Globally Harmonized System (GHS)
Hazard Statements

Hazard Statements specific to pregnancy, reproduction and breastfeeding. Note, in addition to chemicals with the following hazard statements, it is also advisable to avoid chemicals that are highly toxic, noxious, or harmful.

- H340: May cause genetic defects
- H341: Suspected of causing genetic defects
- H350: May cause cancer
- H351: Suspected of causing cancer
- H360: May damage fertility or the unborn child
- H361: Suspected of damaging fertility or the unborn child
- H361d: Suspected of damaging the unborn child
- H361f: Suspected of damaging fertility
- H362: May cause harm to breast-fed children
- H370: Causes damage to organs
- H371: May cause damage to organs
- H372: Causes damage to organs through prolonged or repeated exposure
- H373: May cause damage to organs through prolonged or repeated exposure

Note: Hazard statements are found in every chemical’s Material Safety Data Sheet (MSDS).

Important: Only use most up-to-date MSDS containing full list of H-statements and toxicological information (recommended: MSDS from Sigma-Aldrich or Merck (NOT ScienceLab)). This information can change, so it is important to keep updating the MSDS’s.
