at a free, double header event:

Transition to school report seminar

and / or

72 Month Data Access Workshop

**Thursday 6 September 9.15am - 11am (seminar)
and 11.30am - 1.15pm (workshop)**

**Room 721-201, University of Auckland Tāmaki Campus,
261 Morrin Road, Glen Innes**

Growing Up in New Zealand is New Zealand's contemporary longitudinal study of child development. It is tracking around 6,800 children born in 2009 and 2010 from before birth until at least 21 years of age.

Transition to school report seminar

9.15am – 11am

Transition to school is the study's eighth report and examines the cohort children's experience of embarking on formal schooling. How did families fare and what made the transition easier or harder? Learn

about the findings of this report, which is based on data gathered during *Growing Up in New Zealand's* 72 Month Data Collection Wave with families.

To register for this seminar:

72 Month Data Access Workshop

11.30am – 1.15pm

Six-year data from the *Growing Up in New Zealand* study is now available for researchers to access and utilise. The 72 Month Data Collection Wave was the first time *Growing Up in New Zealand* used an on-line questionnaire as the primary mode of data collection; come along and learn about the 72 Month data set.

The workshop will include:

- An introduction to the 72 Month Data Collection Wave
- Important considerations when analysing the 72 Month data
- The data access process – how to get started
- The e-Research platform
- An introduction to the data sets
- The chance to ask questions

To register for this workshop, or for any questions, email:

workshops@growingup.co.nz

(When registering, please let us know whether you're a new or current user of the e-Research platform; whether you're familiar with Growing Up data sets and have accessed them before; whether you're an analyst who intends working with the data directly, will be sharing the learnings with others, or both).
