4. Medical History

In this section I would like to find out about things to do with medication and your medical history.

MEDICATIONS

The first questions are about medications and non-prescribed products you might use as well as any health problems you may have. Remember that any question you are not happy to answer, you may leave.

**Interviewer:**

Ask the following questions and record all medications and health products, whether they are prescribed or not, in the table to the right. Include inhalers, suppositories, creams, eye drops etc. You may need to prompt the participant about these more unusual products. Ask if you can look at the medication packets and fill in as much information as you can. See the procedure manual for further guidance on completing this section.

CA1. Do you currently take any medications prescribed by the doctor?

I’m going to ask you a question about breathlessness. I ask it now because we want you to rate how breathless you are feeling while you are relaxed. I will also ask you about your perception of exertion later while you are doing some physical activity.

Please look at this rating scale; we want you to use this scale from 6 to 20, where 6 means 'no breathlessness at all' and 20 means 'maximal breathlessness'. Look at the scale and the expressions and then give a number.

BD4. Thinking of your breathlessness right now, how would you rate your feeling of breathlessness?

PAIN

I’d like to ask a few questions about pain now. I’m going to ask for some detail about each area that you have pain in. Use the following scale to determine the level of pain.

Example

<table>
<thead>
<tr>
<th>No pain</th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
<th>5</th>
<th>6</th>
<th>7</th>
<th>8</th>
<th>9</th>
<th>10</th>
</tr>
</thead>
</table>

CG0. Do you have any pain now?

No=0  (Go to CG6)  Yes=1

Where is it? (Interviewer: Use the scale and map supplied to code all pain mentioned by area and write each area in the table below)

<table>
<thead>
<tr>
<th>Area</th>
</tr>
</thead>
<tbody>
<tr>
<td>a.</td>
</tr>
<tr>
<td>b.</td>

<td>d.</td>
</tr>
<tr>
<td>e.</td>
</tr>
<tr>
<td>f.</td>
</tr>
<tr>
<td>g.</td>
</tr>
<tr>
<td>h.</td>
</tr>
</tbody>
</table>

Interviewer – ask these questions about each area before you go on to the next

CG1. What is your pain RIGHT NOW?

CG2. What is your TYPICAL or AVERAGE pain?

CG3. What is your pain level AT ITS BEST (How close to '0' does your pain get at its best)?

CG4. What is your pain level AT ITS WORST (How close to '10' does your pain get at its worst)?

CG5. How many days over the last month have you had this pain?

CG6. Are there any other areas you sometimes have pain but do not have pain right now?

No=0  (Go to EA1)  Yes=1

Interviewer, code other areas of pain and ask CG2–CG5 above for each area mentioned

Now I’d like to ask you to do some physical performance tests. I will first describe and show each movement to you. Then I’d like you to try to do it. If you cannot do a particular movement or you feel it would be unsafe to try to do it, tell me and we’ll move on to the next one. Let me emphasise that I do not want you to try to do any exercise that you feel might be unsafe.

**BALANCE TEST**

Instructions: Start with B: Semi–tandem stand. If the person cannot hold the position for 10 seconds, ask them to attempt A: Side–by–side stand. If they manage the semi–tandem stand for 10 seconds, go straight to C: Tandem stand.

If not attempted or not held for 10 seconds, end balance tests and go to gait speed test

Score ‘777’ if don’t know; score ‘888’ if refuse to answer, score ‘999’ if not applicable
C. Tandem Stand
Now I want you to try to stand with the heel of one foot in front of and touching the toes of the other foot for about 10 seconds. You may put either foot in front, whichever is more comfortable for you.

<table>

GAIT SPEED TEST
Now I am going to observe how you normally walk. This is our walking course. I want you to walk to the other end of the course at your usual speed, just as if you were walking down the street to go to the store. Walk all the way past the other end of the tape before you stop.

Test was attempted
No = 0   Yes = 1

Time for 3 metres (seconds)

Aids for walk
(None = 1; Cane = 2; Walker = 3; Other = 4)

CHAIR STAND TEST
Let’s do the last movement test. Do you think it would be safe for you to try to stand up from a chair without using your arms?

Remember to have card 13 available
Remember that I said earlier that I would ask you about your perception of exertion while you are doing physical activity. While doing the chair stand test we want you to rate your perception of exertion, i.e., how heavy and strenuous the exercise feels to you. The perception of exertion depends mainly on the strain and fatigue in your muscles and on your feeling of breathlessness or aches in the chest. Please look at this rating scale; we want you to use this scale from 6 to 20, where 6 means ‘no exertion at all’ and 20 means ‘maximal exertion’.

9    corresponds to ‘very light’ exercise. For a normal, healthy person it is like walking slowly at his or her own pace for some minutes.
13   on the scale is ‘somewhat hard’ exercise, but it still feels OK to continue.
17   ‘very hard’ is very strenuous. A healthy person can still go on, but he or she really has to push him– or herself. It feels very heavy, and the person is very tired.
19   on the scale is an extremely strenuous exercise level. For most people this is the most strenuous exercise they have ever experienced.
Try to appraise your feeling of exertion as honestly as possible, without thinking about what the actual physical load is. Don’t underestimate it, but don’t overestimate it either. It’s your own feeling of effort and exertion that’s important, not how it compares to other people’s. What other people think is not important either. Look at the scale and the expressions and then give a number.

Any questions?

So let’s do the test. This test measures the strength in your legs. First, fold your arms across your chest and sit so that your feet are on the floor; then stand up keeping your arms folded across your chest.

(Single Chair Stand Test)
Safe to stand without help   (No=0; Yes=1)  
Results    Participant stood without using arms
           Participant used arms to stand
           Test not completed
If not attempted or failed, code reason  
(Code box above)

Please stand up as QUICKLY as you can 5 times without stopping in between. After standing up each time, sit down and then stand up again. Keep your arms folded across your chest. I’ll be timing you with a stopwatch.

(Repeated Chair Stand Test)
Safe to stand five times   (No=0; Yes=1)  
Time to complete five stands (in seconds)  
If not attempted or failed, code reason  
(Code box above)

Interviewer: ask immediately after completing all physical tests the participant can do.

HC1. So, thinking of your feeling of exertion right now, how would you rate your feeling of exertion?

Score ‘777’ if don’t know; score ‘888’ if refuse to answer, score ‘999’ if not applicable
9. Housing and Environment

We know that people’s living environments are closely related to their health and well-being. We also know that people often move as they get older. The next questions now are about your house and about changing where you live.

IB1. Has your place of residence changed since your last LILACS NZ interview about a year ago?

No=0  (Go to IB6)  Yes=1  (continue)

If ‘Yes’ to question IB1… and if more than one move, ask about last move only

IB2. When did you move?

Date or best estimate  

(dd)  .  (mm)  .  (yyyy)

IB3. Why did you choose your current residence?

No=0;  Yes=1

Size of home
Better safety and security
To free up money or equity
Easier maintenance of house and or gardens
Closer to shops, post office, or other amenities
Closer to health services eg. your GP
Nicer environment eg view, climate, weather
To be near or with children
To be near or with other relatives
To be near or with friends
Returning to family/whānau land

Other 

IB4. Was there any one event that made it important to move?

No=0;  Yes=1

If ‘No’, go to IB1

If ‘Yes’ to question IB4:

IB5. What event was that?

Do not read, Do not prompt but put a 1 for each event identified

Death or illness of spouse or partner
Death or illness of another family member
Sudden worsening of health e.g. stroke
Gradual worsening of health or function
Fear, e.g. of criminal behaviour

Something else 

Something else 

Then go to IB14

Answer these questions only if ‘No’ to Question IB1

IB6. Since your last LILACS NZ interview about a year ago, have you seriously considered moving house?

No=0  (Go to IB19)  Yes=1  (continue)
**ENGLISH INTERVIEW WAVE 3: 29 Mar 2012**
