## Philosophy

### Stage I

|                                     |                  |
|-------------------------------------|------------------|
| <b>PHIL 100</b>                     | <b>15 Points</b> |
| <b>Mind, Knowledge, and Reality</b> |                  |

Metaphysics deals with fundamental problems about the nature of the world and human beings, for example, questions about the existence of God, the nature of time, the relationship between mind and body and the nature of identity and the self. The theory of knowledge studies the sources, limits and justification of human knowledge and understanding as distinct from opinion or belief.

|                              |                  |
|------------------------------|------------------|
| <b>PHIL 101</b>              | <b>15 Points</b> |
| <b>Introduction to Logic</b> |                  |

Logic is the study of argument. This course aims to provide an understanding of central logical notions, such as consistency and inconsistency, logical truth, and, most importantly, what it means for an argument to be valid or invalid, sound or unsound. The course examines two main logical systems, propositional and predicate logic, and shows how these formal systems are used to analyse and evaluate arguments.

|                           |                  |
|---------------------------|------------------|
| <b>PHIL 104</b>           | <b>15 Points</b> |
| <b>Ethics and Justice</b> |                  |

How should we live? And how do we live well together? This course examines practical questions of ethics and justice at the personal, professional, social and global levels. The course reflects on these topics in the light of philosophical theories about justice, liberty, rights, and different approaches to ethics that emphasise roles, rules, virtues and consequences.

|                  |                  |
|------------------|------------------|
| <b>PHIL 105</b>  | <b>15 Points</b> |
| <b>PHIL 105G</b> | <b>15 Points</b> |

### Critical Thinking

Dialogue, argument and discussion are analysed. Distinctions are drawn between persuasive, logically good and materially good arguments. The focus is on well reasoned persuasive dialogue, and mistakes in persuasive reasoning. Topics include the point of an argument, strength of arguments, fallacious reasoning, relevance of reasons, and burden of proof.

| <b>Design Methods and Processes 1</b>   |                  |
| Introduces students to key tools, methods and processes of design planning, strategy and practice. Students learn to apply design thinking and technologies to real world contexts and issues. A course of studio-based study focused on a series of creative, hands-on projects and supported by lectures. The emphasis is on human-centred design and interventions.                  |                  |
| <b>DESIGN 101</b>   | <b>15 Points</b> |
| <b>Why We Design</b>  |                  |
| Investigates design as a driver and responder to social needs in contemporary and historic contexts. Students will understand relevant technologies and their contexts. The course explicitly considers planetary limits and sustainability, as well as design and business considered in a social-technological, tikanga Māori, financial, cultural-ethical and environmental context. |                  |
| <b>DESIGN 102G</b>  | <b>15 Points</b> |
| <b>Design Futures</b>   |                  |
| New opportunities are continually emerging in the field of design. This course demonstrates how contemporary design practices have evolved, responded to and influenced change. Students learn how a design approach complements current practice and expands career prospects.   |                  |

### Stage II

|  |                  |
|--|------------------|
| <b>DESIGN 200</b>  | <b>30 Points</b> |
| <b>Design Methods and Processes 2</b>  |                  |
| An intermediate studio-based programme in which students develop a customised design strategy in response to a real-world issue. By working on a detailed case study, students learn to address local issues and engage with the local |                  |

design community. Students present their design solutions, and learn to pitch design concepts and evaluate potential outcomes.

*Prerequisite: DESIGN 100, 101*

|                             |                  |

| <b>DESIGN 201</b>           | <b>15 Points</b> |
| <b>Creative Communities</b> |                  |

Students analyse and discuss the 'design difference' by understanding design as both problem and (potential) solution to one or more identified social issues. Attention is paid to the economic and ethical implications of design with emphasis on value chains and Triple Bottom Line practices.

*Prerequisite: DESIGN 100, 101*

|                              |                  |
|------------------------------|------------------|
| <b>DESIGN 210</b>            | <b>15 Points</b> |
| <b>Indigeneity and Place</b> |                  |

Communication technologies and economic forces are reshaping the ways in which individuals, societies and nations define themselves. In today's global society, what does it mean to belong to a specific place or participate in a specific culture and how might Māori culture locate itself within this global context? Using immersive forms such as video, animation, gaming and/or VR-AR, students will explore their identity—personally, experientially and culturally—in relation to place.

*Prerequisite: DESIGN 100, 101*

|                                 |                  |
|---------------------------------|------------------|

| <b>New Zealand's Narratives</b> |                  |

What were New Zealand's stories, Māori and European? Who got to tell them and why? How have these narratives evolved? How do today's narratives reflect and constitute culture? In this course, students will address these questions by developing and communicating messages, narratives and experiences across a range of media (traditional and digital) with an emphasis on twenty-first century communication via app-based and social media forms.

*Prerequisite: DESIGN 100, 101*

|                                  |                  |
|----------------------------------|------------------|

| <b>Data, Design and Rhetoric</b> |                  |

Data is a valuable resource but can be overwhelming. Economists have used data to influence public policy, but this is changing as data becomes more widely available and informs decision-making more broadly. Students will learn to produce data-driven arguments about a local issue. Using Micro Strategy they will create databases and visualisation concepts (design) and tools (software) to present persuasive design cases.

*Prerequisite: DESIGN 100, 101*

|                      |                  |

| <b>Design Entrepreneurship</b> |                  |

Entrepreneurship and design are equally characterised by open inquiry, trial and error and a view of failure as integral to the creative process. Students will study entrepreneurship in creative industries, focusing on the role of strategic design in the start-up and operation of companies. | <b>Design and Social Responsibility</b> |                  |

Metrics for success differ between profit-making and non-

profit organisations. In this course, students will learn how Triple Bottom Line models measure the wider impact and the social responsibilities of all types of organisation.
