Welcome to the University of Auckland, and an exciting new academic life in New Zealand’s largest and most liveable city. You will be joining New Zealand’s leading university, one that ranks among the world’s top 100.

As the University of Auckland is research-led, your courses will incorporate the latest findings and perspectives related to your discipline, including the research carried out by your lecturers and professors. The University of Auckland is full of opportunity for students, from English language development to a wide choice of academic programmes. We also provide access to a wonderful range of extra-curricular activities. New Zealand is culturally diverse and politically stable, offering a safe environment in a beautiful location, where you can enjoy an excellent lifestyle while studying at the highest level.

The University of Auckland is the only New Zealand university invited to be a member of three prestigious international networks: Universitas 21, an international consortium of research-led universities that fosters academic exchange and quality benchmarking among its members; the Association of Pacific Rim Universities, a network of major international universities working on issues common to the Asia-Pacific region; and the Worldwide Universities Network, a group of leading universities focused on international research collaboration with the aim of addressing some of the major issues facing humankind.

In addition to the services and facilities available to all our students, we offer specialised support for international students through our International Office. This support includes dedicated student advisers who are available to help you enrol and settle in to your new study life.

We’ve earned a great reputation for delivering academic and research excellence within an inspiring and supportive learning environment. I would like to warmly welcome you to be a part of the University of Auckland community. By choosing to study with us, you will build yourself a foundation that will set you apart for the rest of your life.

STUART MCCUTCHEON
Vice-Chancellor
The University of Auckland
Julie Kho

Julie is from Malaysia and gained her PhD in Chemistry from the University of Auckland. She received a departmental scholarship for both her Bachelor of Science (Hons) and PhD degrees.

“My area of research is in photonics—how light interacts with matter. The science of light is present in numerous natural processes and plays a vital role in our lives. So much of the technology we use today is powered by knowledge in photonics—the internet, mobile phones, GPS. During my PhD, I studied how complex molecules in solar cells absorb light, converting solar energy into chemical energy. In order to ‘see’ these extremely fast processes in time, I used ultrafast lasers, and the results we observed enabled us to design better molecules for solar energy harvesting.

“During my undergraduate degree, I was so inspired by a lecture from Professor Cather Simpson that I applied for a summer scholarship project with her at the Photon Factory. The experiences I had that summer were mind-blowing—I observed how the perseverance of scientists can lead to successful experimental results, and I got to work with a group of very smart researchers, and got to build and use state-of-the-art lasers!”

“I have now taken a job in the technical industry in New Zealand, where I’m aiming to bring my skills and knowledge to the business world, to make scientific research have more impact in our lives.”

Professor Simpson says of her former student, “Julie is one of our best and brightest—she earned her degrees at the University of Auckland on the interface of chemistry and physics, a very demanding area. Her leading work on novel laser design and construction has underpinned the research of many other graduates from the Photon Factory—her positive impact will continue to be felt for years to come.”

Quick facts New Zealand/Aotearoa

Population: Approximately 4.7 million
Largest city: Auckland – population 1.5 million
Capital: Wellington
Area: 270,534 square kilometres (104,454 square miles)
Official languages: English, Māori, New Zealand Sign Language
Currency: New Zealand dollar
Exchange rates: US$0.75, £0.53 (April 2018)
Diverse people: Auckland is New Zealand’s most multicultural region: 59.1% European, 23.1% Asian, 14.6% Pacific, 10.7% Māori, 3.1% other significant ethnic groups
Climate: Daytime temperatures in Auckland range from an average of 19°C (66°F) in summer (December to March) to 16°C (60°F) in winter (June to August)
Warrant months: January, February
Coldest months: July, August
Government: Parliamentary democracy, member of the Commonwealth

New Zealand is a modern, English-speaking country with a rich cultural heritage, known internationally for its stunning and diverse natural landscapes and the culture of its indigenous Māori people. New Zealand has earned a reputation for its politically independent stance, support for environmental causes, sporting achievements, and dynamic political and economic reform. Its citizens have made important contributions in the fields of scientific and technological discovery, medicine, conservation, creative arts, food and wine. New Zealand is a safe and politically stable country with a high standard of living. Why study in New Zealand?

New Zealand is a safe and politically stable country with a high standard of living. New Zealand enjoys a global reputation for technical innovation supported by research excellence. Education in New Zealand is not only about imparting knowledge but also about encouraging original thinking. New Zealand has a progressive work-rights policy, which allows international students to work in New Zealand on a post-study visa after finishing at university. International PhD students receive a range of special benefits, including eligibility for a government funding scheme allowing them to pay the same tuition fees as New Zealand students.

1 NZ Census 2013. Respondents can identify with more than one ethnic group so percentages do not total 100%.

Welcome to New Zealand

Nau mai, haere mai ki Aotearoa
Auckland, a top three city

With a population of approximately 1.5 million, Auckland is New Zealand’s largest city and the country’s economic hub.

A city flanked by two harbours, Auckland's unique geographic position means you can enjoy the vibrant atmosphere of a large, cosmopolitan city, and still be close to stunning beaches, nature walks and tranquil islands. You can kayak on sparkling harbours in the morning, and hike through green subtropical forests in the afternoon. Add to that great cafés, restaurants and bars, excellent theatres, galleries, museums and terrific shopping.

With almost 40 percent of the population born overseas, Auckland is more culturally diverse than Sydney, London and New York,¹ and it is clear why Auckland has been ranked third out of 231 world cities for quality of life.²

¹World Migration report 2015
²Mercer Consulting Quality of Living Rankings 2018

City highlights

Sky Tower – Tallest building in the Southern Hemisphere, with spectacular views of the city

Eden Park – New Zealand’s largest stadium, hosting national and international rugby and cricket matches

Rangitoto Island – A dormant volcano with lava tunnels, fantastic views of the harbour and the world’s largest pohutukawa forest, only a 40-minute ferry ride from downtown Auckland

Piha Beach – Most famous surf beach in New Zealand, featuring black iron-ore sand, just 40 minutes from central Auckland through the protected forest of the Waitakere Ranges

Waiheke Island – A beautiful, subtropical island famous for its golden sandy beaches, wineries and water sports, just 40 minutes by ferry from downtown Auckland

Mount Eden – Dormant volcanic cone, centrally located with panoramic 360° views over the city, great for a picnic

Newmarket shopping precinct – Excellent shopping, movie theatres, restaurants and cafés, something for everyone

Auckland waterfront – Attractive, urban beaches alongside a walking and cycling promenade, cafés, bars and restaurants as well as rollerblade, bicycle, sailboard and catamaran hire

The Domain – A beautiful inner city park close to the University, home to the Auckland Museum, where you can experience cultural performances, see priceless Māori treasures and learn about New Zealand’s natural history

Multicultural and local foods – Auckland offers a fantastic range of multicultural foods from all over the world and unique New Zealand foods

For more information about Auckland visit www.aucklandnz.com

The Golden Vineyard on Waiheke Island is a University of Auckland teaching facility for the Wine Science programme.

The University of Auckland City Campus

1 City Campus
Located in the heart of Auckland, City Campus provides a full range of amenities, including cafés, health services, libraries, childcare facilities, and a recreation centre.

2 Grafton Campus
Home to the Faculty of Medical and Health Sciences, the Grafton Campus is situated opposite Auckland City Hospital.

3 Newmarket Campus
Covering five hectares, this campus is designed to be a high-quality environment that supports our research activities for the faculties of Engineering and Science.

4 Epsom Campus
The Epsom Campus is the main Faculty of Education and Social Work campus, offering programmes in teacher education, sport, health and physical education, and social services.

5 Tai Tokerau Campus
The Faculty of Education and Social Work offers courses at the Tai Tokerau Campus, located in Whangarei, the capital of the Northland Region of New Zealand.

6 Leigh Marine Laboratory
The Leigh Marine Laboratory is the “marine campus” of the University, offering opportunities for postgraduate teaching and research at the Goat Island Marine Reserve.

7 Goldie Vineyard
This 14-hectare vineyard and winery provides a unique venue where students live, study and work in a boutique winery in an important winegrowing region of New Zealand.

8 Tāmaki Innovation Campus
Tāmaki Innovation Campus is a University of Auckland teaching facility located at the University of Auckland City Campus.
We’ll help you make your mark on the world.

The University of Auckland is ranked 82nd among the world’s top universities.¹ We offer you the opportunity to gain an internationally-recognised qualification through a leading research-led university. We are a QS Five Stars Plus institution, having achieved five stars in eight categories, including Research, Employability, Teaching, Facilities, Internationalisation and Innovation.²

We are leaders in innovation, named as one of the world’s leading entrepreneurial universities under challenging conditions³ and ranked the most innovative university in New Zealand.⁴ Our research benefits our social, cultural, economic and environmental future. Our academics are leaders in their fields, our teaching staff are ready to support you, and our alumni enjoy meaningful careers all over the world. Your study at the University of Auckland will take you beyond the classroom and keep you connected to the ever-changing global dynamic.

By choosing the University of Auckland, you will have incredible opportunities and a foundation that will set you up for life. As New Zealand’s world-ranked university, we can give you the edge you need to be a successful global citizen.

I’d say just do it. Studying at the University of Auckland, then in a whole new light. If you are considering a system, and also puts your home country to a completely different perspective in terms of culture, language and education. “Studying in a different country introduces a boost. resurrected an interest in dancing – the museum. Since being in Auckland I have time I’ll occasionally treat myself to a distance at the City Campus. In my spare approachable. and the tutors have been great – very quality. The tutorials are especially useful staff here very helpful and of good Auckland.

Marita Nakamura Brekkaa

Marita comes from Norway and is studying towards a Bachelor of Arts degree in Psychology and Education.

“I have always been interested in studying human beings as well as wanting to work with them. During my second year of a Bachelor in Physiotherapy at the University College of Oslo & Akershus, an introductory course in Psychology made me realise that was what I wanted to study. I did a one-year course in Psychology at the University of Bergen, and now I am finishing my bachelors degree at the University of Auckland.

“I have found the teaching and academic staff here very helpful and of good quality. The tutorials are especially useful and the tutors have been great – very approachable.

“Enjoy how everything is within walking distance at the City Campus. In my spare time I’ll occasionally treat myself to a concert or performance, art exhibition or museum. Since being in Auckland I have resurrected an interest in dancing – the ballet classes at the University recreation centre have functioned as an interest boost.

“Studying in a different country introduces you to a completely different perspective in terms of culture, language and education system, and also puts your home country in a whole new light. If you are considering studying at the University of Auckland, then I’d say just do it.”

The Faculty of Arts at the University of Auckland is internationally recognised as New Zealand’s leading Arts faculty, ranked in the world’s top 30 for Arts and humanities. 
At undergraduate level, our unique double major requirement encourages you to develop substantial knowledge in two fields and gives you a strong platform for future careers and postgraduate study. In your first year, you can choose from a wide range of subjects, exploring the human condition in all its social and cultural diversity before deciding on your two majors.
At postgraduate level, you can pursue advanced study and research in your area of interest or in an area with a professional focus such as: conflict and terrorism, creative writing, indigenous studies, public policy, language, teaching, and translation.
Academic staff in the Faculty have diverse interests and pursue research across a wide range of subject areas. Staff include scholars who are internationally acclaimed as leaders in their fields. Teaching and learning are informed by this commitment to research, which means you will be exposed to developing areas of knowledge and encouraged to undertake your own research wherever possible.

Arts research

Dr Chris Wilson is the Programme Coordinator for the Master of Conflict and Terrorism Studies.

“My research examines the causes and dynamics of civil war, riots, insurgency, mass killings and other forms of collective violence within states. My goal is to understand why and how particular societies experience violent conflict while others do not. Through my research I hope not only to advance our knowledge of why such group conflict occurs, but also to provide practical policy recommendations to governments and international agencies on how to prevent it.”

QS World University Rankings by Subject 2019

* Key:
  a: Elective courses only (major not available)
  b: Continued at postgraduate level under Ancient History
  c: Available as part of English for bachelors
  d: Available for PhD as English
  e: Postgraduate courses may be included as part of a postgraduate programme in selected subjects
  f: Subject is called “Theological and Religious Studies” at undergraduate level, and “Theology” at postgraduate level.
Tuyen Nguyen

Tuyen is from Vietnam and graduated with a Master of International Business in 2017. She is the recipient of a New Zealand Development Scholarship, funded by the New Zealand Aid Programme.

“...I chose to study towards my Master of International Business as it supports my work in Vietnam as a government official in charge of business issues at Ho Chi Minh City Department of External Relations. The University of Auckland is regarded as the best university in New Zealand and is highly ranked in the world. It offers excellent teaching and diverse cultures, with modern and comfortable facilities. The teaching and academic staff are excellent – inspiring, approachable, and helpful.

“The University campus is well-equipped and the available facilities are very convenient and comfortable. There are plenty of accommodation choices at the University of Auckland, so it is easy to find something that will suit. “I lived at University Hall and I loved the environment there – it’s student-friendly, secure, clean, with immediate support, and is a great way to meet people.

“Auckland is a dynamic city to live in and the University of Auckland is very culturally diverse. I found it easy to make friends from many countries, and went to several amazing places around New Zealand, including Queenstown, Lake Tekapo, Taupo, Wellington, and New Plymouth.

“My advice to future international students at the University of Auckland is – be inquisitive, and ready to learn and explore. You will receive so much support to achieve your goals.”
Carlos Anchieta
Carlos, from Brazil, is studying for a Master of Urban Planning (Professional).

“I was motivated to study Urban Planning due to what I see as the increasing necessity to shape cities based on human needs while improving quality of life. I chose to study at the University of Auckland because of its excellent academic and employability reputation in New Zealand and internationally. The University’s faculties provide everything a student needs and the academic staff are experienced professionals who always keep their door open to help students.

“Auckland as a city has so many opportunities – walking around the streets is exciting and there is always something going on. It is a great time to be studying Urban Planning in a city like Auckland. When I’m not studying, I have rented a car and travelled around both the North and South Islands. It is easy and incredibly stunning. In my spare time I enjoy catching up with my friends, music and cooking, as well as exploring different parts of the city with friends by public transport or bike.

“The University environment is extremely cosmopolitan. I have met people from different parts of the world, which is incredibly culturally gratifying. My advice for international students at the University of Auckland is to get involved with the many activities promoted by the University – they are more useful than you can imagine.”

Creative Arts and Industries

The Faculty of Creative Arts and Industries is a centre of creative excellence, bringing together the University’s School of Architecture and Planning, Elam School of Fine Arts, School of Music, and the Dance Studies Programme. Elam (art and design) and the School of Architecture and Planning (architecture/build environment) are both ranked within the top 100 schools in the world for their disciplines. The Faculty provides a lively studio teaching environment filled with fellow creatives and internationally recognised artists, practitioners, teachers and researchers. Our strong links with national and international creative communities enable you to connect and foster relationships with relevant professional and business organisations as part of your study. The PhD and named doctorates are available for advanced research across all our disciplines. We also offer a PhD with a creative practice component. Students have the possibility to link theory and creative work into new innovative outcomes by incorporating work such as contemporary art, design, performance or film into their research and final submission. Studying at Creative Arts and Industries cultivates imaginative thinking, fresh ideas and innovation. The educational experience within the Faculty and at the University of Auckland will help set you up for a life of research, discovery and practice that contributes to the future development of society and the creative arts and industries sector.”

QS World University Rankings by Subject 2018

Creative Arts and Industries research

Interdisciplinary research is a hallmark of the faculty, highlighted by Singularity, a recent collaboration between Architecture and Dance Studies. Academic staff and research students examined how computers connect our physical and digital worlds. Singularity used live render programmes with motion-tracking cameras to follow dancers as they moved and created large 3D holographic constructions in projections and haze particles. The research was presented at Ars Electronica, the world’s leading digital art and technology festival, in Austria in 2017.
amazing beaches. Aucklanders are so friendly and lifestyle, beautiful parks, landscapes and homesick or lonely. I enjoy Auckland's outstanding rich culture and lovely people meant I didn’t feel thousands of miles away from home, but Auckland’s ‘I thought it might be difficult to deal with being Colombia.

University of Auckland might help me find a job and my hope is that being a PhD student at the always wanted an academic job at a university has its own unique beauty in every season. I have my two supervisors provide and I like Epsom Campus because of its peaceful environment – it my two supervisors provide and I like Epsom Campus because of its peaceful environment – it

"I am grateful for the patient guidance and advice on Early Childhood Education. I love children, and my passion is helping to provide a better education for them. Working as an Early Childhood teacher, I realised the importance of education and curriculum on children’s development development in the early years. My doctoral thesis will investigate education and care experiences of toddlers, to explore how these very young children demonstrate agency and competency in decision making.

"In the last year of my masters programme in Malaysia, I was searching for a world-class university to pursue my studies. My supervisor suggested the University of Auckland and, after finding out the high global ranking of the University’s Faculty of Education and Social Work and New Zealand’s post-study work visa options, I decided to apply for the doctoral programme.

"I am grateful for the patience and advice of my two supervisors and I love Epsom Campus because of its peaceful environment – it has its own unique beauty in every season. I have always wanted an academic job at a university and my hope is that being a PhD student at the University of Auckland might help me find a job here.

"New Zealand is a place where finding new friends is easy. There is a good mix of cultures in the University, and I have made new friends from China, Indonesia, Taiwan, New Zealand, and even Colombia.

"I thought it might be difficult to deal with being thousands of miles away from home, but Auckland’s rich culture and lovely people meant I didn’t feel homesick or lonely. I enjoy Auckland’s outstanding lifestyle, beautiful parks, landscapes and amazing beaches. Aucklanders are so friendly and welcoming, and living in Auckland is super cool."

Mina Badiei
Mina comes from Iran and is pursuing her PhD in the School of Curriculum and Pedagogy, focusing on Early Childhood Education.

Education research
Professor Christine Rubie-Davies is a world leader in teacher expectation research. The results of her experimental study on the impact of teacher expectations on student outcomes changed the international direction of research in the field, revealing large positive effects on student learning when intervention teachers implemented high expectation practices.

"Increasing equity in any education system lies in creating and developing more high expectation teachers who can continue to have an impact on children long after the initial investment in their training has ended," says Professor Rubie-Davies. "When students are given more advanced opportunities to learn, they can make far more progress than might previously have been thought possible."
Anand Durai, from India, is pursuing a Master of Engineering Studies in Electrical and Electronics Engineering. He received a University of Auckland International Student Scholarship in 2017.

“The development and function of products and services – like mobile phones, broadband internet, high-definition TV, satellite broadcasting, and GPS technology – fascinates me to the core and led to my decision to pursue a masters in Electrical and Electronics Engineering. There is so much more to learn, create, and explore in this field.

“The University of Auckland supports and encourages new ideas, and helps build a good career. My masters study at this prestigious University will serve to enhance my understanding of the subject, and give me the edge I require to become a successful engineer in this field.

“I was really excited to receive the NZ$110,000 University of Auckland International Student Scholarship, as having the chance to study further in my field at the University of Auckland is an incredible opportunity for me. Being awarded the scholarship motivates me to stretch myself further to achieve my goals with more confidence, and reminds me there is always a reward for hard work. The funding towards my tuition fees allows me to focus fully on achieving the best I can in my programme.

“After completing my masters, I would like to work in electrical and communication industries, where theoretical and practical knowledge go hand-in-hand, with special emphasis on research and product development in the communications field.”
Thomas Poschitz

Thomas is from Germany and completed a Master of Laws, specialising in Litigation and Dispute Resolution in 2017.

“I chose to study at the University of Auckland because it has one of the best law schools worldwide, and its LLM programme features international guest lecturers who offer an abundance of expertise.

“There are a lot of new, innovative courses on offer such as Artificial Intelligence (AI), and I really enjoy the fact the courses are not New Zealand-centric. Instead, the general orientation is international with a strong focus on the UK and the USA. The courses are designed to challenge students to think outside the box in setting common law in the future. I want to work in the Automotive Sector and hopefully, courses such as AI will help me to achieve this dream.

“Attaching people from all over the world, Auckland is a multicultural hub, and the city itself is amazing because of its contrasts – utilisation interrupted by lots of green areas; skyscrapers in the centre and wide-spread suburbs containing small buildings. I also enjoyed several road trips all over New Zealand, from Cape Reinga to Bluff, and could not get enough of this place; the climate, nature, the people, cities and towns – it is all simply stunning.

“The hardest part about studying at the University of Auckland was waiting for the adventure to start!”

Auckland Law School has a proud history and produces many outstanding graduates. In 2018, it was ranked among the top 30 law schools in the world in the prestigious QS World University Rankings by Subject.

The Auckland Law School’s undergraduate and postgraduate programmes offer the largest range of courses of any law faculty in New Zealand. The Law School has high-entry standards for its Bachelor of Laws (LLB) and Bachelor of Laws (Honours) (LLBH) degrees, and has New Zealand’s largest postgraduate programme in law. Leading scholars from top overseas universities regularly visit the Law School and teach courses for the Master of Laws (LLM) programme.

Situated in the heart of the legal precinct, the Auckland Law School has strong links to the legal profession and judiciary; it is supported by the staff and resources of the Davis law library, New Zealand’s leading legal research library. The school provides a complete legal education, preparing students for legal practice as well as many other careers in an internationalised world. Law at the University of Auckland is challenging, exciting and taught by some of the best legal scholars from New Zealand and around the world.

**Law research**

The Auckland Law School’s Artsama New Zealand Centre for Indigenous Peoples is a cutting-edge platform for research, teaching and advocacy on indigenous peoples and the law. Associate Professor Claire Charters, based at the Centre alongside 13 other world-leading academics, was awarded a 2017 Rutherford Discovery Fellowship to investigate the ways indigenous peoples’ rights are constitutionally recognised throughout the world. Drawing on case studies from Bolivia, Mexico and Canada, Australia and the Pacific, and Norway, Finland and Sweden, Dr Charters’ research focuses on the recognition of indigenous jurisdiction and autonomy, protection of treaty and aboriginal rights, rights to lands, rights to culture and access to political power.

Dr Charters has represented her iwi in treaty negotiations and worked in the UN Office of the High Commissioner for Human Rights. In addition, she was recently an advisor to the President of the UN General Assembly on enhancing indigenous people’s participation at the United Nations.
**Medical and Health Sciences**

Our graduates are broadly prepared and highly educated to pursue rewarding and challenging careers in a variety of professions around the world. Whether as doctors, scientists, nurses, optometrists, pharmacists or health sector professionals, our graduates are actively involved at the forefront of modern medicine, science and healthcare.

Study with us means that you learn from skilled, internationally recognised academics in programmes designed to improve the health of real people. We also offer an inspiring and stimulating environment with outstanding facilities. The Faculty of Medical and Health Sciences is located at the modern Grafton Campus, which is opposite Auckland City Hospital, New Zealand's largest public hospital and clinical research facility.

The programmes in our faculty cover the spectrum of healthcare, including biomedical and medical sciences, optometry, public health, clinical education and public health. Our range of programmes is designed to help you achieve your academic goals.

Major research strengths include bone disease, cancer, parasitology, epidemiology, clinical trials and neuroscience. Researchers and research groups in those and other key areas provide nurturing and supportive postgraduate training in a flexible and innovative learning environment, with state-of-the-art facilities.

Professor Ian Reid, New Zealand's most frequently cited researcher, has had a profound impact worldwide. Working alongside Associate Professors Mark Bolland and Andrew Grey, Professor Reid found the commonly-prescribed drugs such as osteoporosis and Paget's disease be ineffective at treating osteoporosis. These findings have saved billions of dollars in prescriptions internationally and won the Prime Minister's Science Prize for 2015.

**Key**

- Must be registered with an approved professional body.
- Named specialisation available for postgraduate study.
- Must have access to an approved clinical environment.

**Research Masters**

- Available under a PhD in Psychology.
- Available under a PhD in Medicine.
- Available under a PhD in General Practice.
- Specialisation not offered in this programme, but relevant study is available through Health Sciences or Public Health programmes.

**Doctorate**

- Available under a PhD in Health Sciences.
- Available under a PhD in Māori and Pacific Health.
- One year coursework plus one year research (two years in total).
- 180 point taught masters programme.
Zheyu Tian

Zheyu took part in a dual masters programme and graduated with a Master of Science majoring in Earth Sciences from the University of Auckland and China Geosciences University, Beijing in 2017. He is currently pursuing a PhD at University College London.

“I studied for a Master of Science (Earth Sciences) under the institutional dual masters agreement. In 2008, a severe earthquake in Sichuan, China gave me an understanding of the real power of nature and how weak human beings are in the face of disaster. I decided to dedicate my energy to using geology to help people understand and prevent these natural disasters.”

“A key factor in my decision to apply for the dual masters programme was that the University of Auckland is the best university in New Zealand and is a leading research institute. Some of my professors here are world-renowned researchers in their field. With this programme, I get two masters degrees when I graduate, making me more employable and giving me an edge when it comes to my PhD.”

“My research area was the forces of disaster. I decided to dedicate my energy to using geology to help people understand and prevent these natural disasters.”

Science research

Evolutionary psychologist Dr Alex Taylor reckons he has one of the best jobs in the world – running the Faculty’s Clever Canine Lab. The Lab is exploring how dogs think, with a view to gaining a deeper understanding of the evolution of intelligence and what might have given dogs an advantage when interacting with humans. One of the most intriguing experiments (pictured) is the ‘detour problem’ – whether dogs treat objects as more threatening if they see their owner make a detour around it. In the future this research may be applied to the way guide dogs and mobility dogs are trained.

www.clevercaninelab.auckland.ac.nz
Diego Hernandez

Diego is from Mexico and is studying for his PhD in Civil Engineering. Diego was awarded a Conacyt scholarship in 2016.

“...My research focuses on the holistic response and design of liquid storage tanks under earthquake loading, a topic I worked on during both my bachelors and masters degrees in Civil Engineering at UNAM, the National Autonomous University of Mexico. I wanted to understand more about the seismic response of tanks so that I can contribute somehow to improving the design of these life-critical structures, especially for tanks holding oil and petrol that could be a serious threat in areas where earthquakes are common.

“New Zealand offers more than high-quality education. The diverse outdoor activities and the cosmopolitan environment that we can enjoy in Auckland are priceless. In addition, my interest in expanding my knowledge about Pacific cultures was crucial to choosing the University of Auckland.

“The University of Auckland academic staff are friendly and helpful, and the cultural diversity in the University is incredible. I have made many friends, from almost every place in the world. I made a list of the people I have met and where they are from, and counted more than 60 countries!”

“The best thing about living in Auckland is the outdoors. It is amazing how within a few hours, I can experience changes in the landscape. In my spare time, I try to balance ‘real’ life and my studies. I have joined some of the University’s clubs and with the Auckland University Tramping Club I have been to diverse places and learned a lot about New Zealand wildlife. If you enjoy exploring nature, studying in a high-quality institution and learning about different cultures, New Zealand is a great option. It might be hard, but it is definitely worth it.”

PhD study

Pursue your PhD at the University of Auckland and pay the same tuition fees as New Zealand PhD candidates – just NZ$6,969.60 in 2018. Join a research-led university with a reputation for academic excellence. Gain the opportunity to collaborate with world-class researchers, publish in leading academic journals and build the skills you need for a successful future in academia, industry and beyond.

Why choose us for your PhD?

World-class reputation

Our university is an institution of global standing, ranked among the top 100 in the world by QS World University Rankings, and in the top 2% globally by Times Higher Education.

The QS Stars audit recognises our world-leading status, designating us as a Five Star Plus university and awarding us the highest possible ratings for excellence in seven categories: Research, Innovation, Employability, Internationalisation, Inclusiveness, Teaching and Facilities.

We are the highest ranked university in New Zealand by both QS World University Rankings, and Times Higher Education.

Leading research

We are New Zealand’s largest research organisation and have the most comprehensive research offerings of any university in the country. Our work is supported by the highest level of research income of any New Zealand university, having won 31% of the nation’s research fund with 31% of the research active staff.

Our institution supports over 60 research units, centres and institutes, and hosts co-hosts five Centres of Research Excellence (CoREs). This gives you the opportunity to contribute to a wealth of research activities that lead the way in their field.

Dynamic academic community

We have the highest concentration of top-ranked researchers of any university in New Zealand, and they support the greatest number of annual graduate student completions of any university in the country.

Our thriving doctoral community is impactful and truly international: on average, our doctoral candidates attend three international conferences and publish three papers during their PhD, and around half of all our doctoral candidates join us from overseas.

Supportive environment

The success of your PhD journey is supported through our outstanding financial, academic, employability and research focused services and opportunities. These include:

- Assistance with research-related expenses from your individual Postgraduate Research Student Support (PRSS) fund.
- Access to scholarship opportunities that support the studies of exceptional candidates.
- Use of the largest university library in New Zealand, staffed by specialist subject librarians who offer personalised research assistance.
- Development of your academic skills and employability through a toolkit of courses and workshops, including the Doctoral Skills Programme, the Doctoral Academic Leadership initiative and English Language Enrichment.
- Support from a range of additional services, including the School of Graduate Studies, the International Students’ Support team, the Postgraduate Students’ association, Libraries and Learning Services, and Career Development and Employability services.

Family benefits

Not only can you pay the same tuition fees as New Zealand PhD candidates, you can also bring your family with you when you study. There are additional benefits to this:

- Your spouse or partner can apply for an open work visa valid for the same duration as your student visa.
- Your dependent children can attend a New Zealand public school for the same rates as New Zealand children.

Emergencies and support

In the event of an emergency, your annual PhD fee is less than NZ$5k.

Find a research supervisor

Our online search tool FindaThesis will help you locate detailed information about projects, potential supervisors and more.

Find a research supervisor

www.findathesis.auckland.ac.nz

How to apply

Visit our website for a step-by-step application guide, and other helpful information about our PhD programmes. www.auckland.ac.nz/applying-for-a-doctorate

就业岗位

Finding work during and after your PhD is a key concern for many doctoral candidates. Luckily, when you study in New Zealand as a full-time international PhD candidate, your visa will allow you to work alongside your studies.

On completion of your PhD, you can apply for a 12-month Post Study Work Visa (Open) through Immigration New Zealand to allow you to search for employment. If you are able to find a suitable job in your chosen field, you may then apply for a two-year Post Study Work Visa (Employer Assisted).

During the period of either work visa, you are eligible to apply for permanent residency under the Skilled Migrant Category, provided you meet the points requirement set out by Immigration New Zealand.

www.immigration.govt.nz

1At the time of publication, the 2019 tuition fee had not been set. To be eligible for the domestic fee, you must reside in New Zealand for the duration of your doctoral programme. However, you may undertake research activities and conferences overseas during your doctoral programme (for a cumulative total of no more than 12 months).

2Performance Based Research Fund (PBRF) report 2012

3PBRF report 2012

4Schooling is free at state and state-integrated schools although parents are expected to make some minor costs including school books, stationery and uniforms.
Research and Innovation at the University

The University of Auckland is a world-class research institution¹ and is recognised as having the greatest depth and breadth of research activity of any tertiary institution in New Zealand.²

Renowned research-led university

- We support the work of more than 60 research units, centres and institutes, including two internationally renowned Large Scale Research Institutes – the Liggins Institute and the Auckland Bioengineering Institute.
- We are also host or co-host to five New Zealand Centres of Research Excellence (CoREs), which promote world-class research contributing to New Zealand’s development. The CoREs hosted at the University of Auckland are:
  - The Maurice Wilkins Centre for Molecular Bioclarity
  - The Medical Technologies CoRE
  - Brain Research New Zealand: Rangahau Roro Aotearoa (co-hosted with the University of Otago)
  - Ti Pounaha Matatini: The Centre for Complex Systems and Networks
  - Ngā Pae o te Maramatanga: New Zealand’s Indigenous Centre of Research Excellence

New Zealand’s most innovative University

- The University of Auckland has been ranked as the most innovative in New Zealand in the Reuters Top 75: Asia Pacific’s Most Innovative Universities rankings 2017. No other New Zealand university made it into the top 75 for the region.
- We have a range of academic programmes from undergraduate through to PhD that develop enterprising skills and the capacity to innovate. We have also been recognised by the Massachusetts Institute of Technology (MIT) Skollach Institute as one of the world’s top five emerging leaders in entrepreneurship.

Velocity

- Velocity is a student-led entrepreneurial development programme supported by the Centre for Innovation and Entrepreneurship at the University’s Business School. Velocity is New Zealand’s leading entrepreneurial programmes and involves seminars, challenges and workshops to inspire the next generation of entrepreneurs.

World-class research

The University has more internationally and nationally esteemed researchers than any other tertiary institution in New Zealand. The research we do at the University spans all our disciplines, from the curiosity-driven to the very applied.

Some key areas of research that we excel in are:
- Indigenous knowledge and culture
- Public policy
- Medical innovation
- Natural sciences
- Law and governance
- Creativity and design thinking
- Super diversity
- Disaster prevention
- Applied economics
- Big data
- Sustainability

Students who undertake research at our University will be able to use information discerningly and have the potential and the desire to contribute in a leadership role both nationally and globally.

¹ QS Stars University Ranking
² Performance-Based Research Fund (PBRF) report 2012

Kate Riegle van West

PhD Dance Studies student, Poi innovator from Illinois, USA

“I am currently conducting PhD research on the effects of International Poi on physical and cognitive function in healthy older adults. Poi is a ball attached to a flexible cord which you spin in circles around your body. It was originally used by Māoris to improve dexterity and hand-eye/world flexibility.

“I started practising International Poi (the style practiced outside of Māoridom) 10 years ago in a town called Normal, Illinois. I was enchanted with it from the start, but it wasn’t until I began teaching lessons that I realised how many benefits other people were experiencing as well, everything from better posture to feeling less stressed.

“After years of teaching I realised there was a huge gap between the benefits myself and others were feeling, and the scientific evidence to substantiate it. That’s when I decided to move to New Zealand to conduct the first clinical trial on poi, and include some of the cultural discourse in my dissertation as well. My research aims to prove if poi can improve physical and cognitive function in older adults.

“In my clinical trial I have a whole battery of physical and cognitive tests, including blood pressure, grip strength, balance and cognitive flexibility. I have completed one round with 40 participants, and am in the middle of conducting a second. Preliminary results are showing trends of improvement in upper limb range of motion, manual dexterity, and bimanual coordination, but I won’t know for sure until I complete the second round and combine the results.

“I think poi may be an affordable and fun solution for keeping the mind and body active. Simple and effective strategies for maintaining quality of life in old age are urgently needed, as the ageing population is growing at an unprecedented rate.

“By conducting the first scientific research on poi, I want to pave the way for future poi/health research, and hopefully implement poi in healthcare facilities as a tool to maintain or improve quality of life.”

Kate Riegle van West won the Universitas 21 three minute thesis competition in 2016.

Photo: Boyd Anderson
Study Abroad at the University of Auckland

Spend a summer, a semester or a year at the University of Auckland and earn credits toward your home university qualification.

You can enrol in up to four courses per semester and choose from over 100 subjects including subjects and courses unique to New Zealand, such as Māori Studies and Pacific Studies.

- 2019 fees of NZ$11,950 (approx. US$8,460) per semester

English Language Academy

If you have not yet met the English language requirements for the University of Auckland, the English Language Academy (ELA) offers English programmes that can help you achieve your language goals. The ELA is also an accredited IELTS and PTE Academic testing centre.

Academic pathway programmes

If we have already offered you a place that is conditional on meeting English language requirements, you can fulfil those requirements by successfully completing one of the University of Auckland English Language Academy pathway programmes. If you achieve the required grade, you will meet the University’s English language requirements and will not be required to take IELTS or a similar test.

The ELA’s English pathway programmes are designed to help you prepare for university study. The courses cover note-taking, academic report and essay writing, exam preparation, presentation skills and communication techniques.

Foundation Certificate in English for Academic Purposes (FCEAP) is a 10-week direct-entry pathway to admission to the University of Auckland. You must have a conditional offer of a place and an Academic IELTS score that is 0.5 away from the required score for admission to the University. For example, a programme requiring 6.0 would need no less than 5.5 overall, 5.5 in the writing band and no less than 4.5 in the other bands.

Academic IELTS score that is 1.0 away from the required score for admission to the University. For example, an undergraduate University programme requiring 6.0 would need no less than 5.0 overall, 5.0 in the writing band and no less than 4.5 in the other bands.

Academic IELTS score that is 0.5 away from the required score for admission to the University of Auckland. You must have a conditional offer of a place and an Academic IELTS score that is 0.5 away from the required score for admission to the University. For example, a programme requiring 6.0 would need no less than 5.5 overall, 5.5 in the writing band, and no less than 4.5 in the other bands.

For undergraduates, a PTE Academic test score of no less than 36 overall, 36 in the writing band and 20 in the other bands. For postgraduate, no less than 42 overall, 45 in the writing band and 36 in the other bands.

English Pathway for Undergraduate Studies (EPUS) is a ten-week direct-entry pathway to admission to the University of Auckland. You must have a conditional offer of a place and an Academic IELTS score that is 0.5 away from the required score for admission to the University. For example, a programme requiring 6.0 would need no less than 5.5 overall, 5.5 in the writing band, and no less than 4.5 in the other bands.

English Pathway for Postgraduate Studies (EPPS) is a ten-week direct-entry pathway to admission to the University of Auckland. You must have a conditional offer of a place and an Academic IELTS score that is 0.5 away from the required score for admission to the University. For example, a programme requiring 6.0 would need no less than 5.0 overall, 5.0 in the writing band, and no less than 4.5 in the other bands.

Other programmes

Academic English will equip you with the skills needed to cope with university studies, including note-taking, academic report and essay writing, exam preparation, presentation skills and communication techniques. This full-time course runs in ten-week blocks, and you can choose to focus on either IELTS or university preparation skills. Students can progress from Academic English into IELTS/EPUS.

General English is designed to help you improve your everyday English language skills and is also suitable to prepare you for an Academic English or pathway programme. You can begin the programmes on any Monday, and may study for as long as you wish.

IELTS preparation is an elective course in the Academic English and General English programmes. We also offer four-week evening courses, Saturday morning courses, and writing workshops.

PTE Academic preparation is available as a five-week Saturday morning course.

International

Enhance your skills, academic potential and employability through one of our immersive international opportunities. Come to the University of Auckland and study in a third country to take your education even further.

The University of Auckland has comprehensive relationships with universities and international organisations around the world. 360 International provides access to overseas learning experiences through a diverse, inspiring and attainable set of opportunities.

Further your international study experience with our:
- Semester exchange programme
- Short-term opportunities
- Faculty-led programmes
- Student network programmes and travel grants
- Volunteer placements and internships abroad

Money matters

Most University of Auckland students fund their overseas learning experience through a combination of scholarships, loans, and personal savings.

Tuition fees

Fees vary depending on the type of programme you choose to do. When you go on exchange for one semester, you will be enrolled as a University of Auckland student. This means you will pay tuition fees here, not at the host university. See our website for more information.

Where can I go?

We have hundreds of destinations and institutions in over 30 different countries. You choose!

The University of Auckland has launched an exciting new tool to help you find your perfect overseas programme: Explore your options online and get matched to programmes that suit your degree and personal preferences.

Set up your traveller’s profile and explore our programmes online in the Via TIM system. Find links and more at www.auckland.ac.nz/360.

On campus, you can attend our regular 360 International information sessions:
2pm every Thursday
4pm, Level 4, Student Commons

Marcia Zeng

Marcia is studying for a Bachelor of Science in Psychology at the University of Auckland, and completed part of her degree at the University of British Columbia.

I’ve always wanted a chance to study and experience living overseas, and a 360 International exchange provided a taste of this without the long-term commitment. I suddenly felt a bit more grown up and found that it would be easy for me to complete part of my degree on exchange.

I absolutely loved Canada! It was such a cool experience to live on a massive campus and experience a new kind of university life. Going on exchange also allowed me the opportunity to meet people from all over the globe and get to travel around, both during semester and afterwards.

My advice to anyone considering undertaking an overseas study component as part of their degree is DO IT, DO IT, DO IT! Get out there and make the most of this once in a lifetime experience. Step outside your comfort zone, immerse yourself in the culture and have no regrets!
Entry requirements

We welcome applications from international students with New Zealand or overseas qualifications.

**English language proficiency**

If you are an international applicant and your first language is not English, you will need to provide evidence of your English language proficiency. You can demonstrate this by achieving the required score in an approved English language test, such as IELTS, or successfully completing an ELA pathway programme.

All test results are valid for two years from the date on the test certificate and all English language requirements must be met within one test certificate.

The table below shows the minimum scores for admission to the University. However, some of our undergraduate and postgraduate programmes have higher requirements.

For more information about undergraduate English language requirements, www.auckland.ac.nz/ug-english-reqs

For more information about postgraduate English language requirements, www.auckland.ac.nz/pg-english-reqs

International students studying at New Zealand secondary schools

To be admitted to the University of Auckland you must achieve the New Zealand University Entrance (UE) standard and meet the entry requirements for the undergraduate programme you wish to pursue.

If you have National Certificate of Educational Achievement (NCEA), University of Cambridge International Examinations (CIE), or International Baccalaureate (IB) qualifications, you will be given a rank score.

The entry requirements for your programme will be expressed as the rank score you need to achieve in either NCEA, CIE or IB to guarantee you entry. Applicants with scores below these will still be considered, provided places are available. Some programmes will also require you to have taken specific subjects and gained minimum credits in those, or have other requirements such as a portfolio, audition or interview. www.auckland.ac.nz/entry-requirements

**English language requirements**

If you are entering the University on the basis of NCEA, CIE (NZ) or IB qualifications, you must meet the New Zealand University Entrance (UE) standard literacy requirements for admission. International applicants entering the University on the basis of qualifications other than NCEA, CIE or IB taken in New Zealand must meet a specified score in IELTS or an alternative approved English test, or must have completed and passed the Foundation Certificate in English for Academic Purposes (FCertEAP), the English Pathway for Undergraduate Studies (EPUS), the English Pathway for Postgraduate Studies (EPPP), or an approved alternative.

Some programmes may also require you to demonstrate your proficiency in English at a selection interview.

If you are applying for a Faculty of Education teaching programme, you must achieve an IELTS score of 7.0, in addition to NCEA, CIE or IB requirements.
International students outside New Zealand

If you are an international student, you must meet University Entrance, individual programme and English language requirements.

Academic entry requirements are based on the grades you achieved in your prior study. Some programmes also require you to have taken specific subjects or have other requirements such as a portfolio, audition, interview or proven research capability.

Entry into a bachelor's degree

You must meet the equivalent of the New Zealand University Entrance (UE) standard (the minimum standard for admission to New Zealand universities) as well as the entry requirements and undergraduate English language requirements for the programme you wish to study. These are listed on our website. If you have completed a qualification not listed on our website, we will assess your application on its merits.

Entry into a bachelor's (honours) degree

You need to have completed an undergraduate degree from a recognised university, in a related subject area, with the required grade point equivalent (GPE). Exceptions are the BE(mons) and the BSc(Health). See our website for more information, including the specific entry requirements for your chosen programme(s).

Entry into a postgraduate diploma

Entry requirements vary according to your chosen subject area. You will need to have completed an undergraduate degree from a recognised university, in a related subject area, with the required GPE. Some programmes will require a higher GPE. See our website for more information, including the specific entry requirements for your chosen programme(s).

Entry into a masters degree

To enter a 120-point (one-year) masters programme, you must have completed one year of postgraduate study, following an undergraduate degree, in a related subject area at a recognised university, with the required GPE. The entry requirements for a 180-point or 240-point masters vary according to the subject area of your specialisation. Usually, you must have completed a bachelor's degree (or equivalent) in a related subject area at a recognised university, with the required grade point equivalent (GPE).

Entry into a Doctor of Philosophy (PhD)

Entry into a PhD is based on academic merit. You should also possess high-level critical research skills and theoretical understanding. You must be able to demonstrate an ability to carry out independent research and have already completed a significant research project, dissertation, or thesis, at university.

You will need to have completed a masters-level qualification in a field related to your doctoral studies with the required grade point equivalent (GPE).

Your acceptance is also dependent on the availability of the appropriate supervisor and facilities for your area of study.

The graduate adviser in the faculty or department in which you wish to study will be able to assist you and provide more information.

Calculating your GPA/GPE

Grades or marks achieved at the University of Auckland are given a Grade Point Average (GPA). Grades or marks achieved through prior study at other institutions are converted into a Grade Point Equivalent (GPE) at the University of Auckland.

To convert your grades into a GPE, use our GPA Calculator: www.gpacalculator.auckland.ac.nz

*The online calculator provides an indicative guide only and does not guarantee a place to study at the University.

For further information on entry requirements, please see www.auckland.ac.nz/fo-entry

New Zealand secondary school

New Zealand schools have an excellent reputation for their teaching quality and academic facilities. Pastoral care for international students often includes home-stay accommodation with a family.

Most schools offer the National Certificate of Educational Achievement (NCEA), and some offer the internationally recognised University of Cambridge International Examinations (CIE) or International Baccalaureate (IB). The University of Auckland recognises all of these qualifications.

Our entry requirements for students who have completed NCEA, CIE (taken in New Zealand) or IB qualifications are the same for both New Zealand domestic students and international students.

Foundation programme

If your secondary school qualifications do not meet our entry requirements, a foundation programme can be an alternative entry pathway into a bachelor's degree.

Foundation programmes are suitable for both native English speakers and speakers of English as a second language. They prepare you for university education with skills in:

- Critical and independent thinking
- Computer use and research
- Essential subject knowledge, such as accounting, calculus, chemistry, computer science, design, economics, English, geography, physics and statistics

Two foundation programmes are taught on behalf of the University:

1. The University of Auckland Certificate in Foundation Studies, taught by ACG New Zealand International College
2. Auckland Foundation Year, taught by Taylors College, Auckland

If you complete one of these two foundation programmes with good grades, you will be guaranteed entry into a University of Auckland bachelor's degree programme if you meet the following requirements:

- The minimum overall foundation course average score for your chosen undergraduate degree programme
- English language proficiency at a level equivalent to the International English Language Testing System (IELTS) of at least 6.0 overall, with no band below 5.5. Please note that some programmes may require higher scores.

You must also meet any additional entry requirements for your programme(s) of study, such as an interview, audition or portfolio.

Pathways to undergraduate study

ACG Pathways
ACG Pathways Campus, 345 Queen Street, Auckland City

Prior tertiary study

If you have started or completed tertiary study outside New Zealand, and want to study for a bachelor’s degree, you can transfer from a New Zealand or overseas tertiary institution to the University of Auckland. Your overseas qualification(s) must be approved for University admission, and you must also meet the entry requirements and undergraduate English language requirements for your programme.

You can apply for transfer of credit for tertiary courses completed elsewhere in your Application for Admission.

For more information, please visit www.acgedu.com/university/transfer-credit.
Accommodation

Our accommodation provides a safe, comfortable and supportive environment in quality, fully-catered or self-catered residences. All are within easy walking distance of the City Campus, as well as many of Auckland’s main attractions. Benefits include internet access and fully-catered or self-catered residences. All are within easy walking distance of the City Campus.

Accommodation

- University residences*
  - University Hall – Towers
  - University Hall – Apartments
  - UniLodge Whitaker
  - Wadilonghu Halls
  - Grafton Hall
  - University Hall – Tennyson
  - Whitaker Hall

PG = Postgraduate  |  FC = Fully catered  |  SC = Self-catered  |  PC = Partially catered

Applications dates

Applications for Semester One 2019 open on 1 August 2018.

Applications for Semester Two 2019 open on 1 April 2019.

You should apply for accommodation at the same time you apply for your academic programme to have the best chance of getting a place in a residence. Please note that later applications may not be successful.

Couples and family accommodation at the University is limited, especially for those applying outside of the standard academic year. We encourage those applying in Semester Two or between February and November to contact our Accommodation team, who can assist you in finding suitable accommodation that best fits your needs.

Apply online at www.accommodation.ac.nz

Private accommodation**

If living in a university residence isn’t for you, we can assist you with finding suitable private accommodation in Auckland.

Before you arrive in Auckland, we encourage you to read our e-Book, Living In Auckland – A Student’s Guide, which is full of helpful information about locations, rental agreements, and the cost of living. This guide is available at www.auckland.ac.nz/living-in-auckland-ebook.

We suggest you reserve temporary accommodation for your first few weeks in Auckland to allow time to familiarise yourself with the city, its surrounding suburbs and where you want to live.

Home-stays – In a homestay you live with a family and have your own room. Meals and other services are provided. Please note that host homes are generally not close to the campus.

Private student accommodation and private residences – Our advisory service can assist you with information about student accommodation options near the campus.

Flattting – You share a house or flat with other residents and are responsible for paying the bills according to the details in the tenancy agreement.

All prices quoted are per week and reflect 2018 prices; they are subject to change for 2019. Discounted rates are available for students staying for a 12-week period or various self-catered residences. During the summer from mid-November to mid-February, you can stay in the halls of residence or the self-catered residences at special summer rates. For more information, please refer to the Accommodation website: www.accommodation.ac.nz.

**We do not inspect or in any way guarantee the quality or availability of private accommodation. Do not under any circumstances sign agreements or pay deposits for any properties you have not seen. If in doubt, contact our external accommodation advice.
English Language for university study

The University offers free services to help you improve your English language skills while you study. To find out more, visit www.library.auckland.ac.nz/ele.

Academic English Studies

Academic English Studies offers courses in English Language Enrichment (ELE), which provides opportunities for any student enrolled at the university of Auckland to improve their English language skills. ELE online courses can be used to improve academic English. At ELE online, you can use English language resources, get advice about your English, join language-learning groups and find language exchange partners.

Personal support

Meet and greet

The International Office provides a free airport transfer service for all international students arriving in Auckland. This is a great way to avoid the stress of finding your own way to your accommodation. We will meet you and give you information to help you settle in to life in Auckland. A web link for this service is included in your offer of admission email.

Orientation

The International Office arranges an Orientation programme for all new international students arriving in Auckland. The Orientation is designed to welcome you and give you all the information you need about studying at the University and have the opportunity to meet new people and make friends at a range of social and cultural activities.

University Health and Counselling Service

If you have any health concerns during your time at the University, the University offers a comprehensive service to support you so that you can successfully complete your degree. These services are here to support you so that you can successfully transition into work after you have completed your studies. Some costs may be charged to international students. These would be negotiated on a case-by-case basis.

Student services and support

Academic support

Libraries and Learning Services

Libraries and Learning Services provide resources, workshops and advice to help you successfully complete your study. In addition to the General Library, a number of specialist libraries cover the variety of subjects taught at the University. Your student online access allows you to search a diverse collection of electronic resources, including databases, e-journals and e-books, accessible anytime from anywhere. Within the libraries, you can access large collections of print, multimedia and microsound materials, including unique manuscript and archive collections.

We offer workshops to improve your academic skills, covering topics such as writing skills, finding course readings and articles, referencing, exam preparation, literature searching, presentation skills and thinking critically. Speak to a Learning Adviser or Subject Librarian to get advice on improving your academic skills and finding information for your assignments.

Libraries and Information Commons (IC) facilities provide more than 4,000 study spaces, many with computer connections and access to printers, scanners and photocopiers. IC Helpdesks provide support for student computing resources and services including student email, internet access, the wireless network and student file storage.

English language for university study

The University offers free services to help you improve your English language skills while you study. To find out more, visit www.library.auckland.ac.nz/ele.

Diagnostic English Language Needs Assessment (DELNA)

The DELNA Programme is designed to help students who may need to improve their academic language skills in order to succeed in their studies.

DELNA is a free check of your academic English language skills. Your results will not exclude you from courses you are already enrolled in and will not appear on your official academic record. Students begin with the DELNA Screening, which takes less than 30 minutes.

Depending on your results, you may be asked to follow the Screening with the two-hour DELNA Diagnosis, which consists of reading, listening, and writing tasks. After the Diagnosis, you will receive individual advice about the options available to enrich your academic language ability.

Student Disability Services

Student Disability Services provides a range of services, including assessment of support needs, support with academic reading, writing and mathematics, and special arrangements for tests and exams, if required.

Careers Services

Careers Development and Employability Services

Our award-winning Career Development and Employability Services (CDES) have a designated International Career Development Consultant who is responsible for providing specialised services tailored to meet your career and employability needs. These services are here to support you so that you can successfully transition into work after you have completed your studies. Special events include career expos, recruitment events, networking opportunities, workshops and employer presentations to help you to engage with employers and understand the New Zealand job market.

CDES online tools, workshops, events, job board and personalised services can assist you to identify the opportunities available to you while providing you with the knowledge, understanding and skills to help you to be competitive in the New Zealand job market.

Go to page 40 to learn more about career development.

www.cdes.auckland.ac.nz

Spirituality

Spirituality provides language-learning opportunities. Places of worship available on campus include a Christian chapel and Muslim prayer room. Nearby there are numerous churches, as well as a Hindu temple, a mosque and a temple.

Childcare

Childcare services are in demand, so apply early. The University is committed to providing a child-friendly study space in Old Choral Hall. Dedicated parent spaces provide flexible childcare for parents and caretakers.

Student Leadership Programme

The Student Leadership Programme is for all students to engage with current thinking about leadership and expand their own personal leadership behaviours. There are various ways to get involved, from half-day workshops to interactive and team-building events.

www.auckland.ac.nz/leadership

International student support staff

We provide a counselling service that can help you get back on track if you feel things are becoming too difficult to manage on your own. We offer brief therapy, daily duty slots for urgent counselling, group sessions, academic consultations and a number of online resources.

Career Development and Employability Services

Our award-winning Career Development and Employability Services (CDES) have a designated International Career Development Consultant who is responsible for providing specialised services tailored to meet your career and employability needs. These services are here to support you so that you can successfully transition into work after you have completed your studies. Volunteer Hub

Volunteering is a great way to make friends, get to know the city and gain new skills and experience. The volunteer hub provides the opportunity to volunteer for a wide range of organisations and community projects. You can also get official University recognition for your volunteering activities on your transcript.

www.auckland.ac.nz/volunteer

International student support staff

Being away from home is a challenge in itself. To assist you, the University has facilities and extensive support for international students, whatever your background or needs. Our team of international student support staff is available to help you with a range of issues, including study advice, immigration, health, financial advice, accommodation and personal support. There is also a 24/7 emergency number available if you urgently need to contact our staff, at any time of the day or night.

www.auckland.ac.nz/student-support-and-services

Recreation and sports

The University Recreation Centre at City Campus has a great range of facilities including a sports hall, extensive cardio and weights gym, bouldering wall, squash court, and spin and stretch studios. We also provide a women only space. There are regular group fitness, yoga and dance classes each week. If you are into sport, you can drop in and play, join a social league, or compete against other universities. Whatever your interests, there are plenty of opportunities to get fit, play sport and have fun.

Building a rewarding career

The University is among the top in the world for producing graduates who are highly employable.¹ The award-winning Career Development and Employability Services team can help students take steps towards building a rewarding international career.²

Career Development and Employability Services (CDES)

CDES assists students at the University and recent graduates with all aspects of career development from day one at University and up to three years after graduation. It is important to think about life after study. CDES helps students find direction and develop the skills required to be employable at the end of study. CDES also works with students to help them advance their capabilities to successfully self-manage and navigate the world of work, life and learning.

The services offered can help students identify opportunities, meet and network with employers and help them take steps to establish a rewarding career. MyCDES is an online career management system that features an international job board, resources and bookings for workshops, events, and appointments with Career Development Consultants.

www.cdes.auckland.ac.nz

Understanding the New Zealand job market

CDES runs workshops and employability programmes specifically designed for international students with a specialised International Career Development Consultant.

University of Auckland Workplace Insights programme

CDES runs a programme where selected international students are paired with alumni, who help current students understand cultural settings and expectations from employers in New Zealand. The selected students are also given the opportunity to visit the workplaces of their alumni to learn more about New Zealand work culture. The aim is to enable students to make informed decisions from early on in their study experience.

Career and networking events

Over 100 employers, both global and local, connected with students through CDES in 2017. Almost 20,000 students attended student expos and recruitment events.

CDES’ career events, such as large industry expos, recruitment events and career education events, allow students to connect with New Zealand and international employers, learn about different organisations, and make important connections.

Our suite of workshops

CDES also offers a suite of workshops that cover:
- Finding a job
- Career direction
- CV writing
- Cover letters
- Networking
- Using LinkedIn effectively

Norman Yap

Norman is a 2017 graduate of the Masters Programme of Professional Studies in Data Science. He currently works for Datashaika in Indonesia.

“Datashaika (datashaika.com) is a data analytics company based in Jakarta, Indonesia, serving clients internationally. It was conceived as the University with three data science courses. Our mission is to help organisations rekindle the value hidden in their data using best-in-class data science and machine learning techniques.

“In my time at the University of Auckland, I met my Datahaka co-founders and worked with Datahika, a data analytics start-up serving the cultural institutions sector. I received an R&D Student Fellowship grant from Callaghan Innovation, which enabled me to complete my research project. This significantly advanced Datahika’s insight intelligence and will help museums around the world predict and prepare for their visiting public.

“Studying at the University of Auckland helped me get out of my comfort zone and forge new networks. Come to New Zealand with an open mind and mingle outside your community. You’ll be surprised at how much more you learn and the new experiences you gain.”

Joey He

Joey comes from China and graduated with a Master of Professional Accounting in 2017. She is currently working as an accountant at UBT Accountants New Zealand Limited.

“My passion has always been technology. After graduation, I would like to become a software developer or take on an IT-related role. Currently, I am interning at Datacom as a software developer. We work closely with clients to mitigate risks and ensure the success of their IT systems. Solving challenging problems for clients and seeing how our solutions help their businesses operate is greatly satisfying.

“Finding a job can be challenging. It took practice and perseverance in writing my CV and applying for internships, but I attended a couple of CDES workshops – interview practice and CV writing – both of which were very helpful. Sometimes finding where to start is the hardest part.

“My University of Auckland network is definitely important for my career – some of my University colleagues are interning with me over the summer. In the future, I hope to work on an emerging new technology that revolutionises our lives, or I found a tech start-up and travel the world!

“Being an international student in New Zealand can feel challenging, but the journey is never dull. Studying at the University of Auckland has opened my eyes to a whole new world. On top of the technical skills I learned, being involved with student communities, clubs, and leadership programmes has taught me soft skills and introduced me to many lifelong friends.”

Paul Tanchareon

Paul is from Thailand and is studying towards a Bachelor of Science, majoring in Computer Science and Information Systems. Paul is currently an intern at Datacom and in 2017 was a brand ambassador for Niesh – a successful start-up company created by University of Auckland students.

“My passion has always been technology. After graduation, I would like to become a software developer or take on an IT-related role. Currently, I am interning at Datacom as a software developer. We work closely with clients to mitigate risks and ensure the success of their IT systems. "I did not expect I could get the scholarship. I applied for university thinking I’d use all my all savings from my years of working life. Fortunately, I got this valuable chance."
Postgraduate scholarships
University of Auckland International Scholarships: Worth up to NZ$10,000 for new international students who have received an unconditional offer of study, or English Language Academy (ELA) students who have received a conditional offer, to undertake a postgraduate diploma or masters (taught) programme of 120 points or more.

University of Auckland International Business Masters Scholarships: Worth up to NZ$10,000 for international students applying to the Master of Management, Master of International Business, or Master of Professional Accounting.

AUEA Brathwaite-Thompson Graduate Research Awards: Up to NZ$10,000 for an international student undertaking a Master of Engineering, a Master of Operations Research, or a PhD in Engineering.

Beatrice Ratcliffe Postgraduate Scholarship in Music: Worth up to NZ$10,000 for a student undertaking postgraduate study in the School of Music.

Colombo Plan Scholarship in Engineering: Worth NZ$1,000, this scholarship is funded by alumni of the Faculty of Engineering who studied at the University of Auckland under the Colombo Plan. Applications are open to undergraduate and postgraduate international students who are citizens of a Colombo Plan member country.

Education and Social Work Postgraduate International Student Scholarships: The main purpose of the scholarship is to support international students to enrol into a specified postgraduate programme at the Faculty of Education and Social Work, and successfully establish themselves in Auckland. Provides assistance with fees up to NZ$3,500.

Faculty of Arts International Masters Degree Scholarships: Open to international applicants who enrol in a master’s degree in the Faculty of Arts and worth up to NZ$10,000.

Faculty of Creative Arts and Industries International Masters Scholarships: For international students of high calibre to enrol in master’s level study. Open for up to five years for an international student, who is a citizen of Vietnam, undertaking masters or PhD study in the Faculty of Engineering.

Doctoral scholarships
University of Auckland Doctoral Scholarships: The University awards up to 200 University of Auckland Doctoral Scholarships to high-achieving doctoral candidates applying for admission to approved doctoral programmes each year. Doctoral stipends are increased to NZ$27,600 in 2018.

New Zealand International Doctoral Research Scholarships: Funded by the New Zealand government, these scholarships are open to international PhD candidates.

Dean’s International Doctoral Scholarship (Faculty of Medical and Health Sciences): Covers tuition fees, relocation allowance, and a stipend for an international student to undertake a research doctoral degree in the Faculty of Medical and Health Sciences.

Marie Clay Literacy Trust Research Scholarships: Worth up to NZ$10,000 per year for up to two years, to fund a doctoral student to undertake research into literacy education in the New Zealand context.

University of Auckland Fullbright Scholarship: Awarded to PhD candidates already selected to hold Fulbright Awards, to enable them to complete degrees at the University of Auckland.

University of Auckland Health Research Doctoral Scholarships: Cover tuition fees and a stipend for academically excellent applicants to study in a health-related area in the Faculty of Medical and Health Sciences.

University of Auckland Law School’s Dean’s Doctoral Scholarships: Cover tuition fees and a stipend for academically excellent applicants to study in a health-related area in the Faculty of Medical and Health Sciences.

University of Auckland Senior Health Research Scholarships: These scholarships are open to international students who have worked for at least three years as health professionals (such as medical graduates, clinical psychologists, nurses and other clinical researchers), who wish to study at doctoral level in a health-related area.

Development scholarships
New Zealand Aid Programme: The New Zealand government provides a number of scholarships through the New Zealand Aid Programme. The aim of development scholarships is to provide an opportunity for students from selected developing countries to study in New Zealand. On completion of their programmes, students are expected to return and contribute to their economic and social development of their home countries.

New Zealand ASEAN Scholar Awards: For postgraduate applicants from Cambodia, Indonesia, Laos, Malaysia, Myanmar, Philippines, Thailand and Vietnam.

New Zealand Commonwealth Scholarships: For masters or PhD applicants from selected developing Commonwealth countries in Africa, the Caribbean, Asia and the Pacific.

New Zealand Development Scholarships: For postgraduate or PhD candidates from selected developing countries in Africa, Asia, Latin America and the Caribbean.

New Zealand’s Asia-Pacific Scholarships: For applicants from eligible Pacific Island nations. Available for both undergraduate and postgraduate study in New Zealand.

Other development scholarships
Asian Development Bank (ADB) - Japan Scholarship Programme: Funded by the government of Japan, these scholarships aim to provide an opportunity for well-qualified citizens of ADB’s developing member countries to undertake postgraduate studies in economics, management, science and technology, and other development-related fields.

Student visas
You must apply for a student visa to cover the period you intend to study in New Zealand. You must show evidence you have been accepted into a programme, paid your tuition fees and have sufficient funds to cover your living costs while in New Zealand. You must apply for your student visa before entering New Zealand. Full details on the necessary living requirements are available through Immigration New Zealand.

www.immigration.govt.nz

Eligibility for health services
Most international students are not entitled to publicly-funded health services while in New Zealand. If you receive medical treatment during your visit, you may be liable for the full costs of that treatment if you do not have health insurance. Full details are available through the Ministry of Health.

www.health.govt.nz

Health and travel insurance
All international students are legally required to have appropriate health and travel insurance. The University of Auckland’s recommended policy is StudentSafe Inbound University, a scheme that meets New Zealand government requirements. When you enrol you will automatically be covered by StudentSafe Inbound University, and the insurance premium will be added to your student account. You will receive details with your offer of admission letter from the University.

www.auckland.ac.nz/is-insurance

Accident insurance
The Accident Compensation Corporation (ACC) provides accident insurance for all New Zealand citizens, residents and temporary visitors to New Zealand. But you may still be liable for other medical and related costs.

www.acc.co.nz

Employment
If you are enrolled in a research masters or a doctoral programme you will be eligible for unlimited work rights. Under certain circumstances, other student visa holders may work part-time or full time (during scheduled University vacations) or to meet course requirements for practical work experience. You should refer to the Immigration New Zealand website for up-to-date information on career advice for obtaining any variation of the conditions of your student visa.

Living costs
Generally you should allow approximately NZ$26,000–$35,000 per year (or NZ$61,00–$675 per week) for general living costs, including accommodation, food and transport. Our International Student Support staff are available to assist you with budgeting advice if necessary.

For more information on University of Auckland scholarships, please go to www.auckland.ac.nz/is-scholarships
The University of Auckland calculates fees according to the courses you take within your degree or diploma programme. Fees vary between faculties, and sometimes within a faculty. The tables below give the estimated annual tuition fee based on enrolment in 110 points.

www.auckland.ac.nz/studentfees

You are also required to pay a student services fee. This is calculated on a per point basis. The student services fee for 2019 will be set later in the year. As a guide, the student services fee for 2018 was calculated as NZ$28.7 per point (GST inclusive).

Expect to pay about NZ$1,200 per year for books and stationery. Some fees may be charged at a per point basis. The student services fee for 2019 will be set later in the year. As a guide, the student services fee for 2018 was calculated as NZ$28.7 per point (GST inclusive).

Flat tuition fee 2019 (Includes student services fee.)

Once payment is received by the University, you can generate a receipt.

Pay your first year’s tuition fees by electronic funds transfer, bank draft or credit card.

www.studentservices.auckland.ac.nz

We'll also send you a Student ID number. You can use this to sign in to your Application for Admission, check your application status and see what documentation you need to provide.

Attention students: If your application is successful, we'll email you an offer of place in your programme. Your offer will include a fee estimate.

Bachelors degree: Three years full-time for most programmes. Some clinical programmes take four to six years. Usually the initial programme of study a student completes at university.

Bachelors (honours) degree: Usually one year full-time, once you have completed your bachelors degree. In the following degrees, you can incorporate your honours year into a four-year bachelors programme: Engineering, Fine Arts, Law, Social Work, and Urban Planning. Your study will include a research dissertation or research project. A bachelors (honours) degree can be an entry pathway into a one-year masters degree or a doctoral programme.

Conjoint bachelors degree: Four to six years full-time, depending on the programme. Conjoint programmes allow you to pursue two undergraduate degrees at the same time, giving you the opportunity to develop a wider knowledge base and broaden your career opportunities in a shorter timeframe than completing two degrees separately.

Course: A specific topic of study within a subject. For undergraduate study, most are taught and assessed over one semester and are typically worth 15 points.

Doctor of Philosophy (PhD): Three to four years full-time. The PhD is an advanced research-based degree for students who intend to pursue an academic or research career.

Graduate diploma: Usually one year full-time, once you have completed your bachelors degree. You can specialise further or gain expertise in a new subject. A graduate diploma can be an entry pathway into postgraduate study.

Major: A required core component of an undergraduate degree including a specified number of points at an advanced level.

Masters degree: One to two years full-time. The length of the degree will depend on the level and specialisation of your prior study. Masters degrees at the University of Auckland can be wholly research (a “research masters”), coursework-only (“a taught masters”), or a combination of research and coursework. Most masters degrees will advance you in your existing area of study. However, some University of Auckland masters programmes will also allow you to move into a different field.

Minor: A component of a degree including a specified number of points above stage I in a subject. A minor has fewer compulsory courses and points to fulfil than a major.

Named doctorates: Three to four years full-time. The University of Auckland offers named doctorates in some subject areas. Acceptance into these programmes is based on academic merit, and in general requires a masters degree with a high level of honours, or equivalent.

Postgraduate certificate: A one-semester, full-time programme offered by certain faculties in a specific area.

Postgraduate diploma: One year full-time. A postgraduate diploma is the same level of study as the honours year in a bachelors (honours) degree. It is primarily a taught programme, but your study can include a research project. A postgraduate diploma can be an entry pathway into a one-year masters degree.

Programme: A prescribed set of courses or other work (meeting a required number of points) which on satisfactory completion leads to the award of a University of Auckland certificate, diploma or degree.

Stage: The academic level of a subject. Most undergraduate subjects have three stages (I introductory, II intermediate, III advanced).

Study Abroad: One to two semesters. This programme allows students who are currently studying at overseas tertiary institutions to enrol in courses at the University of Auckland and earn credit towards their home university qualification.

Subject: An area of learning provided by a school or a disciplinary area, or by disciplinary areas offering related courses.

Glossary

Study Abroad: Allow you to move into a different field.
