Philosophy

Stage I

PHIL 100 15 Points
Mind, Knowledge, and Reality
Metaphysics deals with fundamental problems about the nature of the world and human beings, for example, questions about the existence of God, the nature of time, the relationship between mind and body and the nature of identity and the self. The theory of knowledge studies the sources, limits and justification of human knowledge and understanding as distinct from opinion or belief.
PHIL 101 15 Points
Introduction to Logic
Logic is the study of argument. This course aims to provide an understanding of central logical notions, such as consistency and inconsistency, logical truth, and, most importantly, what it means for an argument to be valid or invalid, sound or unsound. The course examines two main logical systems, propositional and predicate logic, and shows how these formal systems are used to analyse and evaluate arguments.

PHIL 104 15 Points
Ethics and Justice
How should we live? And how do we live well together? This course examines practical questions of ethics and justice at the personal, professional, social and global levels. The course reflects on these topics in the light of philosophical theories about justice, liberty, rights, and different approaches to ethics that emphasise roles, rules, virtues and consequences.

PHIL 105G 15 Points
Critical Thinking
An introduction to reasoning, argument, and explanation that emphasises the development of practical skills and their use in everyday life. The course introduces different forms of reasoning and explains techniques to evaluate them. Prerequisite: 30 points in Global Politics and Human Rights, Philosophy or Politics and International Relations

PHIL 207 15 Points

Students will understand how to use a 35mm camera, process film, make black and white photographic prints and learn how to refine and manipulate photographic imagery in the darkroom. Students will explore these analogue technologies as a way of reflecting on contemporary cultural imagery and perspectives, asking what analogue technologies can offer as a way seeing anew.
Prerequisite: FINEARTS 110, 113 and either FINEARTS 111 or 112

FINEARTS 227
15 Points
Photography 2
Explores the ubiquitous nature of digital photography by experimenting with image-making using everything from high-end digital cameras to cell phones. There will be
an emphasis on editing work for presentation in differing platforms including social media, as well as attention given to extra-artistic photographic practices. Forms of documentation, scientific and other 'end-oriented' processes will be explored alongside artistic projects. Fine Arts engagement with these technologies is producing new and emergent forms of art whilst also commenting more broadly on contemporary cultural reality.

Prerequisite: FINEARTS 110, 113 and either FINEARTS 111 or 112

FINEARTS 228  15 Points
Painting 1
Through hands-on engagement with practices of drawing and painting, this course will enable students to gain knowledge and experience in the contemporary art of painting. Students will understand painting as an artistic method in its own right, and as a means to creatively respond to their work. They will be introduced to a variety of strategies for gathering and reflecting upon images; processes will include drawing from direct observation, photography, appropriation, collage etc. Core techniques covered will include preparation of supports and surfaces, and knowledge of methods and mediums relevant to the production of paintings.

Prerequisite: FINEARTS 110, 113 and either FINEARTS 111 or 112

FINEARTS 229  15 Points
Painting 2
Explores the various ways in which the act of painting relates to process, materiality, place, and the self. In response to a range of painterly actions and/or a self-generated list of 'paint-related' verbs (to roll, to smudge, to scrape, etc.) students will create a 'catalogue' of marks and manipulations of paint; they will then develop these ideas through studio practice and research that explores abstraction, materiality, and considerations of form. Students will be guided and encouraged to work beyond and between traditional painting processes in order to develop their own painterly vocabulary.

Prerequisite: FINEARTS 110, 113 and either FINEARTS 111 or 112

FINEARTS 230  15 Points
Sculture 1
Based in Elam's metal and wood workshops, this course will guide students in the exploration of materials and production processes. Students will be asked to pre-conceptualise and plan a sculptural work, or works, and to actualise those plans in metal and/or wood. Drawing, making physical models and 3-D digital modelling will be emphasised as ways of developing spatial ideas. Students will be encouraged to gain proficiency with tools and techniques such as cutting, joining and welding.

Prerequisite: FINEARTS 110, 113 and either FINEARTS 111 or 112

FINEARTS 231  15 Points
Sculture 2
Engages with tactile processes of object-making and reproduction to create works of contemporary art. Workshops will teach students how to make hand made objects with soft materials such as clay and wax. Students will then learn how to make reproductions of those objects using a range of casting processes. Students will explore how reproduction and multiples impact the form and content of artworks.

Prerequisite: FINEARTS 110, 113 and either FINEARTS 111 or 112

FINEARTS 232  15 Points
Performance 1
Explores performance as an artistic practice, with a focus on documentation. How can we retain and communicate the ephemeral effects of a performance (or a documentary record of a performance) in ways that do not interrupt or undermine the fundamentally transitory nature of the performance itself? Students will be guided to explore their own performance practice and to develop appropriate methods of documentation including, but not limited to, video, photography, drawing, and sound recording. Students will learn to use documentation as a visual and conceptual tool: choosing when to direct attention to the residual effects of a performance and when to forego documentation altogether in the pursuit of a direct encounter with an audience.

Prerequisite: FINEARTS 110, 113 and either FINEARTS 111 or 112
effects of colonisation and imperialism upon the cultures that have been subjected to them. Students will generate artwork in any medium to explore related issues including migration, inclusion/exclusion, equity and balance, coloniality, decoloniality and delinking.

Prerequisite: FINEARTS 110, 113 and either FINEARTS 111 or 112

FINEARTS 242 30 Points
Image, Object and Materiality 1
By making images (painting, prints, photos, etc.), but also through discursive practices of reading, writing and discussion, students will explore the critical capacity of images to communicate, reflect upon or challenge ideas. A combination of lectures and readings will introduce students to various movements, epochs, institutions, and economic and cultural forces that have shaped the ways we relate to images within artistic practice. Students will be encouraged to make and use their own creative images to explore the question of art's critical-material capacity, the many ways in which images might be "read," and the range of functions the image has served in the specific cultural contexts in which it emerged.

Prerequisite: FINEARTS 110, 113 and either FINEARTS 111 or 112

FINEARTS 243 30 Points
Image, Object and Materiality 2
Drawing on the ontology, visual language and materiality of the internet, students will generate sculptural objects and installations that exist in real space. The internet has created networked societies and greatly altered cultural relations, creating the conditions for the emergence of new practices in contemporary art. This course begins from the idea of "Post Internet Art" which is a recent phenomenon of this background. By making artworks, and through reading, writing and discussion, students will explore the critical capacity of images, objects and materiality to capture and reflect ideas.

Prerequisite: FINEARTS 110, 113 and either FINEARTS 111 or 112

FINEARTS 244 30 Points
Embodiment, Identity and Agency 1
Explores the role of the audience in art and examines the work of artists who have challenged assumptions about that audience: who they are, and who they might be. Using their own choice of medium, students will develop an art project that addresses this question. They will learn how to negotiate the ‘ethics of the encounter’ (with the audience or community) and explore practices and logistics of making artwork in the public domain. One component of the course will consider the ethical and cultural issues facing artists when working with, or consulting, tangata whenua in Aotearoa, New Zealand.

Prerequisite: FINEARTS 110, 113 and either FINEARTS 111 or 112

FINEARTS 245 30 Points

Seminars and readings will explore key concepts of fluidity, intersectionality, body image, fashion, gender and persona, in relation to photography, film, fashion and the performance of identity.

Prerequisite: FINEARTS 110, 113 and either FINEARTS 111 or 112

FINEARTS 246 30 Points
Systems, Ecologies and Environments 1
Explores the Māori concept of whakawhanaungatanga as the starting point for a contemporary art practice in the contexts of Aotearoa and Te Moana-nui-a-Kiwa. Drawing on a range of influences including kōrerorero, talanoa and critical pedagogy, students will work in an open and discursive way to develop projects that reflect on the climate crisis and the concept of the anthropocene. Students will then undertake a studio art project that allows them to explore the artistic potential embedded in their relationship ki te ira tangata me te taiao (to people and to the environment). One component of the course will consider the ethical and cultural issues facing artists when working with, or consulting, tangata whenua in Aotearoa, New Zealand.

Prerequisite: FINEARTS 110, 113 and either FINEARTS 111 or 112

FINEARTS 247 30 Points
Systems, Ecologies and Environments 2
Students will explore, through reading, talking, researching, performing and making, the capacity of art to lead us back into our animal natures, to elicit empathic modes of being, and to begin the process of renaturing both ourselves and our earth.

Prerequisite: FINEARTS 110, 113 and either FINEARTS 111 or 112

FINEARTS 248 30 Points
Technology and Material Futures 1
Students will learn to combine virtual and tactile methods of making in order to produce artworks. With the advent of 3-D Printing, technologies of Augmented Reality and Virtual Reality, laser cutting, digital casting and 3-D scanning, the line between analogue and digital artmaking has dissolved. Through seminars and readings, students will focus on the socioeconomic, biological and philosophical issues that arise when everything is malleable and the gap between imaginative projection and the substance of the real world has been placed in question.

FINEARTS 249 30 Points
Technology and Material Futures 2
Worldmaking: students will work collectively to develop ideas and resolve conceptual, material and technical problems in the process of creating collaborative artworks. Through seminars, dialogue and readings, students will explore ideas of dystopia, utopia, the concept of the Anthropocene, possible material futures, science fiction, and propositional modes of thinking.

This includes a security clearance (essentially a check of any convictions recorded against you) and a drug test prior to being given access to ESR resources. Students will normally be required to provide a DNA sample to ensure that any allegations of cross-contamination of a DNA sample can be properly investigated. The DNA profile will be retained by ESR. All other information will be returned to the students at the completion of their studies. Students who would like further details of these conditions should contact the Programme Director.
