

### How do scientists find out about the health and wellbeing of people?

**TASK:** Your teacher will assign you with **ONE** population study to summarise.

1. Read the story about the population study from the student book.
2. Read the QUESTIONS.
3. Watch the video about this study and re-read the story.
4. NOW you should be ready to answer the questions!

#### Population Studies: How do scientists around the world learn about health and wellbeing?

1. What is the name of the study or survey?	
2. Which country is it from?	
3. What is the name of one of the researchers working on the study?	
4. What age are the people who are being surveyed?	
5. How many people are part of the survey or study?	
6. Do the researchers talk to the people just once or more than once?	
7. What sort of information are the researchers collecting?	
8. What are the researchers hoping to find out from the survey?	
9. If you were on the research team, what is one other question you would ask and WHY?
