**Being Human**

Humans are simultaneously biological, cultural and historical. Humans are biocultural beings who are immersed in social and ecological entanglements which are shaped by, and act as shaping factors of, our bodies, actions and knowledges (including *matāuranga Māori*). **Future Generations Anthropology**

Acknowledges the colonial history of anthropology but imagines an anthropology that is relevant now and for the future, with Aotearoa New Zealand not as just a site of study but an active producer of anthropological knowledge. Explore key anthropological concepts through contemporary research settings and demonstrate the usefulness of anthropology in addressing fundamental local and global issues.

**Stage II**

**ANTHRO 200** **15 Points**  
**Archaeology: Understanding the Past**

An examination of current concepts in archaeological research and their place in the development of archaeological thought. The aim of this course is to examine this phase of development that is neither childhood nor adulthood but lies between, and recent literary and filmic responses to the characteristic interests and demands of readers at this stage of their lives. Course reading will include film and television, as well as written texts.  <i>Prerequisite: 30 points at Stage II in English</i></p>	<p><b>ENGLISH 356</b> <span style="float: right;"><b>15 Points</b></span>  <b>The Modern Novel</b>            A study of fiction. The prescribed works vary widely in their country of origin, formal elements and themes. Some are recognised as classics, while others show the new directions taken by the writers of the time. The texts are given detailed consideration as well as being placed within social and critical contexts.  <i>Prerequisite: 30 points at Stage II in English</i>  <i>Restriction: ENGLISH 220</i></p>
<p><b>ENGLISH 346</b> <span style="float: right;"><b>15 Points</b></span>  <b>African and Caribbean Literature</b>            The Caribbean, by virtue of its geography and history, embraces cultural elements of Africa, India, Europe and North America. ## Philosophy

### Stage I

<b>PHIL 100</b>	<b>15 Points</b>
<b>Mind, Knowledge, and Reality</b>	
Metaphysics deals with fundamental problems about the nature of the world and human beings, for example, questions about the existence of God, the nature of time, the relationship between mind and body and the nature of identity and the self. The theory of knowledge studies the sources, limits and justification of human knowledge and understanding as distinct from opinion or belief.	
<b>PHIL 101</b>	<b>15 Points</b>
<b>Introduction to Logic</b>	
Logic is the study of argument. This course aims to provide an understanding of central logical notions, such as consistency and inconsistency, logical truth, and, most importantly, what it means for an argument to be valid or invalid, sound or unsound. The course examines two main logical systems, propositional and predicate logic, and shows how these formal systems are used to analyse and evaluate arguments.	
<b>PHIL 104</b>	<b>15 Points</b>
<b>Ethics and Justice</b>	
How should we live? And how do we live well together? This course examines practical questions of ethics and justice at the personal, professional, social and global levels. The course reflects on these topics in the light of philosophical theories about justice, liberty, rights, and different approaches to ethics that emphasise roles, rules, virtues and consequences.	
<b>PHIL 105</b>	<b>15 Points</b>
<b>PHIL 105G</b>	<b>15 Points</b>
<b>Critical Thinking</b>	
An introduction to reasoning, argument, and explanation that emphasises the development of practical skills and	

their use in everyday life. The course introduces different forms of reasoning and explains techniques to evaluate them. It will enable students to distinguish good arguments and explanations from bad ones, to explain the difference, and thereby to improve critical thinking abilities.

### Stage II

#### PHIL 200 15 Points Philosophy of Mind

There are many philosophical problems concerning mental lives (in particular, human mental lives), how they are constituted, and what makes them possible – problems which have generated a vast literature and diverse important philosophical theories. Theories introduced and critically examined will include dualisms, but will mainly comprise forms of physicalism such as philosophical behaviourism, the identity theory and especially functionalist theories.

*Prerequisite:* 30 points in Philosophy or 60 points

*Restriction:* PHIL 320

#### PHIL 204 15 Points Greek Philosophy

An introduction to some of the important figures in ancient philosophy and the issues with which they were concerned. The work of the Presocratics, Plato, and Aristotle will be explored, with a detailed discussion of the philosophical system of either Plato or Aristotle and its importance in the history of philosophy.

*Prerequisite:* 60 points from BA courses at Stage I

#### PHIL 205 15 Points Community, Society and Rights

Addresses a variety of topics in political philosophy such as: the political theories of Locke and Hobbes; the nature of rights and rights-holders; sovereignty; strategies for securing stable and just societies between people with significantly different moral, political and cultural views; and the relationship between individuals and communities.
