

ORGANISATION	PROFILE
	<p>At Synergy Consulting we are experts in recruiting sales and marketing professionals across medical, pharmaceutical and commercial sectors. We do more to create exceptional careers by placing talented individuals into the right place within successful companies. Facilitator of www.medrepsnz.com, online community and career resources for this industry.</p>
	<p>KODE Biotech Limited has a potentially disruptive technology that can allow users to modify virtually any surface with virtually any bioactive compound in less than an hour and without any special equipment. KODE technology already has a range of products in the market, but also has a huge number of potential and therapeutic opportunities to explore. KODE Biotech is looking for post graduate students (MPhil & PhD) who want to either study new KODE technology applications (particularly microbiology and cell immobilisation) or to study the business processes of biotech innovation. Stipends will be made available.</p>
	<p>Scientific and Technical Recruitment (STR) was founded in 1987 by Dr Lynley Watson to supply specialized recruitment solutions to its clients. We have extensive industry experience, including Research & Development, Laboratory Management and pure Scientific Research; Health, Scientific and Technical Sales; Project Management, Engineering and General Management with all our consultants having qualifications in either a scientific, medical or engineering discipline. We place permanent, temporary and contract personnel into niche market segments.</p>
	<p>Teach First NZ is recruiting 20 talented individuals onto an innovative 2-year Leadership Development Programme aimed at tackling educational inequality.</p> <p>Our employment-based programme is fully-salaried, and involves a teaching commitment in a secondary school serving a lower-decile community. You will also receive a fully funded Postgraduate Diploma in Teaching qualification from The University of Auckland. The Teach First NZ scholarship provides participants with leadership development, unparalleled networking opportunities with corporate sponsors, and the opportunity to join over 35,000 international alumni. Develop the leadership skills and experience to excel in any future career, while making a meaningful long-term impact to future generations of New Zealanders.</p> <p>Make a difference. Lead the way. Teach First NZ. www.teachfirstnz.org</p>
	<p>The Pasifika Medical Association has, for 16 years, been involved in advocating health career pathway options with secondary students, supporting Pacific health science tertiary students to achieve in their field of study through informal mentoring and career counselling, and has supported Pacific health science students on campus at the University of Auckland and other tertiary providers.</p> <p>Our Vision: Pacific Health Professionals of Excellence, Working Together to Meet the Health Needs of Pacific People in the Region.</p> <p>Our Mission: Strengthen Pacific Health Workforce Capacity and Capability in the Region</p>

THE UNIVERSITY OF AUCKLAND

FACULTY OF SCIENCE

Department of Sport and Exercise Science

Come and chat to us about the science of exercise - exciting opportunities to understand the human body in motion.

Sport and Exercise Science is an important subject area that relates to all aspects of our everyday life - how and why the human body moves; skill development and elite performance; the cost of physical inactivity and the rehabilitative effects of exercise. Research indicates that there are significant health benefits from prescribed exercise and physical activity.

Clinical Exercise Physiology provides courses and practical training in the application of exercise to people with a range of health conditions.

Kiwi Health Jobs is New Zealand's largest dedicated health job board. Launched in 2011 we are 100% owned and supported by New Zealand's 20 District Health Boards (DHBs) and the NZ Blood Service.

Kiwi Health Jobs is not only a job board. It is a key partner in marketing and hosting information on the ACE House Officer & Nursing programmes, and supporting recruitment campaigns and events such as the BMJ Careers Fair. The brand is significant in driving people to a "one stop" shop, where all vacancies and information about working in New Zealand can be accessed in the same place.

Whether you are looking for a clinical or non-clinical role, Kiwi Health Jobs has a number of opportunities throughout New Zealand to help your career get started in health.

The New Zealand College of Chiropractic (NZCC) is a world-renowned chiropractic training institution offering a Bachelor of Chiropractic degree. Our students, faculty and staff, coupled with a culture of service and excellence, are what makes the College a great place to learn and grow. The College is renowned worldwide for ground-breaking research in the chiropractic field, and for its highly qualified international teaching faculty. Our clinics prepare students with a hands-on learning, exposure to essential chiropractic techniques and a high level of real patient experience, so that NZCC graduates leave ready to be successful as chiropractors. Our graduates are committed to leadership in the science, philosophy and art of chiropractic. Career opportunities are plentiful in chiropractic practice, teaching and research, with NZCC graduates in high demand both in New Zealand and abroad.

Pharmaceutical Solutions Limited is a passionate Clinical Research Company, providing quality clinical management in New Zealand and Australia. Pharmaceutical Solutions Limited is proud to promote the quality of medical research in New Zealand & Australia and of our contribution to improving people's health/wellbeing. We achieve this through the provision of personalised medical research management and regulatory services to the bio-pharmaceutical and device industries.

Convert your bachelors degree into a business masters! The University of Auckland's Graduate School of Management offers coursework masters degrees for students who want to add business expertise to their existing undergraduate qualification. The Master of Management, Master of International Business and Master of Professional Accounting are full-time, 15 to 18-month programmes that will give you the practical business knowledge and professional skills to launch your career.

The New Zealand Defence Force comprises of the Royal New Zealand Navy, The New Zealand Army and the Royal New Zealand Air Force. There are a multitude of career options for those with tertiary qualifications in a range of areas from medical support, marine engineering and military intelligence.

Chiasma is New Zealand's premier student-led non-profit organisation that fosters connections between science and business, connecting university students to high-tech industries. The goal of Chiasma is to encourage innovation in the field of biotechnology and other high-tech fields, and create links and networks between the University's science community and the industry. Thus, we strive to strengthen New Zealand's future prosperity through the growth of a knowledge-based economy.

St John is at the frontline of medical response, providing Ambulance Services throughout New Zealand. We're also part of a much broader picture of health care, through our provision of first aid training, event medical services, AEDs (defibrillators), first aid kits and supplies, medical alarms, youth groups and a wide range of community programmes.

Providing Ambulance Services throughout New Zealand will always be a core activity for St John, however we're also playing an increasing role in meeting the broader health needs of New Zealand communities.

We believe it's important to develop strong communities to help people live independently, get the social connections they need and improve their wellbeing. Central to everything we achieve is the energy and generosity of our volunteers and supporters. Providing an effective Ambulance Service is central to developing strong communities. This core service is supported by our event medical services for everything from school fairs to major international sports matches.

To help people in hospital, we offer our Friends of the Emergency Department and Hospital Friends services, which provide non-clinical support to patients and their family and friends. Our Youth Programme encourages young people to develop personal strengths and care for others. They learn first aid and make friends in the process. We also provide a comprehensive range of adult first aid training courses to teach people the skills they need to act with confidence in an emergency. Complementary to our first aid training is our online shop for first aid kits and supplies. We provide a medical alarm service to help people live safely, for longer, in their own homes. We're also working with key partners to develop solutions that will enable more effective monitoring of chronic illnesses from the patient's home. This is complemented by our Caring Caller service, which provides a friendly phone call to check on someone's wellbeing. We have also established Health Shuttles in a number of areas to help people with impaired mobility attend essential appointments.
