

LENScience Senior Biology Seminar Series

Student Update Number 13 – September 22nd 2009

In this issue:

- ✘ Seminar 6—Challenges
- ✘ Seminar 7—Resources
- ✘ LENSscience on Twitter

Seminar 6 Challenges

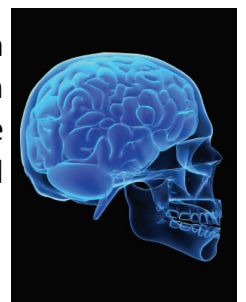

If you have not been keeping up—take a look at the great discussion going on around challenge 6.

A huge thank you to Horowhenua College and Alfriston College for their valuable contributions.

If you have not tried creating your own answers—have a go and compare your work to these ones.

Seminar 7 - Human Evolution

Seminar 7 is all about Human Evolution. If you have not covered Human Evolution at school yet, it would be a good idea to read through the Human Evolution chapter of your text book in advance. The seminar will focus on the development of bipedalism and intelligence in humans and explore the central concepts of evolutionary fitness, adaptive advantage and adaptive cost.
