The Department of Computer Science

Yale Yu

Yale Yu graduated an MSc in Computer Science from The University of Auckland in 2000. He chose to study here because he considered The University of Auckland to be one of the best universities in world. He was attracted by the excellence of the teachers and supervisors, the academic climate and the pleasant living environment.

He now works as Senior Industry Consultant and Principal Enterprise Architect at Hewlett Packard Communication, Media and Entertainment in Australia.

"I provide high-end cross-industry consulting services to enterprise-level businesses. This includes the creation of end-to-end IT architecture solutions, and IT solution delivery and operation management consulting services to HP's corporate clients in the Asia and Pacific region. Assuring business executives of the value of these IT solutions makes mine a really exciting job.

Computer science was the launching pad from where my career took off. Careful planning and the building up of a knowledge structure based on computer science are the keys to career success. "
