The Department of Computer Science

Ying (Christine) Jiang

"After graduating from University, I got a Software Developer position with WinScribe New Zealand Ltd. WinScribe is a world-leading provider of digital dictation software supporting business requirements for digital dictation, digital transcription, voice recognition, and workflow management. My job is to diagnose and resolve software or technical problems with WinScribe systems, develop and maintain a comprehensive knowledge of computer operating systems and associated software for Windows2000/XP/VISTA, provide assistance and advice to staff, dealers, distributors and end-users on technical issues related to the company's products and services.

The Computer Science courses I took at The University of Auckland gave me a good grounding in various technologies and methods used in my current job. My vision for the future revolves around trying to make world-class software products used by billions of people."

Ying graduated with a Bachelor of Science (Honours) in Computer Science in 2007.
