

LENScience I Love My Heart

WORKSHEET 3

Structure of the mighty pump

So..... the heart is a great pump but what does it look like?

- A women's heart weighs about 227g and a man's about 280g
- **Your** heart is about the size of a fist – and an **adult's** heart is the size of 2 fists
- The heart is divided into 2 halves- each of these has 2 chambers.
- The left side is deoxygenated (blue) and the left side is oxygenated (red)

Remember to label as the heart it is in your body!

It helps to put labels on the top of the diagram

| <u>RIGHT SIDE</u> | <u>LEFT SIDE</u> |
|-------------------|------------------|
| RIGHT ATRIUM | LEFT ATRIUM |
| RIGHT VENTRICLE | LEFT VENTRICLE |

Use this diagram to label the chambers
of this heart
