in Continuum Mechanics**

An advanced course in continuum mechanics covering topics in the mechanics of solids and fluids and other continua.

**Prerequisite:** Departmental approval

**ENGSCI 745**

**Petroleum Engineering**

Interdisciplinary introduction to topics in geology, geophysics, reservoir engineering, drilling and production engineering relevant to the production of oil and gas. Mathematical models of multiphase fluid flow in porous media. Reservoir engineering tools for analysis and forecasting of reservoir performance. Unconventional petroleum resources.

**Prerequisite:** 15 points from ENGSCI 311, 313, 314

**ENGSCI 753**

**Computational Techniques in Mechanics and Bioengineering**

Theoretical and applied finite element and boundary element methods for static and time dependent problems of heat flow, bioelectricity, linear elasticity and non-linear mechanics.

**Prerequisite:** ENGG 313 or equivalent, and 15 points from ENGSCI 311, 313, 314

**ENGSCI 755**

**Decision Making in Engineering**

Introduction to techniques for decision making in engineering systems including decision heuristics, simple prioritisation, outranking approaches, analytic hierarchy process, application to group decision making.

**Prerequisite:** Departmental approval

**ENGSCI 760**

**Algorithms for Optimisation**

Meta-heuristics and local search techniques such as Genetic Algorithms, Simulated Annealing, Tabu Search and Ant Colony Optimisation for practical optimisation. Introduction to optimisation under uncertainty, including discrete event simulation, decision analysis, Markov chains and Markov decision processes and dynamic programming.

**Prerequisite:** ENGSCE 391

**ENGSCI 761**

**Integer and Multi-objective Optimisation**

**Prerequisite:** ENGSCE 391

**ENGSCI 762**

**Scheduling and Optimisation in Decision Making**

A course of advanced topics arising in the practical application of optimisation models for machine and resource scheduling, routing applications, staff rostering and performance measurement.

**Prerequisite:** ENGSCE 391

**ENGSCI 763**

**Advanced Simulation and Stochastic Optimisation**

**Prerequisite:** ENGSCE 391

**ENGSCI 765**

**Studies in Operations Research 1**

An advanced course in recent developments in operations research and its applications.

**Prerequisite:** Departmental approval

**ENGSCI 766**

**Studies in Operations Research 2**

An advanced course in recent developments in operations research and its applications.

**Prerequisite:** Departmental approval

**ENGSCI 768**

**Advanced Operations Research and Analytics**

Advanced Operations Research and Analytics topics including selected theory, algorithms and applications for non-linear programming, smooth and non-smooth optimisation, equilibrium programming and game theory.

**Prerequisite:** ENGSCE 391

**ENGSCI 769**

**Research Topics in Operations Research 2**

A course on recent research topics in Operations Research.

**Prerequisite:** ENGSCE 760, 761

**ENGSCI 772**

**Whole Organ Modelling**

**Prerequisite:** BIOMENG 321 or ENGSCE 343

**ENGSCI 787**

**Project X**

Students are required to submit a report on a topic assigned by the appropriate Head of Department.

**Prerequisite:** Departmental approval

**ENGSCI 788A**

**ENGSCI 788B**

**Project Y**

Students are required to submit a report on a topic assigned by the appropriate Head of Department.

**Prerequisite:** Departmental approval

To complete this course students must enrol in ENGSCI 788 A and B
ENGSCL 789 30 Points  
Project Z  
Students are required to submit a report on a topic assigned by the appropriate Head of Department.  
**Prerequisite:** Departmental approval

ENGSCL 795 45 Points  
ENGSCL 795A 15 Points  
ENGSCL 795B 30 Points  
Research Project (Engineering Science)  
Students are required to submit a report on a topic relevant to the specialisation, as assigned by the appropriate Head of Department.  
**Prerequisite:** Departmental approval  
To complete this course students must enrol in ENGSCL 795 A and B, or ENGSCL 795

ENGSCL 796A 60 Points  
ENGSCL 796B 60 Points  
ME Thesis (Engineering Science)  
Students are required to submit a thesis on a topic assigned by the appropriate Head of Department.  
**Prerequisite:** Departmental approval  
To complete this course students must enrol in ENGSCL 796 A and B

Environmental Engineering

Stage II  
ENVENG 244 15 Points  
Environmental Engineering 1  
Water quality, water and wastewater characteristics - physical, chemical and biological treatments (unit operations and processes). Solid waste characteristics and disposal, hazardous waste treatment. Stormwater management.  
**Restriction:** ENVENG 243

ENVENG 333 10 Points  
Engineering Hydrology  

ENVENG 341 15 Points  
Environmental Engineering 2  
Examines natural environmental processes and their relevance to engineering. Soil and water chemistry, equilibrium and organic chemistry, microbiology, biochemistry and biological processes will be examined, focusing on the application of these in engineering design, practice and management.

ENVENG 342 15 Points  
Environmental Engineering Design  
The applications of design practice in environmental engineering with a number of design projects. Elements of water and wastewater engineering. Landfill design and air pollution control.  
**Restriction:** ENVENG 405

Stage III  
ENVENG 400 15 Points  
Special Topic

Postgraduate 700 Level Courses  
ENVENG 701 15 Points  
Urban Stormwater Management  
Design and application of stormwater runoff quantity and quality control systems for urban development including: bioretention, living roofs, swales, permeable/porous pavement, detention ponds, and constructed wetlands. An independent project couples technical design, safety, maintenance, construction, hydrologic and water quality modelling, and stakeholder engagement in an application of "Low Impact Design" from the site to the catchment scale.  
**Prerequisite:** ENVENG 244, 333

ENVENG 702 15 Points  
Engineering Decision Making in Aotearoa  
Advanced systems engineering based decision making; complex problem framing including ontology analysis; cultural opportunity mapping; absolute sustainability analysis; risk threshold determination; temporal cumulative effects; and effective consultation. Independent research is undertaken to solve a complex engineering decision making problem.

ENVENG 703 15 Points  
Studies in Environmental Engineering 3  
A course on a topic in environmental engineering to be determined each year by the Head of Department of Civil and Environmental Engineering. The course will include the independent application of highly specialised knowledge and skills related to the study area.

ENVENG 705 15 Points  
Special Topic in Environmental Engineering 1  
A course on a topic in environmental engineering to be determined each year by the Head of Department of Civil and Environmental Engineering. The course will include the independent application of highly specialised knowledge and skills related to the study area.  
**Restriction:** ENVENG 402

ENVENG 706 15 Points  
Special Topic in Environmental Engineering 2  
A course on a topic in environmental engineering to be determined each year by the Head of Department.  
**Restriction:** ENVENG 403

ENVENG 707 15 Points  
Advanced Water Treatment and Reuse  
Covers advanced treatment technologies including desalination, membrane technologies, advanced oxidation processes, novel materials for treatment of emerging contaminants, and fundamentals of water reuse, applications, and case studies for potable reuse, industrial reuse and aquifer recharge.  
**Prerequisite:** ENVENG 244, 342

ENVENG 719 15 Points  
Design Project  
A design project requiring input from more than one engineering subdiscipline. The department will offer a number of projects from which the students may select. It will be possible for groups of students to work together on a project. Assessment will be based on a report and an oral presentation of the outcome of the project.  
**Restriction:** ENVENG 419

ENVENG 740 15 Points  
Water and Wastewater Engineering  
Chemistry and microbiology of water and wastewater treatment, flow models and reactors. Unit operations

**ENVENG 744**  
Environmental Engineering Processes Laboratory  
15 Points  
Prerequisite: Departmental approval by the appropriate Head of Department.  
Students are required to submit a report on a topic assigned.

**ENVENG 746**  
Surface Water Quality Modelling  
15 Points  
Prerequisite: ENVENG 341 or equivalent.  
Advanced specialist topics in modelling of lakes and rivers. Specific topics covered include response to different loadings applied to surface water systems, and modelling of organic matter, dissolved oxygen consumption, eutrophication, and toxic substances. The core taught skills are extended by an individual project in which independent research is undertaken to solve a challenging surface water quality engineering problem.

**ENVENG 747**  
Soil-Contaminant Fate Processes and Modelling  
15 Points  
Prerequisite: ENVENG 341 or equivalent.  
Focuses on modelling sorption, degradation kinetics, and leaching of chemicals in the soil environment. Topics include deriving sorption parameters, parent and metabolite fitting with statistical rigours, calculating degradation end-points, novel adsorbents for removing contaminants in soil and water. The core taught skills are extended by an individual project in which independent research is undertaken to solve an environmental issue.

**ENVENG 750**  
Advanced Sustainability Engineering  
15 Points  
Prerequisite: ENVENG 341 or equivalent.  
Focuses on an advanced understanding of the science of sustainability and its application to engineering practice and management, including complex systems thinking, tools to assess sustainability, management, leadership and decision making leading to sustainability, global directions towards sustainability across cultural systems. Develops critical analytical thinking and research based knowledge through debates and an applied research project.

**ENVENG 752**  
Risk, LCA and Sustainability  
15 Points  
The objectives of this course are to provide students with an understanding of sustainability, life cycle assessment, impact assessment and risk assessment and how these can be used to measure sustainability. The format will include discussions on sustainability, assessment methods and sustainability assessment, including scoping, sustainable levels, inventory, impact and risk assessment and mitigations measures.

**ENVENG 787**  
Project X  
15 Points  
Prerequisite: Departmental approval by the appropriate Head of Department.

**ENVENG 788A**  
15 Points  
Project Y  
Prerequisite: Departmental approval by the appropriate Head of Department.

**ENVENG 788B**  
15 Points  
To complete this course students must enrol in ENVENG 788 A and B.

**ENVENG 789**  
Project Z  
30 Points  
Prerequisite: Departmental approval

**ENVENG 795**  
45 Points  
**ENVENG 795A**  
15 Points  
**ENVENG 795B**  
30 Points  
Prerequisite: Departmental approval

**ENVENG 796A**  
60 Points  
**ENVENG 796B**  
60 Points  
Prerequisite: Departmental approval

**GLOBAL 101**  
15 Points  
**GLOBAL 101G**  
15 Points  
Prerequisite: Departmental approval

**GLOBAL 101 15 Points**  
Global Issues, Sustainable Futures  
The basis for sustainability – social issues such as population and consumption, environmental issues such as climate change, limited resources and environmental degradation. Discusses the roles that various disciplines (law, business, engineering and urban planning) will play in developing solutions, including consideration of human rights and good governance, new concepts in economics and business management which will lead to sustainable businesses, developments in science and technology which will change how we manage resources and new visions for cities and communities which will support sustainable ways of life.  
Restriction: GENED 101G

**MECHENG 201**  
15 Points  
Introduction to Mechatronics  
Introduces mechatronics to mechanical and mechatronics engineers. Covers sensors and actuators, analogue and digital circuit elements for signal processing and programming.  
Prerequisite: ELECTENG 101, ENGGEN 131

**MECHENG 211**  
15 Points  
Thermofluids  
The fundamentals of fluid mechanics, thermodynamics and
heat transfer with practical applications to engineering devices and systems.

**MECHENG 222**  
**15 Points**  
**Dynamics**  
Kinematics of particles, rectilinear and curvilinear motion, kinematics of rigid bodies in the plane. Kinetics of particles, systems of particles and rigid bodies. Impulse and momentum; mechanism motion in the plane. Vibration of a particle.  
*Prerequisite: ENGGEN 121 or 150*

**MECHENG 235**  
**15 Points**  
**Design and Manufacture 1**  
The design process as a teamwork, and system based, problem-solving activity. Design methodology and evaluation, design failure and safety, communicating design intent through graphical means. Introduction to engineering material properties and concepts of material failure. Introduction to motive power sources, machine elements and production and fabrication processes.  
*Prerequisite: ENGGEN 115*  
*Restriction: MECHENG 223, 234*

**MECHENG 236**  
**15 Points**  
**Design and Manufacture 2**  
Introduction to computer-assisted design animation and virtual mechanisms and computer-aided production processes. Basic hydraulics and pneumatics systems and components. Fundamental techniques for the determination of material behaviour under external loads. Further production processes. Design reliability. Basic principles of “Design for X”.  
*Prerequisite: MECHENG 235*  
*Restriction: MECHENG 223, 234*

**MECHENG 242**  
**15 Points**  
**Mechanics of Materials 1**  
*Prerequisite: ENGGEN 121 or 150*

**MECHENG 270**  
**15 Points**  
**Software Design**  
Fundamentals of software design and high-level programming making use of case studies and programming projects. Includes: requirements analysis, specification methods, software architecture, software development environments, software quality, modularity, maintenance, reusability and reliability; models of software development.  
*Restriction: COMPSYS 202*

**Stage III**

**MECHENG 311**  
**15 Points**  
**Thermal Engineering**  
*Prerequisite: MECHENG 211*

**MECHENG 312**  
**15 Points**  
**Sensors and Actuators**  
Mechatronics engineering and its elements, including sensors, actuators and computer interfacing. The design of mechatronic systems. Topics include interfacing, signal conditioning and processing, sensors, actuators, control technologies, software, systems modelling, simulation, analysis and design.  
*Restriction: ELECTENG 428*

**MECHENG 313**  
**15 Points**  
**Design of Real-Time Software**  
Introduces the principles of software design in a real-time environment. Main topics include computer/microcontroller architecture, programming in a real-time environment, software design and data acquisition systems.  
*Prerequisite: MECHENG 270*

**MECHENG 322**  
**15 Points**  
**Control Systems**  
An introduction to classical control of mechanical and mechatronic systems. Topics include: transfer functions, block diagrams, time response characteristics, stability, frequency response characteristics, and controller design (eg, pole placement, lead-lag compensation, PID). Applications in MATLAB/Simulink and with physical systems.  
*Prerequisite: ENGSCT 211, MECHENG 222*

**MECHENG 325**  
**15 Points**  
**Dynamics of Fluids and Structures**  
*Prerequisite: MECHENG 211, 222*  
*Restriction: MECHENG 324*

**MECHENG 334**  
**15 Points**  
**Engineering Design 3M**  
Good practice and standard methods in mechanical engineering design. Conceptual and detailed design in projects involving machine elements, engineering sciences and engineering mechanics. Some of the advanced computer-aided tools (eg, CAD, CAM, CAE) will be introduced and utilised in some projects.  
*Prerequisite: MECHENG 235, 236*  
*Restriction: MECHENG 332, 333*

**MECHENG 340**  
**15 Points**  
**Mechanics of Materials 2**  
*Prerequisite: MECHENG 242*  
*Restriction: MECHENG 341*

**MECHENG 352**  
**15 Points**  
**Manufacturing Systems**  
An introduction to the procedures and technological aspects of typical manufacturing systems; basic concepts of plant and work design; automation; planning, implementation; simulation, and monitoring of production processes; project-based introduction to the tools and techniques applied by professional engineers in modern manufacturing plants.  
*Restriction: MECHENG 351*
MECHENG 370  15 Points
Analog Circuit Design
An introduction to the design, analysis and implementation of electronic circuits or systems for various applications such as signal generation and processing, interfacing, and high power electronics. These include PCB design and testing.
Prerequisite: 15 points from ELECTENG 101, 208, MECHENG 201

MECHENG 371  15 Points
Digital Circuit Design
Fundamental concepts in the design of combinational and sequential logic circuits. Modern approach to design using CAD tools that exploit the advantage of automation. Students will be exposed to the use of FPGA to rapid prototype digital systems using schematic and hardware description language entries.
Prerequisite: 15 points from ELECTENG 101, 208, MECHENG 201

Postgraduate 700 Level Courses

MECHENG 700A  15 Points
Research Project
A comprehensive investigation carried out under the supervision of a member of staff on a topic assigned by the Head of Department of Mechanical Engineering leading to an oral presentation, a poster display and a written report.
Restriction: MECHENG 407, 408, 461, 462, 762, 763
To complete this course students must enrol in MECHENG 700 A and B

MECHENG 701  15 Points
Studies in Mechanical Engineering 1
Advanced courses on topics to be determined each year by the Head of Department of Mechanical Engineering.

MECHENG 702  15 Points
Studies in Mechanical Engineering 2
Advanced courses on topics to be determined each year by the Head of Department of Mechanical Engineering.

MECHENG 705  15 Points
Mechatronics Systems
Fundamentals of digital control and signal processing as applied to mechatronics systems. Modelling and analysis of mechatronics systems that includes transducers and applications. Issues related to mechatronics systems such as thermal management, signal detection, filtering and integrity, etc.
Prerequisite: MECHENG 312, 322
Restriction: MECHENG 405

MECHENG 706  15 Points
Mechatronics Design
A range of projects that demonstrate the application and integration of the material taught in lecture courses to create practical intelligent products and manufacturing processes.
Prerequisite: MECHENG 312, 322
Restriction: MECHENG 406

MECHENG 707  15 Points
Special Topic in Mechanical Engineering 1
Courses on special topics are to be determined each year by the Head of Department of Mechanical Engineering.

MECHENG 708  15 Points
Special Topic in Mechanical Engineering 2
Courses on special topics are to be determined each year by the Head of Department of Mechanical Engineering.

MECHENG 709  15 Points
Industrial Automation
Automation technologies widely used in manufacturing and processing industries. Topics include industrial robotics; programmable logic controllers (PLCs); pneumatics; machine vision systems; automated assembly; design for automation; and Industry 4.0. Students will participate in a number of hands-on labs throughout the course.
Prerequisite: MECHENG 270
Restriction: MECHENG 409, 710

MECHENG 710  15 Points
Advanced Industrial Automation
Automation technologies widely used in manufacturing and processing industries. Topics include industrial robotics; programmable logic controllers (PLCs); pneumatics; machine vision systems; automated assembly; design for automation; and Industry 4.0. Students will participate in a number of hands-on labs throughout the course. Includes an individual project related to the application of advanced automation techniques to address an industrial challenge.
Prerequisite: MECHENG 270
Restriction: MECHENG 409, 709

MECHENG 711  15 Points
Computational Fluid Dynamics
Application of computational methods to fluid dynamics and heat transfer. Finite volume and finite difference methods. Convergence and stability. Mesh generation and post-processing. Application of commercial computer programs to industrial problems. An individual project in which the student will be required to apply a commercial CFD code to a research problem of the student’s choice.

MECHENG 712  15 Points
Aerohydrodynamics
The study of fluid mechanics relevant to external flows, eg, wind turbines, yachts, aircraft or wind loadings on buildings, boundary layers, computational fluid dynamics.
Prerequisite: MECHENG 325
Restriction: MECHENG 412, 771

MECHENG 713  15 Points
Energy Technology
Industrial thermodynamics and energy conversion/efficiency, power cycles, availability and irreversibility, simple combustion analysis, mass transfer, energy studies, boiling and condensation.
Prerequisite: MECHENG 311
Restriction: MECHENG 413

MECHENG 714  15 Points
Wind Engineering
Advanced specialist topics in wind engineering such as: the wind-loading chain - planetary boundary-layer flow, extreme winds, wind structure, wind loads, dynamic response, bluff body aerodynamics, vortex shedding, aero-elasticity, wind-tunnel testing, pedestrian level winds, wind energy. The core taught skills are extended by an individual project in which independent research is undertaken to solve a challenging wind engineering problem.
Prerequisite: MECHENG 712

MECHENG 715  15 Points
Building Services
Principles and practice of heating, ventilation, air-conditioning and refrigeration (HVAC&R), psychrometry, heating/cooling loads, mass transfer and air quality,
refrigeration/heat pump systems, cooling towers, pumps, fans, valves, pipes and ducts.

**Prerequisite:** MECHENG 325

**Restriction:** MECHENG 411

**MECHENG 717**

**15 Points**

**Advanced Thermal Systems**

Fundamentals of advanced thermodynamics. Topics covered will include a selection from: cycles and applications, heat and mass transfer, psychrometry, refrigeration and air-conditioning, internal combustion engines, combustion, thermal system design and simulation.

**Prerequisite:** MECHENG 325

**Restriction:** MECHENG 411

**MECHENG 719**

**15 Points**

**Advanced Engineering Vibrations**

Selected topics in advanced vibration engineering: multiple degree of freedom and continuous systems, spectral analysis, analytical, approximate and numerical methods, including FEA, vibration instrumentation, measurement and testing, modal analysis, vibration treatment. Includes an individual project in which independent research is undertaken to solve a challenging advanced vibration problem.

**Prerequisite:** MECHENG 325

**Restriction:** MECHENG 421, 722

**MECHENG 720**

**15 Points**

**Advanced Multivariable Control Systems**

Advanced control of mechanical and mechatronic systems. Topics include: state-space representations, linearisation, discretisation, stability, state feedback control design, optimal control, state estimation and Kalman filters. Applications in MATLAB/Simulink and with physical systems.

Includes an individual project related to the design of advanced control systems encountered in practice.

**Prerequisite:** MECHENG 325

**Restriction:** ELECENG 722, MECHENG 423, 724

**MECHENG 722**

**15 Points**

**Engineering Vibrations**

Selected topics in vibration engineering: Multiple degree of freedom and continuous systems; Spectral analysis; analytical, approximate and numerical methods, including FEA; vibration instrumentation, measurement and testing; modal analysis; vibration treatment.

**Prerequisite:** MECHENG 325 or equivalent

**Restriction:** MECHENG 421, 719

**MECHENG 724**

**15 Points**

**Multivariable Control Systems**

Advanced control of mechanical and mechatronic systems. Topics include: state-space representations, linearisation, discretisation, stability, state feedback control design, optimal control, state estimation and Kalman filters. Applications in MATLAB/Simulink and with physical systems.

**Prerequisite:** MECHENG 325

**Restriction:** ELECENG 722, MECHENG 423, 720

**MECHENG 726**

**15 Points**

**Acoustics for Engineers**

**Prerequisite:** MECHENG 325

**Restriction:** MECHENG 425

**MECHENG 728**

**15 Points**

**Advanced MEMS and Microsystems**

Introduction to working principles and fabrication of MEMS/microsystems such as microsensors, microactuators, microfluidics, etc. Exposure to engineering design principles including engineering mechanics, fluids, materials, etc., at microscale. Includes an individual project related to the design and fabrication of a device for an advanced application.

**Prerequisite:** MECHENG 211

**Restriction:** MECHENG 735

**MECHENG 730**

**15 Points**

**Advanced Biomechatronic Systems**

Advanced mechatronic principles and techniques for measuring and manipulating biological systems. Human biomechanics and motion control, advanced serial and parallel robots, compliant soft robots, software and functional safety, human robot interaction and force control, novel sensors and actuators, and biomechatronic design principles. Includes an individual project related to the analysis, selection and successful implementation of one of these advanced technologies.

**Prerequisite:** MECHENG 312

**Restriction:** MECHENG 736

**MECHENG 731**

**15 Points**

**Engineering Design 4M**

A variety of engineering projects requiring the development and communication of design solutions to a professional standard, and using a wide range of advanced engineering methods.

**Prerequisite:** MECHENG 334

**Restriction:** MECHENG 431

**MECHENG 735**

**15 Points**

**MEMS and Microsystems**

Introduction to working principles and fabrication of MEMS/microsystems such as microsensors, microactuators, microfluidics, etc. Exposure to engineering design principles including engineering mechanics, fluids, materials, etc. at microscale. Exposure to microfabrication processes as part of a laboratory component.

**Prerequisite:** MECHENG 211

**Restriction:** MECHENG 728

**MECHENG 736**

**15 Points**

**Biomechatronic Systems**

Mechatronic principles and techniques for measuring, assisting, augmenting and mimicking biological systems. Topics include: brain machine interfaces, sensors and actuators, biomechanics and motion control, wearable and assistive devices, bioinstrumentation, soft robotic technologies, human factors, safety/ethical aspects, and biomechatronic design principles. Significant hands-on experience through the design, modelling and development of paradigmatic biomechatronic systems.

**Prerequisite:** MECHENG 312

**Restriction:** MECHENG 730

**MECHENG 741**

**15 Points**

**Advanced Mechanics of Materials**

Advanced theory of elasticity with applications to problems of contact stresses, stress concentrations, torsion of prismatic bars, plates and shells of revolution. Includes an individual project requiring students to undertake independent research and apply advanced knowledge and skills to solve problems encountered in practice based on actual “real life” case studies using industry standard analysis software.
MECHENG 742 15 Points
Advanced Materials Manufacturing
Properties and processing of polymers and polymer composites. Analysis of selected manufacturing processes such as injection moulding, extrusion, liquid composites moulding. Viscous flow, flow through porous media and heat transfer. An individual project related to recent developments in advanced composites in terms of processability/manufacturability, functionality and performance/potential.

MECHENG 743 15 Points
Composite Materials
Prerequisite: MECHENG 340
Restriction: MECHENG 441, 772

MECHENG 747 15 Points
Manufacturing and Industrial Processes
Theory of plasticity; material characterisation; process analyses; extrusion, wire-drawing, forging, rolling; metal cutting; thin shear model and Merchant’s diagram, tool wear and tool life; sheet forming; forming limit diagram; thermal analyses of industrial operations including polymer processing; basic polymer science: thermostets and thermoplastics, profile extrusion, sheet extrusion; blow-film extrusion, filament extrusion, blow moulding.
Prerequisite: MECHENG 340
Restriction: MECHENG 342, 447

MECHENG 751 15 Points
Advanced CAD/CAM/CNC
Advanced computer-aided design (CAD), computer-aided manufacturing (CAM) and computer numerical control (CNC). Intelligent CAD, feature-based design and manufacturing, CAD data interoperability, advanced CAM methodologies, smart CNC systems, and integration of the above technologies. An individual project related to the philosophy, analysis, selection and successful implementation of one or more of these technologies.
Prerequisite: MECHENG 352 or 752

MECHENG 752 15 Points
Technology Management
An appreciation of the strategic systems and technology management aspects of manufacturing systems. Industry based projects that explore the design and optimisation of manufacturing operations form a major part of the course.
Prerequisite: B grade or higher in ENGEN 303
Restriction: MECHENG 451

MECHENG 753 15 Points
Manufacturing Information Systems
New or emerging information technologies and their applications in manufacturing enterprises. Product modelling technologies based on STEP (Standard for Exchange of Product data), and intelligent and interoperable manufacturing systems. Applications to computer numerically controlled (CNC) machine tools. An individual project related to the main theme of this course on “Managing Manufacturing Information – the ‘STEP’ Way”.
Prerequisite: MECHENG 352 or 752

MECHENG 771 15 Points
Aerodynamics and Hydrodynamics
Sail aerodynamics, thin aerofoil and lifting line theories. Hydrodynamic forces and moments. Velocity prediction programs. Experimental methods in wind tunnel and towing tank testing.
Prerequisite: Department approval required
Restriction: MECHENG 412, 712

MECHENG 772 15 Points
Materials and Yacht Structures
Steel, aluminium and composite materials, stress analysis, finite element methods, slamming loads.
Prerequisite: Departmental approval required
Restriction: MECHENG 441, 743

MECHENG 773 15 Points
Small Craft Design and Manufacturing
Hull and component design, CAD/CAM, manufacturing methods, System design, product specification and selection. Project Management. Regulatory bodies and rules.
Prerequisite: Departmental approval required

MECHENG 774 15 Points
Small Craft Naval Architecture
Hydrostatics and stability, sea keeping, manoeuvring, multi-degree of freedom systems, coupled motions, strip theory. Resistance components and scaling laws. Propulsion methods, propeller design, advanced marine vehicles including hydrofoils and jet propulsion.
Prerequisite: Departmental approval required

MECHENG 775 45 Points
To complete this course students must enrol in MECHENG 775 A and B, or MECHENG 777

MECHENG 775A 15 Points
Yacht Engineering Project
Each student is required to complete an individual project and submit a report on a topic assigned by the appropriate Head of Department. This is a piece of research carried out under the guidance of a supervisor.
Prerequisite: Departmental approval

MECHENG 775B 30 Points
Yacht Engineering Project
Each student is required to complete an individual project and submit a report on a topic assigned by the appropriate Head of Department. This is a piece of research carried out under the guidance of a supervisor.
Prerequisite: Departmental approval

MECHENG 776 15 Points
Materials and Yacht Structures
Steel, aluminium and composite materials, stress analysis, finite element methods, slamming loads.
Prerequisite: Departmental approval required
Restriction: MECHENG 441, 743

MECHENG 776A 30 Points
Materials and Yacht Structures
Steel, aluminium and composite materials, stress analysis, finite element methods, slamming loads.
Prerequisite: Departmental approval

MECHENG 776B 15 Points
Materials and Yacht Structures
Steel, aluminium and composite materials, stress analysis, finite element methods, slamming loads.
Prerequisite: Departmental approval

MECHENG 777 15 Points
Small Craft Design and Manufacturing
Hull and component design, CAD/CAM, manufacturing methods, System design, product specification and selection. Project Management. Regulatory bodies and rules.
Prerequisite: Departmental approval required

MECHENG 777A 15 Points
Small Craft Design and Manufacturing
Hull and component design, CAD/CAM, manufacturing methods, System design, product specification and selection. Project Management. Regulatory bodies and rules.
Prerequisite: Departmental approval

MECHENG 777B 15 Points
Small Craft Design and Manufacturing
Hull and component design, CAD/CAM, manufacturing methods, System design, product specification and selection. Project Management. Regulatory bodies and rules.
Prerequisite: Departmental approval

interface design and user centred design process in software development. Interface usability evaluation methodologies and practice. Includes an evaluation project, group design project, and implementation using current techniques and tools.

Prerequisite: SOFTENG 206
Restriction: COMPSCI 345, 370

SOFTENG 351  
15 Points  
Fundamentals of Database Systems  
Relational model, Relational algebra, Relational calculus, SQL, SQL and programming languages, Entity-Relationship model, Normalisation, Query processing, Query optimisation, Distributed databases, Transaction management, Concurrency control, Database recovery.

Prerequisite: SOFTENG 211 or COMPSCI 225
Restriction: COMPSCI 351

SOFTENG 364  
15 Points  
Computer Networks  

Prerequisite: COMPYS 201 and 15 points from SOFTENG 206, 211, 250, 251, 254, 325

SOFTENG 370  
15 Points  
Operating Systems  

Prerequisite: COMPYS 201, SOFTENG 250

Postgraduate 700 Level Courses

SOFTENG 700A  
15 Points  
Research Project  
Students are required to submit a report on project work carried out on a Software Engineering topic assigned by the Head of Department.

Prerequisite: SOFTENG 306
To complete this course students must enrol in SOFTENG 700 A and B

SOFTENG 701  
15 Points  
Advanced Software Engineering Development Methods  
Advanced studies in methods and techniques for developing complex software systems including topics in software engineering environments, advanced software design, tool construction and software architectures. The core taught skills are extended by individual projects in which independent research is undertaken to address challenging software system problems.

Prerequisite: COMPYS 302 or SOFTENG 306

SOFTENG 702  
15 Points  
Advanced Human Computer Interaction  
Advanced topics in human computer interaction and human aspects of computer systems relevant to commercial solution development and computer science research. Sample topics: advanced evaluation methods; support of pen and touch-based interaction; trends with domain specific user interface design, such as interfaces for enterprise systems.

Prerequisite: COMPSCI 345 or SOFTENG 350
Restriction: COMPSCI 705

SOFTENG 710  
15 Points  
Studies in Software Engineering 1  
Advanced courses on topics to be determined each year by the Head of Department.

Prerequisite: Permission of the Head of Department

SOFTENG 711  
15 Points  
Studies in Software Engineering 2  
Advanced courses on topics to be determined each year by the Head of Department.

Prerequisite: Permission of the Head of Department

SOFTENG 750  
15 Points  
Software Development Methodologies  
Software lifecycle; software process models; examples of software processes; software process improvement; project management; tool support for software development; issues in software engineering.

Prerequisite: SOFTENG 306
Restriction: COMPSCI 732

SOFTENG 751  
15 Points  
High Performance Computing  
Advanced parallel and high performance computing concepts and techniques such as memory architecture and networks; multicores, hardware acceleration devices; shared memory and data parallel programming; object oriented and low level parallel programming; parallelisation process; subtask decomposition, dependence analysis and scheduling. Core concepts are extended by a hands-on research project in which a challenging parallel computing problem is analysed and solved.

Prerequisite: 15 points from SOFTENG 306, COMPYS 302, MECHENG 313, or 30 points at Stage III in Computer Science

SOFTENG 752  
15 Points  
Formal Specification and Design  
Formal specification, design, and (automatic) analysis of software systems. Quality assurance through precise description and rigorous verification on the design. Introduction to the Z, OCL, and CSP notations. Comparison of approaches, emphasising on their practical application.

Prerequisite: SOFTENG 306

SOFTENG 753  
15 Points  
Bayesian Machine Learning  
Examines classic and state of the art algorithms in the field of machine learning. Topics will include: Bayesian classification, regression and state estimation; clustering and mixture models; kernel-based methods; sequential models; graphical models; neural networks and deep architectures.

Prerequisite: ENGSCI 313, SOFTENG 250, 251

SOFTENG 754  
15 Points  
Software Requirements Engineering  
Advanced software engineering concepts focusing on techniques for requirements analysis and requirements engineering (RE) of software systems. Topics will include: requirements elicitation, analysis, specification,
validation, verification, user experience design, test-driven development, and continuous integration.

Prerequisite: COMPSYS 302 or SOFTENG 251

**SOFTENG 755** 15 Points
**Special Topic**
An advanced course on a topic to be determined each year by the Head of Department. Includes a substantial individual research project.
Prerequisite: Permission of the Head of Department

**SOFTENG 761** 15 Points
**Agile and Lean Software Development**
Advanced software engineering concepts focusing on Agile and Lean software development; including hands-on iterative and incremental software development, self-organising teamwork, project management, and an individual research component to explore challenging issues in this discipline.
Prerequisite: SOFTENG 306 or equivalent

**SOFTENG 762** 15 Points
**Special Topic**
An advanced course on a topic to be determined each year by the Head of Department.
Prerequisite: Permission of the Head of Department

**SOFTENG 787** 15 Points
**Project X**
Students are required to submit a report on a topic assigned by the Head of Department.
Prerequisite: Departmental approval

**SOFTENG 788A** 15 Points
**SOFTENG 788B** 15 Points
**Project Y**
Students are required to submit a report on a topic assigned by the Head of Department.
Prerequisite: Departmental approval
To complete this course students must enrol in SOFTENG 788 A and B

**SOFTENG 789** 30 Points
**Project Z**
Students are required to submit a report on a topic assigned by the Head of Department.
Prerequisite: Departmental approval

**SOFTENG 795** 45 Points
**SOFTENG 795A** 15 Points
**SOFTENG 795B** 30 Points

**Research Project (Software Engineering)**
Students are required to submit a report on a topic relevant to the specialisation, as assigned by the appropriate Head of Department.
Prerequisite: Departmental approval
To complete this course students must enrol in SOFTENG 795 A and B, or SOFTENG 795

**SOFTENG 796A** 60 Points
**SOFTENG 796B** 60 Points

**ME Thesis (Software Engineering)**
Students are required to submit a thesis on a topic assigned by the Head of Department.
Prerequisite: Departmental approval
To complete this course students must enrol in SOFTENG 796 A and B

**Faculty of Law**

**Academic Integrity**

ACADINT A01 0 Points

**Academic Integrity Course**
The Academic Integrity Course is an online course designed to increase student knowledge of academic integrity, university rules relating to academic conduct, and the identification and consequences of academic misconduct. Students work through a series of modules, outlining scenarios that they may encounter while studying at university. Each scenario provides information on relevant rules, resources and expected behaviour.

**Commercial Law**

**COMLAW 740A** 15 Points
**COMLAW 740B** 15 Points

**The Tax Base**
An advanced study of the breadth of the New Zealand income tax base, including the different concepts of income, its timing and recognition. Comparisons between the nature of capital and income, and the differing treatment of each, provides a deeper understanding of the policy behind the New Zealand income tax regime. Provides a theoretical background and detailed technical knowledge of the scope and application of the most significant regimes for income, deduction and timing in the Income Tax Act 2007. Involves individual research resulting in a substantial individual research essay.
To complete this course students must enrol in COMLAW 740 A and B

**COMLAW 747** 15 Points

**Goods and Services Tax**
An advanced study of Goods and Services Tax. Provides both a theoretical background and high level of technical knowledge of the GST Act 1985. Comparisons with other indirect taxes and overseas variations of GST (notably Australian GST and UK VAT) provide a deeper understanding of the policy behind the New Zealand GST regime. Major topics include taxable activities, input tax, output tax, registration, adjustments, taxable supplies, timing and the GST anti-avoidance provisions.

**COMLAW 748** 15 Points

**Tax Disputes**
An advanced study of the statutory disputes and challenge procedures in the Tax Administration Act 1994. Covers the power of the Commissioner to propose adjustments, conduct investigations and raise assessments. Reviews the administrative law obligations imposed on the Commissioner, taxpayer rights and the power of the Courts to supervise and review the assessment process.

**COMLAW 757** 15 Points

**Special Topic in Taxation Law**

**COMLAW 789** 15 Points

**Research Essay in Taxation Law**
(For the MTaxS.)
Law

Stage I

LAW 121G 15 Points
Law and Society
An introduction to theories of the nature, functions and origins of law and legal systems, including sources of law; comparative concepts of law; an overview of constitutional and legal arrangements in New Zealand, including the role of the courts; the operation of the legal system in historical and contemporary New Zealand with a focus on concepts of property rights, the Treaty of Waitangi, Treaty Settlements and proposals for constitutional change. Note: Does not meet the General Education requirement for LLB, LLB(Hons), LLB conjoints or LLB(Hons) conjoints.
Restriction: LAW 101

LAW 131 15 Points
Legal Method
An introductory study of how law is made and applied in New Zealand - an overview of the law-making roles of the legislative, executive and judicial branches of government; other influences on the development of the law; an introduction to case law, including judicial reasoning and the doctrine of precedent; an introduction to statute law, including the legislative process and techniques of statutory interpretation and application; the interaction between case law and legislation.
Prerequisite: B- or higher in LAW 121 or 121G

Stage II

LAW 201A 15 Points
LAW 201B 15 Points
Criminal Law
An introduction to the principles and practice of New Zealand criminal law; an analysis of doctrines of liability including defences to criminal charges; a study in detail of selected indictable and summary offences; and a critical survey of the chief elements of procedure relating to offences chargeable indictably or summarily. (Apart from the rules concerning burden of proof, no detailed study is made in this course of the law of evidence.)
Corequisite: LAW 298 or 299
To complete this course students must enrol in LAW 201 A and B

LAW 211A 15 Points
LAW 211B 15 Points
Public Law
The principles and workings of the New Zealand constitution; the powers, privileges and immunities of the three branches of government; the exercise and control of public power; and the relationship between the individual and the State (including the position of Māori under the Treaty of Waitangi).
Corequisite: LAW 298 or 299
To complete this course students must enrol in LAW 211 A and B

LAW 221A 2.14 Points
LAW 221B 2.14 Points
Legal Research and Writing 1A
The research and writing requirements, as determined by the Dean of Faculty of Law, associated with courses LAW 201, 211. Available to transition students only.
To complete this course students must enrol in LAW 221 A and B

LAW 231A 15 Points
LAW 231B 15 Points
Law of Torts
The general principles of civil liability for non-consensual wrongs. The principles of liability applying to selected torts, including the intentional torts such as: assault, battery, false imprisonment, intentionally inflicting emotional distress, trespass to land, wrongs to goods, negligence, strict liability, nuisance and defamation. The law relating to compensation for personal injury.
Corequisite: LAW 298 or 299
To complete this course students must enrol in LAW 231 A and B

LAW 241A 15 Points
LAW 241B 15 Points
Law of Contract
The general principles of contract law including: the formation of contracts at common law, New Zealand contract legislation, breach of contract, and remedies for breach of contract. An introduction to the general principles of agency.
Corequisite: LAW 298 or 299
To complete this course students must enrol in LAW 241 A and B

LAW 251A 2.14 Points
LAW 251B 2.14 Points
Legal Research and Writing 1B
The research and writing requirements, as determined by the Dean of Faculty of Law, associated with courses LAW 231, 241. Available to transition students only.
To complete this course students must enrol in LAW 251 A and B

LAW 298A 5 Points
LAW 298B 5 Points
Legal Research, Writing and Communication
Legal research, writing, mootin and other requirements, as determined by the Dean of the Faculty of Law.
Restriction: LAW 299
To complete this course students must enrol in LAW 298 A and B

Stage III

LAW 301A 10 Points
LAW 301B 10 Points
Land Law
A study of the history and principles of land law including: estates and interests in land, the effect of registration and indefeasibility of title, leasehold estates, easements and profits, mortgages, and concurrent interests in land, and covenants affecting freehold land.
Prerequisite: LAW 201, 211, 231, 241
To complete this course students must enrol in LAW 301 A and B

LAW 306A 10 Points
LAW 306B 10 Points
Equity
A study of the central principles and remedies of equity
including: the fiduciary principle, relationships of confidence, unconscionable conduct, undue influence, estoppel, assignments, trusts (express, resulting and constructive), charities, tracing, third-party liability, the assignment in equity of choses in action, and priorities. Basic principles of the law of succession and of the administration of estates.

**Prerequisite: LAW 201, 211, 231, 241**

**LAW 701**

**The Legal System: Sources, Structure and Method**

Examination of the core substantive components of the New Zealand legal system, in comparison with other municipal legal systems and international law. Analysis of the sources of New Zealand law, including statute, case law and custom, and the influence of international law. Legal methodology in theory and practice, including: judicial reasoning and the doctrine of precedent, techniques of statutory interpretation, and the resolution of disputes. Different modes of legal analysis and approaches to legal theory.

**Prerequisite: LAW 201, 211, 231, 241**

**Stage IV**

**LAW 400**

**Legal Research 3**

Completion of legal research requirements as approved by the Faculty of Law, including moot participation and opinion writing.

**LAW 456**

**Supervised Research**

A research paper, approved by the Dean of Faculty of Law, written under the supervision of a teacher in the Faculty of Law.

**LAW 458**

**Legal Ethics**

A study of legal ethics and professional responsibility including: an introduction to ethical analysis which examines various theories of ethics; the applicability of ethical analysis to legal practice; the concept of a profession and the ethical and professional duties of practitioners (which will include, amongst other topics, conflicts of interest, confidentiality, duties to the court, duties of loyalty and fidelity); the wider responsibilities of lawyers in the community.

**LAW 498**

**Advanced Legal Research, Writing and Communication**

Satisfactory completion of such advanced legal research, writing, communication and other requirements as determined by the Dean of the Faculty of Law.

**Prerequisite: LAW 201, 211, 231, 241**

** Restriction: LAW 400, 499**

**LAW 499**

**Legal Practice**

Such work and practical experience in the detailed application of the law and in relation to the provision of legal services as approved by the Faculty of Law.

**Postgraduate 700 Level Courses**

**LAW 700**

**Legal Research Methodology and Advanced Writing**

Multi-jurisdictional legal information sources and advanced legal research, research problem formulation and refinement, legal and social science research methodologies, research ethics and evaluative research trail. Legal writing for different purposes and different audiences.

**LAW 701**

**Postgraduate 700 Level Courses**

CLINIMAG 706 15 Points
Nuclear Medicine Specialised Clinical Applications
Addresses normal and altered radiopharmaceutical biodistribution appearances, and protocol selection and development, associated with cardiovascular, lymphatic and oncological applications in Nuclear Medicine. Students will also examine non-imaging radionuclide investigations and therapeutic applications associated with current and evolving Nuclear Medicine techniques.
Prerequisite: MEDIMAGE 720

CLINIMAG 707 15 Points
CT Clinical Practice
Addresses normal and abnormal CT imaging appearances, protocol selection and development, and includes reflection on clinical practice. The course will ensure students develop the knowledge, competencies, skills and attitudes needed to demonstrate mastery in both academic and professional capability in CT practice.
Prerequisite: MEDIMAGE 710
Restriction: CLINIMAG 717

CLINIMAG 708 15 Points
Mammographic Clinical Practice
Addresses normal and abnormal mammographic imaging appearances, technique evaluation and adaptation, and includes reflection on clinical practice relating to mammography. The course will ensure students develop the knowledge, competencies, skills and attitudes needed to demonstrate mastery in academic and professional mammographic practice.
Prerequisite: MEDIMAGE 707

CLINIMAG 709 15 Points
Principles of Clinical Ultrasound
Provides a fundamental understanding of ultrasound technology and applications. Students will integrate physical principles of ultrasound including transducer technology, quality assurance, bio-effects and safety, and apply these to clinical practice. In addition, they will analyse standard imaging techniques, normal and abnormal imaging appearances of the abdomen, pelvis and lower leg veins and perform examinations of these areas.
Corequisite: MEDIMAGE 716
CLINIMAG 710 15 Points
MRI Clinical Applications
Addresses normal and abnormal imaging appearances, protocol selection and development, and applications associated with standard neurological, musculoskeletal and body MRI examinations.
Prerequisite: MEDIMAGE 714
Restriction: CLINIMAG 701, 702

CLINIMAG 711 15 Points
MRI Specialised Clinical Applications
Addresses complex scientific principles of MRI relevant to a range of specialised applications. Students will examine advanced pulse sequences, specialised procedures including breast MR, enterography, MR angiography functional MRI and cardiac MRI. Techniques such as perfusion, spectroscopy, diffusion tensor imaging (DTI), and tractography, will be investigated in addition to new and evolving techniques.
Prerequisite: MEDIMAGE 714
Restriction: CLINIMAG 702

CLINIMAG 712 15 Points
MRI Clinical Practice
Develops the knowledge, competencies, skills and attitudes needed to demonstrate mastery in both academic and professional capability in MRI practice.
Prerequisite: Departmental approval

CLINIMAG 713 15 Points
Ultrasound Clinical Applications in Obstetrics and Gynaecology
Addresses normal and abnormal ultrasound imaging appearances, adaptation of scanning techniques relating to gynaecology and obstetrics ultrasound imaging.
Prerequisite: CLINIMAG 709 or MEDIMAGE 716
Restriction: CLINIMAG 703

CLINIMAG 714 15 Points
Ultrasound Clinical Applications
Addresses normal and abnormal ultrasound imaging appearances, adaptation of scanning techniques relating to the abdomen, musculoskeletal system, vascular system, small parts and paediatric imaging. Students will develop theoretical knowledge and reflect on competencies, skills and attitudes required for mastery in academic and professional ultrasound practice.
Prerequisite: CLINIMAG 709 or MEDIMAGE 716
Restriction: CLINIMAG 704

CLINIMAG 715 15 Points
Ultrasound Clinical Practice
Develops the knowledge, competencies, skills and attitudes needed to demonstrate mastery in both academic and professional capability in ultrasound practice.
Prerequisite: Departmental approval

CLINIMAG 716 15 Points
Nuclear Medicine Clinical Practice
Develops the knowledge, competencies, skills and attitudes needed to demonstrate mastery in both academic and professional capability in Nuclear Medicine practice.
Prerequisite: Departmental approval

CLINIMAG 717 15 Points
CT Clinical Applications
Addresses normal and abnormal Computed Tomography (CT) imaging appearances, protocol selection and modification, and application to clinical practice.
Restriction: CLINIMAG 707

CLINIMAG 718 15 Points
Special Topic

CLINIMAG 719 15 Points
Ultrasound Abdominal Clinical Applications
Addresses normal and abnormal ultrasound imaging appearances, scanning techniques and applications associated with abdominal ultrasound examinations. An emphasis will be placed on integrating theory and clinical practice elements to facilitate sound clinical decision making and clinical competence.
Prerequisite: MEDIMAGE 716
Restriction: CLINIMAG 704, 714

CLINIMAG 720 15 Points
Ultrasound Specialised Clinical Applications
Addresses normal and abnormal ultrasound imaging appearances, scanning techniques and applications associated with musculoskeletal, vascular, small parts and paediatric ultrasound examinations. An emphasis will be placed on integrating theory and clinical practice elements to facilitate sound clinical decision making and clinical competence.
Prerequisite: MEDIMAGE 716
Restriction: CLINIMAG 704, 714

Dietetics

Postgraduate 700 Level Courses

DIETETIC 703 15 Points
Clinical Nutrition: Disease Pathophysiology and Management
Provides basic and practical material for professional application of clinical nutrition knowledge to dietetic practice and case management. Includes the aetiology and pathophysiology of disease states that are relevant to, and underpin, nutritional management and/or treatment. Includes assessment of nutritional status and nutritional requirements, fluid and electrolyte management, nutrition therapy by tube feeding, and dietetic management of various disease states.

DIETETIC 704 45 Points
Professional Skills 1
Develops professional communication and organisation/management skills that will enable students to work effectively as dietitians. Introduces the dietetic process as it applies to clinical practice, including assessment, planning, implementation and evaluation of nutrition and dietetic interventions, and introduces the principles of food service management ranging from food safety and hygiene to the development of menus for therapeutic diets. Includes practical placement in the domains of applied nutrition in part fulfilment of the professional course accreditation requirements of the New Zealand Dietitians Board.

DIETETIC 705 30 Points
Professional Skills 2
Further develops professional communication and organisation/management skills that will enable students to work effectively as dietitians. Progresses the knowledge and skills required to develop competency in the nutrition and dietetic care process as it applies to clinical practice, including assessment, planning, implementation and evaluation of nutrition and dietetic interventions, and introduces the principles of food service management ranging from food safety and hygiene to the development of menus for therapeutic diets. Includes practical placement...
DIETETIC 706B 7.5 Points

Professional Skills 3

Further develops professional communication and organisation/management skills that will enable students to work effectively as dietitians and fulfil the registration competency requirements. Reviews and explores the dietetic process as it applies to clinical practice, including assessment, planning, implementation and evaluation of nutrition and dietetic interventions. Includes practical placement in the domains of applied and clinical nutrition, and public health for part fulfilment of the professional course accreditation requirements of the New Zealand Dietitians Board.

Prerequisite: DIETETIC 704

HLTHINFO 730 15 Points
Healthcare Decision Support Systems
Familiarises students with the main developments of decision support systems in healthcare. The theoretical concepts and the technology including data mining, clinical decision support systems, diagnostic systems and decision support in managed care are outlined. Ethical issues are also addressed.

Restriction: POPLHLTH 730

Health Management

Postgraduate 700 Level Courses

HLTHMGT 721 15 Points
Health Management

The application of general management principles to health organisations and resources, with particular reference to the nature of health organisations and health professional teams. Includes theory and concepts supporting the effective management of health human resources and financial resources.

Restriction: POPLHLTH 721

HLTHMGT 725 15 Points
Special Study in Health Leadership

HLTHMGT 729 15 Points
Strategic Health Management

The importance and contribution of strategic management to the health sector is established through the application of strategic management thinking and theory to complex systems. Skills in strategy formulation are developed through application of the logic and processes of strategy.

Restriction: POPLHLTH 729

HLTHMGT 754 15 Points
Health Leadership

Establishes the conceptual foundation of health leadership related to the self, others and organisations. Contemporary leadership frameworks are compared and linked to leadership theory and concepts in the context of improving health and outcomes.

Restriction: NURSING 732, POPLHLTH 754

HLTHMGT 755 45 Points
HLTHMGT 755A 15 Points
HLTHMGT 755B 30 Points

Project in Health Leadership

An applied research-based project in an aspect of health leadership. The project provides a capstone experience to the degree. Students critically analyse real-world cases and problems and develop evidence-informed and innovative solutions through expert consultation and literature research.

To complete this course students must enrol in HLTHMGT 755 A and B, or HLTHMGT 755

Health Informatics

Postgraduate 700 Level Courses

HLTHINFO 722 15 Points
Special Study in Health Informatics 1

HLTHINFO 723 15 Points
Health Knowledge Management

The objective of this course is to develop an ability to analyse the role and dynamics of knowledge in the working environment in the health sector, and to develop aspects of knowledge infrastructure.

Restriction: POPLHLTH 723

HLTHINFO 724 15 Points
Special Study in Health Informatics 2

HLTHINFO 725 15 Points
The New Zealand Health Data Landscape

An overview of key issues to support the appropriate and effective use of large volumes of routinely collected data to drive improvements in the delivery of health care. Ethical and equitable use of health data, critical evaluation of health data, identification of analytic methods and appropriate interpretation to support health care decision-making are discussed. Specific datasets are not analysed.

HLTHINFO 728 15 Points
Principles of Health Informatics

The study of information technology and information management concepts relevant to the delivery of high quality and cost-effective healthcare. Theoretical frameworks such as data management, decision support, strategic planning and implementation, change management, knowledge management and privacy and other ethical aspects of health informatics are included.

Restriction: POPLHLTH 728

Health Psychology

Stage I

HLTHPSYC 122 15 Points
Behaviour, Health and Development

Introduction to the relationship between behaviour and the major biological, cognitive and social-emotional processes,
HLTHPSYC 715 15 Points
Research Methods in Health Psychology
A review of the principal methods used in the design, conduct and analysis of studies in the health psychology area. This will focus on quantitative research, but qualitative methodological approaches will also be addressed.

HLTHPSYC 716 15 Points
Psychoneuroimmunology
Outlines the nature of the human immune system, its measurement and limitations of current practices and models. The main focus of the course is the extent to which psychological processes such as stress, emotions, and social interactions have been found to influence immune behaviour and the implications of these findings for health and wellbeing. Various theoretical frameworks through which psycho-immune relationships might be understood are presented and discussed.

HLTHPSYC 717 15 Points
Emotions, Emotion Regulation, and Health
Extends content knowledge in health psychology by focussing on the expanding literature linking emotions and emotion regulation with health outcomes. The course provides an overview of the nature and functions of emotions, discrete versus dimensional approaches, developmental and cultural considerations, and the links between emotions and cognitive processes. Specific topics include direct and indirect pathways linking emotions and health, links between emotions and health-deleterious behaviours, symptom detection, screening behaviour, treatment decision-making, and adherence.

HLTHPSYC 718 15 Points
Psychophysiology and Health
Describes general psychophysiological methodology including the measurement, analysis and interpretation of physiological data. Topics include physiological responses to stress including heart rate, blood pressure, heart rate variability, cortisol and the startle response. This course takes a multi-systems approach to exploring health and affords the opportunity to view behavioural, physiological and neuroendocrine responses to stress.

HLTHPSYC 719 15 Points
Health Psychology Assessment
Extends content knowledge in health psychology through the development of skills in the assessment and evaluation of constructs commonly used in health psychological research and practice. Includes consideration of general issues in psychometric theory and the specific assessment issues commonly confronting widely-used health psychological research designs, as well as detailed coverage of specific content areas including illness cognitions, health-related psychophysiology, emotions, and health outcomes.

HLTHPSYC 720 15 Points
Health Psychology Interventions
Reviews the underpinning theory base for approaches commonly used in health psychology interventions such as CBT, and applies these approaches to examples from the field of health psychology. Individual and group/community treatment targets will be considered, including common difficulties that impact on disease occurrence or management, and the psychological consequences of disease.

HLTHPSYC 721 15 Points
Self-Management in Chronic Illness
Describes the concept of self-management and how it relates to managing the symptoms, treatment and psychological changes that occur after being diagnosed with a chronic health condition. Some of the most prevalent health conditions and relevant self-care behaviours will be covered including type 2 diabetes, cardiovascular disease, arthritis and cancer. A review of the psychological impact of having a chronic illness will also be covered, including coping with chronic illness. The course will also focus on designing self-management interventions, including a review of the frameworks for intervention development, implementation and evaluation.

HLTHPSYC 742A 15 Points
HLTHPSYC 742B 15 Points
Professional Practice in Health Psychology
Focuses on the professional intervention skills necessary to practice health psychology. Topics include: interviewing and assessment skills, formulation of problems, design and evaluation of interventions and models for interdisciplinary and multidisciplinary functioning. Relevant contexts include: hospitals, hospices, consultancies, general practice etc.
Prerequisite: HLTHPSYC 746
To complete this course students must enrol in HLTHPSYC 742 A and B

HLTHPSYC 743 15 Points
Psychopathology and Clinical Interviewing
Common psychological disorders encountered in clinical practice and health settings. Practical teaching of clinical interview and diagnostic skills is completed in class.

HLTHPSYC 744 15 Points
Research Topic in Health Psychology
Offers the opportunity for academic staff to provide a specific course of study for one or several students. It is available only by arrangement between the staff member(s) and students.

HLTHPSYC 745A 45 Points
HLTHPSYC 745B 45 Points
Practicum in Health Psychology
A practical component of supervised applied work of not less than 1,500 hours in approved health settings, and other work as required. A detailed written report of the work undertaken will be required of the student.
Prerequisite: HLTHPSYC 746
To complete this course students must enrol in HLTHPSYC 745 A and B
HLTHPSYC 746 30 Points
HLTHPSYC 746A 15 Points
HLTHPSYC 746B 15 Points
Pre-internship Placement
Requires students to undertake 300+ hours in at least two approved clinical placements in addition to associated workshops and training over a twelve month period.
To complete this course students must enrol in HLTHPSYC 746 A and B, or HLTHPSYC 746

HLTHPSYC 755 15 Points
Special Study

HLTHPSYC 757 15 Points
Psychosomatic Processes
Focuses on the psychological, social and biological mechanisms behind illnesses that present with medically unexplained symptoms. Such illnesses include: chronic fatigue syndrome, chronic pain, irritable bowel syndrome and the somatoform disorders. The diagnostic controversy surrounding these disorders and treatment approaches for these conditions will be addressed.

HLTHPSYC 758 15 Points

HLTHSCI 700 30 Points
Working with People with Long-term Conditions
Long-term conditions present one of the most challenging global epidemics of the twenty-first century. This course is designed to support the development of a responsive person-centred healthcare workforce to meet the needs of people living with long-term conditions and to work with them to improve their self-efficacy and health outcomes.
Restriction: NURSING 738

HLTHSCI 701 30 Points
Self-management for People Living with Long-term Conditions
Self-management is a key strategy to maximise quality of life for individuals and their families living with long-term conditions. This course is designed to strengthen assessment of self-management, collaborative person centred goal setting and planning. It focuses on developing motivational communication skills and collaborative strengths-based approaches which support efficacy and activation.
Restriction: NURSING 771

HLTHSCI 702 30 Points
Principles of Primary Health Care
Assists primary healthcare professionals working in diverse settings to put population health into practice through primary healthcare. Determinants of health, equity, community empowerment, partnerships and effective ways to care for people with long-term conditions in communities will be explored.
Restriction: NURSING 772

HLTHSCI 703 30 Points
Psychological Interventions in Health Care
Focuses on increasing health professionals’ skills in the use of psychological interventions for people who have acute or long term mental health or physical health problems. Explores evidence-based psychological models, such as Cognitive and Behaviour Therapy and Motivational Interviewing. Illness beliefs that impact on the person’s ability to engage effectively with treatment plans, and self-management of their health problem/s, will also be critiqued.
Restriction: NURSING 760, 781

HLTHSCI 704 30 Points
Primary Health Care of Children and Young People
Equips healthcare professionals with the knowledge to provide primary and community health care, from a global to a national and local level, for well children and young people and those with long term conditions. All aspects of the course will be underpinned by the United Nations Convention on the Rights of the Child (UNCRC). Epidemiology, whānau (family) focused partnerships and interventions will be addressed along with the management of common conditions in the 0–25 year age range.
Restriction: NURSING 716, 788

HLTHSCI 705 30 Points
Mental Health and Addictions in Non-specialist Settings
Uses a person-focused theoretical framework to explore mental health and addiction problems presenting in non-specialist mental health settings. Conceptualises mental health and addiction problems as frequently co-occurring. Engagement, assessment, collaborative solution focused interventions, referral and care coordination will be explored.

Māori Health

Foundation Courses
MAORIHTH 21H 12 Points
Introduction to Biology
An introduction to the structure, function and processes of the human body at cellular and tissue levels. Special emphasis on the four primary tissues including membrane transport, muscle types and function, blood and the immune response, and basic neurobiology. Provides foundational knowledge of development post fertilisation and the anatomy and physiology of selected mammalian organ systems. Exposes students to the laboratory environment, particularly microscopy and dissection.

MAORIHTH 22H 12 Points
Introduction to Anatomy and Physiology
Introduction to human biology through a study of the structure and function of mammalian organ systems. Topics of focus include: skin and derivatives, digestive, nervous, reproductive and urinary, bone, endocrine and circulatory systems. This course also exposes students to learning in a laboratory environment with a strong focus on microscopy and dissection.

MAORIHTH 23H 12 Points
Introduction to Chemistry 1
An overview of general chemistry principles with an emphasis on the language of chemistry and the use of mathematics to determine answers to chemical problems. An emphasis is placed on the atomic scale of matter so that students are able to describe the macroscopic world using a molecular perspective and relate chemical structures to functions. Laboratory work includes techniques of simple qualitative and quantitative measurements.

MAORIHTH 24H 12 Points
Introduction to Chemistry 2
Provides an overview of systematic organic chemistry illustrating the diversity and reactivity of organic compounds, including reaction mechanisms and application of chemical kinetics. Spectroscopic techniques will be discussed, including in relation to structure determination. A quantitative study of proton transfer reactions will allow for understanding of control of pH.

MAORIHTH 25H 12 Points
Introduction to Population Health 1
Introduction to key concepts and foundational knowledge in population health. Concepts include models for conceptualising health, the aggregate health of groups, social determinants of health, social gradients in health outcomes, and health inequalities and inequities, and foundational understanding of health care systems.

MAORIHTH 26H 12 Points
Introduction to Population Health 2
Explores patterns and distributions in health events, causal effects on health, and strategies for addressing health inequalities and inequities at a population level. Exposure to a foundational overview of epidemiology and population health concepts and relevant skills, including understanding and measuring the distribution of disease and illness in well-defined populations, will also be provided.

MAORIHTH 27H 12 Points
Academic and Professional Development in Māori and Pacific Health 1
Soon to be reviewed.

MAORIHTH 28H 12 Points
Academic and Professional Development in Māori and Pacific Health 2
Explores patterns and distributions in health events, causal effects on health, and strategies for addressing health inequalities and inequities at a population level. Exposure to a foundational overview of epidemiology and population health concepts and relevant skills, including understanding and measuring the distribution of disease and illness in well-defined populations, will also be provided.

MAORIHTH 29H 12 Points
Introduction to Mathematics
Provides foundational skills in mathematics and develops mathematical competence. Topics covered include measurement, notation, functions, equations, exponential growth/decay, logarithms and statistics. Examples used in the course will revolve around applications of mathematics in the health sciences.

MAORIHTH 30H 12 Points
Introduction to Health Psychology
Introduction to key concepts and foundational knowledge in health psychology. Concepts include models and theories of behaviour change and development, including the relationship between major biological, cognitive and social-emotional processes. Broader social science approaches to behaviour, health and development across the lifespan will also be explored, as well as the application of health psychology for those wishing to pursue a career in health.
MAORIHTH 31H 12 Points
Introduction to Physics
An introduction to physics relevant to health studies, including examples and illustrations that revolve around human physiology. Topics include mechanics, optics, waves, thermal physics, radiation and electricity.

MAORIHTH 32H 12 Points
Special Topic

Stage II

MAORIHTH 201 15 Points
Introduction to Māori Health
Māori society, culture and values are explored. Historical processes are reviewed within the context of the Treaty of Waitangi. The course will examine how these factors underpin the basic determinants of health and shape contemporary Māori health status in Aotearoa. Different approaches to improving Māori health and reducing inequalities will be critically examined.
Prerequisite: POPLHLTH 111

MAORIHTH 301 15 Points
Māori Health and Practice
Māori health knowledge is used to develop effective public health practice for Māori contexts. Areas of focus include critical thinking, reflective practice, advocacy and the application of Kaupapa Māori principles.
Prerequisite: MAORIHTH 201
Restriction: POPLHLTH 201

Postgraduate 700 Level Courses

MAORIHTH 701 15 Points
Foundations of Māori Health
Provides an overview of the many dimensions of Māori Health. It examines the historical and contemporary determinants of Māori health status, and outlines strategies for improving Māori health in the context of the Treaty of Waitangi, and reducing health inequalities.
Restriction: MAORIHTH 301

MAORIHTH 705 15 Points
Māori Health Promotion and Early Intervention
Discusses the importance of health promotion and early intervention for Māori. Models of health promotion used by different Māori providers will be presented as well as assisting students to design and implement health promotion and interventions which are likely to be effective for Māori individuals, families, and communities.

MAORIHTH 706 15 Points
Māori Health: Policy and Practice
Examines health and social policy in Aotearoa/New Zealand from a Kaupapa Māori perspective, with an emphasis on reorienting policy to advance Māori health and equity. Provides insights into how policy can be applied within a Kaupapa Māori framework in different areas of public health practice.
Prerequisite: MAORIHTH 301 or 701

MAORIHTH 707 15 Points
Practicum in Māori Health
Provides the opportunity to develop social assessment and critical analysis skills through the documentation of an approved practicum. Students will be expected to be able to use and demonstrate knowledge of different Māori views, concepts and frameworks. Each student will have supervision and practicum developed appropriate to their learning interests.

MAORIHTH 708 15 Points
Special Studies

MAORIHTH 709 15 Points
Transformational Research for Māori Health
Provides a critical analysis of research and research processes with regard to their potential to colonise or liberate. Drawing on Kaupapa Māori Theory, the course examines how research can be undertaken in ways that are safe for Māori and that contribute to positive Māori development.
Prerequisite: MAORIHTH 710 and 15 points from POPLHLTH 701, 702, 767

MAORIHTH 710 15 Points
Kaupapa Māori Theory
Kaupapa Māori Theory (KMT) underpins a range of approaches employed to ensure policy, research and intervention processes emphasise Māori ways of knowing and being and work to prevent the further marginalisation of Māori. Students learn about the development of KMT and its use in the context of Māori health and development, and will experience and learn from a range of initiatives and projects that have KMT at their core.

Through clinical scenarios, lectures and laboratories, students are introduced to human health and the description and pathogenesis of disease processes as a basis for the systematic study of human illness. This is integrated with the study of human organ systems through components focusing on musculoskeletal, digestive, genitourinary, cardiovascular and respiratory systems, linked with practical work in anatomy, physiology, pathology, medical imaging, and professional, clinical and communication skills.
Restriction: MBCHB 203, 205, 206, 209, 210, 211
To complete this course students must enrol in MBCHB 221 A and B
Facilities. Students undertake patient care in the disciplines practising under supervision, in hospitals and community up to a period of 11 weeks. The remaining weeks are spent, (the Elective), or complete a substantial research project, to undertake study in an area of medicine of their choice. The 44 week year includes an optional element for students.

MBCHB 401B 60 Points

MBChB Part IV

During Part IV, students spend 33 weeks in eight clinical attachments: emergency medicine, anaesthetics, musculoskeletal surgery, general and specialty medicine, geriatrics and general practice. These attachments are complemented by four weeks of topic teaching on campus. There is also a compulsory Māori and Pacific Health module.

Prerequisite: MBCHB 311, 321

To complete this course students must enrol in MBCHB 401 A and B

Stage V

MBCHB 501A 60 Points
MBCHB 501B 60 Points

MBChB Part V

Students will complete academic study of forty one weeks of which thirty one are in clinical placements. These are: general practice, obstetrics and gynaecology, psychiatry, paediatrics, specialty surgery and a selective. There are three weeks of formal learning on campus including a Population Health week. Other projects and asynchronous learning also needs to be completed. Students may undertake the majority of study in a regional rural setting in Northland.

Prerequisite: MBCHB 401

To complete this course students must enrol in MBCHB 501 A and B

MBCHB 551A 60 Points
MBCHB 551B 60 Points

MBChB Part VI

The 44 week year includes an optional element for students to undertake study in an area of medicine of their choice (the Elective), or complete a substantial research project, up to a period of 11 weeks. The remaining weeks are spent, practising under supervision, in hospitals and community facilities. Students undertake patient care in the disciplines of general practice, medicine, surgery, emergency medicine, psychiatry, paediatrics and obstetrics and gynaecology. Students also complete an advanced cardiac life support workshop and a week of clinical imaging.

Prerequisite: MBCHB 501

To complete this course students must enrol in MBCHB 551 A and B

Medical Imaging

Stage I

MEDIMAGE 199 0 Points

English Language Competency

To complete this course students must attain a level of competency in the English language as determined by the School of Medical Sciences. This course must be completed prior to enrolling in Part III of the Bachelor of Medical Imaging (Honours) degree.

MEDIMAGE 201 15 Points

Fundamentals of Medical Imaging

Provides a fundamental understanding of Medical Imaging practice. Students will examine components of the clinical setting including patient care, cultural competency, and ethical considerations, to prepare them for the clinical learning environment. Students will apply these concepts to radiographic imaging in the context of routine radiographic examinations.

MEDIMAGE 202 15 Points

Medical Imaging Science

Provides students with a fundamental understanding of ionising radiation in the context of medical imaging. Addresses x-ray production, instrumentation, x-ray detection, digital imaging and the principles of quality assurance. Also examines the biological effects of ionising radiation, dose, and radiation protection.

MEDIMAGE 203 15 Points

Radiographic Imaging I

Develops knowledge of routine radiographic examinations in a Medical Imaging department. The anatomical relationships of the body and the imaging examinations are explored with reference to the appendicular skeleton, abdomen and pelvis.

Stage II

MEDIMAGE 301 15 Points

Radiographic Imaging II

Extends knowledge of radiographic examinations and procedures in a Medical Imaging department. The anatomical relationships of the body and the imaging examinations are explored with focus on specialist views and adaptive techniques.

Prerequisite: MEDIMAGE 199, 203

MEDIMAGE 302 15 Points

Sectional Imaging Anatomy and Pathology

Develops understanding of anatomy and pathology as applied in Medical Imaging. Focuses on sectional imaging anatomy, normal variants and common pathologies as demonstrated on CT (computed tomography), MRI (Magnetic Resonance Imaging) and ultrasound images.

Prerequisite: MEDSCI 201, 203

MEDIMAGE 303 15 Points

Physiology and Pharmacology for Medical Imaging

Fundamentals of physiological processes supporting
the study of biopharmaceutics, pharmacokinetics, pharmacodynamics in the context of Medical Imaging.

Prerequisite: BIOSCI 106, 107, CHEM 110, MEDSCI 142

MEDIMAGE 304 15 Points
Advanced Radiographic Imaging
Develops understanding of advanced radiographic imaging examinations including mammography, angiography, interventional procedures, and computed tomography. Addresses the physical principles of image production, instrumentation and dose considerations. Students will investigate a range of clinical applications, and normal and abnormal imaging appearances associated with each of these modalities.

Prerequisite: MEDIMAGE 202, 203

MEDIMAGE 305 15 Points
Professional Practice in Medical Imaging
Develops fundamental concepts of professionalism, reflective practice and communication to patient-centred care and professional practice in Medical Imaging.

Prerequisite: MEDIMAGE 201

MEDIMAGE 306 15 Points
Specialised Medical Imaging
Examines specialised medical imaging modalities including ultrasound, nuclear medicine, and magnetic resonance imaging (MRI). Addresses the physical principles of image production, instrumentation and safety considerations. Students will investigate a range of clinical applications, and normal and abnormal imaging appearances associated with each of these modalities.

Prerequisite: MEDIMAGE 202, 203

Postgraduate 700 Level Courses

MEDIMAGE 701 15 Points
Imaging Anatomy and Pathology
Students will develop an integrated understanding of anatomy and pathology as it applies to medical imaging in the clinical context. The course introduces the principles of medical science at whole body, organ, tissue, cellular, and sub cellular levels and includes the fundamentals of anatomy, physiology and pathophysiology of the major systems of the human body in relation to specific regions and pathologies.

MEDIMAGE 702 15 Points
Professional Issues in Medical Imaging
Students will investigate the concept of professional practice leading to an exploration of current professional issues relevant to medical imaging including role development and advanced practice. The course will provide students with the knowledge to interact with individuals from a variety of backgrounds both ethically and with respect for their beliefs and values. The course also addresses medico-legal issues, decision-making and effective communication within the clinical setting.

MEDIMAGE 707 15 Points
Mammographic Technology
Provides students with an in-depth understanding of mammographic technology and its application. The course addresses the scientific principles of the modality including image formation, technical parameters, radiation safety specific to mammography, image quality, artefacts, and quality assurance. Equipment developments and new and evolving techniques will be examined.

MEDIMAGE 708 15 Points
Nuclear Medicine Technology
Provides students with an in-depth understanding of nuclear medicine technology and its application. Addresses scientific principles of the modality relating to clinical practice including Spectral Positron Emission Computed Tomography (SPECT), Positron Emission Tomography (PET), image quality, quality assurance and non-imaging radionuclide investigations.

Prerequisite: MEDIMAGE 720

MEDIMAGE 710 15 Points
CT Imaging Technology
Provides students with an in-depth understanding of CT technology and its application. The course addresses the scientific principles of the modality including image formation and reconstruction, technical parameters, radiation safety and dose reduction, image quality, artefacts, quality assurance and contrast agents. Equipment developments and new and evolving techniques will be examined.

MEDIMAGE 711 15 Points
Musculoskeletal Trauma Image Evaluation
Provides students with the knowledge to evaluate radiographs of common musculoskeletal trauma in the clinical setting. Using a systematic method of image interrogation and a critical approach, students will develop the ability to provide a preliminary clinical image evaluation of common musculoskeletal trauma radiographs.

MEDIMAGE 712 15 Points
Musculoskeletal Pathology Image Evaluation
Provides students with the knowledge to evaluate radiographs of common musculoskeletal pathologies in the clinical setting. Using a systematic method of image interrogation and a critical approach, students will develop the ability to provide a preliminary clinical image evaluation of common musculoskeletal pathology radiographs.

MEDIMAGE 713 15 Points
Special Studies

MEDIMAGE 714 15 Points
Fundamentals of Clinical MRI
Provides a fundamental understanding of MRI technology and applications and addresses scientific principles of the modality including resonance and relaxation, image contrast, spatial encoding, and digital image formation. Students will examine components of the clinical environment including MRI equipment, contrast agents, bio-effects and safety. In addition, students will analyse standard imaging protocols of the lumbar spine, knee and brain and normal and abnormal MR imaging appearances of these areas.

MEDIMAGE 715 15 Points
MRI Technology
Provides an in-depth understanding of MRI technology and its applications and addresses scientific principles of the modality relating to standard clinical practice including pulse sequences, image quality and quality assurance, technical parameters and trade-offs, image optimisation, artefacts, parallel imaging, scanning at 3T, diffusion and MR angiography.

Prerequisite: MEDIMAGE 714
Restriction: MEDIMAGE 703, 704

MEDIMAGE 716 15 Points
Fundamentals of Clinical Ultrasound
Provides a fundamental understanding of ultrasound
technology and applications. Students will examine components of the clinical environment including transducer technology, quality assurance, bio-effects and safety. In addition, students will analyse standard imaging techniques and normal and abnormal imaging appearances of the renal tract, pelvis and first trimester of pregnancy.

**MEDIMAGE 717**

*Ultrasound Imaging Technology*
Provides students with advanced scientific principles of ultrasound and its application. The course addresses Doppler principles, artefacts and instrumentation, electronic array technology, contrast agents, 3-D and 4-D scanning, equipment developments and new and evolving techniques. 
Prerequisite: CLINIMAG 709 or MEDIMAGE 716

**MEDIMAGE 718**

*Acute Chest Image Interpretation*
Provides students with the knowledge to evaluate acute chest radiographs in the clinical setting. Using a systematic method of image interrogation and a critical approach, students will develop the ability to provide a preliminary clinical image evaluation of common acute chest radiographs.

**MEDIMAGE 719**

*Paediatric Image Evaluation*
Provides students with the knowledge to evaluate radiographs of common paediatric trauma and pathologies in the clinical setting. Using a systematic method of image interrogation and a critical approach, students will develop the ability to provide a preliminary clinical image evaluation of common paediatric radiographs.

**MEDIMAGE 720**

*Fundamentals of Clinical Nuclear Medicine*
Provides a fundamental understanding of nuclear medicine technology and applications and addresses scientific principles of the modality including radioactivity, radiation detection and decay, dosimetry, and radio-pharmacy. Students will examine components of the clinical environment including equipment, laboratory procedures, bio-effects and radiation safety. In addition, they will analyse standard imaging protocols, normal and altered biodistribution and imaging appearances of the skeletal system.

**MEDIMAGE 721**

*MRI Safety*
Extends students’ understanding of the underlying physical principles related to a range of MRI safety issues. The course will provide students with the opportunity to explore these safety issues in greater depth and to apply this knowledge in critically evaluating current policies and practices. New and emerging safety topics will also be examined. 
Prerequisite: MEDIMAGE 714

**MEDIMAGE 722**

*Special Topic*

**MEDIMAGE 740**

*Research in Medical Imaging*
Includes modules on a range of topics in medical imaging, with focus on developing an evidence-based approach on selected topics. Includes supervised investigations into an approved topic related to clinical and applied research. 
To complete this course students must enrol in MEDIMAGE 740 A and B, or MEDIMAGE 740

**Stage I**

**MEDSCI 100G**

*Human Mind and Body Relationships* 15 Points
Humans share with other living things the features of physical self-generation and adaptation to the environment. Humans also live in a mental (mind) world and maintain relationships with our perceived environments. Minds and bodies mutually affect one another. This mind/body dance, which is explored in this course, is what gives rise to all of human behaviour from simple daily activities to the highest forms of creativity.

**MEDSCI 101G**

*Environmental Threats to Human Health* 15 Points
Our environment sustains our lives but at times threatens our health. These threats may occur naturally, or arise from damage we have inflicted on the environment. This course considers health impacts of climate change, pollution, lifestyle choices, poverty and affluence, workplace hazards, emerging infectious diseases, and dangers affecting cancer risk.

**MEDSCI 142**

*Biology for Biomedical Science: Organ Systems* 15 Points
Introduction to human biology with particular emphasis on integrated organ function. The course will deal with: structures and processes associated with the function of the nervous, locomotor, cardiovascular, respiratory, digestive, renal, endocrine, musculoskeletal and reproductive systems. 
Restriction: HUMANBIO 142

**Stage II**

**MEDSCI 201**

*Human Structure and Function* 15 Points
Presents the structure of biological systems with special reference to human biology, from the levels of histology through to gross anatomy. Specific examples of the correlation between structure and function will be considered. An introduction to current techniques for the visualisation of biological structure will be presented. 
Prerequisite: BIOSCI 107, MEDSCI 142

**MEDSCI 202**

*Microbiology and Immunology* 15 Points
An introduction to the nature and roles of bacteria, viruses, fungi and parasites as the causative agents of human diseases. Topics include: the defence mechanisms of the body, the immune system including autoimmunity and allergy, control of disease by antimicrobials, sterilisation, disinfection and infection control practice. 
Prerequisite: BIOSCI 107, MEDSCI 142
Restriction: OPTOM 241, PHARMACY 203

**MEDSCI 203**

*Mechanisms of Disease* 15 Points
Outlines the basic mechanisms, operating at the molecular, cellular and tissue levels, by which human disease develops. These include genetic factors, cell injury, inflammation, repair, circulatory disturbances, and neoplastic change. These mechanisms are illustrated by descriptions of the pathogenesis of specific diseases that are relevant to the New Zealand situation, or are the focus of current biomedical research. 
Prerequisite: BIOSCI 107, MEDSCI 142
MEDSCI 204 15 Points
Pharmacology and Toxicology
A solid grounding in the principles underlying pharmacology and toxicology, including the nature of drug targets, their interaction and response (pharmacodynamics), the fate of drugs within the body (pharmacokinetics), toxicity classification and testing, poisons and antidotes, adverse drug reactions, selective toxicity, drug discovery and development. Selected drug examples will be studied to illustrate key principles of clinical pharmacology.
Prerequisite: BIOSCI 106, CHEM 110, MEDSCI 142

MEDSCI 205 15 Points
The Physiology of Human Organ Systems
An integrative approach is used to study fundamental physiological processes which enable the body to overcome the challenge of life. Drawing on examples of normal and abnormal function, the course examines the interaction of vital physiological processes, from cellular control mechanisms to multiple organ systems. Topics include: control of fluid and electrolytes, cardiovascular control, energy use, and the delivery of oxygen and metabolites.
Prerequisite: BIOSCI 107, MEDSCI 142
Restriction: PHARMACY 205

MEDSCI 206 15 Points
Principles of Neuroscience
The impact of neuroscience revolution on our understanding of human physiology and biomedical research is reviewed. Topics include: mechanisms of neurotransmission, learning, memory, sensory perception (vision, hearing, touch and smell) and application of gene therapy for treating neurological diseases. Special emphasis is placed on the integration and control of physiological function by the nervous system. Examples include control of movement and coordination, regulation of reproduction, blood pressure, breathing, appetite, body weight and sexuality. Developmental neuroscience is also considered. Laboratory exercises provide insight into neural structure and function and include application of neuroimaging technologies.
Prerequisite: BIOSCI 107, MEDSCI 142

Stage III

MEDSCI 300 15 Points
Analytical Anatomy and Visualisation
Examines the analysis, description and quantification of anatomical structures, including visualisation methodologies and the challenges of imaging subcellular to whole organ anatomy. Emphasis is placed on emerging applications and technology, including computational anatomy, surgical planning and research applications. Appropriate uses of human tissue, modern imaging technologies, tissue preparation, imaging artefacts, and novel visualisation techniques will be explored.
Prerequisite: MEDSCI 201

MEDSCI 301 15 Points
Molecular Basis of Disease
An in-depth analysis of the cellular and molecular basis of disease, including the role of environmental and inherited risk factors, as well as mechanisms of response to cell injury and inflammation in the disease process. A number of examples will be studied including cancer and infectious disease.
Prerequisite: MEDSCI 203

MEDSCI 302 15 Points
Cancer Biology
A study of the scientific basis of cancer including: mechanisms underlying the pathogenesis of cancer, carcinogenesis, DNA damage and repair, properties of cancer cells (including abnormalities of growth and cell cycle control), the growth of tumours, the classification and histopathology of cancers, and an introduction to therapeutic strategies.
Prerequisite: BIOSCI 356 or MEDSCI 203

MEDSCI 303 15 Points
Drug Disposition and Kinetics
Topics include: passage of drugs across membranes, drug absorption, distribution, metabolism and excretion, pharmacokinetics, drug-drug interactions, novel drug delivery systems, pharmacogenetics, drug analysis, drugs in selected populations, including the elderly, children and neonates, in pregnancy and in various pathological conditions.
Prerequisite: MEDSCI 204

MEDSCI 304 15 Points
Molecular Pharmacology
Considers the cellular and molecular mechanisms of drug action on receptors with a particular focus on G-protein coupled receptors. Explores how receptors signal and traffic through cells and the implications of these processes on drug development and design. Also includes in silico drug design. Develops skills in experimental design and critical appraisal of data.
Prerequisite: BIOSCI 203, MEDSCI 204

MEDSCI 305 15 Points
Systems Pharmacology
Considers the modification by drugs of human systems under physiological and pathological conditions. The cellular and molecular mechanisms of drugs as receptors, ion channels, enzymes and intermediate messengers are considered. The modification of drugs on the cardiovascular, gastrointestinal, endocrine, reproductive, respiratory and central nervous systems will be covered.
Prerequisite: MEDSCI 204 and 30 points from BIOSCI 203, MEDSCI 203, 205

MEDSCI 306 15 Points
Principles of Toxicology
Considers the principles and concepts that result in detrimental effects in animals and humans. It addresses: biochemical pathways and targets in the toxicity of chemicals, the effects at cellular, organ and whole body level, eg, cell death, cancer and hypersensitivity, as well as the basis for cell and organ-selective toxicity. Drugs, occupational and environmental toxicants are discussed.
Prerequisite: MEDSCI 204 and 30 points from BIOSCI 203, MEDSCI 203, 205

MEDSCI 307 15 Points
Neuropharmacology
An introduction to the principles and concepts involved in neuropharmacology. The course covers: the anatomy, neurochemistry and pharmacology of the normal and diseased human brain; the biochemical causes of psychiatric and neurological diseases; and the types and mechanisms of action of drugs used to treat brain disorders.
Prerequisite: MEDSCI 204, 206

MEDSCI 309 15 Points
Biophysics of Nerve and Muscle
An advanced treatment of the physiology of excitable cells. Topics include: the biophysical basis of membrane potential, the spread of electrical activation and synaptic transmission, structure, excitation, mechanics and energetics of muscle and functional differences among muscle types. The
approach is quantitative with particular emphasis on current advances in the field.

**Prerequisite: MEDSCI 205, 206, or for BE(Hons) students, 15 points from MEDSCI 205 and 15 points from courses at Stage II listed in Part II of the Biomedical Engineering specialisation in the BE(Hons) Schedule**

**MEDSCI 311  15 Points**
**Cardiovascular Biology**
An advanced treatment of the human cardiovascular system that provides an integrated framework for understanding the structure, function and regulation of the heart and circulation, and their modification by drugs. Topics include: the energetics and mechanics of the heart, the regulation of heart rhythm and the control of blood pressure and the regulation of flow through the microcirculation. The course is illustrated using examples drawn from current research in the field and from representative disease states.

**Prerequisite: MEDSCI 205**

**MEDSCI 312  15 Points**
**Endocrinology of Growth and Metabolism**
An introduction to the mechanism controlling the production of hormones and how these achieve their effects in regulating body function. The course focuses in particular on the hormone systems controlling growth and metabolism and contrasts the differences between fetal and adult life. It also highlights how defects in endocrine systems are associated with conditions such as obesity and diabetes.

**Prerequisite: 30 points from BIOSCI 203, MEDSCI 201, 205**

**MEDSCI 313  15 Points**
**Reproductive Biology**
Aspects of reproductive biology including: regulation of gonadal function, the menstrual and oestrous cycles, ovulation, spermatogenesis, feto-maternal physiology including placental function, animal reproduction and assisted reproductive technologies.

**Prerequisite: 15 points from BIOSCI 107, 203, MEDSCI 142**

**MEDSCI 314  15 Points**
**Immunology**
The biology, cellular and molecular events underlying the immune response. The nature and characteristics of antibody-mediated and cell-mediated immunity including antigen recognition and presentation, antibody and T cell receptor structure, immune regulation and cytokines, immunogenetics and histocompatibility. The relationships of the immune system to the activities of pathogenic organisms. Applied immunology including biotechnology, infection, autoimmunity, tumour immunology, transplantation and immunodeficiency.

**Prerequisite: MEDSCI 202 or BIOSCI 201**

**MEDSCI 315  15 Points**
**Nutrition, Diet and Gene Interactions**
Focuses on the importance of nutrition in health and disease from a clinical perspective. The contribution of genetic and epigenetic factors and dietary influences in the development of a range of disorders will be considered. The course is structured using themes that include technologies, gut and metabolism, inflammation, nervous system, mobility and population health.

**Prerequisite: BIOSCI 202, 203**

**MEDSCI 316  15 Points**
**Sensory Neuroscience: From Molecules to Disease**
The physiology of neurosensory systems in health and disease with an emphasis on clinical relevance and current advances in research. The course will provide in-depth coverage of mechanisms involved in each system at a broad systemic level, down to the molecular level. Topics include vision, hearing, balance, olfaction, taste, touch and pain.

**Prerequisite: MEDSCI 206**

**MEDSCI 317  15 Points**
**Integrative Neuroscience: From Fetus to Adult**
The development and function of the central nervous system in health and disease. Topics include development of the CNS, functional imaging of the human brain, synaptic function in health and disease, development and pathophysiology of motor systems, perinatal and adult brain ischemia, stroke, and sleep related disorders. The topics are covered at an advanced level with emphasis on current advances in the fields.

**Prerequisite: MEDSCI 206**

**MEDSCI 318  15 Points**
**Pharmacokinetics and Drug Toxicity**
Considers the biochemical processes involved in achieving clinically-relevant drug concentrations that result in therapeutic effects and drug toxicity, from drug input, distribution, and elimination plus the ways in which these processes are described (pharmacokinetic modelling). Explores factors such as drug-drug interactions, pharmacogenetics, dosing and pharmacokinetic considerations in selected populations and that may influence both clinical effectiveness and drug toxicity.

**Prerequisite: MEDSCI 204 and 30 points from MEDSCI 203, 205, BIOSCI 203**

**Restriction: MEDSCI 303, 306**

**MEDSCI 319  15 Points**
**Molecular Pharmacology**
Explores the cellular and molecular mechanisms of drug action with a focus on G-protein coupled receptors and biochemical targets for cancer therapy. Drug design is considered from the perspective of in silico modelling, biochemical assessment and intracellular signalling.

**Prerequisite: MEDSCI 204 and 30 points from MEDSCI 203, 205, BIOSCI 203**

**Restriction: MEDSCI 304**

**MEDSCI 320  15 Points**
**Pharmacology of the Brain and Body**
Extends the principles of pharmacology acquired at Stage II to discuss how diseases can be treated in a variety of organ systems including the cardiovascular, gastrointestinal, endocrine, reproductive, and respiratory systems with emphasis on the central nervous system. Covers the mechanisms of action of drugs, and the influence of anatomy, physiology and pathology.

**Prerequisite: MEDSCI 204 and 30 points from MEDSCI 203, 205, 206, BIOSCI 203**

**Restriction: MEDSCI 305, 307**

---

**Postgraduate 700 Level Courses**

**MEDSCI 700  15 Points**
**Drug Discovery Biology**
Reviews recent studies on the use of chemical and genetic methods to characterise the role of proteins in disease and their potential as drug targets. Topics will include proteins involved in regulation of immune response, lipid mediated cell signalling pathways, drug-protein interactions, some discovery methods, and pre-clinical studies on mechanism of action.
MEDSCI 701  
Special Studies in Medical Science  
The critical review and analysis of research literature relating to a research topic. Components include an extensive literature review article defining the current knowledge relevant to a particular research area, a research proposal outlining proposed Masters research topic and its significance, and a formal presentation of the proposal. Suitable for students intending to undertake a Masters thesis.  
Restriction: MEDSCI 702, 744

MEDSCI 703  
Advanced Biomedical Imaging  
Theory and practice of biomedical imaging from the subcellular to whole body level with specific emphasis on recent developments. Principles of digital image-processing and image analysis (including quantitative morphology), computed tomography and volume rendering and analysis. Imaging modalities including atomic force microscopy, light and confocal microscopy, electron microscopy, X-ray, CT, ultrasound and magnetic resonance imaging.

MEDSCI 704  
Stem Cells and Development  
Stem cell biology and the genetic regulation of developmental processes will be examined in normal and disease settings. Blood, immunity, vascular networks and the kidney will be used as systems to explore important concepts in organ development and regeneration. This knowledge will be applied in understanding disease processes such as leukaemia, inflammation and kidney disorders, and in designing new therapeutic strategies.

MEDSCI 705  
Infection, Immunity and Disease  
Examines the ways in which host immune mechanisms control infection, infectious organisms evade host defence mechanisms, and the consequences of these processes for the host. Examples of human infectious diseases will include: HIV, hepatitis B, influenza, tuberculosis and streptococcal infections. Consideration of the consequences of infection will incorporate discussion of immune self/non-self discrimination, immune tolerance and autoimmune mechanisms, including the impact of response against infections on autoimmunity.

MEDSCI 706  
Genomic Medicine  
Examines a range of medical genetic disorders that illustrate principles of disease mechanisms, diagnosis and management. These will include: haemophilia, familial cancer, late-onset neurological disorders and mitochondrial disease.

MEDSCI 707  
Activities of Microbes in Disease  
The dynamic interaction between pathogenic microorganisms and humans will be explored. Examines the molecular mechanisms which enable microbes to survive, proliferate and cause disease; to evolve and acquire new genes; and to control the expression of their genes. Emphasis will be placed on recent advances in the understanding of major human microbial diseases.

MEDSCI 708  
Advanced Immunology and Immunotherapy  
Recent advances in immunology including: the genes and proteins involved in the innate and adaptive immune response, intracellular signalling mechanisms that determine immune outcomes, and the mechanisms by which the immune system learns ‘self’ from ‘non-self’. Examines a range of inflammatory diseases, and methods of immunotherapy, in particular approaches to combat cancer.

MEDSCI 709  
Nutrition in Health and Disease  
The influence that dietary patterns, foods and food components have on the promotion and protection against the common nutrition-related diseases in New Zealand. The relevant epidemiological, clinical, and biochemical/physiological aspects of each disease are covered.

MEDSCI 710  
Nutrition Mechanisms  
The mechanisms by which food and food components can influence disease processes. Topics covered include: the interaction between genotype and nutrition, antioxidants and oxidation protection mechanisms, dietary toxicology, the process of atherosclerosis, and the influence of the intra-uterine environment on growth and disease.

MEDSCI 711  
Clinical Nutrition  
Prevention of malnutrition and maintenance of nutritional status during acute and chronic illness through ‘artificial’ or ‘interventional’ means. Diagnosis and quantitation of malnutrition, and monitoring of nutrition support therapy. Practical techniques, common complications and quality assurance through a multidisciplinary team approach. Includes treatment of anorexia nervosa and cancer cachexia.

MEDSCI 712  
Critical Evaluation of Nutritional Therapies  
The suggested roles for micronutrients, ‘nutriceuticals’ and functional foods in general health, exercise performance and disease are evaluated using an evidence-based approach. The roles of micronutrients as dietary supplements and the potential actions of nutriceuticals and functional foods are also critically evaluated. Regulatory and ethical issues in the use of nutritional remedies are considered, including their use as supplements in chemotherapy or other conventional therapies, or in individuals with no symptoms.

MEDSCI 713  
Principles of Cancer Therapy  
Examines the molecular and cellular processes underlying cancer treatment and the development of tumour-selective therapy; the principles of radiotherapy and chemotherapy; DNA and the basis for its interactions with anticancer drugs; recognition of DNA by proteins; exploitation of these processes by anticancer drugs, oncogenes and other regulatory gene products; signal transduction mechanisms and strategies for changing cell cycle control; cytokines and the role of host responses in cancer therapy; new approaches to cancer therapy including gene therapy and photodynamic therapy.  
Prerequisite: MEDSCI 302

MEDSCI 714  
Advanced Cancer Biology  
Advanced studies of concepts related to the biology of cancer. These will include: molecular mechanisms, signal transduction pathways, genomic instability, telomeres and telomerase, anoikis, DNA damage sensing mechanisms, and hypoxia and tumour progression.  
Prerequisite: MEDSCI 302
MEDSCI 715 15 Points
Molecular Toxicology
Covers the current understanding of mechanisms implicated in toxicity of drugs and environmental chemicals plus the basis of inter-individual susceptibility. The course identifies strategies used to predict and prevent adverse reactions during drug development.

MEDSCI 716 15 Points
Advanced Drug Disposition and Kinetics
Advanced study of the absorption, distribution, metabolism and excretion of drugs, and the analysis of these processes. Also included are: in vivo/in vitro techniques in drug ADME studies used in drug development; drug analysis in biological matrices; and pharmaco-genomic aspects related to drug disposition.

MEDSCI 717 15 Points
Advanced Neuroscience: Neuropharmacology
An advanced study of current research topics in neuroscience, involves critical analysis of the literature within the context of a series of major research themes that encompass models from molecular through to systems level neuroscience. Themes will be selected from the following areas: neurogenesis, neurodegeneration and/or addiction.

MEDSCI 718 15 Points
Pharmacology of Anaesthetics and Analgesics
General aspects of anaesthetics and analgesics. Topics covered include the development of modern anaesthesia, the mechanisms of action of drugs used in general and local anaesthesia, and issues surrounding safety and efficacy of anaesthesia, including drug error and circadian variation in drug action.

MEDSCI 719 15 Points
Pharmacometrics
An introduction to the application of mathematical models used in the interpretation of pharmacological observations. Computer-based analysis methods are investigated using individual and population-oriented approaches.

MEDSCI 720 15 Points
Biomedical Research Techniques
An introduction to some of the most commonly used techniques used in today’s research laboratories; from tissue culture to confocal microscopy, RT-PCR to mass spectrometry, immunoassay to cloning. Emphasis is placed on understanding the principles behind the techniques, how they are applied to address specific questions, and how to evaluate and use the data they generate.

MEDSCI 721 15 Points
Advanced Toxicology
Focuses on classes of drugs associated with idiosyncratic adverse reactions and studies to define their metabolic basis and assessment of toxic risk.

MEDSCI 722 15 Points
Clinical Pharmacology
The disposition and action of medicines in humans of all ages will be explored, as well as adverse reactions, effects of pregnancy, medicine classification, and evaluation of clinical trials. Emphasis is placed on understanding the sources of variability of medicines and the use of target concentration intervention.

MEDSCI 723 15 Points
Cancer Pharmacology
The pharmacological basis of the action of anti-tumour drugs relevant to human cancer therapy, emphasising the variability of chemotherapy effects, interactions between anti-cancer agents and early phase clinical trials.

MEDSCI 725 15 Points
Experimental Design
Principles of experimental design and data analysis in physiological research. Topics include: analysis of variance, post-hoc multiple comparisons, non-linear and multiple linear regression, analysis of covariance and statistical power. The approach is practical and computer statistical packages are used.

MEDSCI 727 15 Points
Advanced Neuroscience: Neurophysiology
An advanced treatment of selected topics in neurophysiology and brain pathophysiology. Includes presentations and critical analysis by the students of the current scientific literature within the context of several major research themes that encompass models from molecular and cellular to systems level. Themes will be selected from the following areas: (1) motor control and motor disorders; (2) synapse physiology and pathophysiology; (3) advances in neural stem cell research; and (4) physiology and pathophysiology of CNS glia.

MEDSCI 729 15 Points
Perinatal Physiology and Medicine
Fetal development has long-term consequences for health. This advanced course offers a wide range of research themes relating to fetal development and future health. Topics include: placental development, fetal physiology, and endocrine regulation and metabolic function during fetal and postnatal life. The course explores pathogenesis of disease and injury of the fetus and newborn, and how biomedical research leads to potential clinical treatment strategies.

MEDSCI 730 15 Points
Reproductive Science
Molecular regulation and coordination of normal reproduction. The reproductive disorders that arise when normal biological processes are disrupted. Recent molecular methods have enabled us to study these processes and to understand how they can go wrong. Genomic and proteomic approaches to the understanding of reproduction and reproductive disorders will be presented. Examination of the new technologies that allow us to overcome some of these reproductive problems.

MEDSCI 731 15 Points
Advanced Reproductive Biology
Understanding normal reproductive events and how normal biological processes are disrupted to cause medical problems. A range of specific disorders of reproduction (Pre-eclampsia, polycystic ovarian syndrome, endometriosis), including infertility and gynaecological cancer, will be discussed. Attention will be given to the recent advances in understanding of disease at a molecular level and how they translate to become a clinical disorder.

MEDSCI 732 15 Points
Molecular Aspects of Endocrinology and Metabolism
Explores how hormones are able to control such a wide range of physiological processes. Covers molecular aspects of hormone action with particular reference to the neuroendocrine and peripheral endocrine systems that...
control appetite and metabolism. Other topics covered include how defects in hormone action lead to diseases such as cancer, obesity, Type-2 diabetes and cardiovascular disease.

**MEDSCI 733**  
**Advanced Methods in Cell Physiology**  
The theoretical basis underpinning electrophysiological and live cell imaging techniques used to probe cellular function will be addressed. Emphasis will be placed on the instrumentation, data acquisition, and data analysis associated with each technology. The approach is practical and computer-based software programmes are used to analyse pre-recorded data, and data produced by the students themselves.  
*Restriction: MEDSCI 726*

**MEDSCI 734**  
**Advanced Integrative Physiology**  
In the post-genomic world the limitations of reductionism as a basis for understanding complex function have become apparent and it is necessary to integrate genomics with the biology of organ systems. This course will portray how an integrative physiological approach can reveal new levels of understanding in the field of biomedical research. Examples of this approach will be drawn from research programmes within the areas of cardiovascular biology, fetal physiology, neurophysiology and vision.  
*Restriction: MEDSCI 728*

**MEDSCI 735**  
**Concepts in Pharmacology**  
Explores cellular and molecular mechanisms of drug action and drug discovery and development from the perspective of in silico modelling, biochemical assessment, intracellular signalling and human disease. Considers the pharmacokinetic processes involved in achieving clinically-relevant drug concentrations, the link between concentration and effect, the time course of effect and factors that may influence both clinical effectiveness and drug toxicity.

**MEDSCI 736**  
**Special Topic: Digital Skills and Scholarship for Researchers**  
Develops the skills required to engage effectively in digital research and to enhance digital scholarship and best practice in the digital research environment. Topics include: project and data management (including best practice in metadata), basic scientific programming skills, data analysis and visualisation, and copyright and copyright licensing. Students will develop a project under the guidance of a Project Advisor.

**MEDSCI 737**  
**Biomedical MRI**  
Provides students with a thorough understanding of a range of biomedical MRI techniques as well as advanced clinical MRI applications such as functional imaging of the brain and cardiovascular system. Laboratories will cover MRI applications in basic science, and MRI applications in clinical medicine.

**MEDSCI 738**  
**Biological Clocks**  
Chronobiology – the study of biological rhythms and the clocks that control them. Theory, anatomical location and molecular machinery of biological clocks will be covered, as will the control of rhythms of different time scales from days (circadian rhythms) to years (circannual rhythms).

The influence the human circadian clock has on physiology and drug efficacy, and the effect hospitalisation has on the control of sleep cycles will be given special attention.

**MEDSCI 739**  
**Advanced Sensory Neuroscience**  
Advanced study of the physiology of neurosensory systems in health and disease. Provides an in-depth coverage of the molecular, cellular and systemic mechanisms underlying vision and hearing.  
*Prerequisite: MEDSCI 316*

**MEDSCI 740**  
**Stem Cell Biology and Transgenesis**  
Explores the use of embryonic and adult stem cells in research and for potential therapeutic applications. The development and recent technical advances in the fields of cellular reprogramming and embryonic stem cell-based transgenesis will also be covered.  
*Prerequisite: BIOSCI 356, MEDSCI 301*

**MEDSCI 741**  
**Medical Imaging Technology**  
Study of the physical processes underlying current clinical imaging techniques. Topics include: physical principles of image acquisition, processing and display; artefacts, image acquisition methods and parameters and their impact upon patient safety and image quality; management of radiation exposure; principles of X-Ray, fluoroscopic, mammographic, computed tomography, magnetic resonance imaging (MRI), nuclear medicine, ultrasound imaging; MRI safety; dose estimation and quality assurance. Emphasis is placed on patient and practitioner care, image quality and artefacts in relation to image interpretation.

**MEDSCI 742**  
**Anatomy for Medical Imaging**  
Study of clinical and radiographic human anatomy, as demonstrated by current imaging techniques. Topics include: developmental anatomy, surface anatomy, functional anatomy and cross sectional anatomy. Emphasis is placed on normal variants and range of normality, and how to give a structured account of anatomy in relation to image analysis and identification.

**MEDSCI 743**  
**Design and Analysis in Biomedical Research**  
An in-depth exploration of the principles of experimental design and data analysis in biomedical contexts. A focus on critical appraisal of choice of statistical tests to address experimental questions and appropriateness and limitations of analysis and interpretation of results will be undertaken. Practical and computer statistical packages are used.  
*Restriction: MEDSCI 725*

**MEDSCI 744**  
**Project Design in Biomedical Science**  
An individualised course of study in which each student will provide an exposition of the background to a specific research question in the biomedical sciences combined with a proposal of the best methods to investigate that specific question. A holistic consideration, including the ethical, regulatory, budgetary as well as, any other relevant aspects, of the chosen methods will be documented.  
*Prerequisite: 30 points from Medical Science at Stage III or higher with a B– or better*  
*Restriction: BIOSCI 761, MEDSCI 701, OBSTGYN 705*
MEDSCI 745 15 Points  
**Special Topic: Drug Development**  
Examines approaches for bringing potential new therapeutic drugs from the discovery bench into the clinic and the drug development process. Explores a variety of drugs and uses case studies to provide a practical understanding. Integrates multidisciplinary perspectives, drawn from academic and industry experiences, on practices that contribute to the development of safe and effective drug therapies.

**Postgraduate 700 Level Courses**

MEDICINE 700 15 Points  
**Designing Safer Systems**  
The application of improvement science and safety science methods to achieve better outcomes for patients by reducing harm, waste and variation in health care; includes a focus on measurement for improvement and the application of human factors theory and concepts to design a safer and more reliable health care system.  
**Prerequisite:** NURSING 775 or POPLHLTH 724

MEDICINE 702 15 Points  
**Understanding Complex Clinical Systems**  
Draws across domains of system science, safety science, complexity theory, and implementation science to help analyse how leaders understand and effect change in healthcare. A particular focus is on understanding how things go wrong and how organisational culture, power, and politics impact on models of effective leadership within clinical systems.  
**Prerequisite:** NURSING 775 or POPLHLTH 724

MEDICINE 703 15 Points  
**Special Studies in Medicine**  
Advanced study in a specific area usually related to the field of study of the thesis. Topics include, but are not restricted to, clinical neuroscience, bone science, rheumatology, geriatrics, cardiology, respiratory and renal medicine.

MEDICINE 713 15 Points  
**Cardiovascular Medicine**  
Cardiovascular anatomy and physiology with a detailed study of the pathophysiology of common cardiovascular conditions and management principles. Areas of study include atherosclerosis, hypertension, coronary artery disease and heart failure.

Nursing

Stage I

**NURSING 104** 15 Points
*Applied Science for Nurses*
Provides an opportunity for the application of specific and selected topics from the biological and physical sciences to be related to beginning nursing practice.

**NURSING 105** 30 Points
*Nursing in Practice*
An introduction to nursing as a profession including concepts of nursing practice, and communication skills. The theoretical basis for nursing practice as well as legal and ethical boundaries are introduced. The role of the nurse in health maintenance and health promotion is explored. Skills in assessment of clients and planning client care are introduced.

**NURSING 199** 0 Points
*English Language Competency*
To complete this course students must attain a level of competency in the English language as determined by the School of Nursing. This course must be completed prior to enrolling in Part II of the Bachelor of Nursing degree.

Stage II

**NURSING 201** 60 Points
*Nursing Clients with a Pathophysiological Problem*
A problem-based course where students acquire the skills associated with nursing clients requiring medical and surgical interventions and subsequent rehabilitation. Understanding the mechanisms of disease and prevention of such diseases is the basis for the course. Students are introduced to the principles of pharmacology and pharmacokinetics. Issues such as caring for clients with chronic pain and an understanding of death and grief are included. Practicums and teaching take place in a variety of clinical settings.

**NURSING 202** 60 Points
*Nursing in Mental Health, Addictions and Disability*
Allows students to understand perspectives of mental health and illness, the crisis nature of mental illness and the therapeutic models of mental health management. Students acquire the specific nursing skills required to care for people with mental health problems and also those who have a long-term disability. Students undertake a range of clinical attachments in hospital and community settings. *Prerequisite: NURSING 201*

Stage III

**NURSING 301** 60 Points
*Child and Family Health Nursing*
An understanding of concepts related to family, women’s and child health. The focus is on childbirth as a healthy event in the life of a family, care in the community, together with the nursing care of children suffering illness in a hospital setting. Older persons’ health focuses on an alternate aspect of family health. Clinical attachments are in a variety of clinical and community settings. *Prerequisite: NURSING 201, 202*

**NURSING 302** 60 Points
*Professional Nursing Practice*
Allows the student to make the transition from student to professional nurse. A period of practice in an elected area of clinical speciality is included. Issues such as the development of nursing knowledge, autonomy of practice, accountability for practice, and the legal and ethical parameters of competency as a nurse are emphasised. *Prerequisite: NURSING 301*

Postgraduate 700 Level Courses

**NURSING 701** 30 Points
*Clinical Project*
A personal scholarly exploration of an area of clinical nursing practice that reflects an understanding of research purpose and process. The project includes a critical and comprehensive review of relevant literature which results in new insights and understandings and considers how the application of these might affect existing service delivery or clinical practice models.

**NURSING 710** 15 Points
*Special Studies in Nursing*
As prescribed by the Head of the School of Nursing.

**NURSING 732** 30 Points
*Leading and Managing Changes in Healthcare*
Theoretical and practice principles of leadership and management in the context of healthcare organisations. Utilises an action based learning model, mentorship and project work.

**NURSING 733** 15 Points
*Special Studies in Nursing*

**NURSING 734** 15 Points
*Special Topic in Nursing*

**NURSING 735** 30 Points
*Clinical Education Practicum*
Application and critical analysis of educational theories and concepts in a clinical learning environment. Utilises an action based learning model and project work.

**NURSING 737** 30 Points
*The Scholarship of Practice*
The development of professional knowledge is explored from a variety of perspectives, including the wider healthcare environment and national and international trends, as relevant to advancing nursing practice.

**NURSING 740** 30 Points
*Prescribing in Advanced Nursing Practice*
The knowledge and competencies that form the basis of prescribing in advanced nursing are developed under supervision.

**NURSING 741** 30 Points
*Education for Clinical Practice*
Professional learning is essential to enable healthcare professionals to function competently in the complex world of clinical practice. Health care professionals are required to become actively involved in teaching colleagues involved in healthcare and patients. Effective clinical teaching and learning is enabled by laying a foundation in educational theory and practice.

**NURSING 742** 30 Points
*Biological Science for Practice*
Focuses on common pathologies acknowledging the New Zealand Health Strategy, giving particular attention to areas where health promotion, preventative care, chronic disease management and cost impact for New Zealand.
Advanced Nursing Practicum

Designed to refine advanced nursing skills and to further develop an advanced analytical model for nurses preparing for advanced practice. Advanced assessment skills along with disease management models will be taught with a focus on clinical decision making in various health settings.

Prerequisite: NURSING 773 or equivalent, and practising in an advanced nursing role

Specialty Nursing Practicum

Gives nurses the opportunity to extend their clinical skills and practice knowledge and to advance clinical decision making by utilising a range of guided learning experiences. The focus is on continued development of clinical expertise, using a practice development approach emphasising person-centred, evidence-based practice, and critical thinking practice to improve health outcomes.

To complete this course students must enrol in NURSING 744 A and B, or NURSING 744

Principles of Medication Management

Focuses on the principles and practice of medication management to improve and extend the knowledge and skills of registered nurses in clinical specialty roles and prepare them for delegated prescribing roles in partnership with clients and collaborating with medical colleagues and the health care team. It is not the intention of this course to prepare nurses for authorised prescribing (nurse practitioner).

Restriction: NURSING 761

Evidence-based Practice and Implementation

Considers the types of evidence that inform nursing practice and implementation, and examines barriers and enablers to the application of evidence to practice. Provides students with the tools to locate and appraise evidence and requires the student to engage in research activities resulting in a substantial research essay.

Restriction: NURSING 720

Clinical Practice Development

Develops knowledge, practice and skills within the scope of a beginning registered nurse; enhances client assessment, planning and delivery of client-centred care within a specific healthcare context. Also fosters critical exploration of knowledge and skills appropriate to professional, socio-political, legal-ethical, cultural aspects of practice.

Restriction: NURSING 725, 773

To complete this course students must enrol in NURSING 770 A and B, or NURSING 770

Advanced Assessment and Clinical Reasoning

Nurses make a variety of diagnoses in their daily practice. Advanced nursing practice requires skilled health assessment, estimation of probabilities and evidence based diagnostic reasoning. This complex cognitive process is developed in relation to skills and knowledge required for sound clinical reasoning.

Restriction: NURSING 770
NURSING 785  
Clinical Reasoning in Pharmacotherapeutics  
Builds on prior knowledge to establish an advanced understanding of pharmacotherapeutics and the application of the principles of pharmacokinetics, pharmaco-dynamics to prescribing practice in advanced practice roles; and develops nursing skills in clinical reasoning for safe and effective prescribing.

Restriction: NURSING 719

NURSPRAC 717 30 Points
Practicum for RN Designated Prescribers
Prepares registered nurses to apply for prescribing rights as Designated Prescribers. Provides nurses with the opportunity to develop knowledge and skills in the application of pharmacotherapeutic concepts to prescribing as a designated prescriber. This includes direct supervision of prescribing activities in the clinical area and the ability to work closely and effectively in a multidisciplinary team environment.
Prerequisite: NURSING 742, 773, 785

NURSPRAC 718 30 Points
Contemporary Mental Health and Addictions Nursing Practice
Explores contemporary mental health and addictions nursing practice from both socio-political and practice-skills perspectives. Focuses on developing awareness of the unique mental health and addictions context of Aotearoa/New Zealand and the cultural and values based practices and policies which have emerged. Builds on foundational therapeutic and interpersonal skills and develops knowledge and skills in contemporary, evidence-based mental health and addictions nursing interventions.
Restriction: NURSING 786

NURSPRAC 719 30 Points
Clinical Practice in Mental Health and Addictions

Contraception and Pre and Early Pregnancy
An evidence-based approach to contraception and pre and early pregnancy care. Mechanisms, side effects and contraindications of methods of contraception are covered. Pre pregnancy care will include preconceptual counselling and the psycho-social aspects of pregnancy care such as effects of drugs, alcohol, smoking and travel. Best practise and referral guidelines for early pregnancy ante natal care will be covered including diagnosis and management of early pregnancy problems such as recurrent miscarriage, ectopic pregnancy, gestational trophoblastic disease and hyperemesis.

OBSTGYN 713 15 Points
Pregnancy and Postnatal Care in the Community
Common problems of pregnancy for primary care. Includes pregnancy care in the community, obstetric emergencies, common disorders in pregnancy, birth matters, the immediate postpartum period, the newborn.

OBSTGYN 715 15 Points
Medical Gynaecology 1
Women's health and sexually transmitted diseases, menstrual disorders, pelvic pain and dyspareunia, vulva problems and vaginal discharge, menopause management.
OBSTGYN 716 15 Points
Medical Gynaecology 2
Pathophysiology and clinical management of infertility, gynaecological malignancies, family violence, adolescent gynaecology, termination of pregnancy, urogynaecology.

Ophthalmology

Postgraduate 700 Level Courses

OPHTHAL 703 30 Points
Special Topic: Research Methods and Skills for Eye Research
A comprehensive overview, focusing primarily on the ophthalmic arena. Includes: research, methodologies, literature reviews, implementation and appraisal of qualitative and quantitative research, developing research questions and writing up of research for presentation and publication. Provides skills specific to eye research that may not be relevant to other health care professionals.

OPHTHAL 704 30 Points
Special Topic: Ophthalmic Technology
The theory, basic principles, techniques and interpretation of results for ophthalmic technology used in the diagnosis and treatment of eye disease. Technology covered includes: slit lamp biomicroscopy, tonometry, A-scan ultrasound, keratometry; IOL master, HRT, OCT, computerised topography, anterior segment photography, FFA, autorefration and therapeutic lasers. The latest advances in ophthalmic technology will also be included.

OPHTHAL 705 30 Points
Special Topic: Management of Acute Eye Disease
Overview of the diagnosis and management of ‘acute eye conditions’ in the community and hospital settings including: signs and symptoms, differential diagnosis, treatment modalities and medium term management.

OPHTHAL 706 30 Points
Special Study in Ophthalmology
To provide an opportunity to study a selected field of ophthalmology at an advanced level by undertaking a detailed review of a selected topic or undertaking a research project in a field related to ophthalmology.

Optometry and Vision Science

Stage I

OPTOM 101G 15 Points
How We See
Overview of the interdisciplinary study of human vision. The course introduces the biological/physiological organisation of the visual system, discusses the subjective nature of perception, and the implications of studies of biological visual systems for machine vision. Interdisciplinary understandings of vision will be enriched by the examination of historical paintings and artists’ visual experiences.

Stage II

OPTOM 216 30 Points
OPTOM 216A 15 Points
OPTOM 216B 15 Points
Introduction to Optometry
A clinically-focused course introducing students to optometric practice and addressing, at an introductory level, the ethical, cultural, theoretical and clinical aspects of the optometric examination. Topics covered include: preliminary tests from the eye examination, communication skills and clinical problem solving. The course will emphasise assessment utilising advanced equipment and the production of clinically relevant outcomes and diagnosis-supportive hypotheses.
To complete this course students must enrol in OPTOM 216 A and B, or OPTOM 216

OPTOM 263 30 Points
OPTOM 263A 15 Points
OPTOM 263B 15 Points
Essential Optics
An introduction to optics relevant to optometry and necessary to understand the optical performance of the eye, the design of ophthalmic lens applications, and the principles of operation of clinical instrumentation. Topics
include; the basic principles of physical optics, the principles of image formation by lenses and lens systems mirrors and prisms, optics of the eye, ocular ametropia and aberrations. **Restriction:** OPTOM 215, 262, 265

To complete this course students must enrol in OPTOM 263 A and B, or OPTOM 263

OPTOM 272A 15 Points
OPTOM 272B 15 Points

**Visual Science 1: Structure and Function of the Visual System**

Anatomy and physiology of the eye and visual pathway. Topics include composition and structure of the tear film, neural processing in the visual cortex, aspects of visual function including spatial and temporal vision, motion perception and colour vision. Investigation of visual perception using psychophysical and electrophysiological techniques.

**Restriction:** OPTOM 151, 170, 171

To complete this course students must enrol in OPTOM 272 A and B

OPTOM 292A 7.5 Points
OPTOM 292B 7.5 Points

**Issues in Optometry**

Topics of special interest to students entering Optometry from overseas and from the graduate entry quota.

**Prerequisite:** Permission of Head of School

**Restriction:** OPTOM 191

To complete this course students must enrol in OPTOM 292 A and B

Stage III

OPTOM 316A 30 Points
OPTOM 316B 30 Points

**Optometry**

An integrative approach to the scope of optometric practice, addressing both the theoretical basis and clinical practice of the optometric examination, correction of refractive error and dispensing of optical appliances. Topics covered include: visual acuity, visual fields, colour vision, biomicroscopy, ophthalmoscopy, refractive examination, binocular examination, optical correction, lens materials and coatings, history taking, communication skills and clinical problem solving.

**Restriction:** OPTOM 211, 212, 265, 313, 314, 365, 366

To complete this course students must enrol in OPTOM 316 A and B

To complete this course students must enrol in OPTOM 353 A and B

OPTOM 366A 15 Points
OPTOM 366B 15 Points

**Clinical Optics and Dispensing**

An integrative approach to optical theory and its clinical application, particularly in the areas of correction of refractive error and dispensing of optical appliances. Topics addressed include: optical measurement of refractive error by objective and subjective techniques, optical correction of refractive error, ophthalmic lens materials, coatings and treatments. Optics of ophthalmic lenses, including advanced multifocal lens design. Magnification, aberrations, and lens design. Optical instrumentation and clinical application.

**Restriction:** OPTOM 260, 365

To complete this course students must enrol in OPTOM 366 A and B

OPTOM 375A 7.5 Points
OPTOM 375B 7.5 Points

**Visual Science 2**

To provide an understanding of visual information processing in human brain. In particular the cortical processing of shape, motion and colour, and development of the visual cortex will be addressed. A problem-oriented approach will develop critical thinking and problem solving skills. Students will acquire the ability to seek, evaluate and retrieve scientific information on which to base their clinical practice.

**Restriction:** OPTOM 270

To complete this course students must enrol in OPTOM 375 A and B

OPTOM 392A 7.5 Points
OPTOM 392B 7.5 Points

**Issues in Optometry 2**

**Prerequisite:** Permission of Head of School

**Restriction:** OPTOM 291

To complete this course students must enrol in OPTOM 392 A and B

Stage IV

OPTOM 416A 15 Points
OPTOM 416B 15 Points

**Clinical Optometry**

Facilitates the transition from student to professional optometrist. Topics addressed include: structuring the routine optometric examination in a clinical setting, diagnosis and management of disorders of the visual system, case analysis, myopia control, visual ergonomics, vision screening, and visual standards. This course culminates in students examining and managing clients in the public University Clinics under supervision.

**Restriction:** OPTOM 319, 415

To complete this course students must enrol in OPTOM 416 A and B
dysfunction and signs of systemic disease. Management of ocular adnexa and visual system, including neurological disorders specific to children, adults with binocular vision abnormalities, or those with visual impairment including the older population. Topics include: developmental aspects of infant and children’s vision and eye coordination, visual examination of infant and child patients, investigation and management of idiopathic and acquired binocular eye-movement disorders. This course also explores the diagnosis and management of ocular and vision problems in the elderly including electronic, optical and non-optical low vision appliances.

Restriction: OPTOM 341
To complete this course students must enrol in OPTOM 440 A and B

OPTOM 441A 15 Points
OPTOM 441B 15 Points

Optometry for Special Populations
An advanced clinical course including consideration of visual disorders specific to children, adults with binocular vision abnormalities, or those with visual impairment including the older population. Topics include: developmental aspects and assessment of infants/children, investigation and management of binocular eye-movement disorders; and diagnosis and management of vision problems in visually impaired patients including electronic, optical and non-optical low vision appliances.

Restriction: OPTOM 341, 440, 441
To complete this course students must enrol in OPTOM 442 A and B

OPTOM 442A 7.5 Points
OPTOM 442B 7.5 Points

Optometry for Special Populations
This course also explores the diagnosis and management of ocular and vision problems in the elderly including electronic, optical and non-optical low vision appliances.

Restriction: OPTOM 341
To complete this course students must enrol in OPTOM 441 A and B

OPTOM 441A 15 Points
OPTOM 441B 15 Points

Visual Science 3
To provide an understanding of visual information processing by the visual pathways (retino-geniculate-striate system) and the physiology of other ocular components. A problem-oriented approach, which develops students’ skills in reading, analysing and debating scientific papers in the vision sciences, will be used to achieve a high level of critical thinking and problem solving skills. It is expected that students will acquire the ability to seek, evaluate and retrieve scientific information on which to base their clinical practice. Clear and concise communication of scientific information both in written and oral form will be required.

Restriction: OPTOM 372
To complete this course students must enrol in OPTOM 472 A and B

OPTOM 472A 7.5 Points
OPTOM 472B 7.5 Points

Issues in Optometry 3
Study modules on a range of topics in optometry and vision science, with the focus being on developing research skills including an evidence-based approach to investigations. Study will include supervised investigations into an approved topic relating to optometry and vision science, including clinical and applied research.

Restriction: OPTOM 470, 475, 480, 570
To complete this course students must enrol in OPTOM 473 A and B

OPTOM 473A 15 Points
OPTOM 473B 15 Points

Research in Advanced Vision Science
Study will include supervised investigations into an approved topic relating to optometry and vision science, including clinical and applied research.

Restriction: OPTOM 391
To complete this course students must enrol in OPTOM 492 A and B

OPTOM 492A 7.5 Points
OPTOM 492B 7.5 Points

Advanced Clinical Optometry 1
Clinical work with responsibility, under supervision, for patients.

Restriction: OPTOM 410
To complete this course students must enrol in OPTOM 510 A and B

OPTOM 510A 15 Points
OPTOM 510B 15 Points

Advanced Clinical Optometry 2
Clinical work with greater emphasis on particular areas in optometry including: contact lenses, low vision, binocular vision, paediatric optometry and practice management.

Restriction: OPTOM 420
To complete this course students must enrol in OPTOM 520 A and B

Optometry in Practice
Supervised clinical work in locations external to the Grafton Campus Optometry Clinic. These locations may include University satellite clinics, private optometry practice, hospital eye departments, overseas institutions, or experience in other approved locations. Lectures address; legislation relevant to healthcare including registration and competency, occupational safety and health, ethics, practice management, small business management.
Restriction: OPTOM 462
To complete this course students must enrol in OPTOM 560 A and B

OPTOM 570A  15 Points
OPTOM 570B  15 Points
Research in Advanced Optometric Science
Study modules on a range of topics in optometry and vision science, with the focus being on developing an evidence-based approach on selected topics. Study will include supervised investigations into an approved topic relating to optometry and vision science, including clinical and applied research.
Prerequisite: Enrolment in Part IV of the Optometry Programme
Restriction: OPTOM 470, 475, 480
To complete this course students must enrol in OPTOM 570 A and B

OPTOM 592A  7.5 Points
OPTOM 592B  7.5 Points
Issues in Optometry 4
A number of special topics in Clinical Skills. Further information may be obtained from the School of Optometry and Vision Science.
Prerequisite: Permission of Head of School
Restriction: OPTOM 491

Paediatrics

Diploma Courses
PAEDS 601A  60 Points
PAEDS 601B  60 Points
Diploma in Paediatrics
Covers: genetic and antenatal factors in development, neonatal paediatrics, assessment of a child’s physical, intellectual, emotional and social needs, epidemiology of childhood disease, cultural factors and child health, general and preventative paediatrics, management of common disorders of childhood, and the practical working of the statutory and voluntary services available in New Zealand for the care of children. A logbook and dissertation must be completed.
To complete this course students must enrol in PAEDS 601 A and B

Postgraduate 700 Level Courses
PAEDS 700  15 Points
Special Topic
PAEDS 704  15 Points
Special Studies in Paediatrics
Advanced study in a specific area, usually related to the field of study of the thesis.

PAEDS 710  15 Points
Clinical Care of Gender Diverse Youth
To develop and advance skills, knowledge and expertise in the clinical care of young transgender people.
Corequisite: PAEDS 712

PAEDS 712  15 Points
Youth Health Clinical Skills
Develops and extends knowledge and skills in clinical
interviewing, comprehensive assessments and effective interventions with young people.

**PAEDS 714 15 Points**

**Emergency Paediatrics**

Designed for health care providers involved in the delivery of acute emergency care to children, this course combines theoretical knowledge with clinical practice. Students will learn to recognise and manage the important paediatric medical and surgical emergencies including the approach to the febrile child, management of seizures and the recognition and management of other acute medical and surgical paediatric conditions.

**PAEDS 719 15 Points**

**Health, Education and Youth Development**

Examines the overlap of health and education in the context of youth development by exploring the impact of past and current developments and strategies in both sectors on the wellbeing of young people. It reviews the ‘business’ of schools, the Health and Physical Education curriculum, school-based health and support services, whole school approaches to health, and the health and education needs of students not engaged with the school system.

**PAEDS 720 15 Points**

**Advanced Youth Health**

Extends students’ knowledge of youth health and well-being and develops knowledge and skills for supporting or leading improvements or projects in youth health. Will include advanced understandings of youth development and develop youth health project ideas or service improvements for clinical, research or policy settings.

**PAEDS 721 15 Points**

**Clinical Care of Adolescents and Young Adults with Cancer**

To develop and advance skills, knowledge and expertise in the clinical care of adolescents and young adults with cancer.

**Prerequisite: PAEDS 712**

**PAEDS 722 15 Points**

**Youth Health Practicum**

Aims to give clinicians the opportunity to extend their professional youth health skills and expertise through a supervised self-directed learning practicum in youth health.

**Prerequisite: PAEDS 720**

---

**Pharmacology**

**Stage III**

**PHARMCOL 399 15 Points**

**Capstone: Integrated Pharmacology**

A capstone that applies fundamental principles of pharmacology and toxicology to the safe, effective and responsible use of drugs through investigation of a current area of pharmaceutical research. Emphasises experimental design, data collection, analysis, interpretation and presentation, as the scientific basis for rational, evidence-based decision-making.

**Prerequisite: MEDSCI 204 and 30 points from MEDSCI 203, 205, 206, BIOSCI 203, and 30 points from MEDSCI 318-320**

**Pharmacy**

**Stage I**

**PHARMACY 107 15 Points**

**Special Topic**

**PHARMACY 111G 15 Points**

**Drugs and Society**

The use of drugs in society including historical perspectives. Selected examples of the use of medicines in disease, recreational drug use and drug misuse, and cultural and ethnic influences on drug use. Differences between conventional and complementary medicines. The role of the pharmaceutical industry in drug discovery, manufacture and promotion. Legal and ethical issues pertaining to access to pharmaceuticals.

**PHARMACY 199 0 Points**

**English Language Competency**

To complete this course students must attain a level of competency in the English language as determined by the School of Pharmacy. This course must be completed prior to enrolling in PHARMACY 213.

---

**Stage II**

**PHARMACY 211 30 Points**

**Applied Science for Pharmacy**

Specific and selected aspects of chemistry, biochemistry, anatomy, physiology, immunology, microbiology, pathophysiology and pharmacology are explored in the context of beginning clinical pharmacy practice.

**PHARMACY 212 30 Points**

**Pharmaceutical Science and Practice**

The properties of materials, principles of pharmaceutical formulation, design of drug delivery systems and routes of administration of drugs are considered. The skills for competent pharmacy practice in New Zealand, including law, ethics, medicines information, clinical communication, cultural competence and elements of human behaviour are introduced.

**PHARMACY 213 60 Points**

**Pharmacy 1**

The optimal drug treatment of dermatological,
gastrointestinal and respiratory diseases and disorders is explored through an integrated multidisciplinary systems-based approach. Clinical and professional skills in law and ethics, critical appraisal, medicines information, pharmaceutical compounding and calculations, clinical communication and cultural competence are introduced. Introductory experiential learning opportunities in hospital and community pharmacy sites are provided.

Prerequisite: PHARMACY 199, 211, 212

Stage III

PHARMACY 303 15 Points
Pharmaceutics 2
The scientific principles of formulation and drug delivery, and the choice of appropriate routes of administration. Principles behind the development of pharmaceutical dosage forms capable of achieving predictable and reproducible therapeutic responses are developed, including an introduction to industrial processes and quality assurance.

Prerequisite: PHARMACY 202

PHARMACY 311 60 Points
Pharmacy 2
The optimal drug treatment of cardiovascular, hepatic, renal, and infectious diseases and disorders are explored through an integrated multidisciplinary systems-based approach. Clinical pharmacy skills in law and ethics, dispensing, medicines information, adherence support, clinical communication, physical assessment and management are further developed. Experiential learning opportunities in industry, residential care, general practice and government agencies are provided.

Prerequisite: PHARMACY 211-213

PHARMACY 312 60 Points
Pharmacy 3
The optimal drug treatment of endocrine, musculoskeletal, eye, ear, nose and throat, and dental diseases and disorders and women's and men's health issues are explored through an integrated multidisciplinary systems-based approach. Clinical pharmacy skills in law and ethics, dispensing, medicines information, clinical communication, management, quality and safety, and research skills are further developed. Further experiential learning opportunities are provided.

Prerequisite: PHARMACY 311

Stage IV

PHARMACY 410 30 Points
PHARMACY 410A 15 Points
PHARMACY 410B 15 Points
Dissertation
Students undertake an original research project in the areas of pharmacy practice, clinical pharmacy and pharmaceutical science. They develop an awareness of the purpose, nature and practice of research and an ability to undertake an original research project in a small group under the supervision of an academic member of staff.

Prerequisite: PHARMACY 311, 312
To complete this course students must enrol in PHARMACY 410 A and B, or PHARMACY 410

PHARMACY 411 45 Points
Pharmacy 4
The optimal drug treatment of haematological, nutritional and psychiatric diseases and disorders and cancers are explored through an integrated multidisciplinary systems-based approach. Clinical pharmacy skills in areas such as law and ethics, dispensing, aseptic compounding, medicines information, management, and teamwork and leadership are further developed. Advanced experiential learning opportunities in pharmacy sites, including in rural locations, are provided.

Prerequisite: PHARMACY 311, 312

PHARMACY 412 45 Points
Pharmacy 5
The optimal drug treatment of neurological diseases and disorders, children’s and older persons’ health issues and patients with multiple morbidities is explored through an integrated multidisciplinary systems-based approach. Clinical pharmacy skills in law and ethics, dispensing, medicines information, management, teamwork and leadership, pharmacoconomics and health technology assessment are further developed. Further advanced experiential learning opportunities are provided.

Prerequisite: PHARMACY 411

Postgraduate 700 Level Courses

PHARMACY 750 30 Points
Pharmaceutical Formulation
Physiological and physicochemical factors in drug delivery and formulation of pharmaceutical products. Consideration of both traditional (eg, solutions, semi-solids, solids, aerosols) and novel (eg, liposomal) drug delivery systems based on the experimental literature.

PHARMACY 751 30 Points
Pharmaceutical Techniques
Experimental and analytical techniques in the assessment of pharmaceutical products and of drug action in biological systems. Consideration of pharmacopoeial and official standards, drug stability and drug metabolism.

PHARMACY 752 15 Points
Pharmaceutical Quality Assurance
Principles of good manufacturing practice (GMP), quality assurance and quality control as applied to pharmaceutical products and processes. Consideration of relevant industrial processes, legislation, safety issues, packaging, labelling, stability and regulatory requirements.

PHARMACY 753 15 Points
Regulatory Affairs
National and international requirements pertaining to the registration, licensing and distribution of pharmaceutical products. Consideration of the legal framework, pre-clinical testing, clinical trials, pharmacovigilance, role of statutory authorities, pharmacoeconomic data and the role of health professionals.

PHARMACY 754 15 Points
Pharmaceutical Science Research Proposal
A comprehensive critical study of the literature pertaining to the proposed thesis research. This will include a review of the relevant methodologies, the analysis of research results and the relationship of published work to the proposed research.

PHARMACY 760 15 Points
Literature Review in Pharmaceutical Sciences
A thorough investigation of the current literature in a specified area leading to a comprehensive review with the intent of a review publication.
PHARMACY 761 15 Points
Pharmaceutical Science Research Project
Building on the experience gained in PHARMACY 754, a practical research project in a specified field is conducted. An introductory review of the relevant literature, hypothesis, research methodology and findings framed within the current literature will be reported.
Prerequisite: PHARMACY 754

PHARMACY 762 15 Points
Literature Review in Pharmacy Practice
A thorough investigation of the current literature in a specified area of pharmacy practice or pharmacotherapy leading to a comprehensive review with the intent of a review publication.

PHARMACY 763 15 Points
Case Studies in Pharmacy Practice
The investigation and construction of case studies in a current area of pharmacy practice to a quality suitable for submission for publication.

PHARMACY 764 30 Points
Medicines Information and Critical Appraisal
Develops advanced skills in the retrieval, evaluation and dissemination of medicines information, as well as the ability to critically evaluate clinical literature in the context of selected common therapeutic areas.
Restriction: PHARMACY 712

PHARMACY 765 30 Points
Medicines Management and Pharmaceutical Care
Explores the concepts of medicines management and pharmaceutical care planning in the context of selected common therapeutic areas. The course will emphasise the role of the pharmacist in the optimisation of medicines therapy for individual patients.
Prerequisite: PHARMACY 764
Restriction: PHARMACY 712

PHARMACY 766 30 Points
Applied Pharmacotherapy
Explores current pharmacotherapeutics in the context of common disease presentations and special populations (for example the very young and the elderly), allowing for some specialisation in the student’s areas of interest.
Prerequisite: PHARMACY 764, 765

PHARMACY 767 30 Points
Advanced Pharmacotherapy
Explores current pharmacotherapeutics in the context of patients with complex pathologies and complex clinical needs, allowing for some specialisation in the student’s areas of interest.
Prerequisite: PHARMACY 764, 765

PHARMACY 768 30 Points
Innovative Pharmacy Services
Explores the design, implementation and evaluation of novel and innovative pharmacy services in the context of the individual’s practice setting; principles of pharmaceutical management and strategic development of new services.
Prerequisite: PHARMACY 764, 765

PHARMACY 769 30 Points
Principles of Prescribing
Legal and ethical considerations; communication with patients and other health professionals; clinical reasoning and decision-making; physical assessment and diagnostic skills; ‘mechanics’ of prescribing; pharmacoeconomic considerations.

PHARMACY 770 30 Points
Prescribing Practicum
A practicum for prescribing: an experiential placement where the pharmacist develops experience in prescribing under the overarching guidance of a designated medical prescriber.
Prerequisite: PHARMACY 769

PHARMACY 797 120 Points
Research Portfolio
Supervised research that represents the personal scholarly work of a student based on a coherent area of enquiry. Culminates in a conclusive piece of work related to a specific area of specialisation or aspect of practice in health.

Physiology

Stage III

PHYSIOL 399 15 Points
Capstone: Physiology
Advancements in science come through integrating knowledge and excellence in experimental design. Students will integrate and communicate knowledge attained during their physiology degree by developing a research proposal. Working in small groups, and in research group placements will explore scientific knowledge, and experimental design, as well as wider issues such as ethics, health economics, and Māori and Pasifika health advancement.
Prerequisite: 30 points at Stage III in Physiology
Restriction: BIOMED 399, PHARMCOL 399

Promotion practice rests on particular approaches, values and ethical considerations which directly link to a political analysis of deprivation and powerlessness.

**POPLHLTH 204 15 Points**

**Health Care Ethics**

An introduction to healthcare and medical ethics. A theoretical foundation of ethics in addition to the practical ethical issues relevant to healthcare professionals.

**POPLHLTH 206 15 Points**

**Life Cycle Nutrition**

Provides students with a general background and introduction to: the New Zealand diet; food preparation and meal patterns; dietary requirements during pregnancy and lactation, childhood and adolescence, lifestyle changes, maturity and ageing.

**POPLHLTH 207 15 Points**

**Community and Cultural Development**

An introduction to the study of community and cultural development as both philosophical approach and programme of practice for building active and sustainable communities from grassroots. Real world examples of effective practice will demonstrate the interdependence of theory, research and practice in health development. Emphasis is placed on collaboration and participation. **Prerequisite:** POPLHLTH 102

**POPLHLTH 208 15 Points**

**Mental Health Development**

The importance of mental health to overall health and well-being is explored. Major threats to mental health are reviewed, and contemporary responses to mental ill health are placed in historical perspective. Current theory, research and practice related to mental health development, which includes both recovery-based approaches and mental health promotion practice (ie, promotion of well-being) at the community and population levels are reviewed. **Prerequisite:** POPLHLTH 102

**POPLHLTH 210 15 Points**

**Equity and Inequalities in Health**

Investigates the way in which social determinants lead to particular distributions of health in populations. Draws on a social epidemiological approach to explore ways in which inequalities in health (based on factors such as age, gender, ethnicity and socio-economic status) are created, then maintained or eliminated. **Prerequisite:** POPLHLTH 102 **Restriction:** POPLHLTH 201

**POPLHLTH 211 15 Points**

**Introduction to Environmental Health**

Provides students with the concepts and knowledge necessary to understand the influence of the environment on health, and introduces the tools, such as Health Impact Assessment, that can be applied to identify and control environmental hazards.

**POPLHLTH 212 15 Points**

**Bio-behavioural Aspects of Drug Use**

An introduction to the ways drugs exert their effects on the body, why drug dependence (addiction) occurs and what factors may predispose individuals to the development of drug dependence, including the aetiology of drug dependence and ways in which the study of bio-behavioural aspects of drug use has influenced public health interventions to reduce drug dependence.

POPLHLTH 304 15 Points
The application of an epidemiological approach in population health, including study of the principles of epidemiological thinking, epidemiological study design and analyses, and the application of these findings to population health. Modules will be taught through specific themes for example, a life course approach or injury prevention.
Prerequisite: POPLHLTH 111, 202 and 15 points from STATS 101, 102, 108

Stage III

POPLHLTH 300 15 Points
Health Sector Professional Competencies
Develops core skills in areas of project management, financial management, communication, leadership, team development, and cultural competence. An integrated project development approach is used to expose students to the key principles in these areas and to enable them to build a development plan.
Prerequisite: POPLHLTH 204

POPLHLTH 301 15 Points
Strengthening Health Systems
Prerequisite: POPLHLTH 202, 215

POPLHLTH 302 15 Points
Health Services Placement
The placement with a health service organisation provides students with the opportunity for experiential learning and the development of competencies needed in the workplace. Theory and skills learned in previous courses are integrated and extended as students apply prior knowledge to a local health organisation and carry out tasks asked of them.
Prerequisite: HLTHPSYC 122, MAORIHTH 201, POPLHLTH 101, 102, 111, 202, 204, 210, STATS 101

POPLHLTH 303 15 Points
Health Informatics
Students will explore the development and management of information systems in contemporary New Zealand healthcare services. Health informatics concepts, conceptualised in different healthcare settings, are critically reviewed in terms of their practical application.
Prerequisite: POPLHLTH 101, 202

POPLHLTH 304 15 Points
Principles of Applied Epidemiology
The application of an epidemiological approach in population health, including study of the principles of epidemiological thinking, epidemiological study design and analyses, and the application of these findings to population health. Modules will be taught through specific themes for example, a life course approach or injury prevention.
Prerequisite: POPLHLTH 111, 202 and 15 points from STATS 101, 102, 108

POPLHLTH 305 15 Points
Community Nutrition
Provides students with an understanding of the nutritional practices and requirements in different sectors of the New Zealand population. Includes: socio-economic factors related to dietary habits; the health impacts of Māori and Pacific dietary habits; the relationship between diet, health, malnutrition and nutrition-related diseases; and the importance of nutrition education programmes.
Prerequisite: POPLHLTH 111, 206

POPLHLTH 306 15 Points
Health Promotion 2
Builds on the theory and practice in POPLHLTH 203, and examines in depth the relationship between economic and political processes and health status. The course also looks at the most effective strategies to put health promotion theory into practice. Mixed in with this will be an in-depth introduction to some of the emerging issues in health promotion, and a look at some of the specific areas of health promotion practice.
Prerequisite: POPLHLTH 203

POPLHLTH 307 15 Points
Communities and Addictions
Examines how addictions such as tobacco, alcohol, drugs and gambling seriously undermine the health of individuals and the communities in which they live and/or work. Case studies are used to understand the primary elements of community and cultural health development.
Prerequisite: 30 points at Stage II in Population Health

POPLHLTH 310 15 Points
Special Topic

POPLHLTH 311 15 Points
Shaping Health Policy
Investigates recent changes to the ways in which governments seek to intervene to improve a population's health. NZ case studies will be used to illustrate the interrelationships between research, policy and practice in a devolved health system and the changing relationships between government agencies and health providers.
Prerequisite: POPLHLTH 202

POPLHLTH 312 15 Points
Health and Pacific People in NZ
An overview of the major health issues facing Pacific peoples, including analysis of the key determinants of health status, focusing on approaches to improving health for Pacific peoples through research, policy, public health programmes and health services. A critique of dominant paradigms of health and well-being in relation to Pacific communities in Aotearoa New Zealand is included with consideration of their effect on health outcomes.
Prerequisite: POPLHLTH 210
Restriction: POPLHLTH 201

POPLHLTH 313 15 Points
Health in Asian Communities
An overview of Asian health issues, including the biological, ecological cultural, economic social and psychological factors that determine health for Asian New Zealanders is provided. Current practice, policy development and research priorities for Asian communities are included.
Prerequisite: POPLHLTH 210

POPLHLTH 315 15 Points
Special Topic
POPLHLTH 316 15 Points
Translating Health Information
To lead to improvements in health, information needs to be translated appropriately to influence decision makers. Builds the skills and knowledge to be able to both critique and synthesise existing health information as well as to apply analytical methods and presentation approaches to data in order to effectively communicate findings to different decision-making communities. 
Prerequisite: POPLHLTH 202

Postgraduate 700 Level Courses

POPLHLTH 700 15 Points
Community Health Development
Provides a comprehensive overview of the principles, theories, and frameworks for undertaking community-level health development. Special emphasis on empowering and critical perspectives and the implications for health and determinants at a community-level of focus. Informed by current research and a comparative case study approach, the paper examines the opportunities and challenges in the delivery of health for, and by, diverse communities in New Zealand and globally.
Corequisite: POPLHLTH 722

POPLHLTH 701 15 Points
Research Methods in Health
A comprehensive overview, in relation to health, of theoretical underpinnings of research; the asking of research questions; literature reviews; the design, implementation and appraisal of qualitative and quantitative research; and the writing up and dissemination of research.
Restriction: CLINED 7TH, NURSING 768, POPLHLTH 202

POPLHLTH 704 15 Points
Undertaking Qualitative Health Research
Provides practical experience in the appraisal and use of qualitative methods in research in health. The development of studies from research questions through design, conduct, and analysis and interpretation of such studies are examined in detail. Students are required to prepare a portfolio examining the use of a specific methodological approach in qualitative health research.

POPLHLTH 705 15 Points
Evaluation Research Methods
Provides a comprehensive outline of the nature of programme evaluation in the health sector and an overview of a variety of approaches to programme evaluation and the appropriate use of research tools. Includes logic models, stakeholder analysis, the development of objectives, indicators, client surveys and interviews. Emphasis on mixed methods evaluation designs involving qualitative and quantitative data gathering.

POPLHLTH 706 15 Points
Statistics in Health Science
Provides an overview of statistics and statistical methods for health scientists. Covers a range of methods and tests, including regression.

POPLHLTH 707 15 Points
Statistics in Health Science 2
Develops and builds on elementary statistical methods and prepares the student for advanced epidemiological and statistical analysis.
Prerequisite: POPLHLTH 706

POPLHLTH 708 15 Points
Epidemiology
Examines epidemiological study design, measures of effect, screening, appropriate statistics for epidemiology, with a focus on public health epidemiology.

POPLHLTH 709 15 Points
Evidence for Best Practice
Evidence based practice uses epidemiological data derived from valid and clinically relevant research. This includes the accuracy of diagnostic tests, the power of prognostic markers and the efficacy and safety of therapeutic, rehabilitative or preventive interventions. This evidence is integrated with relevant contextual evidence such as patient and practitioner values, social, cultural and economic considerations to inform best practice.

POPLHLTH 711 15 Points
Systematic Reviews and Meta-analysis
The principles and critical appraisal of interventional systematic reviews and meta-analysis and their role in evidence-based practice. Topics include: protocol development, question formulation, identification of evidence, selection of studies for inclusion, appraisal and quality of included studies, extraction and recording of data, synthesis (meta-analysis) and interpretation of results and application.
Prerequisite: POPLHLTH 708 or 709 or equivalent experience

POPLHLTH 712 15 Points
Clinical Trial Design, Analysis and Management
An exploration of methodological and practical aspects of clinical trial design, analysis and management. Participants will develop skills in designing and conducting randomised controlled trials.
Prerequisite: POPLHLTH 708 or 709 or equivalent experience

POPLHLTH 715 15 Points
Global Public Health
Explores global health from a public health perspective, with a strong emphasis on health and its determinants in developing countries. Topics covered include the global burden of risk and disease, global environmental challenges to health, international health governance, international healthcare financing and international health promotion.

POPLHLTH 717 15 Points
Health and Society
An exploration of health within a social context. Examines the relationships between social factors, their impact on health, and the ways in which these relationships inform our understanding of health and help direct healthcare provision and practitioner values, social, cultural and economic considerations to inform best practice.

POPLHLTH 718 15 Points
Health and Public Policy
A discussion of policy studies frameworks, and how these can be used to analyse policy issues and processes relevant to health and healthcare.

POPLHLTH 719 15 Points
Health Economics
Fundamental economic concepts and their application to healthcare. Provides students with some analytical skills with which to address issues and problems in the funding and organisation of health services.

POPLHLTH 720 15 Points
Cost Effectiveness Evaluation
The application of economic methods to the evaluation of health services and programmes. The principles
and techniques of economic evaluation, the process of measuring costs and benefits of health services, quality of life measurement.

**POPLHLTH 722 15 Points**

**Organisation of Health Systems**

The principles, structure, financing and organisation of health systems. Current issues and challenges facing health systems from a national and international perspective.

**POPLHLTH 724 15 Points**

**Quality in Health Care**

Quality healthcare is examined with an emphasis on strategies that enable individuals, teams, and services within healthcare organisations to implement and sustain performance improvement. Allows students to explore the quality principles to an area of their own choice.

*Restriction: NURSING 775*

**POPLHLTH 725 15 Points**

**Environmental Health**

Explores ways in which the environment affects human health. Studies links between industrial and agricultural development, environmental change and public health at local, national and global levels. Topics include the role of policies, legislation and public health actions in reducing environmental health risks.

**POPLHLTH 726 15 Points**

**Health Protection**

Current issues will be used to illustrate principles of health protection as an element of public health at local and national levels. The main inter-related topic areas within health protection (communicable disease control and surveillance; non-communicable disease control; food safety; alcohol and tobacco; air and water quality) will be discussed, along with identification of health hazards, development of prevention strategies, and field implementation methods.

**POPLHLTH 727 15 Points**

**Population Youth Health**

Youth injury prevention, resiliency factors and reproductive issues, and advocacy for young people. How do you make a difference in youth health? This course introduces key concepts in population youth health and utilises an evidence based approach and New Zealand practice examples to consider how youth health can be improved in communities and populations.

**POPLHLTH 733 15 Points**

**Health Promotion Theory and Models**

Examines the values, theories and practice models of health promotion and in particular, an approach to the social determinants of health and health equity that seeks to empower individuals and groups to deal with these issues.

**POPLHLTH 734 15 Points**

**Health Promotion Strategies**

An overview of key strategies designed to promote health, with an emphasis on healthy public policy, partnerships, community action and advocacy and ways to link local, national and global actions. Practical and creative approaches to health promotion planning are explored through case studies, invited practitioners and the development of a group project with outcomes of empowerment and health gain.

**POPLHLTH 735 15 Points**

**Mental Health Development: Theory and Principles**

Mental Health Development (MHD) represents an emergent paradigm in the mental health sector, one which emphasises strengths, resilience and positive quality of life. It is applicable to all people, including those with mental illness, and to all aspects of mental health and social services. The course has a particular focus on the treatment and recovery for individuals affected by mental health problems.

**POPLHLTH 736 15 Points**

**Mental Health Promotion**

Examines the central role that positive mental health and well-being plays in the health of populations. It focuses on understanding the determinants of mental health and the processes by which these determinants affect mental health. The theory and application of mental health promotion practice, encompassing strategies for action at the societal, community and individual level, are discussed.

**POPLHLTH 737 15 Points**

**Alcohol, Tobacco and Other Drug Studies**

Provides an introduction and overview to studies on alcohol and other drugs. Incorporates theory and research developed within public health, mental health, and specialised treatment frameworks. Topics will include: coverage of historical developments, a review of major theoretical issues and an overview of current trends.

**POPLHLTH 738 15 Points**

**Biology of Addiction**

Explores the genetic and neurobiological factors that predispose individuals to develop addiction. The neuropharmacology of the main drugs of abuse and factors that are responsible for the variability in drug response (ie pharmacokinetics) will be presented. Current neurobiological models of addiction will be considered.

**POPLHLTH 739 15 Points**

**Pacific Health**

Examines a wide range of health issues related to Pacific health. Provides an in-depth analysis with evidence of the global, regional and local issues that determines the health of the Pacific population both in the Pacific region and in New Zealand.

**POPLHLTH 740 15 Points**

**Ethics, Culture and Societal Approaches to Death**

Approaches to death by Māori and other cultures. Resource and legal issues in the New Zealand context. Ethical issues: euthanasia versus palliative care, privacy, living wills and end of life medical decision-making; particularly treatment abatement. Duties after death, the nature of teamwork, the multidisciplinary nature of palliative care, the role of volunteers, emotional self care for palliative care providers, and home versus residential care.

**POPLHLTH 750 15 Points**

**Research Project in Population Health**

**POPLHLTH 751 15 Points**

**Special Studies**

**POPLHLTH 752 15 Points**

**Case Studies in Global Health**

Provides the opportunity to develop critical awareness and practical engagement with a public health issue or issues facing people in the Asia Pacific region. The public health issues facing the region are broad and complex and require a region and country-specific response. Students will develop
an understanding of the key health challenges, and the range
of possible responses to improve health in the country and
wider region.

POPLHLTH 753 15 Points
Tobacco Control: Principles and Practices
An overview of research and theory developed within
public health and epidemiological contexts related to
tobacco control. Major theoretical issues, current trends
and challenges to Tobacco Control are considered. Topics
covered relate to four themes: (1) reducing initiation, (2)
reducing smoking-related harm, (3) smoking cessation and
(4) the new goal for New Zealand to be smoke-free by 2025.

POPLHLTH 755 60 Points
POPLHLTH 755A 30 Points
POPLHLTH 755B 30 Points

Applied Research Project
Provides a supervised learning experience for students in
their place of work in the health sector. Students must
undertake project work and write a report documenting
the work undertaken, the results arising, and the learning
obtained.

To complete this course students must enrol in POPLHLTH 755 A
and B, or POPLHLTH 755

POPLHLTH 758 15 Points
Theoretical Concepts of Health
A number of theoretical explanations of public health are
considered in order to address health issues in diverse
communities. An ecological perspective of health will be
critiqued.

POPLHLTH 760 15 Points
Principles of Public Health
Consideration of the principles underlying the modern
practice of public health. Students examine the major core
concepts in public health, including determinants of health,
health equity, environments and health, health promotion
and health systems.

POPLHLTH 761 15 Points
Special Topic: Women, Gender and Health
Examines gender as a social determinant of health and
explores the links between inequality, social structures and
women's health. Covers critical theories of women's health
drawing on feminism, sociology, law and politics, human
rights and cultural studies. Violence, HIV/AIDS, disability,
abortion, new reproductive technologies, infertility, NCDs,
occupational health, migrant health, and the role of men
are analysed using gender frameworks.

POPLHLTH 762 15 Points
Advanced Qualitative Health Research
Applies skills and knowledge in qualitative research to data
management and the examination of specific methodological
approaches used in qualitative health research. Students
will prepare a portfolio examining the use of a specific
methodological approach in qualitative health research,
and demonstrate a grasp of appropriate skills related to
data management in qualitative research.
Corequisite: POPLHLTH 704 or approved equivalent

POPLHLTH 763 15 Points
Human Vaccinology
Provides an examination of vaccinology as applied to
humans and its application in the health sector. Includes
consideration of immunology, vaccine form and function
and vaccine design; through to vaccine development and
manufacture, vaccine safety, immunisation controversies,
policy and schedule. A core theme throughout the course
will be communication of vaccine science including risk
communication to different audiences including health
professionals and the community.

Restriction: POPLPRAC 755

POPLHLTH 764 15 Points
Special Topic: The Health and Wellbeing of Pacific Youth
Addresses critical issues for youth in the Pacific region.
Provides a sociocultural examination of strengths based
models and youth development theories in light of the
complexities around multiple identities, spirituality,
poverty, education, employment, urbanisation, social media
and marketing and the impact these factors have upon
health outcomes for Pacific youth, their families and their
communities.

POPLHLTH 765 15 Points
Nutrition Interventions in Public Health
Explores the use of community-based nutrition interventions
to reduce nutrition-related health inequalities, and focuses
on the use of appropriate theories to understand the
nutrition issue; the use of data and research in the design
of evidence based nutrition interventions; and the design
of rigorous evaluation plans to determine the effectiveness
of the intervention.

POPLHLTH 766 15 Points
Special Topic

POPLHLTH 767 15 Points
Health Services Research Methods
Focuses on teaching the knowledge and practical skills
to conduct health services research. The course follows
through the typical research process drawing on a range
of different methodologies and methods, both quantitative
and qualitative, to develop and answer research questions
relating to the accessibility, quality and cost of health care
and the improvement of health outcomes.
Restriction: POPLHLTH 702

POPLHLTH 768 15 Points
Special Studies in Addiction and Mental Health

POPLHLTH 769 30 Points
Interpersonal and Family Violence
Explores the magnitude and consequences of the problem
of, and contributing factors to, interpersonal and family
violence. Examines some of the major violence prevention
and intervention activities currently undertaken in New
Zealand. Considers how effective practices and policies
might be disseminated at the individual, community,
and national levels. Themes include: the epidemiology of
violence, causes of violence, developing and evaluating
interventions, and violence as a health issue.
Restriction: SOCHLTH 751

POPLHLTH 773 15 Points
Pharmacotherapeutic Responses to Addiction
Provides an advanced overview of the pharmacological
management of alcohol and drug problems, including
overdose and withdrawal from alcohol, sedatives,
opiods, cannabis and stimulants as well as the long term management of dependence on opioids, tobacco, and alcohol. Management within special groups and conditions (youth, pregnancy, co-existing) will be covered.

**POPLHLTH 774 15 Points**

**Addictive Consumptions and Public Health**

Focuses on the extensive health impacts of addictive consumptions, particularly in relation to the legalised consumptions of tobacco, alcohol and gambling. Outlines applications of public health principles to reducing harm from these consumptions. Critically examines the role of corporate industrial complexes in promoting these consumptions and in preventing policy and legislative reforms.

**Population Health Practice**

**Postgraduate 700 Level Courses**

**POPLPRAC 702 15 Points**

**Adult Mental Health and CBT Skills for Primary Care**

A clinically focused course providing an overview of the recognition and management of adult mental health in primary care and other healthcare settings. Topics and content will enable an examination of mental illness in New Zealand including cultural approaches and epidemiology, assessment, identification, treatment and management options. Content covers high prevalence conditions (depression, anxiety) and long term conditions (bipolar disorder and schizophrenia). Topics will include recovery, resilience, CBT techniques and the effect of alcohol and drugs.

**POPLPRAC 707 15 Points**

**Theory and Skills in Counselling Practice**

The theory, research and practice regarding counselling and psycho-therapeutic approaches used in mental health and addiction service contexts. Approaches will be critically examined in terms of history, theory, social context and trends in research. Particular attention will focus on counselling methods currently in use within services.

**POPLPRAC 708A**

**POPLPRAC 708B**

**Assessment and Intervention with Addiction**

Develops understanding and competency in assessment and intervention work with clients having co-existing problems, specifically those most affected by alcohol and drug issues. It focuses on comprehensive assessment, effective clinical interventions, drug-specific interventions and culturally-specific approaches working with individuals, whānau, and communities. It will involve regular review of practice using case-based scenarios filmed with feedback from tutors, mentors and peers.

*Corequisite: POPLHLTH 737, POPLPRAC 707*

To complete this course students must enrol in POPLPRAC 708 A and B

**POPLPRAC 710 15 Points**

**Community Health Development Practicum**

Theoretical and practical principles of health promotion processes, combined with practical experience, in the context of relevant organisations, community groups and research projects. Students are expected to find their own placement for the practicum.

**POPLPRAC 711 15 Points**

**Health Promotion in Pacific Community Development**

Allows supervised experience for students in a Pacific-specific service. A course of study relevant to the area of placement will be prescribed.

**POPLPRAC 712 15 Points**

**Project Planning for Lifestyle Change**

Focuses on the planning and development of interventions aimed at addressing lifestyle issues such as alcohol and other dangerous consumptions, obesity, lack of exercise and mental trauma. Students synthesise strategies from published literature and adapt them pragmatically for application in local contexts. Interventions will include those occurring in communities, primary and mental healthcare settings, hospitals, workplaces, and educational institutions.

**POPLPRAC 715 30 Points**

**POPLPRAC 715A 15 Points**

**POPLPRAC 715B 15 Points**

**Practicum in Population Health**

Learning of advanced knowledge and skills, and supervised experience within an area of Population Health.

POPLPRAC 716 15 Points
Practicum in Pacific Health
Supervised experience for students in a Pacific-specific health environment. A course of study relevant to the area of placement will be provided.

POPLPRAC 720 15 Points
Psychosocial Issues in Palliative Care
The psychological and social study of patients with cancer or active, progressive disease, unresponsive to curative treatment. Existential philosophy and models of coping with suffering, communication in palliative care, psychiatric disorders in palliative care, and bereavement.

POPLPRAC 722 15 Points
Symptom Management in Palliative Care
Assessment and management of pain, nausea and vomiting, respiratory symptoms, delirium, and other symptoms commonly encountered in palliative care and at the end of life, together with an overview of palliative care emergencies, the role of radiotherapy in symptom management, and issues around nutrition and hydration at the end of life.

POPLPRAC 723 15 Points
Advanced Symptom Management in Palliative Care
Advanced concepts in the assessment and management of symptoms and situations, including the more challenging ones encountered within the palliative care approach to malignant and non-malignant advanced diseases.
Prerequisite: POPLPRAC 722

POPLPRAC 724 15 Points
Child and Adolescent Palliative Care
An examination of specific palliative care issues related to the care of children, adolescents, and their families.

POPLPRAC 739 15 Points
Urgent Primary Medical Care
Assessment and management of a broad range of acute conditions and related issues including: chest pain, dyspnoea, collapse, coma, anaphylaxis, diabetes, toxicology, psychiatry and environmental conditions.

POPLPRAC 740 15 Points
Urgent Primary Surgical Care
Assessment and management of acute surgical and subspecialty conditions and related issues including: trauma, head injury, abdominal pain, ophthalmology, ENT, gynaecology, pregnancy, and genito-urinary conditions.

POPLPRAC 743 15 Points
Upper Limb and Spine
The management of acute and chronic sporting injuries of the upper limb and spine including: initial management, surgical intervention, and rehabilitation.

POPLPRAC 744 15 Points
Lower Limb and Physiotherapy
The management of acute and chronic sporting injuries of the lower limb including: initial management, surgical intervention, and rehabilitation. Physiotherapy principles in relation to diagnosis, management and rehabilitation are covered.

POPLPRAC 745 15 Points
Sports Medicine in the Community
The role of the doctor and physiotherapist in community settings including: their role in team sports, community sports event medical cover, environmental medicine, exercise for health, exercise physiology and sports psychology.

POPLPRAC 746 15 Points
Medical Issues in Sport
Management of medical conditions in sports people and the interaction of exercise and medical conditions, including diabetes, asthma and infections. Other topics covered include: pain management, immunology, rheumatology, ENT, the female athlete, haematology, pharmacology and drugs in sport.

POPLPRAC 753 15 Points
Special Studies

POPLPRAC 754 15 Points
Infant, Child and Adolescent Primary Mental Health
Provides an overview of the recognition and primary care management of mental health in the under-eighteen age group. A clinically focused course for primary care practitioners. The content covers attachment, early intervention, development, risk assessment, resilience and families. Topics include depression, anxiety disorders, substance use, eating disorders, first episode psychosis, pain, somatic presentations, disruptive behaviour disorders and common behavioural problems.

POPLPRAC 755 15 Points
Special Topic

POPLPRAC 756 30 Points
Adult Rehabilitation Studies
Focuses on the rehabilitation of adults with an acquired or traumatic condition; including an in-depth exploration of the philosophy of rehabilitation interwoven with the development of clinical rehabilitation skills. The concepts addressed in rehabilitation reflect the eclectic nature of the discipline.
Restriction: POPLPRAC 728

POPLPRAC 757 15 Points
Special Topic

POPLPRAC 758 30 Points
Biology of Ageing
The systematic analysis of the physiological changes in ageing and the relationship of these changes to current beliefs and theories around the ageing process. Current issues around biogerontology are discussed.
Restriction: POPLHLTH 749

POPLPRAC 760 30 Points
Clinical Leadership in Residential Care
Provides a broad framework for understanding and developing clinical leadership in the residential care environment. The review and critical evaluation of evidence-based practice in this setting will include models of service delivery and extending the knowledge and role of advocacy. Quality of care will be explored through a review of the legislation and regulation governing this sector, critical evaluation of staffing models and a review of the evidence of evaluation measures.
Restriction: POPLHLTH 759

POPLPRAC 761 30 Points
Mental Health in Old Age
Explores mental health in old age, including positive mental health and the range of mental health challenges facing older adults. There will be a focus on mental health issues and care across the health continuum, including primary care, specialist mental health services, and aged care services.
Restriction: NURSING 747, POPLPRAC 727

**Early Childhood Mental Health**

Focuses on the identification, assessment and treatment of early emotional and behavioural problems and their link to the child’s family and preschool environments.

**Prerequisite:** PSYCHIAT 740, 747, 768, or equivalent

**Restriction:** POSTGRAD 771, 772

To complete this course students must enrol in POSTGRAD 730 A and B, or POSTGRAD 730
to increase student knowledge of academic integrity, university rules relating to academic conduct, and the identification and consequences of academic misconduct. Students work through a series of modules, outlining scenarios that they may encounter while studying at university. Each scenario provides information on relevant rules, resources and expected behaviour.

**Bioinformatics**

### Postgraduate 700 Level Courses

**BIOINF 701**

**Bioinformatics**

An overview of the methods and applications of bioinformatics with specific reference to: internet-accessible database technology, database mining, applications for gene and protein sequence analysis, phylogenetic analyses, three-dimensional protein prediction methods, and genome sequence analysis.

Prerequisite: 30 points from Stage II in Biological Sciences

Restriction: BIOINF 301, BIOSCI 359, 742

**BIOINF 702**

**Comparative Bioinformatics**

Much knowledge of biological systems is acquired by making comparisons with known systems. Several computational methods, including Markov models, HMMs and dynamic programming can be used in making these comparisons. Technical aspects of these methods and their application to biological problems will be discussed. A sound understanding of BIOSCI 359 or BIOINF 301 or equivalent is assumed. Students lacking this background must take BIOINF 701 as a corequisite.

**BIOINF 703**

**Genome Bioinformatics and Systems Biology**

Advances in genetic sequencing technologies are rapidly changing our ability to determine the genome sequence and to explore the gene expression profiles of organisms. Relevant computational methods, including graph theory, string comparison and pattern matching, will be discussed, along with their application to genome assembly, metagenomics, gene-gene interaction and systems biology.

Prerequisite: BIOINF 701 or equivalent

**BIOINF 704**

**Statistical Bioinformatics**

The concepts and statistical tools involved in genome-wide association studies (GWAS), whereby genomic regions responsible for certain diseases are identified from the analysis of large amounts of genetic data. Methods for the analysis of gene expression data are also described.

**BIOINF 789A**

**BIOINF 789B**

**Project in Bioinformatics**

Prerequisite: COMPSCI 220 and approval of Programme Director

Restriction: COMPSCI 789, STATS 789

Biological Sciences

Foundation Courses

BIOSCI 94F 15 Points
Foundation Biology 1
An introduction to biological sciences with an emphasis on organism diversity, which includes bacteria, plants, fungi and animals. Fundamentals of classification, ecology and evolution are introduced and the study of a current topic in biology is used to develop research and critical thinking skills. Practical classes are both laboratory-based and field-based.
Restriction: BIOSCI 92F, 92P, 94P

BIOSCI 95F 15 Points
Foundation Biology 2
Concepts introduced in BIOSCI 94F are further developed with an emphasis on the structures and processes of living things at cellular and molecular levels. Cell biology, genetic principles and biochemistry are explored and further developed in a human biological context. Laboratories focus on students developing key practical skills.
Prerequisite: BIOSCI 94F
Restriction: BIOSCI 91F, 91P, 95P

Preparatory Courses

BIOSCI 94P 15 Points
Preparatory Biology 1
An introduction to unity in biological sciences with an emphasis on organism diversity, which includes bacteria, plants, fungi and animals. Fundamentals of classification, ecology and evolution are introduced and the study of a current topic in biology is used to develop research and critical thinking skills. Practical classes are both laboratory-based and field-based.
Restriction: BIOSCI 92F, 92P, 92P

BIOSCI 95P 15 Points
Preparatory Biology 2
Concepts introduced in BIOSCI 94P are further developed with an emphasis on the structures and processes of living things at cellular and molecular levels. Cell biology, genetic principles, biochemistry and human biology are explored using multi-media learning tools in lectures and laboratory, which complement and reinforce the material taught.
Prerequisite: BIOSCI 94P
Restriction: BIOSCI 91F, 91P, 95P

Stage I

BIOSCI 100 15 Points
BIOSCI 100G 15 Points
Antarctica: The Frozen Continent
A general introduction to Antarctica and its environs including the Southern Ocean and the sub-Antarctic islands. Emphasis will be placed on the evolution of Antarctica and how resident plants, animals and micro-organisms have adapted to cope with the extreme environment. Specific topics to be addressed include: the history of Antarctic exploration and its impact on the development of Antarctic science, Antarctic ecosystems, Antarctica as a wilderness region, and the impact of humans including the exploitation of resources and the effects of pollution. This course is suitable for students with both science and non-science backgrounds.

BIOSCI 101 15 Points
Life! Origins and Mechanisms
Questions what Life is and explores its machinery. Speculates on how Life arose from the flow and capture of solar energy, to power growth, movement, replication and storage of generic information. Then, describes how genes interact with environments, and how mutations can be catastrophic or transformational. These processes underpin life as we know it.

BIOSCI 106 15 Points
Foundations of Biochemistry
An introduction to the core elements of biochemistry, investigating biological processes at the chemical and molecular level. Key themes include the molecular structure of proteins, enzyme kinetics, biochemical energetics, carbohydrate and lipid metabolism, nutrition, cell signalling, vision and aspects of plant biochemistry including world food production. These themes provide a framework for discussion of mechanisms underpinning human disease including diabetes and obesity, antibiotic resistance, drug development and plant medicinals.

BIOSCI 107 15 Points
Biology for Biomedical Science: Cellular Processes
The cellular basis of mammalian form and function. Particular emphasis will be placed on cellular components and processes of blood, neural, muscular, reproductive, immune and supporting systems and how they contribute to the structure and function of the body as a whole.

BIOSCI 108 15 Points
Biodiversity: Patterns of Life
Knowledge of biodiversity is fundamental to understanding our world. Students will become familiar with biological diversity and whakapapa beginning with viruses and leading through to microbes, plants, fungi and animals. Defining characteristics of major organismal groupings will be highlighted so as to provide students with an overview of the diversity of life on Earth, and the critical role that maintaining biodiversity has for kaitiakitanga and the future.

BIOSCI 109 15 Points
Ecology and Evolution: The Continuum of Life
Life is hard, thus responding to variation in biotic and abiotic variables is crucial for survival at all levels of biological hierarchy. Ko ahau te taiao, ko te taiao, ko ahau (I am the land, and the land is me) – the ecosystem defines quality of life. Develops an understanding of the evolutionary mechanisms through which life has evolved to cope with change over time, and the ecological mechanisms that determine the distribution and abundance of organisms today; how populations and communities adapted to change in the past, how they respond to environmental challenges today, and how they are likely to respond to change in the future as the climate changes.
Restriction: BIOSCI 104

Stage II

BIOSCI 201 15 Points
Cellular and Molecular Biology
The fundamental processes of the cell are examined to understand how cells reproduce and use information stored within the genome, express proteins for specific functions, and function within larger tissues. Specific modules examine stem cells, tissues and cellular development, cancer
progression and the biology of tumours and the basis of immunity.
Prerequisite: BIOSCI 101, and 30 points from BIOSCI 102-107, MEDSCI 142, and 15 points from CHEM 110, 120, 150

**BIOSCI 202**
**Genetics**
The basic principles of mutation, recombination and genetic mapping are established in this course. These principles are developed in a variety of prokaryotic and eukaryotic organisms. Laboratory work uses molecular, microbial and eukaryotic material to explore the key features of heredity.
Prerequisite: 30 points from Stage I Biological Sciences including BIOSCI 101

**BIOSCI 203**
**Biochemistry**
Presents core areas of modern biochemistry. Emphasis is on macromolecular structure and function. Areas covered include protein structure, oxygen and carbon dioxide transport in humans and other species, metabolism in mammals, proteases and human disease, cholesterol metabolism and transport and signal transduction.
Prerequisite: BIOSCI 101, 106 and 15 points from CHEM 110, 120

**BIOSCI 204**
**Principles of Microbiology**
An introduction to the diversity, physiology and functions of microorganisms (prokaryotes, eukaryotes, viruses) as individuals and as communities. The fundamental roles of microorganisms in ecosystems, health and disease are considered alongside methods for their isolation and study. Microbial applications in biotechnology, food production, agriculture and industry are also discussed.
Prerequisite: BIOSCI 101 and at least 15 points from BIOSCI 102, 106, 107

**BIOSCI 205**
**Plant, Cell and Environment**
Unlike animals, plants cannot move to respond to changes in their environment. Plants have evolved diverse signaling systems and the ability to grow towards their essential resources. Explores the intricate ways plants function, how they are able to respond to developmental and environmental signals at the whole plant and cellular level.
Prerequisite: BIOSCI 101 and 15 points from BIOSCI 102, 104, 106, 107

**BIOSCI 206**
**Principles of Ecology**
An examination of ecosystem processes, factors that affect distribution and interactions of organisms, population ecology, and applications of ecology such as restoration and conservation. The key principles of ecology are taught in a New Zealand context emphasising an experimental approach.
Prerequisite: BIOSCI 101, 104 and 15 points from either STATS 101 or 108

**BIOSCI 207**
**Adaptive Form and Function**
Biological adaptations of animals, including behaviour, morphology, physiology and life history. Topics covered include how animals navigate, physiological adaptations, behavioural ecology, animal reproduction and anti-predator defences.
Prerequisite: BIOSCI 101 and 15 points from BIOSCI 102-104, 106, 107

**BIOSCI 208**
**Invertebrate Diversity**
Invertebrates make up over 95 percent of animal species. This course explores the biology of invertebrates with an emphasis on structure, function, life histories, behaviour and ecology. Invertebrate diversity is examined in a variety of environments, using New Zealand examples where possible, and provides the basis for advanced courses in conservation and marine ecology.
Prerequisite: BIOSCI 101, 103

**BIOSCI 209**
**Biometry**
An introduction to statistical methods for biological and environmental scientists. Students will learn how to carry out various statistical analyses using computer packages, as well as how to interpret and communicate the results. The topics covered include: experimental design and sampling, regression and analysis of variance models, analysing frequencies and counts, and basic multivariate techniques commonly used in biology.
Prerequisite: 15 points in either STATS 101 or 108 and 30 points from Biological Sciences, Environmental Sciences or Geography
Restriction: STAT 201, 207, 208

**BIOSCI 210**
**Evolution and the Biological Origin of Life**
Covers basic concepts in evolutionary biology including Darwin and the theory of evolution by natural selection, phylogenetics, population genetics, molecular evolution, speciation and extinction. The extent to which Darwin’s theory of evolution by natural selection can explain the origins of biological complexity is explored.
Prerequisite: BIOSCI 101 and 15 points from BIOSCI 102, 103, 104, 106, 107

**BIOSCI 220**
**Quantitative Biology**
Almost every biological discipline will require computational and analytical skills beyond using point-and-click software to enable the processing of biological data into biological information. Students will learn fundamentals of experimental design, data management, and data visualisation. Additionally, students will gain the skills required to critically analyse and interpret biological experiments, understanding how statistics can be both used and misused in the scientific literature. Recommended preparation: STATS 101
Prerequisite: BIOSCI 101

**Stage III**

**BIOSCI 320**
**Pure and Applied Entomology**
An introduction to the systematics of insects describing the characters that define the major lineages, discussion of the role insects play in different ecological systems, and insect anatomy, physiology, and genetics. Their impact on agriculture and as disease vectors is discussed with descriptions of various control methods for insect pests and how these methods are integrated. Students wishing to complete a course in plant protection should take both BIOSCI 320 and 321.
Prerequisite: BIOSCI 103 and 15 points from Stage II Biological Sciences courses

**BIOSCI 321**
**Plant Pathology**
Micro-organisms are of major importance to agriculture. This course will examine the biology of plant pathogens,
Plant-microbial interactions at the cellular and sub-cellular level, and the epidemiology and control of plant diseases. Practicals will focus on techniques for isolation, culture, identification and study of plant pathogens.

Prerequisite: 15 points from BIOSCI 204, 205

BIOSCI 322 15 Points
Evolution of Genes, Populations and Species
Advanced concepts in evolutionary biology and their application to current research in molecular evolution, population genetics, phylogenetics and organismal evolution. Examples from animals, plants and microbes, as well as topical issues, including speciation, adaptation, co-evolution, sexual selection, conservation, biogeography, genomics, biotechnology and human disease. Recommended preparation: Prior or concurrent enrolment in BIOSCI 202.

Prerequisite: BIOSCI 210

BIOSCI 323 15 Points
Plant Diversity
An introduction to plant systematics, plant reproductive strategies, and the evolution of plants with a comprehensive survey of the characteristics and distributions of the major plant groups. Coverage will also include classical and phylogenetic approaches to plant identification, and applications of systematics. Practical work will focus on tools for identifying plants, introduction to plant diversity in the lab and field, and development of a herbarium collection.

Prerequisite: BIOSCI 102 or 104 and 30 points at Stage II in Biological Sciences, Environmental Science or Geography

BIOSCI 324 15 Points
Plant Pathology and Symbiosis
Microorganisms and pests form symbioses with plants that are critically important for horticulture and agriculture. This course examines the biology of plant pathogens, pests, and symbionts. It focuses on plant-microbe interactions at the cellular and molecular level, the epidemiology and control of plant diseases, and the mechanisms through which these interactions are mediated.

Prerequisite: BIOSCI 204, 205
Restriction: BIOSCI 321

BIOSCI 325 15 Points
Plant Diversity and Function
Plants form the basis of ecosystem food chains and are fundamental to life on Earth. The diversity in land plants from both phylogenetic and functional trait perspectives will be presented, exploring key steps in the evolution of plants and how they interact with their environment. It provides a framework of plant life focussing on the ecologically, economically and culturally important plants of Aotearoa New Zealand.

Prerequisite: BIOSCI 205
Restriction: BIOSCI 323

BIOSCI 326 15 Points
Plant Biotechnology for Crops and Health
Plants are vital sources of food, health compounds and shelter. Students will learn how biotechnology is used to understand plant biology and discuss strategies for crop improvement. Topics include plant genomics, molecular breeding, genome editing, gene transfer, the regulatory framework and examples of applications in the food, health, environment and crop sectors.

Prerequisite: 15 points from BIOSCI 201, 205
Restriction: BIOSCI 340

BIOSCI 328 15 Points
Fisheries and Aquaculture
Harvest and capture of aquatic organisms and inter-relationships with aquaculture. Fisheries and aquaculture are treated not as distinct disciplines but in the context of integrating exploitation and sustainable environmental integrity. Case studies include deep sea and coastal fisheries, and shellfish culture.

Prerequisite: BIOSCI 207 or 208

BIOSCI 329 15 Points
Biology of Fish
A comprehensive coverage of the biology of fish including their evolution, diversity and organism biology. Coverage includes habitats of particular interest to New Zealand such as Antarctica, the deep sea, coral and temperate reefs, and New Zealand’s lakes and rivers.

Prerequisite: 15 points from BIOSCI 207, 208

BIOSCI 333 15 Points
Marine Ecology
Patterns and processes in marine ecology and biodiversity are described; including animal and plant interactions, benthic and pelagic habitats, biogeography, productivity and physiology. Applied aspects include resources such as fisheries and aquaculture, survey methods, and pollution. Other lectures cover nutritional and chemical ecology and invertebrate reproduction.

Prerequisite: BIOSCI 206, or 104 and 15 points from BIOSCI 205, or 207 or 208 and STATS 101 or 108

BIOSCI 334 15 Points
Biology of Marine Organisms
Not only is the earth predominantly oceanic, but higher marine biodiversity occurs on the shallower continental shelf/coastal areas. Students will learn the key groups of marine organisms within New Zealand’s waters. Attention will be given to understanding their diversity, distribution and adaptations to thrive within the dynamic marine environment.

Prerequisite: BIOSCI 108, 109 and 15 points from BIOSCI 206, 207, 208

BIOSCI 335 15 Points
Ecological Physiology
Focuses on the strategies used by animals to cope with physical and biological challenges in the environment. Accordingly, we work at the level of the individual and the interface between physiological, biochemical or molecular approaches on the one hand, and ecology on the other. The adaptive strategies employed by a range of species, with an emphasis on aquatic organisms, in response to physical factors such as temperature, oxygen and food availability, are considered. Energetics and nutrition are emphasised. The course aims to meet the needs of students with ecological interests wishing to recognise the experimental approach to solving problems in environmental biology. The practical work is project oriented rather than laboratory based.

Prerequisite: 15 points from BIOSCI 207, 208

BIOSCI 337 15 Points
Animal Behaviour
Proximate and ultimate causes of behaviour are investigated experimentally in the field and the laboratory. Responses by animals to variations in the physical environment and to other organisms are studied. The development and organisation of behaviour and the theoretical background to topics of current interest are covered, using both New
Zealand and overseas examples. A knowledge of BIOSCI 206 is recommended.
Prerequisite: BIOSCI 207 and STATS 101 or 108 or BIOSCI 209

BIOSCI 338 15 Points

Biology of Terrestrial Animals
The animals of Aotearoa and Tamaki Makaurau are iconic. We explore the biology, diversity and whakapapa of our native invertebrate and vertebrate animals. Along with a detailed coverage of biology, we focus on practical techniques for sampling and identifying species. This course involves both fieldwork (with the option to conduct this either on campus, or on an overnight fieldtrip) and labwork and training in using biodiversity data for hypothesis testing and scientific communication.
Prerequisite: BIOSCI 207

BIOSCI 340 15 Points

Plant Cell Biology and Biotechnology
Explores the cellular basis of how plants develop, function and respond to the environment and how this knowledge is applied to biotechnology. Topics include: methods in plant cell biology, control of gene expression, control of cell shape, intracellular transport and targeting, plant growth hormones and signaling, controlled flowering, structures and biosynthesis of plant cell walls and horticultural biotechnology.
Prerequisite: BIOSCI 201 or 202 or 205

BIOSCI 347 15 Points

Environmental Microbiology and Biotechnology
The ecology and physiology of micro-organisms in natural and engineered environments. Key themes include marine microbiology, the importance of microbial symbioses to life on Earth, and contemporary research methods in microbiology. Processes such as wastewater treatment and the production of bioactives are used to emphasise exploitation of microbial metabolism for environmental biotechnology purposes.
Prerequisite: BIOSCI 204 or MEDSCI 202

BIOSCI 348 15 Points

Food and Industrial Microbiology
The use and scientific fundamentals of micro-organisms in the production of foods and food additives, nutriceuticals and probiotics. Molecular and applied aspects of the fermentation processes for beer and wine including aroma generation and analysis. Microbial food spoilage, pathogens involved, food safety and quality control.
Prerequisite: BIOSCI 106 and 15 points from BIOSCI 204, MEDSCI 202

BIOSCI 349 15 Points

Biomedical Microbiology
Prerequisite: BIOSCI 201 and either BIOSCI 204 or MEDSCI 202

BIOSCI 350 15 Points

Protein Structure and Function
The relationship of molecular structure to protein function will be emphasised. Techniques for the purification, characterisation, production of native and recombinant proteins and three-dimensional structure determination will be combined with a description of protein structure. Specific groups of proteins will be selected to illustrate structure/function relationships and protein evolution.
Prerequisite: BIOSCI 201, 203

BIOSCI 351 15 Points

Molecular Genetics
The analysis of genetic material in prokaryotes, viruses, yeasts, plants and humans is addressed. The means by which genetic information is transferred and the mechanisms underlying genome diversity will be examined, together with the study of eukaryote genomes at the level of chromosome structure and organisation. The molecular mechanisms underpinning selected inherited human disorders will be discussed as well as the role of model species in understanding normal and perturbed biological pathways.
Prerequisite: BIOSCI 201, 202

BIOSCI 353 15 Points

Molecular and Cellular Regulation
The molecular mechanisms which mediate intracellular sorting and targeting of biologically active molecules and the networks of intracellular and extracellular signals which regulate cell function form the focus of this course. The roles of growth factors, oncogenes, plasma membrane receptors, nuclear receptors, ion channels and membrane transporters are emphasised.
Prerequisite: BIOSCI 201, 203

BIOSCI 355 15 Points

Genomics and Genome Biology
Biological information is coded in and expressed from genomes. This course explores methods for detecting structural and functional elements of genomes, plus the wider genome biology of eukaryotic and prokaryotic systems. Students will learn how genomic data is generated and analysed, how genomes evolve, and how genomic information is expressed and regulated.
Prerequisite: BIOSCI 202
Restriction: BIOINF 301, BIOSCI 354

BIOSCI 356 15 Points

Developmental Biology and Cancer
Molecular, cellular and genetic aspects of normal and abnormal development focusing on a variety of model systems including drosophila, the zebrafish and the mouse. Molecular events underlying the development of body form, the differentiation of specific tissues such as the blood, and abnormalities of development which contribute to diseases of the body such as cancer. Implications of transgenic techniques on development.
Prerequisite: BIOSCI 201, 202

BIOSCI 358 15 Points

Nutritional Science
The scientific basis of nutrition focusing on its biochemistry and physiology in health and disease. Nutritional aspects of carbohydrates, fats, proteins, vitamins and trace nutrients are covered in an integrated manner. The methodologies which underpin nutritional science and its applications are included. Reference will be made to a broad range of examples, and a number of specific nutritional topics of current interest will also be included.
Prerequisite: BIOSCI 203

BIOSCI 394 15 Points

Conservation Ecology
Conservation of species and ecosystems. Population ecology, population growth, harvesting and pest control, marine and terrestrial conservation practice, forest and fisheries management. Impacts and control of invasive species. Population viability analysis and case studies
in the conservation of threatened species. International conservation. 

**Prerequisite:** BIOSCI 104 and 30 points at Stage II in either Biological Sciences or Geography

**BIOSCI 395**  
*15 Points*  
**Pacific Biogeography and Biodiversity**
Island biogeography and insular biodiversity across the Pacific. A multi-disciplinary approach involving the study of both plant and animal systematics and biogeography. 

**Prerequisite:** 30 points at Stage II in either Biological Sciences or Geography

**BIOSCI 396**  
*15 Points*  
**Terrestrial Ecology**
Experimental and theoretical population and community ecology focusing on the interactions and environmental forces controlling the distribution and abundance of terrestrial populations of plants and animals. Both New Zealand and international examples will be used to explain the fundamental processes shaping ecological systems throughout the world. 

**Prerequisite:** BIOSCI 206, or 104 and 15 points from BIOSCI 205 or 207 or 208 and STATS 101 or 108

**BIOSCI 399**  
*15 Points*  
**Capstone: Biological Science in a Post Truth World**
Enables students to engage in debate on contemporary issues in biology and how these are interpreted from a cultural, political and economic perspective. Equips students with the tools to counter misrepresentation of science, through evidence-based scientific reasoning. Offers students a perception of Western science through different lenses, including Vision Matauranga, economic, environmental and health policy and journalism in NZ and beyond.

**Prerequisite:** 30 points at Stage III in Biological Sciences

**Postgraduate 700 Level Courses**

**BIOSCI 724**  
*15 Points*  
**Marine Ecology**
Current topics in marine ecology at the population, community, and ecosystem level. Seminars focus on ecology and evolution in a life-history context, including topics on fertilisation, larval development, and recruitment.

**BIOSCI 725**  
*15 Points*  
**Ecological Physiology**
Physiological and biochemical processes enable animals to occupy diverse habitats. Highly variable and extreme environments provide an opportunity to study the functional attributes of animals, particularly ectotherms, with respect to their metabolic, respiratory, and nutritional adaptations. A sound understanding of BIOSCI 335 or equivalent is assumed.

**BIOSCI 727**  
*15 Points*  
**Aquaculture**
Current assessment of the national and global status of aquaculture and fisheries, including consideration of future prospects. Examples of algal, invertebrate, and fish aquaculture in New Zealand, and a review of general environmental and biological problems and the role of scientific knowledge in aquaculture management. Coverage of factors contributing to wild fisheries management, including spawning, larval survival, recruitment, principles of stock assessment and fisheries modelling. A sound knowledge of BIOSCI 328 or equivalent is assumed.

**BIOSCI 729**  
*15 Points*  
**Evolutionary Biology**
A contemporary approach to central issues in evolutionary biology including mechanisms that produce macroevolutionary patterns. Current research using phylogenetic methods for testing evolutionary hypotheses will be discussed, encompassing the role of selection, the origin of mutations, and concepts of heredity. A sound understanding of BIOSCI 322 or equivalent is assumed.

**BIOSCI 730**  
*15 Points*  
**Entomology and Biosecurity**
More than half of all described species are insects, and even more species await discovery and description. Insects at every trophic level above plants dominate terrestrial and freshwater food chains. Examines the evolution of insects, the importance of their role in terrestrial ecosystems, and the problems posed by insects as biosecurity invaders in non-native environments. A sound understanding of BIOSCI 320 or equivalent is assumed.

**BIOSCI 731**  
*15 Points*  
**Biogeography**
Examines the patterns of animal and plant distribution, and the processes that influence these patterns. Topics covered include equilibrium theory, island succession, vicariance and dispersal, insular speciation, and human migration and colonisation. A sound understanding of BIOSCI 395 or equivalent is assumed.

**BIOSCI 733**  
*15 Points*  
**Molecular Ecology and Evolution**
Interpreting the molecular archive by reconstructing the branching history of inheritance and its relationship to genetic diversity within and between species. Topics may include the neutral theory of molecular evolution, rates of molecular evolution, molecular systematics, genome change and speciation, molecular identification of species, gene flow and population structure, selection at the molecular level, inbreeding depression and mutational load, and the use of molecular markers for estimation of kinship and the description of mating systems. A sound understanding of BIOSCI 322 or equivalent is assumed.

**BIOSCI 734**  
*15 Points*  
**Terrestrial Plant Ecology**
Plants form the autotrophic basis of terrestrial food chains and their distribution, diversity and abundance is a critical determinant of ecosystem functioning. Topics covered include both plant population ecology – including population growth and structure, seed and seedling dynamics, and life history strategies – and community ecology – including vegetation structure, dynamics, and species interactions. Methods to survey, analyse, and model plant populations and communities will also be discussed. A sound understanding of BIOSCI 396 or equivalent is assumed.

**BIOSCI 735**  
*15 Points*  
**Advanced Behavioural Ecology**
Focuses on organisms interacting in natural environments. Both the mechanistic underpinnings of behaviour and the fitness consequences of such behavioural traits will be examined. Behavioural ecology is not limited to questions of behaviour, but draws in issues of energetics and physiology as these factors are often used as proxies for fitness traits such as differences in survival and reproduction. A sound understanding of BIOSCI 337 or equivalent is assumed.
BIOSCI 736 15 Points
Microbial Genomics and Metabolism
Cross-disciplinary issues involved in the understanding of microbial genome structure, gene regulation and metabolism. Includes: the genetic basis of microbial interactions and horizontal gene transfer, the effect of stress and mutation on microbial and viral evolution and modern approaches used to link gene sequence to biological function and phenotypes.

BIOSCI 737 15 Points
High Resolution Imaging of Biological Molecules
X-ray crystallography and electron microscopy are two of the principal techniques used by biologists to determine molecular structure. The theory and practice of X-ray crystallography and electron microscopy, including a laboratory component where 3D structure are determined from experimental data, are addressed. Accessible to students with a variety of backgrounds, including Biology, Bioengineering, Chemistry and Physics. This course complements CHEM 738 and BIOSCI 757.

BIOSCI 738 15 Points
Advanced Biological Data Analysis
Design and analysis of experiments for both field and bench scientists. Methods for the analysis of designed experiments, including analysis of variance with fixed, random and mixed effects; also, regression analysis and analysis of covariance. Methods for the analysis of multivariate datasets such as cluster analysis, principal components analysis, multidimensional scaling, and randomisation methods. There will be a practical component to this course involving the use of appropriate statistical software.
Prerequisite: 15 points from BIOSCI 209, STATS 201, 207, 208, or equivalent

BIOSCI 739 15 Points
Dialogues in Biology
Cross-disciplinary issues in biology will be debated and explored. Topics may include: ethical and commercial issues underpinning science; scientific publishing and advocacy; medical and agricultural biotechnology; animal and environmental ethics, conservation and biodiversity, the history and philosophy of science.

BIOSCI 741 15 Points
Applied Microbiology and Biotechnology

BIOSCI 746 15 Points
The Molecular Machinery of The Cell
The experimental investigation and modelling of protein behaviour at the molecular level, in order to explain cellular biology and facilitate protein engineering. Topics addressed may include binding, transport, catalysis, chemical modification, and dynamics. A sound understanding of BIOSCI 350 or equivalent is assumed.

BIOSCI 747 15 Points
Biosecurity and Invasion Biology
The science of invasion biology, including stages of the invasion process and ecological interactions between species. The impacts of invasive alien species in different ecosystems. Population and community ecology, in relation to biosecurity.

BIOSCI 748 15 Points
Weed and Pest Management
Techniques for the management of invasive plants and animals (vertebrates and invertebrates) in different ecosystem types, including terrestrial and aquatic ecosystems. Approaches to the prevention, control and eradication of invasive species in different situations.

BIOSCI 749 15 Points
Ecology of Microbial Interactions
The associations of micro-organisms with their immediate environment are considered. Topics to be discussed include microbial communities and their survival strategies in natural and artificial systems. A sound understanding of BIOSCI 347 or equivalent is assumed.

BIOSCI 751 15 Points
Plant-microbial Interactions
Addresses selected topics in plant microbial interactions. Modern research on issues relating to plant pathogens and biosecurity, plant disease spread (epidemiology) and plant-microbial interactions (both pathogenic and mutualistic) will be investigated and discussed. A basic understanding of microbiology and molecular biology is assumed.

BIOSCI 752 15 Points
Plant Genomics and Biotechnology
How genomics and gene transfer technologies could be used to achieve improved plant growth and to develop food with new traits. Includes: plant genomics methods, engineering fruit colour, control of fruit ripening and texture, biotechnology project design. A sound understanding of BIOSCI 354 or BIOSCI 340 or equivalent is assumed.

BIOSCI 753 15 Points
Synthesis of Plant Products and Foods
Includes the biosynthesis of: selected plant cell-wall components important in dietary fibre or biomass for the production of biofuels, including lignins, cellulose or non-cellulosic polysaccharides; antioxidant pigments in food plants and their possible impacts on human health. The manipulation of nitrogen assimilation in plants to increase the yield and quality of agricultural and horticultural plant products. A sound understanding of BIOSCI 340 or equivalent is assumed.

BIOSCI 754 15 Points
Plant Genomes and Gene Expression
The analysis of plant genomes and regulation of gene expression in plant biology. Includes: inferences from whole plant genome sequences, transcription factors, transcriptional control of flowering time and post-translational control of hormone receptors by ubiquitination and degradation. A sound understanding of BIOSCI 354 or 340 or equivalent is assumed.

BIOSCI 755 15 Points
Genomics and Gene Expression
The analysis of genomes and gene expression as a means of understanding biological processes. Applications of functional and chemical genomics will be presented, as well as gene expression profiling using microarray technology. In terms
of the latter, features of experimental design and data analysis will be discussed in the context of disease and developmental processes. A sound understanding of BIOSCI 351 or equivalent is assumed.

**BIOSCI 757 15 Points**  
**Structural Biology**  
Reviews recent studies of biological systems that highlight molecular structure, and its ability to explain cellular biology. Topics may include: protein folding and targeting in the cell, motor proteins, pathogen and immune system molecules, and the inference of protein structure and function from genomic data. A sound understanding of BIOSCI 350 or equivalent is assumed.

**BIOSCI 758 15 Points**  
**Development, Differentiation and Disease**  
A critical analysis of normal and perturbed gene expression in selected model organisms as a means of understanding biological pathways and disease processes. Includes the development and use of transgenic organisms as models for human disease. A sound understanding of BIOSCI 356 or equivalent is assumed.

**BIOSCI 759 15 Points**  
**Molecular Cell Biology and Biomedicine**  
Explores recent advances in cell biology that have led to a greater understanding of a variety of cellular processes at the molecular level. Emphasis will be placed on biochemical and genetic approaches to understand disease mechanisms at the cellular level. A sound understanding of either BIOSCI 349 or 353 or MEDSCI 314 or equivalent is assumed.

**BIOSCI 761 15 Points**  
**MSc Thesis Proposal**  
An extensive review of background material associated with the thesis topic, and a detailed outline of the proposed research and its significance. Students will also be required to present an overview of the proposal in a seminar.  
*Restriction: BIOINF 761, ENVSCI 701, MEDSCI 701*

**BIOSCI 762 15 Points**  
**BSc(Hons) Dissertation Proposal**  
A review of the literature associated with the dissertation topic and an outline of the proposed research and its significance. Students will also be required to present an overview of the proposal in a seminar.

**BIOSCI 795 15 Points**  
**Biosecurity and Conservation**  
Explores recent advances in cell biology that have led to a greater understanding of a variety of cellular processes at the molecular level. Emphasis will be placed on biochemical and genetic approaches to understand disease mechanisms at the cellular level. A sound understanding of either BIOSCI 349 or 353 or MEDSCI 314 or equivalent is assumed.

**Postgraduate 700 Level Courses**

- **BIOMED 791A** 45 Points  
- **BIOMED 791B** 45 Points

**Research Portfolio in Biomedical Science**

An integrated combination of research in an advanced biomedical science research option, consisting of supervised practical work and independent critical analysis of research in the field.  
*Restriction: BIOMED 790*  
*To complete this course students must enrol in BIOMED 791 A and B*

**Chemistry**

**Foundation Courses**

- **CHEM 91F** 15 Points  
- **Foundation Chemistry 1**
Chemistry of the Elements and Their Compounds is explored. The chemistry of the elements and their compounds is a systematic study of reactivity focusing on the site and features control of pH of fluids in both living systems and the environment. It is recommended that students with a limited background in chemistry take CHEM 91F prior enrolment in CHEM 91F.

Preparatory Courses

CHEM 91P 15 Points
Preparatory Chemistry 1
Preparatory introduction to elements, compounds, the periodic table, atomic structure, covalent bonding, molecular shape and polarity. Quantitative chemistry, including balancing equations, calculating moles and particles present, calculation of concentration in mol L-1. Energy and thermo-chemistry. Laboratories include practical skills and qualitative analysis, and simple modelling. Restriction: CHEM 91F

Stage I

CHEM 100 15 Points
CHEM 100G 15 Points
Molecules that Changed the World
The impact of chemistry on the modern world will be explored by focusing on the stories of specific molecules, including penicillin, DDT and nylon. Their discovery, the underlying chemical principles that explain their behaviour, their impact on our lives including social and scientific issues that arise from their use, and their likely impact on the future will be investigated. No formal prerequisite, but the course assumes a science background at Year 11 or higher.

CHEM 110 15 Points
Chemistry of the Living World
A foundation for understanding the chemistry of life is laid by exploring the diversity and reactivity of organic compounds. A systematic study of reactivity focuses on the site and mechanism of reaction including application of chemical kinetics. A quantitative study of proton transfer reactions features control of pH of fluids in both living systems and the environment. It is recommended that students with a limited background in chemistry take CHEM 150 prior to CHEM 110.

CHEM 120 15 Points
Chemistry of the Material World
The chemistry of the elements and their compounds is explored. The relationship between molecular structure and reactivity, the role of energy, concepts of bond formation and chemical equilibrium are discussed. Issues such as sustainability, energy and fuels, and the creation of new materials are also discussed. It is recommended that students with a limited background in chemistry take CHEM 150 prior to CHEM 120.
CHEM 251 15 Points  
**Structure and Spectroscopy**
To study chemicals it is important to understand the stereochemical and electronic properties of molecules. Molecular orbital techniques and the application of approaches based on molecular symmetry and group theory to the understanding of molecular properties, bonding and spectroscopy will be studied. Application of these concepts to spectroscopic characterisation and quantification of materials by various spectroscopic techniques will be discussed.

Prerequisite: CHEM 110 or 120 and 15 points from MATHS 108, 110, 150, PHYSICS 120, 160, STATS 101  
Restriction: CHEM 210, 220, 230

CHEM 252 15 Points  
**Properties and Analysis of Matter**
Understanding the physico-chemical properties of matter is crucial for modern chemistry. Fundamental processes to the analysis and understanding of chemical systems, including thermodynamics, equilibria, acid and bases. Applications of modern electrochemistry, physical chemistry of modern materials and methods for assessing the reliability of results will be taught. The laboratory course emphasises the obtaining and understanding of chemical measurements.

Prerequisite: CHEM 110, 120 and 15 points from MATHS 108, 110, 150, PHYSICS 120, 160, STATS 101  
Restriction: CHEM 210, 220, 240

CHEM 253 15 Points  
**Making Molecules: Synthesis and Isolation**
Creation of chemicals and compounds is at the heart of synthetic chemistry; students will learn organic, organometallic and inorganic synthesis with an emphasis on how and why reactions occur. Studying separation strategies, reaction conditions and characterisation techniques will allow an understanding of the variables in synthesis. The laboratory component provides experience in synthesising, isolating, purifying and characterising compounds.

Prerequisite: CHEM 110, 120  
Restriction: CHEM 220, 230, 240

CHEM 254 15 Points  
**Modelling Chemical Processes**
From quantum mechanics to enzyme active sites, statistical analysis to the greenhouse effect, models are essential to our understanding of chemical phenomena. But what makes a good model? How are they developed and tested? After exploring the concept of models and their relationship to the scientific method, students will investigate several currently accepted models used in the chemical sciences.

Prerequisite: CHEM 110, 120

CHEM 260 15 Points  
**Introduction to Green Chemistry**
Introduction to the concepts and principles of Green Chemistry. Selected real world applications of Green Chemistry are presented to illustrate how these important guiding principles can be applied. The integral laboratory course provides valuable practical experience in relevant areas of the chemical sciences.

Prerequisite: Either CHEM 110 and 120, or at least B– in CHEM 110 or 120

Stage III

CHEM 310 15 Points  
**Structural Chemistry and Spectroscopy**
Molecular structure is fundamental to the understanding of modern chemistry. Molecular spectroscopy provides an important method for probing the structure of molecules, and the following aspects of this subject will be presented: molecular energies and molecular spectra, molecular symmetry and spectroscopy, surface spectroscopy and the structure and chemistry of surfaces.

Prerequisite: 15 points from CHEM 210, 251

CHEM 320 15 Points  
**Design and Reactivity of Inorganic Compounds**
A selection of the most recent developments in contemporary inorganic chemistry will be covered. These will include ligand design and reactivity in coordination chemistry, macrocyclic chemistry, redox chemistry, photochemistry, construction of devices, organometallic chemistry, catalysis, and main group rings, chains, clusters and polymers. The laboratories provide complementary experience in synthesis and measurement of physical properties for selected inorganic compounds.

Prerequisite: 15 points from CHEM 220, 253

CHEM 330 15 Points  
**Contemporary Organic Chemistry**
Topics in advanced organic chemistry, including the synthesis, reactions and uses of compounds containing phosphorus, selenium, boron and silicon. Organotransition metal chemistry. Asymmetric synthesis. Heterocyclic chemistry and pericyclic reactions. Laboratories emphasise synthetic and structural methods.

Prerequisite: 15 points from CHEM 230, 253

CHEM 340 15 Points  
**Advanced Analytical Chemistry**
Principles and applications of modern instrumental analytical chemistry. Statistical methods, quality control and assurance, sampling, instrumentation, chromatographic and other separation methods, spectrophotometric methods, electro-analytical methods.

Prerequisite: 15 points from CHEM 240, 252

CHEM 350 15 Points  
CHEM 350A 7.5 Points  
CHEM 350B 7.5 Points  
**Topics in Chemistry**
Topics in modern chemistry. Students will select three of the modules offered, details of which are available in the School of Chemical Sciences Undergraduate Handbook.

Prerequisite: 30 points at Stage II in Chemistry  
To complete this course students must enrol in CHEM 350 A and B, or CHEM 350

CHEM 351 15 Points  
**Chemicals Big and Small: Nano-material to Biomacromolecules**
Chemical materials are found with a broad range of shapes, sizes and physical properties. Students will study the synthesis of chemical materials; including polymeric materials using radical chemistry, inorganic materials and proteins and peptides using synthetic and biological chemical approaches. Methods to characterise materials will be investigated, including a range of physical and computational techniques giving insight into molecular interactions.

Prerequisite: 30 points from CHEM 251, 252, 253  
Restriction: CHEM 350

CHEM 352 15 Points  
**Advanced Concepts in Chemistry**
Comprises various topics in the chemical sciences related to current research interests in the School, which may vary from year to year. Students will be exposed to cutting-edge
research concepts and will study four separate modules over two semesters.

**CHEM 360 15 Points**

**Contemporary Green Chemistry**
Covers topics central to contemporary Green Chemistry such as sustainable syntheses, energy production, catalysis, pollution control, and basic toxicology. The integral laboratory course provides valuable practical experience in relevant areas of the chemical sciences.

Prerequisite: CHEM 260

**CHEM 380 15 Points**

**Materials Chemistry**
Synthesis, properties characterisation and applications of advanced materials. Includes a review of current trends in materials research. Important aspects of solid inorganic materials and organic polymers are covered.

Prerequisite: 15 points from CHEM 210, 220, 251

**CHEM 390 15 Points**

**Medicinal Chemistry**

Prerequisite: CHEM 110 and a minimum of 165 points passed

**CHEM 392 15 Points**

**Issues in Drug Design and Development**
Intellectual property and patent law in the pharmaceutical industry. An overview of the legal and regulatory framework for drug design and development. Clinical trials: formulation of a drug; phase I, phase II and phase III protocols. An introduction to the principles involved in the Codes of Good Manufacturing Practice and Good Laboratory Practice (quality control and quality assurance procedures) as applied to the manufacture of drug products and the quantification of drugs and metabolites in biological fluids.

Examples of drug development. Case studies of selected drugs from design to release.

Prerequisite: Minimum of 165 points passed

**CHEM 397 15 Points**

**Capstone: Green Chemical Science**
Explores green chemical processes, principles, applications and development. Students will examine the ethical, social and commercial implications of green chemical processes.

Prerequisite: 30 points from CHEM 351, 360, ENVSCI 301

**CHEM 398 15 Points**

**Capstone: Medicinal Chemistry**
The combination of skills learnt throughout the Medicinal Chemistry Specialisation will be used to study both currently used and potential new therapeutic agents. Students will use a range of delivery modes to present the molecules studied during this course.

Prerequisite: 30 points at Stage III in Chemistry

**CHEM 399 15 Points**

**Capstone: Chemistry**
The combination of skills learned throughout the Chemistry major will be used to complete two tasks (one written-focused and one practically-based), choosing from a range of topics.

Prerequisite: 30 points at Stage III in Chemistry

**Diploma Courses**

**CHEM 690A 15 Points**

**CHEM 690B 15 Points**

**Graduate Diploma Dissertation (Chemistry)**
To complete this course students must enrol in CHEM 690 A and B

**CHEM 691 30 Points**

**CHEM 691A 15 Points**

**CHEM 691B 15 Points**

**PG Diploma Dissertation (Chemistry)**
Restriction: CHEM 790
To complete this course students must enrol in CHEM 691 A and B, or CHEM 691

**Postgraduate 700 Level Courses**

**CHEM 701 15 Points**

**PG Topics in Chemistry 1**
A directed reading and individual study course to prepare students in the methodologies in a selected sub-discipline of chemistry.

**CHEM 702 15 Points**

**PG Topics in Chemistry 2**
A directed reading and individual study course to prepare students in the methodologies in a selected sub-discipline of chemistry.

**CHEM 710 15 Points**

**Advanced Physical Chemistry**
Topics are chosen from areas of current research in physical chemistry and will include areas such as quantum mechanics, computational chemistry, theory and applications of spectroscopical methods such as nuclear magnetic resonance (NMR). No formal prerequisite, but knowledge of physical chemistry at the level covered in CHEM 310 and of basic calculus will be assumed.

**CHEM 720 15 Points**

**Advanced Inorganic Chemistry**
The topics covered are chosen from areas of current research in inorganic chemistry, and will include functional supramolecular devices, organometallic and inorganometallic chemistry, and main group element multiple bonding. No formal prerequisite, but knowledge of inorganic chemistry at the level covered in CHEM 320 will be assumed.

**CHEM 730 15 Points**

**Modern Methods for the Synthesis of Bioactive Molecules**
The use of modern methods for the construction of complex molecules with an emphasis on carbon–carbon bond formation and control of stereochemistry. Principles and practice of synthesis design based on retrosynthetic analysis. Each student will present and discuss a recent synthesis of a complex bioactive organic compound. No formal prerequisite, but knowledge of organic chemistry at the level covered in CHEM 330 will be assumed.

**CHEM 735 15 Points**

**Advanced Medicinal Chemistry**
A selection of topics dealing with aspects of medicinal chemistry, including anticancer agents, metals in medicine,
antibacterial and antiviral chemotherapy, contemporary topics in medicinal and/or bio-organic chemistry.

**CHEM 738 15 Points**

**Biomolecular Chemistry**

Discusses how techniques including NMR spectroscopy, calorimetry, neutron scattering and computational modelling, can characterise the molecular structure, dynamics, and interactions of biological macromolecules. The principles of each technique will be presented and complemented with examples of where these methods have made major advances in understanding important biochemical processes. Accessible to students with a background in chemistry, biology, bioengineering, or physics.

**CHEM 740 15 Points**

**Current Topics in Analytical Chemistry**

Principles and applications of modern analytical chemistry. Emphasis will be on the solution of problems met by analytical chemists, including a study of the development of instrumentation, and a study of current trends in analytical research. No formal prerequisite, but knowledge of analytical chemistry at the level covered in CHEM 340 will be assumed.

**CHEM 750 15 Points**

**CHEM 750A 7.5 Points**

**CHEM 750B 7.5 Points**

**Advanced Topics in Chemistry 1**

To complete this course students must enrol in CHEM 750 A and B, or CHEM 750

**CHEM 751 15 Points**

**CHEM 751A 7.5 Points**

**CHEM 751B 7.5 Points**

**Advanced Topics in Chemistry 2**

A modular course comprising topics in physical, inorganic, organic and analytical chemistry related to departmental research interests, which will vary from year to year. Students satisfactorily completing three modules will be awarded CHEM 750. Students satisfactorily completing an additional three modules will be awarded CHEM 751.

To complete this course students must enrol in CHEM 751 A and B, or CHEM 751

**CHEM 755 15 Points**

**CHEM 760 15 Points**

**Special Topics in Chemistry 1**

**Advanced Green Chemistry**

Examines topics that are of key global significance to sustainability such as human activities that exceed the planetary boundaries, global warming, ocean acidification, endocrine disrupting compounds, global population, imbalance of the phosphorus and nitrogen cycles, and extinction of species. No formal prerequisite, but knowledge of green chemistry at the level covered in CHEM 360 will be assumed.

**CHEM 770 15 Points**

**Advanced Environmental Chemistry**

Selected current research topics in environmental chemistry. Topics change from year to year, but may include: chemical impacts of geothermal energy development or mining on the environment, trace metal fingerprinting, naturally occurring metal-adsorbents such as iron oxides, the behaviour of persistent organic contaminants, the chemistry of drinking water treatment and the chemical theory behind the design of environmental monitoring instruments. Includes a half-day field trip.

**CHEM 780 15 Points**

**Advanced Materials Chemistry**

A selection of topics on the chemistry of advanced materials, including novel polymeric materials and materials characterisation and analysis. No formal prerequisite, but knowledge of materials chemistry at the level covered in CHEM 380 will be assumed.

**CHEM 793 60 Points**

**CHEM 793A 30 Points**

**CHEM 793B 30 Points**

**Honours Dissertation in Chemistry**

To complete this course students must enrol in CHEM 793 A and B, or CHEM 793

**CHEM 795 15 Points**

**Research Methods in Chemistry**

A review of the literature and research methods associated with a selected chemistry research topic and an outline of the proposed research and its significance. Students will also be required to present an overview of the proposal in a seminar.

**CHEM 796A 60 Points**

**CHEM 796B 60 Points**

**MSc Thesis in Chemistry**

To complete this course students must enrol in CHEM 796 A and B

### Computer Science

#### Stage I

**COMPSCI 101 15 Points**

**Principles of Programming**

An introduction to computers and computer programming in a high-level language. The role of computers and computer professionals in society is also introduced. The course is intended for students who may wish to advance in Computer Science or in Information Systems and Operations Management.

Restriction: COMPSCI 107

**COMPSCI 110 15 Points**

**Introduction to Computer Systems**

An introduction to the various layers that make up a modern computer system: encoding of data and instructions, hardware, low-level programming, operating systems, applications and communications.

**COMPSCI 111 15 Points**

**COMPSCI 111G 15 Points**

**An Introduction to Practical Computing**

A practical introduction to computing. Topics include: web design, an overview of computer hardware and operating systems, effective use of common applications, using the internet as a communication medium, applying programming concepts, and social implications of technology.

Restriction: Cannot be taken with or after COMPSCI 110

**COMPSCI 120 15 Points**

**Mathematics for Computer Science**

Basic mathematical tools and methods needed for computer science are introduced. Elementary mathematical skills for defining, analysing and reasoning with abstracts objects used in programming are developed. Topics include integers and rational numbers, strings and languages, methods of proof (including induction), propositional logic, and
elementary introductions to graphs, trees, counting and probability.

**Prerequisite:** MATHS 102 or at least 13 credits in Mathematics at NCEA Level 3 or D in CIE A2 Mathematics or C in CIE AS Mathematics or 3 out of 7 in IB Mathematics

**Restriction:** Cannot be taken after COMPSCI 225, MATHS 255

**COMPSCI 130 15 Points**

**Introduction to Software Fundamentals**

Fundamental programming techniques and processes, such as conditionals, iteration, recursion, functions, testing and debugging. Efficient ways to organise and manipulate data, including sorting and searching algorithms. Writing software that uses and implements common abstract data types such as lists, stacks, queues, dictionaries and trees.

**Prerequisite:** COMPSCI 101, or Achievement Standard NCEA Level 3: Digital Technologies and Programming; 91637 Develop a complex computer program for a specified task

**Restriction:** COMPSCI 105, 107

---

**Stage II**

**COMPSCI 210 15 Points**

**Computer Systems 1**

The low level representation of data and algorithms in the computer. An introduction to computer organisation. The instruction execution model. Assembly and disassembly of instructions. Assembly language programming. How a high-level language is implemented at the machine level. Hardware support necessary to implement a secure multi-user operating system.

**Prerequisite:** 15 points from COMPSCI 105, 107, 110, 130

**COMPSCI 215 15 Points**

**Computer Systems 2**

An introduction to data communications: the OSI reference model, particularly how the lower layers combine to implement the application layer. An introduction to secure communication and computer systems.

**Prerequisite:** PHYSICS 140 and 15 points from COMPSCI 105, 107, 130

**COMPSCI 220 15 Points**

**Algorithms and Data Structures**

**Prerequisite:** 15 points from COMPSCI 105, 107, 120, 130 and 15 points from MATHS 108, 110, 120, 130, 153

**COMPSCI 225 15 Points**

**Discrete Structures in Mathematics and Computer Science**

An introduction to logic, principles of counting, mathematical induction, recursion, relations and functions, graphs and trees, and algorithms. This course is suited to students who are interested in the foundations of computer science, mathematics and logic.

**Prerequisite:** 15 points from COMPSCI 101, 107, 120, MATHS 120, 150, 153, PHIL 101

**Restriction:** MATHS 255

**COMPSCI 230 15 Points**

**Programming Techniques**

An introduction to object-oriented, concurrent and functional programming.

**Prerequisite:** 15 points from COMPSCI 105, 107, 130

**COMPSCI 235 15 Points**

**Software Development Methodologies**

An introduction to software development, including processes, best practices, tools and quality assurance techniques such as testing.

**Prerequisite:** COMPSCI 130

**Restriction:** COMPSCI 280

---

**COMPSCI 280 15 Points**

**Introduction to Software Development**

An introduction to software development, including processes, best practices, tools and quality assurance techniques such as testing.

**Prerequisite:** 15 points from COMPSCI 105, 107, 130

---

**COMPSCI 289 15 Points**

**Research Seminar in Computer Science**

An introduction to research topics in computer science. Students will be expected to prepare and deliver a review of research in a topic of their choice. Research articles will be provided during the course, and will consist of key scientific publications.

**Prerequisite:** Minimum GPA of 5.0 and COMPSCI 110, 120, 130

---

**Stage III**

**COMPSCI 313 15 Points**

**Computer Organisation**

Modern processor architectures. Principles of modern processor design; pipelining; memory hierarchies; I/O and network interfacing; compiler and OS support; embedded processors; performance; multiprocessing.

**Prerequisite:** COMPSCI 210, 215

**Restriction:** SOFTENG 363, COMPSYS 304

**COMPSCI 314 15 Points**

**Modern Data Communications**

The structure of data communications and networks, including the internet, covering all levels of the communications architecture. The layered protocol model, data transmission and coding, link-level and local area network protocols, wide-area internet working, routing, transport and security protocols. Basic application protocols as the foundation for distributed computing.

**Prerequisite:** COMPSCI 210 and (COMPSCI 215 or INFOSYS 322)

**Restriction:** SOFTENG 364

**COMPSCI 315 15 Points**

**Data Communications Technologies**

The structure of data communications and networks, including the internet, covering all levels of the communications architecture. The layered protocol model, data transmission and coding, link-level and local area network protocols, wide-area internet working, routing, transport and security protocols. Basic application protocols as the foundation for distributed computing.

**Prerequisite:** COMPSCI 210, 215

**Restriction:** COMPSCI 314

**COMPSCI 316 15 Points**

**Cyber Security**

Introduces various concepts related to software, system and network security. Covers a range of topics including attacks on privacy and attack surface, static and dynamic analysis of malware, hardware security (trusted computing base, secure boot, and attestation), network security and some hot topics in cryptography including elliptic curve, blockchain and bitcoin.

**Prerequisite:** COMPSCI 210, 215
MATHS 255
Prerequisite: COMPSCI 220 or PHIL 222, and COMPSCI 225 or
are briefly and critically discussed.
Church-Turing thesis and quantum computing
on computational power and algorithmic complexity are
studied. Basic concepts for programming languages, limits
theorems regarding what can and cannot be computed.
The aim of this course is to present mathematical models for
computational science.

COMPSCI 320
Applied Algorithmics
Fundamental design techniques used for efficient
algorithmic problem-solving and software development.
Methods that yield algorithms that are both provably correct
and efficient. Efficiency of algorithms to provide a basis for
deciding which algorithm is best for the job. Limits on the
power of computers and the theory of NP-completeness. An
introduction to methods whose correctness or performance
is not guaranteed.
Prerequisite: COMPSCI 220, and 225 or MATHS 255

COMPSCI 331
Large-Scale Software Development
Students will understand how to develop large-scale
software systems, and learn about the issues associated
with large-scale software systems and techniques for
addressing them.
Prerequisite: COMPSCI 230, 235

COMPSCI 340
Operating Systems
Operating system principles. Multi-user systems.
Virtualisation. Scheduling. Concurrent processes, threads,
synchronisation and deadlock. Memory allocation and
virtual memory. Managing files, disks and other peripherals.
Security, protection and archiving. Distributed systems and
algorithms, location, migration and replication transparency.
Real-time requirements. History of operating systems.
Prerequisite: COMPSCI 210, 230
Restriction: SOFTENG 370

COMPSCI 345
Human-computer Interaction
Human behaviour and humans’ expectations of computers.
Computer interfaces and the interaction between humans
and computers. The significance of the user interface,
interface design and user centred design process in software
development. Interface usability evaluation methodologies
and practice. Includes a group development and evaluation
project using current implementation techniques and tools.
Prerequisite: COMPSCI 230 or SOFTENG 206
Restriction: COMPSCI 370, SOFTENG 350

COMPSCI 350
Mathematical Foundations of Computer Science
The aim of this course is to present mathematical models for
programming languages and computation, and derive some
theorems regarding what can and cannot be computed.
Abstract programming languages (finite automata,
context-free grammars, Turing and register machines) are
studied. Basic concepts for programming languages, limits
on computational power and algorithmic complexity are
presented. Church-Turing thesis and quantum computing
are briefly and critically discussed.
Prerequisite: COMPSCI 220 or PHIL 222, and COMPSCI 225 or
MATHS 255

COMPSCI 351
Fundamentals of Database Systems
Database principles. Relational model, Relational Algebra,
Relational Calculus, SQL, SQL and Programming Languages,
Entity Relationship Model, Normalisation, Query Processing
and Query Optimisation, ACID Transactions, Transaction
Isolation Levels, Database Recovery, Database Security,
Databases and XML.
Prerequisite: COMPSCI 220, and 225 or MATHS 255
Restriction: SOFTENG 351

COMPSCI 361
Machine Learning
Machine learning is a branch of artificial intelligence
concerned with making accurate, interpretable,
computationally efficient, and robust inferences from data
to solve a given problem. Understand the foundations of
machine learning, and introduce practical skills to solve
different problems.
Prerequisite: COMPSCI 220, 225

COMPSCI 367
Artificial Intelligence
The cornerstones of AI: representation, utilisation, and
acquisition of knowledge. Taking a real world problem and
representing it in a computer so that the computer can
do inference. Utilising this knowledge and acquiring new
knowledge is done by search which is the main technique
behind planning and machine learning.
Prerequisite: COMPSCI 220, and 225 or MATHS 255
Restriction: COMPSCI 365, 366

COMPSCI 369
Computational Biology
Computational biology is the development and application
of computer algorithms and software to address scientific
questions in the biological and life sciences, often using big
data. This course includes probabilistic computer modelling,
computer-based statistical inference and computer
simulation for, and motivated from, the life sciences. It
focuses on modelling and analysing real-world biological
data with an emphasis on analysing DNA sequence data.
Prerequisite: COMPSCI 220, 225

COMPSCI 373
Computer Graphics and Image Processing
Basic geometric processes including transformations;
viewing and projection; back projection and ray tracing.
Graphics modelling concepts: primitives, surfaces, and
scene graphs, lighting and shading, texture mapping, and
curve and surface design. Graphics and image processing
fundamentals: image definition and representation,
perception and colour models, grey level and colour
enhancement, neighbourhood operations and filtering. Use
of the OpenGL graphics pipeline.
Prerequisite: COMPSCI 210, 230
Restriction: COMPSCI 372, 375

COMPSCI 380
Undergraduate Project in Computer Science
Each student taking one of these courses will be expected
to do an individual practical project under the supervision
of a member of staff. Only students with excellent academic
records will be allowed to take these courses, and only after
a supervisor and topic have been agreed upon by the Head of Department.
Prerequisite: Approval of Head of Department
Restriction: COMPSCI 690
To complete this course students must enrol in COMPSCI 380 A and B, or COMPSCI 380

COMPSCI 389  
Research Methods in Computer Science
An overview of research methods and techniques used across the discipline of Computer Science, including formal proof techniques and empirical methods that involve quantitative and/or qualitative data. Students will be expected to apply the research methods in a collaborative research project.
Prerequisite: Minimum GPA of 5.0 and 45 points at Stage II in Computer Science

COMPSCI 390  15 Points
Special Topic in Computer Science 1

COMPSCI 391  15 Points
Special Topic in Computer Science 2

COMPSCI 392  15 Points

COMPSCI 393  15 Points
Special Topic in Computer Science 4

COMPSCI 399  15 Points
Capstone: Computer Science
Students work in small groups to complete a substantial problem applying the knowledge learnt from the different courses in the Computer Science major. Teams are expected to reason on a problem, devise a solution, produce an artefact and present their work. The capstone provides an opportunity for students to further develop their technical and communication skills.
Prerequisite: 30 points at Stage III in Computer Science and COMPSCI 210, 220, 230

COMPSCI 711  15 Points
Parallel and Distributed Computing
Computer architectures and languages for exploring parallelism, conceptual models of parallelism, principles for programming in a parallel environment, different models to achieve interprocess communication, concurrency control, distributed algorithms and fault tolerance. Recommended preparation: COMPSCI 335.
Prerequisite: Departmental approval

COMPSCI 715  15 Points
Advanced Computer Graphics
An advanced look at current research issues in computer graphics. Typical topics include: ray-tracing acceleration methods; radiosity; subdivision surfaces; physically-based modelling; animation; image-based lighting and rendering; non-photorealistic rendering; advanced texturing. The precise content may vary from year to year. Consult the department for details. Recommended preparation: COMPSCI 373 or equivalent, and 15 points at Stage II in Mathematics.
Prerequisite: Departmental approval
COMPSCI 718 30 Points
Programming for Industry
An examination of object-oriented programming and design. Key principles of object-oriented programming: typing, encapsulation, inheritance, polymorphism and composition. Fundamental object-oriented modelling and design techniques. Students will develop application software of reasonable complexity that draws on object-oriented language features, and contemporary APIs, frameworks and tools.

COMPSCI 719 30 Points
Programming with Web Technologies
An examination of developing web-based applications. Client-side technologies: HTML, CSS, and Javascript. Server-side technologies to support dynamic Web pages and data access. Fundamental relational database concepts and design techniques. Principles of Web-application design. HCI considerations and mobile clients. Students will build a Web-based application that dynamically generates content involving relational database access.

COMPSCI 720 15 Points
Advanced Design and Analysis of Algorithms
Selected advanced topics in design and analysis of algorithms, such as: combinatorial enumeration algorithms; advanced graph algorithms; analytic and probabilistic methods in the analysis of algorithms; randomised algorithms; methods for attacking NP-hard problems. Recommended preparation: COMPSCI 320. 
Prerequisite: Departmental approval

COMPSCI 725 15 Points
System Security
Prerequisite: Departmental approval

COMPSCI 726 15 Points
Network Defence and Countermeasures
Focuses on the use and deployment of protective systems used in securing internal and external networks. Provides a detailed understanding of technologies such as intrusion detection systems, firewalls, anti-virus responses, secure patch deployment, virtual desktop protection, and a host of other security mechanisms. This includes an examination of the infrastructure platform looks at national and international standards in network security and explores the current research and developments in this area. Recommended preparation: COMPSCI 314, 315 or equivalent. 
Prerequisite: Departmental approval

COMPSCI 727 15 Points
Cryptographic Management
Focuses on the use and deployment of cryptographic systems used in securing communications and data storage. Provides an overview of encryption algorithms and the technologies and systems that support them including symmetric key cryptography, public key infrastructure, digital signatures and certificate technologies. As a part of this overview, this course will concentrate on the management issues of algorithm selection; encryption key generation, distribution, and revocation; and strategies for overcoming encryption security vulnerabilities and their associated breaches. The course also discusses best-practices and compliance with national and international standards and explores the current research and developments in this area. 
Prerequisite: Approval of the Head of Department of Computer Science

COMPSCI 732 15 Points
Software Tools and Techniques
An advanced course examining research issues related to tools and techniques for software design and development. Typical topics include: techniques for data mapping and data integration, software architectures for developing software tools, issues in advanced database systems. The precise content may vary from year to year. Consult the department for details. Recommended preparation: COMPSCI 335. 
Prerequisite: Departmental approval

COMPSCI 734 15 Points
Web, Mobile and Enterprise Computing
Examines advanced and emerging software architectures at the confluence of XML, web services, distributed systems, and databases. Includes advanced topics in areas such as: mobile computing, remoting, web services for enterprise integration, workflow orchestrations for the enterprise, peer-to-peer computing, grid computing. Recommended preparation: COMPSCI 331, 315. 
Prerequisite: Departmental approval

COMPSCI 742 15 Points
Advanced Internet: Global Data Communications
The protocols and performance of local area networks. The special requirements of very high speed networks (100 Mb/s and higher). Asynchronous transfer mode (ATM) and its relation to other protocols. The TCP/IP suite. Recommended preparation: COMPSCI 314, 315. 
Prerequisite: Departmental approval

COMPSCI 747 15 Points
Computing Education
An overview of topics related to how people learn Computer Science concepts, and how computers are used to enhance learning. Topics include: research methodologies in Computer Science Education; how novices learn to program; programming languages and environments for children; visualisation of computing concepts; attitudes and diversity in the computing classroom; computer as tools to communicate knowledge, engage students in active learning, and facilitate collaboration; different instructional technologies; using computer software to enhance traditional education practice. Recommended preparation: COMPSCI 345. 
Prerequisite: Departmental approval

COMPSCI 750 15 Points
Computational Complexity
Definitions of computational models and complexity classes: time complexity (eg, P and NP), space complexity (eg, L and PSPACE), circuit and parallel complexity (NC), polynomial-time hierarchy (PH), interactive complexity (IP), probabilistic complexity (BPP), and fixed-parameter complexity. Recommended preparation: COMPSCI 320 or 350. 
Prerequisite: Departmental approval
COMPSCI 751 15 Points
Advanced Topics in Database Systems
Prerequisite: Departmental approval
Restriction: COMPSCI 351, SOFTENG 351

COMPSCI 752 15 Points
Big Data Management
Big data modelling and management in distributed and heterogeneous environments. Sample topics include: representation languages for data exchange and integration (XML and RDF), languages for describing the semantics of big data (DTDs, XML Schema, RDF Schema, OWL, description logics), query languages for big data (XPath, XQuery, SPARQL), data integration (Mediation via global-as-view and local-as-view), large-scale search (keyword queries, inverted index, PageRank) and distributed computing (Hadoop, MapReduce, Pig), big data and blockchain technology (SPARK, cryptocurrency). Recommended preparation: COMPSCI 351 or equivalent.
Prerequisite: Departmental approval

COMPSCI 753 15 Points
Uncertainty in Data
Modern applications such as data cleaning, data integration, financial risk assessment, information extraction, scientific databases, and sensor deployments generate large volumes of uncertain data. This course investigates approaches to modelling, managing and processing uncertain data. It covers the state-of-the-art in representation formalisms and querying techniques for databases where the value of some attributes, or the presence of some records, are uncertain. Concepts and methods are discussed to repair inconsistent databases, but also to extract semantically meaningful information from inconsistent databases. Principled methods are investigated that improve the quality of data in databases. Recommended preparation: COMPSCI 351 or equivalent.
Prerequisite: Departmental approval

COMPSCI 760 15 Points
Data Mining and Machine Learning
An overview of the learning problem and the view of learning by search. Techniques for learning such as: decision tree learning, rule learning, exhaustive learning, Bayesian learning, genetic algorithms, reinforcement learning, neural networks, explanation-based learning and inductive logic programming. Experimental methods necessary for understanding machine learning research. Recommended preparation: COMPSCI 367.
Prerequisite: Departmental approval

COMPSCI 761 15 Points
Advanced Topics in Artificial Intelligence
The cornerstones of AI: representation, utilisation, and acquisition of knowledge. Taking a real world problem and representing it in a computer so that the computer can do inference. Utilising this knowledge and acquiring new knowledge is done by search which is the main technique behind planning and machine learning. Research frontiers in artificial intelligence. Recommended preparation: COMPSCI 220, 225.
Prerequisite: Departmental approval
Restriction: COMPSCI 365, 366, 367

COMPSCI 765 15 Points
Interactive Cognitive Systems
Many aspects of intelligence involve interacting with other agents. This suggests that a computational account of the mind should include formalisms for representing models of others’ mental states, mechanisms for reasoning about them, and techniques for altering them. This course will examine the role of knowledge and search in these contexts, covering topics such as collaborative problem solving, dialogue processing, social cognition, emotion, moral cognition, and personality, as well as their application to synthetic characters and human-robot interaction.
Recommended preparation: COMPSCI 367
Prerequisite: Departmental approval

COMPSCI 767 15 Points
Intelligent Software Agents
An introduction to the design, implementation and use of intelligent software agents (eg, knowbots, softbots etc). Reviews standard artificial intelligence problem-solving paradigms (eg, planning and expert systems) and knowledge representation formalisms (eg, logic and semantic nets). Surveys agent architectures and multi-agent frameworks. Recommended preparation: COMPSCI 367.
Prerequisite: Departmental approval

COMPSCI 771 15 Points
Advanced Topics in Computer Graphics and Image Processing
Prerequisite: Departmental approval
Restriction: COMPSCI 372, 373, 375

COMPSCI 773 15 Points
Intelligent Vision Systems
Computational methods and techniques for computer vision are applied to real-world problems such as 2/3D face biometrics, autonomous navigation, and vision-guided robotics based on 3D scene description. A particular feature of the course work is the emphasis on complete system design. Recommended preparation: COMPSCI 373 and 15 points at Stage II in Mathematics.
Prerequisite: Departmental approval

COMPSCI 775 15 Points
Advanced Multimedia Imaging
Topics include: camera calibration, image sequence analysis, computer vision, 3D visualisation, ground truth for image sequence analysis, performance evaluation (noise, accuracy). Applications in vision-based driver assistance, panoramic or 3D visualisation using recorded images, or image and video retrieval. Recommended preparation: COMPSCI 373 and MATHS 208 or 250.
Prerequisite: Departmental approval
COMPSCI 777  15 Points
Computer Games Technology
An advanced course looking at some of the computer graphics and artificial intelligence technology involved in computer games. Typical topics are: an introduction to the gaming industry; commercial modelling and animation software; maximising graphics performance, including such techniques as visibility preprocessing, multiple levels of detail, space subdivision, fast collision detection, direct programming of the graphics card; AI for computer games, including decision trees, rule-based systems, path planning, flocking behaviours, intelligent agents; research issues, such as physically-based modelling, terrain generation, computer learning. Recommended preparation: COMPSCI 367, 373.

Prerequisite: Departmental approval

COMPSCI 778  60 Points
Internship
Enables the development of practical knowledge and hands-on experience through a supervised internship in the IT industry. Students complete a research-informed project, and present both written and oral reports of their findings.

To complete this course students must enrol in COMPSCI 796 A and B

Data Science

Stage III
DATASCI 399  15 Points
Capstone: Creating Value from Data
A group-based project in which students showcase their skills in collaboratively creating value from data. Within a given data science domain, teams will jointly develop a research question, apply their skills to gather, structure, and analyse data to address the question, and communicate their findings effectively. The insights, their implications, limitations, and future work will be discussed by the group. Each team member will write an individual report about the project.
Prerequisite: 30 points at Stage III in Data Science

Postgraduate 700 Level Courses
DATASCI 792  45 Points
DATASCI 792A  15 Points
DATASCI 792B  30 Points
Dissertation
To complete this course students must enrol in DATASCI 792 A and B, or DATASCI 792

Earth Sciences

Stage I
EARTHSCI 102  15 Points
Foundation for Earth Sciences
Exploring and understanding the complexities of Earth systems requires earth scientists to engage with a range of quantitative techniques and tools. Introduces students to contemporary approaches for analysing and interpreting earth science data. Covers mathematical, physical, computational, and chemical methods used in the earth sciences. Emphasises practical application to a variety of earth science topics.
Restriction: EARTHSCI 263

EARTHSCI 105  15 Points
EARTHSCI 105G  15 Points
Natural Hazards in New Zealand
New Zealanders are exposed to extreme natural events and processes including earthquakes, volcanic eruptions, weather bombs, storm surge, tsunami, flooding, landslides and erosion. The physical context for each hazard is provided, drawing on the disciplines of geology, geomorphology and climatology. The frequency and magnitude of natural hazards for New Zealand are considered using different sources. Impacts on modern society are discussed using case studies and scenario modelling.
Restriction: GEOG 105, 105G, GEOLOGY 110

EARTHSCI 120  15 Points
Planet Earth
Examination of geologic processes that have shaped Earth and life through time, and their impact on modern society. Topics include: earthquakes, plate tectonics, volcanic eruptions, tsunamis, landslides, meteorites and planets, mass extinctions and evolution of life. A practical introduction to rocks, minerals and fossils provides insights into Earth's past and important modern resources.
Restriction: EARTHSCI 103

Stage II
EARTHSCI 201  15 Points
Field Skills and Methods in Earth Sciences
Field survey techniques for earth sciences, including spatial-temporal geological and geomorphological evolution reconstruction. Includes: field surveying, terrain/geological mapping and systematic observation and recording, links between earth surface processes and geological formations, geological structures, stratigraphy, sedimentology and palaeontology. Practical classes utilise data from residential field course/ independent mapping projects.
Prerequisite: 15 points from EARTHSCI 103, 120, GEOLOGY 103, 104
Restriction: GEOLOGY 201

EARTHSCI 202  15 Points
Earth History
Explores the evolution of the Earth from its molten
beginnings to the dynamic planet we live on today. Topics include: stratigraphy (litho-, bio-, cyclo-, magneto-); evolution; paleoecology; Precambrian Earth (formation, first continents and beginnings of life); development of the Earth and life through the Phanerozoic Eon. Knowledge of geological mapping equivalent to EARTHSCI 201 or 220 will be assumed.

Prerequisite: 75 points, including at least 15 points from EARTHSCI 103, 120, GEOLOGY 103, 104
Restriction: GEOLOGY 202

EARTHSCI 203
Rock and Minerals
The formation of rocks and minerals, and how they can be used to identify and interpret major Earth Science processes such as crustal evolution, volcanism, mountain building, and deformation. The relationship between rock formation and global-scale tectonic settings is explored.
Prerequisite: 15 points from EARTHSCI 103, 120, GEOLOGY 103
Restriction: GEOLOGY 203

EARTHSCI 204
Earth Structure
A foundation course in structural geology introduces students to descriptive and analytical methods for working with deformed rock. On completion of this course a student will be able to describe brittle and ductile structures, undertake simple analyses of stress and strain, and appreciate the role that structural geology plays in the applied and fundamental geological sciences, including engineering geology, geophysics, mineral and energy exploration, hydrogeology, and tectonophysics. Students enrolling in this course are encouraged to complement it with courses in any of mathematics, physics and/or geomechanics.
Prerequisite: 15 points from EARTHSCI 103, 120, GEOLOGY 103
Restriction: GEOLOGY 204

EARTHSCI 205
EARTHSCI 205G
New Zealand: Half a Billion Years on the Edge
Take a 500 million year journey through time following the geologic and biologic development of New Zealand from humble beginnings on the edge of the ancient supercontinent Gondwana to the present day geologically dynamic land mass beset by volcanic eruptions, earthquakes and massive erosion as a consequence of being located on the edge of the Earth’s largest tectonic plate.
Prerequisite: 75 points passed
Restriction: GEOLOGY 205, 205G

EARTHSCI 206
Astrobiology
Astrobiology examines the potential of the universe to harbour life and is interdisciplinary, combining Geology, Biology, Astronomy, Chemistry, Physics, Philosophy, Ethics. Course focus is on how these disciplines combine with technology, addressing questions of life in the universe. Key topics include origin and evolution of life, definitions and environmental limits of life, and how to search for life beyond Earth.
Prerequisite: 75 points passed

EARTHSCI 208
Earth Structure
A foundation course that introduces students to descriptive and analytical methods in structural geology. Geological maps are used to help students analyse structural features (eg, folds, faults, contacts). On completion of this course, students should be able to interpret geological maps, construct cross-sections, and synthesise analytical results into a structural history.
Prerequisite: 15 points at Stage I in Earth Sciences
Restriction: EARTHSCI 204

EARTHSCI 210
Introduction to GIS and Spatial Thinking
An introduction to the conceptual base of Geographic Information Science, the practical use of geo-spatial data and various issues related to the use of Remote Sensing and Geographic Information Systems. The course exercises cover a range of applications of GIS for analysis and display of spatial data, focusing on non-programmable solutions.
Prerequisite: GEOG 210, 318

EARTHSCI 220
Practice in Earth Sciences 1
A practical and field based course that introduces and develops theory and work flows to enable students to read, document and interpret landforms and landscapes in 4-D. Students will be required to participate in a residential field experience and undertake independent field work.
Prerequisite: 15 points from EARTHSCI 120, GEOG 101
Restriction: EARTHSCI 201, 260

EARTHSCI 260
Field Studies in Earth Surface Processes
Introduction to laboratory, field methods and analytical techniques to interpret the dynamics of Earth surface processes. Specific topics include: geomorphic mapping; landform observation and topographic survey; soil and sedimentary analyses and sampling; stratigraphic analysis; measurement of climatic, hydrological and coastal processes; and techniques for ecological measurement and monitoring.
Prerequisite: GEOG 101
Restriction: EARTHSCI 201, 260

EARTHSCI 261
Climate, Hydrology and Biogeography
Exploration of themes in climatology, hydrology, and biogeography with a focus on the nature and role of key processes at various spatial and temporal scales in the biosphere. The role of climate as a fundamental driver of hydrological and biogeographical processes is an important theme.
Prerequisite: GEOG 101
Restriction: EARTHSCI 261

EARTHSCI 262
Geomorphology
Introduces fundamental concepts in geomorphology for geologists and physical geographers. Key aspects of geomorphology, sedimentology, and earth surface processes are introduced by studying the temporal and spatial development of coastal and river landforms. Applied techniques for earth and environmental sciences, including field, remote sensing, GIS mapping, and modelling.
Prerequisite: GEOG 101
Restriction: EARTHSCI 262

EARTHSCI 263
Tools and Techniques for the Earth Sciences
Exploring and understanding the complexities of Earth systems requires Earth Scientists to engage with a range of quantitative techniques and tools. Students will be introduced to contemporary approaches for analysing and interpreting Earth Science data, including mathematical, physical, computational and chemical methods. The course
emphasises the practical application of these to a variety of Earth Science topics.

**Stage III**

**EARTHSCI 301** 15 Points

**Advanced Field Geological Skills and Methods**

Advanced field course that allows students to attain a high level of geological field skills through a series of integrative field problems. Focuses on advanced field skills, work flows and interpretations needed to decipher complex geological terrains. Examines a range of sedimentary and igneous units in the North Island. Critically examines outcrops and develops complex 4D models of tectonostratigraphic and volcanological evolution in a variety of settings. Field exercises culminate in individual mapping exercises and synthesis of the geological histories of areas.

Prerequisite: EARTHSCI 201 or GEOLOGY 201, and 30 points from EARTHSCI 202-204, GEOLOGY 202-204

Restriction: GEOLOGY 301

**EARTHSCI 302** 15 Points

**Sedimentary Systems**

An advanced course that critically examines sedimentary systems from the mineral to basin scale. Highlights the latest research and techniques used to interpret carbonate and clastic sedimentary systems, including petrological techniques, paleoenvironment facies analysis, sequence stratigraphy, basin analysis and geophysics. Real-life case studies will also show how hydrocarbon systems work in a sedimentary system context.

Prerequisite: Any 30 points at Stage II in Earth Sciences or Biological Sciences, plus an understanding equivalent to EARTHSCI 202 will be assumed

Restriction: GEOLOGY 303

**EARTHSCI 303** 15 Points

**Petroleum and Geochemistry of Igneous Systems**

An introduction to geochemistry and its broad applications including Solar System formation, Earth evolution, geochronology, mountain-building, paleoclimatology, paleoceanography, archeology, tracing the life histories of animals, forensic science and medical geology. Includes how the generation, modification and eruption of magmas can be constrained from mineralogical, chemical and isotopic studies.

Prerequisite: 15 points from EARTHSCI 203, 220 GEOLOGY 203, and 30 points from EARTHSCI 201-263, GEOG 260-263, GEOLOGY 201-205

Restriction: GEOLOGY 304

**EARTHSCI 304** 15 Points

**Tectonics and Geodynamics**

Causes and effects of motions of the Earth's lithosphere drawn from across geosciences. Exposure to seminal literature covering various geological, geophysical and modelling tools and methods used for deciphering deformation at divergent and convergent plate margins. Provides a strong foundation in tectonophysics and experience in critical evaluation of the scientific literature.

Prerequisite: EARTHSCI 204 or GEOLOGY 204

Restriction: GEOLOGY 305

**EARTHSCI 305** 15 Points

**Applied Earth Sciences**

An advanced undergraduate capstone course in Earth Sciences that builds on the principles and concepts taught in Earth Sciences, Environmental Sciences, Geology, Geophysics and Physical Geography and offers a series of flexible 3-week modules that students can take in applied and vocationally relevant topics in the Earth Sciences. Students will be required to take a minimum of three modules and also undertake a further module of independently driven learning to successfully pass the course.

Prerequisite: 45 points from EARTHSCI 201-263, GEOG 260-263, GEOLOGY 201-205

Restriction: GEOLOGY 306

**EARTHSCI 307** 15 Points

**Dynamic Quaternary Environments**

An advanced understanding of the evolution and variability of climate and environment during the Quaternary Period (last 2.6 million years). The focus of the course is on the identification of these and the use of biological, physical and geochronological proxy methods. The topic is multi-disciplinary and will examine aspects of paleoceanography, sea-level change, paleoglaciology, paleohydrology, paleoecology, paleolimnology, dendroclimatology and speleothems.

Prerequisite: 45 points at Stage II, including 15 points from EARTHSCI 201, 202, 220, GEOG 260-263, GEOLOGY 201, 202, or equivalent

**EARTHSCI 315** 15 Points

**Field and Laboratory Geology Skills**

A residential geological field-trip, involving advanced mapping, stratigraphic, paleontological, and structural work, along with geophysical data acquisition and sample collection. Laboratory work involves activities on samples and data collected in the field, including stratigraphic, sedimentological, paleontological, and structural analysis, geochronological and geochemical analysis, and geophysical data processing. The course culminates in preparation of a report that integrates field and laboratory data and quantitatively describes the geological history of the field area.

Prerequisite: EARTHSCI 220, 30 points from EARTHSCI 203, 204, 208, 262 and a GPA of at least 6.0

**EARTHSCI 320** 15 Points

**Practice in Earth Sciences 2**

A practical and field based course that embeds theory and work flows to enable students to read, document and interpret complex and vulnerable landforms and landscapes in 4-D. Students will be required to participate in a residential field experience and undertake independent field work.

Prerequisite: EARTHSCI 220

Restriction: EARTHSCI 301, GEOG 330

**EARTHSCI 330** 15 Points

**Research Methods in Physical Geography**

Research design and associated research methods from the component fields of physical geography. A residential field trip forms a focus for the course. On this trip, students will work under supervision in small groups and apply selected research methods and techniques to a research project. Fieldwork will be followed by the development and presentation of the research project.

Prerequisite: 75 points above Stage I, including at least 15 points from EARTHSCI 201, 260-262, GEOG 260-262, GEOLOGY 201

Restriction: GEOG 330

**EARTHSCI 360** 15 Points

**Climate and Ocean Processes**

An examination of the climate system and the processes that determine global balances. The structure and circulation of the atmosphere and ocean will be presented and the ways in which they interact to create climate variability will be
discussed. Material will also include techniques used to measure and model the climate system. 
Prerequisite: 45 points at Stage II, including 15 points from EARTHSCI 260-263, GEOG 260-263, or equivalent
Restriction: GEOG 360

EARTHSCI 361 15 Points
Exploration Geophysics
Introduction to geophysical methods and their applications. The course will provide a comprehensive overview on seismic methods, an introduction to gravity, electric, magnetic, electromagnetic, and radar techniques, and a short overview on other methods. Applications include hydrocarbon exploration, mineral exploration, studies of the shallow subsurface and the deep Earth. Recommended preparation: Understanding of mathematics covered in MATHS 102 or 110 and geology covered in EARTHSCI 103 or 120 is assumed. Prerequisite: 15 points from EARTHSCI 201-204, 220, GEOLOGY 201-204, PHYSICS 230, 231
Restriction: GEOG 361, GEOPHYS 361

EARTHSCI 372 15 Points
Engineering Geology
An integration of quantitative and qualitative concepts in geology as applied to engineering projects. Fundamentals of soil and rock mechanics will be introduced. Topics covered in the course include landslides, dewatering schemes, contaminant transport, foundations, mines (open-pit and underground), dams, tunnels, urban geology, and transportation infrastructures. Case studies are used in lectures to demonstrate the importance of geology and water to engineering projects. Fieldwork is required. Prerequisite: CIVIL 220 or EARTHSCI 201 or 220 or GEOLOGY 201-204, PHYSICS 230, 231
Restriction: CIVIL 726, GEOLOGY 372

EARTHSCI 388 15 Points
Field Focused Research in Earth System Science
An in-depth research based course that acts as an introduction to researching within an Earth System Sciences paradigm. Students will conduct their own independent research and interact with the vibrant research community of the University of Auckland through critically reading scientific papers, attending research presentations, and preparing their own research to be shared through a research report and professional research presentation. Prerequisite: Permission of Academic Head

EARTHSCI 390 15 Points
Directed Study: Field-focused Research in Earth Sciences
Prerequisite: Permission of Academic Head

EARTHSCI 399 15 Points
Capstone: Research and Practice in Earth Sciences
Students will engage in research and/or practice in Earth Sciences, utilising skills and knowledge acquired in preparatory papers. This course provides Earth Science majoring students with an opportunity to embed themselves within a research group and/or employer, and to apply their skills to outreach, a research project or internship, the outcomes of which will then be presented and assessed in a variety of formats from a formal written report through to oral presentation and/or press release. Prerequisite: 30 points at Stage III in Earth Sciences

Postgraduate 700 Level Courses

EARTHSCI 703 15 Points
Hydrothermal Systems: Geothermal Energy and Ore Deposits
Active hydrothermal systems are dynamic and of vital significance to national energy requirements. In addition, their fossil equivalents are often important sites for ore deposition. This course overviews the geologic, hydrologic, and geochemical features of hydrothermal systems with an emphasis on exploration and development of active systems for geothermal energy, and fossil systems for mineral resources. Restriction: GEOLOGY 703

EARTHSCI 704 15 Points
Directed Study in Earth Sciences
Prerequisite: Head of School approval

EARTHSCI 705 15 Points
Geohazards
Contemporary methods used to identify and assess natural hazards, techniques used for the probabilistic forecasting, spatial representation and communication of hazards. How the relationship between hazard information, risk mitigation and emergency management is addressed. There will be a strong focus on the use of case studies. Restriction: GEOLOGY 705

EARTHSCI 706 15 Points
Special Topic

EARTHSCI 707 15 Points
Special Topics in Earth Sciences
A series of half-course modules from which students must study at least two. Topics that will be generally offered include, but are not restricted to, Ore Deposit Geology, Advanced Mineralogy, Analytical Geochemistry, Igneous Petrology and Geochemistry, and Palaeontology: Origins and Evolution of Life. Prerequisite: Head of School approval

EARTHSCI 708 15 Points
Research Topic in Earth Sciences
Prerequisite: Head of School approval

EARTHSCI 713 15 Points
Tectonic Geomorphology
New Zealand is an ideal location in which to investigate the interplay between tectonics and geomorphic processes. This will be demonstrated by combining relevant case studies and field practice whereby students will develop skills in report writing and handling of some of the data, literature and tools necessary to conduct field research in active tectonics and landform generation. Restriction: GEOG 743, GEOLOGY 713, 773

EARTHSCI 714 15 Points
Earthquake Geology
Understanding why, how and where earthquakes occur from identification of their source parameters to consideration of their effects (ground shaking, fault rupture and crustal stress changes). Topics include seismic style, earthquake size and source parameters, recurrence interval, conditions for failure, and earthquakes as agents for crustal fluid redistribution. Restriction: GEOLOGY 712, 714

EARTHSCI 720 15 Points
Geochemistry of our World
Provides a broad overview of applications of geochemistry
across multiple disciplines. In addition, this course will help determine the suitability of different analytical techniques to different problems while providing practical experience in collecting and evaluating geochemical data. Subject areas are wide-ranging and include, geology, environmental science, biology, archaeology, and forensic sciences. No formal prerequisite but knowledge of introductory chemistry will be assumed.

Restriction: GEOLOGY 720

**EARTHSCI 732** 15 Points

Reconstructing Environmental Change

Examines key issues in environmental change with an emphasis on the South West Pacific during the Quaternary. Methods applied to reconstruct and constrain the timing of environmental change are explored, including glacial geomorphology, environmental isotopes, micro- and macro-fossil remains such as pollen, diatoms and wood, and relevant geochronologic techniques. No formal prerequisite, but an understanding equivalent to EARTHSCI 307, GEOG 334 or GEOLOGY 303 will be assumed.

Restriction: GEOLOGY 751, 752

**EARTHSCI 752** 15 Points

Understanding Volcanic Systems

Understanding how and why volcanoes erupt from magma processes in mantle to eruption at the surface. All tectonic settings and explosive and effusive processes are examined. Volcanic hazards and resource exploration in volcanic terrain is also covered.

Restriction: GEOLOGY 771

**EARTHSCI 754** 15 Points

Pure and Applied Sedimentology

An integrated account of aspects of advanced sedimentology from sediment source to sink. Critical examination of recent and ongoing, pure and applied research into the dynamics of sedimentary environments and their recognition in the ancient record. No formal prerequisite, but knowledge of sedimentology and sedimentary processes at the level covered in GEOG 262 or GEOLOGY 202 will be assumed.

Restriction: GEOLOGY 754

**EARTHSCI 760** 15 Points

Integrated Basin Exploration

Students will conduct exploration and characterisation of a sedimentary reservoir in the context of basin analysis. The geological background of a sedimentary reservoir is supported by a one-day field trip to Waiheke Island to understand scale, facies and depositional processes and their relation to seismic imaging. The course is project based and students will independently develop a geological model by integrating field observations, seismic velocity analysis and, borehole and 3D seismic interpretation. An understanding of the content of EARTHSCI 361 or GEOPHYS 361 will be assumed.

Restriction: GEOPHYS 760

**EARTHSCI 763** 15 Points

Sub-surface Geophysical Exploration

The practice behind exploring the subsurface using seismic waves, ground-penetrating radar, and potential field methods. The course consists of four modules focusing on the rock physics background of geophysical techniques, aspects of geophysical studies of reservoirs, ground-penetrating radar surveys, as well as interpretation of gravity, magnetic and electrical data.

Prerequisite: GEOPHYS 330, EARTHSCI 361 or GEOPHYS 361 or equivalent

Restriction: GEOPHYS 761, 762, 763
Ecology

Stage III

ECOLOG 301 15 Points
Advanced Research Skills in Ecology
Research design and associated methods from the component fields of ecology. A series of field trips to differing habitats are a central component of the course. During these trips students will be supervised in small groups and apply selected research methods and techniques to complete a research project.
Prerequisite: BIOSCI 206

Postgraduate 700 Level Courses

ECOLOG 789 60 Points
BAdvSci(Hons) Dissertation in Ecology
Prerequisite: BIOSCI 762 or ENVSCI 701

Environmental Change

Stage III

ENVCHG 300 15 Points
Research Design for Environmental Change
An understanding of research on environmental change. Students will be introduced to research topics and appropriate methodologies for investigating environmental change. Principles of scientific writing and communication will also be addressed. Students will apply these skills by developing and writing a research proposal or critical review.
Prerequisite: Programme Coordinator approval

Postgraduate 700 Level Courses

ENVCHG 789 60 Points
BAdvSci(Hons) Dissertation in Environmental Change
Prerequisite: Programme Coordinator approval

Environmental Management

Postgraduate 700 Level Courses

ENVMGT 741 15 Points
Social Change for Sustainability
Explores the concept of sustainability through different theoretical frameworks and how social and environmental movements have mobilised around this concept over time. Critically interrogates what is sustainable, what is social change, and how can social change be sustainable in a global economy. Draws on case studies of current environmental issues and associated popular social movements.

ENVMGT 742 15 Points
Social Dimensions of Global Environmental Change
An examination of the social dimensions of global environmental change. This includes a review of the history of climate science, the interaction of science with other knowledges, and contemporary debates surrounding climate change as well as other forms of environmental change. It also examines the different ways in which people respond to environmental risks and changes, and the challenges associated with mitigation and adaptation policies.

ENVMGT 743 15 Points
Environmental Policy
Debates surrounding environmental policy and governance provide insights into the complexities of environmental management issues. Examples of environmental governance will be considered at global and local scales. The roles of international agencies, nation-states, civil society and corporations in shaping environmental policy and governance are examined.

ENVMGT 744 15 Points
Resource Management
A review of advanced principles, concepts and approaches to the sustainable management of natural resources. Case studies emphasise the need for conflict resolution, equitable allocation, and decentralised decision-making to address the social and environmental impacts of resource utilisation.

ENVMGT 746 15 Points
Collaborative Environmental Management
An exploration of participatory management and its potential for engaging communities, resource users and stakeholders in the pursuit of sustainable development. Students will examine strategies for incorporating local knowledge within conservation practices and for reconciling natural resource management with human welfare, social justice and indigenous rights.

ENVMGT 747 15 Points
Current Issues in Sustainability
A topical review of approaches to sustainability as applied within a particular industry or sector.

ENVMGT 796A 60 Points
ENVMGT 796B 60 Points
MSc Thesis in Environmental Management
To complete this course students must enrol in ENVMGT 796 A and B

Environmental Science

Stage I

ENVSCI 101 15 Points
ENVSCI 101G 15 Points

Environment, Science and Management
Explores the science behind key environmental issues to recognise the role environmental science plays in understanding the interaction between humans and the environment. The complexity of environmental problems and the difficult task of integrating science, knowledge and values are discussed.

Stage II

ENVSCI 201 15 Points
Natural and Human Environmental Systems
An examination of current environmental issues in coupled natural and human systems such as urban environments. Interactions among biological, physical and social processes are discussed and means of measuring and managing the environmental outcomes of their interactions are addressed.
Prerequisite: At least 45 points at Stage I

ENVSCI 203 15 Points
Modelling Environmental Systems
An introduction to the philosophy and use of models in the study of a range of environmental systems, including coastal, ecological, fluvial, atmospheric and social. Students will develop skills in designing, communicating and critically assessing models of the environment.
Prerequisite: STATS 101
Restriction: ENVSCI 310
Stage III

ENVSCI 301
Environmental Science in Practice
Advances in environmental science, technology, and policy are explored using case studies of global environmental issues and proposed solutions. Students apply environmental science to assess how science is used to inform environmental intervention and policy, and understand environmental responses.
Prerequisite: ENVSCI 201 or equivalent

ENVSCI 303
Environmental Science, Risk and Society
An examination of the contemporary topics that shape the ways in which environmental science may be communicated and understood. Topics of discussion include issues of scientific uncertainty, risk communication, public trust and the role of media.

ENVSCI 399
Capstone: Environmental Science
Students will engage with the research process, as practiced in environmental science. Independent or small group research projects will be undertaken under the guidance of an academic mentor. Students will design and complete an independent research project and communicate their findings. The emphasis is on research skills and assisting students in developing and implementing their independent academic research project.
Prerequisite: 30 points at Stage III in Environmental Science or 15 points at Stage III in Environmental Science and 15 points from other Stage III courses included in the major

Postgraduate 700 Level Courses

ENVSCI 701
Research Practice in Environmental Science
An understanding of research in Environmental Science. Students will be introduced to a range of methodologies and will be challenged to critically analyse information and data. Principles of scientific writing and communication will also be addressed. Students will apply these skills by developing and writing a research proposal or critical review.

ENVSCI 702
Applied Estuarine Ecology
Emphasises multi-disciplinary science that integrates across different empirical and theoretical approaches to better understand the functioning of soft-sediment ecosystems. Covers fundamental ecological principles of soft-sediment systems through to the impacts associated with human activities. Includes practical exercises in experimental field ecology which will introduce students to key research methods. No formal prerequisite but knowledge of Stage III marine ecology/science, or equivalent, will be assumed.

ENVSCI 703
Research Topics in Environmental Science
A course of study prescribed by the Head of the School, in the absence of an appropriate formal course being available.
Prerequisite: Approval of the Programme Coordinator

ENVSCI 704
Modelling of Environmental Systems
The design and application of models for the investigation of environmental problems; understanding the role and utility of modelling in environmental science; the analysis and representation of dynamic environmental phenomena. Provides an understanding of modelling concepts, approaches and applications, and methods for determining the suitability of modelling in specific contexts. No formal requirement, but an understanding of the material in BIOSCI 209, ENVSCI 310, GEOG 250, MATHS 108 and STATS 101 will be assumed.

ENVSCI 705
Environmental Data Analysis
Contemporary approaches to understanding and analysing environmental data with an emphasis on developing skills to support the ‘transformation, visualisation, modelling’ cycle. The importance of adopting reproducible research practices (e.g., data and code archiving) will be emphasised. The course focuses on an applied laboratory component and will be taught in open-source software. Assessment will be via projects analysing environmental data. No formal prerequisites but an understanding of basic statistical methods equivalent to STATS 101 will be presumed.

ENVSCI 706
Special Topic

ENVSCI 707
Directed Study in Environmental Science
Prerequisite: Head of School approval

ENVSCI 711
Assessing Environmental Effects
A focus on the interdisciplinary, scientific assessment of environmental activities with specific reference to the New Zealand context. Methodologies used in the assessment, monitoring and regulation of environmental effects, trends and risks will be critically evaluated. Aspects of the RMA, including consenting procedures and the role of public and professional participants in the process, will be discussed. A key component of the assessment is the preparation of an individual Assessing Environmental Effects report.

ENVSCI 713
Air Quality and Atmospheric Processes
Monitoring, modelling and management will be considered with emphasis on air quality standards and guidelines and applications of science and technology to indoor and outdoor air pollution prevention, mitigation and remediation. Case studies and practical work will link the theoretical and practical aspects of air quality science.

ENVSCI 714
Water Quality Science
Water contaminants, monitoring techniques and modelling systems for impact prediction and assessment of effects for both point and non-point sources. Application of science and technology to water pollution prevention, mitigation and remediation. Case studies and practical work (laboratory and field methods).

ENVSCI 716
Aquatic Ecological Assessment
Application of science to freshwater ecological assessment, management and restoration. Assessment techniques and interpretation of risks associated with natural and anthropogenic disturbance of aquatic ecosystems. Monitoring and reporting of condition and health of aquatic environments. Relevant policy, strategic and legislative frameworks, and national and regional perspectives on applied freshwater management. Course includes case studies and practical work (incl. field trip). No formal prerequisite but an understanding equivalent to MARINE 303 is assumed.

ENVSCI 733
Biodiversity Management and Conservation
Emphasis will be on current issues associated with the
ecological aspects of biodiversity management and conservation in terrestrial habitats. Topics include: biodiversity and ecosystem services, management of species and ecosystems, issues in plant conservation, precaution and adaptation in conservation, pest control in mainland islands, carbon storage and biodiversity. The course will also address national and international mechanisms for the sustainable management of natural resources.

Prerequisite: BIOSCI 394 or other Stage III course in Environmental Science, or equivalent

ENVSCI 734 15 Points
Restoration and Landscape Ecology
The integration of ecological principles and ecological services at the landscape level for both management and restoration. Topics include: the ecology of fragmented ecosystems such as demography, metapopulation issues, ecological genetics, biota-physical environment interactions, the consequences and techniques for restoration of damaged ecosystems and mitigation of the effects of development. Emphasis will be on sustainable solutions including biophysical, legal, social, cultural and economic considerations. No formal prerequisite but knowledge of ecology at Stage III level will be assumed.

ENVSCI 737 15 Points
Applied Terrestrial Ecology
The dynamics of change in terrestrial ecosystems with a focus on forest and wetland environments. The effects of factors such as climate change and fire in New Zealand’s terrestrial ecosystems will be considered. Students will be introduced to modern methods for vegetation assessment and monitoring, including multivariate statistical methods. Students are required to participate in a residential field course as this is a major component of ENVSCI 737. No formal prerequisite but a knowledge of ecology equivalent to BIOSCI 394 or BIOSCI 396 and data analysis equivalent to GEOG 250 or BIOSCI 209 is assumed.

ENVSCI 738 15 Points
Water and Society
Probes experiments with radical urban change to examine the co-constitution of water and society in the pursuit of improved futures.

ENVS 790 30 Points
ENVS 790A 15 Points
ENVS 790B 15 Points

Exercise Sciences

Stage I

EXERSCI 100G 15 Points
Exercise and Fitness: Myths and Reality
An introduction to the principles of physical exercise, with a focus on understanding how the body moves and responds to exercise, how performance can be measured, and how fitness can be developed and maintained to optimise health. Particular emphasis will be placed on the debunking of common myths about exercise, and offering evidence-based advice on the benefits of appropriate physical activity.

Restriction: BIOSCI 107, EXERSCI 101, 105, SPORTSCI 100G, 101, 105, MEDSCI 142

EXERSCI 101 15 Points
Foundations of Exercise and Sport Sciences
Introduces the essential scientific concepts and methods of the four sub disciplines of Exercise and Sport Sciences: Biomechanics, Exercise Physiology, Movement Neuroscience and Exercise and Sport Psychology. Development of academic literacy skills is encouraged. Examples from current research, professional organisations, progression and career pathways within each sub-discipline are discussed.

Restriction: SPORTSCI 101

EXERSCI 103 15 Points
Human Anatomy
The study of the gross anatomical organisation of the neural, muscular and skeletal systems, with particular reference to the neck, limbs, back and abdominal wall. Practical work includes gross anatomy laboratories and CD-ROM study.

Restriction: SPORTSCI 103

EXERSCI 105 15 Points
Exercise Prescription
An introduction to the risks and benefits of exercise, exercise policy and safety, physical fitness testing, guidelines for exercise test administration, principles of exercise prescription, cardiorespiratory and neuromuscular training.

Restriction: SPORTSCI 105, 205

Stage II

EXERSCI 201 15 Points
Exercise Physiology 1
Physiological and biochemical requirements and provision of energy for exercise, recovery and adaptation. Generation and control of muscular force and power, and how the neuromuscular system adapts to its habitual use. Scientific measurement of muscular force, work and power and oxidative metabolism at rest and during exercise. Justification, administration and reporting of experimental procedures.

Prerequisite: 30 points from BIOSCI 107, EXERSCI 101, 103, MEDSCI 142, SPORTSCI 101, 103

Restriction: SPORTSCI 201

EXERSCI 202 15 Points
Principles of Tissue Adaptation
Principles of adaptation in nerve, muscle, bone and other tissue that occur with increased use, disuse, or misuse including sports and exercise injuries. Coverage includes examples relevant to the maintenance of healthy tissues and the recovery and rehabilitation of tissue following injury or disease.

Prerequisite: EXERSCI 103 or SPORTSCI 103

Restriction: SPORTSCI 202
**Course Prescriptions**

**EXERSCI 203**
**Biomechanics 1**
Mechanical analysis of human movement, using qualitative, quantitative and predictive techniques. The focus is on sports techniques, musculoskeletal stress and locomotion.

*Prerequisite: EXERSCI 101 or SPORTSCI 101*

*Restriction: SPORTSCI 203*

**EXERSCI 204**
**Psychology of Physical Activity**
An introduction to the study of psychology as it relates to physical activity, sedentary behaviour and health.

*Restriction: SPORTSCI 204*

**EXERSCI 206**
**Exercise Nutrition**
A cross-disciplinary focus on nutrition, examining nutritional enhancement of sports performance, diet and physiological function, eating disorders, energy balance, body composition and the role of diet in growth and exercise.

*Prerequisite: BIOSCI 107 or MEDSCI 142*

*Restriction: SPORTSCI 206*

**Stage III**

**EXERSCI 301**
**Exercise Physiology 2**
Biological regulation of the adaptation to physical exercise or inactivity. Homeostasis regulation and the adaptation of the cardiopulmonary, endocrine and immune systems to exercise and training. Evaluation of neuromuscular power and aerobic power and endurance in healthy individuals. Reporting of experimental methods and findings in human exercise physiology.

*Prerequisite: EXERSCI 201 or SPORTSCI 201*

*Restriction: SPORTSCI 301*

**EXERSCI 302**
**Exercise Physiology for Special Populations**
Examination of the role of exercise for special populations. Physiological responses and adaptations to exercise and training, and exercise and training recommendations for selected medical and athletic populations. Evaluation of cardiovascular, pulmonary, metabolic and neuromuscular function.

*Prerequisite: EXERSCI 301 or SPORTSCI 301*

*Restriction: SPORTSCI 302*

**EXERSCI 303**
**Biomechanics 2**
Advanced quantitative techniques in biomechanics used to study human movement including mathematical modelling and signal processing. An application area such as occupational ergonomics or clinical gait analysis will be used to demonstrate the biomechanical techniques.

*Prerequisite: EXERSCI 203 or SPORTSCI 203*

*Restriction: SPORTSCI 303*

**EXERSCI 304**
**Sport Psychology**
Examination of psychological factors affecting behaviour and performance in exercise and sport. The individual performer is the major consideration, but group influences on individual performance are also considered.

*Prerequisite: EXERSCI 204 or SPORTSCI 204, or 45 points at Stage II, III in Psychology with a B– average or higher*

*Restriction: SPORTSCI 304*

**EXERSCI 305**
**Movement Neuroscience**
Examines brain and spinal cord organisation and function related to movement, and the neurological mechanisms involved in the planning, execution and control of movement in health and disease. Introduces the concept of neural plasticity as it relates to motor skill learning and recovery after injury in both healthy and neurologically impaired populations. An understanding of human anatomy at the level covered in EXERSCI 103 will also be assumed.

*Prerequisite: EXERSCI 101 or SPORTSCI 101 and 15 points from EXERSCI 201, MEDSCI 206, PSYCH 202, SPORTSCI 201*

*Restriction: SPORTSCI 305*

**EXERSCI 309**

**EXERSCI 309A**
7.5 Points

**EXERSCI 309B**
7.5 Points

**Practicum in the Exercise Sciences**
A supervised practical project in Exercise Science in a clinical or other research laboratory setting to explore and assess how science underpins practical skills in any arena of the Exercise Sciences.

*Prerequisite: 45 points from EXERSCI 201, 202, 203, 204 and Head of Department approval*

*Restriction: SPORTSCI 309*

To complete this course students must enrol in EXERSCI 309 A and B, or EXERSCI 309

**Postgraduate 700 Level Courses**

**EXERSCI 702**
15 Points

**Projects in the Exercise Sciences**
Provides students with an opportunity to collect data in an area of interest, with the aim of validating an area of study towards their theses.

*Restriction: SPORTSCI 702*

**EXERSCI 703**
15 Points

**Cardiac Rehabilitation**
The role of the exercise scientist in cardiac rehabilitation. Topics include electrocardiography, exercise testing and exercise prescription. The course combines theory and laboratory/clinical study of these topics.

*Restriction: SPORTSCI 703*

**EXERSCI 704**
15 Points

**Advanced Techniques in Biomechanics**
A laboratory-based course which explores the theoretical foundations of advanced data collection and analysis of biomechanical data and offers students opportunities to experience practical, hands-on laboratory experiences that will demonstrate these theoretical foundations.

*Restriction: SPORTSCI 704*
Research in the Exercise Sciences
Examines the nature and value of research contributions in the Exercise Sciences and their application to further research and evidence-based practice. Evaluates the process of research, inclusive of the development of research questions and hypotheses, the planning and collection of data in an ethical and unbiased manner, the analysis, interpretation and presentation of data and the dissemination of results.
Restriction: SPORTSCI 705

Seminar in Advanced Exercise Physiology
A seminar-based course examining the physiological responses and adaptations to physical exercise or inactivity. Students evaluate, present, and discuss seminal and contemporary research publications on selected topics largely focusing on the cardiovascular, metabolic, and musculoskeletal systems. Emphasis will be placed upon investigations of the explanatory elements of adaptation, from the level of the genome to the living human, and the use of relevant contemporary experimental techniques.
Restriction: PHYSIOL 706, SPORTSCI 706

Advanced Seminar in Movement Neuroscience
Seminar-based course which examines brain organisation and function related to movement in health and disease. Emphasis is placed on contemporary techniques and paradigms in the field of movement neuroscience, with special emphasis on clinical populations that exhibit impaired movement. Neural plasticity is a central theme.
Restriction: SPORTSCI 708

Exercise Rehabilitation
The role of exercise in a multi-component approach to rehabilitation. Risks and benefits of exercise, particularly with respect to sedentary individuals and/or those with medical considerations. Exercise test administration. Exercise prescription and monitoring, physical and functional assessment of performance.
Restriction: SPORTSCI 710

Exercise and Performance Psychology
Examines the basis of exercise motivation and to examine how psychological states can influence movement control and performance in work, sports, and daily life. The course covers theoretical foundations and involves active discussion of recent empirical studies.

Advanced Exercise Prescription
The physiology and interpretation of cardiovascular and respiratory functional assessments to enable the advanced prescription of accurate and progressive exercise programmes for people with co-existing health conditions. This course provides an understanding of how respiratory and cardiac physiology interact through the lifespan, and the implications this has on prescribing exercise for a wide range of clinical presentations.
Restriction: SPORTSCI 712

Psychology of Active Living
Using behavioural perspectives, complex relationships between physical activity, sedentarism, health promotion, and their effects on health are analysed. Clinical/methodological measurements of sedentary and physical activity behaviours are discussed.
Restriction: SPORTSCI 713

Special Topics in the Exercise Sciences
Prerequisite: Head of Department approval
Restriction: SPORTSCI 714

Research Planning and Reporting
The theoretical, methodological, and practical skills for designing and reporting clinical research studies. Assignments will assess the student’s ability to critically evaluate relevant literature, prepare an ethics application, and write clearly and effectively. A final report will be submitted, formatted as if it is a manuscript being offered for publication.

Clinical Exercise Practicum I
A body of practical supervised work of not less than 100 hours, including laboratory work. The principles and application of electrocardiography, and the assessment of people with cardiovascular disease. An introduction to the integration of the principles of exercise physiology, testing, and prescription into a practical programme for delivery to premorbid and low-risk clinical populations.
Restriction: SPORTSCI 771, 781

Clinical Exercise Practicum II
A body of practical supervised work of not less than 100 hours. The principles of exercise physiology, testing, and prescription will be integrated into a practical programme for delivery to premorbid and low-risk clinical populations. Emphasis is placed on the application and interpretation of exercise tests; monitoring exercise and identifying contraindications; emergency procedures; scope of practice; and reporting.
Prerequisite: EXERSCI 771
Restriction: SPORTSCI 772, 781

Clinical Exercise Practicum III
A body of practical supervised work of not less than 200 hours. The delivery of exercise rehabilitation services to clinical populations especially individuals who have cardiac, musculoskeletal, neurological, pulmonary, immunological, neoplastic, mood, and metabolic disorders, and post-surgical cases.
Prerequisite: EXERSCI 771, 772
Corequisite: EXERSCI 775
Restriction: SPORTSCI 773, 782

Clinical Exercise Practicum IV
A body of practical supervised work of not less than 200 hours. The delivery of exercise rehabilitation services to clinical populations especially individuals who have cardiac, musculoskeletal, neurological, pulmonary, immunological, neoplastic, mood, and metabolic disorders, and post-surgical cases.
Prerequisite: EXERSCI 773
Restriction: SPORTSCI 774, 782

Seminar in Clinical Exercise Physiology
A body of advanced theoretical and administrative work related to exercise prescription and service delivery. The principles of exercise physiology related to clinical...
populations, especially individuals who have cardiac, musculoskeletal, neurological, pulmonary, immunological, neoplastic, mood, and metabolic disorders, post-surgical cases, the elderly, and for individuals at risk of developing diseases as a consequence of inactivity. Professional and inter-professional relations will be addressed.

Food Science

Stage I

FOODSCI 100 15 Points
Foundations of Food and Nutrition
Introduces students to the multifaceted nature of Food Science and Nutrition with a focus on the interplay between food, nutrition and health. Introduce the chemical, biological, sensory, and processing aspects of foods. Societal, economic, legislative and regulatory aspects will also be introduced. Concepts will be illustrated using real food systems with a focus on lipids, water and vitamin C.
Restriction: FOODSCI 201

Stage II

FOODSCI 200 15 Points
Food Composition and Nutrition
Covers the composition and structure of food. The approach will extend the FOODSCI 100 content from lipids to proteins, carbohydrates and key minor food components. There will be a focus on the molecular structure of the major food components and how they relate to the physical, sensory and nutritional properties of foods.
Prerequisite: 30 points from BIOSCI 106, CHEM 110, FOODSCI 100

FOODSCI 201 15 Points
Foundations of Food Science
The aim of this course is to give the student a general appreciation of the composition and structure of food. Material covered includes the molecular structure of the major food components and how they are altered by processing and preservation. Common foods will be studied in order to understand the complex relationships between food molecules and the physical structure of foods. Topical issues such as genetically modified foods and antioxidants will be included.
Prerequisite: At least 30 points from BIOSCI 101, 102, 106, 107, CHEM 110, 120, MEDSCI 142, PHYSICS 160, PSYCH 109
evaluation will be a component. Sampling of food products is therefore undertaken in this course.
Prerequisite: FOODSCI 301 and 303
Corequisite: FOODSCI 302 or Permission of the Programme Director/Course Coordinator

FOODSCI 399 15 Points
Capstone: Food and Nutrition
Food and Nutrition pathway students will work together in groups to identify and develop a new food product or food system that addresses or responds to a nutritional issue. Students will focus on the interplay between the nutritional aspects of the product or system and the sensory, stability, convenience, cost, regulatory and processing aspects of the product.
Prerequisite: FOODSCI 303 and a further 30 points at Stage III in Food Science and Nutrition

Diploma Courses

FOODSCI 691 30 Points
FOODSCI 691A 15 Points
FOODSCI 691B 15 Points
PG Diploma Dissertation (Food Science)
Restriction: FOODSCI 705
To complete this course students must enrol in FOODSCI 691 A and B, or FOODSCI 691

Postgraduate 700 Level Courses

FOODSCI 703 15 Points
Food Processing
Preservation of food by standard methods including freezing, dehydration and thermal processing. New developments in food preservation. Unit operations, mass and energy balance, and heat transfer are covered. Chemical and physical changes food undergoes during processing.
Prerequisite: Permission of Programme Director

FOODSCI 705 15 Points
Project in Food Science
Prerequisite: Permission of Programme Director
Restriction: FOODSCI 691

FOODSCI 706 15 Points
Food Safety
An understanding of the changing regulations that apply to the New Zealand food industry is of paramount importance. Pathogen awareness and control from an industry perspective are examined. HACCP and risk management plans will be generated.
Prerequisite: Permission of Programme Director

FOODSCI 707 15 Points
Food Science
Chemical, biological and physical aspects of foods. The decomposition of food due to lipid oxidation. Integrated study of selected basic foods.
Prerequisite: Permission of Programme Director

FOODSCI 708 15 Points
Advanced Food Science
Prerequisite: Permission of Programme Director

FOODSCI 709 15 Points
Food Processing
FOODSCI 709A 7.5 Points
FOODSCI 709B 7.5 Points
Selected Topics in Food Science and Technology
Topics offered will usually be based on the specialist interests of the lecturers, although controversial issues may be included (for example, genetically modified food, irradiated food). Students may be required to participate actively by contributing seminars. Topics may vary from year to year.
To complete this course students must enrol in FOODSCI 709 A and B, or FOODSCI 709

FOODSCI 710 15 Points
Industrial Internship
The industrial internship is an opportunity for students to experience the food industry at first hand. While the placement would normally be in New Zealand, overseas internships are possible. The student will work in the food organisation on a defined project under the supervision of a suitably qualified person. A detailed written report on the assignment must be submitted.

FOODSCI 711 15 Points
Food Allergens and Intolerants
Examines the biology and biochemistry of human pathogens, their interactions with humans at the cellular level via the food chain, their epidemiology and control mechanisms. Also examines the chemical and physical food contaminants, their etiology and ways to prevent contamination of food.

FOODSCI 712 15 Points
Food Safety Management
An overview of the management of Food Safety from farmgate to fork, and the development of food safety planning and risk management including HACCP plans, their verification, validation, and implementation, traceability, and recall mechanisms.

FOODSCI 713 15 Points
Food Legislation
An overview of Australian and New Zealand food regulations and also related food regulations of some of our major trading partners, how they operate and are controlled. Models of food control plans, food labeling legislation, enforcement of food laws and the structures which govern these will also be examined.

FOODSCI 714 15 Points
Research Methodology in Food Safety
Methodologies consistent with human health research to identify and critically appraise relevant research, and to use appropriate methodologies to design research projects and collect, report and analyse data.

FOODSCI 715 15 Points
Food Allergens and Intolerants
An understanding of the epidemiology, management, regulation and classification of food allergens and intolerants in accordance with Food Standard 1.2.3 (Australia New Zealand Food Standards Code). This includes the study of foods or food groups with the major food allergens as identified in the Food Allergen Labeling and Consumer Protection Act (FALCPA), and application to new product development and labeling.

FOODSCI 716 15 Points
Current Issues in Food Safety
Current issues in Food Safety will be selected from time to time.
to time depending on the interest of the students and availability of experts to teach such course. Topics will focus on the science of issues of processing, contamination, packaging, storage and handling.

**FOODSCI 717**  
Food Processing and Sanitation
The science of some of the basic processing methods of food and packaging. The course will also cover properties of solid foods and their surface characteristics and the chemistry of detergents and sanitisers as well as factors affecting their effectiveness.

**FOODSCI 740**  
Food Analysis
Students are provided with an opportunity to experience a range of analytical techniques that are used in food industry laboratories and in food science research.  
**Prerequisite:** Programme Director approval

**BSc(Hons) Dissertation in Food Science**
A research proposal will be prepared on the dissertation topic. Students will be required to present an overview of the proposal in a seminar. Students will participate in the critical analysis of scientific papers. The student will carry out an original piece of research. The results will be presented and discussed in a dissertation. A seminar on the research will be given.  
*Restriction:* FOODSCI 789

**Forensic Science**

**Postgraduate 700 Level Courses**

**FORENSIC 701**  
15 Points
**Fundamental Concepts in Forensic Science**
Ethics and quality assurance in forensic science. Principles of criminal law, principles of evidence and procedure, expert evidence, interpretation of scientific evidence, probability and statistics. Forensic pathology, psychology and psychiatry.  
*Prerequisite:* Permission of Programme Director

**FORENSIC 702**  
15 Points
**Introduction to Forensic Science**
Forensic biology, documents, fingerprints, physical evidence, toolmarks, fire examination, explosives, hairs and

fibres, drugs, toxicology, alcohol (including blood and breath

alcohol), crime scene examination, firearms identification.  
*Prerequisite:* Permission of Programme Director

**FORENSIC 703**  
15 Points
**Statistics and Molecular Biology for Forensic Science**
Statistics: data summarisation and reduction, laws of probability, conditional probability, likelihood ratios and Bayes theorem. Interpretation of statistical results. Forensic biology: basic principles of population genetics, genomic structure, conventional blood grouping. DNA profiling: structure, enzymology and basic chemistry of nucleic acids, PCR and microsatellites, interpretation of DNA profiles, developing forensic DNA technologies.  
*Prerequisite:* Permission of Programme Director

**FORENSIC 704**  
15 Points
**Techniques and Applications for Forensic Science**
Analytical techniques: GC, HPLC, GC-MS chromatography, IR and UV spectroscopy. Applications: toxicology, illicit drugs, sports drugs, racing chemistry. Physical and trace evidence.  
*Prerequisite:* Permission of Programme Director

**FORENSIC 706**  
15 Points
**Environmental Forensic Science**
Concepts of environmental science. Environmental monitoring and spill analysis, environmental legislation, criminal and environmental law. Case studies and practical work.

**MSc Thesis in Forensic Science**
Note: The Forensic Science MSc thesis research courses are mounted with the assistance of the Institute of Environmental Science and Research Ltd (ESR) and ESR facilities and databases will be used for some research. As ESR facilities and databases are relied on in Court proceedings, appropriate steps must be taken to ensure the integrity of ESR’s analyses. This means students wishing to use ESR laboratory facilities as part of the MSc programme will be subject to the same type of access requirements as ESR employees. This includes a security clearance (essentially a check of any convictions recorded against you) and a drug test prior to being given access to ESR resources. Students will normally be required to provide a DNA sample to ensure that any allegations of cross-contamination of a DNA sample can be properly investigated. The DNA profile will be retained by ESR. All other information will be returned to the students at the completion of their studies.
Students who would like further details of these conditions should contact the Programme Director.

**Geographic Information Science**

**Stage I**

**GISCI 140** 15 Points

*Geographic Information and Spatial Thinking*

An introduction to the conceptual base of Geographic Information Science, the practical use of geo-spatial data and various societal issues related to the use of Remote Sensing and Geographic Information Systems. This course will introduce students to a range of contemporary geospatial technologies. It covers key concepts and principles behind the development and application of these technologies. The course exercises cover a range of application of GIS for analysis and display of spatial data, focusing on non-programmable solutions.

*Restriction: GEOG 210*

**GISCI 241** 15 Points

*Remote Sensing*

An introduction to remote sensing tools and techniques and their application within the earth, environmental and urban environments. The course focuses on the processing, analysis and interpretation of data collected by government and commercial satellites, Unmanned Aerial Vehicles (UAV) and aerial photography. The course introduces image interpretation, multispectral images, supervised and unsupervised image classification and change detection. Techniques for analysing remote sensing data are introduced through a series and lab-based activities and are applied during an independent project.

*Prerequisite: GISCI 140 or GEOG 210*

**GISCI 242** 15 Points

*Spatial Analysis for Human Environments*

Spatial analysis and GIScience applications of spatial data handling for human environments within the context of a theoretical framework for understanding the earths and ethics of mapping persons in place. Develops advanced practical knowledge of techniques and methodologies in a vector model spatial analysis environment as developed through applications for housing, social wellbeing and inequality, disease, and access to public transportation.

*Prerequisite: GISCI 140 or GEOG 210  
Restriction: GEOG 318*

---

**Stage III**

**GISCI 341** 15 Points

*Advanced Remote Sensing*

Further develops key concepts of geographic information science as it is applied to earth and environmental sciences including physical geography. Covers techniques for describing the physical environment and ways of analysing and visualising the environment with an emphasis on raster-based surface models. Also compares theories of remote sensing from space, the air, non-imagery raster data. Skills in analysing and properly using various types of remote sensing materials are developed through labs.

*Prerequisite: GISCI 241  
Restriction: GEOG 317*

---

**GISCI 343** 15 Points

*GIScience Programming and Development*

Programming and scripting-based techniques for spatial big data analysis, spatial data handling, modelling, automation, and development for the GIScience domain.

*Prerequisite: 15 points from GISCI 241, 242, GEOG 317, 318*

**GISCI 399** 15 Points

*GIScience Capstone*

Students will independently demonstrate domain knowledge through applying their skills as members of groups completing a community-based GIScience projects serving needs identified by community stakeholders. Groups will be assembled based on skillsets of individual students (e.g., programming, remote sensing, advanced vector analysis, etc.), and students will be assessed on their independent contributions to the group project.

*Prerequisite: 30 points at Stage III in Geographic Information Science*

---

**Geography**

**Foundation Courses**

**GEOG 91F** 15 Points

*Foundation Geography 1*

Introduces population and development themes, including global and regional patterns of population growth, overpopulation, migration, urbanisation, city planning issues, uneven patterns of economic growth and human well-being, and sustainable development.

*Restriction: GEOG 91P*

**GEOG 92F** 15 Points

*Foundation Geography 2*

Focuses on the relationship between humans and the environment, emphasising long-term trends in resource use, human impacts in the environment, sustainable resource management and environmental hazards.

*Restriction: GEOG 92P*

---

**Preparatory Courses**

**GEOG 91P** 15 Points

*Preparatory Geography 1*

Introduces population and development themes, including global and regional patterns of population growth, overpopulation, migration, urbanisation, city planning issues, uneven patterns of economic growth and human well-being, and sustainable development.

*Restriction: GEOG 91F*

**GEOG 92P** 15 Points

*Preparatory Geography 2*

Focuses on the relationship between humans and the environment, emphasising long-term trends in resource use, human impacts on the environment, sustainable resource management, and environmental hazards.

*Restriction: GEOG 92F*

---

**Stage I**

**GEOG 101** 15 Points

*Earth Surface Processes and Landforms*

Understanding of the functioning of natural systems at the Earth’s surface and human interactions with these systems. Examines the operation and interaction between Atmospheric, Hydrological, Ecological and Geomorphic systems. Environmental processes are an integrating theme.
Topics include: climate and hydrological systems, ecological processes; surface sediment cycle; and processes governing development and dynamics of major landform types.

GEOG 102 Geography of the Human Environment
Examines the relationships among personal geographies and global geographies of uneven development, economic, environmental and socio-cultural change. Using a variety of examples from New Zealand and the world we illustrate the connection between local places and global issues.

GEOG 103 Mapping Our World
An introduction to contemporary geospatial technologies such as web-mapping, GPS and tracking devices (such as your phone), and GIS. Covers key concepts and principles behind these tools and their use, along with practical experiences through laboratories. Critical and theoretical perspectives on the tools, their use, and their social impacts will be discussed.

GEOG 104 Cities and Urbanism
What makes a great city? This course explores 'urbanism' in both historical and contemporary cities to determine the essence of urbanity and the way that citizens (and visitors) experience city life. The dynamics and character of cities are considered in terms of their built environment, environmental systems, population, social diversity, and planning policies and practices.

Stage II

GEOG 202 Cities, Regions and Communities
A critical examination of geographic processes and consequences in contemporary society. Topics are selected from the instructors’ research interests, which include: the transformation of urban places and spaces; the forms and location of industries and retailing; social geographies of the city; New Zealand’s linkages with the global economy and society; urban historical geographies; and demographic and social changes in New Zealand and the Pacific region. Prerequisite: 60 points

GEOG 205 Environment and Society
A critical exploration of the interconnectedness of environment and society. The course highlights the importance of understanding how different views and attitudes influence people’s interactions with the environment. Key themes include governance, management and development, which are addressed through issues such as conservation, climate change adaptation, disasters and resource use. Classes draw on a variety of case studies from New Zealand and overseas. Prerequisite: 60 points

GEOG 210 Introduction to GIS and Spatial Thinking
An introduction to the conceptual base of Geographic Information Science, the practical use of geo-spatial data and various societal issues related to the use of Remote Sensing and Geographic Information Systems. The course exercises cover a range of applications of GIS for analysis and display of spatial data, focusing on non-programmable solutions.

GEOG 250 Geographical Research in Practice
A critical exploration of the research experience in geography. Case studies and field work demonstrate approaches to understanding the complex interactions of social and environmental processes. Students will develop practical skills in problem identification, research methodologies, ethics and analytical practices. Prerequisite: 60 points

GEOG 260 Field Studies in Earth Surface Processes
Introduction to laboratory, field methods and analytical techniques to interpret the dynamics of Earth surface processes. Specific topics include: geomorphic mapping; landform observation and topographic survey; soil and sedimentary analyses and sampling; stratigraphic analysis; measurement of climatic, hydrological and coastal processes; and techniques for ecological measurement and monitoring. Prerequisite: GEOG 101 Restriction: EARTHSCI 260

Stage III

GEOG 302 Space, Place, Economy
Examines the spatial organisation economies and the economic production of space and place. The course enriches the study of economies and their geographies by drawing upon cultural, political and institutional theories to critically examine concepts and techniques traditionally deployed by geographers. Alternative ways of understanding and influencing economic change are considered. Novel insights are developed into New Zealand’s national and local economies. Prerequisite: 30 points at Stage II

GEOG 305 Population, Health and Society
A survey of major themes in population, health and social geography. An examination of the dynamics of population complements analyses of health and healthcare, the
education sector, the welfare state, and the changing character of urban places.
Prerequisite: 30 points at Stage II

GEOG 307 15 Points
Urban Geography
Analysis of key processes shaping socio-cultural geographies of contemporary cities. Using international and local examples, issues such as the economy of cities, the culture of cities, home and housing, segregation and polarisation, the imaging of cities and sustainability are explored.
Prerequisite: 30 points at Stage II

GEOG 312 15 Points
Geographies of Pacific Development
Examines development processes and issues in the countries of the Pacific. Themes will include development theory, colonialism, post-colonialism, population, economic systems, migration, gender, ethnicity and identity, geopolitics and international linkages, and development strategies.
Prerequisite: 30 points at Stage II

GEOG 315 15 Points
Research Design and Methods in Human Geography
A lecture, practical and field course, the focus of which is a residential field section during the mid-semester study break. The course provides students with experience in designing and executing a research project. It is designed both to prepare students for the increasing number of jobs that require these research skills and as an introduction to research for those proceeding to higher degrees.
Prerequisite: GEOG 250 and either GEOG 202 or 205 and 15 points from GEOG 302, 305, 307, 312, 320, 322-327, 352, or equivalent

GEOG 317 15 Points
Remote Sensing and GIS
Further develops key concepts of geographic information science as it is applied to earth and environmental sciences including physical geography. Covers techniques for describing the physical environment, ways of analysing and visualising the environment, particularly raster-based surface models. Also compares theories of remote sensing from space, the air, non-imagery raster data. Skills in analysing and properly using various types of remote sensing materials are developed through labs.
Prerequisite: EARTHSCI 210, GEOG 210 or equivalent

GEOG 318 15 Points
GIS Principles and Practice
Key concepts of geographic information science and their application in diverse fields such as retailing, environmental management, population mapping, health, crime analysis, and planning. Covers techniques for visualising and describing geographical systems, ways of analysing spatial data, and the impact of recent developments in web-mapping.
Prerequisite: EARTHSCI 210, GEOG 210 or equivalent

GEOG 319 15 Points
GIS Project
Builds on materials in GEOG 317 and/or GEOG 318 by providing an opportunity for students to pursue a topic of choice through an individual project. Project topics are developed by students in conjunction with the instructors, and input and ideas from other courses is encouraged.
Prerequisite: GEOG 318 or equivalent

GEOG 320 15 Points
Resources and Environmental Management
Examines the development and conservation of the environment in its use as a resource base, with particular reference to the way in which institutional structures in society determine provision and allocation. Attention is balanced between international experience and the policy framework in New Zealand. The course provides an understanding of key concepts, practices and methods.
Prerequisite: 30 points at Stage II

GEOG 322 15 Points
Culture and Environment in East Asia
Takes a topical and regional approach to the geography of East Asia. The unity and diversity of East Asia, environment and cultural development, industrialisation and urbanisation, population problems and environmental management are emphasised.
Prerequisite: 30 points at Stage II

GEOG 324 15 Points
Critical Perspectives on Sustainable Development
A critical evaluation of the challenges of sustainable development emphasising the structural and political factors that contribute to unequal development relations. Introduces a variety of theoretical frameworks to interrogate sustainable development strategies and solutions. The course focuses on integrating research and theory into practical learning.
Prerequisite: 30 points at Stage II

GEOG 325 15 Points
The Human Dimension of Disasters
An overview of the human dimension of disasters which covers crucial concepts and theories, vulnerability and the causes of disasters, disaster risk reduction and management, post-disaster recovery and transversal issues such as culture and gender. The discussions encompass not only theoretical but also policy and practical materials and draw on examples and case studies from throughout the world with a particular focus on the most vulnerable and marginalised areas and communities.
Prerequisite: 30 points at Stage II

GEOG 327 15 Points
Politics, Markets and Economies
Uses geographical insights to explore the interrelationships between politics, economy and culture. The course focuses on attention on institutions, subjectivity and the making of markets. It examines political projects and economic spaces such as higher education, food and creative economies at the regional, national, and global level.
Prerequisite: 30 points at Stage II

GEOG 328 15 Points
Special Topic
GEOG 330 15 Points
Research Methods in Physical Geography
Research design and associated research methods from the component fields of physical geography. A residential field trip forms a focus for the course. On this trip, students will work under supervision in small groups and apply selected research methods and techniques to a research project. Fieldwork will be followed by the development and presentation of the research project.
Prerequisite: 75 points above Stage I, including 15 points from EARTHSCI 201, 260-262, GEOG 260-262
GEOG 331  15 Points
Fluvial Geomorphology
An integrated study of hydrological and fluvial processes in a river basin context. Content includes interpretation of channel and floodplain landforms, flow and sediment transport relationships, and analysis of landscape evolution. Scientific principles are applied to selected practical problems.  
Prerequisite: 45 points at Stage II, including EARTHSCI 262 or GEOG 262, or equivalent

GEOG 332  15 Points
Climate and Environment
Introduction to the concept that climate, although often perceived as a hazard, is in fact an important resource. Ways in which climate processes can create hazards or provide a range of resources will be explored. Knowledge concerning how observation systems and climate information can used for decision making, for example in urban planning, economic development and disaster risk reduction, will also be developed as will the procedures associated with the assessment of societal sensitivity to climate.  
Prerequisite: 45 points at Stage II, including EARTHSCI 261 or GEOG 261, or equivalent

GEOG 333  15 Points
Special Topic: Field-focused Research in Earth System Science
Prerequisite: Permission of Academic Head

GEOG 334  15 Points
Environmental Change
An exploration of the nature and causes of change in selected aspects of the physical environment. Key themes are: a) natural processes driving environmental change and variability; b) humans as agents of change, and; c) biophysical and societal sensitivity to change. Course content will include past, present, and future interactions between society and environmental change, with examples primarily drawn from climatology, hydrology/water resources, and ecology.  
Prerequisite: 45 points at Stage II, including EARTHSCI 261 or GEOG 261, or equivalent

GEOG 342  15 Points
Technology, Society and Environment
A nuanced examination of the relationships between intersections and articulations of technology (hardware, software, infrastructures, and data), society, and the environment. This course adopts a critical geography perspective that understands and asks students to reflect on the ways in which technologies are social practices that have profound societal and environmental consequences. The course engages with themes such as social media and cities, the surveillance society, digital social inequality, cultural geographies of internet infrastructures, and energy requirements of ‘the cloud’.  
Prerequisite: 45 points at Stage II

GEOG 351  15 Points
Coastal and Marine Studies
Focuses on the development of coastal landforms across a range of temporal and spatial scales. Introduces natural processes such as waves, tides and circulation, as well as geological-scale coastal evolution driven by changes in sea level and sediment supply. The course has an applied focus with specific emphasis on coastal management problems that affect society. Issues considered include coastal erosion during storms, the impacts of shoreline engineering, climate change and accelerating sea level rise.  
Prerequisite: 45 points at Stage II, including EARTHSCI 262 or GEOG 262, or equivalent

GEOG 352  15 Points
Landscape, Environment and Heritage
An examination of environmental change from a historical geography perspective. Approaches to investigating and understanding the transformation of environments are explored, and processes driving creation of different types of landscapes including heritage places are considered. The course enables students to place the modern environment within a historical context.  
Prerequisite: 30 points at Stage II

GEOG 362  15 Points
Environmental Hydrology
An exploration of the physical science underpinning hydrology. Hydrological pathways are used to examine rainfall-runoff with links made to water quality and eco-hydrology. There is a particular focus on the hydrological impact of urban development and attempts to understand and implement water sensitive cities.  
Prerequisite: 15 points from GEOG 101, ENVSCI 101; 15 points from GEOG 201, 250, 261 or 331

GEOG 399  15 Points
Capstone: Geography
An engagement with the research process, as practised in geography. Students will undertake an independent research project and communicate their findings, with due attention to research design, methodology, research ethics, information sources, field practise, data analysis, and research communication. Independent or small group research projects may involve residential or local fieldwork, laboratory analysis, desktop analysis or other research activities.  
Prerequisite: 30 points at Stage III in Geography

Diploma Courses

GEOG 690  30 Points
GEOG 690A  15 Points
GEOG 690B  15 Points
Graduate Diploma Dissertation (Geography)
To complete this course students must enrol in GEOG 690 A and B, or GEOG 690

Postgraduate 700 Level Courses

GEOG 701  15 Points
Research in Practice
A reflection on the process of developing research projects from theory to methods, analysis, and the presentation of findings. Attention is directed to the ways in which research is shaped by intellectual histories, pressing social and environmental challenges, and contemporary academic and political debates. The course allows students to develop specialised interests in geography or environmental management.

GEOG 711  15 Points
Emerging Economic Spaces
Examines globalising economic processes, localising forces, and the practices of economic actors in the production of emerging economic spaces. The course considers contemporary analytical and conceptual debates, including global value chains, geographic imaginaries, new economies, and diverse economies.
GEOG 712  15 Points
Land, Place and Culture
Contemporary geographic perspectives on society and culture, focusing on a review of traditional and new cultural geographic approaches to the constructions of place and environment, ethnicity, gender and identity. No formal prerequisite, but an understanding of material in Stage III courses in human geography will be assumed.

GEOG 714  15 Points
Population, Mobilities and Wellbeing
An exploration of the changing nature of human populations, the dynamics of human mobilities, the determinants of health status and evolving modes of healthcare provision. No formal prerequisite, but an understanding of material in Stage III courses in human geography will be assumed.

GEOG 715  15 Points
Development and New Regional Geographies
‘Development’ is place-dependent and takes place at a range of scales. This course considers economic, socio-cultural, geopolitical and environmental transformations of nations, regions, communities, and emerging or post-foundational political spaces focussing on examples from Pacific, Asia and New Zealand.

GEOG 717  15 Points
Contemporary Issues in Human Geography
A critical review of selected issues and debates in contemporary human geography.

GEOG 718  15 Points
Urban Worlds
An exploration of contemporary debates in urban theory and research. This course critically examines contemporary processes of urbanisation and imaginations of city futures. Particular emphasis is placed on interrogating questions about urbanisation through a comparative lens, exploring the different geographies of urban life and politics that emerge in cities across the planet.

GEOG 719  15 Points
Geographies of Housing and Urban Change
Advanced study of housing and urban issues, including the topics of homeownership, asset-based welfare, the politics of housing affordability, housing reforms and the changing dynamics of gentrification. Contemporary issues such as mortgage market dynamics and social rented housing reforms are examined. The course will consider also urban governance, office property investment and development processes, and sites of consumption and spectacle.

GEOG 725  15 Points
People, Participation and Development
A critical overview of issues associated with people’s participation in development in their geographical context, including processes and outcomes, accountability, empowerment and transformation in the context of livelihood strengthening, resource management, health and sanitation, education and disaster risk reduction. The course provides the students with theoretical knowledge but also practical skills through the use in class of participatory tools as both contents and teaching aids. Discussions rely upon concrete examples from throughout the world with a particular focus on marginalised places.

GEOG 730  15 Points
Climate Change: Past, Present, and Future
An exploration of the character and causes of past, present, and future climate change. Content includes examination of how and where climate is (or is not) currently changing, and uncertainties associated with future projections. The temporal focus will be on the Holocene and the Anthropocene, through to the end of the twenty-first century. A human society context will feature throughout.

GEOG 737  15 Points
Policy and Expertise
Exploring ‘policy’ — an all too familiar and taken for granted term — by focusing on how policies get made, how different actors and varieties of expertise influence the policy process, and how policies shape people and place. It introduces students to transdisciplinary conversations involving geographers, anthropologists, sociologists and urbanists.

GEOG 738  15 Points
Future Food and Biological Economies
Investigates contemporary understandings, issues and strategies relating to the development of biological economies and food networks in the context of the globalising food economy. Addresses transformations in agro-food complexes and questions of nature-society relationships to do with ‘sustainable’ and ‘resilient’ food production and consumption.

GEOG 739  15 Points
Research Topics in Geography
Directed research on an approved topic or topics. Prerequisite: Approval of the Programme Coordinator

GEOG 745  15 Points
Applied Coastal Geomorphology
Catchment-scale perspectives are used to analyse spatial and temporal variability in river forms and processes. River responses to disturbance are placed in a longer-term evolutionary context. Prospective river futures are appraised using field analyses and numerical modelling applications. These principles and techniques are used to discuss management options. No formal prerequisite but final year undergraduate experience in a related field required.

GEOG 746  15 Points
Applied Coastal Geomorphology
An advanced course on the process-form relationships that shape coastlines over a range of spatial and temporal scales. Coastal processes are examined with field experiments in which principles of experiment design and field deployment are demonstrated. Long-term evolutionary perspectives are examined using a range of field techniques. These short- and long-term approaches are then merged to address examples of applied coastal management problems. No formal prerequisite but an understanding equivalent to GEOG 351 will be assumed.

GEOG 748  15 Points
Current Issues in Coastal Management
Critical consideration of contemporary issues in coastal management. Topics may include: competition for coastal space and resources; vulnerability of coastal communities to climatic variability; scientific uncertainty in the decision making process; understanding the legacies of past planning decisions. Case studies are used to explore complexities of the physical and social dimensions of coastal management approaches within the context of current regulatory frameworks.

GEOG 749  15 Points
Climate and Society
An examination of inter-relationships between climate and society. The sensitivity of selected biophysical and human
activity systems to climate will be investigated and the actual and potential impacts of climatic variability and change investigated. Impact themes will vary from year to year, but are likely to be drawn from hydrology and water resources, agriculture, human health, ecosystems, and energy. No formal prerequisite but an understanding equivalent to GEOG 332 will be assumed.

GEOG 750 15 Points
Environment and Landscape
Environmental change in New Zealand since European settlement, including exploitation of natural resources, the creation of different cultural landscapes, and recognition of places as natural and cultural heritage. Different approaches to investigating and understanding recent environmental change are addressed. The course is suitable for physical and social science students, and will enable them to place the modern environment within a historical context. The course may include short guided walks and a one day or two half-day fieldtrips.

GEOG 759 15 Points
Research Topics in Geography
Directed research on an approved topic or topics.
Prerequisite: Approval of the Programme Coordinator

GEOG 760 15 Points
Directed Study in Geography
Directed studies on an approved topic or topics.
Prerequisite: Academic Head approval

GEOG 761 15 Points
Special Topic

GEOG 770 15 Points
GIS and Spatial Data Handling
Advances spatial data handling, visualisation, and analysis methods as components of GIS as a methodology for approaching spatial problems (planning, resource management, spatial decision support, etc.) in Geography, providing postgraduate students with the ability to develop transferrable skill sets that they can use to support their independent research projects. No formal prerequisites but an understanding of introductory geographic information science equivalent to GEOG 210 or 242 will be presumed.
Restriction: GEOG 318

GEOG 771 15 Points
Spatial Analysis and Geocomputation
Approaches and challenges to analysing spatial data. Specific techniques covered will include measures of spatial autocorrelation, geographical regression, point pattern analysis, interpolation, overlay analysis, and an introduction to some of the newer geocomputation methods such as neural networks and cellular automata. Students will conduct a significant analysis task as part of this course. No formal prerequisite but an understanding equivalent to GEOG 318 or GISCI 342 will be assumed.

GEOG 772 15 Points
Advanced Raster Data Analysis
Concepts and theories underpinning digital analysis of raster data, including remotely sensed data, LiDAR data and digital elevation models. Sources, nature and accuracy of raster data, analysis and integration of raster data from diverse sources, and applications of raster data analysis in hydrology and environmental modelling. No formal prerequisite but an understanding equivalent to GEOG 317 or GISCI 341 will be assumed.

GEOG 773 15 Points
Visualisation and Cartography
Introduction to field of cartography, drawing contrasts with new approaches to geovisualisation facilitated by information visualisation and statistical graphics. Human perceptual and cognitive systems as related to visual displays. Principles of sound perceptual and cognitive map design. Planning, creation and delivery of cartographic and visualisation-based projects. Review of emerging and future trends in this fast-changing field.

GEOG 774 15 Points
Advanced Spatial Data Handling
Advanced approaches to spatial data handling (processing, management, visualisation, and analysis) in web-based environments, including theoretical debates and implications as well as applications for spatial data handling in integrated open-source and web-based mapping/GIS environments. There will be an applied laboratory component and lecture/seminar component where the broader social and theoretical implications of developments in spatial data handling will be engaged. No formal prerequisite, but an understanding equivalent to GEOG 318 will be assumed.

GEOG 779 15 Points
Programming, GIS Customisation and Web-mapping
Spatial databases, spatial data structures and algorithms and converting and handling spatial data. Introduction to programming (in Python). Principles of object- and component-oriented architectures including details relating to ArcGIS as an example. Open source and open standards, web-mapping as a case-study. No formal prerequisite but 15 points from GEOG 317-319, 342, GISCI 341-343 or equivalent will be assumed.

GEOG 789 30 Points
GEOG 789A 15 Points

Geophysics

Stage II

GEOPHYS 213 15 Points
The Geophysical Environment
This course explores the physical principles governing – and the connections between - the Earth’s atmosphere, oceans and interior. Topics include the structure of the solid earth, ocean currents and tides, and fundamental aspects of weather and climate.
Prerequisite: 15 points from PHYSICS 120, 121, 150, 160 and 15 points from ENGSCI 111, MATHS 108, 120, 130, 150
Restriction: PHYSICS 213

Stage I

INFOMGMT 192 15 Points
Information Tools for Business
The ability to manage and analyse information is essential in many aspects of business. This course provides a practical introduction to information tools used to analyse and visualise data. It introduces core programming, scripting and authoring skills that provide a foundation for the creation of information systems solutions across a range of clients including web and mobile platforms.

Marine Science

Stage I

MARINE 100 15 Points
The Oceans Around Us
An interdisciplinary approach to understanding the importance of our oceans as the driver of our climate, source of sustenance, and focus of domestic and international political, economic and legal negotiations. It is framed around physical and biological processes in the ocean which raise questions for ocean management in NZ and internationally, allowing real-world debate about the future of the ocean realm.

Stage II

MARINE 202 15 Points
Principles of Marine Science
An introduction to the physical and biological structure of the oceans, sea floor, coastlines and the biological communities that inhabit them. Subject matter includes an overview of the nature and scope of marine science globally and within the New Zealand and Auckland contexts. A wide coverage of marine science issues are presented with an emphasis on multidisciplinary examples. No formal prerequisite, although an understanding of Stage I level science is assumed.

Stage III

MARINE 302 15 Points
Dynamics of Marine Systems
Fundamental processes in the marine environment with an emphasis on interdisciplinary linkages in the functioning of marine ecosystems. Topics include: the role of fluid dynamics in the lives of marine animals and in shaping the physical marine environment, and interdisciplinary studies of marine ecosystems. No formal prerequisite although an understanding of marine science to the level of MARINE 202 will be assumed.

MARINE 303 15 Points
Freshwater and Estuarine Ecology
The structure, biodiversity and ecology of lakes, streams, wetlands and estuaries and linkages with near-shore marine habitats. Emphasis is placed on the role of science in monitoring and managing these ecosystems. Case studies include the impact of Auckland’s urban sprawl on stream, estuarine and near-shore marine habitats, and local estuaries as nurseries for fish.
Prerequisite: BIOSCI 206, or 104 and 15 points from BIOSCI 205, or 207 or 208 and STATS 101 or 108
Restriction: BIOSCI 330

MARINE 304 15 Points
Directed Study in Marine Science
Independent study on a topic in marine science under the guidance of an individual academic with similar interests to the student, involving the learning of specialist research techniques in a chosen subfield of marine science and the production of a scientific report.
Restriction: MARINE 399

MARINE 399 15 Points
Capstone: Marine Science
A capstone course for those enrolled in the Marine Science major, in which students demonstrate mastery of concepts and skills learnt during their degree through the production and presentation of an independent project developed in conjunction with a mentor from the academic staff.
Restriction: MARINE 304

Postgraduate 700 Level Courses

MARINE 701 15 Points
Current Issues in Marine Science
A seminar-based examination of selected current issues in Marine Science. Seminars will be jointly run using a web link between the universities of Auckland, Otago and Victoria. The topics and material will recognise the wide range of undergraduate experience across participants and emphasise the value of cross-disciplinary approaches to Marine Science.

MARINE 702 15 Points
Field Techniques in Marine Science
An advanced course in the development of practical skills in research design, implementation and analysis in Marine Science. Students participate in two field units: a compulsory field unit at the University of Auckland and a choice of either the unit offered by the University of Otago or the unit offered by Victoria University of Wellington. Each course focuses on different themes in Marine Science.

MARINE 703 15 Points
Marine Protected Areas
A review of current science related to MPA, including biogeographical and ecological principles in the design of marine reserve networks, MPA as controls in ecosystem research, conservation of biological diversity, interaction with fisheries, and case studies and experiences involving guest lecturers. Practicals may include visits to Goat Island marine reserve and other locations, and analysis and interpretation of data related to MPA.

Preparatory Courses

MATHS 91P 15 Points
Preparatory Mathematics 1
Aims to promote an understanding of number skills, including an introduction to algebra. Students will learn how to use simple technology and develop their problem solving abilities. Restriction: MATHS 91F

MATHS 93P 15 Points
Preparatory Mathematics 3
Aims to promote an understanding of numerical and algebraic skills at a deeper level than MATHS 91P. Students will learn how to use simple technology and develop their problem solving abilities. Restriction: MATHS 93F

Stage I

MATHS 102 15 Points
Functioning in Mathematics
An introduction to calculus that builds mathematical skills and develops conceptual thinking. MATHS 102 works as a refresher course for those who haven’t studied Mathematics for some time, a confidence builder for those lacking Mathematical confidence and a preparation course for further study in Mathematics. Restriction: MATHS 102 may not be taken concurrently with any other Mathematics course, except MATHS 190 and may not be taken after ENGSCI 111 or any Mathematics course at Stage I or above, except MATHS 190/190G

MATHS 108 15 Points
General Mathematics 1
A general entry to Mathematics for commerce and the social sciences, following Year 13 Mathematics. MATHS 108 covers selected topics in algebra and calculus and their applications, including: linear functions, linear equations and matrices; functions, equations and inequalities; limits and continuity; differential calculus of one and two variables; integral calculus of one variable. Recommended preparation: It is recommended that NCEA students have a rank score of at least 210 and a merit or excellence in the Differentiation Standard 91578. Prerequisite: MATHS 102 or at least 13 credits in Mathematics at NCEA Level 3 including the Differentiation Standard 91578, or D in CIE A2 Mathematics or C in CIE A5 Mathematics or 3 out of 7 in IB Mathematics. Restriction: MATHS 153, 208, 250, ENGGEN 150, ENGSCI 111. More than 15 points from MATHS 120 and 130. May not be taken with, or after, MATHS 110, 150

MATHS 110 15 Points
Mathematics for Science
A general entry to Mathematics for the natural sciences, following Year 13 Mathematics. Covers selected topics in algebra and calculus and their application to chemistry, biology and other natural sciences. Recommended Preparation: It is recommended that NCEA students have a rank score of at least 210 and a merit or excellence in the Differentiation Standard 91578. Prerequisite: MATHS 102 or 13 credits in Mathematics at NCEA Level 3, or D in CIE A2 Mathematics or C in CIE A5 Mathematics or 3 out of 7 in IB Mathematics. Restriction: MATHS 153, 208, 250, ENGGEN 150, ENGSCI 111. More than 15 points from MATHS 120 and 130. May not be taken with, or after, MATHS 108, 150
MATHS 120 15 Points
Algebra
A foundation for further mathematics courses, essential for students intending to major in Mathematics, Applied Mathematics, Statistics, Physics, or who want a strong mathematical component to their degree. Develops skills and knowledge in linear algebra, together with an introduction to mathematical language and reasoning, including complex numbers, induction and combinatorics. Recommended preparation: Merit or excellence in the Differentiation Standard 91578 at NCEA Level 3.
Prerequisite: B– in MATHS 108 or 110, or A+ in MATHS 102 or at least 18 credits in Mathematics at NCEA Level 3 including at least 9 credits at merit or excellence, or B in CIE A2 Mathematics, or 5 out of 7 in IB Mathematics or equivalent
Restriction: ENNGEN 150, ENGSCI 111, MATHS 150, 153

MATHS 130 15 Points
Calculus
A foundation for further mathematics courses, essential for students intending to major in Mathematics, Applied Mathematics, Statistics, Physics, or who want a strong mathematical component to their degree. Develops skills and knowledge in calculus of functions of a single variable. Recommended preparation: Merit or excellence in the Differentiation Standard 91578 at NCEA Level 3.
Prerequisite: B– in MATHS 108 or 110, or A+ in MATHS 102 or at least 18 credits in Mathematics at NCEA Level 3 including at least 9 credits at merit or excellence, or B in CIE A2 Mathematics, or 5 out of 7 in IB Mathematics or equivalent
Restriction: ENNGEN 150, ENGSCI 111, MATHS 150, 153

MATHS 153 15 Points
Accelerated Mathematics
A course containing material from MATHS 120, 130 and ENGSCI 111 for high achieving students to be taken while they are enrolled in Year 13 at school. Enrolment requires permission from Department.
Restriction: MATHS 108, 110, 120, 130, 150, ENGGEN 150, ENGSCI 111

MATHS 162 15 Points
Computational Mathematics
An introduction to computational mathematics and programming in MATLAB. The course will introduce some basic concepts in computational mathematics and give applications that include cryptography, difference equations, stochastic modelling, graph theory and Markov chains.
Corequisite: 15 points from MATHS 108, 110, 120, 150, 153, ENGSCI 111, ENGGEN 150

MATHS 190 15 Points
MATHS 190G 15 Points
Great Ideas Shaping our World
Mathematics contains many powerful and beautiful ideas that have shaped the way we understand our world. This course explores some of the grand successes of mathematical thinking. No formal mathematics background is required, just curiosity about topics such as infinity, paradoxes, cryptography, knots and fractals.
Restriction: MATHS 190 may not be taken after any Mathematics course at Stage III

Stage II
MATHS 202 15 Points
Learning Mathematics through Teaching
The practice of teaching provides unique opportunities for developing mathematical and pedagogical knowledge.

Through practical teaching sessions and discussions informed by research in Mathematics Education, students will make sense of common difficulties in mathematics learning and acquire effective ways for overcoming them.
Prerequisite: At least 30 points from courses in Mathematics including either MATHS 208 or 250

MATHS 208 15 Points
General Mathematics 2
This sequel to MATHS 108 features applications from the theory of multi-variable calculus, linear algebra and differential equations to real-life problems in statistics, economics, finance, computer science, and operations research. Matlab is used to develop analytical and numerical methods of solving problems.
Prerequisite: 15 points from MATHS 108, 110, 150, 153, ENNGEN 150, ENGSCI 111, or MATHS 120 and 130
Restriction: MATHS 208 cannot be taken, concurrently with, or after MATHS 250, 253 or PHYSICS 211

MATHS 250 15 Points
Advancing Mathematics 2
This preparation for advanced courses in mathematics is intended for all students who plan to progress further in mathematics. Covers topics from multivariable calculus and linear algebra that have many applications in science, engineering and commerce, including vector spaces, eigenvalues, power series, least squares and improper integrals. The emphasis is on both the results and the ideas underpinning these.
Prerequisite: MATHS 120 and 130, or 15 points from ENNGEN 150, ENGSCI 111, MATHS 150, 153, or a B+ in MATHS 208

MATHS 253 15 Points
Advancing Mathematics 3
The standard sequel to MATHS 250. It covers topics in linear algebra and multi-variable calculus including linear transformations, quadratic forms, double and triple integrals and constrained optimisation. It is a preparation for a large number of Stage III courses in mathematics and statistics, and for many advanced courses in physics and other applied sciences. All students intending to advance in mathematics should take this course.
Prerequisite: MATHS 250 or an A+ in MATHS 208
Restriction: PHYSICS 211

MATHS 255 15 Points
Principles of Mathematics
An introduction to mathematical thinking and communication: how to organise arguments logically and prove results. Rigorous notions are developed using topics that are central to the foundations of algebra and analysis including set theory, logic, abstract vector spaces and elementary number theory. An essential course for all students advancing in pure mathematics.
Prerequisite: MATHS 250 or an A+ in MATHS 208

MATHS 260 15 Points
Differential Equations
The study of differential equations is central to mathematical modelling of systems that change. Develops methods for understanding the behaviour of solutions to ordinary differential equations. Qualitative and elementary numerical methods for obtaining information about solutions are discussed, as well as some analytical techniques for finding exact solutions in certain cases. Some applications of
differential equations to scientific modelling are discussed. A core course for Applied Mathematics.

Prerequisite: MATHS 208 or 250 or ENGSCI 211 or a concurrent enrolment in MATHS 250

MATHS 270 15 Points

Numerical Computation

Many mathematical models occurring in Science and Engineering cannot be solved exactly using algebra and calculus. Students are introduced to computer-based methods that can be used to find approximate solutions to these problems. The methods covered in the course are powerful yet simple to use. This is a core course for students who wish to advance in Applied Mathematics.

Prerequisite: 30 points from MATHS 120 and 130, or 15 points from MATHS 108, 110, 150, 153, ENNGEN 150, ENGSCI 111, and 15 points from MATHS 162, COMPSCI 101, 105, 130, INFOSYS 110, 120 (recommended MATHS 162)

Stage III

MATHS 302 15 Points

Perspectives in Mathematics Education

For people interested in thinking about the social, cultural, political, economic, historical, technological and theoretical ideas that influence mathematics education, who want to understand the forces that shaped their own mathematics education, or who are interested in teaching. Students will develop their ability to communicate ideas in essay form. Recommended preparation: At least 45 points from courses in Mathematics or Statistics.

MATHS 307 15 Points

Special Topic in Mathematics Education 1

Both MATHS 307 and 308 deal with some special topic(s) of contemporary interest in mathematics education.

MATHS 308 15 Points

Special Topic in Mathematics Education 2

Both MATHS 307 and 308 deal with some special topic(s) of contemporary interest in mathematics education.

MATHS 310 15 Points

History of Mathematics

A study of some of the topics occurring in the history of mathematics which facilitate the understanding of modern mathematics. These include: concepts of number, geometry, algebra, and the differential and integral calculus.

Corequisite: At least 30 points at Stage III in Mathematics

MATHS 315 15 Points

Mathematical Logic

Logic addresses the foundations of mathematical reasoning. It models the process of mathematical proof by providing a setting and the rules of deduction. Builds a basic understanding of first order predicate logic, introduces model theory and demonstrates how models of a first order system relate to mathematical structures. The course is recommended for anyone studying high level computer science or mathematical logic.

Prerequisite: COMPSCI 225 or MATHS 255 or PHIL 222

MATHS 320 15 Points

Algebraic Structures

This is a framework for a unified treatment of many different mathematical structures. It concentrates on the fundamental notions of groups, rings and fields. The abstract descriptions are accompanied by numerous concrete examples. Applications abound: symmetries, geometry, coding theory, cryptography and many more. This course is recommended for those planning graduate study in pure mathematics.

Prerequisite: MATHS 255 or 328, or an A– pass in MATHS 253

MATHS 326 15 Points

Combinatorics

Combinatorics is a branch of mathematics that studies collections of objects that satisfy specified criteria. An important part of combinatorics is graph theory, which is now connected to other disciplines including bioinformatics, electrical engineering, molecular chemistry and social science. The use of combinatorics in solving counting and construction problems is covered using topics that include algorithmic graph theory, codes and incidence structures, and combinatorial complexity.

Prerequisite: MATHS 255, or COMPSCI 225 and a B+ in MATHS 208, or COMPSCI 225 and any pass in MATHS 250

MATHS 328 15 Points

Algebra and Applications

The goal of this course is to show the power of algebra and number theory in the real world. It concentrates on concrete objects like polynomial rings, finite fields, groups of points on elliptic curves, studies their elementary properties and shows their exceptional applicability to various problems in information technology including cryptography, secret sharing, and reliable transmission of information through an unreliable channel.

Prerequisite: MATHS 255, or B+ pass in COMPSCI 225 and one of MATHS 208, 250, 253

MATHS 332 15 Points

Real Analysis

A standard course for every student intending to advance in pure mathematics. It develops the foundational mathematics underlying calculus, it introduces a rigorous approach to continuous mathematics and fosters an understanding of the special thinking and arguments involved in this area. The main focus is analysis in one real variable with the topics including real fields, limits and continuity, Riemann integration and power series.

Prerequisite: MATHS 255, or an A in both MATHS 253 and MATHS 260 or MATHS 250 and a concurrent enrolment in MATHS 255

MATHS 333 15 Points

Analysis in Higher Dimensions

By selecting the important properties of distance many different mathematical contexts are studied simultaneously in the framework of metric and normed spaces. Examines carefully the ways in which the derivative generalises to higher dimensional situations. These concepts lead to precise studies of continuity, fixed points and the solution of differential equations. A recommended course for all students planning to advance in pure mathematics.

Prerequisite: MATHS 332

MATHS 334 15 Points

Algebraic Geometry

Algebraic geometry is a branch of mathematics studying zeros of polynomials. The fundamental objects in algebraic geometry are algebraic varieties i.e., solution sets of systems of polynomial equations.

Prerequisite: MATHS 332, and at least one of MATHS 320, 328 and Departmental approval

Restriction: MATHS 734

MATHS 340 15 Points

Real and Complex Calculus

Calculus plays a fundamental role in mathematics, answering deep theoretical problems and allowing us to solve very
practical problems. Extends the ideas of calculus to two and higher dimensions, showing how to calculate integrals and derivatives in higher dimensions and exploring special relationships between integrals of different dimensions. It also extends calculus to complex variables.

Prerequisite: MATHS 253

MATHS 341 15 Points
Complex Analysis
Functions of one complex variable, including Cauchy’s integral formula, the index formula, Laurent series and the residue theorem. Many applications are given including a three line proof of the fundamental theorem of algebra. Complex analysis is used extensively in engineering, physics and mathematics. Strongly recommended: MATHS 333.

Prerequisite: MATHS 332 and Departmental approval
Restriction: MATHS 740

MATHS 353 15 Points
Geometry and Topology
A selection of topics providing an introduction to a range of concepts in geometry and general topology, with emphasis on visualisable aspects of these subjects. Topics include some or all of the following: axiom systems, affine geometry, Euclidean and non-Euclidean geometry, projective geometry, symmetry, convexity, the geometric topology of manifolds, and algebraic structures associated with topological spaces.

Prerequisite: MATHS 255

MATHS 361 15 Points
Partial Differential Equations
Partial differential equations (PDEs) are used to model many important applications of phenomena in the real world such as electric fields, diffusion and wave propagation. An introduction to linear PDEs and analytical methods for their solution. The course will also cover weak solutions.

Prerequisite: MATHS 260 and 253, or PHYSICS 211

MATHS 362 15 Points
Methods in Applied Mathematics
Covers a selection of techniques including the calculus of variations, asymptotic methods and models based on conservation laws. These methods are fundamental in the analysis of traffic flow, shocks, fluid flow, as well as in control theory, and the course is recommended for students intending to advance in Applied Mathematics. Recommended preparation: MATHS 361.

Prerequisite: MATHS 260 and 253, or PHYSICS 211

MATHS 363 15 Points
Advanced Modelling and Computation
In real-world situations, the interesting and important variables are often not directly observable. To address this problem, mathematical models and quantities that are observable are usually employed to carry out inference on the variables of interest. This course is an introduction to fitting of models to (noisy) observational data and how to compute estimates for the interesting variables. Numerical methods for partial differential equations, which are commonly used as models for the observations, will also be covered.

Prerequisite: MATHS 260 and 270

MATHS 381 15 Points
Special Topic in Mathematics 1

MATHS 382 15 Points
MATHS 382A 7.5 Points
MATHS 382B 7.5 Points
Special Topic in Mathematics 2

MATHS 383 15 Points
Special Topic in Mathematics 3

MATHS 384 15 Points
Special Topic in Mathematics 4
Each of these courses deals with some special topic(s) of contemporary interest in pure mathematics. Not all of them are offered every year; further information may be obtained from the Department of Mathematics.

MATHS 386 15 Points
MATHS 386A 7.5 Points
MATHS 386B 7.5 Points
Special Topic in Applied Mathematics 1
To complete this course students must enrol in MATHS 386 A and B, or MATHS 386

MATHS 387 15 Points
Special Topic in Applied Mathematics 2
Each of these courses deals with some special topic(s) of contemporary interest in pure mathematics. Not all of them are offered every year; further information may be obtained from the Department of Mathematics.

MATHS 388 15 Points
Special Topic in Applied Mathematics 3
Each of these courses deals with some special topic(s) of contemporary interest in pure mathematics. Not all of them are offered every year; further information may be obtained from the Department of Mathematics.

MATHS 389 15 Points
Special Topic in Applied Mathematics 4
Each of these courses deals with some special topic(s) of contemporary interest in applied and computational mathematics. Not all of them are offered every year; further information may be obtained from the Department of Mathematics.

MATHS 399 15 Points
Capstone: Mathematics
An exploration of the role of mathematics in society and culture, and the activities performed by mathematicians as teachers, critics, and innovators. Students will develop their skills in communication, critical thinking, teaching, and creative problem solving.

Prerequisite: MATHS 250 and 30 points at Stage III in Mathematics

Postgraduate 700 Level Courses

MATHS 701 15 Points
Research Skills in Mathematics Education
Prepares students for postgraduate study in mathematics and statistics education. Its emphasis is on workshops in the key research skills required by students working at this level. It will cover a range of research issues and techniques.

Prerequisite: MATHS 302 or significant teaching experience or department approval

MATHS 702 15 Points
Mathematics Curriculum
A theoretical approach to mathematical curricula, broadly interpreted, with particular emphasis on cultural and linguistic perspectives, especially Māori. Additional
issues will include a selection from history of mathematics curricula, influences on the development of a mathematics curriculum, and the aims and objectives of secondary and tertiary mathematics curricula.

MATHS 703 15 Points
Theoretical Issues in Mathematics Education
An analysis of theoretical perspectives that inform research in mathematics education, with a focus on learning theories, both social and psychological, and their implications for teaching and learning in mathematics.
Prerequisite: MATHS 302 or significant teaching experience or department approval

MATHS 705 15 Points
Socio-political Issues in Mathematics Education
Examines mathematics teaching and learning from a sociological perspective. Topics covered will include gender differences in mathematics, grouping students by ability vs. mixed ability teaching, and the performance of students from working class and ethnic minority backgrounds. Equity issues will be a central focus, and we will discuss the ways in which sociological ideas complement other approaches to research in mathematics education.
Prerequisite: MATHS 302 or significant teaching experience or department approval

MATHS 706 15 Points
Technology and Mathematics Education
Practical and theoretical perspectives on ways that technology, especially calculators and computers, can enhance teaching at senior secondary and university levels, with a particular focus on calculus. Identification of affordances, constraints and obstacles in the use of technology. Consideration of issues of teacher and lecturer development in implementation of technology.
Prerequisite: MATHS 302 or significant teaching experience or department approval

MATHS 707 15 Points
Special Topics in Mathematics Education 1
Prerequisite: MATHS 302 or significant teaching experience or department approval

MATHS 708 15 Points

MATHS 711 30 Points
MATHS 711A 15 Points
MATHS 711B 15 Points
Special Topics in Mathematics Education 5
Prerequisite: MATHS 302 or significant teaching experience or department approval
To complete this course students must enrol in MATHS 711 A and B, or MATHS 711

MATHS 712 15 Points
Teaching and Learning in Algebra
Recent theoretical perspectives on the teaching and learning of school and university mathematics are linked to the learning of either calculus or algebra. The focus is on the mathematics content, applications, and effective learning at school and university. Students taking this course should normally have studied mathematics or statistics at 200 level.
Prerequisite: MATHS 302 or significant teaching experience or department approval

MATHS 713 15 Points
Logic and Set Theory
A study of the foundations of pure mathematics, formalising the notions of a ‘mathematical proof’ and ‘mathematical structure’ through predicate calculus and model theory. It includes a study of axiomatic set theory.
Prerequisite: MATHS 315 or PHIL 305

MATHS 714 15 Points
Number Theory
A broad introduction to various aspects of elementary, algebraic and computational number theory and its applications, including primality testing and cryptography.
Prerequisite: B+ in MATHS 328 or 320

MATHS 715 15 Points
Graph Theory and Combinatorics
A study of combinatorial graphs (networks), designs and codes illustrating their application and importance in other branches of mathematics and computer science.
Prerequisite: B+ pass in MATHS 326 or 320

MATHS 720 15 Points
Group Theory
A study of groups focusing on basic structural properties, presentations, automorphisms and actions on sets, illustrating their fundamental role in the study of symmetry (for example in crystal structures in chemistry and physics), topological spaces, and manifolds.
Prerequisite: MATHS 320

MATHS 721 15 Points
Representations and Structure of Algebras and Groups
Representation theory studies properties of abstract groups and algebras by representing their elements as linear transformations of vector spaces or matrices, thus reducing many problems about the structures to linear algebra, a well-understood theory.
Prerequisite: MATHS 320

MATHS 725 15 Points
Lie Groups and Lie Algebras
Symmetries and invariants play a fundamental role in mathematics. Especially important in their study are the Lie groups and the related structures called Lie algebras. These structures have played a pivotal role in many areas, from the theory of differential equations to the classification of elementary particles. Strongly recommended for students advancing in theoretical physics and pure mathematics. Recommended preparation: MATHS 333.
Prerequisite: MATHS 320 and 332

MATHS 730 15 Points
Measure Theory and Integration
Presenting the modern elegant theory of integration as developed by Riemann and Lebesgue, it includes powerful theorems for the interchange of integrals and limits so allowing very general functions to be integrated, and illustrates how the subject is both an essential tool for analysis and a critical foundation for the theory of probability. Strongly recommended: MATHS 333.
Prerequisite: MATHS 332
MATHS 731 15 Points
**Functional Analysis**
Provides the mathematical foundations behind some of the techniques used in applied mathematics and mathematical physics; it explores how many phenomena in physics can be described by the solution of a partial differential equation, for example the heat equation, the wave equation and Schrödinger's equation. Recommended preparation: MATHS 730 and 750.
Prerequisite: MATHS 332 and 333

MATHS 734 15 Points
**Algebraic Geometry**
Algebraic geometry is a branch of mathematics studying zeros of polynomials. The fundamental objects in algebraic geometry are algebraic varieties i.e., solution sets of systems of polynomial equations.
Prerequisite: MATHS 332 and at least one of MATHS 320, 328

MATHS 735 15 Points
**Analysis on Manifolds and Differential Geometry**
Studies surfaces and their generalisations, smooth manifolds, and the interaction between geometry, analysis and topology; it is a central tool in many areas of mathematics, physics and engineering. Topics include Stokes' theorem on manifolds and the celebrated Gauss Bonnet theorem. Strongly recommended: MATHS 333 and 340.
Prerequisite: MATHS 332

MATHS 740 15 Points
**Complex Analysis**
An introduction to functions of one complex variable, including Cauchy's integral formula, the index formula, Laurent series and the residue theorem. Many applications are given including a three line proof of the fundamental theorem of algebra. Complex analysis is used extensively in engineering, physics and mathematics. Strongly recommended: MATHS 333.
Prerequisite: MATHS 332
Restriction: MATHS 341

MATHS 750 15 Points
**Topology**
Aspects of point-set, set-theoretic and algebraic topology including: properties and construction of topological spaces, continuous functions, axioms of separation, countability, connectivity and compactness, metrization, covering spaces, the fundamental group and homology theory. Strongly recommended: MATHS 333.
Prerequisite: MATHS 332

MATHS 761 15 Points
**Dynamical Systems**
Mathematical models of systems that change are frequently written in the form of nonlinear differential equations, but it is usually not possible to write down explicit solutions to these equations. This course covers analytical and numerical techniques that are useful for determining the qualitative properties of solutions to nonlinear differential equations.
Prerequisite: B– in both MATHS 340 and 361

MATHS 762 15 Points
**Nonlinear Partial Differential Equations**
A study of exact and numerical methods for non-linear partial differential equations. The focus will be on the kinds of phenomena which only occur for non-linear partial differential equations, such as blow up, shock waves, solitons and special travelling wave solutions.
Prerequisite: B– in both MATHS 340 and 361

MATHS 763 15 Points
**Advanced Partial Differential Equations**
A study of exact and approximate methods of solution for the linear partial differential equations that frequently arise in applications.
Prerequisite: B– in both MATHS 340 and 361

MATHS 764 15 Points
**Mathematical Biology**
A course introducing central concepts in mathematical biology, with emphasis on modelling of physiological systems and gene dynamics.
Prerequisite: B– in both MATHS 340 and 361

MATHS 765 15 Points
**Mathematical Modelling**
Advanced topics in mathematical modelling, including selected topics in a range of application areas, principally taken from the physical and biological sciences.
Prerequisite: At least B– or better in both MATHS 340 and 361

MATHS 766 15 Points
**Inverse Problems**
Covers the mathematical and statistical theory and modelling of unstable problems that are commonly encountered in mathematics and applied sciences.
Prerequisite: At least B– in both MATHS 340 and 363, or PHYSICS 701

MATHS 769 15 Points
**Stochastic Differential and Difference Equations**
Differential and difference equations are often used as preliminary models for real world phenomena. The practically relevant models that can explain observations are, however, often the stochastic extensions of differential and difference equations. This course considers stochastic differential and difference equations and applications such as estimation and forecasting.
Prerequisite: B– in both MATHS 340 and 361

MATHS 770 15 Points
**Advanced Numerical Analysis**
Covers the use, implementation and analysis of efficient and reliable numerical algorithms for solving several classes of mathematical problems. The course assumes students have done an undergraduate course in numerical methods and can use Matlab or other high-level computational language.
Prerequisite: B– in MATHS 270, 340 and 361

MATHS 776 30 Points
MATHS 776A 15 Points
MATHS 776B 15 Points
**Honours Dissertation in Mathematics or Applied Mathematics**
Restriction: MATHS 791
To complete this course students must enrol in MATHS 776 A and B, or MATHS 776

MATHS 777 15 Points
**Project in Mathematics**
A supervised investigation or research project including seminar presentation in pure or applied mathematics.
Restriction: MATHS 792

MATHS 781 15 Points
**Advanced Topic(s) in Mathematics**
Each of these courses deals with some special topic(s) from pure mathematics. Not all of them are offered every year;
MATHS 782 15 Points
Advanced Topic(s) in Mathematics 2
Each of these courses deals with some special topic(s) from pure mathematics. Not all of them are offered every year; further information may be obtained from the Department of Mathematics.

MATHS 783 15 Points

Research Portfolio in Mathematics Education
A portfolio of supervised research work in mathematics education drawing on personal experience in teaching mathematics.
To complete this course students must enrol in MATHS 790 A and B

MATHS 791 15 Points
Honours Dissertation in Mathematics or Applied Mathematics

MATHS 792 30 Points
MATHS 792A 15 Points
MATHS 792B 30 Points
Research in Mathematics Education
A portfolio of research work that will include a Research Case Study of a mathematics learner or teacher, a literature investigation and a research proposal for a larger study.
Prerequisite: 30 points from Stage II courses in Mathematics or Statistics. MATHS 202 may not be taken as a prerequisite for this course.
To complete this course students must enrol in MATHS 792 A and B, or MATHS 792

MATHS 793 15 Points
Project in Mathematics 2
Each of these courses involves participation in a research project or investigation in some topic from pure or applied mathematics, under the supervision of one or more staff members, and presentation, by the student, of the results in a seminar; further information may be obtained from the Department of Mathematics.

MATHS 794 30 Points

Foundation Courses

PHYSICS 91F 15 Points
Foundation Physics 1
An introductory course for students who have not previously studied physics. Topics include the nature of light; wave motion; basic mechanics of motion in a straight line,
including the concepts of momentum and energy; an introduction to heat.

**Restriction:** PHYSICS 91P

**PHYSICS 92F** 15 Points

**Foundation Physics 2**

A second foundation course for students who understand the basic mechanics of motion in a straight line. Further mechanics, including equilibrium, projectile motion, rotational motion and gravitation. Electromagnetism, including electrostatics, elementary circuits and the effects of magnetic fields.

**Preparatory Courses**

**PHYSICS 91P** 15 Points

**Preparatory Physics 1**

A preparatory course for students who have not previously studied physics. Topics include the nature of light; wave motion; basic mechanics of motion in a straight line, including the concepts of momentum and energy; an introduction to heat.

**Restriction:** PHYSICS 91F

**Stage I**

**PHYSICS 102** 15 Points

**Basic Concepts of Physics**

An introduction to the basic principles of physics. Key topics are the physical description of motion, electricity and magnetism. The course focuses on the science of everyday phenomena and the understanding of important physical concepts. This course will equip students with little prior knowledge of physics to succeed in PHYSICS 120 or 160.

**Restriction:** PHYSICS 103

**PHYSICS 107** 15 Points

**PHYSICS 107G** 15 Points

**Planets, Stars and Galaxies**

This course tells the story of our place in the Universe. Key topics are the exploration of the solar system, searches for planets around other stars, the structure and evolution of stars and galaxies, high-energy astrophysics, and the origin and overall properties of the Universe. No background in physics or mathematics is assumed.

**PHYSICS 120** 15 Points

**Advancing Physics 1**

For students progressing in physical science. Key topics are mechanics, energy, rotation, oscillations, waves and thermodynamics. This is a calculus based course, focusing on fundamental principles, problem solving and hands-on exercises.

**Restriction:** PHYSICS 160

**PHYSICS 121** 15 Points

**Advancing Physics 2**

For students progressing in physical science. Key topics are electrostatics, electromagnetism, circuits, optics, relativity and quantum mechanics. This is a calculus based course, focusing on fundamental principles, problem solving and hands-on exercises. Recommended preparation is PHYSICS 120 or NCEA Level 3 Physics and Mathematics, or equivalent.

**Restriction:** PHYSICS 150

**PHYSICS 140** 15 Points

**Digital Fundamentals**

An introduction to the physical basis of modern computing for Computer Science students and anyone with an interest in modern Information Technology. Key topics are Boolean Algebra, logic circuits, and digital information processing. Hands-on laboratory work is a key component of the course. No prior electronics or programming knowledge is assumed.

**Restriction:** PHYSICS 219, 243

**PHYSICS 160** 15 Points

**Physics for the Life Sciences**

Designed for students intending to advance in the biomedical and life sciences, this course is focused on physical principles relevant to biological systems. Key topics are motion, waves, thermal physics, electricity and instrumentation. The course is primarily algebra-based and includes lectures, laboratories and tutorials. Recommended preparation is NCEA Level 2 Physics and Mathematics, or equivalent.

**Restriction:** PHYSICS 120

**Stage II**

**PHYSICS 201** 15 Points

**Classical and Thermal Physics**

Classical mechanics and thermal physics. Key topics are linear and rotational motion in three dimensions, fluids, oscillations and mechanical waves, and the laws of thermodynamics. The course will cover both fundamental principles and applied topics, such as planetary dynamics and spacecraft navigation, ultrasound, atmospheric physics and materials science.

**Prerequisite:** 15 points from PHYSICS 120, 121, 150 and 15 points from ENGSCI 211, MATHS 208, 250, PHYSICS 211

**Restriction:** PHYSICS 230, 231

**PHYSICS 202** 15 Points

**Electromagnetism**

Key topics are electric and magnetic fields, the generation of magnetic fields by currents, the derivation of Maxwell’s equations, the interpretation of light as an electromagnetic wave and polarisation. Both fundamental principles and applied topics, including fibre optics, LEDs, physical optics and interferometers are covered.

**Prerequisite:** 15 points from PHYSICS 121, 150 and 15 points from ENGSCI 211, MATHS 208, 250, PHYSICS 211

**Restriction:** PHYSICS 260, 261

**PHYSICS 203** 15 Points

**Relativity and Quantum Physics**

Special relativity, quantum mechanics and nuclear physics. Key topics are the Lorentz transformation, mass-energy equivalence, the Schrödinger equation in one dimension, the hydrogen atom, atomic and molecular bonds, isotopes and radioactivity. Both fundamental principles and applied topics, including isotope production, nuclear medicine, and dosimetry are covered.

**Prerequisite:** 15 points from PHYSICS 121, 150 and 15 points from ENGSCI 211, MATHS 208, 250, PHYSICS 211

**Restriction:** PHYSICS 250, 251

**PHYSICS 244** 15 Points

**Electronics and Imaging**

Provides students with skills in electronics and imaging technologies that will support future work in technology-focused careers, experimental science, medical physics, and photonics. Key topics include networks, resonance, amplifiers, semiconductors, Fourier analysis, imaging systems, MRI systems and biomedical imaging.

**Prerequisite:** 15 points from PHYSICS 120, 160 and 15 points from ENGEN 150, ENGSCI 111, MATHS 108, 110, 120, 130, 150

**Restriction:** PHYSICS 240
Phys 245
Frontiers of Physics
Surveys the research frontier in physics and astrophysics. Topics will be drawn from gravitational wave detection and black holes, searches for extrasolar planets, complexity theory and networks, lasers and frequency combs, Bose-Einstein condensates, Bell’s Theorem and quantum technology.
Prerequisite: 15 points from PHYSICS 121, 150 and 15 points from ENGSCI 211, MATHS 208, 250, PHYSICS 211

Phys 309
Special Study
Directed study on a topic or topics approved by the Academic Head or nominee.

Phys 331
Classical Mechanics and Electrodynamics
Advanced topics in classical mechanics and electromagnetism, including variational and least action principles in mechanics, the physical basis of magnetism, and the four-vector treatment of special relativity and electromagnetism.
Prerequisite: 15 points from PHYSICS 201, 231, 15 points from PHYSICS 202, 261 and 15 points from PHYSICS 211, MATHS 253, 260, ENGSCI 211
Restriction: PHYSICS 315, 325

Phys 332
Fluid Mechanics
Surveys fluid mechanics using the Navier-Stokes equations, covering Newtonian and simple non-Newtonian fluids, and examples from soft condensed matter. Different flow regimes will be studied, from small-scale laminar flows to large-scale turbulent and potential flows, and flows in rotating frames of reference. Applications range from microfluidics to geophysical fluids. Numerical approaches and computational tools will be introduced.
Prerequisite: 15 points from PHYSICS 201, 231 and 15 points from PHYSICS 211, MATHS 253, 260, ENGSCI 211

Phys 333
Lasers and Electromagnetic Waves
Surveys the basic principles of lasers and explains how the behaviour and propagation of light can be understood in terms of electromagnetic waves described by Maxwell’s equations. The theory and applications of several key optical components will be described, including lasers and resonators.
Prerequisite: 15 points from PHYSICS 202, 261 and 15 points from PHYSICS 211, MATHS 253, 260, ENGSCI 211
Restriction: PHYSICS 326

Phys 334
Statistical Physics and Condensed Matter
Covers statistical physics and condensed matter physics, and describes how macroscopic properties of physical systems arise from microscopic dynamics. Topics in statistical physics include temperature, the partition function and connections with classical thermodynamics. Topics in condensed matter physics include crystal structures, phonons, electronic band theory, and semiconductors.
Prerequisite: 15 points from PHYSICS 201, 231, 15 points from PHYSICS 202, 251 and 15 points from PHYSICS 211, MATHS 253, 260, ENGSCI 211
Restriction: PHYSICS 315, 354

Phys 335
Quantum Mechanics
Develops non-relativistic quantum mechanics with applications to the physics of atoms and molecules and to quantum information theory. Topics include the Stern-Gerlach effect, spin-orbit coupling, Bell’s inequalities, interactions of atoms with light, and the interactions of identical particles.
Prerequisite: 15 points from PHYSICS 203, 251 and 15 points from PHYSICS 211, MATHS 253, 260, ENGSCI 211
Restriction: PHYSICS 350

Phys 340
Electronics and Signal Processing
Electronics and digital signal processing with a strong emphasis on practical circuit design and data acquisition techniques. Topics will be selected from: linear circuit theory, analytical and numeric network analysis, feedback and oscillation, operational amplifier circuits, Fourier theory, sampling theory, digital filter design, and the fast Fourier transform.
Prerequisite: 15 points from PHYSICS 240, 244 and 15 points from PHYSICS 211, MATHS 253, 260, ENGSCI 211
Restriction: PHYSICS 341
Concurrent enrolment in PHYSICS 390 is recommended

Phys 356
Particle Physics and Astrophysics
Particle physics topics covered will include relativistic dynamics and application to fundamental particle interactions, the properties of strong, weak and electromagnetic interactions and the particle zoo. Astrophysics topics will include some of the following: the Big Bang, “concordance cosmology”, redshifts, theories of dark matter, extra-solar planets, stellar evolution, supernovae, gravitational wave sources, nuclear astrophysics and the origin of the elements.
Prerequisite: 15 points from PHYSICS 201, 231, 15 points from PHYSICS 203, 251 and 15 points from PHYSICS 211, MATHS 253, 260, ENGSCI 211
Restriction: PHYSICS 355
Concurrent enrolment in PHYSICS 390 is recommended

Phys 371
Special Topics in Physics

Phys 390
Experimental Physics
Covers advanced experimental techniques, giving students choices between a wide range of classic physics experiments and open-ended investigations of physical phenomena.
Prerequisite: 15 points from PHYSICS 201, 202, 231, 240, 244, 251, 261

Phys 399
Capstone: Physics
Students will undertake experimental, observational, computational and numerical investigations of key physical phenomena, working individually and in groups, producing both written and oral reports.
Prerequisite: 30 points from PHYSICS 201, 202, 203, 231, 240, 244, 251, 261
Restriction: PHYSICS 390, 391

Diploma Courses

Phys 625
Selected Topics 1
Enrolment requires approval of the Head of Department and the choice of subject will depend on staff availability or on the needs of particular students.

Phys 626
Selected Topics 2
Enrolment requires approval of the Head of Department and
the choice of subject will depend on staff availability or on the needs of particular students.

PHYSICS 681 15 Points
Experimental Physics
A selection of experiments appropriate to the student’s lecture courses for the Diploma. Requires the approval of the Head of Department.

PHYSICS 690A 15 Points
PHYSICS 690B 15 Points
Graduate Diploma Dissertation (Physics)
To complete this course students must enrol in PHYSICS 690 A and B

PHYSICS 691 30 Points
PHYSICS 691A 15 Points
PHYSICS 691B 15 Points
PG Diploma Dissertation (Physics)
To complete this course students must enrol in PHYSICS 691 A and B, or PHYSICS 691

Postgraduate 700 Level Courses

PHYSICS 703 15 Points
Advanced Quantum Mechanics
An advanced development of nonrelativistic quantum mechanics in the Dirac formulation is presented. Emphasis is placed on the simplicity and generality of the formal structure, lifting the reliance of introductory courses on wave mechanics.

PHYSICS 715 15 Points
Selected Topics 1
Enrolment requires approval of the Head of Department and the choice of subject will depend on staff availability or on the needs of particular students.

PHYSICS 741 15 Points
Advanced Classical Mechanics and Electrodynamics
Develops and deepens students’ knowledge and understanding of advanced topics in classical mechanics and electromagnetism, including variational and least action principles in mechanics, the physical basis of magnetism; and the four-vector treatment of special relativity and electromagnetism.
Restriction: PHYSICS 331, 705

PHYSICS 742 15 Points
Advanced Statistical Mechanics and Condensed Matter
Advanced concepts in statistical mechanics and condensed matter. Topics to be covered include the theory of magnetism, mean field theory, the Ising model, superconductivity, phase transitions, complex systems, and networks.
Restriction: PHYSICS 708

PHYSICS 743 15 Points
Waves and Potentials
Presents the universal mathematical physics of waves and potential fields and discusses related applications. Topics include derivations and solutions for electromagnetic and elastic wave equations, propagation of waves in media, reflection and transmission of waves at interfaces, guided waves in geophysics and optics, and fundamentals of potential theory.

PHYSICS 746 15 Points
Relativistic Quantum Mechanics and Field Theory
Examines quantum field theory. Covers the relativistic generalisations of the Schrödinger equation and many-particle quantum mechanics, quantum electrodynamics is explored using Feynman diagram techniques. Extensions of scalar field theory to include path integrals, statistical field theory, broken symmetry, renormalisation and the renormalisation group.
Restriction: PHYSICS 706, 755

PHYSICS 748 15 Points
General Relativity
Discusses Einstein’s General Theory of Relativity with application to astrophysical problems, drawn from black hole physics, gravitational waves, cosmology, astrophysical lensing and solar system and terrestrial tests of the theory. The course includes the mathematical background needed to describe curved spacetimes in arbitrary coordinate systems and the covariant description of fundamental physical relationships.

PHYSICS 751 15 Points
Selected Topics 2
Enrolment requires approval of the Head of Department and the choice of subject will depend on staff availability or on the needs of particular students.

PHYSICS 752 15 Points
Photonics
Advanced topics in photonics including optical detection, semiconductor and mode locked lasers, the propagation of light in optical fibres, and the physics and applications of nonlinear optics.
Restriction: PHYSICS 726, 727

PHYSICS 753 15 Points
The Dynamic Universe
Covers topics in modern astronomy and astrophysics relating to the evolution and dynamics of key astrophysical systems. Topics will be drawn from: stellar structure and stellar evolution; the formation of planets and the evolution of planetary systems; stellar and galactic dynamics; the large scale dynamical behaviour of the expanding universe.

PHYSICS 754 15 Points
Condensed Matter Physics
Covers topics and methods that are important for current condensed matter research. Topics include ferroelectricity, soft condensed matter, experimental materials physics, electronic structure theory, techniques for condensed matter simulation, and renormalisation group theory.

PHYSICS 757 15 Points
Quantum Optics and Quantum Information
The nonrelativistic quantum treatment of electromagnetic radiation (light) and its interaction with matter (atoms, quantum dots, superconducting qubits) is presented. Emphasis is placed on what is strictly quantum mechanical about light compared with a description in terms of Maxwell waves, and on the concepts and methods underlying modern advances in quantum measurement theory and quantum technologies, e.g., quantum communication/quantum cryptography and quantum simulation/computation.
Restriction: PHYSICS 760

PHYSICS 780 15 Points
Advanced Imaging Technologies
Covers the physical basis and use of new imaging technologies and data processing in medicine, biomedicine and biotechnology. Makes use of practical examples from techniques such as computer assisted tomography, nonlinear microscopy, optical coherence tomography, fluorescence or microarray analysis. No formal prerequisite, but an understanding of material to at least a B grade standard in PHYSICS 244, 340, and 15 points from PHYSICS 211, MATHS 253, 260, ENGSCI 211 is recommended.
Stage II

PSYCH 200 15 Points
Special Topic

PSYCH 201 15 Points
Perception and Cognition
An introduction to a variety of topics in human experimental psychology. Topics covered may include: perceptual processes, attention, memory, mental imagery, language development, theory of mind, problem solving and decision making. Participation in the laboratory component of this course is compulsory.
Prerequisite: 30 points at Stage I Psychology

PSYCH 202 15 Points
Biopsychology
Provides a basic introduction to the structure and function of the brain, neuropsychology, and genetic and hormonal influences on behaviour. This course includes a compulsory laboratory component.
Prerequisite: 30 points at Stage I Psychology or 15 points from BIOSCI 101, 103

PSYCH 203 15 Points
Learning and Behaviour
A consideration of the environmental factors that control and modify animal (including human) behaviour. Generally, an experimental laboratory approach is taken, and quantitative theories are stressed. Topics include: classical and operant conditioning, theories of reinforcement, the stimulus control of operant behaviour, behavioural analyses of problem solving, concept learning and language, choice, self control, remembering and experimental design. This course includes a compulsory laboratory component.
Prerequisite: 30 points at Stage I Psychology or 15 points from BIOSCI 101, 103

PSYCH 204 15 Points
Social Psychology
Focuses on humans as social beings. Covers topics such as social cognition, attitudes, group processes, interpersonal relationships, and language communication. The course may include participation in and completion of a research project.
Prerequisite: 30 points at Stage I Psychology

PSYCH 207 15 Points
Theories of Personality and Development
The major personality theories are presented including: Behavioural, Cognitive, Social-Cognitive, Psychodynamic, Humanistic/Phenomenological, Trait/Dispositional and Biological/Evolutionary. The hypotheses generated by these theories, about development from early childhood onwards and about ‘normal’ and ‘abnormal’ behaviour, will be discussed and evaluated in terms of empirical evidence and utility. Attention will be paid to cultural issues of relevance in a New Zealand context.
Prerequisite: 30 points at Stage I in Psychology

PSYCH 208 15 Points
Producing Psychological Knowledge
How do you go about answering a research question? What is a research question anyway? Which research methodology and method will best provide the types of answers you are looking for? Examines what we do and can know in psychology, and why and how we know it, including philosophy of science, methodology, ethics, research outcomes, and particular methods.
Prerequisite: 30 points at Stage I in Psychology
Stage III

PSYCH 300 15 Points
Applied Psychology
Discusses psychological issues relating to illnesses and well-being of people in the workplace. Consideration will be given both to the theoretical models which have been developed and to the types of methodology used in their investigation. Emphasis is given to the interplay between science and practice.
Prerequisite: 45 points at Stage II in Psychology and 15 points from STATS 101-125, 191

PSYCH 302 15 Points
Special Topic
Prerequisite: 45 points at Stage II Psychology and 15 points from STATS 101-125, 191

PSYCH 303 15 Points
Cognitive Science
Provides an introduction to cognitive science and cognitive neuroscience. Topics covered include: visual and auditory perception, attention, memory, thinking and problem-solving. Participation in the laboratory component of this course is compulsory.
Prerequisite: 45 points at Stage II Psychology and 15 points from STATS 101-125, 191

PSYCH 304 15 Points
Special Topic
Prerequisite: 45 points at Stage II Psychology and 15 points from STATS 101-125, 191

PSYCH 305 15 Points
Human Neuroscience
Covers material relating to the neural basis of cognitive processes, including perception, attention, memory and language. Students will be introduced to different methods of inferring mind-brain relations in normal and neurologically-impaired individuals, and different ways of conceptualising mind-brain relations, such as connectionism and modularism.
Prerequisite: 45 points at Stage II Psychology and 15 points from STATS 101-125, 191, or 15 points from either PHYSIOL 220 or MEDSCI 206

PSYCH 306 15 Points
Research Methods in Psychology
Deals with principles and practices relevant to psychological research, including philosophy of science, research ethics, research design, measurement of dependent variables, describing and analysing data, and interpreting results. Participation in the laboratory component of this course is compulsory.
Prerequisite: 45 points at Stage II Psychology and 15 points from STATS 101-125, 191

PSYCH 308A 7.5 Points
PSYCH 308B 7.5 Points
Directed Study
A course of research supervised by a staff member and written up as a course for publication instead of a final examination.
Prerequisite: 45 points at Stage II in Psychology and 15 points from STATS 101-125, 191
Corequisite: Student must be enrolled in (or have completed) an additional 45 points at Stage III in Psychology courses plus Head of School approval
To complete this course students must enrol in PSYCH 308 A and B

PSYCH 309 15 Points
Learning
A discussion of how behaviour is controlled and modified by discriminative stimuli and by consequential reinforcers and punishers. The emphasis is on laboratory research with animals, but with some human data also considered. Topics include: choice behaviour, punishment, avoidance, psychophysics, memory, and cognition. This course includes a compulsory laboratory component.
Prerequisite: 45 points at Stage II Psychology and 15 points from STATS 101-125, 191 or 45 points at Stage II in Biological Sciences Restriction: PSYCH 362

PSYCH 310 15 Points
Introduction to Clinical Psychology
Describes and evaluates psychological approaches to the assessment and treatment of those mental health problems, in adults and children, most commonly encountered by clinical psychologists. Consideration is given to work in mental health, corrections, child protection and neuropsychology rehabilitation. Issues relevant to Māori mental health, gender, cross-cultural work and prevention are included.
Prerequisite: 45 points at Stage II Psychology and 15 points from STATS 101-125, 191

PSYCH 311 15 Points
Advanced Topics in Social Psychology
Focuses on a number of key topics in social and community psychology. One module examines issues in identity and well-being, a second module looks at interpersonal influence and intimate relationships, and a third module addresses collective behaviour and social issues.
Prerequisite: 45 points at Stage II Psychology and 15 points from STATS 101-125, 191

PSYCH 313 15 Points
Psychology of Communication Disorders
Studies the links between psychological processes and communication disorders. Hearing and speech and language development will be covered. A range of communication disorders will be introduced. Psychosocial aspects of communication disorders including impact on self-esteem, health-related quality of life, peer/interpersonal relationships and educational and behavioural consequences of communication disorders in children will also be discussed.
Prerequisite: 45 points at Stage II Psychology and 15 points from STATS 101-125, 191

PSYCH 317 15 Points
Evolution, Behaviour and Cognition
How does behaviour in non-human animals evolve? Do other animals have language? Do they have culture? Can human behaviour be explained in evolutionary terms? This course addresses these questions and the methods that can be used to answer them.
Prerequisite: 45 points at Stage II Psychology and 15 points from STATS 101-125, 191 or 45 points at Stage II in Biological Sciences

PSYCH 319 15 Points
Psychology and Gender
The study of gender is crucial to understanding many everyday aspects of our lives, as well as many contemporary social issues. This course provides an introduction to selected key issues in the critical psychology of gender, from a social constructionist perspective. Topics that will be covered include gendered bodies, masculinity and femininity, sexuality, rape, and mental health.
Prerequisite: 45 points at Stage II Psychology and 15 points from STATS 101-125, 191, or 30 points at Stage II in Gender Studies
PSYCH 320 15 Points
Culture and Psychology
It is through culture that we make sense of ourselves and our world. Of key interest is how culture, ethnicity and context all play a major role in understanding human experience including behaviour, thoughts, and emotions. Emphasis is placed on critical thinking and analytic skills, and helping students think about their own values and norms from a cultural perspective.
Prerequisite: 45 points at Stage II in Psychology and 15 points from STATS 101-125, 191

PSYCH 322 15 Points
Industrial, Work and Organisational Psychology
An introduction to core areas of industrial, work and organisational Psychology. This field of Psychology is concerned with improving the performance and well-being of people at work at individual, group and organisational levels, recognising the interdependencies among these levels, and between people and their environments. Emphasis is given to the interplay between science and practice.
Prerequisite: 45 points at Stage II Psychology, or MGMT 211 and 15 points from STATS 101-125, 191

PSYCH 326 15 Points
Life Span Development
The development of people across the life span is studied. Describes key milestones in development and examines the causes and processes that produce stability and change in people's development over time. Topics discussed will include aspects of cognitive, social and physical development with consideration given to biological, societal and family influences. Attention will also be given to development within the New Zealand context.
Prerequisite: 45 points at Stage II in Psychology and 15 points from STATS 101-125, 191
Restriction: PSYCH 316

PSYCH 364 15 Points
Health Psychology
An introduction to the study of links between psychological processes and health/illness. The course discusses a number of psychological issues relating to serious illnesses (cancers, coronary heart disease etc.) and links to other aspects of physical well-being (eg, exercise, diet). Consideration will be given both to the theoretical models which have been developed within health psychology and to the types of methodology used in their investigation.
Prerequisite: 45 points at Stage II Psychology and 15 points from STATS 101-125, 191

PSYCH 370 15 Points
PSYCH 370A 7.5 Points
PSYCH 370B 7.5 Points
Research Project
The main focus of the research project is to undertake practical research-related activities under the direction of a supervisor. The work undertaken will be communicated by the student in the form of a research report. The research activities across the year will give students a broader experience of research and academic activities in the School of Psychology.
Prerequisite: 45 points at Stage II in Psychology and PSYCH 306 and 15 points from STATS 101-125
Corequisite: 45 points at Stage III or above in Psychology and Head of School approval
Restriction: PSYCH 308
To complete this course students must enrol in PSYCH 370 A and B, or PSYCH 370

PSYCH 399 15 Points
Capstone: Communicating Psychology
Focuses on communicating psychological ideas and research using different media (eg, podcast, short film, print media, symposia, grant proposals). Students will be required to work in groups, but to also engage in individual activities to demonstrate their own understanding of the topics explored by them and others in this course.
Prerequisite: 30 points at Stage III in Psychology and 15 points from STATS 101-125

Diploma Courses
PSYCH 651A 30 Points
PSYCH 651B 30 Points
Practicum
This includes a practical component of up to 1,500 hours of supervised work in an approved applied psychology setting, with an emphasis on the application of research principles and designs. Evaluation is by internal assessment and assessment by field supervisors.
Restriction: PSYCH 650
To complete this course students must enrol in PSYCH 651 A and B

PSYCH 690A 15 Points
PSYCH 690B 15 Points
Graduate Diploma Dissertation in Psychology
To complete this course students must enrol in PSYCH 690 A and B

PSYCH 691A 15 Points
PSYCH 691B 15 Points
PG Diploma Dissertation in Psychology
To complete this course students must enrol in PSYCH 691 A and B

Postgraduate 700 Level Courses
PSYCH 700 15 Points
Political Psychology
Provides an overview of the intersecting fields of psychology and political science. Seminar-based topics include personality and politics, political socialisation, voting behaviour, media effects, rational choice vs. symbolic politics, the competency of the electorate, the psychology of legitimacy, and other timely issues. Attention will be paid to the international literature, though New Zealand-based research will also be discussed.

PSYCH 707 15 Points
Forensic Psychology
Covers psychological theories of crime and violence, empirical research relevant to the assessment and treatment of youth and adult offenders, with particular emphasis on violent and sexual offenders, and the range of roles for clinical psychologists in forensic and correctional settings such as prisons, community and forensic psychiatric hospitals.

PSYCH 708A 15 Points
PSYCH 708B 15 Points
Clinical Neuropsychology
Consists of: an introduction to neuroanatomy and neuropathology, seminars on the major areas of neuropsychological dysfunction, introduction to community-used test materials and theoretical issues of neuropsychological assessment, neuropsychological...
dysfunction, individual assessment and individual case studies.

To complete this course students must enrol in PSYCH 708 A and B

PSYCH 711A 15 Points
PSYCH 711B 15 Points

Advanced Topics in Learning and Behaviour
A seminar course on advanced treatments of learning and behaviour including both reinforcement and stimulus control. A research-oriented approach is stressed in both pure and applied areas and in the technological application of basic principles in educational and clinical procedures.

To complete this course students must enrol in PSYCH 711 A and B

PSYCH 714 15 Points

Cognitive Neuroscience
An advanced seminar on cognitive neuroscience. Topics may include: neuroanatomy, neuroimaging methodologies, neurological and developmental disorders, and the organisation of higher cognitive functions such as attention, language, memory and executive functions. Emphasis will be placed on current developments relevant to the understanding of human psychological processes.

PSYCH 715 15 Points

Psychology and Sustainability
Human behaviour and thinking is central to both the sustainability problem and viable solutions. This course considers the psychological barriers to thinking and acting sustainably and how theories and research on emotions, modelling, identity, belonging, moral development and the evolution of cooperation can be applied to overcome these barriers. There will be particular emphasis on how to develop 'sustainability consciousness' in individuals and organisations.

PSYCH 716 15 Points

Social Psychology and Interpersonal Processes
Key empirical and theoretical areas in contemporary social psychology form the basis of this seminar-based course. Topics will include social cognition, interpersonal influence, communication, and close personal relationships. Students will also conduct small research projects investigating central topics covered in the course.

PSYCH 717 15 Points

Community Psychology
The application of psychological knowledge and research skills to issues faced by communities. Students will design an intervention relevant to a social issue. Theoretical approaches to working in community settings and the practical challenges involved will be discussed.

PSYCH 718 15 Points

Psychotherapeutic Assessment and Formulation
Major theories used in clinical practice to understand psychological problems will be discussed, including behavioural, cognitive-behavioural, systems and psychodynamic models. Emphasis is on assessment and formulation of clients' problems rather than therapeutic intervention. Approaches covered are those that are most commonly employed by psychologists practicing in New Zealand.

Prerequisite: PSYCH 723
Restriction: PSYCH 709

PSYCH 720A 15 Points
PSYCH 720B 15 Points

Research Topic in Psychology
A research topic undertaken under the direct supervision of a staff member and written up for presentation, instead of a final examination paper. A list of staff available for supervision, and their areas of interest and expertise, is published each year in the School of Psychology Handbook.

To complete this course students must enrol in PSYCH 720 A and B

PSYCH 721 15 Points

Consciousness and Cognition
Discusses recent research on consciousness from the perspective of cognitive neuroscience. Topics covered may include: implicit learning, implicit memory, blindsight, the split-brain syndrome, amnesia and hemineglect.

PSYCH 722 15 Points

Human Learning and Development
Focuses on the processes and factors that influence human learning from early childhood and beyond. Topics discussed may include: early social cognition, language development, and the factors that influence school and life success. Consideration will be given to diverse contexts and populations.

PSYCH 723 15 Points

Mental Health Problems: Aetiology and Assessment
Provides an overview of common mental health problems in childhood and adulthood and the methods that clinical psychologists use to assess these. Examines theories of causation and risk factors for a number of mental health problems. Also introduces and critiques diagnostic tools and psychometric instruments used in assessment.

PSYCH 724 15 Points

Perceptual Neuroscience
Focuses on how the brain processes sensory and perceptual information to support other psychological processes. Includes vision (e.g., motion, colour, development, identification, attention), audition, taste, somatosensory processing, and neurodevelopmental disorders. Provides a brain-related basis for sensation and perception as well as a background for research projects in cognitive neuroscience.

PSYCH 725 15 Points

Evolution and Human Behaviour
Covers evolutionary concepts as they apply to psychological issues. Specific topics may include: the evolution of tool use, language, cerebral asymmetry, theory of mind, culture and the sociobiology/evolutionary psychology debates.

PSYCH 726 15 Points

Emotion and Identity
Explores current psychological theory and research on emotion, adding perspectives from sociology, history and cultural studies as well as neuroscience. Topics include the embodied nature of affect; emotion, relationships and social life; emotion and sense of self, subjectivity, narrative and personal history; emotional contagion in crowds and groups; and the power of social norms around public emotional expression.

PSYCH 727 15 Points

Functional MRI
A comprehensive overview of functional magnetic resonance imaging (fMRI) with a focus on its use in the cognitive neuroscience of memory and aging. Designed for beginners, topics include experimental design, image acquisition and pre-processing, analysis methods, localisation/anatomy
and interpretation. Classes will include a lecture and/or a seminar followed by a hands-on laboratory working with fMRI data to consolidate learning.

PSYCH 728  30 Points
PSYCH 728A  15 Points
PSYCH 728B  15 Points

Portfolio in ABA
A series of written clinical assessment and intervention projects in applied behaviour analysis demonstrating appropriate use of the scientist-practitioner model. Projects will be conducted within each of the placements completed during the internship course PSYCH 651. The portfolio should provide evidence of appropriate mastery of basic behaviour-analytic skills, client-centred responsibilities, and foundational knowledge of applied behaviour analysis.

Prerequisite: PSYCH 750, 751, 754
Corequisite: PSYCH 651, 757

To complete this course students must enrol in PSYCH 728 A and B, or PSYCH 728

PSYCH 730  15 Points
Professional Psychology Practice In New Zealand
Aims to equip students with knowledge and skills required for registration as a psychologist with the New Zealand Psychologists Board. Topics include the structure and functions of the Psychologists Board/Health and Disability Commissioner, cultural competency (obligations under the Treaty of Waitangi and cultural safe practice), professional ethics (Code of Ethics for Psychologists Working in Aotearoa/New Zealand) and related legislation. For students enrolled in the PGDipAppPsych.

PSYCH 731  15 Points
Social Psychology and Intergroup Processes
Focuses on the application of social psychological knowledge and theory to the understanding of broad social and cultural processes and phenomena, such as violence, prejudice, group behaviour and conflict, intergroup dynamics, collective behaviour, social beliefs, cultural differentiation and contact.

PSYCH 733  15 Points
Special Topic: Critical Health Psychology
Utilising the frameworks of critical psychology, including gendered, indigenous and intersectional frameworks, this course examines ways we can theorise, understand, and promote health for individuals, communities and societies.

PSYCH 736  15 Points
Special Topic: Human Brain Mapping
Introduces human brain mapping using magnetic resonance imaging (MRI). Topics include experimental design, image acquisition, processing and analysis, as well as interpretation of findings. Fundamentals of anatomy and physiology will be covered where applicable.

PSYCH 737  15 Points
Work and Well-Being
Reviews concepts, methods, applications and current research relevant to the impact of work on employee well-being, including topics such as the employee lifecycle, stress, well-being, positive psychology, emotion, bullying and work-life balance.

PSYCH 740  15 Points
Sensory Science
A range of methods commonly used to measure sensory capacity will be explored, with an emphasis on the difference between methods commonly used by technicians and scientists and how these methods can be improved. Appropriate methods for use in psychological science as well as in industry will be explored.

PSYCH 741  15 Points
PSYCH 741A  7.5 Points
PSYCH 741B  7.5 Points

ABA: Communicating Behaviourally
Provides the opportunity to gain practical experience with a range of mediums for communicating behavioural concepts.

To complete this course students must enrol in PSYCH 741 A and B, or PSYCH 741

PSYCH 742  15 Points
Neuroscience of Awareness
An advanced seminar on the neuroscience of awareness and related topics. The course will primarily consist of student-led discussion of original research, with particular emphasis on areas of active controversy or debate. In addition to the theoretical discussion of human awareness, there will be a strong focus on the methods and practice of research in human neuroscience.

PSYCH 743  15 Points
Critical Qualitative Research
An in-depth focus on critical and discursive approaches to psychological research will be provided in this seminar-based course. Content will include examination of key theoretical underpinnings of critical qualitative research, as well as the practical application of such approaches.

PSYCH 744  15 Points
Experimental Design and Quantitative Methods for Psychology
Covers applications of the general linear model to research design and analysis. Topics include: univariate techniques (analysis of variance, analysis of covariance, regression) and multivariate techniques (multivariate analysis of variance, discriminant analysis, multivariate regression, and factor analysis).

Prerequisite: PSYCH 306 or consent of School

PSYCH 746  15 Points
Perception, Cognition, Action
Seminar-based introduction to theories and models linking (human, animal and machine) perception, cognition and action, with emphasis on competing approaches to perceptual-motor control and learning, using evidence from classic and contemporary research in experimental psychology and cognitive neuroscience.

PSYCH 749  15 Points
PSYCH 749A  7.5 Points
PSYCH 749B  7.5 Points

Special Topic: Applied Behaviour Analysis Ethics
To complete this course students must enrol in PSYCH 749 A and B, or PSYCH 749

PSYCH 750A  15 Points
PSYCH 750B  15 Points

ABA: Methods and Measurement
A study of the underlying concepts and principles involved with modifying an individual human or animal's behaviour in some applied setting. Appropriate and effective applications of scientific principles of learning will be taught, as will pertinent topics researched in the Experimental Analysis of Behaviour. Topics will include the application of research
into associative learning, reinforcement, punishment, extinction, avoidance, stimulus control and choice. To complete this course students must enrol in PSYCH 750 A and B.

PSYCH 751A  15 Points
PSYCH 751B  15 Points

ABA: Concepts and Principles
A study of the techniques and issues involved with modifying an individual human or animal’s behaviour in some applied setting. Appropriate and effective applications of scientific principles of learning will be taught, as will pertinent topics researched in the Experimental Analysis of Behaviour. Topics will include the application of research into associative learning, reinforcement, punishment, extinction, avoidance, stimulus control and choice. To complete this course students must enrol in PSYCH 751 A and B.

PSYCH 754  15 Points

Developmental and Intellectual Disabilities
Study of the behavioural aspects, aetiologies and therapeutic interventions for disorders usually diagnosed during childhood that are associated with reduced abilities to learn. Examples include intellectual disabilities (mental retardation) and pervasive developmental disorders (e.g., autism).

Restriction: PSYCH 752

PSYCH 755  15 Points

Gender, Power, and Sexuality
This seminar-based course will allow students to explore a broad range of topics such as: sexual coercion, prostitution, rape, pornography, safer sex, lesbian and gay sexuality, heterosexual, bisexuality, sexology, sex therapy, intersex, transgender, sexuality and culture. The emphasis will be on looking at questions from the perspective of theoretical approaches such as Foucault’s work on sexuality and feminist theories.

PSYCH 756  15 Points

Special Topic

PSYCH 757  15 Points
PSYCH 757A  7.5 Points
PSYCH 757B  7.5 Points

Advanced Applied Behaviour Analysis
Advanced education and training in applied behaviour analysis (ABA) in preparation for a professional career. Topics include ethical, professional, and practical issues confronting behaviour analysts in employment; recent research in ABA and other sciences with respect to clinical, educational, and other populations with whom behaviour analysts typically work.

Prerequisite: PSYCH 750, 751
Corequisite: PSYCH 651
Restriction: PSYCH 753
To complete this course students must enrol in PSYCH 757 A and B, or PSYCH 757

PSYCH 758  15 Points

Special Topic: Ethnicity, Identity and Culture

PSYCH 759  15 Points

Special Topic: Advanced Behavioural Psychology

PSYCH 761  15 Points

Organisational Psychology
Focuses on attitudes and behaviours at work that reflect or impact on the relationship between employee and employer, with a particular emphasis on topics that are proposed to impact on employee well-being and productivity (e.g., job satisfaction, motivation, leadership). Students will be encouraged to adopt a scientist-practitioner perspective, through class discussions and assignments.

PSYCH 763A  22.5 Points
PSYCH 763B  22.5 Points

Portfolio of Professional Practice Reports
A portfolio of original reports associated with the student’s practicum experience and demonstrating the ability to make appropriate use of the scientific literature in solving problems in professional practice, as required by the New Zealand Psychologists Board for the practice of psychology. For students enrolled in the PGDipAppPsych specialising in IWO.

Corequisite: PSYCH 651
To complete this course students must enrol in PSYCH 763 A and B

PSYCH 764  15 Points

Special Topic: Dual Process Theories of Human Cognition

PSYCH 765  15 Points
PSYCH 765A  7.5 Points
PSYCH 765B  7.5 Points

Special Topic
To complete this course students must enrol in PSYCH 765 A and B, or PSYCH 765

PSYCH 771A  30 Points
PSYCH 771B  30 Points

Clinical Practice 1 and Professional Issues
Consists of two parts: First, psychological assessment and therapy for diverse clinical populations, including adult, and child and family. Cognitive behaviour therapy and family therapy are central, but other models are included. Consideration of psychotherapy research and practical exercises are incorporated. Secondly, ethics, bicultural and cross-cultural practice, and other professional issues relevant to the practice of clinical psychology are covered. Evaluation is by internal assessment.

To complete this course students must enrol in PSYCH 771 A and B

PSYCH 772A  30 Points
PSYCH 772B  30 Points

Clinical Practice 2
Advanced psychological assessment and therapy for diverse clinical populations, including adult, and child and family. Cognitive behaviour therapy, narrative therapy, psychodynamic therapy, and the trauma model are emphasised. Includes two, 200 hour placements, in either an adult setting or a child and family setting. Evaluation is by internal assessment, including assessment by field supervisors.

To complete this course students must enrol in PSYCH 772 A and B

PSYCH 773A  60 Points
PSYCH 773B  60 Points

Clinical Internship
Includes a practical component of supervised clinical work of not less than 1500 hours in an approved health setting. Emphasis is placed on the application of research principles and designs in routine clinical practice. A university-based seminar series that covers topics relevant to advanced,
intern-level practice is included. Evaluation is by internal assessment, and assessment by field supervisors. 

To complete this course students must enrol in PSYCH 774 A and B

PSYCH 774A 30 Points
PSYCH 774B 30 Points

Clinical Internship Part Time
Includes a practical component of supervised clinical work of not less than 1500 hours in an approved health setting. Emphasis is placed on the application of research principles and designs in routine clinical practice. A university-based seminar series that covers topics relevant to advanced, intern-level practice is included. Evaluation is by internal assessment, and assessment by field supervisors. 

To complete this course students must enrol in PSYCH 774 A and B

PSYCH 779A 7.5 Points
PSYCH 779B 7.5 Points

Research and Communication Skills
Advanced skills associated with developing innovative research designs and communicating information about research designs, outcomes, and the implications of one’s findings are essential to the research process. Students will undertake exercises designed to develop these advanced skills, including writing a research proposal, presenting a seminar on their research project, preparing and presenting a research poster, and additional seminar-based exercises directed at research skill development. 

Corequisite: PSYCH 780
Restriction: PSYCH 788, 789

Named Doctoral Courses

PSYCH 801 30 Points

Scientist-practitioner Model 1
Research based psychological assessment and therapy skills for diverse clinical populations, including adult, child and family. Cognitive-behaviour therapy and family therapy are central, but other models are included. Advanced clinical research design, ethics, bicultural and cross-cultural practice, supervision practice, and other professional issues relevant to the practice of clinical psychology are covered. Evaluation is by internal assessment. Includes one 200-hour placement in either an adult or a child and family setting. Evaluation is by internal assessment, including assessment by field supervisors.

PSYCH 802 30 Points

Scientist-practitioner Model 2
Advanced psychological assessment and therapy skills for diverse clinical populations, including adult, and child and family. Cognitive-behaviour therapy, family therapy, narrative therapy, psychodynamic therapy, and the trauma model are emphasised. Includes two 200-hour placements, in either an adult setting or child and family setting. One of these may, depending on staff availability, be in a specialist setting. Options may include: clinical neuropsychology, forensic psychology, assessment and psychological treatment of psychoses, child and adolescent clinical psychology, drug and alcohol addiction, and others. Evaluation is by internal assessment, including assessment by field supervisors. 

Prerequisite: PSYCH 801

PSYCH 803 60 Points

Internship
This includes a practical component of supervised clinical work of not less than 1,500 hours in an approved setting. Emphasis is placed on the application of research principles and designs in routine psychological clinical practice. A university based seminar course that covers topics relevant to advanced, intern-level practice is included. Evaluation is by internal assessment, and assessment by field supervisors. 

Prerequisite: PSYCH 801, 802

PSYCH 897 90 Points

Portfolio of Clinical Research
Five original research projects demonstrating appropriate use of the scientist-practitioner model (single case design, programme evaluation or group research may be included). One project will be conducted within each of the three placements associated with the courses PSYCH 801 and 802, and two within the Internship, PSYCH 803. At least one project should be related to research with an adult population, and at least one with a child and family population. The Portfolio will be examined by two internal academic psychologists and assessed by the two external Thesis examiners. 

Restriction: PSYCH 894, 895

PSYCH 899 150 Points

Thesis
An original research dissertation completed over the three years of the degree (75 points in year 1, 60 points in year 2, and 15 points in year 3). The research may be basic or applied, but must be relevant to some area of clinical psychology and represent a significant contribution to knowledge in the field. 

Restriction: PSYCH 896

Science Enterprise

Postgraduate 700 Level Courses

SCIENT 701 15 Points

Accounting and Finance for Scientists
Builds upon scientific numeracy in exploring the sources, uses and reporting of accounting and financial information in science-based enterprises; application of capital budgeting and valuation theory to science-relevant situations; and key bases for financially-informed project and enterprise decision-making and the management of economic resources.

SCIENT 702 15 Points

Marketing for Scientific and Technical Personnel
Examines the intermediaries and end-users of technical and research-related applications, products and services; their ‘customers’, ‘value chain’, ‘marketing’, and related
concepts in both highly-regulated and open markets; and how effective science-related marketing strategies and promotional efforts are developed and communicated.

**SCIENT 703**  
Frontiers in Biotechnology  
15 Points  
An examination of how breakthrough discoveries in contemporary life sciences flow through to commercialisation. Current and emerging applications of biotechnology; includes guest lectures from New Zealand’s leading biotechnologists and case studies focused particularly on medical applications.

**SCIENT 704**  
Law and Intellectual Property  
15 Points  
An explanation of the legal system including basic concepts of contract and corporate law in a biotechnology context. Emphasis will be upon intellectual property laws in particular patent law and practice and other means of protecting new ideas, discoveries and inventions. Also covered will be technology licensing and basic competition and marketing law.

**SCIENT 705**  
Research Commercialisation  
15 Points  
Integrative exploration of common theories, processes and models involved in commercialising scientific research. Topics include technology transfer, technological entrepreneurship, commercial potential, risk, and valuation assessment and related tools. Utilises multiple learning approaches including case studies and a ‘hands-on’ term project.  
Prerequisite: SCIENT 701, 702

**SCIENT 706**  
Commercialisation Project  
15 Points  
A supervised practical application of the theories, concepts and techniques of commercialisation, covered in courses SCIENT 701-705, to a research-based opportunity and its related intellectual property estate.  
Prerequisite: SCIENT 701, 702, 704  
Corequisite: SCIENT 703, 705

**SCIENT 707**  
Special Topic  
15 Points  

**SCIENT 720**  
Science Enterprise Research Methods  
15 Points  
Students will become familiar with underlying theory and best practices in the principal qualitative and quantitative methods applicable to, and useful in, thesis research on commercialisation and science-based enterprise.

**SCIENT 721**  
Product Development and Regulatory Environments  
15 Points  
Aims to give students an understanding of the stages of product development for therapeutics, diagnostics and medical devices, as well as the regulatory requirements affecting product development in the Life Sciences. Project management tools and processes will also be covered in the context of product development.

**SCIENT 722**  
Current Issues in Bioscience Enterprise  
15 Points  
An exploration of trends and developments of importance to Life Sciences-related enterprises and industries. Utilises multiple learning approaches, eg, independent reading, case studies, projects, guest speakers, presentations and related discussions.

**SCIENT 794A**  
Thesis  
45 Points  
Research project addressing a topic relevant to the commercialisation of research. Overseen jointly by both academic and industry supervisors.  
To complete this course students must enrol in SCIENT 794 A and B

## Science General

### Stage I

**SCIGEN 101**  
Communicating in a Knowledge Society  
15 Points  
Effective communication is required for specialists in all fields to engage meaningfully with society. In this course students gain an understanding of the important role communication plays in a knowledge society. Through case studies and practical experience students learn about the responsibilities and skills required to communicate with a variety of audiences. They learn how to effectively manage and present data and practice oral, written, visual and electronic communication.

**SCIGEN 189**  
Special Topic  
10 Points  
Selected topics in Science designed as a short credit course for exchange students coming to New Zealand. This course is only available to inbound exchange students.  
Prerequisite: Permission of Head of Department

### Stage II

**SCIGEN 201**  
Innovating in a Knowledge Society  
15 Points  
Interdisciplinary examination of science innovation at policy, organisational and project levels including context, impacts and roles of business and research organisations, and ways innovations are presented and received. Case study analysis of the business environment including how innovation is both enabled and constrained in science-based organisations and society, and innovation strategies in science-based organisations.

### Stage III

**SCIGEN 301**  
Engaging in a Knowledge Society  
15 Points  
Addressing complex issues requires knowledge experts to engage with a variety of people. Solutions will be gained from collaborations that co-produce knowledge in transdisciplinary partnerships that lead to new ways of thinking. This course explores meaningful ways to engage with communities, and reassesses current ways of knowing and doing.  
Prerequisite: Any 180 points

**SCIGEN 310**  
Directed Study  
15 Points  
Directed study on a topic or topics approved by the Academic Head.  
Prerequisite: Approval of Academic Head or nominee and Dean or nominee
Science Scholars

**Introduction to Communication in Children and Adults**
Communication development and disorders. Normal communication development across the lifespan, in the context of total child development, of major changes in expectations such as school and literacy, and of variations such as cultural differences and multilingualism. Applications of these concepts in an introduction to the assessment and management of communication disorders in children and of acquired disorders in adults.

**Communication Difficulties in Children**
The nature of speech and language delay and disorder in children. Introduces a range of disorders focussing on: general language impairment, specific language impairment (SLI) and phonological disorders in children through pre-school and primary school ages, and language disorders in adolescence. Assessment and intervention in phonology, articulation, and all aspects of language, incorporating principles of inclusion and diversity and evidence-based practices.

**Communication Disorders in Adults**
This course examines theoretical, research and clinical...
issues in the field of acquired neurogenic communication disorders. It builds on existing knowledge and presents the process of assessment, differential diagnosis, intervention procedures and treatment specifically designed for these conditions. Skills are developed in analysing client-specific approaches, therapeutic programmes and incorporating measures of efficacy into therapy plans.

SPCHSCI 724 15 Points
Speech Language Therapy Clinical Practicum 2
Clinical observation and practice in a variety of settings, enabling students to work with clients under supervision. This course is supported by weekly tutorials.
Prerequisite: SPCHSCI 714

SPCHSCI 733 15 Points
Audiology for Speech Language Therapy
Study of types of hearing impairment, pathologies of the hearing mechanism, tests and clinical procedures used in audiological evaluations and hearing instrumentation.
Restriction: SPCHSCI 732

SPCHSCI 734 15 Points
Speech Language Therapy Clinical Practicum 3
Clinical practice in a variety of settings with students taking responsibility for the assessment and management of cases with supervisor guidance. The management plan and decision-making process for the client and their family are outlined and the project outcomes after analysis are presented, in a substantial report. Weekly tutorials support the course.
Prerequisite: SPCHSCI 724

SPCHSCI 736 15 Points
Topics in Communication Disorders in Adults
Advanced study of speech-language therapy (SLT) in adult populations including working with Māori, bilingualism, progressive conditions, palliative care, lifelong disability and ageing effects on audition and language. It includes highly specialised theoretical and clinical approaches which underpin the content, with implications for SLT practice in the New Zealand context being the predominant focus. Involves an individual management plan for a client resulting in a substantial individual report.
Restriction: SPCHSCI 741

SPCHSCI 743 15 Points
Advanced Study of Speech and Language Therapy in Children
Develops depth in specific areas of difficulty including language disorders in adolescents, pre-verbal stages, and working with disabilities, particularly intellectual and physical disability and autism spectrum disorder. Develops best practice in cultural and linguistic diversity. Consolidates and extends knowledge of evidence-based practice in child speech and language. Involves individual critical evaluation and synthesis of knowledge and concepts which are then presented in substantial reports.
Restriction: SPCHSCI 732

SPCHSCI 744 15 Points
Speech Language Therapy Clinical Practicum 4
Clinical practice in a variety of settings with the student demonstrating independent practice and problem solving skills. Involves an individual e-portfolio which includes management session plans with clients as well as peer and supervisor feedback. Supervisory guidance will be given and the course will be supported by weekly tutorials.
Prerequisite: SPCHSCI 734

SPCHSCI 746 15 Points
Voice and Fluency
Voice - study of the voice and the assessment and management of voice disorders (adult and paediatrics). Fluency - assessment and management of dysfluency disorders (adult and paediatrics). Critical evaluation and synthesis of knowledge are presented in substantial individual case reports.

Statistics

Stage I

STATS 100 15 Points
Functioning in Statistics
A first exposure to statistics that builds data handling skills and develops conceptual thinking through active participation in problems using real data, computer simulations and group work. STATS 100 makes full use of appropriate technology and prepares students for further study in Statistics.
Restriction: STATS 100 may not be taken with, or after passing, any other Statistics course. STATS 100 is not available to students who have 14 credits or more in Mathematics and Statistics at NCEA Level 3 or those who have passed Cambridge Mathematics A with an E or better, or Cambridge Mathematics AS with a D or better, or those who have passed International Baccalaureate Mathematics, or equivalent

STATS 101 15 Points
STATS 101G 15 Points
Introduction to Statistics
Intended for anyone who will ever have to collect or make sense of data, either in their career or private life. Steps involved in conducting a statistical investigation are studied with the main emphasis being on data analysis and the background concepts necessary for successfully analysing data, extrapolating from patterns in data to more generally applicable conclusions and communicating results to others. Other topics include probability; confidence intervals, statistical significance, t-tests, and p-values; nonparametric methods; one-way analysis of variance,
simple linear regression, correlation, tables of counts and the chi-square test.

Restriction: STATS 102, 107, 108, 191

STATS 108
15 Points
Statistics for Commerce
The standard Stage I Statistics course for the Faculty of Business and Economics or for Arts students taking Economics courses. Its syllabus is as for STATS 101, but it places more emphasis on examples from commerce.

Restriction: STATS 101, 102, 107, 191

STATS 125
15 Points
Probability and its Applications
Probability, conditional probability, Bayes theorem, random walks, Markov chains, probability models. Illustrations will be drawn from a wide variety of applications including: finance and economics; biology; telecommunications, networks; games, gambling and risk.

Corequisite: MATHS 108 or 110 or 120 or 130
Restriction: STATS 210

STATS 150
15 Points
Lies, Damned Lies, and Statistics
Examines the uses, limitations and abuses of statistical information in a variety of activities such as polling, public health, sport, law, marketing and the environment. The statistical concepts and thinking underlying based arguments will be explored. Emphasises the interpretation and critical evaluation of statistically based reports as well as the construction of statistically sound arguments and reports. Some course material will be drawn from topics currently in the news.

Stage II

STATS 201
15 Points
Data Analysis
A practical course in the statistical analysis of data. Interpretation and communication of statistical findings. Includes exploratory data analysis, the analysis of linear models including two-way analysis of variance, experimental design and multiple regression, the analysis of contingency table data including logistic regression, the analysis of time series data, and model selection.

Prerequisite: 15 points from STATS 101-108, 191
Restriction: STATS 207, 208, BIOSCI 209

STATS 208
15 Points
Data Analysis for Commerce
A practical course in the statistical analysis of data. There is a heavy emphasis in this course on the interpretation and communication of statistical findings. Topics such as exploratory data analysis, the analysis of linear models including two-way analysis of variance, experimental design and multiple regression, the analysis of contingency table data including logistic regression, the analysis of time series data, and model selection will be covered.

Prerequisite: 15 points from STATS 101-108, 191
Restriction: STATS 201, 207, BIOSCI 209

STATS 210
15 Points
Statistical Theory
Probability, discrete and continuous distributions, likelihood and estimation, hypothesis testing. This course is a prerequisite for the BSc(Hons) and masters degree in statistics.

Prerequisite: 15 points from ENGSIC 111, ENGGGEN 150, STATS 125
Corequisite: 15 points from MATHS 208, 250, ENGSCI 211 or equivalent

STATS 220
15 Points
Data Technologies
Explores the processes of data acquisition, data storage and data processing using current computer technologies. Students will gain experience with and understanding of the processes of data acquisition, storage, retrieval, manipulation, and management. Students will also gain experience with and understanding of the computer technologies that perform these processes.

Prerequisite: 15 points at Stage I in Computer Science or Statistics

STATS 225
15 Points
Mathematical Statistics
Multivariate probability and distributions, transformations, expectation, moment generating functions, likelihood and estimation, hypothesis testing.

Prerequisite: B+ in STATS 125 or ENGSIC 111 or ENGGGEN 150
Corequisite: 15 points from MATHS 250, ENGSCI 211 or equivalent

STATS 240
15 Points
Design and Structured Data
An introduction to research study design and the analysis of structured data. Blocking, randomisation, and replication in designed experiments. Clusters, stratification, and weighting in samples. Other examples of structured data.

Prerequisite: STATS 101 or 108
Restriction: STATS 340

STATS 255
15 Points
Optimisation and Data-driven Decision Making
Explores methods for using data to assist in decision making in business and industrial applications. Software packages will be used to solve practical problems. Topics such as linear programming, transportation and assignment models, network algorithms, queues, Markov chains, inventory models, simulation, analytics and visualisation will be considered.

Prerequisite: ENGSIC 211 or STATS 201 or 208, or a B+ or higher in either MATHS 120 or 130 or 150 or 153 or STATS 101 or 108, or a concurrent enrolment in either ENGSIC 211 or STATS 201 or 208
Restriction: ENGSIC 255

STATS 290
15 Points
Topics in Statistics
Prerequisite: 15 points from ENGSIC 111, ENGGGEN 150, STATS 125
Restriction: STATS 210, 225

Stage III

STATS 301
15 Points
Statistical Programming and Modelling using SAS
Introduction to the SAS statistical software with emphasis on using SAS as a programming language for purposes of database manipulation, simulation, statistical modelling and other computer-intensive methods.

Prerequisite: 15 points from STATS 201, 207, 208, BIOSCI 209

STATS 302
15 Points
Applied Multivariate Analysis
Covers the exploratory analysis of multivariate data, with emphasis on the use of statistical software and reporting of results. Topics covered include: techniques for data display, dimension reduction and ordination, cluster analysis, multivariate ANOVA and associated methods.

Prerequisite: 15 points from STATS 201, 207, 208, BIOSCI 209
STATS 310 15 Points
Introduction to Statistical Inference
Estimation, likelihood methods, hypothesis testing, multivariate distributions, linear models.
Prerequisite: STATS 210 or 225, and 15 points from MATHS 208, 250 or equivalent

STATS 313 15 Points
Advanced Topics in Probability
Characterisations of and relations between different kinds of random objects including random functions, random paths and random trees. Modes of convergence; the Law of Large Numbers and Central Limit Theorem.
Prerequisite: STATS 225
Restriction: STATS 710

STATS 320 15 Points
Applied Stochastic Modelling
Introduction to stochastic modelling, with an emphasis on queues and models used in finance. Behaviour of Poisson processes, queues and continuous time Markov chains will be investigated using theory and simulation.
Prerequisite: 15 points from STATS 125, 210, 225 and 15 points from STATS 201, 207, 208, 220, BIOSCI 209

STATS 325 15 Points
Stochastic Processes
Introduction to stochastic processes, including generating functions, branching processes, Markov chains, random walks.
Prerequisite: 15 points from STATS 125, 210, 320, with at least a B pass, 15 points from MATHS 208, 250, 253

STATS 326 15 Points
Applied Time Series Analysis
Components, decompositions, smoothing and filtering, modelling and forecasting. Examples and techniques from a variety of application areas.
Prerequisite: 15 points from STATS 201, 208, BIOSCI 209, ECON 221

STATS 330 15 Points
Statistical Modelling
Application of the generalised linear model and extensions to fit data arising from a range of sources including multiple regression models, logistic regression models, and log-linear models. The graphical exploration of data.
Prerequisite: 15 points from STATS 201, 207, 208, BIOSCI 209

STATS 331 15 Points
Introduction to Bayesian Statistics
Introduces Bayesian data analysis using the WinBUGS software package and R. Topics include the Bayesian paradigm, hypothesis testing, point and interval estimates, graphical models, simulation and Bayesian inference, diagnosing MCMC, model checking and selection, ANOVA, regression, GLMs, hierarchical models and time series. Classical and Bayesian methods and interpretations are compared.
Prerequisite: 15 points from STATS 201, 207, 208, BIOSCI 209

STATS 340 15 Points
Design and Analysis of Surveys and Experiments
Design, implementation and analysis of surveys including questionnaire design, sampling design and the analysis of data from stratified, cluster and multistage sampling. Design and implementation issues for scientific experiments including blocking, replication and randomisation and the analysis of data from designs such as complete block, balanced incomplete block, Latin square, split plot, factorial and fractional designs.
Prerequisite: 15 points from STATS 201, 207, 208, BIOSCI 209

STATS 369 15 Points
Data Science Practice
Modern predictive modelling techniques, with application to realistically large data sets. Case studies will be drawn from business, industrial, and government applications.
Prerequisite: STATS 220, 201 or 208, 210 or 225

STATS 370 15 Points
Financial Mathematics
Mean-variance portfolio theory; options, arbitrage and put-call relationships; introduction of binomial and Black-Scholes option pricing models; compound interest, annuities, capital redemption policies, valuation of securities, sinking funds; varying rates of interest, taxation; duration and immunisation; introduction to life annuities and life insurance mathematics.
Prerequisite: 15 points at Stage II in Statistics or BIOSCI 209; 15 points at Stage II in Mathematics

STATS 380 15 Points
Statistical Computing
Statistical programming using the R computing environment. Data structures, numerical computing and graphics.
Prerequisite: 15 points from STATS 201, 207, 208, 220, BIOSCI 209

STATS 399 15 Points
Capstone: Statistics in Action
Provides opportunities to integrate statistical knowledge and collaborate with others through completion of a group-based project.
Prerequisite: 30 points at Stage III in Statistics

Postgraduate 700 Level Courses

STATS 701 15 Points
Advanced SAS Programming
A continuation of STATS 301, with more in-depth coverage of programming in the SAS language. Topics covered will include advanced use of the SAS language, advanced data step programming, macros, input and output, connectivity to other software platforms, SAS SQL.
Prerequisite: STATS 301

STATS 702 15 Points
Special Topic in Statistics 2

STATS 703 15 Points
Special Topic in Statistics 1

STATS 704 15 Points
Topics in Official Statistics

STATS 705 15 Points
Topics in Official Statistics

STATS 707 15 Points
Computational Introduction to Statistics
An advanced introduction to statistics and data analysis, including testing, estimation, and linear regression.
Prerequisite: 15 points from STATS 101, 108 and 15 points from COMPSCI 101, MATHS 162
Restriction: STATS 201, 208, 210, 225

STATS 708 15 Points
Topics in Statistical Education
Covers a wide range of research in statistics education at the school and tertiary level. There will be a consideration of, and an examination of, the issues involved in statistics education in the curriculum, teaching, learning, technology and assessment areas.

</table>
STATS 761 15 Points  
Mixed Models  
Linear mixed effect models for the analysis of data from small experiments, particularly those cases where the data are unbalanced. Methods include restricted maximum likelihood for the estimation of variance components.

STATS 762 15 Points  
Regression for Data Science  
Application of the generalised linear model to fit data arising from a wide range of sources, including multiple linear regression models, Poisson regression, and logistic regression models. The graphical exploration of data. Model building for prediction and for causal inference. Other regression models such as quantile regression. A basic understanding of vector spaces, matrix algebra and calculus will be assumed.  
Prerequisite: STATS 707 or 210 or 225, and 15 points from STATS 201, 207, 208 or a B+ or higher in BIOSCI 209  
Restriction: STATS 330

STATS 763 15 Points  
Advanced Regression Methodology  

STATS 764 15 Points  
Analysis of Failure Time Data  
Topics in the theory and analysis of survival data. Survival data arises both in the Health Sciences and in industrial testing. Such data is often subject to censoring and truncated data. Both parametric and nonparametric methods, such as Kaplan-Meier estimates, will be covered. Other topics may include: proportional hazards regression, censored data and reliability.  
Prerequisite: STATS 310

STATS 766 15 Points  
Multivariate Analysis  
A selection of topics from multivariate analysis, including: advanced methods of data display (eg, Correspondence and Canonical Correspondence Analysis, Biplots, and PREFMAP) and an introduction to classification methods (eg, various types of Discriminant Function Analysis).  
Prerequisite: STATS 302 or 767

STATS 767 15 Points  
Topics in Multivariate Analysis

STATS 768 15 Points  
Longitudinal Data Analysis  
Exploration and regression modelling of longitudinal and clustered data, especially in the health sciences: mixed models, marginal models, dropout, causal inference.

STATS 769 15 Points  
Advanced Data Science Practice  
Databases, SQL, scripting, distributed computation, other data technologies.

STATS 770 15 Points  
Introduction to Medical Statistics  
An introduction to ideas of importance in medical statistics, such as measures of risk, basic types of medical study, causation, ethical issues and censoring, together with a review of common methodologies.

STATS 771 15 Points  
Topics in Biostatistics 1

STATS 773 15 Points  
Design and Analysis of Clinical Trials  
The theory and practice of clinical trials, including: design issues, data management, common analysis methodologies, intention to treat, compliance, interim analyses and ethical considerations.

STATS 775 15 Points  
Design of Ecological Experiments  
Factorial designs, nested hierarchies and mixed models; variance components and expected mean squares; precision and power analysis; multivariate analysis in ecology; designs to detect environmental impact; resampling methods and permutation tests for complex designs.

STATS 776 15 Points  
Topics in Environmental and Ecological Statistics

STATS 779 15 Points  
Professional Skills for Statisticians  
Statistical software, data management, data integrity, data transfer, file processing, symbolic manipulation, document design and presentation, oral presentation, professional ethics.

STATS 780 15 Points  
Statistical Consulting  
Students will learn about the practicalities of statistical consulting. Students will carry out a statistical consulting project, including the writing of a report, under the supervision of a member of the academic staff.

STATS 781 30 Points  
STATS 781A 15 Points  
STATS 781B 15 Points  
Honours Project in Statistics  
Restriction: STATS 789  
To complete this course students must enrol in STATS 781 A and B, or STATS 781

STATS 782 15 Points  
Statistical Computing  
Professional skills, advanced statistical programming, numerical computation and graphics.

STATS 783 15 Points  
Simulation and Monte Carlo Methods  
A practical introduction to modern simulation and Monte Carlo techniques and their use to simulate real situations and to solve difficult statistical inferential problems whose mathematical analysis is intractable.

STATS 784 15 Points  
Statistical Data Mining  
Data cleaning, missing values, data warehouses, security, fraud detection, meta-analysis, and statistical techniques for data mining such as regression and decision trees, modern and semiparametric regression, neural networks, statistical approaches to the classification problem.  
Prerequisite: 15 points from STATS 210, 225, and 15 points from STATS 330, 762

STATS 785 15 Points  
Topics in Statistical Data Management

STATS 786 15 Points  
Special Topic in Statistical Computing
STATS 787  
**Data Visualisation**
Effective visual presentations of data. Topics may include: how to present different types of data; human perception; graphics formats; statistical graphics in R; interactive graphics; visualising high-dimensional data; visualising large data. A background in statistical computing (eg, STATS 220, 380, 779) or programming will be assumed (eg, COMPSCI programming courses or students in the data science programme).

**Sustainability**

**Stage I**

SUSTAIN 100  15 Points  
SUSTAIN 100G  15 Points

**Sustainability and Us**  
What is sustainability? Discussion of what ‘sustainability’ means, its underpinning values, and the role individuals and organisations play in creating solutions. Students work in groups to investigate a sustainability issue on campus and design a solution, which they present via a film, poster, presentation or model. Examines sustainability issues - water and overpopulation.

**Stage II**

SUSTAIN 200  15 Points

The Sustainable Community  
What is the sustainable community? The nature of complex social and ecological systems is unpacked, with a particular focus on the community. Students work in groups to design a game that shows a social or ecological system in play. The issues of food and inequality are considered in depth.

**Wine Science**

**Stage II**

WINESCI 201  15 Points  
**Introduction to Wine Science**
An introduction to grape growing and wine. Topics covered include history of wine, geography and terroir, grape growing, winemaking technology, microbiology, sensory evaluation, and health considerations of wine. A special emphasis on grape growing and winemaking in New Zealand.  
Prerequisite: Any 120 points passed

---

**Postgraduate 700 Level Courses**

WINESCI 701  15 Points  
**Winemaking in a New Zealand Setting**
The principles and practices of local winemaking are reviewed and compared with international counterparts to highlight the distinctive characteristics of winemaking in New Zealand. A microvinification project is undertaken in which students begin with an allotment of grapes, monitor the fermentation using a range of analytical techniques, and make decisions which affect the style of wine they produce.

WINESCI 702  15 Points  
**The Science Behind Grape Production**
Develops understanding of the contemporary scientific knowledge and research that is of relevance to grape production for winemaking. The application of traditional and modern molecular methods in plant science and plant pathology will be discussed in relation to the selection, improvement and management of vines and grape attributes. Research issues of national and international relevance to viticulture will also be addressed.

WINESCI 703  15 Points  
**The Science Behind Winemaking**
Follows on from 702 and focuses on the contemporary scientific knowledge and research that is of relevance to winemaking, commencing from the point of grape harvest. The application of traditional and modern methods in biochemistry and microbiology will be discussed. Research issues of national and international relevance to winemaking will also be addressed.

WINESCI 704  15 Points  
**Sensory Evaluation and Statistical Methods**
The principles of sensory science, sensory analysis of wine, differences among wine types, regional styles and grape types will be covered. Emphasis will be placed on those components which influence sensory appeal. The
application of statistical methods to wine sampling and to the design of sensory panels will be overviewed.

**WINESCI 705** 15 Points
**WINESCI 705A** 7.5 Points
**WINESCI 705B** 7.5 Points

**Project in Wine Science**
Students will gain a thorough understanding of the current knowledge on a selected topic associated with wine science and have experience in writing a research proposal and in giving a presentation to the peer group.

To complete this course students must enrol in WINESCI 705 A and B, or WINESCI 705

**WINESCI 706** 15 Points

**The Business of Wine Production**
Students will be introduced to the economics of grape growing, winemaking, winery design and management. Distribution and marketing will be introduced. Special topics including wine law, use and negotiation of contracts small business development, stock valuation, issues of appellations, labelling and brand development will be taught. Environmental and resource management issues and health and safety regulations will be covered.

**WINESCI 707** 15 Points
**WINESCI 707A** 7.5 Points
**WINESCI 707B** 7.5 Points

**Topics in Wine Science**
A number of advanced or special topics in wine science. This course may not be offered every year; further information may be obtained from the School of Chemical Sciences.

To complete this course students must enrol in WINESCI 707 A and B, or WINESCI 707

**WINESCI 708** 15 Points

**Post-fermentation Processes in Winemaking**
Covers the theory and practice of fining, filtration and other methods of wine clarification. Chemical and sensory effects of barrel and tank aging of red and white wine will be covered as well as blending decisions and stabilisation. Quality control methods used during processing, aging and packaging will also be addressed.

**WINESCI 796A** 60 Points
**WINESCI 796B** 60 Points

**MSc Thesis in Wine Science**
Advanced research on an aspect of wine science. This may be undertaken with the Wine Industry CRIs and University staff.

To complete this course students must enrol in WINESCI 796 A and B

---

**Accounting**

**Stage I**

**ACCTG 151G** 15 Points

**Financial Literacy**
People who understand the basic principles of finance are likely to get much more mileage out of their money – whether spending, borrowing, saving or investing – than those who do not. Develop an understanding of how to be in control of spending and saving; understand borrowing; make informed investment decisions; know broadly what to insure and what not to; recognise scams and consider whether money is the key to happiness.

Restriction: May not be taken by students with a concurrent or prior enrolment in Accounting or Finance courses

**General Education**

**Academic Integrity**

**ACADINT A01** 0 Points

**Academic Integrity Course**
The Academic Integrity Course is an online course designed to increase student knowledge of academic integrity, university rules relating to academic conduct, and the identification and consequences of academic misconduct. Students work through a series of modules, outlining scenarios that they may encounter while studying at university. Each scenario provides information on relevant rules, resources and expected behaviour.
Art History

Stage I

ARTHIST 114G  15 Points
Understanding Art: Leonardo to Warhol
Is seeing learned? Can an image be read in the same way as a text? Understanding images from different historic periods, from Leonardo da Vinci to Andy Warhol, is central to everyday life. Visual literacy is fundamental to all disciplines. This course provides students with tools for making sense of various kinds of images and objects: photographs, advertisements, paintings, film, television, monuments, buildings, maps, landscape, digital and internet images.
Restriction: ARTHIST 109

ARTHIST 115G  15 Points
Global Art Histories
A broad survey of visual art spanning from the early modern period to the contemporary. Students will be introduced to a range of art practices situated within a global context and will consider art works produced in Māori and Pacific cultures alongside Indian, South Asian, Middle Eastern, European and American traditions.

Asian Studies

Stage I

ASIAN 140G  15 Points
New Zealand and Asia
Explores Asia and its interrelationship with New Zealand, including Asia’s growing presence in New Zealand in all its manifestations, and the evolving political, social, economic, cultural, and strategic relations between this country and Asia. Topics will include historical and contemporary ties with Asia, Asian migration, literature, media and films. The course will focus especially on South-East and East Asia.

Biological Sciences

Stage I

BIOSCI 100G  15 Points
Antarctica: The Frozen Continent
A general introduction to Antarctica and its environs including the Southern Ocean and the sub-Antarctic islands. Emphasis will be placed on the evolution of Antarctica and how resident plants, animals and micro-organisms have adapted to cope with the extreme environment. Specific topics to be addressed include: the history of Antarctic exploration and its impact on the development of Antarctic science, Antarctic ecosystems, Antarctica as a wilderness region, and the impact of humans including the exploitation of resources and the effects of pollution. This course is suitable for students with both science and non-science backgrounds.

Business

Stage I

BUSINESS 151G  15 Points
Communication in a Multicultural Society
Communication knowledge, competencies and skills are developed through exploring relationships, mediated communication, writing, team dynamics, oral presentation and technologies.
Restriction: BUSINESS 101, 291, MGMT 291

Business Analytics

Stage I

BUSAN 100G  15 Points
Digital Information Literacy
Introduces students to skills, technologies, and techniques for the effective use of digital information. Information in all spheres of personal and professional life is increasingly created, stored, analysed, exchanged and communicated in digital forms. Digital information literacy will help students be more productive in the digital age.

Chemical and Materials Engineering

Stage I

CHEMMAT 100G  15 Points
Materials of the Modern World
Every aspect of daily living is influenced in some way by the materials that surround us. Ceramics, metals, polymers, and composites; each has its own properties which have, over time, influenced the development of modern technological societies. Take a moment to imagine a world without metal, for example, to see how central the science of materials is to everyday life. This course will explore, at a non-specialist level, the basic principles governing the properties and behaviour of a wide variety of common materials and examine their applications and limitations.

Chemistry

Stage I

CHEM 100G  15 Points
Molecules that Changed the World
The impact of chemistry on the modern world will be explored by focusing on the stories of specific molecules, including penicillin, DDT and nylon. Their discovery, the underlying chemical principles that explain their behaviour, their impact on our lives including social and scientific issues that arise from their use, and their likely impact on the future will be investigated. No formal prerequisite, but the course assumes a science background at Year 11 or higher.

Chinese

Stage I

CHINESE 100G  15 Points
Beginning Modern Chinese 1
Designed to provide basic written and spoken skills in modern standard Chinese (Mandarin, Putonghua) for beginners.
Restriction: May not be taken if a more advanced language acquisition course in this subject has previously been passed
### Classical Studies

**Stage I**

**CLASSICS 110G** 15 Points  
**Classical Mythology**  
A study of ancient Greek and Roman mythology – its gods, heroes and monsters – through the works of major writers and artists from the Greco-Roman world.

### Communication

**Stage I**

**COMMIS 104G** 15 Points  
**Advertising and Society**  
A critical examination of advertising and advertisements focusing on the role advertising plays in consumer culture. Advertisements from a diverse range of media are studied in order to analyse how advertisements construct and disseminate meaning. The course investigates how advertising engages with the logic of wider cultural and global transformations with consideration given to both consumer and industry perspectives.  
*Restriction: FTVMS 110, 110G*

### Computer Science

**Stage I**

**COMPSCI 111G** 15 Points  
**An Introduction to Practical Computing**  
A practical introduction to computing. Topics include: web design, an overview of computer hardware and operating systems, effective use of common applications, using the internet as a communication medium, applying programming concepts, and social implications of technology.

### Cook Islands Māori

**Stage I**

**COOKIS 101G** 15 Points  
**Introduction to Cook Islands Māori**  
Gives students an introduction to the structure of Cook Islands Māori as well as allowing them to develop basic skills in listening, speaking, reading and writing. Designed for students with little or no knowledge of the language, and for those with some fluency wishing to understand simple sentence structure and composition.  
*Restriction: COOKIS 102. May not be taken if a more advanced language acquisition course in this subject has previously been passed*

### Dance Studies

**Stage I**

**DANCE 101G** 15 Points  
**Introduction to Dance and Creative Processes**  
To develop an understanding of our moving bodies through movement awareness, dance improvisation, choreography and creative and analytic writing. Students will undertake both theoretical and practical classes focusing on a range of practices that dancers and movement practitioners use to facilitate kinaesthetic awareness, experimentation, communication and choreography. Students will explore somatic theory and practice, improvisation scores, choreography and dance analysis. **DANCE 101G not available for BDanceSt.**

**Stage II**

**DANCE 200G** 15 Points  
**Dance and Culture**  
Examines the interrelationship between dance and wider political and cultural movements through practical dance classes and theoretical investigations into diverse cultural environments around the world. Students physically and theoretically engage in the study of various dance forms such as Tango, Salsa, Dabkeh, traditional Chinese dance and Bharata Natyam.  
*Prerequisite: 60 points passed*

### Disability Studies

**Stage I**

**DISABLTY 113G** 15 Points  
**Making Disabilities: The Construction of Ideas**  
Examines the expression of social and cultural ideas of disability in popular culture through film, television and print media. The course aims to develop skills to examine the construction and maintenance of concepts of disability and disabling identities in popular culture. The consequences of these processes are also discussed and their implications for perpetuating social devaluation, discrimination, and disadvantage.

### Drama

**Stage I**

**DRAMA 100G** 15 Points  
**Presentation and Performance Skills: Taking the Stage**  
Focuses on enhancing oral communication and performance skills through interactive workshops with speakers and performers highlighting the transferable skills of acting in three main areas: public speaking, improvising and group-devised performance.

### Earth Sciences

**Stage I**

**EARTHSCI 105G** 15 Points  
**Natural Hazards in New Zealand**  
New Zealanders are exposed to extreme natural events and processes including earthquakes, volcanic eruptions, weather bombs, storm surge, tsunami, flooding, landslides and erosion. The physical context for each hazard is provided, drawing on the disciplines of geology, geomorphology and climatology. The frequency and magnitude of natural hazards for New Zealand are considered using different sources. Impacts on modern society are discussed using case studies and scenario modelling.  
*Restriction: GEOG 105, 105G, GEOLOGY 110*

**Stage II**

**EARTHSCI 205G** 15 Points  
**New Zealand: Half a Billion Years on the Edge**  
Take a 500 million year journey through time following the geologic and biologic development of New Zealand from humble beginnings on the edge of the ancient
supercontinent Gondwana to the present day geologically dynamic land mass beset by volcanic eruptions, earthquakes and massive erosion as a consequence of being located on the edge of the Earth's largest tectonic plate. 

Prerequisite: 75 points passed
Restriction: GEOLOGY 205, 205G

---

Economics

**Stage I**

**ECON 151G**  
**Understanding the Global Economy**  15 Points
Economics affects our daily lives and the global environment in many ways. Through the media we are constantly made aware of price increases, interest rate changes, exchange rate movements and balance of payments problems, growth and recessions, standard of living comparisons, regional trading agreements. What does it all mean and how does it all work? 
Restriction: ECON 101, 111, 152, 191

---

Education

**Stage I**

**EDUC 100G**  
**The Creative Process**  15 Points
Theories and practices of creativity will be examined and practically explored through a variety of disciplines, such as the arts, biology, psychology, sociology, philosophy and education. What is creativity? Can creativity be learnt? What happens in the brain when we are creative? These are some of the questions addressed in this course.

**EDUC 104G**  
**Sport in Society**  15 Points
Critically examines the socio-cultural, political and economic significance of sport within Aotearoa New Zealand. Examines how sport is embedded in the lives of people, constitutes identities, and is connected to major spheres of social life and various social issues. Through focusing on select sporting issues it analyses how New Zealanders negotiate understandings of self, ethnicity, gender, sexualities, health, and lifestyle.

**EDUC 105G**  
**Teaching: Tales and Traditions**  15 Points
Introduction to key ideas on teachers and teaching. Explores teaching traditions, their origins, stories of teaching in New Zealand; stories of teachers that generate change; and how teaching and teachers are understood in a variety of disciplines such as Science, Health, Arts, and Sport. Considers the following: How should we teach? What counts as knowledge? What contradictions do teachers encounter?

**EDUC 121G**  
**How People Learn**  15 Points
Focuses on learning in formal and informal settings and addresses such questions as: why do some things seem easier to learn than others, why do we forget things we once knew, and why do some people learn faster or better than others? Examines the nature of intelligence and how to help personal learning or the learning of others.
Restriction: EDUC 111, 117

**EDUC 122G**  
**Learning Sexualities**  15 Points
How and what do we learn about sexualities in New Zealand? Learning about sexualities is viewed as occurring both formally (eg, through sexuality education) and informally (eg, through the media) in a diversity of social sites. Schools are examined as one significant site where students are offered sexual meanings. The historical derivation and current context of contemporary education about sexuality along with its social effects are investigated.

---

Engineering General

**Stage I**

**ENGGEN 100G**  
**Technological Choices for the Future**  15 Points
A consideration of technological choices to support informed decision making in the use of technology in modern society. The course focuses on important questions such as: What is the future direction of power generation in New Zealand? How can we create a sustainable future? Where will current developments in robotics and mobile communications lead us?

---

English

**Stage I**

**ENGLISH 102G**  
**Great Books: Seduction and Betrayal**  15 Points
Surveys a selection of literary masterpieces by major authors from different periods in the history of English literature. Selection of texts is organised around the theme of seduction and betrayal, understood more particularly as a story-arc exploring attitudes to love and sex, to politics and ambition, to ethical conduct, and to the activity of reading itself.

**ENGLISH 121G**  
**Reading/Writing/Text**  15 Points
Develops University-wide skills of reading, writing and analysis. Addresses the needs of students in both English and other disciplines where both writing and reading have an important role in learning. The course fosters personal writing skills and also introduces writing as a subject of study in itself.

---

Environmental Science

**Stage I**

**ENVSCI 101G**  
**Environment, Science and Management**  15 Points
Explores the science behind key environmental issues to recognise the role environmental science plays in understanding the interaction between humans and the environment. The complexity of environmental problems and the difficult task of integrating science, knowledge and values are discussed.

---

European Studies

**Stage I**

**EUROPEAN 100G**  
**Europe and the World**  15 Points
An introduction to the study of Europe, organised around a number of major themes, including linguistic and ethnic groupings, historical periods, literary and cultural movements, religious and philosophical traditions, and political and cultural figures. An ideal course for students wishing to explore European culture and civilisation.
Exercise Sciences

Stage I

EXERSCI 100G 15 Points
Exercise and Fitness: Myths and Reality
An introduction to the principles of physical exercise, with a focus on understanding how the body moves and responds to exercise, how performance can be measured, and how fitness can be developed and maintained to optimise health. Particular emphasis will be placed on the debunking of common myths about exercise, and offering evidence-based advice on the benefits of appropriate physical activity.
Restriction: BIOSCI 107, EXERSCI 101, 105, SPORTSCI 100G, 101, 105, MEDSCI 142

Fine Arts

Stage II

FINEARTS 210G 15 Points
Understanding Contemporary Visual Arts Practice
How does the contemporary artist and designer work? This course presents first-hand, locally engaged practitioners’ perspectives on creative practice. On successful completion of this course students will be able to access local, contemporary art and design with confidence, and to discuss examples of practitioners’ methodologies and areas of investigation. Course work will involve active exploration of the local art world.
Prerequisite: 60 points passed

FINEARTS 211G 15 Points
Understanding Contemporary Fashion Design
Investigates the relationship between fashion design and identity to build understanding of the increasing rapidity of clothing change as both the product of individual choice and the manifestation of a need for community. The emphasis will be on the consumption of fashion and its relationship to the human body with reference to fashion theory in the context of the broader literatures of gender, class and ethnicity.
Prerequisite: 60 points passed

French

Stage I

FRENCH 101G 15 Points
Introductory French Language 1
Introduces students to spoken and written French. It is delivered through two 90-minute sessions per week on campus, blended with an on-line component that uses up-to-date methodology and extensive multimedia materials. It is open to beginners or near beginners. Students who have achieved 24 recent credits in Level 1 NCEA French or 12-16 recent credits in Level 2 NCEA French (or equivalent previous study) should enrol in FRENCH 102. FRENCH 101 does not count towards a major in French. May not be taken if a more advanced language acquisition course in this subject has previously been passed.

Restriction: May not be taken if a more advanced language acquisition course in this subject has previously been passed

Global Studies

Stage I

GLOBAL 101G 15 Points
Global Issues, Sustainable Futures
The basis for sustainability - social issues such as population and consumption, environmental issues such as climate change, limited resources and environmental degradation. Discusses the roles that various disciplines (law, business, engineering and urban planning) will play in developing solutions, including consideration of human rights and good governance, new concepts in economics and business management which will lead to sustainable businesses, developments in science and technology which will change how we manage resources and new visions for cities and communities which will support sustainable ways of life.
Restriction: GENED 101G

History

Stage I

HISTORY 103G 15 Points
Global History
It is only since the fifteenth century that a truly global dimension to history can be identified. This course examines key determinants that have bound the fate of peoples together including the emergence of world trade networks, the growth of world religions, the spread of epidemic diseases, the formation of empires, and the migration of peoples across continents.

Humanities

Stage I

HUMS 100G 15 Points
Digital Humanities: From Text to txt
An interdisciplinary course designed to introduce students to the Humanities using digital tools and resources. Students such as web-mapping, GPS and tracking devices and GIS. Covers key concepts and principles behind these tools and their use, along with practical experiences through laboratories. Critical and theoretical perspectives on the tools, their use, and their social impacts will be discussed.

GEOG 104G 15 Points
Cities and Urbanism
What makes a great city? This course explores ‘urbanism’ in both historical and contemporary cities to determine the essence of urbanity and the way that citizens (and visitors) experience city life. The dynamics and character of cities are considered in terms of their built environment, environmental systems, population, social diversity, and planning policies and practices.
will study the approaches, texts and digital technologies of disciplines in the Humanities such as Art History, English, History, Philosophy, and Theological and Religious Studies. Students will expand their knowledge of the Humanities, extend their digital literacy and build critical and creative thinking skills.

\[\text{Restriction: ARTSGEN 100G}\]

**Innovation**

**Stage I**

**INNOVATE 100G 15 Points**

**Innovation through Design**

Introduces design practice and tools to students in order to develop a user-centred approach to innovation. Students learn about design and, through cycles of empathy, creativity and prototyping, learn to design for innovation.

**Innovation and Entrepreneurship**

**Stage II**

**INNOVENT 203G 15 Points**

**The Entrepreneurial Mindset**

Stimulates new ways of thinking about enterprising behaviour in a multi-disciplinary manner relevant to understanding and addressing real world challenges of today. Introduces skills needed to identify and assess opportunities, solve problems creatively, communicate persuasively, work effectively in teams, and understand individual and organisational impact.

\[\text{Prerequisite: BUSINESS 102 or MGMT 101 or 90 points passed or 60 points from Part I of the BE(Hons) Schedule}\]

**International Business**

**Stage I**

**INTBUS 151G 15 Points**

**Business across Borders**

Business on a global scale presents unique challenges and unrivalled opportunities to companies equipped to cross national boundaries. Set against a background of current events, the course explores the influence of international trade and multinational corporations on the contemporary global economy.

\[\text{Restriction: BUSINESS 101, INTBUS 201, 202}\]

**Italian**

**Stage I**

**ITALIAN 100G 15 Points**

**Introductory Italian Language**

Learn basic Italian language structures and communication skills, including common words and basic phrases concerning everyday life. Acquire skills of interacting verbally by asking and answering straightforward questions on familiar topics. The course is delivered through a combination of class instruction and interactive online activities. For students with no previous knowledge of Italian.

\[\text{Restriction: ITALIAN 106. May not be taken if an equivalent or more advanced language acquisition course in this subject has previously been passed}\]

**ITALIAN 106G 15 Points**

**Italian Language for Beginners 1**

Students learn to speak, read and write Italian, studying aspects of contemporary Italian society and thought. This course does not count towards a major in Italian. For students with no previous knowledge of Italian.

\[\text{Restriction: May not be taken if a more advanced language acquisition course in this subject has previously been passed}\]

**Japanese**

**Stage I**

**JAPANESE 130G 15 Points**

**Japanese Language 1A**

An integrated basic course in modern Japanese covering reading, writing, speaking and listening.

\[\text{Restriction: May not be taken if a more advanced language acquisition course in this subject has previously been passed}\]

**Korean**

**Stage I**

**KOREAN 110G 15 Points**

**Korean for Beginners 1**

Basic written and spoken skills in modern Korean. Through the practice of listening to and reading basic Korean sentences, fundamental grammar and vocabulary are taught so that students will be able to carry out basic conversation and comprehend simple Korean texts.

\[\text{Restriction: KOREAN 100, 250. May not be taken if a more advanced language acquisition course in this subject has previously been passed}\]

**Latin**

**Stage I**

**LATIN 100G 15 Points**

**Introduction to Latin Language 1**

An introduction to the vocabulary and the grammar of simple sentences in Latin.

**Law**

**Stage I**

**LAW 121G 15 Points**

**Law and Society**

An introduction to theories of the nature, functions and origins of law and legal systems, including sources of law; comparative concepts of law; an overview of constitutional and legal arrangements in New Zealand, including the role of the courts; the operation of the legal system in historical and contemporary New Zealand with a focus on concepts of property rights, the Treaty of Waitangi, Treaty Settlements and proposals for constitutional change. Note: Does not meet the General Education requirement for LLB, LLB(Hons), LLB conjoints or LLB(Hons) conjoints.

\[\text{Restriction: LAW 101}\]
Linguistics

Stage I

LINGUIST 101G 15 Points
Language, Mind and Society
A survey of three areas: the interaction between language structure and use on the one hand, and social structure and social norms on the other (sociolinguistics); the relationship between linguistic and cultural knowledge (anthropological linguistics); and the inter-relationship of language and other cognitive structures, especially as it is revealed through language acquisition (psycholinguistics).

Māori Studies

Stage I

MĀORI 101G 15 Points
Introduction to Written Māori
An introduction to listening, reading, writing and translation techniques used in the composition, reading and understanding of basic Māori. Designed for students with little or no knowledge of the language, and for those with some fluency wishing to understand simple sentence structure and composition.
Restriction: May not be taken if a more advanced language acquisition course in this subject has previously been passed

MĀORI 130G 15 Points
Te Ao Māori: The Māori World
An introduction to Māori analyses of topics that are often discussed and sometimes controversial, and that continue to shape contemporary life in New Zealand. Topics include aspects of world view, philosophy and social organisation; the Declaration of Independence, the Treaty of Waitangi and European immigration; and contemporary issues including Treaty claims, ownership of the foreshore and seabed and constitutional issues.

Marine Science

Stage I

MARINE 100G 15 Points
The Oceans Around Us
An interdisciplinary approach to understanding the importance of our oceans as the driver of our climate, source of sustenance, and focus of domestic and international political, economic and legal negotiations. It is framed around physical and biological processes in the ocean which raise questions for ocean management in NZ and internationally, allowing real-world debate about the future of the ocean realm.

Marketing

Stage I

MKTG 151G 15 Points
Essential Marketing
Introduces fundamental marketing ideas and skillsets. Explores the world of customer value creation and marketing communications through the eyes of marketing and creative experts. Covers current topics in marketing including digital and social media, social entrepreneurship, big data analytics, green marketing and sustainability.

Mathematics

Stage I

MATHS 190G 15 Points
Great Ideas Shaping our World
Mathematics contains many powerful and beautiful ideas that have shaped the way we understand our world. This course explores some of the grand successes of mathematical thinking. No formal mathematics background is required, just curiosity about topics such as infinity, paradoxes, cryptography, knots and fractals.

Medical Science

Stage I

MEDSCI 100G 15 Points
Human Mind and Body Relationships
Humans share with other living things the features of physical self-generation and adaptation to the environment. Humans also live in a mental (mind) world and maintain relationships with our perceived environments. Minds and bodies mutually affect one another. This mind/body dance, which is explored in this course, is what gives rise to all of human behaviour from simple daily activities to the highest forms of creativity.

MEDSCI 101G 15 Points
Environmental Threats to Human Health
Our environment sustains our lives but at times threatens our health. These threats may occur naturally, or arise from damage we have inflicted on the environment. This course considers health impacts of climate change, pollution, lifestyle choices, poverty and affluence, workplace hazards, emerging infectious diseases, and dangers affecting cancer risk.

Music

Stage I

MUS 144G 15 Points
Turning-points in Western Music
A study of significant people, major discoveries and inventions, and key factors (artistic, intellectual, social, technical) that were important agents of change in Western music. No previous knowledge of music is assumed.
Restriction: MUSIC 144, 144G

MUS 149G 15 Points
Rock to Reggae: Tracking Popular Music in New Zealand
An introduction to New Zealand's home-grown popular music, from the 1950s to the present day. A broad range of musical styles will be considered and situated within various social contexts. The issue of cultural identity in music – at national and local levels – will also be explored.
Restriction: MUSIC 149, 149G

Optometry and Vision Science

Stage I

OPTOM 101G 15 Points
How We See
Overview of the interdisciplinary study of human vision. The course introduces the biological/physiological organisation of the visual system, discusses the subjective nature of perception, and the implications of studies of biological
visual systems for machine vision. Interdisciplinary understandings of vision will be enriched by the examination of historical paintings and artists’ visual experiences.

Pacific Studies

Stage I
PACIFIC 100G 15 Points
Introduction to Pacific Studies
An introduction to the discipline of Pacific Studies, using the twin perspectives of language and indigenous knowledges as a framework for the expression and understanding of Pacific cultures. Topics covered include language, cultural identity, indigenous knowledge, visual and performing arts, history and political economy.

Pharmacy

Stage I
PHARMACY 111G 15 Points
Drugs and Society
The use of drugs in society including historical perspectives. Selected examples of the use of medicines in disease, recreational drug use and drug misuse, and cultural and ethnic influences on drug use. Differences between conventional and complementary medicines. The role of the pharmaceutical industry in drug discovery, manufacture and promotion. Legal and ethical issues pertaining to access to pharmaceuticals.

Philosophy

Stage I
PHIL 105G 15 Points
Critical Thinking
Dialogue, argument and discussion are analysed. Distinctions are drawn between persuasive, logically good and materially good arguments. The focus is on well reasoned persuasive dialogue, and mistakes in persuasive reasoning. Topics include the point of an argument, strength of arguments, fallacious reasoning, relevance of reasons, and burden of proof.

Physics

Stage I
PHYSICS 107G 15 Points
Planets, Stars and Galaxies
This course tells the story of our place in the Universe. Key topics are the exploration of the solar system, searches for planets around other stars, the structure and evolution of stars and galaxies, high-energy astrophysics, and the origin and overall properties of the Universe. No background in physics or mathematics is assumed.

Planning

Stage I
PLANNING 100G 15 Points
Creative Communities: An Introduction to Planning
The evolution of modern planning as an intellectual and professional movement.

Politics and International Relations

Stage I
POLITICS 107G 15 Points
New Zealand Politics
An introduction to understanding who governs New Zealand and in whose interests. Topics include national identity, institutions of government, leadership, voting and elections, the place of Māori within the political system, parties and political participation. The course draws on current research in NZ politics and provides knowledge that can be applied to a variety of careers, including law, business and public service.

Population Health

Stage I
POPHLHTH 103G 15 Points
Epidemics: Black Death to Bioterrorism
Epidemics have devastated human populations and will continue to do so. This course looks at how epidemics can run rampant through society and how we can control them. It will include examples from the past and present, as well as outline future threats. A diversity of epidemics will be covered, from the plague, gambling, depression, pandemics, nun-biting and alien abduction.

Psychology

Stage I
PSYCH 109G 15 Points
Mind, Brain and Behaviour
Topics covered may include: the nature of sensory and perceptual processes, the cause of perceptual illusions, the structure and function of the human brain, approaches to animal and human learning, models of human language and memory, and the design of psychological experiments. A laboratory component, in which students are required to participate as subjects, forms part of the course.

Russian

Stage I
RUSSIAN 100G 15 Points
Beginners’ Russian 1
A beginner’s course using multi-media (computer) materials that presumes no prior knowledge of Russian, with emphasis on a range of language skills – listening comprehension, speaking, reading, writing, and the essential grammar of Russian.
Restriction: May not be taken if a more advanced language acquisition course in this subject has previously been passed

Samoan

Stage I
SAMOAN 101G 15 Points
Samoan Language 1
Gives students an introduction to the structure of Samoan as well as allowing them to develop basic language skills in listening, speaking, reading and writing. Designed for students with little or no knowledge of the language, and
for those with some fluency wishing to understand simple sentence structure and composition.  
Restriction: May not be taken if a more advanced language acquisition course in this subject has previously been passed.

Science General

Stage I

SCIGEN 101G  15 Points  
Communicating in a Knowledge Society  
Effective communication is required for specialists in all fields to engage meaningfully with society. In this course students gain an understanding of the important role communication plays in a knowledge society. Through case studies and practical experience students learn about the responsibilities and skills required to communicate with a variety of audiences. They learn how to effectively manage and present data and practice oral, written, visual and electronic communication.

Stage II

SCIGEN 201G  15 Points  
Innovating in a Knowledge Society  
Interdisciplinary examination of science innovation at policy, organisational and project levels including context, impacts and roles of business and research organisations, and ways innovations are presented and received. Case study analysis of the business environment including how innovation is both enabled and constrained in science-based organisations and society, and innovation strategies in science–based organisations.

Stage III

SCIGEN 301G  15 Points  
Engaging in a Knowledge Society  
Addressing complex issues requires knowledge experts to engage with a variety of people. Solutions will be gained from collaborations that co-produce knowledge in transdisciplinary partnerships that lead to new ways of thinking. This course explores meaningful ways to engage with communities, and reassesses current ways of knowing and doing.

Sociology

Stage I

SOCIOL 101G  15 Points  
Understanding Aotearoa New Zealand  
Provides an introduction to the sociological analysis of New Zealand society. Looks at familiar events, institutions, social processes from a sociological point of view and offers ways to understand them in new and different ways. Focuses on the structure of New Zealand society and on social and political changes which affect the lives of New Zealanders and shape their society.

Spanish

Stage I

SPANISH 104G  15 Points  
Beginners’ Spanish 1  
Provides a solid grounding in the basic grammar and vocabulary of Spanish. Emphasis is on communicative competence including speaking, listening, reading, and writing skills. This course is designed for beginners or near beginners; thus, students who have achieved 16 credits in Level 2 NCEA Spanish within the last two years must enrol in SPANISH 105 instead. SPANISH 104 does not count towards a major in Spanish.  
Restriction: SPANISH 107. May not be taken if a more advanced language acquisition course in this subject has previously been passed.

Statistics

Stage I

STATS 101G  15 Points  
Introduction to Statistics  
Intended for anyone who will ever have to collect or make sense of data, either in their career or private life. Steps involved in conducting a statistical investigation are studied with the main emphasis being on data analysis and the background concepts necessary for successfully analysing data, extrapolating from patterns in data to more generally applicable conclusions and communicating results to others. Other topics include probability; confidence intervals, statistical significance, t-tests, and p-values; nonparametric methods; one-way analysis of variance, simple linear regression, correlation, tables of counts and the chi-square test.  
Restriction: STATS 102, 107, 108, 191

STATS 150G  15 Points  
Lies, Damned Lies, and Statistics  
Examines the uses, limitations and abuses of statistical information in a variety of activities such as polling, public health, sport, law, marketing and the environment. The statistical concepts and thinking underlying data-based arguments will be explored. Emphasises the interpretation and critical evaluation of statistically based reports as well as the construction of statistically sound arguments and reports. Some course material will be drawn from topics currently in the news.

Sustainability

Stage I

SUSTAIN 100G  15 Points  
Sustainability and Us  
What is sustainability? Discussion of what ‘sustainability’ means, its underpinning values, and the role individuals and organisations play in creating solutions. Students work in groups to investigate a sustainability issue on campus and design a solution, which they present via a film, poster, presentation or model. Examines sustainability issues – water and overpopulation.

Theological and Religious Studies

Stage I

THEOREL 101G  15 Points  
The Bible and Popular Culture  
An exploration of biblical themes, images, and metaphors in contemporary film, music and cultural arts through which religion and culture intersect. It develops tools appropriate for analysing popular culture, as it moves from the local to the national to the global.
