

## LENScience Senior Biology Seminar Series

### Student Update Number 7 – July 20<sup>th</sup> 2009

#### In this issue:

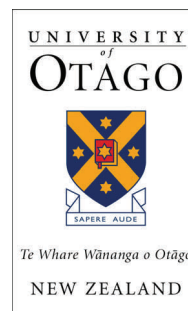

- ✗ Seminar 4—Secrets in the Seaweed!
- ✗ What's happening in your school?
- ✗ Wiki Challenge—how did they do?

#### Seminar 4—Secrets in the Seaweed

Follow the journey of PhD student Ceridwen Fraser who spent three years investigating Kelp populations in Sub-Antarctic islands and found information that helps understanding of climate change. Crid's work is of major interest with many non-scientific news media reporting this finding. The challenge question for this seminar asks you to analyse Crid's data yourselves—put yourselves to the test!

Post your questions for Crid and the team this week

#### What's happening in your school?

We STILL want to know what's happening in your school. Are you sitting round a TV or have you got a big screen. Are you in the library, your teachers office, the classroom, the com????? Have you made the news in your school newspaper, website, local paper? Send in your photos and tell us what you are doing.

#### Wiki Challenge

Thanks to Horowhenua College for offering some excellent postings on the wiki. Definitely top school this month!

Well done sacred Heart Lower Hutt— what happened to Auckland and Hamilton?
