

Centre for Medical and Health Sciences Education (CMHSE)

Research Seminar Series

Monday 15 October 2018, 12noon - 1.30pm
Room 502-001, Grafton Campus

Teaching Quality Improvement to Nascent Medical Students – Are We Making a Difference?

Associate Professor Bridget Kool

Associate Dean, Faculty of Medical and Health Sciences, The University of Auckland

Other Research Team Members: M Wise, R Peiris-John, L Sadler, S Wells

The School of Population Health and the Department of O&G have been delivering a Quality Improvement programme of teaching and learning to medical students for over a decade. In this presentation we will provide a brief overview of the format of our QI teaching, present a summary of the types of QI projects completed by students in their final year, and describe two research projects we have embarked on evaluating the effectiveness of the QI teaching.

Social Media for Clinical Trial Recruitment

Dr Joanna Black

Lecturer, Optometry and Vision Science, The University of Auckland

Social media is increasingly becoming a standard method for recruiting research participants into clinical studies. In this talk, I will describe the various recruitment methods used for a study investigating novel treatments for amblyopia, commonly known as 'lazy eye'.

RSVP to Yan Chen, yan.chen@auckland.ac.nz

12noon – 12.30pm – light lunch and networking
12.30 – 1.30pm – Seminar presentations

If you are interested in presenting at one of our monthly seminars please email your idea to:
