Philosophy

Stage I

PHIL 100 15 Points
Mind, Knowledge, and Reality
Metaphysics deals with fundamental problems about the nature of the world and human beings, for example, questions about the existence of God, the nature of time, the relationship between mind and body and the nature of identity and the self. The theory of knowledge studies the sources, limits and justification of human knowledge and understanding as distinct from opinion or belief.
PHIL 101
Introduction to Logic
Logic is the study of argument. This course aims to provide an understanding of central logical notions, such as consistency and inconsistency, logical truth, and, most importantly, what it means for an argument to be valid or invalid, sound or unsound. The course examines two main logical systems, propositional and predicate logic, and shows how these formal systems are used to analyse and evaluate arguments.

PHIL 104
Ethics and Justice
How should we live? And how do we live well together? This course examines practical questions of ethics and justice at the personal, professional, social and global levels. The course reflects on these topics in the light of philosophical theories about justice, liberty, rights, and different approaches to ethics that emphasise roles, rules, virtues and consequences.

Stage II

PHIL 200
Philosophy of Mind
There are many philosophical problems concerning mental lives (in particular, human mental lives), how they are constituted, and what makes them possible – problems which have generated a vast literature and diverse important philosophical theories. Theories introduced and critically examined will include dualisms, but will mainly comprise forms of physicalism such as philosophical behaviourism, the identity theory and especially functionalist theories. Prerequisite: 30 points in Philosophy or 60 points in Philosophy
Restriction: PHIL 320

PHIL 204
Greek Philosophy
An introduction to some of the important figures in ancient philosophy and the issues with which they were concerned. The work of the Presocratics, Plato, and Aristotle will be explored, with a detailed discussion of the philosophical system of either Plato or Aristotle and its importance in the history of philosophy. Prerequisite: 30 points in Philosophy, or EUROPEAN 100 and 15 points in Philosophy

PHIL 205
Community, Society and Rights
Addresses a variety of topics in political philosophy such as: the political theories of Locke and Hobbes; the nature of rights and rights-holders; sovereignty; strategies for securing stable and just societies with significantly different moral, political and cultural views; and the relationship between individuals and communities.

Topics will be related to contemporary political issues in New Zealand and, in particular, to the Treaty of Waitangi. Prerequisite: 30 points in Global Politics and Human Rights, Philosophy or Politics and International Relations

PHIL 207
Philosophy of Religion
A study of the relationship between reason and faith; is belief in the Judaeo-Christian God reasonable? Topics include: the problem of evil, the meaningfulness of religious language, alternative concepts of God, Hume on miracles, and Kierkegaard and William James on faith and reason. Prerequisite: 30 points in Philosophy
Restriction: PHIL 327

PHIL 209
19th-Century European Philosophy
Examines key figures in nineteenth-century European philosophy, including Arthur Schopenhauer, Friedrich Nietzsche, Søren Kierkegaard, and Karl Marx. Considers alternative reactions to the human condition, either by minimising suffering and seeking tranquillity, by embracing the pain that life contains and continuing to struggle for greatness, by aiming to experience one's true individuality, or by working to establish a non-exploitative social community. Prerequisite: 30 points in Philosophy or EUROPEAN 100 and 15 points in Philosophy
Restriction: PHIL 329

PHIL 210
Applied Ethics
Philosophical analysis and discussion of contemporary moral issues, such as abortion, euthanasia, reverse discrimination, sex work, punishment and the ethics of charity. Prerequisite: PHIL 102 or 104, or 30 points in Philosophy, or 30 points at Stage I in Social Science for Public Health
Restriction: PHIL 313

PHIL 212
Philosophy of the Arts
Considers a range of issues debated by contemporary philosophers concerning the origins, function, definition, ontology, presentation, interpretation, appreciation, expressiveness, representational character, and value of art. Related and applied topics, such as the status of colourised movies, the status of artistic fakes, and the paradox of our enjoying tragedies are also discussed. Prerequisite: 30 points in Philosophy or 90 points in Philosophy
Restriction: PHIL 332

PHIL 216
Modal Logic
An introduction to modal logic, which is a variation of the system of predicate logic studied in PHIL 101. Modal logic is well-suited for studying philosophically important concepts such as necessity, time, knowledge, vagueness, action and obligation. It is also used in computer science for studying the behaviour of programs and is recommended as preparation for studying logic at Stage III. Prerequisite: PHIL 101

PHIL 217
Philosophy of Law

In response to a range of painterly actions and/or a self-generated list of ‘paint-related’ verbs (to roll, to smudge, to scrape, etc.) students will create a ‘catalogue’ of marks and manipulations of paint; they will then develop these ideas through studio practice and research that explores abstraction, materiality, and considerations of form. Students will be guided and encouraged to work beyond and between traditional painting processes in order to develop their own painterly vocabulary.

Prerequisite: FINEARTS 110, 113 and either FINEARTS 111 or 112

Students will be encouraged to gain proficiency with tools and techniques such as cutting, joining and welding.

Prerequisite: FINEARTS 110, 113 and either FINEARTS 111 or 112

How can we retain and communicate the ephemeral effects of a performance (or a documentary record of a performance) in ways that do not interrupt or undermine the fundamentally transitory nature of the performance itself? Students will be guided to explore their own performance practice and to develop appropriate methods of documentation including, but not limited to, video, photography, drawing, and sound recording. Students will learn to use documentation as a visual and conceptual tool: choosing when to direct attention to the residual effects of a performance and when to forego documentation altogether in the pursuit of a direct encounter with an audience.

Prerequisite: FINEARTS 110, 113 and either FINEARTS 111 or 112

FINEARTS 233
Performance 2
15 Points
Focuses on dance, song, narrative and the body as means to examine the ways in which performance can be integral to an artistic and cultural identity. FINEARTS 240
Indigeneity and Culture 1
30 Points
Centres around the concept of whakapapa as the foundation of creative practice. Students will develop artworks that consider the source of their artistic and cultural identity as a set of ever-changing priorities and relations. FINEARTS 242 30 Points

Image, Object and Materiality 1

By making images (painting, prints, photos, etc.), but also through discursive practices of reading, writing and discussion, students will explore the critical capacity of images to communicate, reflect upon or challenge ideas. A combination of lectures and readings will introduce students to various movements, epochs, institutions, and economic and cultural forces that have shaped the ways we relate to images within artistic practice. Students will be encouraged to make and use their own creative images to explore the question of art’s critical-material capacity, the many ways in which images might be “read,” and the range of functions the image has served in the specific cultural contexts in which it emerged. 

Prerequisite: FINEARTS 110, 113 and either FINEARTS 111 or 112

FINEARTS 243 30 Points

Image, Object and Materiality 2

Drawing on the ontology, visual language and materiality of the internet, students will generate sculptural objects and installations that exist in real space. The internet has created networked societies and greatly altered cultural relations, creating the conditions for the emergence of new practices in contemporary art. This course begins from the idea of “Post Internet Art” which is a recent phenomenon of this background. By making artworks, and through reading, writing and discussion, students will explore the critical capacity of images, objects and materiality to capture and reflect ideas. 

Prerequisite: FINEARTS 110, 113 and either FINEARTS 111 or 112

FINEARTS 244 30 Points

Embodiment, Identity and Agency 1

Explores the role of the audience in art and examines the work of artists who have challenged assumptions about that audience: who they are, and who they might be. Using their own choice of medium, students will develop an art project that addresses this question. They will learn how to negotiate the ‘ethics of the encounter’ (with the audience or community) and explore practices and logistics of making artwork in the public domain. One component of the course will consider the ethical and cultural issues facing artists when working with, or consulting, tangata whenua in Aotearoa, New Zealand. 

Prerequisite: FINEARTS 110, 113 and either FINEARTS 111 or 112

FINEARTS 245 30 Points

Seminars and readings will explore key concepts of fluidity, intersectionality, body image, fashion, gender and persona, in relation to photography, film, fashion and the performance of identity. 

Prerequisite: FINEARTS 110, 113 and either FINEARTS 111 or 112

FINEARTS 246 30 Points

Systems, Ecologies and Environments 1

Explores the Māori concept of whakawhanaungatanga as the starting point for a contemporary art practice in the contexts of Aotearoa and Te Moana-nui-a-Kiwa. Drawing on a range of influences including kōrerorero, talanoa and critical pedagogy, students will work in an open and discursive way to develop projects that reflect on the climate crisis and the concept of the anthropocene. Students will then undertake a studio art project that allows them to explore the artistic potential embedded in their relationship ki te ira tangata me te taiao (to people and to the environment). One component of the course will consider the ethical and cultural issues facing artists when working with, or consulting, tangata whenua in Aotearoa, New Zealand. 

Prerequisite: FINEARTS 110, 113 and either FINEARTS 111 or 112

FINEARTS 247 30 Points

Systems, Ecologies and Environments 2

Prerequisite: FINEARTS 110, 113 and either FINEARTS 111 or 112

FINEARTS 248 30 Points

Technology and Material Futures 1

Students will learn to combine virtual and tactile methods of making in order to produce artworks. With the advent of 3-D Printing, technologies of Augmented Reality and Virtual Reality, laser cutting, digital casting and 3-D scanning, the line between analogue and digital artmaking has dissolved. Through seminars and readings, students will focus on the socioeconomic, biological and philosophical issues that arise when everything is malleable and the gap between imaginative projection and the substance of the real world has been placed in question. 

FINEARTS 110, 113 and either FINEARTS 111 or 112

FINEARTS 249 30 Points

Technology and Material Futures 2

Worldmaking: students will work collectively to develop ideas and resolve conceptual, material and technical problems in the process of creating collaborative artworks. Through seminars, dialogue and readings, students will explore ideas of dystopia, utopia, the concept of the Anthropocene, possible material futures, science fiction, and propositional modes of thinking.

This means students wishing to use ESR laboratory facilities as part of the MSc programme will be subject to the same type of access requirements as ESR employees. This includes a security clearance (essentially a check of any convictions recorded against you) and a drug test prior to being given access to ESR resources. Students will normally be required to provide a DNA sample to ensure that any allegations of cross-contamination of a DNA sample can be properly investigated. The DNA profile will be retained by ESR. All other information will be returned to the students at the completion of their studies. Students who would like further details of these conditions should contact the Programme Director.
