   BCom/LLB

Except as otherwise specified in these regulations, each student’s programme is to be governed by the regulations for each of the component degrees.

Only when all the requirements for both component degrees have been satisfied may the two degrees be conferred upon the student.

**Admission**

Admission to a conjoint degree programme may be at initial enrolment, or after the student has passed or been credited with not more than 270 points for either component degree, but the student must not have graduated in either of the component degrees.

A student seeking admission to a conjoint degree programme must gain admission to each of the component degrees and achieve a standard equivalent to a Grade Point Average of at least 3.9, except for the Bachelor of Advanced Science (Honours) and the Bachelor of Engineering (Honours) which require a Grade Point Average of at least 5.5 in the previous year of full-time study.

**Continuation**

In order to continue in a conjoint degree programme, a student needs to achieve a Grade Point Average of at least 3.5 each year, except for the Bachelor of Engineering (Honours) conjoint degrees which require a GPA of 4.0 each year, and Bachelor of Advanced Science (Honours) conjoint degrees which require a Grade Point Average of 5.0 each year.

A student who has been discontinued from a conjoint degree programme due to the continuation requirement specified in Regulation 6 may re-apply for admission under these regulations. To be eligible for readmission: a the student must have achieved a Grade Point Average of at least 3.5, 4.0 for the Bachelor of Engineering (Honours) or 5.0 for the Bachelor of Advanced Science (Honours), in the most recent 120 points of study towards one or more of the component degrees following the student's discontinuation. In exceptional circumstances the required Grade Point Average may be waived by Senate or its representative. If a student has fewer than 120 points to complete then they may apply for readmission immediately. b neither of the component degrees can have been awarded.

A student must state the reasons for re-admission, and include evidence where applicable. Where such application is made, the Deans or nominees of the respective faculties may: a permit the student to be readmitted to the conjoint degree programme b permit the student to be readmitted under specific conditions c decline readmission.

A student may be readmitted to a conjoint degree programme once, other than in exceptional circumstances approved by Senate or its representative.

**Approval**

As a condition of approval, a student may be required to include in a conjoint programme: a a specified major subject or specialisation b specified elective courses.

**Total Points Value**

The total points required for each conjoint degree programme is stated in the Conjoint Degree Schedule and includes the General Education requirement, where applicable.

**Academic Integrity**

All students must pass the University of Auckland Academic Integrity course as specified in the Enrolment and Programme Regulations, Academic Integrity, of the University Calendar.

**General Education**

All students enrolled in a conjoint degree programme, except students enrolled in a BE(Hons)/LLB and BE(Hons)/LLB(Hons), must pass 15 points from courses listed in either the General Education Open Schedule or either of the General Education Faculty Schedules approved for the component degrees for the conjoint degree programme.

**General Education Exemptions**

A student is exempted from the requirement to pass a course offered in the General Education Schedule who has:

1. either
(i) completed an undergraduate degree at a tertiary institution 

or 

(ii) commenced study for their degree at a tertiary institution before 1 January 2006 

or 

(iii) completed a minimum of 50 points of study towards this degree in one semester at an overseas institution, either through an overseas exchange programme or through prior approval under the Credit Regulations.

b A student who has been admitted to either component degree of a conjoint degree programme who has completed 120 points or more of degree-level study at another tertiary institution is exempted from the General Education requirement for the conjoint degree.

c A student who has been exempted from the General Education requirement must substitute 15 points from courses available for the component degrees.

Suspension

15 A student may in any year totally suspend study for both component degrees of a conjoint degree programme.

Additional Component Degrees/Diplomas

16 a If a student has satisfied the requirements of one (but not both) of the component degrees and would be eligible to have that degree conferred, the relevant Dean may approve the suspension of enrolment for the conjoint degree programme to allow the student to enrol for a relevant honours or Masters degree or diploma. In that case the total number of points passed must satisfy the regulations specified for that postgraduate programme.

b With the approval of the relevant Deans, a student who suspends their study in a conjoint degree programme to pursue a graduate programme may subsequently complete the conjoint degree programme provided they have not graduated with either of the component degrees in the meantime.

Graduation

17 Graduation in one component of the conjoint degree constitutes a discontinuation of the conjoint degree programme.

18 A student must graduate in both components of the conjoint degree in one or more ceremonies in the same graduation period.

Variations

19 In exceptional circumstances Senate or its representative may approve a personal programme which does not conform to these regulations.

Amendment

20 These regulations and/or schedule have been amended with effect from 1 January 2024.

The specific requirements for each conjoint degree programme can be found in the Conjoint Degree Schedule and the Conjoint Component Requirements Schedule.

c. a further 15 points from courses available for any programme at this University.

Bachelor of Global Studies/Bachelor of Science – BGlobalSt/BSc

1. A student must pass courses with a total value of 540 points, including
   a. 255 points as listed in the BGlobalSt component in the Conjoint Component Requirements Schedule
   and
   b. 255 points as listed in the BSc component in the Conjoint Component Requirements Schedule
   and
   c. a further 15 points from courses available for any programme at this University.

Bachelor of Health Sciences/Bachelor of Laws – BHSc/LLB

1. A student must pass courses with a total value of 675 points, including:
   a. 255 points as listed in the BHSc component in the Conjoint Component Requirements Schedule
   and
   b. 405 points as listed in the LLB component in the Conjoint Component Requirements Schedule.

Bachelor of Health Sciences/Bachelor of Laws (Honours) – BHSc/LLB(Hons)

1. A student must pass courses with a total value of 735 points, including:
   a. 255 points as listed in the BHSc component in the Conjoint Component Requirements Schedule
   and
   b. 465 points as listed in the LLB(Hons) component in the Conjoint Component Requirements Schedule.

Bachelor of Health Sciences/Bachelor of Nursing – BHSc/BNurs

1. A student must pass courses with a total value of 570 points, including:
   a. 255 points as listed in the BHSc component in the Conjoint Component Requirements Schedule
   and
   b. 300 points required for the BNurs component, including:
      (i) 285 points: MEDSCI 142, NURSING 105, 199, 201, 202, 301, 302
      (ii) 15 points from CHEM 110, NURSING 104
   and
   c. a further 15 points from courses available for any programme at this University.
Bachelor of Health Sciences/Bachelor of Science – BHSc/BSc
1 A student must pass courses with a total value of 540 points, including:
   a 255 points as listed in the BHSc component in the Conjoint Component Requirements Schedule

   a 255 points as listed in the BSc component in the Conjoint Component Requirements Schedule
   and
   b 405 points as listed in the LLB component in the Conjoint Component Requirements Schedule.

Bachelor of Science/Bachelor of Laws (Honours) – BSc/LLB(Hons)
1 A student must pass courses with a total value of 735 points, including:
   a 255 points as listed in the BSc component in the Conjoint Component Requirements Schedule
   and
   b 465 points as listed in the LLB(Hons) component in the Conjoint Component Requirements Schedule.

Conjoint Component Requirements Schedule

Bachelor of Advanced Science (Honours) – BAdvSci(Hons)
375 points from courses listed as available for the BSc or BSc(Hons) Schedules, including:
   • at least 270 points above Stage I, including at least 195 points above Stage II
   • courses in a minimum of two subject codes listed in the Bachelor of Science or Bachelor of Science (Honours) Schedule
   • at least 120 points at 700 level, including a research project or dissertation of between 30 and 60 points
   • the requirement for a specialisation as listed in the Bachelor of Advanced Science (Honours) Schedule
   • the requirement for core courses as listed in the Bachelor of Advanced Science (Honours) Schedule

   For the BAdvSci(Hons) component, students may include one or more modules and only the modules available in the Bachelor of Science Schedule can be included.

Bachelor of Arts – BA
255 points from courses listed in the Bachelor of Arts Schedule, including:
   • the requirements for one or more majors as specified in the Bachelor of Arts Regulations and Schedule of which at least 45 points must be above Stage II for each major
   • at least 165 points above Stage I, of which at least 75 points must be above Stage II

Bachelor of Commerce – BCom
255 points from courses listed in the Bachelor of Commerce Schedule, including:
   • 105 points: BUSINESS 111, 112 or 113, 114, 115, 202, INFOSYS 110, STATS 100 or 108
   • 15 points from BUSINESS 350–353
   • at least 135 points above Stage I including at least 75 points above Stage II
   • the requirements for one or more majors as specified in the Bachelor of Commerce Schedule, of which at least 45 points must be at Stage III in each major

   A student may substitute one or more other courses for one or more of the above courses with the permission of Senate or its representative.
Bachelor of Communication – BC

255 points, including:
• at least 165 points in courses above Stage I, of which at least 75 points must be above Stage II
• 120 points from the Core Courses listed in the Bachelor of Communication Schedule
• the requirements for a major as specified in the Bachelor of Communication Schedule

Bachelor of Design – BDes

255 points:
• 165 points: DESIGN 100, 101, 200, 201, 300, 301, 302
• 90 points from DESIGN 210–243

Bachelor of Engineering (Honours) – BE(Hons)

420 points, including:
• 105 points: CHEMMAT 121, ELECTENG 101, ENNGEN 115, 121, 131, 140, 199, ENGSCI 111
• 315 points of courses in one of the following specialisations:
  Biomedical Engineering
  Part II
  • BIOMENG 299 or ENNGEN 299
  • 120 points: BIOMENG 221, 241, 261, BIOSCI 107, ENNGEN 204, ENGSCI 211, 233, MEDSCI 142
  Part III
  • 90 points: BIOMENG 321, 341, ENGSCI 314, 331, MEDSCI 205, 309
  Part IV
  • ENNGEN 499
  • 30 points: BIOMENG 791, ENNGEN 403
  • a further 45 points from courses listed in Part IV of this BE(Hons) specialisation
  • 30 points: ENGSCI 700 Research Project
  Chemical and Materials Engineering
  Part II
  • CHEMMAT 299 or ENNGEN 299
  • 120 points: CHEMMAT 201–206, ENNGEN 204, ENGSCI 211
  Part III
  • 90 points: CHEMMAT 301–303, 305, 306, ENGSCI 311
  Part IV
  • ENNGEN 499
  • 30 points: CHEMMAT 752, ENNGEN 403
  • a further 15 points from courses listed in Part IV of this BE(Hons) specialisation
  • 30 points: CHEMMAT 750 Design Project
  • 30 points: CHEMMAT 751 Research Project
  Civil Engineering
  Part II
  • CIVIL 299 or ENNGEN 299
  • 120 points: CIVIL 200, 202, 203, ENNGEN 204, ENGSCI 211, ENVENG 200, STRCTENG 200, 201
  Part III
  • 90 points: CIVIL 300, 302, 303, ENGSCI 311, ENVENG 300, STRCTENG 304

• 45 points: ENNGEN 403, MECHENG 705, 706
• a further 30 points from courses listed in Part IV of this BE(Hons) specialisation
• 30 points: MECHENG 700 Research Project

Software Engineering
Part II
• ENNGEN 299 or SOFTENG 299
• 90 points: COMPSYS 201, ENNGEN 204, ENGSCI 211, SOFTENG 206, 281, 283
• a further 30 points from courses listed in Part II of this BE(Hons) specialisation
Part III
• 45 points: SOFTENG 306, 325, 351
• 30 points from SOFTENG 310, 350, 364, 370
• a further 15 points from courses listed in Part III of this BE(Hons) specialisation
Part IV
• ENNGEN 499
• 30 points: ENGGEN 403, SOFTENG 770
• a further 45 points from courses listed in Part IV of this BE(Hons) specialisation
• 30 points: SOFTENG 700 Research Project

**Structural Engineering**

**Part II**
• ENGGEN 299 or STRCTENG 299
• 120 points: CIVIL 200, 202, 203, ENGGEN 204, ENGSCI 211, ENVENG 200, STRCTENG 200, 201

**Part III**
• 90 points: CIVIL 300, ENGSCI 311, STRCTENG 300-303

**Part IV**
• ENGGEN 499
• 75 points: CIVIL 756, 790, ENGGEN 403, STRCTENG 710, 711
• 30 points: CIVIL 705 Research Project

All BE(Hons) conjoint students must either:

1. complete BUSINESS 111 and either 112 or 113, or DESIGN 220 or 221 or 222, or ECON 151 and GLOBAL 101, or COMMS 320, or ENGGEN 303, or LAW 241, or MUS 365, or PROPERTY 231, or SCIGEN 201, or another course approved by the BE(Hons) Programme Director as being equivalent to ENGGEN 303, in their non-BE(Hons) component degree, or

2. complete SCIGEN 201G or another General Education course approved by the BE(Hons) Programme Director as being equivalent to ENGGEN 303.

A student may substitute one or more other courses for one or more of the courses listed in the BE(Hons) component with the permission of the BE(Hons) Programme Director or nominee.

Where approved courses are listed in the Bachelor of Engineering (Honours) Schedule, inclusion of these courses in this conjoint component must be approved by the Head of Department or nominee prior to enrolment.

Academic English Studies

Academic English Studies offers credit courses for international students and New Zealand residents whose first language is not English.

A range of courses is offered with the aim of improving academic English skills and increasing proficiency in reading and writing for academic purposes. Students gain credit points for successfully passing each course.

ACADENG 100 develops skills in English grammar and vocabulary for academic reading and writing. ACADENG 101 focuses on academic writing, and the skills needed for basic academic essays. ACADENG 104 focuses on academic English skills to help Business students understand and express business-related concepts. At Stage II level, ACADENG 210 is an advanced academic writing course for students who need to write academic research reports.

ACADENG 100, ACADENG 101 and ACADENG 104 are approved courses for students who have not met the Academic English Language Requirement (AELR). ACADENG 104 can be taken as an elective but priority is given to Business students who need the course to meet the AELR.

Further information may be obtained from the School of Cultures, Languages and Linguistics, Faculty of Arts.
Phone: +64 9 373 7599 ext 86727.

New Start

New Start provides part-time University preparation courses for adults over the age of 20 who need skills and confidence to undertake academic study. No previous qualifications are required. Students are required to be New Zealand citizens or permanent residents.

Students gain information on the structure of university degrees, and an insight into the standard of work expected. Educational guidance is an integral part of New Start and ongoing planning is offered during the semester.

In addition, students are required to complete the University of Auckland Academic Integrity ACADINT A01 course and the Diagnostic English Language Needs Assessment (DELNA) while they are with New Start.

New Start General NSGEN 47

New Start General introduces students to a variety of lecture topics in communications, education, humanities, law and social sciences, and offers tutorials, assignments with written feedback and a final test.

This is a 13-week part-time, day or evening course, also with weekend options, providing a comprehensive overview of first-year degree study. This course is compulsory for all students. Depending on the final grade achieved students
may apply for admission into an undergraduate degree in the faculties of Arts, Business, Education and Social Work and Law.

New Start General is offered at three campuses throughout the year: University of Auckland City Campus (Semester One or Semester Two), Te Papa Ako o Tai Tonga Campus, Manukau (Semester One) and Tai Tokerau Campus in Whāngarei (Summer School).

**New Start Mathematics**

Two mathematics papers are taught at the University of Auckland City Campus: Mathematics Fundamentals NSMAT 10 and Mathematics Preparation for University NSMAT 14. Students intending to enrol in these courses must first sit a maths assessment.

Note that Mathematics Preparation for University is designed to be taken with New Start General as a pathway to Business School. Results will be used to recommend the best pathway for students.

**Mathematics Fundamentals NSMAT 10**

Mathematics Fundamentals NSMAT 10 is a short intensive course taught over four consecutive Saturdays in a workshop environment designed to build students' skills and confidence. Students will be working together collaboratively, either as a class or in groups, but sometimes there will be lectures. The course includes assignments and a final test. Students who require additional mathematics support are advised to enrol in this course before undertaking Mathematics Preparation for University NSMAT 14.

This course is offered in Summer School or can be taken in the mid-semester break before the start of Semester Two.

**Mathematics Preparation for University NSMAT 14**

A variety of topics of everyday interest is explored with the aim of clarifying the underlying mathematics and statistics.

This is a 12-week part-time course held in Semester One or Semester Two. The course includes lectures, assignments and a final test.

This course is compulsory and taken together with New Start General NSGEN 47 for students planning to pathway to an undergraduate degree in Commerce or Property at the University’s Business School.

A grade of A– or above achieved in this course and New Start General NSGEN 47 enables students to apply for admission to the Bachelor of Commerce or Bachelor of Property.

GENERAL EDUCATION REGULATIONS AND SCHEDULES

General Education Regulations

1. Students required to include General Education in their programme must pass courses as specified in the General Education Regulations and Schedules for their programme.

2. A student will not meet the General Education requirement for their programme if they complete a General Education course with the same subject code as any non-General Education course they have previously passed, or are already enrolled in.

   a. A student will not meet the General Education requirement for their programme if they subsequently enrol in and pass a course with the same subject code as a General Education course which has been passed for their programme, unless the subsequent course is either another General Education course or is assigned to a different programme. Where appropriate the student may be able to use previously completed General Education course(s) to meet another degree requirement. This regulation does not apply to the following courses:
      (i) LAW 121G, 131, and 141 provided no other courses from Parts II–IV of the LLB were completed.
      (ii) EDUC 100G for students enrolled in the BEd(Tchg).

   b. A student who subsequently enrols in and passes a course with the same subject code as a General Education course which has been passed for their programme, unless the subsequent course is either another General Education course or is assigned to a different programme. Where appropriate the student may be able to use previously completed General Education course(s) to meet another degree requirement. This regulation does not apply to the following courses:
      (i) LAW 121G, 131, and 141 provided no other courses from Parts II–IV of the LLB were completed.
      (ii) EDUC 100G for students enrolled in the BEd(Tchg).

   c. A student who transfers programmes can meet the General Education requirement of their new programme using a course in a subject in which they have passed more than one course if the only courses in that subject credited or reassigned to their new programme are General Education courses.

   d. ANTHRO 106G does not meet the General Education requirement for the Bachelor of Music or Bachelor of Music conjoints.

   e. DISABLTY 113G does not meet the General Education requirement for the Bachelor of Human Services or the Bachelor of Social Work.

3. Language courses do not satisfy the General Education requirement for a student who has prior knowledge of the language (for example, as a native speaker, through formal or informal study, or through living with others who speak the language). A student with prior knowledge of the language may be declined enrolment or the enrolment may be deleted at the discretion of the Academic Head or nominee.

4. A student who is required to meet the Academic English Language Requirement through the completion of an approved academic English Language course, as specified in the Enrolment and Programme Regulations, Academic English Language Requirement, of the University Calendar, may substitute one of ACADENG 100, 101, 104, ENGWRIT 101 for 15 points of General Education.

   b. In exceptional circumstances approval may be given by the relevant Associate Dean Academic for a student who has already met the Academic English Language Requirement to substitute one of ACADENG 100, 101, 104, ENGWRIT 101 for 15 points of General Education.

Notes:

(i) Some courses available for General Education are also available as part of regular degree requirements. The content and assessment for both occurrences of the course are the same. A student must enrol in the General Education offering of a course in order to meet the General Education requirements of their programme.

(ii) Some General Education courses have limits on the number of students who can enrol. Places in these courses will be allocated on a first-come-first-served basis.

REGULATIONS – DOCTOR OF PHILOSOPHY

Statute for the Degree of Doctor of Philosophy – PhD

Notes:
(i) “Candidate/s” refers to candidate/s for the degree of Doctor of Philosophy.
(ii) “Candidature” refers to a person’s status as a candidate for the degree of Doctor of Philosophy.
(iii) “Doctoral year” refers to each block of 12 months from the initial date of programme enrolment.
(iv) Full-time and part-time enrolment are defined in the doctoral full-time and part-time enrolment policy and procedures.

General Requirements
1 A candidate for the Degree of Doctor of Philosophy (PhD) is required to undertake an original and coherent research project and to present the outcome of that research project for examination as a thesis.
2 The research project, which may include scholarly creative practice, must involve enquiry that is experimental and/or critical in nature and be driven by an intellectual hypothesis, position, problem or question(s) capable of being rigorously explored and of making an original and significant contribution to knowledge and/or understanding in the relevant field(s) of study.
3 The research project must be conducted under supervision and over the period of enrolment in the PhD programme, and must be conducted in accordance with the Research Code of Conduct Policy.
4 The thesis requirement at Regulation 1 must be satisfied by a cohesive written document, which shall not normally exceed 100,000 words. Scholarly creative work (written or otherwise) that forms an integrated whole with the written document may be submitted for examination as part of the thesis requirement.
5 The thesis must be undertaken and completed in accordance with the Doctoral Thesis Policy and Procedures and, where scholarly creative work is (to be) presented for examination as part of the thesis requirement, with the PhD – Including Scholarly Creative Work Policy and Procedures.
6 In order for the PhD degree to be awarded, the Board of Graduate Studies (or delegate[s]) must be:
   a satisfied that the requirements of Regulations 1-5 and Regulation 47 have been met
   and
   b satisfied that, subject to Regulation 43, the candidate has performed at doctoral level in an oral examination, held in accordance with this Statute on the thesis, the subject of the thesis and the field(s) to which the subject belongs
   and
   c satisfied, by the examination process prescribed by this Statute, that the thesis:
      (i) makes an original and significant contribution to knowledge or understanding in its field(s)
      and
      (ii) meets internationally recognised standards for such work
      and
      (iii) demonstrates knowledge of the literature relevant to the subject and the field(s) to which the subject belongs, and demonstrates the ability to exercise critical and analytical judgement of that literature
      and
      (iv) is satisfactory in its methodology, in the quality and coherence of its expression, and in its scholarly presentation and format.

Duration
7 The thesis must be submitted within a maximum of 48 months of full-time equivalent enrolment from the initial date of enrolment in the PhD programme, unless a later submission date is permitted by the Board of Graduate Studies (or delegate) in accordance with the Doctoral Extension of Enrolment Policy and Procedures. For the avoidance of doubt, the provisions pertaining to the submission of the “thesis” in this regulation and in the remainder of this statute apply to all work (to be) presented for examination in fulfilment of the thesis requirement at Regulation 1.
8 The thesis must not be submitted in less than 36 months of full-time equivalent enrolment from the initial date of enrolment in the PhD programme, unless permission is granted by the Board of Graduate Studies (or delegate).
9 Permission for submission of the thesis must not be granted where a candidate has been enrolled for less than 24 months full-time equivalent from the initial date of enrolment in the PhD programme.
Part-time enrolment may be permitted, subject to the Doctoral Full-time and Part-time Enrolment Policy and Procedures.

A candidate may be permitted to suspend their enrolment subject to the Doctoral Suspension of Enrolment Policy and Procedures.

Unless permitted under the PhD – Masters Thesis Transfer Policy and Procedures, the initial date of enrolment in the PhD programme may not be backdated except in exceptional circumstances as approved by the Board of Graduate Studies (or delegate) and up to a maximum of six months.

### Admission

To be admitted to the PhD programme, applicants must satisfy the University’s Admission regulations and are required to have:

a in their most recent attempt at a relevant qualification:

(i) completed the requirements for a Bachelors Honours or Masters degree or postgraduate diploma in a relevant subject area with at least a B+ average at the University of Auckland, or, where relevant to the intended subject of the PhD, the Degree of Bachelor of Medicine and Bachelor of Surgery at the University of Auckland; in all cases relevance is determined by the Board of Graduate Studies (or delegate)

or

(ii) satisfied the requirements of the PhD – Masters Thesis Transfer Policy and Procedures

or

(iii) completed the requirements for a qualification approved by the Board of Graduate Studies (or delegate) as relevant, with regard to subject area, and as equivalent to a Bachelors Honours or Masters degree with at least a B+ average at the University of Auckland

and

b satisfied the requirements of the Doctoral Candidate Research Capacity Policy and Procedures

and

c satisfied the University of Auckland postgraduate English language requirements and any further requirements for evidence of English language proficiency set by the Board of Graduate Studies (or delegate)

and

d where creative work is to be presented for examination as part of the thesis requirement, have satisfied the eligibility and research project approval requirements of the PhD – Including Scholarly Creative Work Policy and Procedures

and

e have a research project approved by the Board of Graduate Studies (or delegate) as consistent with the requirements of Regulation 2 and capable of satisfying the requirements for the award of the PhD degree

and

f have the approval of the Head(s) of the relevant academic unit(s) or their nominee(s) for the purposes of doctoral matters (“the Academic Head(s)”) with regard to the availability of appropriate supervision and the availability of the research resources deemed necessary by the Academic Head(s).

In exceptional circumstances, the Board of Graduate Studies (or delegate) may, subject to the Doctoral Exceptional Circumstance Entry Policy and Procedures, admit to the PhD programme an applicant whose qualifications do not meet the requirements of Regulation 13a.

An applicant may be considered for transfer from an existing doctoral enrolment subject to the Doctoral Transfer Policy and Procedures.

An applicant may be considered for off-campus enrolment subject to the Doctoral Off-campus Research Policy and Procedures.

The final decision on admission to the PhD programme shall be made by the Board of Graduate Studies (or delegate).

Admission to the PhD programme may be rescinded prior to enrolment in the programme where information that was not available to the Board of Graduate Studies (or delegate) at the time the admission decision was made, and which would have resulted in a different decision being made, becomes available, or where, due to circumstances unforeseeable at the time of the decision, supervision and/or necessary resources will no longer be available for the enrolment.

Admission to the PhD programme is valid for up to six months (or a maximum of 12 months in exceptional circumstances as approved by the Board of Graduate Studies (or delegate)) from the date of notification of admission to the programme. Where enrolment in the programme does not occur within that time, re-application for admission to the programme is required.
20 Concurrent enrolment in another programme at the University of Auckland or at another institution is not permitted except as approved by the Board of Graduate Studies (or delegate) in exceptional circumstances.

21 Persons who are permitted by the Board of Graduate Studies (or delegate) to enrol in a joint or dual doctoral degree must satisfy all the requirements of this Statute in order to have the PhD degree awarded, unless an individual requirement is varied under Regulation 53.

**Supervision**

22 The Academic Head(s) is (are) responsible for the provision of supervision for the duration of the candidate's enrolment.

23 The Board of Graduate Studies (or delegate) will appoint at least two supervisors for each candidate in accordance with the Doctoral Supervision Policy and Procedures.

24 Changes in supervision during candidature are subject to the Doctoral Supervision Policy and Procedures and the approval of the Board of Graduate Studies (or delegate), with whom the final decision as to the appointment of supervisors rests.

**Enrolment and Candidature**

25 Except for any period(s) of suspension approved under Regulation 11, candidates are required to be enrolled continuously from the initial date of enrolment in the PhD programme until the date of thesis submission under Regulations 7–9.

26 Candidature for the PhD degree commences upon enrolment in the PhD programme and continues, regardless of any period(s) of suspension approved under Regulation 11, until the date on which any one of the following occurs:
   a notification from the Board of Graduate Studies (or delegate) that all requirements for the award of the degree at Regulation 6 have been met
   b notification from the Board of Graduate Studies (or delegate) that the final decision under Regulation 46 is that the degree not be awarded
   c candidature expires under Regulation 28
   d a candidate withdraws under Regulation 48
   e candidate is terminated by the Board of Graduate Studies (or delegate) pursuant to Regulation 49.

27 Candidature is provisional until confirmed, and is subject to the Doctoral Confirmation of Candidature Policy and Procedures, the Doctoral Continuation of Confirmed Candidature Policy and Procedures, and the Doctoral Candidature Intervention Policy and Procedures.

28 a Candidature expires when the thesis is not submitted for examination by the date required under Regulation 7.
   b Candidature expires when the thesis is not submitted by the date specified by the Board of Graduate Studies (or delegate) pursuant to Regulation 45.

29 Where candidature has expired under Regulation 28, it may be reinstated only as the outcome of a successful application to the Board of Graduate Studies (or delegate) for a (retrospective) extension of enrolment, or by successful appeal under Regulation 54 of a decision by the Board of Graduate Studies (or delegate) to decline an extension of enrolment (retrospective or otherwise).

30 Enrolment in the PhD programme is not possible where candidature remains expired under Regulation 28 or where a candidate withdraws from the programme under Regulation 48.

31 Termination of candidature under Regulation 49 is also termination of enrolment in the PhD programme for enrolled candidates.

32 Candidates who are required, pursuant to Regulation 45, to revise and resubmit their thesis for examination by the date specified by the Board of Graduate Studies (or delegate) are required to be enrolled for the duration of the period of revision of the thesis. The maximum duration of enrolment for revision and resubmission of a thesis pursuant to Regulation 45 is 12 months full-time equivalent.

33 Candidates who wish to be absent from the University in pursuit of their research for more than one month during enrolment are subject to the Doctoral Off-campus Research Policy and Procedures.

34 Candidates are subject to the Research Code of Conduct Policy and all University statutes, regulations, rules,
policies and procedures relating to student conduct and obligations (academic or otherwise) for the duration of candidature.

35 Candidates may change the title of their thesis at any point prior to submission of the thesis for examination, subject to the approval of the Board of Graduate Studies (or delegate).

Fees
36 All fees required by and pursuant to the Fees Statute and the PhD Domestic Tuition Fees Policy must be paid for the duration of enrolment in the PhD programme.

37 Tuition fees are not payable for any period during which enrolment has been suspended under Regulation 11.

38 a A candidate who withdraws from the PhD programme, or who has their candidature terminated, will receive a refund of one-twelfth of the tuition fee paid for the current doctoral year per each complete month of the period of withdrawal from the programme or termination of candidature and the end of the current doctoral year.

b A candidate who submits a thesis will receive a refund of one-twelfth of the tuition fee paid for the current doctoral year per each complete month of the period between the date of submission of the thesis and the end of the current doctoral year, provided the candidate has been enrolled for at least 36 months’ full-time equivalent.

39 Graduation is not permitted until all outstanding monies owing to the University have been paid.

Submission
40 The thesis must be submitted in accordance with the Doctoral Thesis Submission Pre-Examination Procedures.

Examination
41 For each candidate, the Board of Graduate Studies (or delegate) will appoint two examiners, at least one of whom must be based outside New Zealand, in accordance with the Doctoral Appointment of Examiners Policy and Procedures.

42 The examination for the PhD degree must be conducted in accordance with the Doctoral Examination Procedures and/or, where the Board of Graduate Studies (or delegate) regards it as warranted, with the Doctoral Examination Extraordinary Circumstances and Posthumous Award Procedures. Where scholarly creative work is submitted as part of the thesis requirement, the examination is also subject to the PhD – Including Scholarly Creative Work Policy and Procedures.

43 Except where a candidate is exempted pursuant to the Doctoral Examination Extraordinary Circumstances and Posthumous Award Procedures, the PhD degree cannot be awarded where an oral examination has not taken place.

44 Where a candidate advances to oral examination, the oral examination is to proceed in accordance with the Doctoral Examination Procedures and the Doctoral Oral Examination Procedures.

45 The Board of Graduate Studies (or delegate) will consider all examination reports and recommendations made pursuant to the Doctoral Examination Procedures and determine the outcome of the examination.

Final Decision
46 The final decision as to the award of the PhD degree will be made by the Board of Graduate Studies (or delegate[s]), who may also be the decision-maker at Regulation 45.

47 The final examined and approved thesis must be submitted in accordance with the Doctoral Thesis Submission Post-Examination Procedures in order for the requirements of the PhD degree to be met.

Withdrawal from Programme
48 A candidate may withdraw from the PhD programme at any time by notifying the University in writing. Retraction of the programme withdrawal is not permitted.

Termination of Candidature
49 The Board of Graduate Studies (or delegate) may terminate the candidature of any enrolled or non-enrolled candidate on any one or more of the following grounds:

a failure to meet the requirements for confirmation of candidature pursuant to Regulation 27

b failure to meet the requirements for continuation of confirmed candidature pursuant to Regulation 27

c failure to satisfy conditions imposed on candidature pursuant to Regulation 27
d failure to comply with candidature reporting requirements pursuant to Regulation 27

e failure to complete or satisfactorily complete revisions to an examined thesis by the date required by the Board of Graduate Studies (or delegate)

f failure to comply with the Doctoral Thesis Submission Post-Examination Procedures

g failure to make payment of any tuition fees related to enrolment in the PhD by the due date.

Note: For the avoidance of doubt, termination of candidature pursuant to this Regulation 49 is permanent unless successfully appealed in accordance with Regulation 54(b).

50 Before the Board of Graduate Studies (or delegate) makes a decision as to termination of candidature pursuant to Regulation 49, the candidate will be given notice of termination proceedings and allowed 14 calendar days to make a submission for the Board of Graduate Studies (or delegate) to take into account in making that decision. This process is subject to the Doctoral Termination Proceedings Policy.

51 Cancellation or prohibition of enrolment and/or candidature pursuant to any disciplinary statute of the University takes precedence over the provisions of this Statute.

52 a Where a candidate withdraws from the PhD programme, or has their candidature terminated, or fails to meet the requirements for the award of the degree, admission to a new PhD or other doctoral programme in the same subject at a later date will not normally be permitted.

b A person who withdraws from any relevant doctoral enrolment or has a relevant doctoral candidature terminated (or equivalent), or who fails to meet the requirements for the award of a relevant doctoral degree, will not normally be admitted to the PhD except in accordance with the doctoral transfer policy and procedures.

c Relevance and equivalence at Regulation 52b are determined by the Board of Graduate Studies (or delegate).

Variations

53 In exceptional circumstances, the Board of Graduate Studies (or delegate) may approve a variation to the policies, procedures and regulations for PhD candidature, except where variation of a national or government directive or requirement is involved.

Appeals

54 a Candidates may appeal decisions made by the Board of Graduate Studies (or delegate) pertaining to extension and suspension of enrolment subject to the Doctoral Candidature Appeal Procedures.

b A former candidate may appeal the decision made by the Board of Graduate Studies (or delegate) to terminate candidature, or to decline an extension of enrolment, subject to the Doctoral Candidature Appeal Procedures.

55 Appeals as to extension and suspension of enrolment and termination of candidature will be determined in accordance with the Doctoral Candidature Appeal Procedures.

56 Candidates and former candidates may appeal the outcome of a PhD examination only on the grounds that the result was materially impacted by a procedural flaw in the examination process, and subject to the Doctoral Examination Appeal Procedures.

57 Appeals as to examination will be determined in accordance with the Doctoral Examination Appeal Procedures.

Dispute Resolution

58 Disputes are to be resolved according to the Resolution of Student Academic Complaints and Disputes Statute.

59 Any matter that has been, could have been or could be appealed under the provisions of Regulation 54 or 56 is precluded from consideration as a dispute under Regulation 58.

Further Provisions

60 a The PhD programme is subject to the Limited Entry Statute.

b Candidates are subject to:

(i) the Degrees and Diplomas Statute and the Conferment of Academic Qualifications and Academic Dress Statute

and

(ii) the provisions of the Enrolment and Programme regulations pertaining to members of the security intelligence service, rescindment and surrender of qualifications and the Provost’s Special Powers

and
(iii) the Examination Regulations, where coursework is prescribed pursuant to Regulation 27.

61 The doctoral policies and procedures cited in this Statute may be reviewed and amended from time-to-time.

62 PhD candidates are subject to any additional doctoral policies and procedures devised in support of this Statute, and amended from time-to-time.

63 This Statute may itself be reviewed and amended from time-to-time.

64 This Statute came into force on 1 October 2020.

65 For candidates initially enrolled under a previous statute, the Board of Graduate Studies (or delegate) may agree to vary the application of the provisions of this Statute to ensure consistency with the provisions of the statute under which the candidate was enrolled, where it is satisfied that the candidate would otherwise be at a disadvantage.

REGULATIONS – HIGHER DOCTORATES

In addition to the degree of Doctor of Philosophy, the University offers higher doctorates in Engineering (DEng), Laws (LLD), Literature (LittD), and Science (DSc). These are the highest academic awards offered by the University and are awarded to graduates or close affiliates of the University of Auckland who have published original work that has, over an extensive period of time, given them authoritative standing and international eminence in their respective field. The higher doctorate is thus to be seen as recognition of real distinction in one of these areas of study. It is awarded rarely and only after rigorous examination of a substantial and significant corpus of material. A person wishing to become a candidate for a higher doctorate should refer to the Guidelines for Candidates of Higher Doctorates.

The Degree of Doctor of Engineering – DEng

Eligibility

1 The Degree of Doctor of Engineering shall be awarded to those candidates whose submitted works provide evidence of an original contribution of special excellence in some branch of engineering or technology such that they are considered to have authoritative standing and international eminence in their field.

2 The Degree shall be awarded only on work, whether sole or conjoint, published in book form or in scholarly journals in general circulation, or as designs and inventions. In addition to the published work, the candidate may submit unpublished work in support of the application.

3 A candidate for the Degree of Doctor of Engineering must be a graduate of the University of Auckland or have a substantial, demonstrable association with the University of Auckland.

4 No application to be examined for a higher doctorate will be considered until at least eight years after graduation to the candidate’s first degree.

5 No work shall be considered for the Degree if the work, or a major portion thereof, has previously formed the basis of an award of any degree or diploma in this or any other university.

6 Work submitted on a previous occasion for consideration of a higher doctorate at the University of Auckland will not be reconsidered for the Degree unless more than five years have elapsed since the previous submission and the resubmission includes new material.

Application

7 A person wishing to become a candidate for a Doctor of Engineering should apply in writing to the Dean of Graduate Studies, providing:
   a a completed Application to be Examined for a Higher Doctorate
   and
   b an academic curriculum vitae
   and
   c academic transcripts for each degree previously awarded (if these degrees were not awarded by the University of Auckland).

8 Consideration of applications and examination shall be carried out in accordance with the Procedure for the Examination of Higher Doctorates, as determined by the Board of Graduate Studies from time to time.
The Degree of Doctor of Laws – LLD

Eligibility
1 The Degree of Doctor of Laws shall be awarded to those candidates whose submitted works provide evidence of an original contribution of special excellence to the history, philosophy, exposition or criticism of law, such that they are considered to have authoritative standing and international eminence in their field.

2 The Degree shall be awarded for work, whether sole or conjoint, published in book form or in scholarly journals in general circulation. In addition to the published work, the candidate may submit unpublished work in support of the application.

3 A candidate for the Degree of Doctor of Laws must be a graduate of the University of Auckland or have a substantial, demonstrable association with the University of Auckland.

4 No application to be examined for a higher doctorate will be considered until at least eight years after graduation to the candidate's first degree.

5 No work shall be considered for the Degree if the work, or a major portion thereof, has previously formed the basis of an award of any degree or diploma in this or any other university.

6 Work submitted on a previous occasion for consideration of a higher doctorate at the University of Auckland will not be reconsidered for the Degree unless more than five years have elapsed since the previous submission and the resubmission includes new material.

Application
7 A person wishing to become a candidate for a Doctor of Laws should apply in writing to the Dean of Graduate Studies, providing:
   a a completed Application to be Examined for a Higher Doctorate
   and
   b an academic curriculum vitae
   and
   c academic transcripts for each degree previously awarded if these degrees were not awarded by the University of Auckland.

8 Consideration of applications and examination shall be carried out in accordance with the Procedure for the Examination of Higher Doctorates, as determined by the Board of Graduate Studies from time to time.

The Degree of Doctor of Literature – LittD

Eligibility
1 The Degree of Doctor of Literature shall be awarded to those candidates whose submitted works provide evidence of an original contribution of special excellence to linguistic, literary, philosophical, social, cultural or historical knowledge such that they are considered to have authoritative standing and international eminence in their field.

2 The Degree shall be awarded for work, whether sole or conjoint, published in book form or in scholarly journals in general circulation. In addition to the published work, the candidate may submit unpublished work in support of the application.

3 A candidate for the Degree of Doctor of Literature must be a graduate of the University of Auckland or have a substantial, demonstrable association with the University of Auckland.

4 No application to be examined for a higher doctorate will be considered until at least eight years after graduation to the candidate's first degree.

5 No work shall be considered for the Degree if the work, or a major portion thereof, has previously formed the basis of an award of any degree or diploma in this or any other university.

6 Work submitted on a previous occasion for consideration of a higher doctorate at the University of Auckland will not be reconsidered for the Degree unless more than five years have elapsed since the previous submission and the resubmission includes new material.
Application
7 A person wishing to become a candidate for a Doctor of Literature should apply in writing to the Dean of Graduate Studies, providing:
   a a completed Application to be Examined for a Higher Doctorate
   and
   b an academic curriculum vitae
   and
   c academic transcripts for each degree previously awarded if these degrees were not awarded by the University of Auckland.

8 Consideration of applications and examination shall be carried out in accordance with the Procedure for the Examination of Higher Doctorates, as determined by the Board of Graduate Studies from time to time.

The Degree of Doctor of Science – DSc
Eligibility
1 The Degree of Doctor of Science shall be awarded to those candidates whose submitted works provide evidence of an original contribution of special excellence to some branch of pure or applied science such that they are considered to have authoritative standing and international eminence in their field.

2 The Degree shall be awarded only on work, whether sole or conjoint, published in book form or in scholarly journals in general circulation.

3 A candidate for the Degree of Doctor of Science must be a graduate of the University of Auckland or have a substantial, demonstrable association with the University of Auckland.

4 No application to be examined for a higher doctorate will be considered until at least eight years after graduation to the candidate’s first degree.

5 No work shall be considered for the Degree if the work, or a major portion thereof, has previously formed the basis of an award of any degree or diploma in this or any other university.

6 Work submitted on a previous occasion for consideration of a higher doctorate at the University of Auckland will not be reconsidered for the Degree unless more than five years have elapsed since the previous submission and the resubmission includes new material.

Application
7 A person wishing to become a candidate for a Doctor of Science should apply in writing to the Dean of Graduate Studies, providing:
   a a completed Application to be Examined for a Higher Doctorate
   and
   b an academic curriculum vitae
   and
   c academic transcripts for each degree previously awarded (if these degrees were not awarded by the University of Auckland).

8 Consideration of applications and examination shall be carried out in accordance with the Procedure for the Examination of Higher Doctorates, as determined by the Board of Graduate Studies from time to time.

Procedure for the Examination of Higher Doctorates
This procedure applies to the examination of the Degrees of Doctor of Engineering, Doctor of Laws, Doctor of Literature and Doctor of Science, and should be read in conjunction with the Higher Doctorate Examination Procedures.

Consideration of Applications to be Examined
1 As soon as possible after an application to be examined has been lodged with the Dean of Graduate Studies and has been determined to meet initial requirements, the application will be forwarded to the relevant Faculty Dean or delegate (“the faculty”) for further consideration.

2 The faculty will appoint an Examination Committee of three senior academics who have a general understanding of the applicant’s field of research. At least two members of the Committee must be academic members of the University, one of whom will be nominated to chair the Examination Committee.

3 The Examination Committee will investigate the information provided, including the quality and nature of the
submission for examination, will seek input from the Dean of the faculty, and will make a recommendation to the Dean of Graduate Studies within one month that the faculty:

a. will allow the applicant to be admitted to candidature for the higher doctorate
or
b. will not allow the applicant to be admitted to candidature for the higher doctorate.

**Notification of Assessment of Application and Intention to Submit**

4 The Dean of Graduate Studies will advise the applicant of the faculty’s decision and, if the application has been accepted, will request written notification of the applicant's intention to proceed with candidature and submission. The submission of work to be examined must be received by the Dean of Graduate Studies within three months of the notification that the application was accepted.

5 The examination will not proceed until receipt of the candidate's written notification of intention to proceed and payment of fees as set out in Schedule B of the Fees Statute.

**Appointment of Examiners**

6 Upon payment of fees and receipt of the candidate's written notification of intention to proceed, the Dean of Graduate Studies will request that the faculty nominate three external examiners. The nominations should be made within three months of the request. The examiners must be of authoritative standing and international eminence in the field of the submitted work and must be active in research. At least one examiner shall be resident outside New Zealand. Examiners must not have engaged in substantial collaboration with the candidate. Any involvement with the candidate by the examiner which could constitute a conflict of interest should be declared at the outset. The appointment of all examiners must be approved by the Dean of Graduate Studies.

**Submission**

7 The candidate shall lodge at the School of Graduate Studies:

a. three copies of the work to be examined

and

b. a statutory declaration which shall:

   (i) state the extent to which the work is the candidate’s own, and (in the case of a conjoint work) identify as clearly as possible which parts are the candidate’s own

   and

   (ii) declare that the work in substantially its present form has not been submitted or accepted previously for the award of a degree or diploma in this or any other tertiary institution, and is not being submitted for a degree or diploma in any other tertiary institution or for another degree or diploma at this institution.

**Examination**

8 The degree will be awarded solely on consideration of the submitted works upon which the candidate’s claim to the degree is based.

9 In order to qualify for the degree, the submitted works must provide sufficient evidence that the candidate has made an original contribution of special excellence to their discipline such that they are considered to have authoritative standing and international eminence in their field.

10 Examiners will be requested to report to the Dean of Graduate Studies on the submission within three months of receipt and recommend whether the candidate:

a. should be awarded the degree

or

b. should not be awarded the degree.

11 The reports of all examiners will be forwarded to the Examination Committee for consideration of whether or not to admit the candidate to the degree.

12 If the examiners’ recommendations differ, the Examination Committee may invite the examiners to consult and provide a written report or reports on the outcome of their consultation. If, after such consultation, the differences remain unresolved, the Examination Committee may recommend to the Dean of Graduate Studies that a further independent external examiner be appointed to report on areas of conflict.

13 The Examination Committee shall recommend an outcome based on the examiners’ reports to the Dean of Graduate Studies. The Dean of Graduate Studies will determine the result of the examination and notify the candidate of the decision.
14 An unsuccessful submission may not be presented for re-examination until at least five years after initial submission and must include new material.

**Deposit of Submission in the Library**

15 On successful completion of the examination of the submitted work, and when possible, two bound copies will be deposited in the University Library by the School of Graduate Studies. The first bound copy will remain in the Library for reference purposes; the second copy may be borrowed by members of the Library, or sent to other libraries on inter-library loan. The third copy will be returned to the candidate.

**Graduation**

16 Candidates who have satisfied the requirements for any award of the University shall be admitted to that award.
COURSE PRESCRIPTIONS

The Course Prescriptions contain approved University of Auckland courses. Before selecting courses from this Calendar, students and potential students are advised to ascertain which courses are expected to be offered in this Academic Year and in which semester they are scheduled by referring to the Class Search on Student Services Online, or by contacting their Student Hub.

Where courses in the following Course Prescriptions are listed with an ‘A’ and a ‘B’ option, this means that, if they are offered, they will be taught over two semesters and students must enrol in both Part A and Part B in order to complete and, where successful, be credited with the course. Courses with no ‘A’ or ‘B’ designation are taught over one semester.

The Prescriptions are listed by faculty, in alpha-numeric order by subject title and should be read in conjunction with the relevant regulations.

Calculating a Grade Point Average

Grade Point Averages (GPA) are calculated using the following scale. Courses are weighted based on points value, and the exact formula may vary from programme-to-programme.

Academic Integrity

ACADINT A01 0 Points
Academic Integrity Course
An online course designed to increase student knowledge of academic integrity, university rules relating to academic conduct, and the identification and consequences of academic misconduct. Students work through a series of modules, outlining scenarios that they may encounter while studying at university. Each scenario provides information on relevant rules, resources and expected behaviour.

Foundation Courses

FOUNDST 10F 24 Points
English for Academic Purposes
Develops skills for understanding, writing, reading and speaking English. Attention is paid to accuracy, grammatical structures, spelling, punctuation and word use. Tasks include group discussions and formal presentations, note-taking, extended reading and formal comprehension exercises, paragraph and note-form summaries and preparation of research reports.

FOUNDST 11F 24 Points
Accounting
Provides introduction to accounting methods and concepts. Topics include cash and accrual accounting, budgeting, cash flow, depreciation, assessment of performance, accounting systems, job costing, cost-volume-profit analysis, financial statements for sole traders, partnerships and companies.

FOUNDST 12F 24 Points
Art
Provides a practical knowledge of visual arts and understanding of arts in context. Through a number of practical assignments and the production of a portfolio, students develop ideas, observe, analyse, interpret and evaluate images.

FOUNDST 13F 24 Points
Biology
Develops an understanding of biology and the skills to apply biological knowledge to solve problems, design and perform experiments, and to interpret and present evidence. Topics include structure and function of the cell, responses of plants and animals to biotic and abiotic factors, genetics and evolution (primates and hominids).

FOUNDST 14F 24 Points
Chemistry
Provides science students with the skills and confidence to test their ideas experimentally. Topics include atomic theory, chemical bonding and shapes of molecules, chemistry of transition elements, metal hydroxides, halogens and selected ions, analysis of laboratory solutions and commercial products, energy involved in physical and chemical changes, Aqueous Chemistry, oxidation-reductions and applications, spectroscopic identification of organic compounds.

FOUNDST 15F 24 Points
Classical Studies
Gives an introduction to the history, literature, art, architecture and politics of ancient Greece (600-400BC) and Rome (753 BC to 14 AD). Develops vital skills for university level study, including critical thinking, analysis and writing argumentative essays.

FOUNDST 16F 24 Points
Economics
Covers a wide range of economic issues, from basic economic concepts and principles, to policy options available to governments, and probable consequences of economic decisions. Topics include relative scarcity and production possibilities, demand, supply and the market, market structures, including monopoly, externalities, public goods and government intervention, equity and efficiency, financial markets, aggregate demand and supply and the macroeconomic economy.

FOUNDST 17F 24 Points
Geography
Covers the formation of natural features and develops skills involved in interpreting topographic data. Analysis of cultural processes (urban growth, migration, development and sustainability), the study of human actions that modify natural processes, and analysis of the outcomes.

FOUNDST 18F 24 Points
Information Technology
Provides a broad knowledge of computer technology, common application software, programming, word processing, spreadsheets and databases. Topics include computer hardware, computer software, operating systems, business applications, problem solving techniques used for programming.

FOUNDST 19F 24 Points
Mathematics with Calculus
Provides a solid foundation for university subjects requiring a prior knowledge of Mathematics with Calculus. Topics include calculus, algebra, trigonometry, geometry.

FOUNDST 20F 24 Points
Mathematics with Statistics
Provides students with a broad range of mathematical knowledge and skills and is a prerequisite for many university courses. Topics include algebra and graphing functions, exponentials and logarithms, correlation and progression, probability and set theory, random variables and their distributions, time series, linear programming, mathematical modelling, numerical equation solving, binomial, poisson and normal distributions.

FOUNDST 21F 24 Points
Physics
Develops students’ theoretical knowledge, problem-solving skills and experimental techniques. Topics include light, waves, kinematics, mechanics, electricity and magnetism, atomic and nuclear physics.

Internship

Postgraduate 700 Level Courses

INTERNSP 700 15 Points
Internship 1
Enables the development of practical knowledge and hands-on experience through a supervised internship.
Chemistry is the branch of science concerned with the substances of which matter is composed, the investigation of their properties and reactions, and the use of such reactions to form new substances. Theory is complemented by experiments in which students develop practical skills, such as the use of common laboratory equipment, powers of observation and the ability to communicate results and conclusions.

CTFOUND 15F Design
20 Points

Strong focus on graphic and communication design. Considers graphic design theory and explores communication design solutions by producing a brand identity for an individually chosen project. Students will learn how to design a logo and poster, produce imagery, develop an understanding of building a design brand, interpret and read design works and learn how to use Photoshop.

CTFOUND 16F Economics
20 Points

Economics is the study of scarcity; of how society chooses to use scarce resources to satisfy its unlimited wants. Explores what motivates consumers and producers, how the market works and how markets react to change. Increases students’ understanding of what makes up an economy, how it works and why it is important for the individual and others. Uses economic theory to analyse real-life situations. Challenges students to think like an economist and practise decision making.

CTFOUND 17F Mathematics with Calculus
20 Points

Calculus is a branch of mathematics that provides an understanding of the changes between values that are related by a function. Students will learn how to manipulate mathematical equations, read trigonometric functions, differentiate to get functions that show rates of change, and integrate to obtain formulas that describe things that are not visible. Logical thinking and reasoning, algorithmic processes and problem solving will also be studied.

Restriction: CTFOUND 18F

CTFOUND 18F Mathematics with Modelling
20 Points

Modelling is a branch of mathematics where mathematical representations of the surrounding world are created in order to increase knowledge and predict the future. Students will learn how to manipulate mathematical equations, read trigonometric functions, create formulas for real-life situations and maximise profits and minimise costs. Logical thinking and reasoning, algorithmic processes and problem-solving will be covered.

Restriction: CTFOUND 18F

CTFOUND 19F Geography
20 Points

Geography is the study of the Earth as the home of humankind. Geographical skills such as mapping, graphing and interpretation of data will be covered. Topics include tourism development as a cultural process, tectonic processes and global development. A contemporary geographic issue will be studied.

CTFOUND 20F Photography
20 Points

Photography is the study of the camera, its capabilities and the ideas, theory and aesthetics around the photographic image as a piece of art. Students will be introduced to the history of photography, how the camera works, camera techniques and the language of composition. Students will study contemporary photographers.
CTFOUND 21F  
**Physics**  
20 Points  
Physics provides explanations for why natural and man-made phenomena occur. Topics covered: translational motion, forces, momentum, rotational motion, simple harmonic motion, mechanical and electromagnetic waves, direct current electricity, capacitance, electromagnetism and alternating current theory. Different types of experimental techniques and the appropriate situations in which they should be used. Students will be shown how to develop a logical approach to problem-solving and experimental design.

CTFOUND 22F  
**Statistics**  
20 Points  
Statistics is about collecting and analysing data from a small group to make intelligent and accurate conclusions about a larger group. The Problem, Plan, Data, Analysis, and Conclusion (PPDAC) cycle of inquiry will be used. Statistical knowledge aids in the proper methods to collect data, employ the correct analyses and effectively present the results. Key skills covered: gathering and displaying data, using statistical formulas and writing academic conclusions.

CTFOUND 23F  
**Communication**  
20 Points  
Communications is about the distribution of ideas. Students will develop an awareness of the challenges they face as consumers and conveyors of big ideas in a variety of media. They will explore a range of oral and visual texts including social media and develop the skills to investigate and infer purpose and meaning.

CTFOUND 39F  
**English for Academic Purposes**  
20 Points  
Further develops language, academic and critical thinking skills required for university level study.

CTFOUND 40F  
**English for Academic Purposes**  
10 Points  
Note-taking, critical thinking, research and essay writing are covered. This course covers the language skills that will help students understand academic texts at university.

CTFOUND 41F  
**Accounting**  
20 Points  
Accounting is the practice of communicating financial information in order to make effective decisions. This course focuses on how to record business transactions for a company, and prepare and analyse the financial statements for a company. Management decision making, breakeven analysis, cash budgeting and spreadsheets are also covered.

CTFOUND 42F  
**Art History**  
20 Points  
Discusses the analysis and interpretation of works of art within their cultural and historical context. Artists such as Donatello, Masaccio, Leonardo da Vinci, Michelangelo and Raphael (Renaissance) are studied. The modern period includes Cezanne, Picasso, Braque (Cubism) and Mondrian. A New Zealand artist, Colin McCahon, will also be studied. Encourages students to make connections to other artists. Develops skills in critical analysis, writing, presentation and independent research.

CTFOUND 43F  
**Biology**  
20 Points  
Biology is the study of living things, their environments and their evolution. Understanding how living cells coordinate biochemical reactions, giving rise to what is called ‘life’. By exploring biotechnology, students will discover how cellular and molecular biology are applied to practical human purposes. The wide diversity of living things on Earth: ecosystems, plants and animals, genetics and evolution over time will be studied. Provides opportunities for research, discussion, presenting and writing critically about current biology issues.

CTFOUND 44F  
**Chemistry**  
20 Points  
Chemistry is the branch of science concerned with the substances of which matter is composed, the investigation of their properties and reactions, and the use of such reactions to form new substances. Theory is complemented by experiments in which students develop practical skills, such as the use of common laboratory equipment, powers of observation and the ability to communicate results and conclusions.

CTFOUND 45F  
**Design**  
20 Points  
Strong focus on graphic and communication design. Considers graphic design theory and explores communication design solutions by producing a brand identity for an individually chosen project. Students will learn how to design a logo and poster, produce imagery, develop an understanding of building a design brand, interpret and read design works and learn how to use Photoshop.

Academic Integrity

ACADINT A01 0 Points
Academic Integrity Course
An online course designed to increase student knowledge of academic integrity, university rules relating to academic conduct, and the identification and consequences of academic misconduct. Students work through a series of modules, outlining scenarios that they may encounter while studying at university. Each scenario provides information on relevant rules, resources and expected behaviour.

Academic English Studies

Stage I

ACADEG 100 15 Points
Forms in Academic English
Focuses on developing an understanding of academic reading and writing, including sentence and paragraph structure and academic vocabulary, and aims to develop strategies for employing these for effective reading and writing of academic texts. Develops an understanding of broad principles and practices of academic discourse at university level.
Restriction: May not be taken if ENGWRT 101 or ESOL 201 or ACADEG 201 or ESOL 210 or ACADEG 210 has previously been passed. This course is available only to students who speak English as an additional language.

ACADEG 101 15 Points
Academic English Writing
Teaches students the skills necessary to write essays of exposition and argument for university purposes. It includes brainstorming, writing an outline, structuring an essay, integrating quotations, summaries and referencing.
Restriction: May not be taken if ACADEG 93F, 201, 210, ENGWRT 101, ESOL 201, 210, TFCACENG 93F has previously been passed. This course is available only to students who speak English as an additional language.

ACADEG 104 15 Points
Academic English for Business
Focuses on core English academic reading and writing skills, and strategies for learning disciplinary vocabulary. Targets the academic literacy needs of students in accessing the undergraduate business curriculum and develops awareness of appropriate text structures and academic style to understand and express business-related concepts in an academic context.
Restriction: May not be taken if ENGWRT 101 or ESOL 201 or ACADEG 201 or ESOL 210 or ACADEG 210 has previously been passed.

Stage II

ACADEG 210 15 Points
Writing Research Reports
Aims to develop skills needed for writing research and laboratory reports. It covers key stages in writing a standard report and the language patterns associated with each of these stages. Course components include writing the literature review, methodology, results and discussion sections of a report, dissertation or thesis.
Prerequisite: ACADEG 101 or approval of Academic Head or nominee
Restriction: ESOL 210. This course is available only to students who speak English as an additional language.

ACADEG 212 15 Points
Special Topic
Restriction: ESOL 212. This course is available only to students who speak English as an additional language.

Anthropology

Stage I

ANTHRO 106 15 Points
Global Sound Cultures: Musics, Places and People
Examines a wide range of sound and music cultures, from popular transnational mediations to locally produced, community-based traditions. Considers the ways that music takes on meaning, represents identities and places, and interacts with the world. Traces the historical/economic processes by which music cultures emerge and are sustained (or not). Explores the emotional and economic roles that music plays in lives of musicians, composers and listeners. Using theories from ethnomusicology, anthropology, musicology and cultural studies we show how music is affected by and reflects social change, colonisation and indigeneity, technology and local/global economic processes.

ANTHRO 107 15 Points
The Human-made Planet?
How have humans have come to dominate the planet? Explores hominin history, relationships with other organisms, urbanisation and globalisation, and the rise of the capitalocene. Where to from here? As humankind imagines and embraces sustainable, resilient futures, anthropology offers critical perspectives on diverse ways of being, non-western worldviews, complex bio-social interactions, and pathways to deeper socio-natural connectivities.

ANTHRO 108 15 Points
Being Human
Archaeologists and biological anthropologists examine what it is to be human by studying primates, fossils, archaeological remains and both historical and contemporary societies. Humans are immersed in social and ecological worlds that mutually shape our bodies, actions, and understandings (including mātauranga Māori). Explores the past and present reality of being human, and the evolutionary journey to become human.
Restriction: ANTHRO 102

ANTHRO 110 15 Points
Culture and Creativity
Explores the connections between culture, creativity, and society through anthropological concepts, Mātauranga Māori, and relevant examples. It covers issues and problems faced by communities locally and globally, using a range of mediums such as whakapapa, material culture, performing arts, media and grassroots movements to illustrate how anthropology can help understand the complexities of creativity and the creation of knowledge.
Stage II

ANTHRO 200 15 Points
Archaeology: Understanding the Past
An examination of current concepts in archaeological research and their place in the development of archaeological thought. How archaeology makes use of its methods and theories to understand the past. An introductory laboratory component. This course is essential for students who may wish to continue their study of Archaeology at Stage III.
Prerequisite: 30 points in Anthropology or 60 points passed

ANTHRO 201 15 Points
Human Evolution
Explores issues fundamental to understanding humans’ place in nature from a biocultural perspective. What led to the evolution of bipedalism, large brains, and language? How do we define species in the fossil record? How can we reconstruct ancient diets and ecologies? The course will examine how new discoveries and advancements in biology are reshaping understandings of our evolutionary history.
Prerequisite: 30 points in Anthropology or 60 points passed

ANTHRO 202 15 Points
Music and Identity in World Music Cultures
Examines music’s role in the construction and reinforcement of identity. Considers a range of culturally constructed concepts including class, gender and ethnicity; also considers the impact of mass mediated sound and unique nature of music in the cultural diaspora. Examples and case studies range from the ritual musics of Africa and the classical music of South Asia to East Asian pop.

ANTHRO 205 15 Points
Primate Behaviour, Ecology and Conservation
Examines the diversity of extant nonhuman primate species, including their behaviour, ecology, and conservation, and also the importance of primatology toward an understanding of our own species. Specifically, students will critically examine the results of primatological inquiries in order to gain insight into the comparative evolutionary approach, especially with respect to the applicability of such efforts to the study of humans.
Prerequisite: 15 points in Anthropology or 60 points passed
Restriction: ANTHRO 349

ANTHRO 206 15 Points
Origins of Civilisation
The shift from a hunter-gatherer way of life to one based on village life and agriculture is foundational for the development of complex society. The course considers what socio-cultural changes were involved as Holocene societies developed in different parts of the world and how the relationship between humans and the environment changed.
Prerequisite: 15 points in Anthropology or 60 points passed
Restriction: ANTHRO 322

ANTHRO 207 15 Points
Archaeological History of Aotearoa New Zealand
Examines the first 600-700 years of human settlement in Aotearoa New Zealand from an archaeological perspective, from Polynesian arrival through the early historic period. Themes include Māori origins in East Polynesia, adaptations to Aotearoa’s temperate environment, changing patterns of resource use, Māori material culture and arts, the development of fortified sites or pā, and the emergence of classic Māori society.
Prerequisite: 60 points passed
Restriction: ANTHRO 365

ANTHRO 208 15 Points
Biosocial Medical Anthropology
Medical Anthropology draws on biological and social/cultural anthropology to address issues of human health and disease. A distinct subfield, it includes studies of the co-evolution of humans and diseases, human ecology, cultural constructions of health and illness, medical knowledge and healing practices, and the political economy of health. Students are asked to research, think and write analytically about these topics.
Prerequisite: 60 points passed at Stage I
Restriction: ANTHRO 324, 372

ANTHRO 212 15 Points
Ethnographic Film and Photography
Explores uses of photography and film in the production and dissemination of anthropological knowledge. Emphasises the choices in subject matter, imagined audience, composition, construction of narrative (or not), and mode of representation that are made at all stages in the production of ethnographic images. Uses ethnographic images to reflect on construction of ethnographic texts.
Prerequisite: ANTHRO 100 or ARTHIST 115 or 30 points in Anthropology, Sociology, Media Film and Television, or Communication
Restriction: ANTHRO 320, 373

ANTHRO 213 15 Points
Questioning Race and Racism
Multiple anthropological frameworks explore the scholarly and popular understandings of race and racism, and question contemporary perspectives. Why do these concepts have such social and political potency? What are the impacts of concepts of race and practices of racism and anti-racism on individuals, families, communities, nation-states and empires, in Aotearoa New Zealand, the Pacific, and elsewhere?
Prerequisite: 15 points at Stage I in Anthropology and 15 points in BA courses
Restriction: ANTHRO 105

ANTHRO 217 15 Points
Rhythm, Blues and Rock
African-American popular music and culture from the mid-1930s through the early 1960s, including styles such as blues, R ‘n’ B, and early Rock ‘n’ Roll. Considers issues of racial and gendered representation, creativity, the popular music industry, the place of music in the development of ‘youth culture’ and stylistic trends. Individual performers, recordings and performances, are also examined.
Restriction: POPMUS 206

ANTHRO 220 15 Points
Kaumātua: Ageing in Aotearoa
Examines contemporary and historical understandings of kaumātua and kaumātua roles in Māori society. Topics include: leadership within Māori society; tuakana-teina, gendered roles and complementarity; whanaungatanga and important relationships; health inequities and policies; emerging health partnership models; and the diversity of kaumātua groups.
Prerequisite: 30 points from Anthropology, Māori Studies or Sociology
Restriction: ANTHRO 376
ANTHRO 226 15 Points
**Imperialism and Immigration in the Americas**
Examines the relationship between migration and imperialism in the Americas through the framework of critical anthropology as a discipline and through the use of contemporary case studies. This course critically engages with the role of the United States as an imperial power in and draws significantly from decolonial, post-colonial work and work produced by scholars in Latin America.
Prerequisite: 15 points at Stage I in Anthropology
Restriction: GLOBAL 251

ANTHRO 227 15 Points
**Future Generations Anthropology**
This course acknowledges the colonial history of anthropology and imagines an anthropology that is relevant now and for the future, with Aotearoa-New Zealand not as just a site of study but an active producer of anthropological knowledge. Explores anthropological concepts via contemporary settings and Mātauranga Māori to demonstrate the usefulness of anthropology in addressing fundamental local and global issues.
Restriction: ANTHRO 109

ANTHRO 234 15 Points
**Popular Musics of the Pacific**
From hip hop to reggae to pop, this course explores Pacific popular music genre, artists and songs as well as relevant musical techniques, modes of distribution and processes of fusion and change. It probes the positions and possibilities of Pasifika pop musics by discussing critical questions about culture, authenticity, modernisation, consumerism, identity and musical (ex)change.

ANTHRO 235 15 Points
**The Anthropology of Human Remains**
Human remains reflect the lives of the dead as well as the lives of those who buried them. The course introduces students to the various ways in which we can study the dead. It covers three areas: the interpretation of mortuary practices, the interpretation of past lives from skeletal remains, and the practice of burial archaeology in the southern hemisphere.
Prerequisite: 15 points in Anthropology or 60 points passed
Restriction: ANTHRO 367

ANTHRO 236 15 Points
**Special Topic**

ANTHRO 237 15 Points
**Economy and Culture**
Explores economic systems cross-culturally, including modes of production, forms of exchange, and ideas about property and consumption. Questions and critiques Euro-American assumptions about human nature, social persons, and the ubiquity and morality of markets and market exchange.
Prerequisite: 15 points at Stage I in Anthropology or Employment Relations and Organisational Studies
Restriction: ANTHRO 374

ANTHRO 241 15 Points
**Anthropology of the Body**
Examines cultural and historical variations in how societies understand and experience the human body. The focus will be primarily on social, historical, and political-economic approaches. Topics such as labour, sport, health, illness, sexuality, gender, and religious ritual will be considered.
Explores the cultural construction and social experience of the human body in a diverse range of settings.
Prerequisite: ANTHRO 100 or 30 points in Anthropology
Restriction: ANTHRO 354

ANTHRO 248 15 Points
**Special Topic**
Prerequisite: ANTHRO 100 or 101 or 102 or 103 or 104 or 60 points passed

ANTHRO 250 15 Points
**World-view and Religion**
Anthropological approaches to religion and world-view. Includes cross-cultural approaches to meaning, belief, religious experience, ritual and myth. Issues of religion, ideology, syncretism, symbolism in social conflict and change. Considers local and world religions.
Prerequisite: ANTHRO 100 or 30 points in Anthropology or Theological and Religious Studies or Sociology
Restriction: ANTHRO 319

ANTHRO 251 15 Points
**Special Topic**
Prerequisite: ANTHRO 100 or 30 points in Anthropology

ANTHRO 252 15 Points
**Global Heritage Management**
Globally, archaeological features and historic monuments are increasingly threatened by urban development, looting, antiquities trafficking, and effects of climate change. Using an archaeological perspective, state-of-the-art recording technologies, community partnerships, legislation, management systems, and the role of museums in conservation and exhibition will be examined. Case studies from Aotearoa, Pacific and elsewhere illustrate major issues, contradictions, and controversies, alongside effective heritage management.
Prerequisite: ANTHRO 100 or 101 or 102 or 103 or 104 or 60 points passed

Stage III

ANTHRO 301 15 Points
**Contemporary Research in Music and Culture**
A seminar-style course covering a range of current topics and methods in ethnomusicology. Examines selected theories, methods, and perspectives on the roles and meanings of musical activity in contemporary human culture. We will view music as a symbolic component of cultural expression and as both focus and paradigm for cultural structures and behaviours.
Prerequisite: ANTHRO 202 or 30 points at Stage II in Transnational Cultures and Creative Practice
Restriction: ANTHRO 219

ANTHRO 306 15 Points
**Pacific Archaeology**
The archaeology of the Pacific region, including colonisation, settlement patterns, interisland trade, traditional navigation, cultural change, emergence of complex societies and ethnoscience.
Prerequisite: 60 points at Stage II
Restriction: ANTHRO 706

ANTHRO 317 15 Points
**Field Methods in Archaeology**
Participation in a field school involving an intensive introduction to all aspects of excavation and subsequent laboratory analysis and report preparation.
Prerequisite: ANTHRO 200 passed with a grade of B+ or higher
Restriction: ANTHRO 727
ANTHRO 319  
World-view and Religion  
15 Points  
Anthropological approaches to religion and world-view. Includes cross-cultural approaches to meaning, belief, religious experience, ritual and myth. Issues of religion, ideology, syncretism, symbolism in social conflict and change. Considers local and world religions.  
Prerequisite: ANTHRO 203 or 30 points at Stage II  
Restriction: ANTHRO 250

ANTHRO 321  
Equality and Inequality  
15 Points  
Examines conceptualisations, realities and consequences of equality and inequality cross-culturally. Considers whether there are egalitarian societies and whether inequality is inevitable. Covers types and systems of inequality such as slavery, gender inequality, caste and class, as well as differences between economic and political inequality, and between equality of opportunity and equality of results.  
Prerequisite: 30 points at Stage II

ANTHRO 327  
Music and Culture in Bollywood  
15 Points  
Focuses on Hindi film songs and song scenes taken from mainstream "bollywood" films, with consideration of tensions between music as popular song and as a narrative component. Examines issues and theories of music, semiotics and narrative context and convention and explores the role of film song in South Asian popular culture.  
Prerequisite: 30 points at Stage II

ANTHRO 329  
Music of East Asia: Tradition, Modernity and Globalisation  
15 Points  
Explores East Asia from the ethnomusicological perspective and illuminates how music negotiates boundaries and constructs varying identities in China, Japan, and Korea, while affirming a distinct cultural identity generally referred to as "East Asian". Using different musical practices of East Asia as case studies, it examines multiple approaches and methodologies used in studying East Asian music.  
Prerequisite: 30 points at Stage II

ANTHRO 337  
Birth, Death, and Disease: Anthropological Demography  
15 Points  
Examines how human populations change over time, what factors underlie patterns of disease and death, and why demography is so important to the study of epidemics. The course will explore the use of demographic methods and theories of demographic and epidemiological transition to examine fertility, mortality, morbidity, and migration from an anthropological perspective, with a particular focus on infectious disease dynamics.  
Prerequisite: ANTHRO 201 or 30 points in Anthropology at Stage II or above

ANTHRO 340  
Heritage Conservation in Aotearoa  
15 Points  
Addresses the main principles of heritage conservation focusing on the rationale rather than treatment methods. Special emphasis is given to the fields of: conservation of place, archaeological, architectural, ethnographic and fine art conservation. Provides students with a cultural orientation to conservation where issues are examined through several contexts, including anthropological studies and conservation science.  
Prerequisite: 30 points at Stage II in Anthropology

ANTHRO 345  
Directed Study in Anthropology  
15 Points  
A directed reading and individual study course, offered in exceptional circumstances, to prepare students in the methodologies of a selected sub-discipline of Anthropology, with the agreement and under the supervision of appropriate staff.  
Prerequisite: 30 points at Stage II in Anthropology and permission of Major/Specialisation Leader

ANTHRO 347  
Special Topic in Anthropology  
15 Points  
Prerequisite: 30 points at Stage II in Anthropology including either ANTHRO 200 or 201

ANTHRO 348  
Perspectives on Human Growth  
15 Points  
Adopts evolutionary and biocultural perspectives in examining patterns of human growth and maturation. Human developmental patterns are placed within an evolutionary framework using evidence from non-human primates and earlier hominid remains. Variability within and among human populations in growth and developmental timing is considered in terms of genetics interacting with physical, biotic and social factors.  
Prerequisite: ANTHRO 201 or 60 points in Anthropology

ANTHRO 349  
Primate Behaviour, Ecology and Conservation  
15 Points  
Examines the diversity of extant nonhuman primate species, including their behaviour, ecology, and conservation, and also the importance of primatology toward an understanding of our own species. Specifically, students will critically examine the results of primatological inquiries in order to gain insight into the comparative evolutionary approach, especially with respect to the applicability of such efforts to the study of humans.  
Prerequisite: ANTHRO 201 or 60 points in Anthropology  
Restriction: ANTHRO 205

ANTHRO 351  
Special Topic  
15 Points  
Prerequisite: ANTHRO 203 or 30 points at Stage II in Anthropology

ANTHRO 352  
Special Topic: Applied Anthropology  
15 Points  
Examines how anthropology has been used in interventions that affect people's lives, and how anthropology has contributed to public policy and public discourse. Considers ethical, methodological and theoretical complexities of anthropology's engagement in development and advocacy. Finally, the course will consider how anthropologists fit into the bigger picture of transnational governmentality, policy and economy.  
Prerequisite: 60 points in Anthropology

ANTHRO 353  
Archaeology in Practice  
15 Points  
Introduces standard laboratory methods for analysing artefacts and generating material culture data to answer questions about the past. Quantitative observations, classification, and hypothesis testing will be emphasised. Course content will be relevant to a range of archaeological research, including research in heritage management contexts. Analysis of Australasian and Pacific Island materials will form the basis of laboratory work when possible.  
Prerequisite: B- or higher in ANTHRO 200 or 201
ANTHRO 354 15 Points
Anthropology of the Body
Examines cultural and historical variations in how societies understand and experience the human body. The focus will be primarily on social, historical, and political-economic approaches. Topics such as labour, sport, health, illness, sexuality, gender and religious ritual will be considered. Explores the cultural construction and social experience of the human body in a diverse range of settings.
Prerequisite: ANTHRO 203 or 30 points at Stage II in Anthropology
Restriction: ANTHRO 241

ANTHRO 357 15 Points
Gender, Sexuality and Popular Music
Explores the ways in which gender and sexual identities are both reflected in and modified by mainstream popular music: from ‘girl power’ to boy bands; from outwardly gay and lesbian artists to the gay appropriation of heterosexual female divas; from the camp masculinity of heavy metal to lesbian rock and riot grrrls; from women-hating gangster rappers to powerful women in the recording industry.
Prerequisite: 30 points at Stage II
Restriction: POPMUS 306

ANTHRO 358 15 Points
Gender and Colonialism in the Pacific
The transformation of gender relations in the Pacific from the inception of the European contact period and through the colonial process. Emphasis will be on the gendered nature of colonialism both in terms of how it framed the process, as well as how the experience was lived.
Prerequisite: ANTHRO 203 or 30 points at Stage II

ANTHRO 360 15 Points
Special Topic
Prerequisite: ANTHRO 200 or 201 or 203 or 219 or 120 points passed

ANTHRO 365 15 Points
Coming of the Māori: Archaeology of Aotearoa
Examines the first 600-700 years of human settlement in Aotearoa/New Zealand from an archaeological perspective, from Polynesian arrival through the early historic period. Themes include Māori origins in East Polynesia, adaptations to Aotearoa's temperate environment, changing patterns of resource use, Māori material culture and arts, the development of fortified sites or pā, and the emergence of classic Māori society.
Prerequisite: 60 points at Stage II
Restriction: ANTHRO 207

ANTHRO 366 15 Points
Medicine, Power and Politics
Anthropological examination of the interplay between cultural values, local and national politics, and international health programs and initiatives. Examines how experiences of medical care and ideas of illness and health vary across different cultural groups and socio-cultural settings.
Prerequisite: ANTHRO 203 or 30 points at Stage II

ANTHRO 367 15 Points
The Anthropology of Human Remains
Human remains reflect the lives of the dead as well as the lives of those who buried them. The course introduces students to the various ways in which we can study the dead. It covers three areas: the interpretation of mortuary practices, the interpretation of past lives from skeletal remains, and the practice of burial archaeology in the southern hemisphere.
Prerequisite: ANTHRO 200 or 201 with a minimum B– grade
Restriction: ANTHRO 235

ANTHRO 370 15 Points
Special Topic
Prerequisite: ANTHRO 200 or 120 points passed

ANTHRO 372 15 Points
Biosocial Medical Anthropology
Medical Anthropology draws on biological and social/cultural anthropology to address issues of human health and disease. A distinct subfield, it includes studies of the co-evolution of humans and diseases, human ecology, cultural constructions of health and illness, medical knowledge and healing practices, and the political economy of health. Students are asked to research, think and write analytically about these topics.
Prerequisite: ANTHRO 201 or 30 points at Stage II in Anthropology
Restriction: ANTHRO 208, 324

ANTHRO 373 15 Points
Anthropological Images
Explores the use of visual images in the production and dissemination of anthropological knowledge. Examines the choices made in the production of photographs and films, and the politics of representation. The examination of choices made in producing images will be used to consider choices made in the production of anthropological texts.
Prerequisite: 15 points at Stage I in Anthropology
Restriction: ANTHRO 212, 320

ANTHRO 374 15 Points
Economy and Culture
Explores economic systems cross-culturally, including modes of production, forms of exchange, and ideas about property and consumption. Questions and critiques Euro-American assumptions about human nature, social persons, and the ubiquity and morality of markets and market exchange.
Prerequisite: 15 points at Stage I in Anthropology or Stage II in Employment Relations and Organisational Studies
Restriction: ANTHRO 237

ANTHRO 376 15 Points
Kaumātua: Ageing in Aotearoa
Examines contemporary and historical understandings of kaumātua and kaumātua roles in Māori society. Topics include: leadership within Māori society; tuakana-teina, gendered roles and complementarity; whanaungatanga and important relationships; health inequities and policies; emerging health partnership models; and the diversity of kaumātua groups.
Prerequisite: 45 points from Anthropology, Māori Studies or Sociology including 30 points at Stage II
Restriction: ANTHRO 220

ANTHRO 377 15 Points
Whiteness in the Settler State
Examines the concept and construct of “whiteness” within the construct of the "settler state” through the lens of critical anthropology. Explores the development of white supremacy as an ideology and expression of social and political power and provides students with the conceptual and intellectual frameworks to consider the invisibility of whiteness as a social habit.
Prerequisite: 15 points at Stage I in Anthropology
ANTHRO 399 15 Points  
Capstone: Anthropological Science  
Provides students with an opportunity to demonstrate their integrated knowledge and growth in the major. Students are encouraged to make connections between their academic learning in anthropological science and the professional world. Specific topics will vary by year, but will feature projects designed to incorporate both independent and collaborative work, as well as the potential for public engagement.  
Prerequisite: 30 points passed at Stage III in Anthropological Science or Academic Head approval  

Postgraduate 700 Level Courses  

ANTHRO 701 30 Points  
ANTHRO 701A 15 Points  
ANTHRO 701B 15 Points  

Human Palaeoecology  
Critical survey of methods, theories and problems in human palaeoecology, including issues of resource use, landscape change, island colonisation and anthropogenic extinctions.  
To complete this course students must enrol in ANTHRO 701 A and B, or ANTHRO 701  

ANTHRO 704A 15 Points  
ANTHRO 704B 15 Points  

Material Culture  
The study of material culture using museum, ethnographic, archaeological and experimental approaches, including the information provided by material culture studies on human agency and the structuring of societies.  
To complete this course students must enrol in ANTHRO 704 A and B  

ANTHRO 708A 15 Points  
ANTHRO 708B 15 Points  

Cultural Resource Management in Archaeology  
Covers all aspects of cultural resource management as it relates to archaeological sites and heritage with a particular focus on New Zealand archaeology and Māori heritage. There is an emphasis on site identification, recording and interpretation in the field. Legal aspects and the roles of archaeologists and iwi in cultural resource management are also covered.  
To complete this course students must enrol in ANTHRO 708 A and B  

ANTHRO 709 15 Points  
Applying Anthropology  
Considers the diverse fields in which Anthropology may be applied to peoples and cultures in the contemporary world, including, for example: environmental and development issues; land and resource conflicts; mediation and advocacy; human rights; cultural heritage; social policy; business and industry; communications; marketing; medical investigations; museums and other representational activities. Addresses practical and ethical issues that arise in these areas.  

ANTHRO 712 30 Points  
Topic in Biological Anthropology  

ANTHRO 713 30 Points  
Special Topic in Biological Anthropology  

ANTHRO 718A 15 Points  
ANTHRO 718B 15 Points  

Interpreting Biocultural Data  
A survey of the design, implementation, analysis, interpretation, and dissemination of research in biocultural anthropology. It provides a holistic overview of both qualitative and quantitative approaches to biocultural anthropological scholarship.  
To complete this course students must enrol in ANTHRO 718 A and B  

ANTHRO 719 30 Points  
ANTHRO 719A 15 Points  
ANTHRO 719B 15 Points  

Ethnographic Practice and Design  
Based on seminars, workshops and field research, the course prepares students to understand the foundations of anthropological ethnography and the ethical issues it entails, and to become proficient ethnographers in the field, in archives and at the desk. The course provides instruction and practice in research design and proposal writing in socio-cultural anthropology.  
Restriction: ANTHRO 753  
To complete this course students must enrol in ANTHRO 719 A and B, or ANTHRO 719  

ANTHRO 724 30 Points  
Special Topic in Social Anthropology  

ANTHRO 727 30 Points  
Topic in Ethnomusicology  

ANTHRO 729 15 Points  
ANTHRO 729A 7.5 Points  
ANTHRO 729B 7.5 Points  

Ethnographies of Music-making  
Advanced theories and methodologies for the ethnomusicological analysis of live musical performances and other behaviours across all genres and cultures. Primary attention is given to ethnography and participant-observation supported by analysis of industrial, cultural, musical, and mediated phenomena.  
To complete this course students must enrol in ANTHRO 727 A and B, or ANTHRO 727  

ANTHRO 728 30 Points  
Topic in Ethnomusicology  

ANTHRO 729 15 Points  
ANTHRO 729A 7.5 Points  
ANTHRO 729B 7.5 Points  

Special Studies in Anthropology  
A directed reading and individual study course to prepare students in the methodologies in a selected sub-discipline of Anthropology, under supervision of appropriate staff.

Communication

Stage I

COMMS 100  15 Points
Communication, Technology and Culture
Explores the past, present and future of communication media. Examines communication media within their social context, and provides a particular focus on the interplay between technology and culture. Key concepts in the study of communication are introduced and various communication media are studied via specific case studies, with particular emphasis placed on new digital platforms including social and mobile media as well as older forms such as television and cinema.

COMMS 101  15 Points
Understanding Communication in Māori and Pacific Worlds
Introduces principles and practices of communication relevant to the unique cultural landscape of Aotearoa. Students will explore communication in the context of te ao Māori and Pacific cultures, ethical issues related to bicultural communication, and the significance of Te Tiriti o Waitangi for communication practitioners.

COMMS 102  15 Points
Communication and Social Change
Examines how public communication shapes and is shaped by broader changes in society. Explores the evolution of language, media narratives and public understanding over time in relation to social issues such as: the representation of marginalised groups in society; environmental challenges; the changing nature of Aotearoa New Zealand society; and global societal trends.

COMMS 103  15 Points
Digital Communication and Practice
Offers a practical and creative approach to digital communication within the critical context of platform studies. Students will navigate the capacities, affordances and limitations of a variety of digital platforms by developing the skills to create platform-specific outputs, such as podcasts, gifs, vlogs, mobile films and digital storytelling shorts.
Restriction: COMMS 301

COMMS 104  15 Points
COMMS 104G  15 Points
Advertising and Society
A critical examination of advertising and advertisements focusing on the role advertising plays in consumer culture. Advertisements from a diverse range of media are studied in order to analyse how advertisements construct and disseminate meaning. The course investigates how advertising engages with the logic of wider cultural and global transformations with consideration given to both consumer and industry perspectives.

COMMS 105  15 Points
Introduction to Communication and Leadership
Introduces key concepts and theories of leadership with an emphasis on the fundamental role of communication. Explores the diverse contexts in which leadership operates: from complex and hierarchical organisations to small start-up enterprises; and from large public institutions to community groups. Considers the strengths and weaknesses of different styles and practices of leadership communication in light of real-world examples.

Stage II

COMMS 200  15 Points
Writing in the Workplace
Addresses written communication in the workplace across a range of discourses, environments, strategies and audiences. Focusing on different kinds of writing used in contexts such as government, community organisations, consultancy, professions, NGOs and private business, students will analyse and produce key workplace text-
types within a critical framework of workplace analysis and scholarship on labour and organisations.  
Prerequisite: 60 points at Stage I in BA courses  

COMMS 201  
Journalism Studies  
15 Points  
Explores journalism and the news media, examining their histories and contemporary state. Students gain knowledge about how the news media influences culture and society and will examine how recent social, political, and technological shifts have impacted on journalism. This course is primarily theoretical but has a practical component that involves news writing.  
Prerequisite: 60 points at Stage I in BA courses  

COMMS 202  
Audiences and Users  
15 Points  
Examines the ways that audiences have been conceived, addressed, measured and empowered in the context of the history and technologies of communication media. Theories of reception to be studied include uses and gratifications models, consumer behaviourism, passive versus active audiences, the rise of the 'prosumer', modes of engagement and fan discourses. Students will also learn about audience research methods.  
Prerequisite: 60 points at Stage I in BA courses  

COMMS 203  
Television Journalism  
15 Points  
A practical course where students explore the production of current affairs journalism. Students learn to write, video, present and edit short news items in the field and integrate these into a multi-camera production recorded as live in the television studio. Studio skills include directing, production management, multi-cam scripting, vision switching, presenting and interviewing within a framework of current industry practice.  
Prerequisite: 60 points at Stage I in BA courses  

COMMS 205  
Writing: Concept and Craft  
15 Points  
An exploration of written communication which connects writing as an object of analysis and critique to writing as a multi-faceted craft. Since writing systems, materials and tools create the worlds we live in, the course conceptualises the relation between word and word, image and text, technology and body, and addresses cultural, critical and digital literacies that organise lived experience.  
Prerequisite: 60 points at Stage I in BA courses  
Restriction: ENGLISH 105, 257, 363  

COMMS 206  
Special Topic: Persuasion and Power  
15 Points  
Prerequisite: 60 points at Stage I in BA courses  

COMMS 207  
Communication Research Methods  
15 Points  
Introduces students to a variety of research methods in communication studies. Students learn about the foundations of, and approaches to qualitative and quantitative methods and acquire an array of techniques to collect data, such as individual and focus group interviews, participant observation, and surveys, as well as different forms of data analysis.  
Prerequisite: 60 points at Stage I in BA or BC courses  

COMMS 208  
Digital Communication Ethics  
15 Points  
Addresses applied ethical issues arising in digital journalism, social media, “big data” surveillance and privacy, algorithmic bias, and software design. As digital media expand beyond the personal computer, there is an increase of ethical issues pertaining to mobile devices, GPS navigation, biometric modelling, artificial intelligence, and the ever-expanding range of wired devices tracking us through the so-called ‘internet of things’.  
Prerequisite: 60 points passed  

COMMS 209  
Special Topic  
15 Points  
Prerequisite: 60 points at Stage I in BA courses  

COMMS 210  
Practicing Communication in Māori and Pacific Worlds  
15 Points  
Builds on COMMS 101 to develop students’ cultural competencies and understanding of tikanga Māori and Pacific cultures. Particular emphasis is given to the concept of whakawhanaungatanga and protocols surrounding engagement, consultation and partnership with Māori and Pacific communities.  
Prerequisite: COMMS 101 and 45 points at Stage I in BA or BC courses  

COMMS 212  
Narratives of Social Change  
15 Points  
Investigates how the presentation of information shapes public attitudes and behaviours. Explores how public communication via news, social media and public awareness campaigns influence public understanding, engagement and behaviour. Key ideas explored in this course include: discourse; framing; rhetoric; and the interplay of words, images and sounds in multimodal communication.  
Prerequisite: COMMS 102 and 45 points at Stage I in BA or BC courses  

COMMS 213  
Communication and Persuasion  
15 Points  
Explores theories and practices of persuasive communication. Students will develop competencies through practical exercises and case study investigations. The course will also emphasise the ethics of persuasive communication, exploring themes such as the difference between persuasion and manipulation, and the relationship between persuasion and power.  
Prerequisite: 60 points at Stage I in BA or BC courses  

COMMS 214  
Communication and Inclusive Leadership  
15 Points  
Explores principles and practices of inclusive leadership and communication in the context of diverse organisations. The course investigates key causes and consequences of inequalities and barriers to inclusion within organisations, including overt and covert biases and forms of discrimination based on gender, ethnicity and disabilities. It also explores leadership strategies and best practices for building and sustaining inclusive organisations.  
Prerequisite: 60 points at Stage I in BA or BC courses  

Stage III  

COMMS 303  
Sports Media  
15 Points  
Examines the relationship between sport and the media. Topics include sports journalism; industry practice; the mediated game event; online communities of fandom; commentary; issues of race and gender; and sports law.
Students may have the opportunity to experience televised studio production at the University’s television studio. 

**Prerequisite:** 15 points from COMMS 200-208 and 15 points in BA courses

**COMMS 304 Gender, Politics and the Media**

**Prerequisite:** 60 points at Stage II in BA or BC courses

**COMMS 312 Documentary and Social Change**
Investigates the close alignment between documentary film and social and political transformation. The course will explore documentaries associated with political movements from anti-fascism to LGBTI issues. Students will produce a ‘mini-documentary’ as part of their coursework.  
**Prerequisite:** 60 points at Stage II in BA or BC courses  
**Restriction:** COMMS 306

**COMMS 313 Principles and Practices of Social Communication**
Develops students’ skills in communicating effectively and ethically to promote positive social change. Students will produce communication relating to real-world social issues, where possible in partnership with an external organisation working to promote social change. The course also looks at processes for carrying out stakeholder consultation and audience testing.  
**Prerequisite:** COMMS 212 and 45 points at Stage II in BA or BC courses

**COMMS 314 Risk, Crisis and Disaster Communication**
Explores how governmental and non-governmental organisations communicate in the context of social risks such as environmental hazards and public health emergencies. The course also investigates communication in the wake of disasters. Concepts explored in the course include: mis- and disinformation; public engagement and risk perceptions; framings and narratives of disaster and risk.  
**Prerequisite:** 60 points passed at Stage II

**COMMS 315 Environmental Communication**
Investigates how environmental challenges and policies are communicated in contemporary society. Particular emphasis is given to the relationship between science communication and popular media narratives.  
**Prerequisite:** 60 points passed at Stage II

**COMMS 316 Decolonising Technology and Data**
Explores Indigenous perspectives on technology and data. Policy, activism and design are explored in relation to decolonisation, equity and rangatiratanga (sovereignty).  
**Prerequisite:** 60 points passed at Stage II

**COMMS 317 Design for Equity, Accessibility and Justice**
Examines principles and practices of inclusive technology design. Considers how technologies can be designed to empower rather than disadvantage members of socially marginalised communities.  
**Prerequisite:** COMMS 208 and 45 points passed at Stage II

**COMMS 318 Technology Futures**
Considers the place of digital technologies in diverse and contested visions of the future, from Silicon Valley futurism to surveillance dystopias, and from ecological critiques of high-technology to projects for building a digital commons.  
**Prerequisite:** 60 points passed at Stage II  
**Restriction:** COMMS 300

**COMMS 319 Communication Strategies in the Workplace**
Addresses principles and best practices for effective communication within workplaces and organisations. Focuses on students’ skills in key areas including: professionalism in communication; listening skills; conflict resolution; and negotiation skills. Particular emphasis is given to the skills required for developing coherent and consistent communication strategies.  
**Prerequisite:** COMMS 214 and 45 points passed at Stage II

**COMMS 320 Communication Project**
Students complete a practical or academic project, involving individual or group-based work.  
**Prerequisite:** 60 points at Stage II in BC courses

Key areas of interest include robotics and AI; ubiquitous computing and the Internet of Things (IoT); 3D printing; virtual, augmented and mixed reality technologies. Issues examined include automation; future of employment; surveillance; new modes of experience; transformed human relationships; and ecological consequences.  
*Restriction: MEDIA 717*

**COMMS 701 30 Points**  
**Communication and Data**  
Explores the implications for communication in an age of big data, where code and algorithms curate, evaluate, and profile users’ data. The course addresses issues such as archives, clouds, privacy, identity, algorithmic bias and discrimination, complexity, informational capitalism, and affective labour, while also considering possibilities for rethinking the past and predicting the future through the analysis and visualisation of data.  

**COMMS 702 30 Points**  
**Communication Excess and Avoidance**  
Silences and absences make communication possible. Each medium, whether spoken or printed, projected or computed, has peculiar silences ranging from elegant to tragic, comic to painful, fleeting to eternal. Superabundant digital media raise acute questions about communicative excess and possible needs to disconnect. Such questions will be addressed alongside the cultural and technological history of communication excess and absence.  
*Restriction: MEDIA 745*

**COMMS 703 30 Points**  
**Popular Communication and Politics**  
Explores popular communication across a range of media, genres, texts and technologies to consider the political nature of the cultures, patterns of use, and modes of interpretation that emerge around them. The course will examine the cultural appropriation, adoption, adaptation and distribution of communicative media as well as the political economy of communication, consumer culture and varying forms of fandom.

**COMMS 704 30 Points**  
**Communication and Culture**  
Explores the mutually constitutive relationship between communication and culture through analyses of the cultural forms and meanings of social interaction. Acquaints students with classic and contemporary readings and introduces students to ways in which they can adopt a cultural approach toward communication phenomena in interpersonal, organisational, and intercultural settings.

**COMMS 705 30 Points**  
**Communication Perspectives**  
Critical review of key debates and perspectives in the Communication field, with a particular emphasis on social change communication. Balances broad coverage of dominant approaches in the field with the study of under-represented perspectives including through studies of Indigenous scholarship and research from the Global South.

**COMMS 706 30 Points**  
**Communication Case Studies**  
Explores how research in the Communication field can be applied to address complex challenges of the contemporary world and contribute to the development of solutions. Themes and topics will vary from year to year in line with changing societal issues and the research projects of contributing staff.

**COMMS 707 30 Points**  
**Research Methods and Design**  
Critical survey of methodological approaches in the Communication field, including Indigenous and other non-Western methodologies. Students will also be guided through a process for defining their own research problem and establishing an appropriate methodological design. Prepares students to undertake a dissertation as well as covering skills transferable to professional contexts.

**COMMS 708 15 Points**

CRIM 309 15 Points
Critical Research in Criminology
Introduces critical research methodology. Begins with the problems of epistemology (knowledge) and ontology (reality), then explores data (what is data?) and specific methods of data analysis, such as semiotics, discourse analysis and, amongst others, hermeneutics. Recommended to pursue postgraduate study in criminology.
Prerequisite: 90 points passed from BA courses, including 30 points at Stage II

CRIM 310 15 Points
Paradoxes of Crime Technology
Explores the limits and contradictions of crime prevention technologies. Focuses on the tension between the promises of such technologies and their consequences. Limits are explored via critical analyses of DNA typing, fingerprint comparison, forecasting or prediction, security technologies, and environmental controls, such as 'target hardening', 'guardianship' and 'environmental design'.
Prerequisite: 90 points passed from BA courses, including 30 points at Stage II

Postgraduate 700 Level Courses

CRIM 700 30 Points
Research in Criminology
Examines the methods of research frequently employed in the field of criminology, and the various epistemological and ethical questions that arise in criminological research, and the connection between theory and research and quantitative and qualitative analytic strategies. Students will complete a research project under supervision.
Restriction: CRIM 309

CRIM 701 30 Points
Criminological Theory
An examination of classical and contemporary theories of crime, including sociological, psychological, medical, rational-choice and critical perspectives on criminology. Attention will be given to the construction of theory as it is informed by social science research; to the social, cultural and political contexts in which these theories have emerged; and to the influence of theories in criminal justice policies.

CRIM 702 30 Points
Advanced Issues in Penology
A survey of issues in penology, describing and interpreting specific penal reform strategies in terms of their historical, social, political and economic context. An appreciation of the main themes within penology will allow a greater understanding of the role that punishment regimes play in society and specifically in the criminal justice system.

CRIM 703 30 Points
Contemporary Criminology
An examination of critical approaches to the study of crime and crime control. Attention will be given to understanding how these approaches critically assess social problems surrounding crime and crime control strategies; the political, social and historical development of varying critical perspectives; and the ways in which such approaches may lead to changes in criminal justice policies and practices.

CRIM 704 30 Points
State Crime
Considers a range of theoretical approaches to criminal acts committed by state officials in pursuit of their jobs as representatives of the state, and state organisational deviance that involves the violation of human rights and is liable to sanction. The course offers a series of case studies of such state crime.

CRIM 705 30 Points
Special Topic: Quantitative Criminology
Focuses on criminological quantitative data, and its analysis and interpretation. Students will engage with the basics of survey research and will be guided through statistical techniques to analyse a quantitative dataset. Students gain hands-on experience using software (i.e., SPSS) to run statistical tests, learn how to interpret results, and engage in quantitative reasoning and its application to criminological problems.

Research Methods in Development - Level 9
Provides a critical review of the phases of development research, including theoretically grounded research design and the unique ethical considerations surrounding development fieldwork. Equips students with advanced skills of employing qualitative and participatory research methodologies in challenging social and cultural settings and develops highly specialised knowledge in applying qualitative data analysis software, presenting findings and developing a postgraduate research proposal.

DEVELOP 713 15 Points
Ethics and Governance in International Development
Addresses challenges to ethics and governance that arise in international development processes. Examines the competing demands of various stakeholders in the
development of appropriate governance mechanisms and the values and judgements that inform societal choices and political decision-making. Students shall be familiarised with ethical debates in international development and engaged in ethically informed conversations on contemporary development challenges.

**DEVELOP 715**  
**Independent Research**  
Supervised study on a topic approved by the Academic Head or nominee.

**DEVELOP 716**  
**Global Health and Development**  
Introduces a social science approach to the study of health and globalisation, tracing various historical genealogies from colonial hygiene movements, to international public health in the development sector, up through contemporary global health institutions and their governance structure. Current issues in health and development, including the increasing role of NGOs and human rights frameworks, are critically analysed.

**DEVELOP 717**  
**Humanitarian Interventions**  
Traces the rise of the humanitarian narrative and examines how humanitarianism – along with other key words such as crisis, emergency, and intervention – has become one of the organising categories of political action and order. The course explores the possibilities and limits of intervening in the lives of individuals and communities grounded upon discourses of compassion.

English

Stage I

ENGLISH 101 15 Points
Literature and the Contemporary
Constitutes a wide-ranging study of literatures in English in different forms and media in the twentieth and twenty-first centuries. Themes studied may include modernity/postmodernity, diaspora, gender relations, sexuality, cross-cultural contacts, memory, film adaptation, war and ecological crisis. Works will be examined in the context of key historical events and cultural movements.

ENGLISH 102 15 Points
ENGLISH 102G 15 Points
Great Books: Seduction and Betrayal
Surveys a selection of literary masterpieces by major authors from different periods in the history of English literature. Selection of texts is organised around the theme of seduction and betrayal, understood more particularly as a story-arc exploring attitudes to love and sex, to politics and ambition, to ethical conduct, and to the activity of reading itself.

ENGLISH 113 15 Points
Global South: New World Texts
Introduces cross-disciplinary study of transnational texts in English, with particular reference to poetry and prose works from the Caribbean and Pacific, including New Zealand. In both regions, the local history of writing is extensive and includes notable texts that reflect diverse cultural origins, but also a sharp sense of the new (scenes, socio-political structures, languages).

ENGLISH 121 15 Points
ENGLISH 121G 15 Points
Reading/Writing/Text
Develops University-wide skills of reading, writing and analysis. Addresses the needs of students in both English and other disciplines where both writing and reading have an important role in learning. The course fosters personal writing skills and also introduces writing as a subject of study in itself.

Stage II

ENGLISH 204 15 Points
Pacific Literature in English
An introduction to contemporary Pacific Literature exploring texts from canonical Pacific writers to spoken
word performance poets. Texts will be examined in light of recent theories in Indigenous Writing Studies, with a focus on crossings of cultural and creative borders, diaspora and identity.

**Prerequisite:** 30 points at Stage I in English, or 15 points at Stage I in English and PACIFIC 100

**ENGLISH 207**

15 Points

**Creating Stories**

Explores narrative theory and analysis through major stories from the literature and art of the last six centuries, from Shakespeare's sources to now; from at least four continents; and including short story, drama, 'classic' and modern novels, verse, children's picture story, narrative painting, comics, film and music video. Investigates universal, human, local, individual, work and intra-work levels of analysis.

**Prerequisite:** 60 points passed

**Restriction:** ENGLISH 111

**ENGLISH 213**

15 Points

**Age of Shakespeare: Tragedy**

An introduction to the golden age of English theatre, involving detailed study of a selection of tragedies by Shakespeare and his contemporaries. The theatrical emphasis of the course is intended to help students respond to the plays as theatrical artefacts and not merely as literary texts.

**Prerequisite:** 30 points at Stage I in English or Drama, or approval of Academic Head or nominee

**Restriction:** ENGLISH 353

**ENGLISH 214**

15 Points

**Early Texts: Modern Inventions**

A study of key works and contexts of selected medieval and early modern writers, including Chaucer, Shakespeare, Milton, and Behn. Offers a compact history of literary engagements with important social issues that arose in a period notable for revolution and reform; also develops knowledge of literary forms and trends that are historically important, but, in this period, relatively new.

**Prerequisite:** 15 points at Stage I in English

**Restriction:** ENGLISH 210, 330

**ENGLISH 216**

15 Points

**Modernist Transformations**

Taking transformation as its theme, the course focuses on a selection of influential Modernist works that map out some of the possibilities for the avant-garde in the early twentieth century. Students will expand their knowledge of modernism as a multimedia, multicultural phenomenon and exploit their imaginations and research skills as they consider its relevance to contemporary cultural production.

**Prerequisite:** 30 points at Stage I in English

**Restriction:** ENGLISH 206, 222, 322

**ENGLISH 217**

15 Points

**Postcolonial Memory: Ireland**

Explores globally significant issues of cultural memory, identity and postcolonial inheritance through the lens of Irish literature and cultural experience. Debates about memory and postcoloniality guide our navigation of twentieth and twenty-first century Irish novels, plays, poetry and short stories. Conversely, our literary navigations interrogate postcolonial representations of identity across changing cultural contexts.

**Prerequisite:** 30 points at Stage I in English

**Restriction:** ENGLISH 266, 316, 361

**ENGLISH 219**

15 Points

**Nineteenth Century Literature**

Considers a range of literature from the nineteenth century – poetry, fiction and drama – as regards its treatment of growing up in the period. Issues covered include the recognition of childhood as a special state, the establishment of an individual's gender and sexual identity and the opportunities and constraints afforded by the changing social hierarchy and religious belief systems.

**Prerequisite:** 30 points at Stage I in English

**Restriction:** ENGLISH 104, 306

**ENGLISH 221**

15 Points

**New Zealand Literature**

Offers an historical survey of major writers and key issues in New Zealand literature. Students will not only read some of the best writing our country has to offer but will develop, through the literature studied, a richly detailed overview of New Zealand experience from the period of first contact until now.

**Prerequisite:** 30 points at Stage I in English

**Restriction:** ENGLISH 355

**ENGLISH 223**

15 Points

**Modern Writing and Critical Thinking**

Explores theories and practices of writing and criticality in academic, civic, and artistic contexts. We consider some of the scripts that organise literate social practices and how to perceive and extrapolate their principles. We explore how we are affected by, how we navigate, and how we transform our immersive world of signs.

**Prerequisite:** 15 points at Stage I in English

**Restriction:** ENGLISH 305

**ENGLISH 224**

15 Points

**Creative Writing: Four Genres**

Develops practical skills in four writing genres: Poetry, Multimedia, Creative Non-Fiction and Short Fiction. A range of published models will be studied alongside writing and workshop exercises; and students will develop close-reading skills. Two portfolios of creative work cover all four genres, based on work begun in seminars.

**Prerequisite:** 45 points passed including 30 points in English

**Restriction:** ENGLISH 255, 324

**ENGLISH 256**

15 Points

**Tolkien and his Worlds**

Examines Tolkien’s primary fictional texts, The Hobbit and The Lord of the Rings trilogy, in relation to the author’s ideas about fantasy and world-building, his use of Celtic, German and Christian mythology, and the adaptation of the novels into film.

**Prerequisite:** 60 points passed

Creating Stories
Explores narrative theory and analysis through major stories from the literature and art of the last six centuries, from Shakespeare's sources to now; from at least four continents; and including short story, drama, “classic” and modern novels, verse, children's picture story, narrative painting, comics, film and music video. Investigates universal, human, local, individual, work and intra-work levels of analysis.
Prerequisite: 60 points at Stage II from the BA Schedule
Restriction: ENGLISH 111, 207

ENGLISH 316 15 Points
Postcolonial Memory: Ireland
Explores globally significant issues of cultural memory, identity and postcolonial inheritance through the lens of Irish literature and cultural experience. Debates about memory and postcoloniality guide our navigation of twentieth and twenty-first century Irish novels, plays, poetry and short stories. Conversely, our literary navigations interrogate postcolonial representations of identity across changing cultural contexts.
Prerequisite: 30 points at Stage II in English
Restriction: ENGLISH 217, 266, 361

ENGLISH 318 15 Points
The Gothic: Texts and Theory
An advanced introduction to literary theory through an exploration of classic works of Gothic Literature. We examine the competing claims of psychoanalysis, new historicism, post-colonialism and queer studies in accounting for the appeal and cultural significance of the Gothic mode.
Prerequisite: 30 points at Stage II
Restriction: ENGLISH 321

ENGLISH 322 15 Points
Modernist Transformations
Takes transformation as its theme, focuses on a selection of influential Modernist works that map out some of the possibilities for the avant-garde in the early twentieth century. Students will expand their knowledge of modernism as a multimedia, multicultural phenomenon and exert their imaginations and research skills as they consider its relevance to contemporary cultural production.
Prerequisite: 30 points at Stage II in English
Restriction: ENGLISH 206, 216, 222

ENGLISH 323 15 Points
Contemporary Poetry
An introduction to the work of a dozen influential poets, this course emphasises new developments. The focus is on the still controversial L=A=N=G=U=A=E poetry that emerged in the late 1970s and developments concurrent with it. This shift is seen against a background of changes in technology, politics and in popular and intellectual culture.
Prerequisite: 30 points at Stage II in English

ENGLISH 324 15 Points
Creative Writing: Four Genres
Develops practical skills in four writing genres: Poetry, Multimedia, Creative Non-Fiction and Short Fiction. A range of published models will be studied alongside write and workshop exercises and students will develop close-reading skills. Two portfolios of creative work cover all four genres, based on work begun in seminars.
Prerequisite: 60 points passed, including 45 points in English
Restriction: ENGLISH 252

ENGLISH 330 15 Points
Early Texts, Modern Inventions
A study of key works and contexts of selected medieval and early modern writers, including Chaucer, Shakespeare, Milton, and Behn. Offers a compact history of literary engagements with important social issues that arose in a period notable for revolution and reform; also develops knowledge of literary forms and trends that are historically important, but, in this period, relatively new.
Prerequisite: 30 points at Stage II in English
Restriction: ENGLISH 214, 351

ENGLISH 340 15 Points

Postgraduate 700 Level Courses

ENGLISH 700  30 Points
Pacific Poetry
A critical engagement with poetry written in English by the peoples of Oceania (Polynesia, Melanesia, Micronesia). Pacific aesthetics and epistemologies evident in orature and art, in addition to post-colonial and women of colour feminist theories, will be used in the construction of culturally insightful frameworks to better appreciate this poetry that spans from the 1970s to the present day.
Restriction: ENGLISH 717, 720

ENGLISH 701  30 Points
Milton and Poetic Authority
Milton is the poet who has been most significant in the establishment of the familiar canon of English poetry. This achievement raises questions about the greatness of poetry written in one set of historical circumstances that is then judged by an audience constructed in part by the poetry itself. In this context the course covers political as well as poetic works.
Restriction: ENGLISH 760

ENGLISH 702  30 Points
Postcolonial Literary Studies
Provides a critical investigation of postcolonial literary studies as a field of academic inquiry and cultural critique. We read essays by influential theorists, including theoretical essays by contemporary poets and novelists, but concentrate on the study of literary texts produced in the social, political and cultural circumstances that are largely identified as postcolonial.
Restriction: ENGLISH 786

ENGLISH 703  15 Points
Stages of Religion
The history of English religion through the longer Reformation period, as reflected and addressed especially in the drama of the period, from the Cycle-plays to Milton. Global Studies

Stage I

GLOBAL 102 15 Points
Introduction to Global Studies
Focuses on transdisciplinary frameworks underpinning the field and uses case studies to illustrate its key concepts. Explores global studies as a critical field of inquiry and covers transdisciplinary themes from the four major streams in global studies.

Stage II

GLOBAL 200 15 Points
Global Challenges
Engages with real-world challenges that evoke key global studies themes such as global economic complexity and interdependence; globalisation and identity; cyberspace and netizenship; environmental and health challenges; global citizenship and responsibility. A workshop-based format prioritises teamwork where students produce a joint project in response to their chosen challenge. Provides research methods training to enable students to produce a research proposal for their capstone project.

Health and Society

Stage I

HLTHSOC 100
Introduction to Critical Global Health
An introduction to how the social sciences and humanities shed light on understandings of the social, political-economic, historical and cultural dynamics that underpin contemporary healthcare, medical practices and knowledge-production, and experiences of health and illness around the world. Examines real-life case studies using a range of health social science approaches.

HLTHSOC 201
Medicine, Power and Politics
Explores the interplay between cultural values, local and national politics, and global health programmes and initiatives. Examines how experiences of medical care and ideas of illness and health vary across different cultural groups and socio-cultural settings, with a focus on issues of scientific expertise, patient empowerment and government involvement in healthcare.

HLTHSOC 202
Global Health and Development
Introduces a critical social science approach to the study of health and globalisation, tracing historical genealogies from colonial hygiene movements, to international public health in the development sector, through to contemporary global health institutions and their governance structures. Current issues and case studies in health and development including the roles of NGOs, participatory approaches and human rights frameworks.

HLTHSOC 301
Researching Health and Social Medicine
Introduces qualitative research approaches to health and social medicine and equips students with the methodological skills to conduct their own research project. Reviews all phases of a research project: design and theoretical framing, ethical considerations, methods employed for data collection and analysis, and writing.

Prerequisite: 15 points at Stage II in Health and Society

HLTHSOC 302
Global Health and Development
Introduces a critical social science approach to the study of health and globalisation, tracing historical genealogies from colonial hygiene movements, to international public health in the development sector, through to contemporary global health institutions and their governance structures. Current issues and case studies in health and development including the roles of NGOs, participatory approaches and human rights frameworks.

Restriction: DEVELOP 716, HLTHSOC 202

HLTHSOC 303
The Body
Examines cultural and historical variations in how societies understand and experience the human body, with a focus on social, historical, philosophical and political-economic approaches. Topics such as political violence, sport, health, illness, sexuality, gender and religious ritual will be considered. Case studies explore the cultural construction and social experience of the human body in a diverse range of global settings.

Prerequisite: 30 points at Stage II in Health and Society

Restriction: ANTHRO 354

HLTHSOC 304
Violence and Pain
Examines the meanings of violence and the various forms it might take, as well as how violence and pain shape ideas about personhood, the body, community and the state. Examines how experiences of violence are communicated, how various forms of violence shape and transform daily life, and how the study of health social science can address these impacts.

Prerequisite: HLTHSOC 201 and 15 points at Stage II in BA courses

Restriction: ANTHRO 743

HLTHSOC 305
Culture, Science and Technology
Examines the interplay between culture, scientific knowledge and practice, and technological development with respect to health and illness. Focusing on the social, cultural, ethical, and political dimensions of science and technology, the course introduces students to critical examinations of how knowledge, progress, innovation and expertise are constituted across a variety of global settings.

Intermediate Korean 1
Aims to expand students’ proficiency in Korean by introducing further points of grammar and their usage. This course serves as the base for oral and written language skills at an intermediate level.
Prerequisite: KOREAN 100 or 111
Restriction: KOREAN 250. May not be taken if a more advanced language acquisition course in this subject has previously been passed

KOREAN 201 15 Points
Intermediate Korean 2
A continuation of KOREAN 200 covering more advanced grammar points and their usage. Further develops communicative use of Korean in a wide range of everyday situations.
Prerequisite: KOREAN 200
Restriction: KOREAN 250. May not be taken if a more advanced language acquisition course in this subject has previously been passed

KOREAN 203 15 Points
Special Topic
KOREAN 205 15 Points
Korea through TV Drama and Film
Examines some of the cultural, social and political issues of contemporary South Korea through a selection of popular TV dramas and films.
Prerequisite: 15 points at Stage I in Asian Studies, Chinese, Japanese or Korean, or 15 points at Stage I in Media and Screen Studies and 30 points passed
Restriction: ASIAN 202, KOREAN 305

KOREAN 250 15 Points
Korean for Heritage Speakers
Aims to enhance written skills in modern Korean for students with native speaker background. Emphasis will be placed on the comprehension of a wide range of issues in Korean society.
Prerequisite: Approval of Academic Head or nominee
Restriction: KOREAN 110, 111, 200, 201, 300, 301. May not be taken if a more advanced language acquisition course in this subject has previously been passed

KOREAN 277 15 Points
Korean Study Abroad 2A
Refer to the entry for Language Study Abroad.
Prerequisite: Approval of Academic Head or nominee

KOREAN 278 15 Points
Korean Study Abroad 2B
Refer to the entry for Language Study Abroad.
Prerequisite: KOREAN 277 and approval of Academic Head or nominee

Stage III
KOREAN 300 15 Points
Advanced Korean 1
Korean grammar at an advanced level. A continuation of KOREAN 201.
Prerequisite: KOREAN 201

Language Teaching and Learning

Stage I

LANGTCHG 101 15 Points
Introduction to Language Teaching
An introduction to a range of approaches to second language teaching and the theories of language and learning which underpin them. Students will explore the basic concepts related to current approaches to ELT in current contexts of learning.

LANGTCHG 102 15 Points
Classroom Management and School Experience
Introduces students to the organisation of learning in the classroom and specifically to the role and behaviour of the teacher in secondary classrooms and in the school. The integrated school experience provides students with an initial orientation to the school environment in their home country and the opportunity to apply their growing knowledge and skills in a supportive classroom context.

LANGTCHG 103 15 Points
Competency in the Mother Tongue
Extends the students’ command and control over their mother tongue to enable them to operate efficiently and effectively in schools in their home country where the medium of instruction is the mother tongue. To further enrich their communication skills they will be exposed to the literature in their mother tongue.

Stage II

LANGTCHG 202 15 Points
Introductory English Language Analysis for Teachers
Introduces key concepts of phonology, grammar and vocabulary of English and develops an understanding of how they function as systems in written and spoken English. Develops the skills needed to formally analyse the phonological, lexical and grammatical systems of English. Illustrates how linguistic descriptions can be applied in language teaching.
Prerequisite: 30 points passed or approval of Academic Head or nominee.

LANGTCHG 205 15 Points
Developing Literacy in a Second Language
Examines the theory and practice related to the development of both initial and advanced literacy in a second language: how reading and writing skills are developed in a second language; the interdependency of first and second language literacy skills; effective instructional methods and the role played by second language literacy in the development of academic skills where English is the medium of instruction.
Prerequisite: 30 points passed or approval of Academic Head or nominee.

LANGTCHG 206 15 Points
Special Topic: Language Learning and the Brain
Introduces prominent cognitive aspects of language learning. These include memory, attention, code-switching, and multimodal integration when learners form correspondences between linguistic and sensory input. Examines the power of language to influence brain responses and optical illusions. The mechanisms of linguistic influence on the brain, and their implications for teaching, will be explored from multiple angles.
Prerequisite: 30 points passed.

LANGTCHG 207 15 Points
Instructed Language Learning
Introduces the study of the language acquisition-rich classroom by considering how a second or foreign language is learned, and explores different aspects of language teaching from the perspective of language learning and factors responsible for individual differences in learning. Students will consider concepts and research in instructed language learning in relation to classroom, institutional, and broader social and political contexts.
Prerequisite: 30 points passed or approval of Academic Head or nominee.
Restriction: LANGTCHG 303

LANGTCHG 209 15 Points
Using Tasks in Language Teaching
Students learn about task-based language teaching and have opportunities for hands-on practice in developing tasks for use in the language classroom. The course also enhances students’ understanding of the difference between task-based teaching and traditional approaches to language teaching.
Prerequisite: LANGTCHG 101 or 30 points passed or approval of Academic Head or nominee.
Restriction: LANGTCHG 306
## Stage III

**LANGTCHG 300 15 Points**  
Theory and Practice of Language Teaching  
A general introduction to English language teaching. This course requires students to undertake a study of current theory and practice relating to the teaching of the knowledge systems of English and of language skills.  
Prerequisite: LANGTCHG 101 or 202 or 30 points passed at Stage II or above or approval of Academic Head or nominee

**LANGTCHG 301 15 Points**  
The Second Language Curriculum  
Introduces principles and procedures used in course design and to evaluate TEFL courses, coursebooks and materials. Develops a practical understanding of how to set about planning an EFL curriculum.  
Prerequisite: LANGTCHG 101 or 30 points passed at Stage II or above or approval of Academic Head or nominee

**LANGTCHG 302 15 Points**  
Practical Language Teaching  
Develops an understanding of the procedures, techniques and options used in teaching language lessons; helps participants to design and deliver effective language lessons for a variety of contexts; and introduces participants to a variety of tools for teacher development such as peer teaching, peer observation, and reflective teaching.

**LANGTCHG 304 15 Points**  
The Young Second Language Learner  
Examines the experience of children aged 6-12 years and adolescents aged 12-19 in learning a second language. Gives particular attention to the social, cognitive and psychological characteristics of children; examines the needs of young learners of a second language and how languages are learned in different contexts.  
Prerequisite: LANGTCHG 101 or 30 points at Stage II or above or approval of the Academic Head or nominee

**LANGTCHG 305 15 Points**  
Special Topic

**LANGTCHG 307 15 Points**  
Special Topic  
Prerequisite: 30 points passed at Stage II

**LANGTCHG 308 15 Points**  
Special Topic

**LANGTCHG 309 15 Points**  
Second/Foreign Language Teaching Experience  
Students teach English (or another language) for an organisation (local or abroad) approved by the Academic Head or nominee. Excludes teaching in a NZ primary, intermediate or secondary school.  
Prerequisite: LANGTCHG 101, 202, 300, 301, 302 with a B average or higher and approval of Academic Head or nominee

**LANGTCHG 310 15 Points**  
Literature in Second Language Learning  
Introduces students to the study of stylistics, looks at various forms and genres of literary texts and presents different approaches to teaching literature in a second language classroom. The students will experiment with, evaluate and discuss various ways of teaching literature.  
Prerequisite: LANGTCHG 101 or 202, or 30 points at Stage II or III, or approval of the Academic Head or nominee

**LANGTCHG 311 15 Points**  
Language and Technology  
Introduces students to theoretical and practical aspects of using technology for language learning and teaching purposes. Enables students to develop confidence in their ability to integrate technology into their teaching, and in their capacity to explore other technological applications in response to workplace needs. Students will also experience and reflect upon the language learning dimension, and critically examine the relative benefits of particular applications with reference to sound pedagogical principles.  
Prerequisite: 30 points passed at Stage II

**LANGTCHG 312 15 Points**  
Special Topic

## Stage IV

**LANGTCHG 400 15 Points**  
Language Curriculum Studies  
Examines the meaning of curriculum in relation to the school, state, national contexts, and the broader socio-political context. Of central importance is the idea of curriculum as an interactive process. The idea of curriculum as process and the dynamic interplay between curriculum context, theory and practice are emphasised.  
Restriction: LANGTCHG 724, 741

**LANGTCHG 401 15 Points**  
Language Assessment in Schools  
Aims to develop understanding of second language learning assessment. Starting with broader considerations and techniques, the focus is on different forms of assessment used in secondary English teaching contexts in the home country.  
Restriction: LANGTCHG 704, 742

**LANGTCHG 402 15 Points**  
Linking Theory and Practice in the Language Classroom  
Examines the pedagogical frameworks underpinning classroom methodology. Focuses on linking theory and practice and on preparing students for forthcoming classroom teaching. Includes the practical preparation and implementation of lessons, drawing on and bringing into focus relevant aspects of the programme.  
Restriction: LANGTCHG 710

**LANGTCHG 403 60 Points**  
Teaching Practice  
A 12-week period of teaching practice in a school in the country of the student’s origin. The practice will focus mainly on the teaching of English, although the student may have an opportunity to teach a second subject.

## Postgraduate 700 Level Courses

**LANGTCHG 700 15 Points**  
Literature in Second Language Learning  
An advanced study of stylistics, looking at various forms and genres of literary texts and presenting an in-depth examination of different approaches to teaching literature in a second language classroom. Students will experiment with, evaluate and discuss various ways of teaching literature.  
Restriction: LANGTCHG 310

**LANGTCHG 701 15 Points**  
Multilingual Lives - Level 9  
Examines main theoretical approaches to understanding multilingualism. Students acquire specialised knowledge of different approaches to addressing the needs of an ethnopaperistically diverse population, and develop
a critical awareness of issues and debates in the field. Assignments involve substantial independent research that includes the analysis of factors that influence the acquisition, maintenance, and use of multiple languages in individuals’ lives.

**LANGTCHG 708**  
**Special Topic: Experimental Approaches to SLA**  
15 Points  
Familiarises students with experiments that investigate second language acquisition. There are two goals. First, to develop an understanding of a range of methods in the field, which include categorisation and memory tests, eye-tracking, measuring skin conductance responses and brain signals. Second, to train students to critically read reports from experiments and to evaluate their relevance for SLA research.

**LANGTCHG 710**  
**Task-based Language Teaching**  
15 Points  
Examines research that has investigated task-based second language learning and the theoretical rationale for task-based language teaching. Also considers factors in the design of task-based syllabuses and methodological options for lessons based on tasks, and problems in implementation.

Restriction: LANGTCHG 402

**LANGTCHG 715**  
**Developing Academic Literacy**  
15 Points  
Aims to help participants understand and develop their academic literacies. Focuses on texts involved in the research process, such as review articles, research paper proposals, dissertations and conference abstracts; makes extensive reference to findings from genre and corpus-based analyses; and includes conducting mini-analyses on the discourse in participants’ own disciplines.

**LANGTCHG 716**  
**Vocabulary Learning and Teaching**  
15 Points  
Explores the role of vocabulary learning within a language teaching programme. It reviews research evidence on the nature of vocabulary and the processes involved in vocabulary learning, and considers how to facilitate the acquisition of vocabulary by second language learners both inside and outside the classroom.

**LANGTCHG 723**  
**Theories of Language Learning**  
15 Points  
A critical examination of theories of second language learning grounded in linguistics, psycholinguistics, sociolinguistics and education. The course focuses on cognitive and social theories of second language acquisition, identifying commonalities and differences in the theories, and considering their pedagogical implications.

**LANGTCHG 723**  
**Second/Foreign Language Teaching Practice**  
30 Points  
Aims to create opportunities for students to integrate disciplinary knowledge and professional teaching practice in order to develop the skills required of effective teachers of second and foreign languages. The course includes a seminar-based learning component, micro-teaching, focused observation and reflective teaching practice.

**LANGTCHG 724**  
**Identity in Language Teaching and Learning**  
15 Points  
Explores the concepts of language learner identity and language teacher identity. The course reviews theory and research on identity and considers the practical applications of identity research and debates in classroom practice. Students conduct an independent self-reflective project.

**LANGTCHG 739**  
**Directed Study**  
15 Points  
Supervised research on an approved topic or topics related to language teaching and learning.

**LANGTCHG 740**  
**Language Analysis for Teachers**  
15 Points  
Examines the principles and processes of designing, adapting and evaluating language teaching materials for teaching language systems and language skills. Examines the role materials development play in professional development.

**LANGTCHG 746**  
**Materials Development and Evaluation**  
15 Points  
Examines research that has investigated task-based second language teaching and learning; the quantitative and qualitative methods used in this research.

**LANGTCHG 747**  
**Individual Learner Differences and Second Language Learning**  
15 Points  
The findings of research into individual learner differences and their role in language learning; the quantitative and qualitative methods used in this research.

**LANGTCHG 751**  
**Corpus Studies in Applied Linguistics**  
15 Points  
Covers the theoretical and practical aspects of using corpora to promote language learning. A major part of the course will focus on using corpora and text analysis tools to provide a description of language as it is used by different people for different purposes. Once we have a good description of language usage, we can move on to consider the role of corpus studies in language teaching.

**LANGTCHG 752**  
**Computer Assisted Language Learning**  
15 Points  
Covers the theoretical and practical aspects of using technology to promote language learning. Includes culture and CALL, exercise authoring, CALL research, technology and the four skills, web-based language learning, computer-mediated communication, and CALL evaluation.

**LANGTCHG 754**  
**English for Specific Purposes**  
15 Points  
Considers theory and practice in developing language courses to meet the specific academic or work-related needs of adult learners. In particular, it focuses on analysis of target communication, needs analysis, issues and methodologies in ESP and ESP research. Uses the example of English for Specific Purposes but is relevant to the teaching of other languages for specific purposes as well.

**LANGTCHG 756**  
**Special Topic**  
15 Points  
**LANGTCHG 757**  
**Conducting Research in Applied Language Studies - Level 9**  
15 Points  
Explores advanced theoretical perspectives for research into second/foreign language learning, teaching, and use. Enables students to acquire an advanced understanding of selected research methods. Students work independently on a small-scale project, which involves the collection and
analysis of data on second or foreign language learning, teaching or use. 
Restriction: LANGTCHG 732, 745

LANGTCHG 760 15 Points 
Curriculum Design - Level 9
Advanced level study of theoretical principles and current issues in the second language curriculum. Includes historical examination of influential approaches and methods, with particular attention to the development and current position of communicative approaches. Examines issues associated with course design processes including assessment of needs, objectives setting, syllabus and materials selections, and course evaluation. 
Restriction: LANGTCHG 741

LANGTCHG 761 15 Points 
Sociolinguistics - Level 9
Examines sociolinguistic concepts relevant to understanding influences on language use at the level of individuals, social groups and institutions. Enables students to acquire an advanced understanding of social and regional dialects, perceived differences in the market status of particular languages, the use of sociolects and ethnolects in the media and other public domains, and policies and practices concerning migrant and heritage language maintenance. 
Restriction: LANGTCHG 749

LANGTCHG 762 15 Points 
Second Language Acquisition - Level 9
Advanced study of current theories of second language acquisition and research that have examined both instructed and naturalistic acquisition. Includes an independent study involving analysis of learner language and writing a standard research report and a critique of a pedagogical approach, drawing on contemporary research on how languages are learned. 
Restriction: LANGTCHG 722, 723, 743

LANGTCHG 763 15 Points 
Discourse Analysis - Level 9
Examines major theoretical approaches to the analysis of discourse and implications for pedagogy. Students acquire specialised knowledge of approaches to analysis and frameworks that underpin research, and develop advanced skills in written and spoken text analysis and critical awareness of issues and debates in the field. Assignments involve substantial independent research that includes analysis and interpretation of data. 
Restriction: LANGTCHG 744

LANGTCHG 764 15 Points 
Creativity: Research and Practice - Level 9
Theoretical perspectives, pedagogical practices and research projects related to the topic of creativity in language learning and teaching. Enables students to acquire an advanced understanding of the concept of ‘creativity’ with reference to language teaching and learning through exploratory research, practice and reflection. 
Restriction: LANGTCHG 755

LANGTCHG 765 15 Points 
Language Testing and Assessment - Level 9
Advanced study of theoretical principles and current issues in language testing, assessment and evaluation, and their application to teaching practice and research. Examines issues associated with the creation of valid and reliable assessments, and the implications for course design processes, with particular attention to the testing, assessment and evaluation of communicative language proficiency. 
Restriction: LANGTCHG 742

Latin American Studies

Stage I
LATINAM 101 15 Points
Introductory Portuguese Language
An introduction to spoken and written language, for students with no prior background in the language or limited fluency.

Stage II
LATINAM 200 15 Points
Special Topic: Latin American Icons
An examination of the ways in which Latin America, as a place and a people, has served as a site of otherness and exoticism, providing an economic and symbolic capital for the consumption and pleasure of colonial, neo-colonial and neo-liberal powers. Latin American cultural studies texts offer students a way to read against the grain established by this process.
Prerequisite: 30 points from BA courses or 15 points from BGlobalSt courses
Restriction: LATINAM 306

LATINAM 201 15 Points
Latin American History and Culture Through Film
A journey through five moments of Latin American history and culture, from its creation as a region imagined through the gaze of colonialism, through the development of an independent, revolutionary Third Cinema, to the present when globalisation is critiqued from the periphery.
Prerequisite: 15 points from COMMS 100, FTVMS 100, 101, 112, MEDIA 101, SPANISH 103, 105, 200, 201, 277, 278, 319, 392, 377, 378, or 45 points in BGlobalSt courses
Restriction: LATINAM 303

LATINAM 202 15 Points
Study Abroad (Latin America)
A minimum of four weeks of study at an overseas institution approved by the Spanish and Latin American Study Abroad Adviser.
Prerequisite: Programme Coordinator approval

LATINAM 301 15 Points
Visual Cultures and Industries in Latin America
Follows transformations in Latin American visual cultures and culture industries since the 1930s, from the liberal to the neoliberal era. Throughout this history, who controls visual media production and how does this control relate to democracy? Have recent alliances between Indigenous groups and social movements to introduce new media Laws successfully widened participation and challenged corporate media ownership?
Prerequisite: 45 points in BA courses or approval of Programme Coordinator
Restriction: LATINAM 310

LATINAM 302 15 Points
Music, Politics and Social Change
A theorised study of the history of twentieth-century social movements in Latin America through its poetry and music, largely as expressed in popular forms. The major focus is on the political and cultural manifestations of these expressions as they respond to and instigate social change.
Prerequisite: 15 points from SPANISH 103, 105, 200, 201, 277, 278, 319, 321, 377, 378
Restriction: LATINAM 301, SPANISH 216

Media and Screen Studies

Stage I
MEDIA 101 15 Points
Film Studies
An introduction to the feature film and the main traditions of film criticism. A series of significant films, from 1915 to the present, are explored in detail. The aim is to develop a historical perspective, an awareness of film-making as an art and an interest in the relationship between films and society, including debates about race, gender, censorship.

MEDIA 102 15 Points
Media and Culture
Examines popular media texts, genres, audiences and industries, reflecting on how they influence our notions of self and society. Draws on case studies from a range of popular media, from film and television to comics, games, popular music, social media and advertising. Fosters critical perspectives on media as vehicles for cultural
meaning, alongside strategies for crafting personal and collective narratives.

Stage II

MEDIA 202 Hollywood and its Others 15 Points
An investigation of Hollywood’s interactions with European and Asian cinema, with a particular focus on its industrial, aesthetic and cultural aspects. Students will gain a historical understanding of Hollywood cinema and how its relationships with other film cultures have shaped the dynamics of global cinema.
Prerequisite: 15 points at Stage I in Media and Screen Studies and 30 points passed, or 30 points in Transnational Cultures and Creative Practice
Restriction: MEDIA 307

MEDIA 212 Video Games: Theory and Culture 15 Points
A study of video games as a new media form situated in the broader context of media theory and history. Considers video gaming as an industry, as a leisure activity, and as a site of aesthetic and narrative innovation. The course examines what makes video games a distinctive media form.
Prerequisite: 15 points at Stage I in Media and Screen Studies and 30 points passed, or 30 points in Communication
Restriction: MEDIA 328

MEDIA 213 Cinema of Aotearoa New Zealand 15 Points
Traces a thematic history of filmmaking in Aotearoa New Zealand from the mid-1980s until the present. Locates a range of films in their historical, social and political contexts by concentrating on issues that arise for a small nation defined by indigenous and settler relations, immigration and globalisation.
Prerequisite: 15 points at Stage I in Media and Screen Studies and 30 points passed
Restriction: MEDIA 313

MEDIA 214 Social Media 15 Points
Addresses issues related to the use of social media and considers in particular the influence of new media corporations such as Facebook, as well as platforms like Twitter, SnapChat, Tinder and YouTube. Explores our cultural practices and social rituals in relation to these peer-to-peer, one-to-many media technologies, and examines this revolution in the media landscape.
Prerequisite: 15 points at Stage I in Media and Screen Studies and 30 points passed, or 30 points in Communication
Restriction: COMMS 204, MEDIA 314

MEDIA 216 Special Topic 15 Points
Prerequisite: 15 points at Stage I in Media and Screen Studies and 30 points passed

MEDIA 217 Special Topic 15 Points
Prerequisite: 15 points at Stage I in Media and Screen Studies and 30 points passed

MEDIA 218 Popular Music on Screens 15 Points
Explores relationships between popular music and visual media, such as film, television and online media. Includes analysis of documentaries, feature films, TV shows, music videos and social media platforms. Themes include stardom, fandom, songs, dancing, music genres, technologies and industries. Texts are situated in debates about music media and power relations marked by class, gender, sexuality, race and ethnicity.
Prerequisite: 15 points at Stage I in Media and Screen Studies, or ANTHRO 106, and 30 points passed
Restriction: MEDIA 323

MEDIA 220 Mockumentary and Docu-Genres 15 Points
Considers the development of mockumentary and fakery in relation to documentary genres. Introduces students to basic concepts related to documentary realism and then explores a range of film and television examples that refer to, subvert, and problematise notions of visible evidence and factuality.
Prerequisite: 15 points at Stage I in Media and Screen Studies and 30 points passed
Restriction: MEDIA 316

MEDIA 221 Action Films 15 Points

Media, Sound and Music
Interdisciplinary scholarship on sound and music media. Topics include: listening and soundscape; noise/music; popular culture; the politics of sound and music; audio technologies; affect, feelings and emotions; identities; stardom, celebrity and fandom; voices; material cultures; audiovisual media; social media; and the political economy of music.

MEDIA 715 30 Points
Visualising Difference
Critically examines the representation of racial and ethnic difference in cinema and broadcast television. This course explores and discusses how difference has been conceptualised in colonial, post-colonial, and multicultural frameworks using examples from the USA, Canada, Australia, and New Zealand.

MEDIA 716 30 Points
Love in/Loving the Cinema
Critically examines the theme of love in the cinema. Looks at why the love story has been such a staple of movie narratives and what films can teach us about love. Also explores the nature of the love of cinema itself, cinephilia.

MEDIA 717 30 Points
Ubiquitous Media
Ubiquitous computing has led to an increasingly mediatised world known as the 'Internet of things'. With the increased use of tags and sensors, the development of smart environments means that communication and information media increasingly shape our world and define our relations with others. This interdisciplinary course interrogates the philosophical, social and political implications of the move from software to 'everyware'.

MEDIA 726 30 Points
Directed Study

MEDIA 729 30 Points
Film Evil
Explores the theme of evil in the cinema. What films can teach about evil and why it is that conceptions of evil - its nature and source as well as distinctions between natural and moral evil - have formed so much of the subject matter of cinema. The course also considers the proposition that some films may themselves be evil.

MEDIA 741 30 Points
Time and the Moving Image
Explores how moving images mediate our experience of time, from the actualities of early cinema to video games and digital special effects. Addresses the representation and articulation of time across documentary and narrative cinema, experimental film and video, television and new media, with reference to key concepts in philosophy and media theory.

MEDIA 742 15 Points
Directed Study

MEDIA 743 30 Points
Chinese Film Genres
Explores the evolution of major film genres of the Chinese-language cinemas (i.e., cinemas of mainland China, Hong Kong, Taiwan and the Chinese diaspora). Investigates the formal styles of such genres as melodrama, youth, avant-garde, and documentary as well as how the changing styles reflect some big issues of sociocultural significances.

MEDIA 746 30 Points
Special Topic: Žižek Through Hitchcock
Slavoj Žižek is known for elaborating psychoanalytic and Marxist theory through the use of film and popular culture. In this course we shall read Alfred Hitchcock's films and Žižek's idiosyncratic citation of them to develop a theory of Žižek's own work. To achieve this, each lesson looks at a film by Hitchcock and explores a key aspect of Žižek's ideas.

MEDIA 748 30 Points
Special Topic: Documentary Making
A hands-on production course in which students produce, direct and edit a 9-12 minute documentary. Emphasis is placed on learning technical and craft aspects of documentary-making informed by the rich and varied tradition of the genre. Students are also required to analyse a series of influential documentaries screened as part of the course.

Pacific Studies
focused on future development, opportunity, mobility, and communal success.  
Prerequisite: 30 points passed  
Restriction: PACIFIC 305

PACIFIC 206  
15 Points  
Pacific Youth: Contemporary Realities in the Pacific Region  
Addresses critical contemporary issues for youth in the Pacific region with a particular emphasis on Aotearoa.  
Throughout this course, issues around health and wellbeing, identities (ethnic, spiritual, gender), education, climate change, artistic expressions, resilience, youth engagement and risk taking behaviours will be examined, and the impacts these have upon Pacific young peoples, their families and their communities will be explored.  
Prerequisite: 30 points passed  
Restriction: PACIFIC 306

PACIFIC 207  
15 Points  
Topics in Pacific Arts  
A survey of traditional Pacific art forms focusing specifically on their histories, significance and socio-cultural functioning within contemporary Pacific diasporas. Art forms covered in this course include Pacific architecture, body adornment, tapa (barkcloth), tivaevae (quilt-making), tatau (tattoo) and weaponry. This course will look at these art forms as part of dynamic living cultures within an ever changing, ever global Pacific. Issues addressed in this course include gender, power, ritual and the impact of new technologies on notions of tradition.  
Prerequisite: 30 points passed  
Restriction: PACIFIC 308

PACIFIC 208  
15 Points  
Gender and the Pacific in a Globalising World  
Gender affects the way identity, culture and wellbeing is experienced and navigated in the Pacific. Moreover, these processes are complicated by emerging cosmopolitanisms that impact gendered bodies, cultures, institutions, nations and states. This course examines the intersections of race, sex, biology, ableism, colonialism, nationality, politics and social movements in our constructions/understanding of gender in a Pacific and global context.  
Prerequisite: 30 points passed  
Restriction: PACIFIC 307

PACIFIC 209  
15 Points  
Pacific Leadership: Navigators of Change  
Pacific leadership has had profound effects on Pacific peoples, playing critical roles in how Pacific societies have responded to the forces of colonisation, Christianity and capitalism. The course will examine Pacific traditional leadership and contemporary leadership in areas such as politics, academia, education, the arts, sports and health, analysing changes and developments.  
Prerequisite: 15 points from PACIFIC 100, 105, 110, or 15 points at Stage I in Education, Anthropology, History, or approval of Head of School or nominee  
Restriction: PACIFIC 309

PACIFIC 210  
15 Points  
Pacific Music and Dance 2  
Instruction in the intermediate music and dance forms of specific Pacific nations. Practical focus on acquisition of fundamental music and dance skills, for example songs, commands, gestures, posture, costumes, discussion of styles, instruments, performer categories and the place of the performing arts in the identified Pacific cultures. Two-four music and dance items will normally be taught during the semester.  
Prerequisite: PACIFIC 110 or 30 points in Transnational Cultures and Creative Practice

PACIFIC 211  
15 Points  
Polynesian Warriors: Sport and Pacific Cultures  
Sport has profoundly impacted Pacific peoples and cultures, playing critical roles in colonialism and education in the past, to migration and commercialisation in the present. Sport has changed Pacific cultures and been changed by Pacific cultures. Pacific cultural encounters with globalisation, race, capitalism, migration and public discourse will be explored through the experience of sport.  
Prerequisite: 30 points passed  
Restriction: PACIFIC 311

PACIFIC 212  
15 Points  
Pacific Indigenous Literatures and Knowledges  
Studies Pacific genres of oral literature in English translation. Genres include oratory, poetry, tales of creation, folk tales, and proverbs and sayings.  
Prerequisite: 30 points passed  
Restriction: PACIFIC 312

PACIFIC 213  
15 Points  
Pacific Wellbeing: Empowering Dimensions  
Examines empowering notions of Pacific wellbeing for Pacific individuals, families and communities. Students explore definitions of Pacific wellbeing and the cultural concepts, models, practices and worldviews that have enhanced the overall positive wellbeing experiences of Pacific peoples across the Pacific region.  
Prerequisite: 30 points passed  
Restriction: PACIFIC 313

PACIFIC 214  
15 Points  
Pacific History: New Zealand in the Pacific from 1900  
Explores the historical relationship between New Zealand and the Pacific from 1900 onwards. Traces the central importance of New Zealand in the history of the Pacific from the rise of New Zealand’s colonial empire, through the world wars, and towards the movement for decolonisation. Examines the continually evolving place of New Zealand as a nation in the Pacific Ocean.

Stage III

PACIFIC 300  
15 Points  
NZ-Born Pacific Identities  
Explores the complex issues of growing up as NZ-born persons of Pacific descent. Examines how their dual or multiple identities affect and interact with their behaviours, priorities, social relationships and their concept of self. The course will use a cross-cultural perspective, exploring ethnic identities of other minorities. The concept of inter-generational ethnic identity will also be considered.  
Prerequisite: 30 points at Stage II in Pacific Studies
PACIFIC 304 15 Points
Advanced Pacific Studies
This is the 'capstone' course for the Pacific Studies major. It is particularly engaged with the theory and methods of Pacific Studies. Different modes of presenting Pacific Studies work, and their relevance for real world applications - from policy papers and briefings to NGO reports - are also explored. The central feature of the course is the large project to be completed by each student, which will combine knowledge taught in this course with original research. Prerequisite: PACIFIC 300 and a minimum B- average at Stage II in Pacific Studies

PACIFIC 305 15 Points
Pacific Innovation and Sustainability
Examines innovation and sustainability of Pacific Peoples in the Pacific and within the Pacific communities of Aotearoa. Explores the adaptability and innovation of Pacific peoples to create sustainable communities that embody both traditional cultural values and identities, and are also focused on future development, opportunity, mobility, and communal success. Prerequisite: 30 points passed at Stage II Restriction: PACIFIC 205

Philosophy

Stage I

PHIL 100
15 Points
Mind, Knowledge, and Reality
Metaphysics deals with fundamental problems about the nature of the world and human beings, for example, questions about the existence of God, the nature of time, the relationship between mind and body and the nature of identity and the self. The theory of knowledge studies the sources, limits and justification of human knowledge and understanding as distinct from opinion or belief.

PHIL 101
15 Points
Introduction to Logic
Logic is the study of argument. This course aims to provide an understanding of central logical notions, such as consistency and inconsistency, logical truth, and, most importantly, what it means for an argument to be valid or invalid, sound or unsound. The course examines two main logical systems, propositional and predicate logic, and shows how these formal systems are used to analyse and evaluate arguments.

PHIL 104
15 Points
Ethics and Justice
How should we live? And how do we live well together? This course examines practical questions of ethics and justice at the personal, professional, social and global levels. The course reflects on these topics in the light of philosophical theories about justice, liberty, rights, and different approaches to ethics that emphasise roles, rules, virtues and consequences.

PHIL 105
15 Points
PHIL 105G
15 Points

Critical Thinking
An introduction to reasoning, argument, and explanation that emphasises the development of practical skills and their use in everyday life. The course introduces different forms of reasoning and explains techniques to evaluate them. It will enable students to distinguish good arguments and explanations from bad ones, to explain the difference, and thereby to improve critical thinking abilities.

Stage II

PHIL 200
15 Points
Philosophy of Mind
There are many philosophical problems concerning mental lives (in particular, human mental lives), how they are constituted, and what makes them possible – problems which have generated a vast literature and diverse important philosophical theories. Theories introduced and critically examined will include dualisms, but will mainly comprise forms of physicalism such as philosophical behaviourism, the identity theory and especially functionalist theories.
Prerequisite: 30 points in Philosophy or 60 points
Restriction: PHIL 320

PHIL 204
15 Points
Greek Philosophy
An introduction to some of the important figures in ancient philosophy and the issues with which they were concerned. The work of the Presocratics, Plato, and Aristotle will be explored, with a detailed discussion of the philosophical system of either Plato or Aristotle and its importance in the history of philosophy.
Prerequisite: 60 points from BA courses at Stage I

PHIL 207
15 Points
Philosophy and Religion
Examines the relationship between philosophy and religion from the perspective of different philosophical and religious traditions. Topics include: the nature of ultimate reality, arguments for and against the existence of God or gods, competing philosophical and religious accounts of life after death, religious pluralism and diversity.
Prerequisite: 30 points in Philosophy
Restriction: PHIL 327

PHIL 209
15 Points
19th-Century European Philosophy
Examines key figures in nineteenth-century European philosophy, including Arthur Schopenhauer, Friedrich Nietzsche, Søren Kierkegaard, and Karl Marx. Considers alternative reactions to the human condition, either by minimising suffering and seeking tranquillity, by embracing the pain that life contains and continuing to struggle for greatness, by aiming to experience one's true individuality, or by working to establish a non-exploitative social community.
Prerequisite: 30 points in Philosophy or EUROPEAN 100 and 15 points in Philosophy
Restriction: PHIL 329

PHIL 216
15 Points
Modal Logic
An introduction to modal logic, which is a variation of the system of predicate logic studied in PHIL 101. Modal logic is well-suited for studying philosophically important concepts such as necessity, time, knowledge, vagueness, action and obligation. It is also used in computer science for studying the behaviour of programs and is recommended as preparation for studying logic at Stage III.
Prerequisite: PHIL 101

PHIL 218
15 Points
Problems in Epistemology
Epistemology is the study of knowledge, rationality, belief and related topics. This course will give an overview of epistemology but will focus on three main issues:
foundationalism versus coherentism, internalism versus externalism and replies to scepticism.

**Prerequisite:** 30 points in Philosophy

**Restriction:** PHIL 338

**PHIL 222 15 Points**

**Intermediate Logic**
Natural deduction for propositional and predicate logic; introductory metalogic and related topics in formal logic.

**Prerequisite:** PHIL 101

**Restriction:** PHIL 201

**PHIL 225 15 Points**

**Power, Critique and Emancipation**
What is power? When are relations of power are legitimate and illegitimate? How is power structured in the modern world? Can illegitimate structures of power be resisted and reorganized to promote justice and human flourishing? This course examines and analyzes cultural, economic, political and epistemological structures of power, including gender, race, and class.

**Prerequisite:** 30 points in Philosophy or 60 points passed

**Restriction:** PHIL 345

**PHIL 226 15 Points**

**Special Topic**
**Prerequisite:** 30 points in Philosophy

**PHIL 228 15 Points**

**Special Topic**
**Prerequisite:** 30 points in Philosophy

**PHIL 231 15 Points**

**Indigenous Philosophy**
An exploration of concepts and ideas from a range of Indigenous philosophies, critically examining these with a view to understanding their theoretical underpinnings, conceptual migrations, and contemporary significance in both local and global contexts.

**Prerequisite:** 30 points at Stage I in Philosophy or 60 points passed

**Restriction:** PHIL 331

**PHIL 250 15 Points**

**Philosophy and the Environment**
Philosophical questions relating to the environment and our use of it, such as the following: Do we have obligations to future generations, especially concerning preservation of the environment? What are our moral and epistemological responsibilities regarding climate change and other environmental issues? Does nature have intrinsic value? Is it better to live in a natural world or a virtual world?

**Prerequisite:** 30 points in Philosophy or 60 points passed

**Restriction:** PHIL 351

**PHIL 260 15 Points**

**Philosophy of Science**
Addresses philosophical questions about science, such as: What distinguishes science from pseudoscience? How is scientific knowledge generated and structured? Should we believe scientific claims about things we cannot directly observe? Do scientific theories give us true accounts of the world? Examines philosophical accounts of science and cases from historical and contemporary scientific research. A background in science is not expected.

**Prerequisite:** 30 points in Philosophy or 60 points passed

**Restriction:** PHIL 360

**PHIL 261 15 Points**

**Metaphysical Structures of the World**
Metaphysics attempts to give a quite general picture of the nature and structure of the world, and particularly investigates philosophical problems which thereby arise. Science, common sense, religions and cultures all presuppose metaphysical worldviews. Traditional metaphysical problems concern laws, causation, time, space, substance, identity, attributes and universals, free will, reality, existence etc. Course topics will be selected from such traditional problems.

**Prerequisite:** 30 points in Philosophy or 60 points passed

**Restriction:** PHIL 361

**PHIL 263 15 Points**

**Philosophy of Biology**
Examines philosophical and conceptual issues in the life sciences. Topics may include the units and levels of selection, adaptationism, the evolution of altruism, biology and ethics, sociobiology and evolutionary psychology, cultural evolution, evolution versus creationism, and the origin and nature of life.

**Prerequisite:** 30 points in Philosophy or 60 points passed

**Restriction:** PHIL 363

**PHIL 268 15 Points**

**Ethical Theory**
Philosophical study of moral theory, in both normative ethics and meta-ethics. Topics covered may include: accounts of well-being such as hedonism, preference theory, and objectivism; theories of right action such as consequentialism and contractualism; the demandingness of morality; the role of intuitions in moral theory; and the status and justification of moral theories.

**Prerequisite:** 30 points at Stage I in Philosophy or any 60 points passed from the BA or 30 points in Global Politics and Human Rights

**Restriction:** PHIL 368

**Stage III**

**PHIL 300 15 Points**

**Directed Study**
A directed reading and individual study course on a selected philosophical topic offered in exceptional circumstances, with the agreement and under the supervision of appropriate staff.

**Prerequisite:** B+ average or higher at Stage III in Philosophy and Academic Head approval

**PHIL 302 15 Points**

**Medieval Philosophy**
A detailed introduction to either the work of a leading medieval philosopher, for example Augustine, Abelard, Scotus or Ockham, or to one or more of the topics which were of interest to medieval philosophers. The course aims to show how understanding medieval philosophy is essential for the history of Christian thought and philosophy up to modern times.

Prerequisite: 15 points at Stage I in Politics and International Relations

An introduction to the study of international relations. The focus is on how international organisations, states and non-state actors raise and address global challenges such as security and human insecurity, humanitarian intervention, global trade and finance, development and poverty, environmental degradation, war, and peace processes. The course is informed by and introduces a range of international relations theories.

Explores the role of media in cases of modern conflict, genocide, and peace processes. Through case studies, the course examines media structure, content, framing and psychological responses during times of conflict and peace-making, and how media informs audiences and either foments or quells conflict. Prerequisite: 30 points at Stage I in Communication, Media and Screen Studies or Politics and International Relations

An introduction to understanding who governs New Zealand and in whose interests. Topics include national identity, institutions of government, leadership, voting and elections, the place of Māori within the political system, parties and political participation. The course draws on current research in NZ politics and provides knowledge that can be applied to a variety of careers, including law, business and public service.

An examination, via the works of selected major European thinkers from Ancient Greece to nineteenth-century Britain, of ideas central to the western tradition of political thought: justice, law, liberty, power, rights, citizenship, the rights of women, and the right to resist governments. Thinkers studied include Plato, Machiavelli, Hobbes, Locke, Rousseau, Wollstonecraft, Mill and Marx.

What should the state do and what should it keep out of? Focussing on key debates in modern political theory, topics will vary year from year and may include political authority and the rule of law; freedom, coercion, and manipulation; indigenous rights and the welfare state; paternalism; the ethics of war, global justice and feminism. Prerequisite: 15 points at Stage I in Politics and International Relations and 30 points in the BA

An introduction to the study of international relations. Prerequisite: 30 points at Stage I in Politics and International Relations, or POLITICS 106 and ASIAN 100, or CHINESE 130 and ASIAN 100

An introduction to China's domestic politics, emphasising changes since 1978. The course explores topics such as political succession; the cadre system and political decision-making at the central, provincial, and local levels; economic development; popular religion and the state; NGOs and the non-state sector; nationalism and ethnic diversity; the role and relevance of ideological legacies; and institutional innovation and authoritarian survival. Prerequisite: 30 points at Stage I in Politics and International Relations, or POLITICS 106 and ASIAN 100, or CHINESE 130 and ASIAN 100

Focussing on key debates in modern political theory, topics will vary year from year and may include political authority and the rule of law; freedom, coercion, and manipulation; indigenous rights and the welfare state; paternalism; the ethics of war, global justice and feminism.

15 Points  
Considers the intersection between theory, policy, and problems in health. Topics include: defining health and its value; the role of government and markets in providing health care; allocating resources in a government health system; justice, inequalities, and health; coercion to control the spread of disease, whether caused by pathogens (e.g., pandemic influenza) or lifestyle.

POLITICS 746  
**Global Organisations and Governance**  
15 Points  
Analyses the roles of international organisations in world affairs. Examines the origins and development of international organisations as well as their types and functions. Discusses the participation of states in these organisations. Explores the multilateral approach to such global issues as peace and security, trade and finance, environmental protection, human rights, public health, oil security, and others.

POLITICS 750  
**International Relations and Human Rights**  
15 Points  
An analysis of how governments adopt and implement human rights norms, negotiate human rights treaties with other governments, interact with United Nations human rights institutions, and set up courts to try human rights violations. Includes domestic politics as they bear on international human rights issues.

POLITICS 756  
**New Zealand Government**  
15 Points  
An examination of the composition, functions and powers of New Zealand’s political institutions under MMP. Analyses the extent to which factors such as political leadership, policy, electoral and parliamentary tactics, and relations between the major and minor parties contribute to a government’s success.

POLITICS 757  
**Comparative Public Policy**  
15 Points  
A comparative examination of policy actors, processes and outcomes. Engaging with a range of conceptual and methodological approaches, the course considers how we might explain and understand cross-national similarities and differences in policy-making and policy outcomes. The course focuses on the relative importance of interests, institutions and ideas at the national level, as well as international contexts and actors that facilitate diffusion and transfer of policy across countries.

POLITICS 768  
**Economic Statecraft: Power, Politics and Resources**  
15 Points  
An examination of how governments, particularly the United States, New Zealand, and selected European states, decide upon and conduct their international economic policies. Topics to include bilateral and multilateral trade negotiations and disputes, trade remedies and economic sanctions, controversies surrounding aid, investment, tourism and intellectual property, and reactions to globalisation. Multilateral agreements and institutions such as the WTO, and bilateral free trade agreements, will be analysed from a political perspective.

POLITICS 770  
**Ethnic Conflict and Civil War**  
15 Points  
Students examine the comparative literature on civil war, mass killings and conflict prevention, and apply this scholarship to past and contemporary cases of violent conflict. In doing so, they learn to carry out two policy-relevant tasks: identify common causes of violence and assess which policies of prevention work best in different contexts.

POLITICS 771  
**Democratisation**  
15 Points  
Examines on-going trends, causes and problems in the spread of democracy worldwide. Topics covered include the economic and social preconditions for democratisation, actor-based models of regime transition, institution-building in new and weak democracies, the role of the international community in promoting democracy, and the rise of competitive authoritarian and hybrid regimes.

POLITICS 774  
**Politics-Policy Internship**  
30 Points  
Prerequisite: Programme Coordinator approval  
Restriction: POLICY 737

POLITICS 775  
**Special Topic**

POLITICS 776  
**Media and Politics in an Age of Globalisation**  
15 Points  
Explores the relationship between media and politics, domestically and internationally, within a changing global context. Students will critically engage with key theories in political communication scholarship, such as agenda-setting, priming, framing, silencing and informational effects within the new media dynamics, which includes multiple new media outlets (such as state and private media), platforms, technologies and faster delivery.

POLITICS 777  
**Politics of Terrorism and Counterterrorism**  
15 Points  
Provides students with a critical understanding of terrorism and counter-terrorism politics, policy and practice in a globalised world. The course examines theories, causes, typologies and case studies of terrorism, as well as counterterrorism responses by states and the international community. It also engages with moral, ethical and political questions posed by the discursive battleground of terrorism and counterterrorism.

**Prerequisites and Restrictions**

- POLICY 741: Government and Policy: New Zealand Compared
  - Examines New Zealand’s machinery of government at both central and local level. Analyses the relative impact of institutions, interests and ideas on public policy outcomes in New Zealand and internationally. Applies these understandings to the methods and processes associated with policy transfer and lesson drawing cross-nationally.
  - Restriction: POLICY 756, 757

- POLICY 742: Statistics and Data Analysis for Policy
  - Provides the fundamentals of statistical analysis and examines the use of different types of data used in evidence-based policy making, as well as the issues associated with the advent, use and governance of big data. Covers research design choices and quantitative methods for policy analysis.
  - Restriction: POLICY 769, POLICY 769

- POLICY 743: Economics, Budgets and Bureaucrats
  - Applies key concepts and tools of economic analysis to contemporary policy problems. Focuses on the allocation of the economy’s resources, the budget process and the role of public finance agencies, rationales for government intervention in a market economy, and the impact of expenditure and taxation on the economy and citizens’ wellbeing.
  - Restriction: POLICY 769, POLICY 769

Screen Production

Postgraduate 700 Level Courses

SCREEN 700 30 Points
Screenwriting Project
Considers the short film script with a focus on the practice and principles of dramatic screenwriting, including industry format and narrative structure. By developing a script for a 5-8 minute film in stages, students will practice creative writing, script development, and pitching while also learning skills related to production management, proposal writing, and preparing and scheduling a low-budget production.
Restriction: SCREEN 702, 705

SCREEN 701 30 Points
Introduction to Directing
Provides students with a practical overview of the drama and documentary production process from a director’s point of view. Students are taken through pre-production, production and post-production on a series of group projects, as well as their own 2-minute short film. Emphasises the importance of directing style, character and story alongside acquiring practical skills. Students are encouraged to critique their own work as well as the work of their classmates.

SCREEN 709 15 Points
Directed Study

SCREEN 710 15 Points
Special Topic

SCREEN 711 15 Points
Special Topic

SCREEN 712 30 Points
Advanced Drama Directing
Focuses on the directing of actors for screen, and the relationship between this and blocking for camera. Students direct in front of the class and create a short piece of work as a group using improvisation. Students first focus on directing and presenting a 10-minute excerpt from a play and then direct and edit an original dramatic short film of 8-10 minutes. Crewing on fellow students’ projects is a compulsory requirement.
Prerequisite: SCREEN 701

SCREEN 713 30 Points
Advanced Documentary Directing
Students complete a major treatment/script, an interview exercise, an editing exercise, and a completed documentary of 10-12 minutes. For the latter project, the course convener functions like an executive producer, overseeing and critiquing the documentaries as they progress. Emphasis is placed on aesthetic and formal approaches to the documentary and the class will draw extensively on documentary history.
Restriction: COMMS 713

SCREEN 714 30 Points
Screenplay Writing and Development
A practical course in which students work on original features and analyse the work of writers. Students develop a better sense of structure, plot, characters, dialogue, genre and understand the dynamics of constructive feedback and rewriting, known in the screen industry as the ‘development process.’ Combines lectures and workshops and builds upon SCREEN 700.
Prerequisite: SCREEN 700 or 705 or approval of Programme Director

SCREEN 715 30 Points
Directed Study
Directed research on a selected topic.

SCREEN 716 30 Points
Research Project - Level 9

SCREEN 792 60 Points
Dissertation - Level 9

SCREEN 797A 60 Points
SCREEN 797B 60 Points
Production Project - Level 9
The production of a substantial project in which the student specialises as director, writer, or producer completing either a documentary (approximately 30 minutes), a short dramatic film (approximately 10-15 minutes) or a feature length screenplay (80-110 pages). Students are required to attend a seminar series conducted by academic staff and industry practitioners in Semester One. Crewing on fellow students’ projects is also required.
Prerequisite: Approval of Academic Head or nominee
To complete this course students must enrol in SCREEN 797 A and B

Social Science for Public Health

Stage II

SOCSCIPH 200 15 Points
Social Science for Health
Explores diversity in health knowledges, offers an overview of current health trends and systems with special focus on New Zealand and the Pacific, examines the contributions of social science disciplines to analysis of health including key theoretical approaches, and applies interdisciplinary analytical models to health.
Prerequisite: 30 points at Stage I in Health Social Sciences or Social Science for Public Health, or 60 points passed
Course Prescriptions

2024 Calendar Faculty of Arts

Stage III

SOCSCIPH 300 15 Points
Current Debates in Health and Health Policy
Examines the recent histories of central intellectual debates in health and health policy and their relevance for and in the New Zealand and Pacific contexts. These may consist of the following: the 'medicalisation' of social issues, the 'socialisation' of medical issues, cross-national health policy analysis, the rationing of health resources (global and local perspectives), defining and measuring health outcomes (accountability and responsibility in health service delivery), health service management (medics or managers).
Prerequisite: SOCSCIPH 200

Social Science Research Methods

Stage II

SOCSCRES 200 15 Points
Mixing and Matching Methods
Explores methods and methodologies from both qualitative and quantitative traditions (interviewing, participant observation, forms of textual analysis, genre studies; as well as, surveys, content analysis, material trace analysis, statistical approaches. Focuses also on approaches to research that combine qualitative quantitative methods.
Prerequisite: SOCSCRES 100 or 60 points passed
Restriction: SOCIO 201

SOCSCRES 300 15 Points
Working with Numerical Data
Intensively studies collection, access and analysis of statistical data. The course will extend competencies in the use of statistical analysis, as well as examining digital and technologically-mediated environments that produce big data. A key focus will be in the transformation of data generated and collected by a range of public and private stakeholders to material amenable for contemporary social science research.
Prerequisite: SOCSCRES 200 or 30 points at Stage II from BA courses
Restriction: ANTHRO 309

SOCSCRES 301 15 Points
Skills in Qualitative Research
Intensively studies the methods and methodologies of qualitative research (e.g., indigenous, Pacific, feminist), as well as current debates. Examines issues raised when studying people, communities and cultures, and considers archival, digital and other innovations in collecting and representing data. It explores a wide range of methods used to collect and analyse qualitative data, for example, interviews, focus groups, participant observation, and thematic analysis.
Prerequisite: SOCSCRES 200 or 30 points at Stage II from BA courses

Stage I

SOCIO 100 15 Points
Issues and Themes in Sociology
Introduction to sociology as a discipline and a review of some of its internal debates. Topics include: social class, gender, globalisation, power, sexual identity and family. Draws on material from a range of societies.

SOCIO 101 15 Points
SOCIO 101G 15 Points
Understanding Aotearoa New Zealand
Provides an introduction to the sociological analysis of New Zealand society. Looks at familiar events, institutions, social processes from a sociological point of view and offers ways to understand them in new and different ways. Focuses on the structure of New Zealand society and on social and political changes which affect the lives of New Zealanders and shape their society.

SOCIO 103 15 Points
Aotearoa New Zealand Social Policy and Social Justice
Provides an overview of key contemporary social policy issues within the context of globalising economic processes and continuing gendered and racialised divisions. Discusses the way in which debates around social policy are constructed and the implications this has for social justice. Case studies may include food and health, technology, indigeneity and children.

SOCIO 105 15 Points
Cultural Studies and Society
A cultural studies approach to social life focuses on the way we experience the world, taking account of what we see, what we hear, what we consume and how we communicate. Sociological theory will be explored through investigating different cultural forms including film, advertising, art, social media, sport, and video games.

SOCIO 200 15 Points
Sociological Theory
Aims to map the social condition through theorists who also emphasise the need to transform it. Focuses on material existence, how it is interpreted through language and the investment of people in oppressive regimes, ideologies and discourses. Develops critical perspectives on the intersections of class, race, gender and sexuality.
Prerequisite: 30 points at Stage I in Sociology or 15 points at Stage I in Sociology with a minimum B+ pass

SOCIO 203 15 Points
Social Reality and Ideology
Sociologists construe ideology as ideas that conceal social inequalities. This course explores the meaning of ideology and some of its related concepts, such as hegemony, discourse, and subjugation. It then critically analyses some of the most pervasive contemporary ideologies. Although not exhaustive, examples include beliefs about personal responsibility, corporate job creators, faith in technology, and crime and deviance.
Prerequisite: 60 points passed from BA courses

SOCIO 204 15 Points
Special Topic: Social Control
Analyses the means by which different institutions, groups and individuals control the actions, behaviours and thoughts of people in contemporary modern societies, including our own. Discusses controllers, their targets, the mechanisms they employ, the goals they seek to accomplish, and the means by which people resist. Prompts students to reflect how controlling processes have affected their everyday life.
Prerequisite: 30 points at Stage I in Sociology or 15 points at
SOCIOL 205
Special Topic: Sociology of Subcultures
Through consideration of sociological theory from the Chicago School, British Cultural Studies, and postmodernism, this course investigates marginal, non-normative, and socially deviant group formations considered as 'subcultural'. This will include critical consideration of the social, economic, and political dynamics in which specific group practices and identities of subcultures such as ravers, punks, and skaters take shape in capitalist society.
Prerequisite: 30 points at Stage I in Sociology or 15 points at Stage I in Sociology with a minimum B+ pass
Restriction: SOCIOL 225

SOCIOL 207
Sociology of Gender and Families
Focuses on the interrelationships between gender, sexuality, and families in New Zealand and other Western societies. Through an examination of important moments in the life course of families – for example, partnering and parenting – it explores changes and continuities in the gendered norms, identities, practices and patterns that characterise contemporary family life.
Prerequisite: 30 points in Sociology or Gender Studies or 60 points passed
Restriction: SOCIOL 214, SOCIOL 222

SOCIOL 208
Economy and Society
Examines the changing relations between work and life outside of paid employment. Particular attention is paid to new forms of expropriation that profit from claiming private ownership of collective effort, ideas and cultural forms. These developments are crucial to understanding and contesting social inequality, globalisation, organisational restructuring and new technologies. Course material is drawn from international literatures and is grounded in an understanding of contemporary New Zealand.
Prerequisite: 30 points at Stage I in Employment Relations and Organisational Studies or Sociology or 15 points at Stage I in Sociology with a B+ or higher, or 30 points in International Relations and Business

SOCIOL 210
Colonisation, Globalisation and Social Justice
Charts the political, economic, cultural and ecological consequences of imperialism, colonisation, globalisation, aid and development, up to and including the IMF/World Bank's neoliberalism and structural adjustment programme. It pays particular attention to violence (physical, psychological and ideological), environmental consequences and health impacts in these contexts.
Prerequisite: 30 points at Stage I in Sociology or Employment Relations and Organisational Studies, or 15 points at Stage I in Sociology with a B+ or higher, or 30 points in Global Politics and Human Rights, or 30 points at Stage I in BC courses

SOCIOL 211
Sociology of Popular Culture
Popular culture appears to be everywhere, but what political and social effects might all this popular entertainment have on us? This course seeks to answer such questions through a sociological interpretation of popular culture as both an indicator of social change and as a location of meaning and significance. Topics include reality TV, celebrities, consumption, music, and technology.
Prerequisite: 30 points at Stage I in Sociology, or 15 points at Stage I in Sociology with a B+ or higher, or 30 points from COMMS 100, FTVMS 100, 101, MEDIA 101, or 30 points from Comparative Literature

SOCIOL 213
Ethnicity and Identity
Charts the development of the concepts of racial, national, ethnic and indigenous identities in relation to the histories of modernity and colonisation and then uses these concepts to analyse a range of contemporary issues of identity and belonging.
Prerequisite: 30 points at Stage I in Sociology or 15 points at Stage I in Sociology with at least a B+ average or 30 points at Stage I in Global Studies with at least a B+ average, or 90 points passed

SOCIOL 228
Special Topic

SOCIOL 229
Environmental Sociology
Environmental sociology provides insight into the complex social processes that define, create and even threaten our natural environment. This course gives tools with which to think sociologically about environmental issues, such as understanding how environmental issues come to be seen as environmental problems, and how political, cultural, and economic factors have come to shape our interaction with the natural environment.
Prerequisite: 30 points at Stage I in Sociology, or 30 points from ENVSCI 101, 201, GEOG 102, 205, or COMMS 102 and 15 points from ENVSCI 101, SOCIOL 100

SOCIOL 300
Feminist, Anti-Colonial and Post-Capitalist Technofutures
Introduces students to theoretical approaches for understanding the social, material and power (political) dimensions of science and technology, as well as practical approaches for imagining and enacting more ethical, equitable, collaborative and anti-colonial technofutures. Topics studied include: science, technology and social theory; feminist, anti-colonial and post-capitalist approaches to science and technology; translating knowledge to engage public audiences.
Prerequisite: 30 points at Stage II in Sociology, or 30 points from ENVSCI 101, 201, GEOG 102, 205, or COMMS 102 and 15 points from ENVSCI 101, SOCIOL 100
Restriction: SOCIOL 311

SOCIOL 301
Critical Theory and Society
Critical theory seeks to understand the multiple contradictions of society and to offer roadmaps for progressive social change. This course explores foundational ideas in the tradition of critical theory and in contemporary critical thought. Critical theories are situated in the social and historical contexts from which they arise and are scrutinised for their relevance to contemporary struggles for social justice.
Prerequisite: SOCIOL 200 or 30 points above Stage I in BA or Global Studies courses

SOCIOL 305
Special Topic
SOCIOL 307
The Pacific in the World
15 Points
Brief history of post Second World War theories of economic development and modern world systems. Explores Pacific responses to world systems such as colonisation, capitalism, globalisation and militarisation. Examines Pacific relations with colonial and imperial powers such as Aotearoa New Zealand, Britain, and US. Analyses the limitations of world systems models.
Prerequisite: 30 points at Stage II in Global Environment and Sustainable Development or Sociology

SOCIOL 309
Migration, Borders and Displacement
15 Points
Examines the relationship between national borders and international migration alongside an exploration of critical theories of the drivers, management and experience of displacement. Particular attention is paid to representations of migration, political and policy responses to migration, and patterns of involuntary, labour, lifestyle and educational migration.
Prerequisite: 30 points at Stage II in Global Politics and Human Rights or Sociology

SOCIOL 310
Researching Social Problems
15 Points
Develops skills in integrating theory and methods so that students can critically engage with social problems using a sociological lens both inside and outside the university.
Prerequisite: 30 points at Stage II in Sociology or 60 points passed at Stage II from BA courses

SOCIOL 315
Law, Inequality and the State
15 Points
Examines, in a comparative mode, how law as a set of social relations and categories can both create and remedy inequalities of gender, race, and class.
Prerequisite: 30 points at Stage II in Sociology or 15 points from CRIM 201, 202 or 30 points at Stage II in Global Politics and Human Rights
Restriction: SOCIOL 215

SOCIOL 316
Critical Theories of Schooling
15 Points
Compulsory schooling in western society has traditionally seen as a significant instrument of socialisation, progress and economic advancement for young people. The course will engage students in ideas which challenge this view by drawing on critical theories such as Labelling, Marxist, Foucauldian, and Anarchist theory, and exploring topics including colonialism, patriarchy, racism, and the social control of youth.
Prerequisite: 30 points at Stage II in Sociology

SOCIOL 318
Sociology of the Media
15 Points
An exploration of the relationship and patterns of interaction between media, culture and society through an examination of the print and broadcasting media, and advertising in New Zealand.
Prerequisite: 30 points at Stage II in Sociology, or Media, Film and Television, or Communication

SOCIOL 322
A Sociology of Relational Life
15 Points
Introduces students to new developments in sociology by examining the significance of our relationships to others: intimate partners, friends, acquaintances, and even pets. The course considers the ways relationships are embedded in life through everyday practices, sharing photographs, and telling stories. In so doing, it engages with contemporary debates about the rise of individualism and the decline of family life.
Prerequisite: 30 points at Stage II in Sociology

SOCIOL 326
Sociology of Violence and Death
15 Points
Drawing on writings from a variety of intellectual traditions, this course explores the contested nature of violence through an examination of a number of contemporary debates about the causes, agents, consequences, as well as responses to and interventions in, incidents of violence.
Prerequisite: 30 points at Stage II in Sociology, or 15 points at Stage II in Sociology and CRIM 201 or 202, or 30 points at Stage II in Health and Society

SOCIOL 330

Postgraduate 700 Level Courses

SOCIOL 700
Advanced Sociological Theory
30 Points
Explores gender and sexuality through theories influenced by Marx and Freud. Deleuze (with Felix Guattari) and Lacan are typically used to problematise the relationship of the subject to the capitalist patriarchy. Draws on feminist, queer and trans theory. Scope to research on alternative themes such as race.
Restriction: SOCIOL 733

SOCIOL 701
Advanced Skills in Research
30 Points
Examination of sociological issues in research design, execution, analysis and interpretation. Particular attention is paid to computer assisted data and benefits of employing multiple methods.
Restriction: SOCSRES 702, 703

SOCIOL 703
Sociology of Mental Health
30 Points
Interrogates advanced sociological theories of medicine and psychiatry, investigating mental health interventions as social, economic, cultural and political projects. Key issues will include The Enlightenment and theories of the self, the rise of science and the ‘psy’ professionals, institutionalisation and community care, current
sociological theories of mental health, the medicalisation of everyday life, and gender, race and mental illness.

Sociology 706
Special Topic: The Sociology of Disasters
Disasters are increasing in scale, cost, frequency and severity. This course examines their causes and consequences and considers their future avoidance. In doing so it draws on social theory, Science and Technology Studies, and broad literatures on disaster. Topics include: the risk society thesis, the social patterning of disasters, and the political economy of disasters (disaster capitalism).

Sociology 707
Special Topic: Governing Population and Society
Explores the relationship between population, state and society with a particular emphasis on the settler colonial and post colonial context of Aotearoa New Zealand and the South Pacific. Social theories of biopolitics, gender, racism and technology are examined in order to develop critical insights into population ‘problems’ of migration, borders, fertility/mortality, citizenship and diversity.

Sociology 709
Special Topic: Sociology of Universities
Interrogates the purpose of a university from a sociological lens. Explores how the university is imagined and the different social drivers that guide the ‘purpose’ of a university. Topics include non-performative diversity, the university as a site for ‘cultural wars’, the neoliberal university, critic and conscience and academic freedom.

Sociology 710
Special Topic: Environmental Justice and Environmental Crimes
An advanced study of sociological and green criminoLOGY approaches to environmental harms that illuminates the complex social processes that creates them. This course critically analyses phenomenon that harms humans, non-humans and the environment. Examines the complex political, cultural, economic factors, and social factors contributing to them, as well as the social responses to address these problems.

Sociology 713
Sociology of Law: Human Rights
Examines recent developments in the sociology of human rights within the study of law and society. Sociological thinking can offer a critical examination of international rights thought and practice, addressing the place of rights discourse in law and literature, feminist issues, indigenous rights, the place of rights in critical race theory and for refugees.

Sociology 718
Research Projects: Design and Practice
Explores some of the major principles of research design and practice before discussing particular methods of research. Students will work through problem definition, literature review, and research design. Both ‘empirical’ and ‘theoretical’ projects will be encouraged.

Sociology 728
Family, Gender and the State
The influence of changing ideologies of mothering, fathering, family and work, as well as the political forces and pressure groups that promote them, on both the development and restructuring of social and legal policies in several industrialised nations, including New Zealand.

Sociology 735
Current Debates in Gender and Sexuality
Traces contemporary sociological debates in the analysis of gender and sexuality. This includes reference to feminist concerns with identities, differences, bodies, power and agency. These issues are taken up and explored through an examination of practices enacted on/or through sexed bodies.

Sociology 737
Special Topic

Sociology 738
Directed Study

Sociology 739
Directed Study

Sociology 740
Modern Times, Modern Crimes
Sociology sees itself as being centrally concerned with the question of modernity. However, until recently, it has avoided active scholarly engagement with modernity’s underbelly: war, genocide and torture. This course argues that rather than appearing as peripheral aberrations they are central to the project of modernity. Special attention will be paid to the roles played by science and technology in the production of inhumanity.

Sociology 742
Deviance and Social Control
Examines cultural, medical and sociological explanations of deviant behaviour. Particular attention is given to the manner in which social control has historically functioned in relation to race, class, gender, colonialism and sexuality, and the means by which individuals and groups have been politically, socially and culturally marginalised.

Sociology 743
Special Topic

Sociology 745
Sociology of Science and Technology
Starting from the premise that science is a social phenomenon, this course investigates how science is shaped by norms, institutions, beliefs and other social forces. It asks students to consider how the human world affects science, and how science affects the human world.

Sociology 746
Settler Societies and Indigenous Peoples
Critically examines settler colonialism and the contemporary politics and practices of recognition and reconciliation between indigenous and settler peoples in Aotearoa New Zealand, Australia, Canada and the USA. The course examines the literatures on settler colonialism and contemporary practices of recognition and apology, as well as the work of courts, tribunals, governments and indigenous communities across these four societies.

Sociology 748
Critical Theory and Social Change
Investigates the social forces and forms of thought currently producing progressive social change out of the contradictory realities of the existing social situation. Considers the immanent possibilities for radical change at the present moment of late capitalism, the grounds on which social change might be justified and the practical steps that might be taken to realise them.

**Tertiary Foundation Certificate Pacific Studies**

**Foundation Courses**

TFCPAC 91F 15 Points

**Foundation Pacific Studies**

Introduces students to an essential knowledge of the Pacific and its cultures and peoples, and to the core practices and concepts of interdisciplinary Pacific Studies. This course will provide a foundation of knowledge of Pacific cultures, languages, history, geography and politics, and introduce students to some core Pacific Studies concepts (such as fa’aalo’alo/faka’apa’apa, diaspora, Oceania, identity, and culture). Students will gain familiarity with the history and purposes of Pacific Studies and work with some accessible forms of indigenous Pacific knowledge.

---

**Tertiary Foundation Certificate Sociology**

**Foundation Courses**

TFCSOCIO 91F 15 Points

**Foundation Sociology 1**

Introduces students to fundamental building blocks in sociology. Students develop familiarity with key sociological concepts that explain social inequalities, enabling them to think sociologically about this issue. In particular, students learn how social structures (for example, class, race/ethnicity, gender and sexuality), social institutions (for instance, the state) as well as interactions between people produce and sustain various forms of inequality.

TFCSOCIO 92F 15 Points

**Foundation Sociology 2**

Focuses on Aotearoa New Zealand as a multicultural nation produced through colonisation and subsequent waves of migration. Using a range of case studies, the course highlights the role of different cultural norms and values in creating diverse experiences of living in Aotearoa New Zealand. Such divergent realities invite reconsideration of what it means to be a ‘New Zealander’.

**Stage I**

THEOREL 101 15 Points

THEOREL 101G 15 Points

**The Bible and Popular Culture**

An exploration of biblical themes, images, and metaphors in contemporary film, music and cultural arts through which
religion and culture intersect. It develops tools appropriate for analysing popular culture, as it moves from the local to the national to the global. 

Restriction: THEOLOGY 101, 101G

THEOREL 102 15 Points

Studying Religion: An Introduction
Introduces students to some of the central issues, questions, and debates in the contemporary study of religion. It guides students through a series of case studies, each focusing on a particular topic pertaining to religion, and introduces them to ways of thinking about these topics in an informed and critical way.

THEOREL 106 15 Points

Islam and the Contemporary World
Since the religion of Islam has become a very significant aspect of contemporary global and local societies, this course seeks to introduce students to an understanding of key aspects of Islam and an analysis of its significant contribution to New Zealand society as well as to societies and cultures across the world.

Restriction: THEOLOGY 106, 106G

Stage II

THEOREL 200 15 Points

A Major Religious Thinker
In-depth study of a figure whose thought has had a major impact on the development of one or more religious traditions. It includes the critical study of selected texts by the chosen thinker (where these have survived), and of texts and traditions related to the thinker. The figure chosen reflects the research interests of current staff. 

Prerequisite: 30 points at Stage I

Restriction: THEOREL 300

THEOREL 201 15 Points

Religions in New Zealand
An exploration of living religions in contemporary New Zealand, surveying the beliefs, traditions and practices that are central to religious groups in New Zealand and their interactions with contemporary culture both locally and globally. The course will introduce students to the comparative study of religion, engaging in such topics as religion and ritual, exploring belief, and interfacing dialogue. 

Prerequisite: 15 points at Stage I in Theology or from the BA Schedule, or approval of Academic Head or nominee

Restriction: THEOLOGY 201, THEOREL 320

THEOREL 202 15 Points

A History of the Apocalypse
An 'apocalypse' is a divine revelation about the shape of history. It is written for a society in crisis, often describing that society's collapse before the coming of a better world. This course traces the development of apocalyptic thought in the religions of the West, from the ancient Middle East through to apocalyptic thought in modern cultures. 

Prerequisite: 30 points at Stage I

Restriction: THEOREL 302

THEOREL 206 15 Points

Religion in Film and Television
Explores the ways that religious themes, myths, and imagery are expressed within the narratives of some classic and contemporary films and television dramas. Students will learn skills to identify the articulation of religious beliefs, narratives, and the sacred or transcendent within the medium of film and television, and to discuss critically this cultural engagement with religion. 

Prerequisite: 30 points at Stage I

Restriction: THEOREL 306

THEOREL 208 15 Points

Special Topic in Theological and Religious Studies
Study of a particular theme, religious tradition or set of texts from within the discipline of Theological and Religious Studies.

Prerequisite: 30 points at Stage I from BA Schedule

Restriction: THEOREL 308

THEOREL 209 15 Points

Religious Texts of Terror
Explores the ways that various forms of violence are evoked and discussed within religious texts and traditions. Students will learn about the origins of these ‘texts of terror’, and then trace their ongoing influence throughout history and up to the present day across a range of socio-cultural contexts, both global and local.

Prerequisite: 30 points at Stage I from the BA Schedule

Restriction: THEOREL 301

THEOREL 210 15 Points

Religion, Trauma and Suffering
An exploration of how recent insights into trauma and suffering intersect with theology and religion. Students will learn about ways in which religious narratives and practices have contributed to trauma and suffering, as well as possibilities for resistance and relief. The course will include engagements with trauma and suffering across a range of contexts.

Academic Integrity

ACADINT A01 0 Points

Academic Integrity Course
An online course designed to increase student knowledge of academic integrity, university rules relating to academic conduct, and the identification and consequences of academic misconduct. Students work through a series of modules, outlining scenarios that they may encounter while studying at university. Each scenario provides information on relevant rules, resources and expected behaviour.

Accounting

Stage I

ACCTG 101 15 Points

Accounting Information
Business decisions require accounting information. This course examines the analysis and interpretation of general-purpose financial statements. It assesses financing and investment decisions and covers the role of accounting information to support planning and control.

ACCTG 102 15 Points

Accounting Concepts
Basic principles and concepts of accounting that underlie the production of information for internal and external reporting. This course provides the technical platform for second year courses in financial and management accounting, finance, and accounting information systems. Prerequisite: ACCTG 101 or BUSINESS 114

ACCTG 151G 15 Points

Financial Literacy
People who understand the basic principles of finance are likely to get much more mileage out of their money – whether spending, borrowing, saving or investing – than those who do not. Develop an understanding of how to be in control of spending and saving; understand borrowing; make informed investment decisions; know broadly what to insure and what not to; recognise scams and consider whether money is the key to happiness.

Restriction: May not be taken by students with a concurrent or prior enrolment in Accounting or Finance courses

Stage II

ACCTG 211 15 Points

Financial Accounting
The study of financial accounting principles within New Zealand, to enable students to: (i) understand how they are developed and influenced; (ii) understand and apply New Zealand Financial Reporting Standards; (iii) report the results of complex business structures involving multiple entities and segments. Completing students will understand the role financial statements play in investment, analysis and contracting decisions, providing a base for advanced study and supporting other areas, particularly finance. Prerequisite: ACCTG 102

ACCTG 221 15 Points

Cost and Management Accounting
Budgets and standards, costing systems, cost information for decision-making and control, performance appraisal, and contemporary related issues. Prerequisite: ACCTG 102

ACCTG 222 15 Points

Accounting Information Systems
Encompasses the development and distribution of economic information about organisations for internal and external decision-making. Major themes include: objectives and procedures of internal control, the database approach to data management, data modelling, typical business documents and reports and proper system documentation through data flow diagrams and flowcharts. Prerequisite: ACCTG 102, INFOSYS 110

Stage III

ACCTG 300 15 Points

Directed Study

ACCTG 311 15 Points

Financial Accounting
An introduction to the audit of financial statements. The objective of an audit is to add credibility to the information contained in the financial statements. Emphasises the auditor’s decision-making process in determining the nature and amount of evidence necessary to support management’s assertions. The end result of a financial statement audit is a report that expresses the auditor’s opinion on the fair presentation of the client’s financial statements. Prerequisite: ACCTG 211 or 292, and INFOGMT 296 or 294 or ACCTG 222

Develops skills for navigating the complex and changing workplace, to enable students to lead organisations positively, during uncertainty. Topics covered include leadership mindsets, leadership influence and leading in complex, changing environments. Draws on a range of theoretical backgrounds including psychological and management theories, and combines both international and Aotearoa leadership perspectives.

BUSMBA 721  
**Te Ao Māori Business**  
Investigates how to integrate Māori values into contemporary business practices through examining governance, tikanga, and the Māori economy. Emphasis is placed on sustainability, societal well-being, and principles like kaitiakitanga, social purpose, and long-term planning.

BUSMBA 722  
**Aotearoa NZ’s Unique Legal Landscape**  
Evaluates how New Zealand’s unique history shapes our legal and political environment, exploring how businesses can influence future policy and law-making. Through the lens of key areas of commercial law, business leaders learn to identify and critically evaluate significant business constraints and opportunities, thereby enabling more effective decision-making in both domestic and international contexts.

BUSMBA 723  
**Strategy in Dynamic Markets**  
Explores strategic approaches to sustainable growth in a VUCA (volatility, uncertainty, complexity, and ambiguity) world, focussing on problem-solving, effective positioning in existing markets and shaping of new markets. Develops skills to devise and implement strategies at organisation, ecosystem and market levels in uncertain and complex contexts. Practical examples are used to reinforce climate mitigation and circular economy practices to face and embrace 21st-century challenges.

BUSMBA 724  
**Navigating the Economic Environment**  
Develops analytical and critical thinking skills in contemporary economic issues, both international and domestic, including national goals, productivity growth, money and inflation, inequality, and the genesis of financial crises. Micro-economic skills in the theory of the firm, competition, and supply and demand are also covered. Practical insights are gained into international economics and domestic issues such as the Māori economy.

BUSMBA 725  
**Accounting & Finance**  
Develops finance and accounting skills covering topics such as interpreting financial statements, risk management, valuation techniques, financing, international finance, and fintech. Using case studies and real-world examples, students will develop practical skills in finance decision-making, including the importance of sustainable accounting and climate-related disclosures for ethical financial practices.

BUSMBA 726  
**Analytics for Business Decisions - Level 9**  
Develops a critical understanding of data science techniques. Students will be able to independently evaluate and identify sources of data, make high-level data-driven decisions, communicate specialised insights, and contribute to solving real-world problems.

BUSMBA 727  
**Delivering Value Through Operations**  
Explores operations and supply chain management, focusing on effective production and delivery of goods and services that meet customer needs. Examines how to improve operations and supply chains to support competitive positioning while considering factors such as uncertainty and environmental sustainability.

BUSMBA 728  
**Creating Value Through Innovation**  
Explores contemporary approaches that enhance innovation activities. Expands thinking about design and innovation beyond new products to other sources of value.
creation. Critically evaluates the role of innovation and design processes in creating new products, services, experiences, and markets. Develops skills to manage a creative approach to problem/opportunity/solution identification and ideation.

**BUSMBA 729**  
**Global Success and Scaling Up**  
15 Points  
Evaluates and assesses opportunities, challenges and risks in exporting or operating a business across borders as part of a global value chain. Combines country and market analysis with internationalisation strategies to explore challenges firms and their leaders face, focusing on New Zealand firms, their global context and the unique trade-offs to be considered.

**BUSMBA 730**  
**MBA Capstone Consultancy Project - Level 9**  
15 Points  
Examines cross-functional and inter-organisational business processes, systems, for effective production and delivery of goods and services meeting customer needs. Considers uncertain and complex business environments, along with operations and supply chain management ideas and technologies.

**BUSMBA 750**  
**Navigating the Business Environment**  
15 Points  
Examines the business environment from legal, economic, political and social perspectives, at both the national and international levels. Develops skills to identify and influence major constraints and opportunities, and to use this critical understanding in strategic decision-making.

**BUSMBA 751**  
**Financial Management and Control**  
15 Points  
Examines both traditional and new approaches for achieving operational competitiveness in service businesses and their associated supply chains. Major service sectors such as health care, banking and financial services, transportation, tourism, and call centres are studied. Addresses both strategic analysis and operational decision making.

**BUSMBA 752**  
**Building Capabilities for Performance**  
15 Points  
Examines the role of supply chain management in the business environment through research of a supply chain management issue and the production of a written analytical research report that addresses that issue. To complete this course students must enrol in BUSSCM 703A and B, or BUSSCM 703B.

**BUSMBA 753**  
**Designing, Managing, and Improving Business Processes**  
15 Points  
Examines cross-functional and inter-organisational business processes, systems, technologies, small and big data analysis, integrated business planning, and partnerships to enhance supply chain performance. Considers analysis, design, implementation, and configuration.

**BUSMBA 760**  
**Making Evidence-based Decisions under Uncertainty - Level 9**  
15 Points  
Examines cross-functional and inter-organisational business processes, systems, technologies, small and big data analysis, integrated business planning, and partnerships to enhance supply chain performance. Considers analysis, design, implementation, and configuration.
BUSSCM 707 15 Points
Supply Chain Strategy and Design - Level 9
An advanced analysis of the development and implementation of strategies for enhancing supply chain performance. Includes a critical evaluation of strategic issues, tradeoffs, performance metrics, human and financial aspects, and their relation to supply chain design/operation; and a critical reflection on the roles of sustainability and humanitarian logistics. Includes provision of a research-informed business case.
Restriction: BUSMGT 775

BUSSCM 710 15 Points
Supply Chain Consulting
Develops the tools and frameworks required to engage in consultancy work. Engages students in problem framing, identifying and employing appropriate methodologies, and developing and presenting solutions to specific problems. Considers the dynamics of client-consultant relationships.

BUSSCM 711 30 Points
BUSSCM 711A 15 Points
BUSSCM 711B 15 Points
Supply Chain Consultancy Project - Level 9
A research-informed consultancy project based on a supply chain management internship with a company or other appropriate organisation with written and oral reports of the findings.
To complete this course students must enrol in BUSSCM 711 A and B, or BUSSCM 711

Commercial Law

Stage I

COMLAW 101 15 Points
Law in a Business Environment
Decision makers in commerce and industry require an understanding of legal structures, concepts and obligations. Provides an introduction to the New Zealand legal system and the legal environment in which businesses operate, and also introduces legal concepts of property and the law of obligations, including detailed study of various forms of legal liability relevant to business.
Restriction: BUSINESS 111, COMLAW 191

Stage II

COMLAW 201 15 Points
Commercial Contracts
Every business transaction involves a contract. Commercial Contracts examines the general principles of the law of contract including the process of formation of a contract, the interpretation of contractual terms and the various obstacles which may impede the enforceability of a bargain. Introduces the special features of contracts in digitally networked environments and issues relating to breach of contract and consumer protection.
Prerequisite: COMLAW 101 or 191 or BUSINESS 114 and 115
Corequisite: BUSINESS 112 or 113

COMLAW 203 15 Points
Company Law
Companies are by far the most used vehicle for doing business and an understanding of the rules that govern them is essential for everyone involved in commerce and industry. Examines the nature of a company, incorporation and share capital, the concept of separate legal personality, how a company interacts with the world and the roles of the stakeholders in a company including directors and shareholders. A sound understanding will help decision makers to take the advantages of corporate structure while avoiding pitfalls and legal liability.
Prerequisite: COMLAW 101 or 191 or BUSINESS 114 and 115
Corequisite: BUSINESS 112 or 113

Stage III

COMLAW 300 15 Points
Directed Study

COMLAW 301 15 Points
Taxation
An introduction to the Income Tax Act and the Goods and Services Tax Act, with emphasis on developing an understanding of these types of tax as relevant to taxpayers. Specific topics include the nature of income, taxation of common types of income (such as wages, shares and land), the deduction and prohibition of various types of expenses, tax accounting issues (cash or accrual basis), provisional tax, rebates, PAYE system, tax returns and an introduction to GST.
Prerequisite: COMLAW 201 or 203

COMLAW 303 15 Points
Receiverships and Reconstructions
A business in difficulty may fail or it may be rehabilitated. Receiverships and Reconstructions looks at aspects of business failure and near failure including informal workouts, formal business rescue regimes, company and personal bankruptcy. Students will develop the skills and expertise to operate in these fields.
Prerequisite: COMLAW 203 or LAW 417

COMLAW 304 15 Points
Business Structures for Enterprises
Business advisers need to be familiar with a wide variety of business structures other than companies. Emphasis is on the most common of these including franchises, joint ventures, trading trusts, partnerships, unincorporated societies and State Owned Enterprises in order to ensure that advisers are familiar with their merits and legal consequences of utilising these structures.
Prerequisite: COMLAW 203

COMLAW 305 15 Points
Financial Markets Law
Businesses need investment to grow. Many raise finance from the securities markets, in particular by listing on the Stock Exchange. Topics include raising money from the public and the rules relating to insider trading, market manipulation, disclosure obligations, takeovers and listing on the Stock Exchange and will benefit investment advisers and anyone involved in the financial markets.
Prerequisite: COMLAW 203

COMLAW 306 15 Points
Marketing Law
Marketers are not free to say what they want. A variety of laws and codes govern the claims made about goods and services and the ways in which they are presented and sold. Marketing Law covers consumer legislation, product distribution, advertisement regulation, branding, privacy and competition law. It builds skills in problem solving, decision making and written communication.
Prerequisite: BUSINESS 115 or COMLAW 101, and COMLAW 201 or 203 or MKTG 201 or 203, and 30 points at Stage II
COMLAW 311 15 Points
Advanced Taxation
An advanced study of Income Tax and Goods and Services Tax, with emphasis on the important tax regimes applicable to business taxpayers and high-wealth individuals. Specific topics include corporate taxation, dividends and imputation, company losses and grouping, qualifying companies, trusts, partnerships, financial accruals, international taxation, the disputes procedure and penalties regime, and evasion and avoidance.
Prerequisite: COMLAW 203 and 301, or LAW 429 and LLB Part II
Restriction: LAW 409

COMLAW 314 15 Points
Employment Law
The success of a business depends on the maintaining of a productive relationship with its employees. Employment Law covers the legal principles governing the employment relationship. Specific topics include bargaining, personal grievances, enforcement of employment contracts, strikes and lockouts, the rules regarding holidays, and health and safety obligations.
Prerequisite: COMLAW 201 or 203, or BUSINESS 115 or COMLAW 101 and MGMT 223, or LAW 121 or 131

COMLAW 315 15 Points
Finance and Property Law
Examines the legal concepts of property and ownership which are central to securing repayment of debt. Major topics include types of security over personal and real property; statutory provisions regulating credit contracts and property rights; general principles relating to guarantees; legal aspects of commercial leasing; liability of professional advisers and aspects of unsecured lending.
Prerequisite: COMLAW 201 or 203 or PROPERTY 271

COMLAW 318 15 Points
Special Topic

COMLAW 320 15 Points
Innovation and the Law
New technologies and innovative ideas and information pose challenges and provide opportunities for business and society. Topics will be drawn from intellectual property protection and the commercialisation of emerging technologies, data governance and privacy, blockchain, artificial intelligence regulation, sustainable management of resources and risks, issues related to compliance, and on-line dispute resolution.
Prerequisite: 30 points at Stage II and BUSINESS 115 or COMLAW 101

Economics

Stage I

ECON 151 15 Points
ECON 151G 15 Points
Understanding the Global Economy
Economics affects our daily lives and the global environment in many ways. Through the media we are constantly made aware of price increases, interest rate changes, exchange rate movements and balance of payments problems, growth and recessions, standard of living comparisons, regional trading agreements. What does it all mean and how does it all work?
Restriction: BUSINESS 115, ECON 101, 111, 191
Restriction: ECON 101, 111, 152, 191

ECON 152 15 Points
Principles of Economics
Analysis of issues that affect our daily lives, including pricing decisions by firms and their impact on our cost of living; game theory and strategic decision-making; tackling problems of pollution and global warming; and how governments use monetary and fiscal policies to stimulate economic growth and address unemployment and inequality.
Prerequisite: ECON 101 or 152 or 180 points in Mathematics or Statistics with a GPA of 5 or higher and a B or higher in MATHS 130

Stage II

ECON 200 15 Points
Special Topic
Prerequisite: ECON 111 or 152

ECON 201 15 Points
Microeconomics
Study of the allocation of scarce resources among competing end uses. Intermediate-level analysis of the economic behaviour of individual units, in particular consumers and firms. Although the focus is on perfectly competitive markets, attention is also given to other types of markets. Analysis also includes concepts of expected utility and uncertainty, and welfare economics.
Prerequisite: ECON 101 or 152 or 180 points in Mathematics or Statistics with a GPA of 5 or higher and a B or higher in MATHS 130

ECON 211 15 Points
Macroeconomics
Provides an introduction to the dynamic microfoundations
of macroeconomics, and demonstrates how we can utilise these foundations (i) to understand the trends and fluctuations of macroeconomic aggregates like national output, unemployment, inflation and interest rates, and (ii) to predict the outcome of alternative government policies related to current economic problems of New Zealand and the rest of the world.

Prerequisite: ECON 111 or 152 or 180 points in a BSc major in Mathematics or Statistics with a GPA of 5 or higher and a B or higher in MATHS 130

**ECON 212**  
**Game Theory**
An introduction to the fundamental concepts of non-cooperative and cooperative game theory: the concept of strategy; two person constant sum non-cooperative games and the minmax value; n-person non-cooperative games and Nash equilibrium; examples and applications in auctions, bargaining and other economic models, political science and other fields; the idea of backward induction and sub-game perfection; introduction to games in coalitional form; the core and the Shapley value.

Prerequisite: 15 points from BUSINESS 115, ECON 101, 151, 152, 191, ENGSCI 111, MATHS 108, 130, PHIL 101

**ECON 221**  
**Introduction to Econometrics**
Empirical analysis in economics. Focuses on harnessing the power of data and regression techniques to estimate relationships and test hypotheses based on economic models. Emphasises the identification of causal effects critical to policy analysis, decision-making and strategic planning. Covers applications of econometrics in a variety of areas using a statistical computer package.

Prerequisite: 15 points from ECON 152, MATHS 108, 130, STATS 101, 102, 108, 125, 191, or at least 18 credits in Mathematics at NCEA Level 3 including at least 9 credits at merit or excellence, or B in CIE A2 Mathematics, or 5 out of 7 in IB Mathematics: Analysis and Approaches (SL or HL)

**ECON 232**  
**Economics of Global Development**
The development of the international economy and changing economic relationships that have taken place since the late nineteenth century. The causes and consequences of growing interdependency among nations are examined. Changing patterns of trade and migration of capital and labour are analysed, as are cyclical and secular trends in output, employment and investment. The focus is on the development of institutions as well as the economic and social conditions that induce and validate change.

Prerequisite: ECON 111 and 101 or 191, or ECON 152

**ECON 241**  
**International Economic Policy**
An introduction to contemporary issues in international trade and finance, including tariff wars, optimal currency areas, financial crises, debt default and the role of institutions like the IMF. The course provides a conceptual framework to understand how and why nations trade, the forces underpinning financial globalisation, and the political economy of international trade and monetary relations.

Prerequisite: ECON 111 and 101 or 191, or ECON 152

**ECON 242**  
**Economic Policy**
Explores how economic policy can address socioeconomic challenges like climate change, poverty, sustainability, and the changing nature of work. Examines the role of microeconomic policy in areas such as competition, transport, education, health, labour, international trade, and immigration. Discusses how fiscal and monetary policy can promote welfare and economic stability. Traces the evolution of policy in New Zealand and overseas.

Prerequisite: 15 points from BUSINESS 115, ECON 151, 152

**ECON 271**  
**Behavioural Economics**
Scientists and philosophers have long pondered whether human decisions are primarily deliberative or more prone to emotions. This course brings together findings from economics, psychology and neuroscience to discuss decision making at the level of individuals, within small groups and in more anonymous and impersonal market settings with an emphasis on the role of social norms and cognitive biases.

Prerequisite: 15 points from BUSINESS 115, ECON 151, 152, ENGSCI 111, MATHS 108, 130, PHIL 101, PSYCH 108, 109, STATS 101, 108

**Stage III**

**ECON 300**  
**Directed Study**

**ECON 301**  
**Advanced Microeconomics**
Advanced treatment of aspects of consumer theory, producer theory, and game theory. Applications of this basic theory to the analysis of some topics in uncertainty, contracts, auctions, oligopoly, and information economics.

Prerequisite: ECON 201 and 15 points from ENNGEN 150, ENGSCI 111, MATHS 108, 130

**ECON 302**  
**Economics of Labour Markets**
The application of economics to labour issues that confront policymakers around the world. Examines how labour markets function and focuses on the use of economic frameworks to evaluate the effects of various policies, including education and training, welfare and taxation, workplace health and safety, minimum wages, and immigration. Discusses effective strategies to mitigate workplace discrimination.

Prerequisite: ECON 201

**ECON 303**  
**Law and Economics**
Economic analysis of law and organisation, and the application of economics to property rights, patents and natural resource management. Includes: contracts, transaction cost analysis, classical contracting, long-run contracts, enforcement, role of market forces, risk aversion, remedies for breach, economic theory for torts, negligence rules, strict liability, multiple torts, product liability. Special topics may include: crime, insider trading, and business law.

Prerequisite: 15 points from ECON 201, 212, 232

**ECON 304**  
**Firms and Markets**
An introduction to Industrial Organisation, the analysis of markets with imperfect competition. Industrial Organisation is concerned with the interdependence of market structure, firm behaviour and market outcome. Basic concepts of game theory will be systematically introduced and applied to study strategic firm behaviour in a variety of general and more industry-specific market settings. In each case, we
will analyse the implications of the market behaviour for consumers and society and explore the potential role for public policy with instruments like regulation, competition policy and patent policy.

Prerequisite: ECON 201

**ECON 305**  
**Economic Policy Analysis**  
15 Points  
Examines the design, implementation and analysis of economic policy. Integrates economic theory with empirical methods to evaluate responses to issues that confront policymakers in government and industry. Potential topics include housing, infrastructure and transport investment, climate and sustainability, productivity, employment, welfare and health programmes. Provides opportunities to engage with stakeholders in industry and government.

Prerequisite: ECON 201, 221

**ECON 311**  
**Advanced Macroeconomics**  
15 Points  
Designed to teach students modern macroeconomic analysis and focuses on the standard dynamic general equilibrium model, which is central to current macroeconomic research. Students are given a careful introduction to the overlapping generations version of this model and shown how this model can be adapted in different ways to address a wide variety of economic issues and policy questions.

Prerequisite: ECON 201 or 211, and 15 points from ENGG 150, ENGS 111, MATHS 108, 130

**ECON 321**  
**Advanced Econometrics**  
15 Points  
Development of the linear regression model, its basis, problems, applications and extensions: demand systems, time-series analysis including unit roots and co-integration, simulation and resampling methods including an exposure to practical computing classes.

Prerequisite: 15 points from ECON 221, STATS 201, 207, 208, 210, 225 and 15 points from ENGG 150, ENGS 111, MATHS 108, 130

**ECON 341**  
**International Trade**  
15 Points  
The main theories of international trade in goods and services, and of international movements of capital and labour. Partial equilibrium and general equilibrium analysis of the major instruments of trade policy, their economic effects, and the issues created by their use in practice. The economics of regional trading arrangements, such as free trade areas, customs unions and common markets.

Prerequisite: 15 points from ECON 201, 211, 223, 241

**ECON 343**  
**East Asian Growth and Trade**  
15 Points  
A study of the economic factors underlying the dynamic trade and growth performance of the major economies of contemporary East Asia, and of the impact of their development on New Zealand's international trading environment. Study of individual East Asian economies is strongly emphasised.

Prerequisite: 15 points from ECON 201, 211, 223, 241

**ECON 351**  
**Financial Economics**  
15 Points  
A study of the modern literature on corporate finance, investments and derivative securities. An analysis of consumption and investment decisions in the presence of time and risk, asset pricing models and market efficiency. The term structure of interest rates and various issues in debt and equity financing. The use of derivative securities, e.g., forwards and/or options to manage exchange rate risk.

Prerequisite: ECON 201 and 15 points from ENGG 150, ENGS 111, MATHS 108, 130

**ECON 352**  
**International Finance**  
15 Points  
A study of the modern literature on exchange rate markets, exchange rate determination and the implications of exchange rate movements for various economic issues. Students will gain an understanding of why exchange rates change, of financial market arrangements, and of the reasons for, and implications of, recent events in international financial markets.

Prerequisite: 15 points from ECON 201, 211, 223, 241

**ECON 361**  
**Public Economics**  
15 Points  
A study of the role of the state in a modern mixed economy; its roles, measurement and accountability. Topics include: welfare theory, theory of public goods, cost-benefit analysis, budgetary issues, taxation theory and practice, insurance markets, and social insurance.

Prerequisite: ECON 201

**ECON 372**  
**Energy and Environmental Economics**  
15 Points  
An overview of the theory and empirical practice of economic analysis as it is used in evaluating energy and environmental problems. Topics covered include natural resource economics, as well as electricity and oil markets. Other topics include environmental policy (pollution and economic efficiency); analysis of economic instruments, such as tradable property rights and pollution taxes; the allocation of non-renewable and renewable resources; and contemporary issues of growth, sustainable development and climate change.

Prerequisite: ECON 201

**ECON 374**  
**Special Topic: Urban Economics**  
15 Points  
Explores the growth and impact of cities, as well as the role of policies that impact their form, structure and economy. What explains the explosive growth in urbanisation over the last 100 years? How do firms and individuals decide where to locate? How can we address current urban problems like crime, poverty, traffic congestion, sprawl, gentrification and pollution?

Prerequisite: ECON 201

**ECON 375**  
**Health Economics**  
15 Points  
Examines questions around whether health can be bought, the impacts of pandemics such as COVID-19 and ways to respond. Focuses on issues related to the demand for health, infectious disease and demand for immunisation, health insurance and the medical care market. Explores some health care policies and their implications in developing and developed countries.

Prerequisite: ECON 201

**Postgraduate 700 Level Courses**

**ECON 700**  
**Special Topic**

**ECON 701**  
**Microeconomic Theory**

Advanced treatment of traditional topics from "core" microeconomics, including consumer theory and duality,
expected utility theory, general equilibrium, game theory and the economics of information.

ECON 702  
Industrial Organisation  
15 Points  
Concerned with interdependence of firm behaviour, market structures and implications for consumers and society. Concepts from game theory are introduced and applied to study strategic firm behaviour in a variety of general and more specific market settings; Coverage includes the potential role for public policy with instruments like competition policy, patent policy and the regulation of public utilities such as telecommunication, electricity, water and gas.

ECON 704  
Directed Study  
15 Points  

ECON 711  
Macroeconomic Theory and Policy  
15 Points  
Discusses advanced analytical tools and concepts used in modern macroeconomics and shows how to apply these tools in policy settings. The focus will be on dynamic macroeconomic models with micro-foundations and their applications to understanding macroeconomic policy issues, such as growth, fluctuations, debt-crises, ageing, unemployment, and global imbalances.

ECON 712  
Topics in Money, Banking and Finance  
15 Points  
An advanced treatment of macroeconomics focusing on contemporary issues that have been brought into sharp relief since the global financial crisis. Topics include models of financial crises, the role of financial markets and liquidity, sovereign debt, the relationship between financial intermediation and the macroeconomy, and the (unorthodox) way in which central bank policy is now conducted.

ECON 721  
Econometrics 1  
15 Points  
Core econometrics including theory and applications. The development of the classical linear regression model and extensions to the most general case. Applications to types of linear models involving cross-section and time-series data, and simultaneous equation models. The method of maximum likelihood, other extrema estimators and associated methods of testing.

ECON 723  
Econometrics 2  
15 Points  
An overview of time series econometrics, designed to introduce a range of material in stationary and nonstationary time series including: modern model determination methods, unit root and co-integration theory, non-linear time series analysis and continuous time models. Students will be introduced to practical time series forecasting methods.

ECON 741  
Topics in International Trade  
15 Points  
Advanced treatment of selected developments in international trade theory including the link between trade and development and contemporary issues relating to trade strategies and structural adjustment policies with an emphasis on developing countries.

ECON 742  
Trade Policy  
15 Points  
Economic analysis of current trade policy issues, with an emphasis on the theoretical, empirical and policy dimensions of international trade negotiations in the WTO, and the spread of preferential trading arrangements such as free trade areas.

ECON 751  
Advanced International Finance  
15 Points  
A study of open-economy macroeconomic topics (theoretic, empirical and policy oriented), including models of exchange rate behaviour.

ECON 761  
Public Economics and Policy  
15 Points  
Fundamental theorems of public economics, market failure, public choice theory, and distribution; the role of the economist in the making of public policy in a modern mixed economy, ideologies and critiques of the market model, the economics of the welfare state, welfare and tax reform in New Zealand, and applied poverty issues.

ECON 771  
Economics of Development  
15 Points  
Contemporary issues in development economics. Topics include: the way economists’ approaches to leading development issues have evolved to the present; and leading development issues, including sources of economic growth, the role of population, human capital and innovation, labour and migration, international trade and foreign aid, and strategies for sustainable economic development. There is emphasis on the ‘Newly Industrializing Countries’ and other Third World developing countries.

ECON 773  
The History of Economic Thought  
15 Points  
Covers a selection of topics in the history of economic ideas, including classical economics, post-classical microeconomics and macroeconomics including Keynesian, Austrian, institutional economics and behavioural economics. Topics in twentieth century economics and twentieth century debates on international monetary reform will be given emphasis.

ECON 781  
Experimental Economics  
15 Points  
Controlled decision-making experiments have become an integral part of economics, more so with the advent of behavioural economics, which incorporates key insights from other social sciences to add realism to the Homo Economics model of human behaviour. This course will cover a selection of topics in experimental and behavioural economics with applications to commercial decision-making and public policy.

ECON 783  
Energy Economics  
15 Points  
Discusses issues related to the economics of climate change including peak oil as well as regulation and market design issues for energy and carbon markets. Natural resource economics and electricity markets are covered in depth.

ECON 784  
Special Topic: Health Economics  
15 Points  
Examines contemporary issues in health economics including inequalities in healthcare access, utilisation and health outcomes. Application of economic frameworks and theory to inform decision-making around resource allocation and broader issues of health financing, especially in relation to current New Zealand health reforms and
delivering equity under Te Tiriti o Waitangi as well as the United Nations Sustainable Development Goals.

ECON 788 30 Points
ECON 788A 15 Points
ECON 788B 15 Points

Research Project - Level 9
Restriction: ECON 789
To complete this course students must enrol in ECON 788 A and B, or ECON 788

ECON 791 60 Points
ECON 791A 30 Points
ECON 791B 30 Points

Dissertation - Level 9
To complete this course students must enrol in ECON 791 A and B, or ECON 791

FINANCE

Stage II

FINANCE 251 15 Points
Financial Management
Focuses on practical aspects of corporate finance. Topics covered include: concepts of value creation, risk and required rates of return, financial maths, capital budgeting, capital structure and dividend policies.
Prerequisite: ACCTG 102, and 15 points from ECON 221, ENGSCI 211, STAT 101, 108

FINANCE 261 15 Points
Introduction to Investments
Markets for shares, fixed income securities, options and futures. Methods of valuing shares, fixed income securities, options, and futures. Simple techniques of hedging risk. Portfolio diversification, Portfolio evaluation.
Prerequisite: FINANCE 251 or 180 points in a BSc major in Mathematics or Statistics with a GPA of at least 5 and a B or higher in MATHS 130

Stage III

FINANCE 300 15 Points
Directed Study

FINANCE 351 15 Points
Advanced Financial Management
A rigorous study of advanced capital budgeting procedures, more difficult aspects associated with capital structure and dividend decisions, mergers and acquisitions. Case study applications of financial management are used. A continuation of the material introduced in FINANCE 251.
Prerequisite: FINANCE 251

FINANCE 361 15 Points
Modern Investment Theory and Management
Portfolio theory and equilibrium asset pricing models and empirical tests. Portfolio management (forecasting, construction, administration and evaluation) including issues relating to fixed interest and international equity investment. A continuation of the material introduced in FINANCE 261.
Prerequisite: FINANCE 261 and 15 points from ENGSCI 211, MATHS 208, 250

FINANCE 362 15 Points
Risk Management
Examines theoretical and practical aspects of risk management with an emphasis on the effective use of futures, options and other financial derivatives to control market risk exposure. Reviews no-arbitrage methods used to value financial futures and options, including the Black-Scholes model and binomial tree numerical methods.
Prerequisite: FINANCE 261 and 15 points from ENGSCI 211, MATHS 208, 250

FINANCE 383 15 Points
Banking and Financial Institutions
Provides a thorough understanding of the role of banks and other financial institutions in the economy. It focuses on the problems of risk management and regulation with a particular emphasis on problems, crises and most importantly the Global Financial Crisis.
Prerequisite: FINANCE 251 or ECON 201 and 211

FINANCE 384 15 Points
Special Topic

Postgraduate 700 Level Courses

FINANCE 700 15 Points
Directed Study

FINANCE 701 15 Points
Research Methods in Finance
The theory and application of modern research methods in finance. The content will include the philosophy, process and design of scientific research. Prior knowledge of basic statistical techniques is assumed.
Restriction: ACCTG 701

FINANCE 702 15 Points
Governance Issues in Finance
An introduction to the economic literatures relating to property rights, transaction cost economics, and agency theory. Application of these notions to the way in which organisations are structured. Identification of why some transactions are internalised and some are undertaken through markets. The application of these ideas to finance.
Restriction: ACCTG 702

FINANCE 703 15 Points
Special Topic

FINANCE 705 15 Points
Empirical Finance
Examines the theory and application of modern research methods in finance. Through exposure to a range of contemporary research issues students will develop a basic framework of how to conduct research, and an overview of some of the pitfalls.

GLMI 707  15 Points
**Responsible Business and Sustainability**
Engages with pressing contemporary topics such as corporate social responsibility, sustainability, ethical business and governance, Māori and indigenous leadership, the stakeholder approach to responsible business, and diversity and inclusiveness in organisations.
*Restriction: MGMT 733, 737*

GLMI 708  15 Points
**Critical, Creative and Strategic Thinking**
Focuses on learning and applying ideas, processes and technologies to critical, creative and strategic thinking in fields related to leadership, management and change. Emphasises building the confidence, dexterity and set of practices to question and create new pathways for collaborative and systemic challenges.

GLMI 709  15 Points
**Creating Global Ventures**
Examines the issues involved in forming and operating a knowledge-intensive company that is global from inception. Includes topics such as assessing opportunities, developing a business model, forming a team and gathering the resources to launch a global new venture.
*Restriction: INTBUS 705, MGMT 715*

GLMI 710  15 Points
**Innovation and Knowledge Management**
Examines the role of innovation and knowledge in business profitability and growth. Includes knowledge as a foundation for innovation, core knowledge processes in organisations, understanding innovation processes in uncertain and complex environments, and collaborative innovation.
*Restriction: MGMT 721*

GLMI 711  15 Points
**Strategic Entrepreneurship and Innovation**
Examines the challenge of strategising in highly uncertain situations such as knowledge intensive start-ups and introduction of new products or processes. Reviews key theories of strategy and strategising, and applies tools for strategic management and analysis.
*Restriction: MGMT 726*

GLMI 712  15 Points
**Understanding and Managing Creativity**
Explores theories and research on creativity in both well-established and entrepreneurial organisations at different levels of analysis – individual, groups and firms. Includes topics such as factors impacting creativity, how to manage creative teams and individuals, and how to develop a creative climate in the organisation.

**Information Governance**

**Postgraduate 700 Level Courses**

INFOGOV 700  15 Points
**Environment of Information Governance**
Key legal and governance concepts, practices, structures and mechanisms are studied. This includes a focus on data protection issues. Legal and de facto rules are analysed including their creation, reform and enforcement; business agreements and their interpretation are introduced and relevant standards are evaluated.

INFOGOV 701  15 Points
**Information Research in Practice**
Develops and applies general and context-specific research methods. Identifies and resolves key research issues that arise for businesses and organisations. Explores application of research methodologies.
*Corequisite: INFOGOV 700*

INFOGOV 702  15 Points
**Information Ethics**
Examines ethical, cultural and policy-related concepts related to information, from generation, collection and storage to analysis, application and dissemination, including review and feedback mechanisms. The concepts include research ethics, privacy and surveillance, information and discrimination, professional codes, responsible innovation and the use of algorithms.
*Corequisite: INFOGOV 700*

INFOGOV 703  15 Points
**Impact of New Technologies**
Explores themes in the development, usage and regulation of new technologies. Examines a range of technologies such as blockchain technology, and other distributed ledger technologies with reference to compliance, including their implementation and impact in industry and on society. The legal issues arising from the use of smart contracts are investigated.
*Corequisite: INFOGOV 700*

INFOGOV 704  15 Points
**Artificial Intelligence Regulation - Level 9**
Critically analyses the legal and policy issues created by advanced artificial intelligence technologies, including regulatory response. Evaluates efficiency, proportionality and necessity of existing or suggested regulation, and develops proposals for the regulation of future challenges.
Develops independent research skills including an ability to work in multidisciplinary groups and communicate findings to audiences from a range of disciplinary and jurisdictional backgrounds.

**Prerequisite:** INFOGOV 700

**INFOGOV 705**

**Information Privacy: Theory and Application - Level 9**

Critically evaluates the frameworks protecting personal information including their theoretical underpinnings and global reach. Explores the challenges to regulatory frameworks from rapid technological and social changes and encourages independent research as to how these may be addressed. Considers how leadership and accountability mechanisms can impact an organisation's ability to adapt information privacy requirements to unpredictable, complex and ill-defined environments.

**Prerequisite:** INFOGOV 700

**INFOGOV 706**

**Cybersecurity Techniques and Governance**

Focuses on information security strategies to address cybercrime. Includes analysis and critique of basic technological and managerial issues related to information security. Related regulations and standards will be also discussed.

**Corequisite:** INFOGOV 700

**INFOGOV 707**

**Dispute Resolution Techniques**

Addresses a range of appropriate dispute resolution mechanisms to address complaints. Techniques and best practice for facilitating negotiation of disputes through mediation including skills to assist dispute resolution. Explores negotiation theories, styles, strategies, tactics, and techniques.

**Corequisite:** INFOGOV 700

**INFOGOV 708**

**Intellectual Property and Information**

Examines the information governance implications of data-driven innovation and its impact on intellectual and cultural property protection. Explores intellectual and cultural property management strategies to address public policy issues related to information governance.

**Corequisite:** INFOGOV 700

**INFOGOV 709**

**Access to Information**

Explores access to information from a global and national perspective. Critically evaluates individuals’ right to access to information. Examines the interrelationship between access to information, privacy and data governance. Addresses techniques and procedural rules to evaluate the validity of requests for access to information and grounds for refusal.

**Corequisite:** INFOGOV 700

**INFOGOV 710**

**Sector Regulation**

Explores industry-specific information governance requirements. Critically evaluates information governance across public and private sectors. Examines key industry regulations including information governance in healthcare, marketing and insurance. Analyses the role of different regulators in the public sector that address information governance.

**Corequisite:** INFOGOV 700

**INFOGOV 711**

**Special Topic**

**INFOGOV 712**

**Special Topic**

**INFOGOV 720**

**Information Governance Project - Level 9**

A research-informed consultancy project employing appropriate theories and methodologies to develop and present solutions for issues in information governance.

**Prerequisite:** INFOGOV 701, 705

To complete this course students must enrol in INFOGOV 720 A and B, or INFOGOV 720

**INFOGOV 780**

**Research Project - Level 9**

**Prerequisite:** INFOGOV 701, 705

To complete this course students must enrol in INFOGOV 780 A and B, or INFOGOV 780

### Information Systems

#### Stage I

**INFOSYS 110**

**Digital Systems**

Explores how information systems and analytical tools help organisations to innovate, optimise and deliver value. Examines how the development and implementation of systems and technologies coordinate and manage information, people, and processes within data governance and privacy frameworks.

**INFOSYS 220**

**Business Systems Analysis**

An Information Technology (IT) professional must understand how IT systems are constructed and tested and how quality is assessed, in order to manage, develop or provide innovative business solutions. Business Systems Analysis introduces systems development process concepts and activities, with a strong focus on understanding the problem and solution through modelling.

**Prerequisite:** 15 points from COMPSCI 101, 105, 107, 130, INFOMGMT 192, INFOSYS 110

**Restriction:** INFOMGMT 291

**INFOSYS 221**

**Programming for Business**

Focuses on enhancing Business/IT professional skills. Develops and applies problem-solving and algorithmic skills through pseudocode and fundamental programming constructs. Applies a design thinking methodology of empathise, ideate, design, prototype and test to build applications relevant to current business domains.

**Prerequisite:** INFOSYS 110

**Restriction:** COMPSCI 101, 130

**INFOSYS 222**

**Database Systems**

Managers and other knowledge workers find that many of their duties revolve around accessing, organising, and presenting organisational and external information. The
ability to develop and use computer databases is becoming a critical skill that is required in many disciplines. These skills are developed through an introduction to data modelling, relational theory, database design, and the management of databases.

Prerequisite: 15 points from COMPSCI 101, 105, 107, 130, INFOSYS 110

**Stage III**

**INFOSYS 300** 15 Points

**Robotic Process Automation**
Examines Robotic Process Automation (RPA) Systems and how RPA fits into the current information technology setups and helps the modern organisation address business process-related problems and opportunities. Examines the benefits and limitations of RPA and how it differs from other business solution technologies.

Prerequisite: 30 points at Stage II in either Accounting, Business Analytics, Computer Science, Engineering Science, Information Management, Information Systems, Marketing, Operations and Supply Chain Management, Software Engineering

**INFOSYS 301** 15 Points

**Directed Study**

**INFOSYS 302** 15 Points

**Special Topic**

**INFOSYS 303** 15 Points

**Solutions Architecture**
Information systems specifically designed for organisational IT environments provide competitive advantages. Focuses on using high quality information architecture to address business requirements including the iterative use of system analysis, design and prototyping. Develops familiarity with state-of-the-art modelling, development, and deployment environments, and solutions for designing business systems architecture.

Prerequisite: INFOMGMT 291 or INFOSYS 220, and BUSAN 201 or INFOMGMT 292 or INFOSYS 222, and COMPSCI 130 or INFOSYS 221

Restriction: INFOSYS 320

**INFOSYS 304** 15 Points

**IT Infrastructure**
Modern IT infrastructure relies on a functionally hierarchical network designed around the OSI model. Explores internet-oriented backbones and high-speed access infrastructure, and uses the TCP/IP suite, cloud infrastructure and digital services, and applications to understand basic and business-oriented infrastructure challenges such as capacity planning, architecture design, and scaling of IT infrastructure and applications.

Prerequisite: 15 points from COMPSCI 230, INFOSYS 220, and 15 points from BUSAN 200, 201, COMPSCI 215, 235, INFOSYS 222, INNOVENT 203, OPSMGT 258, SCIGEN 201

Restriction: INFOSYS 224, 322, 339

**INFOSYS 305** 15 Points

**Digital Strategy and Transformation**
Explores strategic opportunities for delivering value through digital technologies. Examines best practices to ensure the effective development and operation of digital capabilities in the global context by aligning business and information technology strategies, controlling risks, and complying with regulatory requirements and standards.

Prerequisite: INFOSYS 220

Restriction: INFOSYS 323

**INFOSYS 306** 15 Points

**Digital Business and Innovation**
Explores the prominent IT-enabled innovative business models and digital platforms that result in the digital transformation of industries, businesses, products and services. Examines the strategic and economic foundations of digital platforms and models. Discusses the design, coordination and management of the ecosystems underpinning the digital business models and platforms.

Prerequisite: 30 points at Stage II in either Accounting, Business Analytics, Computer Science, Engineering Science, Information Management, Information Systems, Marketing, Operations and Supply Chain Management, Software Engineering

Restriction: INFOSYS 323, 338, 344

**INFOSYS 307** 15 Points

**Special Topic**

**INFOSYS 310A** 15 Points

**INFOSYS 310B** 15 Points

**Business Project**
A project in conjunction with an industry partner. The projects are to be in the areas of Business Analytics, Information Systems, and Operations and Supply Chain Management. The course encourages students to demonstrate skills and knowledge obtained in previous courses and to develop the capabilities of solving real-life problems.

Prerequisite: 30 points at Stage II in Business Analytics, Computer Science, Information Systems, Operations and Supply Chain Management and a GPA of 5.0 or higher

Restriction: INFOSYS 340, 342, 345

To complete this course students must enrol in INFOSYS 310 A and B

**INFOSYS 321** 15 Points

**Enterprise Systems**
Examines cross-functional integrated computer-based information systems, known as Enterprise Resource Planning (ERP) systems, designed to support an organisation's information needs and operations. Considers issues associated with the selection, analysis, design, implementation and configuration of such systems. Investigates transaction processing, management information and decision support across an organisation's business processes. Explores the characterisation of problems, in terms of process and information models.

Prerequisite: 15 points at Stage II in Accounting, Business Analytics, Computer Science, Engineering Science, Information Management, Information Systems, Marketing, Operations Management, Software Engineering

**INFOSYS 341** 15 Points

**Information Security in Business**
An overview of activities, methods, and procedures used by business to establish robust information security policies. Topics include: security requirements; security management models and practices; risk management; identification and authentication; access control; information security technologies and encryption. In addition, key legal and ethical issues are discussed. Includes practical exercises using certain key technologies to assist learning.

Prerequisite: 30 points at Stage II in either Business Analytics, Computer Science, Information Systems
Postgraduate 700 Level Courses

INFOSYS 700 15 Points
Digital Innovation
New information technologies are transforming how innovations are created, distributed, and commercialised. Focuses on the practices for digital innovation creation, distribution, and commercialisation as well as the digital strategies needed to manage such digital innovations.

INFOSYS 702 15 Points
Special Topic

INFOSYS 703 15 Points
Managing with Artificial Intelligence
Focuses on a business perspective of the use of Artificial Intelligence (AI) tools and solutions in organisations. Explores how different AI-enabled tools and solutions contribute to organisational and societal objectives and values. Aims to prepare students for jobs that involve technology consultancy and management of technology, with specific focus on AI as an emergent technology.

INFOSYS 704 15 Points
IT Consultancy
Focuses on developing IT consultancy skills by introducing the lifecycle of IT consultancy project and best practices per each phase. Prepares students for IT consultancy roles that involve business and technology analysis, change management, implementation and performance management.

INFOSYS 705 15 Points
Directed Study

INFOSYS 706 15 Points
Digital Sustainability
Informs students about the opportunities in harnessing technology to address the UN SDGs. The course will be guided by the digital sustainability framework (digital maturity, governance, orientation and partnership) and will use real use-cases to develop solutions by students.

INFOSYS 707 15 Points
Special Topic

INFOSYS 708 15 Points
Special Topic

INFOSYS 720 15 Points
Information Systems Research
A substantive review of research in the discipline of information systems. Behavioural, strategic and social issues relating to the design, implementation and impact of information technology applications will be studied.

INFOSYS 722 15 Points
Data Mining and Big Data
Data mining and big data involves storing, processing, analysing and making sense of huge volumes of data extracted in many formats and from many sources. Using information systems frameworks and knowledge discovery concepts, this project-based course uses cutting-edge business intelligence tools for data analytics.

INFOSYS 727 15 Points
Advanced Information Security
Focuses on technical security issues of the systems used in today's information technology applications. Explores the practical issues of identification and authentication, security of operating systems, cryptography, disaster recovery and contingency planning, and discusses the relevant theoretical models. Managerial aspects of information security issues as well as legal and ethical issues arising from protecting computer files both from a New Zealand and global perspective will be addressed. The course follows the content of CISSP certification.

INFOSYS 732 15 Points
Readings in Information Systems
An independent study of the research literature in a particular area of information systems. An opportunity to investigate a topic in depth, and gain valuable research skills. The particular area of research must be jointly agreed upon by the lecturer and students, and approved by the Head of Department.

INFOSYS 735 15 Points
Cloud Computing Architecture
Cloud Computing Architecture combines practical skills development with broader research and critical thinking skills to enable the student to analyze concepts relating to cloud computing. The curriculum is delivered through instructor-led classes, knowledge assessments, and hands-on labs designed to develop technical expertise in cloud computing and preparing students for a career in cloud solutions.

INFOSYS 750 15 Points
Research Methods – Quantitative
A comprehensive review of the methodological issues in systems research, including detailed coverage of univariate and multivariate data analysis. 
Prerequisite: 15 points from STATS 201-255, or equivalent
Restriction: MKTG 703, 704

INFOSYS 751 15 Points
Research Methods – Qualitative
Focus is on the conduct and evaluation of qualitative research. Reviews various qualitative research methods and ways of analysing qualitative data and the challenges of writing up qualitative research work for conferences and peer-reviewed academic journals. 
Restriction: MKTG 703, 704

INFOSYS 757 15 Points
Project Management and Outsourcing
Discusses tools and techniques for managing complex projects. Particular focus is given to balancing competing demands among scope, time, cost, and quality. Communication tools for facilitating relationships between the project team and customers are also discussed as well as between client and vendors on information technology outsourcing projects in onshore, nearshore, offshore and web-based services. 
Restriction: OPSMGT 757

INFOSYS 772 15 Points
Readings in Information Systems
To complete this course students must enrol in INFOSYS 791 A and B, or INFOSYS 791

INFOSYS 778 30 Points

Innovation

Stage I

INNOVATE 100 15 Points
INNOVATE 100G 15 Points
Innovation through Design
Introduces design thinking and develops a user-centred approach to innovation, emphasising the importance of a deep understanding of user needs throughout an iterative ideation and prototyping process. Utilising the maker space at the Unleash Space and a range of digital tools, students will develop practical making and early stage prototyping skills.

Innovation and Entrepreneurship

Stage II

INNOVENT 203 15 Points
INNOVENT 203G 15 Points
The Entrepreneurial Mindset
Stimulates new ways of thinking about enterprising behaviour in a multi-disciplinary manner relevant to understanding and addressing real world challenges of today. Introduces skills needed to identify and assess opportunities, solve problems creatively, communicate persuasively, work effectively in teams, and understand individual and organisational impact.
Prerequisite: 15 points from BUSINESS 102, 103, 112, 113, MGMT 101, or 90 points passed, or 60 points from Part I of the BE(Hons) Schedule

INNOVENT 204 15 Points
Understanding Entrepreneurial Opportunities
Applies processes for creating, evaluating and realising entrepreneurial opportunities. Presents creative and analytical approaches to engage with different stakeholders and make decisions under conditions of uncertainty in a variety of entrepreneurial contexts. Skills to assess opportunities and associated business models and communicate a credible and compelling business case are introduced.
Prerequisite: BUSINESS 102 or 103 or 112 or 113, or INNOVATE 100 or 100G or SCIGEN 201
Restriction: INNOVENT 202

Stage III

INNOVENT 300 15 Points
Directed Study
INNOVENT 305 15 Points
Special Topic
Prerequisite: 15 points from ENGGEN 302, 303, INNOVENT 201, 203, 204, MGMT 202, 211, SCIGEN 201
INNOVENT 307 15 Points
Ecosystems for Innovation and Entrepreneurship
Introduces the eco-system concept to examine ways that innovating firms interact with various actors to build and sustain viable global enterprises. Actors include: suppliers, competitors, investors, users/customers, governments and universities. Develops the analytical skills needed to identify different actors for potential partnerships and strategies to engage with them.
Prerequisite: 15 points from ENGGEN 302, 303, INNOVENT 201, 203, 204, MGMT 202, 211, SCIGEN 201
INNOVENT 308 15 Points
Advanced Entrepreneurship
Extends entrepreneurial knowledge and applies advanced skills in the context of a student defined project focused on an innovative opportunity with international potential. Develops an integrated understanding of the complex interactions within a successful interdisciplinary team and the requirements for engaging with experts relevant to the opportunity.
Prerequisite: INNOVENT 204
Restriction: INNOVENT 303
INNOVENT 309 15 Points
Responsible Innovation
Methods, tools and techniques for responsible innovation and new product development. Frameworks for managing the creative front end of innovation, and anticipating social and ethical issues associated with green and clean technology, circular economy, and frugal innovation trends.
Prerequisite: 15 points from ENGGEN 303, INNOVENT 201, 203, 204, SCIGEN 201
Restriction: INNOVENT 302
INNOVENT 310 15 Points
Women in Entrepreneurship
Explores opportunities and challenges faced by women entrepreneurs in today’s global economy. Examines issues related to gender bias, entrepreneurial finance, and growing the entrepreneurial venture. Develops skills for starting and growing an entrepreneurial venture through collaborative, real world opportunity-based assessments.
Prerequisite: Either 15 points from INNOVENT 201, 203, 204, SCIGEN 201, or 60 points at Stage II

International Business

Stage I

INTBUS 151 15 Points
INTBUS 151G 15 Points
Business across Borders
Business on a global scale presents unique challenges and unrivalled opportunities to companies equipped to cross national boundaries. Set against a background of current events, the course explores the influence of international trade and multinational corporations on the contemporary global economy.
Restriction: BUSINESS 101, 111, INTBUS 201, 202

Stage II

INTBUS 201 15 Points
Foundations of International Business
Explores the distinctive nature of business conducted beyond the boundary of the domestic market. Examines how firms reach multinational scale while exposed to the
turbulence and complexity of international political and economic forces.
Prerequisite: Either 15 points from BUSINESS 102, 112, 113, MGMT 101 and 15 points from BUSINESS 115, ECON 111, 151, 152, 191, or 15 points from ECON 111, 151, 152 and 30 points in International Relations and Business
Restriction: INTBUS 210, 211

INTBUS 202 15 Points
Foundations of Strategy
Examines how firms compete. Focuses on the frameworks and tools needed to make sense of the competitive landscape in order to formulate and implement strategies. Considers the challenges and constraints that managers face in increasingly complex environments and industries.
Prerequisite: 15 points from BUSINESS 102, 112, 113, MGMT 101, or 15 points from ECON 151, 152 and 30 points in International Relations and Business

Stage III

INTBUS 300 15 Points
Firms across Frontiers
Examines international business theories underlying the existence and development of international firms. Analysis of contemporary international business issues.
Prerequisite: INTBUS 201 or 202
Restriction: INTBUS 301, 302

INTBUS 305 15 Points
Governing International Business
Firms that compete internationally need to employ political strategies and understand the governing institutions that affect their ability to do business. Examines the interactions between international firms and governing institutions, and explores the implications of the international regulatory framework for specific industries.
Prerequisite: BUSINESS 200 or INTBUS 201
Restriction: INTBUS 304

INTBUS 306 15 Points
Global and Regional Business
Focuses on the conduct of business in the world's regions. Examines globalisation, regionalisation and market integration and their impact on firms.
Prerequisite: BUSINESS 200 or INTBUS 201
Restriction: INTBUS 310, 311, 312, 313

INTBUS 307 15 Points
International Management and Strategy
Examines theories and practices of management in a cross-border context. Focuses on strategies and their implementation in international markets and how management changes when done internationally.

Property Practice

Postgraduate 700 Level Courses

PROPRAC 701  15 Points
Sustainable Construction
Knowledge of construction is vital in understanding property valuation, property management and property development. Building materials, structural options, and building services have a strong influence on how a property performs both financially, functionally and environmentally. Provides general construction knowledge and an understanding of the construction process in context of buildings’ impact on the environment.

PROPRAC 702  15 Points
Planning and Development
Property Development is approached from a practical perspective on the development process pathway from vision to commissioning and including the navigation of development controls and other land use restrictions in district plans. Analysis and feasibility are key skills that will be developed with case study illustration and a practical assignment. Design management, consenting, leadership, procurement and delivery will be covered including communication and sustainability.

PROPRAC 703  15 Points
Law and Governance
Fundamental legal principles and issues affecting the property professional will be considered including contract law, common form contracts found in the property industry (including leasing, transfer, and valuation) land ownership and professional liability. Key property-focused governance concepts, practices, structures and mechanisms are studied.

PROPRAC 704  15 Points
Property Market Dynamics
The supply and demand characteristics of urban developments have impacts on not only the price and availability of property, but on how we live and work. Development economics, urban policy, and land-use economics inform and guide decisions of property professionals, policy makers, and occupiers who shape the built environment.

PROPRAC 705  15 Points
Investment and Finance
Financing represents a fundamental part of how properties are purchased, developed and managed. The application of general theories of property investment, discounted cash flow, risk and return, and financial mathematics is vital for property professionals. Debt and equity financing options are discussed for residential and income-producing property and development projects.

PROPRAC 706  15 Points
Valuation
As every property is unique, the valuation of property presents many challenges and has a strong influence on the financial viability of both existing buildings and the development process. Valuation involves a range of models and approaches for valuing residential, commercial and industrial property and undeveloped land.

PROPRAC 707  15 Points
Property Technology
Develops capabilities in applying analytical tools and technologies to the analysis of issues to enhance
understanding of property markets and support effective decision-making.

**PROPRAC 708**  
**15 Points**  
**Advanced Valuation**  
The theory and practice of valuing special categories of property including shopping centres, hotels, leasehold and Māori land. Other professional property practices covered include compulsory purchase, and professional ethics and practice.

*Prerequisite: 45 points from PROPRAC 700-708*

**PROPRAC 778**  
**30 Points**  
**PROPRAC 778A**  
**15 Points**  
**PROPRAC 778B**  
**15 Points**  
**Capstone Project - Level 9**  
An individual, research-informed practical project with a company or other appropriate organisation with written and oral reports of the findings.  
*To complete this course students must enrol in PROPRAC 778 A and B, or PROPRAC 778*

**PROPRAC 779**  
**30 Points**  
**PROPRAC 779A**  
**15 Points**  
**PROPRAC 779B**  
**15 Points**  
**Capstone Project - Level 9**  
A team-based, research-informed practical project with a company or other appropriate organisation with written and oral reports of the findings.  
*To complete this course students must enrol in PROPRAC 779 A and B, or PROPRAC 779*

**Tertiary Foundation Certificate Business**

**Foundation Courses**

**TFCBUS 92F**  
**15 Points**  
**Foundation Business**  
Develops an understanding of the role of business in a rapidly changing national and international context. Focuses on factors impacting success and value creation including effective management and leadership, understanding customers, innovation and product development, financial and accounting practices, and strategic planning and decision-making.

Academic Integrity

ACADINT A01 0 Points
Academic Integrity Course
An online course designed to increase student knowledge of academic integrity, university rules relating to academic conduct, and the identification and consequences of academic misconduct. Students work through a series of modules, outlining scenarios that they may encounter while studying at university. Each scenario provides information on relevant rules, resources and expected behaviour.

Architectural Design

Stage I

ARCHDES 102 15 Points
Design 1
The Conceptual: An introduction, in studio format, to the conceptual realm in which architecture operates, making connections to the cultural, physical, formal, social and political dimensions of architectural design. Emphasises the development of skills and abilities in conceptual thinking and design realisation, using a range of approaches to making and representation.
Restriction: ARCHDES 100

ARCHDES 103 15 Points
Design 2
The Formal: An introduction, in studio format, to the discipline of architectural organisation and form-making. Re-examines the traditional notions of typology, precedent, geometry, parti and diagrams. Emphasises strategies that build on and transform understanding for organising form given contemporary programmes and modes of representation.
Restriction: ARCHDES 101

Stage II

ARCHDES 200 30 Points
Design 3
The Domestic: Exploring through design those things both familiar and unfamiliar in our understanding of home, family, privacy, identity, and community. Examines both the most intimate and the most exposed aspects of dwelling. Emphasises the role of precedent in design and addresses scales ranging from the room to the block.
Prerequisite: ARCHDES 100 or 102

ARCHDES 201 30 Points
Design 4
The Constructed: An introduction to architectural practice as a complex and collaborative enterprise. Offers the opportunity to explore materials, construction, fabrication processes, and detailing, through making. Requires students to understand the full range of drawings required to move from design concept to actual construction.
Prerequisite: ARCHDES 101 or 103

Stage III

ARCHDES 300 30 Points
Design 5
The Experimental: Students will be exposed to experimental approaches to architectural design that seek to expand the field of architecture. Highlights the role and agency of media in explorative architectural pursuits.
Prerequisite: ARCHDES 200

ARCHDES 301 30 Points
Design 6
The Integrated: The culmination of all aspects – conceptual, formal, material, tectonic, environmental, structural – of architectural design within the context of a larger network of infrastructural services. Also requires an understanding of the full range of drawings describing the workings of the building as both an active ‘machine’ and place for human comfort.
Prerequisite: ARCHDES 200, and 201 or 300

ARCHDES 302 30 Points
Directed Study
A topic approved by the Head of School of Architecture and Planning.
Prerequisite: ARCHDES 300 and 301 or Departmental approval

Postgraduate 700 Level Courses

ARCHDES 700 30 Points
Advanced Design 1
A studio based inquiry into an architectural topic approved by the Head of School of Architecture and Planning intended to facilitate in-depth study that is both tailored to a student's own interest and aligned with the School's research clusters, sharing workshops, discussions, pin-ups and tutorials.

ARCHDES 701 30 Points
Advanced Design 2
A studio based inquiry into an architectural topic approved by the Head of School of Architecture and Planning intended to facilitate in-depth study that is both tailored to a student's own interest and aligned with the School's research clusters, sharing workshops, discussions, presentations and tutorials.

ARCHDES 702 30 Points
Adaptive Reuse
A studio-based inquiry into an architectural topic in the field of adaptive reuse, approved by the Head of School of Architecture and Planning.
Prerequisite: Head of School approval

ARCHDES 703 30 Points
Advanced Design in Housing
An advanced studio-based inquiry into housing design, approved by the Head of School of Architecture and Planning.
Prerequisite: Head of School approval

ARCHDES 796A 60 Points
ARCHDES 796B 60 Points
Thesis - Level 9
A thesis involving a design-based discourse on a topic approved by the Head of School of Architecture and Planning
for the degree of Master of Architecture (Professional) under the guidance of an appointed supervisor.

Prerequisite: Students must have completed the taught component of their programme

To complete this course students must enrol in ARCHDES 796 A and B

ARCHDES 797A 30 Points
ARCHDES 797B 60 Points

Thesis - Level 9

A thesis involving a design-based discourse on a topic approved by the Head of School of Architecture and Planning for the Degree of Master of Architecture (Professional) and Urban Planning (Professional).

Prerequisite: ARCHDES 700, 701, ARCHGEN 703 or ARCHPRM 700, ARCHPRM 701, URBPLAN 701-708

To complete this course students must enrol in ARCHDES 797 A and B

Architectural History, Theory and Criticism

Stage I

ARCHHTC 102 15 Points
ARCHHTC 102G 15 Points

Modern Architecture and Urbanism

Examines through case studies the cultural contexts that shaped the development of architecture, urban design, landscape and the environment during the twentieth century. Emphasis is placed on the historical developments that influenced changes in style and the theoretical contexts that shaped attitudes towards inhabitation, social organisation, national identity, and cultural self-expression, amongst other things.

Restriction: ARCHHTC 100

Stage II

ARCHHTC 237 15 Points

Postmodern and Contemporary Architecture and Urbanism

Examines architectural and urban history and theory from the postmodern to the recent and contemporary.

Prerequisite: ARCHHTC 102

Restriction: ARCHHTC 235, 236

Stage III

ARCHHTC 340 10 Points

Oceanic Architecture and Urbanism

Examines the development of architecture and its contexts in Aotearoa New Zealand and the South Pacific, including origins, historical influences, key architects and buildings, identity and changing priorities.

Prerequisite: ARCHHTC 235 and 236, or 202 and 230

ARCHHTC 341 15 Points

Worlds of Architecture

Examines topics in pre-modern architectural and urban history and theory across the continents of Eurasia, Africa, the Americas, Australia and Oceania.

Prerequisite: ARCHHTC 237

Restriction: ARCHHTC 339, 340

ARCHHTC 376 15 Points

Directed Study

Postgraduate 700 Level Courses

ARCHHTC 700 15 Points

Pacific Architecture

Examines architectural history and practice in the Pacific region from ancient sites to the present day. Explores design from all periods, with a view to informing future design through consideration of climate, culture, society, materials and economics.

ARCHHTC 701 15 Points

Architecture and Political Philosophy

Examines the political role of architecture and urban space with emphasis on works of Michel Foucault. Analysis of the ways in which architecture constructs habits and habitats in relation to philosophical concepts.

ARCHHTC 702 15 Points

History of Housing in Aotearoa New Zealand - Level 9

A research-based examination of New Zealand’s more than 100-year history of building housing at medium and high densities. Includes analysis of exemplars.

ARCHHTC 703 15 Points

Māori and Pacific Housing

Examines Māori and Pacific housing issues and culturally appropriate housing options for Māori and Pacific peoples, including contemporary whare and papakāinga.

ARCHHTC 704 15 Points

Special Topic

Architectural Media and Fabrication

Stage I

ARCHDRC 103 15 Points

Architectural Media 1

An introduction to drawing and computing techniques related to design studio practice and an overview of the analytical and critical value of these techniques for design.

Restriction: ARCHDRC 102

ARCHDRC 104 15 Points

Architectural Media 2

Examines specific types of representation – both freehand and digital – used in architectural media to develop concepts, evaluate architectural thinking and describe and refine design projects.

Restriction: ARCHDRC 202

Stage II

ARCHDRC 203 15 Points

Architectural Media 3

Examines the relationship between methods of architectural drawing and the three-dimensional communication of fabrication and assembly. Central to this investigation is an understanding of how drawing is evolving in relation to new technologies.

Prerequisite: ARCHDRC 103, 104

Restriction: ARCHDRC 301, 303, 304, 370, 371, 372, 373

Postgraduate 700 Level Courses

ARCHDRC 700 15 Points

Advanced Digital Fabrication

Covers fabrication technologies and materials, practical experimentation with a range of fabrication tools and an introduction to current research and development.
ARCHDRC 701  
Timber Fabrication  
15 Points  
Covers fabrication technologies with timber materials. Includes the design and realization of a small timber building through the preparation of concept plans, developed design plans and a scale models.

ARCHDRC 702  
Special Topic: Architectural Drawing  
15 Points  
Builds a research literature review that supports architectural drawing and design processes, including historical overview of conceptual approaches and applications of drawing, scale and linearity, time and duration, exhibition and documentation, leading to production of series of drawings.

ARCHPRM 700  
Project Management  
15 Points  
Postgraduate 700 Level Courses  
The management of the building project from inception to tendering. An examination of client needs and agreements, feasibility studies, project constraints, cost planning and control, consultants, administration and quality control. An analysis of all aspects of the contracts and documentation during construction and final project accounts.  
Prerequisite: ARCHPRM 304, 700  
Restriction: ARCHPRM 304, 700

ARCHPRM 701  
Practice Management  
15 Points  
The New Zealand legal system and the law of contract and torts; negotiations, negligence, disputes and remedies relevant to architects in practice. An examination of the requirements for establishing and maintaining an architectural practice as a business venture as well as strategic market management, financial planning, insurance and taxation.

ARCHPRM 702  
Architectural Project Management  
15 Points  
Examines the theory and practice of designing a building construction project. Explores advanced models of project organisation, procurement, construction contracts, time and cost management and efficient delivery methods.

ARCHPRM 703  
Transnational Professional Practice  
15 Points  
Examines the theory and practice of how the built environment is designed and constructed when the architect is operating in a foreign field. Utilising problem-based learning and case studies, the student will assume the role of the alien designer who curates context and thus encounters: the vernacular, regionalism, internationalism and indigeneity.

ARCHPRM 704  
Special Topic  
15 Points  
ARCHPRM 705  
Special Topic  
15 Points

Architectural Technology and Sustainability

Stage I

ARCHTECH 108  
Introduction to Technology and Sustainability  
15 Points  
Introduction to structural concepts and construction principles, including building elements, systems and foundation options. Properties of commonly used construction materials, with a focus on timber frame constructions, their regulatory context, applications and detailing, and appropriate ways of applying the principles to design studio projects. Climate and vernacular architecture. Principles of climate-sensitive design. Sustainability and resilience in the built environment.  
Restriction: ARCHTECH 106, 107

Stage II

ARCHTECH 207  
Design Technology 1  
15 Points  
Development of structural and construction principles and systems for small-scale and residential buildings. Characteristics and behaviour of common building materials. Building components and detailing. Outline of building codes, health and safety regulations and site operations. Active building services and technologies for residential housing, including heating, cooling, ventilation, water, waste, electrical services and vertical transportation. Application to design studio projects.  
Prerequisite: ARCHTECH 108

ARCHTECH 210  
Environmental Design 1  
15 Points  
Prerequisite: ARCHTECH 108  
Restriction: ARCHTECH 208

Stage III

ARCHTECH 314  
Environmental Design 2  
15 Points  
Indoor environmental quality for complex, large scale and multi-storey buildings. Requirements of the New Zealand Building Code for energy efficiency and human comfort. Design strategies and innovative materials for high-performance buildings. Qualitative and quantitative approach to sustainable practices. Simulation tools, measurements and techniques. Natural resources,
materials optimisation and building reuse. Sustainability and resilience at the urban scale.

*Prerequisite: ARCHTECH 210
*Restriction: ARCHTECH 307

**ARCHTECH 315**
**Design Technology 2**
Development of construction and structural principles for complex, large-scale and multi-storey buildings. Investigation of façade technology, material selection and detailing, as applied in practice. Development of factors affecting buildability, fire protection and building code requirements. Application to design studio projects through drawing and prototyping.

*Prerequisite: ARCHTECH 207
*Restriction: ARCHTECH 312

**Postgraduate 700 Level Courses**

**ARCHTECH 706**
**Building Materials and Technologies**
Explores the selection and integration of appropriate materials, components and systems in relation to the different contexts, scales and stages of the design, documentation, procurement and construction of projects, in alignment with the National Standard of Competency for Architects.

*Restriction: ARCHTECH 307, 312, 314, 315

**ARCHTECH 707**
**Designing with Resilience Thinking**
Examines resilience in the built environment, from reviewing the literature on resilience to analysing case studies and developing strategies to enhance resilience in architecture.

**ARCHTECH 708**
**Advanced Building Technologies**
Examines how responsive skins can be used to improve building performances. Explores the development of building technologies in the Asian and Oceania regions of the Pacific Rim.

*Prerequisite: ARCHTECH 314 and 315

**ARCHTECH 709**
**Sustainable and Healthy Housing**
Examines the current issues of performances and indoor environmental quality in Aotearoa’s housing. Explores strategies, technologies and materials for designing and retrofitting sustainable, resilient and healthy housing.

*Prerequisite: ARCHTECH 314 and 315

**ARCHTECH 710**
**Special Topic**

**Architecture General**

**Postgraduate 700 Level Courses**

**ARCHGEN 702**
**Research Process**
An introduction to the research process including: research paradigms and strategies, the identification of research topics and research questions, the review and critique of literature, research methodologies, the structuring of research theses and reports, referencing and the preparation of a bibliography. The focus of the course is on preparing students to undertake their own research projects.

*Restriction: ARCHGEN 400, 700

**ARCHGEN 703**
**Design as Research**
Examines the literature on, and approaches to, research by design. Considers research processes and architectural design processes, and the ways in which these processes might be creatively combined in the context of a Masters level design thesis, in order that the thesis process and outcomes might meet the expectations of a research-based thesis.

*Restriction: ARCHGEN 300

**ARCHGEN 704**
**Directed Study**
*Prerequisite: Departmental approval

**ARCHGEN 711**
**Special Topic**
*Restriction: ARCHGEN 710, 712-716

**ARCHGEN 712**
**Special Topic**
*Restriction: ARCHGEN 710, 711, 713-716

**ARCHGEN 713**
**Special Topic**
*Restriction: ARCHGEN 710-712, 714-716

**ARCHGEN 714**
**Special Topic**
*Restriction: ARCHGEN 710-713, 715, 716

**ARCHGEN 715**
**Special Topic**
*Restriction: ARCHGEN 710-714, 716

**ARCHGEN 716**
**Special Topic**

**ARCHGEN 717**
**Public Urban Space in the Contemporary City**
Examines the role of public urban space in the city and how history, geography, culture, physical connections and architectural form contribute to its formation. Explores how contemporary cities are transforming their urban environments through design.

*Restriction: ARCHGEN 730-732, 734-735, URBDES 702

**ARCHGEN 744**
**Special Topic**
*Restriction: ARCHGEN 740-743, 745

**ARCHGEN 750**
**Heritage Processes**
Examines heritage conservation legislation, policy, guidelines and processes. Includes international context as well as New Zealand laws and processes.

**ARCHGEN 751**
**Heritage Assessment and Conservation Planning - Level 9**
Examines the assessment of cultural heritage value and the use and preparation of conservation plans to guide heritage conservation work. Coursework comprises the researching and writing of a conservation plan.

**ARCHGEN 752**
**Conservation of Materials**
Examines the theory and practice of conserving materials commonly found in heritage buildings and artefacts, including stone, brick, timber, concrete and steel.

**ARCHGEN 753**
**Diagnosis and Adaptation**
Examines the investigation of existing building fabric, diagnosis of issues impacting upon the state of repair or the level of comfort, and the adaptation of heritage buildings,
including strengthening, energy upgrading, reuse and the design of additions and alterations.

**ARCHGEN 754** 30 Points
**Research Project - Level 9**
A research project in the field of heritage conservation which may include an internship. Placements and topics to be approved by the Head of School of Architecture and Planning.
Prerequisite: ARCHGEN 750, 751

**ARCHGEN 790** 30 Points
**ARCHGEN 790A** 15 Points
**ARCHGEN 790B** 15 Points
**Research Project - Level 9**
Restriction: ARCHGEN 793, 795
To complete this course students must enrol in ARCHGEN 790 A and B, or ARCHGEN 790

**ARCHGEN 793A** 60 Points
**ARCHGEN 793B** 60 Points
**Thesis - Level 9**
A study of research processes, together with a thesis involving a discourse on a topic approved by the Head of School of Architecture and Planning for the degree of Master of Architecture under the guidance of an appointed supervisor.
Restriction: ARCHGEN 795, 796, 797
To complete this course students must enrol in ARCHGEN 793 A and B

**ARCHGEN 795A** 45 Points
**ARCHGEN 795B** 45 Points
**Thesis - Level 9**
A study of research processes, together with a thesis involving a discourse on a topic approved by the Head of School of Architecture and Planning for the degree of Master of Architecture under the guidance of an appointed supervisor.
Restriction: ARCHGEN 793, 796, 797
To complete this course students must enrol in ARCHGEN 795 A and B

**ARCHGEN 799** 60 Points
**ARCHGEN 799A** 30 Points
**ARCHGEN 799B** 30 Points
**Research Report - Level 9**
A report involving research and application in an architectural subject for the Postgraduate Diploma in Architecture under the guidance of an appointed supervisor.
Prerequisite: ARCHGEN 700 or 702
Restriction: ARCHGEN 798
To complete this course students must enrol in ARCHGEN 799 A and B, or ARCHGEN 799

**Dance Studies**

**Stage I**

**DANCE 101** 15 Points
**DANCE 101G** 15 Points
**Introduction to Dance and Creative Processes**
To develop an understanding of our moving bodies through movement awareness, dance improvisation, choreography and creative and analytic writing. Students will undertake both theoretical and practical classes focusing on a range of practices that dancers and movement practitioners use to facilitate kinaesthetic awareness, experimentation, communication and choreography. Students will explore somatic theory and practice, improvisation scores, choreography and dance analysis. DANCE 101 not available for BDanceSt.

**DANCE 107** 15 Points
**Dance History and Contexts**
Study of the historical development in western theatre dance from the nineteenth century to the beginning of the twentieth century.

**DANCE 110** 15 Points
**Contemporary Dance and Choreography I**
A study of contemporary dance practices through the choreography, creative facilitation and techniques of contemporary dance makers. For BDanceSt students only.

**DANCE 112** 15 Points
**Dance Kinesiology**
Introduction to physiological and kinesiological analysis of dance movements. The study of skeletal alignment, muscular balance and mechanical efficiency.

**DANCE 120** 15 Points
**Dance Vocabulary I**
Introducing the study of diverse dance vocabulary including ballet, contemporary dance and the field of somatics. Students will examine specific technical requirements of identified dance vocabulary.

**DANCE 121** 15 Points
**Dance Technique**
Continuation of work undertaken in DANCE 120 with exploration of skills, repertoire, and merging dance styles.
Prerequisite: DANCE 120

**DANCE 131** 15 Points
**Dance Education**
The study of dance education practice and theory that shapes teaching and learning of dance in school and community contexts. Note: this course does not meet the requirements for teacher registration in New Zealand.

---

**Stage II**

**DANCE 200** 15 Points
**DANCE 200G** 15 Points
**Dance and Culture**
Examines the interrelationship between dance and wider political and cultural movements through practical dance classes and theoretical investigations into diverse cultural environments around the world. Students physically and theoretically engage in the study of various dance forms such as Tango, Salsa, Dabkeh, traditional Chinese dance and Bharata Natyam.
Prerequisite: 60 points passed

**DANCE 201** 15 Points
**Dance and Interdisciplinarity**
Building integrated connections with other arts disciplines such as music, literature, art.
Prerequisite: DANCE 101 or 110

**DANCE 207** 15 Points
**Choreography and Performance**
Focuses on the development and consolidation of choreographic and performance skills.
Prerequisite: Any 30 points at Stage I in Dance Studies
DANCE 210 15 Points
Contemporary Dance and Choreography 2
Study of contemporary choreography practice and theory. Students create choreography that may be shared through film and/or live performances. 
Prerequisite: DANCE 101 or 110

DANCE 211 15 Points
Special Topic
Prerequisite: Any 30 points at Stage I in Dance Studies

DANCE 212 15 Points
New Zealand Dance Contexts and History
Emphasis is on the socio-historical developments of dance in the twentieth century. Choreographers, dancers, designers and composers who have created, influenced and shaped dance in New Zealand will be studied via lectures, videos, scores, and reconstructions. 
Prerequisite: DANCE 107

DANCE 215 15 Points
Special Topic: Styles and Techniques: Street Dance and Jazz
Prerequisite: Any 30 points at Stage I in Dance Studies

DANCE 216 15 Points
Indigenous Dance: Aotearoa and Te-Moana-Nui-a-Kiwa
Develops knowledge of foundational creative dance praxis pertaining to the Contexts of Aotearoa and Moana-Nui-a-Kiwa. Explores cultural and kinaesthetic expressions, traditions, protocols and artists’ elements in relation to indigenous concepts and methodologies of dance practices. 
Prerequisite: MĀORI 190, PACIFIC 110

DANCE 220 15 Points
Dance Vocabulary II
Exploring and analysing contemporary dance practices and techniques. Movement skills and performance skills will be developed integrating personal movement with techniques. 
Prerequisite: DANCE 120

DANCE 222 15 Points
Safe Dance Practices
Establishing the theory and practice of safe dance practices within education, performance and health related contexts. Anatomy, kinesiology and dance conditioning methodologies will be studied in relation to dance practice. 
Prerequisite: DANCE 112

DANCE 231 15 Points
Community Dance
Entering diverse community settings and teaching and learning dance; analysing the roles and functions of dance in your own and others’ communities. Note: this course does not meet the requirements for teacher registration in New Zealand. 
Prerequisite: DANCE 131

DANCE 250 15 Points
Special Topic: Social Dance
Prerequisite: Any 30 points at Stage I in Dance Studies

Stage III

DANCE 300 15 Points
Dance Project
Resident/Guest Artist project that gives students an intensive experience of a particular choreographic vocabulary and repertoire. Not available to BA students. 
Prerequisite: 30 points at Stage II in Dance Studies

DANCE 301 15 Points
Dance and Improvisation
Developing an embodied personal practice, and understanding of the theory and practice of contact improvisation and its influence in dance, education and community contexts. 
Prerequisite: Any 30 points at Stage II in Dance Studies

DANCE 302 15 Points
Dance in Aotearoa New Zealand
An examination of dance in New Zealand including Māori, Pacific Island, European, and Asian influences. Emphasis will be on developments during the twentieth century of traditional form into contemporary practice, indigenous forms in NZ society, the developments in ballet, contemporary and popular dance. 
Prerequisite: DANCE 212, or DANCE 200 for students in Transnational Cultures and Creative Practice

DANCE 310 15 Points
Contemporary Dance and Choreography 3
The study of contemporary dance practices through the choreography and techniques of contemporary dance makers. 
Prerequisite: DANCE 210

DANCE 311 15 Points
Dance Production
Dance works are choreographed on the students by leading dance professionals in their chosen genre, resulting in a dance production. Not available to BA students. 
Prerequisite: Any 45 points at Stage II in Dance Studies

DANCE 313 15 Points
Dance and Technology
Project based study of the interaction between technology and dance. Including hands-on practice with video, digital photography and the study of dance for film. 
Prerequisite: Any 30 points at Stage II in Dance Studies

DANCE 314 15 Points
Dance Composition
Studio based course developing improvisational and compositional skills. Choreographic principles are studied as guidelines for structure and design in movement. 
Prerequisite: Any 30 points at Stage II in Dance Studies

DANCE 315 15 Points
He mana Motuhake o te-Moana-Nui-a-kiwa: Contemporary Indigenous Dance
Explores the artistic relationality of Vā and Whakapapa through indigenous dance praxis. Storytelling through complex choreographic methodological and theoretical concepts will navigate the importance of people to place. Offers an insight into distinct Oceania values as it pertains to the Creative Arts in Aotearoa and wider te-moana-nui-a-kiwa. 
Prerequisite: DANCE 216

DANCE 320 15 Points
Dance Vocabulary III
Refining and deepening dance practices and pedagogy strategies specific to contemporary dance. Choreographic research methods are introduced with emphasis upon articulating key questions and processes for problem solving. 
Prerequisite: Any 30 points at Stage II in Dance Studies

DANCE 322 15 Points
Professional Practices
Developing skills and knowledge in planning and managing
for careers in the diverse dance professions. Students will develop arts management and financial business skills, such as learning to write grant applications, CVs and personal plans that relate to employment and funding issues.  

Prerequisite: DANCE 222

Design

Stage I

DESIGN 100 30 Points
Design Methods and Processes 1
Introduces students to human-centred design methods and tools that range from problem framing to prototyping, modelling, and validating solution ideas. Students will address a variety of briefs based on real-world problems and contexts, exploring their personal creative potential through a series of hands-on projects supported by presentations.

DESIGN 101 15 Points
Design Theory and Fundamentals
Introduces historical and contemporary drivers of design as a maker of socio-cultural meaning. Students will learn fundamental design principles used for communication and sense-making, applied across a variety of mediums and technologies. Students will be introduced to tikanga Māori and to the main ethical, socio-cultural, economic and environmental propellants of design.

DESIGN 102G 15 Points
Design for Sustainable Futures
New opportunities are continually emerging in the field of design. This course introduces design as strategy, demonstrating how contemporary design practices have evolved, responded to, and influenced change. By developing a design project that responds to the United Nations Sustainable Development Goals, students will learn how design thinking complements current practice and expands career prospects.

Stage II

DESIGN 200 30 Points
Design Methods and Processes 2
A studio-based course in which students learn new design methods and technologies. Students also develop customised design strategies in response to real-world challenges. By working on a detailed case study, students learn to address issues that affect local communities. Students present their design solutions, learn to pitch design concepts, and evaluate potential outcomes.
Prerequisite: DESIGN 100, 101

DESIGN 201 15 Points
Creative Communities
Introduces how the digital revolution has empowered people to organise themselves, collaborate and co-operate in non-hierarchical, creative ways. Students will explore the role of designers as catalysts for bottom-up, self-determined and distributed creativity within this scenario. They will learn to design for purpose and positive impact, co-creating open and resilient systems within their local communities.
Prerequisite: DESIGN 100, 101

DESIGN 210 15 Points
Identity, Indigeneity and Place
Encourages students to identify their own positionality within Aotearoa and the wider Pacific. Using decolonising methods to critically analyse design solutions, students will explore their own identity and position themselves as cultural practitioners with obligations towards local communities.
Prerequisite: DESIGN 100, 101

DESIGN 211 15 Points
Aotearoa New Zealand Narratives
An introduction to cultural narratives of Aotearoa New Zealand, and the role that contemporary design is playing as a participatory method for community-led change, both from bottom-up and institutional perspectives. Students will explore design as a practice for facilitating self-determination, and learn ways to enable genuine, respectful partnerships in order to tackle complex local and global challenges.
Prerequisite: DESIGN 100, 101

DESIGN 212 15 Points
Local Making
Examines historic and contemporary making techniques, materials, and networks to understand the scope, scale and value of local traditions, with an emphasis on Māori and Pacific practices. Students will collate a personalised database of local inspirations and resources for continued development and professional reference. This will form the inspiration for the students’ own made outcomes.
Prerequisite: DESIGN 100, 101

DESIGN 213 15 Points
Special Topic: Food Design
Prerequisite: DESIGN 100, 101

DESIGN 220 15 Points
Design Innovation
Introduces students to entrepreneurship within creative industries, focusing on the role of strategic design as a driver for purpose-led, sustainable innovation. Students will learn trends, methods and tools for organisational innovation, whether funding, launching, and managing new start-up companies, or dealing with change within existing organisations (entrepreneurship).
Prerequisite: DESIGN 100, 101
**DESIGN 221**

**Professional Design Practice**

Examines personal career paths, design team and project operations and responsibilities in small studios through to large organisations, the role of professional networks, and resources for designers to present themselves and their work to future collaborators.

*Prerequisite: DESIGN 100, 101*

**DESIGN 222**

**Business Tools for Designers**

Examines the most relevant tools that designers use for project management and business development. This includes services and technologies involved in strategic planning, content management, scheduling, communicating, collaborating, costing, client relations, impact planning, and product and market research.

*Prerequisite: DESIGN 100, 101*

**DESIGN 223**

**Special Topic: Game Design**

*Prerequisite: DESIGN 100, 101*

**DESIGN 230**

**Design, Wellbeing and Communities**

Students will identify and analyse how selected design interventions contribute to the health and wellbeing of communities in a range of contexts. Using service and experience design methods students will present ethical and feasible design strategies that examine notions of wellbeing, health, happiness and freedom, from individual to community level perspectives.

*Prerequisite: DESIGN 100, 101*

**DESIGN 231**

**The Future of Work and Play**

Students will analyse how global techno-social changes such as automation and climate change could impact the way we work and play, now and in the future. Students will critically speculate about possible and probable futures by developing fictional scenarios which test a range of design concepts for transition into preferable futures.

*Prerequisite: DESIGN 100, 101*

**DESIGN 232**

**Smart Homes and Cities**

Introduces the main drivers, strategies, and technologies that make smart cities efficient and sustainable. Students will analyse case studies to understand how these cities work from a systems-level perspective to a human-scale, experiential level. They will propose concept solutions to identified problems and opportunities, demonstrating how future homes and cities may operate synergistically through a connected system of interfaces and services.

*Prerequisite: DESIGN 100, 101*

**DESIGN 233**

**Design for the Natural Environment**

An overview of the ways that design can promote and actualise the regeneration of our natural environment through collaborative, systemic, and circular innovation. Students will learn fundamental theory, frameworks and methods to create positive impact using design strategy within the fields of environmental sustainability and conservation.

*Prerequisite: DESIGN 100, 101*

**DESIGN 240**

**Designing with Data**

Introduces students to the impact data representation has on public perception of global issues. Students will engage and experiment with computational methodologies to interpret, visualise and interact with data sources corresponding to a specific Sustainable Development Goal. Students will produce provocative data-driven visualisations that promote a call-to-action related to a foreseeable local or global crisis.

*Prerequisite: DESIGN 100, 101*

**DESIGN 241**

**Designing Mixed Realities**

Introduces an overview of new materials, products and processes connecting virtual and physical worlds. Students will explore these alternative realities as catalysts for positive impact. Students will experiment with technologies to design projects that augment human experiences in hybrid environments.

*Prerequisite: DESIGN 100, 101*

**DESIGN 242**

**Design and Autonomous Technology**

Introduces the major social, ethical, and technical trends driving the adoption of autonomous technologies and artificial intelligence. Students will explore the expanding role design can play within this field, through a purpose-led, human-centred perspective. Students will produce a prototypical device designed to have autonomous capabilities to affect human or ecological advancement.

*Prerequisite: DESIGN 100, 101*

**DESIGN 243**

**Design and Assistive Technologies**

Students will investigate design interventions that have successfully employed assistive strategies to improve or extend human movement, sensation or mental capacity for a range of individuals and communities. Students will experiment with a range of technologies, experiences and services to design an assistive or rehabilitative intervention that reduces inequalities amongst individuals.

*Prerequisite: DESIGN 100, 101*

### Stage III

**DESIGN 300**

**Design Research Methodologies**

Introduction to a range of key design methodologies that inform contemporary design thinking, research and practice within Aotearoa New Zealand, with reference to Mana Moana philosophies of making and community. Drawing on methodological principles, students learn how to develop design strategies, apply design processes and test their design concepts. Consideration will be given to the phasing and planning of design investigations from data analytics to design concepts to practical methods and proposed solutions.

*Prerequisite: DESIGN 100, 101 and 90 points from DESIGN 200-243*

**DESIGN 301**

**Advanced Design Methods Capstone**

Students will complete a major design project in collaboration with local stakeholders. Students will develop a design strategy in response to a real-world issue. They will engage in research and practical studio work, select appropriate methods, and use multiple tools and
### Course Prescriptions

**Technologies to produce a prototype. Outcomes will be presented to and critiqued by design professionals.**

**Prerequisite:** DESIGN 200, 201, 300 and 90 points from DESIGN 210-243  
**Corequisite:** DESIGN 302

**DESIGN 302 15 Points**  
**Critical-Technical Positioning**  
Students will produce a written account of their capstone project (DESIGN 301). The account will take the form of an essay or technical report supported by visual evidence. It will provide a critical contextualization of the capstone project in relation to global challenges, and use design theory to describe the project from problem framing through to execution.  
**Prerequisite:** DESIGN 200, 201, 300  
**Corequisite:** DESIGN 301

| FINEARTS 101 30 Points | **Studio 1.1** | Students will work on a range of 'ideas based' activities that will challenge them progressively to develop and extend their knowledge and skills. These range from short focused projects to those allowing more time for research and personal development. Students will cover a range of the disciplines available in the school and be encouraged to explore in a cross-disciplinary manner.  
**Corequisite:** FINEARTS 103 or 104 |
| FINEARTS 102 30 Points | **Studio 1.2** | An extension of projects from FINEARTS 101 Studio 1.1. Students will be encouraged to develop personal creative directions with a focus on experimentation and interdisciplinary art and design outcomes.  
**Prerequisite:** FINEARTS 101  
**Corequisite:** FINEARTS 103 or 104 |
| FINEARTS 103 15 Points | **Drawing and Related Practices** | An introduction to different approaches to drawing and its relationship with contemporary practices in art and design, including traditional approaches to drawing and drawing techniques. Students will also explore drawing as a conceptual process. Research which investigates drawings as both a technical and conceptual practice is encouraged.  
**Prerequisite:** FINEARTS 101  
**Corequisite:** FINEARTS 103 or 104 |
| FINEARTS 104 15 Points | **Introduction to Critical Studies** | An introduction to contemporary art from a practice-led perspective. Themes, ideas and movements relevant to the field of contemporary art will be introduced, alongside key theoretical and philosophical terms. Students study the ways these contextual and conceptual frameworks inform art production. Emphasises the multiple ways in which
art-practice engages with these frameworks. Aspects of tikanga Māori and its relationship to art-making will also be introduced.

Provides an understanding of contemporary artistic practice relevant to students' developing interests. Students will engage with current art ideas, methodologies and positions and will gain experience in understanding their own work in relationship to local and international contemporary art practices. Consists of the supervised completion of a number of prescribed briefs, and focused contextual study in an area relevant to the student's broad interests. Discipline-based and interdisciplinary learning will be...
undertaken, with a dual emphasis on the development of conceptual thinking and material languages.
Prerequisite: FINEARTS 101, 102, 103, 104
Restriction: FINEARTS 201, 203

FINEARTS 208
Studio Practice 2
Focuses on the conditions of reception relevant to students' work including ways meaning is created; how art works are read; and the significance of presentation strategies. Consists of a range of supervised briefs embracing media specific, interdisciplinary, Māori, local and global approaches to creating art works. Students will also engage in focused contextual study in an area relevant to their studio interests.
Prerequisite: FINEARTS 207 or 209
Restriction: FINEARTS 202, 206

FINEARTS 209
Studio Practice 1
Provides an understanding of contemporary artistic practice relevant to students' developing interests. Students will engage with current art ideas, methodologies and positions and will gain experience in understanding their own work in relationship to local and international contemporary art practices. Consists of the supervised completion of a number of prescribed briefs. Discipline-based and interdisciplinary learning will be undertaken, with a dual emphasis on the development of conceptual thinking and material languages.
Prerequisite: FINEARTS 101, 102, 103, 104
Restriction: FINEARTS 201, 203, 207

FINEARTS 210G
Understanding Contemporary Visual Arts Practice
How does the contemporary art world work? Premised on the idea that there are many art worlds, this course examines global and local contemporary artistic practices, theories, histories and institutions, exploring the practices and discourses that constitute these worlds. No prior knowledge or experience of contemporary art is assumed.
Prerequisite: 60 points passed

FINEARTS 211G
Understanding Contemporary Fashion Design
Investigates the relationship between fashion design and identity to build understanding of the increasing rapidity of clothing change as both the product of individual choice and the manifestation of a need for community. The emphasis will be on the consumption of fashion and its relationship to the human body with reference to fashion theory in the context of the broader literatures of gender, class and ethnicity.
Prerequisite: 60 points passed

FINEARTS 212
Studio Practice 2
Focuses on the conditions of reception relevant to students' work including ways meaning is created; how art works are read; and the significance of presentation strategies. Consists of a range of supervised briefs embracing media specific, interdisciplinary, Māori, local and global approaches to creating art works.
Prerequisite: FINEARTS 207
Restriction: FINEARTS 202, 206, 208

FINEARTS 220
Nga Toi Taketake: Fibre and Textile
Engages students with concepts, materials and methods of making that are indigenous to Aotearoa. Explores ways of developing and creating contemporary art in fibre and textile.
Prerequisite: FINEARTS 101, 102, 103, 104, or FINEARTS 110, 113 and FINEARTS 111 or 112

FINEARTS 221
Nga Toi Taketake: Kōhatu / Stone
Engages students with concepts, materials and methods of making that are indigenous to Aotearoa. Explores ways of developing and creating contemporary art in kōhatu/stone.
Prerequisite: FINEARTS 101, 102, 103, 104, or FINEARTS 110, 113 and FINEARTS 111 or 112

FINEARTS 222
Printed Matter: Printmaking
Explores contemporary printed matter. Students will work with a range of traditional printmaking technologies that may include monoprint, screen print, woodcut, and photogravure as well as expanded, experimental processes using digital and laser cutting technologies.
Prerequisite: FINEARTS 101, 102, 103, 104, or FINEARTS 110, 113 and FINEARTS 111 or 112

FINEARTS 223
Printed Matter: Publication
Introduces students to print publication as a site of contemporary practice exploring ways in which artists, designers, and activists have made use of the printed form as a social medium. Students will experiment with the format and materiality of printed media, and the experience of viewing, through the production of self-published works such as artist's books, posters, and zines. Technical workshops will develop skills in digital and hand-made print and production methods.
Prerequisite: FINEARTS 101, 102, 103, 104, or FINEARTS 110, 113 and FINEARTS 111 or 112

FINEARTS 224
Time-Based: Moving Image
Offers a practical exploration of moving image production. Students will learn camera techniques and editing skills to support the development of experimental video and audio while learning how digital workflow and project management can affect a creative outcome. Students can work collaboratively or individually, using a range of filmmaking equipment and editing software to create moving image works.
Prerequisite: FINEARTS 101, 102, 103, 104, or FINEARTS 110, 113 and FINEARTS 111 or 112

FINEARTS 225
Time-Based: Action and Documentation
Considers how documentation informs our understanding of time-based action and/or performance art and what might be done to retain and communicate the effects of a passing event. Students explore their own time-based practices and develop appropriate methods of documentation including video, photography, drawing, and sound recording. Students can work both collaboratively and individually, using documentation as a visual and conceptual tool for the creation of artworks.
Prerequisite: FINEARTS 101, 102, 103, 104, or FINEARTS 110, 113 and FINEARTS 111 or 112

FINEARTS 226
Photography: Digital Photography
Covers the conceptual and practical possibilities of digital photography. Students will experiment with a wide range of image-making technologies including SLR digital cameras. Lighting considerations and a range of options for printing...
digital photos will be explored. Contemporary photographic practices will be covered within the context of global image circulation.  
Prerequisite: FINEARTS 101, 102, 103, 104, or FINEARTS 110, 113 and FINEARTS 111 or 112

FINEARTS 227  15 Points
Photography: Analogue Photography
Provides students with an overview of analogue photographic processes. Students will gain skills in darkroom photography, including a practical understanding of film camera technologies, developing and printing processes, and the use of darkroom techniques to refine and manipulate photographic imagery.
Prerequisite: FINEARTS 101, 102, 103, 104, or FINEARTS 110, 113 and FINEARTS 111 or 112

FINEARTS 228  15 Points
Painting: Materiality and Process
Considers the various ways in which actions, processes, and materials can shape a painting practice. Covers a range of painterly actions and a self-generated list of ‘paint-related’ verbs (to roll, to smear, to scrape). Students will create a ‘catalogue’ of marks and manipulations of paint. They will then develop these ideas through a studio practice which explores abstraction, materiality, and considerations of form. A broad range of traditional, modern and expanded paint properties and mediums will be considered.
Prerequisite: FINEARTS 101, 102, 103, 104, or FINEARTS 110, 113 and FINEARTS 111 or 112

FINEARTS 229  15 Points
Painting: Painted Images
Explores contemporary techniques of still life and representational painting as a means of re-thinking visual histories. Students will gather and arrange source materials and object references and explore a range of painted responses. Emphasises the construction and preparation of supports and surfaces, colour theory, and the methods and mediums that support painting practice.
Prerequisite: FINEARTS 101, 102, 103, 104, or FINEARTS 110, 113 and FINEARTS 111 or 112

FINEARTS 230  15 Points
Sculpture: Constructing and Fabricating
Based in the metal and wood workshops, this course will guide students in the exploration of materials and construction processes. Develop sculptural works in metal or wood. Students will use tools and techniques such as cutting, joining and welding.
Prerequisite: FINEARTS 101, 102, 103, 104, or FINEARTS 110, 113 and FINEARTS 111 or 112

FINEARTS 231  15 Points
Sculpture: Shaping and Casting
Engages with tactile processes of object-making and reproduction to create works of contemporary art using clay, wax, and other materials. Students will make reproductions of their handmade objects using a range of casting processes and explore how multiples impact the form and content of artworks.
Prerequisite: FINEARTS 101, 102, 103, 104, or FINEARTS 110, 113 and FINEARTS 111 or 112

FINEARTS 232  15 Points
Performance: Communication, Identity and Community
Focuses on performance art as a means of communication. Examines the ways in which performance can be integral to an artistic and cultural identity, contemporary life, and community.
Prerequisite: FINEARTS 101, 102, 103, 104, or FINEARTS 110, 113 and FINEARTS 111 or 112

FINEARTS 234  15 Points
Creative Careers: Pathways
Emphasises the practical aspects of establishing a career as a creative practitioner. Covers writing proposals, applications, artist’s statements, and other practical tools for a creative career. Focuses on the ability to communicate ideas effectively to peers and professional networks.
Prerequisite: FINEARTS 101, 102, 103, 104, or FINEARTS 110, 113 and FINEARTS 111 or 112

FINEARTS 235  15 Points
Creative Careers: Making Exhibitions
Students will consider the types of roles and structures that exist in contemporary art worlds, with a focus on curatorial practice and exhibition making from the perspective of the artist. Engaging with the local art world, students will develop a critically informed exhibition proposal for a real-world context.
Prerequisite: FINEARTS 101, 102, 103, 104, or FINEARTS 110, 113 and FINEARTS 111 or 112

FINEARTS 236  15 Points
Special Topic: Drawing as Creative Thinking
An introduction to approaches to drawing and its relationship with contemporary practices in art and design, including digital and analogue drawing techniques. The course explores drawing as a conceptual method of thinking through making.
Prerequisite: FINEARTS 101, 102, 103, 104, or FINEARTS 110, 113 and FINEARTS 111 or 112

FINEARTS 237  30 Points
Indigeneity and Culture: Ko wai ariki? Explore whakapapa, whakawhanaungatanga, genealogy, and relationality as the foundation of creative practice in the contexts of Aotearoa and Te-Moana-Nui-a-Kiwa. Related indigenous methodologies and concepts will be explored.
Prerequisite: FINEARTS 101, 102, 103, 104, or FINEARTS 110, 113 and FINEARTS 111 or 112

FINEARTS 238  30 Points
Indigeneity and Culture: Power and Place
Explores and examines the ongoing impact of colonisation, imperialism, and migration through art making. Related indigenous methodologies and concepts will be explored.
Prerequisite: FINEARTS 101, 102, 103, 104, or FINEARTS 110, 113 and FINEARTS 111 or 112

FINEARTS 239  30 Points
Image, Object and Materiality: What is an Image?
Addresses image-making in a digital world. Explores the relation between the fabrication of individual images and their circulation through mass media using different mediums. Reflection on the different ways artists might embrace or subvert the profusion of internet imagery.
Prerequisite: FINEARTS 101, 102, 103, 104, or FINEARTS 110, 113 and FINEARTS 111 or 112

FINEARTS 240  30 Points
Image, Object and Materiality: What is an Object?
Addresses object-making in a digital world. Responds to the immaterial condition of internet culture, students will generate sculptural objects that exist in real space.
Prerequisite: FINEARTS 101, 102, 103, 104, or FINEARTS 110, 113 and FINEARTS 111 or 112

FINEARTS 241  30 Points
Indigeneity and Culture: Power and Place
Explores and examines the ongoing impact of colonisation, imperialism, and migration through art making. Related indigenous methodologies and concepts will be explored.

**Course Descriptions**

- **Classical Theory and Musicianship 1**
  Continuation of work begun in MUS 104 on music theory, aural skills and musicianship. Includes a choral component. 
  *Prerequisite: MUS 104*

- **Classical Theory and Musicianship 2**
  Continuation of work in MUS 203 on music theory, aural skills and musicianship. Includes a choral component. 
  *Prerequisite: MUS 203*

- **Classical Theory and Musicianship 3**
  Continuation of work in MUS 204 on music theory, aural skills and musicianship. Includes a choral component. 
  *Prerequisite: MUS 204*

- **Conducting 1**
  The study of conducting including listening to and writing about a wide variety of music from all historical periods. The practical component of this course concentrates on posture, patterns and gesture. Studies include examples from choral and orchestral repertoire. 
  *Prerequisite: MUS 106*

- **Conducting 2**
  An introduction to rehearsal planning and management, baton technique, the development of conducting gesture, and advanced score preparation. Repertoire includes classical symphonies, a cappella repertoire and a selection of choral/orchestral works. 
  *Prerequisite: MUS 206*

- **Composition 3**
  Applied concepts and techniques in instrumental/vocal composition and sonic arts. Students will develop original creative ideas through experimentation with both notational and sound-based approaches to composing, the study of relevant repertoire and the realisation of a portfolio of works for mixed resources that may include solo instruments, voices, small ensembles, found objects/sounds, loudspeakers and visual media. Liaison with performers both within and outside the class is important. 
  *Prerequisite: MUS 110, 111 Restriction: MUS 258*

- **Composition 4**
  Continuation of work undertaken in MUS 210. 
  *Prerequisite: MUS 210*

- **Instrumentation**
  The study of instrumentation including ranges, characteristics and technical aspects of writing, scoring and arranging for strings, wind, brass and percussion will be introduced together with a study of repertoire. 
  *Prerequisite: MUS 101 or 104*

- **Performance 3**
  Further performance work, involving weekly individual lessons and performance classes. (See course outline and instrumental/vocal syllabus for specific curriculum requirements). 
  *Prerequisite: MUS 121 Restriction: MUSIC 220*

- **Performance 4**
  Continuation of work undertaken in MUS 220. (See course outline and instrumental/vocal syllabus for specific curriculum requirements). 
  *Prerequisite: MUS 220*

- **Interpreting Music**
  Academic study of the resources, instruments, techniques, and stylistic conventions relevant to the performance of music from Renaissance to modern times, with an emphasis on works of the eighteenth and nineteenth centuries. Students consider the role that an awareness of historical factors can play in contemporary performance, and gain understanding of some of the key debates surrounding historically informed performance. 
  *Prerequisite: MUS 143*

- **Music Production 1**
  A study of industry-standard studio recording and production techniques supported by practical studio-based exercises. Topics may include: multi-channel recording and editing, band and ensemble recording, analogue and digital production, synthesis, mixing and mastering. 
  *Prerequisite: MUS 230 Restriction: MUS 219*

- **Music Production 2**
  A study of industry-standard studio recording and production techniques supported by practical studio-based exercises. Topics may include: multi-channel recording and editing, band and ensemble recording, analogue and digital production, synthesis, mixing and mastering. 
  *Prerequisite: MUS 243 Restriction: MUS 219*

- **Music in Society**
  The study of music and text in society using a wide-angled lens to explore how it can be intertwined with issues of politics, gender, religion, race, psychology and class. Examples will include music and text in diverse genres and from various places. 
  *Prerequisite: MUS 143 or 30 points from European Studies, German, Italian, Spanish, or Transnational Cultures and Creative Practice*

- **History, Music and Ideas: Rethinking the Classical Canon**
  Raises issues specific to classical music in one or more concentrated historical periods. Students will get to know a designated repertoire of musical works, whilst exploring critical topics such as periodisation, canon formation and reception history. 
  *Prerequisite: MUS 140 or 143 or 145 or 176 Restriction: MUS 240, 345*

MUS 726 15 Points
Aspects of Performance Practice
Selected research for discussion and investigation from the field of Performance Practice and its documentation. The study of source materials; individual projects; performance and/or teaching and direction of music from the area studied.

MUS 727 15 Points
Advanced Auxiliary Performance
Advanced tuition on an approved instrument or voice suitable for a practical component to complement a student’s other music study.

Prerequisite: Departmental approval

MUS 729 30 Points
Music Performance Research Project - Level 9
A customised performance project incorporating solo performance, conducting, relevant ensemble work, improvisational skills, presentation of original work and the application of advanced instrumental techniques, as appropriate.

Prerequisite: 30 points from MUS 707, 720, 770, 780

MUS 735 15 Points
Advanced Studies in Music Production and Technology
An intensive interface-based course that focuses on advanced theories and practice of music production and computer music.

Prerequisite: 15 points from MUS 258, 315, 330-334, 358, 383

MUS 736 15 Points
Creative Studies in Music Production
The development of advanced creative and technological skills leading to computer-based creative practice.

Prerequisite: 15 points from MUS 315, 330-334, 383

MUS 737 30 Points
Music Technology Research
A customised creative practice or theoretical investigation of music technology-related disciplines including: computer music, musical interface design, interactive art, technology in music education, performance technology, music and AI, and sound design.

MUS 738 30 Points
Creative Practice Research Project - Level 9
A customised creative practice project employing a combination of performance, composition and/or production modes.

Prerequisite: 30 points from MUS 710, 720, 737, 770, 780

MUS 742 30 Points
Research Project - Level 9
Prerequisite: MUS 743

MUS 743 15 Points
Advanced Music Research - Level 9
A critical exploration of advanced concepts and methods for music research, including historical, qualitative, indigenous and practice-led approaches suited to the advanced study of Music. Students develop, apply and critique knowledge of traditional and cutting-edge qualitative methods to design an independent research project for their chosen research topic and to write a substantial research essay.

MUS 744 15 Points
Musicians’ Health and Well-being
An advanced examination of the critical physical and psychological health issues musicians encounter when preparing for performances and when performing. Topics include aspects of musculoskeletal health, focal dystonia, the protection of the voice and hearing, the role of movement disciplines and the management of stress and music performance anxiety. An inquiry into research from both science and arts disciplines that informs how musicians maintain physical and psychological well-being.

|             |               | Students undertake a research project combining compositional and performance elements from multiple
genres: world music, classical, rock, for example, in a blend of contemporary influences. Students contribute original material and written documentation for a recorded portfolio.

**Prerequisite: MUS 371**

**MUS 780 30 Points**

**Popular Music Research**

The development of advanced songwriting and popular music composition skills. Students engage in an in-depth study of lyric writing, word setting, and compositional elements, compose a significant body of new songs and compositions, and produce a research portfolio of recordings and scores of these works.

**Prerequisite: MUS 381**

**MUS 785A 30 Points**

**MUS 785B 60 Points**

**Research Portfolio - Level 9**

To complete this course students must enrol first in MUS 785A and then 785B

**MUS 786B 60 Points**

**Thesis - Level 9**

To complete this course students must enrol first in MUS 786A and then 786B

**URBDES 710 30 Points**

**Urban Design Studio 1 - Level 9**

An urban design project involving in-depth specialised research on the implications for urban design at the strategic scale.

**URBDES 720 30 Points**

**Urban Design Studio 2 - Level 9**

An advanced urban design project involving highly specialised research related to the analysis and design of the built environment.

**Prerequisite: URBDES 710**

**URBDES 730 30 Points**

**Urban Design Research Project**

Individual research project in an aspect of urban design theory or practice.

**Tertiary Foundation Certificate Creative Arts**

**Foundation Courses**

TFCCAI 92F 15 Points

**Foundation Creative Arts**

Helps develop a practical and theoretical understanding of the skills and practices employed by performing artists, visual artists and designers when creating a performance, art object or design portfolio.

**Urban Planning**

**Stage I**

**URBPLAN 101G 15 Points**

**Introduction to Urban Planning**

An introduction to the discipline of urban planning, examining its evolution, theory, practice, profession, ethics, values and future trends. Offers a critical exploration of the challenges facing urban planners today and into the future.

**Restriction: PLANNING 100G**

**URBPLAN 122 15 Points**

**Introduction to Society, Civics and Governance Issues for Urban Planning**

An introduction to the concepts of civics and governance in New Zealand and its international obligations, the theories and values of democracy, natural justice and the role institutional behaviour. Provides an understanding of the basis of the New Zealand legal system, the Te Tiriti o Waitangi/Treaty of Waitangi and public policy development.

**Restriction: URBPLAN 102**

**URBPLAN 123 15 Points**

**Urban Planning Economics**

An introduction to economic theory, at both the micro and macro levels, and its impact and influence on urban planning policy development and decision making. Includes reference to how economic development can be integrated into effective urban planning policy formulation.

**Restriction: URBPLAN 102**

**URBPLAN 124 15 Points**

**Urban Environmental Issues**

An introduction to ecological processes, urban resilience and growth in an urban context. Explores how urban planning systems can work in sympathy with, or in contradiction to, such processes, and the implications of this for urban planning practice.

**Restriction: URBPLAN 105**

**URBPLAN 125 30 Points**

**Urban Planning Studio 1**

An introduction to studio and design thinking, the urban design discipline, research skills (quantitative and qualitative) and methods, and the land tenure system. Enables students to read plans at different scales and provide visual literacy skills, including GIS and other relevant tools, through a studio-based design exercise relevant to urban planning.
Course Prescriptions

Stage II

URBPLAN 201 15 Points
Urban Policy Analysis
The application of critical quantitative and qualitative research skills and methods for urban planning.
Prerequisite: URBPLAN 101-105, or 30 points passed in Global Environment and Sustainable Development

URBPLAN 202 15 Points
Urban Planning Implementation and Law
A critical analysis of the concepts and principles of relevance to urban planning legislation, practice and decision-making.
Prerequisite: URBPLAN 101-105

URBPLAN 203 15 Points
Urban Infrastructure
A critical analysis of infrastructure provision, modelling, and assets management provision.
Prerequisite: URBPLAN 101-105, or GEOG 101, 102, 140 or GISCI 140, and URBPLAN 103

URBPLAN 204 15 Points
Urban Planning Social Theory and Practice
A critical analysis of the urban social issues, urban social theory, social justice and deprivation, and gender issues.
Prerequisite: URBPLAN 101-105

URBPLAN 205 15 Points
Transportation Planning
A critical analysis of transportation planning, modelling and its relationship with land use activities in the urban environment.
Prerequisite: URBPLAN 101-105, or GEOG 101, 102, 140 or GISCI 140, and URBPLAN 103

URBPLAN 210 15 Points
Urban Planning Studio Three
Research and design techniques and skills for evaluating urban design outcomes against urban design criteria at the neighbourhood scale.
Prerequisite: URBPLAN 110, 111

URBPLAN 211 15 Points
Urban Planning Studio Four
Examines the complex interrelationships of urban planning issues required to achieve effective and sustainable design solutions at the town/city spatial scale.
Prerequisite: URBPLAN 110, 111

URBPLAN 221 15 Points
Social Issues for Urban Planning
A critical understanding of urban social theory, social justice, social equity, gender issues, social diversity and equality, and who has rights to the city. Housing policies, markets, practices, and their relationship with urban sustainability, including transportation planning responses to social dislocation. Provides the ability to understand and undertake Social Impacts Assessments relevant for urban planning.
Prerequisite: URBPLAN 101, 122-126
Restriction: URBPLAN 204

URBPLAN 222 15 Points
Urban Economics
A critical understanding of the principles of urban land use economics, how property markets work and how properties are developed, valued and financed, as well as how urban planning strategies can facilitate, or impede, efficient property markets.
Prerequisite: URBPLAN 101, 122-126
Restriction: URBPLAN 304

URBPLAN 223 15 Points
Urban Planning Law
Prerequisite: URBPLAN 101, 122-126
Restriction: URBPLAN 202

URBPLAN 225 30 Points
Urban Planning Studio 3
Explores the social, economic and consultation and design and report writing skills, factors and tools required to undertake a medium scale re-generation community development project. Studio-based design provides prevention strategies to mitigate the adverse impacts of social dislocation of existing communities and urban gentrification.
Prerequisite: URBPLAN 101, 122-126

URBPLAN 226 30 Points
Urban Planning Studio 4
Enables students to undertake a detailed and in-depth consideration of a contemporary wicked problem currently or potentially challenging urban planning practice through a studio-based design exercise leading to a design solution. Potential wicked problems include the impact of climate change on urban form and communities or the challenges of creating resilient and sustainable communities in light of significant urban growth pressures.
Prerequisite: URBPLAN 101, 122-126

Stage III

URBPLAN 301 15 Points
Urban Economic Development
An evaluation of theories, policies and practices of community and economic development relevant for urban planning.

Academic Integrity
ACADINT A01 0 Points
Academic Integrity Course
An online course designed to increase student knowledge of academic integrity, university rules relating to academic conduct, and the identification and consequences of academic misconduct. Students work through a series of modules, outlining scenarios that they may encounter while studying at university. Each scenario provides information on relevant rules, resources and expected behaviour.

Disability Studies

Stage I
DISABLTY 113G 15 Points
Making Disabilities: The Construction of Ideas
Examines the expression of social and cultural ideas of disability in popular culture through film, television and print media. The course aims to develop skills to examine the construction and maintenance of concepts of disability and disabling identities in popular culture. The consequences of these processes are also discussed and their implications for perpetuating social devaluation, discrimination, and disadvantage.

Stage II
DISABLTY 200 15 Points
Disability Frameworks
A range of models and cultural understandings related to disability are examined. These models provide a framework for understanding ways in which disabled people may experience disability. Social constructs that impact on the lives of disabled people will be explored. The influence of emerging models that portray positive social identities, both individual and collective, will be examined.
Restriction: DISABLTY 112

Stage III
DISABLTY 316 15 Points
Supporting Active Participation
An exploration of theories and strategies that promote active participation of disabled people. An understanding of self-determination and a person-centred approach to promote active participation and citizenship upholds this course.
Prerequisite: HUMSERV 101, 102, 104, 201, 202, 203, 211, SOCWORK 111, 112, 114, 211

How People Learn
Focuses on learning in formal and informal settings and addresses such questions as: why do some things seem easier to learn than others, why do we forget things we once knew, and why do some people learn faster or better than others? Examines the nature of intelligence and how to help personal learning or the learning of others.

Restriction: EDUC 111, 117

EDUC 122 15 Points
EDUC 122G 15 Points
Learning Sexualities
How and what do we learn about sexualities in New Zealand? Learning about sexualities is viewed as occurring both formally (e.g., through sexuality education) and informally (e.g., through the media) in a diversity of social sites. Schools are examined as one significant site where students are offered sexual meanings. The historical derivation and current context of contemporary education about sexuality along with its social effects are investigated.

EDUC 142 15 Points
Health and Physical Education in a Diverse Society
Introduces students to thinking critically about Health and Physical Education. Examines discourses about health and physical activity from historical and sociological perspectives. Introduces diversity as it relates to educational opportunity in Health and Physical Education. Addresses such questions as: How are notions about health and physical education and difference constructed and supported?

Restriction: EDUC 141, EDUCM 141

Stage II

EDUC 200 15 Points
Youth Mentoring
A theoretical and applied study of youth mentoring. Students will develop an understanding of theories of youth and youth mentoring, examine current issues in youth mentoring such as cultural perspectives, developmental considerations, and contexts of youth mentoring. Students will also engage in a mentoring internship where they will demonstrate their ability to integrate and apply their developed knowledge and skills.

Prerequisite: Any 60 points passed and approval from the Course Director

EDUC 201 History of Education 15 Points
An examination of the nature of historical inquiry with reference to New Zealand's educational past; questions why education has been analysed largely as something planned rather than something experienced and introduces oral history as methodology. Selected aspects of the educational histories of other countries will be discussed for comparative analysis.

Prerequisite: Any 60 points passed

EDUC 202 Pasifika Education and Diversity 15 Points
Analyses how experiences and outcomes for learners in contemporary education contexts are shaped by social constructions informed by class, ethnicity, culture, gender, sexuality, and (dis)ability. Named Doctoral Courses

EDUC 801 30 Points
Literature Review
An advanced examination of students’ thesis topic through a rigorous review of the existing literature. The craft of advanced academic writing is developed through literature synthesis and critique, identifying research gaps to explore in their thesis work, developing an academic argument, exploring positionality, and drafting research questions for the thesis.

EDUC 802 30 Points
Theoretical Framework
An advanced examination of the role of theoretical frameworks as the system of concepts, assumptions, expectations and beliefs that supports and informs education research. The craft of advanced academic writing is developed through a detailed description of the chosen theoretical framework, with attention to how the framework informs the study design and research questions.

EDUC 803 30 Points
Study Design
An advanced examination of research methods best suited to undertake the proposed thesis investigation. The craft of advanced academic writing is developed through a discussion of and rationale for the proposed methods including a description of study design, participants, sampling plan, study setting, data collection and analysis techniques. Reliability and validity constraints are also explored.

EDUC 804 30 Points
Thesis Proposal
The craft of advanced academic writing is further developed through refinement of the literature review to present a cogent rationale for the proposed investigation, a clear explanation of how the theoretical framework will guide the study and complete articulation of the proposed methods.

EDCURSEC 608A 7.5 Points
EDCURSEC 608B 7.5 Points

**Physical Education Curriculum**
Develops the curriculum knowledge associated with planning, teaching and assessing physical education in secondary schools. Addresses questions such as: What is physical education and why is it important? How are units and programmes planned using the curriculum and national assessment requirements? How do teachers accommodate assessment qualification requirements in their planning?
*Corequisite: EDCURSEC 607 or 687
To complete this course students must enrol in EDCURSEC 608 A and B, or EDCURSEC 608*

EDCURSEC 611 15 Points

**Teaching Health Education 1**
Integrates multidisciplinary-based knowledge and pedagogical content knowledge with developing understanding, skills, attitudes and values associated with teaching in health education across the secondary school. Addresses questions such as: Why is health education important? How are teachers informed in this subject? How is health education taught ethically and effectively for a diverse range of learners?
*Restriction: EDCURSEC 648*

EDCURSEC 612 15 Points
EDCURSEC 612A 7.5 Points
EDCURSEC 612B 7.5 Points

**Teaching Health Education 2**
Examines further the theories, concepts and research central to the teaching of health education. Addresses questions such as: What do teachers need to know to teach and assess learning in health education? What is authentic health education assessment and how do we determine and monitor success? How does knowledge of curriculum concepts determine learning at senior school levels?
*Corequisite: EDCURSEC 611 or 687
Restriction: EDCURSEC 648
To complete this course students must enrol in EDCURSEC 612 A and B, or EDCURSEC 612*

EDCURSEC 613 15 Points

**Teaching and Learning Science 1**
Develops the content knowledge, skills and understanding consistent with relevant curriculum requirements to enable effective teaching and learning approaches in intermediate and secondary science education. Addresses questions such as: How do teachers design quality learning environments that support positive engagement and effective learning for a diverse range of learners? How is achievement determined and monitored?
*Prerequisite: Departmental approval
Restriction: EDCURSEC 619, 620*

EDCURSEC 614 15 Points
EDCURSEC 614A 7.5 Points
EDCURSEC 614B 7.5 Points

**Teaching and Learning Science 2**
Integrates research, theory and practical experience in examining secondary school science learning contexts. Addresses questions such as: Why is Science important? What is scientific literacy? What pedagogical content knowledge is needed to teach science effectively? How is achievement determined and monitored?
*Corequisite: EDCURSEC 613 or 687
Restriction: EDCURSEC 619, 620, EDCURR 604, 633
To complete this course students must enrol in EDCURSEC 614 A and B, or EDCURSEC 614*

EDCURSEC 615 15 Points

**Teaching and Learning Science 3**
Develops the content knowledge, skills and understanding consistent with relevant curriculum requirements to enable effective teaching and learning approaches in senior secondary science education. Addresses questions such as: How do teachers design quality learning environments that support positive engagement and effective learning for a diverse range of learners? How is achievement determined and monitored?
*Restriction: EDCURSEC 619, 620, EDCURR 608, 633*

EDCURSEC 616A 7.5 Points
EDCURSEC 616B 7.5 Points

**Teaching Chemistry Education**
Develops the content knowledge, skills and understanding consistent with relevant curriculum requirements to enable
effective teaching and learning approaches in senior chemistry education. Addresses questions such as: How do teachers design quality learning environments that support positive engagement and effective learning for senior secondary students? How is achievement determined and monitored?
Corequisite: EDCURSEC 613, 615 or 619, 620 or 687
Restriction: EDCUR 638
To complete this course students must enrol in EDCURSEC 616 A and B

EDCURSEC 617A  7.5 Points  
EDCURSEC 617B  7.5 Points

Teaching Biology Education
Develops the content knowledge, skills and understanding consistent with relevant curriculum requirements to enable effective teaching and learning approaches in senior biology education. Addresses questions such as: How do teachers design quality learning environments that support positive engagement and effective learning for senior secondary students? How is achievement determined and monitored?
Corequisite: EDCURSEC 613, 615 or 619, 620 or 687
Restriction: EDCUR 636
To complete this course students must enrol in EDCURSEC 617 A and B

EDCURSEC 618A  7.5 Points  
EDCURSEC 618B  7.5 Points

Teaching Physics Education
Develops the content knowledge, skills and understanding consistent with relevant curriculum requirements to enable effective teaching and learning approaches in senior physics education. Addresses questions such as: How do teachers design quality learning environments that support positive engagement and effective learning for senior secondary students? How is achievement determined and monitored?
Corequisite: EDCURSEC 613, 615 or 619, 620 or 687
Restriction: EDCUR 637

**EDCURRIC 135** 15 Points
**Socio-cultural Foundations of Health and Physical Education**
Introduces subject matter knowledge in the socio-cultural foundations of Health and Physical Education. Addresses such questions as: What is the nature of sport and why do people play it? In what ways is the body a cultural construct? What educational and cultural practices influence human movement culture and mediate understanding of human physicality?

**Stage II**

**EDCURRIC 200** 15 Points
**Biophysical Concepts in Physical Education**
Develops knowledge and understanding of exercise physiology and motor skill learning in the context of the teaching of Physical Education. Addresses such questions as: What role does physiology play during exercise? What physiological responses occur during, and as a result of exercise? What is the nature of skill learning? What theories inform our understanding of skill acquisition?

**Prerequisite: EDCURRIC 132, 133**

**EDCURRIC 201** 15 Points
**Mathematics and Statistics Education 2**
Develops knowledge, understandings and skills that are effective in the successful teaching of mathematics and statistics. Engage with planning, teaching and assessing mathematics and statistics in responsive ways designed...
to improve engagement and success for diverse learners of mathematics.
Prerequisite: EDCURRIC 108
Restriction: EDCURRIC 204

EDCURRIC 202 15 Points
Languages and Literacy Education Primary 2
Deepens the knowledge, skills and attitudes associated with planning, teaching and assessing for individual students’ learning in the English curriculum. Addresses questions such as: What are effective literacy practices for working with individual learners? How are wider concepts of literacy including bilingualism and biliteracy developed? How is learning monitored and assessed?
Prerequisite: EDCURRIC 102
Restriction: EDCURRRM 202

EDCURRIC 203 15 Points
Languages and Literacies in Education 2
Applies learning focused pedagogical and curriculum content knowledge, using evidence to scaffold learning and to improve teaching.
Prerequisite: EDCURRIC 109
Restriction: EDCURRIC 202

EDCURRIC 204 15 Points
Primary Mathematics and Statistics Education 2
Develops the knowledge, skills and understanding for designing quality learning experiences for diverse learners. Considers questions related to primary school mathematics and statistics education such as: What are the concepts and learning progressions in the national curriculum? What theoretical models of teaching, learning and assessment best inform teachers about the growth of understanding? What constitutes effective teaching practice?
Prerequisite: EDCURRIC 104
Restriction: EDCURRIC 203, EDCURRM 204

EDCURRIC 205 15 Points
Science and Technology Education 2
Through inquiry, develop capability and understanding of the role of science and technology in education and society. Apply integration principles with pedagogical, content, assessment and curriculum knowledge to science and technology learning experiences resulting in valued outcomes for diverse akonga.
Prerequisite: EDCURRIC 113

EDCURRIC 206 15 Points
Health and Physical Education and Social Studies Education 2
Critiques pedagogies and practices in Health and Physical Education and Social Studies in relation to their effectiveness for supporting diverse akonga. Developing pedagogical, content, assessment and curriculum knowledge is utilised to design approaches for learning and teaching which promote valued outcomes for diverse akonga.
Prerequisite: EDCURRIC 119

EDCURRIC 207 15 Points
Curriculum and Pedagogy
Critically examines theories, approaches and key curriculum influences. Examines the critical role of teacher knowledge, inquiry and reflection in implementing appropriate curriculum and assessment for infants, toddlers and young children. Critically explores the relationship between assessment, curriculum, pedagogy and learning, including Kaupapa Māori and Pasifika perspectives.

EDCURRIC 208 15 Points
Investigation and Exploration
Critically examines curriculum approaches that promote children's exploration and learning in science, technology, engineering and mathematics. Key concepts, processes and pedagogies relating to these disciplines are considered. Explores children's learning through play and holistic understandings of infant's, toddler's and young children's learning.

EDCURRIC 209 15 Points
Literacies, Languages, and Cultures
Critically explores responsive, equitable and inclusive pedagogies to support diverse ākonga in learning and developing languages and multi-modal literacies. Examines assessment, planning and teaching that take account of ākonga, whānau and communities. Issues related to literacies, languages and cultures in Aotearoa are critically examined. The construction and interpretation of children's texts are explored.

EDCURRIC 211 15 Points
Languages and Literacies
Develops knowledge, critical skills and dispositions associated with assessing, planning and teaching for children's learning in languages and literacies. Addresses questions such as: What do teachers need to know and be, to teach with diverse learners, family, whānau and communities? What resources and strategies maximise complexity and continuity such that all children identify as competent and confident communicators in Aotearoa New Zealand?
Restriction: EDCURRIC 631

EDCURRIC 212 15 Points
Mathematics in the Early Years
Develops knowledge and understanding of early mathematical concepts and their relationship with holistic learning environments. Considers questions such as: What are early mathematical concepts? What is effective planning for mathematical possibilities within a play-based early childhood programme? What constitutes an holistic approach to mathematics learning?

EDCURRIC 213 15 Points
Social Sciences Education
Develops knowledge, skills, dispositions associated with children's learning and social sciences education. Addresses questions such as: What do teachers need to know about belonging, contribution, family and community, and empowerment? What do teachers need to understand about culture and identity? How does pedagogical documentation support learning and teaching? What resources and strategies maximise contribution and participation?

EDCURRIC 216 15 Points
Hauora
Inquires into socio-ecological determinants of health in New Zealand society and the implications of these for the tenets of hauora and holistic wellbeing. Critically considers learning and teaching approaches and resources which enhance the holistic wellbeing and participation of diverse ākonga and their whānau in early childhood contexts. Explores connections between the wellbeing of teachers and ākonga.

EDCURRIC 217 15 Points
Creative Arts in the Early Years
Explores the role of the Arts (dance, drama, music and
visual art) in contributing to infants’, toddlers’, and young children’s critical thinking and creativity. Theories and practices of teaching and learning in Arts education are examined, including Māori and Pasifika perspectives, and connections are made to children’s play, holistic wellbeing, identities and citizenship.

EDCURRIC 220 Special Topic
EDCURRIC 230 Physical Education Ngā Kākano
Examines ngā tikanga Māori in the physical education context. Addresses such questions as: How can teachers understand what it is to be Māori? What is the cultural significance of Māori movement forms and ngā mahi a rēhia (games and pastimes)? What is a culturally responsive pedagogy? Includes marae based experiences where Māori values, traditions and beliefs are practised.
Prerequisite: EDUC 142

EDCURRIC 231 Physical Education Practice 3
Further develops the knowledge, skills and dispositions relating to a practical knowledge base with emphasis being placed on integrating theory and practice. Involves practical learning and addresses such questions as: What knowledge is relevant to: teach physical skills effectively, analyse the learning environment and the diverse needs of learners and provide appropriate feedback to assist learning?
Prerequisite: 15 points from EDCURRIC 130, 131

EDCURRIC 232 Physical Education Practice 4
Broadens the practical knowledge base of physical activities appropriate for inclusion in physical education. Emphasis is placed on practical learning about differing physical activity practices in our diverse society. Addresses such questions as: What is the place and range of possibilities of physical activity in contemporary society? How do different communities engage in physical activity?
Prerequisite: 15 points from EDCURRIC 130, 131

EDCURRIC 233 Youth Health Education
Develops an understanding of adolescent health priorities in New Zealand and their influences on teaching and learning in schools. Addresses such questions as: Why is this subject important? What is the health status of adolescents in New Zealand? What content knowledge is relevant to teaching and learning in Health?
Prerequisite: EDUC 142

EDCURRIC 234 Physical Activity and Health
Examines human physiological responses to physical work and the research evidence linking health and physical activity. Addresses such questions as: What is the nature of work? How do humans respond and adapt to work? What activities promote adaptation to physical work? What is the veracity of the evidence linking physical activity and health?
Prerequisite: 45 points from EDUC 142, EDCURRIC 132, 133, 135

EDCURRIC 235 Senior School Health and Physical Education
Examines and critically evaluates Health and Physical Education in the New Zealand Curriculum and contemporary assessment and qualifications for Years 11-13. Addresses such questions as: What knowledge, skills and attitudes are required to teach and assess Year 11-13 students? What are the issues associated with the learning environments, teaching and assessment methods used by teachers at these levels?
Prerequisite: 45 points from EDUC 142, EDCURRIC 132, 133, 135

EDCURRIC 236 Teaching Outdoor Education
Examines the role of outdoor education as an educational process in physical education contexts. Involves camping and other experiential learning to develop outdoor skills, knowledge, attitudes and behaviours for teaching outdoor education in schools. Addresses such questions as: How does pedagogy and programme design support safe, effective learning in the outdoors? What are the legal responsibilities for teaching outdoor education?

EDCURRIC 237 Recreation and Leisure
Examines the nature of recreation and leisure in contemporary society. Addresses such questions as: How does leisure relate to concepts of lifestyle, work and play? What factors influence participation in recreation and leisure activities? How does one educate for leisure? Involves practical learning experiences.

EDCURRIC 241 Special Study in Health and Physical Education
Prerequisite: Approval by Head of Programme required

EDCURRIC 244 Special Study

EDCURRIC 245 Special Study

EDCURRIC 277 Special Study

EDCURRIC 288 Special Study

Stage III

EDCURRIC 303 Scientific and Technological Literacies: Primary
Develops a critical view of scientific and technological literacies and an understanding of their inter-relationship within a range of learning environments. Asks questions such as: What are scientific and technological literacies? What do teachers need to know to be scientifically and technologically literate? How can teachers develop a quality science/technology learning environment?
Prerequisite: 225 points passed in the BEd(Tchg) Primary Specialisation

EDCURRIC 309 Senior Primary
Investigates quality teaching and learning across the curriculum for learners in Years 7-8. Addresses questions such as: What constitutes effective teaching for diverse learners at these levels? How can curriculum be integrated at this level and how can the effectiveness of this integration be monitored?
Prerequisite: 225 points passed in the BEd(Tchg) Primary Specialisation

EDCURRIC 310 Pasifika Learners
Examines what helps Pasifika learners to succeed in New Zealand education. Addresses questions such as: Who are Pasifika learners? How is Pasifika success addressed in
EDCURRIC 334  
**Exercise and Physical Education**  
15 Points  
Critically examines and applies knowledge about exercise practices in physical education contexts. Addresses such questions as: What evidence base supports current exercise principles? How can the diverse exercise needs of students be addressed in physical education contexts? What issues and dilemmas are associated with current exercise practices? What influences how exercise is programmed in a physical education context?  
Prerequisite: EDCURRIC 234

EDCURRIC 335  
**Research Study in Health and Physical Education**  
15 Points  
Examines research philosophy, approaches and methods in education as a basis for informing professional practice in health and physical education. Addresses such questions as: How can teachers use research to inform their teaching? What represents quality research in educational settings? What issues influence the design and conduct of a research project?  
Prerequisite: At least 60 points from EDCURRIC 230-241, 333-337

EDCURRIC 338  
**Enhancing Teaching Through Science**  
15 Points  
Investigates personal conceptual science understandings and selected science education research to inform effective practice. Selected scientific concepts will be examined to provide experience in enhancing teaching through science and engaging children in effective learning in a variety of environments.  
Prerequisite: 225 points passed in the BEd(Tchg) Primary Specialisation  
Restriction: EDCURRIC 260

EDCURRIC 339  
**Developing Classroom Mathematics Programmes**  
15 Points  
Develops knowledge and understanding of classroom mathematics procedures and learning environments. Examines the integrated nature of learning, teaching and assessment with respect to long term programmes. Aims to further develop teacher confidence in, and positive attitudes toward, the teaching and learning of mathematics through critical analysis and personal reflection.  
Prerequisite: 225 points passed in the BEd(Tchg) Primary Specialisation

EDCURRIC 345  
**Literacy in the Primary School**  
15 Points  
An exploration of a variety of literacy processes, approaches, strategies and resources relevant to literacy learning and teaching in the New Zealand primary school curriculum. The emphasis will be on the place of reading and its relationship to oral, written and visual language.

EDCURRIC 349A  
**Understanding and Extending Mathematical Thinking**  
7.5 Points  
An investigation of a wide range of strategies that children use to solve mathematical problems. Reflects on reasons for learners' naive conceptions and subsequent planning for teaching thinking strategies.  
To complete this course students must enrol in EDCURRIC 349 A and B

EDCURRIC 350  
**Teaching Mathematics Investigations**  
15 Points  
An examination of investigative approaches to the teaching and learning of mathematics within the context of problem solving.  
Prerequisite: 225 points passed in the BEd(Tchg) Primary Specialisation

EDCURRIC 356  
**Teaching and Learning in the Visual Arts**  
15 Points  
Extends the theoretical and practical knowledge base for visual arts teaching and learning. Examines pedagogies used to support the development of visual arts literacy. Connects learning in the visual arts with the guiding structures of national curriculum documents and investigates issues such as addressing diversity and using new technologies. Identifies action and reflection practices that enhance visual arts learning.

EDCURRIC 361  
**The Performance Arts in Education**  
15 Points  
A critical examination of the performance of creating in the arts. The processes of creating and shaping works selected from dance, drama, music and the visual arts will be analysed and used to plan and implement arts education practices in specified educational settings.  
Prerequisite: 225 points passed in the BEd(Tchg) Primary Specialisation

EDCURRIC 362  
**Drama and Learning**  
15 Points  
An examination of the learning processes initiated by the use of drama in the classroom with a particular focus on language use. There will be opportunity to design, implement and evaluate drama programmes.  
Prerequisite: 225 points passed in the BEd(Tchg) Primary Specialisation

EDCURRIC 363  
**Drama Studies**  
15 Points  
An exploration of practical and theoretical activities relating to drama and performance in a range of contexts.

EDCURRIC 364  
**Special Topic**  
15 Points

EDCURRIC 365  
**Special Topic**  
15 Points

EDCURRIC 366  
**Special Topic**  
15 Points
EDCURRIC 368 15 Points
Initiating and Supporting Learning in Music
Development of the knowledge base for the teacher of Music, linking curriculum design and principles with practical experience of The Arts in the New Zealand Curriculum document, while offering opportunities for reflection on practice.
Prerequisite: 225 points passed in the BEd(Tchg) Primary Specialisation

EDCURRIC 369A 7.5 Points
EDCURRIC 369B 7.5 Points
Mathematical Literacy for Lower-achieving Students
Approaches for teaching individuals or small groups who have been identified as achieving below expectations in mathematics in New Zealand primary and secondary schools will be explored. Numeracy assessment tools that identify the problems that students have with mathematical language and mathematical symbols will be explored.
Prerequisite: EDCURRIC 349
To complete these courses students must enrol in EDCURRIC 369 A and B

Stage IV
EDCURRIC 430 15 Points
Curriculum Issues in Health and Physical Education
Critically examines the construction of health and physical education in the curriculum. Addresses questions such as: What stands for health and physical education in the curriculum? What contemporary issues face health and physical education teachers? What factors influence how curriculum is constructed and experienced?
Prerequisite: At least 60 points from EDCURRIC 230-241, 333-337

EDCURRIC 431 15 Points
Physical Education Pedagogy
Examines the nature and characteristics of quality teaching in physical education. Addresses such questions as: What legal and ethical issues mediate professional practice? How can a focus on diversity help learners in physical education contexts? What teaching methodologies, management strategies and resources underpin quality practice in physical education?
Prerequisite: EDPROFST 303

EDCURRIC 433 15 Points
The Health Educator
Critically analyses the professional responsibilities and roles of health educators in schools. Addresses such questions as: What are the issues and dilemmas associated with teaching health education? What values and beliefs underpin teaching approaches in health education? How is health education influenced by external factors? How do teachers resolve ethical and professional dilemmas and challenges related to teaching this subject?
Prerequisite: EDCURRIC 235, 333

Diploma Courses
EDCURRIC 600 15 Points
Literacies, Languages, Cultures
Critically explores responsive, equitable and inclusive pedagogies to support diverse ākonga in learning and developing languages and multi-modal literacies. Examines assessment, planning and teaching that take account of ākonga, whānau and communities. Issues related to literacies, languages and cultures in Aotearoa are critically examined. The construction and interpretation of children's texts are explored.
Restriction: EDCURRIC 631

EDCURRIC 601 15 Points
Creative Arts in the Early Years
Explores the role of the Arts (dance, drama, music and visual art) in contributing to infants', toddlers’, and young children’s critical thinking and creativity. Theories and practices of teaching and learning in Arts education are examined, including Māori and Pasifika perspectives, and connections are made to children's play, holistic wellbeing, identities and citizenship.
Restriction: EDCURRIC 632

EDCURRIC 604 10 Points
Health and Physical Education
Develops understandings of the theories, concepts and practices that support learning and teaching in health and physical education. It will examine such questions as: How are teachers informed in these subjects? How do teachers implement quality learning experiences based on the health and physical education curriculum for effective learning to occur for a diverse range of learners?

EDCURRIC 610 10 Points
Science Education
Develops an appreciation of the nature of science which supports conceptual understandings and quality teaching and learning approaches in science education. Addresses questions such as: How do teachers design quality learning environments based on the science curriculum so that positive engagement and effective learning can occur for a diverse range of learners? How is achievement determined and monitored?

EDCURRIC 611 10 Points
Social Studies Education
Develops students' knowledge and skills associated with planning for teaching and learning in Social Studies. Addresses questions such as: What do teachers need to know and understand about the history, nature and purpose of Social Studies education? What do teachers need to know about curriculum requirements, teaching methodologies, management strategies and resources to successfully plan for students' diverse needs?

EDCURRIC 613 10 Points
Special Topic
EDCURRIC 620 15 Points
Special Topic
EDCURRIC 621 15 Points
Arts, Language and Literacies Education 1
Develops knowledge, skills and understandings necessary to plan, teach and assess diverse learners in arts, language and literacies by addressing such questions as: Why are these curriculum areas important in the junior school and beyond? How do teachers design and resource quality programmes in order to encourage children to become confident, competent communicators and to maximise their achievement in these areas?
Restriction: EDCURRIC 101, 202, 605

EDCURRIC 622 15 Points
Arts, Language and Literacies Education 2
Extends knowledge, skills and dispositions necessary to plan for, teach and assess diverse learners in arts, language and literacies by addressing such questions as: Why are these curriculum areas important to middle/senior
primary school learning? What resources, strategies and approaches will maximise achievement? How do teachers design quality teaching and learning programmes which encourage children to become competent communicators in these areas?

**Prerequisite:** EDCURRIC 621
**Restriction:** EDCURRIC 101, 202, 606

**EDCURRIC 623**  
**Investigation and Exploration**  
15 Points  
Critically examines curriculum approaches that promote children's exploration and learning in science, technology, engineering and mathematics. Key concepts, processes and pedagogies relating to these disciplines are considered. Explores children's learning through play and a holistic understanding of infants, toddlers and young children.

**Restriction:** EDCURRIC 635

**EDCURRIC 624**  
**Curriculum and Pedagogy**  
15 Points  
Critically examines theories, approaches and key curriculum influences. Examines the critical role of teacher knowledge, inquiry and reflection in implementing appropriate curriculum and assessment for infants, toddlers and young children. Critically explores the relationship between assessment, curriculum, pedagogy, and learning, including Kaupapa Māori and Pasifika perspectives.

**Restriction:** EDCURRIC 630, EDPROFST 621, 622

**EDCURRIC 625**  
**Curriculum: Maths and Literacy 1**  
15 Points  
Investigate the learning and teaching of Mathematics and Statistics and English learning areas. Critically examine teaching approaches, resources (including digital technologies) and learner progressions to understand how students learn in Mathematics and Statistics and English. Build essential knowledge and skills for Teaching as Inquiry in these areas.

**Restriction:** EDCURRIC 621, 622, 628, 629

**EDCURRIC 626**  
**Curriculum: Maths and Literacy 2**  
15 Points  
Investigate how responsive pedagogies develop learners and teachers of the Mathematics and Statistics, and English learning areas. A Teaching-as-Inquiry approach will draw on research evidence to develop knowledge, understandings and skills, and planning and assessment strategies, known to improve outcomes for all learners.

**Prerequisite:** EDCURRIC 625
**Restriction:** EDCURRIC 621, 622, 628, 629

**EDCURRIC 627**  
**45 Points**

**EDCURRIC 627A**  
15 Points

**EDCURRIC 627B**  
30 Points

**Designing the Wider Curriculum**
Students will experience, participate in, inquire into and critically examine the content, theory and pedagogy of five Learning Areas of the New Zealand Curriculum: Health and Physical Education, The Arts, Science, Technology, and Social Studies.

**Restriction:** EDCURRIC 604, 610, 611, 621, 622
To complete this course students must enrol in EDCURRIC 627 A and B, or EDCURRIC 627

**EDCURRIC 628**  
**15 Points**

**Mathematics, Statistics and Technology Education 1**
Develops knowledge and understanding of the nature of mathematics, statistics and technology education by addressing questions such as: What is the nature and purpose of mathematics, statistics and technology education in the New Zealand Curriculum? What are the components, key concepts and learning progressions in the national curriculum? What constitutes effective teaching practices?

**Prerequisite:** EDCURRIC 608, 612

**EDCURRIC 629**  
**Mathematics, Statistics and Technology Education 2**  
15 Points  
Develops the knowledge, skills and understanding for designing quality learning experiences in mathematics, statistics and technology education for diverse learners by addressing questions such as: What are the mathematical, statistical and technological concepts and learning progressions in the national curriculum? What constitutes effective teaching practices?

**Prerequisite:** EDCURRIC 628
**Restriction:** EDCURRIC 609, 612

**EDCURRIC 630**  
**15 Points**  
**Early Years Curriculum**
Critically evaluates appropriate curriculum for infants, toddlers and young children in early years settings. Integrated approaches to learning and teaching will be emphasised. Addresses, explores and examines questions about complex relationships between curriculum approaches, current learning theory, teachers' professional knowledge, and assessment, planning and evaluation practices with reference to early childhood curriculum.

**EDCURRIC 631**  
**15 Points**  
**Languages and Cultures**
Develops knowledge, skills and attitudes associated with the planning, teaching and assessing of languages and literacies. Addresses such questions as: What are the interrelationships between languages and cultures in a Pacific nation? What influences construction and interpretation of meaning in text? What are the issues for family/whānau, teachers and learners relating to all children becoming confident, competent communicators in Aotearoa?

**Restriction:** EDCURRIC 211

**EDCURRIC 632**  
**15 Points**  
**The Arts**
Develops understanding of the knowledge, skills and attitudes required to optimise learning and teaching in the arts. Involves a focused inquiry into music, dance, drama and visual arts in early childhood settings. Addresses such questions as: How do specific learning and teaching approaches and strategies motivate and enhance all children's learning?

**EDCURRIC 633**  
**15 Points**  
**Te Ao Māori Early Childhood Education**
Develops competence in te reo Māori and mātauranga Māori. Addresses the needs and aspirations of Māori learners and communities in order to improve educational outcomes. Critically reviews Te Tiriti o Waitangi and Māori pedagogies in relation to teachers' practices. Addresses questions such as: What are the historical and contemporary research and issues for Māori in education?

**EDCURRIC 634**  
**15 Points**  
**Hauora**
Develops understandings of hauora/well-being and belonging. Inquires into key concepts of health, physical education and social sciences. What images do we hold of children? What does identity mean for learners in a Pacific nation? Why is identity critical for Pasifika learners? What specific learning and teaching approaches and resources
enhance the well-being and participation of children in a diverse society?
*Restriction: EDPROFST 101*

**EDCURRIC 635 15 Points**
**Exploration**
Develops pedagogical content knowledge and understanding in science, mathematics and technology. Considers such questions as: What are key early concepts, processes and possible learning progressions? What constitutes effective learning and teaching approaches to promote children's exploration?

**EDCURRIC 636 15 Points**
**Designing the Wider Curriculum 1**
Students will experience, participate in, inquire into and critically examine the content, theory and pedagogy of five Learning Areas of the New Zealand Curriculum: Health and Physical Education, The Arts, Science, Technology, and Social Studies.
*Restriction: EDCURRIC 604, 610, 611, 621, 622, 627*

**EDCURRIC 637 30 Points**
**Designing the Wider Curriculum 2**
Students will experience, participate in, inquire into and critically examine the content, theory and pedagogy of five Learning Areas of the New Zealand Curriculum: Health and Physical Education, The Arts, Science, Technology, and Social Studies.
*Prerequisite: EDCURRIC 636*
*Restriction: EDCURRIC 604, 610, 611, 621, 622*

**Postgraduate 700 Level Courses**

**EDCURRIC 700 30 Points**
**Contemporary Pedagogies - Level 9**
Critical examination of contemporary pedagogical approaches and teachers' own professional knowledge and practice associated with curriculum delivery, appropriate for all learners and their educational outcomes, traversing the early childhood, primary and secondary sectors.

**EDCURRIC 701 30 Points**
**Special Topic**

**EDCURRIC 702 30 Points**
**The Arts: Creative Practices**
Students will critically explore creative practices in research and pedagogy within and between dance, drama, music and visual arts. The emphasis is on exploring emerging visions, theoretical perspectives and arts-based approaches which broaden relationships through postmodern practices in research and pedagogy appropriate to students living in a multicultural society, globalised world, and digital age.

**EDCURRIC 704 30 Points**
**Teaching for Scientific Literacy**
A detailed exploration, focusing on the merits and challenges, of the concept of scientific literacy. Topics will include the nature of science; the process of scientific inquiry; and the role of science education in improving public understanding of science.
*Restriction: EDPROFST 729*

**EDCURRIC 705 30 Points**
**EDCURRIC 705A 15 Points**
**EDCURRIC 705B 15 Points**
**Special Topic: Effective Language Teaching**
A practice-focused examination of effective teaching and learning of additional languages in school settings. Aligned with curricular expectations and underpinned by advances in the theory, research and best practice of teaching and learning languages, the course uses evidence-based evaluative inquiry to explore the design and implementation of responsive practices in contemporary language learning environments.
*Prerequisite: Departmental approval*
*Restriction: EDPROFST 360*
*To complete this course students must enrol in EDCURRIC 705 A and B, or EDCURRIC 705*

**EDCURRIC 706 30 Points**
**Researching Practice in the Second Language School Classroom - Level 9**
Students will apply appropriate research methods and specialised knowledge in an independent investigation into a problem of practice in the second language school classroom. In an authentic setting, students will carry out the investigation and consider critically issues associated with the methods applied, including ethical concerns.

**EDCURRIC 709A 15 Points**
**EDCURRIC 709B 15 Points**
**Literacy Intervention: Individual Inquiry**
Students engage in advanced study of theory and research related to optimising Literacy Intervention effectiveness. A critical understanding of Literacy Processing theory and Literacy Intervention principles and practices is integral to support teachers in effectively working with children having difficulty with literacy learning. A practicum component involving daily teaching of four six-year-old children forming case studies for analysis is required.
*Prerequisite: Departmental approval*
*To complete this course students must enrol in EDCURRIC 709 A and B*

**EDCURRIC 712A 15 Points**
**EDCURRIC 712B 15 Points**
**Literacy Intervention: Design, Implementation and Research**
Critical analysis of issues and research related to the design and implementation of an effective early literacy intervention in an education system is central to this course. Emphasis is on facilitating the professional development and learning of Early Literacy Intervention teachers. Students observe and work with teachers and facilitators at professional learning centres.
*Prerequisite: Departmental approval*
*To complete this course students must enrol in EDCURRIC 712 A and B*

**EDCURRIC 714 30 Points**
**Exploring Mathematical Thinking**
Provides an opportunity for teachers to critique historical number systems as a way of illuminating theoretical issues, and informing their teaching practice, around learning number and place value concepts.

**EDCURRIC 720 30 Points**
**Teaching with Digital Pedagogies - Level 9**
A critical examination of research and practice in using digital technologies to transform classroom pedagogy and enhance students' learning experiences. Building on prior knowledge and using the knowledge and skills developed in the course, students will identify a research focus of their choosing to test concepts of usage, and critically evaluate new instructional designs for using digital technologies in classrooms.
EDCURRIC 721 30 Points
Special Topic: Mental Health and Wellbeing in Schools
How do we ensure that schools are wellbeing and mana-enhancing for children and youth? This course is an advanced examination of the theory and practice of mental health education, wellbeing and hauora in education settings. Emphasis will be placed on developing a substantive and integrated knowledge base, which can be applied to schools and other educational settings in practice.

EDCURRIC 722 30 Points
Teacher Leadership for Learning Equity
Extends teachers’ collaborative and innovative leadership in a curricular area of expertise to optimise learning equity for all students, with priority for Māori, Pacific and migrant children and youth, and those with special needs. Participants will facilitate a teaching initiative with colleagues using inclusive, linguistically and culturally sustaining pedagogies within a selected curriculum area/strand in schools or early childhood centres.
Restriction: EDCURRIC 718

EDCURRIC 723 30 Points
STEM Education in Years 0-8
A practice-focused examination of how to meaningfully integrate science, technology, mathematics and statistics into a localised curriculum with students in Years 0-8. Students will critically examine STEM education, using research to first understand and critique examples drawn from practice, and then to develop an integrated and local learning experience that authentically draws on the STEM disciplines.

EDCURRIC 725 30 Points
Special Topic: Engaging with Te Mātaiaho
Students will critically analyse the key changes to Te Mātaiaho which includes the Common Practice Model for Literacy, Communication, and Maths strategy. ### Academic Integrity

**ACADINT A01** 0 Points  
**Academic Integrity Course**  
An online course designed to increase student knowledge of academic integrity, university rules relating to academic conduct, and the identification and consequences of academic misconduct. Students work through a series of modules, outlining scenarios that they may encounter while studying at university. Each scenario provides information on relevant rules, resources and expected behaviour.

Biotechnology and Design
Sensors and actuators (temperature, position, force, pressure, flow, bioelectric, optical sensors and instruments). Signals, systems and controls (s-domain signal notation, transfer functions, frequency response functions, block diagrams, the Laplace transform, first and second order systems, characterisation methods, fundamentals of control). Bioinstrumentation design methodology and group design project integrating professional engineering considerations.  
Prerequisite: BIOMENG 241

Postgraduate 700 Level Courses

BIOMENG 771  
15 Points
Musculoskeletal and Orthopaedic Biomechanics
Topics that biomechanical and orthopaedic engineers use in research and industry. Includes guest lectures from practitioners. Orthopaedic engineering topics cover implant design, material choice, implant stress shielding and bone loss, implant wear and bone remodelling. Musculoskeletal biomechanics topics cover motion capture, inverse kinematics and dynamics, muscle force evaluation, electromyography (EMG), inertial sensors and applications in sports medicine and rehabilitation.  
Prerequisite: 15 points from ENGSCI 311, 313, 314

BIOMENG 791  
15 Points
Advanced Biomedical Engineering Design
An engineering project requiring the application and integration of material taught in technical and professional engineering courses to the design of medical devices and software to meet client needs. The project also requires consideration of ethical issues, social impact, safety in design, and international regulations.

Chemical and Materials Engineering

Stage I

CHEMMAT 100G  
15 Points
Materials of the Modern World
Every aspect of daily living is influenced in some way by the materials that surround us. Ceramics, metals, polymers, and composites; each has its own properties which have, over time, influenced the development of modern technological societies. Take a moment to imagine a world without metal, for example, to see how central the science of materials is to everyday life. This course will explore, at a non-specialist level, the basic principles governing the properties and behaviour of a wide variety of common materials and examine their applications and limitations.  

CHEMMAT 121  
15 Points
Materials Science
Introduction to materials science starting with the fundamentals of atomic structure and bonding and how this builds up a microstructure to create a solid. Metals, polymers, ceramics, electronic materials, composite and biomaterials will be covered and the properties, advantages and disadvantages of each discussed. Considerations such as corrosion, degradation and failure will be studied with a focus on improving design and creating new materials for our future world.

Stage II

CHEMMAT 201  
15 Points
Process Engineering 1: Introduction
Materials and energy balances with and without chemical reaction, materials and energy balances in multiphase systems such as crystallisation, evaporation, drying, humidification, dehumidification, absorption, distillation, extraction and filtration. An introduction to the most important unit operations in the chemical industry, design concept and safety as applied to processing.  
Prerequisite: CHEM 110 or 120 or ENNGEN 140  
Restriction: CHEMMAT 211

CHEMMAT 202  
15 Points
Process Engineering 2: Energy and Processing
Introduction to thermodynamics for process engineering. The first and second laws of thermodynamics. Application of thermodynamic concepts in closed systems, flow processes and cycles, refrigeration and liquefaction. Classical chemical thermodynamics including concepts of chemical potential, fugacity and activities; their applications to vapour-liquid equilibria and reacting systems. Multi-component physical equilibria. Multiple reaction equilibria and system-free energy minimisation. Practical examples and applications.  
Restriction: CHEMMAT 212

CHEMMAT 203  
15 Points
Process Engineering 3: Transfer Processes
Restriction: CHEMMAT 213

CHEMMAT 204  
15 Points
Materials
Prerequisite: CHEMMAT 121  
Restriction: CHEMMAT 221
CHEMMAT 205 15 Points
Process Design 1
Mechanics of solids and analysis of stress and strain. Introduction to materials selection. Design of thin walled pressure vessels. Application to the design of vessels, tanks, reactors, piping and heat transfer equipment. Introduction to the chemical industry, unit operations, line diagrams and process equipment. Report writing and oral communication skills.
Prerequisite: ENNGEN 121 or equivalent
Restriction: CHEMMAT 231, 232

CHEMMAT 206 15 Points
Applied Chemistry
Fundamental chemistry required for chemical engineering and materials engineering. Topics may include phase equilibrium, reaction kinetics, thermodynamics, surface chemistry, electrochemistry and polymer chemistry. This course will have an emphasis on problem definition and solution.
Prerequisite: 15 points from ENNGEN 140, CHEM 110, 120
Restriction: CHEMMAT 242

CHEMMAT 299 0 Points
Workshop Practice
Restriction: ENNGEN 299

Stage III
CHEMMAT 301 15 Points
Transfer Processes 2
Principles of continuous and staged processes. Mass transfer in various media, systems and phases. Interrelating equipment design to mass transfer processes. Studies of selected separation processes such as absorption, solvent extraction, distillation, and membrane processes.
Prerequisite: CHEMMAT 203 or 213, and CHEMMAT 242 or 206
Restriction: CHEMMAT 312

CHEMMAT 302 15 Points
Advanced Process Engineering
An in-depth analysis of selected topics that influence the design, operation, and performance of process plants. Topics include: particulate technology, particle mechanics and particle motions, non-Newtonian fluid flow, two-phase solid-liquid and gas-liquid flow, computational fluid dynamics, flow through porous media and packed beds, filtration, centrifugation, fluidisation, variable-analysis of variations in materials and product processing, membrane separation methods and optimisation techniques.
Prerequisite: CHEMMAT 203 or 213
Restriction: CHEMMAT 313, 316, 411

CHEMMAT 303 15 Points
Chemical Reactor Engineering
Prerequisite: CHEMMAT 202 and 206, or CHEMMAT 212 and 242
Restriction: CHEMMAT 315

CHEMMAT 304 15 Points
The Future of Energy
Discussion of topical and significant developments in the field of energy transformation, usage and storage in the context of climate change, both globally and in New Zealand. Topics include: energy efficiency, energy storage and applications, sustainability, non-renewable and renewable power generation.
Prerequisite: CHEMMAT 201 or 211
Restriction: CHEMMAT 317

CHEMMAT 305 15 Points
Materials Processing and Performance
Materials processing and performance are critical components of a materials science and engineering degree. This course examines the processing and performance of metals, polymers and ceramics. Topics include metal-making, casting, forming, and forms of degradation, such as corrosion. Emphasis is placed on materials applications for process engineering.
Prerequisite: CHEMMAT 204 or 221
Restriction: CHEMMAT 321, 322, 421

CHEMMAT 306 15 Points
Process Design 2
Prerequisite: CHEMMAT 201 or 211, and CHEMMAT 205 or 232
Restriction: CHEMMAT 331, 756

Postgraduate 700 Level Courses
CHEMMAT 712 15 Points
Directed Study in Chemical Engineering

CHEMMAT 713 15 Points
Advanced Chemical Engineering - Level 9
An independent study in advanced topics, current issues, new trends and developing technologies relevant to the field of chemical engineering, for example energy and environment, alternative fuels, process modeling and control. Topics are informed and supervised by leading researchers in the field and students develop critical assessment, report writing and oral communication skills through independent projects and seminars.

CHEMMAT 717 15 Points
Electrochemical Engineering
The thermodynamics of aluminium electrolysis; heat and mass balance; components of the cell voltage; anode effect and its mitigation, resistance and voltage tracking; cell electromagnetics and magnetic modelling.
Corequisite: CHEMMAT 718, 726, 727

CHEMMAT 718 15 Points
Aluminium Reduction Process Operations
Monitoring overall aluminium cell performance – what are the appropriate parameters to measure, how are they measured and how are they used for process control? Optimising cell performance, scheduling of operations, dealing with process excursions, metal treatment and quality. Novel cell designs.
Corequisite: CHEMMAT 717, 726, 727

CHEMMAT 720 15 Points
Materials Design and Processing
Materials processing of metals, ceramics and polymers. Phase transformation. Microstructural development during
materials processing. Case studies of materials selection in product design.

**CHEMMAT 721 Advanced Materials - Level 9**
An advanced course with emphasis on new developments in materials science and engineering and their impact on technology and society, for example surface engineering, nanomaterials and composites, alloy development, high performance ceramics, powder processing, biomaterials. Students develop critical assessment, report writing and oral communication skills through independent projects and seminars.

**CHEMMAT 722 Directed Study in Materials**
Directed study in materials science and engineering.

**CHEMMAT 723 Industrial Materials Engineering**
Exploration of materials in an industrial context, including industrial metals and alloys, high temperature corrosion, surface engineering, welding, powder metallurgy and additive manufacturing.

**CHEMMAT 724 Advanced Materials Characterisation - Level 9**
The underlying theory essential to understanding modern methods of advanced materials analysis including: electron microscopy, surface analysis, atomic force microscopy and nanoindentation. Teaching is highly research informed with examples drawn from the Research Centre for Surface and Materials Science (RCSMS) and involves principles, practical experience and independent project work related to the application of these techniques.

**CHEMMAT 725 Advanced Functional Materials**

**CHEMMAT 726 The Light Metals Industry**
An overview of the light metals, Ti, Al and Mg, their chemistry, metallurgy and processing. It also deals with trends in the global light metals production and uses and recent advances in extending applications for these materials; economics of feedstock and materials selection and availability; power supply and management; efficient use of equipment and resources; and environmental issues.

**CHEMMAT 727 Materials Performance and Selection for Light Metals Processing**
Performance requirements of anodes, cathodes, cell refractories and other aluminium cell construction materials are assessed. Techniques for monitoring materials performance in operation and post operation (autopsies) are discussed. This course also covers materials specifications, how well they predict performance in the aluminium cell as well as the relationship between the fabrication of the cell components and their performance. New materials.

**CHEMMAT 732 Advanced Design Project - Level 9**
An advanced design project utilising the application of the specialised knowledge required for the design and manufacture of a sophisticated product based on multiple plastics materials. Detailed considerations will include material and process selection, mould design, costing and economics, and environmental impact.

To complete this course students must enrol in CHEMMAT 732 A and B, or CHEMMAT 732

**CHEMMAT 750A Design Project**
Specification, planning and executing a specific process design project. The detailed considerations in the project include environmental impact, safety and occupational health issues, material selection, process energy demand and efficiency, costing and economics, process start-up and operation.

Prerequisite: CHEMMAT 306 or 331

Restriction: CHEMMAT 431, 432

To complete this course students must enrol in CHEMMAT 750 A and B

**CHEMMAT 751A Research Project - Level 9**
Students are required to submit a report on independent investigation carried out on a topic assigned by the Head of Department of Chemical and Materials Engineering. The work shall be supervised by a member of staff.

Prerequisite: CHEMMAT 306 or 331

Restriction: CHEMMAT 431, 432

To complete this course students must enrol in CHEMMAT 751 A and B

**CHEMMAT 752 Process Dynamics and Control - Level 9**
Application of simulation for understanding industry 4.0 focusing on digital twin and process control. Includes rigorous treatment of modelling and control fundamentals, advanced classical control and multiple loop control. Individual research is undertaken to apply advanced concepts and methods in modern chemical processes.

Prerequisite: ENGS SCI 211

Restriction: CHEMMAT 311, 411, 412

**CHEMMAT 753 Biological Materials and Biomaterials - Level 9**
Fundamentals of biological materials from small-scale building blocks (genes, proteins) to large-scale biological entities (organs, joints). Biomaterial design, material selection and functionalisation and the interaction between biomaterials and the biological tissue. Critique and review recent research on selected topics. Individual and team research projects apply advanced concepts and methods to design and implement a scaffold or implant prototype.

Prerequisite: BIOMENG 221, or CHEMMAT 204 and 205, or CHEMMAT 221 and 232

Restriction: CHEMMAT 422
sensing, catalysis and biomedical areas. Advanced manufacturing technology – additive manufacturing, powder metallurgy, and sustainable/green manufacturing. Selected advanced concepts in materials performance enhancement are taught through research based individual projects.

Prerequisite: CHEMMAT 121, and 305 or 322 or equivalent
Restriction: CHEMMAT 423

CHEMMAT 755 15 Points
Materials for Energy and Environmental Applications - Level 9
Electronic properties of materials. Applications in energy storage. Smart materials and devices – magnetic and dielectric materials, sensors and actuators, recording devices. Materials for environmental applications – photocatalysis and environmental cleaning, membrane materials, and eco-materials. Core concepts related to energy and environmental applications are extended by individual research projects on selected topics.

Prerequisite: CHEMMAT 121, and 305 or 322 or equivalent
Restriction: CHEMMAT 424

CHEMMAT 756 15 Points
Food Process Engineering
Application of engineering principles to food processing. Topics include: heating and thermal processing, cooling, freezing and thawing, evaporation, dehydration, the use of membranes and packaging. Innovative food processes: high pressure, pulsed electric, UV, ultrasounds and ohmic heating/cooking, and fundamental areas of engineering relevant for food processing such as heat and mass transfer. Process impact on food safety, quality and preservation.

Prerequisite: CHEMMAT 201 or 211, and 15 points from ENGGEN 150, ENGSCI 111, MATHS 108, 110
Restriction: CHEMMAT 463, 772

CHEMMAT 757 15 Points
Engineering Biotechnology
Principles of biochemical engineering. Exploitation of bioreaction and bioprocess systems. Enzyme and microbial reaction kinetics, bioreactor design and downstream processing. Examples of biochemical process and food industry applications.

Prerequisite: ENGSCI 111 or MATHS 108 or equivalent
Restriction: CHEMMAT 361, 464, FOODSCI 704

CHEMMAT 758 15 Points
Resource Recovery Technologies - Level 9
Selection and application of resource recovery processes. Examination of a variety of resource recovery technologies. Critical evaluations of the latest research and development in innovative resource recovery techniques. Social and economic aspects as catalysts or obstacles to resource recovery. Includes an independent research project.

CHEMMAT 759 15 Points
Industry 4.0 for Chemical Engineering
In-depth coverage of digitalisation and Industry 4.0 in the context of modern biological, chemical, food and materials processing industries. Topics include model building, digital models and digital twins using process simulators, scripting, open source software and data-driven analysis using machine learning concepts, and the application of these to modelling a virtual plant.

Prerequisite: ENGSCI 311

CHEMMAT 760 15 Points
Advanced Microbial Technology in Bioprocess Engineering

CHEMMAT 761 15 Points
Special Topic

CHEMMAT 762 15 Points
Special Topic

CHEMMAT 763 15 Points
Waste Reduction and Recycling Technologies
Principles, concepts, and technologies in waste minimisation and recycling. Topics include implementation of waste management and recycling technologies, economic analysis of waste recycling and minimisation and the three pillars of sustainability.

CHEMMAT 771 15 Points
Advanced Food Process Technology - Level 9
Advanced knowledge essential for the application of food process technology. Topics include advanced food processing technology in specific food sectors strategic to New Zealand including dairy processing, meat processing, fruit and vegetable processing, seafood processing, wine processing. Teaching is highly research informed and involves principles, practice and independent project work related to the application of these skills.

CHEMMAT 772 15 Points
Advanced Food Process Engineering - Level 9
Critical evaluation of the latest research and development in innovative thermal and non-thermal food processing technology. Open-ended application of these latest developments to different specific end-point food processing requirements. Teaching is highly research informed with principles, application examples and related individual research project work.

Restriction: CHEMMAT 756

CHEMMAT 773 15 Points
Food Process Systems Engineering - Level 9
Advanced understanding of the theory and application of process systems engineering for the food industry. Includes advanced process analytical technology, real-time quality control, multivariate data analysis, advanced statistical process control, advanced control methods and strategies, and real-time optimisation. Teaching is highly research informed with examples from the Industrial Information and Control Centre (I2C2) and includes an independent laboratory based project.

CHEMMAT 774A 15 Points
CHEMMAT 774B 45 Points
Dissertation in Food Process Engineering - Level 9
A structured supervised research project addressing a topic relevant to the development and commercialisation of food process engineering technologies.

Restriction: CHEMMAT 775, 776, 777
To complete this course students must enrol in CHEMMAT 774 A and B

Civil Engineering

Stage II

CIVIL 200  15 Points
Introduction to Geotechnical Engineering
The basic concepts and principles governing the mechanical behaviour of soil. Engineering geology, site investigation and soil classification. The principle of effective stress, permeability and seepage, and soil shear strength.
Restriction: CIVIL 220, 221

CIVIL 201  10 Points
Land Information Systems
Aspects of elementary engineering surveying as used for gathering site information for the design and setting out of works. Land information systems, modern methods of gathering, processing and presenting information for engineering purposes.

CIVIL 202  15 Points
Fluid Mechanics and Pipe Flow
Approaches to fluids: classification, dimensional analysis and similarity, integral and differential flow analysis; fluid properties; hydrostatics: pressure distribution in fluids, manometry, forces on plane and curved surfaces; conservation of mass; conservation of energy: Bernoulli equation, energy losses and gains, laminar and turbulent pipe friction losses, local losses, pipes in series and parallel, pipe networks, pumps, cavitation; conservation of momentum: Newton's Second Law, dynamic forces, fluid transients, Joukowsky equation.
Restriction: CIVIL 230, 331
CIVIL 203  
Transport Design and Geomatics  
Introduction to Transportation Engineering (mobility for people and goods, sea, land and air transportation systems). Design and construction of longitudinal infrastructure (plans, longitudinal sections and cross sections, earthworks, quantities, mass haul). Transport geometric design (horizontal, vertical and cross sectional design). Geomatic surveying systems (levelling, theodolites, GPS, drones, digital topographical survey systems and remote sensing).  
Restriction: CIVIL 201, 360

CIVIL 210  
Introduction to Structures  
Structural forms and systems. Analysis of determinate systems, elasticity. Engineering beam theory, elasticity, failure theories. Introduction to structural design.  
Prerequisite: ENNGEN 121 or 150  
Restriction: ENVENG 210

CIVIL 211  
Structures and Design 1  
Introduction to structural design – philosophy, loads, codes; design of simple structural elements in various materials.

CIVIL 220  
Introductory Engineering Geology  

CIVIL 221  
Geomechanics 1  
The basic concepts and principles governing the mechanical behaviour of soil, including phase relationships, permeability and seepage, the principle of effective stress, soil strength, compressibility and basic stability analysis.

CIVIL 230  
Fluid Mechanics 1  

CIVIL 250

CIVIL 303  
Transport Operations and Pavements  
Traffic engineering, transportation planning and road pavement design. Topics include the main transport planning and traffic design techniques, criteria and fundamentals used in transportation engineering practice, traffic studies, public transport and active modes and transport modelling (micro and macro simulation). Additionally, pavement design, surfacings, traffic loading, mechanistic approaches and rehabilitation of road pavements, and environmental and sustainability considerations, are included.  
Prerequisite: CIVIL 203  
Restriction: CIVIL 360, 361

CIVIL 304  
Climate Adaptation Design  
Fundamental understanding of the impact of climate change on the built environment and strategies, and design for adaptation. Topic areas include assessing climate change impacts, vulnerability studies, and climate change adaptation strategies, adaptation design and asset management for major infrastructure and infrastructure networks. Awareness and consideration of holistic adaptation strategies including indigenous knowledge perspectives and nature-based solutions.  
Prerequisite: CIVIL 200, 203, ENVENG 200  
Corequisite: CIVIL 303

CIVIL 305  
Construction Informatics  
The application of digital and automation technologies
(such as building information modelling, virtual reality/ augmented reality, internet of things, laser scanning, drones, artificial intelligence, big data, robotics) in civil engineering and management.

CIVIL 312 Structures and Design 2  15 Points
Prerequisite: CIVIL 211

CIVIL 313 Structures and Design 3  15 Points
Prerequisite: CIVIL 211

CIVIL 314 Structural Dynamics  10 Points
Dynamics of single and multi-degree-of-freedom systems. Ground motion, response spectra, time-history and spectral modal analysis; introduction to seismic design.

CIVIL 322 Geomechanics 2  10 Points
Stability analysis in geotechnical engineering; slope stability, soil pressures on retaining structures, bearing capacity. Consolidation and settlement.
Prerequisite: CIVIL 221

CIVIL 324 Geomechanics 3  10 Points
Prerequisite: CIVIL 322 or equivalent
Restriction: CIVIL 420, 728

CIVIL 331 Hydraulic Engineering  10 Points
Prerequisite: CIVIL 330 or equivalent

CIVIL 332 Fluid Mechanics 2  10 Points

CIVIL 360 Transportation Engineering 1  10 Points
Highway alignment geometrics (horizontal, vertical and cross sectional design). Basis of the main pavement design techniques, pavement materials, stabilisation, compaction and bituminous surfacings.

CIVIL 361 Transportation Engineering 2  10 Points

CIVIL 370 Directed Study  5 Points

CIVIL 371 Directed Study  10 Points

Diploma Courses

CIVIL 660 Traffic Engineering and Planning  15 Points
A range of selected topics in traffic engineering and transportation planning which will provide a basis for extension into further studies.
Restriction: CIVIL 361, 460

CIVIL 661 Highway and Pavement Engineering  15 Points
A range of selected topics in highway and pavement engineering which will provide a basis for extension into further studies.
Restriction: CIVIL 360, 461

Postgraduate 700 Level Courses

CIVIL 700 Geotechnical Analysis  15 Points
Shear strength of soil – triaxial testing, measurement of pore water pressures, and interpretation of test data for use in analysis. Introduction to numerical modelling in geotechnical engineering. The use of traditional methods versus numerical modelling in design.
Prerequisite: CIVIL 300
Restriction: CIVIL 324

CIVIL 701 Studies in Civil Engineering 1  15 Points
Advanced course on topics to be determined each year by the Head of Department of Civil and Environmental Engineering.

CIVIL 702 Design of Earthquake Resistant Foundations - Level 9  15 Points
Observed behaviour of foundations during earthquakes. Site investigation and laboratory testing to estimate values for required soil parameters. Earthquake induced foundation actions. Shallow and deep foundations subject to earthquake excitation. Soil-foundation-structure-interaction. Force-based and displacement-based design. Earthquake induced earth pressures on stiff retaining structures. An independent foundation design project is required.
Prerequisite: CIVIL 301, STRCTENG 300 or 304

CIVIL 703 Project Management in Built Environments  15 Points
Application of different project management domains and principles in civil engineering projects, including the theory and practice of planning and control of civil engineering projects from inception to completion.
Restriction: ENGGEN 740, 742

CIVIL 704 Advanced Topics in Project Management - Level 9  15 Points
Advanced topics in project management are analysed such as: advanced scheduling techniques, integrated project delivery, lean construction, building-information
modeling, negotiation techniques, dispute resolution and innovative project delivery models. Independent research is undertaken in an advanced project in project management.

**CIVIL 705A**  
15 Points

**CIVIL 705B**  
15 Points

**Research Project - Level 9**

Restriction: CIVIL 408

To complete this course students must enrol in CIVIL 705 A and B

**CIVIL 706**  
15 Points

**Special Topic: Water-sensitive Cities**

**CIVIL 707**  
15 Points

**Construction Supply Chain Management - Level 9**

Advanced topics in construction supply chain management such as construction logistics, buffer management, relational contracts and behavioural dimensions, analytical models for construction, information technologies and sustainable supply chains. Independent research is undertaken by developing individual research projects in which students study logistics and supply chain problems by analysing real production scenarios or the current literature available in this topic.

**CIVIL 708**  
15 Points

**Work Based Learning for Civil Engineers - Level 9**

Develops professional and interpersonal skills within the context of civil engineering competencies. Enhances ability to develop work procedures in the civil engineering industry. Studies the principles of professional ethics and the roles and liabilities of civil engineering professionals.

Restriction: ENGEN 738

Note: Students must be in part-time professional employment or have completed at least three years' professional employment within engineering or construction.

**CIVIL 709**  
15 Points

**Construction Cost Management**

Advanced knowledge of the key concepts, theories and principles used in quantity surveying and construction cost management. Construction applications in procurement, economics, and cost management. Best practices of cost management in built environments.

Restriction: ENGEN 739

**CIVIL 710**  
15 Points

**Advanced Structural Dynamics - Level 9**

Advanced topics in structural dynamics, such as wave guide representation, holistic consideration of structural behaviour including soil, main and secondary structures interaction, nonlinearities of soil-foundation-structure systems including uplift, pile-soil separation, plastic hinge or pounding. The core skills are taught and accompanied by an individual project in which independent research is undertaken to solve a challenging structural dynamics problem.

Prerequisite: Departmental approval

**CIVIL 711**  
15 Points

**Structures Seminar**

Selected topics from recent developments in structural analysis and design, including an introduction to the advanced behaviour and design of thin-walled steel sections and composite components made from cold-formed sheet and light-weight fillers.

**CIVIL 713**  
15 Points

**Structures and Design 4**

Continuation of the design and detailing of structural assemblages in structural steel, reinforced concrete, reinforced masonry and timber, including connections in steelwork, composite steel/concrete beams and reinforced masonry structures. Emphasis on good load paths, application of seismic design, techniques for the checking of existing structures and lessons learnt from failures. Introduction to the NZ Standard for light timber frame construction and concepts for light steel frame construction.

Prerequisite: either CIVIL 312 and 313, or STRCTENG 301 and 302 and 303

Restriction: CIVIL 411

**CIVIL 714**  
15 Points

**Multistorey Building Design**

Techniques for the design of structures to resist seismic loading. Derivation of design actions, alternative structural systems for resisting these loads, design of structural components subject to cyclic inelastic action, detailing of members and joints to enhance earthquake resistance. Techniques of seismic isolation. Design project.

Prerequisite: either CIVIL 313, or STRCTENG 302 and 303

**CIVIL 715**  
15 Points

**Advanced Structural Concrete - Level 9**

Design and detailing of prestressed and precast concrete components. Advanced mechanics of reinforced concrete members subject to axial, flexure, shear, and torsion actions. Design of state-of-art low-damage concrete structural systems. Includes an independent concrete design project and an independent research project on past failures of concrete structures.

Prerequisite: CIVIL 313 or STRCTENG 303

**CIVIL 716**  
15 Points

**Construction Risk Management - Level 9**

A broad-based understanding of the critical elements of risk and risk management within the civil engineering industry. Risk analysis tools and techniques for the construction engineer, and risk response. Risk monitoring techniques, risk control and transference of risk methods. An independent project is undertaken in which students apply risk principles to civil engineering projects.

Restriction: ENGEN 737

**CIVIL 717**  
15 Points

**Advanced Structural Timber - Level 9**

Advanced topics in timber design such as: shearwalls, diaphragms, special glulam beams, bolted connections, new fasteners, engineered wood products, laminated bridges, inspection of timber structures. Emphasis will be placed on latest international developments. The core skills are taught and accompanied by an individual project in which independent research is undertaken to solve a challenging timber connection problem.

Prerequisite: CIVIL 451 or 750 or equivalent

**CIVIL 718**  
15 Points

**Light Gauge Steel**

Use of thin steel load bearing structural components in walls, floors and roofs. Behaviour of members and connections under the full range of structural actions. Theory and design application including the Direct Strength Method of design. Use of light gauge steel acting compositely with other materials such as concrete and structural foams.

Prerequisite: CIVIL 313 or STRCTENG 302
CIVIL 719
Matrix Structural Analysis
Direct stiffness method applied to linear, nonlinear and stability analyses. Introduction to variational principles and finite element method. Projects in practical modelling of major structures such as bridges and multi-storey buildings. Use of commercial software.
Restriction: CIVIL 416
15 Points

CIVIL 720
Earthquake Engineering
Earthquakes and the effects on civil infrastructure. The passage of seismic waves from inception, propagation, arrival at site bedrock, site specific response, infrastructure response. Including engineering seismology, seismotectonic setting of NZ, probabilistic seismic hazard analyses, NZS 1170.5, infrastructure dynamics, base isolation, effects of site geology, geophysical and geotechnical site characterisation, concepts of soil-structure interaction, the Canterbury series of earthquakes.
Prerequisite: either CIVIL 313 and ENGSCI 311, or ENGSCI 311 and STRCTENG 302 and 303
15 Points

CIVIL 721
Foundation Engineering
Prerequisite: CIVIL 312 or equivalent
Restriction: CIVIL 323, 421
15 Points

CIVIL 722
Slope Engineering
Slope failure mechanisms, geological controls and classification. Shear strength of rock and soil materials. Laboratory testing of earth materials for slope stability. Limit equilibrium techniques, including analytical, numerical and graphical methods. Effects of water and earthquake on slope stability. Slope monitoring, stabilisation and remediation. Landslide risk management.
Prerequisite: CIVIL 300 or 322
Restriction: CIVIL 422, ENVENG 324
15 Points

CIVIL 723
Rock Mechanics and Excavation Engineering - Level 9
Engineering rock behaviour including strength, stiffness and role of discontinuities. Stress-strain analysis, and stability assessment of rock structures and support using advanced models of rock. Theoretical, practical and environmental aspects of ground excavation techniques as applied to tunnelling. An independent research project will develop skills and knowledge to solve a challenging engineering rock behaviour problem.
Prerequisite: CIVIL 322 or equivalent
15 Points

CIVIL 724
Soil Behaviour - Level 9
Advanced topics in soil behaviour including stress-strain-strength response of remoulded and natural geomaterials when subject to monotonic and cyclic loading; critical state soil mechanics; advanced soil testing; and partially saturated soils. Includes an independent research project related to an applied topic in soil behaviour.
Prerequisite: CIVIL 324 or equivalent
15 Points

CIVIL 725
Geotechnical Earthquake Engineering - Level 9
Advanced topics in earthquake effects on geotechnical structures, including: dynamic properties of soils; earthquake-induced ground response; seismic stability of slopes, embankments; earth-retaining structures; soil liquefaction; ground deformations; remediation and mitigation techniques. Design applications and advanced methods of analysis with case history analyses of major earthquakes. An independent research project will be used to solve a challenging geotechnical earthquake engineering problem.
Prerequisite: CIVIL 300
15 Points

CIVIL 726
Engineering Geology
Introduction to fundamentals in soil and rock mechanics and their application to engineering projects. Discussion of natural hazards and their implications on infrastructure design. Practical exercises in field mapping, core logging, aerial photograph interpretation, and basic laboratory tests.
Restriction: CIVIL 404, EARTHSCI 372, GEOLOGY 372
15 Points

CIVIL 727
Dynamics of Structures in Earthquakes
Dynamic behaviour of structures and the means of predicting their response to the effects of earthquakes. Fundamental principles of earthquake engineering, including the effects of structural properties, and the roles of ductility, damping and isolation in mitigating earthquake damage. An individual research project on the impact of earthquakes on civil infrastructure is undertaken.
Prerequisite: Departmental approval
Restriction: CIVIL 314 or equivalent
15 Points

CIVIL 728
Geotechnical Engineering in Professional Practice
Prerequisite: Departmental approval
Restriction: CIVIL 324
15 Points

CIVIL 729
Humanitarian Engineering
Evaluate frameworks used in the humanitarian engineering field to assist with human crises, including shelter, standards, law, human rights, resilience, appropriate engineering. Rapid assessments, application of minimum international standards for engineering, engineered shelter solutions, water, sanitation and hygiene and the engineering management of humanitarian crises.
15 Points

CIVIL 730
Fluid Mechanics
Examines topics from the areas of fluid dynamics, water resources engineering and statistics, and numerical methods.
15 Points

CIVIL 731
Water Resources Modelling
Risk and uncertainty in water resources systems; evaluation of alternatives in water resources; hydrologic modelling; hydraulic modelling; river basin modelling; water resources economics.
15 Points
CIVIL 732 15 Points
Coastal Engineering Design
Deriving design conditions, wave pressures and forces, design of structures, beaches and control structures, introduction to port, introduction to coastal modelling.
Prerequisite: CIVIL 733

CIVIL 733 15 Points
Coastal Engineering Dynamics
Waves, wave theories, surf zone processes, sediment transport, dynamics of coastal systems.
Restriction: CIVIL 431

CIVIL 734 15 Points
River Engineering
Scales; flows; fluvial processes; mixing; ecohydraulics.

CIVIL 735 15 Points
Transport Modelling and Design
The planning, modelling, design and operation of current and future transport systems. Topics include transport models and their applications, Intelligent Transport Systems and emerging technologies, transport planning process and travel demand modelling. Transport models are developed to plan, design and manage transport networks based on fundamental modelling concepts, New Zealand specifications and international best practices.
Prerequisite: CIVIL 303
Restriction: CIVIL 758

CIVIL 736 15 Points
Transport Safety and Mobility
Develop a sound understanding of safety and mobility of transport systems. Transport safety topics include safe systems, crash reduction studies, road safety audits and at-grade intersection geometric design, economic appraisal methods and transport infrastructure funding. Planning for transport mobility and sustainable transport systems, public transport systems, active modes and travel behaviour.
Prerequisite: CIVIL 203
Restriction: CIVIL 759

CIVIL 737 15 Points
Coastal Modelling
Computer simulation of coastal and wave processes. Introduces modelling software for coastal engineering, ranging from simplified wave propagation codes to sophisticated computational fluid dynamics (CFD) solvers. The learning approach is mostly hands-on, building on information delivered in lectures to allow the student to gain practical knowledge of the software in computer laboratory sessions.
Prerequisite: CIVIL 733

CIVIL 738 15 Points
Construction 4.0: The Future of Construction - Level 9
Advanced knowledge in Construction 4.0 and the deployment of related technologies (Internet of Things (IoT) smart construction sites, reality capture tools such as drones, 3D scanning, robotics, visualisation) in engineering and construction projects. Applications of technologies in addressing health and safety, productivity, efficiency and sustainability. Best practices of technology implementation in built environments. Independent research is undertaken in Construction 4.0.

CIVIL 740 15 Points
Studies in Civil Engineering 3 - Level 9
Advanced course on topics to be determined each year by the Head of Department of Civil and Environmental Engineering. The course will include the independent application of highly specialised knowledge and skills related to the study area.

CIVIL 741 15 Points
Ground Improvements and Geosynthetics Engineering
Advanced ground improvement techniques including: densification, consolidation, preloading and surcharge, soil reinforcement, stabilisation and thermal ground improvement.
Prerequisite: CIVIL 300 or 322
Restriction: CIVIL 403

CIVIL 742 15 Points
Bridge Design
Comprehensive overview of road and rail bridge typologies, design philosophies, performance requirements in key areas of strength and serviceability, calculation methods to address these topics and the analysis and strengthening of existing bridges. Bridge technology used in New Zealand and associated legislative requirements.
Prerequisite: CIVIL 713, 715 or equivalent

CIVIL 743 15 Points
Special Topic: Building Information Modelling
Introduction to the main principles and tools of Building Information Modelling (BIM) in the Architecture-Engineering-Construction (AEC) industry. This course is suitable for different AEC professionals such as civil and structural engineers, architects, among others.

CIVIL 744 15 Points
Special Study in Earthquake Engineering
An advanced course on topics in earthquake engineering to be determined each year by the Head of Department of Civil and Environmental Engineering.

CIVIL 745 15 Points
Seismic Assessment of Existing Buildings - Level 9
Principles of assessing the response of buildings to earthquakes and identification of vulnerabilities for different building types. Example buildings will be assessed using these advanced methodologies and independent research conducted on appropriate forms of retrofit.

CIVIL 746 15 Points
Nonlinear Structural Analysis - Level 9
Nonlinear behaviour of structures and the formulation of elements to model such behaviour; solution strategies; nonlinear material and section response; nonlinear dynamic analysis; nonlinear geometry; application of nonlinear analysis in engineering practice. Research and critically compare modeling approaches used for real buildings. Includes an independent research project involving nonlinear analysis of a real structure as a ‘blind prediction’.

CIVIL 750 15 Points
Timber Engineering
The practical understanding of timber and its use in the construction industry. Design and detailing techniques for connections in timber structures, plywood structures, pole structures, timber floor systems, bridges, multi-storey buildings, formwork and falsework, arches and cable stayed systems.
Prerequisite: CIVIL 312 or STRCTENG 301
Restriction: CIVIL 451

CIVIL 754 15 Points
Geotechnical Modelling
Analysis of stress and strain in two and three dimensions,

CIVIL 756 15 Points
Capstone Project
Final year team exercise with students in multi-disciplinary civil and environmental roles integrating technical learning into realistic design outcomes. Comprehensive investigation of an open ended, complex, real or synthetic civil engineering problem with simulated professional design office constraints. Includes technical, economic, cultural, social, ethical, and environmental impact components to complete a scheme assessment report, incorporating safety in design concepts. 
Prerequisite: 90 points from Part III courses listed in the BE(Hons) Schedule for Civil Engineering

CIVIL 758 15 Points
Traffic Systems Design
Prerequisite: CIVIL 361
Restriction: CIVIL 403, 460, 660

CIVIL 759 15 Points
Highway and Transportation Design
Prerequisite: CIVIL 360
Restriction: CIVIL 461, 661

CIVIL 761 15 Points
Planning and Design of Transport Facilities
Selected topics from: traffic signal practice/safety audits, two way highway planning, arterial traffic management, modelling and simulation and traffic flow.

CIVIL 762 15 Points
Transportation Planning
Provides an in-depth exploration of various components of the urban transportation planning process, with emphasis on theories on modelling. The principle behind the conventional four-stage transport planning model, namely, trip generation, trip distribution, modal split and trip assignment, is covered in detail.

CIVIL 763 15 Points
Smart Infrastructure Analytics
Develops fundamental knowledge in the use of computer programming and data analytics to solve real-world infrastructure problems, such as reducing traffic congestion, predicting water usage and infrastructure failures. Group and independent projects are undertaken in which students study complex smart infrastructure analytics problems using real-world data.

CIVIL 764 15 Points
Highway Safety and Operations - Level 9
Advanced planning, design, operation and safety management of predominantly two way two lane highways, including: passing and overtaking models analysis and treatments, collision modification and mitigation, roadway design, skid resistance, delineation, temporary traffic control, evaluation methods, and environmental management measures. An independently applied research project will use advanced analytical skills to critically evaluate factors which impact highway safety. 
Prerequisite: CIVIL 360, 361, and 15 points from 661, 759, or equivalent

CIVIL 765 15 Points
Infrastructure Asset Management - Level 9
Advanced theories and techniques fundamental to the management of infrastructure assets, with a primary focus on Asset Management Plans. Covers the entire spectrum of infrastructure, including roads, water networks and buildings. A major independent project incorporates a literature review and selection, and then critical review, of an Asset Management Plan from industry.

CIVIL 766 15 Points
Transportation Asset Management - Level 9
Focuses on advanced topics in transportation asset management. Develops a critical awareness of the key issues encountered, including those related to the evaluation of performance; risk management; predictive modelling and calibration; prioritisation and optimisation; and life cycle analysis. The core skills are extended by an independent applied project in which students undertake to solve a complex transportation asset management problem.

CIVIL 767 15 Points
Pavement Analysis and Design
Selected topics from: pavement design philosophy; stresses, strains and deflections in pavements; pavement material properties and characterisation; traffic loading and volume; pavement failure mechanisms; structural and functional assessment of pavements; empirical and mechanistic pavement design methods; pavement overlay design; asphalt mix design. 
Prerequisite: 15 points from CIVIL 661, 759, or equivalent

CIVIL 768 15 Points
Highway Geometric Design - Level 9
An advanced course in highway geometric design techniques. Through the use of an independent applied project, students will apply advanced theory, methods, processes and design tools to the safe design of highway geometric alignments that includes an understanding of human / driver behaviour characteristics. 
Prerequisite: CIVIL 360, 361, and 15 points from 661, 759, or equivalent

CIVIL 769 15 Points
Transport Systems Economics - Level 9
Advanced specialist topics in transportation economics including economic analysis, the theory of demand and supply of transport, government intervention policies, and the theory of externalities and agglomeration. Students are required to undertake a major research project by analysing two major transportation infrastructure projects to determine the likely future social and real time benefits and dis-benefits which accrue to the wider community.
CIVIL 771 15 Points
Planning and Managing Transport - Level 9
An advanced course on integrating land use planning and transport provisions, including planning for different land use trip types and parking, travel demand management techniques, and intelligent transport systems applications. An independent project applies this specialised knowledge towards planning, designing and managing transport infrastructure in a Territorial Local Authority (TLA) area.

CIVIL 773 15 Points
Sustainable Transport: Planning and Design
Pedestrian planning and design; cycling facilities and planning; land use and trips; travel behaviour change and travel plans; integrated transport assessment; transport impact guidelines for site development.

CIVIL 774 15 Points
Studies in Transportation 1
A graduate course on a range of selected topics to be determined each year by the Head of the Department of Civil and Environmental Engineering.

CIVIL 775 15 Points
Studies in Transportation 2
A graduate course on a range of selected topics to be determined each year by the Head of the Department of Civil and Environmental Engineering.

CIVIL 779A 15 Points
CIVIL 779B 30 Points
Research Project in Transportation - Level 9
Students are required to submit a report on a topic in transportation assigned by the Head of Department. To complete this course students must enrol in CIVIL 779 A and B

CIVIL 781 15 Points
Construction Planning and Execution
Addresses the construction project life cycle including essential aspects of construction projects such as estimating, construction planning, logistics, budgeting, tendering, contracting, procurement, risk management, occupational health and safety, cultural issues, and legal constraints. Digital tools are used where relevant. Case studies are used to reinforce the application of theoretical ideas to the successful running of construction projects. Restriction: CIVIL 790, 791

CIVIL 782 15 Points
Water Resources Engineering
A selection from the following: reservoir design and optimisation, flood control and design of flood control structures, micro to large scale hydroelectric engineering, river engineering and sedimentation. A water resources engineering design project. Prerequisite: either CIVIL 302, or CIVIL 331 and ENVENG 333 Restriction: CIVIL 480, 482

CIVIL 783 15 Points
Water Distribution System Modelling and Analysis
Fundamental theory of hydraulics and water quality in pipe networks, its implementation in software simulation tools and the application of models to the design and management of water distribution systems. Network theory, simulation practice, consumer and fire demand, water loss management, design, optimisation and master planning. Prerequisite: CIVIL 202

CIVIL 787 15 Points
Project X - Level 9
Students are required to submit a report on a topic assigned by the appropriate Head of Department. Prerequisite: Departmental approval required

CIVIL 788 30 Points
CIVIL 788A 15 Points
CIVIL 788B 15 Points
Research Project - Level 9
Prerequisite: Departmental approval required
To complete this course students must enrol in CIVIL 788 A and B, or CIVIL 788

CIVIL 789 30 Points
Project Z - Level 9
Students are required to submit a report on a topic assigned by the appropriate Head of Department. Prerequisite: Departmental approval required

CIVIL 790 15 Points
Civil Engineering Administration
The application of legal, cultural, social and ethical principles to problems in civil engineering and environmental engineering management. Examines the administration of national and international engineering contracts. Discusses statutes affecting engineering business. Investigates the implications of resource management and natural resource allocation legislation on engineering projects. Analyses processes for resolving engineering disputes. Restriction: CIVIL 401, 490, ENGEN 734

CIVIL 791 15 Points
Construction Management
Understanding topics necessary for effective construction management. Using a generic construction project life cycle, essential aspects of construction projects including the tendering process, planning, resource allocation, teamwork, site safety, and contract types are covered. Case studies are used to reinforce the application of theoretical ideas to the successful running of construction projects with considerations of cultural, social and ethical responsibilities. Restriction: CIVIL 409

CIVIL 792 15 Points
Discrete-event Simulation in Construction - Level 9
Application of discrete-event simulation (DES) modelling to advanced planning and design construction operations and management of the construction supply chain. Critical assessment of the improvements in efficiency of planning methods and decisions patterns in construction management using DES. Individual and team research projects will apply advanced DES concepts and methods to complex, real-world construction projects.

CIVIL 793A 30 Points
CIVIL 793B 60 Points
Thesis - Level 9
To complete this course students must enrol in CIVIL 793 A and B

CIVIL 794A 45 Points
CIVIL 794B 45 Points
Thesis - Level 9
To complete this course students must enrol in CIVIL 794A and B

**Computer Systems Engineering**

### Stage II

**COMPSYS 201** 15 Points

**Fundamentals of Computer Engineering**

Digital systems and binary coding; binary numbers; Boolean algebra and computer logic; combinational logic circuits; sequential logic circuits; hardware description language; digital design flow; register transfer level descriptions and design; data paths and control units; from circuits to microprocessors; basic computer organisation; introduction to modern microprocessors; timers and interfacing; C and assembly language for microprocessors; designing digital systems using microprocessors.

*Prerequisite: ELECTENG 101*

**COMPSYS 202** 15 Points

**Object Oriented Design and Programming**

A project-based course with extensive hands-on programming experience. Includes: an introduction to object oriented design including UML, sequence diagrams, use-case analysis; an introduction to object oriented programming in a modern high level language, algorithms, data abstraction and elementary data structures.

*Prerequisite: ENNGEN 131 or ENGSIC 131*

*Restriction: MECHENG 270*

**COMPSYS 203** 15 Points

**Computer Systems Design**

Project-based course introducing real-world design aspects of hardware and software components of computer systems using appropriate design methodology. Practical skills will be gained in computer aided design tools, printed circuit board design and construction. Professional issues introduced in ENNGEN 204 (health and safety, sustainability, cultural diversity/awareness, communication, leadership, teamwork, financial awareness) and design for repair are reinforced and developed.

*Prerequisite: COMPSYS 201 and ELECTENG 291, or PHYSICS 140 and 244*

*Restriction: ELECTENG 209*

**COMPSYS 209** 15 Points

**Workshop Practice**

*Restriction: ENNGEN 299*

---

### Stage III

**COMPSYS 301** 15 Points

**Design: Hardware Software Systems**

An appreciation of the engineering design process as applied to computer systems. Design skills are enhanced through engineering projects which typically include elements of: computer hardware/software design, system design and control, sensing, actuation and interfacing. Professional issues introduced in ENNGEN 204 and 303 (health and safety, ethics, sustainability, cultural diversity/awareness, communication, leadership, teamwork, financial awareness) are reinforced and developed.

*Prerequisite: COMPSYS 305, and COMPSYS 209 or ELECTENG 209, and COMPSYS 202 or SOFTENG 281*

**COMPSYS 302** 15 Points

**Design: Software Practice**

A project-based course to gain experience in software design emphasising problem solving techniques and applications in computer systems engineering. The course includes practical, real-world project(s) involving a representative subset of the following topics: algorithm and data structure selection and implementation, parsing and translation, object-oriented and multi-threaded programming, scripting languages, peer-to-peer communication over internet.

*Prerequisite: COMPSYS 202 or SOFTENG 281*

**COMPSYS 303** 15 Points

**Microcomputers and Embedded Systems**

*Prerequisite: COMPSYS 201, and COMPSYS 202 or SOFTENG 251 or 281*

**COMPSYS 304** 15 Points

**Computer Architecture**

Modern processor architectures. Principles of modern processor design; pipelining; memory hierarchies; I/O and network interfacing; compiler and OS support; embedded processors; performance; multiprocessing.

*Prerequisite: COMPSYS 201*

*Restriction: COMPSCI 313*

**COMPSYS 305** 15 Points

**Digital Systems Design**

Digital Systems implementation technologies with emphasis on hardware description languages and design abstraction levels; structural, architectural and behavioural modelling; register-transfer level design; datapath and control units; functional and timing simulations; FPGA-based implementation design flow and case studies.

*Prerequisite: COMPSYS 201*

**COMPSYS 306** 15 Points

**Artificial Intelligence and Machine Learning**

Fundamentals of artificial intelligence, including topics from artificial neural networks, fuzzy models, genetic algorithms. Using machine learning as an application of artificial intelligence to use data for training and inference, including topics from convolutional neural networks, deep learning, pattern classification and recognition.

*Prerequisite: COMPSYS 201, and COMPSYS 202 or SOFTENG 281*
**Postgraduate 700 Level Courses**

**COMPSYS 700A** 15 Points

**COMPSYS 700B** 15 Points

**Research Project - Level 9**

Students are required to submit a report on project work carried out on a Computer Systems Engineering topic assigned by the Head of Department. The work shall be supervised by a member of staff.

**COMPSYS 701** 15 Points

**Advanced Digital Systems Design - Level 9**

Advanced concepts in digital design including: System-on-Chip (system level description, behavioural and register-transfer descriptions); advanced modelling techniques and design flows; design space exploration and optimisation; hardware-software partitioning and trade-offs; component reusability; reconfigurable systems; low-power systems; case studies (speech, image, video algorithms implementation, application specific processor design); individual research projects to analyse the problem, model and implement the required hardware-software components.

**COMPSYS 704** 15 Points

**Advanced Embedded Systems - Level 9**

Selected advanced topics from current research in embedded systems such as: embedded systems based on formal models of computation; centralised and distributed architectures for embedded systems; static and dynamic embedded systems; languages and frameworks for distributed embedded systems; actor and agent systems; verification. Includes a significant individual research project.

**COMPSYS 705** 15 Points

**Formal Methods for Safety Critical Software - Level 9**

Formal methods for the validation/verification of safety critical software, including machine learning algorithms. Topics covered will include mathematical modelling for embedded, automation, and mechatronic systems; advanced techniques for validation and verification; techniques for formal specification; methods of verification such as Bisimulation and model checking; state space explosion problem and solutions such as BDDs, symbolic model checking, and modular verification; verification of HDL/C using model checking tools. Includes a significant individual research project.

**COMPSYS 710** 15 Points

**Studies in Computer Systems Engineering 1**

Advanced courses on topics to be determined each year by the Head of Department.

**COMPSYS 711** 15 Points

**Studies in Computer Systems Engineering 2**

Advanced courses on topics to be determined each year by the Head of Department.

**COMPSYS 713** 15 Points

**Studies in Computer Systems Engineering 4**

Advanced courses on topics to be determined each year by the Head of Department.

**COMPSYS 714** 15 Points

**Studies in Computer Systems Engineering 5**

Advanced courses on topics to be determined each year by the Head of Department.

**COMPSYS 715** 15 Points

**Studies in Computer Systems Engineering 6**

Advanced courses on topics to be determined each year by the Head of Department.

**COMPSYS 721** 15 Points

**Special Topic**

An advanced course on topics to be determined each year by the Head of Department.

**COMPSYS 722** 15 Points

**Special Topic**

An advanced course on topics to be determined each year by the Head of Department.

**COMPSYS 723** 15 Points

**Embedded Systems Design**

Concurrency and models of computation, task models and race conditions, real-time operating systems based approach, synchronous approach, safe state machines, key properties: determinism and reactivity, SoPC and MPSoC, cyber-physical embedded systems, static analysis techniques, case studies in smart grid, automotive, medical devices and the like.

**COMPSYS 725** 15 Points

**Distributed Cyber-Physical Systems Design**

**COMPSYS 726** 15 Points

**Robotics and Intelligent Systems - Level 9**

Fundamentals of robotic and intelligent systems, including reactive and deliberative functionality, navigation techniques, planning and programming of robot actions, machine learning, artificial neural networks and may include topics in sensors and actuators, kinematic analysis, fuzzy systems, genetic algorithms. Core concepts are extended by an individual research project where a challenging robotics problem is analysed and a solution implemented and tested.

**COMPSYS 727** 15 Points

**Model-based Embedded Systems Design - Level 9**

Traditional and advanced methods of embedded systems modelling and design, models of computation, hardware-software co-design, real-time and safety-critical systems, principles of embedded and real-time operating systems, design using the real-time operating systems approach and the synchronous approach, use of the networks in real-time
embedded systems. The assessment includes a significant individual research project.  
*Prerequisite: COMPSYS 303  
*Restriction: COMPSYS 402, 403, 723

**COMPSYS 728**  
**Special Topic - Level 9**  
An advanced course on a topic to be determined each year by the Head of Department. Includes a substantial individual research project.  
*Prerequisite: Departmental approval

**COMPSYS 729**  
**Special Topic - Level 9**  
An advanced course on a topic to be determined each year by the Head of Department. Includes a substantial individual research project.  
*Prerequisite: Departmental approval

**COMPSYS 730**  
**Robotics and Society**  
Explores the moral, ethical and societal impacts of increasing automation in our society, and how both work and leisure will be impacted as robots become more commonplace. Topics also include legal issues, privacy, safety, standards, and indigenous and cultural issues and opportunities.  
*Prerequisite: 15 points from COMPSYS 302, 306, ENGSCI 331, MECHENG 313, SOFTENG 306

**COMPSYS 731**  
**Human-Robot Interaction**  
Human aspects of robotic systems, including how humans and robots can live and interact together. Cultural considerations around the perception of robots and expected robot behaviours in different domains such as agriculture, education, healthcare, and manufacturing.  
*Prerequisite: 15 points from COMPSYS 302, 306, ENGSCI 331, MECHENG 313, SOFTENG 306

**COMPSYS 732**  
**Mobile Autonomous Robotics**  
Techniques and principles for designing and developing mobile robots that interact autonomously with their environment. Topics include sensors and actuators, kinematic analysis, computer vision, state estimation and planning. Includes significant hands-on experience through the design and development of a mobile robot.  
*Prerequisite: 15 points from COMPSYS 302, 306, ENGSCI 331, MECHENG 313, SOFTENG 306

**COMPSYS 770**  
**Capstone Project**  
Final year team exercise with students in multi-disciplinary roles, with focus on computer systems engineering and integrating technical learning into realistic design outcomes. Comprehensive investigation of an open ended, complex, real or synthetic computer, electrical and software engineering problem with simulated professional design office constraints. Includes technical, economic and environmental impact components to complete a scheme assessment report.  
*Prerequisite: 75 points from Part III courses listed in the BE(Hons) Schedule for the Computer Systems Engineering specialisation

**COMPSYS 787**  
**Project X - Level 9**  
Students are required to submit a report on a topic assigned by the appropriate Head of Department.  
*Prerequisite: Departmental approval

**COMPSYS 788A**  
**Project Y - Level 9**  
Students are required to submit a report on a topic assigned by the appropriate Head of Department.  
*Prerequisite: Departmental approval  
To complete this course students must enrol in COMPSYS 788 A and B

**COMPSYS 789**  
**Project Z - Level 9**  
Students are required to submit a report on a topic assigned by the appropriate Head of Department.  
*Prerequisite: Departmental approval

**COMPSYS 792**  
**Research Project (Robotics and Automation) - Level 9**  
*Prerequisite: CHEMMAT 751 or CIVIL 705 or COMPSYS 700 or ELECTENG 700 or ENGGEN 769 or ENGSCI 700 or MECHENG 700 or SOFTENG 700  
To complete this course students must enrol in COMPSYS 792 A and B,

**COMPSYS 795**  
**Research Project (Computer Systems) - Level 9**  
Students are required to submit a report on a topic relevant to the specialisation, as assigned by the appropriate Head of Department.  
*Prerequisite: Departmental approval  
To complete this course students must enrol in COMPSYS 795 A and B,

**COMPSYS 796A**  
**Research Project (Robotics and Automation) - Level 9**  
Students are required to submit a thesis on a topic assigned by the appropriate Head of Department.

### DISMGT 704
- **Course Title**: Research Project - Level 9
- **Description**: Supervised research project addressing a topic relevant to disaster management.
- **Restriction**: To complete this course students must enrol in DISMGT 704 A and B, or DISMGT 704
- **Points**: 45

### DISMGT 704A
- **Course Title**: Special Topic
- **Description**: DISMGT 704A
- **Points**: 15

### DISMGT 704B
- **Course Title**: Special Topic
- **Description**: DISMGT 704B
- **Points**: 30

### ELECTENG 209
- **Course Title**: Analogue and Digital Design
- **Description**: Project-based course introducing the process of electrical engineering design. Students will research a diverse range of practical problems and develop solutions and prototypes, test and evaluate hardware and software solutions, and communicate the design and results. Professional issues introduced in ENGGEN 204 (health and safety, sustainability, cultural diversity/awareness, communication, leadership, teamwork, financial awareness) and design for repair are reinforced and developed.
- **Restriction**: COMP SYS 201 and ELECTENG 202, or COMP SYS 201 and ELECTENG 291, or PHYSICS 140 and 244
- **Points**: 15

### ELECTENG 210
- **Course Title**: Electronics I
- **Description**: Semiconductor devices and applications, diodes, bipolar junction transistors and operational amplifiers. Elementary device physics. Linear and non-linear devices, terminal characteristics, small-signal modelling and analysis. Frequency-dependent behaviour of circuits and analysis methods. Linear and non-linear circuits such as amplifiers and switching circuits. Biasing, coupling and bypass techniques. Operational amplifiers, frequency-dependence and characteristic limitations, frequency selective and non-linear switching circuits.
- **Restriction**: ELECTENG 101
- **Points**: 15

### ELECTENG 291
- **Course Title**: Fundamentals of Electrical Engineering
- **Description**: AC and DC circuit analysis in the context of linear electrical and electronic systems. Time and frequency domain approaches to describing and analysing electrical networks and systems.
- **Restriction**: ELECTENG 101
- **Points**: 15

### ELECTENG 292
- **Course Title**: Electronics
- **Description**: Electronic devices and circuits for solving engineering problems. Analysis of linear and non-linear microelectronic circuits and their practical applications.
- **Restriction**: ELECTENG 202 or 291, or PHYSICS 121 and 244
- **Points**: 15

### ELECTENG 299
- **Course Title**: Workshop Practice
- **Restriction**: ENGGEN 299
- **Points**: 0

### Stage I

#### ELECTENG 101
- **Course Title**: Electrical and Digital Systems
- **Description**: An introduction to electrical, computer and electronic systems and technology. Digital circuits and analysis techniques, computer organisation. Analog circuits and analysis techniques. Inductive power transfer, power systems and electric machines. Communication systems.
- **Restriction**: ELECTENG 202, 204, 208, 210
- **Points**: 15

### Stage II

#### ELECTENG 202
- **Course Title**: Circuits and Systems
- **Description**: Aims to provide a good understanding of the way electrical circuits work. It covers DC and AC circuit theorems and analysis; transient analysis, including the Laplace transform; transfer functions; AC power calculations; and time and frequency representation of signals.
- **Restriction**: ELECTENG 101
- **Points**: 15

#### ELECTENG 204
- **Course Title**: Engineering Electromagnetics
- **Description**: Electrostatics (Coulomb’s and Gauss’s Laws, scalar potential, energy, capacitance, dielectrics), magnetostatics (Biot-Savart and Ampere’s Laws, moving conductors, magnetic forces/torques, ferromagnetic hysteresis, inductance, magnetic materials), electromagnetic induction (Faraday’s and Lenz’s Laws), Transmission lines subjected to pulse excitation, magnetic circuits and single-phase transformers. Introduction to computational electromagnetics.
- **Restriction**: ELECTENG 101
- **Points**: 15

#### ELECTENG 208
- **Course Title**: Electric Circuit Analysis
- **Description**: Aims to provide a good understanding of the way electrical circuits work. The course covers DC and AC circuit theorems and analysis. It also introduces some semiconductor devices (diodes, transistors and operational amplifiers) and gives examples of their applications.
- **Restriction**: ELECTENG 202 or 291
- **Points**: 15

#### ELECTENG 209
- **Course Title**: Analogue and Digital Design
- **Description**: Project-based course introducing the process of electrical engineering design. Students will research a diverse range of practical problems and develop solutions and prototypes, test and evaluate hardware and software solutions, and communicate the design and results. Professional issues introduced in ENGGEN 204 (health and safety, sustainability, cultural diversity/awareness, communication, leadership, teamwork, financial awareness) and design for repair are reinforced and developed.
- **Restriction**: COMP SYS 201 and ELECTENG 202, or COMP SYS 201 and ELECTENG 291, or PHYSICS 140 and 244
- **Points**: 15

### Stage III

#### ELECTENG 303
- **Course Title**: Systems and Control
- **Description**: Introduction to linear, time-invariant, continuous-time system theory from both a time-domain and frequency domain standpoint. This leads on to the fundamental body of knowledge underlying the control and enhancement of system behaviour, with application to the analysis and control of electrical systems.
- **Restriction**: ELECTENG 202
- **Points**: 15

#### ELECTENG 305
- **Course Title**: Applied Electronics
- **Description**: An advanced treatment of electronic circuits including a rigorous treatment of feedback, device limitations, noise effects, stability, and design considerations. Emphasis on common practical circuits taken from analog and switching applications.
- **Restriction**: ELECTENG 202 or 291, and 210 or 292
- **Points**: 15

#### ELECTENG 307
- **Course Title**: Fields and Waves
- **Description**: Transmission lines subjected to AC excitation, the Smith chart, introduction to matching network design and introduction to antennas for radio systems. Maxwell’s equations in differential and integral form, divergence and Stokes’ theorems, skin effect and uniform plane waves (lossless/lossy media, reflection and transmission,
Students are required to submit a report on project work carried out on a topic assigned by the Head of Department. The work shall be supervised by a member of staff.

\textit{Prerequisite: ELECTENG 204}

**ELECTENG 309**  
\textbf{Power Apparatus and Systems}  
Introduces students to three-phase electric machines and power system components. Covers theory, modelling and practical aspects for synchronous machines, induction machines, transformer connections, transmission lines and substation components.  
\textit{Prerequisite: ELECTENG 204}

**ELECTENG 310**  
\textbf{Electrical Engineering Design 1}  
An appreciation of the design process as applied to electrical and electronic engineering systems. Design skills are enhanced through engineering projects which typically involve modelling, simulation and analogue/digital electronic hardware design. Professional issues introduced in ENGGEN 204, 303 and 403 (ethics, sustainability, cultural awareness, communication, leadership, teamwork, financial awareness, safety in design) and design for repair are reinforced and developed.  
\textit{Prerequisite: ELECTENG 310}

**ELECTENG 311**  
\textbf{Electrical Engineering Design 2}  
The formal introduction to the design process is completed by one or more open-ended projects which typically include elements of design from concept to working prototype. Professional issues introduced in ENGGEN 303 (health and safety, sustainability, cultural diversity/awareness, communication, leadership, teamwork, financial awareness) and design for repair are reinforced and developed.  
\textit{Prerequisite: ELECTENG 310}

**ELECTENG 331**  
\textbf{Signals and Systems}  
Introduction to continuous-time and discrete-time signals and systems. Spectral analysis and representation of analog and digital signals, and linear, time-invariant systems. Conversion between analog and digital signals. Systems for manipulating and filtering signals in hardware and software.  
\textit{Prerequisite: ELECTENG 202 or 291, or PHYSICS 140 and 244}  
\textit{Restriction: ELECTENG 303}

**ELECTENG 332**  
\textbf{Control Systems}  
Introduction to modelling in the time-domain and frequency domain. The fundamental body of knowledge underlying the control and enhancement of system behaviour, with application to the analysis and control of systems.  
\textit{Prerequisite: ELECTENG 202 or 291}  
\textit{Restriction: ELECTENG 303}

**Postgraduate 700 Level Courses**

**ELECTENG 700A**  
15 Points

**ELECTENG 700B**  
15 Points

**Research Project - Level 9**  
Students are required to submit a report on project work carried out on a topic assigned by the Head of Department. The work shall be supervised by a member of staff.  
\textit{Prerequisite: ELECTENG 310, 311, and 30 points from ELECTENG 303, 305, 309, 331, 332}  
\textit{Restriction: ELECTENG 401}  
To complete this course students must enrol in ELECTENG 700 A and 8

**ELECTENG 701**  
\textbf{Mobile Wireless Engineering}  
Aspects of the design and planning of mobile radio systems. Radio propagation for mobile radio systems (multipath, narrowband and wideband channels, channel characterisation and measurements), propagation modelling (free-space, plane-earth, diffraction). Frequency reuse and interference, outage probabilities, system performance evaluation, space diversity, MIMO and millimetre-wave systems.  
\textit{Prerequisite: ELECTENG 307 or 721 or 737}

**ELECTENG 703**  
\textbf{Advanced Power Systems - Level 9}  
Electricity markets: structure, pricing, optimisation, ancillary services; power system protection practices; distribution network development: smart grid, demand side participation; HVDC and FACT devices theory and application; renewable energy grid integration. Includes a substantial individual research project.  
\textit{Prerequisite: ELECTENG 731}  
\textit{Restriction: ELECTENG 738}

**ELECTENG 704**  
\textbf{Advanced Control Systems - Level 9}  
Advanced theory of modern control systems with emphasis on optimisation techniques for both deterministic and stochastic processes. State-space modelling of dynamic systems and choice of suitable performance criteria. Adaptive, nonlinear and sliding mode control systems. Core concepts are extended by an individual research project in which a challenging control problem is analysed and solved.  
\textit{Prerequisite: ELECTENG 722}

**ELECTENG 706**  
\textbf{Topics in Digital Signal Processing - Level 9}  
An advanced treatment of digital signal processing topics with an emphasis on state of the art techniques. Case studies of digital signal processing methods used to solve practical problems in science and engineering. Includes a substantial individual research project.  
\textit{Prerequisite: ELECTENG 733}

**ELECTENG 711**  
\textbf{Studies in Electrical and Electronic Engineering 1}  
Advanced course on topics to be determined each year by the Head of Department.

**ELECTENG 712**  
\textbf{Studies in Electrical and Electronic Engineering 2}  
Advanced course on topics to be determined each year by the Head of Department.

**ELECTENG 713**  
\textbf{Studies in Electrical and Electronic Engineering 3}  
Advanced course on topics to be determined each year by the Head of Department.

**ELECTENG 714**  
\textbf{Studies in Electrical and Electronic Engineering 4}  
Advanced course on topics to be determined each year by the Head of Department.

**ELECTENG 715 Studies in Electrical and Electronic Engineering 5**

Advanced course on topics to be determined each year by the Head of Department.

**ELECTENG 716 Studies in Electrical and Electronic Engineering 6**

Advanced course on topics to be determined each year by the Head of Department.

**ELECTENG 721 Radio Engineering**

Matching networks, waveguides, transmitter/receiver design, noise, non-linear behaviour, antennas, applications in computational electromagnetics. Fundamentals of radio propagation, tropospheric effects, diffraction, link budgets, point-to-point link design, multipath propagation, introduction to area coverage (mobile radio) systems. Introduction to radar systems, the radio spectrum and exposure standards.

**ELECTENG 722 Modern Control Systems**

**ELECTENG 724 Special Topic**

An advanced course on topics to be determined each year by the Head of Department.

**ELECTENG 726 Digital Communications**

**ELECTENG 731 Power Systems**

Builds on the knowledge of three-phase power systems components to understand modelling, formulation and typical analysis carried out by electricity transmission, distribution and generation entities. Load flow, fault, stability and power quality. Supplemented by laboratories where students learn to use professional software to implement the theoretical aspects.

**ELECTENG 732 Communication Systems**

**ELECTENG 733 Digital Signal Processing**

**ELECTENG 734 Power Electronics - Level 9**

Selected advanced concepts in power electronics are introduced through a practical and research based individual design project, utilising modern power converter topologies with supporting lectures that include: inductive power transfer and control, DC-DC converter design and control, high frequency magnetics design, semiconductor switches, practical design issues, controlled rectifiers and PWM converters with application to conventional and brushless DC motors.

**ELECTENG 735 Green Energy Technologies**

Advanced green energy technologies with examples from current industry practice and cutting edge research developments. Topics include: renewable energy systems, distributed power generation, energy storage techniques, transportation electrification, power converters for renewable energy integration, soft-switched resonant converters, wireless power transfer, new semiconductor devices, motor drives, and LED lighting.

**ELECTENG 736 Analog and Digital Filter Synthesis**

Filter concepts and network functions, a review of approximation techniques and frequency transformations, leading to a thorough treatment of passive, active and digital filter implementations.

**ELECTENG 737 Advanced Radio Engineering - Level 9**

Advanced topics in radio system and high frequency electromagnetic design including: Matching networks, waveguides, transmitter/receiver design, noise, non-linear behaviour, antennas, applications in computational electromagnetics. Fundamentals of radio propagation, tropospheric effects, diffraction, link budgets, point-to-point link design, multipath propagation, introduction to area coverage (mobile radio) systems. Introduction to
radar systems, the radio spectrum and exposure standards. Students will also undertake an individual research project involving high frequency systems design.

**Prerequisite:** ELECTENG 307  
**Restriction:** ELECTENG 421, 721

**ELECTENG 738 15 Points**  
**Selected Topics in Advanced Power Systems - Level 9**

Electricity markets: structure, pricing, optimisation, ancillary services; Power system protection practices; Distribution Network Development: Smart Grids, Demand Side Participation, Integration of DG/renewable sources and Electric Vehicles. Core concepts are extended by an individual research project, a self-guided protection laboratory and industry engagement in advanced power system practices.

**Prerequisite:** ELECTENG 731  
**Restriction:** ELECTENG 703

**ELECTENG 739 15 Points**  
**Special Topic - Level 9**

An advanced course on a topic to be determined each year by the Head of Department. Includes a substantial individual research project.

**Prerequisite:** Departmental approval

**ELECTENG 740 15 Points**  
**Special Topic - Level 9**

An advanced course on a topic to be determined each year by the Head of Department. Includes a substantial individual research project.

**Prerequisite:** Departmental approval

**ELECTENG 741 15 Points**  
**Advanced Digital Communications - Level 9**

Advanced topics in modern digital communication systems and networks including: Advanced digital modulation theory and practice in single and multi-user communications systems; advanced information theory including single and multiple source coding; modern error control coding methods and applications; traffic theory and application in communication systems and networks. Theoretical knowledge is extended by an advanced laboratory programme and research projects.

**Prerequisite:** 15 points from ELECTENG 303, 331, 332  
**Restriction:** ELECTENG 426, 726

**ELECTENG 770 15 Points**  
**Capstone Project**

Final year team exercise with students in multi-disciplinary roles, with focus on electrical and electronic engineering, integrating technical learning into realistic design outcomes. Comprehensive investigation of an open-ended, complex, real or synthetic computer, electrical and software engineering problem with simulated professional design office constraints. Includes technical, economic and environmental impact components to complete a scheme assessment report.

**Prerequisite:** 75 points from Part III courses listed in the BE(Hons) Schedule for the Electrical and Electronic Engineering specialisation

**ELECTENG 787 15 Points**  
**Project X - Level 9**

Students are required to submit a report on a topic assigned by the appropriate Head of Department.

**Prerequisite:** Departmental approval

**ELECTENG 788A 15 Points**  
**ELECTENG 788B 15 Points**

**Project Y - Level 9**

Students are required to submit a report on a topic assigned by the appropriate Head of Department.

**Prerequisite:** Departmental approval

**To complete this course students must enrol in ELECTENG 788 A and B**

**ELECTENG 789 30 Points**  
**Project Z - Level 9**

Students are required to submit a report on a topic assigned by the appropriate Head of Department.

**Prerequisite:** Departmental approval

**ELECTENG 795 45 Points**  
**ELECTENG 795A 15 Points**

**ELECTENG 795B 30 Points**

**Research Project (Electrical and Electronic) - Level 9**

Students are required to submit a report on a topic relevant to the specialisation, as assigned by the appropriate Head of Department.

**Prerequisite:** Departmental approval

**To complete this course students must enrol in ELECTENG 795 A and B, or ELECTENG 795**

**ENERGY 721 15 Points**

**Energy Resources**

Past, present and likely future uses of various forms of energy focused on electricity generation. Energy economics, prices and markets. Environmental considerations in energy production and use. Climate change, carbon sequestration, carbon trading and carbon taxes.

**ENERGY 722 15 Points**

**Energy Technology**

**ENERGY 785A 15 Points**  
**ENERGY 785B 30 Points**

**Research Project - Level 9**

Supervised research project addressing a topic relevant to the technical, economic, environmental, regulatory or business aspects of energy.

**Prerequisite:** Departmental approval

**Restriction:** ENERGY 786

**To complete this course students must enrol in ENERGY 785 A and B**

to essential drawing skills and CAD, and complete group-based design projects. Topics include systems life cycle, design, and introductions to professional issues such as health and safety, ethics, sustainability, cultural diversity, communication, leadership, and teamwork.

**ENNGEN 121**  
**Engineering Mechanics**  
An introduction to planar mechanics including: free body diagrams, planar equilibrium of rigid bodies, friction, distributed forces, internal forces, shear force and bending moment diagrams, kinematics and kinetics of particles, work and energy, relative motion, kinematics and kinetics of rigid bodies.  
*Restriction: CIVIL 210, MECHENG 222*

**ENNGEN 131**  
**Introduction to Engineering Computation and Software Development**  
Introduction to problem solving in engineering through the use of the software package MATLAB, and the programming language C.  
*Restriction: ENNGSCI 233, 331*

**ENNGEN 140**  
**Fundamentals of Engineering in Society**  
An introduction to chemistry and biology as applied to solving fundamental engineering problems from first principles using conservation laws and with appropriate consideration for uncertainty. Problems will also be addressed from a social perspective, considering the environment, the Treaty of Waitangi, social license to operate, and the role of professional engineering skills in the community and society.

**ENNGEN 199**  
**English Language Competency**  
To complete this course students must attain a level of competency in the English language as determined by the Faculty of Engineering.

**Stage II**

**ENNGEN 204**  
**Professional Skills and Communication**  
A system-wide view of the role of the professional engineer in society and business. The skills of advocacy, and individual and group-based communication are put into practice. Scenarios representative of real-world issues are addressed through team-based projects and problem solving. The professional issues introduced in ENNGEN 115 (health and safety, ethics, sustainability, cultural diversity, communication, leadership, and teamwork) are continued and developed.  
*Prerequisite: ENNGEN 115, 199*

**ENNGEN 299**  
**Workshop Practice**  
*Restriction: BIOMENG 299, CHEMMAT 299, CIVIL 299, COMPYSYS 299, ELECTENG 299, ENNGSCI 299, MECHENG 299, MECHTRON 299, SOFTENG 299, STRCTENG 299*

**Stage III**

**ENNGEN 303**  
**Managing Projects and Innovation**  
Introduction to theory and practice of managing projects, innovation, product development and service delivery. Students work in interdisciplinary teams to complete a project based on a complex real-world systems scenario.  
Project management and innovation topics are integrated with design studies covered in previous courses, and extended to wider business issues of risk and opportunities, entrepreneurship, financial management, and regulatory issues.  
*Prerequisite: ENNGEN 199, 204*

**ENNGEN 388**  
**Leadership in Engineering**  
Prepares engineers for roles as future leaders. Enhances skills in seeing problems from non-engineering perspectives and dealing with situations without ideal solutions. Develops skills from other disciplines and increases awareness of the broader context of how engineering supports society.  
*Prerequisite: Programme Director approval*

**Stage IV**

**ENNGEN 403**  
**Managing a Business**  
An introduction to the commercial drivers and business practices which prepare students for successful roles in the commercial, government, and non-profit sectors after graduation. Students are presented with a systems thinking approach to managing large, complex, multidisciplinary challenges. Professional issues (such as health and safety, sustainability, resilience, ethics, leadership, and cultural diversity) from previous courses are expanded.  
*Prerequisite: BUSINESS 101 and 102, or BUSINESS 111 and 112, or DESIGN 220 or 221 or 222, or ECON 151 and GLOBAL 101, or COMMS 320 or ENNGEN 303 or LAW 241 or MUS 186 or 365 or PROPERTY 231 or SCIGEN 201 or 201G*

**ENNGEN 499**  
**Practical Work**

**Diploma Courses**

**ENNGEN 601**  
**Case Studies in Engineering 1**  
The case study may include aspects of design or analysis, a survey and/or evaluation of a problem in any branch of engineering. Students are required to submit a report.

**ENNGEN 602**  
**Case Studies in Engineering 2**  
The case study may include aspects of design or analysis, a survey and/or evaluation of a problem in any branch of engineering. Students are required to submit a report.

**ENNGEN 622**  
**Advanced Topics in Engineering 1**  
Courses on topics determined each year by the Associate Dean Postgraduate in the Faculty of Engineering.

**ENNGEN 623**  
**Advanced Topics in Engineering 2**  
Courses on topics determined each year by the Associate Dean Postgraduate in the Faculty of Engineering.

**ENNGEN 698**  
**Practical Work for Experienced Engineers**  
Students will demonstrate via formal records at least 800 hours of relevant practical work experience in Engineering completed in the last 5 years.  
*Prerequisite: At least 800 hours of practical work in responsible engineering employment*  
*Restriction: ENNGEN 699*
ENGEN 699 0 Points
**Practical Work**
Students will complete 800 hours of relevant practical work experience in Engineering and reflect on the connections between their work and their study. The work experience can be undertaken at any time during the degree programme or via a combination of some prior work experience and ongoing work experience gained concurrently with the degree.

*Restriction: ENGEN 698*

ENGEN 737 15 Points
Engineering Risk Management - Level 9
The theory and practice of risk management, providing a comprehensive approach to identify, analyse, and treat risks inherent in engineering projects. Critical analysis and synthesis of risk management frameworks to deliver outcomes in scenarios of uncertainty and to communicate plans at a professional level. An independent project is undertaken in which students apply risk management theories to engineering projects.
Restriction: CIVIL 708
Note: Students must be in professional employment or have completed at least three years' professional employment within engineering.

ENGEN 738 15 Points
Work Based Learning - Level 9
Studies in professional and interpersonal skills within the context of engineering and project management practice. Develops ability to critically self-assess competencies. Fosters and enhances competencies in preparation towards membership of a professional body via application of theory and exploration of work practices. Students prepare a portfolio of independent work demonstrating competencies required of a Chartered professional at an advanced level.
Restriction: CIVIL 708
Note: Students must be in professional employment or have completed at least three years' professional employment within engineering.

ENGEN 739 15 Points
Cost Engineering - Level 9
Advanced topics in cost engineering such as engineering economics, cost planning, cost estimating, cost control, cost analysis and lifecycle costing. These topics are extended by independent and group applied projects in which students solve complex engineering management problems. The core taught skills are complemented by independent research to solve cost engineering problems or critically analyse alternative cost engineering approaches.
Restriction: CIVIL 709

ENGEN 740 30 Points
Project Management Bodies of Knowledge
A comprehensive and critical review of existing and emerging project management bodies of knowledge including Waterfall, Agile, Lean and Extreme Project Management approaches. Comparison of a range of project management frameworks and methodologies for management of risk, including the applied application of a range of tools, techniques and knowledge to open-ended project scenarios.
Restriction: CIVIL 703, ENGEN 731, 742

ENGEN 741 30 Points
Project, Programme and Portfolio Management
Critical elements of project delivery including leadership, organisation, owner profile and participation, project objectives, investment decisions and change management. Project, Programme and Portfolio Management frameworks and their practical application to organisations in managing strategy implementation. Examples from industry show how theoretical concepts relate to the success or failure of projects, programmes and portfolios under conditions of uncertainty and ambiguity.
Restriction: ENGEN 733, 735

ENGEN 742 15 Points
Project Management
Planning, organisation and control of projects in ordered environments. Application of project management principles, concepts, disciplines, tools, techniques and processes to the typical project lifecycle. Studies in the knowledge areas/domains defined by the Project Management Institute (PMI). Development of a range of skills, tools and techniques to become an effective project manager.
Restriction: CIVIL 703, ENGEN 740

ENGEN 743 15 Points
Applied Creative Thinking
Application of inventive problem solving and creative thinking to formulate novel engineering solutions. Theories, tools and techniques to assist with generating innovative ideas. Techniques for improving the creativity of teams. Develops skills in the facilitation of workshops to help teams solve complex problems. Practical application of the concepts are synthesised to solve case study industry problems, and students' individual scenarios.
Restriction: ENGEN 722

ENGEN 766 45 Points
Research Project in Engineering Management - Level 9
A major project which should relate to a practical situation in an organisation or company selected by the candidate. The project must be approved by the Master of Engineering Management Programme Director, and may take the form of a survey and evaluation of modern advances in engineering management practices, the development and/or implementation of new management strategies, or a management oriented industrial case study.
Restriction: ENGEN 763, 764, 765
To complete this course students must enrol in ENGEN 766 A and B, or ENGEN 766

ENGEN 769 15 Points
Research Methods for Engineers
Development of research methods knowledge and skills including research philosophy and design, research ethics, data collection and analysis techniques, identification of limitations, and writing up and reporting. Qualitative and quantitative research methods are addressed.
Restriction: CHEMMAT 751, CIVIL 705, COMP SYS 700, ELECTENG 700, ENGEN 721, ENGSCI 700, MECHENG 700, SOFTENG 700

ENGEN 770 15 Points
Medical Device and Technology Development - Level 9
Clinical and technical aspects of medical device development. Identification and definition of a medical device, examples and case studies. Evidence based technology, justification and motivation for developing medical devices. Techniques and issues concerning medical device research and design processes. Includes individual research related to medical device and technology development.

ENGEN 771 15 Points
Medical Device Industry Practice - Level 9
Commercial lifecycle considerations in medical device design. Clinical evaluation of systems; safety and ethics issues. Medical and regulatory requirements and international standards for medical devices; quality assurance and controlled design. Examples drawn from surgical assistance and medical intervention systems, training systems, prosthetics, orthotics, exoskeleton devices, and healthcare robotics.

ENGEN 785A 15 Points
ENGEN 785B 15 Points
Professional Capstone - Level 9
An advanced course comprising an integrating project with
students working independently and inter-dependently in teams to research, investigate and apply engineering knowledge to develop solutions. A comprehensive investigation of an open-ended, complex, real or synthetic engineering problem within a simulated professional office. Completion of a comprehensive report and presentation covering technical, economic, environmental, health and safety and management components.

Prerequisite: 60 points from 700 level courses in the BE(Hons) and MProfEng Schedules

To complete this course students must enrol in ENGGEN 785 A and B

ENGGEN 790 45 Points
ENGGEN 790A 15 Points

ENGGEN 791A 30 Points
ENGGEN 791B 30 Points

Dissertation in Medical Devices - Level 9
A structured supervised research project addressing a topic relevant to the development and commercialisation of medical devices and technologies.

Prerequisite: Departmental approval

To complete this course students must enrol in ENGGEN 791 A and B

ENGGEN 792 30 Points
ENGGEN 792A 15 Points
ENGGEN 792B 15 Points

Research Project - Level 9
A research project which requires students to undertake a practical application in a temporary endeavour to deliver a product, service or specified outcome. May take the form of surveys, interviews, action research, project implementation and evaluation of modern advances in project management practices, or a project management oriented case study. Projects conducted by students working in pairs. Each student must prepare a separate individual report.

To complete this course students must enrol in ENGGEN 792 A and B, or ENGGEN 790

ENGGEN 793A 30 Points
ENGGEN 793B 60 Points

Research Portfolio in Medical Devices - Level 9
A structured supervised research portfolio addressing a topic relevant to the development and commercialisation of medical devices and technologies.

Prerequisite: Departmental approval

To complete this course students must enrol in ENGGEN 793 A and B

ENGGEN 794 30 Points
ENGGEN 794A 15 Points
ENGGEN 794B 15 Points

Research Project - Level 9
A research project which requires a student to undertake a practical application in a temporary endeavour to deliver a product, service or specified outcome. May take the form of action research, project implementation and evaluation of modern advances in project management practices, or a project management oriented case study. Project will be conducted by students working individually within an existing project orientated team.

Prerequisite: Departmental approval

To complete this course students must enrol in ENGGEN 794 A and B, or ENGGEN 794

ENGGEN 796A 60 Points
ENGGEN 796B 60 Points

ME Thesis (Engineering) - Level 9
Students are required to submit a thesis on a topic assigned by the appropriate Head of Department.

Prerequisite: Departmental approval

To complete this course students must enrol in ENGGEN 796 A and B

Restriction: ENGSCI 213

ENGSCI 233 15 Points
Computational Techniques and Computer Systems
Introduction to computer architecture and computational techniques. Data representation, memory, hardware, interfacing, and limitations. Numerical computation and algorithms, coding design and paradigms.
Prerequisite: ELECTENG 101 and ENGGEN 131, and ENGGEN 150 or ENGSCI 111
Corequisite: ENGSCI 211 or 213

ENGSCI 255 15 Points
Modelling and Analytics in Operations Research
Emphasises the relationship between business and industrial applications and their associated operations research models. Software packages will be used to solve practical problems. Topics such as: linear programming, transportation and assignment models, network
algorithms, queues, inventory models, simulation, analytics and visualisation will be considered. 
Prerequisite: 15 points at Stage I in Engineering General or Engineering Science or Mathematics or Statistics 
Restriction: STATS 255

ENGSCI 263  
Engineering Science Design I  
Introduction to concepts of model design for engineering problems, including model formulation, solution procedures, validation, and shortcomings, with examples from topics in computational mechanics, operations research and data science. Further development of problem-solving skills, group project work, and group communication skills. The use of computational models to support design-focused decision making while considering ethical, societal, cultural, and environmental factors. 
Prerequisite: ENNGEN 115 and ENGSCI 233 
Corequisite: ENGSCI 211 or 213

ENGSCI 299  
Workshop Practice  
Restriction: ENNGEN 299

Stage III

ENGSCI 309  
Image and Digital Signal Processing  
Fundamentals of image processing and digital signal processing. One dimensional signals and digital filters. Digital filtering with FIR and IIR filters and the Digital Fourier Transform (DFT). Two-dimensional signals, systems and analysis methods. 2D images, spatial sampling, grey-scale quantification, point operations, spatial operations, high pass filtering, sharpening images, noisy images, nonlinear image processing. 
Prerequisite: ENGSCI 211 or 213

ENGSCI 311  
Mathematical Modelling 3  
A selection from: ordinary differential equations, systems of equations, analytical and numerical methods, non-linear ODEs, partial differential equations, separation of variables, numerical methods for solving PDEs, models for optimisation, industrial statistics, data analysis, regression, experimental design reliability methods. 
Prerequisite: ENGSCI 211 
Restriction: ENGSCI 313, 314

ENGSCI 313  
Mathematical Modelling 3ECE  
Complex Analysis, including complex numbers, analytic functions, complex integration, Cauchy’s theorem. Laurent series, residue theory; Laplace transforms; Modelling with partial differential equations, including electronic and electrical applications; Fourier Analysis, Fourier transform, Fast Fourier transform; Optimisation, including unconstrained and constrained models, linear programming and nonlinear optimisation. 
Prerequisite: ENGSCI 211 
Restriction: ENGSCI 311, 314

ENGSCI 314  
Mathematical Modelling 3ES  
Mathematical modelling using ordinary and partial differential equations, calculus of variations and statistical methods. Topics include: eigenvalues, eigenvectors, systems of equations, stability, separation of variables, wave and heat equations, Euler-Lagrange equation, Hamilton’s Principle, probability, random variables, common distributions, Poisson process, exploratory data analysis, confidence intervals, hypotheses tests, linear models including one-way and two-way ANOVA, ANCOVA and multiple regression, introduction to logistic regression. 
Prerequisite: ENGSCI 211 
Restriction: ENGSCI 311, 313, 321

ENGSCI 331  
Computational Techniques 2  
Methods for computing numerical solutions of mathematical models and data analytics problems with focus on translating algorithms to computer code. A selection of topics from numerical solution of linear and non-linear equations, eigen problems, ordinary and partial differential equations, databases, inverse problems and parameter estimation. 
Prerequisite: ENGSCI 233 
Corequisite: ENGSCI 311 or 313 or 314

ENGSCI 343  
Mathematical and Computational Modelling in Mechanics  
Development of macroscopic models of physical systems using fundamental mathematical techniques and physical laws. Topics include vector and tensor calculus including indicial notation and integral theorems, conservation laws, control volumes and constitutive equations, continuum assumptions, isotropy and homogeneity. Possible applications include deformation, strain and stress, fluid flow, electromagnetism, reactive chemical transport, and kinetics. 
Prerequisite: BIOMENG 221 or MECHENG 242, and ENGSCI 211 or 213 
Restriction: BIOMENG 321

ENGSCI 344  
Computational Design for Physical Systems  
Integrate sustainability and environmental considerations into computational engineering. This will develop skills in: analysing complexity and selecting an appropriate model representation of the physical problem; choosing the correct computational tool with which to solve the model; designing and executing appropriate numerical experiments using the chosen tool; validating, interpreting and communicating the simulation results. Enhance skills in sustainable decision-making and addressing environmental challenges. 
Prerequisite: BIOMENG 321 or ENGSCI 343 
Restriction: ENGSCI 746

ENGSCI 355  
Simulation Modelling for Process Design  
Use of simulation models to design complex processes including consideration of cultural, environmental, societal and ethical factors as appropriate. Focus on practical problem solving, translational methods and the development of real-world modelling skills. 
Prerequisite: ENGSCI 255 or STATS 255 
Restriction: OPSRES 385

ENGSCI 363  
Engineering Science Design II  
Application of computational engineering methods combined with optimisation techniques to complex engineering design problems. Group-based integrated design, prototype and test projects that include consideration of societal, ethical and professional engineering factors. 
Prerequisite: BIOMENG 241 or ENGSCI 263 
Restriction: ENGSCI 773
ENGSCI 391 15 Points
Optimisation in Operations Research
Linear programming, the revised simplex method and its computational aspects, duality and the dual simplex method, sensitivity and post-optimal analysis. Network optimisation models and maximum flow algorithms. Transportation, assignment and transhipment models, and the network simplex method. Introduction to integer programming.
Prerequisite: 15 points from ENGGEN 150, ENGSCI 111, MATHS 208, 250, 253, and 15 points from COMPSCI 101, ENGGEN 131, MATHS 162, STATS 220
Restriction: ENGSCI 765

Postgraduate 700 Level Courses

ENGSCI 700A 15 Points
Research Project - Level 9
An investigation carried out under the supervision of a member of staff on a topic assigned by the Head of Department of Engineering Science. A written report on the work must be submitted.
To complete this course students must enrol in ENGSCI 700 A and B

ENGSCI 701 15 Points
Studies in Engineering Science
An advanced course on topics to be determined each year by the Head of Department of Engineering Science.
Prerequisite: Departmental approval

ENGSCI 705 15 Points
Special Topic

ENGSCI 706 15 Points
Special Topic

ENGSCI 711 15 Points
Advanced Mathematical Modelling
A selection of modules on mathematical modelling methods in engineering, including theory of partial differential equations, integral transforms, methods of characteristics, similarity solutions, asymptotic expressions, theory of waves, special functions, non-linear ordinary differential equations, calculus of variations, tensor analysis, complex variables, wavelet theory and other modules offered from year to year.
Prerequisite: 15 points from ENGSCI 311, 313, 314

ENGSCI 712 15 Points
Computational Algorithms for Signal Processing
Advanced topics in mathematical modelling and computational techniques, including topics on singular value decomposition, Principle Component Analysis and Independent Component Analysis, eigen-problems, and signal processing (topics on neural network models such as the multi-layer perception and self organising map).
Prerequisite: 15 points from ENGSCI 311, 313, 314

ENGSCI 713 15 Points
Mathematical Modelling for Professional Engineers
Mathematical modelling techniques required by professional engineers, such as partial and ordinary differential equations, differentiation and integration, vector calculus, linear algebra, analytical and numerical methods, industrial statistics, and data analysis.
Prerequisite: ENGSCI 211 or 213
Restriction: ENGSCI 311, 313, 314

ENGSCI 721 15 Points
Data-centric Engineering for Physical Systems
Mathematical modelling of complex physical systems, including model development, parameterisation and evaluation, illustrated using examples from current research and industry. Inverse problems and uncertainty quantification for physical models in engineering and science, including principles of uncertainty propagation for linear and nonlinear physical models given real-world data, and connections to physics-informed machine learning.
Prerequisite: 15 points from COMPSCI 101, ENGGEN 131, MATHS 162, 199; and either 15 points from ENGSCI 311, 313, 314, or MATHS 260 and either STATS 210 or 225

ENGSCI 740 15 Points
Computational Engineering for Physical Systems
Principles and practice for modelling complex physical systems. Applications in biomechanics, fluid mechanics and solid mechanics. Including topics such as large deformation elasticity theory applied to soft tissues, incompressible flow theory, compressible flows, viscous flows, meteorology, oceanography, coastal ocean modelling, mixing in rivers, fracture, composite materials and geomechanics. Underlying theories, computational techniques and industry applications explored using commercial software.
Prerequisite: BIOMENG 321 or ENGSCI 343

ENGSCI 741 15 Points
Waves and Fracture
Advanced topics in mechanics including: waves and wave motion with applications to acoustics, optics, fluid flow problems and shock discontinuities using numerical methods. Fracture: modes of, displacement discontinuity in linear elasticity, stress intensity factor, spectral solution methods, finite friction. Applications include: hydraulic fracturing, earthquakes, macroscale strength of materials.
Prerequisite: BIOMENG 321 or ENGSCI 343

ENGSCI 742 15 Points
Studies in Continuum Mechanics
Interdisciplinary introduction to topics in geology, geophysics, reservoir engineering, drilling and production engineering relevant to the production of oil and gas. Mathematical models of multiphase fluid flow in porous media. Reservoir engineering tools for analysis and forecasting of reservoir performance. Unconventional petroleum resources.
Prerequisite: 15 points from ENGSCI 311, 313, 314

ENGSCI 745 15 Points
Petroleum Engineering
Introduction to topics in geology, geophysics, reservoir engineering, drilling and production engineering relevant to the production of oil and gas. Mathematical models of multiphase fluid flow in porous media. Reservoir engineering tools for analysis and forecasting of reservoir performance. Unconventional petroleum resources.
Prerequisite: 15 points from ENGSCI 311, 313, 314

ENGSCI 746 15 Points
Advanced Modelling and Simulation in Computational Mechanics
Solution of real-world continuum mechanics problems using computational tools commonly used in engineering practice. Develops skills in analysing complexity; selecting a model representation of the physical problem; choosing the correct computational tool to solve the model; designing and executing appropriate numerical experiments; validating, interpreting and communicating simulation results. Advanced solver methods, and modelling of
advanced materials such as large-deformation elastic/plastic materials.
Prerequisite: BIOMENG 321 or ENGSCI 343
Restriction: ENGSCI 344

ENGSCI 753
Computational Techniques in Mechanics and Bioengineering
Theoretical and applied finite element and boundary element methods for static and time-dependent problems of heat flow, bioelectricity, linear elasticity and non-linear mechanics.
Prerequisite: ENGGEN 131 or equivalent, and 15 points from ENGSCI 311, 313, 314

ENGSCI 755
Decision Making in Engineering
Introduction to techniques for decision making in engineering systems including decision heuristics, simple prioritisation, outranking approaches, analytic hierarchy process, application to group decision making.
Prerequisite: ENGSCI 211 or MATHS 250

ENGSCI 760
Algorithms for Optimisation
Meta-heuristics and local search techniques such as Genetic Algorithms, Simulated Annealing, Tabu Search and Ant Colony Optimisation for practical optimisation. Introduction to optimisation under uncertainty, including discrete event simulation, decision analysis, Markov chains and Markov decision processes and dynamic programming.
Prerequisite: 15 points from COMPSCI 101, ENGGEN 131, MATHS 162, 199, and 15 points from COMPSCI 120, ENGSCI 111, STATS 125

ENGSCI 761
Integer and Multi-objective Optimisation
Prerequisite: ENGSCI 391 or 765

ENGSCI 762
Scheduling and Optimisation in Decision Making
A course of advanced topics arising in the practical application of optimisation models for machine and resource scheduling, routing applications, staff rostering and performance measurement.
Prerequisite: ENGSCI 391 or 765

ENGSCI 763
Advanced Simulation and Stochastic Optimisation
Prerequisite: ENGSCI 391 or 765

ENGSCI 765
Advanced Optimisation in Operations Research
Linear programming, the revised simplex method and its computational aspects, duality and the dual simplex method, sensitivity and post-optimal analysis. Network optimisation models and maximum flow algorithms. Transportation, assignment and transhipment models, and the network simplex method. Integer programming, The implementation and solution of optimisation models for practical applications.
Prerequisite: 15 points from ENGGEN 150, ENGSCI 111, MATHS 208, 250, 253, and 15 points from COMPSCI 101, ENGGEN 131, MATHS 162, STATS 220
Restriction: ENGSCI 391

ENGSCI 768
Advanced Operations Research and Analytics
Advanced Operations Research and Analytics topics including selected theory, algorithms and applications for non-linear programming, smooth and non-smooth optimisation, equilibrium programming and game theory.
Prerequisite: ENGSCI 391 or 765

ENGSCI 772
Whole Organ Modelling
Prerequisite: BIOMENG 321 or ENGSCI 343

ENGSCI 773
Capstone Project
Group based projects involving the application and integration of knowledge in computational engineering, data analytics and operations research for design, prototyping and performance testing of a new product. Topics include social and Te Tiriti considerations, engineering design practice, optimisation methods in robust design, material selection and structural analysis, risk management, communication skills, prototype manufacturing and design validation.
Prerequisite: 60 points from courses listed in Part III of the BE(Hons) Schedule for Engineering Science
Restriction: ENGSCI 363

ENGSCI 787
Project X - Level 9
Students are required to submit a report on a topic assigned by the appropriate Head of Department.
Prerequisite: Departmental approval

ENGSCI 788A
Project Y - Level 9
Students are required to submit a report on a topic assigned by the appropriate Head of Department.
Prerequisite: Departmental approval
To complete this course students must enrol in ENGSCI 788 A and B

ENGSCI 789
Project Z - Level 9
Students are required to submit a report on a topic assigned by the appropriate Head of Department.

To complete this course students must enrol in ENGSCI 793 A and B
ENVSCI 794A  30 Points
ENVSCI 794B  60 Points
Thesis (Operations Research and Analytics) - Level 9
Prerequisite: Departmental approval
To complete this course students must enrol in ENGSCI 794 A and B

ENGSCI 795  45 Points
ENGSCI 795A  15 Points
ENGSCI 795B  30 Points
Research Project - Level 9
Prerequisite: Departmental approval
To complete this course students must enrol in ENGSCI 795 A and B, or ENGSCI 795

ENGSCI 796A  60 Points
ENGSCI 796B  60 Points
Thesis - Level 9
Prerequisite: Departmental approval
To complete this course students must enrol in ENGSCI 796 A and B

Environmental Engineering

Stage II

ENVENG 200  15 Points
Fundamentals of Environmental Engineering
Prerequisite: ENGEN 140
Restriction: ENVENG 244

ENVENG 244  15 Points
Environmental Engineering 1
Water quality, water and wastewater characteristics - physical, chemical and biological treatments (unit operations and processes). Solid waste characteristics and disposal, hazardous waste treatment. Stormwater management.
Restriction: ENVENG 243

Stage III

ENVENG 300  15 Points
Natural and Built Environment Processes
Prerequisite: ENVENG 200
Restriction: ENVENG 341

ENVENG 331  15 Points
Three Waters: Quality and Treatment
Drinking-water treatment, stormwater and agricultural runoffs, biological wastewater treatment, small-scale water treatment systems, nutrient removal, micropollutants, emerging contaminants, water quality standards.

ENVENG 333  10 Points
Engineering Hydrology

ENVENG 341  15 Points
Environmental Engineering 2
Examines natural environmental processes and their relevance to engineering. Soil and water chemistry, equilibrium and organic chemistry, microbiology, biochemistry and biological processes will be examined, focusing on the application of these in engineering design, practice and management.

ENVENG 342  15 Points
Environmental Engineering Design
The applications of design practice in environmental engineering with a number of design projects. Elements of water and wastewater engineering. Landfill design and air pollution control.
Restriction: ENVENG 405

Stage IV

ENVENG 400  15 Points
Special Topic

Postgraduate 700 Level Courses

ENVENG 701  15 Points
Urban Stormwater Management - Level 9
Design and application of stormwater runoff quantity and quality control systems for urban development including: bioretention, living roofs, swales, permeable/porous pavement, detention ponds, and constructed wetlands. An independent project couples technical design, safety, maintenance, construction, hydrologic and water quality modelling, and stakeholder engagement in an application of "Low Impact Design" from the site to the catchment scale.
Prerequisite: either CIVIL 302 and ENVENG 200, or ENVENG 244 and 333

ENVENG 702  15 Points
Engineering Decision Making in Aotearoa - Level 9
Advanced systems engineering based decision making; complex problem framing including ontology analysis; cultural opportunity mapping; absolute sustainability analysis; risk threshold determination; temporal cumulative effects; and effective consultation. Independent research is undertaken to solve a complex engineering decision making problem.

ENVENG 703  15 Points
Directed Study - Level 9
A course on a topic in environmental engineering to be determined each year by the Head of Department of Civil and Environmental Engineering. The course will include the independent application of highly specialised knowledge and skills related to the study area.

ENVENG 705  15 Points
Special Topic
A course on a topic in environmental engineering to be determined each year by the Head of Department of Civil and Environmental Engineering. The course will include the independent application of highly specialised knowledge and skills related to the study area.
Restriction: ENVENG 402
ENVENG 706  15 Points

Special Topic
A course on a topic in environmental engineering to be determined each year by the Head of Department.
Restriction: ENV ENG 403

ENVENG 707  15 Points

Advanced Water Treatment and Reuse - Level 9
Advanced water, wastewater, greywater, stormwater treatment technologies including advanced oxidation processes, photochemistry, electrochemistry, membrane treatment, and fundamentals of water reuse, applications, and case studies for potable reuse, industrial reuse, and aquifer recharge. Includes an individual research project.
Prerequisite: either ENV ENG 300 and 331, or ENV ENG 244 and 342

ENVENG 708  15 Points

Environmental Engineering for Sustainable Futures
Addresses emerging engineering solutions to challenges facing humankind including climate change, sustainability and resilience of our society, and persistent waste and pollution in the environment. Includes applications of systems modelling through a holistic thinking lens, sustainability innovations, risk assessment and impact in various technologies and processes, climate change adaptation and mitigation.

ENVENG 719  15 Points

Design Project
A design project requiring input from more than one engineering subdiscipline. The department will offer a number of projects from which the students may select. It will be possible for groups of students to work together on a project. Assessment will be based on a report and an oral presentation of the outcome of the project.
Restriction: ENV ENG 419

ENVENG 740  15 Points

Water and Wastewater Engineering

ENVENG 744  15 Points

Environmental Engineering Processes Laboratory
Laboratory research methods (safety, sampling procedures, sample preservation, data analysis and report writing). Laboratory experiments exploring various physical, chemical and biological processes, such as sedimentation, chemical coagulation and precipitation, chlorination, reactor residence time distribution, activated carbon and anaerobic digestion.

ENVENG 746  15 Points

Surface Water Quality Modelling - Level 9
Advanced specialist topics in modelling of lakes and rivers. Specific topics covered include response to different loadings applied to surface water systems, and modelling of organic matter, dissolved oxygen consumption, eutrophication, and toxic substances. The core taught skills are extended by an individual project in which independent research is undertaken to solve a challenging surface water quality engineering problem.
Prerequisite: either ENV ENG 300, or ENV ENG 341 and 342

ENVENG 747  15 Points

Environmental Fate of Chemicals and Mitigation - Level 9
Focuses on modelling sorption, degradation kinetics, and leaching of chemicals in the soil environment. Topics include deriving sorption parameters, parent and metabolite fitting with statistical rigours, calculating degradation end-points, novel adsorbents for removing contaminants in soil and water. The core taught skills are extended by an individual project in which independent research is undertaken to solve an environmental issue.
Prerequisite: ENV ENG 300 or 341

ENVENG 750  15 Points

Advanced Sustainability Engineering - Level 9
Focuses on an advanced understanding of the science of sustainability and its application to engineering practice and management, including complex systems thinking, tools to assess sustainability, management, leadership and decision making leading to sustainability, global directions towards sustainability across cultural systems. Develops critical analytical thinking and research based knowledge through debates and an applied research project.

ENVENG 752  15 Points

Sustainability and Life Cycle Assessment
Assessment and applications of sustainability principles in the design of products and/or infrastructures, including the use of sustainability tools. Provides an overview of life cycle assessment (LCA) based on ISO 14040 and ISO 14044 standards. Introduces LCA software to assist in analysing the data, interpreting the results and writing LCA reports.

ENVENG 760  15 Points

Water-Sensitive Cities
Presents a range of water-sensitive and sustainable engineering solutions for the management of water, and explores their viability and effectiveness in the New Zealand context, both under current and future climate scenarios. Explores how population growth, climate change and economics put pressure on urban water systems, and the need for urban water systems design to be resilient to such pressures.

ENVENG 787  15 Points

Project X - Level 9
Students are required to submit a report on a topic assigned by the appropriate Head of Department.
Prerequisite: Departmental approval

ENVENG 788A  15 Points

Project Y - Level 9
Students are required to submit a report on a topic assigned by the appropriate Head of Department.
Prerequisite: Departmental approval
To complete this course students must enrol in ENVENG 788 A and B

ENVENG 789  30 Points

Project Z - Level 9
Students are required to submit a report on a topic assigned by the appropriate Head of Department.
Prerequisite: Departmental approval

ENVENG 795  45 Points
ENVENG 795A  15 Points
ENVENG 795B  30 Points

Research Project (Environmental) - Level 9
Students are required to submit a report on a topic relevant
to the specialisation, as assigned by the appropriate Head of Department.

Prerequisite: Departmental approval

To complete this course students must enrol in ENVENG 795 A and B, or ENVENG 795

ENVENG 795A 60 Points
ENVENG 795B 60 Points

ME Thesis (Environmental) - Level 9

Students are required to submit a thesis on a topic assigned by the appropriate Head of Department.

Prerequisite: Departmental approval

To complete this course students must enrol in ENVENG 796 A and B

Global Studies

Stage I

GLOBAL 101 15 Points
GLOBAL 101G 15 Points

Global Issues, Sustainable Futures

The basis for sustainability – social issues such as population and consumption, environmental issues such as climate change, limited resources and environmental degradation. Discusses the roles that various disciplines (law, business, engineering and urban planning) will play in developing solutions, including consideration of human rights and good governance, new concepts in economics and business management which will lead to sustainable businesses, developments in science and technology which will change how we manage resources and new visions for cities and communities which will support sustainable ways of life.

Restriction: GENED 101G

Mechanical Engineering

Stage II

MECHENG 201 15 Points
Introduction to Mechatronics

Introduces mechatronics to mechanical and mechatronics engineers. Covers sensors and actuators, analogue and digital circuit elements for signal processing and programming.

Prerequisite: ELECTENG 101, ENNGEN 131

MECHENG 211 15 Points
Thermofluids

The fundamentals of fluid mechanics, thermodynamics and heat transfer with practical applications to engineering devices and systems.

MECHENG 222 15 Points
Dynamics

Kinematics of particles, rectilinear and curvilinear motion, kinematics of rigid bodies in the plane. Kinetics of particles, systems of particles and rigid bodies. Impulse and momentum, mechanism motion in the plane. Vibration of a particle.

Prerequisite: ENNGEN 121 or 150

MECHENG 235 15 Points
Design and Manufacture 1

The engineering design process as a teamwork and problem-solving activity involving analysis, synthesis, evaluation and critical thinking. Design methodology and communicating design intent through written and graphical means. Introduction to selected motive power sources, machine elements for mechanical power systems, and production and fabrication processes.

Prerequisite: ENNGEN 115

MECHENG 236 15 Points
Design and Manufacture 2

Machine elements and their use in engineering design, including internal combustion engines, clutches, brakes, and basic hydraulic and pneumatics systems and components. Material-based production processes and fabrication methods. Design reliability and safety. Basic principles of "Design for X".

Prerequisite: MECHENG 235

MECHENG 242 15 Points
Mechanics of Materials 1

Prerequisite: ENNGEN 121 or 150

MECHENG 270 15 Points
Software Design

Fundamentals of software design and high-level programming making use of case studies and programming projects. Includes: requirements analysis, specification methods, software architecture, software development environments, software quality, modularity, maintenance, reusability and reliability; models of software development.

Prerequisite: ENNGEN 131

Restriction: COMPSYS 202, SOFTENG 281

MECHENG 299 0 Points
Workshop Practice

Restriction: ENNGEN 299

Stage III

MECHENG 306 15 Points
Design of Sensing and Actuating Systems

A range of projects on mechatronic elements and systems, involving sensors, actuators and microcontrollers, as well as their interfacing. The design of mechatronic sub-systems, including interfacing, signal conditioning and processing, sensors, actuators, control technologies, software, systems modelling, simulation, analysis and design.

Prerequisite: MECHENG 235 and 270

Restriction: MECHENG 312

MECHENG 311 15 Points
Thermal Engineering

Prerequisite: MECHENG 211

MECHENG 313 15 Points
Design of Real-Time Software

Introduces the principles of software design in a real-time environment. Main topics include computer/microcontroller architecture, programming in a real-time environment, software design and data acquisition systems.

Prerequisite: MECHENG 270

MECHENG 322 15 Points
Control Systems

An introduction to classical control of mechanical and
**Prerequisite:** ELECTENG 101

**Description language entries.**

Students will be exposed to the use of FPGA to rapid using CAD tools that exploit the advantage of automation.

**Fundamental concepts in the design of combinational and sequential logic circuits. Modern approach to design**

**Digital Circuit Design**

**Prerequisite:** ELECTENG 101

**Description language entries.**

**MECHENG 325 15 Points**

**Dynamics of Fluids and Structures**

3D rigid body dynamics - inertia tensor, Euler’s equations, gyroscopic motion. Vibration of single and two degree of freedom systems. Applications to vibration engineering. Introductory acoustics and spectral analysis. Mass, linear momentum, angular momentum and energy equations. Application to internal and external flows, boundary layers, pumps, turbines and lifting bodies. Experimental and numerical methods, dimensional analysis, similarity, and flow measurement.

**Prerequisite:** MECHENG 211, 222

**MECHENG 334 15 Points**

**Design and Manufacture 3**

Good practice and standard methods in mechanical engineering design. Conceptual and detailed design in projects involving machine elements, engineering sciences and engineering mechanics. Some of the advanced computer-aided tools (e.g., CAD, CAM, CAE) will be introduced and utilised in some projects.

**Prerequisite:** MECHENG 235, 236, 242

**MECHENG 340 15 Points**

**Mechanics of Materials 2**

Complex material behaviour and structural analysis, extending capability from two to three dimensions. States of stress and strain at a point in a general three-dimensional stress system. Generalised stress-strain relations for linearly elastic isotropic materials. Failure theories for ductile and brittle materials, elementary plasticity, and fatigue. Analytical techniques and numerical analysis of complex mechanical elements.

**Prerequisite:** MECHENG 242

**MECHENG 352 15 Points**

**Manufacturing Systems**

An introduction to the procedures and technological aspects of a typical manufacturing system; basic concepts and practice of plant and work design, automation, CAD/CAM, planning and simulation; selected IoT technologies; and project-based introduction to the tools and techniques applied by professional engineers in a modern manufacturing setting.

**MECHENG 370 15 Points**

**Electronics and Signal Processing**

An introduction to the design, analysis and implementation of electronic circuits or systems for various applications such as signal generation and processing, interfacing, and high power electronics.

**Prerequisite:** ELECTENG 101

**MECHENG 371 15 Points**

**Digital Circuit Design**

Fundamental concepts in the design of combinational and sequential logic circuits. Modern approach to design using CAD tools that exploit the advantage of automation. Students will be exposed to the use of FPGA to rapid prototype digital systems using schematic and hardware description language entries.

**Prerequisite:** ELECTENG 101

**MECHENG 700A Level Courses**

**MECHENG 700A 15 Points**

**MECHENG 700B 15 Points**

**Research Project - Level 9**

Supervised research on a topic in engineering culminating in an independent written project report that includes a literature review, a description of the research and its findings, and a statement of research contribution. Further supporting technical material will be provided as a compendium.

**Prerequisite:** 75 points from Part III courses in the BE(Hons) Schedule

**Restriction:** MECHENG 407, 408, 461, 462, 762, 763

To complete this course students must enrol in MECHENG 700 A and B

**MECHENG 701 15 Points**

**Directed Study**

Supervised research on a topic or topics approved by the Academic Head or nominee.

**MECHENG 702 15 Points**

**Directed Study**

Supervised research on a topic or topics approved by the Academic Head or nominee.

**MECHENG 705 15 Points**

**Mechatronics Systems**

Fundamentals of digital control and signal processing as applied to mechatronics systems. Modelling and analysis of mechatronics systems that includes transducers and applications. Issues related to mechatronics systems such as thermal management, signal detection, filtering and integrity, etc.

**Prerequisite:** MECHENG 322, 370

**MECHENG 706 15 Points**

**Mechatronics Design Projects**

A range of projects that demonstrate the application and integration of engineering knowledge to create practical intelligent devices, machines and systems. AI based control techniques will be introduced.

**Prerequisite:** MECHENG 306, 313, 370

**MECHENG 707 15 Points**

**Special Topic**

**MECHENG 708 15 Points**

**Special Topic**

**MECHENG 709 15 Points**

**Industrial Automation**

Automation technologies widely used in manufacturing and processing industries. Topics include industrial robotics; programmable logic controllers (PLCs); pneumatics; machine vision systems; automated assembly; design for automation; and Industry 4.0 (such as machine-to-machine communications and data analysis). Students will participate in a number of hands-on labs throughout the course.

**Restriction:** MECHENG 710

**MECHENG 710 15 Points**

**Advanced Industrial Automation - Level 9**

Automation technologies widely used in manufacturing and processing industries. Topics include: industrial robotics; programmable logic controllers (PLCs); pneumatics; machine vision systems; automated assembly; design for automation; and Industry 4.0 (such as machine-to-machine communications and data analysis). Students will
participate in a number of hands-on labs, including an individual research project related to the application of advanced automation techniques.  
Restriction: MECHENG 709

MECHENG 711  
**Advanced Computational Fluid Dynamics - Level 9**
Application of computational methods to fluid dynamics and heat transfer. Finite volume and finite difference methods. Convergence and stability. Mesh generation and post-processing. Application of commercial computer programs to industrial problems. An individual project in which the student will be required to apply a commercial CFD code to a research problem of the student's choice.  
Restriction: MECHENG 718

MECHENG 712  
**Aerohydrodynamics**
The study of fluid mechanics relevant to external flows, e.g., wind turbines, yachts, aircraft or wind loadings on buildings, boundary layers, computational fluid dynamics.  
Prerequisite: MECHENG 325

MECHENG 713  
**Energy Technology**
Industrial thermodynamics and energy conversion/efficiency, power cycles, availability and irreversibility, simple combustion analysis, mass transfer, energy studies, boiling and condensation.  
Prerequisite: MECHENG 311

MECHENG 714  
**Wind Engineering - Level 9**
Advanced specialist topics in wind engineering such as: the wind-loading chain - planetary boundary-layer flow, extreme winds, wind structure, wind loads, dynamic response, bluff body aerodynamics, vortex shedding, aerelasticity, wind-tunnel testing, pedestrian level winds, wind energy. The core taught skills are extended by an individual project in which independent research is undertaken to solve a challenging wind engineering problem.  
Prerequisite: MECHENG 712

MECHENG 715  
**Building Services**
Principles and practice of heating, ventilation, air-conditioning and refrigeration (HVAC&R), psychrometry, heating/cooling loads, mass transfer and air quality, refrigeration/heat pump systems, cooling towers, pumps, fans, valves, pipes and ducts.  
Prerequisite: MECHENG 325

MECHENG 717  
**Advanced Thermal Systems**
Fundamentals of advanced thermodynamics. Topics covered will include a selection from: cycles and applications, heat and mass transfer, psychrometry, refrigeration and air-conditioning, internal combustion engines, combustion, thermal system design and simulation.

MECHENG 718  
**Computational Fluid Dynamics**
Restriction: MECHENG 711

MECHENG 719  
**Advanced Engineering Vibrations - Level 9**
Selected topics in advanced vibration engineering: multiple degree of freedom and continuous systems, spectral analysis, analytical, approximate and numerical methods, including FEA, vibration instrumentation, measurement and testing, modal analysis, vibration treatment. Includes an individual project in which independent research is undertaken to solve a challenging advanced vibration problem.  
Prerequisite: MECHENG 325  
Restriction: MECHENG 722

MECHENG 720  
**Advanced Multivariable Control Systems - Level 9**
Advanced control of mechanical and mechatronic systems. Topics include: state-space representations, linearisation, discretisation, stability, state feedback control design, optimal control, state estimation and Kalman filters. Applications in MATLAB/Simulink and with physical systems. Includes an individual research project related to the design of advanced control systems encountered in practice.  
Prerequisite: MECHENG 322  
Restriction: ELECTENG 722, MECHENG 724

MECHENG 722  
**Engineering Vibrations**
Selected topics in vibration engineering: Multiple degree of freedom and continuous systems; Spectral analysis; analytical, approximate and numerical methods, including FEA; vibration instrumentation, measurement and testing; modal analysis; vibration treatment.  
Prerequisite: MECHENG 325 or equivalent  
Restriction: MECHENG 719

MECHENG 724  
**Multivariable Control Systems**
Advanced control of mechanical and mechatronic systems. Topics include: state-space representations, linearisation, discretisation, stability, state feedback control design, optimal control, state estimation and Kalman filters. Applications in MATLAB/Simulink and with physical systems.  
Prerequisite: MECHENG 322  
Restriction: ELECTENG 722, MECHENG 720

MECHENG 726  
**Acoustics for Engineers**
Prerequisite: ELECTENG 331 or MECHENG 325

MECHENG 728  
**Advanced MEMS and Microsystems - Level 9**
Working principles and fabrication of MEMS/microsystems such as microsensors, microactuators, microfluidics, etc. Exposure to engineering design principles including engineering mechanics, fluids, materials, etc., at microscale. Includes an individual research project related to the design and fabrication of a device for an advanced application.  
Prerequisite: MECHENG 325  
Restriction: MECHENG 735
MECHENG 730 15 Points
Advanced Biomechatronic Systems - Level 9
Advanced mechatronic principles and techniques for measuring and manipulating biological systems. Human biomechanics and motion control, control and parallel robots, compliant soft robots, software and functional safety, human robot interaction and force control, novel sensors and actuators, and biomechatronic design principles. Includes an individual research project related to the analysis, selection and successful implementation of one of these advanced technologies.
Restriction: MECHENG 736

MECHENG 731 15 Points
Mechanical Design Projects
A variety of engineering projects requiring the development and communication of design solutions to a professional standard, and using a wide range of advanced engineering methods.
Prerequisite: MECHENG 334

MECHENG 735 15 Points
MEMS and Microsystems
Introduction to working principles and fabrication of MEMS/microsystems such as microsensors, microactuators, microfluidics, etc. Exposure to engineering design principles including engineering mechanics, fluids, materials, etc. at microscale. Exposure to microfabrication processes as part of a laboratory component.
Prerequisite: MECHENG 325
Restriction: MECHENG 728

MECHENG 736 15 Points
Biomechatronic Systems
Mechatronic principles and techniques for measuring, assisting, augmenting and mimicking biological systems. Topics include: brain machine interfaces, sensors and actuators, biomechanics and motion control, wearable and assistive devices, bioinstrumentation, soft robotic technologies, human factors, safety/ethical aspects, and biomechatronic design principles. Significant hands-on experience through the design, modelling and development of paradigmatic biomechatronic systems.
Restriction: MECHENG 730

MECHENG 742 15 Points
Advanced Materials Manufacturing - Level 9
Properties and processing of polymers and polymer composites. Analysis of selected manufacturing processes such as injection moulding, extrusion and liquid composites moulding, viscous flows, flow through porous media and heat transfer. Includes an individual research project related to recent developments in advanced composites in terms of processability/manufacturability, functionality and performance/potential.

MECHENG 743 15 Points
Composite Materials
Prerequisite: MECHENG 340

MECHENG 747 15 Points
Manufacturing and Industrial Processes
Analysis and design of manufacturing processes, with a focus on techniques to manipulate metals and polymers. Application of solid mechanics, fluid mechanics and heat transfer to current additive, subtractive, forming and injection/casting manufacturing technologies. Topics include: bulk and sheet forming, extrusion, injection moulding, 2D and 3D printing processes.
Prerequisite: MECHENG 340

MECHENG 751 15 Points
Advanced CAD/CAM/CNC - Level 9
Advanced computer-aided design (CAD), computer-aided manufacturing (CAM) and computer numerical control (CNC). Intelligent CAD, feature-based design and manufacturing, CAD data interoperability, advanced CAM methodologies, smart CNC systems, and integration of the above technologies. Includes an independent research project to demonstrate mastery of the philosophy, analysis, selection and successful implementation of manufacturing technologies.
Prerequisite: MECHENG 352 or 752

MECHENG 752 15 Points
Technology Management
An appreciation of the strategic systems and technology management aspects of manufacturing systems. Industry based projects that explore the design and optimisation of manufacturing operations form a major part of the course.
Prerequisite: B grade or higher in ENGGEN 303

MECHENG 753 15 Points
Advanced Industry 4.0 Smart Manufacturing - Level 9
New or emerging technologies and their applications in manufacturing enterprises, including Industry 4.0, product modelling technologies, smart manufacturing systems, industrial IoT (Internet of Things) sensing and data analysis technologies, digital twins, and applications of RFID (Radio Frequency Identification) and interoperability standards such as OPC UA in a modern manufacturing setting. Students will work on research projects individually and independently on a topic related to Industry 4.0.
Prerequisite: MECHENG 352 or 752
Restriction: MECHENG 709, 710, 754

MECHENG 754 15 Points
Industry 4.0 Smart Manufacturing
New information technologies and their applications in manufacturing enterprises, including introduction to Industry 4.0, product modelling technologies, smart manufacturing systems, industrial IoT sensing and data analysis technologies, digital twins and applications of RFID in a modern manufacturing setting.
Restriction: MECHENG 709, 710, 753

MECHENG 755 15 Points
Design for Additive Manufacturing
Design for additive manufacturing (AM), metal AM, polymer AM, AM technologies, material extrusion, powder bed fusion, vat photopolymerisation, material jetting, binder jetting, AM thought process, economics of AM, support generation, residual stress reduction, post-processing, computational design, light-weighting, topology optimisation, lattice structures, mass-customisation, tooling, conformal cooling, heat exchangers, part consolidation, specialised AM software: nTopology Magics, Inspire, CAD for AM.
Prerequisite: MECHENG 235

MECHENG 787 15 Points
Project X - Level 9
Students are required to submit a report on a topic assigned by the appropriate Head of Department.
Prerequisite: Departmental approval
MECHENG 788A 15 Points
MECHENG 788B 15 Points
Project Y - Level 9
Students are required to submit a report on a topic assigned by the appropriate Head of Department.
Prerequisite: Departmental approval
To complete this course students must enrol in MECHENG 788 A and B

MECHENG 789 30 Points
Project Z - Level 9
Students are required to submit a report on a topic assigned by the appropriate Head of Department.
Prerequisite: Departmental approval

MECHENG 795 45 Points
MECHENG 795A 15 Points
MECHENG 795B 30 Points
Research Project (Mechanical) - Level 9
Students are required to submit a report on a topic relevant to the specialisation, as assigned by the appropriate Head of Department.
Prerequisite: Departmental approval
To complete this course students must enrol in MECHENG 795 A and B, or MECHENG 795

MECHENG 796A 60 Points
MECHENG 796B 60 Points
ME Thesis (Mechanical) - Level 9
Students are required to submit a thesis on a topic assigned by the appropriate Head of Department.
Prerequisite: Departmental approval
To complete this course students must enrol in MECHENG 796 A and B

Mechatronics Engineering
Stage II
MECHTRON 299 0 Points
Workshop Practice
Restriction: ENGGEN 299

Postgraduate 700 Level Courses
MECHTRON 796A 60 Points
MECHTRON 796B 60 Points
ME Thesis (Mechatronics) - Level 9
Students are required to submit a thesis on a topic assigned by the appropriate Head of Department.
To complete this course students must enrol in MECHTRON 796 A and B

Polymer Engineering
Postgraduate 700 Level Courses
POLYMER 700 15 Points
Polymer Materials Engineering
Microstructure and morphology of semi-crystalline and amorphous polymers, including alloys and thermoplastic elastomers. The study of structure/property/processing inter-relationships for polymer materials.
Restriction: CHEMMAT 740

POLYMER 704 15 Points
Advanced Polymer Processing
In-depth coverage of advanced polymer processing techniques. Study of additives, degradation processes and the prevention of degradation, formulation of products (thermosets and speciality polymers) and mixing of materials. Advanced moulding techniques, reaction injection moulding and processing biopolymers and speciality polymers as well as liquid moulding.
Restriction: CHEMMAT 741, 743

POLYMER 705 15 Points
Polymer Process and Product Design
Restriction: CHEMMAT 742

POLYMER 706 15 Points
Polymer Testing and Characterisation
Focuses on applying characterisation techniques to polymer materials, especially spectroscopic, thermal and rheological analysis and mechanical testing to understand the behaviour of polymer materials for design, processing and use.
Restriction: CHEMMAT 740, 743

Software Engineering
Stage II
SOFTENG 206 15 Points
Software Engineering Design 1
Project work. Skills and tools in systematic development of software, including testing, version control, build systems, working with others. Professional issues introduced in ENGGEN 204 (ethics, communication, and teamwork) are reinforced and developed while simulating a client-facing software development process.
Prerequisite: SOFTENG 251 or 281

SOFTENG 211 15 Points
Software Engineering Theory
Prerequisite: ENGGEN 131 or COMPSCI 101

SOFTENG 250 15 Points
Introduction to Data Structures and Algorithms
Introduction to the analytical and empirical behaviour of basic algorithms and data structures.
Prerequisite: ENGGEN 131 or COMPSCI 101
Corequisite: ENGSCI 211

SOFTENG 251 15 Points
Object Oriented Software Construction
An introduction to Object Oriented software development. Programming with classes; objects and polymorphism. Evolutionary and test-driven development. Analysis and design. Modelling with UML. Design patterns. Design for reuse, for testing, and for ease of change.
Prerequisite: ENGGEN 131 or COMPSCI 101

SOFTENG 254 15 Points
Quality Assurance
Software verification and validation. Static and dynamic QA activities as part of the software lifecycle. Unit, integration, system, and usability testing. Use of visual notations, automation, and tools to support development activities.
Metrics to quantify strength of testing and complexity of programs.

Prerequisite: SOFTENG 250, 251

SOFTENG 281 15 Points
Object-Oriented Programming
Computer programming using objects as the mechanism for modularity, abstraction, and code reuse. Review of control structures for conditionals and iteration. Instance variables, methods, and encapsulation. Interfaces, inheritance, polymorphism, and abstract classes. Exception handling. Introduction to basic data structures and basic algorithms including sorting and searching.

Prerequisite: COMPSCI 101 or ENGENG 131
Restriction: COMPSCI 230, COMPYS 202, MECHENG 270, SOFTENG 251

SOFTENG 282 15 Points
Software Engineering Theory
Theoretical foundations of software engineering, including sets, formal languages, operations on languages, deterministic and nondeterministic automata, designing automata, determinisation, regular expressions, logic, induction, recursion, program correctness, computability, counting, elements of graph algorithms.

Prerequisite: COMPSCI 101 or ENGENG 131
Restriction: COMPSCI 225, SOFTENG 211

SOFTENG 283 15 Points
Software Quality Assurance
Software verification and validation. Static and dynamic quality assurance activities as part of the software lifecycle. Unit, integration, system, and usability testing. Metrics to quantify strength of testing and complexity of programs. Techniques for engineering of software systems including requirements, specification, validation, verification. Modelling paradigms including information, behaviour, domain, function and constraint models. Specification languages.

Prerequisite: COMPYS 202 or SOFTENG 251 or 281
Restriction: SOFTENG 254

SOFTENG 284 15 Points
Data Structures and Algorithms
Data structures including linked-lists, stacks, queues, trees, hash tables; graph representations and algorithms, including minimum spanning trees, traversals, shortest paths; introduction to algorithmic design strategies; correctness and performance analysis.

Prerequisite: COMPYS 202 or SOFTENG 251 or 281
Restriction: COMPSCI 220, 717, SOFTENG 250

SOFTENG 299 0 Points
Workshop Practice
Restriction: ENGENG 299

Stage III

SOFTENG 306 15 Points
Software Engineering Design 2
Working in project teams to develop software to meet changing requirements for a large application. Project planning, Requirements gathering. Estimating, costing and tracking. Acceptance and unit testing. Evolutionary design and development. Collaborative development tools. Professional issues introduced in ENGENG 204 and 303 (communication, leadership, teamwork, safety in design) are reinforced and developed.

Prerequisite: SOFTENG 206, and SOFTENG 254 or 283

SOFTENG 310 15 Points
Software Evolution and Maintenance
Design and maintenance of multi-version software, debugging techniques, design and documentation for software re-use, programme migration and transformation, refactoring, tools for software evolution and maintenance.

Prerequisite: SOFTENG 254 or 283

SOFTENG 325 15 Points
Software Architecture
Taxonomy of software architecture patterns, including client/server and multi-tier. Understanding quality attributes. Methodologies for design of software architectures. Technologies for architecture level development, including middleware.

Prerequisite: COMPYS 302 or SOFTENG 254 or 283
Restriction: COMPSCI 331

SOFTENG 350 15 Points
Human Computer Interaction
Human behaviour and humans’ expectations of computers. Computer interfaces and the interaction between humans and computers. The significance of the user interface, interface design and user centred design process in software development. Interface usability evaluation methodologies and practice. Includes an evaluation project, group design project, and implementation using current techniques and tools.

Prerequisite: SOFTENG 206 or 283
Restriction: COMPSCI 345, 370

SOFTENG 351 15 Points
Fundamentals of Database Systems
Relational model, Relational algebra, Relational calculus, SQL, SQL and programming languages, Entity-Relationship model, Normalisation, Query processing, Query optimisation, Distributed databases, Transaction management, Concurrency control, Database recovery.

Prerequisite: SOFTENG 251 or 281
Restriction: COMPSCI 351

SOFTENG 364 15 Points
Networks and Security
Physical networks, TCP/IP protocols, switching methods, network layering and components, network services. Information security, computer and network security threats, defence mechanisms and encryption.

Prerequisite: COMPYS 201, and SOFTENG 251 or 281

SOFTENG 370 15 Points
Operating Systems

Prerequisite: COMPSCI 201, and SOFTENG 251 or 281
Restriction: COMPSCI 340

Postgraduate 700 Level Courses

SOFTENG 700A 15 Points
SOFTENG 700B 15 Points
Research Project - Level 9
Students are required to submit a report on project work
carried out on a Software Engineering topic assigned by the Head of Department.
Prerequisite: SOFTENG 306
To complete this course students must enrol in SOFTENG 700 A and B

SOFTENG 701 15 Points
Advanced Software Engineering Development Methods - Level 9
Advanced studies in methods and techniques for developing complex software systems including topics in software engineering environments, advanced software design, tool construction and software architectures. The core taught skills are extended by individual projects in which independent research is undertaken to address challenging software system problems.
Prerequisite: COMPSYS 302 or SOFTENG 306

SOFTENG 702 15 Points
Advanced Human Computer Interaction
Advanced topics in human computer interaction and human aspects of computer systems relevant to commercial solution development and computer science research. Sample topics: advanced evaluation methods; support of pen and touch-based interaction; trends with domain specific user interface design, such as interfaces for enterprise systems.
Prerequisite: SOFTENG 350
Restriction: COMPSCI 705

SOFTENG 710 15 Points
Studies in Software Engineering 1
Advanced courses on topics to be determined each year by the Head of Department.
Prerequisite: Departmental approval

SOFTENG 711 15 Points
Studies in Software Engineering 2
Advanced courses on topics to be determined each year by the Head of Department.
Prerequisite: Departmental approval

SOFTENG 715 15 Points
Special Topic

SOFTENG 750 15 Points
Software Development Methodologies
Software lifecycle; software process models; examples of software processes; software process improvement; project management; tool support for software development; issues in software engineering.
Prerequisite: COMPSYS 302 or SOFTENG 306
Restriction: COMPSCI 732

SOFTENG 751 15 Points
High Performance Computing - Level 9
Advanced parallel and high performance computing concepts and techniques such as parallel system architecture; parallelisation concepts, algorithms and methodology; parallel programming paradigms and technologies. Core concepts and skills are deepened by a hands-on research project in which a challenging parallel computing problem is analysed and solved.
Prerequisite: COMPSYS 302 or SOFTENG 306

SOFTENG 752 15 Points
Formal Specification and Design - Level 9
Formal specification, design, and (automatic) analysis of software systems. Quality assurance through precise description and rigorous verification on the design. Introduction to the Z, OCL and CSP notations. Comparison of approaches, with emphasis on their practical application. Includes a substantial individual research project.
Prerequisite: COMPSYS 302 or SOFTENG 306

SOFTENG 753 15 Points
Machine Learning Techniques and Applications
Examines classic and state of the art algorithms in the field of machine learning. Topics may include: Bayesian classification, regression and state estimation; clustering and mixture models; kernel-based methods; sequential models; graphical models; neural networks and deep architectures.
Prerequisite: COMPSYS 302 or SOFTENG 306

SOFTENG 754 15 Points
Advanced Software Requirements Engineering - Level 9
Advanced software engineering concepts focusing on techniques for requirements analysis and requirements engineering (RE) of software systems. Topics will include: requirements elicitation, analysis, specification, validation, verification, user experience design, test-driven development and continuous integration. Includes a substantial individual research project.
Prerequisite: COMPSYS 302 or SOFTENG 306

SOFTENG 755 15 Points
Special Topic

SOFTENG 761 15 Points
Advanced Agile and Lean Software Development - Level 9
Advanced software engineering concepts focussing on Agile and Lean software development; including hands-on iterative and incremental software development, self-organising teamwork, project management, and an individual research component to explore challenging issues in this discipline.
Prerequisite: COMPSYS 302 or SOFTENG 306

SOFTENG 762 15 Points
Robotics Process Automation
Covers the fundamentals of Robotic Process Automation (RPA) systems. Students explore what RPA is and where it is useful, how RPA fits into current information technology setups, extracting and manipulating data from both external and internal sources, generating reports and statistics, and orchestrating multi-robot installations.
Prerequisite: COMPSYS 302 or SOFTENG 306

SOFTENG 770 15 Points
Capstone Project
Final year team exercise with students in multi-disciplinary roles, with focus on software engineering, integrating technical learning into realistic design outcomes. Comprehensive investigation of an open ended, complex, real or synthetic computer, electrical and software engineering problem with simulated professional design office constraints. Includes technical, economic and environmental impact components to complete a scheme assessment report.
Prerequisite: 75 points from Part III courses listed in the BE(Hons) Schedule for the Software Engineering specialisation

SOFTENG 787 15 Points
Project X - Level 9
Students are required to submit a report on a topic assigned by the Head of Department.
Prerequisite: Departmental approval

STRCTENG 300 15 Points

Design Loads and Dynamic Response of Structures

Determination of design loads according to AS/NZS1170 and the response of structures under dynamic loadings.

Prerequisite: CIVIL 210 or STRCTENG 200

Restriction: CIVIL 314

STRCTENG 301 15 Points

Timber Structures Design

Structural analytical techniques including computer based approaches to simple indeterminate structures. Design procedures for members and structural systems of timber and engineered wood products including environmental and sustainability considerations in design. Design project.

Prerequisite: CIVIL 210 or STRCTENG 200

Restriction: CIVIL 312

STRCTENG 302 15 Points

Steel Structures Design

Mechanical properties of steel and contextualises the application of steel and steel/concrete into buildings and bridges including material environmental and sustainability considerations. Comprehensive introduction to design of structural steel members and connections and their use in structures. Application to vertical load carrying systems and steel building behaviour in earthquake and fire.

Prerequisite: CIVIL 210 or STRCTENG 200

Restriction: CIVIL 313

STRCTENG 303 15 Points

Concrete Structures Design

Design of reinforced concrete members including beams, columns, walls, foundations. Introduction to prestressed and precast concrete design and applications. Use of the New Zealand Concrete Structures Standard, NZS 3101. Discussion of environmental and sustainability considerations when using concrete as a building material.

Prerequisite: CIVIL 210 or STRCTENG 200

Restriction: CIVIL 313

STRCTENG 304 15 Points

Structural Design for Civil Engineers

Structural loading for gravity and wind in accordance with the loading code AS/NZS1170. Design principles and examples for concrete and timber members and design for timber framed buildings using NZS3604 including the concept of safety in design. Discussion of sustainability and environmental implications of selecting different building materials. Introduction to seismic building behaviour at a conceptual level.

Prerequisite: CIVIL 210 or STRCTENG 200

Restriction: CIVIL 312, 313

Postgraduate 700 Level Courses

STRCTENG 710 15 Points

Low Rise Structures Design

Structural systems for low-rise buildings, including seismic design and analysis techniques. Design and detailing of low-rise structures in structural steel, reinforced concrete, reinforced masonry, and timber including discussion of sustainability and environmental impacts of design decisions. Strut and tie for reinforced concrete. Introduction to fire engineering. Techniques in ensuring safety in design, checking of existing structures, lessons from failures, and design for repair.

Prerequisite: STRCTENG 302, and CIVIL 313 or STRCTENG 303

Restriction: CIVIL 713

STRCTENG 711 15 Points

Multistorey Structures Design

Techniques for the design of multistorey structures to resist seismic loading. Derivation of design actions and design of structural components subject to cyclic inelastic action. Includes identifying alternative structural systems for resisting seismic loads, incorporating sustainable design into seismic structural systems, detailing of members and
joints to enhance earthquake resistance, design for repair, seismic isolation, and ensuring safety in design. 
Prerequisite: STRCTENG 302, and CIVIL 313 or STRCTENG 303
Restriction: CIVIL 714

**STRCTENG 760**

15 Points

**Forensic Structural Engineering**

Investigation of structural failures and disasters extending to the evaluation and assessment, restoration, and strengthening of modern and historic structures. Provides an understanding of the forensic engineering process that applies to the investigation and assessment of structural failures. Business practices including standards of care, performing critical self-assessment of capabilities, assembling a team, and professional ethics, legal testimony, and media relations are also discussed. 
Prerequisite: STRCTENG 302, 303
Restriction: CIVIL 744

Academic Integrity

ACADINT A01 0 Points

Academic Integrity Course
An online course designed to increase student knowledge of academic integrity, university rules relating to academic conduct, and the identification and consequences of academic misconduct. Students work through a series of modules, outlining scenarios that they may encounter while studying at university. Each scenario provides information on relevant rules, resources and expected behaviour.

COMLAW 740A 15 Points
COMLAW 740B 15 Points

The Tax Base - Level 9
An advanced study of the breadth of the New Zealand income tax base, including the different concepts of income, its timing and recognition. Comparisons between the nature of capital and income, and the differing treatment of each, provides a deeper understanding of the policy behind the New Zealand income tax regime. Provides a theoretical background and detailed technical knowledge of the scope and application of the most significant regimes for income, deduction and timing in the Income Tax Act 2007. Involves individual research resulting in a substantial individual research essay.

To complete this course students must enrol in COMLAW 740A and B

COMLAW 747 15 Points

Goods and Services Tax
An advanced study of Goods and Services Tax. Provides both a theoretical background and high level of technical knowledge of the GST Act 1985. Comparisons with other indirect taxes and overseas variations of GST (notably Australian GST and UK VAT) provide a deeper understanding of the policy behind the New Zealand GST regime. Major topics include taxable activities, input tax, output tax, registration, adjustments, taxable supplies, timing and the GST anti-avoidance provisions.

COMLAW 748 15 Points

Tax Disputes
An advanced study of the statutory disputes and challenge procedures in the Tax Administration Act 1994. Covers the power of the Commissioner to propose adjustments, conduct investigations and raise assessments. Reviews the administrative law obligations imposed on the Commissioner, taxpayer rights and the power of the Courts to supervise and review the assessment process.

Law

Stage I

LAW 121G 15 Points

Law and Society
An introduction to theories of the nature, functions and origins of law and legal systems, including sources of law; comparative concepts of law; an overview of constitutional and legal arrangements in New Zealand, including the role of the courts; the operation of the legal system in historical and contemporary New Zealand with a focus on concepts of property rights, the Treaty of Waitangi, Treaty Settlements and proposals for constitutional change. Note: Does not meet the General Education requirement for LLB, LLB(Hons), LLB conjoint or LLB(Hons) conjoint degrees.

Restriction: LAW 101

LAW 131 15 Points

Legal Method
An introductory study of how law is made and applied in New Zealand – an overview of the law-making roles of the legislative, executive and judicial branches of government; other influences on the development of the law; an introduction to case law, including judicial reasoning and the doctrine of precedent; an introduction to statute law, including the legislative process and techniques of statutory interpretation and application; the interaction between case law and legislation.

Prerequisite: LAW 121 or 121G

LAW 141 15 Points

Legal Foundations
An overview of the classification, sources and operation of core aspects of New Zealand law, including state law and tikanga Māori. An introduction to other sources, perspectives and explanations of law.

Prerequisite: LAW 121 or 121G

Corequisite: LAW 131

Stage II

LAW 201A 15 Points
LAW 201B 15 Points

Criminal Law
An introduction to the principles and practice of criminal law in Aotearoa New Zealand, including an analysis of a selection of offences, criminal defences and the rules attributing criminal liability. Apart from the rules concerning burden of proof and an introduction to the principles and process of sentencing, no detailed study is made in this course of the law of evidence or procedure.

Prerequisite: LAW 298 or 299

To complete this course students must enrol in LAW 201 A and B

LAW 211A 15 Points
LAW 211B 15 Points

Public Law
The principles and workings of the New Zealand constitution; the powers, privileges and immunities of the three branches of government; the exercise and control of public power; and the relationship between the individual and the State (including the position of Māori under the Treaty of Waitangi).

Corequisite: LAW 298 or 299

To complete this course students must enrol in LAW 211 A and B
Course Prescriptions

LAW 231A 15 Points
LAW 231B 15 Points
Law of Torts
The general principles of civil liability for non-consensual wrongs. The principles of liability applying to selected torts, including the intentional torts such as: assault, battery, false imprisonment, intentionally inflicting emotional distress, trespass to land, wrongs to goods, negligence, strict liability, nuisance and defamation. The law relating to compensation for personal injury.
Corequisite: LAW 298 or 299
To complete this course students must enrol in LAW 231 A and B

LAW 241A 15 Points
LAW 241B 15 Points
Law of Contract
The general principles of contract law including: the formation of contracts at common law, New Zealand contract legislation, breach of contract, and remedies for breach of contract. An introduction to the general principles of agency.
Corequisite: LAW 298 or 299
To complete this course students must enrol in LAW 241 A and B

LAW 298A 5 Points
LAW 298B 5 Points
Legal Research, Writing and Communication
Legal research, writing, mooting and other requirements, as determined by the Dean of Faculty of Law.
Restriction: LAW 299
To complete this course students must enrol in LAW 298 A and B

Stage III

LAW 301A 10 Points
LAW 301B 10 Points
Land Law
A study of the history and principles of land law including: estates and interests in land, the effect of registration and indefeasibility of title, leasehold estates, easements and profits, mortgages, and concurrent interests in land, and covenants affecting freehold land.
Prerequisite: LAW 201, 211, 231, 241
To complete this course students must enrol in LAW 301 A and B

LAW 306A 10 Points
LAW 306B 10 Points

Prerequisite: LAW 211, 231, 241

LAWGENRL 457 10 Points

Special Topic: Complex Litigation

The rise of globalisation and technology has created complex litigation challenges for victims of mass harms nationally and internationally. This course examines comparative theoretical, ideological and economic policies which underpin complex litigation systems with a particular focus on the use of regulatory actions, class actions and litigation funding entities. It also examines major procedural and substantive issues that arise in the context of national and international complex civil litigation.

Prerequisite: LAW 201 and 211 and 231 and 241 and 298; or LAW 201 and 211 and 231 and 241 and 299

LAWGENRL 458 15 Points

Pasifika Peoples and the Law

Undeniably, Pasifika peoples in Aotearoa experience a number of inequalities. However, the complex relationships between these inequalities and the law are rarely explored in legal education and scholarship. Therefore, this course aims to give students an understanding of these relationships by encouraging the use of critical perspectives to examine a range of socio-legal issues facing Pasifika communities in Aotearoa today.

Prerequisite: LAW 201, 211, and 298 or 299

LAWGENRL 459 15 Points

Special Topic: Race and the Law

Explores the relationship between race, power and the law in Aotearoa and beyond. Areas of focus will include the changing conceptualisations of race, racism, discrimination, implicit and institutional bias. Students will also examine approaches to racial justice (from Critical Race Theory to Abolition movements) and consider how they understand and address the issues facing communities of colour today.

Prerequisite: LAW 201 and 211 and 231 and 241 and 298; or LAW 201 and 211 and 231 and 241 and 299

LAWGENRL 460 15 Points

Special Topic: International Mooting

Students selected to represent the Faculty of Law in approved international mooting competitions will complete independent research, draft written submissions and present oral argument on complex areas of international law which will be overseen by faculty advisers.

Prerequisite: LAW 201, 211, 231, 241, 298 or 299

Ultrasound Specialised Clinical Applications
Addresses normal and abnormal ultrasound imaging appearances, scanning techniques and applications associated with specialised ultrasound imaging. An emphasis will be placed on integrating theory and clinical practice elements to facilitate sound clinical reasoning, decision-making and clinical competence.
Prerequisite: MEDIMAGE 716
Restriction: CLINIMAG 704, 714

**CLINIMAG 721 30 Points**

Mammographic Practice
An in-depth understanding of mammographic imaging of breast anatomy and pathology, and the principles of mammographic technology and image quality. Addresses the knowledge, skills and attributes needed to demonstrate competence in clinical mammographic practice.

**CLINIMAG 722 30 Points**

Extended Mammographic Practice
An in-depth understanding of mammography assessment, interventional techniques and quality assurance. Addresses the knowledge, skills and attributes needed to demonstrate competence in academic and extended clinical mammographic practice.

**CLINIMAG 723 15 Points**

PET-CT Imaging
Addresses the fundamentals of PET-CT and hybrid imaging including equipment, normal and altered radiopharmaceutical biodistribution appearances and a range of clinical applications. An emphasis will be placed on integrating theory and clinical practice elements to facilitate sound clinical reasoning and decision-making.
Prerequisite: MEDIMAGE 720

**Dietetics**

**Postgraduate 700 Level Courses**

**DIETETIC 703 15 Points**

Clinical Nutrition: Disease Pathophysiology and Management - Level 9
Provides basic and practical material for professional application of clinical nutrition knowledge to dietetic practice and case management. Includes the aetiology and pathophysiology of disease states that are relevant to, and underpin, nutritional management and/or treatment. Includes assessment of nutritional status and nutritional requirements, fluid and electrolyte management, nutrition therapy by tube feeding, and dietetic management of various disease states.

**DIETETIC 707 30 Points**

Professional Skills 1
Evaluates professional communication, organisation and management skills that will enable students to work effectively as dietitians. Students will describe and appraise nutrition information, dietetic expertise, judgement and reasoning to the nutrition assessment, intervention and evaluation of nutrition and dietetic process plans. Introduces the principles of food service systems and public health to optimise nutrition, health and well-being.
Restriction: DIETETIC 704

**DIETETIC 708 30 Points**

Professional Skills 2
Integrates professional communication, organisation and management skills that will enable students to work effectively as dietitians. Students will apply nutrition knowledge, dietetic expertise, judgement and reasoning to the nutrition assessment, intervention and evaluation of nutrition and dietetic process plans. Applies the principles of food service systems and public health to optimise nutrition, health and well-being.

**DIETETIC 709A 15 Points**

**DIETETIC 709B 15 Points**

Professional Skills 3
Advances effective communication skills to optimise nutrition, health, well-being for individuals and communities. Integrates and appraises the dietetic process as it applies to clinical and dietetic practice. Critically evaluates the scientific principles of clinical nutrition to enable the translation of the evidence to best practice. Apply communication and organisation principles, which will ensure effective, management and leadership within varied environments.

**DIETETIC 709 30 Points**
To complete this course students must enrol in DIETETIC 709 A and B

**DIETETIC 710 15 Points**

Research Methods in Human Nutrition
An overview of research design and techniques used in human nutrition research. Including the formation and critique of research design, data procedures, analysis and ethical issues.

**DIETETIC 793A 45 Points**

**DIETETIC 793B 45 Points**

**Thesis - Level 9**

**Digital Health**

**Postgraduate 700 Level Courses**

**DIGIHLTH 701 Principles of Digital Health**

The study of information technology and information management concepts relevant to the delivery of high quality and cost-effective healthcare. Theoretical frameworks such as data management, decision support, strategic planning and implementation, change management, knowledge management and privacy and other ethical aspects of digital health are included.

*Restriction: HLTHINFO 728*

**DIGIHLTH 702 Health Knowledge Management**

Analyses the role and dynamics of knowledge in the working environment in the health sector, and develops aspects of knowledge infrastructure.

*Restriction: HLTHINFO 723*

**DIGIHLTH 703 New Zealand Health Data Landscape**

An overview of key issues to support the appropriate and effective use of large volumes of routinely collected data to drive improvements in the delivery of health care. Ethical and equitable use of health data, critical evaluation of health data, identification of analytic methods and appropriate interpretation to support health care decision-making are discussed. Specific datasets are not analysed.

*Restriction: HLTHINFO 725*

**DIGIHLTH 704 Healthcare Decision Support Systems**

Familiarises students with the main developments of decision support systems in healthcare. The theoretical concepts and the technology including data mining, clinical decision support systems, diagnostic systems and decision support in managed care are outlined. Ethical issues are also addressed.

*Restriction: HLTHINFO 730*

**DIGIHLTH 705 Digital Health Design and Evaluation**

Examines the design and development of digital health tools to meet end-user and health service needs. A series of case studies are used to illustrate the different stages of digital health tool development, evaluation, and implementation. Health service, researcher and end-user perspectives are covered.

**DIGIHLTH 706 Health Data Analytics**

Analyses, interprets, and presents quantitative data to assist decision making in the health sector. Fundamental elements of statistics, data management, visualisation, epidemiology and computing are covered.

**DIGIHLTH 707 Directed Study**

*Restriction: HLTHINFO 722, 724*

**DIGIHLTH 708 Special Topic**

**Health Informatics**

### Postgraduate 700 Level Courses

**HLTHINFO 722 Special Study in Health Informatics 1**

**HLTHINFO 723 Health Knowledge Management**

The objective of this course is to develop an ability to analyse the role and dynamics of knowledge in the working environment in the health sector, and to develop aspects of knowledge infrastructure.

*Restriction: POPLHLTH 723*

**HLTHINFO 725 The New Zealand Health Data Landscape**

An overview of key issues to support the appropriate and effective use of large volumes of routinely collected data to drive improvements in the delivery of health care. Ethical and equitable use of health data, critical evaluation of health data, identification of analytic methods and appropriate interpretation to support health care decision-making are discussed. Specific datasets are not analysed.

*Restriction: POPLHLTH 728*

**HLTHINFO 730 Healthcare Decision Support Systems**

Familiarises students with the main developments of decision support systems in healthcare. The theoretical concepts and the technology including data mining, clinical decision support systems, diagnostic systems and decision support in managed care are outlined. Ethical issues are also addressed.

*Restriction: POPLHLTH 730*

**Health Management**

### Postgraduate 700 Level Courses

**HLTHMGT 721 Health Management**

The application of general management principles to health organisations and resources, with particular reference to the nature of health organisations and health professional teams. Includes theory and concepts supporting the effective management of health human resources and financial resources.

*Restriction: POPLHLTH 721*

**HLTHMGT 724 Special Topic**

**HLTHMGT 725 Special Study in Health Leadership**

**HLTHMGT 729 Strategic Health Management**

The importance and contribution of strategic management to the health sector is established through the application
of strategic management thinking and theory to complex systems. Skills in strategy formulation are developed through application of the logic and processes of strategy.

**Stage I**

To complete this course students must enrol in HLTHMGT 755 A and B, or HLTHMGT 755

**Postgraduate 700 Level Courses**

**HLTHPSYC 717**

Emotions, Emotion Regulation, and Health

Extends content knowledge in health psychology by focussing on the expanding literature linking emotions and emotion regulation with health outcomes. The course provides an overview of the nature and functions of emotions, discrete versus dimensional approaches, developmental and cultural considerations, and the links between emotions and cognitive processes. Specific topics include direct and indirect pathways linking emotions and health, links between emotions and health-deleterious behaviours, symptom detection, screening behaviour, treatment decision-making, and adherence.

**HLTHPSYC 718**

Psychophysiology and Health

Describes general psychophysiological methodology including the measurement, analysis and interpretation of physiological data. Topics include physiological responses to stress including heart rate, blood pressure, heart rate variability, cortisol and the startle response. This course takes a multi-systems approach to exploring health and affords the opportunity to view behavioural, physiological and neuroendocrine responses to stress.

**HLTHPSYC 719**

Health Psychology Assessment

Extends content knowledge in health psychology through the development of skills in the assessment and evaluation of constructs commonly used in health psychological research and practice. Includes consideration of general issues in psychometric theory and the specific assessment issues commonly confronting widely-used health psychological research designs, as well as detailed coverage of specific content areas including illness cognitions, health-related psychophysiology, emotions, and health outcomes.

**HLTHPSYC 720**

Health Psychology Interventions

Reviews the underpinning theory base for approaches commonly used in health psychology interventions such as CBT, and applies these approaches to examples from the field of health psychology. Individual and group/community treatment targets will be considered, including common difficulties that impact on disease occurrence or management, and the psychological consequences of disease.

**HLTHPSYC 742**

Professional Practice in Health Psychology

Focuses on the professional intervention skills necessary to practice health psychology. Topics include: interviewing and assessment skills, formulation of problems, design and evaluation of interventions and models for interdisciplinary and multidisciplinary functioning. Relevant contexts include: hospitals, hospices, consultancies, general practice etc.

**Prerequisite:** HLTHPSYC 746

To complete this course students must enrol in HLTHPSYC 742 A and B

**HLTHPSYC 743**

Psychopathology and Clinical Interviewing

Common psychological disorders encountered in clinical
practice and health settings. Practical teaching of clinical interview and diagnostic skills is completed in class.

**Course Prescriptions**

**HLTHPSYC 744**  
*Research Topic in Health Psychology*

Offers the opportunity for academic staff to provide a specific course of study for one or several students. It is available only by arrangement between the staff member(s) and students.

**HLTHSCI 700**  
*Working with People with Long-term Conditions - Level 9*

Long-term conditions present one of the most challenging global epidemics of the twenty-first century. This course is designed to support the development of a responsive person-centred healthcare workforce to meet the needs of people living with long-term conditions and to work with them to improve their self-efficacy and health outcomes.  
*Restriction: NURSING 738*

**HLTHSCI 701**  
*Self-management for People Living with Long-term Conditions - Level 9*

Self-management is a key strategy to maximise quality of life for individuals and their families living with long-term conditions. This course is designed to strengthen assessment of self-management, collaborative person centred goal setting and planning, it focuses on developing motivational communication skills and collaborative strengths-based approaches which support efficacy and activation.

*Restriction: NURSING 771*

**HLTHSCI 702**  
*Principles of Primary Health Care - Level 9*

Assists primary healthcare professionals working in diverse settings to put population health into practice through primary healthcare. Determinants of health, equity, community empowerment, partnerships and effective ways to care for people with long-term conditions in communities will be explored.

*Restriction: NURSING 772*

**HLTHSCI 703**  
*Psychological Interventions in Health Care - Level 9*

Focuses on increasing health professionals' skills in the use of psychological interventions for people who have acute or long term mental health or physical health problems. Explores evidence-based psychological models, such as Cognitive and Behaviour Therapy and Motivational Interviewing. Illness beliefs that impact on the person's ability to engage effectively with treatment plans, and self-management of their health problem/s, will also be critiqued.

*Restriction: NURSING 760, 781*

**HLTHSCI 704**  
*Primary Health Care of Children and Young People - Level 9*

Equips healthcare professionals with the knowledge to provide primary and community health care, from a global to a national and local level, for well children and young people and those with long term conditions. All aspects of the course will be underpinned by the United Nations Convention on the Rights of the Child (UNCRC). Epidemiology, whānau (family) focused partnerships and interventions will be addressed along with the management of common conditions in the 0–25 year age range.

*Restriction: NURSING 716, 788*

**HLTHSCI 705**  
*Mental Health and Addiction for Health Professionals - Level 9*

Uses a person-focused theoretical framework to explore mental health and addiction problems presenting in non-specialist mental health settings. Conceptualises mental health and addiction problems as frequently co-occurring. Engagement, assessment, collaborative solution focused interventions, referral and care coordination will be explored.

#### Description

**Acute Stroke Care**
Students will develop advanced interdisciplinary knowledge about pre-hospital care, diagnosis and hyperacute stroke care, secondary stroke prevention, stroke pathophysiology and management of risk factors. Students will evaluate and critique stroke epidemiology and equity of access to stroke services. Skills in assessment of neurological impairment, rehabilitation needs, and discharge planning will be developed with reference to clinical guidelines and local contexts.

**Stroke Rehabilitation**
Students will develop knowledge of the biological processes underpinning neurological recovery after stroke. Students will also develop interdisciplinary understanding of assessment and interprofessional treatment strategies for impairments in communication, swallowing, vision, sensation, cognition, mood, continence, and movement. Skills in assessing independence and participation using standard scales will be also be developed for application in clinical practice.

**Advanced Stroke Care**
Students will evaluate and critique contemporary and evidence-based advanced clinical assessments and decision-making regarding driving, returning to work, and engaging in physical activity after stroke, including the effects of cognition, mood, and fatigue. Students will also develop advanced skills in communicating with patients and whānau on topics including stroke risk factors, self-management and adjusting to life after stroke.

**Improving Stroke Care**
The organisation and conduct of clinical research will be evaluated and critiqued, with specific examples from the stroke research evidence base. Critical thinking skills will be developed and applied to basic research and clinical trials. The role of the healthcare professional in translating research into practice will be explored with reference to contemporary implementation theories, models and frameworks.

**Stroke Research**
Contemporary qualitative and quantitative research methods and clinical trial designs are evaluated and critiqued, with specific examples from the stroke research evidence base. Students will apply this knowledge by formulating a research question and developing a research proposal, including consideration of ethics and institutional approvals, and the timeframe and resources required.

**Research Project**
To complete this course students must enrol in HLTHSCI 790 A and B, or HLTHSCI 789

**Named Doctoral Courses**

**Research in Action**
Extend scholarly capabilities and in-depth understanding in the critique of the major methodological approaches to research investigations in the health sector. This will include Mātauranga Māori and will provide the rationale for the selection of their methodological approach to the
investigation of their identified health issue that is the focus of their thesis research.

**HLTHSCI 801 30 Points**
*Healthcare Strategy and Planning*
Provides advanced skills in key areas necessary for high-performing health leaders at senior and/or executive levels. It will support the development of students’ ability to sustain commitment to the development of new ideas and practices at the forefront of health service delivery in Aotearoa New Zealand and internationally and integration of these concepts into their proposed thesis. *Prerequisite: HLTHSCI 800*

**HLTHSCI 802A 15 Points**
**HLTHSCI 802B 15 Points**
*Critical Synthesis of Health Issue*
Critically appraise and synthesise the relevant evidence to demonstrate independent and original investigation of the health issue that is the focus of the student’s thesis research, including consideration and integration of Mātauranga Māori. *Prerequisite: HLTHSCI 800, 801*

**HLTHSCI 803 30 Points**
*Research Proposal*
Integrates detailed understanding of the theory, methodology and professional context for investigating a defined issue within healthcare. The focus of the course is on the development of the proposal for the thesis research. Students will critically review and demonstrate the integration of the proposed research within healthcare practice and service development and the implications of for health equity. *Prerequisite: HLTHSCI 800-802*

**HLTHSCI 897A 120 Points**
**HLTHSCI 897B 120 Points**
*Thesis*
*Prerequisite: HLTHSCI 800-803*

**MBChB**

**Part II**

**MBCHB 221A 60 Points**
**MBCHB 221B 60 Points**
*MBChB Part II*
Through clinical scenarios, lectures and laboratories, students are introduced to human health and the description and pathogenesis of disease processes as a basis for the systematic study of human illness. This is integrated with the study of human organ systems through components focusing on musculoskeletal, digestive, genitourinary, cardiovascular and respiratory systems, linked with practical work in anatomy, physiology, pathology, medical imaging, and professional, clinical and communication skills. *Restriction: MBCHB 203, 205, 206, 209, 210, 211 To complete this course students must enrol in MBCHB 221 A and B*

**MBCHB 311A 7.5 Points**
**MBCHB 311B 7.5 Points**
*Medical Humanities*
A variety of options from the study of medical humanities. *To complete this course students must enrol in MBCHB 311 A and B*

**MBCHB 321A 52.5 Points**
**MBCHB 321B 52.5 Points**
*MBCHB Part III*
Through clinical scenarios, lectures, laboratories and problem-solving sessions, students explore human health and illness in a multidisciplinary manner with particular focus on the nervous system, blood, immunity and infection, reproduction, development and aging, and how bodily systems are regulated. This is integrated with practical work in anatomy, physiology, pathology, medical imaging and professional, clinical and communication skills, as well as ward-based learning experiences. *Prerequisite: MBCHB 221 To complete this course students must enrol in MBCHB 321 A and B*

**Stage IV**

**MBCHB 401A 60 Points**
**MBCHB 401B 60 Points**
*MBChB Part IV*
During Part IV, students spend 33 weeks in eight clinical attachments: emergency medicine, anaesthesiology, musculoskeletal, surgery, general and specialty medicine, geriatrics and general practice. These attachments are complemented by four weeks of topic teaching on campus. There is also a compulsory Māori and Pacific Health module. *Prerequisite: MBCHB 311, 321 To complete this course students must enrol in MBCHB 401 A and B*

**Stage V**

**MBCHB 501A 60 Points**
**MBCHB 501B 60 Points**
*MBChB Part V*
Students will complete academic study of forty one weeks of which thirty one are in clinical placements. These are: general practice, obstetrics and gynaecology, psychiatry, paediatrics, specialty surgery and a selective. There are three weeks of formal learning on campus including a Population Health week. Other projects and asynchronous learning also needs to be completed. Students may undertake the majority of study in a regional rural setting in Northland. *Prerequisite: MBCHB 401 To complete this course students must enrol in MBCHB 501 A and B*

**MBCHB 551A 60 Points**
**MBCHB 551B 60 Points**
*MBChB Part VI*
Students undertake patient care, under supervision, in the disciplines of general practice, medicine, surgery, emergency medicine, psychiatry, paediatrics, and obstetrics and gynaecology. Students also complete a week of clinical imaging, a compulsory course in core resuscitation skills and a revision course in procedural skills. The 44-week year includes an optional element for
students to undertake study in areas of medicine of their choice (the Elective), or complete a substantial research project, for a period of 10 weeks.  
Prerequisite: MBCHB 501  
To complete this course students must enrol in MBCHB 551 A and B

Medical Imaging

Stage I

MEDIMAGE 199 0 Points  
English Language Competency  
To complete this course students must attain a level of competency in the English language as determined by the School of Medical Sciences. This course must be completed prior to enrolling in Part III of the Bachelor of Medical Imaging (Honours) degree.

Stage II

MEDIMAGE 201 15 Points  
Fundamentals of Medical Imaging  
Provides a fundamental understanding of Medical Imaging practice. Students will examine components of the clinical setting including patient care, cultural competency, and ethical considerations, to prepare them for the clinical learning environment. Students will apply these concepts to radiographic imaging in the context of routine radiographic examinations.

MEDIMAGE 202 15 Points  
Medical Imaging Science  
Provides students with a fundamental understanding of ionising radiation in the context of medical imaging. Addresses x-ray production, instrumentation, x-ray detection, digital imaging and the principles of quality assurance. Also examines the biological effects of ionising radiation, dose, and radiation protection.  
Corequisite: MEDIMAGE 203

MEDIMAGE 203 15 Points  
Radiographic Imaging I  
Develops student knowledge of routine radiographic examinations in a Medical Imaging department. The anatomical relationships of the body and the imaging examinations are explored with reference to the appendicular and axial skeleton.  
Prerequisite: MEDIMAGE 201  
Corequisite: MEDIMAGE 202

Stage III

MEDIMAGE 300 15 Points  
Medical Imaging for Biomedical Science  
Examines the physical principles of image production, instrumentation and safety considerations of specialised medical imaging modalities, including magnetic resonance imaging (MRI), ultrasound and nuclear medicine. Students will compare normal and abnormal imaging appearances associated with each of these modalities, and investigate a range of clinical and research applications.  
Prerequisite: MEDSCI 201, 203  
Restriction: MEDIMAGE 306

MEDIMAGE 301 15 Points  
Radiographic Imaging II  
Extends knowledge of radiographic examinations and procedures in a Medical Imaging department. The anatomical relationships of the body and the imaging examinations are explored with focus on specialist views and adaptive techniques.  
Prerequisite: MEDIMAGE 199, 203

MEDIMAGE 302 15 Points  
Sectional Imaging Anatomy and Pathology  
Develops understanding of anatomy and pathology as applied in Medical Imaging. Focuses on sectional imaging anatomy, normal variants and common pathologies as demonstrated on CT (computed tomography), MRI (Magnetic Resonance Imaging) and ultrasound images.  
Prerequisite: MEDSCI 201, 203

MEDIMAGE 303 15 Points  
Advanced Radiographic Imaging  
Examines medical imaging modalities including mammography, angiography, interventional procedures, and computed tomography. Addresses the physical principles of image production, instrumentation and dose considerations. Students will investigate a range of clinical applications, and normal and abnormal imaging appearances associated with each of these modalities.  
Prerequisite: MEDIMAGE 202, 203

MEDIMAGE 304 15 Points  
Professional Practice in Medical Imaging  
Develops fundamental concepts of professionalism, reflective practice and communication to patient-centred care and professional practice in Medical Imaging.  
Prerequisite: MEDIMAGE 201

MEDIMAGE 305 15 Points  
Specialised Medical Imaging  
Examines specialised medical imaging modalities including ultrasound, nuclear medicine, and magnetic resonance imaging (MRI). Addresses the physical principles of image production, instrumentation and safety considerations. Students will investigate a range of clinical applications, and normal and abnormal imaging appearances associated with each of these modalities.  
Prerequisite: MEDIMAGE 202, 203

MEDIMAGE 306 15 Points  
Research Methods  
An introduction to the principles of research methodology and evidence-based practice as applied to medical imaging. Addresses the knowledge required to evaluate research and the development of skills and research ethics necessary to conduct medical imaging research.  
Restriction: MEDIMAGE 723

Postgraduate 700 Level Courses

MEDIMAGE 701 15 Points  
Imaging Anatomy and Pathology  
Addresses the principles of medical science at whole body, organ, tissue, cellular and sub cellular levels by developing an integrated understanding of anatomy and pathology as it applies to medical imaging in the clinical context. Specific anatomical regions and pathologies will be investigated to explain imaging appearances and evaluate the role of a variety of imaging modalities in patient pathways.

MEDIMAGE 702 15 Points  
Professional Issues in Medical Imaging  
Students will investigate the concept of professional practice leading to an exploration of current professional issues relevant to medical imaging. The course will
develop students’ ability to reflect on, and respond to, the wide variety of professional, ethical, medico-legal and clinical workplace issues generated in a rapidly changing environment.

MEDIMAGE 707 15 Points
Mammographic Technology
Provides students with an in-depth understanding of mammographic technology and its application. The course addresses the scientific principles of the modality including image formation, technical parameters, radiation safety specific to mammography, image quality, artefacts, and quality assurance. Equipment developments and new and evolving techniques will be examined.

MEDIMAGE 708 15 Points
Nuclear Medicine Technology
Extends students’ specialised theoretical knowledge and understanding of the underlying scientific principles of nuclear medicine technology. Students will develop the ability to apply this knowledge to obtain images of optimal diagnostic quality.
Prerequisite: MEDIMAGE 720

MEDIMAGE 710 15 Points
CT Imaging Technology
Provides students with specialised theoretical knowledge and understanding of the underlying scientific principles of CT technology. Students will develop the ability to apply this knowledge to obtain images of optimal diagnostic quality.
Restriction: CLINIMAG 707

MEDIMAGE 711 15 Points
Musculoskeletal Trauma Image Evaluation
Provides students with the knowledge to evaluate radiographs of common musculoskeletal trauma in the clinical setting. Using a systematic method of image interrogation and a critical approach, students will develop the ability to provide a preliminary clinical image evaluation of common musculoskeletal trauma radiographs.

MEDIMAGE 712 15 Points
Musculoskeletal Pathology Image Evaluation
Provides students with the knowledge to evaluate radiographs of common musculoskeletal pathologies in the clinical setting. Using a systematic method of image interrogation and a critical approach, students will develop the ability to provide a preliminary clinical image evaluation of common musculoskeletal pathology radiographs.

MEDIMAGE 713 15 Points
Special Studies

MEDIMAGE 714 15 Points
Fundamentals of Clinical MRI
Provides students with knowledge of the fundamental scientific principles of MRI. Students will examine components of the clinical environment in the context of patient care and safety. In addition, students will evaluate common clinical applications, developing the ability to analyse standard imaging protocols and explain normal and abnormal MR imaging appearances.

MEDIMAGE 715 15 Points
MRI Technology
Extends students’ specialised theoretical knowledge and understanding of the underlying scientific principles of MR technology. Students will develop the ability to apply this knowledge to obtain images of optimal diagnostic quality.
Prerequisite: MEDIMAGE 714
Restriction: MEDIMAGE 703, 704

MEDIMAGE 716 15 Points
Fundamentals of Clinical Ultrasound
Provides students with knowledge of the fundamental scientific principles of ultrasound. Students will develop the ability to apply this knowledge to different patient populations. In addition, students will investigate standard sonoanography imaging techniques and analyse sonoanographic imaging appearances.

MEDIMAGE 717 15 Points
Ultrasound Imaging Technology
Provides students with specialised theoretical knowledge and understanding of the underlying scientific principles of ultrasound technology including equipment developments, and new and evolving techniques. Students will develop the ability to apply this knowledge to obtain images of optimal diagnostic quality.
Prerequisite: MEDIMAGE 716

MEDIMAGE 718 15 Points
Acute Chest Image Interpretation
Provides students with the knowledge to evaluate acute chest radiographs in the clinical setting. Using a systematic method of image interrogation and a critical approach, students will develop the ability to provide a preliminary clinical image evaluation of common acute chest radiographs.

MEDIMAGE 719 15 Points
Paediatric Image Evaluation
Provides students with the knowledge to evaluate radiographs of common paediatric trauma and pathologies in the clinical setting. Using a systematic method of image interrogation and a critical approach, students will develop the ability to provide a preliminary clinical image evaluation of common paediatric radiographs.

MEDIMAGE 720 15 Points
Fundamentals of Clinical Nuclear Medicine
Provides students with knowledge of the fundamental scientific principles of nuclear medicine. Students will examine components of the clinical environment in the context of patient care and safety. In addition, students will evaluate common clinical applications, developing the ability to analyse standard imaging protocols and explain normal and altered biodistribution and nuclear medicine imaging appearances.

MEDIMAGE 721 15 Points
MRI Safety
Extends students’ understanding of the underlying physical principles related to a range of MRI safety issues. The course will provide students with the opportunity to explore these safety issues in greater depth and to apply this knowledge in critically evaluating current policies and practices. New and emerging safety topics will also be examined.
Prerequisite: MEDIMAGE 714

MEDIMAGE 722 15 Points
Special Topic: Introduction to Cardiac Ultrasound
Introduces cardiac ultrasound by exploring the analysis and interpretation of the 2D, M-mode, spectral Doppler, and colour Doppler components of the normal cardiac ultrasound examination. An emphasis will be placed on integrating theory and clinical practice elements to facilitate sound clinical reasoning, decision-making and clinical competence.
MEDSCSI 201  15 Points
Human Structure and Function
Presents the structure of biological systems with special reference to human biology, from the levels of histology through to gross anatomy. Specific examples of the correlation between structure and function will be considered. An introduction to current techniques for the visualisation of biological structure will be presented.
Prerequisite: BIOSCI 107, MEDSCI 142

MEDSCSI 202  15 Points
Microbiology and Immunology
An introduction to the nature and roles of bacteria, viruses, fungi and parasites as the causative agents of human diseases. Topics include: the defence mechanisms of the body, the immune system including autoimmunity and allergy, control of disease by antimicrobials, sterilisation, disinfection and infection control practice.
Prerequisite: BIOSCI 107, MEDSCI 142
Restriction: OPTOM 241, PHARMACY 203

MEDSCSI 203  15 Points
Mechanisms of Disease
Outlines the basic mechanisms, operating at the molecular, cellular and tissue levels, by which human disease develops. These include genetic factors, cell injury, inflammation, repair, circulatory disturbances, and neoplastic change. These mechanisms are illustrated by descriptions of the pathogenesis of specific diseases that are relevant to the New Zealand situation, or are the focus of current biomedical research.
Prerequisite: BIOSCI 107, MEDSCI 142

MEDSCSI 204  15 Points
Pharmacology and Toxicology
A solid grounding in the principles underlying pharmacology and toxicology, including the nature of drug targets, their interaction and response (pharmacodynamics), the fate of drugs within the body (pharmacokinetics), toxicity classification and testing, poisons and antidotes, adverse drug reactions, selective toxicity, drug discovery and development. Selected drug examples will be studied to illustrate key principles of clinical pharmacology.
Prerequisite: CHEM 110, MEDSCI 142, and 15 points from BIOSCI 106 or 107

MEDSCSI 205  15 Points
The Physiology of Human Organ Systems
An integrative approach is used to study fundamental physiological processes which enable the body to overcome the challenge of life. Drawing on examples of normal and abnormal function, the course examines the interaction of vital physiological processes, from cellular control mechanisms to multiple organ systems. Topics include: control of fluid and electrolytes, cardiovascular control, energy use, and the delivery of oxygen and metabolites.
Prerequisite: BIOSCI 107, MEDSCI 142
Restriction: PHARMACY 205

MEDSCSI 206  15 Points
Principles of Neuroscience
The impact of neuroscience revolution on our understanding of human physiology and biomedical research is reviewed. Topics include: mechanisms of neurotransmission, learning, memory, sensory perception (vision, hearing, touch and smell) and application of gene therapy for treating neurological diseases. Special emphasis is placed on the integration and control of physiological function by the nervous system. Examples include control of movement and coordination, regulation of reproduction, blood pressure, breathing, appetite, body weight and sexuality. Developmental neuroscience is also considered. Laboratory exercises provide insight into neural structure and function and include application of neuroimaging technologies.
Prerequisite: BIOSCI 107, MEDSCI 142

Stage III

MEDSCSI 300  15 Points
Analytical Anatomy and Visualisation
Examines the analysis, description and quantification of anatomical structures, including visualisation methodologies and the challenges of imaging subcellular to whole organ anatomy. Emphasis is placed on emerging...
applications and technology, including computational anatomy, surgical planning and research applications. Appropriate uses of human tissue, modern imaging technologies, tissue preparation, imaging artefacts, and novel visualisation techniques will be explored.

Prerequisite: MEDSCI 201

MEDSCI 301 Molecular Basis of Disease
An in-depth analysis of the cellular and molecular basis of disease, including the role of environmental and inherited risk factors, as well as mechanisms of response to cell injury and inflammation in the disease process. A number of examples will be studied including cancer and infectious disease.

Prerequisite: MEDSCI 203

MEDSCI 302 Cancer Biology
A study of the scientific basis of cancer including: mechanisms underlying the pathogenesis of cancer, carcinogenesis, DNA damage and repair, properties of cancer cells (including abnormalities of growth and cell cycle control), the growth of tumours, the classification and histopathology of cancers, and an introduction to therapeutic strategies.

Prerequisite: BIOSCI 356 or MEDSCI 203

MEDSCI 309 Biophysics of Nerve and Muscle
An advanced treatment of the physiology of excitable cells. Topics include: the biophysical basis of membrane potential, the spread of electrical activation and synaptic transmission, structure, excitation, mechanics and energetics of muscle and functional differences among muscle types. The approach is quantitative with particular emphasis on current advances in the field.

Prerequisite: MEDSCI 205, 206, or for BE(Hons) students, 15 points from MEDSCI 205 and 15 points from courses at Stage II listed in Part II of the Biomedical Engineering specialisation in the BE(Hons) Schedule

MEDSCI 311 Cardiovascular Biology
An advanced treatment of the human cardiovascular system that provides an integrated framework for understanding the structure, function and regulation of the heart and circulation, and their modification by drugs. Topics include: the energetics and mechanics of the heart, the regulation of heart rhythm and the control of blood pressure and the regulation of flow through the microcirculation. The course is illustrated using examples drawn from current research in the field and from representative disease states.

Prerequisite: MEDSCI 205

MEDSCI 312 Neuroendocrinology of Growth and Metabolism
An introduction to the mechanism controlling the production of hormones and how these achieve their effects in regulating body function. The course focuses in particular on the hormone systems controlling growth and metabolism and contrasts the differences between fetal and adult life. It also highlights how defects in endocrine systems are associated with conditions such as obesity and diabetes.

Prerequisite: MEDSCI 205

MEDSCI 313 Reproductive Biology
Aspects of reproductive biology including: regulation of gonadal function, the menstrual and oestrous cycles, ovulation, spermatogenesis, feto-maternal physiology including placental function, animal reproduction and assisted reproductive technologies.

Prerequisite: 15 points from BIOSCI 107, 203, MEDSCI 142

MEDSCI 314 Immunology
The biology, cellular and molecular events underlying the immune response. The nature and characteristics of antibody-mediated and cell-mediated immunity including antigen recognition and presentation, antibody and T cell receptor structure, immune regulation and cytokines, immunogenetics and histocompatibility. The relationships of the immune system to the activities of pathogenic organisms. Applied immunology including biotechnology, infection, autoimmunity, tumour immunology, transplantation and immunodeficiency.

Prerequisite: MEDSCI 202 or BIOSCI 201

MEDSCI 315 Nutrition, Diet and Gene Interactions
Gene-X environment interactions are increasingly being recognised to play an important role in the risk and pathogenesis of various diseases. The interaction between genetics and dietary factors in modulating mechanism of gut, bone, cancer and metabolic disease will be considered in this course, as well as the technologies required to understand such interactions.

Prerequisite: BIOSCI 202 or 203

MEDSCI 316 Sensory Neurosciences: From Molecules to Disease
The physiology of neurosensory systems in health and disease with an emphasis on clinical relevance and current advances in research. The course will provide in-depth coverage of mechanisms involved in each system at a broad systemic level, down to the molecular level. Topics include vision, hearing, balance, olfaction, taste, touch and pain.

Prerequisite: MEDSCI 206

MEDSCI 317 Integrative Neurosciences: From Fetuses to Adult
The development and function of the central nervous system in health and disease. Topics include development of the CNS, functional imaging of the human brain, synaptic function in health and disease, development and pathophysiology of motor systems, perinatal and adult brain ischemia, stroke, and sleep related disorders. The topics are covered at an advanced level with emphasis on current advances in the fields.

Prerequisite: MEDSCI 206

MEDSCI 318 Pharmacokinetics and Drug Toxicity
Considers the biochemical processes involved in achieving clinically-relevant drug concentrations that result in therapeutic effects and drug toxicity, from drug input, distribution, and elimination plus the ways in which these processes are described (pharmacokinetic modelling). Explores factors such as drug-drug interactions, pharmacogenetics, dosing and pharmacokinetic considerations in selected populations and that may influence both clinical effectiveness and drug toxicity.

Prerequisite: MEDSCI 204 and 30 points from MEDSCI 203, 205, BIOSCI 203

Restriction: MEDSCI 303, 306, 321
MEDSCI 319 15 Points
Molecular Pharmacology
Explores the cellular and molecular mechanisms of drug action with a focus on G-protein coupled receptors and biochemical targets for cancer therapy. Drug design is considered from the perspective of in silico modelling, biochemical assessment and intracellular signalling.
Prerequisite: MEDSCI 204 and 30 points from MEDSCI 203, 205, BIOSCI 203
Restriction: MEDSCI 304, 321

MEDSCI 320 15 Points
Pharmacology of the Brain and Body
Extends the principles of pharmacology acquired at Stage II to discuss how diseases can be treated in a variety of organ systems including the cardiovascular, gastrointestinal, endocrine, reproductive, and respiratory systems with emphasis on the central nervous system. Covers the mechanisms of action of drugs, and the influence of anatomy, physiology and pathology.
Prerequisite: MEDSCI 204 and 30 points from MEDSCI 203, 205, 206, BIOSCI 203
Restriction: MEDSCI 305, 307

MEDSCI 321 15 Points
Special Topic: Concepts in Pharmacology
Explores the cellular and molecular mechanisms of drug action plus drug discovery and development from the perspective of in silico modelling, biochemical assessment, intracellular signalling and human disease. Considers the pharmacokinetic processes of input, distribution and elimination involved in achieving clinically-relevant drug concentrations. Describes the link between concentration and effect and the time course of effect. Explores factors such as disease progression, drug metabolism, drug-drug interactions, pharmacogenetics, use in selected populations and in various pathological conditions that may influence both clinical effectiveness and drug toxicity.
Prerequisite: MEDSCI 204 and 30 points from MEDSCI 203, MEDSCI 203, 205
Restriction: MEDSCI 303, 306, 318, 319, 735

MEDSCI 399 15 Points
Capstone: Medical Sciences
Students will integrate and communicate knowledge attained during their study of medical sciences ranging from normal physiology through pathological process to the safe and effective use of medicines to treat diseases. Students will consider wider societal issues involved in research, such as human and animal ethics, within the context of Aotearoa and Te Tiriti o Waitangi.
Prerequisite: 15 points from MEDSCI 318-320 and 15 points from MEDSCI 301-321
Restriction: BIOMED 399, BIOSCI 399, PHARMCOL 399, PHYSIOL 399

MEDSCI 318 15 Points
Advanced Immunology
Examines the ways in which host immune mechanisms control infection, infectious organisms evade host defence mechanisms, and the consequences of these processes for the host. Examples of human infectious diseases will include: HIV, hepatitis B, influenza, tuberculosis and streptococcal infections. Consideration of the consequences of infection will incorporate discussion of immune self/non-self discrimination, immune tolerance and autoimmune mechanisms, including the impact of response against infections on autoimmunity.

MEDSCI 304 15 Points
Stem Cells and Development
Stem cell biology and the genetic regulation of developmental processes will be examined in normal and disease settings. Blood, immunity, vascular networks and the kidney will be used as systems to explore important concepts in organ development and regeneration. This knowledge will be applied in understanding disease processes such as leukaemia, inflammation and kidney disorders, and in designing new therapeutic strategies.

MEDSCI 305 15 Points
Infection, Immunity and Disease
Examines the ways in which host immune mechanisms control infection, infectious organisms evade host defence mechanisms, and the consequences of these processes for the host. Examples of human infectious diseases will include: HIV, hepatitis B, influenza, tuberculosis and streptococcal infections. Consideration of the consequences of infection will incorporate discussion of immune self/non-self discrimination, immune tolerance and autoimmune mechanisms, including the impact of response against infections on autoimmunity.

MEDSCI 306 15 Points
Genomic Medicine
Examines a range of medical genetic disorders that illustrate principles of disease mechanisms, diagnosis and management. These will include: haemophilia, familial cancer, late-onset neurological disorders and mitochondrial disease.

MEDSCI 317 15 Points
Antimicrobials and Resistance
Antimicrobial resistance is a public health concern developing worldwide. The nature of antimicrobial agents will be explored by examining their discovery, development and mechanisms of action. Antimicrobial resistance will be studied to understand both mechanisms of resistance and the factors that drive resistance. Emphasis will be placed on recent advances in the discovery of antimicrobials and the development of novel strategies for the control of infectious agents.

MEDSCI 701 15 Points
Special Studies in Medical Science
The critical review and analysis of research literature relating to a research topic. Components include an extensive literature review article defining the current knowledge relevant to a particular research area, a research proposal outlining proposed Masters research topic and its significance, and a formal presentation of the proposal. Suitable for students intending to undertake a Masters thesis.
Restriction: MEDSCI 702, 744

MEDSCI 703 15 Points
Advanced Biomedical Imaging
Theory and practice of biomedical imaging from the sub-cellular to whole body level with specific emphasis on recent developments. Principles of digital image-processing and image analysis (including quantitative morphology), computed tomography and volume rendering and analysis. Imaging modalities including atomic force microscopy, light and confocal microscopy, electron microscopy, X-ray, CT, ultrasound and magnetic resonance imaging.

MEDSCI 704 15 Points
Stem Cells and Development
Stem cell biology and the genetic regulation of developmental processes will be examined in normal and disease settings. Blood, immunity, vascular networks and the kidney will be used as systems to explore important concepts in organ development and regeneration. This knowledge will be applied in understanding disease processes such as leukaemia, inflammation and kidney disorders, and in designing new therapeutic strategies.

MEDSCI 705 15 Points
Infection, Immunity and Disease
Examines the ways in which host immune mechanisms control infection, infectious organisms evade host defence mechanisms, and the consequences of these processes for the host. Examples of human infectious diseases will include: HIV, hepatitis B, influenza, tuberculosis and streptococcal infections. Consideration of the consequences of infection will incorporate discussion of immune self/non-self discrimination, immune tolerance and autoimmune mechanisms, including the impact of response against infections on autoimmunity.

MEDSCI 706 15 Points
Genomic Medicine
Examines a range of medical genetic disorders that illustrate principles of disease mechanisms, diagnosis and management. These will include: haemophilia, familial cancer, late-onset neurological disorders and mitochondrial disease.

MEDSCI 707 15 Points
Antimicrobials and Resistance
Antimicrobial resistance is a public health concern developing worldwide. The nature of antimicrobial agents will be explored by examining their discovery, development and mechanisms of action. Antimicrobial resistance will be studied to understand both mechanisms of resistance and the factors that drive resistance. Emphasis will be placed on recent advances in the discovery of antimicrobials and the development of novel strategies for the control of infectious agents.

MEDSCI 708 15 Points
Advanced Immunology and Immunotherapy
Examines recent advances in immunology including the
genes, proteins and cell types involved in the innate and adaptive immune response, with a focus on how key components are integrated at a systems level to determine immune outcomes. Examines a range of inflammatory and immune mediated diseases, together with methods of immunotherapy, including the latest approaches to combat cancer and autoimmune disease.

**MEDSCI 709 Nutrition in Health and Disease**  
15 Points  
The influence that dietary patterns, foods and food components have on the promotion and protection against the common nutrition-related diseases in New Zealand. The relevant epidemiological, clinical, and biochemical/physiological aspects of each disease are covered.

**MEDSCI 710 Nutrition Mechanisms**  
15 Points  
The mechanisms by which food and food components can influence disease processes. Topics covered include: the interaction between genotype and nutrition, antioxidants and oxidation protection mechanisms, dietary toxicology, the process of atherosclerosis, and the influence of the intra-uterine environment on growth and disease.

**MEDSCI 711 Clinical Nutrition**  
15 Points  
Prevention of malnutrition and maintenance of nutritional status during acute and chronic illness through ‘artificial’ or ‘interventional’ means. Diagnosis and quantitation of malnutrition, and monitoring of nutrition support therapy. Practical techniques, common complications and quality assurance through a multidisciplinary team approach. Includes treatment of anorexia nervosa and cancer cachexia.

**MEDSCI 712 Critical Evaluation of Nutritional Therapies**  
15 Points  
The suggested roles for micronutrients, ‘nutriceuticals’ and functional foods in general health, exercise performance and disease are evaluated using an evidence-based approach. The roles of micronutrients as dietary supplements and the potential actions of nutriceuticals and functional foods are also critically evaluated. Regulatory and ethical issues in the use of nutritional remedies are considered, including their use as supplements in chemotherapy or other conventional therapies, or in individuals with no symptoms.

**MEDSCI 713 Principles of Cancer Therapy**  
15 Points  
Examines the molecular and cellular processes underlying cancer treatment and the development of tumour-selective therapy; the principles of radiotherapy and chemotherapy; DNA and the basis for its interactions with anticancer drugs; recognition of DNA by proteins; exploitation of these processes by anticancer drugs, oncogenes and other regulatory gene products; signal transduction mechanisms and strategies for changing cell cycle control; cytokines and the role of host responses in cancer therapy; new approaches to cancer therapy including gene therapy and photodynamic therapy.  
Prerequisite: MEDSCI 302

**MEDSCI 714 Advanced Cancer Biology**  
15 Points  
Advanced studies of concepts related to the biology of cancer. These will include: molecular mechanisms, signal transduction pathways, genomic instability, telomeres and telomerase, anoikis, DNA damage sensing mechanisms, and hypoxia and tumour progression.  
Prerequisite: MEDSCI 302

**MEDSCI 715 Molecular Toxicology**  
15 Points  
Covers the current understanding of mechanisms implicated in toxicity of drugs and environmental chemicals plus the basis of inter-individual susceptibility. The course identifies strategies used to predict and prevent adverse reactions during drug development.

**MEDSCI 716 Advanced Drug Disposition and Kinetics**  
15 Points  
Advanced study of the absorption, distribution, metabolism and excretion of drugs, and the analysis of these processes. Also included are: in vivo/in vitro techniques in drug ADME studies used in drug development; drug analysis in biological matrices; and pharmaco-genomic aspects related to drug disposition.

**MEDSCI 717 Advanced Neuroscience: Neuropharmacology**  
15 Points  
An advanced study of current research topics in neuroscience. Involves critical analysis of the literature within the context of a series of major research themes that encompass models from molecular through to systems level neuroscience. Themes will be selected from the following areas: neurogenesis, neurodegeneration and/or addiction.

**MEDSCI 718 Pharmacology of Anaesthetics and Analgesics**  
15 Points  
General aspects of anaesthetics and analgesics. Topics covered include the development of modern anaesthesia, the mechanisms of action of drugs used in general and local anaesthesia, and issues surrounding safety and efficacy of anaesthesia, including drug error and circadian variation in drug action.

**MEDSCI 719 Pharmacometrics**  
15 Points  
An introduction to the application of mathematical models used in the interpretation of pharmacological observations. Computer-based analysis methods are investigated using individual and population-oriented approaches.

**MEDSCI 720 Biomedical Research Techniques**  
15 Points  
An introduction to some of the most commonly used techniques used in today’s research laboratories; from tissue culture to confocal microscopy, RT-PCR to mass spectrometry, immunoassay to cloning. Emphasis is placed on understanding the principles behind the techniques, how they are applied to address specific questions, and how to evaluate and use the data they generate.

**MEDSCI 721 Advanced Toxicology**  
15 Points  
Focuses on classes of drugs associated with idiosyncratic adverse reactions and studies to define their metabolic basis and assessment of toxic risk.

**MEDSCI 722 Clinical Pharmacology**  
15 Points  
The disposition and action of medicines in humans of all ages will be explored, as well as adverse reactions, effects of pregnancy, medicine classification, and evaluation of clinical trials. Emphasis is placed on understanding the sources of variability of medicines and the use of target concentration intervention.
MEDSCI 723  
**Cancer Pharmacology**  
The pharmacological basis of the action of anti-tumour drugs relevant to human cancer therapy, emphasising the variability of chemotherapy effects, interactions between anti-cancer agents and early phase clinical trials.

MEDSCI 725  
**Experimental Design**  
Principles of experimental design and data analysis in physiological research. Topics include: analysis of variance, post-hoc multiple comparisons, non-linear and multiple linear regression, analysis of covariance and statistical power. The approach is practical and computer statistical packages are used.  
*Restriction: MEDSCI 743*

MEDSCI 727  
**Advanced Neuroscience: Neurophysiology**  
An advanced treatment of selected topics in neurophysiology and brain pathophysiology, includes presentations and critical analysis by the students of the current scientific literature within the context of several major research themes that encompass models from molecular and cellular to systems level. Themes will be selected from the following areas: (1) motor control and motor disorders; (2) synapse physiology and pathophysiology; (3) advances in neural stem cell research; and (4) physiology and pathophysiology of CNS glia.  
*Prerequisite: MEDSCI 206, 317*

MEDSCI 729  
**Perinatal Physiology and Medicine**  
Fetal development has long-term consequences for health. This advanced course offers a wide range of research themes relating to fetal development and future health. Topics include: placental development, fetal physiology, and endocrine regulation and metabolic function during fetal and postnatal life. The course explores pathogenesis of disease and injury of the fetus and newborn, and how biomedical research leads to potential clinical treatment strategies.

MEDSCI 730  
**Reproductive Science**  
Molecular regulation and coordination of normal reproduction. The reproductive disorders that arise when normal biological processes are disrupted. Recent molecular methods have enabled us to study these processes and to understand how they can go wrong. Genomic and proteomic approaches to the understanding of reproduction and reproductive disorders will be presented. Examination of the new technologies that allow us to overcome some of these reproductive problems.

MEDSCI 731  
**Advanced Reproductive Biology**  
Focusses on recent scientific advances in the field of human reproductive biology and medicine, with an emphasis on developing critical thinking skills. Examines the scientific approaches used to understand normal and pathological pregnancies, recent advances in reproductive medicine, and the ethical implications and considerations of assisted reproductive technologies.

MEDSCI 732  
**Molecular Aspects of Endocrinology and Metabolism**  
Explores how hormones are able to control such a wide range of physiological processes. Covers molecular aspects of hormone action with particular reference to the neuroendocrine and peripheral endocrine systems that control appetite and metabolism. Other topics covered include how defects in hormone action lead to diseases such as cancer, obesity, Type-2 diabetes and cardiovascular disease.

MEDSCI 733  
**Advanced Methods in Cell Physiology**  
The theoretical basis underpinning electrophysiological and live cell imaging techniques used to probe cellular function will be addressed. Emphasis will be placed on the instrumentation, data acquisition, and data analysis associated with each technology. The approach is practical and computer-based software programmes are used to analyse pre-recorded data, and data produced by the students themselves.  
*Prerequisite: 15 points from MEDSCI 309, 311, 312, 316, 317  
Restriction: MEDSCI 726*

MEDSCI 734  
**Advanced Cardiovascular Science**  
Examines the current state of the field of research relating to cardiovascular physiology, including critical analysis of the literature. This course portrays how an integrative physiological approach can reveal new levels of understanding in the field of cardiovascular research. Examples of this approach will be drawn from research programmes within the broad area of cardiovascular biology.  
*Prerequisite: 15 points from MEDSCI 309, 311, 312, 316, 317*

MEDSCI 735  
**Concepts in Pharmacology**  
Explores cellular and molecular mechanisms of drug action and drug discovery and development from the perspective of in silico modelling, biochemical assessment, intracellular signalling and human disease. Considers the pharmacokinetic processes involved in achieving clinically-relevant drug concentrations, the link between concentration and effect, the time course of effect and factors that may influence both clinical effectiveness and drug toxicity.  
*Restriction: MEDSCI 321*

MEDSCI 736  
**Special Topic: Digital Skills and Scholarship for Researchers**  
Develops the skills required to engage effectively in digital research and to enhance digital scholarship and best practice in the digital research environment. Topics include: project and data management (including best practice in metadata), basic scientific programming skills, data analysis and visualisation, and copyright and copyright licensing. Students will develop a project under the guidance of a Project Adviser.

MEDSCI 737  
**Biomedical MRI**  
Provides students with a thorough understanding of a range of biomedical MRI techniques as well as advanced clinical MRI applications such as functional imaging of the brain and cardiovascular system. Laboratories will cover MRI applications in basic science, and MRI applications in clinical medicine.

MEDSCI 738  
**Biological Clocks**  
Chronobiology – the study of biological rhythms and the clocks that control them. Theory, anatomical location and molecular machinery of biological clocks will be covered.
as will the control of rhythms of different time scales from
days (circadian rhythms) to years (circannual rhythms).
The influence the human circadian clock has on physiology
and drug efficacy, and the effect hospitalisation has on
the control of sleep cycles will be given special attention.

MEDSCI 739
Advanced Sensory Neuroscience
Advanced study of the physiology of neurosensoryst systems
in health and disease. Provides an in-depth coverage of the
molecular, cellular and systemic mechanisms underlying
vision and hearing.
Prerequisite: MEDSCI 316

MEDSCI 740
Stem Cell Biology and Transgenesis
Explores the use of embryonic and adult stem cells in research and for potential therapeutic applications. The development and recent technical advances in the fields of cellular reprogramming and embryonic stem cell-based transgenesis will also be covered.
Prerequisite: BIOSCI 356, MEDSCI 301

MEDSCI 741
Medical Imaging Technology - Level 9
Study of the physical processes underlying current clinical imaging techniques. Topics include: physical principles of image acquisition, processing and display; artefacts, image acquisition methods and parameters and their impact upon patient safety and image quality; management of radiation exposure; principles of X-Ray, fluoroscopic, mammographic, computed tomography, magnetic resonance imaging (MRI), nuclear medicine, ultrasound imaging; MRI safety; dose estimation and quality assurance. Emphasis is placed on patient and practitioner care, image quality and artefacts in relation to image interpretation.

MEDSCI 742
Anatomy for Medical Imaging - Level 9
Study of clinical and radiographic human anatomy, as demonstrated by current imaging techniques. Topics include: developmental anatomy, surface anatomy, functional anatomy and cross sectional anatomy. Emphasis is placed on normal variants and range of normality, and how to give a structured account of anatomy in relation to image analysis and identification.

MEDSCI 743
Design and Analysis in Biomedical Research
An in-depth exploration of the principles of experimental design and data analysis in biomedical contexts. A focus on critical appraisal of choice of statistical tests to address experimental questions and appropriateness and limitations of analysis and interpretation of results will be undertaken. Practical and computer statistical packages are used.
Restriction: MEDSCI 725

MEDSCI 744
Project Design in Biomedical Science
An individualised course of study in which each student will provide an exposition of the background to a specific research question in the biomedical sciences combined with a proposal of the best methods to investigate that specific question. A holistic consideration, including the ethical, regulatory, budgetary as well as, any other relevant aspects, of the chosen methods will be documented.
Prerequisite: 30 points from Medical Science at Stage III or higher with a B- or better
Restriction: BIOSCI 761, MEDSCI 701, OBSTGYN 705

MEDSCI 745
Drug Development
Examines approaches for bringing potential new therapeutic drugs from the discovery bench into the clinic and the drug development process. Explores a variety of drugs and uses case studies to provide a practical understanding. Integrates multidisciplinary perspectives, drawn from academic and industry experiences, on practices that contribute to the development of safe and effective drug therapies.
Prerequisite: 30 points from Biological Sciences, Medical Sciences or Pharmacology at Stage III or higher, or equivalent

**Medicine**

**Postgraduate 700 Level Courses**

MEDICINE 700 15 Points
Designing Safer Systems
The application of improvement science and safety science methods to achieve better outcomes for patients by reducing harm, waste and variation in health care; includes a focus on measurement for improvement and the application of human factors theory and concepts to design a safer and more reliable health care system.

MEDICINE 702 15 Points
Understanding Complex Clinical Systems
Draws across domains of system science, safety science, complexity theory, and implementation science to help analyse how leaders understand and effect change in healthcare. A particular focus is on understanding how things go wrong and how organisational culture, power, and politics impact on models of effective leadership within clinical systems.

MEDICINE 703 15 Points
Special Studies in Medicine
Advanced study in a specific area usually related to the field of study of the thesis. Topics include, but are not restricted to, clinical neuroscience, bone science, rheumatology, geriatrics, cardiology, respiratory and renal medicine.

MAORIHTH 21H 12 Points
Introduction to Biology
An introduction to the structure, function and processes of the human body at cellular and tissue levels. Special emphasis on the four primary tissues including membrane transport, muscle types and function, blood and the immune response, and basic neurobiology. Provides foundational knowledge of development post fertilisation and the anatomy and physiology of selected mammalian organ systems. Exposes students to the laboratory environment, particularly microscopy and dissection.

MAORIHTH 22H 12 Points
Introduction to Anatomy and Physiology
Introduction to human biology through a study of the structure and function of mammalian organ systems. Topics of focus include: skin and derivatives, digestive, nervous, reproductive and urinary, bone, endocrine and circulatory systems. This course also exposes students to learning in a laboratory environment with a strong focus on microscopy and dissection.

MAORIHTH 23H 12 Points
Introduction to Chemistry 1
An overview of general chemistry principles with an emphasis on the language of chemistry and the use of mathematics to determine answers to chemical problems. An emphasis is placed on the atomic scale of matter so that students are able to describe the macroscopic world using a molecular perspective and relate chemical structures to functions. Laboratory work includes techniques of simple qualitative and quantitative measurements.

MAORIHTH 24H 12 Points
Introduction to Chemistry 2
Provides an overview of systematic organic chemistry illustrating the diversity and reactivity of organic compounds, including reaction mechanisms and application of chemical kinetics. Spectroscopic techniques will be discussed, including in relation to structure determination. A quantitative study of proton transfer reactions will allow for understanding of control of pH.

MAORIHTH 25H 12 Points
Introduction to Population Health 1
Introduction to key concepts and foundational knowledge in population health. Concepts include models for conceptualising health, the aggregate health of groups, social determinants of health, social gradients in health outcomes, and health inequalities and inequities, and foundational understanding of health care systems.

MAORIHTH 26H 12 Points
Introduction to Population Health 2
Explores patterns and distributions in health events, causal effects on health, and strategies for addressing health inequalities and inequities at a population level. Exposure to a foundational overview of epidemiology and population health concepts and relevant skills, including understanding and measuring the distribution of disease and illness in well-defined populations, will also be provided.

MAORIHTH 27H 12 Points
Academic and Professional Development in Māori and Pacific Health 1
Presents study and academic writing skills essential for successful transition from secondary education or community contexts into tertiary study. Content focuses on a practical application of Population Health and Māori and Pacific health workforce development, while engaging students in their professional practice, cultural growth and leadership and communication.

MAORIHTH 28H 12 Points
Academic and Professional Development in Māori and Pacific Health 2
Provides study and academic skills necessary for transition from foundation study to first year bachelor level study. Content areas focus on Māori and Pacific relevant examples
of population health topics including: health status, determinants of health, barriers to access and quality of care and health interventions targeted at Māori and Pacific populations.

**MAORIHTH 29H 12 Points**
**Introduction to Mathematics**
Provides foundation skills in mathematics and develops mathematical competence. Topics covered include measurement, notation, functions, equations, exponential growth/decay, logarithms and statistics. Examples used in the course will revolve around applications of mathematics in the health sciences.

**MAORIHTH 30H 12 Points**
**Introduction to Health Psychology**
Introduction to key concepts and foundational knowledge in health psychology. Concepts include models and theories of behaviour change and development, including the relationship between major biological, cognitive and social-emotional processes. Broader social science approaches to behaviour, health and development across the lifespan will also be explored, as well as the application of health psychology for those wishing to pursue a career in health.

**MAORIHTH 31H 12 Points**
**Introduction to Physics**
An introduction to physics relevant to health studies, including examples and illustrations that revolve around human physiology. Topics include mechanics, optics, waves, thermal physics, radiation and electricity.

**MAORIHTH 32H 12 Points**
**Special Topic**

**Stage II**

**MAORIHTH 201 15 Points**
**Introduction to Māori Health**
Māori society, culture and values are explored. Historical processes are reviewed within the context of the Treaty of Waitangi. The course will examine how these factors underpin the basic determinants of health and shape contemporary Māori health status in Aotearoa. Different approaches to improving Māori health and reducing inequalities will be critically examined.
Prerequisite: POPLHLTH 111

**MAORIHTH 301 15 Points**
**Māori Health and Practice**
Māori health knowledge is used to develop effective public health practice for Māori contexts. Areas of focus include critical thinking, reflective practice, advocacy and the application of Kaupapa Māori principles.
Prerequisite: MAORIHTH 201
Restriction: POPLHLTH 201

**Postgraduate 700 Level Courses**

**MAORIHTH 701 15 Points**
**Foundations of Māori Health**
Provides an overview of the many dimensions of Māori Health. It examines the historical and contemporary determinants of Māori health status, and outlines strategies for improving Māori health in the context of the Treaty of Waitangi, and reducing health inequalities.
Restriction: MAORIHTH 301

**MAORIHTH 705 15 Points**
**Māori Health Promotion and Early Intervention**
Discusses the importance of health promotion and early intervention for Māori. Models of health promotion used by different Māori providers will be presented as well as assisting students to design and implement health promotion and interventions which are likely to be effective for Māori individuals, families, and communities.

**MAORIHTH 706 15 Points**
**Māori Health: Policy and Practice**
Critically examines public health policy and practice in Aotearoa/New Zealand with respect to Māori health and equity. Provides insights into the application of Kaupapa Māori principles in different areas of public health practice to advance Māori health.
Prerequisite: MAORIHTH 301 or 701

**MAORIHTH 707 15 Points**
**Practicum in Māori Health**
Provides the opportunity to develop social assessment and critical analysis skills through the documentation of an approved practicum. Students will be expected to be able to use and demonstrate knowledge of different Māori views, concepts and frameworks. Each student will have supervision and practicum developed appropriate to their learning interests.

**MAORIHTH 708 15 Points**
**Transformational Research for Māori Health**
Provides a critical analysis of research and research processes with regard to their potential to colonise or liberate. Drawing on Kaupapa Māori Theory, the course examines how research can be undertaken in ways that are safe for Māori and that contribute to positive Māori development.
Prerequisite: MAORIHTH 710

**MAORIHTH 709 15 Points**
**Transformational Research for Māori Health**
Provides a critical analysis of research and research processes with regard to their potential to colonise or liberate. Drawing on Kaupapa Māori Theory, the course examines how research can be undertaken in ways that are safe for Māori and that contribute to positive Māori development.
Prerequisite: MAORIHTH 710

**MAORIHTH 710 15 Points**
**Kaupapa Māori Theory**
Kaupapa Māori Theory (KMT) underpins a range of approaches employed to ensure policy, research and intervention processes emphasise Māori ways of knowing and being and work to prevent the further marginalisation of Māori. Students learn about the development of KMT and its use in the context of Māori health and development, and will experience and learn from a range of initiatives and projects that have KMT at their core.
Prerequisite: MAORIHTH 301 or 701
Restriction: MAORIHTH 702

**MAORIHTH 711 15 Points**
**Special Topic: Māori Quantitative Methods**
Provides students with an understanding of how to apply a Kaupapa Māori Research (KMR) approach to quantitative research methods (study design, analysis and dissemination) in the health sciences. It will expose students to a range of analytic and practical tools that can be drawn on in the design and conduct of quantitative research with Māori.
Prerequisite: MAORIHTH 301 or 701
Nursing Clients with a Pathophysiological Problem
A problem-based course where students acquire the skills associated with nursing clients requiring medical and surgical interventions and subsequent rehabilitation. Understanding the mechanisms of disease and prevention of such diseases is the basis for the course. Students are introduced to the principles of pharmacology and pharmacokinetics. Issues such as caring for clients with chronic pain and an understanding of death and grief are included. Practicums and teaching take place in a variety of clinical settings.
Prerequisite: 120 points at Stage I of the Bachelor of Nursing or equivalent

Nursing in Practice
An introduction to nursing as a profession including concepts of nursing practice, and communication skills. The theoretical basis for nursing practice as well as legal and ethical boundaries are introduced. The role of the nurse in health maintenance and health promotion is explored. Skills in assessment of clients and planning client care are introduced.

English Language Competency
To complete this course students must attain a level of competency in the English language as determined by the School of Nursing. This course must be completed prior to enrolling in Part II of the Bachelor of Nursing degree.
NURSING 741 30 Points
**Education for Clinical Practice**
Professional learning is essential to enable healthcare professionals to function competently in the complex world of clinical practice. Health care professionals are required to become actively involved in teaching colleagues involved in healthcare and patients. Effective clinical teaching and learning is enabled by laying a foundation in educational theory and practice.

NURSING 742 30 Points
**Biological Science for Practice**
Focuses on common pathologies acknowledging the New Zealand Health Strategy, giving particular attention to areas where health promotion, preventative care, chronic disease management and cost impact for New Zealand.

NURSING 743 30 Points
**Nurse Practitioner Advanced Practicum**
Synthesises advanced clinical decision making within the Nurse Practitioner competency framework and prepares for autonomous clinical practice.
*Prerequisite: NURSING 785*

NURSING 744 30 Points
NURSING 744A 15 Points
NURSING 744B 15 Points
**Specialty Nursing Practicum**
Gives nurses the opportunity to extend their clinical skills and practice knowledge and to advance clinical decision making by utilising a range of guided learning experiences. The focus is on continued development of clinical expertise, using a practice development approach emphasising person-centred, evidence-based practice, and critical thinking practice to improve health outcomes.
*To complete this course students must enrol in NURSING 744 A and B, or NURSING 744*

NURSING 745 30 Points
**Principles of Medication Management**
Focuses on the principles and practice of medication management to improve and extend the knowledge and skills of registered nurses in clinical specialty roles and prepares them for delegated prescribing roles in partnership with clients and collaborating with medical colleagues and the health care team. It is not the intention of this course to prepare nurses for authorised prescribing (nurse practitioner).
*Restriction: NURSING 761*

NURSING 746 30 Points
**Evidence-based Practice and Implementation - Level 9**
Considers the types of evidence that inform nursing practice and implementation, and examines barriers and enablers to the application of evidence to practice. Provides students with the tools to locate and appraise evidence and requires the student to engage in research activities resulting in a substantial research essay.
*Restriction: NURSING 720*

NURSING 748 30 Points
**Primary Health Care Nursing**
Assists primary healthcare nurses working in diverse settings to put population health principles into practice through primary healthcare. Determinants of health, equity, community empowerment, partnerships and effective ways to care for people with long-term conditions in communities will be explored.
*Restriction: HLTHSCI 702, NURSING 772*

NURSING 749 30 Points
**Special Topic: Whānau Ora – Tahi**
The concept of Whānau Ora is to achieve maximum health and well-being for whānau. Students’ knowledge of the concept will be extended and an understanding of Whānau Ora in nursing praxis will be demonstrated. Through guided learning experiences, clinical and academic support, students will self-reflect on nursing praxis and explore equity and social justice in the context of Te Tiriti o Waitangi.

NURSING 770 30 Points
NURSING 770A 15 Points
NURSING 770B 15 Points
**Clinical Practice Development**
Develops knowledge, practice and skills within the scope of a beginning registered nurse; enhances client assessment, planning and delivery of client-centred care within a specific healthcare context. Also fosters critical exploration of knowledge and skills appropriate to professional, socio-political, legal-ethical, cultural aspects of practice.
*Restriction: NURSING 725, 773*
*To complete this course students must enrol in NURSING 770 A and B, or NURSING 770*

NURSING 773 30 Points
**Advanced Assessment and Clinical Reasoning**
Nurses make a variety of diagnoses in their daily practice. Advanced nursing practice requires skilled health assessment, estimation of probabilities and evidence-based diagnostic reasoning. This complex cognitive process is developed in relation to skills and knowledge required for sound clinical reasoning.
*Restriction: NURSING 770*

NURSING 774 30 Points
**Nursing People in Acute Mental Health Crisis**
The concept of recovery forms the basis of exploring nursing care of people in states of acute crisis. The course focuses on models of acute care, collaborative care, risk assessment and management, and maintaining a safe, non-coercive environment. Students will be expected to engage in critical reflection and analysis of practice issues and case studies.

NURSING 775 30 Points
**Leadership and Management for Quality Health Care**
Builds management and leadership knowledge, competence and business acumen through project based learning. Focuses on critical thinking, quality service delivery and improvements and maximises organisational performance and change management.

NURSING 778 30 Points
**Health Promotion and Early Detection of Cancer**
Examines the latest knowledge and research available around health promotion, risk assessment and early intervention for cancer and consider the implications for nursing practice. Content addressed includes epidemiology, genetic risk, nutrition, lifestyle and environmental screening, surveillance, government policies and interventions.
*Restriction: NURSING 767*

NURSING 779 30 Points
**Special Studies**

NURSING 780 30 Points
**Mental Health and Addiction Nursing**
Introduces a person-focused theoretical framework
to explore mental health and addiction problems in healthcare. Conceptualises mental health and addiction problems as frequently co-occurring. Engagement, assessment, collaborative solution focused interventions, referral and care coordination will be explored.

NURSING 783
Research Methods in Nursing and Health
30 Points
Explores the philosophical underpinnings of research methodologies and assists students to understand the major distinctions between quantitative and qualitative approaches. Students will critique research studies and apply research findings to practice. They will gain a practical appreciation of research ethics. By the end of the course, students will be able to apply their learning to the development of a basic research proposal.
Restriction: NURSING 768

NURSING 783
Special Topic: Pae Ora
30 Points
Pae Ora encourages the wider health sector to work collaboratively, to provide high-quality and effective health and disability services at all levels. This course has been designed for those who wish to develop and consolidate a sophisticated understanding of the principles of Pae Ora (Mauri Ora – healthy individuals; Whānau Ora – healthy families; Wai Ora – healthy environments) in their practice area.

NURSING 784
Advanced Emergency Nursing Practicum
30 Points
Specialty Emergency nurses provide advanced nursing care and need expertise in assessment, diagnostic processes and therapeutic decision making. Advanced assessment skills along with injury and condition specific management models are taught with a focus on clinical decision making for clients in emergency and accident and medical clinic settings. Designed to refine advanced emergency nursing skills for nurses working in specialty emergency nursing roles.
Prerequisite: NURSING 773 or equivalent, and practising in an advanced nursing role

NURSING 785
Clinical Reasoning in Pharmacotherapeutics - Level 9
30 Points
Builds on prior knowledge to establish an advanced understanding of pharmacotherapeutics and the application of the principles of pharmacokinetics, pharmaco-dynamics to prescribing practice in advanced practice roles; and develops nursing skills in clinical reasoning for safe and effective prescribing.
Prerequisite: NURSING 742, and 770 or 773 or NURSPRAC 720
Restriction: NURSING 706, 722

NURSING 787
Fundamentals of Nursing Care
30 Points
Introduces the novice student to professional and theoretical knowledge in nursing; including clinical assessment skills, cultural awareness and specific ethical issues in nursing. Provides an overview of theories, policies and structures related to the New Zealand health context.

NURSING 789
Research Project - Level 9
30 Points

NURSING 790A
45 Points
NURSING 790B
45 Points

Research Portfolio - Level 9
Supervised research that represents the personal scholarly work of a student based on a coherent area of inquiry. Culminates in a conclusive piece of work related to a specific area of specialisation or scope of practice.
To complete this course students must enrol in NURSING 790 A and B

Research Portfolio - Level 9
Supervised research that represents the personal scholarly work of a student based on a coherent area of inquiry. Culminates in a conclusive piece of work related to a specific area of specialisation or scope of practice.
To complete this course students must enrol in NURSING 797 A and B

Nursing Practice

Postgraduate 700 Level Courses

NURSPRAC 701
Cardiac Specialty Nursing
30 Points
Draws on evidence from biomedical and social science research to equip nurses for the care and treatment of cardiac patients. Students will be expected to integrate evidence from a range of sources and apply this to the practice of cardiac nursing.
Restriction: NURSING 730

NURSPRAC 702
Critical Care Specialty Nursing

15 Points
NURSPRAC 702A
15 Points
NURSPRAC 702B

Critical Care Specialty Nursing
Draws on evidence from biomedical and social science research to equip nurses for the care and treatment of critical care patients. Students will be expected to integrate evidence from a range of sources and apply this to the practice of critical care nursing.
Restriction: NURSING 730
To complete this course students must enrol in NURSPRAC 702 A and B, or NURSPRAC 702

NURSPRAC 703
30 Points
NURSPRAC 703A
15 Points
NURSPRAC 703B
15 Points

Paediatric Cardiac Specialty Nursing
Draws on evidence from biomedical and social science research to equip nurses for the care and treatment of paediatric cardiac patients. Students will be expected to integrate evidence from a range of sources and apply this to the practice of paediatric cardiac nursing.
Restriction: NURSING 730
To complete this course students must enrol in NURSPRAC 703 A and B, or NURSPRAC 703
NURSPRAC 704 30 Points
Cancer Specialty Nursing
Draws on evidence from biomedical and social science research to equip nurses for the care and treatment of patients with cancer. Students will be expected to integrate evidence from a range of sources and apply this to the practice of cancer nursing.
Restriction: NURSING 730

NURSPRAC 705 30 Points
Stroke Specialty Nursing
Draws on evidence from biomedical and social science research to equip nurses for the care and treatment of patients following a stroke. Students will be expected to integrate evidence from a range of sources and apply this to the practice of stroke nursing.
Restriction: NURSING 730

NURSPRAC 706 30 Points
Orthopaedic Specialty Nursing
Draws on evidence from biomedical and social science research to equip nurses for the care and treatment of orthopaedic patients. Students will be expected to integrate evidence from a range of sources and apply this to the practice of orthopaedic nursing.
Restriction: NURSING 730

NURSPRAC 707 30 Points
Registered Nurse First Surgical Assist
Draws on evidence from biomedical and social science research to equip nurses for the care and treatment of surgical patients. Students will be expected to integrate evidence from a range of sources and apply this to the practice of RNPSA nursing.
Restriction: NURSING 730

NURSPRAC 708 30 Points
Emergency Specialty Nursing
Draws on evidence from biomedical and social science research to equip nurses for the care and treatment of patients in the emergency setting. Students will be expected to integrate evidence from a range of sources and apply this to the practice of emergency nursing.
Restriction: NURSING 730

NURSPRAC 710 30 Points
Palliative Care Specialty Nursing
Draws on evidence from biomedical and social science research to equip nurses for the care and treatment of palliative care patients. Students will be expected to integrate evidence from a range of sources and apply this to the practice of palliative care nursing.
Restriction: NURSING 730

NURSPRAC 711 30 Points
Pain Nursing Specialty Nursing
Draws on evidence from biomedical and social science research to equip nurses for the care and treatment of patients experiencing pain. Students will be expected to integrate evidence from a range of sources and apply this to the practice of nursing patients with pain.
Restriction: NURSING 730

NURSPRAC 712 30 Points
Diabetes Specialty Nursing
Draws on evidence from biomedical and social science research to equip nurses for the care and treatment of diabetic patients. Students will be expected to integrate evidence from a range of sources and apply this to the practice of nursing patients with diabetes.
Restriction: NURSING 730

NURSPRAC 713 30 Points
Paediatric Intensive Care Nursing
Draws on evidence from biomedical and social science research to equip nurses for the care and treatment of paediatric intensive care patients. Students will be expected to integrate evidence from a range of sources and apply this to the practice.
Restriction: NURSING 730

NURSPRAC 715 30 Points
Endoscopy Specialty Nursing
Draws on evidence from biomedical and social science research to equip nurses for the care and treatment of patients undergoing an endoscopy procedure. Students will be expected to integrate evidence from a range of sources and apply this to the practice of endoscopy nursing.
Restriction: NURSING 730

NURSPRAC 716 30 Points
Ophthalmology Specialty Nursing
Draws on evidence from biomedical and social science research to equip nurses for the care and treatment of ophthalmology patients. Students will be expected to integrate evidence from a range of sources and apply this to the practice of ophthalmology nursing.
Restriction: NURSING 719

NURSPRAC 717 30 Points
Practicum for RN Designated Prescribers
Prepares registered nurses to apply for prescribing rights as Designated Prescribers. Provides nurses with the opportunity to develop knowledge and skills in the application of pharmacotherapeutic concepts to prescribing as a designated prescriber. This includes direct supervision of prescribing activities in the clinical area and the ability to work closely and effectively in a multidisciplinary team environment.
Prerequisite: NURSING 742, 773, 785

NURSPRAC 718 30 Points
Contemporary Mental Health and Addictions Nursing Practice
Explores contemporary mental health and addictions nursing practice from both socio-political and practice-skills perspectives. Focuses on developing awareness of the unique mental health and addictions context of Aotearoa/New Zealand and the cultural and values based practices and policies which have emerged. Builds on foundational therapeutic and interpersonal skills and develops knowledge and skills in contemporary, evidence-based mental health and addictions nursing interventions.
Restriction: NURSING 786

NURSPRAC 719 30 Points
Clinical Practice in Mental Health and Addictions
A clinically based course focusing on history taking, assessment, formulation and nursing care planning. There is an emphasis on mental health, physical health and addictions assessment and the development of nursing formulation skills.

NURSPRAC 720 30 Points
Advanced Mental Health Assessment - Level 9
A clinically based course covering history taking, assessment and case formulation in advanced clinical practice for mental health nurses. There is an emphasis on
comprehensive mental health assessment, and negotiation of a client-focused plan of care.

**NURSPRAC 721** 45 Points
**Integrative Nursing Practice**
A problem-based course where students develop the knowledge and assessment skills associated with nursing clients across a variety of clinical settings. The course provides learning opportunities for students to gain knowledge, skills and develop attitudes that will ensure safe nursing practice. Principles of medication management to prepare students for practice as a registered nurse are integrated into the course.

**NURSPRAC 722** 30 Points
**Transition to Professional Nursing Practice**
Enables students to transition from student to registered nurse through an extended period of clinical practice. Integration of nursing knowledge and legal and ethical parameters of competency will occur alongside the development of autonomy and accountability of practice.

**NURSPRAC 723** 30 Points
**Special Topic: Paediatric Intensive Care**
Extends specialised nursing skills for the nurse in paediatric cardiac and intensive care settings. Through guided learning experiences and support from clinical and academic mentors, students set and achieve individual learning goals. Focus is on practice development and clinical leadership, demonstrating understanding of quality healthcare and the socio-political and cultural contexts of health and wellbeing.

**Prerequisite:** NURSPRAC 713
**Restriction:** NURSING 730, 744

**NURSPRAC 724** 30 Points
**Special Topic: RN First Surgical Assist Practicum**
Refines specialised nursing skills for expanded scope of practice for a Registered Nurse First Surgical Assistant. Through guided learning experiences and support from clinical and academic mentors, students set and achieve individual learning goals. Focus is on practice development and clinical leadership, demonstrating an understanding of quality healthcare and socio-political and cultural contexts of health and wellbeing.

**Prerequisite:** NURSPRAC 707
**Restriction:** NURSING 730, 744

**NURSPRAC 725** 30 Points
**Special Topic: Endoscopy Nursing Practicum**
Refines specialised nursing skills for the expanded scope of practice for Nurses performing endoscopy. Through guided learning experiences and support from clinical and academic mentors, students set and achieve individual learning goals. Focus is on the development of practice and clinical leadership, demonstrating understanding of quality healthcare and socio-political and cultural contexts of health and wellbeing.

**Prerequisite:** NURSPRAC 715
**Restriction:** NURSING 730, 744

**NURSPRAC 726** 30 Points
**Mental Health Nursing Practicum**
Extends mental health nurses’ knowledge and skills in clinical practice, scholarly activity, and leadership to improve health outcomes. Through guided learning experiences and support from clinical and academic mentors, students set and achieve individual learning goals. Focus is on the development of person-centred, reflective practice demonstrating understanding of the socio-political and cultural contexts of health and wellbeing.

**Restriction:** NURSING 744

**NURSPRAC 727** 30 Points
**Special Topic: Perioperative Nursing Specialty**
Draws on evidence from biomedical and social science research to equip nurses for the care and treatment of patients across the perioperative continuum. Students will integrate evidence from a range of sources and apply this to the practice of caring for people requiring surgical intervention.

**NURSPRAC 728** 30 Points
**Special Topic: Frailty in Aged Care Nursing**
Frailty is an age-related, progressive geriatric syndrome related to pathological changes in underlying physiological and psycho-social function and the leading cause of mortality and morbidity in older people. Draws on evidence from biomedical and social science research to equip nurses for the care and treatment of older people affected by frailty.

**NURSPRAC 729** 30 Points

**NURSPRAC 730** 30 Points
**Special Topic**

**Obstetrics and Gynaecology**

**Postgraduate 700 Level Courses**

**OBSTGYN 705** 15 Points
**Special Topic in Obstetrics and Gynaecology**

**OBSTGYN 712** 15 Points
**Contraception and Pre and Early Pregnancy**
An evidence-based approach to contraception and pre and early pregnancy care. Mechanisms, side effects and contraindications of methods of contraception are covered. Pre pregnancy care will include preconceptual counselling and the psycho-social aspects of pregnancy care such as effects of drugs, alcohol, smoking and travel. Best practise and referral guidelines for early pregnancy ante natal care will be covered including diagnosis and management of early pregnancy problems such as recurrent miscarriage, ectopic pregnancy, gestational trophoblastic disease and hyperemesis.

**OBSTGYN 713** 15 Points
**Pregnancy and Postnatal Care in the Community**
Common problems of pregnancy for primary care. Includes pregnancy care in the community, obstetric emergencies, common disorders in pregnancy, birth matters, the immediate postpartum period, the newborn.

**OBSTGYN 715** 15 Points
**Medical Gynaecology 1**
Women’s health and sexually transmitted diseases, menstrual disorders, pelvic pain and dyspareunia, vulva problems and vaginal discharge, menopause management.

**OBSTGYN 716** 15 Points
**Medical Gynaecology 2**
Pathophysiology and clinical management of infertility, gynaecological malignancies, family violence, adolescent gynaecology, termination of pregnancy, urogynaecology.
**Course Prescriptions**

**OBSTGYN 717** 30 Points  
**OBSTGYN 717A** 15 Points  
**OBSTGYN 717B** 15 Points

**Practical Obstetrics and Gynaecology**  
Practice of obstetrics and medical gynaecology, practical procedures in obstetrics and gynaecology including competency in examinations, cervical smear taking, and insertion of intrauterine contraceptive devices. Competency in normal labour and delivery and minor surgical procedures encountered in obstetric practice. Requires the completion of a logbook approved by the Clinical Supervisor and Head of Department.  
Corequisite: OBSTGYN 721 and 722, or 724 and 725  
To complete this course students must enrol in OBSTGYN 717 A and B, or OBSTGYN 717

**OBSTGYN 722** 15 Points  
**Gynaecology Residential**  
Approaches to women's health issues, history and examination principles and procedures, issues of screening, hormone replacement therapy and case-based studies. This course must be completed prior to students sitting the clinical and written examinations.  
Restriction: OBSTGYN 719

**OBSTGYN 723** 15 Points  
**Special Studies**

**OBSTGYN 724** 15 Points  
**Obstetrics Residential**  
Attitudes to women's health, including cultural and ethical issues. History-taking techniques and techniques for minor procedures are developed.  
Restriction: OBSTGYN 721

**OBSTGYN 725** 15 Points  
**Gynaecology Residential**  
Approaches to women's health issues, principles and procedures associated with history-taking and examination. Issues of screening, hormone replacement therapy and other case-based studies are addressed.  
Restriction: OBSTGYN 722

**Ophthalmology**

### Postgraduate 700 Level Courses

**OPHTHAL 703** 30 Points  
**Special Topic: Research Methods and Skills for Eye Research**  
A comprehensive overview, focusing primarily on the ophthalmic arena. Includes: research, methodologies, literature reviews, implementation and appraisal of qualitative and quantitative research, developing research questions and writing up of research for presentation and publication. Provides skills specific to eye research that may not be relevant to other health care professionals.

**OPHTHAL 704** 30 Points  
**Special Topic: Ophthalmic Technology**  
The theory, basic principles, techniques and interpretation of results for ophthalmic technology used in the diagnosis and treatment of eye disease. Technology covered includes: slit lamp biomicroscopy, tonometry, A-scan ultrasound, keratometry; IOL master, HRT, OCT, computerised topography, anterior segment photography, FFA, autorefractiion and therapeutic lasers. The latest advances in ophthalmic technology will also be included.

**OPHTHAL 705** 30 Points  
**Special Topic: Management of Acute Eye Disease**  
Overview of the diagnosis and management of 'acute eye conditions' in the community and hospital settings including: signs and symptoms, differential diagnosis, treatment modalities and medium term management.

**OPHTHAL 706** 30 Points  
**Special Study in Ophthalmology**  
To provide an opportunity to study a selected field of ophthalmology at an advanced level by undertaking a detailed review of a selected topic or undertaking a research project in a field related to ophthalmology.

### Optometry and Vision Science

**Stage I**

**OPTOM 101G** 15 Points  
**How We See**  
Overview of the interdisciplinary study of human vision. The course introduces the biological/physiological organisation of the visual system, discusses the subjective nature of perception, and the implications of studies of biological visual systems for machine vision. Interdisciplinary understandings of vision will be enriched by the examination of historical paintings and artists’ visual experiences.

**Stage II**

**OPTOM 216A** 15 Points  
**OPTOM 216B** 15 Points  
**Introduction to Optometry**  
A clinically-focused course introducing students to optometric practice and addressing, at an introductory level, the ethical, cultural, theoretical and clinical aspects of the optometric examination. Topics covered include: preliminary tests from the eye examination, communication skills and clinical problem solving. The course will emphasise assessment utilising advanced equipment and the production of clinically relevant outcomes and diagnosis-supportive hypotheses.  
To complete this course students must enrol in OPTOM 216 A and B

**OPTOM 263A** 15 Points  
**OPTOM 263B** 15 Points  
**Essential Optics**  
An introduction to optics relevant to optometry and necessary to understand the optical performance of the eye, the design of ophthalmic lens applications, and the principles of operation of clinical instrumentation. Topics include; the basic principles of physical optics, the principles of image formation by lenses and lens systems mirrors and prisms, optics of the eye, ocular ametropia and aberrations.  
Restriction: OPTOM 215, 262, 265

**OPTOM 272A** 15 Points  
**OPTOM 272B** 15 Points  
**Visual Science 1: Structure and Function of the Visual System**  
Anatomy and physiology of the eye and visual pathway. Topics include composition and structure of the tear film, neural processing in the visual cortex, aspects of visual function including spatial and temporal vision, motion
perception and colour vision. Investigation of visual perception using psychophysical and electrophysiological techniques.

**Restiction:** OPTOM 151, 170, 171

Prerequisite: Permission of Head of School
Restriction: OPTOM 391
To complete this course students must enrol in OPTOM 492 A and B

**Stage V**

OPTOM 510A 15 Points
OPTOM 510B 15 Points
**Advanced Clinical Optometry 1**
Clinical work with responsibility, under supervision, for patients.
Restriction: OPTOM 410
To complete this course students must enrol in OPTOM 510 A and B

OPTOM 520A 15 Points
OPTOM 520B 15 Points
**Advanced Clinical Optometry 2**
Clinical work with greater emphasis on particular areas in optometry including: contact lenses, low vision, binocular vision, paediatric optometry and practice management.
Restriction: OPTOM 420
To complete this course students must enrol in OPTOM 520 A and B

OPTOM 560A 15 Points
OPTOM 560B 15 Points
**Optometry in Practice**
Supervised clinical work in locations external to the Grafton Campus Optometry Clinic. These locations may include University satellite clinics, private optometry practice, hospital eye departments, overseas institutions, or experience in other approved locations. Lectures address; legislation relevant to healthcare including registration and competency, occupational safety and health, ethics, practice management, small business management.
Restriction: OPTOM 462
To complete this course students must enrol in OPTOM 560 A and B

OPTOM 592A 7.5 Points
OPTOM 592B 7.5 Points
**Issues in Optometry 4**
A number of special topics in Clinical Skills. Further information may be obtained from the School of Optometry and Vision Science.
Prerequisite: Permission of Head of School
Restriction: OPTOM 491
To complete this course students must enrol in OPTOM 592 A and B

**Postgraduate 700 Level Courses**

OPTOM 751 30 Points
OPTOM 751A 15 Points
OPTOM 751B 15 Points
**Special Study in Vision Science**
The study of selected fields of vision science at an advanced level with detailed study of a particular field. The topic will be prescribed by the Head of School.
To complete this course students must enrol in OPTOM 751 A and B, or OPTOM 751

OPTOM 752 30 Points
OPTOM 752A 15 Points
OPTOM 752B 15 Points
**Special Study**
To complete this course students must enrol in OPTOM 752 A and B, or OPTOM 752

OPTOM 757A 15 Points
OPTOM 757B 15 Points
**Special Study in Optometry**
The study of selected fields of optometry at an advanced level with detailed study of the particular field. The topic will be prescribed by the Head of School.
To complete this course students must enrol in OPTOM 757 A and B

OPTOM 759 30 Points
OPTOM 759A 15 Points
OPTOM 759B 15 Points

To complete this course students must enrol in OPTOM 759 A and B, or OPTOM 759
OPTOM 783A 15 Points
OPTOM 783B 15 Points
Research Project in Vision Science - Level 9
Supervised research that represents the personal scholarly work of a student based on a coherent inquiry at an advanced level into an approved topic related to vision science.
Corequisite: OPTOM 416, 430, 442, 450
Restriction: OPTOM 473, 570
To complete this course students must enrol in OPTOM 783 A and B

OPTOM 791A 45 Points
OPTOM 791B 45 Points
Research Portfolio in Clinical Optometry - Level 9
Advanced clinical optometry research in a chosen sub-specialist area of optometric practice. The area of special interest may include contact lenses, low vision, paediatric optometry, binocular vision, ocular disease management, or any other area approved by the Head of School.
To complete this course students must enrol in OPTOM 791 A and B

OPTOM 796A 60 Points
OPTOM 796B 60 Points
MSc Thesis in Optometry - Level 9
To complete this course students must enrol in OPTOM 796 A and B

Paediatrics

Diploma Courses

PAEDS 601A 60 Points
PAEDS 601B 60 Points
Diploma in Paediatrics
Covers: genetic and antenatal factors in development, neonatal paediatrics, assessment of a child’s physical, intellectual, emotional and social needs, epidemiology of childhood disease, cultural factors and child health, general and preventative paediatrics, management of common disorders of childhood, and the practical working of the statutory and voluntary services available in New Zealand for the care of children. A logbook and dissertation must be completed.
To complete this course students must enrol in PAEDS 601 A and B

Postgraduate 700 Level Courses

PAEDS 700 15 Points
Special Topic
PAEDS 704 15 Points
Special Studies in Paediatrics
Advanced study in a specific area, usually related to the field of study of the thesis.
PAEDS 705 15 Points
Neonate and Infant Health
Students will learn about the pathogenesis, diagnosis and clinical management of common medical issues which affect infants from birth through the first year of life. Students will gain both theoretical and practical skills in clinical topics that affect neonates and infants.
PAEDS 706 30 Points
PAEDS 706A 15 Points
PAEDS 706B 15 Points
Paediatric Care (Toddler-Adolescent)
Focuses on the pathogenesis, diagnosis and clinical management of common acute and chronic medical issues that affect infants, children, adolescents and young adults from the first year of life onwards. Students will develop both practical and theoretical skills.
To complete this course students must enrol in PAEDS 706 A and B, or PAEDS 706

PAEDS 707A 30 Points
PAEDS 707B 30 Points
Clinical Portfolio
Students will draw on their paediatric clinical exposure to reflect and modify clinical practice to meet best practices. Students will be given the opportunity to apply complex clinical theory in a structured framework. Students will develop a deep understanding of the theoretical underpinnings in paediatric clinical medicine and proficiency to apply relevant skills.
To complete this course students must enrol in PAEDS 707 A and B

PAEDS 708 15 Points
Population Youth Health
Youth injury prevention, resiliency factors and reproductive issues, and advocacy for young people. How do you make a difference in youth health? This course introduces key concepts in population youth health and utilises an evidence based approach and New Zealand practice examples to consider how youth health can be improved in communities and populations.
Restriction: POPLHLTH 732

PAEDS 710 15 Points
Clinical Care of Gender Diverse Youth
To develop and advance skills, knowledge and expertise in the clinical care of young transgender people.
Corequisite: PAEDS 712
PAEDS 712 15 Points
Youth Health Clinical Skills
Develops and extends knowledge and skills in clinical interviewing, comprehensive assessments and effective interventions with young people.
PAEDS 714 15 Points
Emergency Paediatrics
Designed for health care providers involved in the delivery of acute emergency care to children, this course combines theoretical knowledge with clinical practice. Students will learn to recognise and manage the important paediatric medical and surgical emergencies including the approach to the febrile child, management of seizures and the recognition and management of other acute medical and surgical paediatric conditions.
PAEDS 719 15 Points
Health, Education and Youth Development
Examines the overlap of health and education in the context of youth development by exploring the impact of past and current developments and strategies in both sectors on the wellbeing of young people. It reviews the 'business' of schools, the Health and Physical Education curriculum, school-based health and support services, whole school approaches to health, and the health and education needs of students not engaged with the school system.
PAEDS 720 15 Points
Advanced Youth Health
Extends students' knowledge of youth health and well-being and develops knowledge and skills for supporting or leading improvements or projects in youth health. Will include advanced understandings of youth development and develop youth health project ideas or service improvements for clinical, research or policy settings.

PAEDS 721 15 Points
Clinical Care of Adolescents and Young Adults with Cancer
To develop and advance skills, knowledge and expertise in the clinical care of adolescents and young adults with cancer.
Prerequisite: PAEDS 712

PAEDS 722 15 Points
Youth Health Practicum
Aims to give clinicians the opportunity to extend their professional youth health skills and expertise through a supervised self-directed learning practicum in youth health.
Prerequisite: PAEDS 720

PAEDS 792 45 Points
PAEDS 792A 15 Points
PAEDS 792B 30 Points
Research Project - Level 9
To complete this course students must enrol in PAEDS 792 A and B, or PAEDS 792

Pharmacology

Stage I

PHARMACY 107 15 Points
Special Topic

PHARMACY 111G 15 Points
Drugs and Society
The use of drugs in society including historical perspectives. Selected examples of the use of medicines in disease, recreational drug use and drug misuse, and cultural and ethnic influences on drug use. Differences between conventional and complementary medicines. The role of the pharmaceutical industry in drug discovery, manufacture and promotion. Legal and ethical issues pertaining to access to pharmaceuticals.

PHARMACY 199 0 Points
English Language Competency
To complete this course students must attain a level of competency in the English language as determined by the School of Pharmacy. This course must be completed prior to enrolling in PHARMACY 213.

Stage II

PHARMACY 211 30 Points
Applied Science for Pharmacy
Specific and selected aspects of chemistry, biochemistry, anatomy, physiology, immunology, microbiology, pathophysiology and pharmacology are explored in the context of beginning clinical pharmacy practice.

PHARMACY 212 30 Points
Pharmaceutical Science and Practice
The properties of materials, principles of pharmaceutical formulation, design of drug delivery systems and routes of administration of drugs are considered. The skills for competent pharmacy practice in New Zealand, including law, ethics, medicines information, clinical communication, cultural competence and elements of human behaviour are introduced.

PHARMACY 213 60 Points
Pharmacy 1
The optimal drug treatment of dermatological, infectious and gastrointestinal diseases and disorders is explored through an integrated multidisciplinary systems-based approach. Clinical and professional skills in law and ethics, critical appraisal, medicines information, pharmaceutical compounding and calculations, clinical communication and cultural competence are introduced. Introductory experiential learning placements in industry, hospital and community pharmacy sites are provided.
Prerequisite: PHARMACY 199, 211, 212

Stage III

PHARMACY 311 60 Points
Pharmacy 2
Optimal drug treatment of respiratory, cardiovascular, renal and hepatic diseases and disorders are explored through
an integrated multidisciplinary systems-based approach. Clinical pharmacy skills in law and ethics, dispensing, medicines information, adherence support, clinical communication, physical assessment and management are further developed. Experiential learning placements focus on development of pharmacy practice skills in community/hospital pharmacy settings throughout New Zealand.

**PHARMACY 411 45 Points**

Clinical pharmacy skills in law, ethics, dispensing, medicines information, clinical communication, management, quality and safety, and research skills are further developed. Further experiential learning placements focus on development of pharmacy practice skills in community/hospital pharmacy settings throughout New Zealand.

**Postgraduate 700 Level Courses**

**PHARMACY 701 45 Points**

**Medicine Optimisation 1**

Evaluation of theoretical frameworks to assess health service design. Optimal drug treatment of cancers, neurological and psychiatric diseases and disorders are explored underpinned by critical appraisal of evidence. Clinical pharmacy skills in law, ethics, dispensing, aseptic compounding, medicines information, teamwork and leadership are consolidated. Advanced experiential learning placement opportunities are undertaken in sites throughout New Zealand and overseas locations.

**PHARMACY 702 45 Points**

**Medicine Optimisation 2**

Theories and critical appraisal of evidence applied to design health service innovations. Optimal treatment of musculoskeletal diseases, disorders and pain, children's and older persons' health issues, patients with multiple morbidities explored through an integrated multidisciplinary systems-based approach. Clinical pharmacy skills in law, ethics, dispensing, medicines information, teamwork and leadership, pharmacoeconomics and health technology are further developed. Advanced experiential learning placement opportunities.

**PHARMACY 750 30 Points**

**Pharmaceutical Formulation**

Physiological and physicochemical factors in drug delivery and formulation of pharmaceutical products. Consideration of both traditional (e.g., solutions, semi-solids, solids, aerosols) and novel (e.g., liposomal) drug delivery systems based on the experimental literature.

**PHARMACY 751 30 Points**

**Pharmaceutical Techniques**

Experimental and analytical techniques in the assessment of pharmaceutical products and of drug action in biological systems. Consideration of pharmacopoeial and official standards, drug stability and drug metabolism.

**PHARMACY 752 15 Points**

**Pharmaceutical Quality Assurance**

Principles of good manufacturing practice (GMP), quality assurance and quality control as applied to pharmaceutical products and processes. Consideration of relevant industrial processes, legislation, safety issues, packaging, labelling, stability and regulatory requirements.
PHARMACY 753
Pharmaceutical Regulatory Affairs
To synthesise knowledge pertaining to the registration and licensing of pharmaceutical products nationally and internationally and to effectively apply regulatory principles to the introduction of new pharmaceutical products to the New Zealand and global market.

PHARMACY 754
Pharmaceutical Science Research Proposal
A comprehensive critical study of the literature pertaining to the proposed thesis research. This will include a review of the relevant methodologies, the analysis of research results and the relationship of published work to the proposed research.

PHARMACY 760
Literature Review in Pharmaceutical Sciences
A thorough investigation of the current literature in a specified area leading to a comprehensive review with the intent of a review publication.

PHARMACY 761
Pharmaceutical Science Research Project
Building on the experience gained in PHARMACY 754, a practical research project in a specified field is conducted. An introductory review of the relevant literature, hypothesis, research methodology and findings framed within the current literature will be reported.
Prerequisite: PHARMACY 754

PHARMACY 762
Literature Review in Pharmacy Practice
A thorough investigation of the current literature in a specified area of pharmacy practice or pharmacotherapy leading to a comprehensive review with the intent of a review publication.

PHARMACY 763
Case Studies in Pharmacy Practice
The investigation and construction of case studies in a current area of pharmacy practice to a quality suitable for submission for publication.

PHARMACY 764
Medicines Information and Critical Appraisal
Develops advanced skills in the retrieval, evaluation and dissemination of medicines information, as well as the ability to critically evaluate clinical literature in the context of selected common therapeutic areas.

PHARMACY 765
Medicines Management and Pharmaceutical Care
Explores the concepts of medicines management and pharmaceutical care planning in the context of selected common therapeutic areas. The course will emphasise the role of the pharmacist in the optimisation of medicines therapy for individual patients.
Prerequisite: PHARMACY 764

PHARMACY 766
Applied Pharmacotherapy
Embody evidence-based practice and the philosophy of pharmaceutical care to achieve optimum therapeutic outcomes in patients with endocrine, cardiovascular, respiratory, mental health, neurological and gastrointestinal disease states.
Prerequisite: PHARMACY 764, 765

PHARMACY 767
Advanced Pharmacotherapy
Explores current pharmacotherapeutics in the context of patients with complex pathologies and complex clinical needs, allowing for some specialisation in the student’s areas of interest.
Prerequisite: PHARMACY 764, 765

PHARMACY 768
Innovative Pharmacy Services
Explores the design, implementation and evaluation of novel and innovative pharmacy services in the context of the individual’s practice setting; principles of pharmaceutical management and strategic development of new services.
Prerequisite: PHARMACY 764, 765

PHARMACY 769
Principles of Prescribing
Legal and ethical considerations; communication with patients and other health professionals; clinical reasoning and decision-making; physical assessment and diagnostic skills; ‘mechanics’ of prescribing; pharmacoeconomic considerations.

PHARMACY 770
Prescribing Practicum
A practicum for prescribing: an experiential placement where the pharmacist develops experience in prescribing under the overarching guidance of a designated medical prescriber.
Prerequisite: PHARMACY 769

PHARMACY 771
Special Studies

PHARMACY 772
Special Studies

PHARMACY 773
Special Topic

PHARMACY 774
Special Topic

PHARMACY 789A
Research Project - Level 9
Supervised research that represents the personal scholarly work of a student based on a coherent inquiry at an advanced level into an approved topic related to pharmacy or health scholarship under supervision of School of Pharmacy academic staff and collaborators. Develop understanding about the nature and practice of research and capabilities in data analysis, academic writing and dissemination of research.
Prerequisite: PHARMACY 312
Restriction: PHARMACY 410, 413
To complete this course students must enrol in PHARMACY 789 A and B

PHARMACY 792
Dissertation - Level 9
To complete this course students must enrol in PHARMACY 792 A and B, or PHARMACY 792
PHARMACY 796A  60 Points
PHARMACY 796B  60 Points
Thesis - Level 9
To complete this course students must enrol in PHARMACY 796 A and B

PHARMACY 797  120 Points
PHARMACY 797A  60 Points
PHARMACY 797B  60 Points
Research Portfolio - Level 9
Supervised research that represents the personal scholarly work of a student based on a coherent area of enquiry. Culminates in a conclusive piece of work related to a specific area of specialisation or aspect of practice in health.
To complete this course students must enrol in PHARMACY 797 A and B, or PHARMACY 797

Physiology

Stage III

PHYSIOL 399  15 Points
Capstone: Physiology
Advancements in science come through integrating knowledge and excellence in experimental design. Students will integrate and communicate knowledge attained during their physiology degree by developing a research proposal. Working in small groups, and in research group placements will explore scientific knowledge, and experimental design, as well as wider issues such as ethics, health economics, and Māori and Pasifika health advancement.
Prerequisite: 30 points at Stage III in Physiology
Restriction: BIOMED 399, MEDSCI 399, PHARMCOL 399

Postgraduate 700 Level Courses

PHYSIOL 787  60 Points
PHYSIOL 787A  30 Points
PHYSIOL 787B  30 Points
Dissertation - Level 9
Restriction: PHYSIOL 788, 789
To complete this course students must enrol in PHYSIOL 787 A and B, or PHYSIOL 787

PHYSIOL 788  45 Points
PHYSIOL 788A  22.5 Points
PHYSIOL 788B  22.5 Points
BSc(Hons) Dissertation - Level 9
Restriction: PHYSIOL 789
To complete this course students must enrol in PHYSIOL 788 A and B, or PHYSIOL 788

PHYSIOL 796A  60 Points
PHYSIOL 796B  60 Points
MSc Thesis in Physiology - Level 9
To complete this course students must enrol in PHYSIOL 796 A and B

Population Health

Stage I

POPLHLTH 101  15 Points
Introduction to Health Systems
Provides an overview and understanding of the New Zealand health system, including: history of health and health service delivery in New Zealand; the role and functioning of hospitals; primary care; purchasers and funders of health services; the role of insurance and private healthcare providers.

POPLHLTH 102  15 Points
Social Determinants of Health
A description and analysis of health within a social context. Discusses different models of health and provides a range of explanations for how social factors influence health. Options for addressing these issues are also explored.

POPLHLTH 103G  15 Points
Epidemics: Black Death to Bioterrorism
Epidemics have devastated human populations and will continue to do so. This course looks at how epidemics can run rampant through society and how we can control them. It will include examples from the past and present, as well as outline future threats. A diversity of epidemics will be covered, from the plague, gambling, depression, pandemics, nun-biting and alien abduction.

POPLHLTH 111  15 Points
Population Health
To introduce frameworks and tools for measuring and understanding and improving the health of populations, both locally and globally. These frameworks and tools are derived from epidemiology, demography, public health, environmental health and global health sciences.

Stage II

POPLHLTH 202  15 Points
Research Methods in Health
Examines the different ways of approaching, designing and undertaking population health science research, covering research paradigms and methodologies, including both quantitative and qualitative methods.

POPLHLTH 203  15 Points
Health Promotion: Philosophy and Practice
Explains in detail the theoretical basis of health promotion; calling on current practice examples to bring the theory to life. Introduces international and New Zealand health promotion concepts and tools. Explains how health promotion practice rests on particular approaches, values and ethical considerations which directly link to a political analysis of deprivation and powerlessness.

POPLHLTH 204  15 Points
Health Care Ethics
An introduction to healthcare and medical ethics. A theoretical foundation of ethics in addition to the practical ethical issues relevant to healthcare professionals.

POPLHLTH 206  15 Points
Life Cycle Nutrition
Provides students with a general background and introduction to: the New Zealand diet; food preparation and meal patterns; dietary requirements during pregnancy and lactation, childhood and adolescence, lifestyle changes, maturity and ageing.
of theory, research and practice in health development. Emphasis is placed on collaboration and participation.

Prerequisite: POPLHLTH 102

**POPLHLTH 208 15 Points**

**Mental Health Development**
The importance of mental health to overall health and well-being is explored. Major threats to mental health are reviewed, and contemporary responses to mental illness are placed in historical perspective. Current theory, research and practice related to mental health development, which includes both recovery-based approaches and mental health promotion practice (i.e., promotion of well-being) at the community and population levels are reviewed.

Prerequisite: POPLHLTH 102

**POPLHLTH 210 15 Points**

**Equity and Inequalities in Health**
Investigates the way in which social determinants lead to particular distributions of health in populations. Draws on a social epidemiological approach to explore ways in which inequalities in health (based on factors such as age, gender, ethnicity and socio-economic status) are created, then maintained or eliminated.

Prerequisite: POPLHLTH 102

**POPLHLTH 211 15 Points**

**Introduction to Environmental Health**
Provides students with concepts and knowledge necessary to understand the influence of the environment on health, and also to understand how human activity affects the environment. Local, regional and global examples of environmental health issues, as well as success stories, are explored. The course introduces approaches that may be taken to identify, understand and reduce environmental hazards.

**POPLHLTH 212 15 Points**

**Bio-behavioural Aspects of Drug Use**
An introduction to the ways drugs exert their effects on the body, why drug dependence (addiction) occurs and what factors may predispose individuals to the development of drug dependence, including the aetiology of drug dependence and ways in which the study of bio-behavioural aspects of drug use has influenced public health interventions to reduce drug dependence.

**POPLHLTH 213 15 Points**

**Special Topic: Positioning Pacific Health**
Introduces Pacific perspectives and worldviews of health and wellbeing and examines the social, structural, economic and political determinants of health for Pacific peoples in New Zealand.

Prerequisite: POPLHLTH 101, 102, 111

**POPLHLTH 214 15 Points**

**Special Topic**

**POPLHLTH 215 15 Points**

**Dynamics of Health Systems**
Examines ways in which approaches to quality and efficiency can be understood to examine changes in health systems, in response to the environment. The influence of key players is a key focus throughout this course.

Prerequisite: POPLHLTH 101

**POPLHLTH 216 15 Points**

**Quantitative Methods in Health**
An introduction to and application of epidemiological and social science-based, quantitative principles, methods and skills used in health sector research.

Prerequisite: POPLHLTH 111, 202

**Stage III**

**POPLHLTH 300 15 Points**

**Health Sector Professional Competencies**
Develops core skills in areas of project management, financial management, communication, leadership, team development, and cultural competence. An integrated project development approach is used to expose students to the key principles in these areas and to enable them to build a development plan.

Prerequisite: POPLHLTH 204

**POPLHLTH 301 15 Points**

**Strengthening Health Systems**

Prerequisite: POPLHLTH 202, 215

**POPLHLTH 302 15 Points**

**Health Services Placement**
The placement with a health service organisation provides students with the opportunity for experiential learning and the development of competencies needed in the workplace. Theory and skills learned in previous courses are integrated and extended as students apply prior knowledge to a local health organisation and carry out tasks asked of them.

Prerequisite: HLTHPSYC 122, MAORIHLTH 201, POPLHLTH 101, 102, 111, 202, 204, 210, 216

**POPLHLTH 303 15 Points**

**Health Informatics**
Students will explore the development and management of information systems in contemporary New Zealand healthcare services. Health informatics concepts, conceptualised in different healthcare settings, are critically reviewed in terms of their practical application.

Prerequisite: POPLHLTH 101, 202

**POPLHLTH 304 15 Points**

**Principles of Applied Epidemiology**
The application of an epidemiological approach in population health, including study of the principles of epidemiological thinking, epidemiological study design and analyses, and the application of these findings to population health. Modules will be taught through specific themes for example, a life course approach or injury prevention.

Prerequisite: POPLHLTH 111, 202, 216

**POPLHLTH 305 15 Points**

**Community Nutrition**
This course builds on POPLHLTH 206 ‘Life Cycle Nutrition’ by providing students with a general overview of the determinants of population eating behaviours and the implications of current dietary behaviours and patterns on health.

Prerequisite: POPLHLTH 111, 206

**POPLHLTH 306 15 Points**

**Health Promotion 2**
Builds on the theory and practice in POPLHLTH 203, and examines in depth the relationship between economic and political processes and health status. The course also looks at the most effective strategies to put health promotion theory into practice. Mixed in with this will be an in-depth
introduction to some of the emerging issues in health promotion, and a look at some of the specific areas of health promotion practice.
Prerequisite: POPLHLTH 203

POPLHLTH 307 15 Points
Communities and Addictions
Examines how addictions such as tobacco, alcohol, drugs and gambling seriously undermine the health of individuals and the communities in which they live and/or work. Case studies are used to understand the primary elements of community and cultural health development.
Prerequisite: 30 points at Stage II in Population Health

POPLHLTH 310 15 Points
Special Topic: Health Sector Competencies

POPLHLTH 311 15 Points
Shaping Health Policy
Investigates recent changes to the ways in which governments seek to intervene to improve a population’s health. NZ case studies will be used to illustrate the interrelationships between research, policy and practice in a devolved health system and the changing relationships between government agencies and health providers.
Prerequisite: POPLHLTH 202

POPLHLTH 312 15 Points
Health and Pacific People in NZ
An overview of the major health issues facing Pacific peoples, including analysis of the key determinants of health status, focusing on approaches to improving health for Pacific peoples through research, policy, public health programmes and health services. A critique of dominant paradigms of health and well-being in relation to Pacific communities in Aotearoa New Zealand is included with consideration of their effect on health outcomes.
Prerequisite: POPLHLTH 210
Restriction: POPLHLTH 201

POPLHLTH 313 15 Points
Health in Asian Communities
An overview of Asian health issues, including the biological, ecological cultural, economic social and psychological factors that determine health for Asian New Zealanders is provided. Current practice, policy development and research priorities for Asian communities are included.
Prerequisite: POPLHLTH 210

POPLHLTH 314 15 Points
Special Topic: Systematic Reviews and Meta-analysis
The principles of interventional systematic reviews and meta-analysis and their role in evidence-based health practice. Topics include understanding the population of interest, developing search strategies, appraising quality of included studies, data extraction, understanding synthesis (meta-analysis) and interpretation of results in the health context.
Prerequisite: POPLHLTH 111 and 216

POPLHLTH 315 15 Points
Translating Health Information
To lead to improvements in health, information needs to be translated appropriately to influence decision makers. Builds the skills and knowledge to be able to both critique and synthesise existing health information as well as to apply analytical methods and presentation approaches to data in order to effectively communicate findings to different decision-making communities.
Prerequisite: POPLHLTH 202

POPLHLTH 316 15 Points

POPLHLTH 317 15 Points
Directed Study
Prerequisite: Programme Director approval required

Postgraduate 700 Level Courses

POPLHLTH 700 15 Points
Community Health Development
Provides a comprehensive overview of the principles, theories, and frameworks for undertaking community-level health development. Special emphasis on empowering and critical perspectives and the implications for health and determinants at a community-level of focus. Informed by current research and a comparative case study approach, the paper examines the opportunities and challenges in the delivery of health for, and by, diverse communities in New Zealand and globally.
Corequisite: POPLHLTH 722

POPLHLTH 701 15 Points
Research Methods in Health
A comprehensive overview, in relation to health, of theoretical underpinnings of research; the asking of research questions; literature reviews; the design, implementation and appraisal of qualitative and quantitative research; and the writing up and dissemination of research.
Restriction: CLINED 714, NURSING 768, POPLHLTH 202

POPLHLTH 704 15 Points
Undertaking Qualitative Health Research
Provides practical experience in the appraisal and use of qualitative methods in research in health. The development of studies from research questions through design, conduct, and analysis and interpretation of such studies are examined in detail. Students are required to prepare a portfolio examining the use of a specific methodological approach in qualitative health research.

POPLHLTH 705 15 Points
Evaluation Research Methods
Provides a comprehensive outline of the nature of programme evaluation in the health sector and an overview of a variety of approaches to programme evaluation and the appropriate use of research tools. Includes logic models, stakeholder analysis, the development of objectives, indicators, client surveys and interviews. Emphasis on mixed methods evaluation designs involving qualitative and quantitative data gathering.

POPLHLTH 706 15 Points
Statistics in Health Science
Provides an overview of statistics and statistical methods for health scientists. Covers a range of methods and tests, including regression.

POPLHLTH 708 15 Points
Epidemiology
Examines epidemiological study design, measures of effect, screening, appropriate statistics for epidemiology, with a focus on public health epidemiology.

POPLHLTH 709 15 Points
Evidence for Best Practice
Evidence based practice uses epidemiological data derived from valid and clinically relevant research. This includes the accuracy of diagnostic tests, the power of prognostic markers and the efficacy and safety of therapeutic, rehabilitative or preventive interventions. This evidence is integrated with relevant contextual evidence such
as patient and practitioner values, social, cultural and economic considerations to inform best practice.

**POPLHLTH 711 15 Points**
**Systematic Reviews and Meta-analysis**
The principles and critical appraisal of interventional systematic reviews and meta-analysis and their role in evidence-based practice. Topics include: protocol development, question formulation, identification of evidence, selection of studies for inclusion, appraisal and quality of included studies, extraction and recording of data, synthesis (meta-analysis) and interpretation of results and application.

*Prerequisite: POPLHLTH 708 or 709 or equivalent experience*

**POPLHLTH 715 15 Points**
**Global Public Health**
Explores global health from a public health perspective, with a strong emphasis on health and its determinants in developing countries. Topics covered include the global burden of risk and disease, global environmental challenges to health, international health governance, international healthcare financing and international health promotion.

**POPLHLTH 717 15 Points**
**Health and Society**
An exploration of health within a social context. Examines the relationships between social factors, their impact on health, and the ways in which these relationships inform our understanding of health and help direct healthcare provision and public health policy.

**POPLHLTH 718 15 Points**
**Health and Public Policy**
A discussion of policy studies frameworks, and how these can be used to analyse policy issues and processes relevant to health and healthcare.

**POPLHLTH 719 15 Points**
**Health Economics**
Fundamental economic concepts and their application to healthcare. Provides students with some analytical skills with which to address issues and problems in the funding and organisation of health services.

**POPLHLTH 720 15 Points**
**Cost Effectiveness Evaluation**
The application of economic methods to the evaluation of health services and programmes. The principles and techniques of economic evaluation, the process of measuring costs and benefits of health services, quality of life measurement.

**POPLHLTH 722 15 Points**
**Organisation of Health Systems**
The principles, structure, financing and organisation of health systems. Current issues and challenges facing health systems from a national and international perspective.

**POPLHLTH 724 15 Points**
**Quality in Health Care**
Quality healthcare is examined with an emphasis on strategies that enable individuals, teams, and services within healthcare organisations to implement and sustain performance improvement. Allows students to explore the quality principles to an area of their own choice.

*Restriction: NURSING 775*

**POPLHLTH 725 15 Points**
**Environmental Health**
Explores ways in which the environment affects human health. Studies links between industrial and agricultural development, environmental change and public health at local, national and global levels. Topics include the role of policies, legislation and public health actions in reducing environmental health risks.

**POPLHLTH 726 15 Points**
**Health Protection**
Current issues will be used to illustrate principles of health protection as an element of public health at local and national levels. The main inter-related topic areas within health protection (communicable disease control and surveillance; non-communicable disease control; food safety; alcohol and tobacco; air and water quality) will be discussed, along with identification of health hazards, development of prevention strategies, and field implementation methods.

**POPLHLTH 733 15 Points**
**Health Promotion Theory and Models**
Examines the values, theories and practice models of health promotion and in particular, an approach to the social determinants of health and health equity that seeks to empower individuals and groups to deal with these issues.

**POPLHLTH 734 15 Points**
**Health Promotion Strategies**
An overview of key strategies designed to promote health, with an emphasis on healthy public policy, partnerships, community action and advocacy and ways to link local, national and global actions. Practical and creative approaches to health promotion planning are explored through case studies, invited practitioners and the development of a group project with outcomes of empowerment and health gain.

**POPLHLTH 735 15 Points**
**Mental Health Development: Theory and Principles**
Mental Health Development (MHD) represents an emergent paradigm in the mental health sector, one which emphasises strengths, resilience and positive quality of life. It is applicable to all people, including those with mental illness, and to all aspects of mental health and social services. The course has a particular focus on the treatment and recovery for individuals affected by mental health problems.

**POPLHLTH 736 15 Points**
**Mental Health Promotion**
Examines the central role that positive mental health and well-being plays in the health of populations. It focuses on understanding the determinants of mental health and the processes by which these determinants affect mental health. The theory and application of mental health promotion practice, encompassing strategies for action at the societal, community and individual level, are discussed.

**POPLHLTH 737 15 Points**
**Alcohol, Tobacco and Other Drug Studies**
Provides an introduction and overview to studies on alcohol and other drugs. Incorporates theory and research developed within public health, mental health, and specialised treatment frameworks. Topics will include: coverage of historical developments, a review of major theoretical issues and an overview of current trends.

**POPLHLTH 738 15 Points**
**Biology of Addiction**
Explores the genetic and neurobiological factors that
predispose individuals to develop addiction. The neuropharmacology of the main drugs of abuse and factors that are responsible for the variability in drug response (i.e. pharmacokinetics) will be presented. Current neurobiological models of addiction will be considered.

POPLHLTH 739 15 Points
Pacific Health
Examines a wide range of health issues related to Pacific health. Provides an in-depth analysis with evidence of the global, regional and local issues that determines the health of the Pacific population both in the Pacific region and in New Zealand.

POPLHLTH 746 15 Points
Ethics, Culture and Societal Approaches to Death
Approaches to death by Māori and other cultures. Resource and legal issues in the New Zealand context. Ethical issues: euthanasia versus palliative care, privacy, living wills and end of life medical decision-making; particularly treatment abatement. Duties after death, the nature of teamwork, the multidisciplinary nature of palliative care, the role of volunteers, emotional self care for palliative care providers, and home versus residential care.

POPLHLTH 751 15 Points
Special Studies

POPLHLTH 752 15 Points
Case Studies in Global Health
Provides the opportunity to develop critical awareness and practical engagement with a public health issue or issues facing people in the Asia Pacific region. The public health issues facing the region are broad and complex and require a region and country-specific response. Students will develop an understanding of the key health challenges, and the range of possible responses to improve health in the country and wider region.

POPLHLTH 758 15 Points
Theoretical Concepts of Health
A number of theoretical explanations of public health are considered in order to address health issues in diverse communities. An ecological perspective of health will be explored and the specific models of population health will be critiqued.

POPLHLTH 760 15 Points
Principles of Public Health
Consideration of the principles underlying the modern practice of public health. Students examine the major core concepts in public health, including determinants of health, health equity, environments and health, health promotion and health systems.
Restriction: POPLHLTH 300, 302

POPLHLTH 762 15 Points
Advanced Qualitative Health Research
Applies skills and knowledge in qualitative research to data management and the examination of specific methodological approaches used in qualitative health research. Students will prepare a portfolio examining the use of a specific methodological approach in qualitative health research, and demonstrate a grasp of appropriate skills related to data management in qualitative research.
Corequisite: POPLHLTH 704 or approved equivalent

POPLHLTH 763 15 Points
Human Vaccinology
Provides an examination of vaccinology as applied to humans and its application in the health sector. Includes consideration of immunology, vaccine form and function and vaccine design; through to vaccine development and manufacture, vaccine safety, immunisation controversies, policy and schedule. A core theme throughout the course will be communication of vaccine science including risk communication to different audiences including health professionals and the community.
Restriction: POPLPRAC 755

POPLHLTH 765 15 Points
Nutrition Interventions in Public Health - Level 9
Explores the use of community-based nutrition interventions to reduce nutrition-related health inequalities, and focuses on the use of appropriate theories to understand the nutrition issue; the use of data and research in the design of evidence based nutrition interventions; and the design of rigorous evaluation plans to determine the effectiveness of the intervention.

POPLHLTH 766 15 Points
Special Topic

POPLHLTH 767 15 Points
Health Services Research Methods
Focuses on teaching the knowledge and practical skills to conduct health services research. The course follows through the typical research process drawing on a range of different methodologies and methods, both quantitative and qualitative, to develop and answer research questions relating to the accessibility, quality and cost of health care and the improvement of health outcomes.
Restriction: POPLHLTH 702

POPLHLTH 768 15 Points
Special Studies in Addiction and Mental Health

POPLHLTH 769 30 Points
Interpersonal and Family Violence
Explores the magnitude and consequences of the problem of, and contributing factors to, interpersonal and family violence. Examines some of the major violence prevention and intervention activities currently undertaken in New Zealand. Considers how effective practices and policies might be disseminated at the individual, community, and national levels. Themes include: the epidemiology of violence, causes of violence, developing and evaluating interventions, and violence as a health issue.
Restriction: SOCHLTH 751

POPLHLTH 770 30 Points
Special Topic - Level 9

POPLHLTH 774 15 Points
Addictive Consumptions and Public Health
Focuses on the extensive health impacts of addictive consumptions, particularly in relation to the legalised consumptions of tobacco, alcohol and gambling. Outlines applications of public health principles to reducing harm from these consumptions. Critically examines the role of corporate industrial complexes in promoting these consumptions and in preventing policy and legislative reforms.
Restriction: POPLPRAC 709

POPLHLTH 776 15 Points
Public Health in Practice
Students will apply population health concepts, principles and methodologies from formal course work to current public health problems, and develop skills
in communicating their solutions to a range of diverse audiences, while critically reflecting on their own position. Pre-requisite: 45 points from Master of Public Health Schedule

**POPLHLTH 777**

**Ethics and Societal Approaches to Death**

Covers the approaches to death of different cultures, exploring resource and legal issues. Addresses ethical issues: euthanasia versus palliative care, privacy, living wills and end of life medical decision-making, treatment abatement, duties after death, the nature of teamwork, the multidisciplinary nature of palliative care, the role of volunteers, self-care for palliative care providers and home versus residential care.

**Adult Mental Health and CBT Skills for Primary Care**

A clinically focused course providing an overview of the recognition and management of adult mental health in primary care and other healthcare settings. Topics and content will enable an examination of mental illness in New Zealand including cultural approaches and epidemiology, assessment; identification, treatment and management options. Content covers high prevalence conditions (depression, anxiety) and long term conditions (bipolar disorder and schizophrenia). Topics will include recovery, resilience, CBT techniques and the effect of alcohol and drugs.

**POPLPRAC 707**

**Theory and Skills in Counselling Practice**

The theory, research and practice regarding counselling and psycho-therapeutic approaches used in mental health and addiction service contexts. Approaches will be critically examined in terms of history, theory, social context and trends in research. Particular attention will focus on counselling methods currently in use within services.

**POPLPRAC 708A**

**Assessment and Intervention with Addiction**

Develops understanding and competency in assessment and intervention work with clients having co-existing problems, specifically those most affected by alcohol and drug issues. It focuses on comprehensive assessment, effective clinical interventions, drug-specific interventions and culturally-specific approaches working with individuals, whānau, and communities. It will involve regular review of practice using case-based scenarios filmed with feedback from tutors, mentors and peers.

**Corequisite:** POPLHLTH 737, POPLPRAC 707

To complete this course students must enrol in POPLPRAC 708 A and B

**POPLPRAC 710**

15 Points

**Community Health Development Practicum**

Theoretical and practical principles of health promotion processes, combined with practical experience, in the context of relevant organisations, community groups and research projects. Students are expected to find their own placement for the practicum.

**POPLPRAC 711**

15 Points

**Health Promotion in Pacific Community Development**

Allows supervised experience for students in a Pacific-specific service. A course of study relevant to the area of placement will be prescribed.

**POPLPRAC 712**

15 Points

**Project Planning for Lifestyle Change**

Focuses on the planning and development of interventions aimed at addressing lifestyle issues such as alcohol and other dangerous consumptions, obesity, lack of exercise and mental trauma. Students synthesise strategies from published literature and adapt them pragmatically for application in local contexts. Interventions will include those occurring in communities, primary and mental healthcare settings, hospitals, workplaces, and educational institutions.

**POPLPRAC 720**

15 Points

**Psychosocial Issues in Palliative Care**

The psychological and social study of patients with cancer or active, progressive disease, unresponsive to curative treatment. Existential philosophy and models of coping with suffering, communication in palliative care, psychiatric disorders in palliative care, and bereavement.

**POPLPRAC 722**

15 Points

**Symptom Management in Palliative Care**

Assessment and management of pain, nausea and vomiting, respiratory symptoms, delirium, and other symptoms commonly encountered in palliative care and at the end of life, together with an overview of palliative care emergencies, the role of radiotherapy in symptom management, and issues around nutrition and hydration at the end of life.

Course Prescriptions

POPLPRAC 723 15 Points
Advanced Symptom Management in Palliative Care
Advanced concepts in the assessment and management of symptoms and situations, including the more challenging ones encountered within the palliative care approach to malignant and non-malignant advanced diseases.
Prerequisite: POPLPRAC 722

POPLPRAC 724 15 Points
Child and Adolescent Palliative Care
An examination of specific palliative care issues related to the care of children, adolescents, and their families.

POPLPRAC 739 15 Points
Urgent Primary Medical Care
Assessment and management of a broad range of acute conditions and related issues including: chest pain, dyspnoea, collapse, coma, anaphylaxis, diabetes, toxicology, psychiatry and environmental conditions.

POPLPRAC 740 15 Points
Urgent Primary Surgical Care
Assessment and management of acute surgical and subspecialty conditions and related issues including: trauma, head injury, abdominal pain, ophthalmology, ENT, gynaecology, pregnancy, and genito-urinary conditions.

POPLPRAC 753 15 Points
Special Studies

POPLPRAC 754 15 Points
Infant, Child and Adolescent Primary Mental Health
Provides an overview of the recognition and primary care management of mental health in the under-eighteen age group. A clinically focused course for primary care practitioners. The content covers attachment, early intervention, development, risk assessment, resilience and families. Topics include depression, anxiety disorders, substance use, eating disorders, first episode psychosis, pain, somatic presentations, disruptive behaviour disorders and common behavioural problems.

POPLPRAC 755 15 Points
Special Topic

POPLPRAC 756 30 Points
Adult Rehabilitation Studies
Focuses on the rehabilitation of adults with an acquired or traumatic condition; including an in-depth exploration of the philosophy of rehabilitation interwoven with the development of clinical rehabilitation skills. The concepts addressed in rehabilitation reflect the eclectic nature of the discipline.
Restriction: POPLPRAC 728

POPLPRAC 757 15 Points
Special Topic

POPLPRAC 758 30 Points
Biology of Ageing
The systematic analysis of the physiological changes in ageing and the relationship of these changes to current beliefs and theories around the ageing process. Current issues around biogerontology are discussed.
Restriction: POPLHLTH 749

POPLPRAC 759 30 Points
Engaging Pasifika Communities in Health
Examines the concepts and principles of Pasifika health engagement and applies them culturally and appropriately in a Pacific setting to improve Pasifika health outcomes.

POPLPRAC 765 15 Points
Coexisting Problems: Theory and Principles - Level 9
Develops further knowledge and skills in working effectively with clients who suffer from coexisting mental health and addiction problems. Students will be presented with research and theory on existent problems and will examine recent developments in intervention strategies.
Prerequisite: POPLPRAC 708 or equivalent experience

POPLPRAC 766 30 Points
Special Topic in Palliative Care - Level 9

POPLPRAC 767 30 Points
Dementia Care
A clinically focused course that explores dementia within three specific areas; the brain, the diseases, and the person. It explores theoretical concepts and models of dementia care, and focuses on the partnership of individuals, carers and health professionals in the delivery of dementia care.

POPLPRAC 768 30 Points
Principles of Gerontology
Explores the issues of providing health services for an ageing population from a number of perspectives: demographics, sociology, psychology, successful ageing, public policy, economics, design, workforce and service provision. The principles that underpin gerontology and models of service delivery to older people are examined as are the attitudes that improve the partnership between individuals, carers and other family members, and health professionals in the delivery of services to older people.
Restriction: POPLPRAC 725, 726

POPLPRAC 769 30 Points
Special Topic: Aged Care Practice - Level 9
Provides an in-depth understanding of the unique clinical and contextual complexities of providing health care in the aged residential care sector. Using rich data sources and standardised assessment tools it focuses on the quality of clinical care. Health professionals will explore the use of gerontological assessment to respond to identified need, inform care planning and care delivery at an individual and systems level.

POPLPRAC 770 30 Points
Special Topic - Level 9

POPLPRAC 771 30 Points
Special Topic

POPLPRAC 772 30 Points
Symptom Management in Palliative Care
An overview of key symptoms commonly encountered in patients with progressive diseases in palliative care and end of life. Addresses assessment and management of these common symptoms using evidenced-based learning.
Restriction: POPLPRAC 722

POPLPRAC 773 30 Points
Challenges in Symptom Management in Palliative Care
An overview of key symptoms commonly encountered in malignant and non-malignant patients in palliative care and at end of life. Addresses assessment and management of these common symptoms using evidenced-based learning.
Restriction: POPLPRAC 723

POPLPRAC 774 30 Points
Psychosocial Issues in Palliative Care
An overview of the psychological and social study of patients with cancer or active, progressive disease,
unresponsive to curative treatment. Covers existential philosophy and models of coping with suffering, spirituality, communication in palliative care, family systems, psychosocial assessments, psychiatric disorders in palliative care and bereavement.

Academic Integrity

ACADINT A01 0 Points

Academic Integrity Course
An online course designed to increase student knowledge of academic integrity, university rules relating to academic conduct, and the identification and consequences of academic misconduct. Students work through a series of modules, outlining scenarios that they may encounter while studying at university. Each scenario provides information on relevant rules, resources and expected behaviour.

Astrosciences

Stage I

ASTRO 100 15 Points
ASTRO 100G 15 Points

Planets, Stars and Galaxies
The story of our place in the Universe. Key topics are the exploration of the solar system, searches for planets around other stars, the structure and evolution of stars and galaxies, high-energy astrophysics, and the origin and overall properties of the Universe. No background in physics or mathematics is assumed.

ASTRO 110 15 Points

Introduction to Rocket Science
An introduction to spaceflight and space technology. Topics include rocketry, orbits, spacecraft design and systems, space-based technologies, space exploration, ethical and legal issues and the present and future scientific, technological and social impacts of spaceflight. No background in physics or mathematics is assumed.

Stage II

ASTRO 200 15 Points
ASTRO 200G 15 Points

Astrobiology
Astrobiology examines the potential of the universe to harbour life and is interdisciplinary, combining Geology, Biology, Astronomy, Chemistry, Physics, Philosophy, Ethics. Course focus is on how these disciplines combine with technology, addressing questions of life in the universe. Key topics include origin and evolution of life, definitions and environmental limits of life, and how to search for life beyond Earth.

Prerequisite: 60 points passed

Postgraduate 700 Level Courses

ASTRO 720 15 Points

Planetary Science
Explores celestial bodies and planetary systems and the processes of their formation. Emphasis is on planetary geology and geophysics over the 4.6-billion-year-history of our solar system, evaluating the origination, evolution, and habitability of diverse worlds, using varied tools and techniques. Also addressed are modes of scientific enquiry, knowledge perspectives and the ethics of space exploration.

Biological Sciences

Stage I

BIOSCI 100 15 Points
BIOSCI 100G 15 Points

Antarctica: The Frozen Continent
A general introduction to Antarctica and its environs including the Southern Ocean and the sub-Antarctic islands. Emphasis will be placed on the evolution of Antarctica and how resident plants, animals and micro-organisms have adapted to cope with the extreme environment. Specific topics to be addressed include: the history of Antarctic exploration and its impact on the development of Antarctic science, Antarctic ecosystems, Antarctica as a wilderness region, and the impact of humans including the exploitation of resources and the effects of pollution. This course is suitable for students with both science and non-science backgrounds.

BIOSCI 101 15 Points

Life! Origins and Mechanisms
Questions what life is and explores its machinery. Speculates on how life arose from the flow and capture of solar energy, to power growth, movement, replication and storage of genetic information. Describes how genes interact with environments, and how mutations can be catastrophic or transformational. These processes underpin life as we know it.

BIOSCI 106 15 Points

Foundations of Biochemistry
An introduction to the core elements of biochemistry, investigating biological processes at the chemical and molecular level. Key themes include the molecular structure of proteins, enzyme kinetics, biochemical energetics, carbohydrate and lipid metabolism, nutrition, cell signalling, vision and aspects of plant biochemistry including world food production. These themes provide a framework for discussion of mechanisms underpinning human disease including diabetes and obesity, antibiotic resistance, drug development and plant medicinals.

BIOSCI 107 15 Points

Biology for Biomedical Science: Cellular Processes
The cellular basis of mammalian form and function. Particular emphasis will be placed on cellular components and processes of blood, neural, muscular, reproductive, immune and supporting systems and how they contribute to the structure and function of the body as a whole.
BIOSCI 108  15 Points

Biodiversity: Patterns of Life
Knowledge of biodiversity is fundamental to understanding our world. Students will become familiar with biological diversity and whakapapa beginning with viruses and leading through to microbes, plants, fungi and animals. Defining characteristics of major organisinal groupings will be highlighted to provide students with an overview of the diversity of life on Earth, and the critical role that kaitaikitanga and maintaining biodiversity has for the future.

BIOSCI 109  15 Points

Ecology and Evolution: The Continuum of Life
Explores the ecological mechanisms that determine the distribution and abundance of organisms, and the evolutionary mechanisms which drive change over time. Also explores the role of society and mātauranga Māori in recognising and seeking solutions for human-induced environmental change. Course components emphasise critical thinking and scientific communication skills.

Restriction: BIOSCI 104

Stage II

BIOSCI 201  15 Points

Cellular and Molecular Biology
The fundamental processes of the cell are examined to understand how cells reproduce and use information stored within the genome, express proteins for specific functions, and function within larger tissues. Specific modules examine stem cells, tissues and cellular development, cancer progression and the biology of tumours and the basis of immunity.

Prerequisite: BIOSCI 101, and 15 points from BIOSCI 106-109, MEDSCI 142, and 15 points from CHEM 110, 120, 150

BIOSCI 202  15 Points

Genetics
The basic principles of mutation, recombination and genetic mapping are established in this course. These principles are developed in a variety of prokaryotic and eukaryotic organisms. Laboratory work uses molecular, microbial and eukaryotic material to explore the key features of heredity.

Prerequisite: BIOSCI 101 and 15 points from BIOSCI 106-109

BIOSCI 203  15 Points

Biochemistry
Presents core areas of modern biochemistry. Emphasis is on macromolecular structure and function. Areas covered include protein structure, oxygen and carbon dioxide transport in humans and other species, metabolism in mammals, proteases and human disease, cholesterol metabolism and transport and signal transduction.

Prerequisite: BIOSCI 101, 106 and 15 points from CHEM 110, 120

BIOSCI 204  15 Points

Principles of Microbiology
An introduction to the diversity, physiology and functions of microorganisms (prokaryotes, eukaryotes, viruses) as individuals and as communities. The fundamental roles of microorganisms in ecosystems, health and disease are considered alongside methods for their isolation and study. Microbial applications in biotechnology, food production, agriculture and industry are also discussed.

Prerequisite: BIOSCI 101 and 15 points from BIOSCI 106-109

BIOSCI 205  15 Points

Plant, Cell and Environment
Unlike animals, plants cannot move to respond to changes in their environment. Plants have evolved diverse signaling systems and the ability to grow towards their essential resources. Explores the intricate ways plants function how they are able to respond to developmental and environmental signals at the whole plant and cellular level.

Prerequisite: BIOSCI 101, 108

BIOSCI 206  15 Points

Principles of Ecology
An examination of ecosystem processes, factors that affect distribution and interactions of organisms, population ecology, and applications of ecology such as restoration and conservation. The key principles of ecology are taught in a New Zealand context emphasising an experimental approach.

Prerequisite: BIOSCI 108, 109 and STATS 101 or 108

BIOSCI 207  15 Points

Adaptive Form and Function
Investigates the diverse biological adaptations of animals, with a focus on generating adaptive hypotheses and ways to test them. Topics covered include comparative physiology, behavioural ecology, hormones and predator/prey interactions.

Prerequisite: BIOSCI 108, and BIOSCI 101 or 109

BIOSCI 208  15 Points

Invertebrate Diversity
Invertebrates make up over 95 percent of animal species. This course explores the biology of invertebrates with an emphasis on structure, function, life histories, behaviour and ecology. Invertebrate diversity is examined in a variety of environments, using New Zealand examples where possible, and provides the basis for advanced courses in conservation and marine ecology.

Prerequisite: BIOSCI 108, and BIOSCI 101 or 109

BIOSCI 210  15 Points

Evolution and the Origin of Life
Covers basic concepts in evolutionary biology including Darwin and the theory of evolution by natural selection, phylogenetics, population genetics, molecular evolution, speciation and extinction. The extent to which Darwin's theory of evolution by natural selection can explain the origins of biological complexity is explored.

Prerequisite: BIOSCI 109, and 15 points from BIOSCI 101-108

BIOSCI 220  15 Points

Quantitative Biology
An introduction to mathematical, statistical and computational literacy as required for contemporary biologists. Topics include fundamentals of experimental design, data exploration and visualisation, model-based inference to process biological data into biological information, comparing statistical models, prediction using mathematical models of biological processes, critical thinking about models and effective communication of findings. Data analysis and generation is taught using the R programming language. Recommended preparation: STATS 101

Prerequisite: 30 points from BIOSCI 101-109

Stage III

BIOSCI 300  15 Points

Directed Study

BIOSCI 322  15 Points

Evolution of Genes, Populations and Species
Advanced concepts in evolutionary biology and their application to current research in molecular evolution,
population genetics, phylogenetics and organismal evolution. Examples from animals, plants and microbes, as well as topical issues, including speciation, adaptation, co-evolution, sexual selection, conservation, biogeography, genomics, biotechnology and human disease. Recommended preparation: Prior or concurrent enrolment in BIOSCI 202.
Prerequisite: BIOSCI 210

BIOSCI 324 15 Points
Plant Pathology and Symbiosis
Microorganisms and pests form symbioses with plants that are critically important for horticulture and agriculture. This course examines the biology of plant pathogens, pests, and symbionts. It focuses on plant-microbe interactions at the cellular and molecular level, the epidemiology and control of plant diseases, and the mechanisms through which these interactions are mediated.
Prerequisite: BIOSCI 204 or 205
Restriction: BIOSCI 321

BIOSCI 325 15 Points
Plant Diversity and Function
Plants form the basis of ecosystem food chains and are fundamental to life on Earth. The diversity in land plants from both phylogenetic and functional trait perspectives will be presented, exploring key steps in the evolution of plants and how they interact with their environment. It provides a framework of plant life focussing on the ecologically, economically and culturally important plants of Aotearoa New Zealand.
Prerequisite: BIOSCI 108, and BIOSCI 205 or 206
Restriction: BIOSCI 323

BIOSCI 326 15 Points
Plant Biotechnology for Crops and Health
Plants are vital sources of food, health compounds and shelter. Students will learn how biotechnology is used to understand plant biology and discuss strategies for crop improvement. Topics include plant genomics, molecular breeding, genome editing, gene transfer, the regulatory framework and examples of applications in the food, health, environment and crop sectors.
Prerequisite: 15 points from BIOSCI 202, 203, 205
Restriction: BIOSCI 340

BIOSCI 328 15 Points
Fisheries and Aquaculture
Harvest and capture of aquatic organisms and inter-relationships with aquaculture. Fisheries and aquaculture are treated not as distinct disciplines but in the context of integrating exploitation and sustainable environmental integrity. Case studies include deep sea and coastal fisheries, and shellfish culture.
Prerequisite: 15 points from BIOSCI 207, 208, MARINE 202

BIOSCI 333 15 Points
Marine Ecology and Conservation
Patterns and processes in marine ecology and biodiversity are described; including predator-prey interactions, benthic and pelagic habitats, productivity and physiology. Applied aspects include movement ecology, dispersal related to resource availability, disturbance and impacts of resource use e.g., fisheries. Emerging technologies to understand resilience within ecosystems and dispersal will be included.
Prerequisite: BIOSCI 206 or MARINE 202, and 15 points from BIOSCI 220, STATS 101, 108

BIOSCI 334 15 Points
Biology of Marine Organisms
Not only is the earth predominantly oceanic, but higher marine biodiversity occurs on the shallower continental shelf/coastal areas. Students will learn the key groups of marine organisms within New Zealand's waters. Attention will be given to understanding their diversity, distribution and adaptations to thrive within the dynamic marine environment.
Prerequisite: BIOSCI 108, 109 and 15 points from BIOSCI 206, 207, 208

BIOSCI 335 15 Points
Ecological Physiology
Focuses on the strategies used by animals to cope with physical and biological challenges in the environment. Accordingly, we work at the level of the individual and the interface between physiological, biochemical or molecular approaches on the one hand, and ecology on the other. The adaptive strategies employed by a range of species, with an emphasis on aquatic organisms, in response to physical factors such as temperature, oxygen and food availability, are considered. Energetics and nutrition are emphasised. The course aims to meet the needs of students with ecological interests wishing to recognise the experimental approach to solving problems in environmental biology. The practical work is project oriented rather than laboratory based.
Prerequisite: 15 points from BIOSCI 207, 208

BIOSCI 337 15 Points
Animal Behaviour
Animal Behaviour Proximate and ultimate causes of behaviour are investigated experimentally in the field and the laboratory. Responses by animals to variations in the physical environment and to other organisms are studied. The development and organisation of behaviour and the theoretical background to topics of current interest are covered, using both New Zealand and overseas examples.
Prerequisite: BIOSCI 220, and BIOSCI 207 or 208

BIOSCI 338 15 Points
Biology of Terrestrial Animals
The animals of Aotearoa and Tāmaki Makaurau are iconic. We explore the biology, diversity and whakapapa of our native invertebrate and vertebrate animals. Along with a detailed coverage of biology, we focus on practical techniques for sampling and identifying species. This course involves both fieldwork (with the option to conduct this either on campus, or on an overnight fieldtrip) and labwork and training in using biodiversity data for hypothesis testing and scientific communication.
Prerequisite: 15 points from BIOSCI 206-208
Restriction: BIOSCI 320

BIOSCI 339 15 Points
Environmental Microbiology and Biotechnology
The ecology and physiology of micro-organisms in natural and engineered environments. Key themes include marine microbiology, the importance of microbial symbioses to life on Earth, and contemporary research methods in microbiology. Processes such as wastewater treatment and the production of bioactives are used to emphasise exploitation of microbial metabolism for environmental biotechnology purposes.
Prerequisite: BIOSCI 204 or MEDSCI 202

BIOSCI 348 15 Points
Applied Microbiology
Microorganisms and microbial-derived products have been used by humans for millennia. Explores the interface of microorganisms and engineering, including how microorganisms interact with food products in
beneficial and unfavourable ways, identifying and utilising microorganisms to produce chemicals, therapeutics, and materials and how to use innovative methods to engineer microorganisms to perform novel functions or produce novel products.

Prerequisite: BIOSCI 204 or MEDSCI 202

BIOSCI 349 15 Points

Biomedical Microbiology

Prerequisite: BIOSCI 201 and either BIOSCI 204 or MEDSCI 202

BIOSCI 350 15 Points

Protein Structure and Function
The relationship of molecular structure to protein function will be emphasised. Techniques for the purification, characterisation, production of native and recombinant proteins and three-dimensional structure determination will be combined with a description of protein structure. Specific groups of proteins will be selected to illustrate structure/function relationships and protein evolution.

Prerequisite: BIOSCI 201, 203

BIOSCI 351 15 Points

Molecular Genetics
The analysis of genetic material in prokaryotes, viruses, yeast, plants and humans is addressed. The means by which genetic information is transferred and the mechanisms underlying genome diversity will be examined, together with the study of eukaryote genomes at the level of chromosome structure and organisation. The molecular mechanisms underpinning selected inherited human disorders will be discussed as well as the role of model species in understanding normal and perturbed biological pathways.

Prerequisite: BIOSCI 201, 202

BIOSCI 353 15 Points

Molecular and Cellular Regulation
The molecular mechanisms which mediate intracellular sorting and targeting of biochemically active molecules and the networks of intracellular and extracellular signals which regulate cell function form the focus of this course. The roles of growth factors, oncogenes, plasma membrane receptors, nuclear receptors, ion channels and membrane transporters are emphasised.

Prerequisite: BIOSCI 201, 203

BIOSCI 355 15 Points

Genomics and Genome Biology
Biological information is coded in and expressed from genomes. This course explores methods for detecting structural and functional elements of genomes, plus the wider genome biology of eukaryotic and prokaryotic systems. Students will learn how genomic data is generated and analysed, how genomes evolve, and how genomic information is expressed and regulated.

Prerequisite: BIOSCI 202
Restriction: BIOINF 301, BIOSCI 354

BIOSCI 356 15 Points

Developmental Biology and Cancer
Molecular, cellular and genetic aspects of normal and abnormal development focusing on a variety of model systems including drosophila, the zebrafish and the mouse.

Molecular events underlying the development of body form, the differentiation of specific tissues such as the blood, and abnormalities of development which contribute to diseases of the body such as cancer. Implications of transgenic techniques on development.

Prerequisite: BIOSCI 201

BIOSCI 358 15 Points

Nutritional Science
The scientific basis of nutrition focusing on its biochemistry and physiology in health and disease. Nutritional aspects of carbohydrates, fats, proteins, vitamins and trace nutrients are covered in an integrated manner. The methodologies which underpin nutritional science and its applications are included. Reference will be made to a broad range of examples, and a number of specific nutritional topics of current interest will also be included.

Prerequisite: BIOSCI 203

BIOSCI 394 15 Points

Terrestrial Ecology and Conservation
Explores theoretical ecology from populations to ecosystems. Applies ecological theory to conservation management through a cross-disciplinary lens in the context of social and cultural values. Students will test theoretical hypotheses in the field, conduct an ecological site assessment for conservation management and learn to use population viability analysis to assess risks to threatened populations.

Prerequisite: BIOSCI 206, 220

BIOSCI 395 15 Points

Pacific Biogeography and Biodiversity
Island biogeography and insular biodiversity across the Pacific. A multi-disciplinary approach involving the study of both plant and animal systematics and biogeography.

Prerequisite: BIOSCI 109 or GEOG 101

BIOSCI 399 15 Points

Capstone: Biology: The Science of the 21st Century
Major advances in biology have added immensely to the understanding of our world. These advancements will continue, and biological science will influence our future lives and world. Students will enhance their scientific skills by envisioning the innovative future of biology, and its likely cultural, political and economic impacts, globally, and within the context of Aotearoa and Te Tiriti o Waitangi.

Prerequisite: 30 points at Stage III in Biological Sciences

Postgraduate 700 Level Courses

BIOSCI 700 15 Points

Phylogenetics
Students will learn advanced computational methods for inferring phylogenetic trees and studying macroevolutionary processes, including phylogenetic dating, coalescence, epidemic phylogeography, and estimation of ancestral traits and biogeography. Relevant skills in computation (BEAST, command-line programs, R) and statistics (Bayesian methods, model-based inference) will also be taught.

Restriction: BIOINF 702

BIOSCI 701 15 Points

Practical Approaches in Genomics - Level 9
Genomics provides insights into the diversity, evolution, adaptation and function of organisms. Students will complete a research project to apply the advanced practical aspects of genomics across taxa and topics such as conservation, health and ecosystem function.
Recommended preparation: BIOSCI 322, 351 or 355 or equivalent.

**Restriction: BIOINF 703**

BIOSCI 702  15 Points

**Modelling Biological Processes**
Modelling and simulation are increasingly important aspects of the biological sciences. A variety of biological modelling approaches are introduced through a series of practical exercises to build and analyse models of biological processes. Topics include modelling in ecology and systems biology, agent-based modelling of complex biological systems, and molecular dynamics of biological molecules.

**Restriction: BIOINF 703**

BIOSCI 704  15 Points

**Practical Applications of Cell Analysis - Level 9**
Application of highly specialised technologies for cell analysis relevant to a wide range of biotechnology-based disciplines including immunology, infectious diseases, stem cells, neuroscience and cancer. Advanced skill development in technologies including high dimensional flow cytometry, cell sorting and microscopy/imaging.

BIOSCI 724  15 Points

**Marine Ecology**
The ocean covers 70% of the surface area of Earth, provides 50% of the oxygen and much of the food consumed. This course considers marine ecology at the local, hemispheric and global levels with a focus on habitat and ecosystem connectivity and the impacts of anthropogenic change.

BIOSCI 725  15 Points

**Ecological Physiology**
Physiological and biochemical processes enable animals to occupy diverse habitats. Highly variable and extreme environments provide an opportunity to study the functional attributes of animals, particularly ectotherms, with respect to their metabolic, respiratory, and nutritional adaptations. A sound understanding of BIOSCI 335 or equivalent is assumed.

BIOSCI 727  15 Points

**Aquaculture**
Current assessment of the national and global status of aquaculture and consideration of future prospects. Examples of aquaculture in New Zealand are examined and a review of general environmental and biological problems and the role of scientific knowledge in aquaculture management. A sound knowledge of BIOSCI 328 or equivalent is assumed.

BIOSCI 729  15 Points

**Evolutionary Biology**
A contemporary approach to central issues in evolutionary biology including mechanisms that produce macroevolutionary patterns. Current research using phylogenetic methods for testing evolutionary hypotheses will be discussed, encompassing the role of selection, the origin of mutations, and concepts of heredity. A sound understanding of BIOSCI 322 or equivalent is assumed.

BIOSCI 730  15 Points

**Entomology and Biosecurity**
More than half of all described species are insects, and even more species await discovery and description. Insects at every trophic level above plants dominate terrestrial and freshwater food chains. Examines the evolution of insects, the importance of their role in terrestrial ecosystems, and the problems posed by insects as biosecurity invaders in non-native environments. A sound understanding of BIOSCI 320 or 338 or equivalent is assumed.

BIOSCI 731  15 Points

**Biogeography**
Examines the patterns of animal and plant distribution, and the processes that influence these patterns. Topics covered include equilibrium theory, island succession, vicariance and dispersal, insular speciation, and human migration and colonisation. A sound understanding of BIOSCI 395 or equivalent is assumed.

BIOSCI 733  15 Points

**Molecular Evolution and Conservation Genomics**
Using the molecular archive to address ecological and evolutionary questions. Provides a broad theoretical and practical basis for undertaking studies in fields ranging from conservation genetics/genomics and connectivity, and biosecurity and forensics, to phylogenetics and molecular evolution. Topics may include the neutral theory of molecular evolution, molecular identification of species, gene flow, selection at the molecular level, and inbreeding depression.

BIOSCI 734  15 Points

**Terrestrial Plant Ecology**
Plants form the autotrophic basis of terrestrial food chains and their distribution, diversity and abundance is a critical determinant of ecosystem functioning. Topics covered include both plant population ecology - including population growth and structure, seed and seedling dynamics, and life history strategies - and community ecology - including vegetation structure, dynamics, and species interactions. Methods to survey, analyse, and model plant populations and communities will also be discussed.

BIOSCI 735  15 Points

**Advanced Behavioural Ecology**
Focuses on organisms interacting in natural environments. Both the mechanistic underpinnings of behaviour and the fitness consequences of such behavioural traits will be examined. Behavioural ecology is not limited to questions of behaviour, but draws in issues of energetics and physiology as these factors are often used as proxies for fitness traits such as differences in survival and reproduction. A sound understanding of BIOSCI 337 or equivalent is assumed.

BIOSCI 736  15 Points

**Microbial Genomics and Metabolism**
Cross-disciplinary issues involved in the understanding of microbial genome structure, gene regulation and metabolism. Includes: the genetic basis of microbial interactions and horizontal gene transfer, the effect of stress and mutation on microbial and viral evolution and modern approaches used to link gene sequence to biological function and phenotypes.

BIOSCI 737  15 Points

**High Resolution Imaging of Biological Molecules**
X-ray crystallography and electron microscopy are two of the principal techniques used by biologists to determine molecular structure. The theory and practice of X-ray crystallography and electron microscopy, including a laboratory component where 3D structure are determined by crystallography and electron microscopy, including a critical determinant of ecosystem functioning. Topics covered include both plant population ecology - including population growth and structure, seed and seedling dynamics, and life history strategies - and community ecology - including vegetation structure, dynamics, and species interactions. Methods to survey, analyse, and model plant populations and communities will also be discussed.
Advanced Biological Data Analysis  
15 Points

Building on a strong foundation in quantitative biology, fundamental statistical methods and basic R programming, students will learn an array of advanced biostatistical methods for data analysis. Topics covered include: data wrangling, methods for the analysis of designed experiments, regression analysis, including mixed effect models, and the analysis of multivariate data, including advanced supervised and unsupervised learning techniques. Requires students to apply their knowledge across a myriad of complex biological datasets.

Dialogues in Biology  
15 Points

Social, ethical and other philosophical issues in the life sciences will be debated and explored. Topics may include: animal and environmental ethics, conservation and biodiversity, the history and philosophy of science, ethical and commercial issues underpinning science, scientific publishing and advocacy, medical and agricultural biotechnology.

Applied Microbiology and Biotechnology  
15 Points

Explores recent advances in microbial biotechnology across the environmental, industrial and medical sectors, highlighting the diversity and complexity of applications. Features of experimental design and data analysis will be discussed. A sound understanding of BIOSCI 348 or equivalent is assumed.

The Molecular Machinery of The Cell  
15 Points

The experimental investigation and modelling of protein behaviour at the molecular level, in order to explain cellular biology and facilitate protein engineering. Topics addressed may include binding, transport, catalysis, chemical modification, and dynamics. A sound understanding of BIOSCI 350 or equivalent is assumed.

Biosecurity and Invasion Biology  
15 Points

The science of invasion biology, including stages of the invasion process and ecological interactions between species. The impacts of invasive alien species in different ecosystems. Population and community ecology, in relation to biosecurity.

Weed and Pest Management  
15 Points

Techniques for the management of invasive plants and animals (vertebrates and invertebrates) in different ecosystem types, including terrestrial and aquatic ecosystems. Approaches to the prevention, control and eradication of invasive species in different situations.

Microbiomes  
15 Points

The roles of microbial communities (microbiomes) and current research methods to study these are considered in different contexts including the environment (natural and biotechnological systems) and the human microbiome. A sound understanding of BIOSCI 347 or equivalent is assumed.

Plant-microbial Interactions  
15 Points

Addresses selected topics in plant microbial interactions. Modern research on issues relating to plant pathogens and biosecurity, plant disease spread (epidemiology) and plant-microbial interactions (both pathogenic and mutualistic) will be investigated and discussed. A basic understanding of microbiology and molecular biology is assumed.

Plant Genomics and Biotechnology  
15 Points

Plant Genomics and Gene Transfer Technologies could be used to achieve improved plant growth and to develop food with new traits. Includes: plant genomics methods, engineering fruit colour, control of fruit ripening and texture, biotechnology project design. A sound understanding of BIOSCI 354 or 340 or 326 or equivalent is assumed.

Synthesis of Plant Products and Foods  
15 Points

Includes the biosynthesis of: selected plant cell-wall components important in dietary fibre or biomass for the production of biofuels, including lignins, cellulose or non-cellulosic polysaccharides; antioxidant pigments in food plants and their possible impacts on human health. The manipulation of nitrogen assimilation in plants to increase the yield and quality of agricultural and horticultural plant products. A sound understanding of BIOSCI 340 or equivalent is assumed.

Plant Genomes and Gene Expression  
15 Points

The analysis of plant genomes and regulation of gene expression in plant biology. Includes: inferences from whole plant genome sequences, genetic control of nitrogen fixation, uptake and use, flowering time, hormone signalling pathways, sugar metabolism and its regulation. A sound understanding of BIOSCI 354 or 340 or 326 or equivalent is assumed.

Genomics and Gene Expression  
15 Points

The analysis of genomes and gene expression as a means of understanding biological processes. Aspects of functional and chemical genomics will be presented, as well as gene expression profiling using microarray technology. In terms of the latter, features of experimental design and data analysis will be discussed in the context of disease and developmental processes. A sound understanding of BIOSCI 351 or equivalent is assumed.

Molecular Form, Function and Design  
15 Points

Biological systems highlight a complex interplay of thousands of molecules. Reviews fundamental studies focusing on molecular structure and function (structural biology), and designer molecules with applications in nanotechnology and biomedicine. Topics may include: enzyme evolution and engineering, protein design and assembly, rational drug and vaccine discovery, and protein structure and dynamics.

Development, Differentiation and Disease  
15 Points

A critical analysis of normal and perturbed gene expression in selected model organisms as a means of understanding biological pathways and disease processes. Includes the development and use of transgenic organisms as models for human disease. A sound understanding of BIOSCI 356 or equivalent is assumed.

Cell and Molecular Biomedicine  
15 Points

Explores recent advances in cell biology that have led to a greater understanding of a variety of cellular processes at the molecular level. Emphasis will be placed on biochemical
and genetic approaches to understand disease mechanisms at the cellular level. A sound understanding of either BIOSCI 349 or 353 or MEDSCI 314 or equivalent is assumed.

BIOSCI 760 15 Points
**Bio-systematics**
Exploration of key concepts and processes that form the professional discipline of bio-systematics. Introduction and familiarisation with advanced concepts in bio-systematics, and knowledge of methods to manage bio-systematics collections, to develop accessible biodiversity databases, and to study and characterise biodiversity. Previous experience with basic taxonomic principles and the systematics of a taxonomic group is desirable.

BIOSCI 761 15 Points
**Thesis Proposal - Level 9**
Students will complete an advanced literature review to produce a research output that applies their knowledge to a novel context or application. Students will develop skills to synthesise and communicate their research output including the significance, potential limitations and context within the wider discipline to an academic audience using both written and verbal platforms.

BIOSCI 762 15 Points
**BSc(Hons) Dissertation Proposal - Level 9**
A review of the literature associated with the dissertation topic and an outline of the proposed research and its significance. Students will also be required to present an overview of the proposal in a seminar.

BIOSCI 763 15 Points
**Professional Applications of Ecology**
Exploration of key concepts that form the professional discipline of ecology. Introduction and familiarisation with relevant policy, advanced ecological community and population survey and monitoring, use of Geographic Information Science (GIS) and remote sensing, accessing bio-systematics resources, data management, effective engagement with mana whenua, and effective communication skills. Some previous knowledge of ecology is desirable.

BIOSCI 764 15 Points
**Human Virology**
The COVID-19 pandemic was a global health crisis without parallel in the modern era and has evoked an unprecedented scientific response. Explores aspects of virus biology to illustrate principles of emergence, transmission and disease caused by viruses with pandemic potential and discusses how emerging pandemics can reshape our ability to respond to future viral threats with pandemic potential.

BIOSCI 765 15 Points
**Translating Biomedical Science into Therapeutic Strategies**
Explores the research involved in development of currently available and potential future cell based biomedical therapeutics. The challenges and wider societal issues which need to be considered when conducting this research will be discussed. Emphasis will also be placed on guiding students as they develop their critical evaluation and communication skills.

BIOSCI 766 15 Points
**Global Change Ecology**
Discusses the profound impacts global change processes have on ecological systems, including climate change,

land use change, biodiversity loss and changes in biogeochemical cycles. Covers the complex concepts of global change and approaches for planning and mitigation. Some previous knowledge of ecology is desirable.

BIOSCI 788 45 Points
BIOSCI 788A 22.5 Points
BIOSCI 788B 22.5 Points
**BSc(Hons) Dissertation in Biological Sciences - Level 9**

BIOSCI 796A 60 Points
BIOSCI 796B 60 Points
**MSc Thesis in Biological Sciences - Level 9**
To complete this course students must enrol in BIOSCI 796 A and B

**Biomedical Science**

**Stage III**

BIOMED 399 15 Points
**Capstone: Biomedical Science**
Students will synthesise knowledge and reflect on learning experiences attained during their studies in Biomedical Science. Students will engage in debate on contemporary issues and use their scientific reasoning to counter misunderstandings and misrepresentation. Students will consider wider societal issues involved in research, such as human and animal ethics, Māori and Pacific health advancement, and public health relevance and economic benefits.

Prerequisite: 30 points from BIOSCI 347-358, MEDSCI 300-320, MEDIMAGE 300, 302

Chemistry

Preparatory Courses

CHEM 91P 15 Points
Preparatory Chemistry 1
Preparatory introduction to elements, compounds, the periodic table, atomic structure, covalent bonding, molecular shape and polarity. Quantitative chemistry, including balancing equations, calculating moles and particles present, calculation of concentration in mol L-1. Energy and thermo-chemistry. Laboratories include practical skills and qualitative analysis, and simple modelling.

Restriction: CHEM 91F

Stage I

CHEM 100 15 Points
Molecules that Changed the World
The impact of chemistry on the modern world will be explored by focusing on the stories of specific molecules, including penicillin, DDT and nylon. Their discovery, the underlying chemical principles that explain their behaviour, their impact on our lives including social and scientific issues that arise from their use, and their likely impact on the future will be investigated. No formal prerequisite, but the course assumes a science background at Year 11 or higher.

CHEM 110 15 Points
Chemistry of the Living World
A foundation for understanding the chemistry of life is laid by exploring the diversity and reactivity of organic compounds. A systematic study of reactivity focuses on the site and mechanism of reaction including application of chemical kinetics. A quantitative study of proton transfer reactions features control of pH of fluids in both living systems and the environment. It is recommended that students with a limited background in chemistry take CHEM 150 prior to CHEM 110.

CHEM 120 15 Points
Chemistry of the Material World
The chemistry of the elements and their compounds is explored. The relationship between molecular structure and reactivity, the role of energy, concepts of bond formation and chemical equilibrium are discussed. Issues such as sustainability, energy and fuels, and the creation of new materials are also discussed. It is recommended that students with a limited background in chemistry take CHEM 150 prior to CHEM 120.

CHEM 150 15 Points
Concepts in Chemistry
The fundamentals of chemistry are explored with a view to enhancing understanding of the chemical nature of the world around us and providing a foundation for further study in chemistry. Special attention is paid to familiarisation with the language of chemistry and the chemist's perspective of the properties of matter and its transformations. It is recommended that students with a limited background in chemistry take this course prior to CHEM 110 or CHEM 120. Restriction: Cannot be taken at the same time as any other chemistry course, or after any successfully completed chemistry course, other than CHEM 100/CHEM 100G

Stage II

CHEM 200 15 Points
Special Topic

CHEM 251 15 Points
Structure and Spectroscopy
To study chemicals it is important to understand the stereochemical and electronic properties of molecules. Molecular orbital techniques and the application of approaches based on molecular symmetry and group theory to the understanding of molecular properties, bonding and spectroscopy will be studied. Application of these concepts to spectroscopic characterisation and quantification of materials by various spectroscopic techniques will be discussed.
Prerequisite: CHEM 120 and 15 points from MATHS 108, 110, 120, 130, PHYSICS 120, 160, STATS 101, 108

Restriction: CHEM 220

CHEM 252 15 Points
Properties and Analysis of Matter
Understanding the physico-chemical properties of matter is crucial for modern chemistry. Fundamental processes to the analysis and understanding of chemical systems, including thermodynamics, equilibria, acid and bases will be covered. Applications of modern spectroscopy, physical chemistry of modern materials and methods for assessing the reliability of results will be described while the laboratory course emphasises the obtaining and understanding of chemical measurements.
Prerequisite: CHEM 110, 120, and 15 points from MATHS 108, 110, 120, 130, PHYSICS 120, 160, STATS 101, 108

Restriction: CHEM 240

CHEM 253 15 Points
Making Molecules: Synthesis and Isolation
Creation of chemicals and compounds is at the heart of synthetic chemistry and is fundamental for the preparation of new materials and medicines. Students will learn organic, organometallic and inorganic synthesis with an emphasis on how and why reactions occur. Students will study separation strategies and characterisation techniques such as NMR spectroscopy to determine reaction outcomes. Provides experience in synthesising, purifying and characterising compounds.
Prerequisite: CHEM 110
Restriction: CHEM 230

CHEM 254 15 Points
CHEM 254A
CHEM 254B
7.5 Points

Modelling Chemical Processes
From quantum mechanics to enzyme active sites, statistical analysis to the greenhouse effect, models are essential to our understanding of chemical phenomena. But what makes a good model? How are they developed and tested? After exploring the concept of models and their relationship to the scientific method, students will investigate several currently accepted models used in the chemical sciences.
Prerequisite: CHEM 110, 120 and 15 points from MATHS 108, 110, 130, 150, PHYSICS 120

To complete this course students must enrol in CHEM 254 A and B, or CHEM 254

Course Prescriptions

**CHEM 260 Introduction to Green Chemistry**

Introduction to the concepts and principles of Green Chemistry. Selected real world applications of Green Chemistry are presented to illustrate how these important guiding principles can be applied. The integral laboratory course provides valuable practical experience in relevant areas of the chemical sciences.

**Prerequisite:** Either CHEM 110 and 120, or at least B- in CHEM 110 or 120

**CHEM 300 Special Topic**

A selection of the most recent developments in contemporary inorganic chemistry will be covered. Topics include selected physical properties of coordination compounds such as multinuclear NMR spectroscopy, UV-vis spectroscopy, magnetism, redox chemistry and photochemistry, the organometallic chemistry and catalytic reactions of transition elements, bioinorganic and medicinal inorganic chemistry, the kinetics and thermodynamics of ligand substitution reactions, main-group organometallic chemistry and main-group polymers. The laboratories provide an important complementary experience in the synthesis and measurement of physical properties for selected inorganic compounds.

**Prerequisite:** CHEM 220 or 251

**CHEM 320 Design and Reactivity of Inorganic Compounds**

A selection of the most recent developments in contemporary inorganic chemistry will be covered. Topics include selected physical properties of coordination compounds such as multinuclear NMR spectroscopy, UV-vis spectroscopy, magnetism, redox chemistry and photochemistry, the organometallic chemistry and catalytic reactions of transition elements, bioinorganic and medicinal inorganic chemistry, the kinetics and thermodynamics of ligand substitution reactions, main-group organometallic chemistry and main-group polymers. The laboratories provide an important complementary experience in the synthesis and measurement of physical properties for selected inorganic compounds.

**Prerequisite:** CHEM 220 or 251

**CHEM 330 Contemporary Organic Chemistry**

Topics in advanced organic chemistry, including the structure and chemistry of surfaces.

**Prerequisite:** CHEM 220 or 251

**CHEM 340 Advanced Analytical Chemistry**

Principles and applications of modern instrumental analytical chemistry. Statistical methods, quality control and assurance, sampling, instrumentation, chromatographic and other separation methods, spectrophotometric methods, electro-analytical methods.

**Prerequisite:** CHEM 340

**CHEM 350 Chemicals Big and Small: Nano-material to Biomacromolecules**

Chemical materials are found with a broad range of shapes, sizes and physical properties. Students will study the synthesis of chemical materials; including polymeric materials using radical chemistry, inorganic materials and proteins and peptides using synthetic and biological chemical approaches. Methods to characterise materials will be investigated, including a range of physical and computational techniques giving insight into molecular interactions.

**Prerequisite:** 30 points from CHEM 251, 252, 253

**CHEM 360 Contemporary Green Chemistry**

Covers topics central to contemporary Green Chemistry such as sustainable syntheses, energy production, catalysis, pollution control, and basic toxicology. The integral laboratory course provides valuable practical experience in relevant areas of the chemical sciences.

**Prerequisite:** CHEM 260

**CHEM 380 Materials Chemistry**

Synthesis, properties characterisation and applications of advanced materials. Includes a review of current trends in materials research. Important aspects of solid inorganic materials and organic polymers are covered.

**Prerequisite:** 15 points from CHEM 210, 220, 251, CHEMMAT 121

**CHEM 390 Medicinal Chemistry**

**Prerequisite:** CHEM 110 and a minimum of 165 points passed

**CHEM 392 Issues in Drug Design and Development**

Intellectual property and patent law in the pharmaceutical industry. An overview of the legal and regulatory framework for drug design and development. Clinical trials: formulation of a drug; phase I, phase II and phase III
protocols. An introduction to the principles involved in the Codes of Good Manufacturing Practice and Good Laboratory Practice (quality control and quality assurance procedures) as applied to the manufacture of drug products and the quantification of drugs and metabolites in biological fluids. Examples of drug development. Case studies of selected drugs from design to release.

Prerequisite: CHEM 110 and a further 150 points passed

CHEM 397 15 Points
**Capstone: Green Chemical Science**
Explores green chemical processes, principles, applications and development. Students will examine the ethical, social and commercial implications of green chemical processes.

Prerequisite: 30 points from CHEM 351, 360, ENVSCI 301

CHEM 398 15 Points
**Capstone: Medicinal Chemistry**
Integrates and applies the foundations of medicinal chemistry to popular science-related themes, working individually and in groups and producing written and oral reports. Comprises an open-ended drug discovery research project that will require students to work in groups and individually.

Prerequisite: CHEM 390 and 15 points from CHEM 310, 320, 330, 340, 351, 360, 380, 392

CHEM 399 15 Points
**Capstone: Chemistry**
Using a combination of skills learnt throughout their major, students will investigate key chemistry-related phenomena, working individually and in groups, producing both written and oral reports. Along with the chemistry behind the phenomena, the social, environmental, economic and ethical considerations will be explored.

Prerequisite: 30 points from CHEM 251, 252, 253, 260 and 255 points passed

**Diploma Courses**

CHEM 690A 15 Points
CHEM 690B 15 Points
**Graduate Diploma Research Project**
To complete this course students must enrol in CHEM 690 A and B

CHEM 691 30 Points
CHEM 691A 15 Points
CHEM 691B 15 Points
**Postgraduate Diploma Research Project**
Restriction: CHEM 790
To complete this course students must enrol in CHEM 691 A and B, or CHEM 691

**Postgraduate 700 Level Courses**

CHEM 701 15 Points
**Directed Study**
A directed reading and individual study course to prepare students in the methodologies in a selected sub-discipline of chemistry.

CHEM 702 15 Points
**Directed Study**
A directed reading and individual study course to prepare students in the methodologies in a selected sub-discipline of chemistry.

CHEM 710 15 Points
**Advanced Physical Chemistry**
Covers modern areas of research in physical chemistry and may include solid-state nuclear magnetic resonance spectroscopy (NMR), X-ray spectroscopic techniques commonly used in materials science (including synchrotron-based X-ray absorption, emission and scattering techniques), and computational chemistry with applications in heterogeneous catalysis.

CHEM 712 15 Points
**Nanomaterials and Nanotechnology**
Introduces a range of modern methods used in the synthesis and characterisation of nanomaterials (including metal nanoparticles, polymers, ceramics and their nanocomposites), with the application of these nanomaterials in energy conversion, optical devices and biosensing also being explored. Potential risks of nanomaterials in the environment will be discussed.

CHEM 720 15 Points
**Advanced Inorganic Chemistry**
Covers modern areas of research in inorganic chemistry, and may include main-group catalysis, medicinal inorganic chemistry, supramolecular chemistry and/or inorganic cluster compounds.

CHEM 730 15 Points
**Modern Methods for the Synthesis of Bioactive Molecules**
The use of modern methods for the construction of complex molecules with an emphasis on carbon-carbon bond formation and control of stereoisomerism. Principles and practice of synthesis design based on retrosynthetic analysis. Each student will present and discuss a recent synthesis of a complex bioactive organic compound. No formal prerequisite, but knowledge of organic chemistry at the level covered in CHEM 330 will be assumed.

CHEM 735 15 Points
**Advanced Medicinal Chemistry**
A selection of topics dealing with aspects of medicinal chemistry, including anticancer agents, metals in medicine, antibacterial and antiviral chemotherapy, contemporary topics in medicinal and/or bio-organic chemistry.

CHEM 738 15 Points
**Biomolecular Chemistry**
Discusses how techniques including NMR spectroscopy, calorimetry, neutron scattering and computational modelling, can characterise the molecular structure, dynamics, and interactions of biological macromolecules. The principles of each technique will be presented and complemented with examples of where these methods have made major advances in understanding important biochemical processes. Accessible to students with a background in chemistry, biology, bioengineering, or physics.

CHEM 740 15 Points
**Current Topics in Analytical Chemistry**
Principles and applications of modern analytical chemistry. Emphasis will be on the solution of problems met by analytical chemists, including a study of the development of instrumentation, and a study of current trends in analytical research. No formal prerequisite, but knowledge of analytical chemistry at the level covered in CHEM 340 will be assumed.

CHEM 741 15 Points
**Chemometrics and Quality Assurance in Chemistry**
Explores a range of different chemometric processes including statistical analysis techniques, and methods and strategies for experimental design. Concepts related to method validation for analysis will be covered, as well as
quality management of chemistry experimental data and principles of Good Laboratory Practice (GLP).

**CHEM 750** 15 Points
**CHEM 750A** 7.5 Points
**CHEM 750B** 7.5 Points

**Advanced Topics in Chemistry 1**
To complete this course students must enrol in CHEM 750 A and B, or CHEM 750

**CHEM 751** 15 Points
**CHEM 751A** 7.5 Points
**CHEM 751B** 7.5 Points

**Advanced Topics in Chemistry 2**
A modular course comprising topics in physical, inorganic, organic and analytical chemistry related to departmental research interests, which will vary from year to year. Students satisfactorily completing three modules will be awarded CHEM 750. Students satisfactorily completing an additional three modules will be awarded CHEM 751.

**CHEM 760** 15 Points

**Advanced Green Chemistry**
Examines topics that are of key global significance to sustainability such as human activities that exceed the planetary boundaries, global warming, ocean acidification, endocrine disrupting compounds, global population, imbalance of the phosphorus and nitrogen cycles, and extinction of species. No formal prerequisite, but knowledge of green chemistry at the level covered in CHEM 360 will be assumed.

**CHEM 770** 15 Points

**Advanced Environmental Chemistry**
Selected current research topics in environmental chemistry. Topics change from year to year, but may include: chemical impacts of geothermal energy development or mining on the environment, trace metal fingerprinting, naturally occurring metal-adsorbents such as iron oxides, the behaviour of persistent organic contaminants, the chemistry of drinking water treatment and the chemical theory behind the design of environmental monitoring instruments. Includes a half-day field trip.

**CHEM 780** 15 Points

**Advanced Materials Chemistry**
A selection of topics on the chemistry of advanced materials, including novel polymeric materials and materials characterisation and analysis. No formal prerequisite, but knowledge of materials chemistry at the level covered in CHEM 380 will be assumed.

**CHEM 794** 60 Points
**CHEM 794A** 30 Points
**CHEM 794B** 30 Points

**Dissertation - Level 9**
Corequisite: CHEM 795
To complete this course students must enrol in CHEM 794 A and B, or CHEM 794

**CHEM 795** 15 Points

**Research Methods in Chemistry - Level 9**
Supervised research planning on a topic in chemical sciences culminating in an independent written research proposal to develop advanced knowledge and understanding of the nature, purpose and application of a range of research methods in chemical sciences. A research seminar will demonstrate critical awareness of the role of research and knowledge in a specialised field of chemical sciences.

**CHEM 796A** 60 Points
**CHEM 796B** 60 Points

**MSc Thesis in Chemistry - Level 9**
To complete this course students must enrol in CHEM 796 A and B

**Computer Science**

**Stage I**

**COMPSCI 101** 15 Points

**Principles of Programming**
A practical introduction to computers and computer programming in a high-level language. The course is lab-based and focuses on reading and writing computer programs. The course is intended for students who may wish to advance in Computer Science or in Information Systems and Operations Management.

**Restriction: Cannot be taken with or after COMPSCI 105, 107, 130, 210-220, 230-289, 313-399**

**COMPSCI 110** 15 Points

**Introduction to Computer Systems**
An introduction to the various layers that make up a modern computer system: encoding of data and instructions, hardware, low-level programming, operating systems, applications and communications.

**Restriction: Cannot be taken with or after COMPSCI 210**

**COMPSCI 111** 15 Points
**COMPSCI 111G** 15 Points

**An Introduction to Practical Computing**
A practical introduction to computing. Topics include: web design, an overview of computer hardware and operating systems, effective use of common applications, using the internet as a communication medium, applying programming concepts, and social implications of technology.

**Restriction: Cannot be taken with or after COMPSCI 210, 220, 230**

**COMPSCI 120** 15 Points

**Mathematics for Computer Science**
Basic mathematical tools and methods needed for computer science are introduced. Elementary mathematical skills for defining, analysing and reasoning with abstract objects used in programming are developed. Topics include integers and rational numbers, strings and sets, methods of proof (including induction), algorithms and functions,
and elementary introductions to graphs, trees, counting and probability.
Prerequisite: MATHS 102 or at least 13 credits in Mathematics at NCEA Level 3 or D in CIE A2 Mathematics or C in CIE AS Mathematics or 3 out of 7 in IB Mathematics
Restriction: Cannot be taken with, or after, COMPSCI 225, MATHS 254

COMPSCI 130
Introduction to Software Fundamentals
Fundamental programming techniques and processes, such as conditionals, iteration, recursion, functions, testing and debugging. Efficient ways to organise and manipulate data, including sorting and searching algorithms. Writing software that uses and implements common abstract data types such as lists, stacks, queues, dictionaries and trees.
Prerequisite: COMPSCI 101, or B+ or higher in ENGGEN 131, or Achievement Standard NCEA Level 3 Digital Technologies and Programming: 91906 Use complex programming techniques to develop a computer program, or 91637 Develop a complex computer program for a specified task
Restriction: COMPSCI 105, 107

Stage II

COMPSCI 210
Computer Organisation
The low level representation of data and algorithms in the computer. An introduction to computer organisation. The instruction execution model. Assembly and disassembly of instructions. Assembly language programming. How a high-level language is implemented at the machine level. The memory subsystem. Hardware support necessary to implement a secure multi-user operating system.
Prerequisite: COMPSCI 110, 130

COMPSCI 215
Data Communications and Security
An introduction to data communications: the OSI reference model, particularly how the lower layers combine to implement the application layer. An introduction to secure communications and computer systems.
Prerequisite: COMPSCI 110, 130, PHYSICS 140

COMPSCI 220
Algorithms and Data Structures
Prerequisite: COMPSCI 120, 130
Restriction: COMPSCI 717, SOFTENG 284

COMPSCI 225
Discrete Structures in Mathematics and Computer Science
An introduction to the foundations of computer science, mathematics and logic. Topics include logic, principles of counting, mathematical induction, recursion, sets and functions, graphs, codes, and finite automata.
Prerequisite: COMPSCI 120 or MATHS 120
Restriction: MATHS 254, SOFTENG 282

COMPSCI 230
Object Oriented Software Development
The design and implementation of object-oriented programmes. Analysis and design. Modelling with UML.
Prerequisite: COMPSCI 220, and COMPSCI 225 or MATHS 254

Design for reuse, for testing, and for ease of change. Programming with classes, objects and polymorphism.
Prerequisite: COMPSCI 130
Restriction: SOFTENG 281

COMPSCI 235
Software Development Methodologies
An introduction to software development, including processes, best practices, tools and quality assurance techniques such as testing.
Prerequisite: COMPSCI 130
Restriction: COMPSCI 280

COMPSCI 289
Research Seminar in Computer Science
An introduction to research topics in computer science. Students will be expected to prepare and deliver a review of research in a topic of their choice. Research articles will be provided during the course, and will consist of key scientific publications.
Prerequisite: Minimum GPA of 5.0 and COMPSCI 110, 120, 130

COMPSCI 290
Special Topic

Stage III

COMPSCI 313
Computer Architecture
Modern processor architectures. Principles of modern processor design; pipelining; memory hierarchies; I/O and network interfacing; compiler and OS support; embedded processors; performance; multiprocessing.
Prerequisite: COMPSCI 210, PHYSICS 140
Restriction: SOFTENG 363, COMPSYS 304

COMPSCI 315
Data Communications Technologies
The structure of data communications and networks, including the internet, covering all levels of the communications architecture. The layered protocol model, data transmission and coding, link-level and local area network protocols, wide-area internet working, routing, transport and security protocols. Basic application protocols as the foundation for distributed computing.
Prerequisite: COMPSCI 210, 215
Restriction: COMPSCI 314

COMPSCI 316
Cyber Security
Introduces various concepts related to software, system and network security. Covers a range of topics including attacks on privacy and attack surface, static and dynamic analysis of malware, hardware security (trusted computing base, secure boot, and attestation), network security and some hot topics in cryptography including elliptic curve, blockchain and bitcoin.
Prerequisite: COMPSCI 210, 215 or COMP SYS 201

COMPSCI 320
Applied Algorithmics
Fundamental design techniques used for efficient algorithmic problem-solving and software development. Methods that yield algorithms that are both provably correct and efficient. Efficiency of algorithms to provide a basis for deciding which algorithm is best for the job. Limits on the power of computers and the theory of NP-completeness. An introduction to methods whose correctness or performance is not guaranteed.
Prerequisite: COMPSCI 220, and COMPSCI 225 or MATHS 254
COMPSCI 251
Large-Scale Software Development
15 Points
Students will understand how to develop large-scale software systems, and learn about the issues associated with large-scale software systems and techniques for addressing them.
Prerequisite: COMPSCI 230, 235
Restriction: SOFTENG 225

COMPSCI 335
Web Programming and Distributed Services
15 Points
Covers web programming concepts, with applications to data integration from heterogeneous and asynchronous collections. Building web and cloud clients and services, with emphasis on high-level declarative and functional techniques. Dynamic web applications. Security and performance as overarching factors of web application development.
Prerequisite: COMPSCI 230 and 15 points at Stage II in Computer Science, or SOFTENG 281

COMPSCI 340
Operating Systems
15 Points
Prerequisite: COMPSCI 210, 230
Restriction: SOFTENG 230

COMPSCI 345
Human-computer interaction
15 Points
Human behaviour and humans' expectations of computers. Computer interfaces and the interaction between humans and computers. The significance of the user interface, interface design and user centred design process in software development. Interface usability evaluation methodologies and practice. Includes a group development and evaluation project using current implementation techniques and tools.
Prerequisite: COMPSCI 230 or SOFTENG 206
Restriction: SOFTENG 230

COMPSCI 350
Mathematical Foundations of Computer Science
15 Points
The aim of this course is to present mathematical models for programming languages and computation, and derive some theorems regarding what can and cannot be computed. Abstract programming languages (finite automata, context-free grammars, Turing and register machines) are studied. Basic concepts for programming languages, limits on computational power and algorithmic complexity are presented. Church-Turing thesis and quantum computing are briefly and critically discussed.
Prerequisite: COMPSCI 220 or PHIL 222, and COMPSCI 225 or MATHS 254

COMPSCI 351
Fundamentals of Database Systems
15 Points
Database principles. Relational model, Relational Algebra, Relational Calculus, SQL, SQL and Programming Languages, Entity Relationship Model, Normalisation, Query Processing and Query Optimisation, ACID Transactions, Transaction Isolation Levels, Database Recovery, Database Security, Databases and XML.
Prerequisite: COMPSCI 220, and COMPSCI 225 or MATHS 254
Restriction: COMPSCI 251, SOFTENG 235

COMPSCI 361
Machine Learning
15 Points
Machine learning is a branch of artificial intelligence concerned with making accurate, interpretable, computationally efficient, and robust inferences from data to solve a given problem. Understand the foundations of machine learning, and introduce practical skills to solve different problems.
Prerequisite: COMPSCI 220, and 15 points from DATASCI 100, STATS 101, 108, and 15 points from COMPSCI 225, MATHS 254, 255
Restriction: COMPSCI 761

COMPSCI 366
Computational Methods in Interdisciplinary Science
15 Points
Many sciences use computational methods that involve the development and application of computer algorithms and software to answer scientific questions. This course looks at how to tackle these interdisciplinary problems through methods like probabilistic computer modelling, computer-based statistical inference, and computer simulations. The material is largely motivated by the life sciences but also uses examples from other sciences. It focuses on modelling and analysing real-world data with an emphasis on analysing DNA sequence data. No background in physical or life sciences is assumed.
Prerequisite: COMPSCI 220, and COMPSCI 225 or MATHS 254

COMPSCI 377
Computer Graphics and Image Processing
15 Points
Basic geometric processes including transformations; viewing and projection; back projection and ray tracing. Graphics modelling concepts: primitives, surfaces, and scene graphs, lighting and shading, texture mapping, and curve and surface design. Graphics and image processing fundamentals: image definition and representation, perception and colour models, grey level and colour enhancement, neighbourhood operations and filtering. Use of the OpenGL graphics pipeline.
Prerequisite: COMPSCI 210, 230, or COMPSCI 200 and SOFTENG 281
Restriction: COMPSCI 771

COMPSCI 380
Project in Computer Science
15 Points
Each student taking one of these courses will be expected to do an individual practical project under the supervision of a member of staff. Only students with excellent academic records will be allowed to take these courses, and only
after a supervisor and topic have been agreed upon by the Head of Department.
Prerequisite: Approval of Academic Head or nominee
Restriction: COMPSCI 690
To complete this course students must enrol in COMPSCI 380 A and B, or COMPSCI 390

COMPSCI 389
Research Methods in Computer Science
An overview of research methods and techniques used across the discipline of Computer Science, including formal proof techniques and empirical methods that involve quantitative and/or qualitative data. Students will be expected to apply the research methods in a collaborative research project.

Creating Maintainable Software
Developing maintainable software has been an ongoing challenge in the software industry. This course presents the principles and practices that have been proposed for developing maintainable software systems. It will evaluate and critique these principles and practices through examining their application in practice and through understanding the research on their effectiveness.
Recommended preparation: COMPSCI 331 or 718

COMPSCI 702

Generalising Artificial Intelligence
AI deep learning has significantly advanced image understanding, language modelling, speech recognition, game playing, and more. These developments enable near-human capabilities in text and image generation. Explores highly specialised knowledge in planning, reasoning, explanation, natural language understanding, and knowledge acquisition, and assess their contribution to highly competent, general AI systems. Includes a significant individual research project.

Computer architectures and languages for exploring parallelism, conceptual models of parallelism, principles for programming in a parallel environment, different models to achieve interprocess communication, concurrency control, distributed algorithms and fault tolerance.
Prerequisite: COMPSCI 320 or 335

COMPSCI 711
15 Points
AI Agency, Ethics and Society
Introduces students to a range of philosophical and normative topics relating to artificial intelligence. Examines key ideas of intelligence, privacy, consent, and discusses other ethical issues that arise in the development and use of AI. The importance of Māori rights and interests in AI and data are explored. Possible approaches to addressing these various concerns are considered.

practice. Recommended preparation: 30 points at Stage III in Computer Science or COMPSCI 718

COMPSCI 750 15 Points
Computational Complexity
Definitions of computational models and complexity classes: time complexity (e.g., P and NP), space complexity (e.g., L and PSPACE), circuit and parallel complexity (NC), polynomial-time hierarchy (PH), interactive complexity (IP), probabilistic complexity (BPP), and fixed-parameter complexity. Recommended preparation: COMPSCI 320 or 350

COMPSCI 751 15 Points
Advanced Topics in Database Systems
Database principles. Relational model, relational algebra, relational calculus, SQL and programming languages, entity-relationship model, normalisation, query processing and query optimisation, ACID transactions, transaction isolation levels, database recovery, database security, databases and XML. Research frontiers in database systems. Recommended preparation: COMPSCI 220, 225 or COMPSCI 718
Restriction: COMPSCI 351, SOFTENG 351

COMPSCI 752 15 Points
Big Data Management
The deep diversity of modern-day data from many companies requires data scientists to master many technologies that rely on new principles to represent, describe, access, and analyse data. The course will provide insight into the rich landscape of big data modelling, management, and analysis in distributed and heterogeneous environments. Recommended preparation: COMPSCI 220, 351

COMPSCI 753 15 Points
Algorithms for Massive Data
Modern enterprises and applications such as electronic commerce, social networks, location services, and scientific databases are generating data on a massive scale. Analysis of such data must be carried out by scalable algorithms. This course exposes data science practitioners and researchers to various advanced algorithms for processing and mining massive data, and explores best-practices and state-of-the-art developments in big data. Recommended preparation: COMPSCI 320

COMPSCI 760 15 Points
Advanced Topics in Machine Learning
An overview of the learning problem and the view of learning by search. Covers advanced techniques for learning such as: decision tree learning, rule learning, exhaustive learning, Bayesian learning, genetic algorithms, reinforcement learning, neural networks, explanation-based learning and inductive logic programming. Advanced experimental methods necessary for understanding machine learning research.
Prerequisite: COMPSCI 361 or 762

COMPSCI 761 15 Points
Advanced Topics in Artificial intelligence
Examines the cornerstones of AI: representation, utilisation, and acquisition of knowledge. Taking a real-world problem and representing it in a computer so that the computer can do inference. Utilising this knowledge and acquiring new knowledge is done by search which is the main technique behind planning and machine learning. Research frontiers in artificial intelligence.
Prerequisite: COMPSCI 220 and 225, or COMPSCI 220 and MATHS 254, or COMPSCI 713 and 714, or COMPSCI 718
Restriction: COMPSCI 367

COMPSCI 762 15 Points
Foundations of Machine Learning
Machine learning is a branch of artificial intelligence concerned with making accurate, interpretable, computationally efficient, and robust inferences from data to solve a given problem. Students will be introduced to the foundations of machine learning and will gain practical skills to solve different problems. Students will explore research frontiers in machine learning.
Prerequisite: COMPSCI 713 and 714, or COMPSCI 718, or 15 points from DATASCI 100, STATS 101, 108 and COMPSCI 220 or 717 and COMPSCI 225 or MATHS 254
Restriction: COMPSCI 361

COMPSCI 764 15 Points
Deep Learning - Level 9
Critically analyses the fundamentals of deep neural networks alongside current state-of-the-art advancements in this field. Students will acquire specialised knowledge in state-of-the-art deep learning architectures and gain the ability to apply deep learning in various fields, including natural language processing and computer vision. Includes a significant individual research project.
Prerequisite: COMPSCI 361 or 762, or COMPSCI 713 and 714

COMPSCI 765 15 Points
Modelling Minds
How can researchers of artificial intelligence effectively model subjective aspects of minds, such as emotional states, desires, perceptual experience and intrinsic goals? This course draws upon interdisciplinary methods and considers classic and emerging approaches to try to answer this question. Recommended preparation: COMPSCI 367

COMPSCI 766 15 Points
Intelligent Software Agents
An introduction to the design, implementation and use of intelligent software agents (e.g., knowbots, softbots etc). Reviews standard artificial intelligence problem-solving paradigms (e.g., planning and expert systems) and knowledge representation formalisms (e.g., logic and semantic nets). Surveys agent architectures and multi-agent frameworks.
Prerequisite: COMPSCI 367 or 761, or COMPSCI 713 and 714

COMPSCI 769 15 Points
Natural Language Processing - Level 9
Examines the progress in enabling AI systems to use natural language for communication and knowledge storage. Explores knowledge formalisation, storage, multiple solving paradigms (e.g., planning and expert systems) and knowledge representation formalisms (e.g., logic and semantic nets). Surveys agent architectures and multi-agent frameworks.
Prerequisite: COMPSCI 718, or 15 points from DATASCI 100, MATHS 253, 254 and 258
Restriction: COMPSCI 718

COMPSCI 771 15 Points
Advanced Topics in Computer Graphics and Image Processing
Basic geometric processes including transformations; viewing and projection; back projection and ray tracing. Graphics modelling concepts: primitives, surfaces, and scene graphs, lighting and shading, texture mapping, and curve and surface design. Graphics and image processing fundamentals: image definition and representation, perception and colour models, grey level and colour enhancement, neighbourhood operations and filtering.
Use of the OpenGL graphics pipeline. Research frontiers in computer graphics and image processing. Recommended preparation: COMPSCI 210, 230

**COMPSCI 773**

**Intelligent Vision Systems**

Computation methods and techniques for computer vision are applied to real-world problems such as 2/3D face biometrics, autonomous navigation, and vision-guided robotics based on 3D scene description. A particular feature of the course work is the emphasis on complete system design. Recommended preparation: COMPSCI 373 and 15 points at Stage II in Mathematics

**COMPSCI 775**

**Advanced Multimedia Imaging**

Camera calibration, image sequence analysis, computer vision, 3D visualisation, ground truth for image sequence analysis, performance evaluation (noise, accuracy). Applications in vision-based driver assistance, panoramic or 3D visualisation using recorded images, or image and video retrieval. Recommended preparation: COMPSCI 373 and MATHS 208 or 250

**COMPSCI 777**

**Computer Games Technology**

An advanced course looking at some of the computer graphics and artificial intelligence technology involved in computer games. Typical topics are: an introduction to the gaming industry; commercial modelling and animation software; maximising graphics performance, including such techniques as visibility preprocessing, multiple levels of detail, space subdivision, fast collision detection, direct programming of the graphics card; AI for computer games, including decision trees, rule-based systems, path planning, flocking behaviours, intelligent agents; research issues, such as physically-based modelling, terrain generation, computer learning. Recommended preparation: COMPSCI 367, 373

**COMPSCI 778**

**Internship - Level 9**

Enables the development of practical knowledge and hands-on experience through a supervised internship in the IT industry. Students complete a research-informed project, and present both written and oral reports of their findings.

**COMPSCI 779**

**Computational Mathematics**

Enables students to gain workplace experience, the development of practical knowledge, and hands-on experience on research-informed AI projects through a supervised internship with an external organisation. At the end of the internship, students are expected to present both written and oral reports of their findings.

**COMPSCI 780**

**Postgraduate Project in Computer Science I**

Prerequisite: Approval of Academic Head or nominee

**Restriction:** COMPSCI 691

To complete this course students must enrol in COMPSCI 780 A and B, or COMPSCI 780

**COMPSCI 789A**

**Honours Research Project - Level 9**

Prerequisite: Approval of Academic Head or nominee

To complete this course students must enrol in COMPSCI 789 A and B

**COMPSCI 791**

**Research Project - Level 9**

Prerequisite: Academic Head or nominee approval

To complete this course students must enrol in COMPSCI 791 A and B, or COMPSCI 791

**COMPSCI 792**

**Research Project - Level 9**

Prerequisite: Academic Head or nominee approval

To complete this course students must enrol in COMPSCI 792 A and B, or COMPSCI 792

**COMPSCI 796A**

**MSC Thesis in Computer Science - Level 9**

To complete this course students must enrol in COMPSCI 796 A and B

**Data Science**

**Stage I**

**DATASCI 100**

**Data Science for Everyone**

Explores how to use data to make decisions through the use of visualisation, programming/coding, data manipulation, and modelling approaches. Students will develop conceptual understanding of data science through active participation in problems using modern data, hands-on activities, group work and projects. DATASCI 100 will help students to build strong foundations in the science of learning from data and to develop confidence with integrating statistical and computational thinking.

**Stage III**

**DATASCI 399**

**Capstone: Creating Value from Data**

A group-based project in which students showcase their skills in collaboratively creating value from data. Within a given data science domain, teams will jointly develop a research question, apply their skills to gather, structure, and analyse data to address the question, and communicate their findings effectively. The insights, their implications, limitations, and future work will be discussed by the group. Each team member will write an individual report about the project.

Prerequisite: 30 points at Stage III in Data Science

**Postgraduate 700 Level Courses**

**DATASCI 709**

**Data Management**

Data management is the practice of collecting, preparing, organising, storing, and processing data so it can be analysed for business decisions. The course will use R and SQL to illustrate the process of data management. This
will include principles and best practice in data wrangling, visualisation, modelling, querying, and updating.
Prerequisite: COMPSCI 130, MATHS 108, and 15 points from STATS 101, 108, or equivalent
Restriction: COMPSCI 351, 751, STATS 383, 707, 765

DATASCI 792 45 Points
DATASCI 792A 15 Points
DATASCI 792B 30 Points
Dissertation - Level 9

Earth Sciences

Stage I

EARTHSCI 105 15 Points
EARTHSCI 105G 15 Points
Earth's Natural Hazards
New Zealand experiences many natural hazards caused by the Earth's natural processes through earthquakes, volcanic eruptions, weather bombs, storm surge, tsunami, flooding and wildfires. Focuses on spatial and temporal occurrences of disasters, hazard preparedness and recovery, and societal responses that affect and, sometimes, compound the magnitude of disasters. Case studies are drawn from contemporary and ancient societies.

EARTHSCI 120 15 Points
Planet Earth
Examination of geologic processes that have shaped Earth and life through time, and their impact on modern society. Topics include: earthquakes, plate tectonics, volcanic eruptions, tsunamis, landslides, meteorites and planets, mass extinctions and evolution of life. A practical introduction to rocks, minerals and fossils provides insights into Earth's past and important modern resources.
Restriction: EARTHSCI 103

Stage II

EARTHSCI 202 15 Points
Earth History
Explores the evolution of the Earth from its molten beginnings to the dynamic planet we live on today. Topics include: stratigraphy (litho-, bio-, cyclo-, magneto-); evolution; paleoecology; Precambrian Earth (formation, first continents and beginnings of life); development of the Earth and life through the Phanerozoic Eon. Knowledge of geological mapping equivalent to EARTHSCI 201 or 220 will be assumed.
Prerequisite: 75 points, including at least 15 points from EARTHSCI 103, 120

EARTHSCI 203 15 Points
Rock and Minerals
The formation of igneous, metamorphic and sedimentary rocks, the minerals they contain, and how they can be used to interpret major Earth Science processes such as crustal evolution, volcanism, mountain building, deformation, and sedimentation.
Prerequisite: 15 points from EARTHSCI 103, 120

EARTHSCI 205 15 Points
EARTHSCI 205G 15 Points
New Zealand: Half a Billion Years on the Edge
Take a 500 million year journey through time following the geologic and biologic development of New Zealand from humble beginnings on the edge of the ancient supercontinent Gondwana to the present day geologically dynamic land mass beset by volcanic eruptions, earthquakes and massive erosion as a consequence of being located on the edge of the Earth's largest tectonic plate.
Prerequisite: 75 points passed

EARTHSCI 208 15 Points
Earth Structure
A foundation course that introduces students to descriptive and analytical methods in structural geology. Geological maps are used to help students analyse structural features (e.g., folds, faults, contacts). On completion of this course, students should be able to interpret geological maps, construct cross-sections, and synthesise analytical results into a structural history.
Prerequisite: 15 points at Stage I in Earth Sciences
Restriction: EARTHSCI 204

EARTHSCI 209 15 Points
Special Topic

EARTHSCI 220 15 Points
Practice in Earth Sciences I
A practical and field based course that introduces and develops theory and work flows to enable students to read, document and interpret landforms and landscapes in 4-D. Students will be required to participate in a residential field experience and undertake independent field work.
Prerequisite: 15 points from EARTHSCI 201, GEOG 101
Restriction: EARTHSCI 201I, 260

Stage III

EARTHSCI 303 15 Points
Sedimentary Systems
An advanced course that critically examines ancient and contemporary sedimentary systems. State of the art techniques and technologies (sedimentology, geomorphology, modelling) are used to examine the physical and biological processes in freshwater and marine environments. The application of sedimentary systems in the context of Earth's resources and the current energy transition are highlighted.

EARTHSCI 307 15 Points
Earth's Changing Climate
An exploration of long-term climatic and environmental variability from deep time to the present - all placed in the context of our warming world. Emphasis is on the nature and drivers of climate change, and the tools used for analysis of past climate impacts on Earth landscapes, the hydrosphere and the biosphere.
Prerequisite: 45 points at Stage II, including 15 points from EARTHSCI 201, 202, 220, GEOG 260-263, or equivalent

EARTHSCI 308 15 Points
Tectonic and Magmatic Systems
Explores the tectonic and magmatic evolution of Earth and planetary systems, including their formation, composition, and how they deform. Students are exposed to seminal literature covering the various geological, geochemical, geophysical, and modelling tools and methods used for deciphering Earth deformation and magmatism, and the critical feedbacks between these processes. Recommended preparation: EARTHSCI 203, 208
Restriction: EARTHSCI 304, 305

EARTHSCI 309 15 Points
Special Topic
EARTHSCI 315 15 Points
Analytical Skills in Geology
A laboratory and field-based course expanding a student’s ability to collect, synthesise and analyse the range of datasets encountered in Earth Sciences, in disciplines such as geochemistry, sedimentology, structural geology and geophysics. Activities focus around a residential geological field-trip, where students develop advanced quantitative field skills in geologically diverse settings, and provide a report synthesising and interpreting their collected data. Prerequisite: EARTHSCI 220, 30 points from EARTHSCI 202, 203, 208, 262 and a Grade Point Average of 5.0 or higher

EARTHSCI 320 15 Points
Practice in Earth Sciences 2
A practical and field based course that embeds theory and work flows to enable students to read, document and interpret complex and vulnerable landforms and landscapes in 4-D. Students will be required to participate in a residential field experience and undertake independent field work. Prerequisite: EARTHSCI 220
Restriction: EARTHSCI 301, GEOL 330

EARTHSCI 361 15 Points
Imaging the Subsurface
Geophysical imaging of the subsurface utilises contrasting rock and fluid properties. Applications include environmental, engineering, resource, hazard, and tectonic studies. Students will acquire and interpret geophysical data by attending a one-day field trip and through laboratory sessions. Prerequisite: 15 points at Stage II in Earth Sciences, Environmental Physics, Geophysics
Restriction: GEOL 361, GEOPHYS 361

EARTHSCI 372 15 Points
Engineering Geology
An integration of quantitative and qualitative concepts in geology as applied to engineering projects. Fundamentals of soil and rock mechanics will be introduced. Topics covered in the course include landslides, dewatering schemes, contaminant transport, foundations, mines (open-pit and underground), dams, tunnels, urban geology, and transportation infrastructures. Case studies are used in lectures to demonstrate the importance of geology and water to engineering projects. Fieldwork is required. Prerequisite: CIVIL 220 or EARTHSCI 201 or 220 or GEOL 201, and 30 points from EARTHSCI 201-263, GEOL 260-263, GEOL 202-205
Restriction: CIVIL 726, GEOLOGY 372

EARTHSCI 390 15 Points
Directed Study
Prerequisite: Permission of Academic Head

EARTHSCI 399 15 Points
Capstone: Earth Sciences
Conducting an Earth Science investigation involving a range of skills, as practised in research and industry careers. Students will undertake an independent research project involving field, desktop and/or laboratory work, and communicate the results in written and oral formats. Skills gained include ability to design a research project, collect and analyse quantitative and qualitative Earth Science data, and research communication. Prerequisite: 30 points at Stage III in Earth Sciences

EARTHSCI 399 15 Points
EARTHSCI 399 15 Points
Analytical Skills in Geology
A laboratory and field-based course expanding a student’s ability to collect, synthesise and analyse the range of datasets encountered in Earth Sciences, in disciplines such as geochemistry, sedimentology, structural geology and geophysics. Activities focus around a residential geological field-trip, where students develop advanced quantitative field skills in geologically diverse settings, and provide a report synthesising and interpreting their collected data. Prerequisite: EARTHSCI 220, 30 points from EARTHSCI 202, 203, 208, 262 and a Grade Point Average of 5.0 or higher

EARTHSCI 703 15 Points
Hydrothermal Systems
Active hydrothermal systems are dynamic and significant to national energy requirements, hazards assessment and understanding planetary evolution. Geologic, hydrologic, and geochemical features of hydrothermal systems are considered with an emphasis on hydrothermal systems, sustainable geothermal energy extraction, mechanisms underpinning hydrothermal eruptions, and the potential role of hydrothermal systems in origin of/early life scenarios and the search for extra-terrestrial life.

EARTHSCI 704 15 Points
Directed Study in Earth Sciences
Prerequisite: Head of School approval

EARTHSCI 705 15 Points
Geohazards
Contemporary methods used to identify and assess natural hazards, techniques used for the probabilistic forecasting, spatial representation and communication of hazards. How the relationship between hazard information, risk mitigation and emergency management is addressed. There will be a strong focus on the use of case studies.

EARTHSCI 709 15 Points
Special Topic

EARTHSCI 714 15 Points
Faults and Fluids
Fault-fluid interaction is critical in earthquake dynamics and hydrothermal systems that have implications for geothermal energy, ore mineralisation and, via hydrothermal alteration, land stability. We will explore the fundamentals of these interactions and their relevance to hazard and resource challenges of society today. This course will be anchored by a strong in-person field component.
Restriction: EARTHSCI 706

EARTHSCI 720 15 Points
Environmental Geochemistry
Provides a broad overview of applications of geochemistry across multiple disciplines. In addition, this course will help determine the suitability of different analytical techniques to different problems while providing practical experience in collecting and evaluating geochemical data. Subject areas are wide-reaching and include, geology, environmental science, biology, archaeology, and forensic sciences. No formal prerequisite but knowledge of introductory chemistry will be assumed.

EARTHSCI 732 15 Points
Exploring Environmental Change
Sedimentary and biological records show that extreme, rapid and short-lived climatic and environmental changes occurred in the past. Case studies are used to introduce the tools used to identify and interpret abrupt environmental changes during the Last Glacial Period and Holocene that may have implications for the present and our future.

EARTHSCI 752 15 Points
Volcanoes
Volcanoes were an important part in the formation of Earth’s crust and atmosphere and influenced the evolution of life. Today, volcanoes play an important role in society from hazards and resources to recreation. This course covers how and why volcanoes erupt from magma processes in the mantle to eruption at the surface.
Course Prescriptions

**EARTHSCI 754 15 Points**  
Integrated Sedimentology and Tectonics  
Develops an advanced and practical understanding of how sedimentary and tectonic processes relate to one another. Case studies, field work, guest lectures and discussions will allow critical examination of the latest research into the dynamics of tectonic and sedimentary environments.

**EARTHSCI 770 15 Points**  
Engineering Geological Mapping  
A field-based course which provides hands-on experience in outcrop mapping, geomorphic mapping, and simple field testing of rocks and soils for geotechnical purposes.

**EARTHSCI 771 15 Points**  
Advanced Engineering Geology  
Advanced engineering geology focused on engineering practice. Interpretation of in-situ testing and laboratory test data (including groundwater) for the derivation of design parameters for input into numerical modeling software. The topics covered include, but are not limited to, design and analysis of site investigation, advanced core logging, slope stability analysis, rock fall assessment, introduction to numerical modeling, liquefaction and seismic hazard assessment for engineering design.

**EARTHSCI 772 15 Points**  
Hydrogeology  
Introduces aquifers and aquifer properties; the various processes and techniques utilised in the discovery, development and assessment of groundwater resources; groundwater in construction; groundwater contamination.

**EARTHSCI 785 60 Points**  
**EARTHSCI 789A 30 Points**  
**EARTHSCI 789B 30 Points**  
BAdvSci(Hons) Dissertation in Geology - Level 9  
Prerequisite: Approval of Programme Director or Major/Specialisation Lead  
To complete this course students must enrol in EARTHSCI 785 A and B, or EARTHSCI 789

**ECOLOG 301 15 Points**  
Advanced Research Skills in Ecology  
Research design and associated methods from the component fields of ecology. A series of field trips to differing habitats are a central component of the course. During these trips students will be supervised in small groups and apply selected research methods and techniques to complete a research project.  
Prerequisite: BIOSCI 206

**Environmental Change**

**Stage III**

**ENVCHG 300 15 Points**  
Environmental Change  
An exploration of the nature and causes of change in the physical environment, including: natural processes driving environmental change and variability; humans as agents of change; and biophysical and societal sensitivity to change. Past, present and future interactions between society and environmental change with examples drawn from climatology and ecology. Principles of scientific writing and communication will also be addressed.  
Prerequisite: Approval of Programme Director or Major/Specialisation Lead  
Restriction: GEOG 334

**Social Change for Sustainability**

Explores the concept of sustainability through different theoretical frameworks and how social and environmental movements have mobilised around this concept over time. Critically interrogates what is sustainable, what is social change, and how can social change be sustainable in a global economy. Draws on case studies of current environmental issues and associated popular social movements.
ENVMGT 742 15 Points
**Social Dimensions of Global Environmental Change**
An examination of the social dimensions of global environmental change. This includes a review of the history of climate change, the interaction of science with other knowledges, and contemporary debates surrounding climate change as well as other forms of environmental change. It also examines the different ways in which people respond to environmental risks and changes, and the challenges associated with mitigation and adaptation policies.

ENVMGT 743 15 Points
**Environmental Policy**
Debates surrounding environmental policy and governance provide insights into the complexities of environmental management issues. Examples of environmental governance will be considered at global and local scales. The roles of international agencies, nation-states, civil society and corporations in shaping environmental policy and governance are examined.

ENVMGT 744 15 Points
**Resource Management**
A review of advanced principles, concepts and approaches to the sustainable management of natural resources. Case studies emphasise the need for conflict resolution, equitable allocation, and decentralised decision-making to address the social and environmental impacts of resource utilisation.

ENVMGT 746 15 Points
**Collaborative Environmental Management**
An exploration of participatory management and its potential for engaging communities, resource users and stakeholders in the pursuit of sustainable development. Students will examine strategies for incorporating local knowledge within conservation practices and for reconciling natural resource management with human welfare, social justice and indigenous rights.

ENVMGT 748 15 Points
**Coastal Management**
Explores the physical, social and policy dimensions of coastal management. The nature of coastal environments is a function of physical coastal dynamics, the history of human occupation and utilisation of the coast, and governmental decision making. Discusses shifts in management approaches in the coastal environment, using national and international examples to highlight key coastal management issues.

ENVMGT 749 15 Points
**Ethical Environmental Futures**
We face urgent environmental challenges that require innovative responses to affect better environmental futures. This course will analyse environmental uncertainty and its implications; examine the interface between environmental technologies and society; consider environmental responsibilities, values and ethics; and situate environmental solutions within their wider sociopolitical and economic context. Students will engage with strategies to achieve sustainable and just outcomes.

ENVMGT 750 15 Points
**Special Topic**

ENVMGT 751 15 Points
**River Management**
Explores biophysical, socio-economic, cultural and institutional dimensions of river management, contextualising the situation in Aotearoa New Zealand in global terms. A proactive and precautionary approach engages generatively with river futures, scooping sustainable solutions to contemporary environmental problems. Policy, planning and on-the-ground applications are outlined.

**Environmental Physics**

**Stage I**

ENVPHTHS 100 15 Points
ENVPHTHS 100G 15 Points

**Sun, Sand, Surf: Science of Aotearoa**
The atmosphere, oceans and land make up the dynamic environment of Aotearoa New Zealand. A range of phenomena with natural beauty can be described elegantly with simple scientific laws. This course establishes the physical principles underlying nature, empowering students to explain everyday environmental phenomena. These principles provide the foundation to unravel the science of Earth, climate and environmental change, and energy systems.

**Stage II**

ENVPHTHS 200 15 Points
**Earth Observations and Models**
An experiential study of climate and environmental physics. The analysis and modelling of laboratory, field and remote sensing observations to explain the state and behaviour of the atmosphere, oceans and the solid earth. Topics include radiation, cloud and aerosol processes, energy balance, circulations and seismic waves. It develops transferable skills in acquiring measurements, data analytical methods and laboratory techniques.
Prerequisite: 15 points from ENVPHTHS 100, PHYSICS 100, 102, 120, 121, 160, EARTHSCI 120 and 15 points from MATHS 108, 110, 120, 130, 199, STATS 101-120
Restriction: GEOPHTHS 213

**Stage III**

ENVPHTHS 300 15 Points
**Atmosphere, Ocean and Earth Physics**
The physics basis for dynamical behaviours of the
atmosphere, ocean and solid earth. Topics include the planetary general circulation, development of storms and convection, emergence of climate states, gravity, magnetism and seismology. An emphasis is placed on the fundamental conservation laws and processes that control geophysical systems.

**Prerequisite:** PHYSICS 201, and ENVPHYS 200 or GEOPHYS 213, and 15 points from ENGSCI 211, MATHS 253, 260

**Restriction:** GEOPHYS 310, 311

**ENVPHYS 301**

Special Topic

**ENVPHYS 370**

Directed Study

**Prerequisite:** Departmental approval

**ENVPHYS 399**

Capstone: Environmental Physics

Students will employ core methodologies (experimental, observational, numerical) to investigate some aspect of climate and environmental systems such as key atmospheric, ocean or solid earth geophysical phenomenon. They will relate their findings to contemporary research in the field, considering wider societal aspects and issues. Students will develop their skills in communication, critical thinking, teaching and creative problem solving.

**Prerequisite:** ENVPHYS 300

**Restriction:** EARTHSCI 399, GEOG 399, PHYSICS 399

**Postgraduate 700 Level Courses**

**ENVPHYS 700**

Frontiers in Climate Science

An up-to-date assessment of the state of the climate system that highlights changes in climate pertinent to future change. Evaluates climate using the latest scientific discoveries, evaluates information from observations and models of past, present and future climate. Leverages findings from scientific synthesis efforts and emphasises understanding Earth’s climate as a basis for evaluating impacts of climate on wider environment and society.

**Prerequisite:** ENVPHYS 300

**ENVPHYS 701**

Atmosphere and Ocean Dynamics

Explores physical processes underlying Earth’s climate using observations, modelling and predictions. Spans geophysical fluid dynamics, Earth’s energy budget, the meridional and vertical heat imbalances, and processes linked to seasonal and long-term climate variations and changes. Explores quasi-geostrophic and wave theory to describe general circulation, Hadley and midlatitude circulations in the atmosphere, Sverdrup balance and western boundary currents in the ocean.

**Prerequisite:** ENVPHYS 300 or 30 points from PHYSICS 201-203, 231, 240, 244, 251, 261

**Restriction:** GEOPHYS 711

**ENVPHYS 702**

Subsurface Characterisation with Geophysical Methods

Pertains to subsurface characterisation through the inversion of geophysical observations. The course covers a combination of rock physics, seismic methods, ground-penetrating radar, as well as gravity, magnetic and electrical methods.

**Prerequisite:** 15 points from EARTHSCI 361, ENVPHYS 300, GEOPHYS 310

**Restriction:** GEOPHYS 761

**ENVPHYS 703**

**ENVPHYS 796B**

Thesis - Level 9

To complete this course students must enrol in ENVPHYS 796 A and B

**Environmental Science**

**Stage I**

**ENVSCI 101**

**ENVSCI 101G**

Environment, Science and Management

Explores the science behind key environmental issues to recognise the role environmental science plays in understanding the interaction between humans and the environment. The complexity of environmental problems and the difficult task of integrating science, knowledge and values are discussed.

**Stage II**

**ENVSCI 201**

Natural and Human Environmental Systems

An examination of current environmental issues in coupled natural and human systems such as urban environments. Interactions among biological, physical and social processes are discussed and means of measuring and managing the environmental outcomes of their interactions are addressed.

**ENVSCI 203**

Modelling Environmental Systems

An introduction to the philosophy and use of models in the study of a range of environmental systems, including coastal, ecological, fluvial, atmospheric and social. Students will develop skills in designing, communicating and critically assessing models of the environment.

**Prerequisite:** STATS 101 or 108

**Restriction:** ENVSCI 310

**ENVSCI 204**

Special Topic

**Stage III**

**ENVSCI 301**

Environmental Science in Practice

Advances in environmental science, technology, and policy are explored using case studies of global environmental issues and proposed solutions. Students apply environmental science to assess how science is used to inform environmental intervention and policy, and understand environmental responses.

**Prerequisite:** ENVSCI 201 or equivalent
ENVSCI 303
Environmental Science, Risk and Society
An examination of the contemporary topics that shape the ways in which environmental science may be communicated and understood. Topics of discussion include issues of scientific uncertainty, risk communication, public trust and the role of media.

ENVSCI 304
Special Topic

ENVSCI 390
Directed Study
Prerequisite: Academic Head approval

ENVSCI 399
Capstone: Environmental Science
Students will engage with the research process, as practised in environmental science. Independent or small group research projects will be undertaken under the guidance of an academic mentor. Students will design and complete an independent research project and communicate their findings. The emphasis is on research skills and assisting students in developing and implementing their independent academic research project.
Prerequisite: 30 points at Stage III in Environmental Science or 15 points at Stage III in Environmental Science and 15 points from other Stage III courses included in the major

Postgraduate 700 Level Courses

ENVSCI 701
Research Practice in Environmental Science
An understanding of research in Environmental Science. Students will be introduced to a range of methodologies and will be challenged to critically analyse information and data. Principles of scientific writing and communication will also be addressed. Students will apply these skills by developing and writing a research proposal or critical review.

ENVSCI 704
Modelling of Environmental Systems
The design and application of models for the investigation of environmental problems; understanding the role and utility of modelling in environmental science; the analysis and representation of environmental phenomena. Provides an understanding of modelling concepts, approaches and applications. An understanding of the material in ENVSCI 310, GEOG 250, MATHS 108 and STATS 101 will be assumed.

ENVSCI 705
Handling Environmental Data
Contemporary approaches to understanding and analysing environmental data with an emphasis on developing skills to support the ‘transformation, visualisation, modelling’ cycle. The importance of adopting reproducible research practices (eg, data and code archiving) will be emphasised. The course focuses on an applied laboratory component and will be taught in open-source software. Assessment will be via projects analysing environmental data. No formal prerequisites but an understanding of basic statistical methods equivalent to STATS 101 will be presumed.

ENVSCI 706
Special Topic

ENVSCI 707
Directed Study in Environmental Science
Prerequisite: Approval of Programme Director or Major/ Specialisation Lead

ENVSCI 708
Ecosystem Dynamics
Ecosystems have a critical role in regulating climate, soil, water, and air quality. Basic concepts of ecosystem ecology are introduced and the effects of human-induced changes on ecosystem processes are examined. The dynamics of key ecosystem processes (e.g. carbon and water cycling) and their driving factors are investigated. Students will conduct a research project linking theoretical and practical aspects of ecosystem science.

ENVSCI 711
Environmental Impact Assessment - Level 9
A focus on the interdisciplinary, scientific assessment of environmental impacts with specific reference to applying this discipline in New Zealand. Methodologies used in the assessment, monitoring and regulation of environmental impacts will be discussed and critically evaluated. The contribution of Environmental Impact Assessment to policy and regulatory decisions in environmental management, including consenting procedures and plan-making processes and the roles and duties of public and professional participants, will be covered. A key component of the assessment is the preparation of an individual Environmental Impact Assessment report.

ENVSCI 713
Air Quality and Atmospheric Processes
Monitoring, modelling and management will be considered with emphasis on air quality standards and guidelines and applications of science and technology to indoor and outdoor air pollution prevention, mitigation and remediation. Case studies and practical work will link the theoretical and practical aspects of air quality science.

ENVSCI 714
Environmental Pollution
Contaminants of soil and water emitted by point and non-point sources. Monitoring of legacy and emerging contaminants, and impact assessment. Application of science and technology to pollution prevention, mitigation and remediation.

ENVSCI 716
Applied Freshwater Ecology
Applied freshwater management and restoration issues considered in light of general ecological processes in freshwater systems. Contemporary issues in New Zealand and overseas such as eutrophication, invasive species and climate change are considered. Students will be introduced to methods of measuring ecological health of streams and lakes. Field and laboratory experience in data collection and analysis relevant to environmental management.

ENVSCI 717
Restoration and Landscape Ecology
Restoration ecology is the scientific study of repairing degraded, damaged or destroyed ecosystems. It is a young but rapidly growing field that represents fundamental changes in human relationships to nature. Restoration draws on concepts from landscape ecology, and the two disciplines are inextricably linked. The course covers the issues of habitat fragmentation and edge effects in a restoration framework.

ENVSCI 737
Applied Terrestrial Ecology
The dynamics of change in terrestrial ecosystems with a focus on forest and wetland environments. Students will be introduced to methods for vegetation assessment
and ecosystem ecology, including multivariate statistical methods. Students are required to participate in a residential field course. No formal prerequisite but a knowledge of ecology equivalent to Stage II, including associated quantitative analysis, is assumed.

**ENVS CI 738**
**Water Sensitive Cities**
This course probes experiments with radical urban change to examine the co-constitution of water-society in the pursuit of improved futures. A case study is built around the aspiration to become a Water Sensitive City. Students first employ quantitative methods to design a water sensitive neighbourhood. Students then critique reductionist approaches to becoming sustainable. The aim is to better understand the sustainable city debate and its emerging logics.

**Stage I**

**EXERSCI 100G**
**Exercise and Fitness: Myths and Reality**
An introduction to the principles of physical exercise, with a focus on understanding how the body moves and responds to exercise, how performance can be measured, and how fitness can be developed and maintained to optimise health. Particular emphasis will be placed on the debunking of common myths about exercise, and offering evidence-based advice on the benefits of appropriate physical activity.

**EXERSCI 101**
**Foundations of Exercise and Sport Sciences**
Introduction to the scientific principles and concepts underpinning the sub-disciplines of Exercise and Sport Sciences: Biomechanics, Exercise Physiology, Movement Neuroscience and Psychology. Content experts will provide a broad overview of the applications and career pathways of each sub-discipline using examples from research or industry. Academic literacy skills required in all sub-disciplines will be developed.

**EXERSCI 103**
**Human Anatomy**
The study of the gross anatomical organisation of the neural, muscular and skeletal systems, with particular reference to the neck, limbs, back and abdominal wall. Practical work includes gross anatomy laboratories and CD-ROM study.

**EXERSCI 105**
**Exerc ise Prescription**
An introduction to the risks and benefits of exercise, exercise policy and safety, physical fitness testing, guidelines for exercise test administration, principles of exercise prescription, cardiorespiratory and neuromuscular training.

**Stage II**

**EXERSCI 201**
**Exercise Physiology 1**
Introduction to the physiological and biochemical requirements and provision of energy for acute exercise and recovery. A key focus is on the mechanisms involved in physiological system responses to aerobic and anaerobic exercise. Practical experiences will cover experimental and scientific procedures of measuring and reporting on physiological responses to acute exercise.

**EXERSCI 203**
**Biomechanics 1**
Covers the mechanical basis of human movement, using quantitative and qualitative modelling approaches. Focuses on the analysis of sporting performance, locomotion, and musculoskeletal stress. Practical work explores key techniques in measurement and data analysis of human movement and the forces involved.

**EXERSCI 205**
**Motor Learning**
Introduction to the principles and stages of motor skill acquisition, and their application to sport and exercise. Key concepts include the structure of practice tasks, feedback, individual differences, growth and development, aging, injury, and relationships to the underlying neurobiology. Develops practical skills in the measurement of human motor performance, and in the development and assessment of individualised training programmes to improve skill.

**EXERSCI 206**
**Exercise Nutrition**
A cross-disciplinary focus on nutrition, examining nutritional enhancement of sports performance, diet and physiological function, eating disorders, energy balance, body composition and the role of diet in growth and exercise.

**EXERSCI 207**
**Sport Psychology**
An introduction to the study of psychology as it relates to human behaviour and performance in sport settings. Key concepts include achievement motivation, individual differences, performing under pressure, psychological skills training, team dynamics, and their relationships to human motor behaviour and performance.
EXERSCI 210 15 Points
Special Topic

EXERSCI 271 15 Points
Advanced Exercise Assessment and Prescription
This theoretical and workplace-based course integrates behavioural competencies in the application of advanced physical fitness assessment and design, and implementation of evidence-based, effective and individualised exercise programmes for the maintenance of health and physical fitness in apparently healthy individuals. Supervised practice of not less than 70 hours is provided. Prerequisite: 45 points: EXERSCI 101, 103, 105

Stage III
EXERSCI 301 15 Points
Exercise Physiology 2
Systemic physiological responses and adaptations to exercise training and physical inactivity relevant to selected athletic and medical populations and across the lifespan. Skills will be developed in the interpretation of experimental methods and findings in human exercise physiology. Prerequisite: 15 points from EXERSCI 201, MEDSCI 205, SPORTSCI 201. Restriction: SPORTSCI 301

EXERSCI 303 15 Points
Biomechanics 2
Advanced quantitative techniques in biomechanics used to study human movement including mathematical modelling and signal processing. An application area such as occupational ergonomics or clinical gait analysis will be used to demonstrate the biomechanical techniques. Prerequisite: 15 points from ENNGEN 121, PHYSICS 160, EXERSCI 203, SPORTSCI 201. Restriction: SPORTSCI 303

EXERSCI 304 15 Points
Sport Psychology
The study of psychology as it relates to human behaviour and performance in sport settings. Key concepts include achievement motivation, individual differences, performing under pressure, psychological skills training, team dynamics, and their relationships to human motor behaviour and performance. Prerequisite: EXERSCI 204 or SPORTSCI 204, or 45 points passed at Stage II or III. Restriction: EXERSCI 207, SPORTSCI 304

EXERSCI 305 15 Points
Movement Neuroscience
Examines brain and spinal cord organisation and function related to movement, and the neurological mechanisms involved in the planning, execution and control of movement in health and disease. Introduces the concept of neural plasticity as it relates to motor skill learning and recovery after injury in both healthy and neurologically impaired populations. An understanding of human anatomy at the level covered in EXERSCI 103 will also be assumed. Prerequisite: 15 points from EXERSCI 201, 205, MEDSCI 206, 309, 320, PSYCH 202, SPORTSCI 201. Restriction: SPORTSCI 305

EXERSCI 307 15 Points
Psychology of Physical Activity
Introduction to the study of psychology as it relates to physical activity, sedentary behaviour and health. Key concepts include exercise motivation, mental health benefits of exercise, models of behaviour change, intervention design, special populations, and the relationship to the underlying neurophysiology and implications for physical activity behaviour. Prerequisite: 45 points passed at Stage II or III. Restriction: EXERSCI 204, SPORTSCI 204

EXERSCI 309 15 Points
EXERSCI 309A 7.5 Points
EXERSCI 309B 7.5 Points
Project in Exercise Sciences
A supervised individual practical project in a clinical or other research laboratory setting to explore and assess how science underpins practical skills. Prerequisite: 15 points at Stage II or III in Exercise Sciences and Departmental approval. Restriction: SPORTSCI 309. To complete this course students must enrol in EXERSCI 309 A and B, or EXERSCI 309

EXERSCI 310 15 Points
Special Topic

EXERSCI 371 15 Points
Practicum in Exercise and Sport Sciences
A workplace-based course of supervised practice of not less than 100 hours. Competencies will be developed in the application of advanced physical fitness assessment and design of evidence-based, effective and individualised exercise programmes for the maintenance of health and physical fitness in apparently healthy individuals. Prerequisite: EXERSCI 271

EXERSCI 399 15 Points
Capstone: Applying Exercise Sciences
A supervised project course that will focus on applying theoretical knowledge to practical skills. Opportunities will include laboratory and clinic-based research projects, science communication or public engagement projects. Students will work in groups, but will also engage in individual activities to demonstrate their own understanding of topics. Prerequisite: 15 points from EXERSCI 301, 303, 305, 307

Diploma Courses
EXERSCI 690A 15 Points
EXERSCI 690B 15 Points
Graduate Diploma Research Project
To complete this course students must enrol in EXERSCI 690 A and B

Postgraduate 700 Level Courses
EXERSCI 702 15 Points
Projects in the Exercise Sciences
Provides students with an opportunity to collect data in an area of interest, with the aim of validating an area of study towards their theses. Restriction: SPORTSCI 702

EXERSCI 703 15 Points
Cardiac Rehabilitation
Seminral literature is used to explore the effects of exercise, physical activity and sedentary behaviour on cardiovascular physiology and pathophysiology within the context of disease prevention and rehabilitation. Restriction: EXERSCI 720, 721, SPORTSCI 703

EXERSCI 704 15 Points
Advanced Techniques in Biomechanics
A laboratory-based course which explores the current biomechanics methodology for quantifying human
movements. Emphasis on motion capture, force measurement, accelerometers, clinical gait analysis, balance assessment, and electromyography. Students will apply biomechanical methods to clinical assessment.

Restriction: SPORTSCI 704

**EXERSCI 705 15 Points**
**Research in the Exercise Sciences**
Examines the nature and value of research contributions in the Exercise Sciences and their application to further research and evidence-based practice. Evaluates the process of research, inclusive of the development of research questions and hypotheses, the planning and collection of data in an ethical and unbiased manner, the analysis, interpretation and presentation of data and the dissemination of results.

Restriction: SPORTSCI 705

**EXERSCI 706 15 Points**
**Seminar in Advanced Exercise Physiology**
A seminar-based course examining the physiological responses and adaptations to physical exercise or inactivity. Students evaluate, present, and discuss seminal and contemporary research publications on selected topics largely focusing on the cardiovascular, metabolic, and musculoskeletal systems. Emphasis will be placed upon investigations of the explanatory elements of adaptation, from the level of the genome to the living human, and the use of relevant contemporary experimental techniques.

Restriction: PHYSIOL 706, SPORTSCI 706

**EXERSCI 708 15 Points**
**Advanced Seminar in Movement Neuroscience**
Seminar-based course which examines brain organisation and function related to movement in health and disease. Emphasis is placed on contemporary techniques and paradigms in the field of movement neuroscience, with special emphasis on clinical populations that exhibit impaired movement. Neural plasticity is a central theme.

Restriction: SPORTSCI 708

**EXERSCI 710 15 Points**
**Exercise Rehabilitation**
The role of exercise and physical activity in the rehabilitation of people living with chronic and long-term health conditions. Professional practice in Aotearoa New Zealand. Evidence-based exercise prescription and outcome measurement for selected client populations.

Restriction: EXERSCI 720, 721, SPORTSCI 710

**EXERSCI 711 15 Points**
**Exercise and Performance Psychology**
Examines the basis of exercise motivation and to examine how psychological states can influence movement control and performance in work, sports, and daily life. The course covers theoretical foundations and involves active discussion of recent empirical studies.

**EXERSCI 714 15 Points**
**Special Topics in the Exercise Sciences**
Prerequisite: Head of Department approval
Restriction: SPORTSCI 714

**EXERSCI 715 15 Points**
**Research Planning and Reporting**
The theoretical, methodological, and practical skills for designing and reporting clinical research studies. Assignments will assess the student’s ability to critically evaluate relevant literature, prepare an ethics application, and write clearly and effectively. A final report will be submitted, formatted as if it is a manuscript being offered for publication.

**EXERSCI 720 15 Points**
**Clinical Exercise Physiology 1**
Develops specialist knowledge in clinical exercise physiology practice, clinical exercise testing, and the effects of medication on exercise responses in people with cardiovascular, pulmonary and metabolic health conditions. Explores the evidence-based, physiological foundations underlying exercise assessment and prescription for people with these chronic health conditions.

**EXERSCI 721 15 Points**
**Clinical Exercise Physiology 2**
Develops specialist knowledge in the evidence-based, physiological foundations underlying exercise assessment and prescription for people with orthopaedic, musculoskeletal, neuromuscular, neoplastic, immunologic and mental health-related chronic conditions. Covers treatment planning and reporting, and the critical analysis of the role of exercise in short and long-term chronic disease management.

Prerequisite: EXERSCI 720

**EXERSCI 731 15 Points**
**Physiotherapy Healthcare**
Students will apply specialist knowledge about the regulation of the practice of physiotherapy in New Zealand supporting professional, legal, ethical, evidence-based and culturally safe practice. Knowledge and skills include Te Tiriti o Waitangi, Māori models of health, government legislation and health strategies, whānau-centred care, interprofessional practice, teamwork, effective communication, and developing a critical consciousness to promote equity in healthcare delivery.

**EXERSCI 732 15 Points**
**Exercise for Rehabilitation**
Students will apply clinical reasoning and deduction to assessment and treatment of individuals across the lifespan living with chronic health conditions to increase life-long physical activity and reduce sedentary behaviours. Knowledge and skills include aerobic capacity testing, functional assessments, exercise intervention, outcome measurement and self-management support for people undergoing cardiac rehabilitation or living with chronic health conditions and older adults.

**EXERSCI 733 15 Points**
**Musculoskeletal Outpatients**
Students will evaluate assessments, planning and delivery of interventions for clients with musculoskeletal, orthopaedic, women’s health and rheumatologic conditions across the lifespan. Client scenarios will develop clinical reasoning skills underpinning safe, effective and holistic delivery of therapy. Students will learn to formulate differential diagnoses, prioritise clinical problems and implement an evidence-based treatment plan, using manual therapy, exercise and modality-based interventions.

**EXERSCI 734 15 Points**
**Physiotherapy Practice**
Students will assess, plan and deliver interventions for case-studies with spinal musculoskeletal, orthopaedic, and rheumatological conditions across the lifespan. Students will formulate differential diagnoses, prioritise clinical problems and generate solutions using knowledge and skills of physiotherapy practice. Students will implement
EXERSCI 735
Neurological Rehabilitation
Students will apply specialist knowledge to develop skills in evidence-based assessment and intervention across health care settings, focusing on interdisciplinary rehabilitation of neurological and neurodevelopmental conditions through the lifespan. The emphasis will be on normal development and milestones to underpin learning in paediatric rehabilitation. Motor learning principles will be applied to rehabilitate mobility, walking, balance and upper-limb function, including integration of assistive technology.

EXERSCI 736
Acute Care
Students will apply advanced knowledge in physiotherapy management of acute respiratory, cardiac, surgical and neurological conditions across the lifespan, and to operate effectively in an interdisciplinary healthcare team. Students will learn to provide cardiopulmonary care for medical, surgical and acute neurological patients and the fundamentals of managing patients in an intensive care unit (ICU) including the role of physiotherapist in an ICU.

EXERSCI 737
Physiotherapy in the Community
Students will advance generic skills to manage chronic conditions commonly delivered by healthcare services in urban and rural communities. Learning will include manual therapy and exercise interventions for spinal conditions, chronic pain management, falls prevention, movement disorders, amputees, cancer survivors and paediatric respiratory conditions. Students will learn to deliver e-health rehabilitation and to deliver whānau-centred care for Māori and Pasifika communities.

EXERSCI 738
Professional Practice
Students will apply specialist knowledge and skills to support graduate practice. Topics include: advanced professional practice, registration and ongoing professional competency, reflections to enhance critical consciousness, and strategies to maintain physical and mental health. Students will gain essential knowledge for business practices such as Accident Compensation Corporation, private insurance, legal and ethical obligations and occupational health and safety.

EXERSCI 741
Advanced Physiotherapy Practice - Level 9
Students will apply advanced knowledge and skills in specialised and emerging areas of physiotherapy practice, including advanced practitioner roles. Applying critical thinking and evidence-based practices, students will independently develop and evaluate management plans for complex cases. Case scenarios include integration of Hauora Māori, paediatric/neonatal ICU, burns/plastics, spinal cord injury, gender health, hand therapy, palliative care and emergency department physiotherapy.

EXERSCI 751
Physiotherapy Practicum 1
Students will undertake supervised practice in clinical settings. This is the first of 5 clinical practicums across different physiotherapy settings. Students will complete supervised practice for 25 days, usually during a 5- or 6-week block, following a compulsory pre-clinical programme. Students will develop competencies in assessment of clients' problems, analysis of findings, goal setting and implementation and evaluation of interventions.

EXERSCI 752
Physiotherapy Practicum 2
Students will undertake supervised practice in a clinical setting. This is the second of 5 clinical practicums across different physiotherapy settings. Students will complete supervised practice for 25 days over a 5-week block. Students will develop competencies in assessment of clients' problems, analysis of findings, goal setting and implementation and evaluation of interventions appropriate to the specific clinical setting.

EXERSCI 753
Physiotherapy Practicum 3
Students will undertake supervised practice in a clinical setting. This is the third of 5 clinical practicums across different physiotherapy practice settings. Students will complete supervised practice for 25 days over a 5-week block. Students will develop competencies in assessment of clients' problems, analysis of findings, goal setting and implementation and evaluation of interventions appropriate to the specific clinical setting.

EXERSCI 754
Physiotherapy Practicum 4
Students will undertake supervised practice in a clinical setting. This is the fourth of 5 clinical practicums across different physiotherapy practice settings. Students will complete supervised practice for 25 days over a 5-week block. Students will develop competencies in assessment of clients' problems, analysis of findings, goal setting and implementation and evaluation of interventions appropriate to the specific clinical setting.

EXERSCI 755
Physiotherapy Practicum 5
Students will undertake supervised practice in a clinical setting. This is the final of 5 clinical practicums across different physiotherapy practice settings. Students will complete supervised practice for 25 days over a 5-week block. Students will develop competencies in assessment of clients' problems, analysis of findings, goal setting and implementation and evaluation of interventions appropriate to the specific clinical setting.

EXERSCI 775
Seminar in Clinical Exercise Physiology
A body of advanced theoretical and administrative work related to exercise prescription and service delivery. The principles of exercise physiology related to clinical populations, especially individuals who have cardiac, musculoskeletal, neurological, pulmonary, immunological, neoplastic, mood, and metabolic disorders, post-surgical cases, the elderly, and for individuals at risk of developing diseases as a consequence of inactivity. Professional and inter-professional relations will be addressed.

Restriction: SPORTSCI 775, 783

EXERSCI 776
Clinical Exercise Practicum 1
Individual interdisciplinary practice in exercise screening, exercise and physical activity assessment, exercise...
prescription and supervision, exercise and physical activity counselling and health education and promotion in clinical populations. The course integrates ethical, safe, reflective and culturally responsive practice through supervised clinical work of not less than 200 hours.

**Restriction:** EXERSCI 771, SPORTSCI 771, 781

**EXERSCI 777 Clinical Exercise Practicum 2**

Individual and interdisciplinary practice in exercise screening, exercise and physical activity assessment, exercise prescription and supervision, exercise and physical activity counselling and health education and promotion in clinical populations. The course integrates ethical, safe, reflective and culturally responsive practice through supervised clinical work of not less than 200 hours.

**Prerequisite:** EXERSCI 776

**Restriction:** EXERSCI 772, SPORTSCI 772, 781

**EXERSCI 778 Clinical Exercise Practicum 3**

Individual and interdisciplinary practice in exercise screening, exercise and physical activity assessment, exercise prescription and supervision, exercise and physical activity counselling and health education and promotion in clinical populations. The course integrates ethical, safe, reflective and culturally responsive practice through supervised clinical work of not less than 200 hours.

**Prerequisite:** EXERSCI 771 and 772, or EXERSCI 776 and 777

**Corequisite:** EXERSCI 775

**Restriction:** EXERSCI 773, SPORTSCI 773, 782

**EXERSCI 779 Clinical Exercise Practicum 4**

Individual and interdisciplinary practice in exercise screening, exercise and physical activity assessment, exercise prescription and supervision, exercise and physical activity counselling and health education and promotion in clinical populations. The course integrates ethical, safe, reflective and culturally responsive practice through supervised clinical work of not less than 200 hours.

**Prerequisite:** EXERSCI 771 or 776, and EXERSCI 772 or 777, and EXERSCI 773 or 778

**Food Science**

**Stage I**

**FOODSCI 100 15 Points**

**Foundations of Food and Nutrition**

Introduces students to the multifaceted nature of Food Science and Nutrition with a focus on the interplay between food, nutrition and health. Introduce the chemical, biological, sensory, and processing aspects of foods. Societal, economic, legislative and regulatory aspects will also be introduced. Concepts will be illustrated using real food systems with a focus on lipids, water and vitamin C.

**Restriction:** FOODSCI 201

**FOODSCI 110 15 Points**

**Concepts in Food and Nutrition**

Introduces students to the multifaceted nature of Food Science and Nutrition with a focus on the interplay between food, nutrition and health. Provides general insights relating food molecules to food function and health. Societal, economic, legislative and regulatory aspects will also be explored. No background in science is assumed.

**Restriction:** FOODSCI 100

**Stage II**

**FOODSCI 200 15 Points**

**Food Composition and Nutrition**

Covers the composition and structure of food. The approach will extend the FOODSCI 100 content from lipids to proteins, carbohydrates and key minor food components. There will be a focus on the molecular structure of the major food components and how they relate to the physical, sensory and nutritional properties of foods.

**Prerequisite:** 15 points from BIOSCI 106, CHEM 110, FOODSCI 100

**Restriction:** FOODSCI 201
FOODSCI 202 15 Points
Food Preservation
Food is spoilt by microbiological, chemical, biochemical and physical processes. It is important to understand the mechanism of spoilage caused by each of these processes in order to prevent or minimise such degradation. This course includes fundamental principles covering the preservation and processing of different food products. The principles involved in the development of food safety and HACCP programmes, as well as New Zealand food laws are also covered.
Prerequisite: 15 points from FOODSCI 200, 201, 15 points from MATHS 108, 110
Restriction: FOODSCI 302

Stage III

FOODSCI 301 15 Points
Food Quality Attributes
Attributes that make food attractive, such as colour, flavour, and texture, and how they alter during processing are studied. Texture measurement and methods of studying food structure will be discussed. Lectures will be given on non-destructive testing of food.
Recommended preparation: BIOSCI 203
Prerequisite: FOODSCI 200 or 201

FOODSCI 303 15 Points
Sensory Science
Human perception and preference of food products. Design of experiments, statistical methodologies and applications in industry and research. Sampling of foods is undertaken in this course.
Prerequisite: 15 points from STATS 101, 108 and 15 points from FOODSCI 200, 201
Corequisite: FOODSCI 301 or Permission of the Programme Director/Course Coordinator

FOODSCI 306 15 Points
Principles of Food Processing
The fundamental principles of freezing and thawing, thermal processing and canning, fermentation and dehydration are studied. The fundamental areas of engineering relevant for food processing such as heat and mass transfer, are covered. Process impact on food safety, quality and preservation is also discussed.
Prerequisite: FOODSCI 200
Restriction: CHEMMAT 756

FOODSCI 310 15 Points
Theory of Food Product Design
Examines the science underpinning human sensory perception and food preferences and how this science interfaces with the design and development of food products as well as the fundamental aspects of food product development.
Prerequisite: FOODSCI 100, 200 and STATS 101 or 108
Restriction: FOODSCI 303, 304

FOODSCI 399 15 Points
Capstone: Food and Nutrition
Food and Nutrition pathway students will work together in groups to identify and develop a new food product or food system that addresses or responds to a nutritional issue. Students will focus on the interplay between the nutritional aspects of the product or system and the sensory, stability, convenience, cost, regulatory and processing aspects of the product.
Prerequisite: FOODSCI 303 or 310 and a further 30 points at Stage III in Food Science and Nutrition

Postgraduate 700 Level Courses

FOODSCI 691 30 Points
FOODSCI 691A 15 Points
FOODSCI 691B 15 Points

Postgraduate Diploma Research Project
To complete this course students must enrol in FOODSCI 691 A and B, or FOODSCI 691

Food Processing
Preservation of food by standard methods including freezing, dehydration and thermal processing. New developments in food preservation. Unit operations, mass and energy balance, and heat transfer are covered. Chemical and physical changes food undergoes during processing.

Project in Food Science
Prerequisite: Permission of Programme Director

Food Safety
An understanding of the changing regulations that apply to the New Zealand food industry is of paramount importance. Pathogen awareness and control from an industry perspective are examined. HACCP and risk management plans will be generated.
Prerequisite: Permission of Programme Director

Food Science
Chemical, biological and physical aspects of foods. The decomposition of food due to lipid oxidation. Integrated study of selected basic foods.

Advanced Food Science
Prerequisite: Permission of Programme Director

Industrial Internship - Level 9
The industrial internship is an opportunity for students to experience the food industry at first hand. While the placement would normally be in New Zealand, overseas internships are possible. The student will work in the food organisation on a defined project under the supervision of a suitably qualified person. A detailed written report on the assignment must be submitted.
Prerequisite: Permission of Programme Director
FOODSCI 715 15 Points
Food Allergens and Intolerants
An understanding of the epidemiology, management, regulation and classification of food allergens and intolerants in accordance with Food Standard 1.2.3 (Australia New Zealand Food Standards Code). This includes the study of foods or food groups with the major food allergens as identified in the Food Allergen Labeling and Consumer Protection Act (FALCPA), and application to new product development and labeling.

FOODSCI 740 15 Points
Food Analysis
Students are provided with an opportunity to experience a range of analytical techniques that are used in food industry laboratories and in food science research.
Restriction: FOODSCI 301, 610

FOODSCI 750 15 Points
Advanced Topics in Food Science 1
A modular course consisting of topics chosen from the diverse research interests of the Food Science staff and academic visitors which may vary from year to year.
Prerequisite: Permission of Programme Director

Special Topic
Prerequisite: Programme Director approval

FOODSCI 788 60 Points
FOODSCI 788A 30 Points
FOODSCI 788B 30 Points
BSc(Hons) Dissertation in Food Science - Level 9
A research proposal will be prepared on the dissertation topic. Students will be required to present an overview of the proposal in a seminar. Students will participate in the critical analysis of scientific papers. The student will carry out an original piece of research. The results will be presented and discussed in a dissertation. A seminar on the research will be given.
Restriction: FOODSCI 789
To complete this course students must enrol in FOODSCI 788 A and B, or FOODSCI 788

Forensic Science

Postgraduate 700 Level Courses

FORENSIC 701 15 Points
Fundamental Concepts in Forensic Science
Ethics and quality assurance in forensic science. Principles of criminal law, principles of evidence and procedure, expert evidence, interpretation of scientific evidence, probability and statistics. Forensic pathology, psychology and psychiatry.

FORENSIC 702 15 Points
Introduction to Forensic Science
Forensic biology, documents, fingerprints, physical evidence, toolmarks, fire examination, explosives, hairs and fibres, drugs, toxicology, alcohol (including blood and breath alcohol), crime scene examination, firearms identification.

FORENSIC 703 15 Points
Statistics and Molecular Biology for Forensic Science
Statistics: data summarisation and reduction, laws of probability, conditional probability, likelihood ratios and Bayes theorem. Interpretation of statistical results. Forensic biology: basic principles of population genetics, genomic structure, conventional blood grouping. DNA profiling: structure, enzymology and basic chemistry of nucleic acids, PCR and microsatellites, interpretation of DNA profiles, developing forensic DNA technologies.

FORENSIC 704 15 Points
Techniques and Applications for Forensic Science
Analytical techniques: GC, HPLC, GC-MS chromatography, IR and UV spectroscopy. Applications: toxicology, illicit drugs, sports drugs, racing chemistry. Physical and trace evidence.

FORENSIC 706 15 Points
Environmental Forensic Science
Concepts of environmental science. Environmental monitoring and spill analysis, environmental legislation, criminal and environmental law. Case studies and practical work.

FORENSIC 707 30 Points
FORENSIC 707A 15 Points
FORENSIC 707B 15 Points
Project in Forensic Science
A research essay on an aspect of forensic science.
Restriction: FORENSIC 705
To complete this course students must enrol in FORENSIC 707 A and B, or FORENSIC 707
FORENSIC 708
Special Topic: Forensic Science in a Digital World
15 Points
Principles and applications of data science and statistics to forensic science. Methods may include machine learning, artificial intelligence, Bayesian inference, data visualisation, data security and the ethical use of data. Applications may include wastewater analysis, DNA sequencing, drug identification, biometrics, and crime detection and prevention. Prior knowledge of basic statistics is assumed. Familiarity with statistical programming language R is beneficial.

GISCI 241
Principles of Remote Sensing
15 Points
An introduction to remote sensing tools and techniques and their application within the earth, environmental and urban environments. The course focuses on the processing, analysis and interpretation of data collected by government and commercial satellites, Unmanned Aerial Vehicles (UAV) and aerial photography. The course introduces image interpretation, multispectral images, supervised and unsupervised image classification and change detection. Techniques for analysing remote sensing data are introduced through a series and lab-based activities and are applied during an independent project.
Prerequisite: 60 points passed

GISCI 242
Principles of GIScience
15 Points
Spatial analysis and GIScience applications of spatial data handling for built and natural environments within the context of theoretical frameworks for understanding human-driven and physical phenomena. Develops advanced practical knowledge of methodology and applications for changing environments. Focus topics include climate change, air pollution, healthcare access, transportation, and 3D game worlds.
Prerequisite: 60 points passed
Restriction: GEOG 318

GISCI 243
Special Topic
15 Points

Stage II

GISCI 341
Remote Sensing of Surface Processes
15 Points
Key concepts of geographic information science as applied to earth and environmental sciences. Monitoring, analysis, visualisation and modelling of landscape change for terrestrial and coastal environments, using imagery from satellites, airplanes (LiDAR) and UAVs. Principles and practice of field techniques, including RTK-GPS, LiDAR and UAV piloting will be reviewed with application to catchment management, conservation, natural hazards and civil infrastructure.
Prerequisite: GISCI 241
Restriction: GEOG 317

GISCI 343
GIScience Programming and Development
15 Points
Programming and scripting-based techniques for spatial big data analysis, spatial data handling, modelling, automation, and development for the GIScience domain.
Prerequisite: 15 points from GISCI 241, 242, GEOG 317, 318

GISCI 344
Special Topic
15 Points

GISCI 390
Directed Study
15 Points
Prerequisite: Approval of Programme Director or Major/Specialisation Lead

GISCI 399
Capstone: GIScience
15 Points
Students will independently demonstrate domain knowledge through applying their skills as members of groups completing a community-based GIScience projects serving needs identified by community stakeholders. Groups will be assembled based on skillsets of individual
students (e.g., programming, remote sensing, advanced vector analysis, etc.), and students will be assessed on their independent contributions to the group project.  
Prerequisite: 30 points at Stage III in Geographic Information Science

**Geography**

**Stage I**

**GEOG 101 15 Points**  
*Earth Surface Processes and Landforms*  
Understanding of the functioning of natural systems at the Earth's surface and human interactions with these systems. Examines the operation and interaction between Atmospheric, Hydrological, Ecological and Geomorphic systems. Environmental processes are an integrating theme. Topics include: climate and hydrological systems, ecological processes; surface sediment cycle; and processes governing development and dynamics of major landform types.

**GEOG 102 15 Points**  
*Geography of the Human Environment*  
Examines the relationships among personal geographies and global geographies of uneven development, economic, environmental and socio-cultural change. Using a variety of examples from New Zealand and the world we illustrate the connection between local places and global issues.

**GEOG 103 15 Points**  
**GEOG 103G 15 Points**  
*Mapping Our World*  
An introduction to contemporary geospatial technologies such as web-mapping, GPS and tracking devices (such as your phone), Remote Sensing and GIS. Covers key concepts and principles behind these tools and their use, along with practical experiences through laboratories. Critical and theoretical perspectives on the tools, their use, and their social impacts will be discussed.  
*Restriction: GEOG 140, GISCI 140*

**GEOG 104 15 Points**  
**GEOG 104G 15 Points**  
*Cities and Urbanism*  
What makes a great city? This course explores 'urbanism' in both historical and contemporary cities to determine the essence of urbanity and the way that citizens (and visitors) experience city life. The dynamics and character of cities are considered in terms of their built environment, environmental systems, population, social diversity, and planning policies and practices.

**GEOG 106 15 Points**  
*Geographies of the Pacific*  
Examines the diverse geographies of Pacific peoples, their worldviews and ways of living. Case studies are used to place these geographies in entangled environmental, economic, historical, social, cultural and political contexts and to identify contradictory dynamics of change.

**Stage II**

**GEOG 202 15 Points**  
*Cities, Regions and Communities*  
A critical examination of geographic processes and consequences in contemporary society. Topics are selected from the instructors' research interests, which include: the transformation of urban places and spaces; the forms and location of industries and retailing; social geographies of the city; New Zealand's linkages with the global economy and society; urban historical geographies; and demographic and social changes in New Zealand and the Pacific region.  
Prerequisite: 60 points

**GEOG 205 15 Points**  
*Environment and Society*  
A critical exploration of the interconnectedness of environment and society. The course highlights the importance of understanding how different views and attitudes influence people's interactions with the environment. Key themes include governance, management and development, which are addressed through issues such as conservation, climate change adaptation, disasters and resource use. Classes draw on a variety of case studies from New Zealand and overseas.  
Prerequisite: 60 points

**GEOG 250 15 Points**  
*Geographical Research in Practice*  
A critical exploration of the research experience in geography. Case studies and field work demonstrate approaches to understanding the complex interactions of social and environmental processes. Students will develop practical skills in problem identification, research methodologies, ethics and analytical practices.  
Prerequisite: 60 points

**GEOG 261 15 Points**  
*Climate and Society*  
Exploration of themes in climatology, meteorology, hydro-climatology and oceanography with a focus on the nature and role of key processes. These will be examined in relation to key issues for society such as extreme weather events, drought, floods, air pollution and climate change.  
Prerequisite: GEOG 101  
*Restriction: EARTHSCI 261*

**GEOG 262 15 Points**  
*Geomorphology*  
Introduces fundamental concepts in geomorphology for geologists and physical geographers. Key aspects of geomorphology, sedimentology, and earth surface processes are introduced by studying the temporal and spatial development of coastal and river landforms. Applied techniques for earth and environmental sciences, including field, remote sensing, GIS mapping, and modelling.  
Prerequisite: GEOG 101  
*Restriction: EARTHSCI 262*

**Stage III**

**GEOG 305 15 Points**  
*Population, Health and Society*  
A survey of major themes in population, health and social geography. An examination of the dynamics of population complements analyses of health and healthcare, the education sector, the welfare state, and the changing character of urban places.  
Prerequisite: 30 points at Stage II

**GEOG 306 15 Points**  
*Special Topic*

**GEOG 307 15 Points**  
*Urban Geography*  
Analysis of key processes shaping socio-cultural geographies of contemporary cities. Using international and local examples, issues such as the economy of cities, the culture of cities, home and housing, segregation and
2024 Calendar
Faculty of Science
Course Prescriptions

polarisation, the imaging of cities and sustainability are explored.
Prerequisite: 30 points at Stage II
GEOG 308 15 Points
Geopolitics and Indigenous Rights
Examines Indigenous peoples as agents of geopolitical change. Introduces colonial/decolonial geographies to demonstrate the geopolitical implications of Indigenous ways of knowing, being and doing. Key themes include: territory and geopolitics; Indigenous identities, subjectification and intersectionality; Indigenous knowledges, rights and political agency; and, Indigenous relationships with non-Indigenous peoples.
Prerequisite: 30 points at Stage II
Restriction: GEOG 312
GEOG 320 15 Points
Resources and Environmental Management
Examines the development and conservation of the environment in its use as a resource base, with particular reference to the way in which institutional structures in society determine provision and allocation. Attention is balanced between international experience and the policy frameworks in New Zealand. The course provides an understanding of key concepts, practices and methods.
Prerequisite: 30 points at Stage II
GEOG 325 15 Points
The Human Dimension of Disasters
An overview of the human dimension of disasters which covers crucial concepts and theories, vulnerability and the causes of disasters, disaster risk reduction and management, post-disaster recovery and transversal issues such as culture and gender. The discussions encompass not only theoretical but also policy and practical materials and draw on examples and case studies from throughout the world with a particular focus on the most vulnerable and marginalised areas and communities.
Prerequisite: 30 points at Stage II
GEOG 327 15 Points
Politics, Markets and Economies
Uses geographical insights to explore the interrelationships between politics, economy and culture. The course focuses attention on institutions, subjectivity and the making of markets. It examines political projects and economic spaces such as higher education, food and creative economies at the regional, national, and global level.
Prerequisite: 30 points at Stage II
GEOG 335 15 Points
Applied Physical Geography
Examines the challenges of ‘doing science’ in the real world. With particular emphasis on climate, fluvial and coastal processes, the types of data, knowledge and information needed for decision making in environmental contexts are examined. Examines the ways human activities effect, and are affected by, the environmental settings of humans. Seeks improved understanding, and prediction, of the world around humans framed as both a resource and hazard.
Prerequisite: 45 points at Stage II in Geography
GEOG 342 15 Points
Technology, Power and Social Change
Technology, algorithms, and Big data are changing our relationships with reality, space and power. This course explores how we know each other, society, and ourselves in this period of unprecedented technological change.
Prerequisite: 45 points at Stage II
GEOG 351 15 Points
Coastal and Marine Studies
Focuses on the development of coastal landforms across a range of temporal and spatial scales. Introduces natural processes such as waves, tides and circulation, as well as geological-scale coastal evolution driven by changes in sea level and sediment supply. The course has an applied focus with specific emphasis on coastal management problems that affect society. Issues considered include coastal erosion during storms, the impacts of shoreline engineering, climate change and accelerating sea level rise.
Prerequisite: 45 points at Stage II, including EARTHSCI 262 or GEOG 262, or equivalent
GEOG 352 15 Points
Landscape, Environment and Heritage
An examination of environmental change from a historical geography perspective. Approaches to investigating and understanding the transformation of environments are explored, and processes driving creation of different types of landscapes including heritage places are considered. The course enables students to place the modern environment within a historical context.
Prerequisite: 30 points at Stage II
GEOG 390 15 Points
Directed Study
Prerequisite: Approval of Programme Director or Major/Specialisation Lead
GEOG 399 15 Points
Capstone: Geography
An engagement with the research process, as practised in geography. Students will undertake an independent research project and communicate their findings, with due attention to research design, methodology, research ethics, information sources, field practise, data analysis, and research communication. Independent or small group research projects may involve residential or local fieldwork, laboratory analysis, desktop analysis or other research activities.
Prerequisite: GEOG 250 and 30 points at Stage III in Geography

Postgraduate 700 Level Courses

GEOG 701 15 Points
Research in Practice
A reflection on the process of developing research projects from theory to methods, analysis, and the presentation of findings. Attention is directed to the ways in which research is shaped by intellectual histories, pressing social and environmental challenges, and contemporary academic and political debates. The course allows students to develop specialised interests in geography or environmental management.
GEOG 714 15 Points
Mobilities and Wellbeing
An exploration of place-based human mobilities and their influence on health and wellbeing, employing current theoretical perspectives. No formal prerequisite, but an understanding of material in Stage III courses in human geography will be assumed.
GEOG 719 15 Points
Geographies of Housing and Urban Change
Advanced study of housing and urban issues, including the topics of homeownership, asset-based welfare, the politics of housing affordability, housing reforms and the changing dynamics of gentrification. Contemporary issues such as
mortality market dynamics and social rented housing reforms are examined. The course will consider urban governance, office property investment and development processes, and sites of consumption and spectacle.

GEOG 725  
**People, Participation and Development**  
A critical overview of issues associated with people’s participation in development in their geographical context, including processes and outcomes, accountability, empowerment and transformation in the context of livelihood strengthening, resource management, health and sanitation, education and disaster risk reduction. The course provides the students with theoretical knowledge but also practical skills through the use in class of participatory tools as both contents and teaching aids. Discussions rely upon concrete examples from throughout the world with a particular focus on marginalised places.

GEOG 737  
**Geographies of Public Policy**  
Exploring ‘policy’ — an all too familiar and taken for granted term — by focusing on how policies get made, how different actors and varieties of expertise influence the policy process, and how policies shape people and place. It introduces students to transdisciplinary conversations involving geographers, anthropologists, sociologists and urbanists.

GEOG 738  
**Future Food and Biological Economies**  
Investigates contemporary understandings, issues and strategies relating to the development of biological economies and food networks in the context of the globalising food economy. Addresses transformations in agro-food complexes and questions of nature-society relationships to do with ‘sustainable’ and ‘resilient’ food production and consumption.

GEOG 745  
**Applied Fluvial Geomorphology**  
Catchment-scale perspectives are used to analyse spatial and temporal variability in river forms and processes. River responses to disturbance are placed in a longer-term evolutionary context. Prospective river futures are appraised using field analyses and numerical modelling applications. These principles and techniques are used to discuss management options. No formal prerequisite but final year undergraduate experience in a related field required.

GEOG 746  
**Applied Coastal Geomorphology**  
An advanced course on the process-form relationships that shape coastlines over a range of spatial and temporal scales. Coastal processes are examined with field experiments in which principles of experiment design and field deployment are demonstrated. Long-term evolutionary perspectives are examined using a range of field techniques. These short- and long-term approaches are then merged to address examples of applied coastal management problems. No formal prerequisite but an understanding equivalent to GEOG 351 will be assumed.

GEOG 747  
**Applied Climate Science**  
An examination of climate themes relevant to society. Themes will vary but may include hydrology and water resources, agriculture, human health, ocean-atmosphere interaction and energy in the climate system. The sensitivity of selected biophysical and human activity systems to climate will be explored and the actual and potential impacts of climatic variability and change (past and future) investigated.

GEOG 750  
**Environment and Landscape**  
Environmental change in New Zealand since European settlement, including exploitation of natural resources, the creation of different cultural landscapes, and recognition of places as natural and cultural heritage. Different approaches to investigating and understanding recent environmental change are addressed. The course is suitable for physical and social science students, and will enable them to place the modern environment within a historical context. The course may include short guided walks and a one day or two half-day fieldtrips.

GEOG 759  
**Research Topics in Geography**  
Directed research on an approved topic or topics.  
**Prerequisite:** Approval of Programme Director or Major/ Specialisation Lead

GEOG 760  
**Directed Study in Geography**  
Directed studies on an approved topic or topics.  
**Prerequisite:** Academic Head approval

GEOG 761  
**Special Topic: Monitoring Change from Space with Machine Learning**  
Remotely sensed (satellite) data and machine learning techniques will be used to classify and analyse both commercial and environmental targets through time. Techniques will focus on both pixel classification and object detection and students will experience the latest in satellite imagery analysis with a focus on deriving actionable information.

GEOG 771  
**Spatial Analysis and Geocomputation**  
Approaches to and challenges in analysing spatial data. Specific techniques will include geographical regression, point pattern analysis, interpolation, and newer geocomputation and machine learning methods. Students will gain an advanced knowledge of spatial analysis. An understanding equivalent to GISCI 242 will be assumed.

GEOG 774  
**Advanced Spatial Data Handling**  
Advanced approaches to spatial data handling (processing, management, visualisation, and analysis) in web-based environments, including theoretical debates and implications as well as applications for spatial data handling in integrated open-source and web-based mapping/GIS environments. There will be an applied laboratory component and lecture/seminar component where the broader social and theoretical implications of developments in spatial data handling will be engaged. No formal prerequisite, but an understanding equivalent to GEOG 318 will be assumed.

GEOG 789  
**Honours Research Project - Level 9**  
To complete this course students must enrol in GEOG 789 A and B, or GEOG 789

**Geography**

**Stage II**

**GEOPHYS 213**  
**The Geophysical Environment**  
This course explores the physical principles governing - and the connections between - the Earth's atmosphere, oceans and interior. Topics include the structure of the solid earth, ocean currents and tides, and fundamental aspects of weather and climate.

**Prerequisite:** 15 points from PHYSICS 120, 121, 150, 160, and either 15 points from ENGSCI 111, MATHS 108 or MATHS 120 and 130  
**Restriction:** PHYSICS 213

**Stage III**

**GEOPHYS 310**  
**Physics of the Earth**  
Covers the physics of the solid earth from the surface to the core. Specifically, the course explores the Earth's gravitational field (including the rotation and figure of the earth), seismology, heat flow, the magnetic and electromagnetic field to unravel the properties, processes, and structure of the Earth's interior.

**Prerequisite:** 15 points from EARTHSCI 103, 120, GEOLOGY 103, and 15 points from GEOPHYS 213, PHYSICS 213, and 15 points from ENGSCI 211, MATHS 253, 260, PHYSICS 211  
**Restriction:** GEOPHYS 330

**GEOPHYS 311**  
**Atmosphere, Ocean, and Climate Physics**  
Examines the physical and dynamic processes shaping the atmosphere and oceans, covering the thermodynamics of the climate system and the dynamics of global atmospheric and oceanic circulations. Explores the fundamental physical processes that control Earth's climate and investigates the dilemmas they present in our current understanding of climate.

**Prerequisite:** 15 points from PHYSICS 201, 231, and 15 points from GEOPHYS 213, PHYSICS 213, and 15 points from ENGSCI 211, MATHS 253, 260, PHYSICS 211  
**Restriction:** GEOPHYS 331

**GEOPHYS 339**  
**Special Topics in Geophysics**

**GEOPHYS 361**  
**Fundamentals and Applications of Geophysical Exploration**  
The fundamentals of geophysical exploration methods and their application. The course will provide a comprehensive overview of seismic techniques, geophysical borehole methods, and an introduction to gravity, electric, magnetic, electromagnetic, and radar techniques. Applications of these will be considered including hydrocarbon, mineral and geothermal exploration. Geophysical data will be acquired and analysed through field and laboratory work.

**Prerequisite:** 15 points from EARTHSCI 103, 120, GEOLOGY 103, and GEOPHYS 213 or PHYSICS 213 and MATHS 208 or equivalent  
**Restriction:** EARTHSCI 361, GEOLOGY 361

**GEOPHYS 399**  
**Capstone: Geophysics**  
Students will employ core methodologies (experimental, observational, computational, numerical) to investigate some aspect of a key geophysical phenomenon, and relate their findings to contemporary research in the field, considering wider societal aspects and issues. Students will develop their skills in communication, critical thinking, teaching and creative problem solving.

**Prerequisite:** 30 points from GEOPHYS 310, 311, 361  
**Restriction:** EARTHSCI 399, PHYSICS 399

**Diploma Courses**

**GEOPHYS 690**  
**Graduate Diploma Research Project**  
To complete this course students must enrol in GEOPHYS 690 A and B, or GEOPHYS 690

**GEOPHYS 691**  
**Postgraduate Diploma Research Project**  
To complete this course students must enrol in GEOPHYS 691 A and B, or GEOPHYS 691

**Postgraduate 700 Level Courses**

**GEOPHYS 780**  
**Directed Study**

**GEOPHYS 789**  
**Honours Research Project - Level 9**  
To complete this course students must enrol in GEOPHYS 789 A and B, or GEOPHYS 789

**GEOPHYS 796A**  
**MSc Thesis in Geophysics - Level 9**  
To complete this course students must enrol in GEOPHYS 796 A and B

**Information Management**

**Stage I**

**INFOMGMT 192**  
**Information Tools for Business**  
The ability to manage and analyse information is essential in many aspects of business. This course provides a practical introduction to a variety of information tools used to analyse and visualise data relating to aspects of information management. Through these tools and methods students explore using data to inform decisions related to a variety of activities.

**Prerequisite:** 15 points from PHYSICS 120, 121, 150, 160, and either 15 points from ENGSCI 111, MATHS 108 or MATHS 120 and 130  
**Restriction:** PHYSICS 213

Approaches to management and conservation of global
An introduction to calculus that builds mathematical skills and develops conceptual thinking. MATHS 102 works as a refresher course for those who haven’t studied Mathematics for some time, a confidence builder for those lacking mathematical confidence and a preparation course for further study in Mathematics.  

Restriction: MATHS 102 may not be taken concurrently with any other Mathematics course, except MATHS 190 and may not be taken after ENGGEN 111 or any Mathematics course at Stage I or above, except MATHS 190/190G.

**MATHS 108**

**General Mathematics 1**

A general entry to Mathematics for commerce and the social sciences, following Year 13 Mathematics. Covers selected topics in algebra and calculus and their applications, including: linear functions, linear equations and matrices; functions, equations and inequalities; limits and continuity; differential calculus of one and two variables; integral calculus of one variable. 

Prerequisite: MATHS 102 or 110 or at least 13 credits in Mathematics at NCEA Level 3 including the Differentiation Standard 91578, or D in CIE A2 Mathematics or C in CIE AS Mathematics or 3 out of 7 in IB Mathematics: Analysis and Approaches (SL or HL)

Restriction: ENGG 150, ENGGEN 111, MATHS 120, 130, 208, 250

**MATHS 110**

**Mathematics for Natural Sciences**

A general entry to Mathematics for the natural sciences, following Year 13 Mathematics. Covers selected topics in algebra and calculus and their application to chemistry, biology and other natural sciences. 

Prerequisite: MATHS 102 or 110 or at least 13 credits in Mathematics at NCEA Level 3, or D or better in Cambridge Mathematics at NCEA Level 3, or A in CIE A2 Mathematics, or a score of 7 in IB Mathematics: Analysis and Approaches (SL or HL)

Restriction: ENGG 150, ENGSCI 111, MATHS 208, 250. More than 15 points from MATHS 120 and 130

**MATHS 120**

**Algebra**

A foundation for further mathematics courses, essential for students intending to major in Mathematics, Applied Mathematics, Statistics, Physics, or who want a strong mathematical component to their degree. Develops skills and knowledge in linear algebra, together with an introduction to mathematical language and reasoning, including complex numbers, induction and combinatorics. Recommended preparation: Merit or excellence in the Differentiation Standard 91578 at NCEA Level 3.

Prerequisite: MATHS 108, or B- or higher in MATHS 110, or A- or higher in MATHS 110, or A+ in MATHS 108, or at least 18 credits in Mathematics at NCEA Level 3 including at least 9 credits at merit or excellence, or B in CIE A2 Mathematics, or 5 out of 7 in IB Mathematics: Analysis and Approaches (SL or HL).

**MATHS 130**

**Calculus**

A foundation for further mathematics courses, essential for students intending to major in Mathematics, Applied Mathematics, Statistics, Physics, or who want a strong mathematical component to their degree. Develops skills and knowledge in calculus of functions of a single variable. Recommended preparation: Merit or excellence in the Differentiation Standard 91578 at NCEA Level 3.

Prerequisite: MATHS 108, or B- or higher in MATHS 108, or A- or higher in MATHS 110, or A+ in MATHS 108, or at least 18 credits in Mathematics at NCEA Level 3 including at least 9 credits at merit or excellence, or B in CIE A2 Mathematics.
or 5 out of 7 in IB Mathematics: Analysis and Approaches (SL or HL)

MATHS 162 15 Points
Computational Mathematics
An introduction to computational mathematics and programming in MATLAB. The course will introduce some basic concepts in computational mathematics and give applications that include cryptography, difference equations, stochastic modelling, graph theory and Markov chains.
Corequisite: ENNGEN 150 or ENGSCI 111 or MATHS 108 or 120
Restriction: MATHS 199

MATHS 190 15 Points
MATHS 190G 15 Points
Great Ideas Shaping our World
Mathematics contains many powerful and beautiful ideas that have shaped the way we understand our world. This course explores some of the grand successes of mathematical thinking. No formal mathematics background is required, just curiosity about topics such as infinity, paradoxes, cryptography, knots and fractals.
Restriction: MATHS 190 may not be taken after any Mathematics course at Stage III

MATHS 199 15 Points
Advancing in Mathematics
An introduction to University level mathematics, for high-achieving students currently at high school. The numerical computing environment MATLAB is used to study beautiful mathematics from algebra, analysis, applied mathematics and combinatorics. Students will learn to write mathematical proofs and create mathematical models to find solutions to real-world problems.
Prerequisite: Departmental approval

Stage II
MATHS 200 15 Points
Special Topic
MATHS 208 15 Points
General Mathematics 2
This sequel to MATHS 108 features applications from the theory of multi-variable calculus, linear algebra and differential equations to real-life problems in statistics, economics, finance, computer science, and operations research.
Prerequisite: 15 points from MATHS 108, ENGSCI 111, ENNGEN 150, or MATHS 120 and MATHS 130, or a B- or higher in MATHS 110
Restriction: Cannot be taken, concurrently with, or after MATHS 250, 253

MATHS 250 15 Points
Algebra and Calculus 2
Designed for all students who plan to progress further in mathematics, this course follows directly from MATHS 120 and 130. Covering topics from multivariable calculus and linear algebra, which have many applications in science, engineering and commerce. Students will learn mathematical results and procedures as well as the underpinning ideas and mathematical proofs.
Prerequisite: MATHS 120 and 130, or ENNGEN 150 or ENGSCI 111

MATHS 253 15 Points
Algebra and Calculus 3
A sequel to MATHS 250, further developing and bringing together linear algebra and calculus. Students will learn about quadratic forms, projections, spectral decomposition, methods of multicriteria optimisation, double, triple and line integrals, Green's theorem and applications.
Prerequisite: MATHS 250

MATHS 254 15 Points
Fundamental Concepts of Mathematics
Explores fundamentals of mathematics important to many branches of the subject and its applications. Topics include equivalence relations, elementary number theory, counting techniques, elementary probability, geometry, symmetry and metric spaces. This is an essential course for all students advancing beyond Stage II in pure mathematics, and highly suitable for other students in the mathematical sciences.
Corequisite: MATHS 250

MATHS 260 15 Points
Differential Equations
The study of differential equations is central to mathematical modelling of systems that change. This course develops methods for understanding the behaviour of solutions to ordinary differential equations. Qualitative and elementary numerical methods for obtaining information about solutions are discussed, as well as some analytical techniques for finding exact solutions in certain cases. Some applications of differential equations to scientific modelling are discussed. A core course for Applied Mathematics.
Prerequisite: MATHS 208 or 250 or ENGSCI 211 or a concurrent enrolment in MATHS 250

MATHS 270 15 Points
Numerical Computation
Many mathematical models occurring in Science and Engineering cannot be solved exactly using algebra and calculus. Students are introduced to computer-based methods that can be used to find approximate solutions to these problems. The methods covered in the course are powerful yet simple to use. This is a core course for students who wish to advance in Applied Mathematics.
Prerequisite: MATHS 120 and 130, or 15 points from ENNGEN 150, ENGSCI 111, MATHS 108, 110 and 15 points from COMPSCI 101, 105, 130, INFOSYS 110, 120, MATHS 162, 199

Stage III
MATHS 302 15 Points
Perspectives in Mathematics Education
For people interested in thinking about the social, cultural, political, economic, historical, technological and theoretical ideas that influence mathematics education, who want to understand the forces that shaped their own mathematics education, or who are interested in teaching. Students will develop their ability to communicate ideas in essay form. Recommended preparation: At least 45 points from courses in Mathematics or Statistics.

MATHS 307 15 Points

MATHS 308 15 Points
Special Topic
MATHS 315 15 Points
Mathematical Logic
Logic addresses the foundations of mathematical reasoning, it models the process of mathematical proof by providing a setting and the rules of deduction. This course builds a basic understanding of first order predicate logic, introduces model theory and demonstrates how
models of a first order system relate to mathematical structures. Recommended for high level computer science or mathematical logic.

**Prerequisite:** B+ or higher in COMPSCI 225 or MATHS 254 or PHIL 222

**MATHS 320**

**Algebraic Structures**

This is a framework for a unified treatment of many different mathematical structures. It concentrates on the fundamental notions of groups, rings and fields. The abstract descriptions are accompanied by numerous concrete examples. Applications abound: symmetries, geometry, coding theory, cryptography and many more. This course is recommended for those planning graduate study in pure mathematics.

**Prerequisite:** MATHS 250, 254

**MATHS 326**

**Combinatorics**

Combinatorics is a branch of mathematics that studies collections of objects that satisfy specified criteria. An important part of combinatorics is graph theory, which is now connected to other disciplines including bioinformatics, electrical engineering, molecular chemistry and social science. The use of combinatorics in solving counting and construction problems is covered using topics that include algorithmic graph theory, codes and incidence structures, and combinatorial complexity.

**Prerequisite:** MATHS 254, or MATHS 250 and a B+ or higher in COMPSCI 225

**MATHS 328**

**Algebra and Applications**

The goal of this course is to show the power of algebra and number theory in the real world. It concentrates on concrete objects like polynomial rings, finite fields, groups of points on elliptic curves, studies their elementary properties and shows their exceptional applicability to various problems in information technology including cryptography, secret sharing, and reliable transmission of information through an unreliable channel.

**Prerequisite:** MATHS 250 and 254, or a B+ or higher in COMPSCI 225 and 15 points from MATHS 250, 253

**MATHS 322**

**Real Analysis**

A standard course for every student intending to advance in pure mathematics. It develops the foundational mathematics underlying calculus, it introduces a rigorous approach to continuous mathematics and fosters an understanding of the special thinking and arguments involved in this area. The main focus is analysis in one real variable with the topics including real fields, limits and continuity, Riemann integration and power series.

**Prerequisite:** MATHS 250, 254

**MATHS 332**

**Analysis in Higher Dimensions**

By selecting the important properties of distance many different mathematical contexts are studied simultaneously in the framework of metric and normed spaces. This course examines carefully the ways in which the derivative generalises to higher dimensional situations. These concepts lead to precise studies of continuity, fixed points and the solution of differential equations. A recommended course for all students planning to advance in pure mathematics.

**Prerequisite:** MATHS 332 or a B or higher in MATHS 254

**MATHS 334**

**Algebraic Geometry**

Algebraic geometry is a branch of mathematics studying zeros of polynomials. The fundamental objects in algebraic geometry are algebraic varieties i.e., solution sets of systems of polynomial equations.

**Prerequisite:** MATHS 332, and at least one of MATHS 320, 328 and Departmental approval

**Restriction:** MATHS 734

**MATHS 340**

**Real and Complex Calculus**

Calculus plays a fundamental role in mathematics, answering deep theoretical problems and allowing us to solve very practical problems. This course extends the ideas of calculus to two and higher dimensions, showing how to calculate integrals and derivatives in higher dimensions and exploring special relationships between integrals of different dimensions. It also extends calculus to complex variables. Recommended preparation: MATHS 253

**Prerequisite:** MATHS 250

**MATHS 341**

**Complex Analysis**

Explores functions of one complex variable, including Cauchy’s integral formula, the index formula, Laurent series and the residue theorem. Many applications are given including a three-line proof of the fundamental theorem of algebra. Complex analysis is used extensively in engineering, physics and mathematics. Strongly recommended: MATHS 333

**Prerequisite:** MATHS 332 and Departmental approval

**Restriction:** MATHS 740

**MATHS 350**

**Topology**

Aspects of point-set, set-theoretic and algebraic topology including: properties and construction of topological spaces, continuous functions, axioms of separation, countability, connectivity and compactness, metrisation, covering spaces, the fundamental group and homology theory. Recommended preparation: MATHS 333.

**Prerequisite:** MATHS 332 and Departmental approval

**Restriction:** MATHS 750

**MATHS 361**

**Partial Differential Equations**

Partial differential equations (PDEs) are used to model many important applications of phenomena in the real world such as electric fields, diffusion and wave propagation. Covers linear PDEs, analytical methods for their solution and weak solutions. Recommended preparation: MATHS 253

**Prerequisite:** MATHS 250, 260

**MATHS 362**

**Methods in Applied Mathematics**

Covers a selection of techniques to analyse differential equations including the method of characteristics and asymptotic analysis. These methods are fundamental in the analysis of traffic flows, shocks and fluid flows. Introduces foundational concepts to quantify uncertainty in parameters of differential equations and is recommended for students intending to advance in Applied Mathematics. Recommended preparation: MATHS 253, 361

**Prerequisite:** MATHS 250, 260

**MATHS 363**

**Advanced Computational Mathematics**

Finite element methods, calculus of variations and control theory are key mathematical tools used to model, compute approximations to model solutions and to understand
the control of real-world phenomena. These topics share the same mathematical foundations and can all be described as variational methods. The course offers advanced techniques to handle complicated geometries and optimise desired objectives in applications modelled using differential equations. Recommended preparation: MATHS 253

**Prerequisite:** MATHS 260 and 270

**Capstone: Mathematics**

An exploration of the role of mathematics in society and culture, and the activities performed by mathematicians as teachers, critics, and innovators. Students will develop their skills in communication, critical thinking, teaching, and creative problem solving.

**Prerequisite:** MATHS 250 and 30 points at Stage III in Mathematics

### Postgraduate 700 Level Courses

**MATHS 701**

**Introduction to Research in Mathematics Education**

What is Mathematics Education research, and how can it inform practice? This course introduces a range of skills and methods for conducting and critically consuming research in mathematics education. Students will explore issues and techniques in Mathematics Education research as they design their own research studies to inform their teaching and learning practice.

**Prerequisite:** MATHS 302 or significant teaching experience or department approval

**MATHS 702**  
15 Points

**Mathematical Processes in the Curriculum**

Historically, mathematics curricula have emphasised the what of mathematics (content), at the expense of considering the how. This course uses hands-on experiences and research literature to explore how to teach, learn and do mathematics through processes such as communication, modelling, problem solving, and proving.

**MATHS 703**  
15 Points

**What Can Be More Practical Than a Good Theory?**

An analysis of theoretical perspectives that inform research in mathematics education, with a focus on learning theories, both social and psychological, and their implications for teaching and learning in mathematics.

**Prerequisite:** MATHS 302 or significant teaching experience or department approval

**MATHS 705**  
15 Points

**Contemporary Issues in Mathematics Education**

This course explores contemporary topics in mathematics education research and their impact on teaching and learning. Students will investigate and critically examine research and scholarly literature, and consider the implications of current knowledge for their own practice.

**Prerequisite:** MATHS 302 or significant teaching experience or department approval

**MATHS 706**  
15 Points

**Technology and Mathematics Education**

Practical and theoretical perspectives on ways that technology can enhance teaching and learning of mathematics. Students will consider and critically examine affordances, constraints and obstacles in the use of technology.

**MATHS 712**  
15 Points

**Teaching and Learning in Algebra**

Recent theoretical perspectives on the teaching and learning of school and university mathematics are linked to the learning of either calculus or algebra. The focus is on the mathematics content, applications, and effective learning at school and university. Students taking this
course should normally have studied mathematics or statistics at 200 level.  
Prerequisite: MATHS 302 or significant teaching experience or department approval

MATHS 713  
Logic and Set Theory  
A study of the foundations of pure mathematics, formalising the notions of a ‘mathematical proof’ and ‘mathematical structure’ through predicate calculus and model theory. It includes a study of axiomatic set theory.  
Prerequisite: MATHS 315 or PHIL 305

MATHS 714  
Number Theory  
A broad introduction to various aspects of elementary, algebraic and computational number theory and its applications, including primality testing and cryptography.  
Prerequisite: B+ in MATHS 328 or 320

MATHS 715  
Graph Theory and Combinatorics  
A study of combinatorial graphs (networks), designs and codes, illustrating their application and importance in other branches of mathematics and computer science.  
Prerequisite: 15 points from MATHS 320, 326, 328 with a B or higher

MATHS 720  
Group Theory  
A study of groups focusing on basic structural properties, presentations, automorphisms and actions on sets, illustrating their fundamental role in the study of symmetry (for example in crystal structures in chemistry and physics), topological spaces, and manifolds.  
Prerequisite: MATHS 320

MATHS 721  
Representations and Structure of Algebras and Groups  
Representation theory studies properties of abstract groups and algebras by representing their elements as linear transformations of vector spaces or matrices, thus reducing many problems about the structures to linear algebra, a well-understood theory.  
Prerequisite: MATHS 320

MATHS 725  
Lie Groups and Lie Algebras  
Symmetries and invariants play a fundamental role in mathematics. Especially important in their study are the Lie groups and the related structures called Lie algebras. These structures have played a pivotal role in many areas, from the theory of differential equations to the classification of elementary particles. Strongly recommended for students advancing in theoretical physics and pure mathematics. Recommended preparation: MATHS 333.  
Prerequisite: MATHS 320 and 332

MATHS 730  
Measure Theory and Integration  
Presents the modern elegant theory of integration as developed by Riemann and Lebesgue. This course includes powerful theorems for the interchange of integrals and limits, allowing very general functions to be integrated, and illustrates how the subject is both an essential tool for analysis and a critical foundation for the theory of probability. Strongly recommended: MATHS 333  
Prerequisite: MATHS 322

MATHS 731  
Functional Analysis  
Provides the mathematical foundations behind some of the techniques used in applied mathematics and mathematical physics; it explores how many phenomena in physics can be described by the solution of a partial differential equation, for example the heat equation, the wave equation and Schrödinger’s equation. Recommended preparation: MATHS 730 and 750.  
Prerequisite: MATHS 332 and 333

MATHS 734  
Algebraic Geometry  
Algebraic geometry is a branch of mathematics studying zeros of polynomials. The fundamental objects in algebraic geometry are algebraic varieties i.e., solution sets of systems of polynomial equations.  
Prerequisite: MATHS 332 and at least one of MATHS 320, 328  
Restriction: MATHS 334

MATHS 735  
Analysis on Manifolds and Differential Geometry  
Studies surfaces and their generalisations, smooth manifolds, and the interaction between geometry, analysis and topology; it is a central tool in many areas of mathematics, physics and engineering. Topics include Stokes’ theorem on manifolds and the celebrated Gauss-Bonnet theorem. Strongly recommended: MATHS 333 and 340.  
Prerequisite: MATHS 332

MATHS 740  
Complex Analysis  
An introduction to functions of one complex variable, including Cauchy’s integral formula, the index formula, Laurent series and the residue theorem. Many applications are given including a three line proof of the fundamental theorem of algebra. Complex analysis is used extensively in engineering, physics and mathematics. Strongly recommended: MATHS 333.  
Prerequisite: MATHS 332  
Restriction: MATHS 341

MATHS 750  
Topology  
Aspects of point-set, set-theoretic and algebraic topology including: properties and construction of topological spaces, continuous functions, axioms of separation, countability, connectivity and compactness, metrization, covering spaces, the fundamental group and homology theory. Strongly recommended: MATHS 333.  
Prerequisite: MATHS 332  
Restriction: MATHS 350

MATHS 761  
Dynamical Systems  
Mathematical models of systems that change are frequently written in the form of nonlinear differential equations, but it is usually not possible to write down explicit solutions to these equations. This course covers analytical and numerical techniques that are useful for determining the qualitative properties of solutions to nonlinear differential equations.  
Prerequisite: B+ in both MATHS 340 and 361

MATHS 762  
Nonlinear Partial Differential Equations  
A study of exact and numerical methods for non-linear partial differential equations. The focus will be on the kinds of phenomena which only occur for non-linear partial differential equations, such as blow up, shock waves, solitons and special travelling wave solutions.  
Prerequisite: B+ in both MATHS 340 and 361

A preparatory course for students who have not previously studied physics. Topics include the nature of light; wave motion; basic mechanics of motion in a straight line,
including the concepts of momentum and energy; an introduction to heat.

Restriction: PHYSICS 91F

**Stage I**

**PHYSICS 100**
15 Points

**PHYSICS 100G**
15 Points

Models and Reality
Explore the role of models in physical science and what they contribute to our understanding of the world, and the concepts of reductionism and emergence. Topics include particle physics, materials science, and climate; and the use of models that explain dynamics of populations and artificial systems, including epidemiology, flocking in birds and fish, and the spread of information in social networks.

**PHYSICS 102**
15 Points

Basic Concepts of Physics
An introduction to the basic principles of physics. Key topics are the physical description of motion, electricity and magnetism. The course focuses on the science of everyday phenomena and the understanding of important physical concepts. This course will equip students with little prior knowledge of physics to succeed in PHYSICS 120 or 160.

Restriction: PHYSICS 103

**PHYSICS 120**
15 Points

Advancing Physics 1
For students progressing in physical science. Key topics are mechanics, energy, rotation, oscillations, waves and thermodynamics. This is a calculus based course, focusing on fundamental principles, problem solving and hands-on exercises.

Prerequisite: PHYSICS 102, or at least 4 credits in the Mechanics (91524) or Waves (91533) standards in NCEA Level 3 Physics and at least 6 credits in the Differentiation (91578) or Integration (91579) standards in NCEA Level 3 Calculus, or equivalent with departmental approval

**PHYSICS 121**
15 Points

Advancing Physics 2
For students progressing in physical science. Key topics are electrostatics, electromagnetism, circuits, optics, relativity and quantum mechanics. This is a calculus based course, focusing on fundamental principles, problem solving and hands-on exercises.

Prerequisite: PHYSICS 120, or 24 credits in the Mechanics (91524), Electricity (91526), Differentiation (91578), Integration (91579) standards in NCEA Level 3 at merit or excellence, or equivalent with departmental approval

**PHYSICS 140**
15 Points

Digital Fundamentals
An introduction to the physical basis of modern computing for Computer Science students and anyone with an interest in modern Information Technology. Key topics are Boolean Algebra, logic circuits, and digital information processing. Hands-on laboratory work is a key component of the course. No prior electronics or programming knowledge is assumed.

Restriction: PHYSICS 219, 243

**PHYSICS 160**
15 Points

Physics for the Life Sciences
Designed for students intending to advance in the biomedical and life sciences, this course is focused on physical principles relevant to biological systems. Key topics are motion, waves, thermal physics, electricity and instrumentation. The course is primarily algebra-based and includes lectures, laboratories and tutorials. Recommended preparation is NCEA Level 2 Physics and Mathematics, or equivalent.

Restriction: PHYSICS 120

**Stage II**

**PHYSICS 201**
15 Points

Classical and Thermal Physics
Classical mechanics and thermal physics. Key topics are linear and rotational motion in three dimensions, fluids, oscillations and mechanical waves, and the laws of thermodynamics. The course will cover both fundamental principles and applied topics, such as planetary dynamics and spacecraft navigation, ultrasound, atmospheric physics and materials science.

Prerequisite: 15 points from PHYSICS 120, 121, 150, 160 and 15 points from ENGS 211, MATHS 130, 208, PHYSICS 211

**PHYSICS 202**
15 Points

Electromagnetism
Key topics are electric and magnetic fields, the generation of magnetic fields by currents, the derivation of Maxwell’s equations, the interpretation of light as an electromagnetic wave and polarisation. Both fundamental principles and applied topics, including fibre optics, LEDs, physical optics and interferometers are covered.

Prerequisite: 15 points from PHYSICS 121, 150 and 15 points from ENGS 211, MATHS 130, 208, PHYSICS 211

**PHYSICS 203**
15 Points

Relativity and Quantum Physics
Special relativity, quantum mechanics and nuclear physics. Key topics are the Lorentz transformation, mass-energy equivalence, the Schrödinger equation in one dimension, the hydrogen atom, atomic and molecular bonds, isotopes and radioactivity. Both fundamental principles and applied topics, including isotope production, nuclear medicine, and dosimetry are covered.

Prerequisite: 15 points from PHYSICS 121, 150 and 15 points from ENGS 211, MATHS 130, 208, PHYSICS 211

**PHYSICS 244**
15 Points

Electronics and Imaging
Provides students with skills in electronics and imaging technologies that will support future work in technology-focused careers, experimental science, medical physics, and photonics. Key topics include networks, resonance, amplifiers, semiconductors, Fourier analysis, imaging systems, MRI systems and biomedical imaging.

Prerequisite: 15 points from PHYSICS 120, 121, 140, 160 and 15 points from COMPSCI 120, ENGG 150, ENGS 211, MATHS 108, 110, 120, 130, 150

**Stage III**

**PHYSICS 309**
15 Points

Special Study
Directed study on a topic or topics approved by the Academic Head or nominee.

**PHYSICS 331**
15 Points

Classical Mechanics and Electrodynamics
Advanced topics in classical mechanics and
electromagnetism, including variational and least action principles in mechanics, the physical basis of magnetism, and the four-vector treatment of special relativity and electromagnetism.

Prerequisite: 15 points from PHYSICS 201, 231, 15 points from PHYSICS 202, 261 and 15 points from PHYSICS 211, MATHS 253, 260, ENGSCI 211

Restriction: PHYSICS 315, 325

PHYSICS 332 15 Points
Fluid Mechanics
Surveys fluid mechanics using the Navier-Stokes equations, covering Newtonian and simple non-Newtonian fluids, and examples from soft condensed matter. Different flow regimes will be studied, from small-scale laminar flows to large-scale turbulent and potential flows, and flows in rotating frames of reference. Applications range from microfluidics to geophysical fluids. Numerical approaches and computational tools will be introduced.

Prerequisite: 15 points from PHYSICS 201, 231 and 15 points from PHYSICS 211, MATHS 253, 260, ENGSCI 211

PHYSICS 333 15 Points
Lasers and Electromagnetic Waves
Surveys the basic principles of lasers and explains how the behaviour and propagation of light can be understood in terms of electromagnetic waves described by Maxwell's equations. The theory and applications of several key optical components will be described, including lasers and resonators.

Prerequisite: 15 points from PHYSICS 202, 261 and 15 points from PHYSICS 211, MATHS 253, 260, ENGSCI 211

Restriction: PHYSICS 326

PHYSICS 334 15 Points
Statistical Physics and Condensed Matter
Covers statistical physics and condensed matter physics, and describes how macroscopic properties of physical systems arise from microscopic dynamics. Topics in statistical physics include temperature, the partition function and connections with classical thermodynamics. Topics in condensed matter physics include crystal structures, phonons, electronic band theory, and semiconductors.

Prerequisite: 15 points from PHYSICS 201, 231, 15 points from PHYSICS 203, 251 and 15 points from PHYSICS 211, MATHS 253, 260, ENGSCI 211

Restriction: PHYSICS 315, 354

PHYSICS 335 15 Points
Quantum Mechanics
Develops non-relativistic quantum mechanics with applications to the physics of atoms and molecules and to quantum information theory. Topics include the Stern-Gerlach effect, spin-orbit coupling, Bell's inequalities, interactions of atoms with light, and the interactions of identical particles.

Prerequisite: 15 points from PHYSICS 203, 251 and 15 points from PHYSICS 211, MATHS 253, 260, ENGSCI 211

Restriction: PHYSICS 350

PHYSICS 340 15 Points
Electronics and Signal Processing
Electronics and digital signal processing with a strong emphasis on practical circuit design and data acquisition techniques. Topics will be selected from: linear circuit theory, analytical and numeric network analysis, feedback and oscillation, operational amplifier circuits, Fourier theory, sampling theory, digital filter design, and the fast Fourier transform.

Prerequisite: PHYSICS 240 or 244

Restriction: PHYSICS 341

Concurrent enrolment in PHYSICS 390 is recommended

PHYSICS 346 15 Points
Particle Physics and Astrophysics
Particle physics topics covered will include relativistic dynamics and application to fundamental particle interactions, the properties of strong, weak and electromagnetic interactions and the particle zoo. Astrophysics topics will include some of the following: the Big Bang, "concordance cosmology", redshifts, theories of dark matter, extra-solar planets, stellar evolution, supernovae, gravitational wave sources, nuclear astrophysics and the origin of the elements.

Prerequisite: 15 points from PHYSICS 201, 231, 15 points from PHYSICS 203, 251 and 15 points from PHYSICS 211, MATHS 253, 260, ENGSCI 211

Restriction: PHYSICS 355

Concurrent enrolment in PHYSICS 390 is recommended

PHYSICS 371 15 Points
Special Topic

PHYSICS 390 15 Points
Experimental Physics
Covers advanced experimental techniques, giving students choices between a wide range of classic physics experiments and open-ended investigations of physical phenomena.

Prerequisite: 15 points from PHYSICS 201, 202, 203, 231, 240, 244, 251, 261

PHYSICS 399 15 Points
Capstone: Physics
Students will undertake experimental, observational, computational and numerical investigations of key physical phenomena, working individually and in groups, producing both written and oral reports.

Prerequisite: 30 points from PHYSICS 201-261 and 30 points from PHYSICS 309-356

Diploma Courses

PHYSICS 624 15 Points
Mechanics and Electrodynamics
Advanced topics in classical mechanics and electromagnetism, including variational and least action principles in mechanics, the physical basis of magnetism, and the four-vector treatment of special relativity and electromagnetism. Advanced Laboratory work is included in relevant topics.

Prerequisite: Departmental approval

PHYSICS 703
Advanced Quantum Mechanics
15 Points
An advanced development of nonrelativistic quantum mechanics in the Dirac formulation is presented. Emphasis is placed on the simplicity and generality of the formal structure, lifting the reliance of introductory courses on wave mechanics.

PHYSICS 715
Directed Study
15 Points
Enrolment requires approval of the Head of Department and the choice of subject will depend on staff availability or on the needs of particular students. 
Prerequisite: Departmental approval

PHYSICS 741
Advanced Classical Mechanics and Electrodynamics
15 Points
Develops and deepens students’ knowledge and understanding of advanced topics in classical mechanics and electromagnetism, including variational and least action principles in mechanics, the physical basis of magnetism; and the four-vector treatment of special relativity and electromagnetism. 
Restriction: PHYSICS 331, 705

PHYSICS 742
Advanced Statistical Mechanics and Condensed Matter
15 Points
Advanced concepts in statistical mechanics and condensed matter. Topics to be covered include the theory of magnetism, mean field theory, the Ising model, superconductivity, phase transitions, complex systems, and networks. 
Restriction: PHYSICS 708

PHYSICS 743
Waves and Potentials
15 Points
Presents the universal mathematical physics of waves and potential fields and discusses related applications. Topics include derivations and solutions for electromagnetic and elastic wave equations, propagation of waves in media, reflection and transmission of waves at interfaces, guided waves in geophysics and optics, and fundamentals of potential theory.

PHYSICS 746
Relativistic Quantum Mechanics and Field Theory
15 Points
Examines quantum field theory. Covers the relativistic generalisations of the Schrödinger equation and many-particle quantum mechanics, quantum electrodynamics is explored using Feynman diagram techniques. Extensions of scalar field theory to include path integrals, statistical field theory, broken symmetry, renormalisation and the renormalisation group. 
Restriction: PHYSICS 706, 755

PHYSICS 748
General Relativity
15 Points
Discusses Einstein’s General Theory of Relativity with application to astrophysical problems, drawn from black hole physics, gravitational waves, cosmology, astrophysical lensing and solar system and terrestrial tests of the theory. The course includes the mathematical background needed to describe curved spacetimes in arbitrary coordinate systems and the covariant description of fundamental physical relationships.

PHYSICS 751
Special Topic
15 Points

PHYSICS 752
Photonics
15 Points
Advanced topics in photonics including optical detection, semiconductor and modelocked lasers, the propagation of light in optical fibres, and the physics and applications of nonlinear optics. 
Restriction: PHYSICS 726, 727

PHYSICS 753
The Dynamic Universe
15 Points
Covers topics in modern astronomy and astrophysics relating to the evolution and dynamics of key astrophysical systems. Topics will be drawn from: stellar structure and stellar evolution; the formation of planets and the evolution of planetary systems; stellar and galactic dynamics; the large scale dynamical behaviour of the expanding universe.

PHYSICS 754
Condensed Matter Physics
15 Points
Covers topics and methods that are important for current condensed matter research. Topics include ferroelectricity, soft condensed matter, experimental materials physics, electronic structure theory, techniques for condensed matter simulation, and renormalisation group theory.

PHYSICS 757
Quantum Optics and Quantum Information
15 Points
The nonrelativistic quantum treatment of electromagnetic radiation (light) and its interaction with matter (atoms, quantum dots, superconducting qubits) is presented. Emphasis is placed on what is strictly quantum mechanical about light compared with a description in terms of Maxwell waves, and on the concepts and methods underlying modern advances in quantum measurement theory and quantum technologies, e.g., quantum communication/ cryptography and quantum simulation/computation. 
Restriction: PHYSICS 760

PHYSICS 780
Advanced Imaging Technologies
15 Points
Covers the physical basis and use of new imaging
technologies and data processing in medicine, biomedicine and biotechnology. Makes use of practical examples from techniques such as computer assisted tomography, nonlinear microscopy, optical coherence tomography, fluorescence or microarray analysis. No formal prerequisite, but an understanding of material to at least a B grade standard in PHYSICS 244, 340, and 15 points from PHYSICS 211, MATHS 253, 260, ENGSCI 211 is recommended.

PSYCH 109G 15 Points
Mind, Brain and Behaviour
Topics covered may include: the nature of sensory and perceptual processes, the cause of perceptual illusions, the structure and function of the human brain, approaches to animal and human learning, models of human language and memory, and the design of psychological experiments. A laboratory component, in which students are required to participate as subjects, forms part of the course.

Stage II

PSYCH 200 15 Points
Foundations of Developmental Psychology
How do children’s minds develop, how do they work, and how do they influence children’s behaviour? Students will learn the theoretical perspectives and methods that scientists use to investigate the developing mind in infancy through late childhood. Topics of particular focus include learning and memory, concepts and categories, language, the self and identity, social cognition, attachment, and emotion.
Prerequisite: 30 points at Stage I in Psychology

PSYCH 201 15 Points
Perception and Cognition
An introduction to a variety of topics in human experimental psychology. Topics covered may include: perceptual processes, attention, memory, mental imagery, language development, theory of mind, problem solving and decision making. Participation in the laboratory component of this course is compulsory.
Prerequisite: 30 points at Stage I in Psychology

PSYCH 202 15 Points
Biopsychology
Provides a basic introduction to the structure and function of the brain, neuropsychology, and genetic and hormonal influences on behaviour. This course includes a compulsory laboratory component.
Prerequisite: 30 points at Stage I in Psychology or 15 points from BIOSCI 101, 103

PSYCH 203 15 Points
Learning and Behaviour
A consideration of the environmental factors that control and modify animal (including human) behaviour. Generally, an experimental laboratory approach is taken, and quantitative theories are stressed. Topics include: classical and operant conditioning, theories of reinforcement, the stimulus control of operant behaviour, behavioural analyses of problem solving, concept learning and language, choice, self control, remembering and experimental design. This course includes a compulsory laboratory component.
Prerequisite: 30 points at Stage I in Psychology or 15 points from BIOSCI 101, 103

PSYCH 204 15 Points
Social Psychology
Focuses on humans as social beings. Covers topics such as social cognition, attitudes, group processes, interpersonal relationships, and language communication. The course may include participation in and completion of a research project.
Prerequisite: 30 points at Stage I in Psychology

PSYCH 207 15 Points
Theories of Personality and Development
The major personality theories are presented including: Behavioural, Cognitive, Social-Cognitive, Psychodynamic, Humanistic/Phenomenological, Trait/Dispositional and Biological/Evolutionary. The hypotheses generated by these theories, about development from early childhood onwards and about ‘normal’ and ‘abnormal’ behaviour, will be discussed and evaluated in terms of empirical evidence and utility. Attention will be paid to cultural issues of relevance in a New Zealand context.

**PSYCH 208**

Producing Psychological Knowledge

How do you go about answering a research question? What is a research question anyway? Which research methodology and method will best provide the types of answers you are looking for? Examines what we do and can know in psychology, and why and how we know it, including philosophy of science, methodology, ethics, research outcomes, and particular methods.

Prerequisite: 30 points at Stage I in Psychology

**PSYCH 209**

Special Topic

**PSYCH 211**

Psychology for Society

Examines what we do and can know in psychology, and why and how we know it, including philosophy of science, methodology, ethics, research outcomes, and particular methods. Embeds a focus on the cultural context of Aotearoa/New Zealand within which psychological knowledge is applied. Introduces broad content in preparation for more advanced study.

Prerequisite: 30 points at Stage I in Psychology

**PSYCH 300**

Applied Psychology

Discusses psychological issues relating to illnesses and well-being of people in the workplace. Consideration will be given both to the theoretical models which have been developed and to the types of methodology used in their investigation. Emphasis is given to the interplay between science and practice.

Prerequisite: 45 points at Stage II in Psychology and 15 points from STATS 100-125

**PSYCH 302**

Special Topic

Prerequisite: 45 points at Stage II in Psychology and 15 points from STATS 100-125

**PSYCH 303**

Cognitive Science

Provides an introduction to cognitive science and cognitive neuroscience. Topics covered include: visual and auditory perception, attention, memory, thinking and problem-solving. Participation in the laboratory component of this course is compulsory.

Prerequisite: 45 points at Stage II in Psychology and 15 points from STATS 100-125

**PSYCH 304**

Special Topic

Prerequisite: 45 points at Stage II in Psychology and 15 points from STATS 100-125

**PSYCH 305**

Human Neuroscience

Covers material relating to the neural basis of cognitive processes, including perception, attention, memory and language. Students will be introduced to different methods of inferring mind-brain relations in normal and neurologically-impaired individuals, and different ways of conceptualising mind-brain relations, such as connectionism and modularism.

Prerequisite: 45 points at Stage II in Psychology and 15 points from STATS 100-125, or MEDSCI 206 or PHYSIOL 220

**PSYCH 306**

Research Methods in Psychology

Deals with principles and practices relevant to psychological research, including philosophy of science, research ethics, research design, measurement of dependent variables, describing and analysing data, and interpreting results. Participation in the laboratory component of this course is compulsory.

Prerequisite: 45 points at Stage II in Psychology and 15 points from STATS 100-125

**PSYCH 308**

Special Topic

**PSYCH 308A**

Directed Study

A course of research supervised by a staff member and written up as a course for publication instead of a final examination.

Prerequisite: 45 points at Stage II in Psychology and 15 points from STATS 100-125

Corequisite: Student must be enrolled in (or have completed) an additional 45 points at Stage III in Psychology courses and Programme Director approval

To complete this course students must enrol in PSYCH 308 A and B, or PSYCH 308

**PSYCH 309**

Learning

A discussion of how behaviour is controlled and modified by discriminative stimuli and by consequential reinforcers and punishers. The emphasis is on laboratory research with animals, but with some human data also considered. Topics include: choice behaviour, punishment, avoidance, psychophysics, memory, and cognition. This course includes a compulsory laboratory component.

Prerequisite: 45 points at Stage II in Psychology and 15 points from STATS 100-125, or 45 points at Stage II in Biological Sciences

Restriction: PSYCH 362

**PSYCH 310**

Introduction to Clinical Psychology

Describes and evaluates psychological approaches to the assessment and treatment of those mental health problems, in adults and children, most commonly encountered by clinical psychologists. Consideration is given to work in mental health, corrections, child protection and neuropsychology rehabilitation. Issues relevant to Māori mental health, gender, cross-cultural work and prevention are included.

Prerequisite: 45 points at Stage II in Psychology and 15 points from STATS 100-125

**PSYCH 311**

Advanced Topics in Social Psychology

Focuses on a number of key topics in social psychology. Modules examine interpersonal influence and close relationships, collective behaviour, prejudice and social issues, and social identity and well-being.

Prerequisite: 45 points at Stage II in Psychology and 15 points from STATS 100-125

**PSYCH 312**

Psychology of Communication

Studies the links between psychological processes and communication difficulties. Hearing, speech, language and voice will be covered. A range of communication difficulties and communication differences will be introduced and the psychosocial aspects will be discussed, including impact on self-esteem, health-related quality of life,
peer/interpersonal relationships and educational and behavioural consequences in children and adults.
Prerequisite: 45 points at Stage II in Psychology and 15 points from STATS 100-125

**PSYCH 315**  
15 Points  
Special Topic

**PSYCH 317**  
15 Points  
Evolution, Behaviour and Cognition
How does behaviour in non-human animals evolve? Do other animals have language? Do they have culture? Can human behaviour be explained in evolutionary terms? This course addresses these questions and the methods that can be used to answer them.
Prerequisite: 45 points at Stage II in Psychology and 15 points from STATS 100-125, or 45 points at Stage II in Biological Sciences

**PSYCH 319**  
15 Points  
Psychology and Gender
The study of gender is crucial to understanding many everyday aspects of our lives, as well as many contemporary social issues. This course provides an introduction to selected key issues in the critical psychology of gender, from a social constructionist perspective. Topics that will be covered include gendered bodies, masculinity and femininity, sexuality, rape, and mental health.
Prerequisite: 45 points at Stage II in Psychology and 15 points from STATS 100-125, or 30 points at Stage II in Gender Studies

**PSYCH 320**  
15 Points  
Culture and Psychology
It is through culture that we make sense of ourselves and our world. Of key interest is how culture, ethnicity and context all play a major role in understanding human experience including behaviour, thoughts, and emotions. Emphasis is placed on critical thinking and analytic skills, and helping students think about their own values and norms from a cultural perspective.
Prerequisite: 45 points at Stage II in Psychology and 15 points from STATS 100-125

**PSYCH 323**  
30 Points  
Changes across the Lifespan
Development is a lifelong process. Classic and modern theories of development provide a foundation for understanding changes and continuities across the lifespan. Students will learn how we develop key social, emotional, and cognitive abilities across infancy, childhood, adolescence, and adulthood. Developmental psychology will then be applied to understand developmental challenges, atypical development, and the role of social context.
Prerequisite: PSYCH 211

**PSYCH 324**  
30 Points  
The Behaving Brain
Human brains are enormously complex, and they serve a wide range of human needs, from perception to language to social interactions. Brains are also subject to growth, learning, insult, and ageing. Introduces research and theory on neural and cognitive science, as well as opportunities to apply this knowledge.
Prerequisite: PSYCH 211

**PSYCH 325**  
30 Points  
Social Processes
Social processes heavily influence how we think, feel, and behave. Students will learn about how social cognition, social influence, attitudes, politics, and identity shape our lived experiences. Explores various topics, which may include prejudice and intergroup relationships, romantic relationships, workplace and organisational dynamics, gendered practices, indigenous psychologies, and the evolution of religion.
Prerequisite: PSYCH 211

**PSYCH 326**  
15 Points  
Life Span Development
The development of people across the life span is studied. Describes key milestones in development and examines the causes and processes that produce stability and change in people's development over time. Topics discussed will include aspects of cognitive, social and physical development with consideration given to biological, societal and family influences. Attention will also be given to development within the New Zealand context.
Prerequisite: 45 points at Stage II in Psychology and 15 points from STATS 100-125  
Restriction: PSYCH 316

**PSYCH 327**

Special Topic

**PSYCH 329**  
15 Points  
Research Project
The main focus of the research project is to undertake practical research-related activities under the direction of a supervisor. The work undertaken will be communicated by the student in the form of a research report. The research activities across the year will give students a broader experience of research and academic activities in the School of Psychology.
Prerequisite: 45 points at Stage II in Psychology and 15 points from STATS 100-125  
Corequisite: 45 points at Stage III or above in Psychology and Head of School approval
Restriction: PSYCH 308  
To complete this course students must enrol in PSYCH 370 A and B, or PSYCH 370

**PSYCH 330**  
15 Points  
Capstone: Communicating Psychology
Focuses on communicating psychological ideas and research using different media (e.g., podcast, short film, print media, symposia, grant proposals). Students will be required to work in groups, but to also engage in individual activities to demonstrate their own understanding of the topics explored by them and others in this course.
Prerequisite: 30 points at Stage III in Psychology and 15 points from STATS 100-125

**Diploma Courses**

**PSYCH 651A**  
30 Points

**PSYCH 651B**  
30 Points

**Practicum**
This includes a practical component of up to 1,500 hours of supervised work in an approved applied psychology setting, with an emphasis on the application of research principles and designs. Evaluation is by internal assessment and assessment by field supervisors.
Restriction: PSYCH 650  
To complete this course students must enrol in PSYCH 651 A and B

</tbody>
</table>
PSYCH 726
Emotion and Identity
Explores current psychological theory and research on emotion, adding perspectives from sociology, history and cultural studies as well as neuroscience. Topics include the embodied nature of affect; emotion, relationships and social life; emotion and sense of self, subjectivity, narrative and personal history; emotional contagion in crowds and groups; and the power of social norms around public emotional expression.

PSYCH 727
Functional MRI
A comprehensive overview of functional magnetic resonance imaging (fMRI) with a focus on its use in the cognitive neuroscience of memory and aging. Designed for beginners, topics include experimental design, image acquisition and pre-processing, analysis methods, localisation/anatomy and interpretation. Classes will include a lecture and/or a seminar followed by a hands-on laboratory working with fMRI data to consolidate learning.

PSYCH 728 30 Points
PSYCH 728A 15 Points
PSYCH 728B 15 Points
Portfolio in ABA
A series of written clinical assessment and intervention projects in applied behaviour analysis demonstrating appropriate use of the scientist-practitioner model. Projects will be conducted within each of the placements completed during the internship course PSYCH 651. The portfolio should provide evidence of appropriate mastery of basic behaviour-analytic skills, client-centred responsibilities, and foundational knowledge of applied behaviour analysis.

To complete this course students must enrol in PSYCH 728 A and B, or PSYCH 728

PSYCH 746 15 Points
Perception, Cognition, Action
Seminar-based introduction to theories and models linking (human, animal and machine) perception, cognition and action, with emphasis on competing approaches to perceptual-motor control and learning, using evidence from classic and contemporary research in experimental psychology and cognitive neuroscience.

PSYCH 747 15 Points
Work and Well-Being
Reviews concepts, methods, applications and current research relevant to the impact of work on employee wellbeing, including topics such as the employee lifecycle, stress, well-being, positive psychology, emotion, bullying and work-life balance.

PSYCH 749 15 Points
Applied Behaviour Analysis Ethics
Investigates the similarities and differences between the NZPB and BACB codes and discusses how to reconcile the two in practical situations. Discusses the current legislation
and frameworks that apply to clinicians working with vulnerable people, and the impact of culture when applying codes and working ethically. Different methods of ethical problem solving are covered.

To complete this course students must enrol in PSYCH 749 A and B, or PSYCH 749

PSYCH 750A  15 Points
PSYCH 750B  15 Points

ABA: Methods and Measurement
A study of the underlying concepts and principles involved with modifying an individual human or animal's behaviour in some applied setting. Appropriate and effective applications of scientific principles of learning will be taught, as will pertinent topics researched in the Experimental Analysis of Behaviour. Topics will include the application of research into associative learning, reinforcement, punishment, extinction, avoidance, stimulus control and choice.

To complete this course students must enrol in PSYCH 750 A and B

PSYCH 751A  15 Points
PSYCH 751B  15 Points

ABA: Concepts and Principles
A study of the techniques and issues involved with modifying an individual human or animal's behaviour in some applied setting. Appropriate and effective applications of scientific principles of learning will be taught, as will pertinent topics researched in the Experimental Analysis of Behaviour. Topics will include the application of research into associative learning, reinforcement, punishment, extinction, avoidance, stimulus control and choice.

To complete this course students must enrol in PSYCH 751 A and B

PSYCH 754  15 Points

Developmental and Intellectual Disabilities
Study of the behavioural aspects, aetiologies and therapeutic interventions for disorders usually diagnosed during childhood that are associated with reduced abilities to learn. Examples include intellectual disabilities (mental retardation) and pervasive developmental disorders (e.g., autism).

Restriction: PSYCH 752

PSYCH 755  15 Points

Gender, Power, and Sexuality
This seminar-based course will allow students to explore a broad range of topics such as: sexual coercion, prostitution, rape, pornography, safer sex, lesbian and gay sexuality, heterosexuality, bisexuality, sexuality, sex therapy, intersex, transgender, sexuality and culture. The emphasis will be on looking at questions from the perspective of theoretical approaches such as Foucault's work on sexuality and feminist theories.

PSYCH 756  15 Points

Dynamics of Brain and Behaviour
Examines the behavioural and neural changes that result from normal development, those that may arise in the context of neurological diseases and disorders, and the changes that can be elicited via interventions. Topics include the design and implementation of interventions to improve mental and physical health, methods to evaluate characteristics of change, and the precise mechanisms of neural and behavioural change. Recommended preparation: PSYCH 305

PSYCH 757  15 Points
PSYCH 757A  7.5 Points
PSYCH 757B  7.5 Points

Advanced Applied Behaviour Analysis
Advanced education and training in applied behaviour analysis (ABA) in preparation for a professional career. Topics include ethical, professional, and practical issues confronting behaviour analysts in employment; recent research in ABA and other sciences with respect to clinical, educational, and other populations with whom behaviour analysts typically work.

Prerequisite: PSYCH 750, 751
Corequisite: PSYCH 651
Restriction: PSYCH 753

To complete this course students must enrol in PSYCH 757 A and B, or PSYCH 757

PSYCH 758  15 Points

Ethnicity, Identity and Culture
Students will draw upon Indigenous and cultural psychological frameworks to examine how psychological research is conducted with ethnic communities, and will examine the influences of culture, values and beliefs across selected topics (e.g. resiliency, language and masculinity).

PSYCH 759  15 Points

Advanced Behavioural Psychology
Examination of selected topics in contemporary behavioural psychology. The specific topics covered depend partly on student interest, exploring research on the relation between behaviour and environment, considering both animal and human behaviour, and both lab-based research and translation of that research into understanding behaviour of significance to society.

PSYCH 761  15 Points

Organisational Psychology
Focuses on attitudes and behaviours at work that reflect or impact on the relationship between employee and employer, with a particular emphasis on topics that are proposed to impact on employee well-being and productivity (e.g., job satisfaction, motivation, leadership). Students will be encouraged to adopt a scientist-practitioner perspective, through class discussions and assignments.

PSYCH 763A  22.5 Points
PSYCH 763B  22.5 Points

Portfolio of Professional Practice Reports
A portfolio of original reports associated with the student's practicum experience and demonstrating the ability to make appropriate use of the scientific literature in solving problems in professional practice, as required by the New Zealand Psychologists Board for the practice of psychology.

Corequisite: PSYCH 651

To complete this course students must enrol in PSYCH 763 A and B

PSYCH 764  15 Points

Dual Process Theories of Human Cognition
Explores how dual-process theories in cognitive, social and developmental psychology account for human thought and action in terms of the interaction between automatic (implicit, parallel) and controlled (explicit, serial) processes. Topics of focus include memory, learning, numerical cognition, theory of mind, moral reasoning, attribution, executive functioning and decision making.

PSYCH 765  15 Points

Special Topic: Pacific Psychologies
Explores how Pacific knowledges and worldviews shape and
are shaped by Pacific communities to make meaning of and respond to a broad range of topics relevant to psychology.

**PSYCH 766**

**Occupational Health Psychology**

Students will focus on the in-depth treatment of this area, focusing primarily on occupational stress, including coverage of topics such as: work, life, and family, job insecurity, workplace incivility, abusive supervision, positive aspects of workplaces, as well as stress management interventions.

**PSYCH 767**

**Gender Violence**

What does it mean to say that violence is gendered? How does a gender analysis shape our understanding of the nature of problems like sexual violence, domestic violence, street harassment and online abuse? And how does it guide our responses to the harm of violence and our strategies for prevention? This course will bring a critical feminist lens to understanding key questions, theories and debates in research on gender violence.

**PSYCH 768**

**Special Topic: Sex and Well-Being**

**PSYCH 769**

**Special Topic: Developmental Psychology: A Critical Lens**

**PSYCH 770**

**Behavioural Insights**

Explores how cognitive biases and errors cause us to behave in irrational ways and how nudging and debiasing can mitigate these effects. Introduces students to methods to run behavioural insight analyses in real-world settings.

**PSYCH 771A**

**Clinical Practice 1 and Professional Issues**

Consists of two parts: First, psychological assessment and therapy for diverse clinical populations, including adult, and child and family. Cognitive behaviour therapy and family therapy are central, but other models are included. Consideration of psychotherapy research and practical exercises are incorporated. Secondly, ethics, bicultural and cross-cultural practice, and other professional issues relevant to the practice of clinical psychology are covered. Evaluation is by internal assessment.

*To complete this course students must enrol in PSYCH 771 A and B*

**PSYCH 772A**

**Clinical Practice 2**

Advanced psychological assessment and therapy for diverse clinical populations, including adult, and child and family. Cognitive behaviour therapy, narrative therapy, psychodynamic therapy, and the trauma model are emphasised. Includes two, 200 hour placements, in either an adult setting or a child and family setting. Evaluation is by internal assessment, including assessment by field supervisors.

*To complete this course students must enrol in PSYCH 772 A and B*

**PSYCH 773A**

**Clinical Internship**

Includes a practical component of supervised clinical work of not less than 1500 hours in an approved health setting. Emphasis is placed on the application of research principles and designs in routing clinical practice. A university-based seminar series that covers topics relevant to advanced, intern-level practice is included. Evaluation is by internal assessment, and assessment by field supervisors.

*To complete this course students must enrol in PSYCH 773 A and B*

**PSYCH 774A**

**Clinical Internship Part Time**

Includes a practical component of supervised clinical work of not less than 1500 hours in an approved health setting. Emphasis is placed on the application of research principles and designs in routing clinical practice. A university-based seminar series that covers topics relevant to advanced, intern-level practice is included. Evaluation is by internal assessment, and assessment by field supervisors.

*To complete this course students must enrol in PSYCH 774 A and B*

**PSYCH 775**

**Special Topic: Visual perception in brains and machines**

Explores current debates on how to build and assess computational models of human visual perception. Students will learn how state-of-the-art artificial systems perform visual tasks, and gain hands-on experience interacting with these systems. Literature from the field of visual neuroscience will examine the ways in which these models may work similarly to, and differently from, human vision.

**PSYCH 776**

**Special Topic: Psychology of Music**

Music is a cultural signature of our species, appearing frequently in daily life, across human societies, and throughout our history with striking diversity. This course will provide an in-depth exploration of the psychology of music.

**PSYCH 777**

**Special Topic: Illusory Line Motion**

**PSYCH 778**

**Topics in Sensation and Perception**

A range of topics in Sensation and Perception will be explored, including those of applied interest, experimental approaches, and methods. Examples include cross-modal effects on taste perception, misophonia and misokinesia, the five basic tastes, false memory for foods, threshold estimation, preference testing, the auditory sensory meridian response, and other contemporary topics.

**PSYCH 779A**

**Research and Communication Skills - Level 9**

Advanced skills associated with developing innovative research designs and communicating information about research designs, outcomes, and the implications of one's findings are essential to the research process. Students will undertake exercises designed to develop these advanced skills, including writing a research proposal, presenting a seminar on their research project, preparing and presenting a research poster, and additional seminar-based exercises directed at research skill development.

*Corequisite: PSYCH 780*

*Restriction: PSYCH 788, 789*

*To complete this course students must enrol in PSYCH 779 A and B*

Psychology

Postgraduate 700 Level Courses

PSYCHOL 700 15 Points

Special Topic: Wairua, Wellbeing and Cultural Considerations
Wairua is multi-faceted and central to holistic wellbeing. This course privileges Mātauranga Māori in the exploration of wairua and wellbeing and will provide a strong foundation for working with Māori. Students engage with topics relevant to indigenous cultural considerations in psychological research and practice. Includes self-reflection and group work in a wānanga/noho marae setting.

PSYCHOL 701 15 Points

Special Topic

Named Doctoral Courses

PSYCH 800 120 Points

Scientist-practitioner Model
Advanced research based psychological assessment and therapy skills for diverse ages, cultures and clinical settings, and for complex clinical issues. Cognitive, behavioural, systemic, and mātauranga Māori models are central. Development of leadership, integrity, cultural sensitivity and other professional competences to allow registration with the New Zealand Psychologists Board. Supervised practicum experience includes three 200-hour placements and a 1,500 hour internship.

PSYCH 801 30 Points

Scientist-practitioner Model 1
Research based psychological assessment and therapy skills for diverse clinical populations, including adult, child and family. Cognitive-behaviour therapy and family therapy are central, but other models are included. Advanced clinical research design, ethics, bicultural and cross-cultural practice, supervision practice, and other professional issues relevant to the practice of clinical psychology are covered. Evaluation is by internal assessment. Includes one 200-hour placement in either an adult or a child and family setting. Evaluation is by internal assessment, including assessment by field supervisors.

PSYCH 802 30 Points

Scientist-practitioner Model 2
Advanced psychological assessment and therapy skills for diverse clinical populations, including adult, and child and family. Cognitive-behaviour therapy, family therapy, narrative therapy, psychodynamic therapy, and the trauma model are emphasised. Includes two 200-hour placements, in either an adult setting or child and family setting. One of these may, depending on staff availability, be in a specialist setting. Options may include: clinical neuropsychology, forensic psychology, assessment and psychological treatment of psychoses, child and adolescent clinical psychology, drug and alcohol addiction, and others. Evaluation is by internal assessment, including assessment by field supervisors.

PSYCH 803 60 Points

Internship
This includes a practical component of supervised clinical work of not less than 1,500 hours in an approved setting. Emphasis is placed on the application of research principles and designs in routine psychological clinical practice. A university based seminar course that covers topics relevant to advanced, intern-level practice is included. Evaluation is by internal assessment, and assessment by field supervisors.

PSYCH 897 90 Points

Portfolio of Clinical Research
Five original research projects demonstrating appropriate use of the scientist-practitioner model (single case design, programme evaluation or group research may be included). One project will be conducted within each of the three placements associated with the courses PSYCH 801 and 802, and two within the Internship, PSYCH 803. At least one project should be related to research with an adult population, and at least one with a child and family population. The Portfolio will be examined by two internal academic psychologists and assessed by the two external Thesis examiners.

PSYCH 899 150 Points

Thesis
An original research dissertation completed over the three years of the degree (75 points in year 1, 60 points in year 2, and 15 points in year 3). The research may be basic or applied, but must be relevant to some area of clinical psychology and represent a significant contribution to knowledge in the field.

Restriction: PSYCH 894, 895
Pūtaiao

Stage II

PŪTAIAO 200
Mātauranga and Kaupapa Māori Science
15 Points
Mātauranga is central to the future practice of science in Aotearoa New Zealand. Explores foundational understandings of mātauranga Māori and Kaupapa Māori for scientists. Students will meaningfully and respectfully engage with te ao Māori through place-based relational learning and case studies grounded in whanaungatanga. Students will experience Māori ways of being, knowing, and doing.
Prerequisite: 60 points at Stage I

Regional Development

Postgraduate 700 Level Courses

REGDEV 701 Regional Futures
15 Points
Examines the changing nature of the region as a spatial category of social and political economy. The course draws on place-based understandings of regional development to address how regions are being reassembled and what that means for the futures of people and place. Particular reference, in the New Zealand context, is made to the interconnections between regional and iwi developments.

Science Enterprise

Postgraduate 700 Level Courses

SCIENT 701 Accounting and Finance for Scientists
15 Points
Builds upon scientific numeracy in exploring the sources, uses and reporting of accounting and financial information in science-based enterprises; application of capital budgeting and valuation theory to science-relevant situations; and key bases for financially-informed project and enterprise decision-making and the management of economic resources.

SCIENT 702 Marketing for Scientific and Technical Personnel
15 Points
Examines the intermediaries and end-users of technical and research-related applications, products and services; their 'customers', 'value chain', 'marketing', and related concepts in both highly-regulated and open markets; and how effective science-related marketing strategies and promotional efforts are developed and communicated.

SCIENT 703 Frontiers in Biotechnology - Level 9
15 Points
An examination of how breakthrough discoveries in contemporary life sciences develop through to commercialisation. Students will integrate their advanced biological skills with business knowledge to critically analyse the commercialisation of scientific discoveries and communicate their findings effectively to both scientists and industry stakeholders.

SCIENT 704 Law and Intellectual Property
15 Points
An explanation of the legal system including basic concepts of contract and corporate law in a biotechnology context. Emphasis will be upon intellectual property laws in particular patent law and practice and other means of protecting new ideas, discoveries and inventions. Also covered will be technology licensing and basic competition and marketing law.

SCIENT 705 Research Commercialisation
15 Points
Integrative exploration of common theories, processes and models involved in commercialising scientific research. Topics include technology transfer, technological entrepreneurship, commercial potential, risk, and valuation assessment and related tools. Utilises multiple learning approaches including case studies and a 'hands-on' term project.
Prerequisite: SCIENT 701, 702

SCIENT 706 Commercialisation Project
15 Points
A supervised practical application of the theories, concepts and techniques of commercialisation, covered in courses SCIENT 701-705, to a research-based opportunity and its related intellectual property estate.
Prerequisite: SCIENT 701, 702, 704
Corequisite: SCIENT 703, 705

SCIENT 707 Special Topic
15 Points

SCIENT 720 Science Enterprise Research Methods
15 Points
Students will become familiar with underlying theory and best practices in the principal qualitative and quantitative methods applicable to, and useful in, thesis research on commercialisation and science-based enterprise.

SCIENT 721 Product Development and Regulatory Environments
15 Points
Aims to give students an understanding of the stages of product development for therapeutics, diagnostics and medical devices, as well as the regulatory requirements affecting product development in the Life Sciences. Project management tools and processes will also be covered in the context of product development.

SCIENT 722 Current Issues in Bioscience Enterprise
15 Points
An exploration of trends and developments of importance to Life Sciences-related enterprises and industries. Utilises multiple learning approaches, e.g., independent reading, case studies, projects, guest speakers, presentations and related discussions.

SCIENT 794A Thesis - Level 9
45 Points
Research project addressing a topic relevant to the commercialisation of research. Overseen jointly by both academic and industry supervisors.
To complete this course students must enrol in SCIENT 794 A and B

SCIENT 795A Thesis - Level 9
30 Points
SCIENT 795B
60 Points
Research project addressing a topic relevant to the commercialisation of research. Overseen jointly by both academic and industry supervisors.
To complete this course students must enrol in SCIENT 795 A and B
Science General

Stage I

SCIGEN 101  
SCIGEN 101G  
**Communicating in a Knowledge Society**

Effective communication is required for specialists in all fields to engage meaningfully with society. In this course students gain an understanding of the important role communication plays in a knowledge society. Through case studies and practical experience students learn about the responsibilities and skills required to communicate with a variety of audiences. They learn how to effectively manage and present data and practice oral, written, visual and electronic communication.

SCIGEN 102  
SCIGEN 102G  
**Contemporary Science in Aotearoa New Zealand**

What does it mean to do science here and now? This course considers how knowledge of place enhances your learning, the significance of Te Tiriti o Waitangi, and how knowledge systems frame understanding. Students will think critically about the relationships between science and our environment, along with the ethics of science in practice.

SCIGEN 189  
**Special Topic**

Selected topics in Science designed as a short credit course for exchange students coming to New Zealand. This course is only available to inbound exchange students.

Prerequisite: Permission of Head of Department

Stage II

SCIGEN 201  
SCIGEN 201G  
**Innovating in a Knowledge Society**

Interdisciplinary examination of science innovation at policy, organisational and project levels including context, impacts and roles of business and research organisations, and ways innovations are presented and received. Case study analysis of the business environment including how innovation is both enabled and constrained in science-based organisations and society, and innovation strategies in science-based organisations.

Stage III

SCIGEN 301  
SCIGEN 301G  
**Engaging in a Knowledge Society**

Addressing complex issues requires knowledge experts to engage with a variety of people. Solutions will be gained from collaborations that co-produce knowledge in transdisciplinary partnerships that lead to new ways of thinking. This course explores meaningful ways to engage with communities, and reassesses current ways of knowing and doing.

Prerequisite: Any 180 points

SCIGEN 310  
**Directed Study**

Directed study on a topic or topics approved by the Academic Head.

Prerequisite: Approval of Academic Head or nominee

Science Scholars

Stage I

SCISCHOL 100  
SCISCHOL 100A  
SCISCHOL 100B  
**Science in Action**

An introduction to the big questions in science, approaches to scientific research, and how science and scientists play a role in society. Students will explore scientific knowledge and enquiry from a broad, cross-disciplinary perspective.

Prerequisite: Programme Director approval

Restriction: SCISCHOL 101

To complete this course students must enrol in SCISCHOL 100 A and B, or SCISCHOL 100

Stage II

SCISCHOL 201  
**Introduction to Science and Innovation**

An exploration of issues affecting Science in Society, including governance, funding and policies. Students will also explore the development of modern scientific method and the challenges of engaging in scientific research.

Prerequisite: Programme Director approval

Stage II

SCISCHOL 202  
SCISCHOL 202A  
SCISCHOL 202B  
**Research and Discovery**

An exploration of scientific research skills and communication. Students will develop an understanding of the impact of culture on scientific discovery, the skills
to develop and document a research proposal, and how to communicate scientific work in an area of choice.

**Prerequisite:** Programme Director approval

**To complete this course students must enrol in SCISCHOL 202 A and B, or SCISCHOL 202**

**Notes**

- **Stage III**
  - **SCISCHOL 301**
    - Explores the role of science in relation to the New Zealand and global economy and discusses issues including ownership, exploitation and stewardship of resources, indigenous science, biodiversity and National Science Challenges. Students will also explore the position of science nationally and globally and current scientific debates.
  - **Prerequisite:** Programme Director approval
  - **To complete this course students must enrol in SCISCHOL 301 A and B, or SCISCHOL 302**

- **Speech, Language and Communication Needs in Children 1**
  - The nature of speech, language and communication needs in children is introduced by focusing on pre-verbal and very early communication, the development of speech, language and communication through preschool and primary school ages, and adolescence. Topics will include developmental language disorders and phonological disorders in children as well as contextual approaches to assessment and intervention, incorporating clinical decision-making, cultural and linguistic diversity and evidence-based practices.
  - **Prerequisite:** SCISCHOL 301

- **Communication Disorders in Adults**
  - This course examines theoretical, research and clinical issues in the field of acquired neurogenic communication disorders. It builds on existing knowledge and presents the process of assessment, differential diagnosis, intervention procedures and treatment specifically designed for these conditions. Skills are developed in analysing client-specific approaches, therapeutic programmes and incorporating measures of efficacy into therapy plans.
  - **Prerequisite:** SCISCHOL 301

- **Speech, Language and Communication Needs in Children 2**
  - The study of articulatory phonetics, phonemic transcription using the International Phonetic Alphabet, and the relationship between phonetics and phonology. Additional language analysis covering morphology, syntax, semantics and pragmatics.
  - **Prerequisite:** SCISCHOL 301

- **Anatomy and Physiology for Speech Language Therapy**
  - Anatomy and physiology of speech, language and hearing, including the respiratory, phonatory, articulatory, auditory and peripheral and central nervous systems underlying spoken communication. Application of this knowledge is through manipulation of human models and supported computer laboratories.
progressive conditions, palliative care, lifelong disability and ageing effects on audition and language. It includes highly specialised theoretical and clinical approaches which underpin the content, with implications for SLT practice in the New Zealand context being the predominant focus. Involves an individual management plan for a client resulting in a substantial individual report.

Prerequisite: SPCHSCI 723
Restriction: SPCHSCI 741

SPCHSCI 743 15 Points
Speech, Language and Communication in Needs in Children 2 - Level 9
Extends topics introduced in SPCHSCI 722 by focusing on advanced topics in speech, language and communication needs in children. This includes in-depth learning in speech sound disorders, oromotor difficulties, intellectual and/or physical disability, autism spectrum disorder as well as language disorders in adolescents. Consolidating and extending knowledge of evidence-based practice in child speech and language will include critical evaluation and synthesis of terminology and concepts.

Prerequisite: SPCHSCI 722
Restriction: SPCHSCI 732

SPCHSCI 744 15 Points
Speech Language Therapy Clinical Practicum 4 - Level 9
Clinical practice in a variety of settings with the student demonstrating independent practice and problem solving skills. Involves an individual e-portfolio which includes management session plans with clients as well as peer and supervisor feedback. Supervisory guidance will be given and the course will be supported by weekly tutorials.

Prerequisite: SPCHSCI 734

SPCHSCI 746 15 Points
Voice and Fluency - Level 9
Voice - study of the voice and the assessment and management of voice disorders (adult and paediatrics). Fluency - assessment and management of dysfluency disorders (adult and paediatrics). Critical evaluation and synthesis of knowledge are presented in substantial individual case reports.

Statistics

Stage I

STATS 100 15 Points
Concepts in Statistics
A first exposure to statistics that builds data handling and literacy skills and develops conceptual thinking through active participation in problems using real data, computer simulations and group work. STATS 100 makes full use of appropriate technology and prepares students to use statistics in their own disciplines.

Restriction: May not be taken with, or after passing, any other Statistics course

STATS 101 15 Points
STATS 101G 15 Points
Introduction to Statistics
Intended for anyone who will ever have to collect or make sense of data, either in their career or private life. Steps involved in conducting a statistical investigation are studied with the main emphasis being on data analysis and the background concepts necessary for successfully analysing data, extrapolating from patterns in data to more generally applicable conclusions and communicating results to others. Other topics include probability; confidence intervals, statistical significance, t-tests, and p-values; nonparametric methods; one-way analysis of variance, simple linear regression, correlation, tables of counts and the chi-square test.

Restriction: STATS 102, 107, 108, 191

STATS 108 15 Points
Statistics for Commerce
The standard Stage I Statistics course for the Faculty of Business and Economics or for Arts students taking Economics courses. Its syllabus is as for STATS 101, but it places more emphasis on examples from commerce.

Restriction: STATS 101, 102, 107, 191

STATS 125 15 Points
Probability and its Applications
Probability, conditional probability, Bayes theorem, random walks, Markov chains, probability models. Illustrations will be drawn from a wide variety of applications including: finance and economics; biology; telecommunications, networks; games, gambling and risk.

Corequisite: ENGSCI 111 or MATHS 108 or 110 or 120 or 130
Restriction: STATS 210

STATS 150 15 Points
Statistics for Commerce
The standard Stage I Statistics course for the Faculty of Business and Economics or for Arts students taking Economics courses. Its syllabus is as for STATS 101, but it places more emphasis on examples from commerce.

Restriction: STATS 101, 102, 107, 191

STATS 150G 15 Points
Communicating Statistics
Examines the uses, limitations and abuses of statistical information in a variety of activities such as polling, public health, sport, law, marketing and the environment. The statistical concepts and thinking underlying data-based arguments will be explored. Emphasises the interpretation and critical evaluation of statistically based reports as well as the construction of statistically sound arguments and reports. Some course material will be drawn from topics currently in the news.

Stage II

STATS 201 15 Points
Data Analysis
A practical course using the R language in the statistical analysis of data and the interpretation and communication of statistical findings. Includes exploratory data analysis,
analysis of linear models including multiple regression and analysis of variance, generalised linear models including logistic regression and analysis of counts, time series analysis.

Prerequisite: 15 points from STATS 101-108, 191
Restriction: STATS 207, 208

STATS 208 15 Points
Data Analysis for Commerce
A practical course using the popular R language in the statistical analysis of data and the interpretation and communication of statistical findings. Includes exploratory data analysis, analysis of linear models including multiple regression and analysis of variance, generalised linear models including logistic regression and analysis of counts, time series analysis.
Prerequisite: 15 points from STATS 101-108, 191
Restriction: STATS 207, 208

STATS 210 15 Points
Statistical Theory
Probability, discrete and continuous distributions, likelihood and estimation, hypothesis testing.
Prerequisite: 15 points from ENGEN 115, 150, 210
Corequisite: 15 points from MATHS 208, 250, ENGEN 211 or equivalent

STATS 220 15 Points
Data Technologies
Explores the processes of data acquisition, storage and data processing using current computer technologies. Students will gain experience with and understanding of the processes of data acquisition, storage, retrieval, manipulation, and management. Students will also gain experience with and understanding of the computer technologies that perform these processes.
Prerequisite: 15 points at Stage I in Computer Science or Statistics

STATS 225 15 Points
Probability: Theory and Applications
Covers the fundamentals of probability through theory, methods, and applications. Topics should include the classical limit theorems of probability and statistics known as the laws of large numbers and central limit theorem, conditional expectation as a random variable, the use of generating function techniques, and key properties of some fundamental stochastic models such as random walks, branching processes and Poisson point processes.
Prerequisite: B+ or higher in ENGEN 150 or ENGEN 211 or STATS 125, or a B+ or higher in MATHS 120 and 130
Corequisite: 15 points from ENGEN 115, MATHS 208, 250

STATS 240 15 Points
Design and Structured Data
An introduction to research study design and the analysis of structured data. Blocking, randomisation, and replication in designed experiments. Clusters, stratification, and weighting in samples. Other examples of structured data.
Prerequisite: STAT 101 or 108
Restriction: STAT 340

STATS 255 15 Points
Optimisation and Data-driven Decision Making
Explores methods for using data to aid in decision making in business and industrial applications. Software packages will be used to solve practical problems. Topics such as linear programming, transportation and assignment models, network algorithms, queues, Markov chains, inventory models, simulation, analytics and visualisation will be considered.
Prerequisite: ENGEN 115 or STATS 201 or 208, or a B+ or higher in either MATHS 108 or 120 or 130 or 162 or 199 or STATS 101 or 108, or a concurrent enrolment in either ENGEN 211 or STATS 201 or 208
Restriction: ENGEN 255

STATS 290 15 Points
Topics in Statistics
Prerequisite: 15 points from ENGEN 115, ENGEN 150, 210
Restriction: STATS 210, 225

Stage III

STATS 302 15 Points
Applied Multivariate Analysis
Covers the exploratory analysis of multivariate data, with emphasis on the use of statistical software and reporting of results. Topics covered include: techniques for data display, dimension reduction and ordination, cluster analysis, multivariate ANOVA and associated methods.
Prerequisite: ENGEN 314 or STATS 201 or 208
Restriction: STATS 767

STATS 310 15 Points
Introduction to Statistical Inference
Estimation, likelihood methods, hypothesis testing, multivariate distributions, linear models.
Prerequisite: STATS 210 or 225, and 15 points from MATHS 208, 250 or equivalent
Restriction: STATS 732

STATS 313 15 Points
Advanced Topics in Probability
Characterisations of and relations between different kinds of random objects including random functions, random paths and random trees. Modes of convergence; the Law of Large Numbers and Central Limit Theorem.
Prerequisite: STATS 225
Restriction: STATS 710

STATS 320 15 Points
Applied Stochastic Modelling
Prerequisite: 15 points from STATS 215, 210, 225 and 15 points from STATS 201, 208, 220, or ENGEN 314

STATS 325 15 Points
Stochastic Processes
Introduction to stochastic processes, including generating functions, branching processes, Markov chains, random walks.
Prerequisite: B+ or higher in STATS 125 or B or higher in ENGEN 314 or STATS 210 or 225 or 320, and 15 points from ENGEN 211, MATHS 208, 250
Restriction: STATS 791

STATS 326 15 Points
Applied Time Series Analysis
Components, decompositions, smoothing and filtering, modelling and forecasting. Examples and techniques from a variety of application areas.
Prerequisite: 15 points from ECON 211, ENGEN 314, STATS 201, 208
Restriction: STATS 727
STATS 330  
Statistical Modelling  
15 Points  
Application of the generalised linear model and extensions to fit data arising from a range of sources including multiple regression models, logistic regression models, and log-linear models. The graphical exploration of data.  
Prerequisite: ENGSCL 314 or STATS 201 or 208

STATS 331  
Introduction to Bayesian Statistics  
15 Points  
Introduces Bayesian data analysis using the WinBUGS software package and R. Topics include the Bayesian paradigm, hypothesis testing, point and interval estimates, graphical models, simulation, and Bayesian inference, diagnosing MCMC, model checking and selection, ANOVA, regression, GLMs, hierarchical models and time series. Classical and Bayesian methods and interpretations are compared.  
Prerequisite: ENGSCL 314 or STATS 201 or 208

STATS 369  
Data Science Practice  
15 Points  
Modern predictive modelling techniques, with application to realistically large data sets. Case studies will be drawn from business, industrial, and government applications.  
Prerequisite: STATS 220 and STATS 210 or 225 and 15 points from ECON 291, STATS 201, 208, or ENGSCL 314  
Restriction: STATS 765

STATS 370  
Financial Mathematics  
15 Points  
Mean-variance portfolio theory; options, arbitrage and put-call relationships; introduction of binomial and Black-Scholes option pricing models; compound interest, annuities, capital redemption policies, valuation of securities, sinking funds; varying rates of interest, taxation; duration and immunisation; introduction to life annuities and life insurance mathematics.  
Prerequisite: 15 points at Stage II in Mathematics and 15 points at Stage II in Statistics  
Restriction: STATS 722

STATS 380  
Statistical Computing  
15 Points  
Statistical programming using the R computing environment. Data structures, numerical computing and graphics.  
Prerequisite: 15 points from ENGSCL 314, STATS 201, 208, 220

STATS 383  
The Science and Craft of Data Management  
15 Points  
A structured introduction to the science and craft of data management, including: data representations and their advantages and disadvantages; workflow and data governance; combining and splitting data sets; data cleaning: the creation of non-trivial summary variables; and the handling of missing data. These will be illustrated by data sets of varying size and complexity, and students will implement data processing steps in at least two software systems.  
Prerequisite: ENGSCL 314 or STATS 201 or 208, and COMPSCI 101 or ENGSCL 233 or STATS 220

STATS 392  
Directed Study  
15 Points  
Directed study on a topic from Data Science, Statistics or Probability approved by the Academic Head or nominee.  

STATS 399  
Capstone: Statistics in Action  
15 Points  
Provides opportunities to integrate knowledge in statistics and data science, and collaborate with others through a succession of group projects and activities.  
Prerequisite: 30 points at Stage III in Statistics

Postgraduate 700 Level Courses

STATS 700  
Spatial Statistics  
15 Points  
Advanced techniques in the analysis of spatial and spatiotemporal data. Modelling spatial dependence; hierarchical models with latent stochastic components using likelihood approximation techniques and Bayesian methodology.  
Prerequisite: 15 points from STATS 325, 330, 331  
Corequisite: 15 points from STATS 720, 762, 731

STATS 701  
Advanced SAS Programming  
15 Points  
A continuation of STATS 301, with more in-depth coverage of programming in the SAS language. Topics covered will include advanced use of the SAS language, advanced data step programming, macros, input and output, connectivity to other software platforms, SAS SQL.  
Prerequisite: STATS 301

STATS 702  
Special Topic in Statistics 2  
15 Points

STATS 703  
Special Topic in Statistics 1  
15 Points

STATS 705  
Topics in Official Statistics  
15 Points  
Official statistics, data access, data quality, demographic and health statistics, other social statistics, economic statistics, analysis and presentation, case studies in the use of official statistics.

STATS 707  
Computational Introduction to Statistics  
15 Points  
An advanced introduction to statistics and data analysis, including testing, estimation, and linear regression.  
Prerequisite: 15 points from STATS 101, 108 and 15 points from COMPSCI 101, MATHS 162  
Restriction: ENGSCL 314, STATS 201, 207, 208, 210, 225

STATS 708  
Topics in Statistical Education  
15 Points  
Covers a wide range of research in statistics education at the school and tertiary level. There will be a consideration of, and an examination of, the issues involved in statistics education in the curriculum, teaching, learning, technology and assessment areas.

STATS 709  
Predictive Modelling  
30 Points  
Predictive modelling forecasts likely future outcomes based on historical and current data. Following an advanced introduction to statistics and data analysis, the course will discuss concepts for modern predictive modelling and machine learning.  
Prerequisite: COMPSCI 130, MATHS 108, and 15 points from STATS 101, 108, or equivalent  
Restriction: STATS 201, 207, 208, 210, 225, 707, 765

STATS 710  
Probability Theory  
15 Points  
Fundamental ideas in probability theory; sigma-fields, laws of large numbers, characteristic functions, the Central Limit Theorem.  
Prerequisite: B+ or higher in STATS 225 or 15 points from STATS 310, 320, 325
STATS 720 15 Points
Stochastic Processes
Prerequisite: STATS 320 or 325

STATS 721 15 Points
Foundations of Stochastic Processes
Fundamentals of stochastic processes. Topics include: generating functions, branching processes, Markov chains, and random walks.
Prerequisite: 15 points from STATS 125, 210, 225, 320 with at least a B+ and 15 points from MATHS 208, 250, 253
Restriction: STATS 325

STATS 722 15 Points
Foundations of Financial Mathematics
Fundamentals of financial mathematics. Topics include: mean-variance portfolio theory; options, arbitrage and put-call relationships; introduction of binomial and Black-Scholes option pricing models; compound interest, annuities, capital redemption policies, valuation of securities, sinking funds; varying rates of interest, taxation; duration and immunisation; introduction to life annuities and life insurance mathematics.
Prerequisite: 15 points at Stage II in Statistics or BIOSCI 209, and 15 points at Stage II in Mathematics
Restriction: STATS 370

STATS 723 15 Points
Stochastic Methods: Theory and Applications
Essential probabilistic techniques underlying discrete and continuous stochastic models and their applications. Markov processes in discrete and continuous time, diffusion processes, Ito's lemma, stochastic differential equations, and martingales. Applications may include models from biology and population genetics, physics, engineering, chemistry, finance, economics, and statistics.
Prerequisite: 15 points from ENGSCE 314, STATS 313, 325, or 15 points with a B+ or higher from MATHS 210, 225, or B+ or higher in MATHS 250 and 15 points from STATS 125, 320, 370

STATS 724 15 Points
Operations Research
Continuous-time Markov processes; optimisation for jump Markov processes; Markov decision processes; queueing theory and stochastic networks.
Prerequisite: 15 points from STATS 320, 325, 720 with at least B+

STATS 725 15 Points
Special Topic

STATS 726 15 Points
Time Series
Stationary processes, modelling and estimation in the time domain, forecasting and spectral analysis.
Prerequisite: STATS 210, and 15 points from STATS 326, 786

STATS 727 15 Points
Foundations of Applied Time Series Analysis
Fundamentals of applied time series analysis. Topics include: components, decompositions, smoothing and filtering, modelling and forecasting. Examples and techniques from a variety of application areas are presented.
Prerequisite: 15 points from ECON 221, STATS 201, 207, 208, 707
Restriction: STATS 326

STATS 730 15 Points
Statistical Inference
Fundamentals of likelihood-based inference, including sufficiency, conditioning, likelihood principle, statistical paradoxes. Theory and practice of maximum likelihood. Examples covered may include survival analysis, GLM's, nonlinear models, random effects and empirical Bayes models, and quasi-likelihood.
Prerequisite: STATS 310 or 732

STATS 731 15 Points
Bayesian Inference
A course in practical Bayesian statistical inference covering: the Bayesian approach, specification of prior distributions, decision-theoretic foundations, the likelihood principle, asymptotic approximations, simulation methods, Markov Chain Monte Carlo methods, the BUGS and CODA software, model assessment, hierarchical models, application in data analysis.
Prerequisite: STATS 331 and 15 points from STATS 210, 225

STATS 732 15 Points
Foundations of Statistical Inference
Fundamentals of statistical inference including estimation, hypothesis testing, likelihood methods, multivariate distributions, joint, marginal, and conditional distributions, vector random variables, and an introduction to decision theory and Bayesian inference.
Prerequisite: STATS 210 or 225, and 15 points from MATHS 208, 250
Restriction: STATS 310

STATS 735 15 Points
Statistics in Ecology and Population Genetics
Concepts of population modelling and inference from ecological and genetic data. Topics covered include estimation of population size, spatial models, genetic structure and assignment. No previous knowledge of ecology or genetics is required. Recommended preparation: STATS 730
Prerequisite: STATS 310 or 732

STATS 737 15 Points
Modern Bayesian Methods
Concepts and tools underlying Bayesian methods in many modern areas of statistics. Advanced Markov-chain Monte Carlo, model evaluation using information criteria and Bayesian cross-validation, robustness, Bayesian non-parametrics. Applications may include hierarchical modelling, times-series, spatial data, Bayesian networks, genetics, approximate Bayesian computation for big data, artificial intelligence.
Prerequisite: STATS 731

STATS 740 15 Points
Sample Surveys
The design, management and analysis of sample surveys. Topics such as the following are studied. Types of Survey. Revision of statistical aspects of sampling. Preparing surveys. Research entry: problem selection, sponsorship and collaboration. Research design: methodology and data collection; Issues of sample design and sample selection. Conducting surveys: Questionnaires and questions; Non-sampling issues; Project management; Maintaining data quality. Concluding surveys: Analysis; Dissemination.
Prerequisite: 15 points from STATS 240, 330, 340, and 15 points from Stage II Mathematics

STATS 741 15 Points
Sample Surveys and Experimental Design
Design, implementation and analysis of sample surveys
and of experiments. This course covers the foundations of both areas.
Prerequisite: 15 points from STATS 201, 207, 208
Restriction: STATS 340

STATS 747 15 Points
Statistical Methods in Marketing
Stochastic models of brand choice, applications of General Linear Models in marketing, conjoint analysis, advertising media models and marketing response models.
Prerequisite: 15 points from STATS 201, 207, 208, 210, 707

STATS 750 15 Points
Experimental Design
The design and analysis of data from experiments involving factorial and related designs and designs which have the property known as general balance (this includes most of the standard designs), and more general designs with blocking and replication. Response surface methodology. Sequential experimentation.
Prerequisite: 15 points from STATS 240, 330, 340, 762

STATS 760 15 Points
A Survey of Modern Applied Statistics
A survey of techniques from modern applied statistics. Topics covered will be linear, non-linear and generalised linear models, modern regression including CART and neural networks, mixed models, survival analysis, time series and spatial statistics.
Prerequisite: STATS 310, 330

STATS 761 15 Points
Mixed Models
Linear mixed effect models for the analysis of data from small experiments, particularly those cases where the data are unbalanced. Methods include restricted maximum likelihood for the estimation of variance components.

STATS 762 15 Points
Regression for Data Science
Application of the generalised linear model to fit data arising from a wide range of sources, including multiple linear regression models, Poisson regression, and logistic regression models. The graphical exploration of data. Model building for prediction and for causal inference. Other regression models such as quantile regression. A basic understanding of vector spaces, matrix algebra and calculus will be assumed.
Prerequisite: 15 points from STATS 210, 225, 707, and 15 points from ENGSCI 314, STATS 201, 207, 208
Restriction: STATS 330

STATS 763 15 Points
Advanced Regression Methodology
Prerequisite: STATS 210 or 225, and 15 points from STATS 330, 762 and 15 points at Stage II in Mathematics

STATS 765 15 Points
Statistical Learning for Data Science
Concepts of modern predictive modelling and machine learning such as loss functions, overfitting, generalisation, regularisation, sparsity. Techniques including regression, recursive partitioning, boosting, neural networks. Application to real data sets from a variety of sources, including data quality assessment, data preparation and reporting.
Prerequisite: 15 points from ENGS CI 314, STATS 201, 207, 208 and 15 points from STATS 210, 225, 707
Corequisite: May be taken with STATS 707
Restriction: STATS 369

STATS 766 15 Points
Multivariate Analysis
A selection of topics from multivariate analysis, including: advanced methods of data display (e.g., Correspondence and Canonical Correspondence Analysis, Biplots, and PREFMAP) and an introduction to classification methods (e.g., various types of Discriminant Function Analysis).
Prerequisite: STATS 310 or 732

STATS 767 15 Points
Foundations of Applied Multivariate Analysis
Fundamentals of exploratory analysis of multivariate data, with emphasis on the use of statistical software and reporting of results. Topics covered include: techniques for data display, dimension reduction and ordination, cluster analysis, multivariate ANOVA and associated methods.
Prerequisite: 15 points from ENGSCI 314, STATS 201, 207, 208, 707
Restriction: STATS 302

STATS 768 15 Points
Longitudinal Data Analysis
Exploration and regression modelling of longitudinal and clustered data, especially in the health sciences: mixed models, marginal models, dropout, causal inference.
Prerequisite: 15 points from ENGSCI 314, STATS 201, 207, 208, 210, 707

STATS 769 15 Points
Advanced Data Science Practice
Databases, SQL, scripting, distributed computation, other data technologies.
Prerequisite: 15 points from STATS 220, 369, 380 and 15 points from ENGSCI 314, STATS 201, 207, 208, 707

STATS 770 15 Points
Introduction to Medical Statistics
An introduction to ideas of importance in medical statistics, such as measures of risk, basic types of medical study, causation, ethical issues and censoring, together with a review of common methodologies.
Prerequisite: 15 points from ENGSCI 314, STATS 201, 207, 208 and 15 points from STATS 210, 225, 707

STATS 771 15 Points
Special Topic

STATS 773 15 Points
Design and Analysis of Clinical Trials
The theory and practice of clinical trials, including: design issues, data management, common analysis methodologies, intention to treat, compliance, interim analyses and ethical considerations.
Prerequisite: 15 points from ENGSCI 314, STATS 201, 207, 208, 707

STATS 776 15 Points
Estimating Animal Abundance
Fundamentals of the statistical methods that underly capture-recapture, distance sampling and occupancy analysis, focusing on the critical role that p, the probability of detection, plays in estimating n, the number of animals, or psi, the probability of species presence. Extensions
to these fundamental tools including spatially explicit, genetic, and hierarchical methods will be covered.
Prerequisite: 15 points from ENGSCI 314, STATS 201, 207, 208, 707

STATS 779 15 Points
**Professional Skills for Statisticians**
Statistical software, data management, data integrity, data transfer, file processing, symbolic manipulation, document design and presentation, oral presentation, professional ethics.
Prerequisite: 15 points from ENGSCI 314, STATS 201, 208, 707

STATS 780 15 Points
**Statistical Consulting**
Students will learn about the practicalities of statistical consulting. Students will carry out a statistical consulting project, including the writing of a report, under the supervision of a member of the academic staff.
Prerequisite: STATS 330 or 762

STATS 781 30 Points
STATS 781A 15 Points
STATS 781B 15 Points
**Research Project - Level 9**
Restriction: STATS 789
To complete this course students must enrol in STATS 781 A and B, or STATS 781

STATS 782 15 Points
**Statistical Computing**
Professional skills, advanced statistical programming, numerical computation and graphics.
Prerequisite: 15 points from ENGSCI 314, STATS 201, 208, 707

STATS 783 15 Points
**Simulation and Monte Carlo Methods**
A practical introduction to modern simulation and Monte Carlo techniques and their use to simulate real situations and to solve difficult statistical inferential problems whose mathematical analysis is intractable.

STATS 784 15 Points
**Statistical Data Mining**
Data cleaning, missing values, data warehouses, security, fraud detection, meta-analysis, and statistical techniques for data mining such as regression and decision trees, modern and semiparametric regression, neural networks, statistical approaches to the classification problem.
Prerequisite: 15 points from STATS 210, 225, and 15 points from STATS 330, 762

STATS 785 15 Points
**Foundations of Statistical Data Management**
SAS statistical software with an emphasis on using SAS as a programming language for purposes of database manipulation, simulation, statistical modelling and other computer-intensive methods.
Prerequisite: 15 points from ENGSCI 314, STATS 201, 207, 208, 707
Restriction: STATS 301

STATS 786 15 Points
**Time Series Forecasting for Data Science**
Delivers a comprehensive understanding of widely used time series forecasting methods, illustrates how to build models to uncover the structure in time series and perform model diagnostics to assess the fit of models, and develops analytical and computer skills that are necessary for analysing time series data. Familiarity with coding in R is recommended.
Prerequisite: 15 points from STATS 201, 208
Restriction: STATS 326, 727

STATS 787 15 Points
**Data Visualisation**
Effective visual presentations of data. Topics may include: how to present different types of data; human perception; graphics formats; statistical graphics in R; interactive graphics; visualising high-dimensional data; visualising large data.
Prerequisite: 15 points from STATS 220, 369, 380 and 15 points from ENGSCI 314, STATS 201, 207, 208, 707

STATS 790 30 Points
STATS 790A 15 Points
STATS 790B 15 Points
**Research Project - Level 9**
Restriction: STATS 796
To complete this course students must enrol in STATS 790 A and B, or STATS 790

STATS 792 45 Points
STATS 792A 22.5 Points
STATS 792B 22.5 Points
**Dissertation in Statistics Education - Level 9**
To complete this course students must enrol in STATS 792 A and B, or STATS 792

STATS 793 45 Points
STATS 793A 22.5 Points
STATS 793B 22.5 Points
**Dissertation - Level 9**
To complete this course students must enrol in STATS 793 A and B, or STATS 793

STATS 798A 45 Points
STATS 798B 45 Points
**Masters Thesis in Statistics - Level 9**
Prerequisite: 15 points from STATS 310, 732 and 15 points from STATS 330, 762, or approval of Head of Department
Restriction: STATS 790, 796
To complete this course students must enrol in STATS 798 A and B

**Sustainability**

Stage I

SUSTAIN 100 15 Points
SUSTAIN 100G 15 Points

**Sustainability and Us**
What is sustainability? Discusses what sustainability means, and its underpinning values, history and operation within complex physical systems. Students complete a group project to develop skills in collective decision making with a solution focus. Two sustainability issues, such as food and water, are discussed in depth.

Stage II

SUSTAIN 200 15 Points

**The Sustainable Community**
What is the sustainable community? We unpack the nature of complex social and ecological systems with a particular focus on large organisations and cities. Students undertake a group project to enhance their skills in collective decision making, and to develop skills in integrating information and presenting sustainability solutions. Two sustainability
issues, such as climate change and fisheries, are discussed in depth.
Prerequisite: 60 points passed

Stage III

SUSTAIN 300 15 Points
A Sustainable World
Is it possible to have a sustainable global system? We focus on large scale social institutions including politics, the media, national and international law and economics. Students undertake a group project to develop skills in researching and integrating information from a range of experts and recommending sustainability solutions to policy makers. Two sustainability issues, such as population and plastic, are discussed in depth.
Prerequisite: 30 points passed at Stage II

Tertiary Foundation Certificate Biological Science

Foundation Courses

TFCBIO 91F 15 Points
Foundation Biology 1
An introduction to biological sciences with an emphasis on organism diversity, which includes bacteria, plants, fungi and animals. Fundamentals of classification, ecology and evolution are introduced and the study of a current topic in biology is used to develop research and critical thinking skills. Practical classes are both laboratory-based and field based.
Restriction: BIOSCI 91F, 91P

TFCBIO 92F 15 Points
Foundation Biology 2
Concepts introduced in TFCBIO 91F are further developed with an emphasis on the structures and processes of living things at cellular and molecular levels. Cell biology, genetic principles and biochemistry are explored and further developed in a human biological context. Laboratories focus on students developing key practical skills.
Restriction: BIOSCI 91F, 92F, 91P, 92P

Tertiary Foundation Certificate Mathematics

Foundation Courses

TFCMATHS 91F 15 Points
Foundation Mathematics 1
Development of fundamental mathematics concepts including an understanding of arithmetic ideas as expressed in fractions, decimals and percentages, ratio and proportion, measurement and algebraic thinking. Application of these concepts in contexts such as financial literacy, problem solving, and real-life mathematics will form the basis of this course.
Restriction: EDFOUND 15F, TFCEDUC 15F

TFCMATHS 92F 15 Points
Foundation Mathematics 2
Introduces further principles of chemistry. Physical chemistry and qualitative inorganic analysis, including chemical kinetics and chemical equilibrium. Organic chemistry, including hydrocarbons, oxygen-containing functional groups, isomerism and reaction classifications, acids, bases, buffer solutions and titrations. Laboratories include reactions of hydrocarbon and oxygen-containing organic compounds, chromatography, testing for anions and cations in solution, acid-base titrations.
Restriction: CHEM 92F

Tertiary Foundation Certificate Environmental Stud

Foundation Courses

TFCENV 91F 15 Points
Geography
How does geography effect both how we live today and our future? An introduction to human and physical geography with an emphasis on population, migration, social inequality, uneven development, climate change, sustainability and geospatial thinking. We examines these geographical topics using a variety of local and global case studies.

TFCENV 92F 15 Points
Earth and Environmental Sciences
How do biophysical processes shape the Earth and the environmental issues we face on it? Introduces students to the physical processes that shapes our world, from earthquakes deep underground to glaciers on mountain tops. Explores how physical and biological processes on Earth interact in pressing environmental issues like climate change, pollution and species conservation.

Tertiary Foundation Certificate Environmental

Foundation Courses

TFCENV 91F 15 Points
Geography
How does geography effect both how we live today and our future? An introduction to human and physical geography with an emphasis on population, migration, social inequality, uneven development, climate change, sustainability and geospatial thinking. We examines these geographical topics using a variety of local and global case studies.

TFCENV 92F 15 Points
Earth and Environmental Sciences
How do biophysical processes shape the Earth and the environmental issues we face on it? Introduces students to the physical processes that shapes our world, from earthquakes deep underground to glaciers on mountain tops. Explores how physical and biological processes on Earth interact in pressing environmental issues like climate change, pollution and species conservation.

Tertiary Foundation Certificate Mathematics

Foundation Courses

TFCENV 91F 15 Points
Mathematics for Arts
Includes several important mathematical ideas within historical, environmental, societal, political, financial, justice, entertainment and cultural contexts. Will also be guided by the interests of its learners as citizens and consumers, who will be encouraged to draw on the mathematics they are already familiar with. Aimed at linking mathematics to the world of students who are likely to be non-STEM majors.

TFCENV 92F 15 Points
Preparatory Skills in Mathematics
Development of fundamental mathematics concepts including an understanding of arithmetic ideas as expressed in fractions, decimals and percentages, ratio and proportion, measurement and algebraic thinking. Application of these concepts in contexts such as financial literacy, problem solving, and real-life mathematics will form the basis of this course.
Restriction: EDFOUND 15F, TFCEDUC 15F

TFCENV 91F 15 Points
Foundation Mathematics 1
This mathematics course aims to promote an understanding of number skills, including an introduction to algebra. Students will learn how to use simple technology and develop their problem solving abilities.
Restriction: MATHS 91P, 92F

TFCENV 92F 15 Points
Foundation Mathematics 2
This mathematics course aims to use the skills learnt in TFCENV 91F to develop an understanding of functions in their tabular, algebraic and graphical representations.
Prepares students for MATHS 102. Recommended preparation: TFCMATHS 91F or TFCMATHS 93F. Restriction: MATHS 92F

TCFMATHS 93F 15 Points
Foundation Mathematics 3
This mathematics course aims to promote an understanding of numerical and algebraic skills at a deeper level than TFCMATHS 91F. Students will learn how to use simple technology and develop their problem solving abilities. Restriction: MATHS 93F, 93P

TCFMATHS 94F 15 Points
Foundation Mathematics 4
This mathematics course aims to use the skills learnt in TFCMATHS 93F to develop an understanding of functions, including differential functions, in their tabular, algebraic and graphical representations. This course prepares students for MATHS 102. Restriction: MATHS 94F

Tertiary Foundation Certificate Physics

Foundation Courses

TFCPHYS 91F 15 Points
Foundation Physics
An introductory course for students who have not previously studied physics. Topics include the nature of light; wave motion; basic mechanics of motion in a straight line, including the concepts of momentum and energy; an introduction to heat. Restriction: PHYSICS 91F, 91P

TFCPHYS 92F 15 Points
Foundation Physics 2
A second foundation course for students who understand the basic mechanics of motion in a straight line. Further mechanics, including equilibrium, projectile motion, rotational motion and gravitation. Electromagnetism, including electrostatics, elementary circuits and the effects of magnetic fields. Restriction: PHYSICS 92F

Tertiary Foundation Certificate Statistics

Foundation Courses

TCFSTATS 92F 15 Points
Foundation Statistics
Provides an introduction to statistics for anyone who will ever have to collect, analyse or interpret data, either in their career or private life. Statistical skills will be developed through Exploratory Data Analysis of real data using appropriate technology and statistical techniques. An important aspect of the course will involve communication of results.

Transdisciplinary Environmental Futures

Stage I

TDENVF 100 15 Points
Our Environmental Futures: Te Taiao Tāngata
Explores the complex relationships between environmental systems and humans. Working in teams, students examine environmental, social, economic and cultural perspectives in the real-world contexts of waitā (sea), waitī (freshwater) and whenua (land). Students will respond to environmental issues by recognising ora (wellbeing) and Ki Uta ki Tai (the interconnectedness of ecosystems) and develop a transdisciplinary mindset to tackle current and future environmental challenges.

Wine Science

Stage II

WINESCI 201 15 Points
Introduction to Wine Science
An introduction to grape growing and wine. Topics covered include history of wine, geography and terroir, grape growing, winemaking technology, microbiology, sensory evaluation, and health considerations of wine. A special emphasis on grape growing and winemaking in New Zealand.
Prerequisite: Any 120 points passed

Postgraduate 700 Level Courses

WINESCI 701 15 Points
Winemaking in a New Zealand Setting
The principles and practices of local winemaking are reviewed and compared with international counterparts to highlight the distinctive characteristics of winemaking in New Zealand. A microvinification project is undertaken in which students begin with an allotment of grapes, monitor the fermentation using a range of analytical techniques, and make decisions which affect the style of wine they produce.

WINESCI 702 15 Points
The Science Behind Grape Production
Develops understanding of the contemporary scientific knowledge and research that is of relevance to grape production for winemaking. The application of traditional and modern molecular methods in plant science and plant pathology will be discussed in relation to the selection, improvement and management of vines and grape attributes. Research issues of national and international relevance to viticulture will also be addressed.

WINESCI 703 15 Points
The Science Behind Winemaking
Follows on from 702 and focuses on the contemporary scientific knowledge and research that is of relevance to winemaking, commencing from the point of grape harvest. The application of traditional and modern methods in biochemistry and microbiology will be discussed. Research issues of national and international relevance to winemaking will also be addressed.

WINESCI 704 15 Points
Sensory Evaluation and Statistical Methods
The principles of sensory science, sensory analysis of wine, differences among wine types, regional styles and grape types will be covered. Emphasis will be placed on those components which influence sensory appeal. The application of statistical methods to wine sampling and to the design of sensory panels will be overviewed.

WINESCI 705 15 Points
WINESCI 705A 7.5 Points
WINESCI 705B 7.5 Points
Project in Wine Science
Students will gain a thorough understanding of the current knowledge on a selected topic associated with wine science
and have experience in writing a research proposal and in giving a presentation to the peer group.

To complete this course students must enrol in WINESCI 705 A and B, or WINESCI 705

WINESCI 706 15 Points
The Business of Wine Production
Students will be introduced to the economics of grape growing, winemaking, winery design and management. Distribution and marketing will be introduced. Special topics including wine law, use and negotiation of contracts, small business development, stock valuation, issues of appellations, labelling and brand development will be taught. Environmental and resource management issues and health and safety regulations will be covered.

WINESCI 707 15 Points
WINESCI 707A 7.5 Points
WINESCI 707B 7.5 Points
Topics in Wine Science
A number of advanced or special topics in wine science. This course may not be offered every year; further information may be obtained from the School of Chemical Sciences.

To complete this course students must enrol in WINESCI 707 A and B, or WINESCI 707

WINESCI 708 15 Points
Post-fermentation Processes in Winemaking
Covers the theory and practice of fining, filtration and other methods of wine clarification. Chemical and sensory effects of barrel and tank aging of red and white wine will be covered as well as blending decisions and stabilisation. Quality control methods used during processing, aging and packaging will also be addressed.

WINESCI 792 45 Points
WINESCI 792A 22.5 Points
WINESCI 792B 22.5 Points
Research Project - Level 9
To complete this course students must enrol in WINESCI 792 A and B, or WINESCI 792

WINESCI 796A 60 Points
WINESCI 796B 60 Points
MSc Thesis in Wine Science - Level 9
Advanced research on an aspect of wine science. This may be undertaken with the Wine Industry CRIs and University staff.

To complete this course students must enrol in WINESCI 796 A and B

Academic Integrity
ACADINT A01 0 Points

Academic Integrity Course
An online course designed to increase student knowledge of academic integrity, university rules relating to academic conduct, and the identification and consequences of academic misconduct. Students work through a series of modules, outlining scenarios that they may encounter while studying at university. Each scenario provides information on relevant rules, resources and expected behaviour.

Accounting

Stage I
ACCTG 151G 15 Points

Financial Literacy
People who understand the basic principles of finance are likely to get much more mileage out of their money – whether spending, borrowing, saving or investing – than those who do not. Develop an understanding of how to be in control of spending and saving; understand borrowing; make informed investment decisions; know broadly what to insure and what not to; recognise scams and consider whether money is the key to happiness.

Restriction: May not be taken by students with a concurrent or prior enrolment in Accounting or Finance courses

Anthropology

Stage I
ANTHRO 106G 15 Points

Global Sound Cultures: Musics, Places and People
Examines a wide range of sound and music cultures, from popular transnational mediations to locally produced, community-based traditions. We consider the ways that music takes on meaning, represents identities and places, and interacts with the world. We trace the historical/economic processes by which music cultures emerge and are sustained (or not). We look at the emotional and economic roles that music plays in lives of musicians, composers and listeners. Using theories from ethnomusicology, anthropology, musicology and cultural studies we show how music is affected by and reflects social change, colonisation and indigeneity, technology and local/global economic processes.

Architectural History, Theory and Criticism

Stage I
ARCHHTC 102G 15 Points

Modern Architecture and Urbanism
Examines through case studies the cultural contexts that shaped the development of architecture, urban design, landscape and the environment during the twentieth century. Emphasis is placed on the historical developments that influenced changes in style and the theoretical contexts that shaped attitudes towards inhabitation, social organisation, national identity, and cultural self-expression, amongst other things.

Restriction: ARCHHTC 100

Art History

Stage I

Art History

Stage I

ARTHIST 114G 15 Points

Understanding Art: Leonardo to Warhol
Visual intelligence is crucial in navigating the world of images that convey coded messages, and the history of ideas fundamental to all disciplines. How do we read such images? This course decodes artworks, photographs, advertising, digital images, and architecture, providing tools to analyse artists from Leonardo to Warhol: experts at moving the eye around the image for meaning to emerge.

Restriction: ARTHIST 109

ARTHIST 115G 15 Points

Global Art Histories
A broad survey of visual art spanning from the early modern period to the contemporary. Students will be introduced to a range of art practices situated within a global context and will consider art works produced in Māori and Pacific cultures alongside Indian, South Asian, Middle Eastern, European and American traditions.

Restriction: May not be taken by students with a concurrent or prior enrolment in Accounting or Finance courses

Asian Studies

Stage I

ASIAN 140G 15 Points

New Zealand and Asia
Explores Asia and its interrelationship with New Zealand, including Asia’s growing presence in New Zealand in all its manifestations, and the evolving political, social, economic, cultural, and strategic relations between this country and Asia. Topics will include historical and contemporary ties with Asia, Asian migration, literature, media and films. The course will focus especially on South-East and East Asia.

Astrosciences

Stage I

ASTRO 100G 15 Points

Planets, Stars and Galaxies
The story of our place in the Universe. Key topics are the exploration of the solar system, searches for planets around other stars, the structure and evolution of stars and galaxies, high-energy astrophysics, and the origin and overall properties of the Universe. No background in physics or mathematics is assumed.

Restriction: PHYSICS 107, 107G
Stage II

ASTRO 200G 15 Points
Astrobiology
Astrobiology examines the potential of the universe to harbour life and is interdisciplinary, combining Geology, Biology, Astronomy, Chemistry, Physics, Philosophy, Ethics. Course focus is on how these disciplines combine with technology, addressing questions of life in the universe. Key topics include origin and evolution of life, definitions and environmental limits of life, and how to search for life beyond Earth.
Prerequisite: 60 points passed

Biological Sciences

Stage I

BIOSCI 100G 15 Points
Antarctica: The Frozen Continent
A general introduction to Antarctica and its environs including the Southern Ocean and the sub-Antarctic islands. Emphasis will be placed on the evolution of Antarctica and how resident plants, animals and micro-organisms have adapted to cope with the extreme environment. Specific topics to be addressed include: the history of Antarctic exploration and its impact on the development of Antarctic science, Antarctic ecosystems, Antarctica as a wilderness region, and the impact of humans including the exploitation of resources and the effects of pollution. This course is suitable for students with both science and non-science backgrounds.

Business

Stage I

BUSINESS 151G 15 Points
Communication in a Multicultural Society
Communication knowledge and skills are essential in business careers and for interpersonal and intercultural relationships. This course offers a theory-based approach combined with applied communication practices. Communication knowledge, competencies and skills are developed through exploring relationships, mediated communication, writing, team dynamics, oral presentation and technologies.
Restriction: BUSINESS 101, 111, 291, MGMT 291

Business Analytics

Stage I

BUSAN 100G 15 Points
Digital Information Literacy
Introduces students to skills, technologies, and techniques for the effective use of digital information. Information in all spheres of personal and professional life is increasingly created, stored, analysed, exchanged and communicated in digital forms. Digital information literacy will help students be more productive in the digital age.
Restriction: Cannot be taken with or after INFOSYS 110-345

Career

Stage I

CAREER 100G 15 Points
Crafting your Career
What is employability? The world of work is changing rapidly. Crafting your Career uses project-based, collaborative, problem-solving exercises to assist students in readying themselves for life after the degree. The course aims to build students' work-readiness by enhancing their understanding of a variety of workplaces, while developing the skills employers regard as essential to career success.
Prerequisite: 60 points passed
Restriction: ARTSGEN 102, POPHLTH 300, 302

Chemical and Materials Engineering

Stage I

CHEMMAT 100G 15 Points
Materials of the Modern World
Every aspect of daily living is influenced in some way by the materials that surround us. Ceramics, metals, polymers, and composites; each has its own properties which have, over time, influenced the development of modern technological societies. Take a moment to imagine a world without metal, for example, to see how central the science of materials is to everyday life. This course will explore, at a non-specialist level, the basic principles governing the properties and behaviour of a wide variety of common materials and examine their applications and limitations.

Chemistry

Stage I

CHEM 100G 15 Points
Molecules that Changed the World
The impact of chemistry on the modern world will be explored by focusing on the stories of specific molecules, including penicillin, DDT and nylon. Their discovery, the underlying chemical principles that explain their behaviour, their impact on our lives including social and scientific issues that arise from their use, and their likely impact on the future will be investigated. No formal prerequisite, but the course assumes a science background at Year 11 or higher.

Chinese

Stage I

CHINESE 100G 15 Points
Beginning Modern Chinese 1
Introduces students to modern Standard Chinese (Mandarin, Putonghua) through exercises and activities to develop speaking, listening, reading and writing skills. Also introduces the social and cultural background of the language.
Restriction: May not be taken if a more advanced language acquisition course in this subject has previously been passed
Classical Studies and Ancient History

Stage I

ANCIENT 110G  15 Points
Classical Mythology
A study of ancient mythology - its gods, heroes and monsters - through the works of major writers and artists from Greece and either Rome or Egypt.

Restriction: CLASSICS 110, 110G

Communication

Stage I

COMMS 104G  15 Points
Advertising and Society
A critical examination of advertising and advertisements focusing on the role advertising plays in consumer culture. Advertisements from a diverse range of media are studied in order to analyse how advertisements construct and disseminate meaning. The course investigates how advertising engages with the logic of wider cultural and global transformations with consideration given to both consumer and industry perspectives.

Computer Science

Stage I

COMPSCI 111G  15 Points
An Introduction to Practical Computing
A practical introduction to computing. Topics include: web design, an overview of computer hardware and operating systems, effective use of common applications, using the internet as a communication medium, applying programming concepts, and social implications of technology.

Cook Islands Māori

Stage I

COOKIS 101G  15 Points
Introduction to Cook Islands Māori
Gives students an introduction to the structure of Cook Islands Māori as well as allowing them to develop basic skills in listening, speaking, reading and writing. Designed for students with little or no knowledge of the language, and for those with some fluency wishing to understand simple sentence structure and composition.

Restriction: May not be taken if a more advanced language acquisition course in this subject has previously been passed

Dance Studies

Stage I

DANCE 101G  15 Points
Introduction to Dance and Creative Processes
To develop an understanding of our moving bodies through movement awareness, dance improvisation, choreography and creative and analytic writing. Students will undertake both theoretical and practical classes focusing on a range of practices that dancers and movement practitioners use to facilitate kinaesthetic awareness, experimentation, communication and choreography. Students will explore somatic theory and practice, improvisation scores, choreography and dance analysis. DANCE 101G not available for BDanceSt.

Stage II

DANCE 200G  15 Points
Dance and Culture
Examines the interrelationship between dance and wider political and cultural movements through practical dance classes and theoretical investigations into diverse cultural environments around the world. Students physically and theoretically engage in the study of various dance forms such as Tango, Salsa, Dabkeh, traditional Chinese dance and Bharata Natyam.

Prerequisite: 60 points passed

Design

Stage I

DESIGN 102G  15 Points
Design for Sustainable Futures
New opportunities are continually emerging in the field of design. This course introduces design as strategy, demonstrating how contemporary design practices have evolved, responded to, and influenced change. By developing a design project that responds to the United Nations Sustainable Development Goals, students will learn how design thinking complements current practice and expands career prospects.

Disability Studies

Stage I

DISABLTY 113G  15 Points
Making Disabilities: The Construction of Ideas
Examines the expression of social and cultural ideas of disability in popular culture through film, television and print media. The course aims to develop skills to examine the construction and maintenance of concepts of disability and disabling identities in popular culture. The consequences of these processes are also discussed and their implications for perpetuating social devaluation, discrimination, and disadvantage.

Drama

Stage I

DRAMA 100G  15 Points
Presentation and Performance Skills: Taking the Stage
Focuses on enhancing oral communication and performance skills through interactive workshops with speakers and performers highlighting the transferable skills of acting in three main areas: public speaking, improvising and group-devised performance.

Earth Sciences

Stage I

EARTHSCI 105G  15 Points
Earth's Natural Hazards
New Zealand experiences many natural hazards caused by the Earth's natural processes through earthquakes, volcanic
eruptions, weather bombs, storm surge, tsunami, flooding and wildfires. Focuses on spatial and temporal occurrences of disasters, hazard preparedness and recovery, and societal responses that affect and, sometimes, compound the magnitude of disasters. Case studies are drawn from contemporary and ancient societies.

Stage II
EARTHSCI 205G 15 Points
New Zealand: Half a Billion Years on the Edge
Take a 500 million year journey through time following the geologic and biologic development of New Zealand from humble beginnings on the edge of the ancient supercontinent Gondwana to the present day geologically dynamic land mass beset by volcanic eruptions, earthquakes and massive erosion as a consequence of being located on the edge of the Earth’s largest tectonic plate.
Prerequisite: 75 points passed

Stage I
ECON 151G 15 Points
Understanding the Global Economy
Economics affects our daily lives and the global environment in many ways. Through the media we are constantly made aware of price increases, interest rate changes, exchange rate movements and balance of payments problems, growth and recessions, standard of living comparisons, regional trading agreements. What does it all mean and how does it all work?
Restriction: ECON 101, 111, 152, 191

Education
Stage I
EDUC 100G 15 Points
The Creative Process
Theories and practices of creativity will be examined and practically explored through a variety of disciplines, such as the arts, biology, psychology, sociology, philosophy and education. What is creativity? Can creativity be learnt? What happens in the brain when we are creative? These are some of the questions addressed in this course.

EDUC 105G 15 Points
Teaching: Tales and Traditions
Introduction to key ideas on teachers and teaching. Explores teaching traditions, their origins, stories of teaching in New Zealand; stories of teachers that generate change; and how teaching and teachers are understood in a variety of disciplines such as Science, Health, Arts, and Sport. Considers the following: How should we teach? What counts as knowledge? What contradictions do teachers encounter?

EDUC 121G 15 Points
How People Learn
Focuses on learning in formal and informal settings and addresses such questions as: why do some things seem easier to learn than others, why do we forget things we once knew, and why do some people learn faster or better than others? Examines the nature of intelligence and how to help personal learning or the learning of others.
Restriction: EDUC 111, 117

EDUC 122G 15 Points
Learning Sexualities
How and what do we learn about sexualities in New Zealand? Learning about sexualities is viewed as occurring both formally (e.g., through sexuality education) and informally (e.g., through the media) in a diversity of social sites. Schools are examined as one significant site where students are offered sexual meanings. The historical derivation and current context of contemporary education about sexuality along with its social effects are investigated.

Engineering General
Stage I
ENGGEN 100G 15 Points
Technological Choices for the Future
A consideration of technological choices to support informed decision making in the use of technology in modern society. The course focuses on important questions such as: What is the future direction of power generation in New Zealand? How can we create a sustainable future? Where will current developments in robotics and mobile communications lead us?

ENGGEN 101G 15 Points
Software, Data and Intelligent Automation
Introduces concepts of intelligent automation, robotic process automation, analytics and artificial intelligence/machine learning. Includes consideration of data privacy and sovereignty, and the ethics of AI. Students will engage in critical analysis of potential intelligent automation applications and solutions, and will build their own software robot through practical laboratory work.

English
Stage I
ENGLISH 102G 15 Points
Great Books: Seduction and Betrayal
Surveys a selection of literary masterpieces by major authors from different periods in the history of English literature. Selection of texts is organised around the theme of seduction and betrayal, understood more particularly as a story-arc exploring attitudes to love and sex, to politics and ambition, to ethical conduct, and to the activity of reading itself.

ENGLISH 121G 15 Points
Reading/Writing/Text
Develops University-wide skills of reading, writing and analysis. Addresses the needs of students in both English and other disciplines where both writing and reading have an important role in learning. The course fosters personal writing skills and also introduces writing as a subject of study in itself.
Environmental Physics

**Stage I**

ENVPHYS 100G 15 Points

*Sun, Sand, Surf: Science of Aotearoa*

The atmosphere, oceans and land make up the dynamic environment of Aotearoa New Zealand. A range of phenomena with natural beauty can be described elegantly with simple scientific laws. This course establishes the physical principles underlying nature, empowering students to explain everyday environmental phenomena. These principles provide the foundation to unravel the science of Earth, climate and environmental change, and energy systems.

Environmental Science

**Stage I**

ENVSCI 101G 15 Points

*Environment, Science and Management*

Explores the science behind key environmental issues to recognise the role environmental science plays in understanding the interaction between humans and the environment. The complexity of environmental problems and the difficult task of integrating science, knowledge and values are discussed.

European Studies

**Stage I**

EUROPEAN 100G 15 Points

*Europe and the World*

An introduction to the study of Europe, organised around a number of major themes, including linguistic and ethnic groupings, historical periods, literary and cultural movements, religious and philosophical traditions, and political and cultural figures. An ideal course for students wishing to explore European culture and civilisation.

Exercise Sciences

**Stage I**

EXERSCI 100G 15 Points

*Exercise and Fitness: Myths and Reality*

An introduction to the principles of physical exercise, with a focus on understanding how the body moves and responds to exercise, how performance can be measured, and how fitness can be developed and maintained to optimise health. Particular emphasis will be placed on the debunking of common myths about exercise, and offering evidence-based advice on the benefits of appropriate physical activity.

Restriction: BIOSCI 107, EXERSCI 101, 105, SPORTSCI 100G, 101, 105, MEDSCI 142

Fine Arts

**Stage I**

FINEARTS 109G 15 Points

*Introduction to Photographic Practice*

Introduces the methods, concepts and contemporary contexts of photographic practice alongside the development of a photographic portfolio. Students will use their own camera, (this can include cell phone cameras) to develop a portfolio of photographic work and explore the ways in which contemporary arts and cultural practices in Aotearoa enable a critical reflection on the production of images.

**Stage II**

FINEARTS 210G 15 Points

*Understanding Contemporary Visual Arts Practice*

How does the contemporary art world work? Premised on the idea that there are many art worlds, this course examines global and local contemporary artistic practices, theories, histories and institutions, exploring the practices and discourses that constitute these worlds. No prior knowledge or experience of contemporary art is assumed. 

Prerequisite: 60 points passed

FINEARTS 211G 15 Points

*Understanding Contemporary Fashion Design*

Investigates the relationship between fashion design and identity to build understanding of the increasing rapidity of clothing change as both the product of individual choice and the manifestation of a need for community. The emphasis will be on the consumption of fashion and its relationship to the human body with reference to fashion theory in the context of the broader literatures of gender, class and ethnicity.

Prerequisite: 60 points passed

French

**Stage I**

FRENCH 101G 15 Points

*Introductory French Language 1*

Introduces students to spoken and written French. It is delivered through two 90-minute sessions per week on campus, blended with an on-line component that uses up-to-date methodology and extensive multimedia materials. It is open to beginners or near beginners. Students who have achieved 24 recent credits in Level 1 NCEA French or 12-16 recent credits in Level 2 NCEA French (or equivalent previous study) should enrol in FRENCH 102. FRENCH 101 does not count towards a major in French. May not be taken if a more advanced language acquisition course in this subject has previously been passed.

Gender Studies

**Stage I**

GENDER 101G 15 Points

*Gender: Global and Local*

Develops an understanding of key concepts that underlie gender analysis, and how they are expressed in politics, culture and society. Examines the meaning of gender across a range of subjects and issues on the global stage and in our everyday lives.

Restriction: GENDER 100
Geography

**Stage I**

**GEOG 103G 15 Points**  
**Mapping Our World**  
An introduction to contemporary geospatial technologies such as web-mapping, GPS and tracking devices (such as your phone), Remote Sensing and GIS. Covers key concepts and principles behind these tools and their use, along with practical experiences through laboratories. Critical and theoretical perspectives on the tools, their use, and their social impacts will be discussed.

**GEOG 104G 15 Points**  
**Cities and Urbanism**  
What makes a great city? This course explores 'urbanism' in both historical and contemporary cities to determine the essence of urbanity and the way that citizens (and visitors) experience city life. The dynamics and character of cities are considered in terms of their built environment, environmental systems, population, social diversity, and planning policies and practices.

German

**Stage I**

**GERMAN 101G 15 Points**  
**German Language Introductory 1**  
Written and oral use of German for students with no previous knowledge of the language or with fewer than 16 credits in NCEA Level 2 German.  
*Restriction: May not be taken if a more advanced language acquisition course in this subject has previously been passed*

Global Studies

**Stage I**

**GLOBAL 101G 15 Points**  
**Global Issues, Sustainable Futures**  
The basis for sustainability - social issues such as population and consumption, environmental issues such as climate change, limited resources and environmental degradation. Discusses the roles that various disciplines (law, business, engineering and urban planning) will play in developing solutions, including consideration of human rights and good governance, new concepts in economics and business management which will lead to sustainable businesses, developments in science and technology which will change how we manage resources and new visions for cities and communities which will support sustainable ways of life.  
*Restriction: GENED 101G*

History

**Stage I**

**HIST 103G 15 Points**  
**Global History**  
It is only since the fifteenth century that a truly global dimension to history can be identified. This course examines key determinants that have bound the fate of peoples together including the emergence of world trade networks, the growth of world religions, the spread of epidemic diseases, the formation of empires, and the migration of peoples across continents.

Humanities

**Stage I**

**HUMS 100G 15 Points**  
**Digital Humanities: From Text to txt**  
An interdisciplinary course designed to introduce students to the Humanities using digital tools and resources. Students will study the approaches, texts and digital technologies of disciplines in the Humanities such as Art History, English, History, Philosophy, and Theological and Religious Studies. Students will expand their knowledge of the Humanities, extend their digital literacy and build critical and creative thinking skills.  
*Restriction: ARTSGEN 100G*

Innovation

**Stage I**

**INNOVATE 100G 15 Points**  
**Innovation through Design**  
Introduces design thinking and develops a user-centred approach to innovation, emphasising the importance of a deep understanding of user needs throughout an iterative ideation and prototyping process. Utilising the maker space at the Unleash Space and a range of digital tools, students will develop practical making and early stage prototyping skills.

**Stage II**

**INNOVENT 203G 15 Points**  
**The Entrepreneurial Mindset**  
Stimulates new ways of thinking about enterprising behaviour in a multi-disciplinary manner relevant to understanding and addressing real world challenges of today. Introduces skills needed to identify and assess opportunities, solve problems creatively, communicate persuasively, work effectively in teams, and understand individual and organisational impact.  
*Prerequisite: 15 points from BUSINESS 102, 103, 112, 113, MGMT 101, or 90 points passed, or 60 points from Part I of the BE(Hons) Schedule*

International Business

**Stage I**

**INTBUS 151G 15 Points**  
**Business across Borders**  
Business on a global scale presents unique challenges and unrivalled opportunities to companies equipped to cross national boundaries. Set against a background of current events, the course explores the influence of international trade and multinational corporations on the contemporary global economy.  
*Restriction: BUSINESS 101, 111, INTBUS 201, 202*
Italian

Stage I

ITALIAN 100G 15 Points
Introductory Italian Language
Learn basic Italian language structures and communication skills, including common words and basic phrases concerning everyday life. Acquire skills of interacting verbally by asking and answering straightforward questions on familiar topics. The course is delivered through a combination of class instruction and interactive online activities. For students with no previous knowledge of Italian.
Restriction: ITALIAN 106. May not be taken if an equivalent or more advanced language acquisition course in this subject has previously been passed.

ITALIAN 106G 15 Points
Italian Language for Beginners 1
Students learn to speak, read and write Italian, studying aspects of contemporary Italian society and thought. This course does not count towards a major in Italian. For students with no previous knowledge of Italian.
Restriction: May not be taken if a more advanced language acquisition course in this subject has previously been passed.

Law

Stage I

LAW 121G 15 Points
Law and Society
An introduction to theories of the nature, functions and origins of law and legal systems, including sources of law; comparative concepts of law; an overview of constitutional and legal arrangements in New Zealand, including the role of the courts; the operation of the legal system in historical and contemporary New Zealand with a focus on concepts of property rights, the Treaty of Waitangi, Treaty Settlements and proposals for constitutional change. Note: Does not meet the General Education requirement for LLB, LLB(Hons), LLB conjoint or LLB(Hons) conjoint degrees.
Restriction: LAW 101

Linguistics

Stage I

LINGUIST 101G 15 Points
Language, Mind and Society
A survey of three areas: the interaction between language structure and use on the one hand, and social structure and social norms on the other (sociolinguistics); the relationship between linguistic and cultural knowledge (anthropological linguistics); and the inter-relationship of language and other cognitive structures, especially as it is revealed through language acquisition (psycholinguistics).

Introduces fundamental marketing ideas and skillsets. Explores the world of customer value creation and marketing communications through the eyes of marketing and creative experts. Covers current topics in marketing including digital and social media, social entrepreneurship, big data analytics, green marketing and sustainability.

Mathematics

Stage I

MATHS 190G 15 Points
Great Ideas Shaping our World
Mathematics contains many powerful and beautiful ideas that have shaped the way we understand our world.
This course explores some of the grand successes of mathematical thinking. No formal mathematics background is required, just curiosity about topics such as infinity, paradoxes, cryptography, knots and fractals.

**Medical Science**

**Stage I**

**MEDSCI 100G** 15 Points

**Human Mind and Body Relationships**

Humans share with other living things the features of physical self-generation and adaptation to the environment. Humans also live in a mental (mind) world and maintain relationships with our perceived environments. Minds and bodies mutually affect one another. This mind/body dance, which is explored in this course, is what gives rise to all of human behaviour from simple daily activities to the highest forms of creativity.

**MEDSCI 101G** 15 Points

**Environmental Threats to Human Health**

Our environment sustains our lives but at times threatens our health. These threats may occur naturally, or arise from damage we have inflicted on the environment. This course considers health impacts of climate change, pollution, lifestyle choices, poverty and affluence, workplace hazards, emerging infectious diseases, and dangers affecting cancer risk.

**Music**

**Stage I**

**MUS 144G** 15 Points

**Turning-points in Western Music**

A study of significant people, major discoveries and inventions, and key factors (artistic, intellectual, social, technical) that were important agents of change in Western music. No previous knowledge of music is assumed.

**MUS 149G** 15 Points

**Rock to Reggae: Tracking Popular Music in New Zealand**

An introduction to New Zealand’s home-grown popular music, from the 1950s to the present day. A broad range of musical styles will be considered and situated within various social contexts. The issue of cultural identity in music – at national and local levels – will also be explored.

**Māori Studies**

**Stage I**

**MAORI 101G** 15 Points

**Introduction to Written Māori**

An introduction to listening, reading, writing and translation techniques used in the composition, reading and understanding of basic Māori. Designed for students with little or no knowledge of the language, and for those with some fluency wishing to understand simple sentence structure and composition. Restriction: May not be taken if a more advanced language acquisition course in this subject has previously been passed.

**MAORI 103G** 15 Points

**Introduction to Spoken Māori**

An introduction to spoken Māori for those with no previous knowledge of the language. Concentrates on the acquisition of aural and oral skills, developing the ability to understand and speak Māori. Restriction: MAORI 106. May not be taken if a more advanced language acquisition course in this subject has previously been passed.

**Optometry and Vision Science**

**Stage I**

**OPTOM 101G** 15 Points

**How We See**

Overview of the interdisciplinary study of human vision. The course introduces the biological/physiological organisation of the visual system, discusses the subjective nature of perception, and the implications of studies of biological visual systems for machine vision. Interdisciplinary understandings of vision will be enriched by the examination of historical paintings and artists’ visual experiences.

**Pacific Studies**

**Stage I**

**PACIFIC 100G** 15 Points

**Te Moana-nui-a-Kiwa/Pacific Worlds**

Introduces students to Pacific Studies and the worlds of Te Moana-nui-ā-Kiwa (The Pacific). Through the study of taonga or cultural treasures drawn from specific cultures and societies, insights into Indigenous Pacific knowledges and practices are developed. Spanning deep history and the contemporary moment, this course provides a critical understanding of change in the Pacific over time and space.

**Pharmacy**

**Stage I**

**PHARMACY 111G** 15 Points

**Drugs and Society**

The use of drugs in society including historical perspectives. Selected examples of the use of medicines in disease, recreational drug use and drug misuse, and cultural and ethnic influences on drug use. Differences between conventional and complementary medicines. The role of the pharmaceutical industry in drug discovery, manufacture and promotion. Legal and ethical issues pertaining to access to pharmaceuticals.

**Philosophy**

**Stage I**

**PHIL 105G** 15 Points

**Critical Thinking**

An introduction to reasoning, argument, and explanation
that emphasises the development of practical skills and their use in everyday life. The course introduces different forms of reasoning and explains techniques to evaluate them. It will enable students to distinguish good arguments and explanations from bad ones, to explain the difference, and thereby to improve critical thinking abilities.

**Physics**

**Stage I**

**PHYSICS 100G**

*Models and Reality*
Explore the role of models in physical science and what they contribute to our understanding of the world, and the concepts of reductionism and emergence. Topics include particle physics, materials science, and climate; and the use of models that explain dynamics of populations and artificial systems, including epidemiology, flocking in birds and fish, and the spread of information in social networks.

**Politics and International Relations**

**Stage I**

**POLITICS 107G**

*New Zealand Politics*
An introduction to understanding who governs New Zealand and in whose interests. Topics include national identity, institutions of government, leadership, voting and elections, the place of Māori within the political system, parties and political participation. The course draws on current research in NZ politics and provides knowledge that can be applied to a variety of careers, including law, business and public service.

**Population Health**

**Stage I**

**POPLHLTH 103G**

*Epidemics: Black Death to Bioterrorism*
Epidemics have devastated human populations and will continue to do so. This course looks at how epidemics can run rampant through society and how we can control them. It will include examples from the past and present, as well as outline future threats. A diversity of epidemics will be covered, from the plague, gambling, depression, pandemics, nun-biting and alien abduction.

**Psychology**

**Stage I**

**PSYCH 109G**

*Mind, Brain and Behaviour*
Topics covered may include: the nature of sensory and perceptual processes, the cause of perceptual illusions, the structure and function of the human brain, approaches to animal and human learning, models of human language and memory, and the design of psychological experiments. A laboratory component, in which students are required to participate as subjects, forms part of the course.

**Science General**

**Stage I**

**SCIGEN 101G**

*Communicating in a Knowledge Society*
Effective communication is required for specialists in all fields to engage meaningfully with society. In this course students gain an understanding of the important role communication plays in a knowledge society. Through case studies and practical experience students learn about the responsibilities and skills required to communicate with a variety of audiences. They learn how to effectively manage and present data and practice oral, written, visual and electronic communication.

**SCIGEN 102G**

*Contemporary Science in Aotearoa New Zealand*
What does it mean to do science here and now? This course considers how knowledge of place enhances your learning, the significance of Te Tiriti o Waitangi, and how knowledge systems frame understanding. Students will think critically about the relationships between science and our environment, along with the ethics of science in practice.

**Stage II**

**SCIGEN 201G**

*Innovating in a Knowledge Society*
Interdisciplinary examination of science innovation at policy, organisational and project levels including context, impacts and roles of business and research organisations, and ways innovations are presented and received. Case study analysis of the business environment including how innovation is both enabled and constrained in science-based organisations and society, and innovation strategies in science-based organisations.
**Stage III**

**SCIGEN 301G  15 Points**

*Engaging in a Knowledge Society*

Addressing complex issues requires knowledge experts to engage with a variety of people. Solutions will be gained from collaborations that co-produce knowledge in transdisciplinary partnerships that lead to new ways of thinking. This course explores meaningful ways to engage with communities, and reassesses current ways of knowing and doing.

**Sociology**

**Stage I**

**SOCL 101G  15 Points**

*Understanding Aotearoa New Zealand*

Provides an introduction to the sociological analysis of New Zealand society. Looks at familiar events, institutions, social processes from a sociological point of view and offers ways to understand them in new and different ways. Focuses on the structure of New Zealand society and on social and political changes which affect the lives of New Zealanders and shape their society.

**Spanish**

**Stage I**

**SPANISH 104G  15 Points**

*Beginners' Spanish 1*

Provides a solid grounding in the basic grammar and vocabulary of Spanish for beginners or near beginners, emphasising communicative competence in the present tense. Develops speaking, listening, reading and writing skills, and prepares students at the A1 Level of the Common European Framework of Reference for Languages.

**Sport Studies**

**Stage I**

**SPORT 100G  15 Points**

*Sport in Society*

Critically examines the socio-cultural, political and economic significance of sport within Aotearoa New Zealand. Examines how sport is embedded in the lives of people, constitutes identities, and is connected to major spheres of social life and various social issues. Through focusing on select sporting issues it analyses how New Zealanders negotiate understandings of self, ethnicity, gender, sexualities, health, and lifestyle.

**Statistics**

**Stage I**

**STATS 101G  15 Points**

*Introduction to Statistics*

Intended for anyone who will ever have to collect or make sense of data, either in their career or private life. Steps involved in conducting a statistical investigation are studied with the main emphasis being on data analysis and the background concepts necessary for successfully analysing data, extrapolating from patterns in data to more generally applicable conclusions and communicating results to others. Other topics include probability; confidence intervals, statistical significance, t-tests, and p-values; nonparametric methods; one-way analysis of variance, simple linear regression, correlation, tables of counts and the chi-square test.

**Restriction:** STATS 102, 107, 108, 191

**STATS 150G  15 Points**

*Communicating Statistics*

Examines the uses, limitations and abuses of statistical information in a variety of activities such as polling, public health, sport, law, marketing and the environment. The statistical concepts and thinking underlying data-based arguments will be explored. Emphasises the interpretation and critical evaluation of statistically based reports as well as the construction of statistically sound arguments and reports. Some course material will be drawn from topics currently in the news.

**Sustainability**

**Stage I**

**SUSTAIN 100G  15 Points**

*Sustainability and Us*

What is sustainability? Discusses what sustainability means, and its underpinning values, history and operation within complex physical systems. Students complete a group project to develop skills in collective decision making with a solution focus. Two sustainability issues, such as food and water, are discussed in depth.

**Theological and Religious Studies**

**Stage I**

**THEOREL 101G  15 Points**

*The Bible and Popular Culture*

An exploration of biblical themes, images, and metaphors in contemporary film, music and cultural arts through which religion and culture intersect. It develops tools appropriate for analysing popular culture, as it moves from the local to the national to the global.

**Restriction:** THEOLOGY 101, 101G

**THEOREL 106G  15 Points**

*Islam and the Contemporary World*

Since the religion of Islam has become a very significant aspect of contemporary global and local societies, this course seeks to introduce students to an understanding of key aspects of Islam and an analysis of its significant contribution to New Zealand society as well as to societies and cultures across the world.

**Restriction:** THEOLOGY 106, 106G

**Tongan**

**Stage I**

**TONGAN 101G  15 Points**

*Tongan Language 1*

Gives students an introduction to the structure of Tongan as well as allowing them to develop basic language skills in listening, speaking, reading and writing. Designed for
students with little or no knowledge of the language, and for those with some fluency wishing to understand simple sentence structure and composition.

Restriction: May not be taken if a more advanced language acquisition course in this subject has previously been passed.

Translation Studies

Stage I

TRANSLAT 100G 15 Points
Translation for Global Citizens
Covers the foundations of translation and interpreting as an academic discipline and as a critically important communication enabler which serves a multicultural and multilingual society. The course is designed to equip monolingual students, as well as students with language skills, with the literacy in translation and interpreting increasingly needed to navigate today's globalised world and to detect and overcome communication gaps in diverse business and private contexts.

Urban Planning

Stage I

URBPLAN 101G 15 Points
Introduction to Urban Planning
An introduction to the discipline of urban planning, examining its evolution, theory, practice, profession, ethics, values and future trends. Offers a critical exploration of the challenges facing urban planners today and into the future.

Restriction: PLANNING 100G

Youth Work

Stage I

YOUTHWRK 152G 15 Points
Understanding New Zealand Youth
Examines the concept of 'youth' and the historical, economic and political contexts in which young people live and are schooled in New Zealand society. The concept of youth is explored as a fundamental aspect of human development, identity and culture. The ways that we learn about what it is to be a young person in New Zealand today, including sport, body image, media, music, technology and social networking will be explored.
**Micro-credentials**

A micro-credential certifies the achievement of a specific set of skills and knowledge. Micro-credentials can be stand-alone units and can also potentially be used as credit towards a formal qualification.
