

Centre for Medical and Health Sciences Education (CMHSE)

Research Seminar Series

**Monday 16 October 2017, 12noon - 1.30pm
Room 503-024, Grafton Campus**

Career-defining moments and professional identity

Dr Yan Chen

Lecturer, Centre for Medical and Health Sciences Education

Identity is a multifaceted social construct, which can contribute to personal wellbeing. This presentation discusses the use of career defining moments to measure doctors' professional identity and to further explore the link between professional identity and wellbeing.

**Understanding the implementation of
multidisciplinary simulation-based team-training**

Dr Peter Beaver

Research Fellow, Centre for Medical and Health Sciences Education

MORSim (the Multidisciplinary Operating Room Simulation) is a method of team training that improves communication and teamwork between operating room staff. MORSim has been funded by ACC for all DHBs in NZ, and we anticipate that improvements in communication and teamwork due to MORSim will enhance the safety of surgical care. In this seminar I will discuss our use of an implementation science approach to understand the challenges and successes involved in a major simulation-based safety initiative.

RSVP to Hazel Pannell h.pannell@auckland.ac.nz

**12noon – 12.30pm – light lunch and networking
12.30 – 1.30pm – Seminar presentations**

If you are interested in presenting at one of our monthly seminars please email your idea to: [Craig Webster c.webster@auckland.ac.nz](mailto:c.webster@auckland.ac.nz)
