Notes:
(i) “Candidate/s” refers to candidate/s for the degree of Doctor of Philosophy.
(ii) “Candidature” refers to a person’s status as a candidate for the degree of Doctor of Philosophy.
(iii) “Doctoral year” refers to each block of 12 months from the initial date of programme enrolment.
(iv) Full-time and part-time enrolment are defined in the doctoral full-time and part-time enrolment policy and procedures.

General Requirements
1 A candidate for the Degree of Doctor of Philosophy (PhD) is required to undertake an original and coherent research project and to present the outcome of that research project for examination as a thesis.

2 The research project, which may include scholarly creative practice, must involve enquiry that is experimental and/or critical in nature and be driven by an intellectual hypothesis, position, problem or question(s) capable of being rigorously explored and of making an original and significant contribution to knowledge and/or understanding in the relevant field(s) of study.

3 The research project must be conducted under supervision and over the period of enrolment in the PhD programme, and must be conducted in accordance with the Research Code of Conduct Policy.

4 The thesis requirement at Regulation 1 must be satisfied by a cohesive written document, which shall not normally exceed 100,000 words. Scholarly creative work (written or otherwise) that forms an integrated whole with the written document may be submitted for examination as part of the thesis requirement.

5 The thesis must be undertaken and completed in accordance with the Doctoral Thesis Policy and Procedures and, where scholarly creative work is (to be) presented for examination as part of the thesis requirement, with the PhD – Including Scholarly Creative Work Policy and Procedures.

6 In order for the PhD degree to be awarded, the Board of Graduate Studies (or delegate[s]) must be:
a satisfied that the requirements of Regulations 1-5 and Regulation 47 have been met and
b satisfied that, subject to Regulation 43, the candidate has performed at doctoral level in an oral examination, held in accordance with this Statute on the thesis, the subject of the thesis and the field(s) to which the subject belongs and
c satisfied, by the examination process prescribed by this Statute, that the thesis:
   (i) makes an original and significant contribution to knowledge or understanding in its field(s) and
   (ii) meets internationally recognised standards for such work and
   (iii) demonstrates knowledge of the literature relevant to the subject and the field(s) to which the subject belongs, and demonstrates the ability to exercise critical and analytical judgement of that literature and
   (iv) is satisfactory in its methodology, in the quality and coherence of its expression, and in its scholarly presentation and format.

Duration
7 The thesis must be submitted within a maximum of 48 months of full-time equivalent enrolment from the initial date of enrolment in the PhD programme, unless a later submission date is permitted by the Board of Graduate Studies (or delegate) in accordance with the Doctoral Extension of Enrolment Policy and Procedures. For the avoidance of doubt, the provisions pertaining to the submission of the “thesis” in this regulation and in the remainder of this statute apply to all work (to be) presented for examination in fulfilment of the thesis requirement at Regulation 1.

8 The thesis must not be submitted in less than 36 months of full-time equivalent enrolment from the initial date of enrolment in the PhD programme, unless permission is granted by the Board of Graduate Studies (or delegate).

9 Permission for submission of the thesis must not be granted where a candidate has been enrolled for less than 24 months full-time equivalent from the initial date of enrolment in the PhD programme.
Part-time enrolment may be permitted, subject to the Doctoral Full-time and Part-time Enrolment Policy and Procedures.

A candidate may be permitted to suspend their enrolment subject to the Doctoral Suspension of Enrolment Policy and Procedures.

The examination for the PhD degree must be conducted in accordance with the Doctoral Examination Procedures and/or, where the Board of Graduate Studies (or delegate) regards it as warranted, with the Doctoral Examination Extraordinary Circumstances and Posthumous Award Procedures. Where scholarly creative work is submitted as part of the thesis requirement, the examination is also subject to the PhD – Including Scholarly Creative Work Policy and Procedures.

Except where a candidate is exempted pursuant to the Doctoral Examination Extraordinary Circumstances and Posthumous Award Procedures, the PhD degree cannot be awarded where an oral examination has not taken place.

Where a candidate advances to oral examination, the oral examination is to proceed in accordance with the Doctoral Examination Procedures and the Doctoral Oral Examination Procedures.

50 Before the Board of Graduate Studies (or delegate) makes a decision as to termination of candidature pursuant to Regulation 49, the candidate will be given notice of termination proceedings and allowed 14 calendar days to make a submission for the Board of Graduate Studies (or delegate) to take into account in making that decision. This process is subject to the Doctoral Termination Proceedings Policy.

51 Cancellation or prohibition of enrolment and/or candidature pursuant to any disciplinary statute of the University takes precedence over the provisions of this Statute.

52 a Where a candidate withdraws from the PhD programme, or has their candidature terminated, or fails to meet the requirements for the award of the degree, admission to a new PhD or other doctoral programme in the same subject at a later date will not normally be permitted.

b A person who withdraws from any relevant doctoral enrolment or has a relevant doctoral candidature terminated (or equivalent), or who fails to meet the requirements for the award of a relevant doctoral degree, will not normally be admitted to the PhD except in accordance with the doctoral transfer policy and procedures.

c Relevance and equivalence at Regulation 52b are determined by the Board of Graduate Studies (or delegate).

Variations

53 In exceptional circumstances, the Board of Graduate Studies (or delegate) may approve a variation to the policies, procedures and regulations for PhD candidature, except where variation of a national or government directive or requirement is involved.

Appeals

54 a Candidates may appeal decisions made by the Board of Graduate Studies (or delegate) pertaining to extension and suspension of enrolment subject to the Doctoral Candidature Appeal Procedures.

b A former candidate may appeal the decision made by the Board of Graduate Studies (or delegate) to terminate candidature, or to decline an extension of enrolment, subject to the Doctoral Candidature Appeal Procedures.

55 Appeals as to extension and suspension of enrolment and termination of candidature will be determined in accordance with the Doctoral Candidature Appeal Procedures.

56 Candidates and former candidates may appeal the outcome of a PhD examination only on the grounds that the result was materially impacted by a procedural flaw in the examination process, and subject to the Doctoral Examination Appeal Procedures.

57 Appeals as to examination will be determined in accordance with the Doctoral Examination Appeal Procedures.

Dispute Resolution

58 Disputes are to be resolved according to the Resolution of Student Academic Complaints and Disputes Statute.

59 Any matter that has been, could have been or could be appealed under the provisions of Regulation 54 or 56 is precluded from consideration as a dispute under Regulation 58.

Further Provisions

60 a The PhD programme is subject to the Limited Entry Statute.

b Candidates are subject to:

(i) the Degrees and Diplomas Statute and the Conferment of Academic Qualifications and Academic Dress Statute

and

(ii) the provisions of the Enrolment and Programme regulations pertaining to members of the security intelligence service, rescindment and surrender of qualifications and the Provost’s Special Powers

and

(iii) the Examination Regulations, where coursework is prescribed pursuant to Regulation 27.

61 The doctoral policies and procedures cited in this Statute may be reviewed and amended from time-to-time.
PhD candidates are subject to any additional doctoral policies and procedures devised in support of this Statute, and amended from time-to-time.

This Statute may itself be reviewed and amended from time-to-time.

This Statute came into force on 1 October 2020.

For candidates initially enrolled under a previous statute, the Board of Graduate Studies (or delegate) may agree to vary the application of the provisions of this Statute to ensure consistency with the provisions of the statute under which the candidate was enrolled, where it is satisfied that the candidate would otherwise be at a disadvantage.

**REGULATIONS – HIGHER DOCTORATES**

In addition to the degree of Doctor of Philosophy, the University offers higher doctorates in Engineering (DEng), Laws (LLD), Literature (LittD), and Science (DSc). These are the highest academic awards offered by the University and are awarded to graduates or close affiliates of the University of Auckland who have published original work that has, over an extensive period of time, given them authoritative standing and international eminence in their respective field. The higher doctorate is thus to be seen as recognition of real distinction in one of these areas of study. It is awarded rarely and only after rigorous examination of a substantial and significant corpus of material. A person wishing to become a candidate for a higher doctorate should refer to the Guidelines for Candidates of Higher Doctorates.

**The Degree of Doctor of Engineering – DEng**

Procedure for the Examination of Higher Doctorates

This procedure applies to the examination of the Degrees of Doctor of Engineering, Doctor of Laws, Doctor of Literature and Doctor of Science, and should be read in conjunction with the Higher Doctorate Examination Procedures.

Consideration of Applications to be Examined
1 As soon as possible after an application to be examined has been lodged with the Dean of Graduate Studies and has been determined to meet initial requirements, the application will be forwarded to the relevant Faculty Dean or delegate (“the faculty”) for further consideration.

2 The faculty will appoint an Examination Committee of three senior academics who have a general understanding of the applicant’s field of research. At least two members of the Committee must be academic members of the University, one of whom will be nominated to chair the Examination Committee.

3 The Examination Committee will investigate the information provided, including the quality and nature of the submission for examination, will seek input from the Dean of the faculty, and will make a recommendation to the Dean of Graduate Studies within one month that the faculty:
   a. will allow the applicant to be admitted to candidature for the higher doctorate or
b will not allow the applicant to be admitted to candidature for the higher doctorate.

**Notification of Assessment of Application and Intention to Submit**

4 The Dean of Graduate Studies will advise the applicant of the faculty’s decision and, if the application has been accepted, will request written notification of the applicant’s intention to proceed with candidature and submission. The submission of work to be examined must be received by the Dean of Graduate Studies within three months of the notification that the application was accepted.

5 The examination will not proceed until receipt of the candidate’s written notification of intention to proceed and payment of fees as set out in Schedule B of the Fees Statute.

**Appointment of Examiners**

6 Upon payment of fees and receipt of the candidate’s written notification of intention to proceed, the Dean of Graduate Studies will request that the faculty nominate three external examiners. The nominations should be made within three months of the request. The examiners must be of authoritative standing and international eminence in the field of the submitted work and must be active in research. At least one examiner shall be resident outside New Zealand. Examiners must not have engaged in substantial collaboration with the candidate. Any involvement with the candidate by the examiner which could constitute a conflict of interest should be declared at the outset. The appointment of all examiners must be approved by the Dean of Graduate Studies.

**Submission**

7 The candidate shall lodge at the School of Graduate Studies:
   a three copies of the work to be examined
   and
   b a statutory declaration which shall:
   (i) state the extent to which the work is the candidate’s own, and (in the case of a conjoint work) identify as clearly as possible which parts are the candidate’s own
   and
   (ii) declare that the work in substantially its present form has not been submitted or accepted previously for the award of a degree or diploma in this or any other tertiary institution, and is not being submitted for a degree or diploma in any other tertiary institution or for another degree or diploma at this institution.

**Examination**

8 The degree will be awarded solely on consideration of the submitted works upon which the candidate’s claim to the degree is based.

9 In order to qualify for the degree, the submitted works must provide sufficient evidence that the candidate has made an original contribution of special excellence to their discipline such that they are considered to have authoritative standing and international eminence in their field.

10 Examiners will be requested to report to the Dean of Graduate Studies on the submission within three months of receipt and recommend whether the candidate:
   a should be awarded the degree
   or
   b should not be awarded the degree.

11 The reports of all examiners will be forwarded to the Examination Committee for consideration of whether or not to admit the candidate to the degree.

12 If the examiners’ recommendations differ, the Examination Committee may invite the examiners to consult and provide a written report or reports on the outcome of their consultation. If, after such consultation, the differences remain unresolved, the Examination Committee may recommend to the Dean of Graduate Studies that a further independent external examiner be appointed to report on areas of conflict.

13 The Examination Committee shall recommend an outcome based on the examiners’ reports to the Dean of Graduate Studies. The Dean of Graduate Studies will determine the result of the examination and notify the candidate of the decision.

14 An unsuccessful submission may not be presented for re-examination until at least five years after initial submission and must include new material.

**Deposit of Submission in the Library**

15 On successful completion of the examination of the submitted work, and when possible, two bound copies will be deposited in the University Library by the School of Graduate Studies. The first bound copy will remain in the
Library for reference purposes; the second copy may be borrowed by members of the Library, or sent to other libraries on inter-library loan. The third copy will be returned to the candidate.

**Graduation**

16 Candidates who have satisfied the requirements for any award of the University shall be admitted to that award.
COURSE PRESCRIPTIONS

The Course Prescriptions contain approved University of Auckland courses. Before selecting courses from this Calendar, students and potential students are advised to ascertain which courses are expected to be offered in this Academic Year and in which semester they are scheduled by referring to the Class Search on Student Services Online, or by contacting their Student Hub.

Where courses in the following Course Prescriptions are listed with an ‘A’ and a ‘B’ option, this means that, if they are offered, they will be taught over two semesters and students must enrol in both Part A and Part B in order to complete and, where successful, be credited with the course. Courses with no ‘A’ or ‘B’ designation are taught over one semester.

The Prescriptions are listed by faculty, in alpha-numeric order by subject title and should be read in conjunction with the relevant regulations.

Calculating a Grade Point Average

Grade Point Averages (GPA) are calculated using the following scale. Courses are weighted based on points value, and the exact formula may vary from programme-to-programme.

More details about GPAs are available online at https://uoa.custhelp.com/app/answers/detail/a_id/2454/.

9 for A+  4 for B-
8 for A   3 for C+
7 for A-  2 for C
6 for B+  1 for C-
5 for B   0 for D+, D, D- or F

**CTFOUND 10F**

**English for Academic Purposes**

Develops language skills such as reading, writing, speaking, and listening. Builds academic vocabulary and correct use of grammar, making it easy to understand other subjects. Note-taking, critical thinking, research, and essay writing are covered. This course covers the language skills that will help students understand academic texts at university.

**CTFOUND 11F**

**Accounting**

Accounting is the practice of communicating financial information in order to make effective decisions. This course focuses on how to record business transactions for a company, prepare and analyse the financial statements for a company. Management decision making, break-even analysis, cash budgeting and spreadsheets are also covered.

**CTFOUND 12F**

**Art History**

Discusses the analysis and interpretation of works of art within their cultural and historical context. Artists such as Donatello, Masaccio, Leonardo da Vinci, Michelangelo and Raphael (Renaissance) are studied. The modern period includes Cezanne, Picasso, Braque (Cubism) and Mondrian. A New Zealand artist, Colin McCahon, will also be studied. Encourages students to make connections to other artists. Develops skills in critical analysis, writing, presentation and independent research.

**CTFOUND 13F**

**Biology**

Biology is the study of living things, their environments and their evolution. Understanding how living cells coordinate biochemical reactions, giving rise to what is called 'life'. By exploring biotechnology, students will discover how cellular and molecular biology are applied to practical human purposes. The wide diversity of living things on Earth: ecosystems, plants and animals, genetics and evolution over time will be studied. Provides opportunities for research, discussion, presenting and writing critically about current biology issues.

**CTFOUND 14F**

**Chemistry**

Chemistry is the branch of science concerned with the substances of which matter is composed, the investigation of their properties and reactions, and the use of such reactions to form new substances. Theory is complemented by experiments in which students develop practical skills, such as the use of common laboratory equipment, powers of observation and the ability to communicate results and conclusions.

**CTFOUND 15F**

**Design**

Strong focus on graphic and communication design. Considers graphic design theory and explores communication design solutions by producing a brand identity for an individually chosen project. Students will learn how to design a logo and poster, produce imagery, develop an understanding of building a design brand, interpret and read design works and learn how to use Photoshop.

**CTFOUND 16F**

**Economics**

Economics is the study of scarcity; of how society chooses to use scarce resources to satisfy its unlimited wants. Explores what motivates consumers and producers, how the market works and how markets react to change. Increases students' understanding of what makes up an economy, how it works and why it is important for the individual and others. Uses economic theory to analyse real-life situations. Challenges students to think like an economist and practise decision making.

**CTFOUND 17F**

**Mathematics with Calculus**

Calculus is a branch of mathematics that provides an understanding of the changes between values that are related by a function. Students will learn how to manipulate mathematical equations, read trigonometric functions, differentiate to get functions that show rates of change, and integrate to obtain formulas that describe things that are not visible. Logical thinking and reasoning, algorithmic processes and problem solving will also be studied.

Restriction: CTFOUND 18F

**CTFOUND 18F**

**Mathematics with Modelling**

Modelling is a branch of mathematics where mathematical representations of the surrounding world are created in order to increase knowledge and predict the future. Students will learn how to manipulate mathematical equations, read trigonometric functions, create formulas for real-life situations and maximise profits and minimise costs. Logical thinking and reasoning, algorithmic processes and problem-solving will be covered.

Academic Integrity

ACADINT A01 0 Points
Academic Integrity Course
An online course designed to increase student knowledge of academic integrity, university rules relating to academic conduct, and the identification and consequences of academic misconduct. Students work through a series of modules, outlining scenarios that they may encounter while studying at university. Each scenario provides information on relevant rules, resources and expected behaviour.

Accounting

Stage I

ACCTG 151G 15 Points
Financial Literacy
People who understand the basic principles of finance are likely to get much more mileage out of their money – whether spending, borrowing, saving or investing – than those who do not. Develop an understanding of how to be in control of spending and saving; understand borrowing; make informed investment decisions; know broadly what to insure and what not to; recognise scams and consider whether money is the key to happiness.

Restriction: May not be taken by students with a concurrent or prior enrolment in Accounting or Finance courses

Anthropology

Stage I

ANTHRO 104G 15 Points
Peoples and Cultures of the Pacific
A survey of the peoples of Pacific Islands through the perspectives of archaeology, biological anthropology, ethnomusicology, linguistics and social anthropology.

ANTHRO 106G 15 Points
Global Sound Cultures: Musics, Places and People
Examines a wide range of sound and music cultures, from popular transnational mediations to locally produced, community-based traditions. We consider the ways that music takes on meaning, represents identities and places, and interacts with the world. We trace the historical/economic processes by which music cultures emerge and are sustained (or not). We look at the emotional and economic roles that music plays in lives of musicians, composers and listeners. Using theories from ethnomusicology, anthropology, musicology and cultural studies we show how music is affected by and reflects social change, colonisation and indigeneity, technology and local/global economic processes.
