- (ii) “Candidature” refers to a person’s status as a candidate for the degree of Doctor of Philosophy.
- (iii) “Doctoral year” refers to each block of 12 months from the initial date of programme enrolment.
- (iv) Full-time and part-time enrolment are defined in the doctoral full-time and part-time enrolment policy and procedures.

### General Requirements

- 1 A candidate for the Degree of Doctor of Philosophy (PhD) is required to undertake an original and coherent research project and to present the outcome of that research project for examination as a thesis.
- 2 The research project, which may include scholarly creative practice, must involve enquiry that is experimental and/or critical in nature and be driven by an intellectual hypothesis, position, problem or question(s) capable of being rigorously explored and of making an original and significant contribution to knowledge and/or understanding in the relevant field(s) of study.
- 3 The research project must be conducted under supervision and over the period of enrolment in the PhD programme, and must be conducted in accordance with the Research Code of Conduct Policy.
- 4 The thesis requirement at Regulation 1 must be satisfied by a cohesive written document, which shall not normally exceed 100,000 words. Scholarly creative work (written or otherwise) that forms an integrated whole with the written document may be submitted for examination as part of the thesis requirement.
- 5 The thesis must be undertaken and completed in accordance with the Doctoral Thesis Policy and Procedures and, where scholarly creative work is (to be) presented for examination as part of the thesis requirement, with the PhD – Including Scholarly Creative Work Policy and Procedures.

## REGULATIONS – HIGHER DOCTORATES

*In addition to the degree of Doctor of Philosophy, the University offers higher doctorates in Engineering (DEng), Laws (LLD), Literature (LittD), and Science (DSc). These are the highest academic awards offered by the University and are awarded to graduates or close affiliates of the University of Auckland who have published original work that has, over an extensive period of time, given them authoritative standing and international eminence in their respective field. The higher doctorate is thus to be seen as recognition of real distinction in one of these areas of study. It is awarded rarely and only after rigorous examination of a substantial and significant corpus of material. A person wishing to become a candidate for a higher doctorate should refer to the Guidelines for Candidates of Higher Doctorates.*

### Consideration of Applications to be Examined

- 1 As soon as possible after an application to be examined has been lodged with the Pro Vice-Chancellor Global and Graduate Research and has been determined to meet initial requirements, the application will be forwarded to the relevant Faculty Dean or delegate ("the faculty") for further consideration.
- 2 The faculty will appoint an Examination Committee of three senior academics who have a general understanding of the applicant's field of research. At least two members of the Committee must be academic members of the University, one of whom will be nominated to chair the Examination Committee.
- 3 The Examination Committee will investigate the information provided, including the quality and nature of the

submission for examination, will seek input from the Dean of the faculty, and will make a recommendation to the Pro Vice-Chancellor Global and Graduate Research within one month that the faculty:

- a will allow the applicant to be admitted to candidature for the higher doctorate
- or
- b will not allow the applicant to be admitted to candidature for the higher doctorate.

### **Notification of Assessment of Application and Intention to Submit**

- 4 The Pro Vice-Chancellor Global and Graduate Research will advise the applicant of the faculty's decision and, if the application has been accepted, will request written notification of the applicant's intention to proceed with candidature and submission. The submission of work to be examined must be received by the Pro Vice-Chancellor Global and Graduate Research within three months of the notification that the application was accepted.
- 5 The examination will not proceed until receipt of the candidate's written notification of intention to proceed and payment of fees as set out in Schedule B of the Fees Statute.

### **Appointment of Examiners**

- 6 Upon payment of fees and receipt of the candidate's written notification of intention to proceed, the Pro Vice-Chancellor Global and Graduate Research will request that the faculty nominate three external examiners. The nominations should be made within three months of the request. The examiners must be of authoritative standing and international eminence in the field of the submitted work and must be active in research. At least one examiner shall be resident outside New Zealand. Examiners must not have engaged in substantial collaboration with the candidate. Any involvement with the candidate by the examiner which could constitute a conflict of interest should be declared at the outset. The appointment of all examiners must be approved by the Pro Vice-Chancellor Global and Graduate Research.

### **Submission**

- 7 The candidate shall lodge at the School of Graduate Studies:
  - a three copies of the work to be examined
  - and
  - b a statutory declaration which shall:
    - (i) state the extent to which the work is the candidate's own, and (in the case of a conjoint work) identify as clearly as possible which parts are the candidate's own
    - and
    - (ii) declare that the work in substantially its present form has not been submitted or accepted previously for the award of a degree or diploma in this or any other tertiary institution, and is not being submitted for a degree or diploma in any other tertiary institution or for another degree or diploma at this institution.

### **Examination**

- 8 The degree will be awarded solely on consideration of the submitted works upon which the candidate's claim to the degree is based.
- 9 In order to qualify for the degree, the submitted works must provide sufficient evidence that the candidate has made an original contribution of special excellence to their discipline such that they are considered to have authoritative standing and international eminence in their field.
- 10 Examiners will be requested to report to the Pro Vice-Chancellor Global and Graduate Research on the submission within three months of receipt and recommend whether the candidate:
  - a should be awarded the degree
  - or
  - b should not be awarded the degree.
- 11 The reports of all examiners will be forwarded to the Examination Committee for consideration of whether or not to admit the candidate to the degree.
- 12 If the examiners' recommendations differ, the Examination Committee may invite the examiners to consult and provide a written report or reports on the outcome of their consultation. If, after such consultation, the differences remain unresolved, the Examination Committee may recommend to the Pro Vice-Chancellor Global and Graduate Research that a further independent external examiner be appointed to report on areas of conflict.
- 13 The Examination Committee shall recommend an outcome based on the examiners' reports to the Pro Vice-Chancellor Global and Graduate Research. The Pro Vice-Chancellor Global and Graduate Research will determine the result of the examination and notify the candidate of the decision.

- 14 An unsuccessful submission may not be presented for re-examination until at least five years after initial submission and must include new material.

**Deposit of Submission in the Library**

- 15 On successful completion of the examination of the submitted work, and when possible, two bound copies will be deposited in the University Library by the School of Graduate Studies. The first bound copy will remain in the Library for reference purposes; the second copy may be borrowed by members of the Library, or sent to other libraries on inter-library loan. The third copy will be returned to the candidate.

**Graduation**

- 16 Candidates who have satisfied the requirements for any award of the University shall be admitted to that award.

# COURSE PRESCRIPTIONS

---

*The Course Prescriptions contain approved University of Auckland courses. Before selecting courses from this Calendar, students and potential students are advised to ascertain which courses are expected to be offered in this Academic Year and in which semester they are scheduled by referring to the Class Search on Student Services Online, or by contacting their Student Hub.*

*Where courses in the following Course Prescriptions are listed with an 'A' and a 'B' option, this means that, if they are offered, they will be taught over two semesters and students must enrol in both Part A and Part B in order to complete and, where successful, be credited with the course. Courses with no 'A' or 'B' designation are taught over one semester.*

*The Prescriptions are listed by faculty, in alpha-numeric order by subject title and should be read in conjunction with the relevant regulations.*

**Calculating a Grade Point Average**

*Grade Point Averages (GPA) are calculated using the following scale. Courses are weighted based on points value, and the exact formula may vary from programme-to-programme.*

|          |                      |
|----------|----------------------|
| 9 for A+ | 4 for B-             |
| 8 for A  | 3 for C+             |
| 7 for A- | 2 for C              |
| 6 for B+ | 1 for C-             |
| 5 for B  | 0 for D+, D, D- or F |

*More details about GPAs are available online at [https://uoa.custhelp.com/app/answers/detail/a\\_id/2454/](https://uoa.custhelp.com/app/answers/detail/a_id/2454/).*

## **Philosophy**

### **Stage I**

**PHIL 100** 15 Points

### **Mind, Knowledge, and Reality**

Metaphysics deals with fundamental problems about the nature of the world and human beings, for example, questions about the existence of God, the nature of time, the relationship between mind and body and the nature of

identity and the self. The theory of knowledge studies the sources, limits and justification of human knowledge and understanding as distinct from opinion or belief.

**PHIL 101** 15 Points

### **Introduction to Logic**

Logic is the study of argument. This course aims to provide an understanding of central logical notions, such as consistency and inconsistency, logical truth, and, most importantly, what it means for an argument to be valid or invalid, sound or unsound. The course examines two main logical systems, propositional and predicate logic, and shows how these formal systems are used to analyse and evaluate arguments.

**PHIL 104** 15 Points

### **Ethics and Justice**

How should we live? And how do we live well together? This course examines practical questions of ethics and justice at the personal, professional, social and global levels.
