This map shows the relative frequencies of words in the publication titles listed below (1966-Nov. 2017), with “New Zealand” removed (otherwise it dominates), and variants of stem words and taxonomic synonyms amalgamated (e.g., ecology/ecological, *Chrysophrys/Pagrus*). It was created using Jonathan Feinberg’s utility at www.wordle.net.

In press

McArley, T.J., Hickey, A.J.R., Wallace, L., Kunzmann, A., Herbert, N.A. Intertidal triplefin fishes have a lower critical oxygen tension (P_{cr}) and higher tissue glycogen stores than their subtidal counterparts. Journal of Comparative Physiology B: Biochemical, Systemic, and Environmental Physiology.
