

Chemistry Health and Safety Guidelines

Please ensure that all lab users have signed off on the latest version of the Chemistry Health and Safety Guidelines.

Fume hoods – labelling with names of students /supervisors

Please update the mini white board on each fume hood with the name of the student(s) and the initials of the lab manager/ supervisor(s). If it becomes necessary to discuss the contents of the fume hood the users can easily be identified. In general the lab manager/ supervisor (not the student) would be approached in the first instance.
