

MRS GREN reminds us that all plants and animals...

Move

Reproduce (make new plants and animals)

Sense what is around them

Grow

Respire (get energy from food)

Excrete (get rid of wastes)

Need Food (Nutrients) (or make food to use)

TASK 2

The MRS GREN processes happen differently in different plants and animals; e.g. fish swim, birds fly, dogs walk, ...

1. Choose ONE process from this list:

MOVE or **REPRODUCE** or **SENSE**

2. Think of the DIFFERENT ways the plants and animals in the photos do this activity. **List your ideas on a sheet of paper.**

3. Find a group that has chosen a different process to you.

4. Share your groups ideas with that group.

5. Work together to design a table to record what you have found out. You can cut out the pictures and use them in your report.
