

Sibley, C. G. (2015). Sample Counts by Meshblock Area Unit. NZAVS Technical Documents, e17.

This technical document is an SPSS file (.SAV) containing the frequency count of participants sampled at the meshblock level for all meshblocks in New Zealand. Counts are provided for the first five waves of the NZAVS. Higher-level area units are also included in the datafile. These data thus summarize the broad geographic distribution of the NZAVS sample from Waves 1-5.

Variable Name	Variable Description
MB_2013	Meshblock 2013 code
T1_Count	N sampled per meshblock at Time 1
T2_Count	N sampled per meshblock at Time 2
T3_Count	N sampled per meshblock at Time 3
T4_Count	N sampled per meshblock at Time 4
T5_Count	N sampled per meshblock at Time 5
AU_2013	Area unit 2013 code
UA_2013	Urban area 2013 v2 code
TA_2013	Territorial authority 2013 code
WARD_2013	Ward 2013 code
CB_2013	Community board 2013 code
REGC_2013	Regional council 2013 code
CON_2013	Regional council constituency 2013 code
GED_2007	General electoral district 2007 code
MED_2007	Māori electoral district 2007 code
DHB_code	District health board code
