

Laboratory Safety Induction – Chemicals

- I have read and understood the material in Induction Kit Part 1 – Chemical Safety in the Laboratory and Part 2 – Classification and Handling of Chemicals
- I understand how to access MSDS databases and how to interpret MSDS sheet information
- I have read and understood the requirements of the General Safe Method of Use.

In particular:

1. I will follow the General Safe Method of Use.
2. I will consult MSDS sheets for chemicals whose hazardous properties I am unfamiliar with.
3. I will wear laboratory coats, safety glasses and correct type of glove when handling chemicals.
4. I will use fume hoods for toxic and flammable chemicals and I will leave fume hoods in a tidy and uncluttered state.
5. I will dispose of chemicals using a University approved method.
6. I will report any accident/incident immediately to the Laboratory Manager or the 'Person in Charge'.
