

FREE hearing tests for infants at Tāmaki Innovation Campus

At the beginning of their clinical experience with young children, Master of Audiology students need to test the hearing of a number of infants aged between 7 and 24 months to gain experience in basic test techniques.

If you have, or know of, an infant in this age group whose parents would like to have their child's hearing tested free of charge, please phone 09 923 9909 for an appointment.

All children will be tested by Master of Audiology students under the supervision of an experienced audiologist.

The appointments will take about 30 minutes and are offered on:

- **Tuesday 18 September**
- **Wednesday 19 September**
- **Friday 21 September**
