

TAKE 5	✓
For the following experiment/procedure -	
1. I am authorised to carry out this procedure and I am aware of any known hazards and safety guidelines. (Do you have the appropriate literature, MSDS's and has the procedure been discussed with your supervisor? If after hours, is this authorised and will there be appropriate support people around).	
2. I am using the appropriate chemicals - clearly labelled - and procedure. If the procedure is particularly hazardous, I have informed others about the safety implications.	
3. I am using the appropriate equipment (including personal protection) and the experimental and laboratory facilities are in good order.	
4. I have completed an experiment data table if the procedure is being carried out for the first time, and if I have performed this experiment before, I have thought about any change to the procedure that might affect safety? (new equipment, larger scale, new location)	
5. I know where the safety equipment (fire extinguishers/ first aid) is located and what to do and who to contact if incidents arise or this procedure goes out of control.	
Signature of Researcher: _____	Date: _____
